

ECHINACEA ARTISAN
SOFT ORANGE

Echinacea Artisan Collection

The NEW Artisan Collection™ elevates seed Echinacea to offer consistency of plant structure for uniform and highly branched, full plants. It also provides uniformity of flowering, so all plants are ready to sell at the same time. Plus, the benefit of a seed input provides flexibility for production so it fits better in your schedule.

Height 16 to 28 in. (41 to 71 cm)

Spread 10 to 25 in. (25 to 64 cm)

Weeks to Finish 13 to 17 weeks

Media Use well-drained, disease-free, soilless medium (pH 5.5 to 6.0, electrical conductivity [EC] 1.5-2.0 mS/cm)

Temperature Days: 65-75°F (18-24°C)
Nights: 60 to 65°F (16 to 18°C)

Key Tips Too wet soil during overwinter production can result in Root Rot and uneven plant development. Short days are recommended to bulk the liners prior to long day conditions. Continue short day conditions until plants reach at least 7 fully mature leaves. After short day treatment, grow under long day conditions (natural or extended).

Chlorine Treated Vegetable Seed

Many common diseases affecting vegetable plants start with bacteria on the surface of the seed. In an effort to fight these diseases, all tomato, pepper and eggplant seed used at Kube-Pak is cleaned in a chlorine bath.

All tomato, pepper and eggplant plug trays shipped by Kube-Pak will start with clean, chlorine-treated seed -- meaning healthier plants for you.
