CATALOGUE 2024

INTRUDER ALARM TECHNOLOGY

Certified hybrid systems as well as wired and wireless alarm systems for private and commercial properties. With operating convenience at the door and on the app plus efficient system management, remote maintenance and more.

New in the ABUS range: the modern, digital Comfion wireless security system.

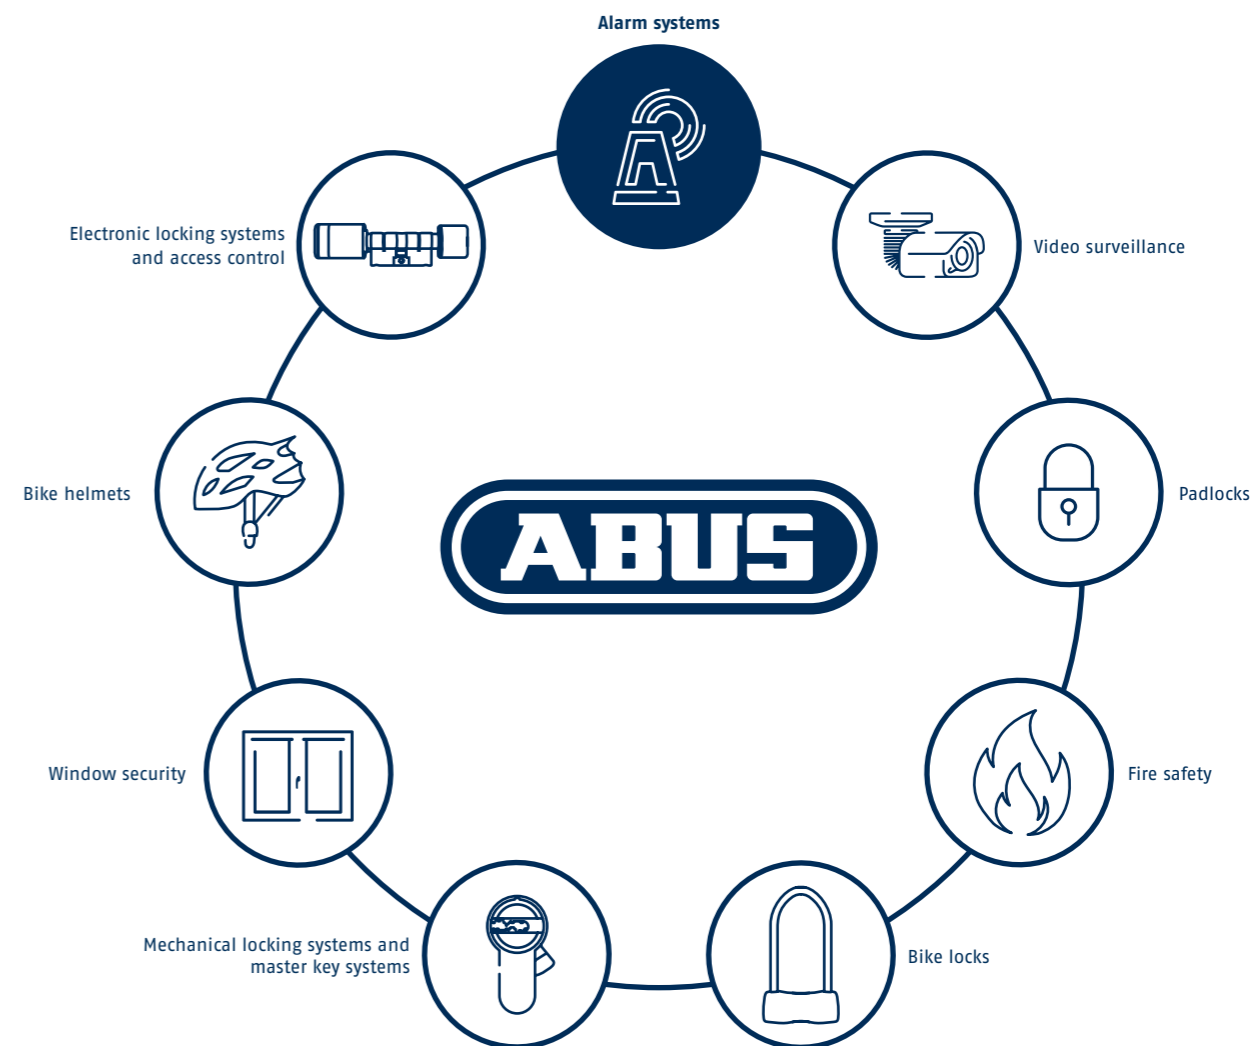

In our current catalogue, we provide you with an overview of the **2024 intruder alarm technology range** from ABUS Security Center. Detailed information for all products can be found at abus.com

MAKING A LITTLE LARGER

ABUS | August Bremicker Söhne
Home security, property security, mobile security

ABUS | Security Center
Alarm systems, electronic security systems, electronic locking systems, access control, switching devices, video surveillance, door intercom systems

ABUS | Pfaffenhain
Mechanical locking systems and master key systems

ABUS Security Center belongs to the ABUS Group and is part of the well-known global security brand.

The ABUS Group and its subsidiaries have stood for comprehensive security for nearly 100 years. As a traditional company with many years of experience, ABUS continues to set new standards and trends in the field of innovative security technology – with a particular focus on the smart interplay between electronics and mechanics.

High-quality security solutions are the result of the interplay of various factors such as hardware and software, service and advice – and the fusion of separate technologies into a comprehensive networked solution.

ABUS Security Center brings this philosophy of integrated security solutions to life with its products. And by doing so, it pursues the goal of making the everyday lives of its customers and users extra secure and comfortable.

OVERVIEW

ABUS INTRUDER ALARM SYSTEMS

SYSTEMS:

PRIVATE

COMFION | WIRELESS ALARM

- Ideal for detached houses, flats & small businesses
- 100% wireless, with encrypted radio transmission (1,000 m free field)
- Video verification, integrated NVR & smart home automation
- App operation, emergency call and service centre protocol, OTA updates

SECVEST | WIRELESS ALARM

- Ideal for detached houses
- All-round protection & active break-in protection
- Video verification (ABUS cameras)
- App operation, emergency call and service centre (ARC) protocols

COMMERCIAL

SECORIS | HYBRID ALARM

- Ideal for commercial properties & office complexes
- App operation & encrypted Secoris Wireless
- High genuine alarm precision & forced access
- Simple installation & remote maintenance (system bus, OTA update)

TERXON | HYBRID ALARM

- Ideal for large commercial properties & industry
- Extensive expansion capability (up to 264 zones)
- Digital emergency call and service centre (ARC) protocols (integrated dialler)
- Extensive switching scenarios (max. 93 outputs)

CERTIFICATIONS:

VdS Schadenverhütung is the leading institute for corporate security within the German Insurance Association. VdS home defines the standard for alarm systems in the private sector.

The EN 50131 standard defines the security level of intruder alarm systems (IAS) with radio frequency technology. EN Grade 2 offers protection against experienced burglars with special tools – ideal for private households.

Alarm systems with EN Grade 3 offer increased protection against highly experienced burglars with comprehensive tools, incl. electronic devices. Relevant for commercial properties, often in accordance with insurance requirements.

The Austrian Association of Security Companies (VSÖ) checks compliance with international norms and quality standards and defines guidelines for high-quality intruder alarm systems.

OVERVIEW

ABUS INTRUDER ALARM SYSTEMS

Item number	FUAAB0000	FUAAS0500
Description	Comfion wireless security system	Secvest Touch wireless alarm system
Max. number of wireless components	160	48
Max. number of wired detector groups	0 (160 system)	2 x 4CC or 4 x FSL
Max. number of bus lines / components	0 / 0	0 / 0
expandable* hybrid**	✓ / ✗	✓ / ✗
Partitions	40	4
Max. number of users	50	50
Max. number of events	> 10,000	600
Max. number of keypads	160	8
Integrated siren	✗	✓
Outputs	160 wireless / 0 wired	32 wireless / 4 wired
Video integration / Number of cameras	✓ / 4	✓ / 6
Storage location	Control panel (MicroSD = events / 2.5" hard drive = 24/7 recording)	Control panel (pictures) / Camera (videos)
Integration Access control	✓ (wired)	✓ (wired)
Home automation	100 scenes & if/then automated functions	10 combination outputs
Certifications	EN 50131 Level 2	EN 50131 Level 2 VdS home VSO P/S (FUAAS0000)
Radio frequency	868.0 - 868.6 MHz	868.6625 MHz
Wireless range (free field)	1,000 m	500 m
Max. range with repeater (free field)	2,600 m (2 repeaters cascaded)	1,000 m
Operating functions (user)	Keypad, remote control, app	Keypad, remote control, app
Configuration (installer)	App, web interface	Control panel, web interface
Installer portal / Remote access to WBI	ABUS Cloud / ✓	ABUS Server / ✓
Communication - Notification types	Push, email, text message, call, emergency call and service centre	Push, email, text message, call, emergency call and service centre
Communication - Ethernet / Mobile network	✓ / ✓	✓ / optional
Telecommunications standard	2G / 3G / 4G	PSTN, 2G / 4G (via ESM050001)
Control centre protocols	SIA-DC09	Fast Format, Contact ID, SIA (analogue and IP); Care: Scancom, Scanfast, Tunstall
AUA category	SP2 (GSM), SP5 (LAN), DP3 (LAN+GSM)	SP2, DP2 (via ESM050001)

Item number	ESEZ70500 / ESEZ70500	AZ4200
Description	Secoris intruder alarm control panel EN Level 2/3	Terxon LX hybrid alarm control panel
Max. number of wireless components	0 (200 system)	0 (256 system)
Max. number of wired detector groups	10 (200 system)	8 (256 system)
Max. number of bus lines / components	2 / 50	2 / 32 extensions & 128 keypads

AUA category	SP3, DP2 (via ESM060000)	SP2

*expandable: integration of wired detector groups with hybrid module
**hybrid: Integration/extension of wired/wireless detector groups using extension modules

COMFION

WIRELESS ALARM

NEW

The professional, innovative wireless security system for the smart home. With certified security (EN Grade 2) and digital alarm transmission to an emergency call control centre, it is the ideal security system for private households and smaller commercial properties. Digital and modern: connected to the mains and a router, access to the control panel is no longer necessary for operation. The battery-operated wireless components of the ABUS Comfion are quick and easy to install. Intelligent networking with a home automation system is also simple. For reliable all-round protection in the event of break-ins, emergencies and water damage – combined with smart living convenience.

Up to 160 battery-operated wireless components enable extensive and customised equipment for private and small commercial properties. With unprecedented flexibility in project planning, not least thanks to the powerful, securely encrypted 868 MHz radio transmission.

Installation is carried out without the hassle of installing cables or taking into account a radio-inhibiting building structure or existing power supply. Moving the entire system is also easier than ever – making Comfion the ideal, certified system for flats and private homes.

The Comfion also impresses across the board when it comes to operation: whether with the intuitive app (incl. push messages), with the mini remote control on a key ring, on the wall keypad or directly at the front door – thanks to integrated WLX Pro wireless cylinders or FaceXess door stations with face recognition. Up to 4 LAN cameras are integrated directly into the alarm control panel – including internal recording of the video images.

Maximum convenience for the specialist installer: after installation, all Comfion systems are clearly managed in the ABUS Cloud – from anywhere on a PC. Updates are simply uploaded to the control panel via remote access and OTA updates – without the need for long journeys.

