About the Marine Sanctuaries Conservation Series

The Office of National Marine Sanctuaries, part of the National Oceanic and Atmospheric Administration, serves as the trustee for a system of underwater parks encompassing more than 620,000 square miles of ocean and Great Lakes waters. The 13 national marine sanctuaries and two marine national monuments within the National Marine Sanctuary System represent areas of America's ocean and Great Lakes environment that are of special national significance. Within their waters, giant humpback whales breed and calve their young, coral colonies flourish, and shipwrecks tell stories of our maritime history. Habitats include beautiful coral reefs, lush kelp forests, whale migration corridors, spectacular deep-sea canyons, and underwater archaeological sites. These special places also provide homes to thousands of unique or endangered species and are important to America's cultural heritage. Sites range in size from less than one square mile to more than 582,000 square miles and serve as natural classrooms, cherished recreational spots, and are home to valuable commercial industries.

Because of considerable differences in settings, resources, and threats, each marine sanctuary has a tailored management plan. Conservation, education, research, monitoring and enforcement programs vary accordingly. The integration of these programs is fundamental to marine protected area management. The Marine Sanctuaries Conservation Series reflects and supports this integration by providing a forum for publication and discussion of the complex issues currently facing the sanctuary system. Topics of published reports vary substantially and may include descriptions of educational programs, discussions on resource management issues, and results of scientific research and monitoring projects. The series facilitates integration of natural sciences, socioeconomic and cultural sciences, education, and policy development to accomplish the diverse needs of NOAA's resource protection mandate. All publications are available on the Office of National Marine Sanctuaries website (<http://www.sanctuaries.noaa.gov>).

Abstract

Sur Ridge is a large rocky feature located approximately 28 miles west of Point Sur, central California within Monterey Bay National Marine Sanctuary. Sur Ridge serves as a focal area for facilitating research to better understand natural and human-caused ecosystem variation. Recently, Sur Ridge has been surveyed using a remotely operated vehicle (ROV; midwater and seafloor), and with a midwater trawl. At least 261 taxa were observed and are presented in this guide. The purpose of this field guide is to create an inventory of benthic and midwater organisms, and associated imagery, observed at Sur Ridge to provide a baseline taxonomic characterization. It may also be useful for other deep-sea studies off California.

Key Words

Monterey Bay National Marine Sanctuary (MBNMS), Monterey Bay Aquarium Research Institute (MBARI), Sur Ridge, field guide, deep sea, taxonomy, corals, sponges, invertebrates, fishes, marine protected area, images, ROV, sanctuary ecologically significant area.

Introduction

Sur Ridge is a large rocky feature located approximately 28 miles west of Point Sur, central California within Monterey Bay National Marine Sanctuary (MBNMS; Fig. 1). As part of an ecosystem based management approach, MBNMS staff identified Sur Ridge as a Sanctuary Ecologically Significant Area (SESA; MBNMS 2016). Sur Ridge serves as a focal area for facilitating research to better understand natural and human-caused ecosystem variation.

Recently, Sur Ridge has been surveyed using a remotely operated vehicle (ROV; midwater and seafloor), and with a midwater trawl. Scientists from the Monterey Bay Aquarium Research Institute (MBARI) and MBNMS conducted ROV surveys at the Sur Ridge seafloor (29 dives; 2013-2017; Fig. 1) with several goals: 1) to explore and characterize Sur Ridge; 2) to conduct sea star feeding experiments; and 3) to develop methods to transplant deep-sea corals. ROV surveys were conducted from 0-1572 meters, with a focus on the seafloor from 785-1572 meters. Additional midwater animals included were incidental observations from ROV ascents and descents, and a few exploratory ROV missions in the water column over Sur Ridge.

During an MBNMS-led survey, scientists conducted one midwater trawl above Sur Ridge on 9 May 2015, before twilight (1920-2024 PDT; Fig. 1). The midwater Tucker trawl (2-meter wide, non-closing, single net, 500-micron mesh) was used to collect mesopelagic fishes from 0-435 meters (oblique tow).

These research cruises have contributed to the biological characterization of Sur Ridge. At least 261 taxa were observed and are presented in this guide. The purpose of this field guide is to create an inventory of benthic and midwater organisms, and associated imagery, observed at Sur Ridge to provide a baseline taxonomic characterization.

How to Use This Guide

Format

Organisms in this guide are presented in taxonomic order, starting with Phylum Porifera (sponges) and ending with Subphylum Vertebrata (fishes). Organisms are identified to the lowest possible taxon. A full taxonomic checklist is located at end of document.

Classification

Classification follows the World Register of Marine Species (WoRMS Editorial Board 2017); a comprehensive dynamic list of names of marine organisms that is curated by taxonomic experts. Classification schemes for specific groups are under revision. For example, sponges, corals, and sea stars are undergoing, or in need of, revision by the larger research community; and new species are currently awaiting description (Hourigan et al. 2007, Lee et al. 2007, Mah and Blake 2012, Blake and Mah 2014).

Information for each observed taxa is provided, including scientific name (or lowest possible taxonomic identification), common name, identification confidence, and any applicable comments. If an organism could not be identified to at least the genus level, the lowest possible taxonomic name was assigned (shown in capital letters); and numbered if it could be further differentiated (e.g., ACANTHASCINAE sp. 1). A representative image was used, when available.

Common Name

Some common names are well established, and are used where available. Often common names are not available (e.g., unidentified organisms, no accepted common name), so descriptive common names are assigned until further identification is possible.

Confidence (Identification)

Confidence levels of organism identification from video or midwater trawl are as follows:

Confirmed: This organism has been collected and/or has been definitively identified by a taxonomic expert.

Provisional: This organism is very likely to be this taxon based on an investigation by MBARI or MBNMS staff (literature search, consultation with outside taxonomic experts, etc.).

Unconfirmed: The status of this organism is pending field collection and further taxonomic investigation.

Comments

Comments are included when additional information is available to help with identification. Benthic organisms are distinguished from those found primarily in the water column.

Images

Image credits are indicated on the image and include the following sources: MBARI (including Jacobsen Stout et al. 2017); NOAA/MBARI; Chad King/MBNMS; and Kim Reisenbichler/MBARI. Occasionally two horizontal red lasers are visible in images; and are positioned 29 cm apart. Organisms that could not be differentiated, due to distance from the camera or for those that are too small to see identifying characteristics (e.g., otherwise unidentified PORIFERA), are not included in the image portion of the guide. Images of midwater trawl-caught fishes may include a centimeter ruler. Some representative images may not have been taken at Sur Ridge.

Taxonomic Checklist

A full checklist of organisms observed at Sur Ridge is located at end of document. Provisional identifications are marked with an asterisk (*). Unconfirmed identifications are marked with a dagger (†).

