

Stump-tailed macaque

Macaca arctoides

Countries of Origin: Bangladesh, Cambodia, China, India, Laos, Myanmar, Thailand, Vietnam.

Habitat: Tropical forests

Size: Head/Body length 48.5cm - 65cm

Weight: 7.5kg - 10.2kg

Life Expectancy: 25 years

Diet: Fruit, seeds, young leaves, flowers, buds, insects, birds, eggs and small animal prey

Lifestyle: Live in groups with multiple males and females, which have strong female hierarchies. They spend more time on the ground than in trees (terrestrial).

Rescue Information: Monkey World has rescued over 30 stump-tailed macaques from European countries. 29 had been kept and used in laboratories, where they had little room to exercise and were fed poor diets. The others were rescued from the pet trade and other centres, where they had been kept on their own in small cages.
