

Mobile Digital Forms from Mirata Software & TOUGHBOOK

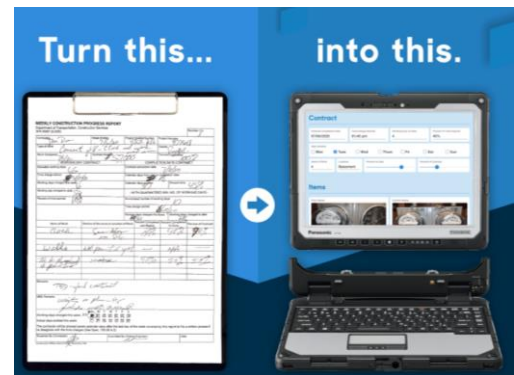

Panasonic TOUGHBOOK and Mirata Software provides a mobile digital form solution that digitalizes your form process any place, any environment, any time within an enterprise-grade platform.

Whether in the extreme heat, cold, humidity or rain, utility workers are supported with a rugged solution, long battery life, reliable connectivity, and low failure rates so that they can stay most productive with collecting digital form data wherever they go. Mirata user friendly and zero code digital forms are straightforward to access and utilize through TOUGHBOOK mobile devices from the office and the field. Digital forms are easy to integrate across the SAP landscape.

We can help you with a customized Panasonic TOUGHBOOK and Mirata Software digital form solution to improve user experience, real-time visibility, costs and efficiency so data collection execution times and process are shortened significantly and seamlessly integrated into your SAP system.

Learn how TOUGHBOOK+Mirata can help you implement a mobile digital form solution to improve efficiencies.

A user friendly and easily implemented digital form solution

- Deploy a single platform for all your forms needs: Reduced costs and complexity.
- Run forms across devices: Mirata runs on mobile devices, in a Web browser, or embedded in other applications such as the SAP® Service and Asset Manager mobile app.
- Put the data where you want it: Configurable system interfaces to both SAP and non-SAP systems.
- Automate business processes: Instant updates anywhere inside or outside your organization.
- Empower your business units to actively contribute to your digital transformation: No-code form designer enables a citizen community of form developers while IT maintains control over data access and security.

Real-time data collection and access means better decisions can be made faster.

- Business users can create and maintain complex forms and workflow without IT involvement.
- Eliminate paper, supporting a digital audit trail and signature capture.
- Increase productivity with fewer manual processes and keying of data.
- Drive better business decisions based on real-time reporting & analytics.
- Create a common user experience for everyone - use it on a mobile device or your desktop with or without network coverage.
