RUDY
PROJECT

RIDETOZERO IS A TRULY NEW PHILOSOPHY THAT DIRECTS EVERY RUDY PROJECT ACTION. WE ARE A COMPANY WITH SPORT IN OUR DNA AND WE ARE AWARE THAT CLIMATE CHANGE CREATES NEW CHALLENGES THAT MUST BE FACED. OUR ULTIMATE GOAL IS TO SAVE OUR ENDANGERED ENVIRONMENT, THE VITAL ELEMENT TO LIVE AND TO FULFILL OUR INNATE PASSION FOR SPORTS. FOR THIS REASON, WE HAVE EMBRACED THE RIDETOZERO PHILOSOPHY AND WE ARE COMMITTED TO MINIMIZE THE ENVIRONMENTAL IMPACT OF RUDY PROJECT PRODUCTS, DESIGN AND ORGANIZATIONAL PROCESSES.

kelion ■

Unleash your potential with Rudy Project Kelion sunglasses! Eco-friendly, stylish, & tailored for athletes, especially bikers. Experience crystal-clear vision, custom fit, fog-free lenses, & unstoppable performance. Elevate your game with Kelion today!

astral ■

Affordable, comfy, sustainable & ultra-lightweight at 25g! Astral sunglasses offer cutting-edge tech, adjustable fit, eco-friendly frames & trendy lenses. Experience unmatched eyewear performance & style!

sirius ■

Affordable, innovative eyewear, ideal for prescription wearers. Customizable features, sustainable materials, and exceptional comfort meet wallet-friendly pricing. Boost your look with Sirius now!

stellar ■

The ultimate blend of sport tech & style for your active life. Perfect for city strolls, beach volleyball, commuting & more. Lightweight, durable, with polarized lenses & UV protection. Your active style statement gets a boost.

nytron pro ■

Get ready to redefine your cycling experience with our new Nytron Pro! Born from intensive wind tunnel testing, this helmet enhances aerodynamic performance by an impressive 2 Watts compared to its predecessor, the Nytron. Tailored for road cyclists, it offers the perfect balance between high-speed efficiency and ventilation, with only a minor 11% reduction in the latter. Discover the perfect blend of comfort and performance with the Nytron Pro - where advanced technology meets real-world cycling needs.

responsible sport eyewear

R&D FOR REDUCED ENVIRONMENTAL FOOTPRINTS

Drawing from Rudy Project's years of experience in research and development for product improvement, we are now focusing on using that knowledge to lower the emissions of our products, making a strong effort towards better environmental sustainability.

RILSAN CLEAR is available only on Kelion, Sirius, Astral, Stellar, Magnus, Deltabeat, Overlap, Lightflow, Pulse, Stardash.

RESPONSIBLE FRAME MATERIALS

In our pursuit of "Frame Materials" innovation, we are expanding the use of Rilsan Clear, a bio-plastic derived from 45% castor oil grown by certified farmers in Gujarat, India, who adopt improved farm waste management practices. This environmentally conscious material enables us to reduce our reliance on fossil-based materials for eyewear frames, aligning with our commitment to sustainable and responsible manufacturing. Rilsan Clear is available on a selection of Rudy Project frames; please consult the product information sheets for further details.

MAXIMUM DURABILITY

Rudy Project's exceptional durability sets them apart as a sustainable choice; their long-lasting performance ensures a sound investment in the future, reducing the need to purchase additional eyewear and conserving energy in production. Designed to withstand the most extreme weather conditions, these glasses truly embody the ultimate in lasting quality and eco-conscious design.

TIMELESS DESIGN

Rudy Project's "timeless design" encapsulates an enduring appeal, as their eyewear effortlessly melds Italian style with sporty functionality, resulting in a fashionable yet elegant aesthetic. This evergreen approach ensures that Rudy Project glasses remain perpetually in vogue, transcending fleeting trends while retaining their sophisticated charm.

VERSATILITY

Rudy Project's "versatility" lies in the elegant design of their eyewear, making them ideal for a wide range of sports disciplines, as well as for commuting or strolling through the city. This adaptability ensures both style and functionality, offering a seamless blend of performance and sophistication suitable for diverse activities and environments.

LOW-IMPACT PACKAGING SOLUTIONS

Embracing "Eco Packaging," we have streamlined our approach to minimize waste and unnecessary materials. By eliminating plastic laminations from our paper products, utilizing recycled plastic for our eyewear cases, and eradicating single-use plastic, we are dedicated to fostering a more environmentally responsible packaging solution.

LONG TERM PRODUCT ASSISTANCE

We offer extended support (as a paid service beyond warranty terms) to extend the life of eyewear by replacing scratched lenses or worn-out components. This commitment ensures our customers can maintain and enjoy their Rudy Project glasses for years to come, promoting both sustainability and customer satisfaction.

3 GOOD HEALTH AND WELL-BEING

We promote sports as a key element to ensuring a healthy lifestyle, and promote well-being for everyone of all age

Our products help enhance sports performance because of our relentless pursuit of superior comfort, safety, and aerodynamics

We promote environmental protection because our planet is the playground for outdoor sports

5 GENDER EQUALITY

We design and promote specific gender products

50% of our employees are male and 50% are females

50% of our managers are male and 50% are females

We provide for parentale leave

Flexibility on working time

7 AFFORDABLE AND CLEAN ENERGY

We produce a share of our electric energy with solar panels

We offset our carbon emissions by financing reforestation projects

We are committed to reducing waste by raising awareness among all our stakeholders

8 DECENT WORK AND ECONOMIC GROWTH

We are working to make the workplace more inclusive through more transparent and holistic internal communication

We train our employees to improve their safety and professional skills according to their own talents

We support our local economy by manufacturing 100% of Rudy Project glasses in Italy

We contribute to our employees' social welfare

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

We invest in environmentally sustainable product innovation to deliver better performance

We are hiring more people who live closer to the company headquarters to reduce travel emissions

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

Rudy Project sunglasses are designed to last through the use of high-quality manufacturing materials

We are incrementally moving toward bio-based plastics in sunglass frame production

Our Research and Design department is working to make products easier to disassemble and recycle at the end of their life cycles

