The effective date of publication for AASP Contributions Series No 48 is January 5, 2017

ABSTRACT

Included in this 2017 edition of the Lentin and Williams Index are all fossil dinoflagellate taxa at and below generic rank known to the authors as of 31st July 2016. The Index now has 667 generic and 4,464 specific "correct" names, and includes in total 9,910 taxonomic entries in its main part (exclusive of appendices), as well as over 2,400 references. There are 728 entirely new taxonomic entries and 1,471 modified entries. Validly published and legitimate names are listed, as well as those that are effectively published, but are not valid or are illegitimate. Information on synonymies, nomenclatural types, nomenclatural status, history, and geologic age is also provided. The age cited for each taxon of species or infraspecific rank is, unless otherwise specified, that attributed to it in the protologue. It is not intended to be a full or up-to-date statement of the range of the species, and users are advised to consult the literature for potentially more detailed and precise information. Proposals include 5 new names (*Bohaidina arenula*, *Bohaidina enodis*, *Parabohaidina arenata*, *Parabohaidina bulla* and *Parabohaidina runcinatus*), all necessary because of the inadvertent creation of homonyms in the literature. Also proposed are two new combinations (*Danea spinosa* and *Nyktericysta spinosa*), made necessary by generic synonymys. Taxa at some time included in non-dinoflagellate or extant dinoflagellate genera are listed in two appendices. Appendix A lists all non-dinoflagellate genera that at some time have included species or infraspecific taxa now or previously considered dinoflagellates; it also includes genera listed in the main text of previous editions of the Index but not (now) considered dinoflagellates. Appendix B includes extant dinoflagellate genera based on motile types to which cyst taxa have been assigned. This edition of the Index is a digital publication and is released in parallel with a new version of the DINOFLAJ database, DINOFLAJ3 (<http://dinoflaj.smu.ca/dinoflaj3/>).

INTRODUCTION

This 2017 edition of the Lentin and Williams Index (hereafter “the Index”) is being released in tandem with a new version of the DINOFLAJ database — DINOFLAJ3. In fact, it has been generated from the database, though the entries for the latter were formulated in the same way as entries for previous editions of the Index, the most recent of which was Fensome and Williams (2004). The main difference between the 2017 edition of the Index and previous editions is the exclusive use of digital publication, both to follow the modern preference for digital material and for practical reasons, given that it is over 1100 pages long when formatted as a document.

The merit of having both a web version of DINOFLAJ3 and a digital formal publication is that the former offers a modern, flexible, easily accessible database that can be adapted for use in conjunction with other databases, while the latter enables formal nomenclatural changes to be proposed (see the sections dealing with nomenclature below) and a more conventional format for those who prefer that style. Throughout, as in previous editions of the Index, we follow the formal rules of nomenclature, as now contained in the International Code of Nomenclature for Algae, Fungi and Plants (ICN), previously known as the International Code of Botanical Nomenclature (ICBN) (see below).

As with previous editions of the Index and versions of DINOFLAJ, the main objective of this edition of the Index is to list all dinoflagellate taxa of generic and lower rank cited in formal publications and based on fossil or fossilizable types. In both the 2017 Index and DINOFLAJ3, we have included information from publications available to us as of 31 July 2016. Where life-cycle relationships are known, we indicate the name of the motile equivalent.

The Index has three sections: Main Index, Appendix A and Appendix B. The Main Index contains all genera based on fossilizable dinoflagellates, mainly organic-walled, calcareous and siliceous cysts. Appendix A contains non-dinoflagellate genera (fossil and modern) as well as forms that have at one time or other been considered to be, or have been associated with, dinoflagellates. Appendix B contains dinoflagellate genera that are not based on fossil or fossilizable types. Taxa included in the appendices are those necessary to complete the histories of taxa in the main section.

Besides citing organic-walled, calcareous and siliceous cysts, the Main Index includes genera based on mineralized skeletal elements (e.g. *Actiniscus*); and genera based on extant fossilizable

cysts (e.g. *Brigantedinium*). Another unusual taxon included in this section is *Succiniperidinium inopinatum*, a species based on a motile form preserved in Cretaceous amber.

The line between fossil and living dinoflagellates is becoming increasingly blurred with the growing number of studies of cyst-forming modern species, promoted in large part by the paleoecological significance of these forms. Most researchers agree that a dual nomenclature of fossil and living dinoflagellates (effectively cysts and motile stages) needs to be maintained, even if some may prefer to use just one. Such a dual approach is permissible under the ICN (see below and Head et al. 2016). However, a quandary arises in terms of what to include in the Main Index when a cyst name is based on a living type, as we consider living dinoflagellates to be beyond our scope other than to identify equivalence with fossil taxa. For clarity, in the Main Index we include all genera typified by fossils, as well as genera based on preservable living cysts. We do not include modern cyst-based species assigned to extant, motile-based genera unless they are subsequently transferred to a fossilizable-cyst-based or fossil genus.

Unless there is a compelling reason not to do so, we have generally accepted the latest systematic treatment of a particular taxon in the literature, provided that the latest author indicates that previous taxonomic treatments and nomenclatural proposals have been considered and are in accord with the rules of the ICN.

The number of genera and species in the Main Index has increased remarkably since the first edition of the Index (Lentin and Williams, 1973). The 2017 Index (and DINOFLAJ3) now has 667 generic and 4,464 specific "correct" names, and includes in total 9,910 taxonomic entries in its main part (exclusive of appendices), as well as over 2,400 references. In this edition, 728 taxonomic entries are entirely new, and 1,471 entries have been modified.

A major effort in this edition has been the re-evaluation of 21 references by C. G. Ehrenberg, dating from the 1800s. Many of his papers were initially read, then printed and distributed as separates, then published in journals, these events commonly taking place in different years. Given the convoluted nature of establishing actual effective publication dates, the years assigned to some of Ehrenberg's references have varied from publication to publication (by us and others). Thanks to access to digital reproductions of Ehrenberg's original papers and our re-assessment of information they record, we hope that many of the problems surrounding Ehrenberg's papers have been resolved herein. However, users should be aware that the dates

we now assign to many of Ehrenberg's publications have changed from those given in previous editions of the Index.

