Limitations Statement

The sole purpose of this report and the associated services performed by Kellogg Brown & Root Pty Ltd(KBR) is to provide a Notice of Intent in accordance with the scope of services set out in the contract between KBR and DIPE ('the Client'). That scope of services was defined by the requests of the Client, by the time and budgetary constraints imposed by the Client, and by the availability of access to the site.

KBR derived the data in this report primarily from examination of records in the public domain and interviews with individuals with information about the site. The passage of time, manifestation of latent conditions or impacts of future events may require further exploration at the site and subsequent data analysis, and re-evaluation of the findings, observations and conclusions expressed in this report.

In preparing this report, KBR has relied upon and presumed accurate certain information (or absence thereof) relative to the site and the proposed development provided by government officials and authorities, the Client and others identified herein. Except as otherwise stated in the report, KBR has not attempted to verify the accuracy or completeness of any such information.

The findings, observations and conclusions expressed by KBR in this report are not, and should not be considered, an opinion concerning the significance of environmental impacts. No warranty or guarantee, whether express or implied, is made with respect to the data reported or to the findings, observations and conclusions expressed in this report. Further, such data, findings, observations and conclusions are based solely upon information and drawings supplied by the Client etc. in existence at the time of the investigation.

This report has been prepared on behalf of and for the exclusive use of the Client, and is subject to and issued in connection with the provisions of the agreement between KBR and the Client. KBR accepts no liability or responsibility whatsoever for or in respect of any use of or reliance upon this report by any third party.

2 Introduction

This document is a Notice of Intent for a major industrial development and associated infrastructure to be located in the Darwin region. The proponent, Department of Infrastructure, Planning and Environment, has identified an area at Glyde Point on the Gunn Point Peninsula, as a site for a major gas-based industrial estate and associated port facilities. The prerequisite for the development occurring is that gas comes onshore in Darwin, which has not been secured to date.

To facilitate industry investment at this locality, the NT Government is proposing to construct the necessary infrastructure required for a gas-related industrial estate and port facilities. The estate will be approximately 39 km from the Darwin CBD and approximately 90 km by road at its northern boundary (refer Map 1). This proposal includes subdivision pursuant to the Planning Act and the staged provision of infrastructure within the project area outlined in Map 1, consisting of:

- A 4,212 ha industrial estate, of which approximately 1,572 ha is reclaimed land, and associated services including power, water, gas, roads
- Port facilities consisting of a 4.9 km long, 170 m wide, 17 m deep access channel, turning basin and berths;
- Accommodation for construction workers in the Murrumujuk locality, 12 km to the south-west of Glyde Point and approximately 75 km by road from the Darwin CBD. The accommodation for workers will be the first stage in the later development of rural residential living in the Murrumujuk locality, aiming at a total population of 16,000; and
- Roads and service corridors linking the industrial estate at Glyde Point with Middle Arm Peninsula and East Arm Port. Required services include power, water, gas pipelines and potentially rail spur lines.

This Notice of Intent (NOI) covers all aspects of the proposed development in order to assess the requirement for the preparation of an Environmental Impact Statement. The NOI addresses the following sections to allow for a thorough evaluation of the proposal:

- Location of the proposal;
- Detailed description of the proposal;
- Description of the existing environment;
- Aboriginal and sacred sites clearance;
- Timing of proposed action;
- Proposed environmental management.

It has to be noted that the aim of this proposal is solely to provide serviced blocks of land for future industrial development. The final allocation of these parcels of land will depend on the activities of parties interested in occupying the land. Individual environmental assessments would be undertaken for each of these proposals. As such, a strategic environmental assessment to address the issues associated with the current proposal is considered to be most appropriate.

3 Location of the proposal

The proposed industrial estate is located at Glyde Point on the Gunn Peninsula, approximately 90 km by road from Darwin CBD (40 km north-east as the crow flies). The port is to extend seaward from the north eastern edge of the industrial estate.

The Murrumujuk locality is situated about 25 km to the south-west of the southern boundary of the industrial estate, approximately 75 km by road from Darwin. The proposed road and service corridor run in an overall southerly direction from the estate. One set of corridors branches off to the south-west, towards East Arm Port. The other set of corridors, including the gas pipeline, continues in a southerly direction to the Humpty Doo area before turning westward to link into the Middle Arm corridor.

All project elements are illustrated in Map 1. The development is located in Litchfield Shire. Land use concepts for the Shire are illustrated in Map 2 (Refer to Litchfield Planning Concepts and Land Use Objectives, 2002). The Litchfield Planning Concepts and Land Use Objectives form amendments to the Northern Territory Planning Scheme and confirm the location of Glyde Point as a future major industrial estate and Murrumujuk as the site of a future district centre serving the locality. As such, the proposed project area has been rezoned from PA (Pastoral) and FU (Future Use) (Litchfield Area Plan 1992) to Development (DV), Corridors and Murrumujuk.

The project area encompasses numerous land parcels. The industrial estate lies within section NT Portion 2626, Hundred of Bagot, currently held under leasehold tenure (Crown Lease Perpetual No. 311) by the Northern Territory Land Corporation. The Land Corporation has already agreed to surrender the land. The Murrumujuk area is integrated within Portions 2626, 2727 and 1378 Hundred of Bagot. Portion 2727, previously set aside for the former Gunn Point Prison, is vacant Crown land managed by the Department of Infrastructure, Planning and Environment. Portion 1378 is held as freehold by the NT Land Corporation. The proposed road and service corridor will dissect and pass adjacent to numerous smaller freehold and Crown land parcels, including NT Portion 4476, Hundred of Hutchison and Hundred of Paton, and NT Portion 3601 Hundred of Bagot, in the northern section of the Litchfield Shire. The service corridor alignment will then pass south through Section 8 (Black Jungle Reserve), Sections 1595, 567, 572 and 1580 in the Lambell's Lagoon area (Hundred of Guy), and across the Arnhem Highway into NT Portion 4477, Koolpinyah PL. From here, the alignments follow predominantly the rural road network, within the Hundred of Strangways before joining with the Darwin to Alice Springs Railway alignment (URS 2002). Map 3 illustrates land tenure for the project area.

4 Description of the proposal

Industrial Estate

The fully developed industrial estate is proposed to cover an area of 4,212 ha, of which approximately 1,572 ha would be reclaimed land. The development is to occur in several stages over more than 25 years, as illustrated in Map 4.

Stage 1 covers 794 ha, of which 417 ha will consist of reclaimed land. This will require 8.4 million m³ of fill, most likely to be sourced from offshore sources and potentially the material dredged to construct the access channel and turning basin.

Stage 2A (239 ha) consists mostly of reclaimed land, requiring a total of 10.4 million m³ of fill. Depending on the requirement for further land supplies, this stage will be completed within 5-10 years of the industrial estate being taken into use.

Stage 1 and 2A land would be used for heavy gas-related industry, including but not limited to refineries, a power plant, cryogenics, smelters and metallurgical industries. The final allocation will be dependent on the activities of parties interested in occupying the land. Individual environmental assessments would be undertaken for each of these proposals. The aim of this proposal is to provide serviced blocks of land for industrial development.

Stage 2B (218 ha) would be taken into use after 10-15 years, stage 2C (354 ha) after 15-20 years and stage 2D (595 ha) after 20-25 years. This land would be used by suppliers and service providers to the heavy industry in the estate.

The red and green areas in Map 4 are areas set aside for long-term development, exceeding the 25-year timeframe. The red area will be largely reclaimed land (930 ha), for which fill has not been identified at this stage.

Reclamation works will commence with the construction of bund walls along the foreshore of Glyde Point. The north-east edge of the Stage 1 reclamation area will be protected from wave surges by a beach constructed of gravel won from the site. The next step will be the reclamation works.

The foreshore supports an extensive mangrove forest typically on soft organic muds (mangrove muds). It is proposed to fill over the muds using appropriate techniques and materials. Settlement-critical locations could be pre-loaded with a surcharge to reduce future settlements. Wick drains would be used as and where needed to reduce pre-load time. This option reduces the environmental problems associated with the disposal of mangrove mud, which will almost certainly have acid sulphate potential.