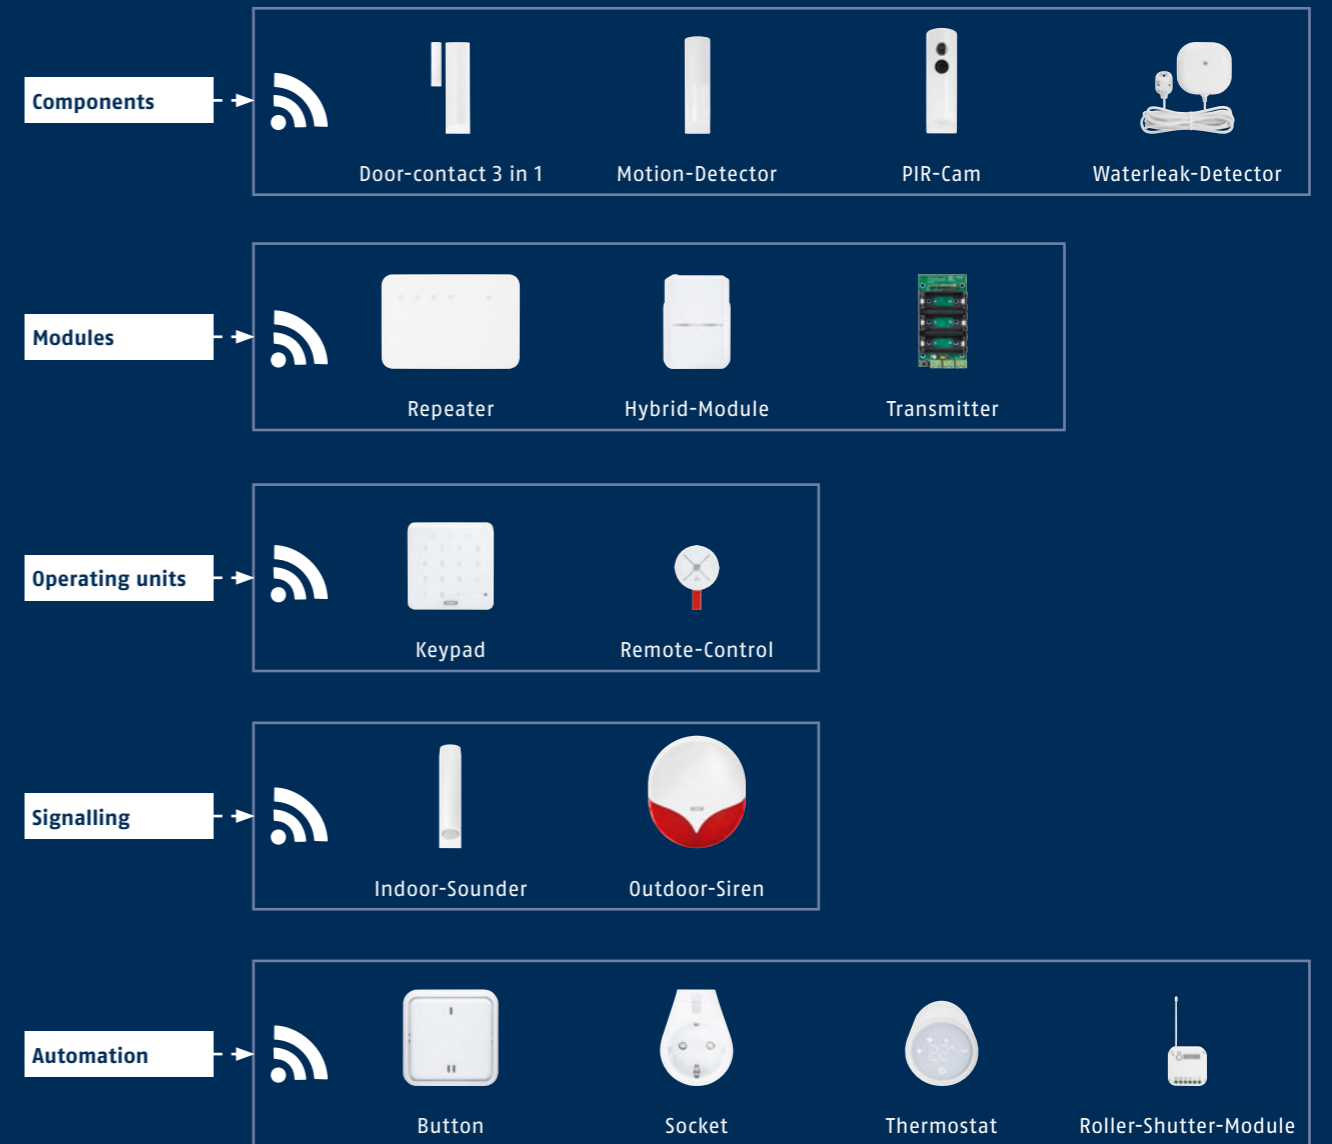

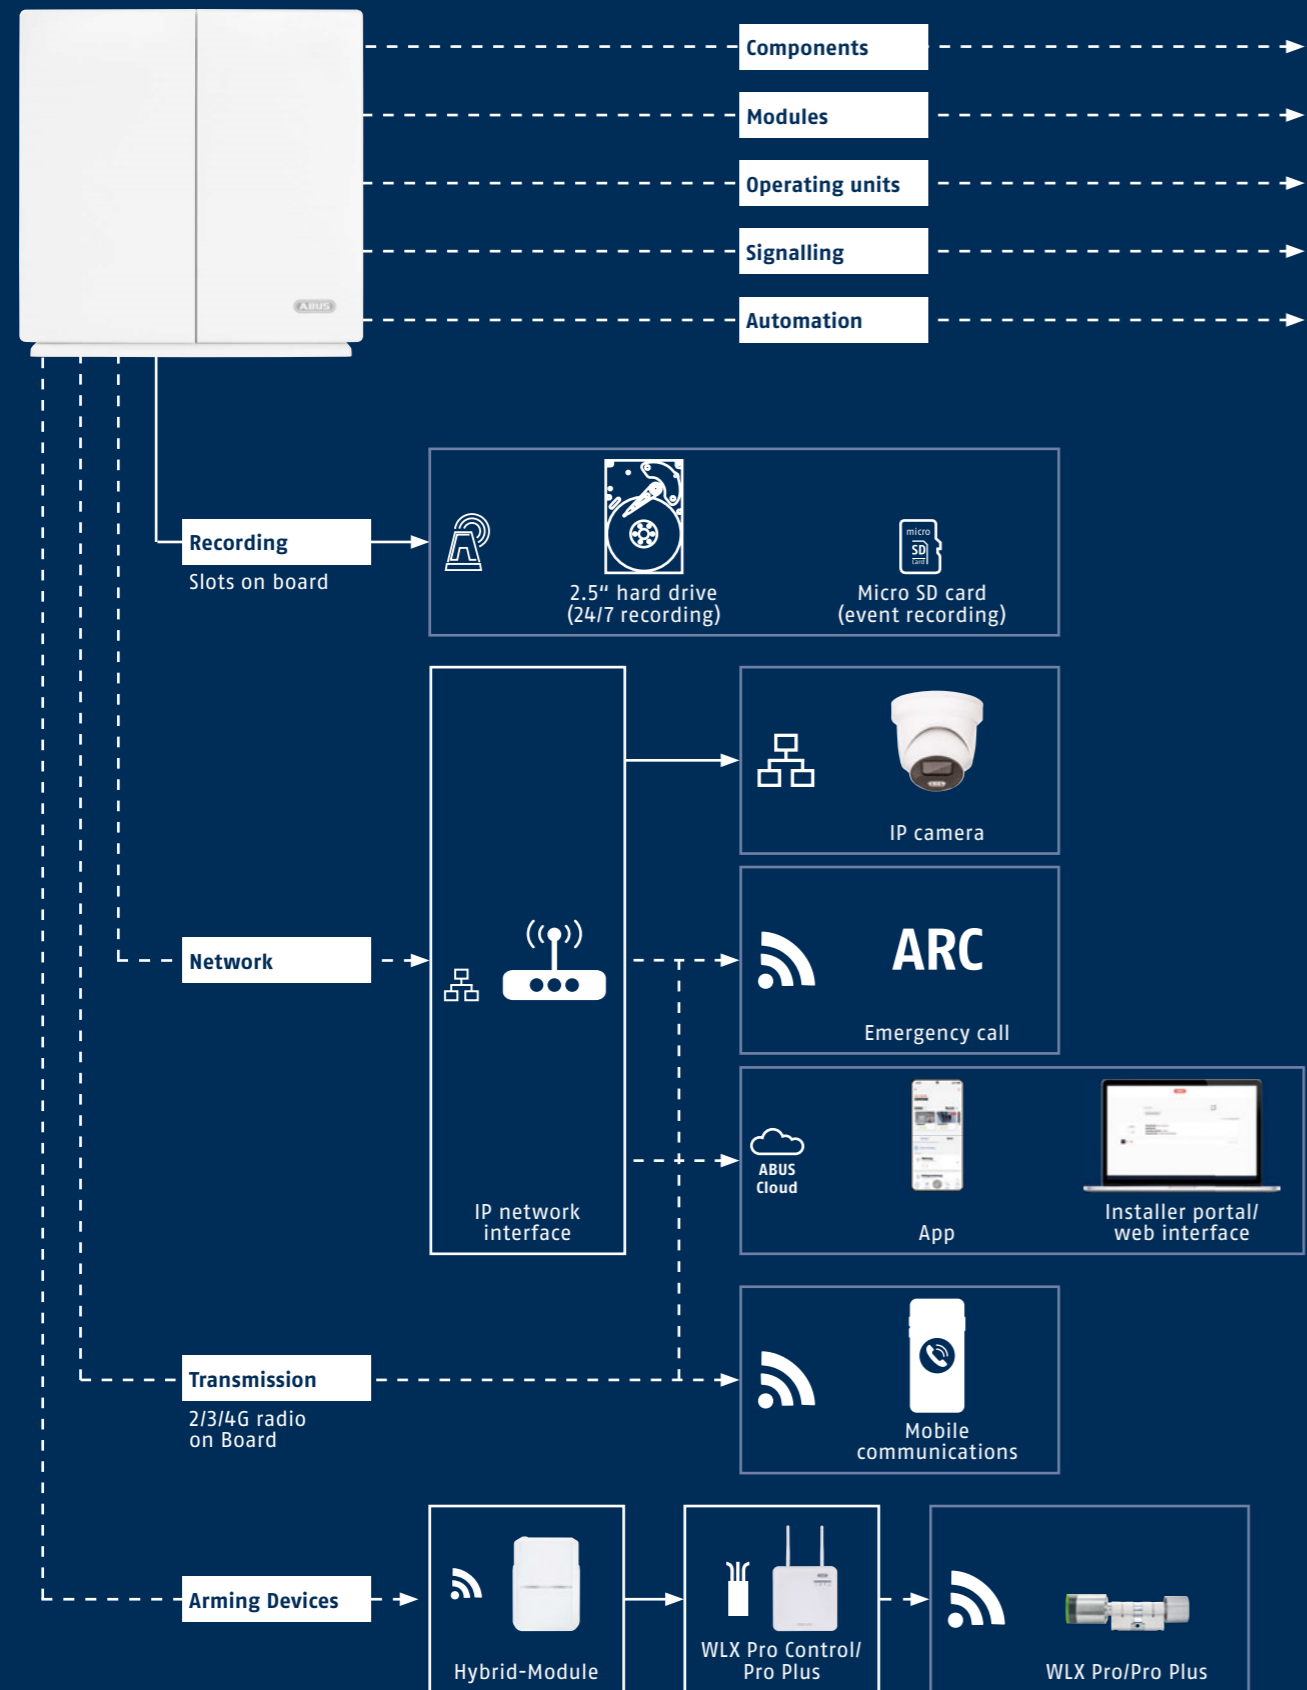

KEY ADVANTAGES AT A GLANCE:

- Alarm control panel as a digital white box: operation without access to the control panel (e.g. in the infrastructure room)
- Video verification with up to 4 LAN cameras incl. recording in the control panel (native NVR)
- Up to 160 battery-operated wireless components per system (alarm detectors, keypads, sirens, etc.)
- Divide objects into up to 40 partitions for maximum flexibility when installing and operating the system
- Home automation: simple integration of internal and external sensors and actuators (e.g. lighting control, heating)
- Up to 100 automation scenarios, including control of cameras (e.g. PTZ positions) and access components or locking elements (e-door opener, motorised lock, etc.)
- Up to 1,000 m wireless range (free field) and securely encrypted radio connection (AES128) – optimally protected against tampering and can also be extended using a repeater if required
- Forced disarming with WLX Pro cylinder and FaceXess door station (face recognition)
- Transmission of IP-based protocols to emergency call/service control centres (mobile communication module on-board in the control panel)
- Management of all systems in the ABUS Cloud, incl. remote maintenance and over-the-air updates (OTA)
- Certified according to EN 50131-1 Grade 2

ABUS Comfion is a professional security system that protects the modern home and controls smart scenarios.

SYSTEM OVERVIEW

COMFION

ABUS IP CAMERA COMPATIBILITIES:

Item number	Description
IPCB34511A	IP Mini Tube 4 MPx (2.8 mm)
IPCB34511B	IP Mini Tube 4 MPx (4 mm)
IPCB34611A	IP Mini Tube 4 MPx Black (2.8 mm)
IPCB38511A	IP Mini Tube 8 MPx (4K, 2.8 mm)
IPCB38511B	IP Mini Tube 8 MPx (4K, 4 mm)
IPCB44511A	IP Mini Dome 4 MPx (2.8 mm)
IPCB44561A	IP Mini Dome Wi-Fi 4 MPx (2.8 mm)
IPCB54511A	IP Spherical Dome 4 MPx (2.8 mm)
IPCB54511B	IP Spherical Dome 4 MPx (4 mm)
IPCB58511A	IP Spherical Dome 8 MPx (2.8 mm)
IPCB58511B	IP Spherical Dome 8 MPx (4 mm)
IPCB64521	IP Tube 4 MPx (2.8-12 mm)
IPCB64621	IP Tube 4 MPx Black (2.8 - 12 mm)
IPCB68521	IP Tube 8 MPx (2.8 - 12 mm)
IPCB68621	IP Tube 8 MPx Black (2.8 - 12 mm)

Item number	Description
IPCB74521	IP Dome 4 MPx (2.8-12 mm)
IPCB78521	IP Dome 8 MPx (2.8 - 12 mm)

COMFION WIRELESS-ALARM

EN 50131
2

Item number **FUAA80000**

Description	Comfion Wireless-Security-System
-------------	----------------------------------

- Radio security system for reliable burglary protection & all-round protection (e.g. in case of fire). Secures all rooms, windows, doors; alerts locally, via app and security service, creates a high level of living comfort via smart home automation
- Very easy to operate for 50 people (40 sub-areas) via app, remote control, control panel and at the door via e-locking cylinder WLX Pro or video door station with face recognition (forced access)
- Powerful security system with up to 160 wireless components: Includes control panel, alarm detector (PIR motion detector, opening detector), siren, smart sensors/actuators, etc
- The alarm system and the smart home are always with you: Operate and control everything from anywhere via the smartphone app, receive video insights and instant alarms
- 100 smart home scenarios configurable via web interface: for example, light control / roller shutters for presence simulation, garage door, saving heating costs (motion detector), coming home sequence (system off, heating and home entertainment on)
- Secure radio connection with a long range of up to 1,000 m (free field), expandable with repeaters; with high manipulation/data protection (AES128-encrypted); direct status feedback from the components
- Secure, fast alerting via push message, telephone call or connection to an emergency call control center (SIA DC-09), integrated mobile radio module for redundant communication (mobile radio / 4G) during alerting
- Surveillance recorder function for up to 4 security cameras (model types in the list of compatible devices). With video memory for event-controlled recording (motion and person detection) or 24/7 continuous recording
- Compatible with ABUS access control / locking system wAppLoxx Pro and FaceXess (via I/O module)
- EN50131 Grade-2 certified

Number of components	160
Sub-areas/monitoring areas	40
Number of users	50
Number of events	10000
Operation	App
Programming	via Web Server or App
Remote configuration	Yes
Event memory	Yes
Communication/alarm	Monitoring station, voice, SMS, email, push notification
Sabotage monitoring	Yes
Radio frequency	868 MHz
Protocols	ARC: SIA-DC09
Connections	9 V DC-Jack, RJ45 (LAN), SATA-Connector, SIM-Card-Slot, MicroSD-Card-Slot
Network access	Ethernet
Network protocols	HTTPS
Integrated siren	No
Backup power supply	Lilon 7.4V 2500mAh
Voltage monitoring	Yes
Environmental class	II
Certifications	EN 50131 Grade 2
Housing material	ABS
Net weight	0.596 kg
Dimensions (W × H × D)	165 x 165 x 61 mm
Scope of delivery	1 x Comfion Security System • 1 x Rechargeable battery pack • 1 x Power adaptor • 1 x Wall mount • 1 x LAN-Cable • 1 x Mounting material

Item number **FUBE80010**

Description	Comfion Wireless-Keypad	Comfion Wireless-Remote-Control
-------------	-------------------------	---------------------------------

- Control panel with for arming/disarming and status display of the Comfion alarm system
- Arming, disarming and partial arming by numerical code; switching of partitions separately from the actual living area / main house
- Touch user interface with backlit keypad: Proximity sensor activates device and button illumination; light/brightness sensor dynamically adjusts the backlighting to the lighting situation

- Mini wireless remote control for arming/disarming the Comfion wireless alarm panel, small and handy as a key fob
- 3 freely programmable buttons for arming/disarming or switching previously set home automation scenarios, such as „Coming Home“
- Multicolored status LED provides information at a glance about the command being executed (activated, deactivated, partially armed, fault)

Sabotage monitoring	Yes	No
Compatible with	Comfion	Comfion
Environmental class	II	II
Certifications	EN 50131 Grade 2	EN 50131 Grade 2
Dimensions (W × H × D)	93 x 95 x 29 mm	10 x 40 mm
Scope of delivery	1 x Comfion Wireless-Keypad • 3 x Batteries LR06, AA, Alkaline • 1 x Adhesive pad • 1 x Mounting material	1 x Comfion Remote-Control • 1 x Battery CR2032
Recommended accessories	AZBT10100 1.5V AA/LR06 Alkaline Battery ProceII MN1500	FU2991 CR2032 3 V Li Replacement Battery

Item number **APP80200**

Description	Comfion App (iOS)	Comfion App (Android)
-------------	-------------------	-----------------------

- Free smartphone app for configuring and operating the Comfion security system
- The system can also be controlled, armed and disarmed remotely via the app
- Intuitive dashboard with the most important buttons and system information:
 - Display of system status, arming/disarming, camera preview, direct scene switching
- Live view of video streams and playback of recordings from integrated IP cameras
- Push notifications for alarms, video events and other system messages
- Opening the front door or apartment door via the app if a WappLoxx locking cylinder is integrated into the system
- Configuration of scenes (switching via the app) and automations (if-then links) by the system installer. If desired, the user can also be given approval for the configuration.
- Invitation function for new users and assignment of authorizations

