THE M SERIES – TWO AMAZING SERGERS WITH THE
EXCLUSIVE AND PATENTED* MICRO THREAD CONTROL.

1300MDC
BERNINA®

1150MDA
BERNINA®

Sew, cut and neaten in a single operation—in overlock, chain or coverstitch. Innovative features make Bernina sergers delightfully easy to use and ensure professional quality down to the last stitch.

The M series of sergers allow you to sew creatively with unrivalled ease. You'll be inspired by the wide range of stitches and enjoy the wealth of deluxe features that make serging an even greater pleasure.

FROM LOOSE TO LOVELY WITH A FLICK OF THE WRIST.

Micro Thread Control (mtc). Only from Bernina.

Micro Thread Control fine tunes over-edge thread length at the turn of a knob for tight, clean results like this.

It's not just more precise, it's easier. Previously, to correct overhanging thread loops, you had to reset cutting width and both looper tensions. Now, one twist of the *mtc* knob makes a smooth, tight seam, and makes it easy to create a professional finish as you move from fabric to fabric. These edges are so perfect, you have to see them to believe them.

Up to 24 stitch variations.

Overlock, chainstitch, coverstitch, flatlock, rolled hem, all at your fingertips, all crisp and clean.

A simple threading system.

The Bernina lay-in system lets you thread quickly and directly—and the automatic lower-looper threading system makes it simpler, too.

Stitch widths up to 9 mm. Even lets you sew together loose knits, such as hand-knitted sweaters.

THE 1300MDC AND 1150MDA HAVE A HOST OF SPECIAL FEATURES DESIGNED TO MAKE YOUR SEWING EXPERIENCE SIMPLER, SMARTER, AND MORE CREATIVE.

Rolled-hem lever
Simply move the rolled-hem lever to switch effortlessly to a rolled-hem stitch and back again with no need to change the stitch plate or presser foot. **Bernina exclusive.**

Needle threader
Easy-to-use manual tool. (1300MDC only)

Auto threader
For 2 needles. (1150 MDA)

LCD screen
The clear display tells you both personal and default basic settings of stitch variations. You can also read recommended basic thread tension, and save personal settings. (1300MDC only)

Patented swing-out presser foot
Simply swing the foot out to the side to give yourself plenty of space for easy threading and hassle-free needle change. **Bernina exclusive.**

Front foot lift system
The front foot lift gives an additional lift to the front of the presser foot, making it possible to accurately position multiple layers of fabric and bulky projects such as polar fleece, hand-knit sweaters and home-decorating fabrics underneath it.

The Bernina lay-in threading system
Lets you thread quickly and directly—and the automatic lower-looper threading system makes it simpler, too.

Micro Thread Control
Thanks to *mtc*, it's finally possible to directly set the over-edge thread length for the perfect seam at the twist of a knob. **Bernina exclusive.**

Differential feed
Stepless differential feed ensures wave-free seams in knits and prevents puckering in fine fabrics—at the same time allowing deliberate gathering.

Handwheel position indicator
Easy, ergonomic operation. Find the ideal threading position for the needles and the lower looper quickly. **Bernina exclusive.**

Accessories in the looper cover
Here you'll find the most commonly used accessories, neatly arranged and right at hand.

Professional knife drive from above
Provides the greatest, most robust cutting force. Even thick fabrics won't deflect the upper knife—so all fabric edges can be trimmed safely and professionally.

Swing-out upper-knife arm
The upper-knife arm can be quick-released effortlessly at the press of a button to provide more room. This is particularly advantageous when you're working in coverstitch mode or do not wish to trim the fabric edge. (1300MDC only)

Elasticator Foot
The elasticator foot guides and stretches the elastic. Ideal for lingerie, swimwear, sportswear, home textiles, and more.

Blindstitch Foot
The blindstitch foot features an adjustable lateral guide plate that takes the hard work out of sewing blind hems. Excellent for blind hemming, flatlocking and heirloom techniques.

Coverstitch Foot
This special foot can be fitted for absolutely flawless coverstitch seams. Especially for seams, hems, bindings and decorative applications. (1300MDC only)

VERSATILITY, SIMPLICITY, PRACTICALITY AND CREATIVITY.

BERNINA®

009DCC
BERNINA®

The Bernina 800DL and 700D are especially versatile machines with practical features that make them easy to use.

Whether you're working with the finest silk and satin, robust denim, thick fleece or stretch fabrics, these Bernina sergers give you the sewing results you've always dreamed of. They bring you features such as easily adjustable thread tension, thirteen stitch variations with 2, 3 or 4 threads, the Bernina lay-in threading system, the rolled hem lever and ergonomically placed differential feed and stitch-length controls. You can sew much more quickly, easily and skillfully whether you're doing creative threadwork, hard-wearing seams on stretch and woven fabrics, decorative rolled hems or gathering.

