CATALOGUE 2022

INTRUDER ALARM TECHNOLOGY

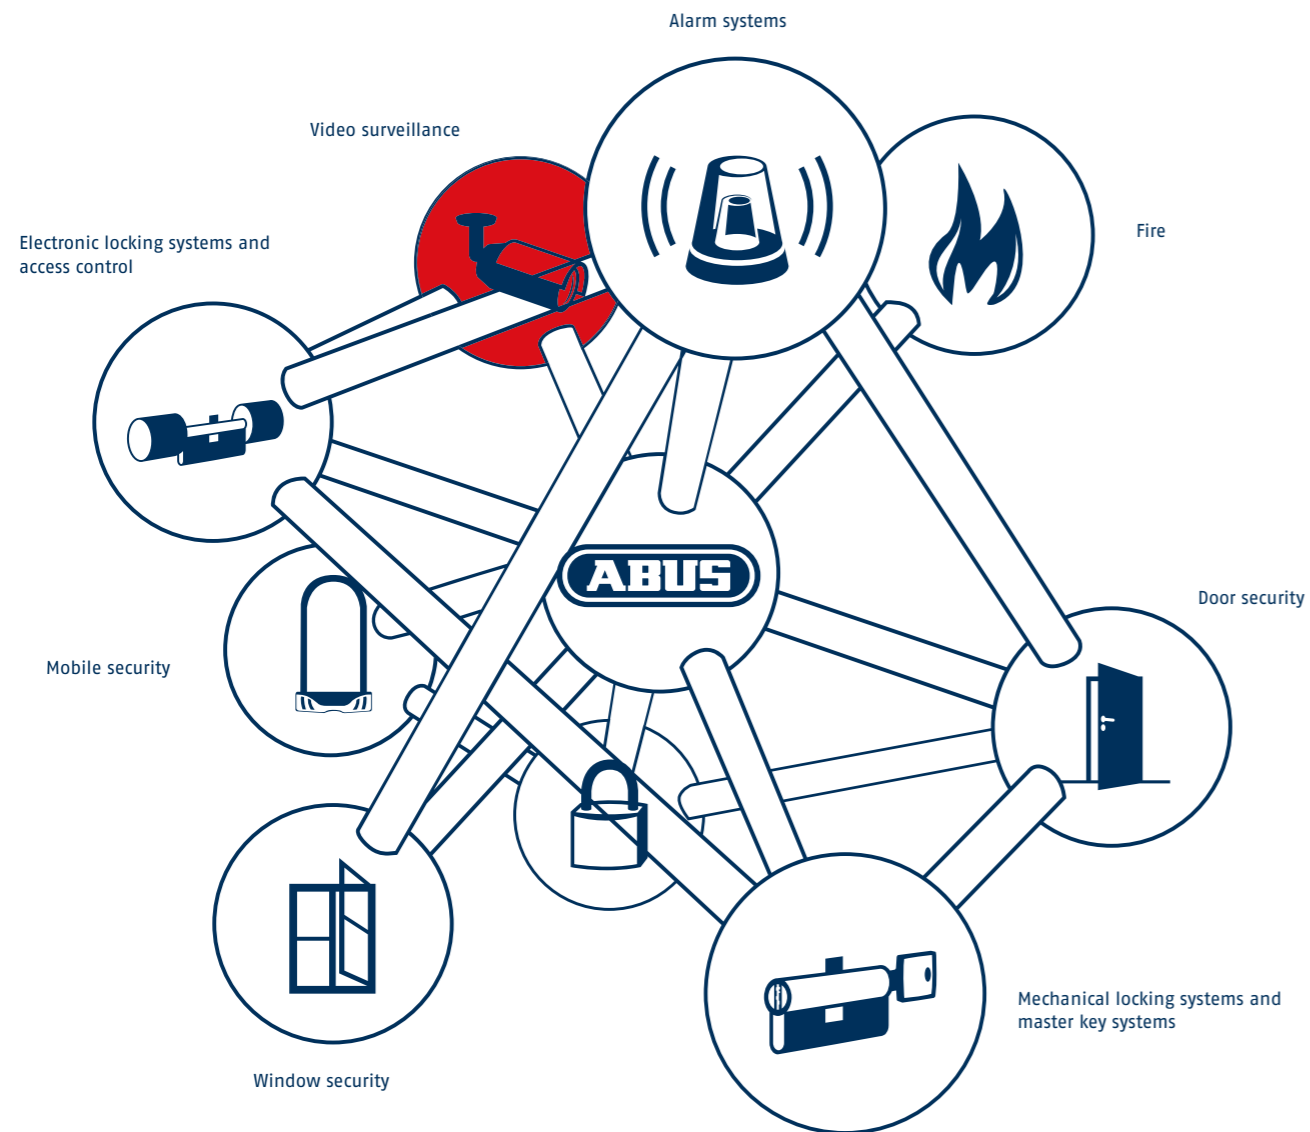

Wired and wireless alarm systems for private and commercial properties. With operating convenience at the door and on the app plus efficient system management, remote maintenance and more.

In our current catalogue, we give you an overview of the
2022 alarm range from ABUS Security Center.
Detailed information for all products can be found in the partner portal at partner-asc.abus.com

ABUS | August Bremicker Söhne
Home security, property security, mobile security

ABUS | Security Center
Alarm systems, video surveillance, electronic security systems, electronic locking systems, access control, switching devices

ABUS | Pfaffenhain
Mechanical locking systems and master key systems

ABUS Security Center is an integrated part of the global security brand

Safety and Security are no coincidence, but the result of a variety of different measures, and it is at its most effective when they integrate perfectly.

Together with its subsidiaries, the ABUS Group has provided comprehensive security for more than 90 years. A traditional company with a wealth of experience, ABUS has consistently set new standards in the innovative security technology sector since 1924, with a particular focus on the smart interplay between electronics and mechanics.

With its solutions and products, ABUS Security Center embodies this ethos and strives to make its customers' day-to-day lives as secure and convenient as possible.

ALARM OVERVIEW

SECORIS - SECURITY ACCORDING TO PLAN

The professional intruder alarm system with EN Grade 2 certificate. For comprehensive security and individual protection for office complexes and commercial properties with up to 200 zones.

With its wide range of functions (system bus, wired and radio detectors, integration of WLX Pro Plus and IP cameras), high level of operating convenience including the Secoris app and matching certification, ABUS Secoris is the most powerful wire-bound alarm system in the ABUS range.

Reliable in operation, easy to operate and, thanks to convenient remote access (web interface, ABUS installer portal), perfectly efficient and time-saving in administration, monitoring and maintenance of the system.

TERXON - SOLUTIONS FROM M TO L

The classic Terxon wired and hybrid alarm system offers a wide range of options to plan individual security solutions for more complex requirements with up to 264 zones. Various expansion levels and many different extensions available.

SECVEST

Every alarm system deters burglars and warns the residents. The Secvest can do more: The wireless alarm system provides reliable protection against burglary, fire, water and in an emergency - and actively prevents burglary by means of mechatronic wireless components.

Meanwhile the modern Secvest design blends in well with the living area. The elegant touch surface is intuitive to operate, with keys that illuminate or activate when touched. Thanks to the brightness sensor, the lighting dynamically adjusts to the current lighting conditions.

This makes the Secvest the solution for burglary protection and defence against everyday dangers, especially in private homes and existing buildings where flexible detector wiring and a certain aesthetic appeal are required.

SECORIS WIRED ALARM

Many owners, operators and managers of commercial buildings can't rely on just any alarm system. Depending on the type of business and the premises, the insurance company requires a intruder alarm system with EN Grade 2 certification.

Based on this certification, ABUS Secoris implements alarm functions for protection against burglary, fire and water damage and for emergencies. Secoris also wins over its customers with a wide range of additional security functions, such as the addition of electronic wireless locking cylinders (WLX Pro + WLX Pro Plus access control). In this way, the administrator or operator can keep an eye on all access to and movements in the building. And users have optimal protection against the triggering of false alarms by entering a secured area through arming/disarming the alarm directly at the door.