Important note regarding ages.

The age cited for each taxon of species or infraspecific rank is, unless otherwise specified, that attributed to it in the protologue. **Ages cited in the Index are thus not intended to be full or up-to-date statements of species ranges**; users are advised to consult the literature for potentially more detailed and precise information.

DINOFLAGELLATES

Dinoflagellates are primarily single-celled, eukaryotic organisms (protists) with at least one life-cycle stage bearing two distinctive flagella: a ribbon-like, wavy transverse flagellum that almost encircles the cell and a longitudinal flagellum that trails posteriorly. The combined motion of the two flagella causes the cell to move forward in a spirally rotating manner. The term "dinoflagellate", originated from the Greek "dinos" (= a whirl or eddy) and the Latin "flagellum" (= a small whip). Most dinoflagellates at some stage in their life cycle have a dinokaryon, a nucleus characterized by the absence of histones and by chromosomes that remain condensed between cell divisions. Mitosis is said to be closed, meaning that the nuclear membrane does not break down and the mitotic spindle remains outside the nucleus. The presence of characteristic dinoflagellate flagella and/or a dinokaryon are diagnostic for the division (or phylum) Dinoflagellata.

Dinoflagellates typically possess vesicles in the motile cell's peripheral region. The latter is termed the amphiesma and the vesicles are, accordingly, termed amphiesmal vesicles. These vesicles may be empty, or they may contain thin to thick, usually cellulosic, thecal plates, the overall assembly of thecal plates being termed the theca. The number and arrangement of the thecal plates is referred to as tabulation. Tabulation is an important criterion in the classification of several major groups, including the Peridiniphyceae, which includes the vast majority of fossil dinoflagellates. Other genera recognized as fossils are included in the Gymnodiniphyceae and Dinophysiphyceae (Fensome et al., 1993b).

Many dinoflagellates are known to have complex life cycles, which usually include one or more, non-motile or cyst stages. The main types of cyst are resting cysts, temporary cysts and vegetative cysts. Most fossil dinoflagellates are thought to be hypnozygotes, resting cysts resulting from sexual fusion (Dale, 1983), although this is unproven except for a few Holocene examples. That they are representative of a cyst stage is confirmed by their possession of an excystment opening, termed an "archoepyle". Several fossil dinoflagellate genera, however, appear to represent other stages in the life cycle. For example, *Dinogymnium* and its allies appear to represent the remains of discarded pellicles (Fensome et al., 1993b). The pellicle is a continuous layer that in some dinoflagellates occurs beneath the theca or amphiesmal vesicles of motile cells; it may be homologous with the cyst wall.

Dinoflagellates include both autotrophs and heterotrophs, and thus the group as a whole is properly referred to as protists rather than algae or protozoa. These organisms have been treated under both the International Code of Zoological Nomenclature (ICZN) and the International Code of Botanical Nomenclature (ICBN; now the ICN). To bring a degree of stability to the nomenclature, Downie et al. (1961) proposed that all dinoflagellates be treated under the ICBN. This proposal has been adopted widely (completely for fossils) and in this, as in previous editions of the Index, we follow the rules of "botanical" nomenclature as now found in the ICN. The latest version of the ICN is the "Melbourne Code" (McNeill et al., 2012; <http://www.iapt-taxon.org/nomen/main.php>), and it is this version that we refer to unless otherwise stated. The rules expressed in the ICBN/ICN do change: for example the requirement for an English or Latin diagnosis or description for fossils was instituted in 1995; however, these are not usually retroactive, as that would cause great nomenclatural instability. In the following section we review the ICN, especially as it relates to fossil dinoflagellates. But we can't over-emphasize that this review should not be used in place of direct reference to the ICN; note that we have generally omitted reference to measures and complications that we consider not relevant to the nomenclature of fossil dinoflagellates. At the end of the section on nomenclature we provide a list of critical dates from the Code for quick reference.

RULES OF NOMENCLATURE

General Remarks

The ICN (also referred to herein as "the Code") assumes a hierarchical classification, the basic unit being the species. However, other than this basic exception, the Code is concerned with nomenclature, not taxonomy (Fensome and Skog, 1997). Provisions of the ICN can be suspended through a formal process of conservation or rejection of names; names so affected are listed in an appendix to the Code. Below we highlight key sections of the Code, with examples mainly from this edition of the Index to illustrate the discussion. The Code is divided into chapters and these are divided into sections and articles. Here, for expediency, we focus on articles, which are numbered from 1 to 62 cumulatively across sections and chapters. Related topics are dealt with in paragraphs within an Article, which are generally referred to with numbers subordinate to the appropriate article number: thus the first paragraph in Article 1 is Article 1.1. Most terms are explained at first mention, but further elucidation for many terms can be found in the Glossary below. At the end of the section on Rules of Nomenclature we have compiled a list of key dates at which particular rules took effect.

Ranks of Taxa

Articles 1 to 5 of the ICN are concerned with the ranks of taxa. **Article 1.2** clarifies that a fossil-taxon is one based on a fossil type: it specifies that “A fossil-taxon comprises the remains of one or more parts of the parent organism, one or more of their life history stages, in one or more preservational states” Thus fossil dinoflagellate cysts clearly fall into the “life history stage category”, and as such are well entrenched in the Code. The concept of fossil-taxa replaces earlier concepts of form-, organ- and morphotaxa. **Articles 3.1, 4.1 and 4.2** list the ranks to which an organism can be assigned. The ranks referred to in the Index are, in descending scale: genus, subgenus, section, species, subspecies, variety and form

In the first edition of the Index, Lentin and Williams (1973, p.3–5) discussed the infraspecific classification then used for fossil dinoflagellates, and recommended that the ranks subspecies, variety and form not be used indiscriminately, which was a tendency at the time. Consequently, Lentin and Williams (1973, 1975, 1977b, 1981, 1985, 1989, 1993) consistently raised varieties and forms to subspecific rank. An example is *Amphorosphaeridium fenestratum* var. *dividum*

Davey, 1969c, which Lentin and Williams (1973) raised to the subspecific rank. In the 1998 and 2004 editions (Williams et al., 1998 and Fensome and Williams, 2004), the latest taxonomic treatments in the literature were generally followed with regard to infraspecific rank. However, we still have misgivings about the value of uneven treatment and recommend that, if infraspecific taxa must be used, they be designated as subspecies, nuanced definitions of infraspecific ranks in our view being meaningless in our field. Although we list infrageneric taxa (subgenus and section) after the genus and all of its species, we similarly consider that use of these ranks adds unnecessary complication in the classification of fossil dinoflagellates.