Part of the fill will be supplied by the dredged materials from the access channel and turning basin, which are likely to be stiff clays. A range of measures may be necessary to achieve the proper consolidation including layering, wick drains and horizontal drainage layers. Once the fill operation is finalised, the wharf will be constructed.

On land earthworks will consist mainly of cut to fill.

Services are discussed in the next section. The industrial estate will comprise an independent sewerage treatment plant and ocean outfall.

Road and Services Corridor

Road and service corridor alignments are illustrated in Map 1. The proposed road and service corridor run in an overall southerly direction from the estate. One set of corridors branches off to the south-west, towards East Arm Port. The other set of corridors, including the gas pipeline, continues in a southerly direction to the Humpty Doo area before turning westward to link into the Middle Arm corridor.

The arterial road from Howard Springs is to branch off into collector roads and local streets within Murrumujuk residential estate. A major collector road is to continue to the industrial estate. All roads are to be sealed all-weather roads and will be provided with a stormwater drainage system.

Services to be provided to the industrial estate include water, power, gas and a rail spur line. Power transmission will consist of a high voltage transmission line from Darwin to a transformer station at Glyde Point, from which both the industrial estate and Murrumujuk will be supplied. The development scenario for the industrial estate includes the construction of a power plant, which can feed back into the grid.

Water will be pumped via a 600 mm nominal diameter mains to a large water storage tank (nominal volume of 30 ML) at ground level on a site near Murrumujuk. Future potential doubling up of this infrastructure (pipeline and tank) is accounted for. Water will be pumped into an elevated 4 ML storage tank, from which it will be gravity fed to Murrumujuk and the industrial estate.

The gas pipeline and the rail spur line will follow the corridor alignment, but no design work has been undertaken to date.

Port Facilities

The proposed port location and staged development is illustrated in Map 4. The location is believed to offer a good compromise between dredging volumes, vessel accessibility and proximity to Glyde Point. Facilities will consist of a 4.9 km long, 17 m deep access channel, a 875 m by 500 m, 17 m deep turning basin and a composite wharf comprising a concrete slab on pile deck with a bulkhead wall to the rear.

The port is designed to accommodate 75,000 DWT vessels with a draft of 14.5 m.

Murrumujuk Residential Estate

The Murrumujuk residential estate will be a staged land development aiming at a total nominal population of 16,000. The area will be mainly set aside for urban and rural living, with provisions for a district centre the size of which will be proportional to the population. When complete, the estate will consist of 3,500 urban blocks of approximately 1000 m² and 800 rural blocks ranging in size between 1 and 10 ha.

Services are to be supplied from Darwin, as detailed above. The estate will have an independent sewerage treatment plant and a potential ocean outfall.

5 Description of the existing environment

Climate

The Darwin region has a monsoonal climate with a wet season lasting from October to April. Most rain falls between December and March. The mean annual rainfall is 1614 mm, as determined by the Bureau of Meteorology. The highest recorded rainfall is 2644 mm and the lowest is 1025 mm.

Temperatures are highest in November and December, when the mean maximum is 34°C and the mean minimum is 27°C. The coolest month is July when the mean maximum is 30°C and the mean minimum is 19°C (NT Geological Survey 1987).

Geology

The geology of the area is covered by the 1:100,000 'Koolpinyah' and 'Noonamah' Geological Map Sheets, the 1:250,000 Darwin Map Sheet and accompanying explanatory notes (NT Geological Survey 1987).

The project area is largely underlain by tertiary soils and laterite overlying Wangarlu Mudstone of the Bathurst Island Formation, which in turn overlies Koolpinyah Dolomite. The tertiary soils typically comprise unconsolidated sand, clayey sand, ferruginous clayey sand and soil, commonly containing limonite pisolithes. Tertiary laterite typically comprises nodular, concretionary, pisolithic and vermicular mottled laterite and ferricrete.

Topography

The majority of land within the Litchfield Shire boundary, incorporating the proposed developments at Glyde Point and the associated service corridors, is predominantly flat, rarely rising more than 45 metres above Mean Sea Level. The majority of land suitable for development lies between 7.5 metres and 30 metres AHD (Litchfield Land Use Structure Plan 1990).

The Glyde Point area encompasses land terrain units including low plateau surface, side slopes and gentle gradients below the low plateau surface, drainage floors, lower foot slopes and seepage areas and estuarine plains. The project area consists of an eroding plateau surface. The main topographic features of Glyde Point are small surface drainage gullies and steeply dipping slopes from the plateau to the mangrove fringe.

The Murrumujuk area comprises predominantly a low plateau surface, which drains internally in an area to the east of Gunn Point Road. Towards the coast, the land slopes gently towards lower footslopes and seepage areas.

The service corridor is aligned predominantly with the plateau surface, although there are some low lying/coastal plain areas in the Howard River, Leaders Creek, Murrumujuk and Black Jungle areas.

Land Systems and Units

Land unit classification information was obtained from the Natural Resources Division within DIPE.

In a generally north to south direction, the proposed industrial area covers tidal flats and minor beaches typically containing mangrove forests; gently undulating lower slopes (0.5-1%) consisting of yellow massive earths and exhibiting *Eucalypt* open forest and minor woodland vegetation; undulating rises and slopes (2-5%) consisting of moderately deep gravelly yellow massive earths and exhibiting *Eucalypt* open woodland to woodland vegetation; and gently undulating upland surfaces (0.5-2%) with soils ranging from deep loamy massive earths to very shallow gravelly yellow massive earths and lithosols. The latter land units are characterised by *Eucalypt* woodlands.

The Murrumujuk residential area, from west to east, is characterised by a narrow strip of dunes and beach ridges with slopes between 2-8% and a vegetation consisting of grassland with pockets of low closed forest. Subsequently, a similar sequence as the one described for the industrial estate is observed.

Upon leaving the Glyde Point industrial estate, the corridors will move in a southerly direction, traversing gently undulating upland surfaces with slopes from 0.5-2%. These surfaces consist mostly of deep loamy massive earth and moderately deep gravelly massive earths, vegetated with *Eucalypt* open forest and *Eucalypt* woodland.

Where the corridor branches off to the south-west, towards East Arm Port, it traverses gently undulating upland surfaces, gentle side slopes and broad lowland plains. The soil types for these surfaces are moderately deep gravelly massive earths, very gravelly yellow massive earths, deep loamy yellow massive earths and moderately deep siliceous sands. The vegetation types include *Eucalypt* open woodland, minor open woodland and *Grevillea/Melaleuca* tall shrubland. Also in this area are swamp depressions of negligible slope. These swamp depressions consist of friable mottled yellow duplex soils and are vegetated with open to closed forest of *Melaleuca* spp.

The corridors that branch off towards Middle Arm Peninsula follow a more circuitous route. Initially, they go east from the junction then angle off to move in a southerly direction. This section of corridors will mainly pass through gently undulating upland surfaces, gentle side slopes and broad lowland plains. The soil types for these surfaces consist of moderately deep gravelly Massive Earths, very gravelly yellow massive earths, deep loamy yellow massive earths and moderately deep siliceous sands. The vegetation will be *Eucalypt* Open Woodland, minor open woodland and *Grevillea/Melaleuca* tall shrubland.

Eventually, the corridors turn to the west then branch into two - one for services only, the other for services and road. The “services-only” corridor traverses several different land types, including steeply sloping ridge terrain, drainage lines, gently undulating upland surfaces, broad lowland plains, low rounded hills and gentle side slopes. The soil types are varied, and include shallow gravelly lithosols, mottled grey earths, hard mottled yellow duplex soils, moderately deep gravelly massive earths, very gravelly yellow massive earths, and moderately deep siliceous sand. The vegetation is mostly *Eucalypt* woodland, mixed open woodland, open shrubland and *Grevillea/Melaleuca* tall shrubland. The “services and road” corridors initially traverse a significant section

of rugged low hills and slopes, consisting of shallow lithosols and shallow gravelly lithosols, vegetated with open *Eucalypt* woodland and open forest. Once they have passed through this section, they traverse similar terrain to the “services-only” corridor.

