

## Wednesday Walk – Cullulla Rd, Nadgigomar NR (East), Claypit Rd & Willow Glen Rd – 25 September 2013

The main aim of the day was to walk from the locked gate on Mogo Rd to the gas pipeline scar in Nadgigomar Nature Reserve (east) – a new area for us. To get there we went via Bungendore, Tarago and Cullulla Rd where we did our usual stop at the quarry site which continues to regenerate well. *Pomaderris delicata* was flowering well. We continued on to Sandy Point Road then Mogo Road to the locked gate. We walked past the locked gate on the right hand side which is part of Nadgigomar Nature Reserve. Flowering were *Mirbelia platylobioides*, *Aotus ericoides*, *Lomandra glauca*, *Leucopogon virgatus*, *Lissanthe strigosa*, *Philothea salsolifolia*, *Tetratheca bauerifolia*, *Patersonia sericea* (and later *P. longifolia*), *Acacia brownii*, *A. gunnii*, *A. ? obtusata* (just finishing), *Petalochilus fuscatus*, *Diuris pardina*, *Exocarpos strictus* and an interesting *Schoenus* sp. to name a few. Other interesting plants were the 3 banksias - *B. marginata*, *B. spinulosa* and *B. paludosa* - *Persoonia mollis*, *P. microphylla* (some enormous plants) - and one which kept us guessing until we got to the pipeline and found one flowering - *Conospermum taxifolium*. Also in the pipeline scar were some fantastic *Leionema diosmeum* and *Chloanthes parviflora* flowering well. On the way back we called in to Claypit Rd looking for *Bossiaea oligosperma* which is a threatened plant only found in a couple of locations. We found the small population and there were still a few flowers but it was already forming seed pods. Here we also finally saw what we'd been flashing past - good displays of the prostrate form of *Pultenaea microphylla* - and also a yellow prostrate form of *Grevillea juniperina*. Also flowering well were some *Dillwynia glaucula* which is another rare and endangered pea. Then, onto Willow Glen Rd to do the pomaderris crawl, passing some floriferous *P. elliptica* en route. We saw *P. andromedifolia* (small leaved form), *P. lanigera*, *P. ledifolia* and *P. andromedifolia* ssp. *confusa*. Many were past their best but the flowering was pretty good and wall-to-wall in parts. Many of the other plants we'd already seen were also there along with *Daviesia acicularis*.

## Composite Plant List for Nadgigomar Nature Reserve (East) – 25 September 2013

Acacia brownii  
Acacia gunnii  
Acacia ?obtusata  
Acacia parramattensis  
Allocasuarina diminuta  
Allocasuarina littoralis  
Aotus ericoides  
Aristida ramosa  
Astroloma humifusum  
Banksia marginata  
Banksia paludosa  
Banksia spinulosa  
Bossiaea buxifolia  
Bossiaea prostrata  
Brachyloma daphnoides  
Brachyscome spathulata  
Carex appressa  
Caustis flexuosa  
Chloanthes parviflora  
Conospermum taxifolium  
Coronidium oxylepis ssp. lanatum  
Craspedia variabilis  
Daviesia leptophylla  
Dianella revoluta  
Dillwynia sericea  
Diuris pardina  
Drosera sp.  
Epacris microphylla  
Eucalyptus ? sclerophylla  
Eucalyptus dives  
Eucalyptus macrorhyncha  
Eucalyptus mannifera  
Eucalyptus pauciflora  
Eucalyptus rubida  
Eucalyptus sieberi  
Exocarpos strictus  
Gahnia sp.  
Glossodia major  
Gompholobium minus  
Gonocarpus micranthus  
Gonocarpus tetragynus  
Goodenia hederacea  
Hakea laevipes  
Hakea sericea  
Hibbertia obtusifolia  
Hovea heterophylla  
Hydrocotyle laxiflora  
Hydrocotyle tripartita  
Isopogon prostrata?  
Kunzea parvifolia  
Leionema diosmeum  
Lepidosperma laterale  
Leptospermum juniperinum  
Leptospermum multicaule  
Leptospermum myrtifolium  
Leucopogon virgatus  
Lissanthe strigosa  
Lomandra filiformis  
Lomandra glauca  
Lomandra longifolia  
Lomandra multiflora  
Lomandra obliqua  
Lomatia ilicifolia  
Luzula densiflora  
Melichrus urceolatus  
Microlaena stipoides  
Mirbelia platylobioides  
Monotoca scoparia  
Patersonia longifolia  
Patersonia sericea  
Persoonia chamaepeuce  
Persoonia microphylla  
Persoonia mollis  
Petalochilus fuscatus  
Petrophile canescens  
Philothea salsolifolia  
Poa sp.  
Poranthera microphylla  
Pratia pedunculata  
Pteridium esculentum  
Pultenaea subspicata  
Rhytidosporum procumbens  
Rytidosperma sp.  
Rytidosperma pallidum  
Schoenus sp.  
Stylidium graminifolium  
Tetratheca bauerifolia  
Thelymitra sp.  
Viola betonicifolia  
Xanthorrhoea concava