Hymenaster sp.
sea star

Confidence: Confirmed

Comments:

- ROV
- Benthic

BRITTLE STARS

OPHIUROIDEA
brittle star

Confidence: Confirmed

Comments:

- ROV
- Benthic
- Multiple species

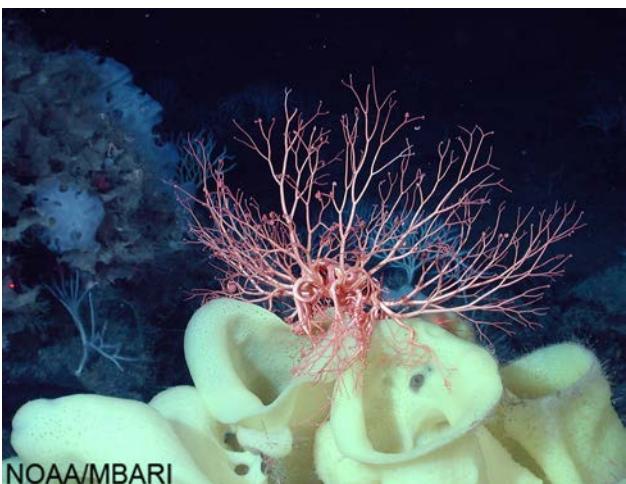

Asteronyx sp.
brittle star

Confidence: Confirmed

Comments:

- ROV
- Benthic

Gorgonocephalus sp.
basket star

Confidence: Confirmed

Comments:

- ROV
- Benthic

BRITTLE STARS

OPHIACANTHIDAE
brittle star

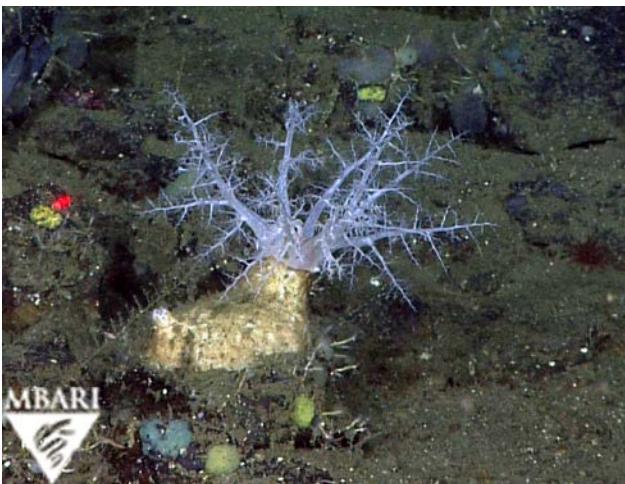

Confidence: Provisional

Comments:

- ROV
- Benthic

SEA CUCUMBERS

Psolus squamatus
sea cucumber

Confidence: Confirmed

Comments:

- ROV
- Benthic

Pseudostichopus mollis
sea cucumber

Confidence: Confirmed

Comments:

- ROV
- Benthic

SYNALLACTIDAE
sea cucumber

Confidence: Confirmed

Comments:

- ROV
- Benthic

SEA CUCUMBERS

Scotoplanes sp. A
sea cucumber (aka sea pig)

Confidence: Confirmed

Comments:

- ROV
- Benthic

Laetmogone sp.
sea cucumber

Confidence: Confirmed

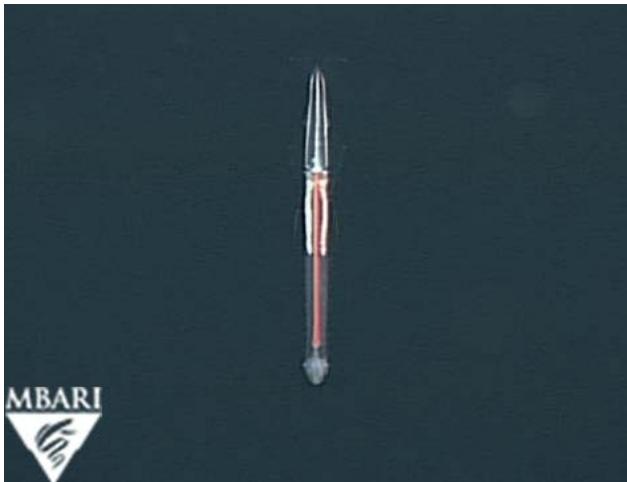

Comments:

- ROV
- Benthic

CHAETOGNATHS

CHAETOGNATHS

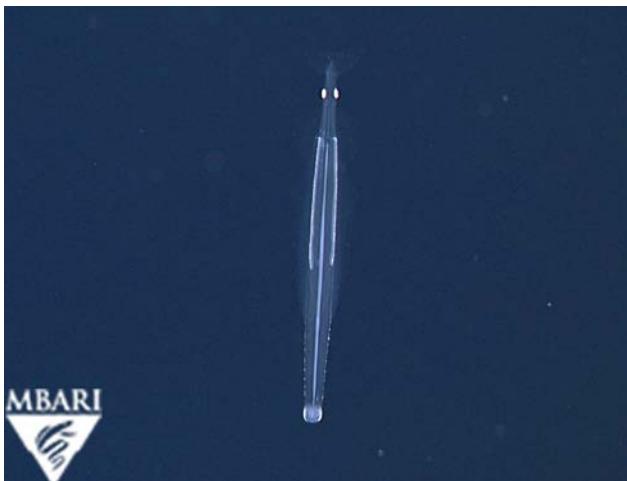

Caecosagitta macrocephala
orange gut chaetognath

Confidence: Confirmed

Comments:

- ROV
- Pelagic

Pseudosagitta maxima
chaetognath

Confidence: Confirmed

Comments:

- ROV
- Pelagic

HEMICORDATES

ACORN WORMS

Saxipendium implicatum
acorn worm

Confidence: Confirmed

Comments:

- ROV
- Benthic

Allapasus sp. 3
acorn worm

Confidence: Provisional

Comments:

- ROV
- Benthic

CHORDATES

TUNICATES

Megalodicopia hians
predatory tunicate

Confidence: Confirmed

Comments:

- ROV
- Benthic

Culeolus sp. A
stalked tunicate

Confidence: Confirmed

Comments:

- ROV
- Benthic

Cnemidocarpa sp.
tunicate

Confidence: Unconfirmed

Comments:

- ROV
- Benthic

Pyrosoma sp.
pyrosome

Confidence: Confirmed

Comments:

- ROV
- Pelagic

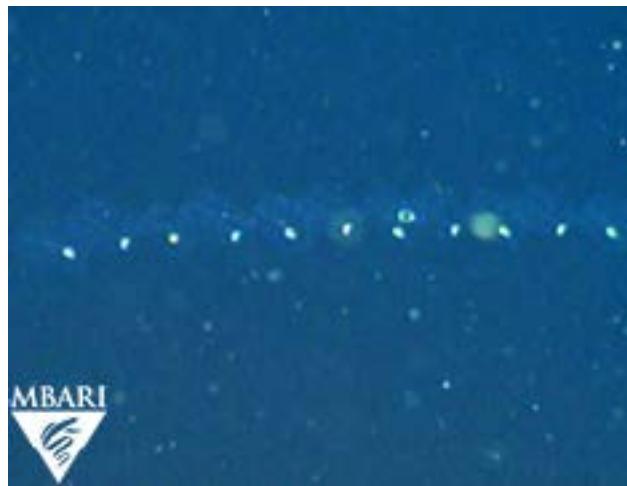

SALPIDA
salp

Confidence: Confirmed

Comments:

- ROV
- Pelagic

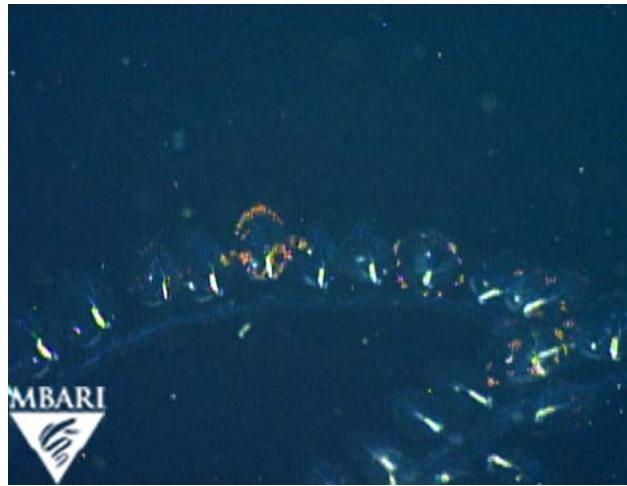

DOLIOLIDA
salp

Confidence: Confirmed

Comments:

- ROV
- Pelagic

LARVACEANS

Bathochordaeus stygius
giant larvacean

Confidence: Confirmed

Comments:

- ROV
- Pelagic

HAGFISHES

Eptatretus sp.
hagfish

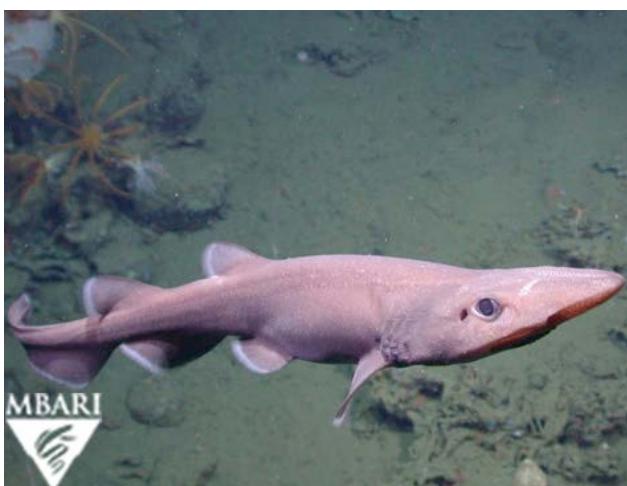

Confidence: Confirmed

Comments:

- ROV
- Benthic
- Likely *E. stoutii* (Pacific Hagfish)

SHARKS and SKATES

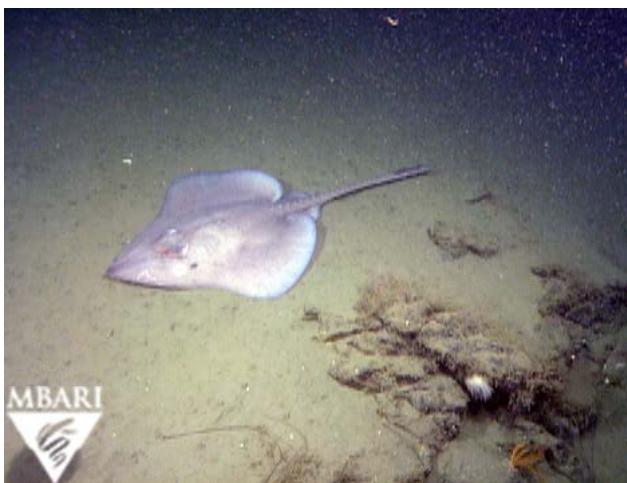

Apristurus kampae
Longnose Cat Shark

Confidence: Confirmed

Comments:

- ROV
- Bathydemersal

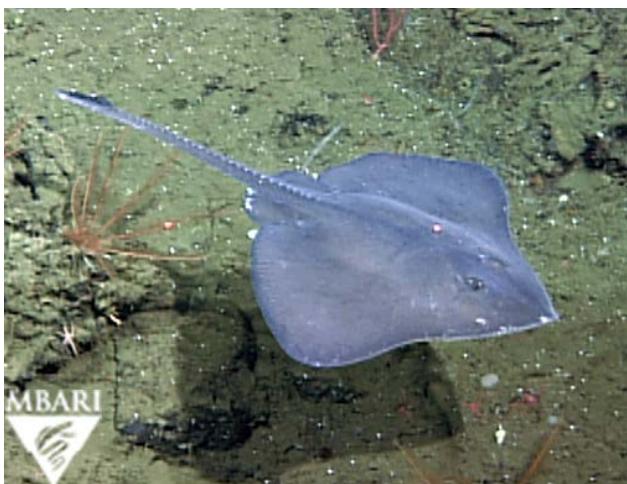

Bathyraja abyssicola
Deepsea Skate

Confidence: Confirmed

Comments:

- ROV
- Benthic

Bathyraja trachura
Roughtail Skate

Confidence: Confirmed

Comments:

BRISTLEMOUTHS

Cyclothona pseudopallida
Phantom Bristlemouth

Confidence: Confirmed

Comments:

- Midwater trawl
- Pelagic
- Larvae

Chad King/MBNMS

Cyclothona signata
Showy Bristlemouth

Confidence: Confirmed

Comments:

- Midwater trawl
- Pelagic

Chad King/MBNMS

Cyclothona sp.
bristlemouth

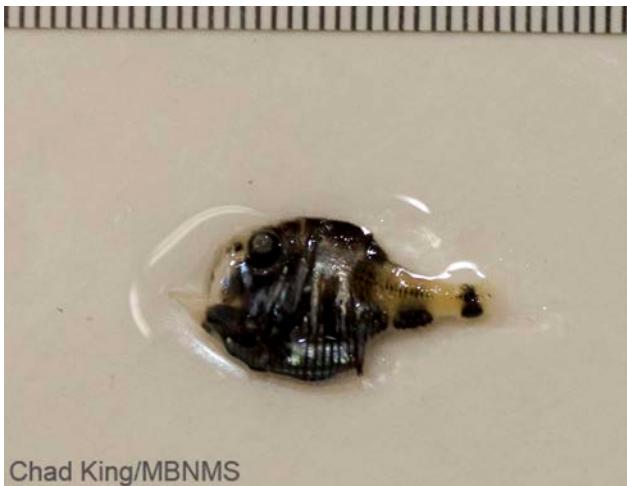

Confidence: Confirmed

Comments:

- Midwater trawl
- Pelagic

MARINE HATCHETFISHES

Chad King/MBNMS

Argyropelecus sladeni
Lowcrest Hatchetfish

Confidence: Confirmed

Comments:

- Midwater trawl
- Pelagic
- Larvae (not pictured here)

DRAGONFISHES

Aristostomias scintillans
Shining Loosejaw

Confidence: Confirmed

Comments:

- Midwater trawl
- Pelagic

Chauliodus macouni
Pacific Viperfish

Confidence: Confirmed

Comments:

- Midwater trawl
- ROV
- Pelagic

Idiacanthus antrostomus
Pacific Blackdragon

Confidence: Confirmed

Comments:

- Midwater trawl

PEARLEYES

Benthalbella dentata
Northern Pearleye

Confidence: Confirmed

Comments:

- Midwater trawl
- Pelagic
- Larvae

BARRACUDINAS

Magnisudis atlantica
Duckbill Barracudina

Confidence: Confirmed

Comments:

- ROV bycatch
- Pelagic

LANTERNFISHES

Chad King/MBNMS

Diaphus theta
California Headlightfish

Confidence: Confirmed

Comments:

- Midwater trawl
- Pelagic

Chad King/MBNMS

Nannobrachium ritteri
Broadfin Lampfish

Confidence: Confirmed

Comments:

- Midwater trawl
- Pelagic

Chad King/MBNMS

Protomyctophum crockeri
California Flashlightfish

Confidence: Confirmed

Comments:

- Midwater trawl
- Pelagic
- Larvae (not pictured here)

LANTERNFISHES

Stenobrachius leucopsarus
Northern Lampfish

Confidence: Confirmed

Comments:

- Midwater trawl
- Pelagic

Triphoturus mexicanus
Mexican Lampfish

Confidence: Confirmed

Comments:

- Midwater trawl
- Pelagic
- Larvae (not pictured here)

GRENADIERS

Coryphaenoides acrolepis
Pacific Grenadier

Confidence: Confirmed

Comments:

- ROV
- Benthopelagic

Coryphaenoides acrolepis-filifer
complex
Pacific/Threadfin Grenadier

Confidence: Provisional

Comments:

- ROV
- Benthopelagic
- *C. acrolepis* and *C. filifer* are sometimes difficult to distinguish on imagery

Coryphaenoides pectoralis
Giant Grenadier

Confidence: Confirmed

Comments:

- ROV
- Benthopelagic

CODLINGS and MERLUCCIID HAKES

Antimora microlepis
Pacific Flatnose

Confidence: Confirmed

Comments:

- ROV
- Benthopelagic

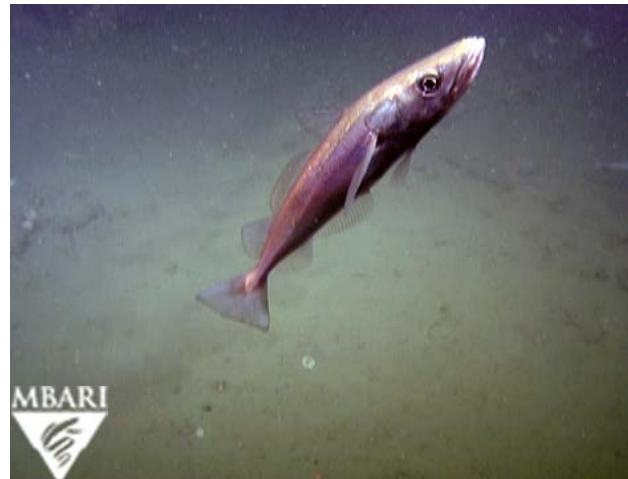

Merluccius productus
Pacific Hake

Confidence: Confirmed

Comments:

- ROV
- Pelagic/Benthopelagic

CUSK-EELS

Luciobrotula sp. A
no common name

Confidence: Provisional

Comments:

- ROV
- Benthic

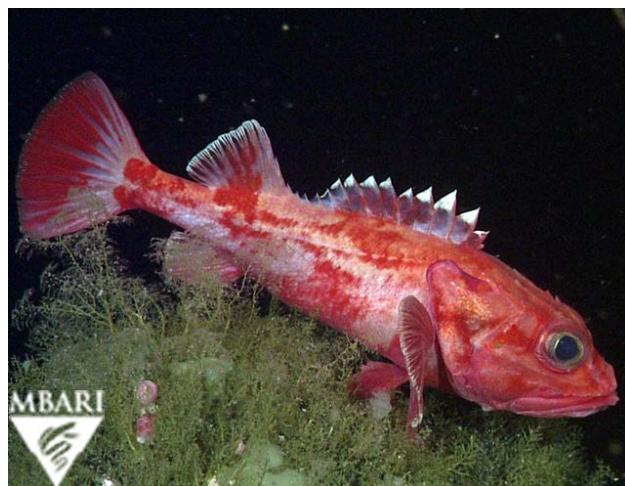

SCORPIONFISHES

Sebastolobus alascanus
Shortspine Thornyhead

Confidence: Confirmed

Comments:

- ROV
- Benthic

Sebastolobus altivelis
Longspine Thornyhead

Confidence: Confirmed

Comments:

- ROV
- Benthic

SABLEFISHES and FATHEAD SCULPINS

Anoplopoma fimbria
Sablefish

Confidence: Confirmed

Comments:

- ROV
- Benthopelagic

Psychrolutes phrictus
Blob Sculpin

Confidence: Confirmed

Comments:

- ROV

SNAILFISHES

Careproctus filamentosus
snailfish

Confidence: Provisional

Comments:

- ROV
- Benthopelagic

Careproctus kamikawai
Arbiter Snailfish

Confidence: Confirmed

Comments:

- ROV
- Benthopelagic

Careproctus melanurus
Blacktail Snailfish

Confidence: Confirmed

Comments:

- ROV
- Benthopelagic

SNAILFISHES

LIPARIDAE sp. 1
snailfish

Confidence: Unconfirmed

Comments:

- ROV
- Benthopelagic

LIPARIDAE sp. 3
snailfish

Confidence: Provisional

Comments:

- ROV
- Benthopelagic

Nectoliparis pelagicus
Tadpole Snailfish

Confidence: Confirmed

Comments:

- Midwater trawl
- Pelagic

Nectoliparis pelagicus

Chad King/MBNMS

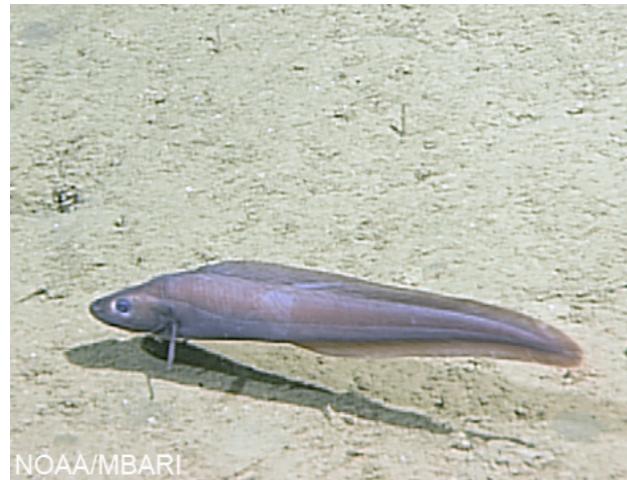

EELPOUTS

Bothrocara brunneum
Twoline Eelpout

Confidence: Confirmed

SCIENTIFIC NAME	COMMON NAME
PHYLUM BACTERIA	
BACTERIA	bacterial mat
PHYLUM OCHROPHYTA – BROWN ALGAE (drift)	
Class Phaeophyceae	
ORDER LAMINARIALES	
LAMINARIALES	kelp (drift)
PHYLUM TRACHEOPHYTA – VASCULAR PLANTS (drift)	
Class Monocots	
ORDER ALISMATALES	
Family Cymodoceaceae	
<i>Phyllospadix</i> sp.	surfgrass (drift)
PHYLUM PORIFERA – SPONGES	
*PORIFERA sp. 3.....	sponge
*PORIFERA sp. 5.....	sponge
PORIFERA.....	sponge (otherwise unidentified)
Class Demospongiae – horny sponges	
SUBCLASS HETEROSCLEROMORPHA	
ORDER TETRACTINELLIDA	
SUBORDER ASTROPHORINA	
Family Theneidae	
<i>Thenea muricata</i>	sponge
Family Cladorhizidae	
<i>Asbestopluma monticola</i>	branched predatory sponge (white)
<i>Asbestopluma</i> sp. A	palm frond sponge
*CLADORHIZIDAE sp. A	unbranched predatory sponge (white)
Family Mycalidae	
* <i>Mycale</i> sp. 2.....	sponge
Class Hexactinellida – glass sponges	
†HEXACTINELLIDA sp. 4	glass sponge
*HEXACTINELLIDA sp. 6	glass sponge
HEXACTINELLIDA.....	glass sponge (otherwise unidentified)
SUBCLASS HEXASTEROPHORA	
ORDER HEXACTINOSIDA	
SUBORDER SCEPTRULOPHORA	
Family Aphrocallistidae	
<i>Heterochone calyx</i>	fingered goblet vase sponge

