Illustration by Jonh Megahan.  
from: Mimulus evanescens (Scrophulariaceae): a new annual species from the northern Great Basin. (1995) Great Basin Naturalist, 55:251.

**Plant** annual, more or less succulent and glandular-puberulent except the calyces. **Stems** slender, 10-25 cm tall, mostly erect, simple or branched near the base. **Leaves** broadly lanceolate to ovate, lower leaves abruptly narrowed to a petiole, upper leaves sessile, margins entire or slightly denticulate. **Inflorescence** racemose, axillary flowers; calyx tube glabrous, cleft less than half its length, tube 5-angled or pleated, lobes triangular, acute and ciliate; corolla yellow, fused, 5-lobed, < 8 mm long; style forked with two flat stigmas. **Fruit** an included, sessile capsule, seeds ovoid, brownish.

### Lookalikes

*Erythranthe breviflora*

*Erythranthe latidens*

*Erythranthe floribunda*

### differs from featured plant by

its overall smaller size, narrowly lanceolate to rhombic-ovate leaves, upper and lower leaves petiolate.

its basal rosette, broadly ovate leaves, larger, whitish corolla, and clearly stipitate capsule.

its distinctly petiolate upper leaves and bilabiate corollas.

# *Erythranthe inflatula* (Suksd.) G.L. Nesom

Disappearing monkeyflower

PLANTS symbol: MIEV

August 2019 status Oregon:C; ORBIC: List 1

**Distribution:** Eastern Oregon, southwest Idaho and northeast California.

**Habitat:** Moist gravelly, rocky areas, and low, wet fields, in sagebrush-juniper zones.

**Elevation:** 1200-1700 m

**Best survey time (in flower):** Late May to late June

### Associated species:

*Artemisia tridentata* (Big sagebrush)

*Juniperus occidentalis* (Western juniper)

*Erythranthe floribunda* (Purple stemmed monkeyflower)

*Erythranthe suksdorfii* (Suksdorf's monkeyflower)

*Porterella carnosula* (Porterella)

*Collomia grandiflora* (Large flowered collomia)

*Collinsia parviflora* (Small flowered blue eyed Mary)

*Mimetanthe pilosa* (Downy monkeyflower)

*Heterocodon rariflorum* (Heterocodon)

*Poa bulbosa* (Bulbous bluegrass)

*Achnatherum hymenoides* (Indian ricegrass)
