

Rhodamnia acuminata - family: MYRTACEAE

COOLOOLA IRON WOOD

Small rainforest tree ± 5 metres

Small white flowers followed by black, bird-attracting fruit

Cultivation: Adapts to a variety of sites and soils.

This plant occurs in Queensland only, north from the Mooloolah River, in subtropical and littoral rainforest. Its glossy green leaves have a greyish-white underside.

The pinkish new growth and compact form make this an attractive species.
