

Supplementary Material to “Contribution of the Brazilian National Forest Inventory to the knowledge of Cerrado woody flora”

Table S3 - List of woody species collected by the IFN Cerrado, including information on states of occurrence, number of specimens collected, habit, vegetation type, and selected voucher specimen. A voucher specimen, either sterile or fertile, was chosen to represent each species. States where species were collected: BA = Bahia, DF = Distrito Federal, GO = Goiás, MA = Maranhão, MG = Minas Gerais, MS = Mato Grosso do Sul, MT = Mato Grosso, PI = Piauí, SP = São Paulo, TO = Tocantins. ⁺ = endemic to the Cerrado. Habitat based on Mapbiomas categories: G = grasslands, S = savannas, F = forests, A = anthropic areas, W = water. N/A = no data available.
