Introduction

The following bibliography of Johan Gunnar Andersson, Anders Birger Bohlin, Carl Johan Josef Ernst Wiman and Otto Zdansky has been compiled from various archival and published sources. It contains only those published works by these authors that directly relate to China and Mongolia. Of these four authors, only Wiman's work has previously been compiled into a published bibliography (Anonymous, 1937; Bohlin, 1947). This is the first compilation of Andersson's, Bohlin's and Zdansky's publications on the archaeology, geology and palaeontology of eastern Asia. Three obituaries of J.G. Andersson (Åhman 1961, Ahlman & Karlgren, 1961; Nelson, 1961) and an account of some of Andersson's research in China (Palander *et al.*, 1919), none of which contain a bibliography of J.G. Andersson, also have appeared.

Remarks

The correspondence and accounts of Johan Gunnar Andersson are in the Sirénarkivet at the Museum of Far Eastern Antiquities (Östasiatiska Museet), Box 16381, S-103 27 STOCKHOLM, Sweden.

Please note that G. [Gunnar] Andersson and J.G. [Johan Gunnar] Andersson are two different persons.

There is only one publication – in 1925 – for which Birger Bohlin used the initials A.B. [Anders Birger]. All subsequent publications of this author have only the initial B.

The spellings of Upsala and Uppsala were both in use until the 1950's, when the spelling officially became Uppsala.

The journal *Geologische Rundschau*, Volume 50 has the year 1960 printed in its cover but was not distributed until March 1961. This is therefore the correct publishing date.
