A TASTE OF THE NEFF COLLECTION

CircoTherm®

WE ARE A FAN!

CLEAR BENEFITS WITH CIRCOTHERM® TECHNOLOGY BY NEFF

- Cook a three course meal at the same time with multi-level cooking and, better still, have no flavour transfer across dishes.
- Get cooking faster with little or no pre-heating of the oven.
- Better cooking results because of even heat transference through the oven cavity AND no loss of heat when opening the oven door.
- Moist, succulent roast dinners are achieved easily thanks to the speed at which the heat is delivered throughout the oven.
- No need to turn food on the grill, the air circulates to give perfect results EVERYTIME.

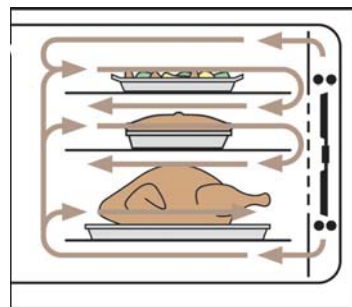

THE BENCHMARK FOR ALL FAN OVENS

THE PRINCIPLE:

CircoTherm® works by drawing air in from the oven via a powerful fan. It then heats up the air and forces it right back into the oven cavity through strategically placed ducts in the rear wall.

By continuously circulating hot air around the oven in this way the desired temperature is achieved more quickly and evenly than in a normal oven, saving time and energy as little or no preheating is required.

Because the hot air is focused directly onto the food being cooked, the heat is evenly distributed on shelf positions 1, 3 and 4. Shelf position 2 will have a lower temperature.

In fact, a complete three course meal can be cooked at the same time on the three shelf levels without the flavours intermingling. With CircoTherm® temperatures are lower so there is less splashing and spitting, making the oven much easier to clean.

All Neff ovens also come with additional CeramiClean® liners which effectively absorb and oxidise grease particles so that they don't build up over time, thus, requiring minimum maintenance. The great thing is these liners never need replacing.

CircoTherm® is great for roasting because of the way and the speed at which the heat is delivered - as a result, roasts are quickly sealed. This means the juices are retained, producing less shrinkage and moist, succulent joints.

CircoTherm® is the perfect way to cook foods which usually need to be grilled. There's no need to turn fish, burgers, steaks or sausages as the air circulates around them providing an even cooking result.

SOME OF THE UNIQUE NEFF FEATURES

SLIDE&HIDE® DOOR

The Slide&Hide® door, unique to Neff, slides smoothly away beneath the oven providing more space in the kitchen and easy access to the oven.

REVOLUTION HANDLE

When the oven door is opened, the Revolution Handle rotates towards you in a smooth, circular motion making opening and closing your oven easy and safe.

AQUAASSIST

AquaAssist provides a moist cooking environment to help achieve beautiful food that is perfectly succulent and tender, and retains its colour throughout the cooking process.

FLEXINDUCTION HOBS

FlexInduction hobs provide greater flexibility by using an enlarged single zone that heats pans of any size, positioned anywhere in the zone.

POINT & TWIST

Simply place the metallic dial in the centre of the control area, point it towards the zone you want to activate and twist to select the power level you want.

VITAFRESH 0°C

VitaFresh 0°C compartments store meat, fish, fruit or vegetables at their optimum humidity levels ensuring that the nutrients and vitamins are retained for up to three times longer.

SUPERCOOL & SUPERFREEZE

Adding fresh food to your fridge or freezer may increase the internal temperature. Use the SuperCool or SuperFreeze function to quickly chill the freshly added food and return the appliance to its ideal temperature.

NEFFSPARKLE® SYSTEM

A combination of delicate washing programmes, glass-friendly baskets, a lower spray pressure, gentle drying and a water softener that will keep your glasses in pristine condition.

CIRCOCARE DRUM

Raised droplets across the surface of the drum and specially designed paddles ensure deeper detergent penetration and a more thorough rinse. A powerful yet gentle wash.

TASTE OF NEFF QUICK REFERENCE GUIDE

Appliances which have this symbol are part of the Neff MasterChef promotion and can be bought at the reduced, highlighted price.

Appliances which have this symbol have Neff's unique Slide&Hide® door, explained above.

These appliances are part of the Series 3 range. Match with other appliances from the same series to create a truly in sync kitchen.

Appliances which have this symbol are only available through authorised Neff Trade Partners.

Appliances which have this symbol have Neff's Revolution Handle, explained above.

These appliances are part of the Series 5 range. Match with other appliances from the same series to create a truly in sync kitchen.

THE NEFF LEARNING CENTRE

Open Monday to Friday from 9am to 5pm in Citywest, Dublin, the Neff Learning Centre is the ideal setting to find a Neff appliance that will truly suit your needs.

With a vast range of Neff product on display and our expert advisors on hand you will have full opportunity to make a choice that will make your kitchen really special.

NEFF DEMONSTRATIONS

The Neff Learning Centre is also home to our purpose built demonstration theatre.

Here you can see Neff's unique features and benefits firsthand and fully experience just how the Neff CircoTherm® way of cooking generates perfect results every time.

Our product demonstrator also holds Neff demonstrations in retail outlets throughout the country. For a full listing and information on how to book your place visit the Nationwide Demonstrations page at www.neff.ie

For more information or to make an appointment please ring: (01) 413 6416

Roasting with CircoTherm® JENNY BRISTOW'S RACK OF LAMB WITH A GREMOLATA CRUSH AND LEMON GRAVY

Method:

Gently warm the olive oil in a pan and add the garlic, lemon zest, black pepper and parsley or rosemary. Mix lightly. Add the bread crumbs and continue to cook until the mixture binds.

Ask your butcher to prepare a rack of lamb, ensuring that all fat is scraped away from the bone, leaving at least 2 inches of the bones bare of fat. Pat dry the flesh section of the lamb with kitchen paper and cover with the gremolata crush, patting down carefully and firmly to ensure the crush will stay on after cooking.

Place in a roasting tin, sprinkle with the olive oil and cook in a preheated oven at CircoTherm 170°C or gas mark 6 for 35-40 minutes. The lamb will be pink when cooked. Increase the cooking time if you prefer your lamb well done.

Strain the meat juices from the roasting dish into a saucepan and add the lemon zest and honey. Heat through for 2 minutes. If you need to thicken the gravy, mix the flour with the water and stir in. Bring the gravy to the boil and continue boiling for 1 minute. Serve immediately and enjoy.

Ingredients:

Gremolata Crush

- 4 dessert spoons of olive oil
- 4 cloves of garlic - finely chopped
- Zest of 2 lemons - coarsely grated
- ½ a tea spoon of black pepper
- 2 dessert spoons of finely chopped parsley/rosemary
- 110 grams / 4 ounces white bread crumbs

Lemon Gravy

- 275ml / ½ a pint of meat juices
- Zest of ½ a lemon
- 2 dessert spoons of honey
- 10 grams / 2 ounces plain flour - optional
- 2-3 dessert spoons of water

Oven roasting is popular at any time of the year and is especially good using the CircoTherm® forced air cooking system which is at the heart of Neff ovens.

The great advantages of this lie in the fact that the oven heats up quickly with no need to pre-heat and secondly the combination of fast flowing hot air plus natural evaporation creates a uniquely moist heat which gives you extra succulent meat or lamb and caramelised vegetables.

In this recipe I have combined lamb with some lemon, herbs, parsley, garlic and a little olive oil.