KEY ADVANTAGES AT A GLANCE:

- Powerful alarm system, optimal for the commercial sector (businesses, offices, etc.)
- Reliable operation, precise alarming and flexible set-up depending on the property and customer's requirements
- 200 zones*, 50 BUS devices** and flexible operation for 200 users in up to 20 sub-areas
- Efficient management, set-up and monitoring of all systems in the installer portal including remote diagnostics and maintenance (e.g. firmware updates)
- Certified quality according to EN 50131 grade 2

*) Individually identifiable ***) components as a whole, e.g. keypads, extension modules, etc.

SECORIS SYSTEM OVERVIEW

SECORIS WIRED ALARM

Item number EZE60500

Description	Secoris Alarm Panel
-------------	---------------------

- Powerful alarm system for professional protection of commercial properties, for reliable operation, precise alarming and flexible setup, ideal in the commercial sector (businesses, offices, etc.), certified quality to EN Grade 2
- 200 individually identifiable zones and a total of 50 BUS devices (e.g. keypads, expanders, external power supply) for comprehensive protection, flexible operation for 200 users in up to 20 partitions
- Efficient management, set-up and monitoring of all systems in the Installer Portal, incl. remote diagnosis, maintenance (e.g. firmware updates) and connectivity solutions by the installer
- Extended administration and service offers via additional packages in the Installer Portal
- Alignment of the system to specific requirements in the project/building through flexible configuration, BUS system, optional expanders and connection of the electronic ABUS locking system (WLX Pro/Pro Plus)
- Integration of up to 10 ABUS IP cameras for video verification of events (e.g. alarm)
- Individual authorisation management for individual user groups
- Optional redundancy in control centre communication possible via PSTN or 4G module
- Control centre connection via standard integrated control centre protocols possible
- Certified to EN 50131-1 Grade 2

Number of BUS lines	2
Max. number of BUS-devices	50
Partitions/surveillance partitions	20
Number of wired zones	10
Max. number of keypads	49
Outputs	200 plus 16 communicators
Relay outputs	2
Number of users	200
Number of events	3000
Event log	Yes
Integrated siren	No
Extensible (hybrid)	Yes
Backup power supply	Yes
Zone closure	CC/FSL
Power consumption	240 mA
Backup battery	12 V 7 Ah
Net weight	4.5 kg
Installation location	Surface-mounted
Environmental class	II
Certifications	EN 50131 Grade 2
Configuration (1)	Keypad, Web Server, Cloud, App
Remote configuration	Yes
Network protocols	HTTPS
Communication/alarming	ARC, SMS, E-Mail, Push-messaging
Dimensions (W × H × D)	402 × 320 × 102 mm
Scope of delivery	Secoris intruder alarm system control panel
Required accessories	BT2070 VdS Battery, 12 V, 7.2 Ah • BUBE60000 Secoris keypad

Item number BUBE60000

Description	Secoris keypad
-------------	----------------

- Keypad with number/text keys for indoor use
- For activating/deactivating of the panel via access code
- Individually adjustable brightness of the backlight
- Switching of partitions possible, e.g. individual departments separated from each other
- Power supply can be provided via the BUS line of the panel or an external power supply unit
- LEDs indicate the current system status
- Certified to EN 50131-1 Grade 3

Connections	RS485 BUS
Integrated siren	Yes
Switching outputs	No
Tamper monitoring	Yes
Installation location	Surface mount
DC voltage supply	12 V
Power consumption	58 mA
Environmental class	II
Max. operating temperature	55° C
Min. operating temperature	-10° C
Certifications	EN 50131 Grade 3
Housing material	ABS
Dimensions (W × H × D)	128 × 128 × 29 mm
Scope of delivery	Secoris keypad
Required accessories	EZE60500 Secoris Alarm Panel

Item number **BUM060100** **BUM060010** **BUM060040**

Description **Secoris BUS external power supply unit** **Secoris BUS Wired Extension** **Secoris BUS wireless extension**

- ABUS Secoris - the ideal alarm system for reliable protection of offices and commercial properties
 - Additional power supply unit with emergency power supply (integrated rechargeable battery)
 - For larger installations and utilising the maximum cable lengths, the external power supply offers added performance
 - Can be used as a power supply for the safe operation of the alarm system in the event of faults (e.g. cut main line)
 - Provides up to 10 additional wired zones/detector lines
 - Certified to EN 50131-1 Grade 3
- ABUS Secoris - the ideal alarm system for reliable protection of offices and commercial properties
 - Extends the Secoris Alarm Panel by up to 10 wired zones for the integration of further detectors and devices
 - Flexibility through connection to the alarm panel via BUS line from anywhere in the building
 - For decentralised wiring of the detectors without the need for complex individual wiring to the panel
 - Compatible with a wide range of wired detectors such as motion detectors/PIR sensors, glass breakage and smoke detectors, emergency call buttons and door contacts
 - The wiring type (CC or FSL) can be defined individually for each wired extension module during installation
 - 4 integrated open collector outputs per wired extension module are used to control external devices (light, roller shutter, garage door, etc.) and other building automation applications
 - Need more switching capacity? The increased power is made available by means of the Secoris 4x Relay Card (AZM060010) (optional accessory)
 - Up to 50 BUS devices (incl. extensions) per Secoris panel
- ABUS Secoris - the ideal alarm system for reliable protection of offices and commercial properties
 - Expander for the Secoris Alarm Panel for integrating up to 30 ABUS radio detectors
 - Compatible with a wide range of ABUS radio detectors, e.g. motion detectors/PIR sensors, glass breakage detectors, smoke detectors, emergency call buttons and door contacts (see compatibility list)
 - For simple protection of areas where the use of conventional wired detectors is not possible or practical
 - Simple installation of the detectors anywhere in the building thanks to the radio link, without any effort for wiring, structural changes, etc.
 - Flexibly integrate up to 50 BUS devices (incl. extensions) into the Secoris, from any installation location in the building, without the effort of rewiring to the panel

Connections	230V AC, 1 Port for PlugBy-Communicator, RS485 BUS, Speaker, 5 - 10 wired zones, LAN, 2x 12V outputs, 4 open collector outputs	RS485 BUS, 10 wired zones, 1 port for PlugBy communicator, 4 open collector outputs, Speaker	RS485 BUS, Speaker
Switching outputs	4 open Collector Transistor outputs	4 Open collector outputs	-
Number of wired zones	10	10	0
Number of wireless zones	0	-	30
Backup power supply	Yes	-	-
Integrated siren	No	No	No
Tamper monitoring	Yes	Yes	Yes
Installation location	Surface mount	Surface mount	Surface mount
Radio frequency	-	-	868 MHz
Transmission power	-	-	10 mW
Modulation	-	-	FM
Zone closure	CC/FSL	CC/FSL	-
Power consumption	240 mA	500 mA	40 mA
Net weight	4.9 kg	0.42 kg	0.39 kg
Environmental class	II	II	II
DC voltage supply	12 V	12 V	12 V
Housing material	Metal	ABS	ABS
Certifications	EN 50131 Grade 3	EN 50131 Grade 3	-
Dimensions (W × H × D)	320 × 400 × 102 mm	144 × 230 × 44 mm	144 × 230 × 44 mm
Scope of delivery	Secoris BUS external power supply	Secoris BUS Wired Zone Expansion (10)	Secoris BUS Remote Zone Expansion (30)
Required accessories	ESEZ60500 Secoris Alarm Panel + BT2190 VdS Battery, 12 V, 18 Ah	ESEZ60500 Secoris Alarm Panel	ESEZ60500 Secoris Alarm Panel

