

Data sheet

HP Thin Client Family

Enjoy rich multimedia performance, enterprise level data security, simplified management, and lower costs with HP Thin Clients.

Monitor, keyboard, mouse, and integrated work center stand are sold separately

HP Zero Clients

Zero in on a better VMware client.

HP Zero Clients are designed for VMware environments with the latest PCoIP technology ideal for graphics-intensive applications that need workstation-like performance and support for dual monitors.¹ No operating system or moving parts mean HP Zero clients require zero management. Deployment is simple and viruses are history. As HP's most secure endpoints, HP Zero Clients keep your data safe in the datacenter—only pixels are transferred. Hardware USB authorization and fiber NIC² add extra layers of security. Designed for fast PCoIP, Amazon Workspace and VMware, HP Zero Clients are an ultra-low-cost-per-seat solution with ultra performance and reliability.

HP Thin Clients

Customise your level of performance, security and manageability.

Pair the thin client desktop form factor of your choice with the operating system of your choice, including Linux-based **HP Smart Zero Core** and **HP ThinPro**, or **Windows Embedded**. Choose the AMD processing power that matches your productivity needs, whether it's for mission-critical multimedia access, or everyday task-based demands. Support your growth with expansion options and legacy ports, choose native support for up to four digital displays, and maintain network adaptability with wired-in ethernet and Wi-Fi options. Get a cloud-ready and VDI-optimised thin client that's tested and certified for today's top ISV providers, including Citrix, VMware and Microsoft.

HP Mobile Thin Clients

Ultimate cloud convenience.

Mobile cloud computing is easier and more flexible than ever with HP Mobile Thin Clients. Employees can get the job done from just about anywhere thanks to professional cloud and VDI-optimised features with critical user and management software built right in. Windows-based programs and tools make it easy for everyone to log in and get to work with familiar tools and programs. No training required.

Operating Systems and Software

HP ThinPro OS

More flexibility. More freedom.

Get the highest customisation per user with HP ThinPro—featuring a new, simplified graphical user interface. Customise properties, rich graphics, terminal emulation connections, and permissions. Print locally and enable concurrent virtualisation sessions. Create multiple experiences and roll back to previous configurations with “snapshot” restore points. Switch between HP ThinPro and HP Smart Zero, or customise your own experience—all from one centralised interface.

For more information go to hp.com/go/thinpro

HP Smart Zero Core OS

The smarter zero client.

Configure it and forget it. It's that easy with the smarter HP Zero Client experience provided by HP Smart Zero Core technology. Everyone wins with an easy-to-navigate ecosystem for end users and simple setup and maintenance for IT that doesn't require specialised administrative support. Switch between HP Smart Zero and HP ThinPro, or customise your own experience—all from one centralised interface.

HP and Windows Embedded OS

A familiar interface.

Work efficiently with Windows Embedded, the thin client operating system you're already well-acquainted with. Reduce the cost of training and tools and make maintenance and roll-outs a breeze. Help prevent unauthorised updates and viruses with an integrated Write Filter. Take advantage of broad-range support for peripherals, drivers, and applications.

HP Device Manager

Making your life easy to manage.

HPDM provides full life cycle management for HP Thin Clients; from initial discovery, deployment and configuration to maintenance and EOL of product. IT administrators can control and make decisions about their IT resources locally or remotely with HPDM which provides detailed asset information through a simple console “dashboard”. With just one software you can do it all—track, configure, upgrade, clone, and manage up to thousands of thin client devices. So, kick back and relax. We do the hard work so you can focus on your key business initiatives. Device deployment, task automation, compliance management, and policy-based security management.

For more information go to hp.com/go/hpdm

Network performance improvements with HP Velocity

Figure 1. Effective network performances seen by user under different network conditions.

HP Velocity

Accelerate network performance.

Improve network performance and the end-user experience with HP Velocity software, which optimises network traffic for remote desktops and application streaming, IDs and fixes bottlenecks, and simplifies IT troubleshooting.

For more information go to hp.com/go/velocity

HP EasyShell

Quick. Simple. Customised.

Make your HP Thin Client Windows Embedded user experience easier than ever with HP Easy Shell. Customise the intuitive interface and level of protection to fit your needs, and enjoy targeted control at a great price so you can make the most of your cloud infrastructure, VDI, and kiosk environments.

