

BOSCH

Invented for life

The easy way to perfect results.

Introducing the new generation of built-in appliances.

www.bosch-home.com/za

Bosch – A brand you can trust.

“I have always acted according to the principle that it is better to lose money than trust. The integrity of my promises, the belief in the value of my products and in my word of honour have always had a higher priority to me than a transitory profit.”

Robert Bosch, 1921

Design

Every detail of every appliance has been carefully designed, where everything just matches perfectly and makes your time spent in the kitchen as enjoyable as possible.

Quality

Bosch appliances offer premium quality, outstanding Germanmade and engineered technology and have been produced and tested by our engineers to fully satisfy the highest of standards.

Convenience

A little peace of mind for your daily life at home with Bosch sensor technology for perfect cooking results.

Performance

With Bosch Assist and advanced sensor technology found in PerfectBake™ and PerfectRoast, your Bosch Series 8 ovens and compact appliances will modify the cooking process from start to finish for perfect baking and roasting results.

Sustainability

The Green Technology inside signet stands for the resource-efficiency of our products – quite simply, a Bosch kitchen reflects environmental consciousness.

Designed to make your everyday life easier.

Extractors

Each Bosch extractor is created using highly durable stainless steel. Designed to offer wider coverage and the most ideal suction / extraction for all kinds of kitchens all thanks to powerful blower motors & the largest baffle filters. All this is offered together with the finest aesthetics, LED illumination & low noise.

Built-in refrigeration

Stylish, matching your kitchen cabinetry and packed full of sensor technology to keep your food fresher for longer.

Dishwashers

A dishwasher is a must in any modern kitchen to save you the hassle of cleaning up. Choose from semi and fully integrated models to perfectly match the kitchen cabinetry.

Hobs

Choose a hob to match your cooking habits: from traditional ceramic or gas cooktops, to innovative induction.

Ovens

High-quality stainless steel combined with sleek black glass offers timeless design, while sophisticated features deliver the best results meaning less work and more cooking pleasure.

Coffee machine

For lovers of coffee, your favourite café can be right in your kitchen. The coffee machine design matches the Serie 8 ovens for a seamless and coordinated look.

Warming drawers

Keep your coffee cups on hand for the morning cappuccino or warm up plates before serving dinner. You can also defrost, prove dough and so much more.

Series 8 | Built-in ovens and compact appliances

Design inspiration gallery.

Side-by-side

This is a great combination for people who need double oven capacity and require the quality results of convection cooking. Choose the 60cm built-in oven for increased functionality and cooking flexibility.

Models featured: HBG656LS1, HBG655BS1

Models featured: HBG656LS1,cMG633BS1, BIC630NS1

Models featured:cMG633BS1, HBG634BS1, BIC630NS1, CTL636ES1

Horizontal cooking centre

Together the combination of these appliances give the home chef a versatile baking centre. The addition of warming drawers keeps the lines consistent and adds convenience to retain the quality of prepared food until guests arrive.

Models featured: HBG656LS1,cMG633BS1, CTL636ES1, BIC630NS1, HBG655BS1

Large horizontal cooking centre

The ergonomic horizontal installation offers a strong linear baking zone that takes full advantage of an expansive kitchen wall. All the oven technologies are at a comfortable, and safe height for most cooks. It is great for large families cooking together.

Single column

Maximum functionality in a limited space. The combination microwave oven adds speed and versatility as well as the ability to cook in two ovens simultaneously.

Models featured:cMG633BS1, HBG656LS1, BID630NS1

Cube installation

This concise combination offers speed, steam and two convection ovens in a limited wall space.

Models featured: HBG656LS1, HBG655BS1,cMG633BS1, BIC630NS1, CTL636ES1

Models featured: HBG656LS1, HBG655BS1,cMG633BS1, BIC630NS1, CTL636ES1

T-configuration cooking centre

A cook with a large family, one that entertains often, will find everything they need with this T-configuration. This configuration allows two ovens to be accessed at the same time, plus the benefits of microwave technology. The positioning of the control panels and clean uniform lines of each unit allows for different custom configurations with the same modern look.

Ovens | Heating functions

Because there's hot,
and then there's hot.

Perfect baking and roasting not only requires the right temperature, but also the appropriate heating function too. From 4D HotAir to Slow cooking, Bosch ovens offer heating functions that deliver everything from haute cuisine to everyday feasts.

