

Of Coal Strike in 1911... Likelihood of Interrupted Service Here—Goat Family Defended—Proposed Economy.

The Herald has received a communication from the Chicago, St. Paul, Minneapolis and Omaha railway headquarters explaining passenger train reductions due to the coal strike...

AS to the local situation, the fact that the Wayne power plant uses oil removes danger of interrupted or curtailed electrical service here.

The condition in Wayne now is quite different from what it was during a former major coal strike which started in November, 1919, and ran into December of that year.

John L. Lewis' present coal strike is more damaging than the one that gripped the country twenty-seven years ago.

The plane in which he was flying took off from the USS Langley in a group of aircraft whose mission was a fighter sweep against southern Kyushu, Japan.

In view of the probability that your son lost his life when he bailed out of the plane in which he was flying, or while he was in the hands of the enemy, because no official or unconfirmed reports have been received that he survived, because his name has not appeared on any lists of reports of prisoners liberated from Japanese prisoner of war camps, and in view of the length of time that has elapsed since the date of his disappearance...

World's Destiny Lies With Youth

Rev. Oliver B. Proett Gives Baccalaureate Sermon For Class Sunday.

The destiny of the world lies with the power of young folks of today. They will determine whether good or evil shall predominate, stated Rev. Oliver B. Proett in speaking to Wayne high school graduates at baccalaureate services Sunday evening in the auditorium.

Rev. Proett began by stating that this is the first class to be graduated in the atomic age. Students have the choice of making this new power work for or against mankind. The destructiveness of the power was proved. Arthur Compton is one of those who believe that the force can be used to heat homes, run cars, supply energy for manufacturing and perhaps provide medicinal help.

Educated young folks are interested in lending their ability and influence to make the world one of life and good rather than one of death and evil. "We have to approach the matter through faith, and faith is the cure for fear."

Faith in self, in others and in humanity is the first requirement, Rev. Proett asserted. Faith is evidenced in all lines of business and social relationships. Lack of faith brought a tremendous breakdown (Continued on Page Two)

LATE FROST HURTS FRAIL VEGETATION AND SPREADS LOSS

FROST descended Friday night to the overthrow of much tender vegetation and the disappointment of many ambitious gardeners. Exposed beans, tomato and strawberry plants were nipped. Potatoes suffered. Fruit blossoms were thinned out more than an expert orchardist would advise. Numerous gardens were covered and saved. Some replanting will be done in the reasonable assurance that no more killing frozes will happen this year. Main crops—cattle, hogs and chickens—are still intact. Other chief crops—corn, small grain and hay—are made extra promising by recent rains.

While we deplore the necessity of strengthening valuable gardens to an unseasonable frost, we still have much to look forward to, much to be thankful for.

Freeze Damages Crops Over Area

Crops and Gardens Suffer From Low Temperatures Last of Week.

Slight damage was done to most crops that were up and heavy damage to early gardens in this area as a result of low temperatures which hit this territory Friday evening, according to reports received by County Agent W. R. Harder. Precipitation Thursday and Friday totaled 1.09 inches, with 14 falling Thursday and .95, Friday. Temperature dropped to about 23, one of the lowest on record for May.

Type of most sweetclover plants were slightly damaged. Some of the oats was frozen but there is a difference of opinion as to whether it is much damaged. Some feel that the cold will merely retard the growth rather than kill it.

As no corn was up, no loss was noted. Several reports have come in that new stands of alfalfa were damaged, depending upon how severely plants were frozen.

Most potatoes were frozen, but according to state reports, they will come up again and yield a crop, the size depending upon how badly the frost affected them.

Most of the plum, apple, peach, pear and cherry trees were frozen. Orchards and vineyards in the southern part of Nebraska were damaged quite badly. Sugar beets in the western part of the state had to be replanted.

B. Hall reports that considerable damage was done to the first crop of strawberries, but, since many are everbearing, he thought they would come out later.

Many flowers were severely damaged or completely frozen.