Sunglass packaging is recyclable and partly manufactured from recyclable sources

We are committed to separating waste and recycling materials as much as possible

POLAR 3FX HDR

Polar3FX HDR technology eliminates glare providing superior visual comfort, enhanced contrast and contours. In addition, the new Polar3FX lenses incorporate the HDR (high dynamic range) filter to further define contrast and color perception.

p.23 for further informations

RP OPTICS

RP Optics lenses protect against harmful UV rays up to 400 nm and offer a range of over 30 available colors. Ideal for athletes and weekend warriors who demand performance but accept no compromise when it comes to appearance.

p.25 for further informations

BUILDING ON THE SUCCESS OF IMPACTX® TECHNOLOGY AND FOLLOWING YEARS OF EXTENSIVE LABORATORY RESEARCH AND FIELD TESTS WITH PROFESSIONAL ATHLETES, RUDY PROJECT PROUDLY UNVEILS IMPACTX® 2, A BREAKTHROUGH COLLECTION OF TECHNICAL LENSES. THESE LENSES BOAST EXCEPTIONAL PHOTOCHROMIC PROPERTIES, UTILIZING CUTTING-EDGE PARTICLES FOR UNMATCHED CLIMATIC MANAGEMENT TECHNOLOGY.

IMPACTX® 2 LENSES ADAPT RAPIDLY, TRANSITIONING FROM LOW TO HIGH LIGHT TRANSMISSION IN JUST A FEW SECONDS. THEY CAN ALSO BE TAILORED TO ACHIEVE A CUSTOM COLOR FROM AN INITIALLY CLEAR STATE. THIS REMARKABLE FEATURE ENHANCES CONTRAST, EVEN IN DARKER CONDITIONS, IMPROVING VISUAL ACUITY AND DEPTH PERCEPTION FOR A SUPERIOR VIEWING EXPERIENCE.

IN ADDITION TO THEIR OUTSTANDING VISUAL PERFORMANCE, IMPACTX® 2 LENSES PROVIDE UNPARALLELED EYE PROTECTION. THEY SHIELD THE EYES FROM HARMFUL ELEMENTS, ENSURING SAFETY AND COMFORT DURING VARIOUS OUTDOOR ACTIVITIES. RUDY PROJECT'S COMMITMENT TO INNOVATION AND EXCELLENCE IS EVIDENT IN IMPACTX® 2, OFFERING ATHLETES AND OUTDOOR ENTHUSIASTS THE PERFECT COMBINATION OF ADVANCED TECHNOLOGY, FUNCTIONALITY, AND STYLE.

ImpactX technology

impactx[®]

UNBREAKABLE PHOTOCHROMIC OPTIC

GUARANTEED | UNBREAKABLE FOR LIFE

Experience the unbeatable durability of ImpactX® lenses, exclusively designed for Rudy Project. These semi-rigid lenses provide ultimate eye protection against impacts, chemicals, and atmospheric elements while minimizing injury risks. Ideal for sports enthusiasts seeking enhanced safety and performance.

PHOTOCHROMIC | TECHNOLOGY

ImpactX photochromic lenses by Rudy Project offer seamless adaptation to lighting conditions, ensuring perfect visibility and protection. With quick responsiveness, unmatched durability, and complete UV protection, these lenses are ideal for sports enthusiasts and outdoor adventurers.

ULTIMATE | CLARITY

ImpactX® lenses outperform polycarbonate with a lower refraction index, reduced internal stress, and lower chromatic dispersion, providing higher definition and sharper images. The minimized surface reflection and "rainbow effect" deliver a superior visual experience for sports and outdoor enthusiasts.

LIGHTWEIGHT

ImpactX® lenses excel in performance, being 16% lighter than CR-39 and 10% lighter than polycarbonate. With lower internal stress and chromatic dispersion, these lenses provide sharper images, higher definition, and reduced "rainbowing" for enhanced visual comfort. Experience state-of-the-art photochromic and polarized technology for exceptional weather management and a superior eye-wear experience.

polar 3fx HDR | technology.

The POLAR 3FX lenses features the HDR filter which is fine tuned to maximize your safety by improving contrast in urban, mountain and road bike environments.

The result is bright and comfortable vision, sharper details perception and brighter colors with considerable reduction in eye fatigue. The POLAR 3FX Multilaser lenses are available in a vast array of colors allowing to benefit from they superior visual comfort and to choose the color which best suits for your style.

Our POLAR 3FX technology protects your eyes from harmful UV rays and eliminates glare by selectively filtering non harmful wavelenghts through the lens. POLAR 3FX technology is designed to filter glare from car headlights, sun rays and the refracted light on wet or shiny surfaces like water and snow.

HDR TECHNOLOGY

The HDR filter is designed to boost your color experience by tuning the wavelength of the light passing through the lens. By actively refining the intensity of various wavelenghts of light and by optimizing the visible, the HDR filter provides extraordinary visual performance. In addition to a maximized chromatic range, benefits include superior perception, sharper image and unparalleled contrast definition.

3FX COATINGS

This state-of-the-art coating has been developed to make Polar3FX lenses tougher and more durable. The 3FX coating is a hydrophobic barrier which minimizes the formation of smudges. This treatment is designed to enable water slipping on the surface, to prevent stains and fingerprints and to make cleaning easier.

Hydro / Oleo treatment

Easy cleaning

Preventing stain and fingerprints

rp optics
technology ■

For particular light conditions, Rudy Project offers technically advanced specialty lenses with high visual quality tailored to your needs. The various lenses enable you to perform and excel in any light or atmospheric condition you may encounter. RP Optics is a design philosophy that aims to improve visual performance and eye protection by means of selective lenses with high optical and mechanical performance, combined with the most advanced technologies and scientific applications. Our lens program has features common to every type of lens, such as neutralizing ultraviolet radiation completely up to 400 nm (UV 400 Protection), and maintains colors integrity even with the dark filters. We believe it is not enough to protect the eyes from hazardous radiation and external agents. It also important to enhance visual acuity and minimize distortion, while offering high quality optics suitable for sports. In some extreme conditions an athlete must rely on technologies to enhance performance and minimize distractions. For this reason, we have expanded the range of filters with specific treatments including antifog, hydrophobic, and photochromic technology.