4D HotAir*

Thanks to 4D HotAir, you can place your food on any shelf from level one to four, and the results will be consistently perfect. The rotating fan alternates its direction during cooking to distribute heat evenly on every level. And for reliable results “top-to-bottom”, you can also bake and roast on up to four different levels simultaneously.^

HotAir Eco*

HotAir Eco uses less energy by using a single tray. This energy efficient function distributes less heat into the oven and uses residual heat to maintain the set temperature.

Top and bottom heat*

Uses both the upper and lower heating elements. Heat travels to the centre of the oven, which is the best position to obtain the selected temperature. Suitable for traditional baking and roasting, and offers the best results for cakes with moist toppings.

Top and bottom heat Eco*

In addition to the Top and bottom heat function, selected Series 8 ovens feature a new eco-friendly mode, which supports cooking on a single shelf for energy efficient cooking. Prepare perfect sponges, pound cakes, delicate pastries and bread rolls while saving valuable energy.

Bottom heating*

For cooking in a bain-marie and for the final baking stage. The heat is emitted from the lower heating element.

Intensive heat*

Combines the top element with a more powerful bottom heating element that is perfect for crispy bases and baking in tins.

Hot air grilling*

Achieve rotisserie-style cooking for meat and poultry. The grill and fan alternate, which produces even and crisp cooking results.

Grill, large area*

For grilling flat items, such as steaks and sausages, for making toast, and for cooking a gratin.

Grill, small area*

For grilling small amounts of steaks or sausages, for making toast or grilling a smaller surface area.

Pizza setting*

Create crispy pizzas or give any dish that extra heat that's needed from underneath by using a combination of heating elements.

Keeping warm*

A new feature that keeps cooked food warm.

Slow cooking*

For gentle and slow cooking of seared, tender pieces of meat in ovenware without a lid.

Drying*

A new function for drying fruits, vegetables and herbs with maximum flavour. This function can also be used for drying out the oven cavity after the added steam function has been used.

Preheat ovenware*

A new feature that is useful for pre-heating ovenware and even dinnerware.

Sabbath mode*

Set a maximum timer of up to 74 hours using the Sabbath function. You can keep the food in the cooking compartment warm without having to switch the oven on or off.

Rapid heating*

With rapid heating, you can shorten the heat-up time for selected heating functions, including 4D HotAir and Top and bottom heating.

3D HotAir Plus*

Cook on up to 3 levels simultaneously with even heat distribution.

Fan forced hot air*

A fan disperses heat evenly for cakes and pastries baked on two levels. Fan assisted top and bottom heating uses both upper and lower heating elements while a fan disperses heat evenly.

Defrost*

Perfect for gentle defrosting of meat, poultry, bread and much more.

Reheating*

For plated meals and baked items. Cooked food is gently reheated. The steam ensures the food does not dry out.

Dough proving*

For yeast dough and sourdough. Dough will rise considerably quicker than at room temperature. The surface of the dough does not dry out.

*Features may vary depending on models. Please check individual product specifications.

^To cook on all four levels simultaneously, four wire racks are required for best results. For up to three levels, all accessories are suitable, ie. universal tray or baking tray.

Serie | 8

Compact appliances | Combination microwave oven and warming drawers

Fits every kitchen.
And every need.

The perfect compliment to your Series 8 kitchen.

For lovers of cooking, Bosch compact appliances offer exceptional cutting-edge features and extra cooking functionality. Perfectly matched design panels within Series 8 allow you to mix and match these appliances with full-sized ovens for a seamless and coordinated look. With the intuitive display and Bosch control ring, operating functions are harmonised for easy use.

iF product design award
For all Series 8 ovens and compacts, built-in coffee machines and warming drawers.

German design award
For all Series 8 ovens and compacts, built-in coffee machines and warming drawers.

Red Dot award
For all Series 8 ovens and compacts, built-in coffee machines and warming drawers.

Serie | 8

Compact appliances | Built-in coffee machine

Your favourite café is now open 24/7.

Latte, cappuccino or espresso? With the Series 8 built-in coffee machine, you can treat yourself and your guests to any beverage at the touch of a button. Bosch barista technology guarantees a full-bodied aroma and perfect crema – for coffees as delicious as those brewed in your favourite café.