Status, Typification and Priority

Articles 6 to 15 deal with general provisions for the status, typification and priority of names. **Article 6** states that a name must be effectively published and validly published in order to be a legitimate name — i.e. one that satisfies the rules. It does not follow that names not in accordance with the rules are illegitimate, as discussed below (as are the definitions of effectively and validly published). **Article 6.6** states that "At the rank of family or below, the correct name of a taxon with a particular circumscription, position, and rank is the legitimate name which must be adopted for it under the rules" This implies that the correct name is the senior (earliest) legitimate name of a group of legitimate names that are considered to be taxonomic synonyms. The species name *Xanthidium* (now *Spiniferites*) *ramosum* is legitimate, as are the names *Xanthidium furcatum*, *Galea koryka*, *Hystrichosphaeridium echinoides*, *Areoligera birama*, *Geodia? tripunctata* and *Homotryblium distinctum*. All seven names, as well as being legitimate, are correct as long as they are considered to represent separate species. However, the last six species have been considered taxonomic junior synonyms of *Xanthidium* (now *Spiniferites*) *ramosum*. Since we accept all these names to be synonyms, the correct name for the species is *Spiniferites ramosus*, as this name, being the earliest (or earliest-selected in cases where names are of the same vintage), has priority over the other six names. Note that the word "correct" thus has a specific meaning in this context. Article 6 also has paragraphs dealing with autonyms, new combinations and new (replacement) names.

Typification is the subject of **Articles 7 to 10**. According to **Article 7.1**, all names of taxa at the rank of family or below (and of names above family when based on a generic name) must have a nomenclatural type. A nomenclatural type, as defined in **Article 7.2**, is "... that element

to which the name of a taxon is permanently attached, whether as a correct name or as a synonym" (see also the discussion under Article 10.1 below).

Article 7.4 states that: "A replacement name ... is typified by the type of the replaced synonym ...". Thus, *Hystrichokolpoma wilsonii*, proposed as a substitute name, has the same type as the illegitimate homonym, *Hystrichokolpoma truncatum* Wilson, which it replaced.

Article 7.6 stipulates that the type of an autonym is the same specimen as the type of the (specific) name from which it is derived. Thus, the autonym *Circulodinium distinctum* subsp. *distinctum* has the same holotype as *Circulodinium distinctum*. Interspersed among its Articles, the ICN has Recommendations that ought to be followed but are not binding. **Recommendation 7A** urges that material on which the name of a taxon is based, especially the holotype, be deposited in a public herbarium or other public collection with a policy of giving bona fide researchers access to deposited material, and that it be scrupulously conserved. Fortunately, this seems to happen more often than not for fossil dinoflagellates, with a very positive impact on the taxonomic stability of the group.

Holotypes, lectotypes, and neotypes of species and infraspecific taxa (e.g. subspecies) are defined in **Articles 8 and 9**. **Articles 8.1** stipulates that the type is a single specimen or illustration, and **Article 8.5** restricts this to only specimens (except for epitypes — see below) for fossils. **Article 9.1** defines a holotype of a name as the specimen designated by an author as the nomenclatural type. As long as a holotype exists, it fixes the application of a name. When the holotype is missing or destroyed, or when the original author did not designate a holotype (prior to 1958), a lectotype can be designated from the original material (**Articles 9.2**). Note that the Code specifically uses the word "missing", so there is no need to demonstrate that a holotype has been destroyed in order for a lectotype to be designated. An example of a lectotype is that designated by Jan du Chêne and Londeix (1988) for *Achomosphaera andalousiensis*, this designation being necessary because the holotype is lost. Under **Article 9.3**, "original material" can include any specimens seen by the original author, whether or not cited in the original publication. Where no original material remains, a neotype is designated (**Articles 9.7**) from material not used by the original author. The first author to designate a lectotype or neotype for a particular name must be followed (Article 9.19) unless such a specimen is shown to be in conflict with the protologue (everything associated with the name at its valid publication); in that case the lectotype or neotype may be superseded (**Articles 9.18, 9.19**). Thus, Sarjeant (1984a)

designated a lectotype for *Gonyaulax* (now *Cribroperidinium*) *granulatum* because the holotype had disintegrated. Brenner (1988) argued that the lectotype designated by Sarjeant was not conspecific with the holotype, and so designated as lectotype the specimen illustrated in Brenner (1988, pl.1, figs.3a–c). Inevitably, such debates involve subjective taxonomy. Authors who agree with Brenner must adhere to Brenner's lectotype; authors considering the holotype and both lectotypes to be conspecific are obliged to adhere to Sarjeant's lectotype.

Other sorts of type are accommodated in **Article 9**. **Article 9.6** allows for paratypes, which are specimens cited in the protologue other than the holotype: the article does not specify that such a specimen needs to have been cited as a paratype in order to be considered one. Paratypes have no definitive nomenclatural role, although they are potential lectotypes if the holotype is lost. The term "isotype" has been used by some palynologists (e.g., Drugg, 1978). According to **Article 9.4**, an isotype is "any duplicate of the holotype". As with the broad definition of the word "specimen" in **Article 8.3**, the word "duplicate" in Article 9.4 is tacitly underpinned by genetic identity in a modern botanical context. Hence, the term isotype should be avoided in a fossil context. A syntype is any specimen cited in the protologue when no holotype has been designated (**Article 9.5**); hence this term is applicable only for names validated prior to 1958, when designation of holotypes became mandatory (see below).