Item number FUM080000

Item number FUM080200

Description	Comfion Wireless-Hybrid-Module	Comfion Wireless-Transmitter
	<ul style="list-style-type: none"> Hybrid module for connecting wired devices and integrating them into the Comfion security system In the event of a power failure, the hybrid module's battery operation ensures functionality – for up to 24 hours. 3 potential-free outputs and 3 inputs (NC or NO) Option to integrate the wAppLoxx Pro access control system with pre-configuration / wiring diagram available Mechanical tamper protection via integrated wall tear-off contact Installation by a specialist company Secure radio connection to the Comfion alarm control panel, with a long range of up to 1,000 m (free field) and high tamper/data protection (AES128 encryption) Power supply primarily via mains adapter and secondarily via battery operation (24-hour battery life) 	<ul style="list-style-type: none"> Wireless transmitter for integrating a wired detector into the Comfion alarm system. Equipped with an alarm input, a sabotage input and a voltage output Integrated acceleration sensor for sabotage monitoring Installation by a specialist company Secure radio connection to the Comfion alarm control panel, with a long range of up to 1,000 m (free field) and high tamper/data protection (AES128 encryption) Power supply via battery operation, alternatively the transmitter can supply the connected detector with power via the batteries EN50131 Grade-2 certified alarm system Can be used as a vibration sensor (thanks to integrated acceleration sensor)

Display	LED	LED
Programming	Comfion App	Comfion App
Outputs	3 Relay outputs (NC/COM/NO)	DC-Terminal 3.3V
Inputs	3 (NC/NO) 0/12V	Alarm / Sabotage Terminal
Compatible with	Comfion	Comfion
Environmental class	II	-
Certifications	conform according to EN 50131-1	-
Dimensions (W x H x D)	100 x 142 x 35 mm	43 x 84 x 16 mm
Scope of delivery	1 x Comfion Wireless-3I/3O-hybrid module • 4 x Batteries LR03, AAA, Alkaline • 1 x Mounting material	1 x Comfion Radio-Transmitter • 3 x Batteries CR123A, 3V, Li
Recommended accessories	ACAC00058 International power supply 12V/3A	FU2998 3V Lithium Photo Cell CR123A

Item number FUM080100

Description	Comfion Wireless-Repeater
	<ul style="list-style-type: none"> Radio repeater that amplifies the radio signal where the building structure interferes The repeater amplifies the radio signal of up to ten wireless components – these are manually assigned to the repeater Up to two repeaters can be used in series, with a maximum range of 2,600 m (free field) Secure radio connection to the Comfion alarm control panel with long range. Strong tamper protection (AES128 encryption) Power supply via a 12 V power supply unit and emergency power buffer in the event of a power failure EN50131 Grade-2 certified

Display	LED
Programming	Comfion App
Connections	12V DC Terminal
Battery - type	Battery-pack (LiPo)
Max. backup power supply duration	12
Compatible with	Comfion
Environmental class	II
Certifications	EN 50131 Grade 2
Housing material	Plastic
Net weight	0.325 kg
Dimensions (W x H x D)	190 x 31 x 130 mm
Scope of delivery	1 x Comfion Radio-Repeater • 1 x Mounting material
Recommended accessories	AZZU10011 International Switching-Mode Power Supply 12 V/1.5 A (Cord)

Item number **FUMK80000**

Item number **FUMK80100**

Description	Comfion Wireless-Door-Contact	Comfion Wireless-Door-contact 3 in 1
	<ul style="list-style-type: none"> Opening detector for indoor use, discreet and space-saving (battery operation, without cable) Top burglary protection: Reliably detects the opening of windows and doors and reports any unauthorized access to the Comfion alarm system Effective perimeter protection for access to the house: Residents can stay in the house when the alarm system is activated internally Can be used as a sensor for home automation, e.g. for coming home scenarios Flexible mounting with the magnet on the left or right, including shims for different heights Fits even in narrow installation spaces thanks to its slim dimensions (detector only 24 mm wide) Secure radio connection between Comfion alarm control unit and control panel, with a long range of up to 1,000 m (free field) and AES128 encryption Mechanical tamper protection against opening and dismantling Power-saving: magnetic contact with up to 4 years of battery life EN50131 Grade-2 certified 	<ul style="list-style-type: none"> 3-in-1 wireless detector that can be used separately as an opening detector, vibration detector or wireless module for a wire detector connection – or in combination of the detector types; in a slim, only 24 mm wide device (battery operation) Opening detector: Detects the opening of windows and doors and reports it to the alarm control panel. For safe, convenient presence protection. Optionally, a wire contact can be connected directly to the detector, for example as a glass breakage or opening detector Vibration detector: Detects vibrations when breaking open and through walls, doors, safes, etc. and when moving objects Radio module: To integrate a wireless detector zone into the alarm system via radio, it is connected to the detector input Secure radio connection between Comfion alarm control unit and control panel, with a long range of up to 1,000 m (free field) and high tamper/ data protection (AES128 encryption) Flexible mounting with the magnet on the left or right, including shims for different heights Mechanical tamper protection against opening and dismantling Power-saving: up to 5 years of battery life EN50131 Grade-2 certified

Scope of delivery	1 x Comfion Radio-Motion-detector • 4 x Batteries LR03, AAA, Alkaline • 2 x Adhesive pad • 1 x Mounting material	1 x Comfion Wireless-PIR-Cam • 3 x Batteries CR123A, 3V, Li • 1 x Adhesive pad • 1 x Mounting material

Item number FUWM80000

Description Comfion Wireless-Waterleak-Detector

- Wireless water detector whose wired sensor informs the alarm control panel when it comes into contact with water, triggering an alarm there
- The detector is mounted at a safe distance from the water, the sensor is positioned at the desired location using a 450 cm cable; easy cable routing using the supplied guide rails
- Secure radio connection to the Comfion alarm control panel, with a long range of up to 1,000 m (free field) and high tamper/data protection (AES128 encryption)
- Power-saving: up to 5 years of battery life

Sensor type	Contact sensor
Type of detection	Resistance measurement
Battery - type	AA, LR06, 1.5V, Alkaline
Battery - max. battery life	5 y
Compatible with	Comfion
Housing material	Plastic
Dimensions (W x H x D)	85 x 85 x 40 mm
Scope of delivery	1 x Comfion Wireless-Waterleak-Detector • 3 x Battery LR06, AA, Alkaline • 6 x Cable holder • 1 x Mounting material

EN 50131
2

Item number FUSG80000

Description Comfion Wireless-Outdoor-Siren

- Wireless outdoor siren of the Comfion alarm system (battery operation, or optionally also via a mains adapter)
- Alarm and deterrence: The loud alarm (105 dB) in the outdoor area is visually supported by a red flashing light.
- Secure radio connection to the Comfion alarm control panel with long range (up to 1,000 m in open field). Strong tamper protection (AES128 encryption)
- Indicates the input/output delay as well as arming and disarming; optionally, it can also indicate that the system is armed.
- Sabotage protection: Immediate alarm when attempting to open or dismantle the siren
- Power-saving: up to 4 years of battery life
- Push message on the Comfion app, for example when the battery is low
- EN50131 Grade-2 certified

Sound pressure	105	105
Adjustable alarm tone	Sound pressure level: Low: 95 db(A) / Medium: 100 db(A) / High: 105 db(A)	Siren sound & 5 announcements via Loudspeaker
Connections	DC-Terminal 12V DC / 1 A	Mini USB
Sensor type	Thermometer	thermometer/hygrometer
Battery - type	Batteries CR123A, 3V, Li	C (LR14) Alkaline 1.5V
Battery - max. battery life	3	4
Compatible with	Comfion	Comfion
Environmental class	IV	II
Certifications	EN 50131 Grade 2	EN 50131 Grade 2
Housing material	Plastic	Plastic
Net weight	0.74 kg	0.172 kg
Dimensions (W x H x D)	200 x 230 x 70 mm	45 x 200 x 58 mm
Scope of delivery	1 x Comfion Wireless-Outdoor-Siren • 4 x Batteries CR123A, 3V, Li • 1 x Mounting material	1 x Comfion Wireless-Indoor-Sounder • 4 x Batteries LR14 1.5V • 1 x Adhesive pad • 1 x Mounting material
Recommended accessories	AZZU10011 International Switching-Mode Power Supply 12 V/1.5 A (Cord) • FU2998 3V Lithium Photo Cell CR123A	AZBT10300 1.5V C/LR14 Alkaline Batterie Procell Baby

EN 50131
2

Item number FUSG80100

Description Comfion Wireless-Indoor-Sounder

- Wireless indoor siren with voice announcements and loud alarm (105 dB)
- Alarm and deterrence: The loud alarm sound exposes the burglar, impairs his orientation in the room and forces him to flee
- Alarm and system messages in plain text (five preset voice announcements)
- With integrated thermometer and hygrometer for home automation, works depending on the room temperature and humidity (e.g. turn down the heating, automatic ventilation)
- Secure radio connection to the Comfion alarm control panel, with a long range of up to 1,000 m (free field) and high tamper/data protection (AES128 encryption)
- Mechanical tamper protection against opening and dismantling
- Power-saving: up to 3 years of battery life
- Push message on the Comfion app, for example when the battery is low
- EN50131 Grade-2 certified

Item number FUAT80000

Description Comfion Wireless-Button

- Wireless push-button with two freely assignable buttons. Can perform up to four different actions, for example for smart home scenarios, with schedules or detectors and sensors from the ABUS Comfion series
- Secure radio connection to the Comfion alarm control panel with a long range of up to 1,000 m (free field) and high tamper/data protection (AES128 encryption)
- Flexible mounting using the supplied wall-click bracket for mobile use of the push-button. Alternatively, adhesive mounting is also possible – on basically any smooth surface in the house.
- Power-saving: up to 2 years of battery life

Compatible with	Comfion
Environmental class	II
Housing material	Plastic
Dimensions (W × H × D)	80 x 80 x 17 mm
Scope of delivery	1 x Comfion Radio Button • 2 x Batteries LR03, AAA, Alcaline • 1 x Adhesive pad • 1 x Mounting material

Item number FUSH80000

Description Comfion Wireless-Socket

- Compact adapter plug for wireless switching of connected devices, including power consumption measurement
- Simple operation with a smartphone via the Comfion app, or manually via the button on the radio-controlled socket outlet
- Integration of the socket in smart home scenarios, with schedule or detectors / sensors from the ABUS Comfion series: such as full lighting in the event of an alarm, light control when coming home or presence simulation
- Power consumption of plugged-in devices is displayed in the Comfion app
- LED provides visual feedback during commissioning and function
- Secure radio connection to the Comfion alarm control panel with a long range of up to 1,000 m (free field) and high tamper/data protection (AES128 encryption)
- Switching capacity: up to 3 kW

Switching power	3000
Operation	button on device, Comfion App
AC voltage supply	230
Compatible with	Comfion
Housing material	Plastic
Dimensions (W × H × D)	50 x 57 x 59 mm
Scope of delivery	1 x Comfion Wireless-Socket

Item number FUSH80010

Description Comfion Wireless-Relay Module (flush-mount)

- 230 V module for switching room lighting for compact installation in the flush-mounted box behind the light switch
- The module is conveniently switched via the Comfion smartphone app or wireless push-button (FUAT80000)
- Inputs for up to two classic 230 V switches (push-buttons) for manual switching (changeover switching possible)
- Can also switch home automation applications via potential-free switching contact
- Secure radio connection to the Comfion alarm control panel with long range (up to 1,000 m in open field). Strong tamper protection (AES128 encryption)

Item number FUSH80020

Description Comfion Wireless-Roller-Shutter-Module

- 230 V module for controlling roller shutters and blinds for installation in flush-mounted boxes
- Easy operation with a smartphone via the Comfion app, remote control or wireless wall switch; individual adjustment of position and tilt angle
- Secure radio connection to the Comfion alarm control panel, with a long range of up to 1,000 m (free field) and high tamper/data protection (AES128 encryption)
- The current position of the shutters and blinds is detected and reported: ideal for integrating the module into smart home scenarios
- with automatic calibration function
- existing switches for the roller shutters can still be used

Display	LED	LED
Switching power	2500 (resistive load), 1200 (Incandescent load), 320 (fluorescent load), 200 (LED - self balasted lamp bulb)	1000 (resistive load), 400 (motor load)
AC voltage supply	100 - 240	100 - 240
Installation type	Flush socket	Flush socket
Compatible with	Comfion	Comfion
Environmental class	II	II
Housing material	Plastic	Plastic
Net weight	0.034 kg	0.03 kg
Dimensions (W × H × D)	43 x 17 x 42 mm	42 x 43 x 18 mm
Scope of delivery	1 x FUSH80010 - Comfion Radio Relay module • 1 x Mounting material	1 x FUSH80020 - Comfion Radio Roller-Shutter/Blinds module

Item number FUSH80100

Description Comfion Wireless-Radiator-Thermostat

- Wireless radiator thermostat for easy control of radiators exactly as required – fully automated via Comfion Automation and app
- Eco mode regulates the temperature according to set max/min values, schedule mode follows an individual weekly program, manual operation works via the touch display and can be deactivated in lock mode
- A sudden drop in temperature (e.g. when a window is open) is detected and the heating is switched off; there is also a frost protection function
- Easy installation without special tools on all valves with M30x1.5 thread. 6 special adapters supplied enable use with all common valve types.
- Integration of the thermostat in smart home scenarios, with schedule or detectors/sensors from the ABUS Comfion series

Display	LED-Display
Operation	Touch-Display, Comfion App
Sensor type	thermometer
Battery - max. battery life	0.5
Compatible with	Comfion
Environmental class	II
Housing material	Plastic
Net weight	0.128 kg
Dimensions (W x H x D)	83 x 50 mm
Scope of delivery	1 x FUSH80100 - Comfion Radio Thermostat • 6 x radiator adaptors • 2 x AA, LR06, 1.5V, Alkaline

Item number FUM080300

Description Comfion Radio-Test-Box

- Handy radio test box as an accessory for the Comfion security system, with which system installers can analyze the radio connection and range on-site
- Detects all signals in the frequency range and recognizes their power
- Analyzes radio ranges and any existing interference transmitters in the building
- Displays radio utilization in the Comfion radio band – for immediate analysis
- Detects incoming signals from Comfion wireless components
- Up to ten hours of the radio signals recorded by the test box, with all data, are stored in the internal flash memory – with export option

Display	Segment Display, LEDs
Measurement range	868.0 - 868.6 MHz
Protocols	Comfion Radio
Inputs	USB-C
Environmental class	II
Housing material	Plastic
Net weight	0.11 kg
Dimensions (W x H x D)	85 x 40 x 85 mm
Scope of delivery	1 x FUM080300 - Radio Text-box • 1 x Adhesive pad • 1 x Mounting material

Item number MUK080000

Description Comfion Demo Case (not equipped)

- Sample case for the professional demonstration of Comfion at the customer
- The elegant case impresses with its simple elegance and enhances your Comfion product presentation, while the products are well protected during transport thanks to the black foam inlay.
- The following products are intended for the case and must be ordered separately:
FUAA80000, FUBE80000, FUBE80010, FUBW80000, FUMK80100, FUBW80200, FUSG80100, FUSH80000

Comfion Wireless-Door-contact 3 in 1

Housing material	Aluminium
Dimensions (W x H x D)	460 x 320 x 105 mm
Scope of delivery	1 x Sample case Comfion (unequipped)
Required accessories	FUAA80000 Comfion Wireless-Security-System • FUBE80000 Comfion Wireless-Keypad • FUBW80000 Comfion Wireless-Motion-Detector • FUMK80100 Comfion Wireless-Door-Contact 3 in 1 • FUBW80200 Comfion Wireless-PIR-Cam • FUSG80100 Comfion Wireless-Indoor-Sounder • FUSH80000 Comfion Wireless-Socket

SECVEST WIRELESS ALARM

Reassuring for residents or staff: Reliable technology ensures your personal safety around the clock.