WORLD'S DESTINY—

(Continued from Page One)

in political relationships in recent years. "Discovery of atomic power forces us to trust one another in more friendly relationships than before." The American-Canadian boundary, which is unprotected, is more safe than though it were guarded with guns because it emphasizes faith in others.

Faith in the future is another necessity. For young folks, faith in the future is essential to growth. They must believe that big things are yet to be done. Rev. Proett told of a Washington, D. C. statue of a girl reading a book that is nearly finished and the inscription is, "All that is past is prologue." No man can predict the marvelous things ahead for those who apply themselves in a constructive way. The minister quoted the poem, "The Look Ahead," which Markham wrote after he was 80. The poet still had faith in the future.

A need of faith in God to build a better world is also imperative. Rev. Proett described a statue at Ponca City, Okla., where a mother holds a son by one hand and carries a Bible in the other. The boy signifies the beginning of life and the Bible represents the key to faith in God. "If we will have 'one world,' the only way to begin is by recognition of our dependence upon 'one God.'" It is impossible to believe that God would make a world that would come to a bad end. It is meant that the world shall be good and that it shall grow. People who look to better things look to God for strength and power. When much doubt was expressed about democracy in the early days of this country, Benjamin Franklin said, "I have lived a long time and the longer I live the more convincing proof I see of this truth: God governs in the affairs of men. And if a sparrow cannot fall to the ground without His notice, it is impossible that an empire can rise without His aid."

Rev. Proett concluded by again reminding young folks that they hold the key to a golden age if they will but turn their ability and influence in the right direction. He illustrated by telling of a professor questioning students who held a bird in their hands. When

Myra Anderson, accompanied by Miss Ellen Soderberg, sang "The Moon Behind the Cottonwood" by Cadman. Joel Gillespie, accompanied by Prof. Anderson, sang "Give a Man a Horse He Can Ride" by O'Hara. Prof. Anderson presented the vocalists.

Poppies to Bloom Coast to Coast

Every year in May the American Legion and American Legion Auxiliary poppies bloom on the streets in towns and cities from coast to coast.

What are these poppies? No! They are reminders of big things. These poppies are a symbol of sacrifice and must remind all of an obligation. They are the American Legion and American Legion Auxiliary memorial flower to be worn as a memorial emblem in tribute to those who have sacrificed their lives.

It is an emblem of service to the men and women of World War I and II who are disabled and in hospitals and who will continue to fight a losing battle.

Members of Wayne Legion Auxiliary have set a goal of 4,500 poppies to be sold Saturday, May 18.

Vet's Corner

Veterans see insurance minded. Direct payments by mail on premiums of National Service Life Insurance passed the 2,000,000 mark. The payments received for March alone were 585,000 over the number received the previous month. The total does not include premiums for men still in the service of premiums paid by deductions from benefit payments made by the veterans' administration.

An increase of \$10 in subsistence allowance to both married and single veterans studying under the GI bill and increased dependent payment totalling \$15 for one child and \$10 additional for each additional child was proposed in a bill in the house by Rep. Leonard A. Allen (D., La.).

The majority of veterans blame the veterans' administration regional office for the delay in starting their subsistence payments. The veterans' administration claims that its regional offices are understaffed and therefore unable to cope with all the difficulties of the rapidly expanded educational program.

Amateur radio stations will link veteran "hams" by air. The federal communications commission predicts that there will be more than 250,000 radio "hams" in the United States by 1951. At the start of World War II there were approximately 60,000 "hams". Many of the applicants today for use of the amateur radio bands are ex-servicemen. Veterans should be warned not to operate an amateur station without a license. The fine for operating without a license is \$10,000 or two years in prison or both.

Booklets available through inquiry at service office are: Operating a Shoe Repair Business, Operating a Service Station, Establishing and Operating a Painting and Decorating Contracting Business, Establishing and Operating a Retail Bakery, Establishing and Operating an Automobile Repair Shop, Establishing and Operating a Grocery Store.