An epitype is a specimen selected to serve as an interpretative type when the holotype, lectotype or neotype is "demonstrably ambiguous" (**Article 9.8**). **Article 9.20** specifies that the author who first designates an epitype must be followed, and a new epitype may be designated only if the original epitype is lost or destroyed. As with other kinds of type, an epitype is not validly published unless its repository is specified (**Article 9.19**). As far as we are aware, no epitypes have yet been designated for fossil dinoflagellates. However, this device may prove a useful addition to the "tool box" in helping to solve some difficult taxonomic issues related to fossil dinoflagellates.

Fensome et al. (1990) and Fensome et al. (1998a) identified examples among acritarchs where an author listed a holotype in the text but did not specify which of the illustrations represented that specimen. The name *Moyeria uticaensis* Thusu, 1973 is an example. Fensome et al. (1990) faced a quandary as to whether such a name was validly published: they decided that it was not, since in effect no useful holotype had been designated. To resolve this issue, Fensome et al. (1998a) proposed new articles, incorporated in the St. Louis Code (Greuter et al.,

2000) and now **Articles 9.15** and **43.3**. **Article 9.15** effectively states that such a name, if published before 2001, should be considered as validly published, but one of the illustrated specimens should be designated as a lectotype until the identity of the holotype (if represented among the illustrations in the protologue) is confirmed. Hence, the name *Moyeria uticaensis* was validly published in 1973. **Article 43.3** indicates that, after 2000, at least one illustration must be identified as the holotype: hence, if published now with the same material, *Moyeria uticaensis* would not be validly published.

Article 10.1 states that: "The type of a name of a genus or any subdivision of a genus is the type of the name of a species" This article, in conjunction with **Article 7.2** on the permanence of types, implies that the type of a generic name remains the holotype of the name of the "type species" as designated by the author of the generic name. For example, Duxbury (1983, p.58) designated *Cepadinium variabile* as the "type species" of *Cepadinium*. Lister and Batten (1988b, p.43) considered *Cepadinium ventriosum* to be a taxonomic synonym of *Cepadinium variabile*. Since *Cepadinium ventriosum* is the senior name, it becomes the correct name for the "type species" of the genus *Cepadinium*. However, the nomenclatural type of the generic name *Cepadinium* remains the holotype of *Cepadinium variabile* (Duxbury, 1983, pl.9, fig.8; text-fig.27A–E). Article 10.1 also notes that "For purposes of designation or citation of a type [of a genus], the species name alone suffices" However, because the identity of the generic type has sometimes been misconstrued in the fossil dinoflagellate literature, we suggest that citing the type specimen of a genus rather than the correct name for the "type species" avoids confusion and misunderstanding. **Article 10.6** indicates that the type of a name of a family or any subdivision of a family is the same as that of the genus on which its name is based. The same is true for taxa above the rank of family that are based on generic names (**Article 10.7**).

Articles 11 to 12 deal with priority. Each taxon of family or lower rank can bear only one correct name (**Article 11.1**). Of importance for fossil dinoflagellates is the second sentence in Article 11.1, which states: "However, the use of separate names is allowed for fossil-taxa that represent different parts, life-history stages, or preservational states of what may have been a single organismal taxon or even a single individual." In the past such variants were covered under provisions for form-, organ- and morphotaxa, but these terms have now been dropped in favour of a general reference to fossil-taxa. What this means is that a single biological taxon

(however that may be defined) may have separate “extant” and “fossil” names (if the latter is based on a fossil specimen representing, say, a particular life-cycle stage such as a cyst). An example involves the species names *Pyrophacus steinii* and *Tuberculodinium vancampoae*: the former is typified by a living dinoflagellate, and the latter is based on a fossil cyst. The provision of Article 11.1 allows for an individual author to decide whether to treat the two generic names as taxonomic synonyms or to retain both separately. In the Index we retain all fossil-cyst based names separately from any known motile equivalents, following the generally accepted practice of dual nomenclature for dinoflagellates (Head et al., 2016). This is an excellent example of the flexibility in well-considered nomenclatural rules allowing for freedom in taxonomic decision-making. Not all nomenclatural rules are so well-considered!

At family to generic rank, the correct name is the earliest legitimate name at that rank (**Article 11.3**). For each species, subspecies, variety and form, the correct name is the combination of the final epithet of the earliest legitimate name at that rank (except for autonyms — **Article 11.6** — and a few other specified cases) combined with the correct name of the genus or species to which it is assigned (**Article 11.4**). In cases of equal priority, the first effectively published choice establishes priority (**Article 11.5**). The order in which names appear in an individual publication has no bearing on priority. The name *Hystrichosphaeridium recurvatum* subsp. *polypes* was proposed by Cookson and Eisenack (1962b) and was later raised to specific rank, as *Polysphaeridium? polypes*, by Davey and Williams (1966b). Two years earlier, Tasch in Tasch et al. (1964) had proposed the species name *Hystrichosphaeridium unituberculatum*, which is now considered synonymous with *Polysphaeridium? polypes*. Unfortunately, since “*unituberculatum*” was proposed at species rank in 1964 and “*polypes*” was not raised to species rank until 1966 (although proposed at subspecific rank in 1962), the more cumbersome epithet has to have priority over the more elegant one at species rank, as *Kiokansium unituberculatum*.