Not only with all-round protection from burglary, fire and water damage and in case of emergency: in combination with mechatronic ABUS window/door locks, the Secvest is the only wireless alarm system that actively protects against the risk of burglary. Conclusion: The perpetrator is detected or driven away before they make it into the building. The privacy of the residents - sometimes the most important factor affected by a burglary - remains completely unviolated.

A clear advantage of wireless technology: The alarm system can be installed in just a few hours - without pulling cables, possibly knocking open the walls and the associated dirt. By integrating additional components, you can expand the system scope as required, e.g. add wired detectors, attach opening detectors integrated into the window on site or wireless door cylinders. Should you move house, the Secvest and its components can be dismantled at any time and reinstalled in your new home, office or business.

The operating convenience of the Secvest also speaks for itself: Whether with the app on the smartphone (including push notifications in the event of an alarm), with the handy remote control on the key ring, on the keypad or directly by unlocking and locking the front door on the WLX wireless cylinder.

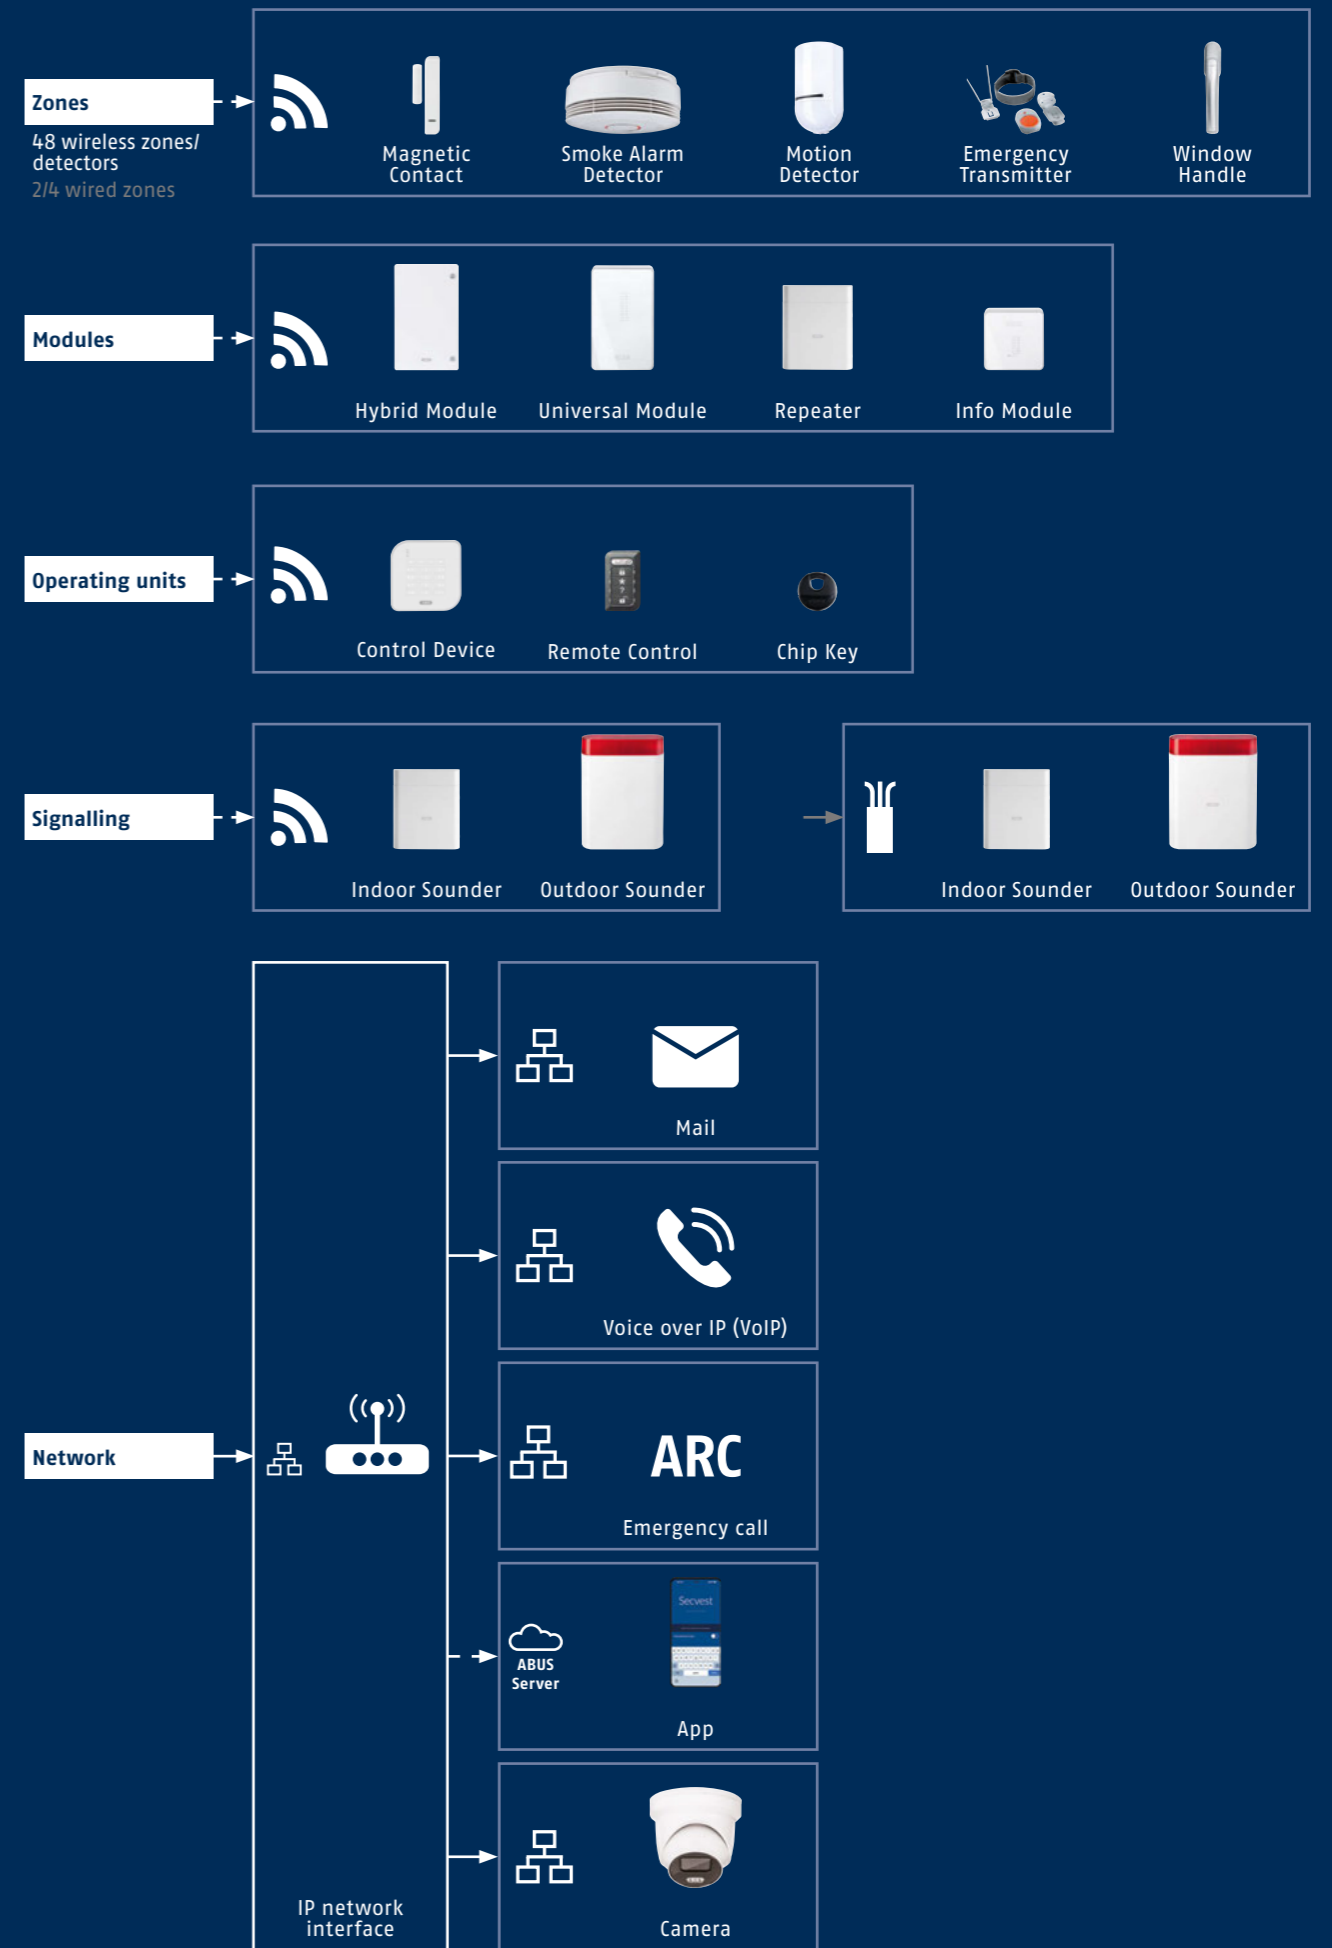

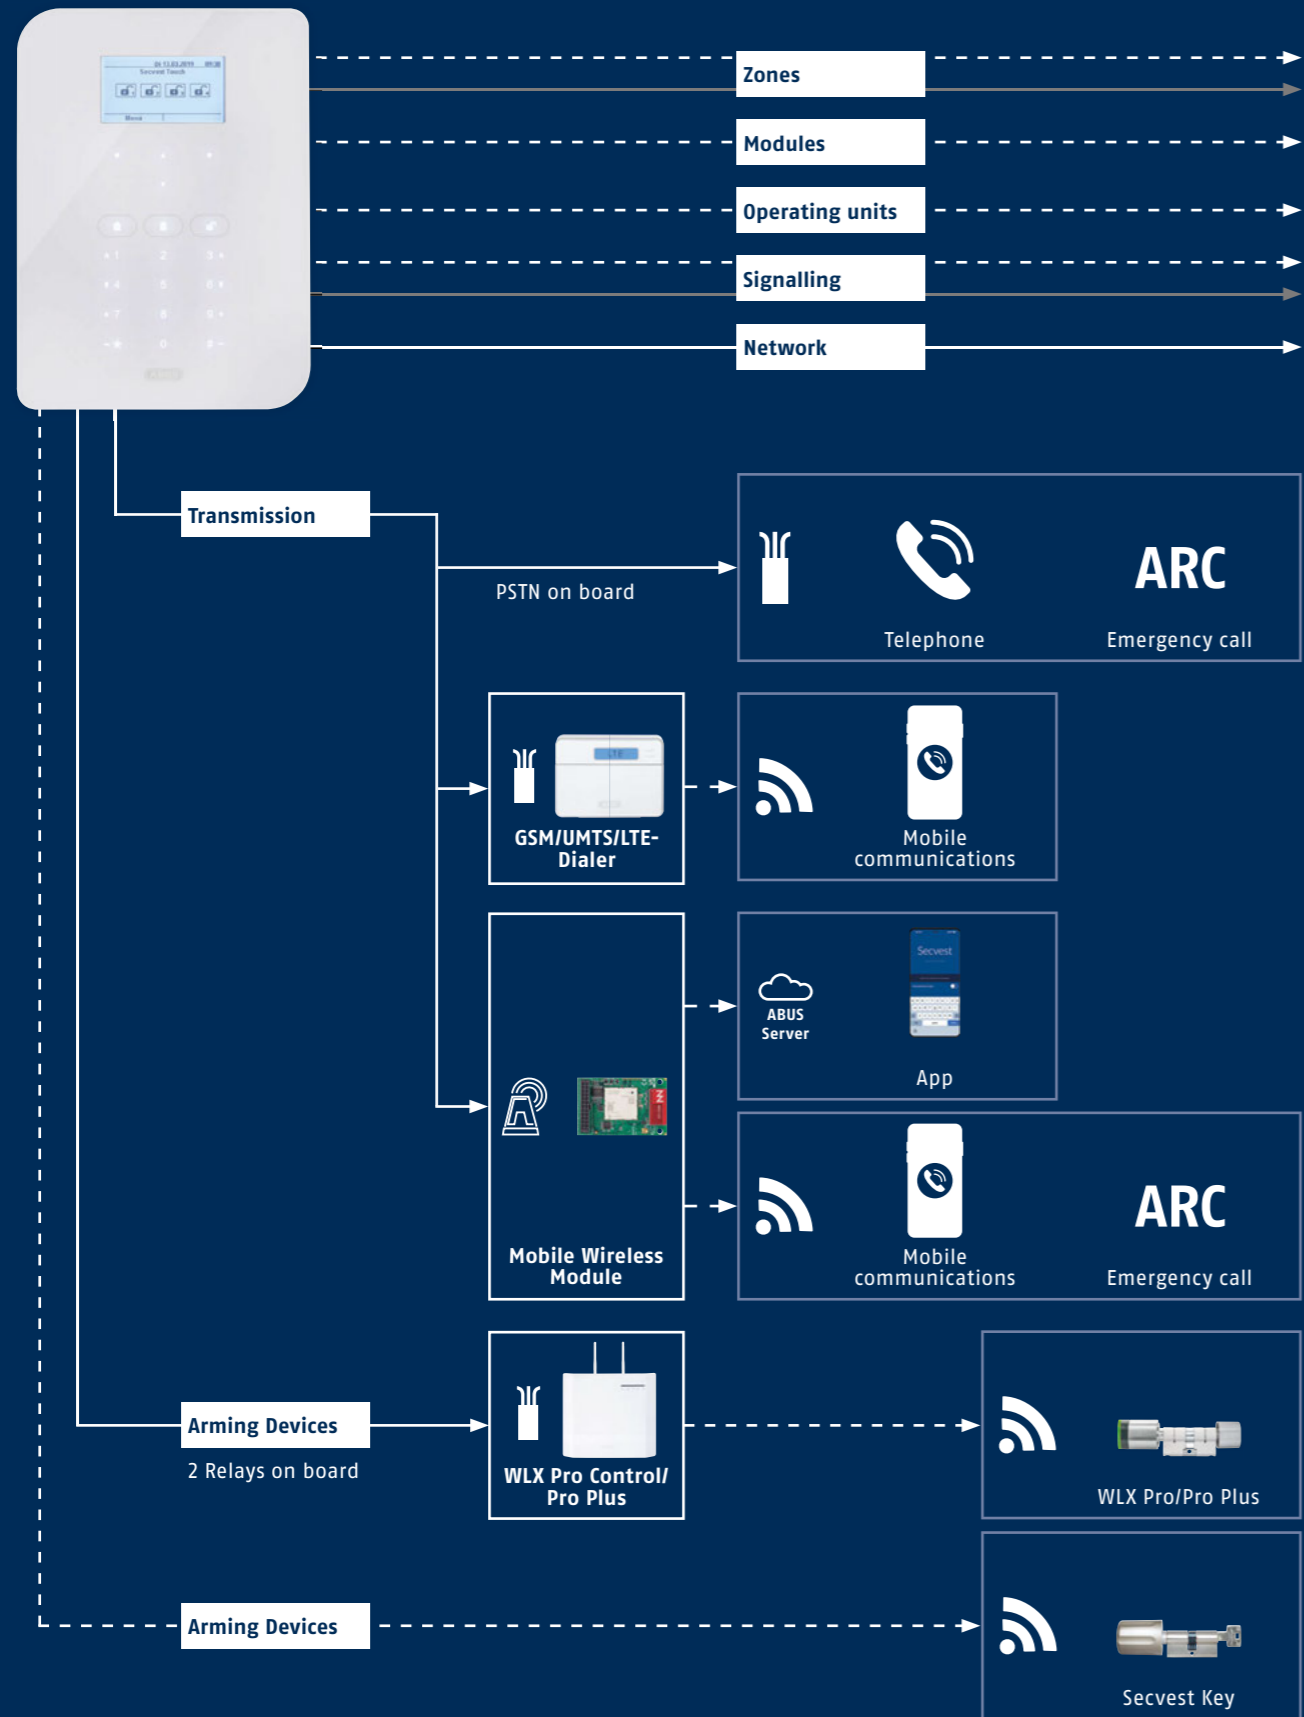

KEY ADVANTAGES AT A GLANCE:

- Up to 48 individually identifiable radio detectors (radio zones), 8 keypads, 50 remote controls
- Convenient operation and programming on the panel and web server
- Fast configuration and diagnostics through software features via the panel and web server
- Active burglary protection with additional mechatronic wireless window/door security devices
- Video verification with up to 6 ABUS network cameras
- Send IP-based protocols to alarm receiving centres (e.g. security firm)
- VdS Home certified and EN 50131 Grade 2

The original: ABUS Secvest is a proven hybrid alarm system that offers comprehensive, active break-in protection.