SensoFlow system for a perfect aroma

The optimal brewing temperature for an espresso is between 90°C and 95°C. If the temperature is any higher or lower, the flavour of the beans is only partially released or the coffee is bitter. Our smart SensoFlow system heats the water to just the right temperature, for a full-bodied espresso aroma from the first to the last cup.

A choice of coffee at the touch of a button

With the OneTouch function, it'll be ready in an instant. Innovative technology regulates the release of coffee, hot milk and foam to deliver the beverage of your choice at the touch of a button.

Automatic cleaning of the milk system

Now you can clean your coffee maker as easily as you prepare your morning pick-me-up. Each time you make a coffee drink with milk, the milk system is automatically rinsed out with a blast of steam. The coffee machine takes total charge of the milk system's daily maintenance, so that you can concentrate on enjoying your cappuccino or latte macchiato instead of cleaning.

CTL636ES1

SERIE 8 FULLY-AUTOMATIC COFFEE MAKER

Flavour
SensoFlow System
AromaPro Concept
One-touch preparation: Ristretto, Espresso, Espresso Macchiato, Coffee, Cappuccino, Latte Macchiato, Caffè Latte at the touch of a button
AromaDouble Shot
Beverage temperature adjustable individually: coffee 3 levels, hot water 4 levels

Convenience

Hobs | Induction

The best cooking needs just one ingredient: Bosch.

Modern cooking offers so many wonderful new tastes and textures, you need a hob that's flexible enough to keep up.

**Induction hobs**

Quite simply, Bosch has a range of induction hobs that are designed to make it easier and quicker for you to create the dishes you love.

**Electric hobs**

With their electronic touch-controls and flexible cooking zones, Bosch ceramic hobs combine great looks with smart function and design.

Hobs | Gas cooktops

Fire that does exactly what you want.

Gas provides fast and instant versatility. Our German-designed gas cooktops all feature Bosch flame failure technology fitted to each burner and conveniently come with controls that are either front or side mounted.

Features and functions for everyday use.

Efficiency

One-hand ignition

Push and turn the ergonomically designed control knobs and the gas ignites automatically. As well as offering the convenience of only using one hand, there is also no separate ignition button to clean.

Easy clean tempered glass

Premium models with tempered glass base are easy to clean for total convenience and completed by a frameless finish for a stylish and sleek look.

Cleaning rounded off to perfection

The rounded edges of our gas cooktops ensure effortless cleaning - dirt simply doesn't have anywhere to collect.

Simplicity

FlameSelect

FlameSelect and its patented valve technology offer you incremental heat regulation within nine precisely defined power levels, making your cooking with gas as easy, safe and enjoyable as possible.

Flame failure device

For added safety, all Bosch gas cooktops feature a flame failure device. This feature stops the supply of gas to the burners if the flame is extinguished.

Cast-iron supports

Cast-iron pan supports are both stylish and highly durable, providing solid and robust support for your cooking pans.

Performance

High-power wok-style burner

Selected gas cooktop models feature a powerful wok-style burner, which provides up to 18Mj/h. Suitable for use with flat-based pans or with a wok using the wok ring provided.

Flexible burners

All our gas cooktops feature different burner combinations for greater flexibility. With wok, high-speed, standard and economy burners, you can cook more efficiently with the burner most suited to the size of the pan.

*Features may vary depending on models.

Vario hobs.

Bosch vario hobs can be put together entirely to suit your taste and go together perfectly in terms of looks. Available in different designs, you can enjoy maximum flexibility when you install your vario hob too: You can position the hobs next to each other in your work top or, if you have an island unit, you can have them opposite each other. Connecting strips between the domino hobs make sure everything looks harmonious in the kitchen.

Extractors | Convenience

Designs for your dream kitchen.
From focal point island to
hidden integrated extractors.

**Ducted extraction**

Ducting out is the most effective method of extraction. Ideally the extractor should be sited on an outside wall, or an outside wall can be reached via ducting. All Bosch extractors are now standardised to facilitate a 150mm diameter outlet for maximum performance, although smaller ducting can be used if required. Please refer to the installation guide for further advice on best practice installation.

**Recirculation kit**

Odours are extracted and filtered, then purified air is returned to the room. The kit comprises of a carbon filter and all components needed to ensure that odour free air is returned into the kitchen. To maintain performance, the carbon filter should be replaced on a regular basis. A recirculation kit needs to be purchased as a separate accessory.