ALWAYS AT THE FOREFRONT OF TECHNOLOGY, OUR LENSES GUARANTEE VISUAL ACUITY AND PHYSICAL PROTECTION OF THE EYE. HIGH VISUAL QUALITY LENSES HAVE THE FOLLOWING PROPERTIES/BENEFITS:

• reduce glare / enhance contrast

• protect from ultraviolet rays

• protect against external agents.

• ensure true vision without distortion of colors

THIS TABLE ILLUSTRATES THE STANDARDS OF LUMINOUS TRANSMITTANCE OF ALL THE RP OPTICS LENSES. THE VALUES SLIGHTLY VARY FROM THE BENCHMARK SHOWN IN THE TABLE ACCORDING TO THE LENS MODEL. PLEASE REFER TO THE PACKAGING LABEL FOR THE EXACT FIGURES.

rp optics collection lens

RUDY PROJECT SUNGLASSES ARE LOADED WITH FEATURES THAT MAXIMIZE YOUR COMFORT AND PERFORMANCE. HERE IS A LIST OF TECHNICAL SOLUTIONS THAT MAKE OUR SUNGLASSES THE BEST-IN-THE-WORLD. ON EVERY PRODUCT PAGE OF THE CATALOGUE YOU WILL FIND ICONS THAT REPRESENT THESE FEATURES.

technology features ■

ADAPTIVE TIPS

The Adaptive Tips system is designed to ensure maximum comfort : thanks to its interior bendable stainless steel, the front portion of the tip can be very easily adjusted and the rear portion of the tip naturally flexes without hurting the riders' head when inserted through the helmet vents

ADJUSTABLE NOSEPIECE

Our soft adjustable nose pads offer an exceptional custom fit for any shape of face

ADJUSTABLE TEMPLE

Adjustable temples ensures a fully custom and a perfect grip maximizing the stability of the sunglasses.

COMPRESSION FIT

The wraparound geometry of the Rudy Project performance eyewear delivers a natural compression fit without applying too much pressure on the head increasing comfort and stability

INTERCHANGEABLE BUMPER

The bumpers are colorful rubber inserts placed on the lower edge of the lens and designed to maximize your safety in the event of crash

COUNTER MASK

The vented and padded full-face counter mask provides additional protection from wind and atmospheric elements increasing the safety of the eyes area.

QUICK CHANGE

The Quick Change feature allows you to easily and swiftly change out lenses to manage any light condition and choose the look that suits you best

ELASTIC STRAP

The elastic strap with included head lock is essential to secure your eyewear and retain it while wearing a helmet

TOTAL COMFORT FIT

Featuring ergonomic design, complete adjustability, multiple sizes and smart comfort solutions, our eyewear ensure unparalleled comfort and fit with the physical features of each ethnic group.

VENT CONTROLLER

Rudy Project vent controller is designed to adjust the airflow through the lens to reduce thermal shock, prevent misting, and ensure perfect vision and comfortable ventilation.

PERIPHERAL SHIELDS

The peripheral shields are removable rubber inserts which enhance protection from side light and shocks caused by eventual falls or impacts with rocks or branches.

POWERFLOW

The Power Flow ventilation system reduces the risk of fogging thanks to venting scientifically located on the frame, lens, and temple tips.

RX-ABLE

Most of our models offer prescription solutions to always ensure the best standard of performance for all prescription wearers.

SAFETY PROJECT

Rudy Project eyewear provide superior safety through integrated hinges and soft, thermoplastic elastomers which prevent injuries in the event of falls, impact and collisions.

RILSAN

RILSAN® material is used for injecting frame, made from the oil of the castor bean grown in the Gujarat region of India. The oil is further refined during several steps to produce the primary bio-based raw material in the polymer.

performance eyewear ■

Rudy Project equipment is thoughtfully designed to provide athletes with a competitive advantage in training and racing. Our lens quality is unmatched, thanks to technologies that ensure superior clarity and safety for all sports and conditions. Our frames are lightweight, ventilated, and adjustable, which allows for maximum comfort and customization of fit.

Transparent Z87+/EN166
SP 25 11 42 - GRDO

CERTIFIED Z87.1+ / EN 166:2001

P.P.E CERTIFIED CATEGORY 2

All Rudy Project protective glasses are PPE certified in compliance with the EN 166:2001 Standard on eye protection. Agent Q Guard Tralyx Guard and Intron are both category 2 PPE. The PPE eyewear meets also the ANZI Z87+ standards passing the high mass impact and high velocity impact tests ensuring further protection

INTERCHANGEABLE RETAINER

Tralyx Guard features an interchangeable retainer with head lock included to keep your spectacles safe.

EASY CLEANING

Our PPE collection sunglasses are easy to sanitize with warm water, mild soap or with a hydrogen peroxide solution at 0.5%.

WATER AND CHEMICAL RESISTANCE

The Grilamid frame of the Rudy Project glasses is well suited to cleaning and sterilization. Thanks to its high chemical resistance this material can be cleaning and sanitize several times without being damaged.

LIGHTNESS AND DURABILITY

Benefiting from the Grilamid frame and its ergonomic design, all the Rudy Project PPE glasses are extremely comfy without exerting any pressure on the skull.

SHIELD PROTECTIVE LENSES

All the PPE eyewear feature specific lens geometry to maximize the protection of the eyes area. The PPE eyewear lenses are more deep and wraparound compared to the traditional lens shapes. The transparent polycarbonate lenses benefit from the RP Optics qualities such as sharp vision and high resistance.

COMFORT AND STABILITY

Drawing from the Rudy Project performance features, our PPE frames feature soft rubber adjustable temple tips and nose pads to offer maximum comfort, stability and adjustability.

PPE CATEGORY 2

PPE Cat. 2 eyewear is designed to be worn or held by an individual for protection against one or more health and safety hazards. Each eye protection equipment (PPE) used for work-related purposes must at least be classified as category 2 in compliance with the Standard UNI EN 166:2001. Therefore, for this kind of glasses, third-part testing is mandatory.