Senate Sponsors Bill for Farmers

WASHINGTON—Senator Hugh Butler has added to his long senatorial service to Nebraska farmers by sponsoring a resolution which, if adopted, will save them millions of dollars. Butler, the state's senior senator, is author of a resolution which provides that livestock and poultry feeders may meet the government's 30-cent premium prices on grain. The government recently offered farmers a 30-cent-a-bushel bonus on both corn and wheat to obtain the grains for shipment to famine areas abroad.

Butler's resolution said "preventive action is needed to 'prevent' this government program from stampeding the millions of producers of dairy products, meat, and poultry into slaughtering their herds." The senator said the 500,000 bushels of corn to be bought by the government would be used for industrial purposes as well as relief feeding. "This action has completely tied up grain markets to the point where no one except the government can purchase any grain at all," said Senator Butler. "Yet thousands and thousands of feeders, who embarked on a feeding program in good faith to produce meat for our people and for overseas shipment, are absolutely dependent on purchased grain." A cattle feeder, the senator said, "cannot just close down operations for a month, turn the key in the lock, and plan on starting again a month or two from now."

Under the senator's resolution, any feeder or producer who pays over-feeding prices—meaning the 30-cent bonus—will be exempted from prosecution. He estimated that many Nebraska feeders thereby will be enabled to save their herds from premature slaughter.

Butler's action in sponsoring the resolution is another of his long services to farmers generally, and particularly those in Nebraska. It is in line with his efforts to adjust wheat prices at the Omaha market to meet those at Kansas City, thereby saving Nebraskans more than \$100,000, and his successful chore in getting farm machinery quotas raised for the state.

To District Meeting. Mrs. C. W. Wait, Mrs. Victor West, Mrs. Clarence Soferson, Mrs. Gertrude Hancock and Mrs. C. P. Lapham were in Radium Tuesday to attend a district Methodist meeting.

Attends Meetings. County Agent W. R. Harder was in Norfolk Wednesday attending a radio conference. He will go to Columbus May 20 to attend an agents' meeting for a demonstration of septic tank construction.

Sell Corn for Relief. The government corn purchase program for famine relief terminated Saturday night, May 11, and according to records, Dixon county producers sold approximately 80,000 bushels of corn at an average price of \$1.235 per bushel to help meet the government goal of 50 million bushels. This will be shipped directly to the famine stricken countries.

Freedom to Work
 C. I. "Neal" Haskell, farmer and stockman of the Laurel neighborhood, has been made chairman of the proposed "right-to-work" amendment campaign, sponsored by officers of the Nebraska Small Business Men's association. Mr. Haskell will see that signatures are obtained for petitions to put the amendment on the ballot next November. District vice chairman will soon be appointed by him.

This step seems to be a declaration of independence. It would appear to mean a law freeing orderly endeavor from unreasonable labor union rule. It is something union radicals have invited. The masses are driven to defend themselves against unbearable imposition.

"It is my belief, and I think most Nebraskans feel the same, that every man should have a right to work and earn a living for his family without his employer being able to fire him for joining a union and without a union being able to obtain his dismissal if he refuses to join," Mr. Haskell said, in accepting the chairmanship. "The right to work amendment will give workers this freedom if the people of Nebraska vote favorably on it next fall. Our petition is necessary to put this on the ballot," he added.

Mr. Haskell also stated that Nebraska farmers are now operating under the greatest difficulties since the war started because labor strife has held up production of much needed farm equipment. "Two of the five strikes now in progress in Omaha directly affect the farmer," he said. "The addition of the fight to work amendment to our state constitution will make it less difficult for unions and employers to get together on labor contracts in our state."

Another World War
 THE brewing of another world war is discounted by the Sioux City Journal as far outside the bounds of common sense and the instincts of self-preservation. The pessimistic reactions of Walter Lippmann who has just returned from a tour of Europe, are mentioned. The journal comments in conclusion:

"The Journal cannot and will not believe that another world war is inevitable. It has not lost all its faith in the sanity of humanity nor its confidence in human nature. It still believes any nation, even the strong world powers, would go to any length short of dishonor in making a contribution to peace and would consider a thing of that kind a cheap price to pay. Europe's views may have been superinduced by its fears, a quite understandable thing in view of what has happened in the old world."