CleanAir module
Accessory to be
purchased separately*
*Available for selected
Bosch extractors

What extraction rate do I need?

It is recommended that air be extracted (or exchanged) in a room depending on your type of cooking: minimum of 6 times per hour; and a maximum of 12 times per hour.

Air extraction is measured using room volume. This is calculated by multiplying Length x Width x Height.

Bosch extraction rates are tested inline with EU standards.

Extractors | Silence

Relax in a quieter kitchen with family and friends.

A few decibels can make the difference between harmful, loud and pleasant. Our quietest extractor means you can have it on while listening to music, enjoying a conversation or while your baby rests.

Silence

Noise is measured in numeric decibels or dB(A). It is important to note that a few decibels can make a huge difference.

EcoSilence Drive® motor

The EcoSilence Drive® motor operates without carbon brushes, eliminating the disadvantages of conventional motors. Instead of energy loss, wear and noise, you get efficiency, durability, and smooth operation. To reduce motor noise even further (1dB(A) noise reduction compared to other motors), we have optimised the airflow inside the hood. The result: low noise levels with high power.

Bosch extractor

40dB

30dB Leaves rustling

*DFR097E50A at quietest operating mode 40dB(A) and 48dB(A) at level 2 (320m³/h (150mm ducted)).

Extractors | Convenience

Designs for your dream kitchen.
From focal point island to
hidden integrated extractors.

**Halogen lighting***

Integrated halogen lighting ensures that the cooking area is clearly illuminated. They are more efficient than standard lights and are designed to last longer.

**LED lighting***

The new LED lights offer a longer lifetime and use less energy than conventional halogen lighting. Additional convenience is offered with SoftLight which gently fades lighting in and out with dimmer function.

**Dishwasher-safe metal filters***

For easy cleaning, all Bosch filters can be safely loaded into any Bosch dishwasher for sparkling clean results.

Rim ventilation filter*

With its smooth uninterrupted surface and grease separation of 80-92%,* the rim ventilation filter from Bosch has a multi-patented filter sealing system and flow-optimised filter system with 12-layer filter mats.

*Depending on motor output

**Stainless steel filter***

The stainless steel filter provides an exceptionally high level of grease absorption. It is concealed behind an elegant stainless steel cover with a stainless steel handle.

**Metal grease filter***

Metal grease filters are required for ducted and recirculating systems to filter grease and other solid particles out of the extracted air. To make sure these filters operate at maximum efficiency, they should be cleaned about twice a month.

*Features may vary depending on models.

Refrigeration | Built-In

Packed full of good ideas.

Bosch Active Cooling ensures your food is protected against bacterial growth and provides the ideal storage environment. Thanks to this technology, fruit and vegetables can be stored for longer, giving you more time to enjoy them.

**VitaFresh**

The VitaFresh compartments always maintain the right storage conditions, thanks to two different climate zones: In the top, drier zone, with a low temperature setting about 0° C, fish and meat can be stored hygienically in two separate drawers – with no odour transfer. The more perishable the food the lower the temperature should be. The temperature in the meat and fish drawers will be lowered by placing the slider manually on the “extra cool” position to open the air channel. The big bottom drawer is specifically designed for keeping fruits and vegetables fresh for longer; its humidity can be controlled with the slider. More humidity is required to store vegetables, and less for long-lasting freshness for fruit.

**SuperCooling***

Adding new food into the fridge causes the internal temperature to rise, which means the fridge has to work harder to cool down and regulate the temperature again. SuperCooling will prepare your fridge by rapidly reducing the temperature, keeping the contents cool, while quickly cooling the new groceries down to 2°C.

**SuperFreezing***

Adding new food to the freezer can increase the internal temperature, which can partly defrost existing food. The SuperFreezing function rapidly lowers the temperature in the freezer, ensuring the fresh food is frozen quickly, while surrounding food remains frozen.

**SoftClose door***

Thanks to a special damping mechanism, the fridge door closes softer and quieter than before. When it is open at a 20° angle or less, the door closes automatically and helps prevent the fridge from being left open.

**LED lighting***

Bright LED lighting across all shelves provides the highest possible visibility LED Light throughout the fridge.

**VarioShelf***

Space for bottles and bowls with sectional glass shelves that can be separated and slid underneath.

