Küppersbusch installation options: Diversity in possibilities

The **vertical** arrangement of two appliances creates a harmonious overall look and also shortens distances to make work processes easier. Oven and steam oven, microwave oven and fully automatic coffee machine – with Küppersbusch there is no limit to the diversity of combination options.

Arranging several appliances **horizontally** at eye level is a clear commitment to more design homogeneity for kitchen planners: the horizontal arrangement dominates the overall picture, and several appliances complement one another and create a continuous line. Küppersbusch compact appliances also provide genuine planning diversity here. We recommend ConceptLine ® for the horizontal combination of a 60-cm oven and a 45-cm compact appliance.
