Anacardiaceae

*Schinus terebinthifolius*

Brazilian Pepper Tree,

Christmas Berry Tree

**WEED!**

Crushed leaves smell of pepper.

**Poisonous** – berries cause vomiting & diarrhoea, sap causes skin & eye irritation.

Spreads by suckering from aggressive but shallow root system.

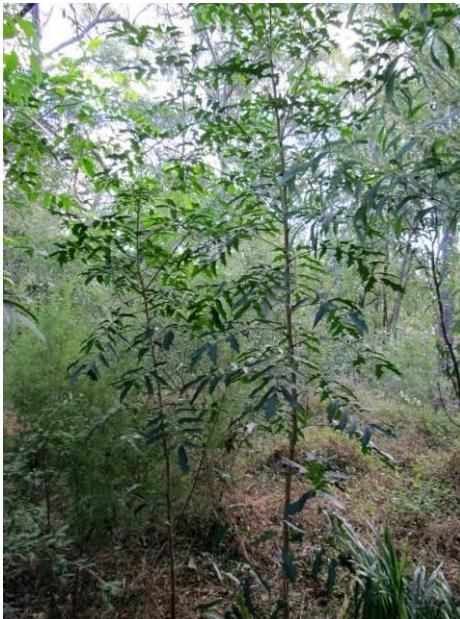

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Anacardiaceae

*Rhodosphaera rhodanthema*

Deep Yellow Wood, Yellow Cedar,  
Tulip Satinwood

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Apocynaceae  
*Cascabela thevetia*  
Yellow Oleander, Captain Cook tree

**WEED!**

Noxious weed – BCC Class C

**Poisonous** – all parts of tree  
dangerously poisonous

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Apocynaceae  
*Gomphocarpus physocarpus*  
Balloon Cotton Bush

**WEED!**

**Poisonous sap** – handle with care

Caterpillar food plant for:  
Lesser Wanderer and  
Monarch/Wanderer

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Araliaceae  
*Schefflera actinophylla*  
Umbrella Tree

**WEED!**

Native of North Queensland

Spreads rapidly as birds eat ripe fruit.

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Asteraceae  
*Ageratina adenophora*  
Crofton Weed

**WEED!**

Asteraceae  
*Baccharis halimifolia*  
Groundsel, Consumption  
Weed

**WEED!**

Spreads by wind dispersal.  
Native to North America & West  
Indies – introduced in mid 1800s.

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Asteraceae

*Montanoa hibiscifolia*

Anzac Flower, Treedaisy

**WEED!**

Native to Mexico and Central America.

Asteraceae

*Olearia nernstii*

Snow Bush

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Asteraceae  
*Ozothamnus diosmifolius*  
Sago Flower

Bignoniaceae  
*Jacaranda mimosaeifolia*  
Jacaranda

**WEED!**

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Bignoniaceae  
*Tecoma stans*  
Yellow Bells

**WEED!**

Caesalpiniaceae  
*Chamaecrista nomame*

Caterpillar food plant:  
No-brand Grass-yellow

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Caesapiniaceae

*Senna pendula v glabrata*

Easter Cassia

**WEED!**

Colonises bushland and prevents native regrowth.

Produces masses of yellow flowers at Easter.

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Large numbers of seed pods produced each year.

Easter Cassia has a distinctive gold rim along the edge of leaf.

Casuarinaceae  
*Allocasuarina littoralis*  
Black She-oak

Male

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Casuarinaceae  
*Allocasuarina littoralis*  
Black She-oak

Female

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Casuarinaceae  
*Allocasuarina torulosa*  
Forest She-oak

Dilleniaceae  
*Hibbertia aspera*

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Dilleniaceae  
*Hibbertia stricta(riparia)*  
Erect Guinea-flower

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Epacridaceae

*Trochocarpa laurina*

Tree Heath

Longitudinal veins like Hickory  
Wattle.