- Maintenance-free
- Suitable for Secvest wireless universal module (FU8211 / FUM050020)

Dimensions (W x H x D)	97 x 55 x 25 mm
Scope of delivery	1 x Battery Pack For Wireless Universal Module

SECORIS HYBRID ALARM

Many owners, operators and managers of commercial buildings can't rely on just any alarm system. Depending on the type of company and business premises, insurance companies require a certified burglar alarm system according to EN Grade 2 or Grade 3.

Based on this certification, ABUS Secoris implements alarm functions for protection against burglary, fire and water damage and for emergencies. Secoris also wins over its customers with a wide range of additional security functions, such as the addition of electronic wireless locking cylinders (WLX Pro + WLX Pro Plus access control). In this way, the administrator or operator keeps an eye on all access points and movements in the building. And users have optimal protection against triggering false alarms by entering secured areas through mandatory arming/disarming directly at the door.

Our recommendation for Terxon MX fans and all professional EMA installers who have previously relied on other makes: Upgrade now to the Secoris, the worthy successor to the Terxon MX! You benefit from all the new features and EN certification. Because: the Secoris can do everything the Terxon MX can do - and much more!

KEY ADVANTAGES AT A GLANCE:

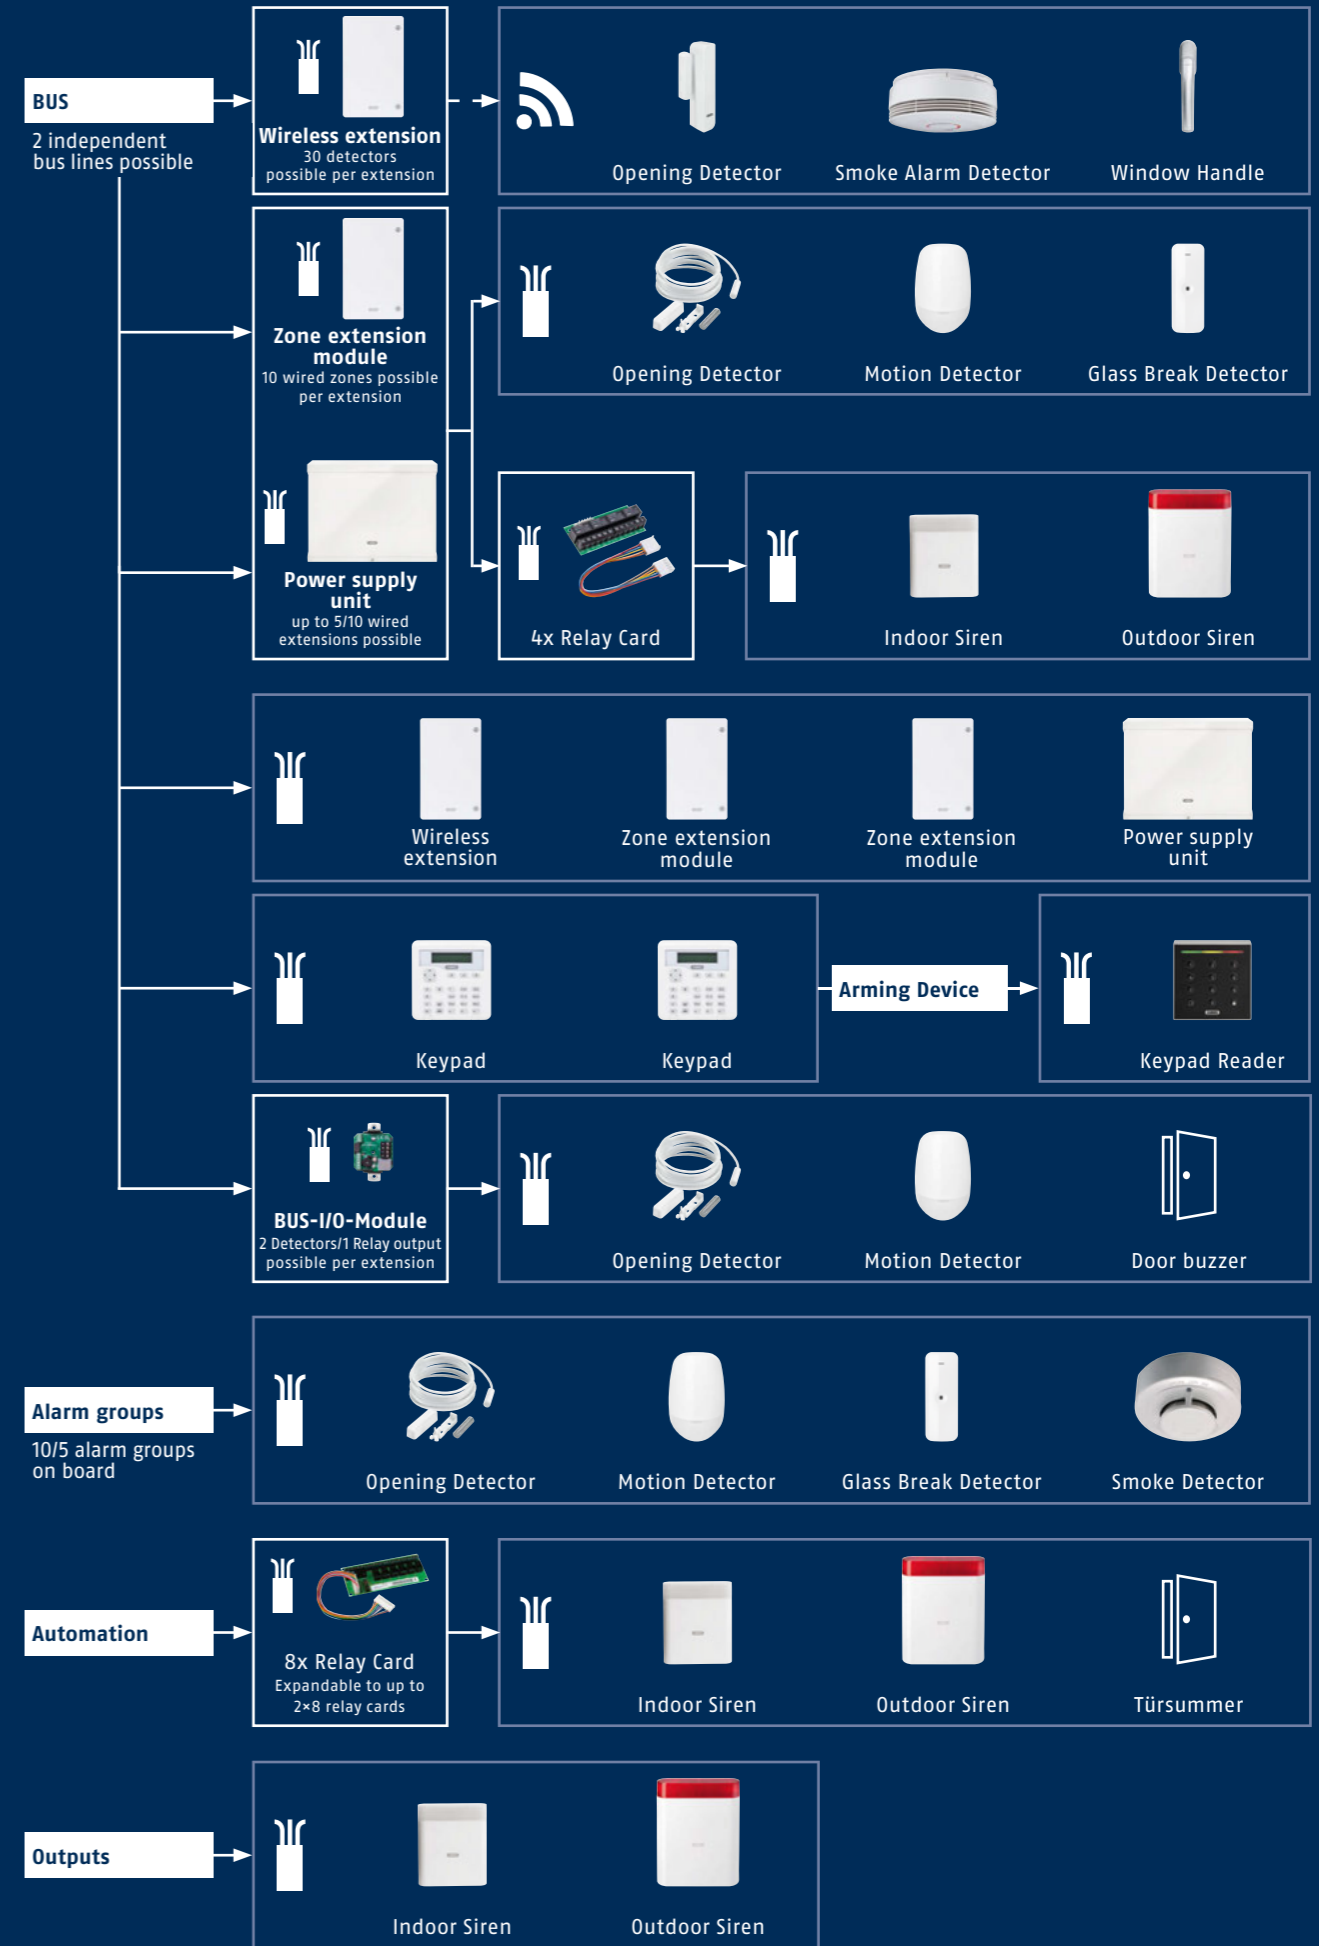

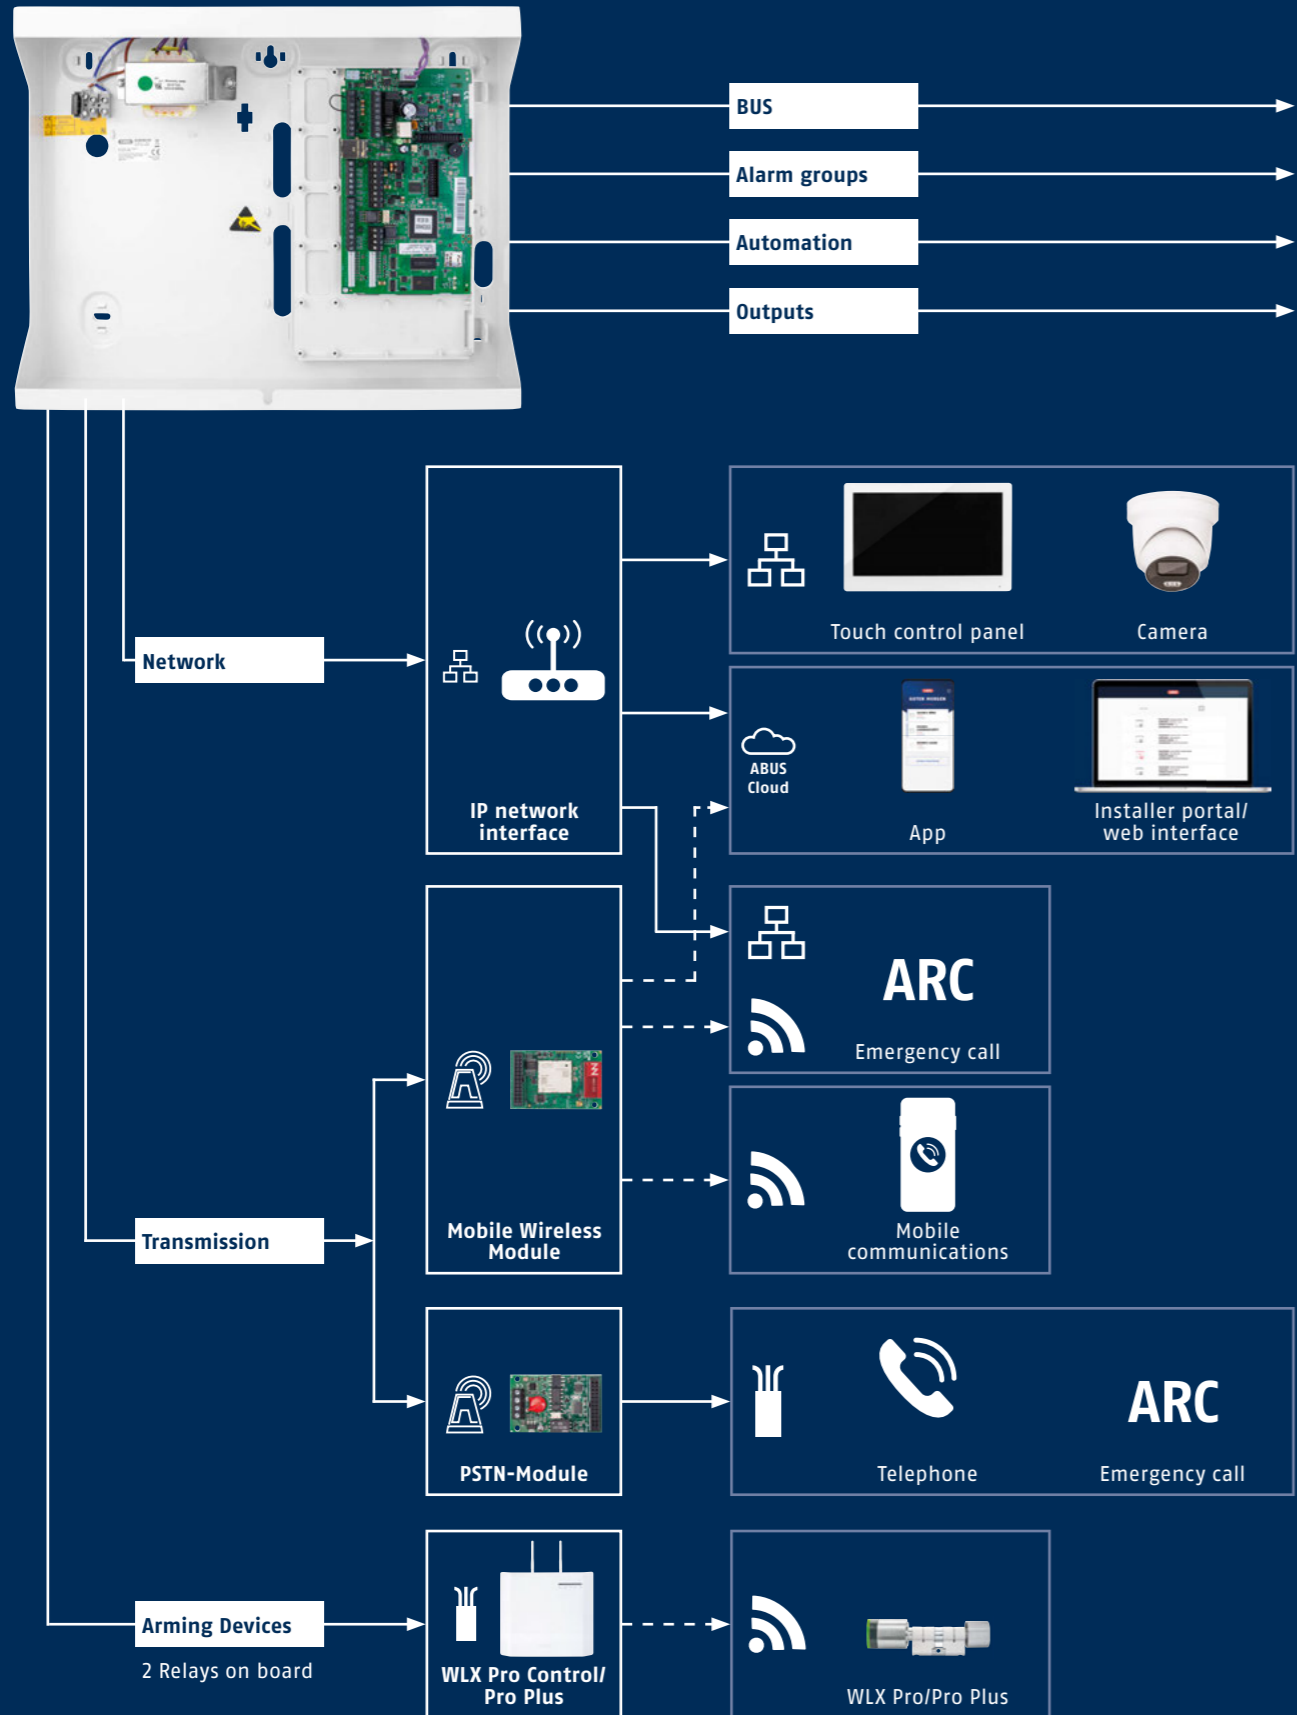

- Powerful alarm system, optimal for the commercial sector (businesses, offices, etc.)
- Reliable operation, precise alarming and flexible set-up depending on the property and customer's requirements
- 200 zones*, 50 BUS devices** and flexible operation for 200 users in up to 20 sub-partitions
- Flexible operating options on the RFID keypad, external keypad reader and touch control panel
- Efficient management, set-up and monitoring of all systems in the installer portal including remote diagnostics and maintenance (e.g. firmware updates)
- Certified quality according to EN 50131-1 Grade 2 and 3

*) individually identifiable **) components as a whole, e.g. control panels, extension modules, etc.

The certified platform for high-quality break-in protection in companies. Absolutely installation-friendly and low-maintenance thanks to the bus system, remote maintenance and over-the-air updates.

SECORIS HYBRID ALARM

Item number **ESEZ60500**

Description Secoris Alarm Control Panel

- Powerful alarm system for professional protection of commercial properties, for reliable operation, precise alarming and flexible setup, ideal in the commercial sector (businesses, offices, etc.), certified quality to EN Grade 2
- 200 individually identifiable zones and a total of 50 BUS devices (e.g. keypads, expanders, external power supply) for comprehensive protection, flexible operation for 200 users in up to 20 partitions
- Efficient management, set-up and monitoring of all systems in the Installer Portal, incl. remote diagnosis, maintenance (e.g. firmware updates) and connectivity solutions by the installer
- Extended administration and service offers via additional packages in the Installer Portal
- Alignment of the system to specific requirements in the project/building through flexible configuration, BUS system, optional expanders and connection of the electronic ABUS locking system (WLX Pro/Pro Plus)
- Integration of up to 10 ABUS IP cameras for video verification of events (e.g. alarm)
- Individual authorisation management for individual user groups
- Optional redundancy in control centre communication possible via PSTN or 4G module
- Control centre connection via standard integrated control centre protocols possible
- Certified to EN 50131-1 Grade 2

Number of wired detector groups	10
Max. number of detector groups	200

Item number **ESEZ70500**

Description Secoris Alarm Control Panel EN Grade 3

- Hybrid-capable intrusion alarm system for professional protection of commercial properties, reliable operation, precise alerting and flexible setup, ideal in the commercial sector (businesses, offices, etc.), certified quality according to EN Grade 3
- 200 individually identifiable zones and a total of 50 BUS components (e.g. keypads, extension modules, external power supply) for comprehensive protection, flexible operation for 200 users in up to 20 sub-areas
- Efficient online management, set-up and monitoring of all systems in the web installer portal, incl. remote diagnosis, maintenance (e.g. firmware updates) and connectivity solutions by the installation company (ABUS specialist partner)
- Extended management and offer of extra services by the ABUS specialist partner after activation of additional packages in the web installer portal
- System customisation to specific requirements in the project/building through flexible configuration, BUS system, optional expansion modules (wire/wireless), forced operation and connection of the electronic ABUS key system (WLX Pro/Pro Plus)
- Individual authorisation management for individual user groups (installer, admin, user, etc.)
- Control centre connection to (emergency call and service control centre) possible via standard integrated control centre protocols
- Optional redundancy in control centre communication possible via PSTN or 4G module
- Integration of up to 10 ABUS IP security cameras for verification of events (e.g. alarm)
- EN 50131 Grade 3 certified (selected components: VdS-C, VSÖ GS-N), compliant with DIN VDE 0833-1/-3

Item number IPBE60000

Description Secoris 10" Touch control panel

- IP control panel with 10.2 inch (approx. 26 cm) touch display for operation of the Secoris intruder alarm system without buttons
- Two operating modes can be set: standard operating mode or Lamp Tableau
- Operating mode for conveniently arming/disarming the intruder alarm system
- Lamp Tableau mode: shows the status (open/closed) of all access points (secured doors, windows) in all partitions
- Flexible network integration into the Secoris control panel via LAN or Wi-Fi
- Easy to install: Power supply via network cable/PoE (LAN operation) or power supply unit (Wi-Fi operation)
- Wall terminal for easy installation in the hallway or entrance area (wall mount included)

Sabotage monitoring	No
Connections	RJ45 Ethernet, supply voltage
Integrated siren	No
DC voltage supply	12 V
Power consumption	96 mA
Max. operating temperature	50 °C
Min. operating temperature	-10 °C
Installation location	Wall
Environmental class	II
Housing material	ABS
Net weight	0.875 kg
Dimensions (W × H × D)	254 x 166 x 26,6 mm
Scope of delivery	1 x Secoris 10" Touch Monitor • 1 x Wall bracket • 1 x Mounting material • 1 x Quick guide
Recommended accessories	AZZU10011 International Switching-Mode Power Supply 12 V/1.5 A (Cord) • TVAC35202 Mini clip built-in power supply unit 12V / 1A • ESEZ70500 Secoris Alarm Control Panel EN Grade 3 • ITAC10320 Powerline PoE Adapter

EN 50131
3 VSÖ

Item number BUBE60000

Description Secoris keypad

- Keypad with number/text keys for indoor use
- For activating/deactivating of the panel via access code
- Individually adjustable brightness of the backlight
- Switching of partitions possible, e.g. individual departments separated from each other
- Power supply can be provided via the BUS line of the panel or an external power supply unit
- LEDs indicate the current system status
- Certified to EN 50131 Grade 3

EN 50131
3

Item number BUBE60020

Description Secoris BUS keypad with RFID reader (Mifare Desfire)

- Keypad with RFID reader / proximity reader (Mifare-Desfire) for indoor use
- For convenient arming/disarming of the control panel by means of a contactless RFID transponder (chip key) or PIN code when leaving/entering the building
- Readout-protected RFID communication between transponder and keypad via Mifare Desfire EV1 possible – optionally also via Mifare Classic
- Switching of sub-areas possible, e.g. individual departments separately