SPLASH AND LIQUID DROPLET PROTECTION

Agent Q ensures a superior level of protection because it meets the requirements of the UNI EN 166:2001 (PPE category 2) and the additional standard of splash and liquid droplets protection in compliance with the specific testing procedure of the UNI EN 168:2001 (point 12).

WHAT IS Z87.1

ANSI Z87.1 is the American National Standard that covers the basic requirements for personal eye and face protective devices to minimize or prevent injuries from impacts, non-ionizing radiation and chemical agents in occupational, educational and military environments. This Standard sets criteria related to the description, general requirements, testing, marking, selection, care and use of these protectors.

+ is an additional requirement of ANSI Z87.1 standard which provides more strict and severe impact tests:

Penetration (1.56 oz – 44.2 gm / 50 in – 127 cm)
High Mass Impact (17.6 oz – 500 gr / 50 in – 127 cm)

High Velocity Impact resistance (150 ft/s – 46 m/s).

active lifestyle ■

Rudy Project's Active Lifestyle collection weaves a spectrum of colors and inspirational designs into our DNA of premium sports performance. Developed around style and comfort, this collection optimizes optical clarity, thanks also to our POLAR 3FX and HDR technologies.

rxloptical ■

Rudy Project prioritizes optical clarity and coverage when developing RX optical eyewear for athletes. We offer a wide range of optical solutions for athletes. The process begins with understanding the specific demands of the athlete to create the most technologically advanced eyewear in the world.

rx solutions.

rx direct

THE ULTIMATE OPTION

- the world's most advanced digital surface lenses
- fully personalised
- Maximum impact resistance
- Stylish wraparound design
- Superior eye comfort (absence of distortions)
- photochromic or polarized lenses

rx inserts

THE VALUE OPTION

- Easy to mount and interchangeable
- Perfect for lower budgets
- Allows opticians to edge prescription lenses in the office
- Available on all performance models
- Perfect for contact lens wearers

rx optical dock

THE HIGH CORRECTION SPORT OPTION

- Easy to mount and interchangeable
- Perfect for sport high prescriptions
- Available in our top selling performance models
- allows opticians to edge prescription lenses in the office
- full rim interchangeable design
- built to last

rx direct clips

THE UTILITY OPTION

- Easy to mount and interchangeable allows opticians to edge prescription lenses in the office
- Perfect for high prescriptions
- Ideal for contact lens wearers who want another option for when eyes become irritated
- High versatility of interchangeable clear and sun RX lenses in the same frame
- Adapts perfectly to different contexts

rx readers

THE INTEGRATED READING OPTION

- Perfect for people with presbyopic correction needs
- Helps to read - maps, smart/mobile devices, hear rate monitors, score cards, etc..
- PC bifocal lenses available in 3 powers and 3 vibrant multilayer colours

rx flip-up

THE VERSATILE OPTION

- Perfect for high prescriptions and versatile sun protection
- Allows instant control over light transmission
- Designed for sport but ideal for any occasion
- Driving friendly
- Allows opticians to edge prescription lenses in the office

rx ophthalmic

THE PRESCRIPTION OPTION

- Inspired from our performance models features but with the casual touch
- Allows opticians to edge prescription lenses in the office

Offering freeform single vision and progressive lens design for performance sport wraps, ImpactRX® is the world's most advanced digital back surface lens program, fully personalized for your lifestyle. We've combined a revolutionary lens material with the best wrap design to create the best prescription sports lens in the world! Now available in many superlative platforms. For more information please contact your country official Rudy Project distributor (<http://www.rudyproject.com/customer-service/distributors/>) or send an email to rudyrx@rudyproject.com to receive your personal web credentials. Once activated you can immediately place orders.

WARNING The content of this catalog section is dedicated exclusively to opticians and qualified healthcare operators. RP optics high index.

OUR 1.6 ENTRY MATERIAL OF CHOICE FOR PATIENTS WITH HIGH PRESCRIPTIONS, OR WHEN LENS THICKNESS CONSIDERATION IS ESSENTIAL

Rudy Project created a new and innovative Hybrid material, dedicated to patients with stronger prescriptions: the ImpactRx High Index combines the best attributes of High Index, such as its extraordinary thinness, to the comfort of ImpactRX, offering strength and durability.

Main features include:

- LOWER DENSITY TO PROVIDE LIGHTER LENSES AND INCREASED COMFORT
- ENHANCED IMPACT RESISTANCE (UP TO 5 TIMES WHEN COMPARED TO OUR PREVIOUS HI-1.6 MATERIAL)
- IMPROVED COSMETIC FOR WRAP LENSES
- THINNER THAN COMMON HIGH INDEX 1.60 MATERIALS (UP TO 5%)

TECHNICAL FEATURES Density gr/cm3 1,23- Refractive index 1,60 - Abbe Number 41 - UV Cutout 400 - Absorption 100% UVA UVB

diamond coat

WHAT IS DIAMOND COAT? Diamond Coat is an exceptional and powerful multi-layer coating engineered to eliminate lens glare, ghost images and halos from bright light or back reflections while offering a cleaner vision by preventing dust, water drops, scratches and finger marks on the lens. Perfect for outdoor action and dusty environments, Diamond Coat will keep lenses sparkling and easy to clean. It will ensure a better comfort while providing outstanding lens durability.

The Rudy Project Diamond Coat is a superior treatment resulting from extensive research and provides the following features:

- anti-static layer against dust and impurities
- anti-reflection coating, cutting lens glare, ghosts and halos resulting from bright light
- enhanced protection against finger marks
- superior hydrophobic layers against water drops
- outstanding scratch protection, ensuring lens durability

polar 3FX 1.59.

WHAT IS POLAR 3FX?

POLARIZED LENSES effectively block reflected glare, a situation which occurs primarily near water or snow or off reflective surfaces nearby, such as car windows, metallic objects, etc. Light which strikes a horizontal reflective surface is reflected back into your eyes. You then get a "double dose" of light energy, some of which falls directly on to you and some that is reflected on to you. Polarized lenses offer an interesting advantage: because they dramatically reduce or eliminate the reflected light energy which might account for the majority of the annoying glare, you can use a lighter tint to achieve the same (or better) degree of glare reduction and comfort compared to non-polarized dark lenses.

