

Northern Suburbs Branch
Wildflower Society of W.A.
ns.wsowa.org.au

THE NURSERY was established in the 1980's so members could enjoy learning to propagate, grow and promote W.A. wildflowers. We freely provide to the community, experienced advice on plant selection, soil types, waterwise plants, verge plantings, local plants and plant care.

VOLUNTEERING requires no prior experience. The nursery is solely run by dedicated volunteers. Our experienced members are eager to pass on their knowledge, skills and passion for W.A. flora. When you join us, you will learn how to propagate and grow W.A. native plants in a friendly and relaxing setting.

RARE & DIVERSE SPECIES of W.A. flora are our speciality. We take pride in the extensive range of species we grow, not commonly available and considered hard to propagate.

THE NORTHERN SUBURBS BRANCH meets on the 4th Tuesday of every month at 7:30pm in the Henderson Environmental Centre located at the northern end of Groat Street, North Beach. Meetings are open to both members and the wider community. Prominent guest speakers provide insight into environmental, scientific and community topics involving W.A. flora.

DECLARED RARE & PRIORITY 1-4 are conservation codes for W.A. flora. Declared Rare plants are threatened plants facing an extremely high risk of extinction in the wild. Priority 1-4 plants are possibly or near threatened plants with Priority 1 being the most at risk.