Once these corridors have joined together again, they traverse north-west over similar terrain until they reach Middle Arm Peninsula. On the south-eastern section of Middle Arm Peninsula, the corridors are mostly located on low rounded hills and gentle side slopes. These surfaces have shallow gravelly lithosols and moderately deep gravelly yellow massive earths, vegetated with *Eucalypt* open woodland. The corridors also traverse sections of low scarp and short steep slopes to 10-15%, with shallow gravelly lithosols, vegetated with *Eucalypt* woodland. Farther out on the Peninsula, the corridors traverse significant sections of estuarine fringes with negligible slope. These estuarine fringes experience tidal inundation, and consist of saline muds and clays vegetated with low closed forests of mangrove species and small areas of samphire and salt tolerant grasses (EPBC Ref 2001/334).

Hydrology

Surface water in the area of the proposed industrial estate drains generally to the south-east towards Leaders Creek. Leaders Creek is a permanent, tidally influenced creek that drains an extensive mangrove/salt flats area to the south-east of the proposed site (URS 2002).

The major water courses to be potentially impacted by the proposed project are Leaders Creek and Howard River due to altered local landscape. Increased erosion and sedimentation of receiving waters has the potential to occur during the construction phase and after construction of the industrial and residential developments and service corridor. During the construction phase, erosion control measures, management techniques and monitoring of receiving environments shall be implemented.

The transport and services corridors will traverse a wide area. The corridors are all located inland, where they will be in the vicinity of various small rivers and streams. The proposed route has been chosen to ensure minimal impact on these waterways.

On the Middle Arm Peninsula, the corridors will be in close proximity to various creeks. Certain sections of the corridors will be constructed on estuarine fringes, where the predominant vegetation is mangrove species, and the area is subject to tidal inundation. Appropriate construction techniques will be used to ensure minimal impact on these waterways (EPBC Ref 2001/334).

Hydrogeology

The proposed industrial estate and Murrumujuk residential areas are situated in Water Management Area 1 on the basis of assessed groundwater potential (Litchfield Shire Land Use Structure Plan 1990). The natural occurrence of saline groundwater and threat of induced saline intrusion with large-scale bore pumping restricts water supply potential to small isolated development sites.

Oceanography

A bathymetric survey carried out by Mapping and Hydrographic Surveys Pty Ltd in June 2002 indicated water depths ranging between -2 m and -20 m LAT in a 3 km by 2 km grid immediately north of Glyde Point.

The area offshore from Glyde Point experiences very large tidal ranges and very strong currents. Astronomical tidal range at Glyde Point is 5.64 m, mean neap range is 1.53 m and mean spring range is 3.90 m. The tides at Glyde Point are somewhat unusual in that slack water generally occurs well after the high and low water. Tidal currents are high, commonly exceeding 4 knots during spring tides (KBR 2003).

Terrestrial fauna and flora

Species and Habitats

Flora and fauna surveys were carried out as part of the Sunrise Gas Project (EcOz 2001), with sample site locations concentrated on the immediate Glyde Point area, southern pipeline landfall, Murrumujuk area, and three locations in the area of the existing corridor.

The vegetation survey recorded a total of 219 plant species and identified five major vegetation communities: open forest/woodland; mangroves; open grass swamp; *Melaleuca* swamp; and rainforest. The open forest/woodland communities dominated the study area.

The most significant vegetation communities in terms of conservation values were identified as rainforest and mangroves. Plant species of conservation interest included cycads and orchids, which are protected plants under the *Territory Parks and Wildlife Act 1996*. Weeds were not abundant in the area.

The fauna survey recorded a total of 135 fauna species, including 16 mammals, 20 reptiles, 13 amphibians and 86 birds. The area was noted to be important for migratory wader birds, although no significant roosts were identified. Two species of particular conservation interest were recorded. These were the Red Goshawk (*Erythrotiochis radiatus*), which is classified as Vulnerable; and the Bush Stone Curlew (*Burhinus grallarius*), which is classified as Near-threatened.

A search of DIPE's Biodiversity Unit's databases resulted in 393 plant species and 219 animal species for the industrial estate area and Murrumujuk. The road and services corridor areas search revealed 608 plant species and 337 animal species. Species lists have been attached in Appendix A.

Of the Glyde Point plant species, only *Cycas armstrongii* and *Malaxis marsupichila* (orchid) are listed as vulnerable (IUCN 2002). All Northern Territory cycads and orchids are protected under the Territory Parks and Wildlife Act (2000). In the corridor area, *Ptychosperma macarthurii* is listed as endangered. This species typically occurs in coastal monsoon vine forests such as Black Jungle. Near-threatened species in the corridor area include *Utricularia hamiltonii*, *holtzei* and *triflora*, *Nymphoides subacuta* and *Citrus gracilis*. The latter plant is the only endemic native citrus tree.

In the Glyde Point area, the following listed animal species were recorded:

- Hawksbill Turtle (*Eretmochelys imbricata*): critically endangered (IUCN 2002), vulnerable (EPBC 2002)
- Red Goshawk (*Erythrotriorchis radiatus*): vulnerable
- Beach Stone Curlew (*Esacus neglectus*), Eastern Curlew (*Numenius madagascariensis*), Black-necked Stork (*Ephippiorhynchus asiaticus*), Black-footed Tree Rat (*Mesembriomys gouldii*), Delicate Mouse (*Pseudomys delicatulus*) and Common Bent-wing Bat (*Miniopterus schreibersii*): all near threatened.

The near-threatened species were also recorded in the corridor areas, as well as the following:

- Pale Field Rat (*Rattus tunneyi*), Yellow-bellied Sheathtail Bat (*Saccopteryx flaviventris*), Asian Dowitcher (*Limnodromus semipalmatus*), Bush Stone Curlew (*Burhinus grallarius*): all near threatened;
- Australian Bustard (*Ardeotis australis*): vulnerable (NT 2002)
- Northern Quoll (*Dasyurus hallucatus*): listed vulnerable by the Territory Parks and Wildlife Act, near threatened by IUCN (2002).

Listed migratory species

There are no known significant (international, national or Territory) sites for waterbirds, seabirds, terrestrial migrant birds, or migratory waders within the industrial estate and residential development areas. Reasonable numbers of migratory waders have been found, but these are not significant relative to numbers in other areas. The terrestrial species listed in Table 1 are common and widely distributed. The area is unlikely to provide a significant refuge or major habitat for any of the species.

The proposed corridors pass through three significant wetland areas, all of them rich in waterbird species. The listed migratory species that are known to move throughout these wetland areas are listed below in Table 1. It is not expected that the proposed corridors will have a significant impact on the overall numbers of these species.

Table 1. Migratory species occurring in the project area

Species observed in corridor areas	
Bar-tailed Godwit	Marsh Sandpiper
Black-tailed Godwit	Oriental Pratincole
Common Sandpiper	Red-necked Stint
Curlew Sandpiper	Ruddy Turnstone
Eastern Curlew	Sharp-tailed Sandpiper
Greenshank	Terek Sandpiper
Grey Plover	Wader sp.
Grey-tailed Tattler	Whimbrel
Little Curlew	White-winged Tern
Long-toed Stint	Wood Sandpiper
Species observed in Glyde Point and Murrumujuk areas	
Brown Goshawk	Australian Hobby
Red Goshawk	White-winged Tern
White-bellied Sea Eagle	Little Tern
Brahminy Kite	Rainbow Bee-eater
Whistling Kite	Ruddy Turnstone
Black Kite	Red Knot
Osprey	Red-necked Stint
Fork-tailed Swift	Great Knot
Eastern Reef Egret	Bar-tailed Gadiwt
Cicadabird	Black-tailed Godwit
Greater Sand Plover	Little Curlew
Lesser Sand Plover	Whimbrel
Grey Plover	Terek Sandpiper
Red-capped Plover	Golden-headed Cisticola
Brown Falcon	Tawny Grassbird
Nankeen Kestrel	Australian Hobby

Introduced Terrestrial Species

A number of surveys conducted in the area (Ecoz 2001, Dames & Moore 2000, Dames & Moore 1994, cited by URS 2002) have detected the presence of introduced feral

fauna species, including the feral pig (*sus scrofa*), Asian Water Buffalo (*Bubalus bubalis*), Feral Cat (*Felis catus*), cattle (*Bos sp.*), brumbies (*Equus caballus*) and donkeys (*equus asinus*).