For more information go to hp.com/go/easyshell

HP True Graphics

True 3D³ delivery you have to see to believe.

Achieve breakthrough loss-less video and graphics presentation from the cloud with HP True Graphics⁴ which offloads rich multimedia content to your GPU HW decoder so your CPU can boost the efficiency of your thin client and scale easily for heavy compute demands.

For more information go to hp.com/go/truegraphics

HP Remote Graphics Software

Work virtually anywhere.

Access your workstation- or server-based graphic-rich applications and collaborate remotely in real time from any PC, Thin Client or Windows tablet with HP Remote Graphics Software (RGS).⁵

*Availability varies by region

- The resolutions your monitor displays and the multi-display modes (i.e. clone, spanning, extended/independent) supported in ICA, RDP or locally may vary. Number of monitors supported varies by model.
- t310 only
- 3D content required to view 3D images. 3D capable display required to take full advantage of 3D.
- HP True Graphics requires an HP Thin Client with an HP ThinPro 5.0 or higher operating system (combo OS with HP Smart Zero Core begins at v5.0), AMD processing technology, and a Citrix virtual desktop infrastructure—must be XenApp or XenDesktop v7.0 or higher. HP True Graphics is preinstalled on the OS starting with HP ThinPro 5.2. HP True Graphics will be available on HP ThinPro 5.0 or higher as an add-on through Easy Update for ThinPro or via HPDM in early 2015. See product QuickSpecs for exact compatibility.
- HP Remote Graphics Software requires Windows and internet connection.
- This system requires a 64-bit operating system and 64-bit software products to take advantage of the 64-bit processing capabilities of AMD technology. Multi-core processing available with AMD technology is designed to improve performance of this system. Given the wide range of software applications available, performance of a system including a 64-bit operating system will vary.
- Multi core processing with AMD technology is designed to improve performance of this system. Given the wide range of software applications available, performance will vary. AMD's numbering is not a measurement of clock speed.
- Maximum memory capacities assume Windows 64-bit operating systems or Linux. With Windows and Linux 32-bit operating systems, memory above 3 GB may not all be available due to system resource requirements.
- The resolutions your monitor displays and the multi-display modes (i.e. clone, spanning, extended/independent) supported in ICA, RDP or locally may vary. Number of monitors supported varies by model.
- With custom single-to-dual DVI conversion cable, sold separately.
- 64 MB or more memory reserved for video. 42 GB/1 GB SKU available in North America. Up to 1 GB may not be available in 4GB configurations with 32-bit operating systems due to system resource requirements. Flash and RAM maximum vary with OS.
- Touchscreen support varies by OS. Not supported by Windows Embedded Standard 7E, Windows CE, or HP Smart Zero Client Technology.
- Wireless access point and Internet service required and sold separately. Availability of public wireless access points limited. 802.11 Wi-Fi and Bluetooth combo sold separately or as an optional feature.
- The specifications for the 802.11ac WLAN are draft specifications and are not final. If the final specifications differ from the draft specifications, it may affect the ability of the thin client to communicate with other 802.11ac WLAN devices.
- Options sold separately. Availability varies by country.
- Configurations of the HP t620 and HP t620 PLUS Flexible Thin Clients that are ENERGY STAR® qualified are identified on HP websites and on energystar.gov. EPEAT® registered where applicable. EPEAT registration varies by country. See epeat.net for registration status by country.
- This product is low halogen except for power cords, cables and peripherals, as well as the customer-configurable 100 Mbps Fiber NIC module which is not Low Halogen. Service parts obtained after purchase may not be Low Halogen.
- Windows Embedded Standard 7 products require 8 GB or more Flash memory.
- Configurable for one protocol at a time.
- Service levels and response times for HP Care Packs may vary depending on your geographic location. Service starts on date of hardware purchase. Restrictions and limitations apply. For details, hp.com/go/cpc. HP services are governed by the applicable HP terms and conditions of service provided or indicated to Customer at the time of purchase. Customer may have additional statutory rights according to applicable local laws, and such rights are not in any way affected by the HP terms and conditions of service or the HP Limited Warranty provided with your HP Product.
- Mobile broadband is an optional or add-on feature and is not available in all regions. Mobile broadband use requires separately purchased service contract. Check with service provider for coverage and availability in your area. Connection speeds will vary due to location, environment, network conditions, and other factors.