- Power supply via the BUS line of the panel or an external power supply unit possible
- Integration into the Secoris alarm control panel (ESEZ60500, ESEZ70500): arming/disarming via proximity chip, assignment to user (1 chip key/ transponder)
- Connection for outdoor keypad reader (ABUS art.no.: BUBE60100) via RS485-BUS (OSDP security standard: secured connection, AES128-encrypted)
- Wire detector groups (on-board): 1 (4CC) / 2 (FSL/2CC)
- 1 transistor switching output on-board
- EN 50131 Grade 3 certified

Sabotage monitoring	Yes	Yes
Connections	RS485 BUS, Screw terminal für additional tamper contact	RS485 BUS, Screw terminal for additional Tamper contact
Integrated siren	Yes	Yes
Switching outputs	No	1 Open Collector Output
DC voltage supply	12 V	12 V
Power consumption	58 mA	65 mA
Max. operating temperature	55 °C	55 °C
Min. operating temperature	-10 °C	-10 °C
Installation location	surface mount	surface mount
Environmental class	II	II
Certifications	EN 50131 Grade 3, VSÖ GS-H	EN 50131 Grade 3
Housing material	ABS	ABS
Dimensions (W × H × D)	128 x 128 x 29 mm	128 x 128 x 29 mm
Scope of delivery	1 x Secoris keypad	1 x Secoris BUS Control Panel Prox +
Required accessories	ESEZ60500 Secoris Alarm Control Panel	ESEZ60500 Secoris Alarm Control Panel
Recommended accessories	AZ6361 Alarm Cable, 8-core, 100 m • AZ6362 Alarm Cable, 8-core, 250 m	BUBE60100 Secoris keypad reader with RFID reader (Mifare Desfire) IP54 • FUBE50020 Proximity Chip Key • ACTP00004G ABUS Transponder green Mifare DESfire EV1 (4K Security) • ACTP00004W ABUS Transponder white Mifare DESfire EV1 (4K Security)

Item number BUBE60100

Description Secoris keypad reader with RFID reader (Mifare Desfire) IP54

- Control panel with keypad and RFID reader / proximity reader (Mifare Desfire) for outdoor use
- For conveniently arming/disarming the Secoris control panel from outside the building (IP54)
- Arm/disarm using a contactless RFID transponder (chip key) or by entering a PIN code
- Robust, high-quality design with scratch-resistant surface and convenience keypad, fits perfectly thanks to compact construction (WxH: 81x81 mm) fits flexibly and discreetly into any façade
- Readout-protected RFID communication between transponder and keypad reader via Mifare Desfire EV1 possible (also compatible with Mifare Classic)
- Immediate feedback / system status signal (coloured status LED, signal tones)
- Outdoor keypad reader acts as an extension for the indoor component (item no. BUBE60020), simple connection with only one cable via RS485-BUS (data/signal transmission, power supply)
- Tamper-proof connection to the indoor control panel via RS485-BUS (OSDP security standard: secured connection, AES128 encrypted), system logic not accessible from outside
- Flexible mounting: exposed or concealed, connection: with spring-loaded or screw terminals
- Protection class: IP54

Sabotage monitoring	Yes
Connections	RS485-BUS (OSDP) to be connected to BUBE60020
Integrated siren	-
DC voltage supply	8 - 30 V
Power consumption	140 mA
Max. operating temperature	60 °C
Min. operating temperature	-25 °C
Installation location	flush-mounted (optional surface-mounted incl. Item: AZZU10080)
IP protection class	54
Certifications	compliant to EN 50131-1
Housing material	plastic
Net weight	0.082 kg
Dimensions (W × H × D)	81 x 81 x 13,3 mm
Scope of delivery	1 x Secoris keypad reader with RFID reader • 1 x Installation material • 1 x Installation instructions
Required accessories	BUBE60020 Secoris BUS keypad with RFID reader (Mifare Desfire)
Recommended accessories	FUBE50020 Proximity Chip Key • ACTP00004G ABUS Transponder green Mifare DESfire EV1 (4K Security) • ACTP00004W ABUS Transponder white Mifare DESfire EV1 (4K Security) • AZZU10060 Weatherproof Housing for Secoris Keypad reader (Flush-mount)

Item number APP60200

Item number APP60000

Description Secoris (App) Secoris (App)

- Free app for the Secoris alarm system for up to 200 app users with individual authorisations per alarm panel
- Operate and manage several Secoris panels with just one app; arm/disarm the system remotely as well
- Guided onboarding: successfully connect (pair) the panel and app in just a few simple steps with the animated help wizard
- Easy to use: streamlined user guidance with clear status display (coloured shield symbol), direct selection of functions (e.g. arming, alarm mute) and a clear tab bar with shortcuts to important functions
- At a glance: Overview of all coupled panels incl. online status in one view
- Details for each alarm panel can be selected directly via a tile, displayed in a clear colour code: Partitions including status, number of zones with respective status
- React correctly in the event of an alarm: Plain text display of event, triggered partition and zone in the alarm view. Authorised users acknowledge the alarm and reset the alarm system directly in the app.

Description	Secoris BUS external power supply unit	Secoris BUS Wired Extension
-------------	--	-----------------------------

- Additional power supply unit with emergency power supply (integrated rechargeable battery)
- For larger installations and utilising the maximum cable lengths, the external power supply offers added performance
- Can be used as a power supply for the safe operation of the alarm system in the event of faults (e.g. cut main line)
- Provides up to 10 additional wired zones/detector lines
- Certified to EN 50131 Grade 3

- Extends the Secoris Alarm Panel by up to 10 wired zones for the integration of further detectors and devices
- Flexibility through connection to the alarm panel via BUS line from anywhere in the building
- For decentralised wiring of the detectors without the need for complex individual wiring to the panel
- Compatible with a wide range of wired detectors such as motion detectors/PIR sensors, glass breakage and smoke detectors, emergency call buttons and door contacts
- The wiring type (CC or FSL) can be defined individually for each wired extension module during installation
- 4 integrated open collector outputs per wired extension module are used to control external devices (light, roller shutter, garage door, etc.) and other building automation applications
- Need more switching capacity? The increased power is made available by means of the Secoris 4x Relay Card (AZM060010) (optional accessory)
- Up to 50 BUS devices (incl. extensions) per Secoris panel

Description	Secoris BUS-I/O-Module
-------------	------------------------

- Extension module for the Secoris BAS, for integrating up to 2 wired detector zones into the system BUS
- Easily connect up to 2 conventionally wired, individually identifiable detectors to the alarm control unit system BUS anywhere in the building
- Ultra-flexible installation in a standard switch box (55 mm diameter) anywhere in the building, in direct proximity to the wired detectors in the respective room (e.g. office)
- Decentralized wiring of the detectors without complex individual wiring saves cable length and installation time
- Individual configuration for each I/O module during installation, e.g. wiring type (CC or FSL), setting the cable lengths, etc.
- Detector wiring is easy to install and maintain, fixes practically in place, with 7-segment display, e.g. for address display, error codes or localization of individual modules via buzzer
- Compatible with a wide range of wired detectors such as motion detectors/PIR sensors, glass breakage and smoke detectors, emergency call buttons, and door contacts
- Integrated relay output for simple control of building automation (e.g. light, roller shutters, door buzzer)
- Protected installation in permanently sealed switch box, incl. cover/tamper contact
- EN 50131 Grade 3 certification in preparation

Number of wired detector groups	2
Number of wireless detector groups	0
Zone closure	CC/FSL
Sabotage monitoring	Yes
Connections	RS485 BUS, 2 wire detector zones, 1 relay output, Buzzer

Absolutely proven: the hybrid alarm system for complex project planning and extensive switching scenarios.