One big boon to farm life has been electrification which started eleven years ago. Half the farms of the nation are now reported so served. Electricity for light, power and cooking takes city conveniences into rural areas and removes much of the drudgery from old-time farming. Not only work in the home but in barns and pens is wonderfully facilitated. Carrying a lantern proved a painfully imperfect source of help. Going into a coop at night to capture a chicken and instead picking up an in-

AS SEEN BY KARL STEFAN

Washington, D. C. May 9, 1946
 The fact is not generally known, but the department of state is preparing a list of commodities on which it will be proposed to still further reduce import duties. Nobody knows how and to what extent the further cut will affect our agriculture and industry. If and when the reductions will come, they will be put into force and effect by an order of the president, who has power to reduce all duties to 25 per cent of the rates fixed by congress.

At the meeting of foreign ministers now in session in Paris, tariff rates were among the first matters considered in connection with the new treaty of peace. The recommendation of the council is that all European nations shall abolish all their tariff barriers in order to obviate trade rivalry which has been a frequent source of trouble on that continent. If that shall be accomplished through

trading skunk was terribly annoying. An irritated cow kicking the lantern over involved a lot of peril. Turning a switch and lighting farm yards and buildings is a long and satisfying step in the direction of comfort and convenience.

Gen. Jacob L. Devers aroused the resentment of congress by the report that he referred to the body as a "group of cowards". The remark which the officer says was garbled, is said to have followed delayed action on the draft. It appears that an officer cannot direct contemptuous or disrespectful words at congress without the risk of being court-martialed. The remark expands to dreadful proportions when uttered by an officer, and a congressional investigation may be expected. To the rest of the public congress is not so sacred. If members escape with no more violent words from constituents than those imputed to the general, they would consider themselves extremely fortunate.

We are informed by an article in Nation's Business that beautiful springtime in Washington is largely overlooked by politicians whose minds are on the November election. They are said to be "only mildly aware of the glories of Potomac Park and Rock Creek Valley." But we think house and senate members could more certainly secure voter favor by acting on a basis of best judgment without apparently angling for election support. Think a proposition through, and then act in harmony with logical conclusions, letting voters approve or disapprove as reasoning suggests. We think that would be the way to capture the hearts and votes of the populace.

Four weeks remain of the pre-primary campaign, and candidates who have opposition, will reanimate themselves for the finals. Wayne county's major offices are conceded to first-farmers, and incumbents escape the effort and cost involved in reelection. Senator Butler is a first-termee whose right to a second term is contested, and he is one of the grass-roots candidates whose sound record is reasonably certain to capture the deserved favor of the rural population. Val Peterson, in the field for the governorship, is another candidate who has risen from the grass roots and reflects all the qualities required to make a successful state executive.

Every live community has a lot of improvements in prospect. Wayne may be listed in that group. Many new buildings and expansions await necessary materials. Memorial park just north of town will be developed into one of the most attractive recreation centers in the state as soon as voters act and essentials for the purpose become available. Building suspended by the war, is still held back by strikes and lack of production. When the green light appears, the rush for long contemplated improvements will start.

Two weeks' truce in the coal strike will be employed in the hope of ironing out differences and arranging a permanent settlement. Under pressure of the government, it may be expected more rational labor leaders will overthrow John L. Lewis' arbitrariness and permit terms acceptable to both sides. In the meantime, congress is moving in the direction of a law to deflate Lewis and outlaw all strikes that interfere with production and threaten economic paralysis.

Some one suggests that less grain be used for making liquor, leaving more to feed essential livestock and ship to the hungry abroad. It would seem easier to cut down on liquor consumption than on foods vital to life. Perhaps that idea makes too much sense to be adopted.