Article 11.7 states that “... names of fossil-taxa (diatom taxa excepted), compete only with names based on a fossil type.” This is followed by **Article 11.8**, which states “Names of organisms (diatoms excepted) based on a non-fossil type are treated as having priority over names of the same rank based on a fossil type”. As pointed out by Head et al. (2016), Article 11.8

"... is meant to address the priority of names based on a non-fossil type that are considered to be synonyms of those based on a fossil type when these names are applied to a non-fossil taxon. However, it could be interpreted to mean that a name based on a non-fossil type must also be applied to a fossil-taxon if both non-fossil and fossil-taxa are considered equivalent, such as when they represent different parts of the same life cycle. This would then be at odds with dual nomenclature and potentially contradict Art. 11.7."

Hence, Head et al. (2016) proposed an amendment of Article 11.8, as follows: "Names of organisms (diatoms excepted) based on a non-fossil type are treated as having priority over names of the same rank based on a fossil type *where these names are treated as synonyms for a non-fossil taxon*" (italics added here to indicate the additional phrase). If this amendment is accepted (ultimately at the 2017 International Botanical Congress), it will clarify and confirm the use of dual cyst (fossil) and motile nomenclature for dinoflagellates. For the purposes of this edition of the Index, we interpret Article 11.8 in the sense of the new proposed amendment, as we did in previous editions of the Index. Head et al. (2016) propose a new example to be added under Article 11.8. This example involves *Votadinium calvum*, which was proposed by Reid (1977) as a new fossil-species, acknowledging that it is the cyst of the extant species *Peridinium oblongum*. *Votadinium calvum* can be used as the correct name for the cyst because it has a fossil type and does not compete for priority with *Peridinium oblongum*.

Article 13.3 states that "For nomenclatural purposes, a name is treated as pertaining to a non-fossil taxon unless its type is fossil in origin. Fossil material is distinguished from non-fossil material by stratigraphic relations at the site of original occurrence." Thus, to paraphrase interpretively, a specimen is a fossil for nomenclatural purposes if it is found in strata. For example, based on this definition, and following Head et al. (2001) and Head (2003a), we consider the name *Echinidinium granulatum* to have been not validly published in its original proposal by Zonneveld (1997). The holotype is from a sediment trap and does not have a stratigraphic context; hence it must be treated as extant, its name (at the time of its proposal) requiring a Latin diagnosis. However, *Echinidinium bispiniformum* has a holotype from ocean floor sediment and has a stratigraphic context; hence it may be treated as a fossil, its name not requiring a Latin diagnosis for validation (Head, 2003a, p.171–172).

Article 12.1 states that: "A name of a taxon has no status under this Code unless it is validly published" Thus, only validly published names can be considered legitimate, illegitimate, correct, or for priority. Limitation of priority is covered in **Articles 13 to 15**. According to **Article 13.1f**, only names of fossil plants published after 1820 can be considered as validly published. Fortunately, this includes all names of fossil dinoflagellate taxa.

Conservation of names against others that would otherwise have priority is dealt with in **Article 14**. Names can only be conserved through submission to the General Committee (normally via a proposal in the journal *Taxon*), which refers the proposal to the appropriate subcommittee: in the case of fossil dinoflagellates this is the Committee for Fossil Plants. If recommended at the committee stages, proposals for conservation of names must be subjected to a decision of an International Botanical Congress (**Article 14.14**). Conservation cannot be achieved by individual taxonomists in general publications. Davey (1978) proposed in the general literature that the dinoflagellate generic name *Tenua* be "conserved" with a different type to that proposed by Eisenack (1958a), who first used the generic name *Tenua*. However, Davey's proposal is not in accordance with **Article 14**, and *Tenua* Davey (with the holotype of *Tenua rioultii* as type) must be considered an illegitimate junior homonym of *Tenua* Eisenack (with the holotype of *Tenua hystrix* as type). Similar situations surround the generic names *Aiora* and *Compositosphaeridium*. Among dinoflagellates, the family name Rhaetogonyaulaceae (Fensome et al., 1998c) and the generic name *Diphyes* (Harris and Fensome, 2000) have been formally conserved and are listed in the Code. **Article 15** deals with sanctioned names, a concept that does not (yet) affect fossil dinoflagellates.

Nomenclature of Taxa According to their Rank

Articles 16 to 28 deal with the nomenclature of taxa in relation to their rank. **Articles 16 to 19** are concerned with taxa above generic rank. **Articles 20 to 22** cover names of genera and their subdivisions above the rank of species. **Article 20.1** specifies that the name of a genus is a noun or a word treated as such; it must not coincide with an active Latin morphological term (**Article 20.2**). A generic name must not consist of two unhyphenated words (**Article 20.3**). Thus, *Ovum hispidum* is not an acceptable generic name; unhyphenated multiple word generic names apparently are not to be considered valid in their initial publication, though they may subsequently be made acceptable by the addition of a hyphen. Recommendation 20A

encourages authors of generic names to use Latin terminations, to avoid names that are not adaptable to Latin, that are long, that are of mixed language, that are similar to a contained species name, and that are dedicated to individuals outside natural science.

Article 21.1 indicates that the name of a subdivision of a genus is a combination of a generic name and a subdivisional epithet, with a connecting term (e.g. "subgenus") to denote rank. Hence *Protopteridinium* subgenus *Archaopteridinium* is a proper rendition of the subgeneric name. When a specific epithet is added and the subdivisional epithet is deemed necessary, the subdivisional epithet should be placed in parentheses: for example, *Protopteridinium* (*Archaopteridinium*) *minutum* or *Protopteridinium* (subgenus *Archaopteridinium*) *minutum* are both acceptable (**Recommendation 21A**).

Under the provisions of **Article 22.1**, the name of any subdivision of a genus that includes the type of the genus is an autonym and repeats the generic name as its epithet; it is not followed by an author citation. An example is *Protopteridinium* subgenus *Protopteridinium*.