Food plant - Lewin's Honeyeater

Common Crow – *Euploea core*

Flower and fruit

## Trees-Shrubs of Mt Gravatt Conservation Reserve

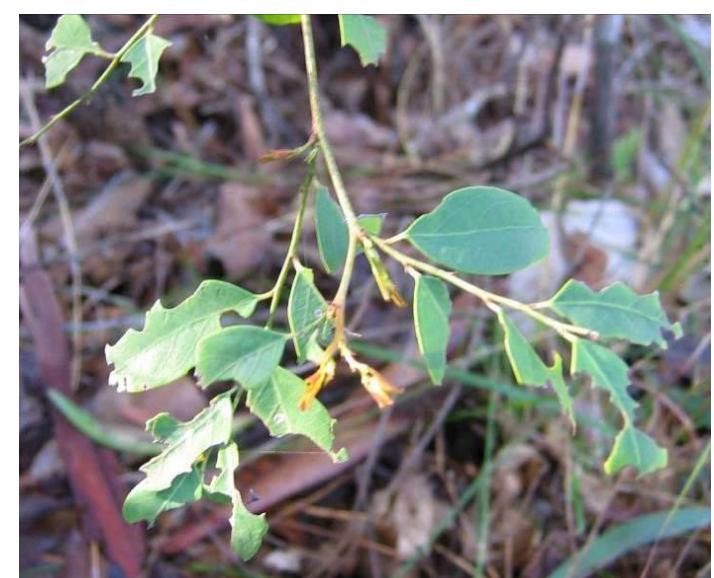

Euphorbiaceae  
*Alchornea ilicifolia*  
Native Holly

Euphorbiaceae  
*Breynia oblongifolia*  
Coffee Tree/Native Privet

Food plant – flowers:  
White-cheeked Honeyeater

Caterpillar food plant:  
Large Grass-yellow butterfly  
*Achaea argilla*

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Euphorbiaceae  
Genus waiting identification

**WEED!**

**Poisonous**

Irritant milky sap – on skin causes rashes to serious burns – in eyes causes inflammation even blindness.

Handle with extreme care – rubber gloves and eye protection required. Bag for disposal.

**DO NOT MULCH**

Euphorbiaceae  
*Macaranga tanarius*  
Macaranga

Similar to Weed – Castor Oil Plant - leaves rounded not star shaped.

6m – Cream flowers

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Euphorbiaceae  
*Petalostigma pubescens*  
Quinine Bush

6m

Euphorbiaceae  
*Petalostigma triloculare*  
Quinine Bush/Long-leaved  
Bitter Bark

5m

Cream/yellow flower  
Orange fruit

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Euphorbiaceae  
*Ricinus communis*  
Castor Oil Plant

**WEED!**

Noxious weed – BCC Class C  
Seeds highly toxic – can cause death if eaten.

Large red flowers in summer – seed capsules explode when ripe. Found on disturbed or cleared land and along creek banks.

Similar to Macaranga - leaves star shaped rather than rounded.

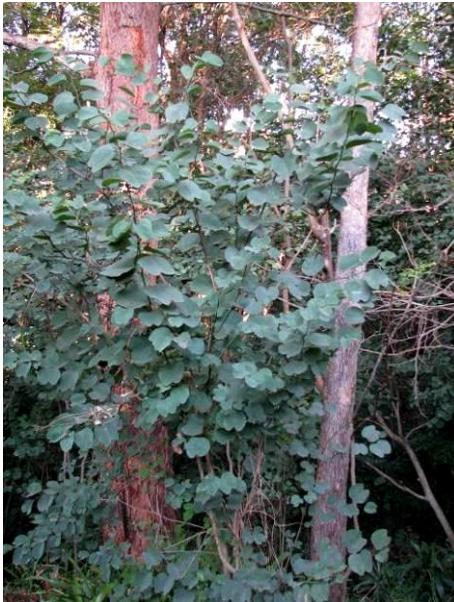

Fabaceae  
*Aotus lanigera*  
Woolly Aotus

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae  
*Bauhinia variegata*  
Orchid Tree

**WEED!**

Fabaceae  
*Caesalpinia ferrea*  
Leopard Tree

**WEED!**

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae  
*Crotalaria lanceolata*  
Rattlepod

**WEED!**

Caterpillar food plant:  
Long-tailed Pea-blue

Distinctive seed pods rattle when dry.

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae  
*Crotalaria montana*  
Rattlepod

### Native Rattlepod

Caterpillar food plant:  
Long-tailed Pea-blue

Fabaceae  
*Crotalaria pallida*  
Rattlepod

### WEED!

Caterpillar food plant:  
Long-tailed Pea-blue

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae

*Daviesia ulicifolia*  
Gorse Bitter Pea

Caterpillar food plant:  
Fringed Heath-blue

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae

*Daviesia villifera*

Bitter Pea

Caterpillar food plant:  
Fringed Heath-blue

Distinctive leaf shape.