**10 year warranty***

The 10 year warranty on your compressor will give additional peace of mind when purchasing a Bosch fridge.

**Features may vary depending on models.*

Concealed behind cabinetry panels that match the rest of your kitchen, these fully integrated fridge freezers allow you to continue the clean design lines of your kitchen. The fully reversible hinges let you create a side-by-side configuration or install them as individual units in separate zones of your kitchen.

Dishwashers | Design

Integrate your dishwasher for a seamless look.

Bosch integrated dishwashers are designed to fit your new kitchen to perfection. They can be fitted with a door panel to match the design of your kitchen cabinetry.

**WORLD'S
BRAND No.1***

*For Dishwashers. Source: Euromonitor, volume sales, 2016.

Dishwashers | Features and functions.

Features and functions for everyday use.

Efficiency

GlassCare Technology*

As excessively soft water causes glass corrosion, the level of hardness is constantly measured and controlled in Bosch dishwashers featuring GlassCare technology.

DosageAssist™ detergent system

Unique to Bosch, DosageAssist™ maximises the effectiveness of detergent tablets by dropping it into a specially engineered tray that is targeted by water jets, resulting in a tablet that dissolves evenly under control. For superior cleaning performance and a quieter wash.

AquaStop™ Plus

The AquaStop™ Plus system consists of a double-walled supply hose, a safety valve, as well as a floor sump with float switch, offering 100% protection against water damage.

Guaranteed by Bosch.

Heat Exchanger Uses residual heat to rinse and dry dishes, saving energy, reducing temperature shock, and providing hygienically clean results by not drawing air from outside the dishwasher.

AquaSensor™ technology

The AquaSensor™ helps you save more water as it measures the amount of soiling at the end of the pre-rinse cycle, reusing water when it can, saving up to 20% for the entire wash.

Simplicity

ActiveWater technology*

This innovative rinsing technology maximises efficiency and ensures environmentally friendly rinsing for excellent cleaning results. The water and energy is saved through targeted water distribution, optimised filter technology, faster heating and higher pump performance for increased water circulation

Anti-fingerprint finish

The anti-fingerprint stainless steel finish ensures no prints are left behind and the dishwasher always looks its best.

Child door and button locks For added safety, the door can be locked manually to prevent children from inadvertently opening the door. The buttons can also be locked to prevent tampering during operation.

Full colour TFT display

The multi-coloured TFT display shows wash progress, time remaining, and thanks to the advanced technology, displays the predefined water and energy consumption for each wash option.

TimeLight™

You might not hear anything coming from your dishwasher, but it still might be on. To prevent you from interrupting the cycle, we've developed TimeLight™: an illumination that projects the remaining wash cycle time onto the floor when the dishwasher is in operation.

InfoLight™

Selected models feature InfoLight™ – a red LED light that discreetly beams onto the floor during the wash cycle and disappears after the drying cycle is complete.

Performance

EcoSilence Drive®

Our advanced motor has been built to provide you with maximum efficiency, economy, and durability whilst operating. EcoSilence Drive® wash and drain pumps work without brushes, resulting in ultra-silent performance and top results.

10 year anti-rust warranty

Our appliances are made from top quality materials and in addition to our standard appliance warranty, we provide a free-of-charge warranty against rusting-through of the dishwasher's stainless steel inner cavity.

Whisper quiet washing

Bosch dishwashers are amongst the quietest in the world. With brushless motors and advanced sound insulation technology resulting in whisper quiet operation from just 40dB. Quieter than a buzzing bee!

AutoBrilliance™ automatic detergent sensor

The AutoBrilliance™ function adapts the temperature for multi-function detergent tablets, ensuring the rinse aid is fully utilised, delivering sparkling results every time. Three stage self-cleaning filter An additional nozzle in the spray arm cleans the bottom of the dishwasher while also breaking down food to pass through the filter and prevent blockages.

*Features may vary depending on models.

Dishwashers | Wash Programs

Your guide to our wash programs and options:

Wash programs

Automatic programs

By choosing the automatic program, your dishwasher will assess how soiled the items are and adjust the program time and temperature accordingly.

Eco Wash 45°C

Save on your utility bills and reduce the impact on our environment by using this water and energy efficient program for mixed loads.

Intensive 70°C

An intensive wash cycle designed for heavily soiled dishes such as pans with baked-on food.