TERXON HYBRID ALARM

Whether for factory buildings, offices or mixed properties – Terxon LX is the security solution for very individual and complex requirements, especially in very large buildings.

As a hybrid system in the "L" (Large) category, Terxon LX offers extensive expansion capabilities with wired zones. If required, it can also be supplemented with ABUS wireless modules and wireless detectors. This results in very versatile options in mixed operation to optimally secure properties of any size. And also to plan solutions for technically challenging special cases.

This makes it possible to establish sophisticated security systems in large factory halls or office blocks. Wired alarm systems are a highly efficient and trouble-free solution, especially in new buildings.

KEY ADVANTAGES AT A GLANCE:

- Security in size "L": Terxon LX for up to 264 wired/wireless zones and 128 keypads
- Programming via LCD keypad or software
- Integrated dialler for transmission of digital control centre protocols
- Sabotage-monitored control panel, keypads and detectors

Important note:

- We have discontinued the supply of Terxon MX control panels.
- As an alternative, we recommend the direct successor: the Secoris intruder alarm control panel.
- All wired components (detectors, sirens, extensions, etc.) and the Terxon LX are still available.

TERXON
HYBRID ALARM

TERXON HYBRID ALARM

Item number **AZ4200**

Description	Terxon LX Hybrid Alarm Control Panel
-------------	--------------------------------------

- Hybrid system, scalable up to 256 wireless/wired zones
- 8 partitions enable independent security for multiple building sections
- Programming with LCD key pads or software
- Integrated analogue dialler for transmitting digital monitoring centre protocols
- Connect up to 128 control panels
- High security because of tampered control panel, key pad, and detector

Display	Two-line LCD alphanumerical display
Number of wired zones	8
Expandable (hybrid)	Yes
Sub-areas/monitoring areas	8
Zone closure	NC / DEOL
Max. number of control units	128
Number of users	99
Number of events	2000
Communication/alarm	Integrated analog dialer for transferring digital monitoring station protocols
Protocols	ARC: fast format, contact ID, SIA
Remote configuration	Yes
Connections	230 V screw terminal, 13.8 V screw terminal, loudspeaker, zone-screw terminal, 23 x switching outputs, RS-232, PSTN, USB, 2 x bus
Integrated siren	No
Switching outputs	1 x siren, 1 x flash, 3 x 500 mA transistors, 2 x 1000 mA relays, 16 x 50 mA transistors
Power consumption	200 mA
Backup power supply	Yes
Battery - type	12 V DC, 7.0 Ah or 17 Ah lead battery
Environmental class	II
Housing material	Alarm centre: Metal, keypad: ABS
Net weight	5 kg
Dimensions (W x H x D)	384 x 312 x 90 mm
Scope of delivery	1 x Terxon LX alarm panel • 1 x LCD keypad • 1 x Resistors • 1 x User manual • 1 x Installation manual
Required accessories	AZ5106 Serial Programming Cable for Terxon MX • AZ5107 USB Adapter Cable for Terxon MX / LX • FU5009 USB Programming Cable • BT2070 VdS Battery, 12 V, 7.2 Ah

Item number **AZ4210**

Description	Terxon LX LCD Keypad	Terxon LX 8-Zone Wired Extension
-------------	----------------------	----------------------------------

- For operating and programming the alarm panel
- Suitable for indoor and protected outdoor use
- Operate your alarm panel with PIN code or proximity key fob
- Proximity chip reader integrated

- 5-wire bus connection
- 2 transistor outputs
- Enables individual identification of detectors (advisable in areas where safety and security are important)
- Allows clustering in logical areas
- Minimises cabling work

Display	Alphanumeric LCD display, 2 lines x 16 segments	-
Sabotage monitoring	Yes	Yes
Connections	5-core bus, screw terminal for connection of two zones, loudspeaker	5-wire bus
Integrated siren	Yes	-
Switching outputs	1	2 Transistor-outputs (1 positive/negative switching output each, 100mA)
DC voltage supply	12 V	12 V
Power consumption	30 mA	60 mA

Description	USB Adapter Cable for Terxon MX / LX	USB Programming Cable
	<ul style="list-style-type: none"> • For convenient programming of the Terxon MX / LX with a PC • Only in conjunction with AZ5106 • Suitable for use with the wireless test box (FU3801) 	<ul style="list-style-type: none"> • Programming of the Secvest 2WAY and Terxon LX with a PC • USB connection • Software included with Secvest 2WAY delivery • Software updates available on the Internet

Scope of delivery	1 x USB serial adapter • 1 x USB extension cable • 1 x Product support CD-ROM	1 x USB Programming Cable
--------------------------	---	---------------------------

Flexible positioning, quick installation: Whether wireless detectors or signalling devices for the Secoris hybrid system or standard wireless components for the Secvest.

WIRELESS COMPONENTS

By selecting radio detectors, mechatronic wireless window/door locks and wireless sounders, you can put together your own individual alarm system. In addition to the alarm components, you supplement the system with the valuable protection provided by hazard detectors such as wireless-networked smoke detectors (protection against smoke poisoning) or water detectors.

The wireless detectors and sirens are easy to install and programmed into the control panel or wireless extension without pulling cables. When using detectors with Secoris radio standard, a secure encrypted wireless connection (AES-128 standard as used in online banking) is provided. The mechatronic detectors also function as robust mechanical security devices for maximum burglary protection.

Depending on the project plan (e.g. radio extension, hybrid module), wireless components are the optimal supplement for hybrid alarm systems. For example, at installation sites where wiring is highly complex, special features (e.g. mechatronic protection) are required or time-limited protection is intended.

SECVEST WIRELESS PRODUCTS COMPATIBILITY WITH BUM060040:

The Secoris BUS wireless extension BUM060040 creates the bridge to the radio detectors, mechatronic window handles/door locks and other wireless components of the Secvest. To upgrade an existing system from Secvest to Secoris, only the control panel is replaced and the wireless extension is installed. Existing wireless components simply continue to work with the Secoris system.

SECORIS WIRELESS COMPONENTS WITH BUM060030:

The Secoris BUS wireless extension BUM060030 integrates wireless detectors and other wireless components into the Secoris intrusion alarm panel. Signals are transmitted via the secure Secoris radio system with convenience functions, making installation and maintenance of the wireless components simple.

Description Secvest Wireless Retrofit Kit for F0 400

- Double your protection by combining mechanical security with electronic monitoring
- Active intrusion protection, thanks to simple upgrading of the mechanical system with electronics
- Even detects intrusion attempts
- Connection points for passive glass break detectors
- Retrofitting the purely mechanical variant from production date autumn 2014 (F0 400 N)

Connections	Clamping terminal
Sensor type	Reed contact, magnetic field sensor system
Type of detection	Magnetic field measurement
Battery - type	2 x 1.5 V AA alkaline batteries, Varta Industrial / Industrial Pro, Duracell Industrial, Panasonic Powerline
Battery - max. battery life	2 y
Compatible with	Secvest, BUM060040
Certifications	VdS in combination with mechanic F0400
Housing material	ABS
Dimensions (W x H x D)	120 x 70 x 215 mm
Scope of delivery	1 x Electronic adapter cover with PCB • 2 x 1.5 V AA batteries • 1 x Leaf spring • 1 x Magnet

Item number FUSG50101

Description Secvest Wireless Outdoor Sounder

- New attractive design
- Loud combination sounder
- Fast installation thanks to integrated spirit level
- Optimised seal contact can be adapted for any wall surface
- Fixed front flap enables installation with one hand
- Robust, UV-resistant, weatherproof housing
- Bright SMD LEDs

Battery - type	Alkaline battery pack 2 x 3 V (FU2986)
Battery - max. battery life	2 y
Compatible with	Secvest, BUM060040
Certifications	EN 50131 Grade 2, INCERT
Housing material	PC/ABS
Dimensions (W x H x D)	210.6 x 294 x 78.5 mm
Scope of delivery	1 x Secvest Wireless Outdoor Sounder • 1 x Alkaline battery pack 2 x 3 V (FU2986) • 1 x Mounting material • 1 x Quick Guide

Item number FUSG50110

Description Secvest Wireless Indoor Sounder

- High-volume sounder (> 80 dB) for indoor areas
- Acoustic support for alarm panels and wireless outdoor sounders
- Easy integration of up to 4 indoor sounders into the Secvest alarm panel
- Compatible equipment: FUA50xxx S/W >= v3.01.11, FUM050010 wireless repeater
- Inconspicuous, compact product design
- Flexible installation and retrofitting with minimal work
- Optional external power supply for operation without batteries (6–15 V DC)
- Jamming detection
- Monitors the input voltage
- Repeatable for bridging larger transmission paths

Battery - type	1.5 V AA Alkaline
Battery - max. battery life	1 y
Compatible with	Secvest, BUM060040
Housing material	PC / ABS
Dimensions (W x H x D)	130 x 154 x 40 mm
Scope of delivery	1 x Secvest Wireless internal siren • 4 x batteries • 1 x Quickstart guide • 3 x Screws, Wall Plugs

SECORIS WIRELESS COMPONENTS

Item number **FUMK60030A**

Item number **FUMK60030W**

Description	Secoris Slim wireless opening detector (anthracite)	Secoris Slim wireless opening detector (white)
-------------	---	--

- Reliably detects the opening of windows and doors (magnetic contact)
- Slim design and discreet appearance, particularly suitable for tight installation spaces
- Easy to retrofit without cable (battery life up to 3 years)
- Device configuration can be set on the intrusion alarm control panel (alarm control panel)
- Tamper monitoring (cover and wall tear-off contact)
- Firmware with OTA update capability (over-the-air remote maintenance)
- Compatible with Secoris (BUM060030) and Secvest (FUAA50000, FUA50500 and higher)
- Wireless connection in Secoris wireless mode AES128-encrypted and replay-protected
- Finish: available in anthracite (FUMK60030A) and white (FUMK60030W)
- EN Grade 2 certified

Type of detection	Magnetic field measurement	Magnetic field measurement
Compatible with	Secoris, Secvest	Secoris, Secvest
Certifications	EN 50131 Grade 2, VSÖ GS N	EN 50131 Grade 2, VSÖ GS N

Item number **FUBW60120**

Description	Secoris wireless motion detector PIR	Secoris wireless motion detector PIR MW
-------------	--------------------------------------	---

- PIR motion detector for indoor use (wireless)
- Detects humans/animals based on their body heat and heat movement using passive infrared sensor technology (animal-immune: configurable setting to ignore pets)
- Efficient room surveillance: detection area approx. 10 x 10 m; approx. 90° aperture angle for corner installation
- Walk test and pet immunity configurable at the control panel in Secoris wireless mode. Directly at the detector in Secvest wireless mode.

- Dual motion detector PIR/MW for indoor use (wireless)
- Dual detector with passive infrared sensor (PIR) and microwave sensor (active monitoring) in one device (duplex detector)
- 2-fold room surveillance: detects intruders by body heat (PIR) and by microwave detection, with approx. 10 m detection range and 85° aperture angle (corner installation) – for highest false alarm protection
- Walk test and pet immunity configurable at the control panel in Secoris wireless mode. Directly at the detector in Secvest wireless mode.

Type of detection	Heat detection	Heat detection, Microwave
Detector coverage area (m)	10 m	10 m
Compatible with	Secvest, Secoris	Secvest, Secoris
Certifications	EN 50131 Grade 2, VSÖ GS N	EN 50131 Grade 2
Housing material	ABS	ABS
Dimensions (W × H × D)	55 x 155 x 55 mm	55 x 155 x 55 mm
Scope of delivery	1 x Wireless Motion Detector • 1 x Quickstart guide • 2 x Battery 1,5V AA (LR6)	1 x Secoris Dual Wireless Motion Detector PIR MW 24 Ghz • 1 x Quickstart guide • 3 x Battery 1,5V AA (LR6)

Item number **FUGB60000**

Description	Secoris wireless glass break alarm (acoustic)
-------------	---

- Glass break alarm detects the specific sound of breaking glass panes
- Monitors a window or a window front in the room (without being placed directly on the pane)
- Wireless detector easily retrofittable without cable (battery life up to 2 years)
- Alarm LED to indicate wireless signal strength on the unit (can be deactivated in Secoris wireless mode)
- Device identification: trigger the LED on the alarm from the alarm control panel
- Tamper monitoring (cover and wall tear-off contact)
- Firmware with OTA update capability (over-the-air remote maintenance)
- Compatible with Secoris (BUM060030) and Secvest (FUAA50xxx)
- Wireless connection in Secoris wireless mode AES128-encrypted and replay-protected
- Compliant with EN 50131

Type of detection	Audible
Detector coverage area (m)	6 m
Compatible with	Secoris, Secvest
Certifications	compliant to EN 50131-1
Housing material	ABS
Dimensions (W × H × D)	108 x 80 x 43 mm
Scope of delivery	1 x Wireless Glass Break Detector • 1 x Battery 3 V CR2 Li (FU2990) • 1 x Quick-Guide

Item number **FUEM60000**

Description	Secoris wireless Seismic sensor
-------------	---------------------------------

- Suitable for monitoring objects and walls that are not to be moved or penetrated
- Detector monitors the surface or object on which it is mounted for vibration (highly sensitive acceleration sensor)
- Sensitivity and alarm sensitivity individually adjustable
- Wireless detector can be easily retrofitted without wiring (battery life up to 2 years)
- Display of the wireless signal strength on the device as well as device identification (coloured LED)
- Tamper monitoring (cover and wall tear-off contact)
- Compatible with Secoris (BUM060030) and Secvest (FUAA50000, FUA50500 and higher)
- Device configuration can be set at the Secoris control panel. Directly at the detector in Secvest wireless mode
- Wireless connection in Secoris wireless mode AES128-encrypted and replay-protected
- Compliant with EN 50131

Type of detection	Vibration detection
Compatible with	Secoris, Secvest
Certifications	compliant to EN 50131-1
Housing material	ABS
Dimensions (W × H × D)	19 x 103 x 24 mm
Scope of delivery	1 x Wireless shock detector • 1 x Battery 3 V CR2 Li (FU2990) • 1 x Quickstart guide

Item number FUBE60010

Description Securis wireless remote control

- Compatible with Securis intrusion alarm system (BUM060030) and Secvest alarm system (FUAA50xxx)
- 3 function keys „Arming“, „Disarming“ and „Status query“
- 1 freely programmable key, e.g. for internal setting or activation of a switching output, etc.
- 8 coloured status LEDs for clear display and current status feedback
- A hold-up alarm can be deliberately triggered via key combination
- Wireless connection in Securis wireless mode AES128-encrypted and replay-protected
- Compact remote control for trouser pocket and key ring (incl. lanyard)
- Firmware with OTA update capability (over-the-air remote maintenance)
- Battery life: up to 3 years
- EN 50131 Grade 2 certified

Compatible with	Secvest, Securis
Certifications	EN 50131 Grade 2, VSÖ GS N
Housing material	ABS
Dimensions (W × H × D)	36 x 17 x 62 mm
Scope of delivery	1 x Wireless remote control • 1 x Batterie CR2450 3 V Li-Mn (FU2987) • 1 x Manual • 1 x ABUS lanyard

Item number FUM060010

Description Securis wireless repeater (signal amplifier)

- Additional module to increase the range and amplify the signal of Securis wireless components
- Enables good wireless accessibility anywhere in the building
- Opens up rooms, parts of buildings and outdoor areas for wireless operation that would otherwise be unsuitable due to long distance to the Securis wireless extension or shielding building structure
- Amplifies the signal for max. 10 Securis wireless components
- Automatic transmission of the wireless components to the repeater
- Coloured LEDs for status display and indication of signal strength (range)
- Wireless connection in Securis wireless mode AES128-encrypted and replay-protected
- Firmware with OTA update capability (over-the-air remote maintenance)
- EN 50131 Grade 2 certified