Fabaceae

*Daviesia wyattiana*

Long-leaved Bitter Pea

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae  
*Hovea acutifolia*  
Purple Pea Bush

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae

*Hovea heterophylla*

Common Hovea, Narrow-leaved Pea Bush

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae

*Indigofera australis*

Native Indigo

Caterpillar food plant:

Long-tailed Pea-blue

Common Grass-blue

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae

*Indigofera hirsute*  
Hairy Indigo

Caterpillar food plant:  
Long-tailed Pea-blue  
Common Grass-blue

Leaves and stem very hairy

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae  
*Isotropis filicaulis*

Rare/Threatened species

Fabaceae  
*Jacksonia scoparia*  
Dogwood

Caterpillar food plant:  
Fiery Jewel  
Copper Pencilled-blue

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae

*Leucaena leucocephala*  
Lead Tree, Coffee Bush

**WEED!**

Native to tropical America.  
Introduced as fodder species.

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae

*Podolobium aciculiferum*  
Prickly Shaggy Pea

Previously *Oxylobium aciculiferum*

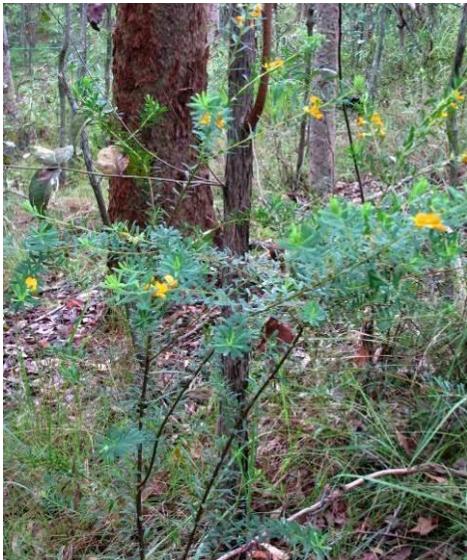

Multiple long sharp prickles.

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae  
*Pultenaea euchila*  
Orange Pultenaea

Caterpillar food plant:  
Fringed Heath-blue butterfly

Fabaceae  
*Pultenaea villosa*  
Hairy Pea Bush

Well named for hairs on leaves.

Caterpillar food plant:  
Fringed Heath-blue butterfly

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Fabaceae

*Tephrosia glomeruliflora*  
Pink Pea Bush

**WEED!**

Lamiaceae

*Callicarpa pedunculata*  
Velvet Leaf

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Lauraceae

*Cinnamomum camphora*

Camphor Laurel

**WEED!**

Aggressive along waterways,  
forming dense infestations.  
Distinctive smooth green bark.  
Leaves fragrant when crushed.

Caterpillar food plant:  
Blue Triangle

## Trees-Shrubs of Mt Gravatt Conservation Reserve

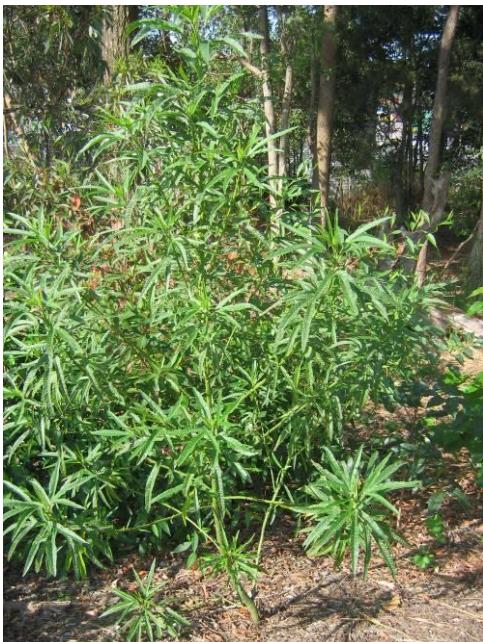

Malvaceae

*Hibiscus*

*heterophyllus*

Native Rosella

Caterpillar food plant:  
Cotton Looper Moth

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Melastomataceae  
*Melastoma affine*  
Blue Tongue, Native  
Lasiandra