Item number **AZM060000** **AZM060010**

Description **Secoris 8x Relay Card** **Secoris 4x Relay Card**

- ABUS Secoris - the ideal alarm system for reliable protection of offices and commercial properties
 - Extends the alarm panel with 8 powerful relay switching outputs
 - Converts open collector/drain transistor outputs to relay outputs
 - Activates the relay switching outputs when predefined events occur (alarm, fire, robbery) and triggers the desired reaction (e.g. external siren triggers, roller shutter goes up, light comes on)
 - Allows switching of actuators to control smart home scenarios and forms an interface to building automation
 - Relay switching capacity 1 A each (30 V DC/120 V AC)
- ABUS Secoris - the ideal alarm system for reliable protection of offices and commercial properties
 - Expands the alarm panel with 4 powerful relay switching outputs
 - Converts open collector/drain transistor outputs to relay outputs
 - Activates the relay switching outputs when predefined events occur (alarm, fire, robbery) and triggers the desired reaction (e.g. external siren triggers, roller shutter goes up, light comes on)
 - Supports easy wiring of the Secoris wired extension and BUS external power supply unit
 - Allows switching of actuators to control smart home scenarios and forms an interface to building automation
 - Relay switching capacity 1 A each (30 V DC/120 V AC)

Outputs	8 relay outputs NO/NC, potential free	4 relay outputs NO/NC, potential free
DC voltage supply	12 V	12 V
Power consumption	150 mA	80 mA
Dimensions (W × H × D)	130 × 25 × 60 mm	63 × 33 × 23 mm
Scope of delivery	Secoris 8x relay card	Secoris 4x Relay Card
Required accessories	ESEZ60500 Secoris Alarm Panel	BUM060010 Secoris BUS Wired Extension + BUM060100 Secoris BUS external power supply unit

Item number **APP60000** **APP60200**

Description **Secoris (App)** **Secoris (App)**

- Free app for the Secoris alarm system for up to 200 app users with individual authorisations per alarm panel
- Operate and manage several Secoris panels with just one app; arm/disarm the system remotely as well
- Guided onboarding: successfully connect (pair) the panel and app in just a few simple steps with the animated help wizard
- Easy to use: streamlined user guidance with clear status display (coloured shield symbol), direct selection of functions (e.g. arming, alarm mute) and a clear tab bar with shortcuts to important functions
- At a glance: Overview of all coupled panels incl. online status in one view
- Details for each alarm panel can be selected directly via a tile, displayed in a clear colour code: Partitions including status, number of zones with respective status
- React correctly in the event of an alarm: Plain text display of event, triggered partition and zone in the alarm view. Authorised users acknowledge the alarm and reset the alarm system directly in the app.
- Secure app access for authenticated users to the Secoris alarm system via ABUS account
- Additional security via app password, fingerprint (Touch ID) or facial recognition (Face ID)
- Further features such as viewing the logbook, switching outputs via app, etc.

Required accessories ESEZ60500 Secoris Alarm Panel

TERXON HYBRID ALARM

Whether in business premises, offices or multiple-use properties – Terxon is the security solution for highly customised, thoroughly complex scenarios.

The product family is available to fit every project, and comes in sizes "M" (medium) and "L" (large).

This makes it possible to establish sophisticated security systems in large factory halls or office blocks. Wired alarm systems are a highly efficient and trouble-free solution, especially in new buildings.