Article 23 deals with the names of species. **Article 23.1** states that the name of a species is a binary combination consisting of the name of the genus followed by a single specific epithet. (Note that the term epithet refers to part of a name: thus, for *Oligosphaeridium complex*, *Oligosphaeridium* is the generic name, *Oligosphaeridium complex* is the specific name, and *complex* is the specific epithet. An epithet cannot stand alone.) The specific epithet can be in the form of an adjective (e.g. *Kallosphaeridium granulatum*) or a noun in the genitive (e.g. *Cribropteridinium wilsonii*) or in apposition (e.g. *Trichodinium castanea*). If an adjective and not a noun, a specific or infraspecific epithet must agree grammatically with the generic name, as in *Riculacysta perforata* (**Article 23.5**; see also Orthography and Gender below). Epithets not conforming with this rule are to be corrected; in the Index we treat such corrections as typographic errors and ordinarily make the changes without comment unless there are complications regarding the etymology or past understandings of it. If an epithet is a noun in apposition (N.I.A.), its ending is not changed to agree with the gender of the generic name, as for example with *Cordosphaeridium cantharellus* (the epithet referring to a specific type of mushroom). If the specific epithet is not of a single word, it can be considered valid in the initial publication (in contrast to the situation for generic names) but the words must be united or hyphenated in subsequent use if they were not originally thus proposed. An example of a name with a hyphenated epithet is *Subtilisphaera pontis-mariae*.

Article 23.4 states that a specific epithet may not be a tautonym — i.e. repeat exactly the generic name. Thus, the specific name *Galea galea* is not validly published, even if the generic name *Galea* were not a homonym. (This contrasts with the International Code of Zoological Nomenclature where such tautonyms are acceptable: e.g. *Bison bison*.) **Recommendation 23A** involves similar exhortations to those listed under Recommendation 20A above.

Names of taxa below the rank of species (infraspecific taxa) are covered in **Articles 24 to 27**. **Article 24.1** states that the name of an infraspecific taxon is a combination of the name of a species and an infraspecific epithet, these being connected by a term denoting the rank (e.g. subspecies, varietas, forma). **Article 24.2** notes that infraspecific epithets are formed in the same way as specific epithets: for example, where adjectival, they must agree grammatically with the generic name (e.g. *Impagidinium paradoxum* subsp. *granulatum*).

Article 26.1 stipulates that the name of any infraspecific taxon which includes the type of the species is an autonym and must repeat the specific epithet, but is not followed by an author's name. **Article 26.3** notes that the first valid publication of a name of an infraspecific taxon that does not include the type of the species automatically establishes the corresponding autonym. Thus, when Yun Hyesu (1981) published the name *Xenascus ceratioides* subsp. *procerus*, which was the first subspecies proposed in this species, *Xenascus ceratioides* subsp. *ceratioides* was automatically established. Autonyms are indicated throughout the Index for species in which at any given time there has been a validly published infraspecific taxon. Thus, the entry for *Apectodinium homomorphum* includes an entry for the autonym *Apectodinium homomorphum* subsp. *homomorphum*, even though no other infraspecific taxa are now included in *Apectodinium homomorphum*. In such a situation, the autonym becomes (perhaps temporarily) redundant. A new infraspecific taxon is appropriately compared only with other infraspecific taxa (even if there is only the autonym), rather than with the species.

Effective Publication

Articles 29 to 31 deal with effective publication. **Article 29.1** states that publication is effected by distribution of printed matter to the general public "or at least to scientific institutions with generally accessible libraries." However, **Articles 30.4 and 30.5** permit "indelible autograph" prior to 1953. **Article 30.1** stipulates that publication is not effected by communication of new

names at a public meeting, by the placing of names in public collections, by the issue of microfilm, or via electronic material other than that specified in Article 29.1.

New in the Melbourne Code is an addition to **Article 29.1** that states: “Publication is also effected by distribution on or after 1 January 2012 of electronic material in Portable Document Format (PDF ...) in an online publication with an International Standard Serial Number (ISSN) or an International Standard Book Number (ISBN). **Article 30.2** specifies that an electronic publication is not effectively published if it is a preliminary version of something finalized later. The content of an electronic publication must not be altered after it is effectively published (**Article 30.3**). In preparing new entries for DINOFLAJ3, and hence this version of the Index, we encountered issues that illustrate the potential pitfalls of interpreting new rules such as those concerning electronic publishing in the Melbourne Code. The new genus *Bianchina* is proposed in the journal *Palynology* and first came to our attention in a PDF sent to us by the author, Poul Schiøler. The PDF appears essentially final, and the author has fulfilled all the conventional requirements for valid publication. However, the PDF bears the date 2015 and the pagination 1–6 (with the new genus proposed on pages 3 and 5). A little research involving “insider” connections confirmed that this pagination is not final and that the paper would be included as pages 406–412 in an issue of *Palynology* to appear in later 2016. Initially we considered *Bianchina* (and its single contained species *Bianchina hieroglyphica*) to be not effectively published because it was proposed in a non-final PDF — the pagination not being final. However, in discussion with Patrick Herendeen, a co-author of the Melbourne Code, we learned that during deliberations for the compilation of the Melbourne Code, final pagination was not considered a requirement for effective publication and was in fact regarded as “aesthetic and not substantive”. While we go along with this decision apparently accepted among the nomenclatural hierarchy, and recognize the value of prompt publication of scientific data, we think it unfortunate that the article is not clearer (apparently “final” does not mean “final”) and we are concerned about the confusion that will ensue. Thus, *Bianchina* was effectively published on pages 3,5 of a PDF of a paper that was posted online in 2015. The article will be part of an issue of *Palynology* to appear in its entirety and printed as a hard copy in later 2016, the article by Schiøler and containing *Bianchina* bearing the pagination 406–412. In future, the latter pagination will be the one referred to in the literature, but it will not be the formal pagination for effective (and valid) publication.