Biting Insects

The Medical Entomology Branch of Territory Health Services conducted biting insect surveys at Murrumujuk from October 1990 to March 1991 and at Glyde Point from October 2000 to June 2001. These reports provide baseline information regarding biting insects in the proposed project area (cited by URS 2002).

It was found that the whole Glyde Point area will be subject to seasonal pest midge problems. The main biting midge breeding sites are in the mangrove fringe located along the northern Glyde Point coastline and in a southerly direction to the mouth of the Leaders Creek. Given the dendritic pattern of small tributary creeks in the area, biting midges range up to approximately 1.5 km inland.

The saltmarsh mosquito (*Ochlerotatus vigilax*) is the most common mosquito species in the area. Mosquitoes generally range from the low lying swamps in the area and their numbers are tidally influenced. With development in the area, mosquitoes will represent a considerable nuisance with a number of species in the area acting as a vector for diseases such as Ross River Virus.

Coastal and Marine Habitats

A marine survey undertaken by URS in June 2002 extended from Point Stephens in the east to the Blue Holes in the west, including parts of South West Vernon Island (URS 2003).

Intertidal Communities

- : Mangrove Communities

Within the project area, mangroves fringe the entire coastline from Gunn Point to Point Stephens and also encircle South West Vernon Island.

- : Rocky Shores

Intertidal rock habitat is limited to a rock shelf adjoining the mangrove islet at Glyde Point and to rock stacks off Point Stephens. These rock habitats typically support clusters of rock oyster (*Saccostrea* cf. *echinata*) and barnacles (*Chthalamus* cf. *malayensis*). Small colonies of hard corals were present in rock pools on top of the rock shelf.

- : Intertidal Pavements

Intertidal pavement habitat extends seaward from the mangrove fringe from Gunn Point through to Glyde Point. The embayment between the two Points consists of a mudflat. The pavement areas that form the points exhibit limited hard coral patches (<10% cover).

- : Seagrass Beds

No substantial seagrass beds are present in the project area and none of the seagrasses recorded could be considered significant as a food source for dugongs or as nursery habitat for juvenile fish or prawns.

- : Algal Beds

As with seagrasses, it is considered highly unlikely that there are significant algae beds in the vicinity of Glyde Point which could be adversely impacted by the proposed port development.

Subtidal Communities

- : Reef slopes

The reef slopes on both sides of South Channel are characterised by a limited presence of hard corals (shallow depths only). The strong currents and high suspended matter favour filterfeeders such as sponges, soft corals and gorgonians.

South West Vernon Island reef slopes support up to 75% cover of hard corals, but the chance of impacts from construction and operation of the port are considered to be low, unless from ships traversing the Howard Channel.

- : Blue Holes

The Western Blue Holes off Gunn Reef supports a diverse and exceptionally high cover of hard corals to a depth of 2 m. Below 2 m depth, the slopes were comprised of coral rubble covered with an algal turf and scattered sponges and soft corals. The Eastern Blue Hole was not surveyed.

- : Subtidal Pavement

The subtidal seafloor extending northwards from Glyde Point consists of rock pavement. Turbidity levels are very high due to the strong currents observed. The epibenthic communities were dominated by filter-feeders (sponges, gorgonians, ascidians, etc.) with some soft corals, bryozoans and echinoderms (pencil urchins, sea stars, feather stars, etc. Similar communities were found on subtidal pavements off Point Stephens, Fright Point and Stephens Bank.

Vertebrate Fauna

Marine vertebrates known to occur within the Darwin regions, and which are likely to occur in the vicinity of Glyde Point, are:

- Turtles - green (*Chelonia mydas*) and hawksbill (*Eretmochelys imbricata*);
- Sea snakes - families Hydrophiidae and Laticaudidae;
- Estuarine crocodiles (*Crocodylus porosus*);
- Dugongs (*Dugong dugong*)
- Dolphins - common (*Delphinus Delphi*), striped (*Stenella coeruleoalba*), spinner (*S. longirostris*), bottle-nose (*Tursiops truncates*), Irrawaddy River (*Orcaella brevirostris*) and Indo-Pacific hump-backed (*Sousa chinensis*); and

- Pelagic and demersal fish, including species of commercial and recreational importance.

It is considered that no critical habitats for any of these species would be significantly impacted upon by the proposed port development (URS 2003).

Heritage and Archaeology

A recent database search by the Office of Environment and Heritage listed 7 archaeological sites within the Glyde Point Industrial Estate area and 11 sites within the immediate vicinity of the Murrumujuk residential development. The sites consist mainly of shell middens and scattered artefacts. A search of the service corridors did not identify any known archaeological sites. Map 5 indicates the locations of archaeological sites within the larger study area.

Hiscock (1994, cited by URS 2002) undertook an archaeological survey of the Murrumujuk area and the existing Gunn Point road to the proposed residential development. No archaeological material was found in the Murrumujuk area.

Heritage Surveys (2000, cited by URS 2002) completed a survey on the Gunn Point Peninsula as part of the proposed Sunrise Gas Project. Eleven prehistoric archaeological sites (comprising of shell scatters/earth mounds) were recorded within the proposed industrial estate area. In addition, one historic site (Ginger Palmer's Jungle) located within the proposed development area is being considered for nomination on the Northern Territory Heritage Register.

No sites are recorded in the Register of the National Estate or on the Register of Significant Places maintained by the National Trust of Australia, Northern Territory Branch.

Maritime Archaeology

Information pertaining to shipwrecks in Australian coastal waters is available through the Northern Territory Shipwreck Database. There are no recorded historic shipwrecks in the vicinity of the proposed port development. A Second World War aircraft crash site is located south of Gunn Point, with wreckage washed up on the beach at Gunn Point at 12°13'S, 131°00E. This site is not currently protected under the Northern Territory of Australian Heritage Conservation Act 1991.

Aboriginal Sacred Sites

There are ten sacred sites registered with the Aboriginal Areas Protection Authority (AAPA) in the Glyde Point area. Sacred sites are protected under the Northern Territory Aboriginal Sacred Sites Act 1989.

Land Use

The Gunn Point Peninsula has a history of extensive grazing associated with historical annual pastoral lease and grazing licence use dating back to 1905. The last grazing licence issued became the Koolpinyah Pastoral Lease in 1957, which was surrendered over the project area in 1969.

The peninsula is covered with native vegetation except where clearing for the former Gunn Point Prison Farm occurred and forestry and farming plots were established as part of the prison development. Cropping in the area is restricted to the plots of the former Gunn Point Prison. NT Quality Hay Pt Ltd holds Miscellaneous Licence No. 1872 over cropping plots and NT Cypress Oil Pty Ltd holds Miscellaneous Licence No. 1870 over the forestry plots. The Bureau of Meteorology holds an Occupation Licence over a small area near the former Prison Buildings.

Currently, Darwin region residents use parts of the Gunn Point Peninsula for recreational fishing and informal camping. The NT Land Corporation, which holds NT Portion 2626, currently subleases an area of approximately 2 ha, located to the south of Leaders Creek adjacent to the boat ramp. This lies outside of the project area and includes secure parking, small convenience store, a barbecue/picnic area, caretaker accommodation and a camping ground.

6 Aboriginal and Sacred Site Clearances

There are ten sacred sites registered with the Aboriginal Areas Protection Authority (AAPA) in the Glyde Point area. A list of sacred site locations along the service corridor has not been requested as yet.

Sacred sites are protected under the Northern Territory Aboriginal Sacred Sites Act (1989). The register is not a definitive list of all sites. When the project is likely to move ahead, the proponent will be required to obtain an Authority Certificate from AAPA.

7 Description of timing of proposed actions

Timing of the proposed actions cannot be addressed at this stage. The project will only move ahead if (a) Sunrise gas coming onshore and (b) adequate industry interest in the development can be secured.

It is envisioned that the development of the industrial estate, residential area and service corridor will be staged over several years to decades.