Contemptuous cocksureness is certain in time to draw large and painful retribution. The fellow who manifests an ugly mien when asked to sell commodities or services, is likely to meet a shocking setback when supply again equals or exceeds demand.

The weather does its worst, takes a costly toll of damage and then turns on a mild, smiling variety as though in an attempt to mollify what has happened.

at least a peculiar situation if it exists.

But tariff rates of other countries, reduced by the negotiations of our state department, have not resulted in freer trade as fully as claimed. The fixing of exchange rates has barred products from the countries in the "Sterling Bloc" and has served to restrict shipments even more than tariff duties. Such exchange practices are being urged as one of the big reasons for foreign loans of billions from our treasury. After thousands of years of experience in foreign trade no system has been devised which prevents world-wide monopolies and cartels from hogging profitable markets for their own goods. How many such cartels are in the background of present negotiations will not be discovered until long after the treaties are completed.

The UNO at its meetings in New York City is not finding the road to peace any smoother today than it was at the San Francisco conference a year ago. Then the war still was on but conflicting interests of the big nations were obvious to the program to establish permanent world peace. The outcome was the UNO which finds the same conflict of big interests in foreign trade. The oil fields of Iran, the Balkans, Spain, and Argentina still prove to be stumbling blocks as the conference endeavors to get the allied government into accord. When the peace conference gathers at Paris it will have added the contrariness which is develop-

ONLY SURVIVOR

J. H. Morrison, former college coach, told a group of church men at Norfolk recently that the middle west is the only American survivor of fundamental democracy. His travels in this country and abroad led to his conclusion. His observation tallies with that of many others. It is a disturbing report that may well inspire efforts to bring less favored areas back into the traditional American fold. Inhabitants of the two coasts have too often become indifferent, careless and narrowly selfish. They live too much for themselves and don't seem to care a peacypune about the other fellow. Money is too often their sole god and the result is sacrifice of fine qualities of soul. The exemplary character of the middle west, attested to by the observations of numerous travelers, should persuade it to use its example and influence in behalf of uniformly high standards everywhere in the United States.

ing at the meeting of foreign ministers now trying to iron out differences at Paris. Power politics supposedly was banned when victory came, but the ban is not working too successfully.

What to do about Italy and its borders and African colonies has been under consideration without definite results. Russia wants large reparations from that country over a term of years. The tentative amount is set at 300 million dollars. A new navy for Italy, with an allowance of four big battleships or cruisers and many smaller boats is regarded as a concession. And Italy is receiving 450 million dollars for food and rehabilitation this year. Peace never has been long continued in a world armament race.

Only a fair start has been made on the big program for new highways. The federal government has set up a fund of three millions of dollars to be spent in federal aid for new highways, all federal contribution to be matched by state funds. The plan will cover three years, and include secondary as well as primary highways. About 40,000 miles of interstate highways will receive the first attention, and then post-roads. During the war, new highway construction fell off to the lowest point in 30 years. But the states were unable to plan ahead until the war closed. New contracts are being awarded, but for 1946 the work will be retarded by lack of equipment. The factories are reconverted and in operation and will continue to expand for a larger output in 1947.

In January, 1945, 52,375 army trucks were built, and only 15,019 commercial vehicles were put out. This year, there is a surplus of army trucks, in addition to the several hundred thousand given away for lend-lease and rehabilitation purposes. Farm trucks are coming off the lines, but in number far too small to meet the demand. In the automotive industry the shortage of materials due to strikes and reconversion has prevented factories operating at capacity, but the output for the year may come up to the large estimates made at the beginning of the year.

"What will the harvest be?" suddenly looms up as a troublesome question as the food shortage at home adds to the difficulties of famine relief in foreign lands. Only a few weeks ago very optimistic estimates were made by the government agencies. Then the rains failed to fall over many states in the middle west, and from Texas north to the Canadian border dust storms have started. Occasional showers have occurred in many sections, but not the soaking rains required for heavy crops. In the southwest the wheat fields are threatened by drought, and unless heavy rains come soon the yields of last year may be cut by half, if not more. The middle west is the largest producer of grains, meat and dairy products. Its importance in that regard seems to be over-

TOO MUCH POWER.