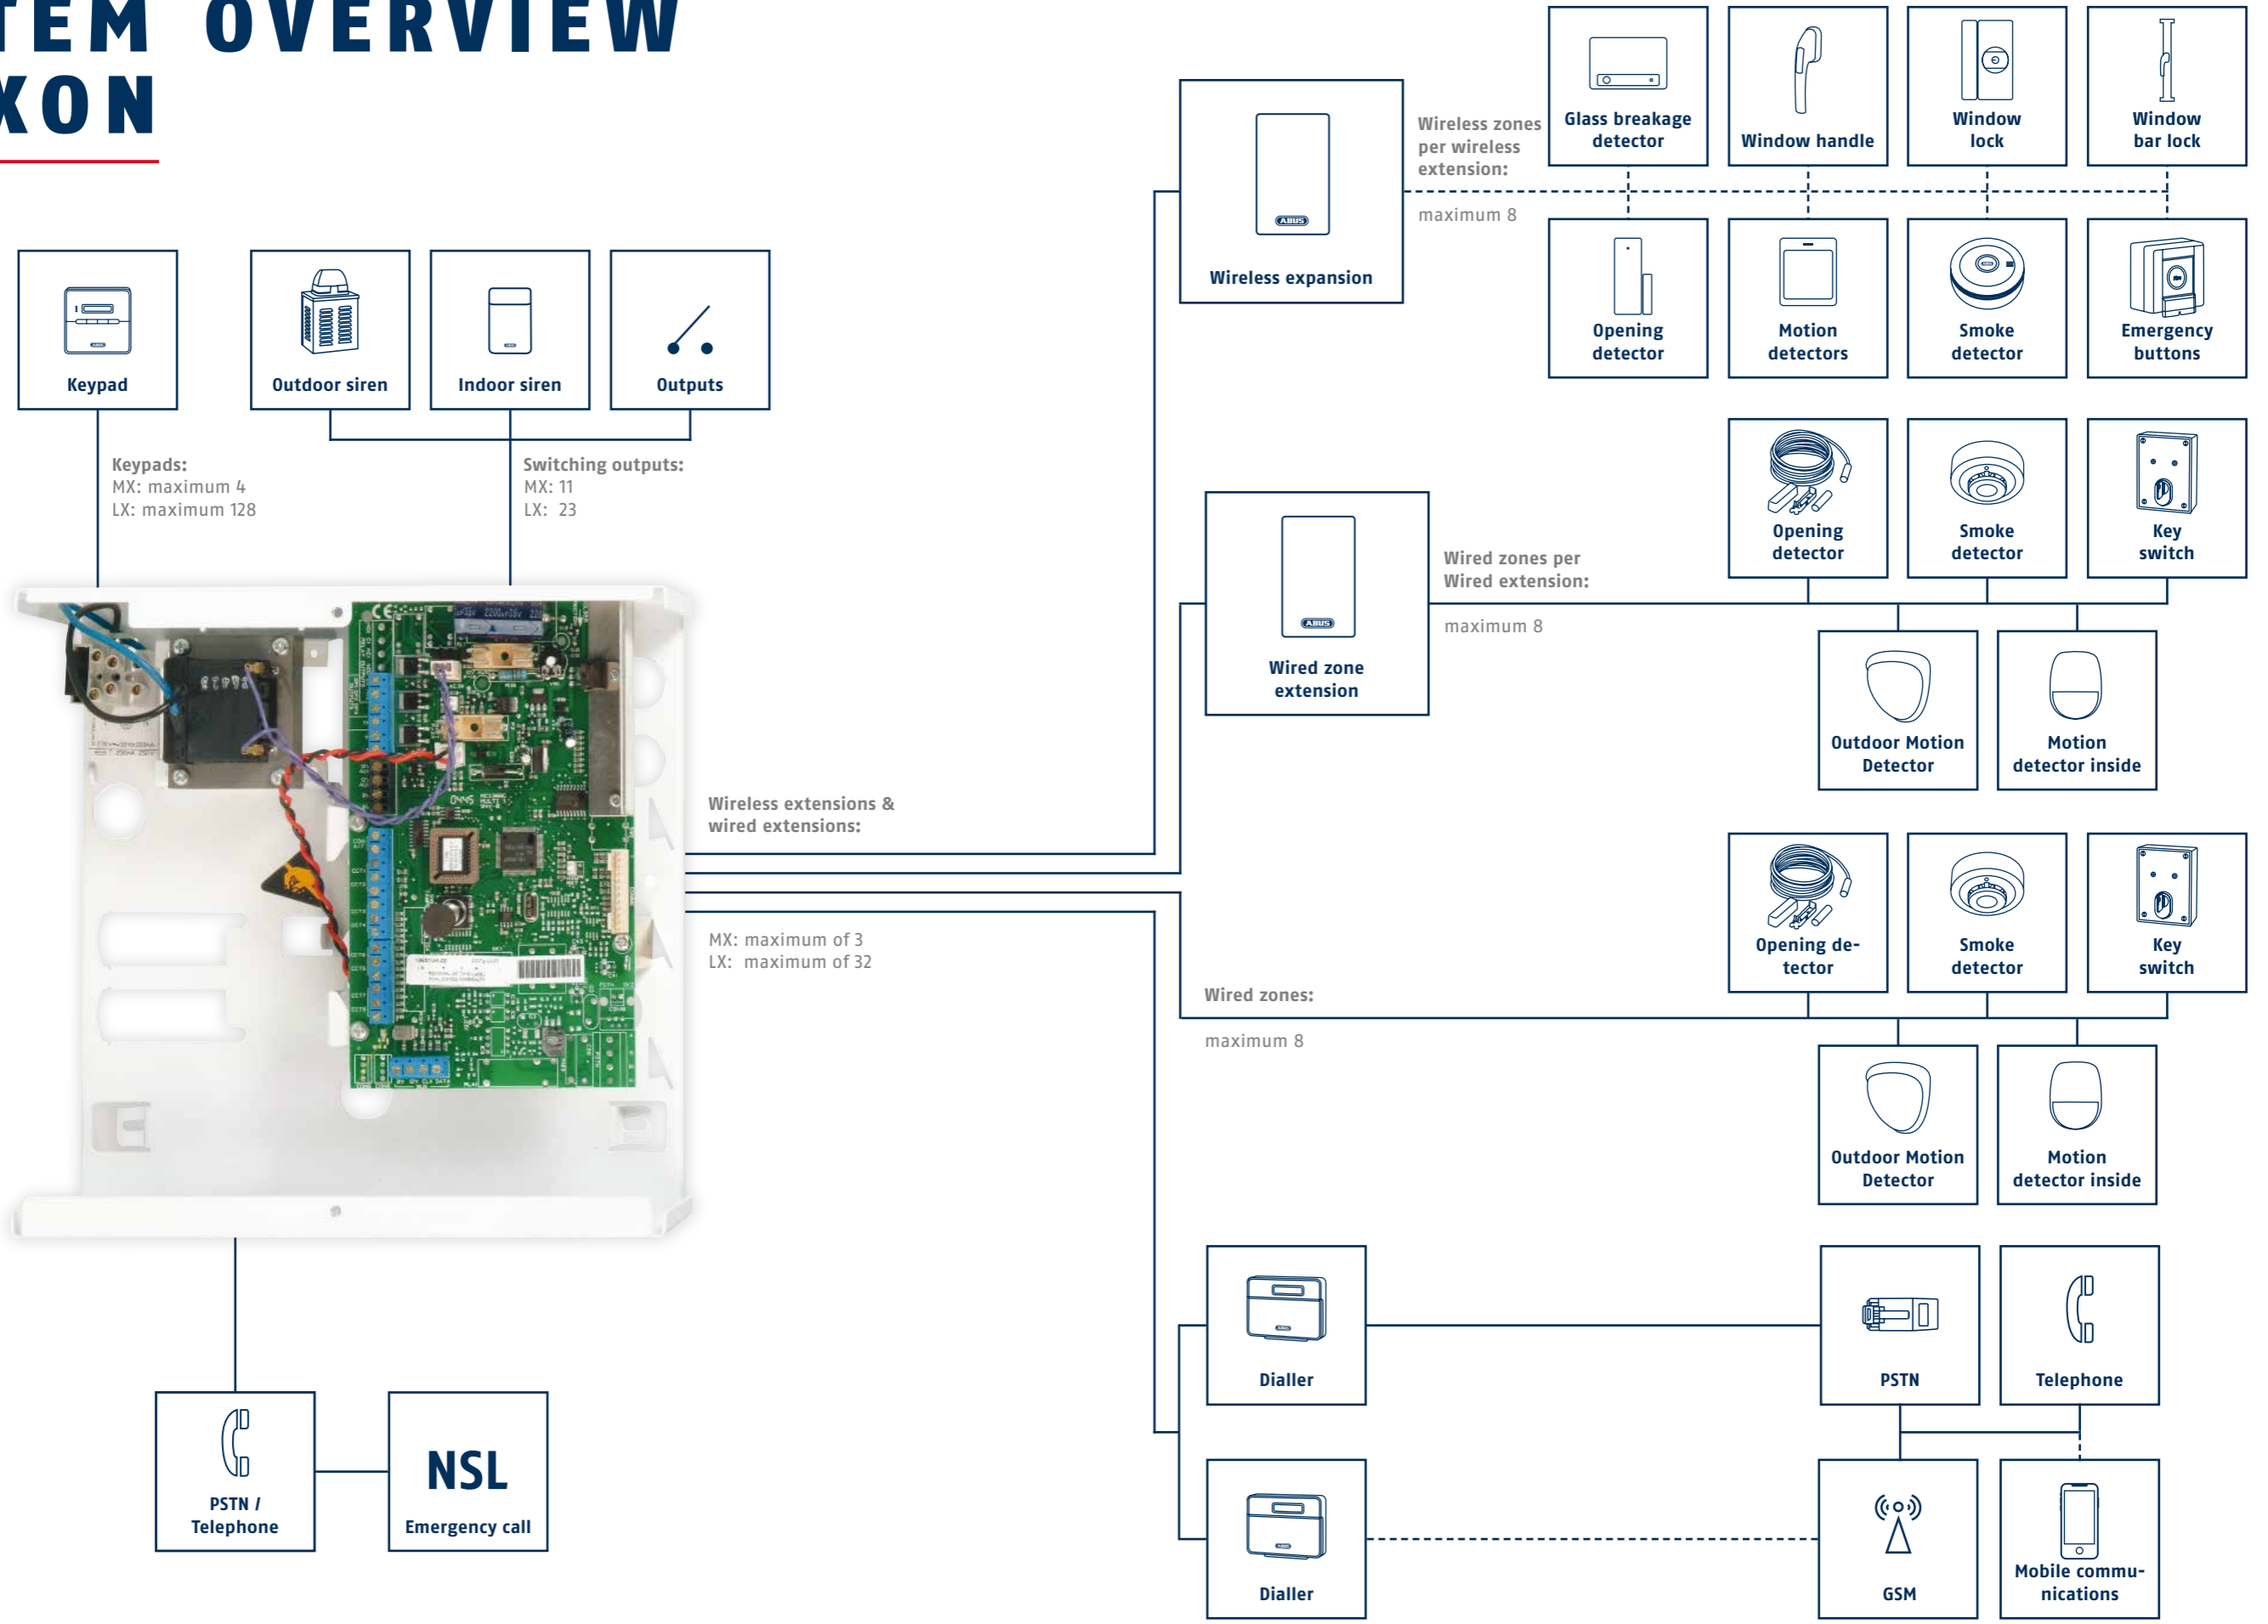

Terxon MX and LX are hybrid systems that can not only be extensively expanded with wired zones, but also with ABUS wireless modules and radio detectors if required. This results in a very versatile range of options in mixed operation to provide optimum protection for every property.

KEY ADVANTAGES AT A GLANCE:

- Security in size "M": Terxon MX for up to 32 wired/wireless zones
- Security in size "L": Terxon LX for up to 264 wired/wireless zones and 128 keypads
- Programming via LCD keypad or software
- Integrated dialler for transmission of digital control centre protocols
- Sabotage-monitored control panel, keypads and detectors

SECVEST WIRELESS ALARM

Reassuring for residents or staff: Reliable technology ensures your personal safety around the clock.

Not only with all-round protection from burglary, fire and water damage and in case of emergency: in the team of mechatronic ABUS window/door locks, the Secvest is the only wireless alarm system that actively protects against the risk of burglary. Conclusion: The perpetrator is detected or driven away before they make it into the building. The privacy of the residents - sometimes the most important factor affected by a burglary - remains completely unviolated.