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Mimosaceae  
*Acacia complanata*  
Flat-stemmed Wattle

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Mimosaceae <i>Acacia decurrens</i> Green Wattle, Black Wattle		
Mimosaceae <i>Acacia falcata</i> Sickle Leafed Wattle  Height: 2-5m  Leaves curved like a sickle, longitudinal veins with some cross veins.    Food plant: Pale-headed Rosella Caterpillar food plant: Imperial Hairstreak Short-tailed Line		

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Mimosaceae  
*Acacia fimbriata*  
Brisbane Fringed Wattle

Height: 6m

Food plant – King Parrot

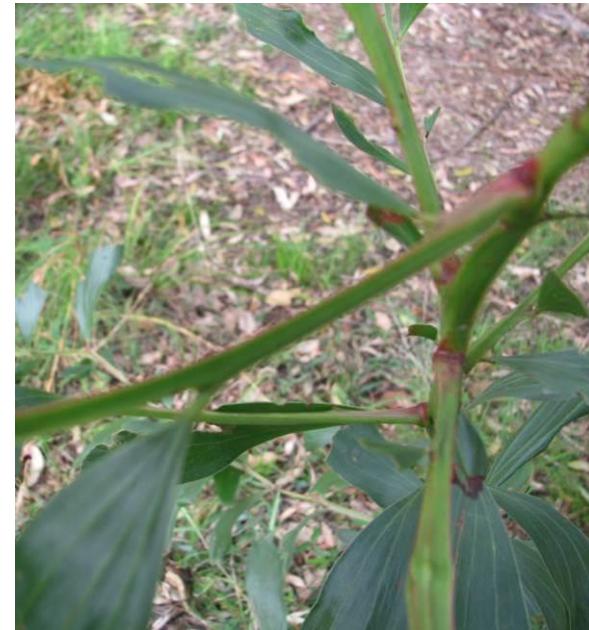

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Mimosaceae  
*Acacia leiocalyx*  
Early Black Wattle  
Lamb's Tail Wattle

Height: 6m

Identify: Branches triangular and reddish

Caterpillar food plant:  
Imperial Hairstreak

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Mimosaceae  
*Acacia maidenii*  
Maiden's Wattle

Height: 15m

Caterpillar food plant:  
Tailed Emperor  
Common or Large Grass-yellow  
Double-spotted Line Blue  
Glistening Blue

Mimosaceae  
*Acacia macradenia*  
Zig-zag Wattle

(Planted)

Indigenous to Central Queensland  
(Chinchilla to Blackdown  
Tableland)

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Mimosaceae  
*Acacia podalyriifolia*  
Silver Wattle

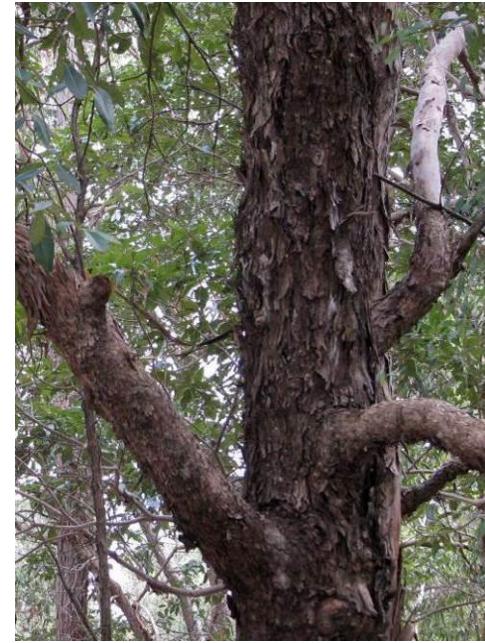

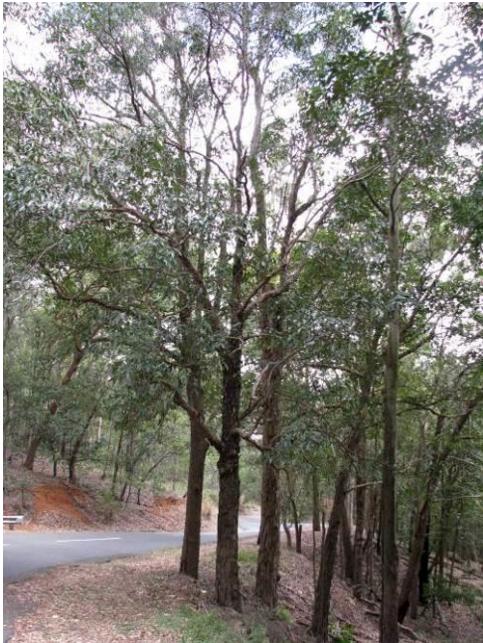

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Myrtaceae  
*Angophora woodsiana*  
Smudgee