The Norfolk Daily News expresses the hope that the truce in the coal strike will not slow up legislation to curb John L. Lewis, who has more power than any one person should possess. Manifestly, congress should promptly take him and others of his kind promptly in hand and remove threats to millions of helpless and unoffending citizens. Lewis has not hesitated to employ his authority boldly and defiantly, indifferent to wrecking production and causing widespread human hardship. The Wagner act, passed in 1934, encourages strikes, and it needs to be changed. The News concludes: "While one man can wield such powers over the people, this is not a government of the people, nor by the people, nor for them either. The legislative solution may be a hard one, but it is desperately needed to save the people from the effects of irresponsible power. Since this is partly the product of laws now in force, congress can at least revise these to take away the incentive to strike first and talk afterward. That duty is as plain now as it was before the calling of the truce. It is one of the most important problems before congress and there is no excuse for neglecting it."

looked at times by the big seaboard cities, whose principal food supplies come from the Mississippi valley. While the outlook is temporarily discouraging, rains may bring relief from the drought and insure that heavy production which our own country and our world so sorely needs at this time.

Every man has a RIGHT TO WORK and Earn a living for his FAMILY!

NO EMPLOYER should have the right to keep a man from working—and earning a living for his family—because he belongs to a union.

NO UNION should have the right to keep a man from working—and earning a living for his family—because he refuses to join a union.

EVERY MAN should have the right—as a free American citizen, as provided by the Constitution of the United States—to give an honest day's work for an honest day's pay. REGARDLESS OF AFFILIATION WITH UNION OR EMPLOYER. That, in a few words, states the position of the Nebraska Small Business Men's Assn. and why we urge you to sign the "right to work" petition now being circulated.

WHAT THE PETITION MEANS:

It merely provides for a vote of the people of the state on the question of a man's right to work and earn a living, regardless of union affiliation.

This petition has nothing to do with the right of labor to organize. It has nothing to do with a man's joining a union if he wants to. It has nothing to do with recognition of a union by employers. It merely provides that **NO ONE CAN BE FORCED TO JOIN A UNION AGAINST HIS WILL or be FIRED because he joins a union!**

PLEASE KEEP THIS IN MIND:

- By signing the petition you are not creating a law; you are merely giving the people of this state the right to vote next November on the "right to work" amendment to the state's constitution.
- By signing the petition you are not opposing collective bargaining or any man's right to join a union if he wants to.
- By signing the petition you are broadcasting to industry and the workers throughout the nation that Nebraska is FAIR to industry and worker alike—that every man and woman can work and do business in Nebraska completely free of domination, by either labor or employer.

THIS WILL BRING GREATER PROSPERITY — MORE INDUSTRIES AND MORE JOBS — WITH BENEFIT TO ALL NEBRASKA CITIZENS.

If you wish to circulate a petition in your community, you may obtain one by writing to State Chairman C. D. "Neal" Haskell, Laurel, Nebraska, or to the Secretary, Nebraska Small Business Men's Association, 703 Omaha National Bank Building, Omaha, Nebraska. The Nebraska Small Business Men's Association is a nonprofit organization. Its purpose is to develop conditions favorable to the business health and general prosperity of all the citizens of Nebraska, thereby creating more jobs—greater payrolls—and better living.

Emil F. Meyer. Candidate For Commissioner First District. The welfare of Wayne County is what we all desire. Vote for the candidate that in your opinion will best promote this — but be sure to vote. It is the American way.

Our dealers join us in making this frank report to THE FARMERS OF AMERICA

INTERNATIONAL Harvester is getting back into production with all possible speed. Extra shifts are being employed wherever conditions permit, to try to overcome the production losses of the recent strike. Everything is being done to get parts and machines to you.