8 Proposed environmental management measures

A detailed environmental management plan covering construction and operation of the entire development will be prepared as part of the Environmental Impact Statement process to be undertaken upon securing the project's feasibility.

Reptile	Crocodylidae	<i>Crocodylus porosus</i>	Estuarine or Salt-Water Crocodile						1
Reptile	Elapidae	<i>Demansia olivacea</i>	Olive Whip Snake	DD					
Reptile	Elapidae	<i>Furina ornata</i>	Orange-naped Snake						
Reptile	Elapidae	<i>Pseudonaja nuchalis</i>	Western Brown Snake or Gwarder	DD					
Reptile	Elapidae	<i>Vermicella annulata</i>	Bandy Bandy						
Reptile	Gekkonidae	<i>Gehyra australis</i>	Northern Dtella or House Gecko						
Reptile	Gekkonidae	<i>Hemidactylus frenatus</i>	Asian House Gecko						
Reptile	Gekkonidae	<i>Heteronotia binoei</i>	Bynoes Gecko						
Reptile	Gekkonidae	<i>Oedura rhombifera</i>	Zig-zag Gecko						
Reptile	Hydrophiidae	<i>Hydrophis darwiniensis</i>	Hydrelaps darwiniensis						
Reptile	Scincidae	<i>Carlia gracilis</i>	Slender Rainbow Skink						
Reptile	Scincidae	<i>Carlia munda</i>	Striped Rainbow Skink						
Reptile	Scincidae	<i>Carlia rufilatus</i>	Red-Sided Rainbow Skink						
Reptile	Scincidae	<i>Carlia triacantha</i>	Three-Spined Rainbow Skink						
Reptile	Scincidae	<i>Cryptoblepharus plagioccephalus</i>	Aboreal Snake-Eyed Skink						
Reptile	Scincidae	<i>Ctenotus essingtoni</i>	Port Essington Ctenotus						
Reptile	Scincidae	<i>Ctenotus hilli</i>	Hill's Ctenotus						
Reptile	Scincidae	<i>Ctenotus storri</i>	Storr's Ctenotus						
Reptile	Scincidae	<i>Glaphyromorphus darwiniensis</i>	Darwin Skink						
Reptile	Scincidae	<i>Glaphyromorphus douglasi</i>	Douglas Skink						
Reptile	Scincidae	<i>Menetia alanae</i>	Alana's Menetia						
Reptile	Scincidae	<i>Morethia stormi</i>	Storr's Snake-Eyed Skink						
Reptile	Scincidae	<i>Tiliqua scincoides</i>	Common Blue-Tongued Lizard	DD					
Reptile	Varanidae	<i>Varanus indicus</i>	Mangrove Monitor	DD					
Reptile	Varanidae	<i>Varanus panoptes</i>	Varanus panoptes						

Conservation Status

EX	Extinct
EX(W)	Extinct in the wild
CE	Critically Endangered
EN	Endangered
VU	Vulnerable
LR/NT	Near Threatened
DD	Data Deficient
LC	Least Concern

FAUNA SPECIES LIST FOR THE SERVICE CORRIDORS

TYPE	FAMILYNAME	TAXONNAME	COMMONNAME	NT2002	EPBCA2002	IUCN2002	JAMBA	CAMBA
Bird	Acanthizidae	Smicromys brevirostris [indeterminate]	Weebill					
Bird	Accipitridae	Accipiter cirrocephalus	Collared Sparrowhawk					
Bird	Accipitridae	Accipiter fasciatus [indeterminate]	Brown Goshawk					
Bird	Accipitridae	Accipiter novaehollandiae	Grey Goshawk					
Bird	Accipitridae	Aquila audax	Wedge-tailed Eagle					
Bird	Accipitridae	Aviceda subcristata	Pacific Baza					
Bird	Accipitridae	Circus approximans	Swamp Harrier					
Bird	Accipitridae	Circus assimilis	Spotted Harrier					
Bird	Accipitridae	Elanus axillaris	Black-shouldered Kite					
Bird	Accipitridae	Elanus scriptus	Letter-winged Kite					
Bird	Accipitridae	Haliaeetus leucogaster	White-bellied Sea-eagle					1
Bird	Accipitridae	Haliastur indus	Brahminy Kite					
Bird	Accipitridae	Haliastur sphenurus	Whistling Kite					
Bird	Accipitridae	Hamirostra melanosternon	Black-breasted Buzzard					
Bird	Accipitridae	Hieraetus morphoides	Little Eagle					
Bird	Accipitridae	Lophoictinia isura	Square-tailed Kite					
Bird	Accipitridae	Milvus migrans	Black Kite					
Bird	Accipitridae	Pandion haliaetus	Osprey					
Bird	Aegothelidae	Aegotheles cristatus	Australian Owlet-nightjar					
Bird	Alaudidae	Mirafra javanica	Singing Bushlark					
Bird	Alcedinidae	Alcedo azurea	Azure Kingfisher					
Bird	Alcedinidae	Alcedo pusilla	Little Kingfisher					
Bird	Anatidae	Anas gracilis	Grey Teal					
Bird	Anatidae	Anas superciliosa	Pacific Black Duck					
Bird	Anatidae	Dendrocagna arcuata	Wandering Whistling-Duck					
Bird	Anatidae	Dendrocagna eytoni	Plumed Whistling-Duck					
Bird	Anatidae	Malacorhynchus membranaceus	Pink-eared Duck					
Bird	Anatidae	Nettapus pulchellus	Green Pygmy-Goose					
Bird	Anatidae	Tadorna radjah	Radjah Shelduck					
Bird	Anhingidae	Anhinga melanogaster	Darter					
Bird	Anseranatidae	Anseranas semipalmata	Magpie Goose					
Bird	Apodidae	Apus pacificus	Fork-tailed Swift	1	1			
Bird	Ardeidae	Ardea alba	Great Egret	1	1			
Bird	Ardeidae	Ardea ibis	Cattle Egret	1	1			
Bird	Ardeidae	Ardea intermedia	Intermediate Egret					
Bird	Ardeidae	Ardea pacifica	White-necked Heron					
Bird	Ardeidae	Ardea picata	Pied Heron					
Bird	Ardeidae	Ardea sumatrana	Great-billed Heron					
Bird	Ardeidae	Butorides striatus stagnatilis	Striated Heron					
Bird	Ardeidae	Egretta garzetta	Little Egret					
Bird	Ardeidae	Egretta novaehollandiae	White-faced Heron					
Bird	Ardeidae	Egretta sacra	Eastern Reef Egret				1	
Bird	Ardeidae	Ixobrychus flavicollis	Black Bittern	DD				
Bird	Ardeidae	Nycticorax caledonicus	Nankeen Night Heron					
Bird	Artamidae	Artamus cinereus	Black-faced Woodswallow					
Bird	Artamidae	Artamus leucorynchus	White-breasted Woodswallow					
Bird	Artamidae	Artamus minor	Little Woodswallow					
Bird	Artamidae	Cracticus nigrogularis	Pied Butcherbird					
Bird	Artamidae	Cracticus quoyi	Black Butcherbird					
Bird	Artamidae	Cracticus torquatus leucopterus	Grey Butcherbird					
Bird	Burhinidae	Burhinus grallarius	Bush Stone-curlew					
Bird	Burhinidae	Esacus neglectus	Beach Stone-curlew	LR/NT				
Bird	Cacatuidae	Cacatua galerita	Sulphur-crested Cockatoo					
Bird	Cacatuidae	Cacatua roseicapilla	Galah					
Bird	Cacatuidae	Cacatua sanguinea [indeterminate]	Little Corella					
Bird	Cacatuidae	Calyptorhynchus banksii [indeterminate]	Red-tailed Black-cockatoo					
Bird	Cacatuidae	Calyptorhynchus banksii macrorhynchos	Red-tailed Black-cockatoo					
Bird	Cacatuidae	Nymphicus hollandicus	Cockatiel					
Bird	Campephagidae	Coracina novaehollandiae	Black-faced Cuckoo-shrike					
Bird	Campephagidae	Coracina papuensis	White-bellied Cuckoo-shrike					
Bird	Campephagidae	Coracina tenuirostris	Cicadabird					
Bird	Campephagidae	Lalage leucomela	Varied Triller					
Bird	Campephagidae	Lalage sueurii	White-winged Triller					
Bird	Caprimulgidae	Caprimulgus macrurus	Large-tailed Nightjar					
Bird	Caprimulgidae	Eurostopodus argus	Spotted Nightjar					
Bird	Centropodidae	Centropus phasianinus	Pheasant Coucal					
Bird	Charadriidae	Charadrius leschenaultii	Greater Sand Plover	1	1			
Bird	Charadriidae	Charadrius mongolus	Lesser Sand Plover	1	1			
Bird	Charadriidae	Charadrius ruficollis	Red-capped Plover					
Bird	Charadriidae	Charadrius veredus	Oriental Plover	1				
Bird	Charadriidae	Elseyornis melanops	Black-fronted Dotterel					
Bird	Charadriidae	Erythrocercus cinctus	Red-kneed Dotterel					
Bird	Charadriidae	Pluvialis fulva	Pacific Golden Plover	1	1			
Bird	Charadriidae	Pluvialis squatarola	Grey Plover	1	1			
Bird	Charadriidae	Vanellus miles miles	Masked Lapwing					
Bird	Ciconiidae	Ephippiorhynchus asiaticus	Black-necked Stork	LR/NT				
Bird	Climacteridae	Climacteris melanurus	Black-tailed Treecreeper					
Bird	Columbidae	Chalcophaps indica	Emerald Dove					
Bird	Columbidae	Columba livia	Rock Dove (feral Pigeon)					
Bird	Columbidae	Ducula bicolor	Pied Imperial Pigeon					