Compatible with	Secvest, Securis
Certifications	EN 50131 Grade 2, VSÖ GS N
Housing material	ABS
Dimensions (W × H × D)	130 x 155 x 42 mm
Scope of delivery	1 x wireless repeater • 2 x batteries • 1 x Installation manual • 3 x Screw, plug
Required accessories	AZZU10011 International Switching-Mode Power Supply 12 V/1.5 A (Cord)

Item number FUSG60100

Description Securis wireless outdoor siren with flashing light (combined signal transmitter)

- Combined signal transmitter for alerting by means of siren (acoustic) and LED flashing light (visual)
- Loud alarm siren (> 100 dB(A) at 1 m) for outdoor use
- LED flashing light (red) visible from afar, coloured LED display of wireless signal strength and other functions
- Simple, wireless integration into the Securis control panel (via wireless extension BUM060030), flexible choice of installation location thanks to high wireless range (battery life up to 2 years)
- Device settings at the control panel (Securis wireless): Arming confirmation, jamming detection, signal tone adjustment, siren duration; at the siren via jumper (Secvest wireless)
- Quick 1-hand installation thanks to fixed front flap and integrated spirit level, optimised tear-off contact (sabotage monitoring) can be adapted to any wall surface
- Firmware with OTA update capability (over-the-air remote maintenance)
- Compatible with Securis (BUM060030) and Secvest (FUAA50000, FUA50500 and higher)
- Wireless connection in Securis wireless mode AES128-encrypted and replay-protected
- EN 50131 Grade 2 certified

Compatible with	Securis, Secvest
Certifications	EN 50131 Grade 2, VSÖ GS N
Housing material	PC/ASA
Dimensions (W × H × D)	210.6 x 294 x 78.5 mm
Scope of delivery	1 x Wireless Outdoor Sounder • 1 x Alkaline battery pack 2 x 3 V (FU2986) • 1 x Mounting material • 1 x Quick Guide

Item number FUSG60110

Description Securis wireless indoor siren (acoustic signal transmitter)

- Signal transmitter for alerting by means of siren (acoustic)
- Loud alarm siren (> 80 dB(A) at 1 m) for indoor use
- Simple, wireless integration into the Securis intrusion alarm control panel via the wireless extension (BUM060030)
- Wireless siren is easy to install or retrofit without cables, wireless signal repeatable for bridging long wireless distances
- Firmware with OTA update capability (over-the-air remote maintenance)
- Tamper monitoring (cover and wall tear-off contact)
- Battery operation (up to 2 years) or external power supply (6-15 V DC, power supply unit optional)
- Compatible with Securis (BUM060030) and Secvest (FUAA50000, FUA50500 and higher)
- Wireless connection in Securis wireless mode AES128-encrypted and replay-protected
- EN 50131 Grade 2 certified

Compatible with	Securis, Secvest
Certifications	EN 50131 Grade 2, VSÖ GS N
Housing material	PC / ABS
Dimensions (W × H × D)	130 x 154 x 40 mm
Scope of delivery	1 x Wireless internal siren • 4 x batteries • 1 x Quickstart guide • 3 x Screws, Wall Plugs

WIRED COMPONENTS

Maximum flexibility: Efficient wired detectors and wired sounders (outdoor and indoor sirens) work with the hybrid-capable ABUS intrusion detection and alarm systems Secoris, Terxon and Secvest, depending on the configuration (e.g. hybrid module).

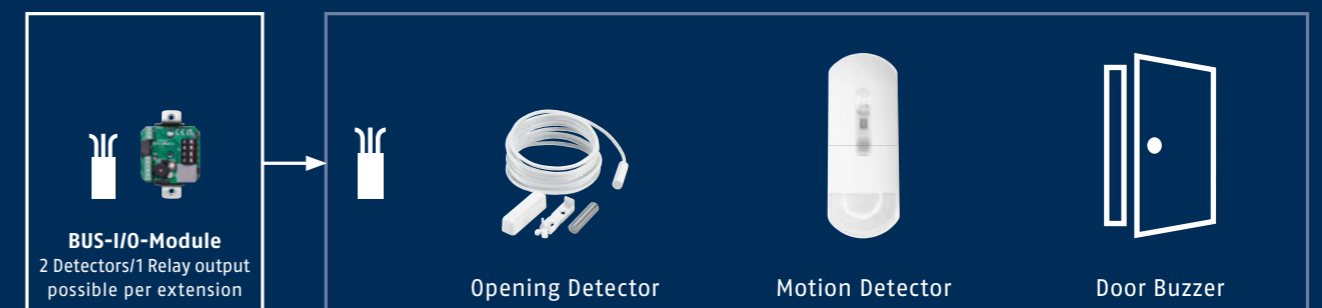

A wide range of different detector types is available for the many hazards of everyday life. The VdS-certified detectors in the ABUS range provide a very high level of protection against tampering. Automatically secure: VdS-certified locking elements of Secoris protect users against triggering false alarms by entering secured areas (armed Intruder Alarm System).

Motion detectors, for example, monitor entire rooms. Opening detectors trigger an alarm when windows and doors are opened, the system is armed and no one is at home. Glass breakage detectors and shock sensors detect intrusion via broken windows, glass doors, drywall, etc.

In United Kingdom and various European countries, smoke alarms are required by law in private living spaces and must be installed in commercial buildings in accordance with the respective fire protection regulations (fire protection concept/building permit). The wired smoke sensors can be integrated directly into the alarm system for even greater security and convenience.

Components such as light barriers are recommended for monitoring entrances, for example.

SECORIS WIRED-COMPONENTS E.G. WITH BUM060020:

With the mini module, wired detectors can be placed anywhere in the building and simply connected to the system bus. The module with integrated relay output fits into a switch box (55 mm), which is installed next to the detectors. This saves cable runs and labour time during installation.

Ideal for commercial properties: connect wired detectors quickly and easily via the system bus. Efficient and low-maintenance.

Key: Wired connection:

Description	Active glass break alarm VdS C
	<ul style="list-style-type: none"> Automatic monitoring of glass surfaces for destruction (glass breakage, glass cutting) and tampering Active ultrasound monitoring between transmitter and receiver unit: frequency, time interval and reflection measurements Suitable for different types of glass in frame constructions: window, crystal, tempered, insulating, bullet-proof, laminated and safety glass as well as glass with wire insert or shatter protection film
Display	LED
Sabotage monitoring	Yes
Type of detection	Ultrasonic
Adjustable sensitivity	Normal glass / laminated glass and bulletproof glass
DC voltage supply	10,4 - 15 V
Power consumption	18 mA
Cable length	6 m
Compatible with	Secoris
Certifications	VdS C
Housing material	stainless steel
Dimensions (W x H x D)	110 x 90 x 30 mm
Scope of delivery	1 x processing unit • 1 x transmitter • 1 x receiver

ARMING DEVICES

Convenience and safety when arming/disarming the alarm system. Quite easy to do directly at the front door when closing or opening via access control system (commercial building), door fitting with PIN code access or separate wireless cylinder (private household). In addition to the high level of operating convenience, this also enables forced arming/disarming of the intruder alarm system in order to avoid entering secured areas and to reduce any false alarms to a minimum.

That is why professional ABUS alarm systems can be easily integrated into an access control system or coupled with a wireless door cylinder. With the ABUS systems listed here – or, depending on the project plan, with an existing system in the property.

WAPPLOXX PRO PLUS SYSTEM

- Radio-based, online-capable locking/access control system
- Up to 160 wireless door components for flexible, wireless installation
- 2 intruder alarm systems or security zones can be integrated
- Arming/disarming the intruder alarm system at the wireless cylinder
- Centralised software for all components, intruder alarm systems and cameras

EL & ELT SYSTEM

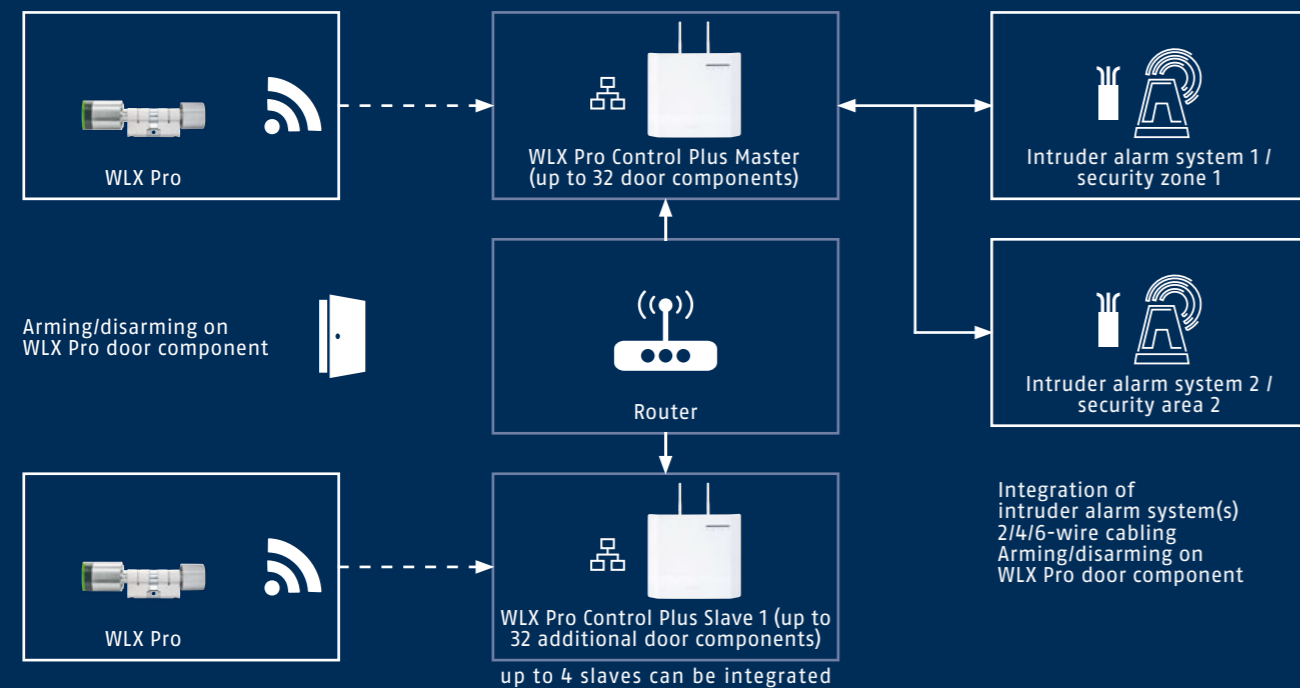

- Wired electronic door components with chip key reader
- EL: discreet wall reader for operation using a chip key
- ELT: Input unit can be operated with chip key and PIN code
- Control of e-door openers, motorised locks, lifts, etc.
- Arming/disarming of the intruder alarm system at the door component

Convenient & professional: forced arming/disarming of the intruder alarm system directly at the door protects against false alarms and offers optimum operating convenience.

Description	WLP Pro Control Plus	WLP Pro Control Plus (WLP/WLP Pro)
-------------	----------------------	------------------------------------

- Central control unit for the wAppLoxx Pro Plus system operated via radio network
- Integrated software for programming and managing the locking system by up to 1,000 users (wAppLoxx Pro Plus Manager)
- Possible operating modes: offline, local network, and online with internet connection
- Up to 32 wireless door components can be integrated per WLP Pro Control Plus, with a maximum of 6 WLP Pro Repeaters each
- Up to 5 control units can be combined to scale the system up to a total of 160 WLP Pro door components
- Locking permissions are assigned in the locking plan matrix for up to 160 door groups and 100 user groups
- Flexible access release - even while on the road - for all wAppLoxx Pro door components via app (iOS/Android)
- Control of up to 2 intrusion alarm systems or 2 security areas directly at the door (forced protection against false alarms) as well as integration of up to 10 ABUS IP cameras for access verification (live image in the app)
- Intelligent event control (e.g. e-mail sent in the event of an invalid access attempt)
- Automatic provision of software updates

TRANSMISSION

Any alarm chain is only as strong as its weakest link. The fast and reliable transmission of the alarm notification to the occupants, owners or managers of the building is absolutely crucial.

In addition to the local alarm on the property, the immediate alarm via e-mail or app is an important part of the alarm chain. Additional security is provided by a (possibly intentionally redundant) alarm via the fixed or mobile network.

When securing high-value homes and commercial properties, a professional guard and security service should usually also be alerted, primarily by transmitting the alarm notification via digital protocols to an alarm receiving centre (ARC). Depending on the system's programming, a silent alarm (without local alarm) can also be transmitted.

Silent if necessary: if the external alarm with loud external siren is not desired or sufficient in the building, the remote alarm is sent to stored telephone numbers or emergency call and service centres. If required (e.g. network failure) also via a mobile network.

ACCESSORIES

Matching accessories make the difference: clearly visible warnings, batteries and accumulators, distributors for clean installation and much more.

Draw the attention of customers, employees and passers-by to your alarm security system with warning stickers - and thus directly deter potential offenders.

On the following pages you will also find the appropriate accessories for clean installation and stable operation of the alarm system.

Small but extremely practical: accessories for professional installation, expert maintenance and identification of the security zone.

Item number AZVT10000 AZVT10010

Description Metal distributor empty housing for 8 distributor strips VdS C LSA terminal strip 10 wire pairs

- Main distribution box for wired alarm system
- Empty housing for up to 40 connections (4 CC) or 80 wire pairs
- Can be fitted with 8 PCB strips: LSA, solder and screw terminal strips with 10 wire pairs each (accessories required)
- Suitable for LSA-Plus quick connection technology (solderless, screwless and stripped)
- Possible wiring types: 2-wire, NO, NC, FSL
- Housing made of robust sheet steel, tamper monitoring, pure white
- For surface mounting indoors
- VdS C certified: VdS Class C (G 199 042)

- Terminal strip for installation in metal distribution box (art. no. AZVT10000)
- LSA PCB strip with 10 wire pairs 4CC (solderless, screwless and stripped)
- Suitable for LSA-Plus quick connection system
- With 2 shield connection screw terminals, 2 fixing screws

Certifications	VdS C	VdS C

SERVICE & CONTACT

INTERNAL AND FIELD SERVICE

As a specialist dealer partner, you can benefit from your own, dedicated team of representatives for your region. Our team will be available to support you with comprehensive, specialist expertise no matter what you need. This of course also covers any questions relating to your project, so you can count on both our internal support office and our on-site field service.

THE ONLINE STORE

Take advantage of the quick and easy ordering process at www.abus.com

Your user account is where you can conveniently carry out all of your orders and track your order status in real time. This is also where we provide comprehensive information and sales support documents for your convenience.

TECHNICAL SUPPORT (TS)

If problems occur with our products, our technical support team is ready to take your call to find the source of the issue and work with you to find a solution. And when on-site assistance is required, our technical field service representatives are always on hand.

QUALITY ASSURANCE – SERVICE – PRODUCTION (QSP)

In the event of a technical defect, our QSP department will perform a thorough check of your device and repair it immediately if possible.

PLANNING SUPPORT

Are you planning a new building or a larger property? We offer you knowledgeable planning support incl. tender data, calculation tools, etc.

PLANNING DEPARTMENT	DE 
	+49 82 07 959 90-400 planung@abus-sc.com

We are always there for you: when ordering, for advice, for technical questions or for your complex electrical planning.