Height: 20m

Distinctive bark

Food plant:  
Grey-headed Flying-fox

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Myrtaceae  
*Austromyrtus dulcis*  
Midgen, Midjim, Midyim  
Berry

Shrub: 50cm

Hardy – sun or shade, rockery

Bushfood – sweet edible  
berries/seeds

Attracts fruit eating birds. Dense  
foliage offers safety to small birds.

Myrtaceae  
*Babingtonia similis*  
Twiggy Myrtle

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Myrtaceae  
*Backhousia myrtifolia*  
Grey Myrtle  
  
Height: 6-15m

Myrtaceae  
*Corymbia citriodora* v  
*variegata*  
Spotted Gum

## Trees-Shrubs of Mt Gravatt Conservation Reserve

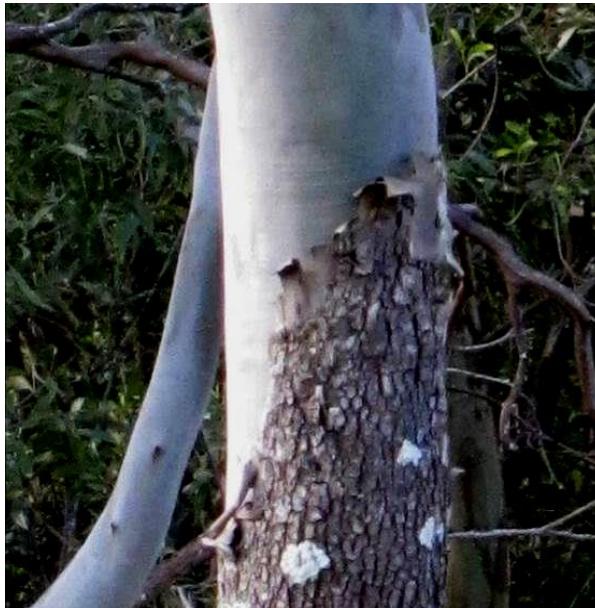

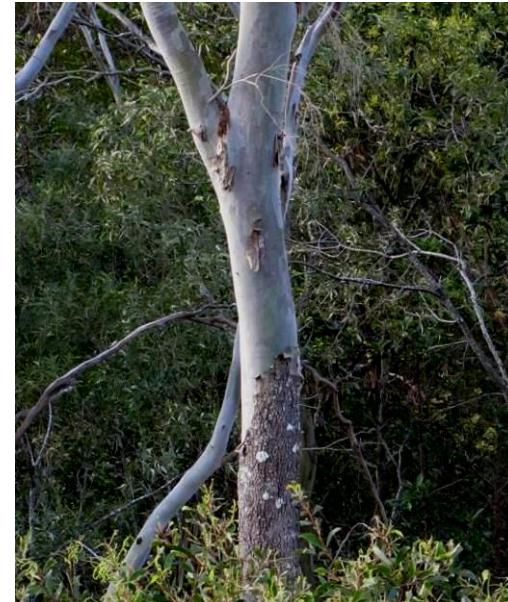

Myrtaceae

*Corymbia tessellaris*

Moreton Bay Ash

Height: 10-20m

Half-bark – rough tessellated bark  
on bottom changing to smooth  
grey/white on upper parts.

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Myrtaceae

*Corymbia torrelliana*

Cadaghi

**WEED!**

Environmental weed – BCC class R

Rainforest tree from North Qld

Dangerous for native bees –

Trigona carbonaria – flowers Nov.

– seeds form in Jan – bees

become

obsessed with

collection of

resin from seeds

and carry seeds

to nest.