SCIENTIFIC NAME	COMMON NAME
	Family Euretidae
* <i>Chonelasma</i> sp. trumpet sponge (white)
	Family Ferreidae
* <i>Farrea</i> sp. white cloud sponge
* <i>Farrea truncata</i> complex stalked ruffled sponge (white)
	Family Tretodictyidae
<i>Sclerothamnopsis compressa</i> sponge
	ORDER LYSSACINOSIDA
	Family Rossellidae
	Subfamily Acanthascinae
* <i>ACANTHASCINAЕ</i> sp. 1 sponge
* <i>ACANTHASCINAЕ</i> sp. 2 sponge
† <i>ACANTHASCINAЕ</i> sp. 3 sponge
* <i>Staurocalyptus</i> sp. 1 Picasso sponge (yellow)
* <i>Staurocalyptus</i> sp. 2 sponge
	PHYLUM CNIDARIA
	Class Scyphozoa – jellyfish
	SUBCLASS CORONAMEDUSAE
	ORDER CORONATAE
	Family Atollidae
<i>Atolla</i> sp. crown jelly
	Family Periphyllidae
<i>Periphylla periphylla</i> crown jelly
	SUBCLASS DISCOMEDUSAE
	ORDER SEMAEOSTOMEAE
	Family Ulmaridae
	Subfamily Poraliinae
<i>Poralia rufescens</i> jelly
	Class Hydrozoa – hydrozoans
	SUBCLASS HYDROIDOLINA
HYDROIDOLINA hydroid (otherwise unidentified)
	ORDER LEPTOTHECATA
	Family Mitrocomidae
<i>Mitrocoma cellularia</i> cross jellyfish

SCIENTIFIC NAME	COMMON NAME
ORDER SIPHONOPHORAE - SIPHONOPHORES SUBORDER PHYSONECTAE	
Family Agalmatidae	
<i>Frillagalma vityazi</i>	siphonophore
<i>Nanomia bijuga</i>	siphonophore
Family Apolemidae	
<i>Apolenia lanosa</i>	siphonophore
Family Erennidae	
<i>Erenna</i> sp.	siphonophore
Family Pyrostephidae	
<i>Bargmannia elongata</i>	siphonophore
Family Rhodaliidae	
RHODALIIDAE	benthic siphonophore (otherwise unidentified)
Family Stephanomiidae	
<i>Stephanomia amphytridis</i>	siphonophore
SUBORDER CALYCOPHORAE	
CALYCOPHORAE	rocketship siphonophore (otherwise unidentified)
Family Clausophyidae	
<i>Chuniphyes multidentata</i>	siphonophore
<i>Kephyes ovata</i>	siphonophore
Family Hippopodiidae	
<i>Vogtia serrata</i>	siphonophore
Family Prayidae	
<i>Gymnopraia lapislazula</i>	siphonophore
Family Sphaeronectidae	
<i>Sphaeronectes</i> sp.	siphonophore
SUBCLASS TRACHYLINAE ORDER NARCOMEDUSAE	
Family Aeginidae	
<i>Aegina</i> sp.	jelly
<i>Aeginura</i> sp.	jelly
Family Cuninidae	
<i>Solmissus</i> sp.	jelly

SCIENTIFIC NAME	COMMON NAME
ORDER TRACHYMEDUSAE	
Family Halicreatidae	
<i>Halicreas minimum</i>	jelly
<i>Halitrepes</i> sp.	jelly
Family Rhopalonematidae	
<i>Colobonema sericeum</i>	silky jelly
<i>LRJ complex</i>	"litte red jelly" complex
Class Anthozoa	
ANTHOZOA	anemone (otherwise unidentified)
SUBCLASS HEXACORALLIA	
ORDER ACTINIARIA – ANEMONES	
ACTINIARIA	anemone (otherwise unidentified)
SUBORDER ENTHEMONAE	
SUPERFAMILY ACTINIOIDEA	
Family Actiniidae	
* <i>ACTINIIDAE</i> sp. 1	anemone
<i>Bolocera</i> sp.	anemone
Family Liponematidae	
<i>Liponema brevicorne</i>	pompom (aka tumbleweed) anemone
SUPERFAMILY ACTINOSTOLIDEA	
Family Actinostolidae	
ACTINOSTOLIDAE.....	anemone (otherwise unidentified)
Family Exocoelactinidae	
[†] <i>Exocoelactis</i> sp.	anemone
SUPERFAMILY METRIDIOIDEA	
Family Actinoscyphiidae	
<i>Actinoscyphia</i> sp.	flytrap anemone
Family Hormathiidae	
HORMATHIIDAE sp. 1	warty anemone
ORDER ANTIPATHARIA – BLACK CORALS	
ANTIPATHARIA	black coral (otherwise unidentified)
Family Cladopathidae	
<i>Trissopathes</i> sp.	black coral

SCIENTIFIC NAME	COMMON NAME
	Family Schizopathidae
<i>Bathypathes</i> sp.	black coral
<i>Lillipathes</i> sp.	black coral
	ORDER CERIANTHARIA – TUBE-DWELLING ANEMONES
CERIANTHARIA sp. 2	tube-dwelling anemone
CERIANTHARIA	tube-dwelling anemone (otherwise unidentified)
	ORDER SCLERACTINIA – STONY CORALS
SCLERACTINIA	stony coral (otherwise unidentified)
	Family Caryophylliidae
CARYOPHYLLIIDAE	cup coral (otherwise unidentified)
* <i>Desmophyllum dianthus</i>	cockscomb cup coral
	ORDER ZOANTHARIA - ZOANTHIDS
*ZOANTHARIA sp. 1	zoanthid
*ZOANTHARIA sp. 2	zoanthid
ZOANTHARIA	zoanthid (otherwise unidentified)
	SUBCLASS OCTOCORALLIA
OCTOCORALLIA	octocoral (otherwise unidentified)
	ORDER ALCYONACEA – SOFT CORALS (SUBORDER) ALCYONIINA
	Family Alcyoniidae
<i>Heteropolypus ritteri</i>	mushroom soft coral
	Family Nephtheidae
<i>Gersemia juliepackardae</i>	Julie Packard's Treasure coral
	SUBORDER CALCAXONIA
	Family Isididae
<i>Isidella tentaculum</i>	bamboo coral
ISIDIDAE	bamboo coral (otherwise unidentified)
<i>Keratoisis</i> sp.	bamboo coral
† <i>Lepidisis</i> sp.	bamboo coral
	Family Primnoidae
<i>Parastenella gymnogaster</i>	coral
<i>Parastenella</i> sp.	coral
PRIMNOIDAE	primnoid coral (otherwise unidentified)
	SUBORDER HOLAXONIA
	Family Acanthogorgiidae
<i>Acanthogorgia</i> sp.	coral

