

Clorox® Broad Spectrum Quaternary Disinfectant Cleaner

When it comes to patient protection, don't compromise - switch to Clorox® Broad Spectrum Quaternary Disinfectant Cleaner today!

Fast and Effective

- Clorox® Broad Spectrum Disinfectant kills most organisms in 2 minutes, faster than most competitive quaternary sprays.
- No precleaning required. Less waiting means your staff can move more quickly to the next area.

Powerful, Gentle Cleaning

Clorox® Broad Spectrum Disinfectant is:

- Fragrance-free to help avoid the harsh odors associated with other quaternary disinfectant sprays.
- Formulated with powerful grease-cutting agents to clean the toughest messes on almost any surface.
- Tested for surface safety on most hospital-grade materials.
- See back for details.
- Alcohol-free, safe for plastics and rubber surfaces.

90 Healthcare-Relevant Kill Claims

Some quaternary ammonium-based sprays have only 15 EPA-registered kill claims. Why risk using a disinfectant that is registered to kill so few microorganisms? Clorox® Broad Spectrum Disinfectant is:

- EPA-registered to kill 90 different pathogens
- EPA-registered to kill bacteria, including *Bordetella bronchiseptica*, in 2 minutes
- EPA-registered to kill Canine parvovirus in 3 minutes

If your current disinfectant isn't registered to kill these organisms and more, your patients may not be protected from these potentially harmful pathogens.†

† Use as directed on hard, nonporous surfaces. Product tested to maintain active stability for 5 years.

Effective against:

BACTERIA: 2-minute contact time

<ul style="list-style-type: none"> • <i>Acinetobacter baumannii</i> • <i>Acinetobacter calcoaceticus</i> • <i>Bordetella bronchiseptica</i> • <i>Burkholderia cepacia</i> • <i>Citrobacter freundii</i> • <i>Corynebacterium ammoniagenes</i> • <i>Enterobacter aerogenes</i> • <i>Enterobacter cloacae</i> • <i>Enterococcus faecalis</i> • VRE • <i>Enterococcus faecium</i> • <i>Enterococcus hirae</i> • <i>Escherichia coli</i> • <i>Escherichia coli</i> resistant to tetracycline • <i>Escherichia coli</i> with ESBL (Extended Spectrum Beta Lactamase) resistance 	<ul style="list-style-type: none"> • <i>Escherichia coli</i> O157:H7 • <i>Flavobacterium</i> • <i>Haemophilus influenzae</i> • <i>Hafnia alvei</i> • <i>Klebsiella oxytoca</i> resistant to ampicillin • <i>Klebsiella oxytoca</i> • <i>Klebsiella pneumoniae</i> • <i>Legionella pneumophila</i> • <i>Listeria monocytogenes</i> • <i>Micrococcus luteus</i> • <i>Kytococcus sedentarius</i> • <i>Pasteurella multocida</i> • <i>Proteus mirabilis</i> • <i>Proteus vulgaris</i> • <i>Pseudomonas (Brevundimonas) diminuta</i> • <i>Pseudomonas aeruginosa</i> 	<ul style="list-style-type: none"> • <i>Pseudomonas fluorescens</i> • <i>Pseudomonas putida</i> • <i>Pseudomonas stutzeri</i> • <i>Salmonella enterica</i> • <i>Salmonella enteritidis</i> • <i>Salmonella gallinarum</i> • <i>Salmonella paratyphi B</i> • <i>Salmonella pullorum</i> • <i>Salmonella typhi</i> • <i>Salmonella typhimurium</i> • <i>Serratia liquefaciens</i> • <i>Serratia marcescens</i> • <i>Shigella dysenteriae</i> • <i>Shigella flexneri</i> serotype 1B • <i>Shigella sonnei</i> • <i>Staphylococcus aureus</i> • MRSA 	<ul style="list-style-type: none"> • CA-MRSA • <i>Staphylococcus aureus</i> resistant to erythromycin, penicillin, tetracycline • <i>Staphylococcus aureus</i> resistant to vancomycin • <i>Staphylococcus aureus</i> toxic shock toxin (TS) • <i>Staphylococcus epidermidis</i> resistant to methicillin • <i>Staphylococcus haemolyticus</i> • <i>Streptococcus agalactiae</i> • <i>Streptococcus mutans</i> • <i>Streptococcus pneumoniae</i> resistant to penicillin • <i>Streptococcus pyogenes</i> • <i>Xanthomonas maltophilia</i> • <i>Yersinia enterocolitica</i>