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Myrtaceae  
*Eucalyptus grandis*  
Flooded Gum

Food tree: Rainbow Lorikeet

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Myrtaceae  
*Eucalyptus microcorys*  
Tallowwood

Leaves heavily fragrant when crushed. Reddish brown bark has distinctive pock marks.

Food tree: Koala  
Scaly-breasted Lorikeet

Myrtaceae  
*Eucalyptus racemosa*  
Scribbly Gum

Food tree: Koala  
Scaly-breasted Lorikeet

Caterpillar food plant:  
Scribbly Gum Moth  
*Ogmograptis scribula*

Tiny (2mm) Scribbly Gum Moths lay eggs under bark. Caterpillar burrows between layers of bark leaving distinctive "scribble".

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Myrtaceae  
*Eucalyptus tereticornis*  
Qld Blue Gum or Forest Red  
Gum  
  
25-45m  
  
Koala – favorite food tree

Myrtaceae  
*Leptospermum polygalifolium*  
Wild May  
  
<4m

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Myrtaceae

*Lophostemon confertus*

Brush Box

Caterpillar food plant:

Four-Spotted Cup Moth

Half bark – rough, grayish-brown  
lower, upper smooth pink-grey  
New leaf growth - whorl

## Trees-Shrubs of Mt Gravatt Conservation Reserve

<p>Myrtaceae <i>Syzygium australe</i> Creek Satinash</p> <p>Leaves aromatic when crushed</p> 			
<p>Myrtaceae <i>Xanthostemon chrysanthus</i> Golden Penda</p> <p>Coastal rainforest in North Qld - Townsville to Cape York</p>			

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Ochnaceae  
*Ochna serrulata*  
Mickey Mouse Plant

**WEED!**

Very limited response to  
Glyphosate poison

TreePopper effective when ground  
soft after rain.

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Oleaceae  
*Ligustrum sinense*  
Small Leafed Privet

**WEED!**

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Oleaceae  
*Notelaea longifolia*  
Long-leaved Mock-olive

3-7 metres

White flowers  
Purple-black fruit

Food for fruit eating birds.

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Oleaceae  
*Notelaea ovata*  
Netted Mock-olive

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Phyllanthaceae  
*Glochidion ferdinandi*  
Cheese Tree

Phyllanthaceae  
*Glochidion sumatranum*  
Buttonwood, Umbrella  
Cheese Tree

Hairy stems and leaves.  
Similar to Cheese Tree  
*Glochidion Ferdinandi* which has  
no hairs and stiff glossy dark  
green leaves.

Food plant for:  
Crested Pigeon  
Rainbow Lorikeet

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Pittosporaceae  
*Bursaria spinosa*  
Prickly Pine

Protection for small forest birds

Food plant:

- flowers - Imperial Hairstreak , Common Crow, Blue Tiger butterflies
- leaves – caterpillars of Fiery Copper and Bright Copper butterflies

(Right) Blue Tiger butterfly

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Pittosporaceae  
*Pittosporum revolutum*  
Forest Pittosporum

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Polygalaceae  
*Polygala virgata*

**WEED!**

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Proteaceae  
*Banksia integrifolia*  
    ssp *integritolia*  
Coastal Banksia

Food plant:  
Squirrel Glider  
Eastern Spinbill

Proteaceae  
*Persoonia iogyna*  
Geebung

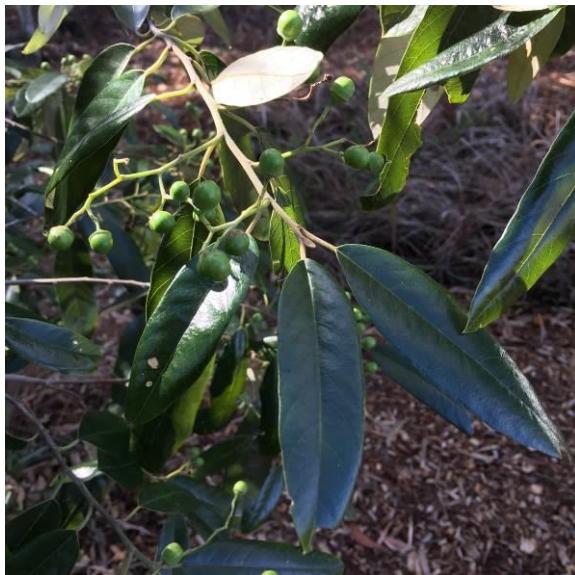

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Rhamnaceae  
*Alphitonia excelsa*  
Soapy or Red Ash

Leaves dark/mid green on top –  
powdery white underneath.  
Rub leaves in water for bush soap.