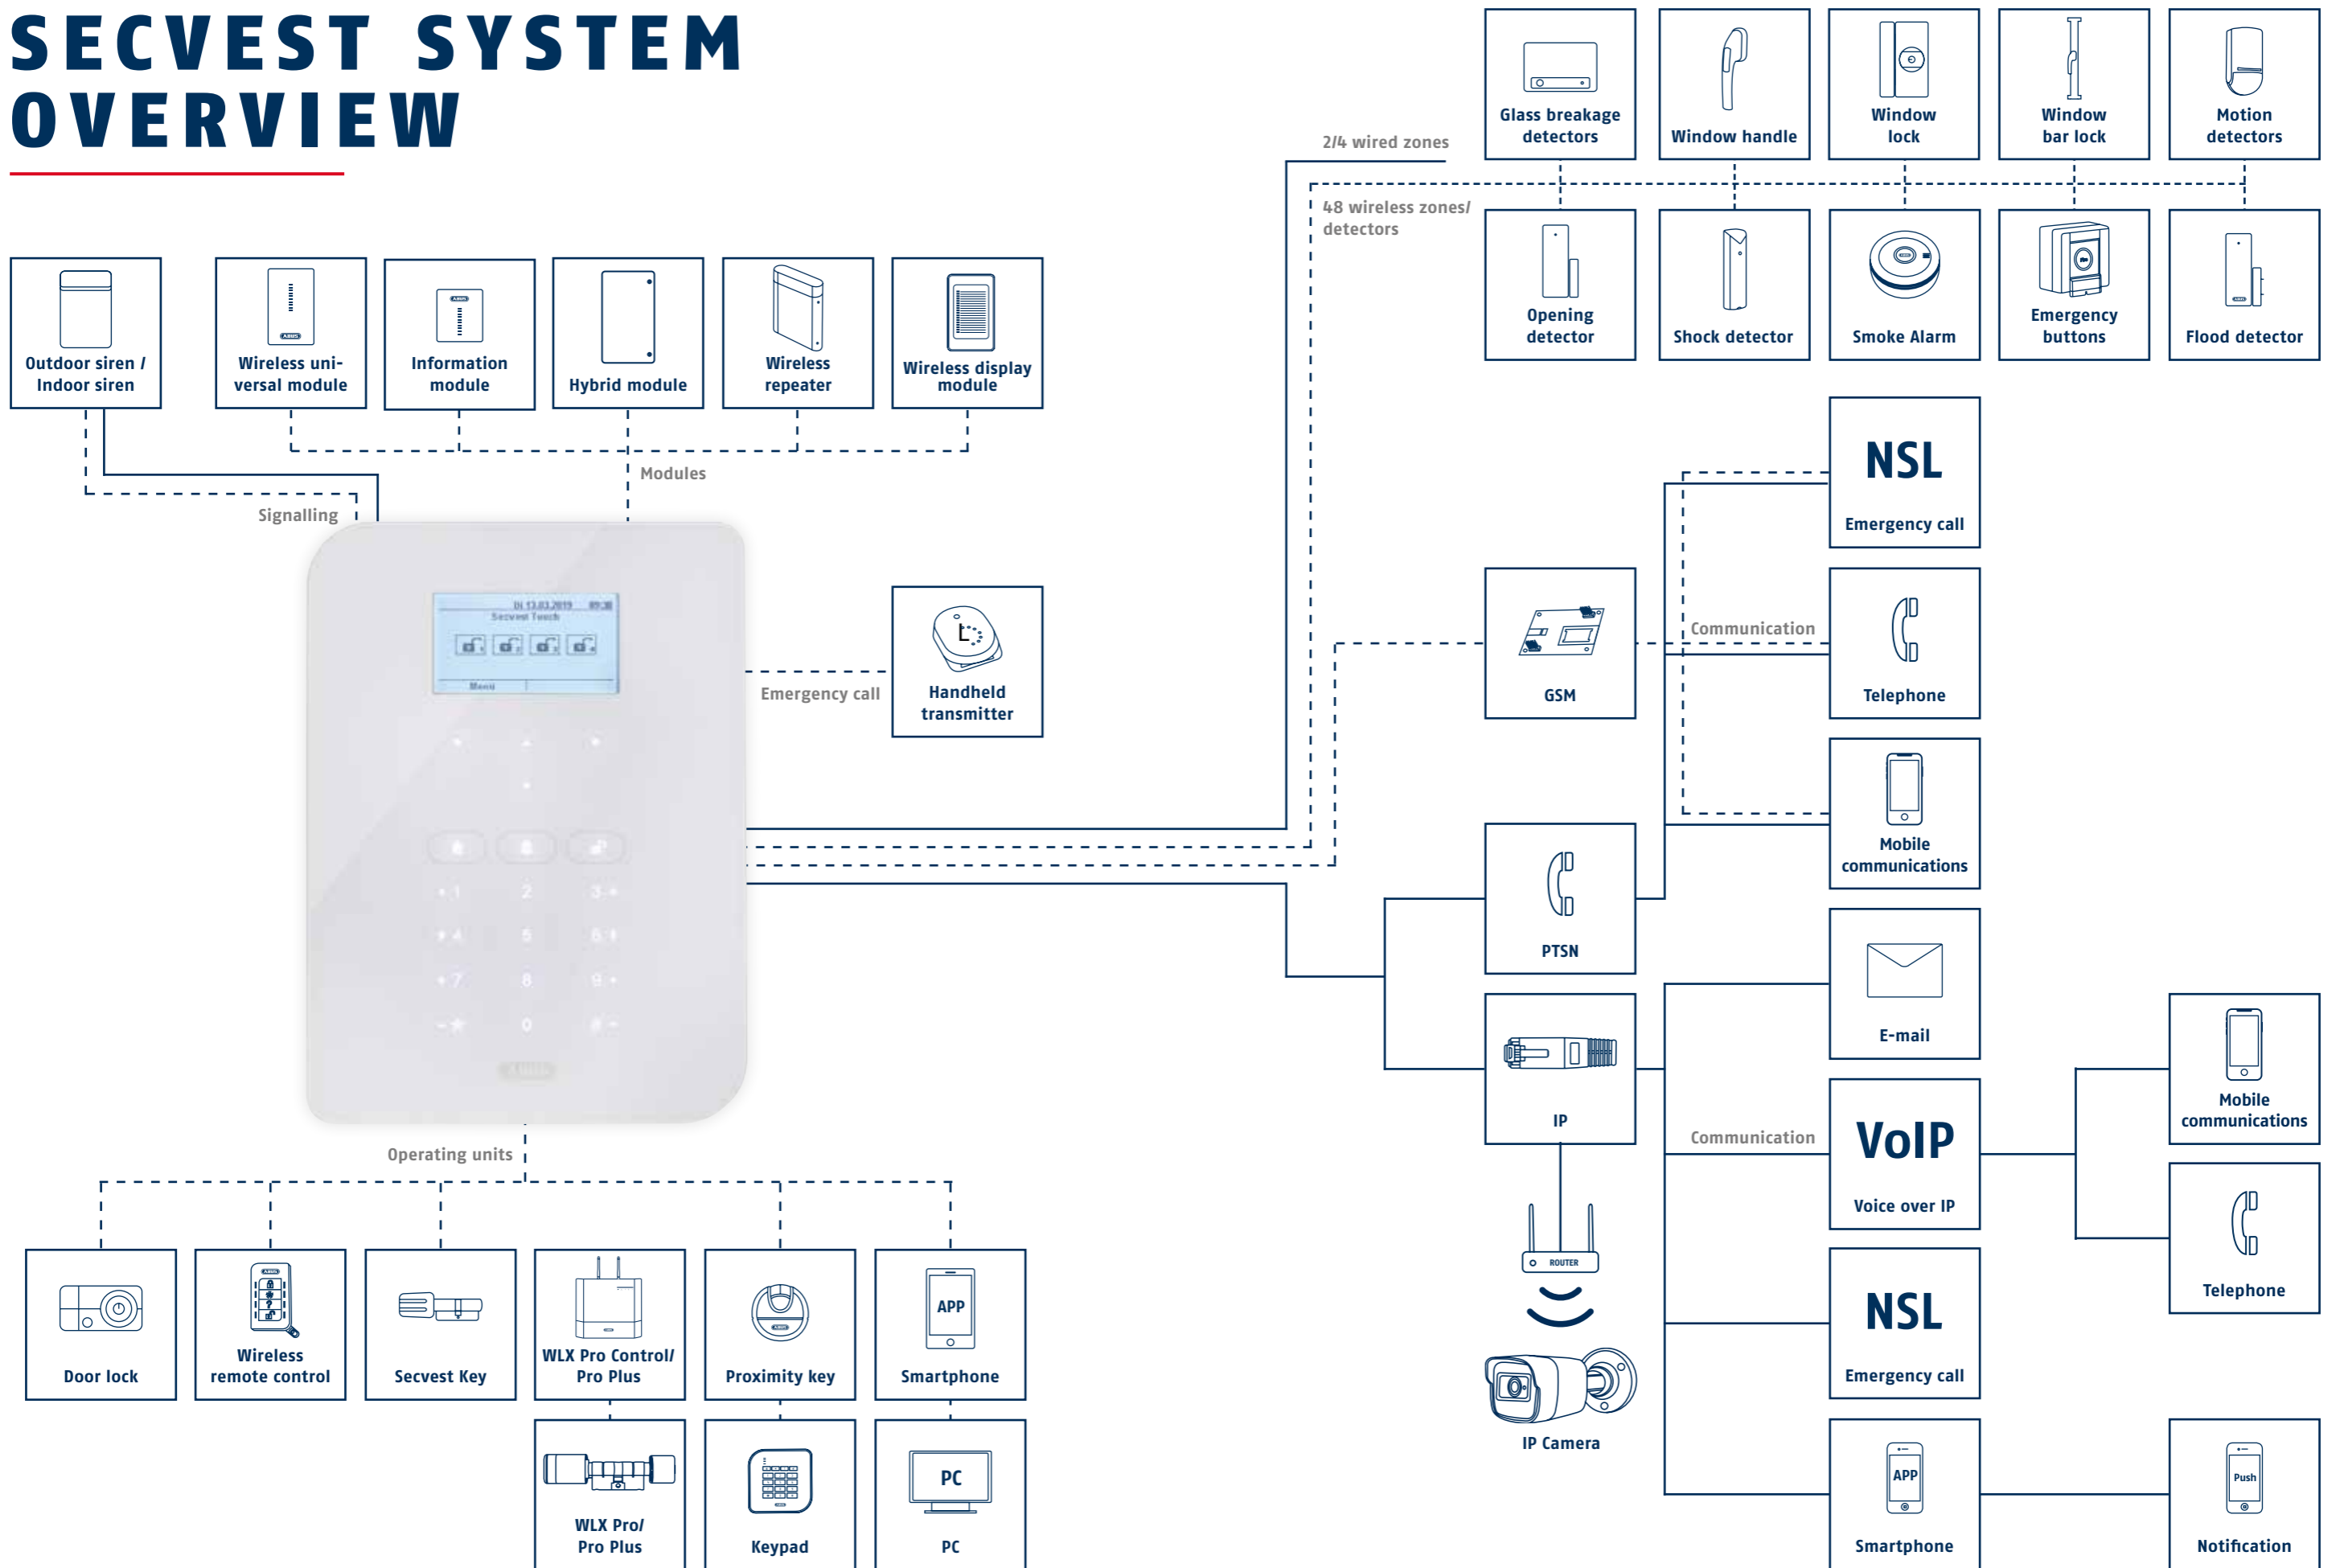

A clear advantage of wireless technology: The alarm system can be installed in just a few hours - without pulling cables, possibly knocking open the walls and the associated dirt. By integrating additional components, you can expand the system scope as required, e.g. add wired detectors, attach opening detectors integrated into the window on site or wireless door cylinders. Should you move house, the Secvest and its components can be dismantled at any time and reinstalled in your new home, office or business.

The operating convenience of the Secvest also speaks for itself: Whether with the app on the smartphone (including push notifications in the event of an alarm), with the handy remote control on the key ring, on the keypad or directly by unlocking and locking the front door on the WLX wireless cylinder.

KEY ADVANTAGES AT A GLANCE:

- Up to 48 individually identifiable radio detectors (radio zones), 8 keypads, 50 remote controls
- Convenient operation and programming on the panel and web server
- Fast configuration and diagnostics through software features via the panel and web server
- Active burglary protection with additional mechatronic wireless window/door security devices
- Video verification with up to 6 ABUS network cameras
- Send IP-based protocols to alarm receiving centres (e.g. security firm)
- VdS Home certified and EN 50131-1 Grade 2

Required accessories	FUAA50000 Secvest Wireless Alarm System

Item number **FUM050030** **FUM050010** **FUM050020**

Description **Secvest Wireless Info Module** **Secvest wireless repeater** **Wireless Universal Module**

- Informs you about the state of the Secvest
- 8 LED displays
- Various signal and alarm tones
- Integrated piezo sounder

- Accessory to expand the range and amplify the signal strength of Secvest wireless components
- Enables good wireless reception anywhere in the house
- Amplifies all available Secvest wireless components up to a maximum of 10 components per repeater
- Pre-configuration of the components that are to be amplified in the alarm panel's menu
- Automatic transmission of the configured components from the alarm panel to the repeater
- Integration of a maximum of 4 repeaters per alarm panel is possible