TYPE	FAMILYNAME	TAXONNAME	COMMONNAME	NT2002	EPBCA2002	IUCN2002	JAMBA	CAMBA
Bird	Columbidae	<i>Geopelia humeralis</i>	Bar-shouldered Dove					
Bird	Columbidae	<i>Geopelia striata</i>	Peaceful Dove					
Bird	Columbidae	<i>Phaps chalcoptera</i>	Common Bronzewing					
Bird	Columbidae	<i>Ptilinopus regina</i>	Rose-crowned Fruit-dove					
Bird	Coraciidae	<i>Eurystomus orientalis</i>	Dollarbird					
Bird	Corvidae	<i>Corvus orru</i>	Torresian Crow					
Bird	Cuculidae	<i>Cacomantis variolosus</i>	Brush Cuckoo					
Bird	Cuculidae	<i>Chrysococcyx basalis</i>	Horsfield's Bronze-Cuckoo					
Bird	Cuculidae	<i>Chrysococcyx minutillus</i>	Little Bronze-Cuckoo					
Bird	Cuculidae	<i>Chrysococcyx osculans</i>	Black-eared Cuckoo					
Bird	Cuculidae	<i>Cuculus pallidus</i>	Pallid Cuckoo					
Bird	Cuculidae	<i>Cuculus saturatus</i>	Oriental Cuckoo					
Bird	Cuculidae	<i>Eudynamys scolopacea</i>	Common Koel					
Bird	Dicaeidae	<i>Dicaeum hirundinaceum</i>	Mistletoebird					
Bird	Dicruridae	<i>Dicrurus bracteatus</i>	Spangled Drongo					
Bird	Dicruridae	<i>Grallina cyanoleuca</i>	Magpie-lark					
Bird	Dicruridae	<i>Myiagra alecto</i>	Shining Flycatcher					
Bird	Dicruridae	<i>Myiagra inquieta</i>	Restless Flycatcher					
Bird	Dicruridae	<i>Myiagra rubecula</i>	Leaden Flycatcher					
Bird	Dicruridae	<i>Myiagra ruficollis</i>	Broad-billed Flycatcher					
Bird	Dicruridae	<i>Rhipidura fuliginosa</i>	Grey Fantail					
Bird	Dicruridae	<i>Rhipidura leucophrys</i>	Willie Wagtail					
Bird	Dicruridae	<i>Rhipidura phasiana</i>	Mangrove Grey Fantail					
Bird	Dicruridae	<i>Rhipidura rufifrons</i>	Rufous Fantail					
Bird	Dicruridae	<i>Rhipidura rufiventris</i>	Northern Fantail					
Bird	Estrildidae	<i>Neochmia phaeton</i>	Crimson Finch					
Bird	Falconidae	<i>Falco berigora</i>	Brown Falcon					
Bird	Falconidae	<i>Falco cenchroides</i>	Nankeen Kestrel					
Bird	Falconidae	<i>Falco longipennis</i>	Australian Hobby					
Bird	Falconidae	<i>Falco peregrinus</i>	Peregrine Falcon					
Bird	Falconidae	<i>Falco subniger</i>	Black Falcon					
Bird	Glareolidae	<i>Glaoreola maldivarum</i>	Oriental Pratincole				1	1
Bird	Glareolidae	<i>Stiltia isabellina</i>	Australian Pratincole					
Bird	Gruidae	<i>Grus rubicunda</i>	Brolga					
Bird	Haematopodidae	<i>Haematopus longirostris</i>	Pied Oystercatcher					
Bird	Halcyonidae	<i>Dacelo leachii</i>	Blue-winged Kookaburra					
Bird	Halcyonidae	<i>Todiramphus chloris</i>	Collared Kingfisher					
Bird	Halcyonidae	<i>Todiramphus macleayii</i>	Forest Kingfisher					
Bird	Halcyonidae	<i>Todiramphus pyrrhopygia</i>	Red-backed Kingfisher					
Bird	Halcyonidae	<i>Todiramphus sanctus</i>	Sacred Kingfisher					
Bird	Hirundinidae	<i>Hirundo ariel</i>	Fairy Martin					
Bird	Hirundinidae	<i>Hirundo nigricans</i>	Tree Martin					
Bird	Jacanidae	<i>Irediparra gallinacea</i>	Comb-crested Jacana					
Bird	Laridae	<i>Chlidonias hybrida</i>	Whiskered Tern					
Bird	Laridae	<i>Chlidonias leucopterus</i>	White-winged Black Tern				1	1
Bird	Laridae	<i>Larus novaehollandiae</i>	Silver Gull					
Bird	Laridae	<i>Sterna albifrons</i>	Little Tern				1	1
Bird	Laridae	<i>Sterna bengalensis</i>	Lesser Crested Tern					
Bird	Laridae	<i>Sterna bergii</i>	Crested Tern					1
Bird	Laridae	<i>Sterna caspia</i>	Caspian Tern				1	1
Bird	Laridae	<i>Sterna nilotica</i>	Gull-billed Tern					
Bird	Maluridae	<i>Malurus melanocephalus cruentatus</i>	Red-backed Fairy-wren					
Bird	Megapodiidae	<i>Megapodius reinwardt</i>	Orange-footed Scrubfowl					
Bird	Meliphagidae	<i>Certhionyx variegatus</i>	Banded Honeyeater					
Bird	Meliphagidae	<i>Conopophila albogularis</i>	Rufous-banded Honeyeater					
Bird	Meliphagidae	<i>Conopophila rufogularis</i>	Rufous-throated Honeyeater					
Bird	Meliphagidae	<i>Entomyzon cyanotis</i>	Blue-faced Honeyeater					
Bird	Meliphagidae	<i>Lichenostomus unicolor</i>	White-gaped Honeyeater					
Bird	Meliphagidae	<i>Lichmera indistincta</i>	Brown Honeyeater					
Bird	Meliphagidae	<i>Manorina flavigula</i> [indeterminate]	Yellow-throated Miner					
Bird	Meliphagidae	<i>Melithreptus albogularis</i>	White-throated Honeyeater					
Bird	Meliphagidae	<i>Myzomela erythrocephala</i>	Red-headed Honeyeater					
Bird	Meliphagidae	<i>Myzomela obscura</i>	Dusky Honeyeater					
Bird	Meliphagidae	<i>Philemon argenteiceps</i>	Silver-crowned Friarbird					
Bird	Meliphagidae	<i>Philemon buceroides</i>	Helmeted Friarbird					
Bird	Meliphagidae	<i>Philemon citreogularis</i>	Little Friarbird					
Bird	Meliphagidae	<i>Ramsayornis fasciatus</i>	Bar-breasted Honeyeater					
Bird	Meropidae	<i>Merops ornatus</i>	Rainbow Bee-eater				1	
Bird	Motacillidae	<i>Anthus novaeseelandiae</i>	Richard's Pipit					
Bird	Oriolidae	<i>Oriolus flavocinctus</i>	Yellow Oriole					
Bird	Oriolidae	<i>Oriolus sagittatus</i>	Olive-backed Oriole					
Bird	Oriolidae	<i>Sphecotheres vieilloti ashbyi</i>	Australasian Figbird					
Bird	Otididae	<i>Ardeotis australis</i>	Australian Bustard		VU			
Bird	Pachycephalidae	<i>Colluricinclus harmonica</i>	Grey Shrike-thrush					
Bird	Pachycephalidae	<i>Colluricinclus megarhyncha</i>	Little Shrike-thrush					
Bird	Pachycephalidae	<i>Pachycephala lanioides</i>	White-breasted Whistler					
Bird	Pachycephalidae	<i>Pachycephala melanura</i>	Mangrove Golden Whistler					
Bird	Pachycephalidae	<i>Pachycephala rufiventris</i>	Rufous Whistler					
Bird	Pachycephalidae	<i>Pachycephala simplex</i>	Grey Whistler					
Bird	Pardalotidae	<i>Gerygone chloronota</i>	Green-backed Gerygone					
Bird	Pardalotidae	<i>Gerygone levigaster</i>	Mangrove Gerygone					
Bird	Pardalotidae	<i>Gerygone magnirostris</i>	Large-billed Gerygone					