The Bernina 009DCC is the ideal partner for cover and chainstitching. It brings you professional, 5-mm wide coverstitching, the standard in ready-made clothing. You can coverstitch beautiful, decorative seams or flat, joining seams for smooth comfort. Plus, gathered seams and simple, elegant hems with chainstitch. And temporary basting. All, of course, with Bernina quality, precision, and ease of use.

“SERGERS USED TO BE THOUGHT OF AS JUST TOOLS FOR SMOOTH SEAMS AND FINISHED EDGES. BERNINA QUALITY AND INNOVATION HAVE MADE THEM INTO HIGHLY FLEXIBLE TOOLS FOR ENHANCING ALL SORTS OF GARMENTS, QUILTS AND HOME-DECORATION PROJECTS. SO, CREATIVE SEWERS NOW USE THEM FOR MANY STUNNING TECHNIQUES—BEAUTIFUL RESULTS THAT JUST CAN'T HAPPEN WITHOUT A SERGER.”

NANCY BEDNAR AUTHOR OF *Creative Serging*

Stitch variations

STITCH	1300MDC	1150MDA	800DL	700D	009DCC	USE	EXAMPLE	
Total Stitch Count	24	15	15	7	2			
4-thread coverstitch, wide (5.0 mm)	●					Durable, flat stitch for hems and seams in elastic materials. Use for flat seams, finishes with sandwiched or sewn-on elastic, and elastic binding. For the decorative topstitching of seams or elastic straps; may also be used with decorative thread in the looper (wrong-seam-side up).		
3-thread coverstitch, wide (5.0 mm)/narrow (2.5mm) – 1300MDC	●					Durable, flat stitch for hems and seams in elastic materials. Use for flat seams, finishes with sandwiched or sewn-on elastic, and elastic binding. For the decorative topstitching of seams or elastic straps; may also be used with decorative thread in the looper (wrong-seam-side up).		
wide (5.0 mm) – 009DCC					●			
2-thread chainstitch seam, top and bottom	●					●	Having limited stretch, the chainstitch is ideal for fairly firm-woven fabrics, stabilizing seams, and bindings, as well as decorative effects in finer fabrics for garments and home textiles. May also be used for decorative seams with decorative thread in the looper (wrong-seam-side up).	
5-thread safety seam, wide	●						The two different parallel seams and the limited elasticity of the chainstitch make this extremely hard-wearing seam ideally suited for firm-woven fabrics such as jeans, uniforms, jackets, and more. A highly elastic seam in lengthways- and crossways-stretch fabrics such as Lycra and cotton-Lycra.	
4-thread overlock seam with wooly nylon thread and built-in safety seam	●	●	●	●			An elastic, highly durable seam for knits such as jersey, machine knits and tricot from any natural or synthetic fibers, as well as for hand-knits. For seams in fine- to medium-weight cotton, viscose, silk or synthetic fabrics such as batiste, crêpe de chine, poplin, satin, and more.	
3-thread overlock seam, wide/narrow	●	●	●	●			For neatening edges, seams, hems and facings; suitable for all fabrics. A soft, elastic seam for fine knits. For decorative and quickly sewn edge finishes, as well as effect seams in fairly firm-woven fabrics, fluffy or furry materials and sturdy knits.	
3-thread super-stretch (with wooly nylon thread)	●	●	●				A highly elastic seam in lengthways- and crossways-stretch fabrics such as Lycra and cotton-Lycra.	
3-thread flatlock seam, wide/narrow (with decorative thread)	●	●	●	●			For a flat, decorative seam in woven fabrics. Excellent for patchwork.	
3-thread rolled seam	●	●	●	●			A light seam for the finest silk, cotton or synthetic fiber jerseys. Perfect for sewing on or inserting lace.	
3-thread rolled hem	●	●	●	●			An attractive, quickly sewn edge finish for all fine fabrics.	
2-thread overlock seam, wide/narrow (edge-wrapped with wooly nylon thread)	●	●	●				Fine for all fabrics. For neatening edges, seams, hems and facings, reversible edge finishes. Use for firm-woven fabrics, fluffy or furry materials and sturdy knits.	
2-thread flatlock seam, wide/narrow (with decor. thread)	●	●	●				A flat, elastic, decorative seam for knits and woven fabrics. Ideal for patchwork.	
2-thread rolled hem	●	●	●				Edge finish on hems, ruffles and flounces in fine- and light-woven fabrics or jerseys. Excellent for inserting lace in fine batiste.
