

## CISCO WIRELESS IP PHONE 7920, VERSION 2.0

The power of Cisco IP Communications Solution extends throughout the enterprise by delivering a powerful converged wireless solution with intelligent wireless infrastructure and an innovative product with the latest version of the Cisco Wireless IP Phone 7920–Version 2.0. The Cisco Wireless IP Phone 7920 is an easy-to-use IEEE 802.11b wireless IP phone that provides comprehensive voice communications in conjunction with Cisco CallManager and Cisco CallManager Express. Increased security and faster roaming, plus eXtensible Markup Language (XML) applications to the display, are several of the enhancements to the Cisco Wireless IP Phone 7920 Version 2.0.

Cisco IP Phones are covered by a Cisco standard one year replacement warranty. A Cisco SMARTnet optional service agreement is available on the Cisco Wireless IP Phone 7920 hardware only and not the accessories, such as batteries.

### CISCO IP COMMUNICATIONS SERVICES AND SUPPORT

Cisco IP Communications services and support reduce the cost, time, and complexity associated with implementing a converged network. Cisco and its partners have designed and deployed some of today's largest and most complex IP Communications networks-which means that they understand how to integrate an IP Communications solution into your network.

Cisco design tools and best practices ensure the solution best fits your business needs from the start, eliminating costly redesigns and downtime. Our proven methods ensure a sound implementation that will deliver the functions and features you expect-on time. Support services include remote network operations, network management tools to administer the converged application and network infrastructure, and technical support services.

Through these services, your organization benefits from the experience gained by Cisco and its partners. Leveraging this valuable experience, you can create and maintain a resilient converged network that will meet your business needs today-and in the future.