## Plant List for Cullulla Road (including quarry) & Willow Glen Road – 25 September 2013

? indicates that those present were unsure of the plant name

### Cullulla Road

Acacia brownii  
Acacia genistifolia  
Acacia gunnii  
Acacia mearnsii  
Acacia terminalis  
Allocasuarina littoralis  
Banksia spinulosa  
Cassinia longifolia  
Chrysocephalum apiculatum  
Cryptandra amara var. amara  
Daviesia acicularis  
Daviesia leptophylla  
Dianella revoluta  
Dillwynia phyllicoides  
Dillwynia sericea  
Eucalyptus sieberi  
Gompholobium minus  
Gonocarpus tetragynus  
Goodenia hederacea  
Hardenbergia violacea  
Kennedia prostrata  
Leionema diosmeum  
Lepidosperma laterale  
Lomandra filiformis ssp. filiformis  
Lomandra obliqua  
Patersonia glabrata

Patersonia sericea  
Persoonia mollis  
Philothea salsolifolia  
Pomaderris andromedifolia  
Pomaderris delicata  
Pomaderris elliptica  
Pomaderris ferruginea  
Pomax umbellata  
Pultenaea microphylla  
Rhytidosporum procumbens  
Styandra glauca  
Tetratheca sp.  
Xanthorrhoea concava

### Willow Glen Road

Acacia brownii  
Daviesia acicularis  
Dillwynia acicularis  
Hibbertia sp.  
Leionema diosmeum  
Patersonia glabrata  
Philothea salsolifolia  
Pomaderris andromedifolia (small leaf form)  
Pomaderris andromedifolia ssp. confusa  
Pomaderris elliptica  
Pomaderris lanigera  
Pomaderris ledifolia

## Plant List for Claypit Road – 25 September 2013

? indicates that those present were unsure of the plant name

Pultenaea microphylla  
Grevillea juniperina  
Bossiaea oligosperma  
Melaleuca parvistaminea  
Acacia brownii  
Leucopogon virgatus  
Brachyscome spathulata  
Coronidium scorpioides  
Leionema diosmeum  
Dillwynia glaucula

### Vertebrate List

**Birds** (Nadgigomar only)

Striated pardalote

Striated thornbill  
Yellow-faced honeyeater  
Brown-headed Honeyeater  
Grey Shrike-thrush  
Rufous Whistler (display)  
Crimson Rosella  
Scarlet Robin (pair)

**Other vertebrates**

Eastern Blue-tongued Lizard (Mogo Rd)  
Jacky Lizard (Mogo Rd)  
Pobblebonk (pond just inside gate to Nadgigomar)  
Red-bellied Black snake (about 1.5m, basking on Willow Glen Rd)