SCIENTIFIC NAME	COMMON NAME
	Family Plexauridae
[†] <i>Swiftia kofoidi</i>	red sea fan coral
[†] <i>Swiftia simplex</i>	coral
	(SUBORDER) SCLERAXONIA
	Family Paragorgiidae
<i>Paragorgia arborea</i>	bubble gum coral (dark pink)
<i>Sibogagorgia cauliflora</i>	bubble gum coral (light pink)
	Family Coralliidae
<i>Corallium</i> sp.	precious coral
	(SUBORDER) STOLONIFERA
	Family Clavulariidae
[†] <i>Clavularia</i> sp.	coral
	ORDER PENNATULACEA – SEA PENS
PENNATUALCEA	sea pen (otherwise unidentified)
	SUBORDER SESSILIFLORAE
	Family Anthoptilidae
<i>Anthoptilum grandiflorum</i>	feather boa sea pen
	Family Funiculinidae
<i>Funiculina</i> sp.	bottle brush sea pen
	Family Umbellulidae
<i>Umbellula lindahli</i>	droopy sea pen
	PHYLUM CTENOPHORA – COMB JELLIES OR SEA WALNUTS
	Class Tentaculata
	ORDER CYDIPPIDA
CYDIPPIDA.....	ctenophore (otherwise unidentified)
	Family Aulacoctenidae
<i>Aulacoctena</i> sp.....	ctenophore
	ORDER LOBATA
	Family Bathocyroidae
<i>Bathocyroe</i> sp.	lobate ctenophore
	Family Bolinopsidae
<i>Bolinopsis infundibulum</i>	lobate ctenophore
	Family Kiyohimeidae
<i>Kiyohimea usagi</i>	lobate ctenophore

SCIENTIFIC NAME	COMMON NAME
	Family Lampocenidae
<i>Lampoceteis cruentiventer</i>	lobate ctenophore
	Class Nuda ORDER BEROIDA
<i>Beroe</i> sp.	ctenophore
	PHYLUM MOLLUSCA - MOLLUSCS Class Gastropoda – sea slugs
*GASTROPODA sp. 2	gastropod
GASTROPODA	gastropod (otherwise unidentified)
	SUBCLASS VETIGASTROPODA SUPERFAMILY TROCHOIDEA
	Family Calliostomatidae
* <i>Calliostoma platinum</i>	silvery topsnail
	SUBCLASS CAENOGASTROPODA ORDER LITTORINIMORPHA SUBORDER PTEROTRACHEOIDEA
PTEROTRACHEOIDEA	heteropod (otherwise unidentified)
	ORDER NEOGASTROPODA SUPERFAMILY BUCCINOIDEA
	Family Buccinidae
*BUCCINIDAE sp. 1	snail
* <i>Neptunea-Buccinum</i> complex	snail
	SUBCLASS HETEROBRANCHIA INFRACLASS OPISTHOBRANCHIA ORDER NUDIBRANCHIA SUBORDER DEXIARCHIA
	Family Aeolidiidae
AEOLIDIIDAE	nudibranch (otherwise unidentified)
	Family Tritoniidae
<i>Tritonia tetraquetra</i>	nudibranch
	ORDER THECOSOMATA SUBORDER PSEUDOTHECOSOMATA
PSEUDOTHECOSOMATA	(otherwise unidentified)

SCIENTIFIC NAME	COMMON NAME
	SUPERFAMILY CYMBULIOIDEA
	Family Cymbuliidae
	Subfamily Glebinae
<i>Corolla spectabilis</i>	sea butterfly
	Class Polyplacophora
	ORDER NEOLORICATA
NEOLORICATA	chiton (otherwise unidentified)
	Class Bivalvia – bivalves
	SUBCLASS PTERIOMORPHIA
	ORDER LIMOIDA
	Family Limidae
<i>Acesta mori</i>	clam (smooth shell)
	ORDER PECTINIDA
	SUPERFAMILY PECTINOIDEA
	Family Pectinidae
* <i>Delectopecten</i> sp.	scallop
	SUBCLASS PROTOBRANCHIA
	ORDER SOLEMYIDA
	SUPERFAMILY SOLEMYOIDEA
	Family Solemyidae
<i>Solemya</i> sp.	
	SUBCLASS HETERODONTA
	ORDER VENERIDA
	Family Vesicomydiae
<i>Phreagena kilmeri</i>	vesicomyid clam
VESICOMYIDAE.....	vesicomyid clam (otherwise unidentified)
	Class Cephalopoda
	SUBCLASS COLEOIDEA
	SUPERORDER DECAPODIFORMES
	ORDER OEGOPSIDA
	Family Chiroteuthidae
<i>Chiroteuthis calyx</i>	squid
	Family Cranchiidae
	Subfamily Taoniinae
TAONIINAE	squid (otherwise unidentified)
	Family Gonatidae
Gonatus sp.	squid

SCIENTIFIC NAME	COMMON NAME
	SUPERORDER OCTOPODIFORMES ORDER OCTOPODA SUBORDER INCIRRATA
	Family Enteroctopodidae
<i>Benthoctopus</i> sp.	octopus
	Family Megaleledonidae
<i>Graneledone boreopacifica</i>	octopus
	Family Octopodidae
<i>Octopus rubescens</i>	red octopus
	ORDER VAMPYROMORPHA
	Family Vampyroteuthidae
<i>Vampyroteuthis infernalis</i>	vampire squid
	PHYLUM ANELIDA – SEGMENTED WORMS Class Polychaeta – polychaete worms
POLYCHAETA	polychaete worm (otherwise unidentified)
POLYCHAETA tube	sediment or parchment tube
	SUBCLASS ERRANTIA ORDER PHYLLODOCIDA
	Family Polynoidae
POLYNOIDAE	scale worm (otherwise unidentified)
	Family Tomopteridae
<i>Tomopteris</i> sp.	tomopterid worm
	Family Typhloscolecidae
<i>Travisiopsis</i> sp.	polychaete worm
	SUBCLASS SEDENTARIA INFRACLASS CANALIPALPATA ORDER SABELLIDA
	Family Sabellidae
*SABELLIDAE	sabellid worm (otherwise unidentified)
	Family Serpulidae
SERPULIDAE	serpulid worm (otherwise unidentified)
	ORDER TEREBELLIDA
	Family Flabelligeridae
<i>Poeobius meseres</i>	holopelagic worm
	Family Terebellidae
†TEREBELLIDAE	terebellid worm (otherwise unidentified)

SCIENTIFIC NAME	COMMON NAME
	PHYLUM ARTHROPODA
	SUBPHYLUM CHELICERATA
	Class Pycnogonida – sea spiders
PYCNOGONIDA	sea spider (otherwise unidentified)
	SUBPHYLUM CRUSTACEA
	SUPERCLASS MULTICRUSTACEA
	Class Malacostraca
	SUBCLASS EUMALACOSTRACA
	SUPERORDER EUCARIDA
	ORDER EUPHAUSIACEA
EUPHAUSIACEA	krill (otherwise unidentified)
	ORDER DECAPODA
	SUBORDER DENDROBRANCHIATA
	SUPERFAMILY SERGESTOIDEA
	Family Sergestidae
<i>Eusergestes similis</i>	midwater shrimp
<i>Petalidium spiriosum</i>	shrimp
	SUBORDER PLEOCYEMATA
	INFRAORDER AXIIDEA
	Family Callianassidae
CALLIANASSIDAE	ghost shrimp (otherwise unidentified)
	INFRAORDER CARIDEA
CARIDEA	shrimp (otherwise unidentified)
	SUPERFAMILY PANDALOIDEA
	Family Pandalidae
PANDALIDAE	shrimp (otherwise unidentified)
<i>Pandalopsis ampla</i>	deepwater bigeye shrimp
	INFRAORDER PALINURA
	SUPERFAMILY ERYONOIDEA
	Family Polychelidae
<i>Polycheles</i> sp. (larvae)	