PATENTED 3FX POLARIZED TECHNOLOGY

POLAR3FX coatings offer:

- Advanced visual acuity, depth of field perception, chromatic partitioning.
- Minimizes annoying staining and smudging for clean, unobstructed vision all the time.
- Highly scratch resistant.
- A unique and sophisticated fashionable look.

DIAMOND COAT INCLUDED

Rudy Project's unique multi-layer process provides excellent visual acuity and eliminates annoying back glare that causes eye strain and eye fatigue in bright light conditions. Reduced hue and ambient reflections.

POLAR 3FX [1.59]

TECHNICAL FEATURES Density gr/cm3 1,20- Refractive index 1,59 - Abbe Number 31 - UV Cutout 385 - Absorption 100% UVA UVB

ANTI-REFLECTION COATING

Lenses with higher indices also reflect more than standard plastic and glass. Because of this, anti-reflective coating is especially important. Additional reflections will be distracting in day to day activities such as night driving and computer use. Impurities, water drops, dust, scratches will heavily influence the comfort of high index lenses, for these reasons, Rudy Project offers diamond coat, our new premium coating.

ATTENTION

For its highly engineered vision solution using extremely sophisticated edging equipments, all models of the ImpactRX and ImpactRX High Index collection are mounted and shipped directly and exclusively through our own laboratories according to selected sunwear geometry and original patient's prescription formula.

POLAR 3FX [1.59] HDR

After years of intense research, we have updated our Polar3FX technology to take your vision to the next level. Polar3FX HDR technology eliminates glare providing superior visual comfort, enhanced contrast and contours. In addition, the new Polar3FX lenses incorporate the HDR (high dynamic range) filter to further define contrast and color perception. To ensure maximum toughness and durability, we have boosted the Polar 3FX lenses with the revolutionary 3FX Coating anti smudge and anti aging treatment.

rx optical inserts

Rudy Project has developed RX inserts that can be easily attached behind the polycarbonate lenses. Our 'easy-in easy-out' system allows for effortless insertion and removal of Clip-ons, making them convenient when you want to wear contact lenses or clean your glasses.

1. If the template is unavailable, use the demo (or plano lens) as a reference for cutting the ophthalmic lenses.
2. Properly shape the clip according to the glasses model before installation. After setting it, determine the fit parameters (PD and H) and make final adjustments when mounting progressive lenses.
3. Be sure to note your references for the true horizontal axis before removing the clip to fit ophthalmic lenses.
4. Keep in mind that the vertex distance is reduced when using an Optical RX insert, and this should be considered before mounting ophthalmic lenses.
5. The winding angle of the RX Optical Insert may vary based on the eyewear's design and geometry. It is usually much higher than that of regular dress eyewear, leading to horizontal prismatic deviation, which increases with lens power. Rudy Project generally recommends applying a horizontal shift of +1.00 mm per eye for negative correction and -1.00 mm per eye for positive correction.
6. For spherical lens values greater than +/- 3:00 diopters and considering the high wrap of Rudy Project frames, make necessary adjustments to accommodate the required horizontal prismatic compensation and reduced vertex distance.
7. Always verify the lens centering on the clip when it's inside the frame before mounting ophthalmic lenses. Avoid mounting prescriptions on clips without a frame.
8. To achieve the best results when mounting lenses on the clip, Rudy Project recommends referring to the patient's regular dress eyewear. This will ensure a quicker and easier adaptation to the new device.
9. Rudy Project advises using ophthalmic lenses with spherical geometry. For optimal performance, consider mounting lenses specifically designed for wraparound frames.

The FR70 RX Optical Insert comes now standard with 3 pairs of proprietary shock absorber stickers; made out of a special polymer they will minimize scratches and vibrations resulting from the insert/correction lenses against the inner surface of the sun/plano lenses. To be mounted on the far edge of each prescription lens of the insert.

dock

**INTRODUCING THE ENHANCED HIGH-CORRECTION SPORTS OPTION
EXCEPTIONAL FUNCTIONALITY - OPTIMAL VALUE - STREAMLINED STYLE**

Following years of meticulous research, we've revamped our Optical Dock, one of Rudy Project's most versatile and sought-after sports eyewear solutions, to offer prescription wearers an even more seamless and sophisticated option. The full-rim optical interface boasts a sleek design and broader shape, skillfully blending style with the remarkable adaptability and user-friendliness of the Optical Dock platform. Furthermore, it extends the prescription range for higher correction levels.

The Optical Dock 2 is an effortlessly RX-adaptable 6-Base full-rim clip crafted from a sturdy yet flexible polymer, compatible with any lens material, including entry-level edging processes. Its innovative shape provides an expanded field of view and accommodates a wider variety of prescriptions (both standard and progressive), enabling the correction of vision for higher and more intricate levels in a sleek and integrated package.

Featuring interchangeable clips, the Optical Dock 2 is simple to install, courtesy of a proprietary screwless system, and is fully compatible with our award-winning 'Rydon' model. This cutting-edge solution is ideal for patients requiring significant vision correction who also desire the design, technology, and comfort of Rudy Project sunglasses. It provides opticians with increased flexibility in handling, while offering cost-effective solutions to customers.

rx direct clips ■

WE ARE THRILLED TO ANNOUNCE THE LATEST ADDITION TO THE RUDY PROJECT FAMILY: OUR INNOVATIVE “DIRECT CLIPS” LINE, DESIGNED SPECIFICALLY FOR CONTACT LENS WEARERS WHO FACE CHALLENGES DURING SPORTS ACTIVITIES OR THOSE WHO REQUIRE A MORE BUDGET-FRIENDLY ALTERNATIVE TO PRESCRIPTION SPORTS SUN LENSES LIKE IMPACTRX. THE DIRECT CLIPS SYSTEM IS A GAME-CHANGER IN THE WORLD OF EYEWEAR, OFFERING A VERSATILE AND COST-EFFECTIVE SOLUTION TO YOUR CUSTOMERS’ VISION NEEDS.