While we and our dealers would like to tell you that this means an immediate end to the shortage of service parts and machines, it is more accurate to say that it means the beginning of the end of it. If illness or bad weather delays you seriously in the Spring, you know how much it throws you off your schedule. The strike has thrown our schedules off balance, too. There are many "chores" we must do before new machines reach you.

Material shortages. The preliminary chores of getting our plants back into shape for full production are finished. But disturbances in other industries and resulting material shortages may affect our plans. Light gauge steel sheets, brass and copper, fractional horse power motors, and many other items are all very short. The coal situation may also prove serious—we hope not.

Refilling the well. Both our dealers and our branches have run dry on parts and new machines. So the biggest chore is to get their working stocks back to normal. It will take time to fill the pipeline to dealers—just as it takes time for you to refill a well or cistern after it has run dry. Stock and display rooms of our dealers represent not one, but ten thousand reservoirs which must be refilled. The most heroic pro-

duction efforts will mean that your local dealer can expect only a small number of parts and machines at a time. Since we must play fair with all our customers, there will be a sprinkle of parts and machines all over the country—not a downpour in any one section.

You will be glad to know that all repair parts production schedules are far beyond normal.

No hoarding. You may be sure that every machine will be shipped to dealers as soon as completed. We do not and will not hold machines off the market.

At the start of the strike we had on hand at all our factories and branches just 837 tractors of all kinds—less than two days' production—and 405 of these were not completed. Many of those on hand had one or more important parts missing—principally radiator cores. Most of the rest represented the normal daily "float" between the end of the assembly line and the shipping platform. Naturally no tractors were made during the strike.

What dealers may have for you. We can report to you that our current production on TRACTORS is good and we are shipping at a normal rate. Even so, there will not be enough to go around. The situation on FLOWS

and DISK HARROWS is reasonably good. On COMBINES, MOWERS, HAYRAKES, ONE-MAN HAY BALERS, CORN PICKERS and many other items, our schedules have been seriously disrupted. We must in fairness say that many of our customers are likely to be disappointed on delivery of these machines. On MILKING MACHINES, STATIONARY ENGINES, and some other small units we are hopeful of making practically normal delivery.

We know you will understand the reasons why your dealer cannot fill your orders overnight. He would like to give you the kind of delivery on machines you would like to get, but his situation is a difficult one and not of his own making. He is doing the best he can.

No cutting corners on quality. There is one thing you can be absolutely certain about: We will NOT cut corners on quality in order to increase production in this emergency. For years we have said: "QUALITY IS THE FOUNDATION OF OUR BUSINESS." Today we say it—and mean it—as much as ever. We know you need new machines—and need them badly. But we believe it will pay you to wait just a little while longer if you cannot get all you want immediately. By waiting you can be sure your new equipment will have the quality so rightly associated with INTERNATIONAL HARVESTER for so many years.

Drive Progresses For Cancer Fund

In the Wayne county cancer drive, \$160 has been pledged, \$130 of which has been received. Mrs. F. S. Morgan is county chairman. Wayne city should contribute \$250. The American Cancer society represents the highest in medical and lay leadership in the field of cancer. It has organization and a "know how" to cope with the problem. It was not until 1945 that any substantial sum was raised for a nation-wide attack on the problem of cancer. A total of \$4,000,000 was contributed in 1945 and for the first time a large sum was appropriated for research.

The National Research Council of America, foremost scientific organization which advised the government on its wartime research, was retained by the society to recommend to the organization a similar but peacetime attack on cancer. This program is now under way.

One corner of the room was candy land and was decorated with large lollipops and stick candy. In another corner were pictures of the three bears and the big bad wolf. Walt Disney characters, the dwarfs, Donald Duck and others, were in one corner. Little Boy Blue and other nursery rhymes were pictured in the other corner. Soft lights were used, and lawn chairs and porch swings were brought in from the home. Don Oliver's orchestra from Sioux City, furnished music. SIXTY-FOURTH YEAR

Lady Proves Age
Is State of Mind

Magician Fails to Bring Lost Rabbits Back After They Disappear.

