PHILIPS

Highlights

Fingerprint authentication
Smart fingerprint authentication restricts your Philips mobile phone and data to be accessed only by you - using your unique fingerprint. All you need to do is to register your fingerprint via the phone's built-in fingerprint sensor. A quick swipe of your finger will verify the match and allow you exclusive use of your phone and its amazing functions and applications.

Secure privacy of your data
Your Philips mobile phone allows other users to access certain features, while securely protecting your data. With a few buttons click, you can permit commonly used functions - like call or receiving messages and files - to be used.

7.1 cm (2.8") AMOLED display
Experience crystal clear and vivid images like never before on your Philips mobile phone's AMOLED display. Everything looks amazing at night or even in direct sunlight. Plus, its 7.1 cm (2.8") screen lets you enjoy fluid, full-motion videos anytime, anywhere.

Up to 1 month standby time

The phone can be on and in standby mode continuously for up to 1 month on a single charge.

Up to 8 hours talk time

The phone can support up to 8 hours conversation on a single charge.

Dual SIM

Organize your life better and keep your contacts separate by using 2 different phone numbers. With Dual SIM, you don't need to carry 2 phones around.

5 MPixel AF camera with flash

Capturing memorable moments is as simple as point-and-shoot. A built-in flash allows you to capture clear, sharp images - even in dim lighting conditions.

RDS FM Radio
Enjoy quick and easy tuning to your favorite stations with Radio Data System (RDS) display, which shows the name of the station instead of frequency numbers. RDS also allows stations to transmit text messages and information directly to your radio display, so you can keep updated with news updates and radio promotions.

Bluetooth stereo music
Your Philips mobile phone supports A2DP Bluetooth Profile. It lets you enjoy your favorite tunes wirelessly and in high quality stereo music from your Bluetooth headphones.

MicroSD memory card slot
You can now enjoy extra capacity and storage of multimedia files by inserting a MicroSD memory card into the built-in memory card slot of your phone.

red dot design award 2010 winner
Product design award for mobile phone Perfect combination of western design philosophy with eastern culture elements.

Specifications

Dimensions
- Antenna: Integrated
- Form Factor: Clam shell
- Handset color: Whiterose
- Handset dimensions: 105.8*51.5*16.7mm
- Handset weight: 138g