- LEDs for displaying the current status and as an indicator of the signal range
- USB connector to make it easy to perform updates
- Uniform ABUS design

- For expanding the range of Secvest Generation wireless detectors
- Output module with 4 outputs (switch capacity 500 mA)
- Siren module can be used as siren sender/receiver
- Supports perimeter warnings, e.g. when outside motion detectors are used
- Expands wired systems into hybrid alarm systems

Connections	12V	Voltage	4 x transistor relay (NO/NC), max. switch capacity 500 mA, 24 V DC, R=2 / 1 x RJ12 for control of the siren
Display	8 LEDs of different colors	3 LED	10 LEDs
Tamper monitoring	-	Yes	Yes

Dimensions (H × Ø)	69 × 44 mm
Scope of delivery	Secvest Switching mode Power supply FU3819

Item number **FU3821**

Description **Battery Pack For Wireless Universal Module**

- To secure operation of the wireless universal module in event of power failure
- Maintenance-free
- Suitable for Secvest wireless universal module (FU8211 / FUM050020)

Dimensions (W × H × D)	97 × 55 × 25 mm
Scope of delivery	Battery Pack For Wireless Universal Module

WIRED COMPONENTS

Maximum flexibility: Efficient wired detectors and wired sounders (outdoor and indoor sirens) work with the hybrid-capable ABUS intrusion detection and alarm systems Secoris, Terxon and Secvest, depending on the configuration (e.g. hybrid module).

A wide range of different detector types is available for the many hazards of everyday life. The VdS-certified detectors in the ABUS range provide a very high level of protection against tampering.

Motion detectors, for example, monitor entire rooms. Opening detectors trigger an alarm when windows and doors are opened, the system is armed and no one is at home. Glass breakage detectors and shock sensors detect intrusion via broken windows, glass doors, drywall, etc.

Smoke alarms are required by law in private living spaces and must be installed in commercial buildings in accordance with the respective fire protection regulations (fire protection concept/building permit). The wired smoke sensors can be integrated directly into the alarm system for even greater security and convenience.

Components such as light barriers are recommended for monitoring entrances, for example.