TYPE	FAMILYNAME	TAXONNAME	COMMONNAME	NT2002	EPBCA2002	IUCN2002	JAMBA	CAMBA
Bird	Pardalotidae	Pardalotus striatus	Striated Pardalote					
Bird	Passeridae	Lonchura castaneothorax	Chestnut-breasted Mannikin					
Bird	Passeridae	Lonchura flavigrypha	Yellow-rumped Mannikin					
Bird	Passeridae	Poephila acuticauda	Long-tailed Finch					
Bird	Passeridae	Poephila personata	Masked Finch					
Bird	Passeridae	Taeniopygia bichenovii	Double-barred Finch					
Bird	Pelecanidae	Pelecanus conspicillatus	Australian Pelican					
Bird	Petroicidae	Eopsaltria pulverulenta	Mangrove Robin					
Bird	Petroicidae	Microeca flavigaster	Lemon-bellied Flycatcher					
Bird	Phalacrocoracidae	Phalacrocorax carbo	Great Cormorant					
Bird	Phalacrocoracidae	Phalacrocorax melanoleucos	Little Pied Cormorant					
Bird	Phalacrocoracidae	Phalacrocorax sulcirostris	Little Black Cormorant					
Bird	Phalacrocoracidae	Phalacrocorax varius	Pied Cormorant					
Bird	Phasianidae	Coturnix ypsilophora	Brown Quail					
Bird	Pittidae	Pitta iris	Rainbow Pitta					
Bird	Podargidae	Podargus strigoides	Tawny Frogmouth					
Bird	Podicipedidae	Tachybaptus novaehollandiae	Australasian Grebe					
Bird	Pomatostomidae	Pomatostomus temporalis	Grey-crowned Babbler					
Bird	Psittacidae	Aprosmictus erythropterus	Red-winged Parrot					
Bird	Psittacidae	Platycercus venustus	Northern Rosella					
Bird	Psittacidae	Psitteuteles versicolor	Varied Lorikeet					
Bird	Psittacidae	Trichoglossus haematocephalus	Rainbow Lorikeet					
Bird	Ptilonorhynchidae	Chlamydera nuchalis	Great Bowerbird					
Bird	Rallidae	Amaurornis olivaceus	Bush-hen					
Bird	Rallidae	Eulabeornis castaneoventris	Chestnut Rail					
Bird	Rallidae	Fulica atra	Eurasian Coot					
Bird	Rallidae	Gallirallus philippensis	Buff-banded Rail					
Bird	Rallidae	Porphyrio porphyrio	Purple Swamphen					
Bird	Rallidae	Porzana cinerea	White-browed Crake					
Bird	Recurvirostridae	Cladorhynchus leucocephalus	Banded Stilt					
Bird	Recurvirostridae	Himantopus himantopus	Black-winged Stilt					
Bird	Scolopacidae	Actitis hypoleucos	Common Sandpiper	1	1			
Bird	Scolopacidae	Arenaria interpres	Ruddy Turnstone	1	1			
Bird	Scolopacidae	Calidris acuminata	Sharp-tailed Sandpiper	1	1			
Bird	Scolopacidae	Calidris alba	Sanderling	1	1			
Bird	Scolopacidae	Calidris canutus	Red Knot	1	1			
Bird	Scolopacidae	Calidris ferruginea	Curlew Sandpiper	1	1			
Bird	Scolopacidae	Calidris melanotos	Pectoral Sandpiper	1	1			
Bird	Scolopacidae	Calidris ruficollis	Red-necked Stint	1	1			
Bird	Scolopacidae	Calidris tenuirostris	Great Knot	1	1			
Bird	Scolopacidae	Gallinago hardwickii	Latham's Snipe	DD				
Bird	Scolopacidae	Gallinago megala	Swinhoe's Snipe	DD				
Bird	Scolopacidae	Heteroscelus brevipes	Grey-tailed Tattler	1	1			
Bird	Scolopacidae	Limnodromus semipalmatus	Asian Dowitcher	DD	LR/NT			
Bird	Scolopacidae	Limosa lapponica	Bar-tailed Godwit	1	1			
Bird	Scolopacidae	Limosa limosa	Black-tailed Godwit	1	1			
Bird	Scolopacidae	Numenius madagascariensis	Eastern Curlew	LR/NT				
Bird	Scolopacidae	Numenius minutus	Little Curlew	1	1			
Bird	Scolopacidae	Numenius phaeopus	Whimbrel	1	1			
Bird	Scolopacidae	Tringa glareola	Wood Sandpiper	DD				
Bird	Scolopacidae	Tringa nebularia	Common Greenshank	1	1			
Bird	Scolopacidae	Tringa stagnatilis	Marsh Sandpiper	1	1			
Bird	Scolopacidae	Xenus cinereus	Terek Sandpiper	1	1			
Bird	Strigidae	Ninox connivens	Barking Owl					
Bird	Strigidae	Ninox novaeseelandiae	Southern Boobook					
Bird	Strigidae	Ninox rufa	Rufous Owl					
Bird	Sulidae	Sula leucogaster	Brown Booby	1	1			
Bird	Sylviidae	Acrocephalus stentoreus	Clamorous Reed-Warbler					
Bird	Sylviidae	Cisticola exilis	Golden-headed Cisticola					
Bird	Sylviidae	Cisticola juncidis	Zitting Cisticola					
Bird	Sylviidae	Megalurus timoriensis alisteri	Tawny Grassbird					
Bird	Threskiornithidae	Platalea regia	Royal Spoonbill					
Bird	Threskiornithidae	Plegadis falcinellus	Glossy Ibis	1	1			
Bird	Threskiornithidae	Threskiornis molucca	Australian White Ibis					
Bird	Threskiornithidae	Threskiornis spinicollis	Straw-necked Ibis					
Bird	Turnicidae	Turnix maculosa	Red-backed Button-quail					
Bird	Tytonidae	Tyto alba	Barn Owl					
Bird	Zosteropidae	Zosterops luteus	Yellow White-eye					
Frog	Hyliidae	Cyclorana australis	Giant Frog	DD				
Frog	Hyliidae	Cyclorana longipes	Long-footed Frog					
Frog	Hyliidae	Litoria bicolor	Northern Dwarf Tree-frog					
Frog	Hyliidae	Litoria caerulea	Green Tree-frog					
Frog	Hyliidae	Litoria dahlii	Dahl's Aquatic Frog					
Frog	Hyliidae	Litoria microbelos	Javelin Frog					
Frog	Hyliidae	Litoria nasuta	Rocket Frog					
Frog	Hyliidae	Litoria pallida	Pale Frog					
Frog	Hyliidae	Litoria rothii	Roth's Tree-frog					
Frog	Hyliidae	Litoria rubella	Red Tree-frog					
Frog	Myobatrachidae	Crinia bilinqua	Bilingual Froglet					
Frog	Myobatrachidae	Limnodynastes convexiusculus	Marbled Frog					
Mammal	Bovidae	Bubalus bubalis	Water Buffalo (feral)					
Mammal	Canidae	Canis familiaris	Dingo					