Age, says Mrs. Lillian H. Gist, 91, of Tampa, Fla., is a state of mind. Mrs. Gist can prove it. She's going to fly to commencement exercises at the school from which she was graduated 71 years ago. She was graduated from Illinois Female Seminary at Jacksonville, Ill., at the age of 20. She is the mother of 11 children. She received her master's degree at 81 and her doctor's degree at 82.

An unidentified woman shopper at Lansing, Mich., followed a line of people right through the front door of a tavern. "My gosh," she gasped as she reached the counter. "I thought it was for nylons." She was standing in a beer line, the result of rationing imposed by dealers.

Mike and Ike, white rabbits, have disappeared and reappeared many times at the will of Magician Edward F. Turner, Atlanta, Ga. Mr. Turner had them in a carrying case which he placed on the outside walk while he bought a newspaper. When he turned around, the rabbits were gone. Neither he nor the city detectives have been able to make them materialize.

G. C. Hardman, newly-elected judge of the local corporate court, was hurrying to the city hall to be sworn in and drove through a stop sign. As Judge, his first case was a solo affair. He pleaded guilty to running through the stop sign and paid himself a fine.

Mrs. Fern Gonzales, 25, came out with only minor injuries after an automobile in which she was riding was struck by a train and 20 railroad cars passed over her. After Mrs. Gonzales was helped to her feet by trainmen she remarked: "Please call my family in Ontario and tell them I left the gas stove burning."

Thomas R. Donovan of Buffalo, N. Y., who came home from the army last Christmas to a supply of 15 pre-war shirts, had to borrow one recently. The laundry lost six a fortnight ago. A thief jumped open his auto and swiped the rest which he had just received from another laundry.

For information on where to go and what to see, use the books and pamphlets at your public library. You can't travel? Why not see far away lands with your mind's eye through the many books on travel and adventure at your public library.

One of the new books which will take you on one of these arm-chair expeditions is Man-Eaters of Kumaon by Jim Corbett. This is his own story of his experiences with the man-eating tigers of Kumaon. In the Kumaon hills, which lie in the Himalayas in the far northern United Provinces of India, man-eating tigers have long been the scourge and terror of the tiny villages and jungles. In desperation District Officers, and later the villagers themselves, turned to Jim Corbett, noted hunter and sportsman. He responded to their appeals, and today his name is a household word in many a village whose inhabitants he has delivered from the paralyzing fear of the man-eaters. Here are stories worthy to stand beside Kipling's Jungle Books. For every reader, young or old, who quickens to tales of courage and daring, Man-Eaters of Kumaon will become an adventure.

We also have four new mystery novels by Kaufman, Dig A Hole Grave by Don Cameron, The Little Man Who Wasn't There by Gordon and The Corpse on the Hearth by Lang.

Rev. Mrs. C. T. Dillon Gives Baccalaureate Sermon at Services Sunday.

Baccalaureate services were held Sunday evening at the Methodist church in Winside for 12 Winside high school seniors. Rev. Mrs. C. T. Dillon delivered the address entitled, "This Is the Victory That Overcometh the World, Even Our Faith."

In her sermon, Rev. Dillon stated that unto each one has been given the priceless gift, life. It is up to each one to choose what he will do with this gift. Life stretches out before us like a vast sea. The world lies before us like a mighty ocean. What the world will do to each one in this life depends upon what the individual will do with the world.

Rev. Mrs. Dillon went on to say that there are three ways to handle the world. "We may love it like the Greek, shun it like the monk, or conquer it like St. John." She further stated that "we cannot conquer this world unless we live in two worlds. Faith goes out and discovers the world back of this world, which is God or Christ, gets a vision and returns to conquer."

Ruth Spengler, Leonard Janke, Helen Wylie and Dale Behmer of the junior class served as ushers. Juniors, with Miss Gladys Mettlen as sponsor, placed flowers at the altar for services.