Caterpillar food plant:  
Small Green-banded Blue

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Rosaceae

*Eriobotrya japonica*

Loquat, Japanese plum

**WEED!**

Edible - small yellow/orange fruit –  
large seed

Origin – China

Rosaceae

*Rhaphiolepis indica*

Indian Hawthorne

**WEED!**

Suppresses regeneration and  
growth of native species

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Rosaceae

*Rubus moluccanus*

Molucca/Queensland

Broad-leaf Bramble

Red berry fruit

Rubiaceae

*Pomax umbellata*

No common name found

Shrub

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Rubiaceae  
*Psychotria lonicerooides*  
Hairy Psychotia

Rutaceae  
*Flindersia australis*  
Crow's Ash

Caterpillar food plant:  
Orchard Swallowtail

Female Orchard Swallowtail

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Rutaceae

*Zieria smithii*

Sandfly Zieria, Smithian Zieria,  
Dr Smith's Zieria

Listed as Endangered in  
Queensland

Planted:  
Gertrude Petty Place  
Firefly Gully

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Santalaceae

*Exocarpos cupressiformis*

Native Cherry

Bush food – fruit red when ripe

Caterpillar food plant:  
Spotted Jezebel butterfly

Looks similar to:  
She-oak *Allocasuarina*  
Dogwood *Jacksonia scoparia*

Ripe fruit  
Photo: Alan Moore

(Right) Tiny flower smaller than a pin head. Photo: Alan Moore

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Sapindaceae  
*Cupaniopsis anacardioides*  
Tuckeroo

Sapindaceae  
*Dodonaea triquetra*  
Hop Bush  
  
Leafcutter Bee

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Sapindaceae  
*Jagera pseudorhus*  
Foambark

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Sapindaceae  
*Koelreuteria elegans*  
Golden Rain

**WEED!**

Flowers spread hundreds of metres by wind when dry.

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Solanaceae

*Cestrum parqui*

Green Cestrum, Green

Poisonberry

**WEED!**

Noxious weed – BCC Class C

Foul smell from flowers and crushed leaves.

Solanaceae

*Solanum mauritianum*

Wild Tobacco Bush

**WEED!**

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Sterculiaceae  
*Commersonia bartramia*  
Brown Kurrajong

Thymelaeaceae  
*Wikstroemia indica*  
Bootlace Bush

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Tiliaceae  
*Grewia latifolia*  
Dog's Balls, Dysentery Plant

Ulmaceae  
*Celtis sinensis*  
Chinese Elm  
**WEED!**

Class 3 declared pest plant in Qld  
– supply and sale prohibited.

A highly invasive environmental weed native to Asia it sucks up water and destroys natural habitat. Produces thousands of small orange berries which are spread by birds, flying foxes and water.

Caterpillar food plant:  
White-banded Plane

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Ulmaceae

*Trema tomentosa*

Poison Peach

Leaves similar to *Lantana camara*  
but leaves alternate – if unsure  
crush leaf Lantana has very strong  
unusual smell

Caterpillar food plant:  
Speckled Line-blue

## Trees-Shrubs of Mt Gravatt Conservation Reserve

<p>Urticaceae  <i>Pipturus argenteus</i>          Native Mulberry</p> <p>Shrub/small tree – 6m</p> <p>Bushfood</p> <p>Caterpillar food plant:          Speckled Line-blue          Varied Eggfly          Yellow Admiral</p> <p>Flowers – nectar for adult butterflies</p>		
<p>Verbenaceae  <i>Lantana camara</i>          Lantana</p> <p><b>WEED!</b></p> <p><b>Poisonous</b> leaves, flowers and berries.</p> <p>Leaves similar to Poison peach but opposed – if unsure crush leaf Lantana has very strong unusual smell</p>		

## Trees-Shrubs of Mt Gravatt Conservation Reserve

Xanthorrhoeaceae

*Xanthorrhoea macronema*  
Bottle Brush Grass Tree

Uncommon.

Distinctive bottlebrush flower

## Trees-Shrubs of Mt Gravatt Conservation Reserve