TYPE	FAMILYNAME	TAXONNAME	COMMONNAME	NT2002	EPBCA2002	IUCN2002	JAMBA	CAMBA
Mammal	Dasyuridae	<i>Dasyurus hallucatus</i>	Northern Quoll	VU		LR/NT		
Mammal	Dasyuridae	<i>Planigale maculata</i>	Common Planigale	DD				
Mammal	Emballonuridae	<i>Saccolaimus flaviventris</i>	Yellow-bellied Sheathtail Bat			LR/NT		
Mammal	Felidae	<i>Felis catus</i>	Cat (feral)					
Mammal	Macropodidae	<i>Macropus agilis</i>	Agile Wallaby					
Mammal	Macropodidae	<i>Macropus antilopinus</i>	Antilope Wallaroo					
Mammal	Molossidae	<i>Mormopterus loriae</i>	Little Northern Freetail-bat					
Mammal	Muridae	<i>Melomys burtoni</i>	Grassland Melomys					
Mammal	Muridae	<i>Mesembriomys gouldii</i>	Black-footed Tree-rat			LR/NT		
Mammal	Muridae	<i>Mus musculus</i>	House Mouse					
Mammal	Muridae	<i>Pseudomys delicatulus</i>	Delicate Mouse			LR/NT		
Mammal	Muridae	<i>Rattus colletti</i>	Dusky Rat					
Mammal	Muridae	<i>Rattus rattus</i>	Black Rat					
Mammal	Muridae	<i>Rattus tunneyi</i>	Pale Field-rat			LR/NT		
Mammal	Peramelidae	<i>Isoodon macrourus</i>	Northern Brown Bandicoot					
Mammal	Phalangeridae	<i>Trichosurus vulpecula arnhemensis</i>	Northern Brushtail Possum					
Mammal	Pteropodidae	<i>Macroglossus minimus</i>	Northern Blossom-bat					
Mammal	Pteropodidae	<i>Pteropus alecto</i>	Black Flying-fox					
Mammal	Pteropodidae	<i>Pteropus scapulatus</i>	Little Red Flying-fox					
Mammal	Suidae	<i>Sus scrofa</i>	Pig (feral)					
Mammal	Vespertilionidae	<i>Miniopterus schreibersii</i>	Common Bent-wing Bat			LR/NT		
Mammal	Vespertilionidae	<i>Myotis moluccarum</i>	Large-footed Myotis					
Mammal	Vespertilionidae	<i>Nyctophilus bifasciatus</i>	Eastern Long-eared Bat					
Reptile	Agamidae	<i>Chlamydosaurus kingii</i>	Frilled Lizard					
Reptile	Agamidae	<i>Diporiphora albifrons</i>	Diporiphora albifrons					
Reptile	Agamidae	<i>Diporiphora bilineata</i>	Two-Lined Dragon					
Reptile	Agamidae	<i>Lophognathus gilberti</i>	Gilberts Dragon					
Reptile	Agamidae	<i>Lophognathus temporalis</i>	Northern Water Dragon					
Reptile	Boidae	<i>Liasis childreni</i>	Children's Python					
Reptile	Boidae	<i>Liasis fuscus</i>	Water Python					
Reptile	Boidae	<i>Liasis olivaceus</i>	Olive Python					
Reptile	Boidae	<i>Morelia spilota</i>	Carpet Python					
Reptile	Chelidae	<i>Chelodina rugosa</i>	Northern Snake-Necked Turtle					
Reptile	Chelidae	<i>Emydoidea victoriae</i>	Red-Faced Turtle					
Reptile	Colubridae	<i>Boiga irregularis</i>	Brown Tree Snake					
Reptile	Colubridae	<i>Dendrelaphis punctulata</i>	Green Tree Snake					
Reptile	Colubridae	<i>Enhydris polylepis</i>	Macleay's Water Snake	DD				
Reptile	Colubridae	<i>Stegonotus cucullatus</i>	Slaty-Grey Snake					
Reptile	Colubridae	<i>Tropidonophis mairii</i>	Keelback or Freshwater Snake					
Reptile	Crocodylidae	<i>Crocodylus johnstoni</i>	Freshwater Crocodile					
Reptile	Crocodylidae	<i>Crocodylus porosus</i>	Estuarine or Salt-Water Crocodile					
Reptile	Elapidae	<i>Acanthophis praelongus</i>	Northern Death Adder					
Reptile	Elapidae	<i>Demansia atra</i>	Black Whip Snake	DD				
Reptile	Elapidae	<i>Demansia olivacea</i>	Olive Whip Snake	DD				
Reptile	Elapidae	<i>Demansia papuensis</i>	Papaun Whip Snake	DD				
Reptile	Elapidae	<i>Demansia torquata</i>	Collared Whip Snake	DD				
Reptile	Elapidae	<i>Furina ornata</i>	Orange-naped Snake					
Reptile	Elapidae	<i>Oxyuranus scutellatus</i>	Taipan	DD				
Reptile	Elapidae	<i>Pseudechis australis</i>	King Brown or Mulga Snake	DD				
Reptile	Elapidae	<i>Pseudonaja nuchalis</i>	Western Brown Snake or Gwarder	DD				
Reptile	Elapidae	<i>Rhinoplocephalus pallidiceps</i>	Northern Small-eyed Snake	DD				
Reptile	Elapidae	<i>Simoselaps semifasciatus</i>	Half -girdled Snake					
Reptile	Elapidae	<i>Vermicella multifasciata</i>	Northern Bandy Bandy	DD				
Reptile	Gekkonidae	<i>Diplodactylus villosus</i>	Spiny-tailed Gecko					
Reptile	Gekkonidae	<i>Gehyra australis</i>	Northern Della or House Gecko					
Reptile	Gekkonidae	<i>Hemidactylus frenatus</i>	Asian House Gecko					
Reptile	Gekkonidae	<i>Heteronotia binoei</i>	Bynoes Gecko					
Reptile	Gekkonidae	<i>Oedura lesuerrei</i>	Zig-zag Gecko					
Reptile	Hydrophiidae	<i>Hydrelaps darwiniensis</i>	Hydrelaps darwiniensis					
Reptile	Pegopodidae	<i>Pygopus nigriceps</i>	Hooded Scaly Foot					
Reptile	Pygopodidae	<i>Delma borea</i>	Delma borea					
Reptile	Pygopodidae	<i>Lialis burtonis</i>	Burtons Legless Lizard					
Reptile	Scincidae	<i>Carlia amax</i>	Two-Spined Rainbow Skink					
Reptile	Scincidae	<i>Carlia gracilis</i>	Slender Rainbow Skink					
Reptile	Scincidae	<i>Carlia munda</i>	Striped Rainbow Skink					
Reptile	Scincidae	<i>Carlia rufilatus</i>	Red-Sided Rainbow Skink					
Reptile	Scincidae	<i>Carlia triacantha</i>	Three-Spined Rainbow Skink					
Reptile	Scincidae	<i>Cryptoblepharus carnabyi</i>	Caranaby's Snake-Eyed Skink					
Reptile	Scincidae	<i>Cryptoblepharus plagioccephalus</i>	Aboreal Snake-Eyed Skink					
Reptile	Scincidae	<i>Ctenotus borealis</i>	Northern Ctenotus					
Reptile	Scincidae	<i>Ctenotus essingtoni</i>	Port Essington Ctenotus					
Reptile	Scincidae	<i>Ctenotus hillii</i>	Hill's Ctenotus