With Rudy Project’s RX Direct Clips, you can now provide your customers with the convenience of quickly and effortlessly edging prescription lenses right in your office, eliminating the need for complex cutting machines. Our patented smart mounting system allows for easy removal and attachment, making it a breeze for customers to switch between clear and sun RX lenses in the same frame.

Key features of the Direct Clips line include:

- Ease of use: The smart mounting system allows opticians to easily edge prescription lenses in the office, saving time and resources.
- Versatility: Interchangeable clear and sun RX lenses provide customers with the flexibility to adapt their eyewear to various light conditions and activities.
- Budget-friendly: Direct Clips offer a more affordable alternative for customers who are unable to invest in premium prescription sports sun lenses like ImpactRX.
- Ideal for sensitive eyes: Perfect for contact lens wearers who experience irritation during sports practice or other outdoor activities.

By choosing Rudy Project’s Direct Clips for your optical practice, you are not only offering your customers a superior eyewear solution but also enhancing their overall experience. This innovative product is sure to set your business apart from the competition and solidify your reputation as a cutting-edge eyewear provider.

Don’t miss out on the opportunity to revolutionize your customers’ eyewear experience with the Rudy Project Direct Clips line. For more information or to place an order, please contact our dedicated sales team today.

rx readers

Introducing the groundbreaking "Readers" eyewear line from Rudy Project, specifically designed for athletes who see well from a distance but struggle up close when reading bike computers, watches, or newspapers. The all-new RX Readers sunglasses are crafted for sports enthusiasts who require minor vision adjustments without sacrificing style or functionality.

These sport reader prescription lenses are seamlessly integrated into the lower part of the RP Optics sun lens, making it easy for you to read maps or view screens on devices like mobile phones, GPS systems, cycle-computers, and heart rate monitors. The RX Readers offer three configurations of prescription lenses: Smoke, Multilaser Ice, and Multilaser Red. Each of these lenses enhances glare protection while also elevating your aesthetic appearance.

Choose from three different correction powers for each lens color: +1.5, +2.0, and +2.5. With the Rudy Project "Readers" sunglasses, you can confidently and comfortably tackle your favorite sports activities, knowing that you have the perfect combination of style, functionality, and vision support.

flip-up ■

INTRODUCING RUDY PROJECT'S INNOVATIVE "FLIP-UP" EYEWEAR LINE, SPECIFICALLY DESIGNED FOR ATHLETES AND SPORTS ENTHUSIASTS WHO REQUIRE PRESCRIPTION GLASSES. OUR FLIP-UP GLASSES COMBINE THE VERSATILITY OF PERFORMANCE EYEWEAR WITH THE CONVENIENCE OF A UNIQUE FLIP-UP LENS SYSTEM, ALLOWING YOU TO ADAPT SEAMLESSLY TO SUDDEN CHANGES IN LIGHT CONDITIONS.

Equipped with Quick Change Interchangeable Lens Technology, our Flip-up glasses empower players and athletes to effortlessly manage varying light conditions on the field, on the bike, or on the green. This advanced lens system is perfect for sports where quick visual adjustments are crucial, such as baseball, biathlon, golf, shooting, and archery.

Our revolutionary flip-up mechanism allows you to swiftly lift the additional lenses in case of a sudden decrease in light or remove them entirely to maintain only the prescription glasses. This adaptability helps eliminate fogging and ensures optimal visual clarity for a winning performance.

The Rx insert is designed to accommodate a wide variety of prescriptions, offering eyeglass wearers a sleek and stylish alternative to bulky prescription sports eyewear. Experience the perfect fusion of function and fashion with Rudy Project's Flip-up eyewear line, and elevate your game to new heights.

ophthalmic ■

UNLEASH YOUR SPORTY SPIRIT IN EVERYDAY EYEWEAR

INTRODUCING THE OPHTHALMIC LINE, A UNIQUE COLLECTION OF EYEGASSES DESIGNED FOR THOSE WHO CRAVE A SPORTY LOOK IN THEIR EVERYDAY PRESCRIPTION EYEWEAR. BLENDING ADVANCED SPORTS TECHNOLOGY WITH A LIFESTYLE-ORIENTED DESIGN, OPHTHALMIC GLASSES ARE PERFECT FOR INDIVIDUALS SEEKING TO EXPRESS THEIR ATHLETIC SIDE WHILE ADDRESSING THEIR VISION NEEDS.

Key Features:

- **Sport-Inspired Design:** Drawing from our expertise in high-performance sports eyewear, the Ophthalmic line offers a dynamic, athletic appearance that suits the needs of those requiring prescription lenses for daily use.
- **360-Degree Adjustable Temples:** Experience maximum comfort and stability with our innovative adjustable temple design. Ophthalmic glasses allow for a full 360-degree temple adjustment, ensuring a customized, secure fit for any head shape.
- **Rubber Nose Pads:** To enhance grip and provide a comfortable, secure fit throughout the day, Ophthalmic glasses feature slip-resistant rubber nose pads. These pads prevent the glasses from sliding down the nose, even during intense activities.
- **Versatile Lifestyle Appeal:** While Ophthalmic glasses boast sports-inspired features, they maintain a lifestyle-oriented look that seamlessly transitions from work to play. These stylish frames are perfect for any daily activity, allowing you to embrace your sporty side without compromising on style.

Discover the Ophthalmic line by Rudy Project and experience the perfect fusion of sports functionality and everyday fashion. With Ophthalmic eyewear, you no longer have to choose between performance and style. Embrace your sporty spirit while addressing your vision needs with these exceptional glasses.

Unleash your athletic spirit with Ophthalmic by Rudy Project—where style and performance come together.

bike helmets ■

ROAD | TRIATHLON | MTB | URBAN

Rudy Project helmets combine performance-driven design with the highest levels of safety to exceed the most stringent impact testing protocols. Our obsession to reduce weight, increase ventilation, optimize aerodynamics, and maximize comfort and fit provide cyclists with the most technologically advanced helmets in the world.

E L E V A T E Y O U R P E R F O R M A N C E

helmets technology ■

1 dual density | eps core

All our helmets use state-of-the-art EPS co-molding technology for enhanced safety, quality and lightweight performance. Loaded with double density EPS core using an innovative internal structure engineered to enhance air circulation and shock absorption capacity, the EGOS is our penultimate development in helmet safety.