Description	Motion detector PIR (PET)	Motion detector PIR MW (PET)	Outdoor Motion Detector
-------------	---------------------------	------------------------------	-------------------------

- Passive infrared motion detector (PIR) for indoor use
- Pet-immune optional: Ignores animals up to approx. 15 kg
- Monitors entire rooms (detection area approx. 16 x 16 m)
- High security: No blind spots thanks to anti-creep protection
- Time-saving installation thanks to preconfigured, common resistor combinations for alarm and tamper monitoring on the detector, which can be conveniently set via jumpers (plug-in jumpers)
- EN Grade 2 Certification

- Passive infrared motion detector (PIR) with microwave element (MW) for indoor use
- Dual detector: PIR sensor and MW sensor combined in one detector
- Pet-immune optional: Ignores animals up to approx. 15 kg
- Monitors entire rooms (detection area approx. 12 x 12 m)
- Microwave frequency in the 24 GHz range (EU-wide approval)
- No blind spots thanks to anti-creep protection
- AND- or OR-linked PIR and microwave element
- Time-saving installation thanks to preconfigured, common resistor combinations for alarm and tamper monitoring on the detector, conveniently adjustable via jumpers (plug-in jumpers)
- EN Grade 2 Certification

- Suitable for alarm and video monitoring systems
- Outdoor motion detector for perimeter monitoring
- Dual PIR element
- Detection range up to 30 m
- Protection class IP55
- Two potential-free outputs

Detection range of detector (m)	16 m	12 m	8-30 m

WIRELESS COMPONENTS

By selecting radio detectors, mechatronic wireless window/door locks and wireless sounders, you can put together your own individual alarm system. In addition to the alarm components, you can supplement the system with the valuable protection provided by hazard detectors such as radio-networked smoke detectors (protection against life-threatening smoke poisoning) or water detectors (timely warning in the event of a burst water pipe, for example, or before major water damage has occurred).

The radio detectors and sirens are easy to install and programmed into the wireless alarm system without pulling cables. The mechatronic detectors also function as robust mechanical security devices for maximum burglary protection. For example, with the ABUS Secvest you can quickly and easily implement effective burglary protection for private households or small businesses.

Depending on the project plan (e.g. radio extension, hybrid module), wireless components are the optimal supplement for hybrid alarm systems. For example, at installation sites where wiring is highly complex, special features (e.g. mechatronic protection) are required or time-limited protection is intended.

SECVEST WIRELESS PRODUCTS COMPATIBILITY WITH BUM060040:

BUM060040

The Secoris BUS wireless extension BUM060040 creates the bridge to the radio detectors, mechatronic fuses and other wireless components of the Secvest. When updating an existing Secvest system, only the panel is replaced and the wireless extension is installed - and the upgrade is complete. The existing wireless components simply continue to work with the Secoris panel.

Item number FUFT50002B

Description Secvest Wireless Window Lock FTS 96 E - AL0145 (brown)

- Active intrusion protection (detects break-in attempts)
- Mechanically secured through claw-like steel bolts
- More than one tonne of pressure resistance
- The open and closed position can be detected visually
- Common closing: one key for all units, various locking variants available
- With a connection point for a passive glass breakage detector

Max. battery life	2 y
Closure number	AL0145
Compatible with	Secvest, BUM060040
Dimensions (W × H × D)	78 × 125 × 55 mm
Scope of delivery	Secvest Wireless Window Lock FTS 96 E - AL0145 (brown) • 2 x Key • 2 x 1.5 V AAA batteries
Required accessories	FU8456 Fixing Set IM 100 Composite Mortar Anchor • FU8408 Drilling Template For FTS 96 E • FU8406 Mounting Anchor For FTS 96 E (set of 10)

Item number FUSG50110

Description Secvest Wireless Indoor Sounder

- High-volume sounder (> 80 dB) for indoor areas
- Acoustic support for alarm panels and wireless outdoor sounders
- Easy integration of up to 4 indoor sounders into the Secvest alarm panel
- Compatible equipment: FUA50xxx S/W >= v3.01.11, FUM050010 wireless repeater
- Inconspicuous, compact product design
- Flexible installation and retrofitting with minimal work
- Optional external power supply for operation without batteries (6–15 V DC)
- Jamming detection
- Monitors the input voltage
- Repeatable for bridging larger transmission paths

Sound pressure	> 80 dB
Tamper monitoring	Yes
Housing material	PC / ABS
DC voltage supply	12 V
Battery type	1.5 V AA Alkaline
Max. battery life	1 y
IP protection class	34
Environmental class	II
Certifications	-
Dimensions (W × H × D)	130 × 154 × 40 mm
Scope of delivery	Secvest Wireless internal siren • 4 x batteries • Quickstart guide • 3 x Screws, Wall Plugs

Item number FUSG50101

Description Secvest Wireless Outdoor Sounder

- New attractive design
- Loud combination sounder
- Fast installation thanks to integrated spirit level
- Optimised seal contact can be adapted for any wall surface
- Fixed front flap enables installation with one hand
- Robust, UV-resistant, weatherproof housing
- Bright SMD LEDs

Sound pressure	100 dB
Tamper monitoring	Yes
Battery type	Alkaline battery pack 2 x 3 V (FU2986)
Max. battery life	2 y
Compatible with	Secvest, BUM060040
IP protection class	65
Certifications	EN 50131 Grade 2, INCERT
Dimensions (W × H × D)	210.6 × 294 × 78.5 mm
Scope of delivery	Secvest Wireless Outdoor Sounder • Alkaline battery pack 2 x 3 V (FU2986) • Mounting material • Quick Guide

ARMING

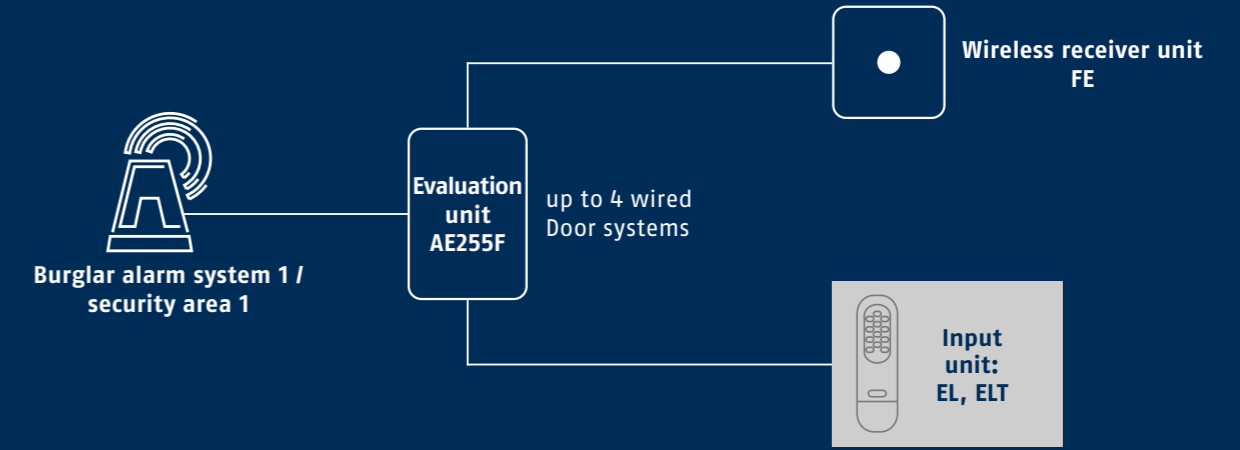

Convenience and safety when arming/disarming the alarm system. Quite easy to do directly at the front door when closing or opening via access control system (commercial building), door fitting with PIN code access or separate wireless cylinder (private household). In addition to the high level of operating convenience, this also enables forced arming/disarming of the intruder alarm system in order to avoid entering secured areas and to reduce any false alarms to a minimum.

That is why you should Professional ABUS alarm systems can be easily integrated into an access control system or coupled with a wireless door cylinder. With the ABUS systems listed here - or, depending on the project plan, with an existing system in the property.

EL AND ELT SYSTEM

Practical and discreet wall readers for controlling electronic switching (e.g. motorised locks, lifts, barriers, garage door openers or automatic doors)

- Arming/disarming of intruder alarm systems in combination with AE255F evaluation unit
- Flexible operation via ABUS chip key, additional code keypad or proximity media (depending on model)
- Also suitable for activating electrical door openers.