SCIENTIFIC NAME	COMMON NAME
INFRAORDER ANOMURA SUPERFAMILY LITHODOIDEA	
Family Lithodidae – king crabs	
<i>Lithodes cousesii</i>	scarlet king crab
LITHODIDAE.....	king crab (otherwise unidentified)
<i>Neolithodes diomedae</i>	crab
<i>Paralithodes rathbuni</i>	spiny king crab
* <i>Paralomis multispina</i>	spiny paralomis
SUPERFAMILY PAGUROIDEA	
*PAGUROIDEA.....	hermit crab (otherwise unidentified)
SUPERFAMILY CHIROSTYLOIDEA	
Family Chirostyliidae	
<i>Gastroptychus iaspis</i>	
<i>Gastroptychus perarmatus</i>	
SUPERFAMILY GALATHEOIDEA	
Family Munididae	
<i>Munida quadrispina</i>	squat lobster
<i>Munida</i> sp. A	
<i>Pleuroncodes planipes</i>	pelagic red crab
Family Munidopsidae	
<i>Munidopsis</i> sp.	squat lobster
INFRAORDER BRACHYURA SUPERFAMILY MAJOIDEA	
Family Epialtidae	
<i>Chorilia longipes</i>	longhorn decorator crab
Family Oregoniidae	
<i>Chionoecetes tanneri</i>	grooved tanner crab
SUPERORDER PERACARIDA ORDER MYSIDA	
Family Mysidae	
<i>MYSIDAE</i>	mysid (otherwise unidentified)
ORDER AMPHIPODA	
AMPHIPODA.....	amphipod (otherwise unidentified)
AMPHIPODA tube mat.....	amphipod tube mat

SCIENTIFIC NAME	COMMON NAME
	SUBORDER HYPERIIDEA INFRAORDER PHYSOSOMATA SUPERFAMILY SCINOIDEA
SCINIDAE	Family Scinidae amphipod (otherwise unidentified)
	SUBORDER SENTICAUDATA INFRAORDER COROPHIIDA SUPERFAMILY CAPRELLOIDEA
CAPRELLIDAE	Family Caprellidae caprellid amphipod (otherwise unidentified)
	ORDER ISOPODA SUBORDER ASELOTA SUPERFAMILY JANIROIDEA
MUNNOPSISIDAE	Family Munnopsidae spider (otherwise unidentified)
	INFRAPHYLLUM BRACHIOPODA ORDER RHYNCHONELLIDA
Laqueus californianus	Family Laqueidae lamp shell
	PHYLUM ECHINODERMATA SUBPHYUM CRINOZOA Class Crinoidea – crinoids, feather stars SUBCLASS ARTICULATA ORDER COMATULIDA
COMATULIDA.....	crinoid (otherwise unidentified)
	SUPERFAMILY ANTEDONOIDEA
*ANTEDONOIDEA sp. 1	crinoid
	Family Zenometridae
*Psathyrometra fragilis	crinoid
	Class Asteroidea – sea stars
ASTEROIDEA	sea stars (otherwise unidentified; numerous unidentified species present)
	SUPERORDER FORCIPULATACEA ORDER FORCIPULATIDA
	Family Zoroasteridae
*ZOROASTERIDAE	zoroasterid sea star (otherwise unidentified)

SCIENTIFIC NAME	COMMON NAME
ORDER BRISINGIDA	
BRISINGIDA	brisigid sea star (otherwise unidentified)
SUPERORDER SPINULOSACEA	
ORDER SPINULOSIDA	
Family Echinasteridae	
† <i>Henricia</i> sp.	sea star
SUPERORDER VALVATACEA	
Family Poraniidae	
<i>Poraniopsis inflata</i>	sea star
ORDER VALVATIDA	
Family Goniasteridae	
GONIASTERIDAE.....	goniasterid sea star (otherwise unidentified)
<i>Mediaster aequalis</i>	sea star
Subfamily Hippasterinae	
<i>Hippasteria californica</i>	sea star
<i>Hippasteria lepidonotus</i>	sea star
Family Solasteridae	
* <i>Crossaster borealis</i>	
* <i>Heterozonias alternatus</i>	
* <i>Solaster hypothrissus</i>	
SOLASTERIDAE.....	sun star (otherwise unidentified)
ORDER PAXILLOSIDA (or "NOTOMYOTIDA")	
Family Astropectinidae	
<i>Dipsacaster</i> sp.	sea star
<i>Thrissacanthias penicillatus</i>	sea star
Family Benthopectinidae	
BENTHOPECTINIDAE.....	benthopectinid sea star (otherwise unidentified)
ORDER VELATIDA	
Family Myxasteridae	
<i>Asthenactis fisheri</i>	sea star
Family Pterasteridae	
<i>Hymenaster</i> sp.	sea star
PTERASTERIDAE	pterasterid sea star (otherwise unidentified)
Class Ophiuroidea – brittle stars, basket stars	
OPHIUROIDEA	brittle star (otherwise unidentified)

SCIENTIFIC NAME	COMMON NAME
ORDER EURYALIDA	
Family Asteronychidae	
<i>Asteronyx loveni</i>	brittle star
<i>Asteronyx</i> sp.	brittle star
Family Gorgonocephalidae	
<i>Gorgonocephalus</i> sp.	basket star
ORDER OPHIURIDA	
Family Ophiacanthidae	
* <i>OPHIACANTHIDAE</i>	brittle star (otherwise unidentified)
Class Holothuroidea – sea cucumbers	
ORDER DENDROCHIROTIDA	
Family Psolidae	
<i>Psolus squamatus</i>	sea cucumber
ORDER ASPIDOCHIROTIDA	
Family Synallactidae	
<i>Pseudostichopus mollis</i>	sea cucumber
SYNALLACTIDAE	sea cucumber (otherwise unidentified)
ORDER ELASIPODIDA	
Family Elpidiidae	
<i>Scotopanes</i> sp. A	sea cucumber (aka sea pig)
Family Laetmogonidae	
<i>Laetmogone</i> sp.	sea cucumber
PHYLUM CHAETOGNATHA – CHAETOGNATHS	
CHAETOGNATHA	chaetognath (otherwise unidentified)
Class Sagittoidea	
ORDER APHRAGMOPHORA	
Family Sagittidae	
<i>Caecosagitta macrocephala</i>	orange gut chaetognath
<i>Pseudosagitta maxima</i>	chaetognath
PHYLUM HEMICHORDATA	
Class Enteropneusta – acorn worms	
Family Harrimaniidae	
<i>Saxipendium implicatum</i>	acorn worm
Family Torquaratoridae	
* <i>Allapasus</i> sp. 3	acorn worm