2 3d air frame | adaptive band

Our latest generation AirFrame Band has been re-engineered for an even more advanced air flow control; its seamless 3D geometry is designed to distribute ventilation from the front ports through the inner channels helping concretely sweat management; coupled with the adaptive bands connected directly to the retention system, it ensures stability, superior safety and phenomenal 360° comfort fit.

3 rsr micro 11 | retention system

The all-new miniaturized RSR11 retention system is a sturdy yet extremely lightweight and compact safety frame anchored in the helmet: implemented with vertical fitting options and a handy easy-adjust ratchet wheel to provide a swift and exceptional user-friendly adjustment, it will flawlessly secure the helmet around the head.

4 ergo divider | straps

We have developed new ergonomic strap dividers to ensure stability, flush comfort over the skin and simple fitting. No struggling with the adjustments anymore, once tuned to your head it will keep its setting for a superior riding experience.

5 fidlock® | chin buckle

The compact magnetic industry-leading FidLock® buckle is intuitive, pinch-free and one handed use even wearing your gloves on. This reliable, comfortable and secure system ensures secure protection in a snap.

6 eyewear ports

Building on our experience in manufacturing performance eyewear and helmets since 1985, most of our helmets integrate sunglasses dock to securely stow and access them easily.

7 helmets-eyewear | powerflow technology

Rudy Project empowers athletes offering sunglasses with vertical PowerFlow channels integrated in the upper part of the eyewear chassis, which once combined with our helmets, will furthermore optimize air circulation.

aero helmets technology ■

aerodynamics vs. internal ventilation?

These two elements are most often at odds in the development of an aerodynamic helmet. A very ventilated helmet provokes turbulence which negatively affects aerodynamics, but ventilation benefits physical performance. Because overall performance is what matters most for an athlete, we have conducted extensive testing in the wind tunnel to find the right balance of aerodynamics and ventilation for the development of the Rudy Project helmet collection.

“Triathletes and cyclists often face the most important races of the season in hot and humid weather conditions. These conditions can lead to deterioration, sometimes substantial, of physical performance. Training sessions and races at temperatures above 30-32 degrees Celsius with high relative humidity increase the workload of the cardiovascular, nervous, and metabolic systems due to rising core body temperature.

In addition to weather conditions, physical exertion also contributes to the increase of internal body temperature. This rise is directly correlated with the intensity of the effort. The human body, particularly that of an athlete, is able to modulate these variations by regulating core temperatures through a series of behavioral and physiological interventions. During physical exercise, core temperature increases, especially in hot, humid conditions, and can exceed the normal 36.5-37.5 degree range to as much as 40 degrees centigrade. It should be remembered that at temperatures above 41 degrees centigrade, cellular functions begin to deteriorate. When the internal temperature rises, the body’s natural thermostat (hypothalamus), located in the brain, triggers a series of defense mechanisms (primarily sweating for evaporative cooling) to dissipate heat.

“During physical activity in favorable climatic conditions, the heart provides oxygen through the blood to active muscles, organs, and tissues. When heat and humidity increase, the heart is subjected to an additional workload because it must pump more blood to the skin in order to promote the evaporation of sweat. For this reason, less blood reaches the muscles. The heart rate increases with effort, and therefore the filling time of the heart is reduced with a consequent decrease in cardiac output, leading to a worsening of performance.

“When the internal body temperature begins to increase significantly during physical exercise, even the central nervous system enacts defense mechanisms to contain the production of heat. In particular, it reduces muscle recruitment by deactivating part of the muscles involved in the effort in order to avoid health risks. The inevitable consequence is the reduction of performance capacity.

“There is an infinite number of scientific studies showing that during endurance physical activities, body heating and the significant increase in core temperature tend to increase brain response times, decrease response accuracy, and generally affect physical capabilities. It is also widely demonstrated that head cooling is able to counteract these tendencies by mitigating the negative effects of increasing internal body temperature.

“Further scientific contributions have shown that scalp temperature can be considered an important factor in perceived head and overall body comfort, even in scenarios where the internal body temperature remains high. During physical exercise in high heat and humidity, the subjective perception of increased fatigue and workload on the cardiovascular system with consequent decrease in performance is certainly related to the increase in skin temperature, as well as an increase in internal body temperature, which causes critical decreases in cognitive performance.

“A helmet with superior internal ventilation ensures greater heat dissipation, and therefore better thermoregulation and homeostasis of the body’s internal temperature, to the benefit of the athlete’s performance capabilities.”

time trial | 45 km/h wind speed

- simulation setup: 75kg rider, 8.5kg bike, aero drag (baseline) cda 0.250
- * course: 70.3 ironman 90km with 500m climbing, full ironman 180km with 1000m climbing
- power output: 200W average (typical age group athlete on long distance ironman)
- helmets tested in M size

FALLS CAN PROVE TO BE VERY COSTLY AND HAVE PERMANENT OR EVEN LETHAL CONSEQUENCES. THE STARTING POINT FOR THE DEVELOPMENT OF RUDY PROJECT'S HELMETS IS THE ADOPTION OF ONLY HIGHLY-ADVANCED MATERIALS WHICH CAN ABSORB SHOCKS AND DISSIPATE THE MECHANICAL ENERGY WITHOUT IT BEING TRANSFERRED TO THE HEAD AND BODY.

Our bicycle helmets, depending on the design and market of destination, comply with the provisions of Module B of the Regulation (EU) 2016/425 "Personal Protective Equipment" and with the national standard transposing the harmonized standard(s) EN 1078:2012+A1:2012 "Helmets for pedal cyclists and for users of skateboards and roller skates" for PPE of Class II, or with American safety standard "CPSC § 12.03 U.S. Consumer Product Safety Commission Safety Standard for Bicycle Helmets for Persons Age 5 and Older."

Check carefully the markers and informations placed on the labels placed on the product and on its packaging to verify the security standards are fulfilled by the helmet. A copy of the declaration of conformity could be downloaded from the website www.rudyproject.com/warranties.