Another innovation in the Melbourne Code of potential importance (and confusion) to fossil dinoflagellate nomenclature is **Article 30.8**. This states: Publication on or after 1 January 1953 of an independent non-serial work stated to be a dissertation submitted to a university or other institute of education for the purpose of obtaining a degree does not constitute effective publication unless the work includes an explicit statement (referring to the requirements of the *Code* for effective publication) or other internal evidence that it is regarded as an effective publication by its author or publisher.” Presumably, “dissertation” can be taken to be a synonym of “thesis” in this context. This new ruling may affect some names in this version of the Index that have been considered until now effectively published and consequently legitimate. For example, those introduced in the dissertation by Agelopoulos (1967), which has been considered effectively published supposedly in consideration of its broad distribution. **Note 4** following **Article 30.8** indicates that the presence of an ISBN number or a statement of the name of the printer, publisher, or distributor in the original printed version is regarded as internal evidence that the work was intended to be effectively published. In our view, Note 4 will cause confusion, especially regarding the statement of a printer’s or related name. Moreover, the question arises as to whether theses that contain such indications should be considered effectively published; presumably, Article 29.1 would need to be considered in this context. Recommendation 30A notes that when publications exist only as printed matter, they should be deposited in “at least ten, but preferably more” generally accessible libraries”. We have not made any changes in reaction to the present version of Article 30.8.

The date of effective publication is the date of availability as defined in Article 29 and that, in the absence of other proof, the date on the publication must be accepted (**Article 31.1**). When a publication is issued as both electronic material and printed matter, they must be treated as effectively published on the same date unless the dates of the versions are different (**Article 31.2**). Commonly, the electronic version is available at an earlier date than the printed version, as is the case with Schiøler (2015), as discussed above. In such cases, the date of effective publication will be that of the electronic publication. **Article 31.3** clarifies that the date of effective publication can be that the distribution of separates (reprints) if earlier than the containing issue of the journal (echoing the case of *Bianchina* above and presumably with final pagination unnecessary). An example involves the fossil dinoflagellate taxa *Quinquecuspis* and *Trinovantedinium concretum*. Head (1993) contended that *Quinquecuspis* was not validly

published by Harland (1977b) because he designated as its type *Trinovantedinium concretum*, which Head thought was not effectively published until 1978. However, although the journal in which Reid's paper appeared did indeed not come out until 1978, preprints of Reid's paper did appear in 1977 (P.C. Reid, personal communication, 1997).

Valid publication

Articles 32 to 45 deal with general provisions for valid publication. While the conditions for valid publication remain closely similar to those in previous versions of the ICBN, the order and arrangement of Articles in the Melbourne Code (ICN) is significantly different. According to **Article 32.1**, in order to be validly published, a name of a new taxon (other than an autonym) must be effectively published and have an acceptable form (for example, it must be in the Latin alphabet). **Article 32.2** stipulates that use of incorrect Latin endings to epithets does not affect validity or authorship, but the endings should be corrected. The date of a name is that of its valid publication (**Article 33.1**). Prior to 1973, when conditions for fulfilment for valid publication are met in stages, the date of valid publication is the date when the final condition is met; after 1972, for a name to be validly published full and direct reference needs to be made in the validating publication to all places where the various elements have been fulfilled. The generic name *Brigantedinium* is a good example. It was not validly published in Reid (1977) since the type species, *Chytroeisphaeridia simplicia* Wall 1965b, was not validly published; Wall (1965b) had not provided a Latin diagnosis for *Chytroeisphaeridia simplicia*, a requirement since, although a cyst species, it was based on living material. Harland and Reid in Harland et al. (1980) provided a Latin diagnosis for the species, but did not validate the generic name *Brigantedinium* since they did not directly cite the Latin diagnosis provided for it by Reid (1977). It was not until Lentin and Williams (1993) brought all the pieces of the puzzle together that the names *Brigantedinium* and *Brigantedinium simplex* became validly published. (Although Wall, 1965b, had proposed the epithet originally as "*simplicia*", when eventually Lentin and Williams, 1993, validly published the name, they rendered the epithet as "*simplex*", which is thus correct.)

Article 35.1 specifies that the name of a taxon below the rank of genus is not validly published unless the name of the genus is also validly published. Thus, the name *Palaeoperidinium muriciforme* Conrad, 1941 was not validly published since the generic name

Palaeoperidinium Deflandre, 1934 ex Sarjeant, 1967b, was not validly published until 1967. Note that species names attributed to validly published but illegitimate generic names (for example *Albertia recticornis* Vozzhennikova 1967) are validly published (*Albertia* in the example being a validly published name but an illegitimate junior homonym).

A combination is not validly published unless the final epithet is definitely associated with the genus or species to which it belongs (**Article 35.2**). Thus, in the Fensome and Williams (2004) Index, where we listed names within a genus by final epithet, for new combinations and other nomenclatural novelties, we deliberately used the full name of the taxon somewhere in the entry. Generic abbreviations are allowed in this context (but not recommended by us). **Article 36.1** specifies that a name is not validly published when it is: not accepted by the author; proposed provisionally in anticipation of future acceptance; cited merely as a synonym; or merely mentioned as a subordinate taxon within a discussion of another taxon. Thus, the name *Deflandrea eocenica* was not validly published in Balteş (1969), since he considered it a provisional name. The correct citation is *Deflandrea eocenica* Balteş, 1969 ex Lentin and Williams, 1973. Bujak (1994, p. 119) stated that "Stover and Williams (in press) erected the genus *Enneadocysta* to accommodate ... species ... which have a partiform hypocystal configuration, with processes on paraplates 6", 2" and 1ps. They designated *Enneadocysta pectiniformis* (Gerlach) Stover and Williams as the type species." Bujak's paper represents the first published mention of the generic name *Enneadocysta*, since the paper by Stover and Williams did not appear until 1995. In most respects, Bujak fulfilled the requirements for validating the name *Enneadocysta*, providing a description, albeit brief, and indicating a type. However, since he was clearly mentioning the generic name in anticipation of Stover and Williams' paper, following Article 34.1b the name *Enneadocysta* was not validly published in Bujak (1994) and is correctly cited as *Enneadocysta* Stover and Williams, 1995. Similar situations surround the original publication of the names *Tehamadinium* and *Chiropteridium lobospinosum*. **Article 36.1** also makes clear that names published with an indication of taxonomic doubt, such as a question mark, but otherwise in accordance with the Code, are validly published.