SCIENTIFIC NAME	COMMON NAME
	PHYLUM CHORDATA SUBPHYLUM TUNICATA
TUNICATA	tunicate (otherwise unidentified)
	Class Ascidiacea – sea squirts ORDER PHLEBOBRANCHIA
	Family Octacnemidae
<i>Megalodicopia hians</i>	predatory tunicate
	ORDER STOLIDOBANCHIA
	Family Pyuridae
<i>Culeolus</i> sp. A	stalked tunicate
PYURIDAE	tunicate (otherwise unidentified)
	Family Styelidae
[†] <i>Cnemidocarpa</i> sp.....	tunicate
	Class Thaliacea – salps ORDER PYROSOMATIDA
	Family Pyrosomatidae
<i>Pyrosoma</i> sp.	pyrosome
	ORDER SALPIDA
SALPIDA	salp (otherwise unidentified)
	ORDER DOLIOLIDA
DOLIOLIDA	salp (otherwise unidentified)
	Class Appendicularia – larvaceans ?ORDER COPELATA
	Family Oikopleuridae
	Subfamily Bathochordaeinae
<i>Bathochordaeus stygius</i>	giant larvacean
	SUBPHYLUM VERTEBRATA
	SUPERCLASS AGNATA
	Class Myxini
	ORDER MYXINIFORMES
	Family Myxinidae – hagfishes
<i>Eptatretus</i> sp.	hagfish

SCIENTIFIC NAME	COMMON NAME
	SUPERCLASS GNATHOSTOMATA CLASS ELASMOBRANCHII ORDER CARCHARHINIFORMES
	Family Scyliorhinidae – cat sharks
<i>Apristurus kampae</i>	Longnose Cat Shark
	ORDER RAJIFORMES SUBORDER RAJOIDEI
	Family Arhynchobatidae – softnose skates
<i>Bathyraja abyssicola</i>	Deepsea Skate
<i>Bathyraja trachura</i>	Roughtail Skate
	Class Actinopteri ORDER ANGUILLIFORMES
ANGUILLIFORMES	true eel (otherwise unidentified)
	ORDER OSMERIFORMES
	Family Bathylagidae – deepsea smelts
<i>Bathylagoides wesethi</i> (midwater trawl, larvae).....	Snubnose Blacksmelt
<i>Leuroglossus stibius</i>	California Smoothtongue
<i>Lipolagus ochotensis</i> (midwater trawl, larvae)	Popeye Blacksmelt
<i>Pseudobathylagus milleri</i> (midwater trawl, larvae; ROV).....	Robust Blacksmelt
	Family Alepocephalidae – slickheads
<i>Alepocephalus tenebrosus</i>	California Slickhead
	ORDER STOMIIFORMES
	Family Gonostomatidae – bristlemouths
<i>Cyclothona pseudopallida</i> (midwater trawl, larvae)	Phantom Bristlemouth
<i>Cyclothona signata</i> (midwater trawl)	Showy Bristlemouth
<i>Cyclothona</i> sp.	bristlemouth (otherwise unidentified)
	Family Sternopychidae – marine hatchetfishes
<i>Argyropelecus lychnus</i> (midwater trawl, larvae)	Tropical Hatchetfish
<i>Argyropelecus sladeni</i> (midwater trawl, larvae)	Lowcrest Hatchetfish
	Family Stomiidae – dragonfishes
<i>Aristostomias scintillans</i> (midwater trawl)	Shining Loosejaw
<i>Chauliodus macouni</i> (midwater trawl; ROV).....	Pacific Viperfish
<i>Idiacanthus antrostomus</i> (midwater trawl)	Pacific Blackdragon
	ORDER AULOPIFORMES
	Family Scopelarchidae – pearleyes
<i>Benthophilus dentata</i> (midwater trawl, larvae).....	Northern Pearleye

SCIENTIFIC NAME	COMMON NAME
	Family Paralepididae – barracudinas
<i>Magnisudis atlantica</i>	Duckbill Barracudina
ORDER MYCTOPHIFORMES	
	Family Myctophidae – lanternfishes
<i>Diaphus theta</i> (midwater trawl)	California Headlightfish
<i>Nannobrachium regale</i> (midwater trawl, larvae)	Pinpoint Lampfish
<i>Nannobrachium ritteri</i> (midwater trawl)	Broadfin Lampfish
<i>Protomyctophum crockeri</i> (midwater trawl, larvae).....	California Flashlightfish
<i>Stenobrachius leucopsarus</i> (midwater trawl)	Northern Lampfish
<i>Triphoturus mexicanus</i> (midwater trawl, larvae)	Mexican Lampfish
ORDER GADIFORMES	
	Family Macrouridae – grenadiers
<i>Coryphaenoides acrolepis</i>	Pacific Grenadier
* <i>Coryphaenoides acrolepis-filifer</i> complex.....	Pacific/Threadfin Grenadier
<i>Coryphenooides pectoralis</i>	Giant Grenadier
	Family Moridae – codlings
<i>Antimora microlepis</i>	Pacific Flatnose
	Family Merlucciidae – merlucciid hakes
<i>Merluccius productus</i>	Pacific Hake
ORDER OPHIDIIFORMES	
	Family Ophidiidae – cusk-eels
* <i>Luciobrotula</i> sp. A	
OPHIIDIIDAE	cusk eel (otherwise unidentified)
ORDER SCORPAENIFORMES	
	Family Scorpaenidae – scorpionfishes
<i>Sebastes diploproa</i> (midwater trawl, larvae).....	Splitnose Rockfish
<i>Sebastes levis</i> (midwater trawl, larvae)	Cowcod
<i>Sebastes cf. melanostomus</i> (midwater trawl, larvae)	Blackgill Rockfish
<i>Sebastes</i> spp. (midwater trawl, larvae).....	rockfishes (otherwise unidentified)
<i>Sebastolobus alascanus</i>	Shortspine Thornyhead
<i>Sebastolobus altivelis</i>	Longspine Thornyhead
	Family Anoplopomatidae – sablefishes
<i>Anoplopoma fimbria</i>	Sablefish
	Family Psychrolutidae – fathead sculpins
<i>Psychrolutes phrictus</i>	Blob Sculpin

SCIENTIFIC NAME	COMMON NAME
Family Liparidae – snailfishes	
* <i>Careproctus filamentosus</i>	snailfish
<i>Careproctus kamikawai</i>	Arbiter Snailfish
<i>Careproctus melanurus</i>	Blacktail Snailfish
†LIPARIDAE sp. 1	snailfish
*LIPARIDAE sp. 3	snailfish
LIPARIDAE.....	snailfish (otherwise unidentified)
<i>Nectoliparis pelagicus</i> (midwater trawl)	Tadpole Snailfish

ORDER PERCIFORMES

Family Zoarcidae – eelpouts	
<i>Bothrocara brunneum</i>	Twoline Eelpout
<i>Lycenchelys</i> sp.....	eelpout
<i>Lycodapus</i> sp.....	eelpout
ZOARCIDAE	eelpout (otherwise unidentified)

ORDER PLEURONECTIFORMES

Family Pleuronectidae – righteye flounders	
<i>Embassichthys bathybius</i>	Deepsea Sole
<i>Microstomus pacificus</i>	Dover Sole
PLEURONECTIFORMES	flatfish (otherwise unidentified)

* Confidence level of identification is provisional.

† Confidence level of identification is unconfirmed.