All the Rudy Project helmets are tested in the production sites and by the independent certification authorities.

The purpose of a bike helmet is to protect the rider's head by absorbing the impact energy through the partial, and not always visible, destruction of the helmet itself, including the compression of the interior EPS foam liner.

To be an effective protection for the head/brain, bike helmets have to meet a number of conditions that test how well they perform in an impact, including the strength of the retention system and their stability of the on the wearer's head.

To ensure a uniform standard of safety testing for bicycle helmets, many countries have adopted bike helmet certification standards with which manufacturers and importers must comply.

All the Rudy Project bicycle helmets, depending on the market of destination, comply with one of the following Standards:

CE/EN 1078

Created in 1997, the EN 1078 Standard was approved in 2012 by the European Committee for Standardization (CEN) and amended the same year into the EN 1078:2012+A1:2012 standard for all cycling, skateboarding and roller skating helmets sold in Europe.

The EN 1078 Standard covers helmet construction including field of vision, shock absorbing properties, retention system properties including chin strap and fastening devices, as well as marking and information.

The standard's key features are:

- Test anvils: Flat and kerbstone
- Drop apparatus: Guided free fall
- Ambient, Hot, Cold and wet conditioning
- Impact velocity, energy or drop height flat anvil: 5.42–5.52 m/s
- Impact energy criteria: < 250g
- Roll-off test
- Retention system strength: Force applied dynamically. Helmet supported on headform.

CPSC / CPSC 12.03

In the United States, The Consumer Product Safety Commission (CPSC) was tasked by Congress with the development of a U.S. Government standard for bicycle helmets and began to do so in 1994. After working with an ASTM task group and producing two drafts for public comment, the third and final draft was approved in February of 1998 and the final version of the standard was published. One interpretation letter has been issued since that time. The standard covers all helmets produced for the US market after March 10, 1999.

The CPSC 1203 Standard covers helmet construction including field of vision, shock absorbing properties, retention system properties including chin strap and fastening devices, as well as marking and information.

The standard's key features are:

- Test anvils: Flat, kerbstone and hemispheric
- Drop apparatus: Guided free fall
- Ambient, Hot, Cold and wet conditioning
- Impact velocity, energy or drop height flat anvil: 2 m
- Impact energy criteria: < 300g
- Roll-off test
- Retention system strength: Force applied dynamically. Helmet supported on headform.

rp rotational impact test

Currently, nearly each research group active within helmet safety has its own definition of helmet safety.

An official Standard that allows measuring and quantifying oblique impact and combines the insight of the different experts would provide a more objective framework of about helmets safety.

On this purpose, CEN (THE EUROPEAN COMMITTEE FOR STANDARDIZATION), through the Technical Committee TC 158 which is dedicated to the head protection and the eight Working Groups currently active under it, is developing a method for measuring the absorption of energy from oblique or normal impacts

The Working Group directly focused on that is known as the CEN TC 158 / Working Group 11.

At Rudy Project we are committed to develop products aiming to the highest level of safety, exceeding the current requirements set by international Standards, such as the CE or CPSC norms.

Today more than ever our goal is to go even further by overpassing also the RP ROTATIONAL IMPACT TEST.

The RP ROTATIONAL IMPACT TEST is an internal protocol adopted by Rudy Project, in cooperation with accredited and notified bodies, to test and measure the performance of the helmets against rotational impacts; it takes inspiration from CEN, from ECE 22.06 (a new standard for motorcycle helmets) and it is based on real accident data and scientific sources.

The RP ROTATIONAL IMPACT TEST "pass-fail" criterion is based on the BRIC (Brain Injury Criterion) value, an algorithm that defines the level of brain injury. This value must be less than 0,68.

*The RP ROTATIONAL IMPACT TEST is a RUDY PROJECT internal protocol to test and measure the performance of the RUDY PROJECT helmets against rotational impacts. This test has not been adopted by CEN or by its Working Group CEN TC 158 / Working Group 11.

RP ROTATIONAL IMPACT TEST

- oblique tests @ 45° on X,Y and Z axis
- impact speed 6 m/s, BRIC < 0,68
- grade 80 closed-coat aluminum oxide abrasive paper
- headform nominal coefficient of friction 0,3
- wireless system: triaxial accelerometer + n. 3 ARS
- Headform: EN960 serie
- Measurements: Peak of rotational acceleration, Peak of linear acceleration, HIC, BRIC (< 0,68)

EGOS, NYTRON, SPECTRUM, VENGER, VENGER CROSS, PROTERA+ SUCCESSFULLY PASSED RP ROTATIONAL IMPACT TEST

helmet sizing guide.

- 01** LOCATE MEASURING INSTRUMENT
 Locate a pliable measuring ribbon or a mobile charging cable (and a straightedge to compare it against).
- 02** TAKE MEASUREMENT
 Encircle the cable around your head slightly over the brow line.
- 03** DETERMINE YOUR SIZE
 Consult the table above to identify your fitting.
 If you're between two dimensions, opt for the smaller one.

Egos helmet / Cutline eyewear

color match.

There is an intense relationship between the Rudy Project collections and their colour combinations; shapes, volumes, materials and perception in all of its senses have deeply inspired the creative team. Rudy Project's constant research into colour is evident in its winning choices and combinations, the reward for a decade's worth of experience and an unrivalled spirit of innovation. Here's a small selection of color matching products. Have fun creating other matching combinations while discovering our full collection!

SNOW

Protecting the eyes in the harshest weather conditions and guaranteeing a high level of comfort are the main objectives that led Rudy Project to create its snow collection. The attractive and practical design, and the optical solutions developed for this collection, certify the attention that is paid to every type of sport and every athlete.

ATTENTION
The Rudy Project helmets are engineered and manufactured with different specifications according to the markets of destination. If your helmet bears a CE designation, it meets the requirements of the Council Directive 89/686/ECC and of the European technical Standard EN 1078. If your helmet bears a CPSC designation, it meets the standard safety requirements of the U.S. Consumer Product Safety Commission. If your helmet bears a AS/NZS designation, it meets the standard safety requirements of the Australian Standard AS/NZS 2063.

ELEVATE YOUR PERFORMANCE