ARMING

WAPPLOXX PRO PLUS SYSTEM

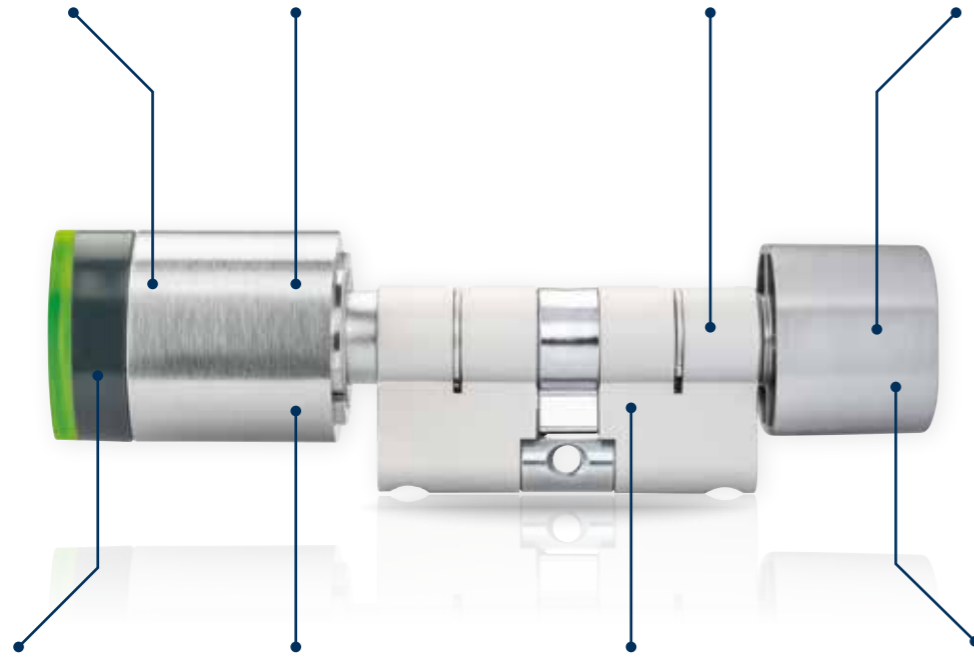

Can be operated without network or internet connection

All data is stored locally on the wAppLoxx Pro Control.

Access management while out and about
Flexible access at any time via app, Apple Watch and Apple TV.

Modular cylinder
with extension concept, choice of design, colour and function.

Access Management
32 doors and 500 Users and up to 160 doors with 1000 users with Pro Control Plus.

The highest level of IT and wireless protection
Secure AES radio path (128 bit) and P2P communication between the wAppLoxx Pro Control and components as well as SSL web encryption.

IP camera integration
See who is at the door in real time through simplified, direct integration of IP cameras.

Locking plan matrix
Sorted, clearly arranged and uncomplicated
Link door and user access rights in real time.

Control of intruder alarm systems
Prevent operating errors and false alarms as well as direct control of the alarm system at the door.

ARMING

TRANSMISSION

Any alarm chain is only as strong as its weakest link. The fast and reliable transmission of the alarm notification to the occupants, owners or managers of the building is absolutely crucial.

In addition to the local alarm on the property, the immediate alarm via e-mail or app is an important part of the alarm chain. Additional security is provided by a (possibly intentionally redundant) alarm via the fixed or mobile network.

When securing high-value homes and commercial properties, a professional guard and security service should usually also be alerted, primarily by transmitting the alarm notification via digital protocols to an alarm receiving centre (ARC). Depending on the system's programming, a silent alarm (without local alarm) can also be transmitted.

TRANSMISSION

Item number **AZ6301** **AZWG10020** **AZWG10200**

Description **Terxon PSTN Dialer** **GSM/PSTN Dialer** **PSTN/IP Converter**

- TBR/CTR-21 compliant
- Alarm repetition
- Remote acknowledgement configurable
- Also usable as a standalone communication module
- Illuminated display

- Enables communication to and from the alarm system via landline/cellular network
- Text and voice messages via PSTN and GSM (redundant transmission)
- Alarm and status messages to up to 10 stored telephone numbers
- 8 wired inputs, 4 output switches, 10 storable contact numbers
- 8 text and 8 voice messages plus location message (1 message per input)
- Remote access via telephone for worldwide operation when out and about
- Listen and speaking mode for simple on-site interaction (microphone/loudspeaker)
- Inbox function for forwarding messages (e.g. prepaid credit)
- Can be used independently of alarm system (building management system, industry)

- Converts analog reporting protocols to digital protocols and reports them to monitoring stations
- 8 programmable wired inputs
- Integrated GPRS module
- Dual security: redundancy through ethernet and GPRS
- Housing tamper protected

Item number **ESM060010**

Description **Secoris PSTN module**

- ABUS Secoris - the ideal alarm system for reliable protection of commercial properties and small businesses
- Additional module for redundant communication of the Secoris Alarm Panel
- Data transmission and communication via the phone network (voice messages and analogue control centre protocols)
- Ensures a second secure transmission path in case of network connection failure
- To connect the alarm panel to the PSTN interface of the phone system
- Transmission of control centre-based standard protocols (FF, SIA, CID) for alarm activation to an emergency call and service control centre

Connections	Screw Terminal for PSTN
Compatible with	Secoris
Dimensions (W × H × D)	62 × 40 × 12 mm
Scope of delivery	Secoris PSTN module
Required accessories	ESEZ60500 Secoris Alarm Panel

Item number **ESM050000** **AZ6310W**

Description **Secvest mobile wireless module** **GSM antenna for Secvest (white)**

- Accessory module for alternative or redundant language and data transmission
- Data transmission and communication via the wireless mobile phone network
- GSM and LTE-compatible (2G and 4G)
- Secure transmission in the event of landline failure
- Ideal for flats and properties with no landline
- Transmits voice messages, monitoring station protocols, push and SMS messages
- Straightforward installation via corresponding connector on the Secvest motherboard
- Optimises the GSM reception of the Secvest GSM module (ESM05000x)
- Flexible installation thanks to a 3 metre cable
- Colour: white

Compatible with	Secoris, Secvest	ESM050000
Dimensions (W × H × D)	63 × 12 × 40 mm	220 × 12 × 2 mm
Scope of delivery	Mobile Wireless Module • Mobile communication antenna (ca. 300 cm cable) • Installation instructions and user guide • Mounting material	GSM antenna
Required accessories	FUAA50000 Secvest Wireless Alarm System • FUAA50500 Secvest Touch Wireless Alarm System • ESEZ60500 Secoris Alarm Panel	-

ACCESSORIES

Matching accessories make the difference: clearly visible warnings, batteries and rechargeable batteries, distributors for clean installation and much more.

Draw the attention of customers, employees and passers-by to your alarm security system with warning stickers - and thus directly deter potential offenders.

On the following pages you will also find the appropriate accessories for clean installation and stable operation of the alarm system.

SERVICE & CONTACT

INTERNAL AND FIELD SERVICE

As a specialist dealer partner, you can benefit from your own, dedicated team of representatives for your region. Our team will be available to support you with comprehensive, specialist expertise no matter what you need. This also covers any questions relating to your project, so you can count on both our internal support office and our on-site field service.

THE ONLINE STORE

Take advantage of the quick and easy ordering process at www.abus.com

The Partner Lounge is where you can conveniently carry out all of your orders and track your order status in real time. This is also where we provide comprehensive information and sales support documents for your convenience.

TECHNICAL SUPPORT (TS)

If problems occur with our products, our technical support team is ready to take your call to find the source of the issue and work with you to find a solution.

QUALITY ASSURANCE – SERVICE – PRODUCTION (QSP)

In the event of a technical defect, our QSP department will perform a thorough check of your device and repair it immediately if possible.

PLANNING SUPPORT

Are you planning a new building or a larger property? We offer you knowledgeable planning support incl. tender data, calculation tools, etc.