Quick Wash 45°C

A 29 minute express wash designed to clean lightly soiled dishes in a short time, such as drinking glasses at a dinner party.

ExtraQuiet 40dB 50°C

Washes dishes exceptionally quietly at just 40dB, perfect for eat-in kitchens, open spaces or running your dishwasher at night.

Pre-Rinse

Uses only cold water to rinse dishes, ideal for odour reduction of dirty dishes between full wash cycles.

Glass Wash 40°C

Gently cleans glasses such as high-quality crystal stems while providing optimum drying to add an extra sparkle to your glassware.

Intensive zone*

New Intensive Zone option is the solution for mixed loads. Heavily soiled and delicate dishes are perfectly cleaned in the same cycle. The entire lower basket is converted into a heavy duty cleaning zone by increasing water pressure and the cleaning temperature in the lower basket, whilst water pressure stays according to the selected program in the upper basket.

AquaSensor™ technology*

The AquaSensor™ helps you save even more water as it measures the amount of soiling at the end of the pre-rinse cycle, reusing water when it can, saving up to 20% for the entire wash.

Vario Speed Plus*

This feature allows you to wash a full load of dishes up to three times faster. With a touch of a button, rinsing time is reduced by up to 66% (three times), but without having to compromise on cleaning quality. Dishes still get hygienically cleaned and dried but it is done quickly. This is ideal for busy households or when entertaining.

Half load*

A reduced dish load can be washed – it's your choice to use the top or bottom basket. Reduction of Energy (up to 15%) and water (up to 25%) consumption.

Silent benefits*

We know that the kitchen is a central part of the home where people gather. With this in mind, we have designed a range of 42dB whisper-quiet dishwashers.

TimeLight™*

You might not hear anything coming from your dishwasher, but it still might be on. To prevent you from interrupting the cycle, we've developed TimeLight™: an illumination that projects the remaining wash cycle time onto the floor when the dishwasher is in operation.

Open Assist*

With OpenAssist you can open fully integrated dishwashers simply by touching the front of the unit. This partially opens the door, making it easy to load and unload the dishwasher.

Rackmatic*

The height of the dishwashers top basket can easily be adjusted by 5cm, even when fully loaded. This means that bulky items such as tall glasses in the top basket or large plates in the bottom one can easily be accommodated without having to re-arrange absolutely everything.

Machine Care Program*

The Machine Care programme is used to remove grease and limescale from the dishwasher interior with the assistance of a standard machine-care-detergent. The programme run time is 90 min with medium to high water temperatures.

Guarantee Conditions*

Guarantee is not valid if appliance is used in an industrial application.

Total guarantee period: 5 years from date of purchase

CTL636ES1 coffee machine for 3 years from date of purchase

Transport damages will only be accepted 7 days after delivery to end user or contractor working on behalf of end user (kitchen company, building contractor).

First year full guarantee on parts and labour – excluding very fragile parts i.e. glass, plastic, light bulbs.

Second year guarantee on all functional parts only: electronics, timers, switches, pumps, motors, compressors, locks, valves, thermostats, fan, plus labour to repair or replace.

Third year guarantee on all functional parts only: electronics, timers, switches, pumps, motor, compressor, locks, valves, thermostats.

After guarantee expires, customer must pay a charge of R430 excl. VAT (annual increase applies) towards labour costs.

* Valid from February 2008

Condition governing appliance service

1. A guarantee claim ceases once repair or work is undertaken by a person not entitled by BSH to do so or if the appliance is provided with spare parts, attachments or accessories that are not original, therefore causing damage.
2. The guarantee is given in such a manner that defective parts are repaired free of charge or – and this is BSH choice – replaced by perfect parts.
3. A claim under guarantee does not cause an extension of the guarantee period nor does it start a new guarantee period.
4. If BSH refuses repair or repair fails and the end user so requires, a replacement of equal value is supplied free of charge within the above guarantee period.
5. These conditions of guarantee are applicable to appliances purchased in South Africa. If appliances are taken abroad and meet the technical requirements (e.g. voltage, frequency, type of gas etc) of such country while also being suitable for the respective climate and environmental conditions, these terms of guarantee are applicable only if BSH have an approved customer service network in such country.

Service you can rely on.

For help with your home appliance, trust Bosch Customer Service.