After 1952, the rank of a new name must be clear (**Article 37.1**). The name of a new taxon must also be accompanied by a description (any morphological statement) or diagnosis (a statement of the morphological features that distinguished the taxon from other taxa — **Article**

38.2) or a reference to such (**Article 38.1**). **Article 38.5** specifies that the names of a genus and species can be validated simultaneously provided that the genus is monotypic at the time of validation. Thus, *Palynodinium* and its "type species" *Palynodinium grallator* were both validly published by Gocht (1970a), since *Palynodinium* was monospecific, even though Gocht gave only a diagnosis for *Palynodinium grallator* and did not separately describe the genus. Prior to 1908, an annotated illustration is acceptable in place of a written description or diagnosis (**Article 38.7**).

Article 39.1 deals with language of descriptions, but defers the language to be used for fossils and algae to later articles. Any name for a new taxon published after 2011 must have an English or Latin description or diagnosis or reference to such (**Article 39.2**) — prior to 2012, most groups governed by the Code had to have Latin descriptions, but not fossils (see below). After 1957, designation of the type of a new name of generic rank or lower is a requirement (**Article 40.1**). For the name of a genus, this can be reference to a species name, or the holotype of a species name (**Article 40.3**). After 1989, indication of a type must include the word "typus" or equivalent (**Article 40.6**). The generic name *Kisselovia* was proposed by Vozzhennikova (1963), who indicated a "type species" (*Kisselovia ornata*) but did not provide a description for that species. Hence, effectively, no type was designated in 1963 for *Kisselovia*. Vozzhennikova (1967) fulfilled the requirements for valid publication of the name of the proposed "type species", including the provision of a description and the designation of a type, thus also validating the generic name (with the spelling *Kisselevia*).

After 1989, the repository of the type must be specified (**Article 40.7**). Thus, the specific name *Fibrocysta prolixa* Harker and Sarjeant in Harker et al., 1990 was not validly published since those authors did not indicate where the holotype is lodged. This oversight was corrected in Harker and Sarjeant (1991). Therefore, the correct citation for the name of this species is *Fibrocysta prolixa* Harker and Sarjeant in Harker et al., 1990 ex Harker and Sarjeant, 1991, or more simply but less informatively *Fibrocysta prolixa* Harker and Sarjeant, 1991. Fensome et al. (1998b) noted, in correspondence with J. Jansonius, that the Chair of the then Code Editorial Committee, W. Greuter, considered that "the intent of [Article 40.7] is not to make deposition of types in a public herbarium mandatory, but to force authors to make the whereabouts of their types publically known." Greuter remarked also that the Article does not specify "public" herbarium, and he implied that reference to a private herbarium (i.e. collection) would fulfil this

requirement of the Code. Fensome et al. (1998b) also suggested that if an author does not directly (i.e. fully) cite a repository but does give specimen numbers including abbreviations that clearly refer to a particular institute or collection (e.g. BS or BSIP for Birbal Sahni Institute of Palaeobotany), this is acceptable under Article [40.7]. This agrees with the spirit of **Article 40.7, Note 4**, which states that "Specification of the herbarium or institution may be made in an abbreviated form"

An additional requirement for valid publication of a new combination or replacement name is a citation to the basionym (the original version of the name of a taxon) (**Article 41.1**). After 1952, this citation must be a full and direct reference to its author and place of valid publication, with page or plate reference and date (**Article 41.5**). We interpret this to mean also that a full reference to the relevant publication must appear in the reference list of the paper in which the proposal is made, not a blanket reference to an earlier compendium, such as Fensome and Williams (2004) (cf. **Article 41.7**). Thus, the combination *Stiphrosphaeridium dictyophorum* (Cookson and Eisenack, 1958) Davey, 1982b, was not validly published in Davey (1982b), since although he provided page and plate references and a date, he did not provide a reference for Cookson and Eisenack (1958) in his reference list. The correct citation is *Stiphrosphaeridium dictyophorum* (Cookson and Eisenack, 1958) Lentin and Williams, 1985, since a complete reference to the protologue was given by the latter authors. However, errors in citation do not invalidate such nomenclatural proposals (**Article 41.6**).

After 1995, in order to be validly published, the name of a new fossil-taxon must be accompanied by a Latin or English description or diagnosis (**Article 43.1**). Thus the name *Pervosphaeridium septatum*, proposed in Slimani (1996), was not validly published since that author did not provide a description or diagnosis in Latin or English. Fossil taxa named prior to 1996 can be accompanied by a description or diagnosis in any language (**Note 1**). **Article 43.2** stipulates that after 1911 the name of a new fossil-taxon of generic or lower rank must be accompanied by an illustration or reference to such. And as already noted, according to **Article 43.3**, after 2000 the name of a new fossil-species or infraspecific fossil-taxon is not validly published unless at least one of the validating illustrations is identified as the type.

As dinoflagellates are algae, aspects of the Code relating to that group as well as to fossils are of significance here. To be valid, the name of a non-fossil alga published between 1958 and 2011 inclusive must have a Latin diagnosis (**Article 44.1**), and from 1958 must be accompanied

by an illustration (**Article 44.2**). There has been some confusion over what constitutes a fossil. Harland and Reid in Harland et al. (1980, p.223) considered that the name of a "Recent" species, *Omanodinium alticinctum*, was not validly published since its author (Bradford, 1975) did not provide a Latin diagnosis. However, the type is from not-avowedly living material and derived from sediments (i.e. having a stratigraphic context — see comments related to Article 11.7 above), and hence can appropriately be considered as a fossil. Thus, as noted by Lentin and Williams (1981), no Latin diagnosis or description of that name was required for valid publication.

Article 45.1 deals with names originally established under other codes, primarily the ICZN. It states that such a name need satisfy only requirements of the other code to be validly published under the ICN. Thus, many early names for fossil dinoflagellates were established under the ICZN. An example is the extant dinoflagellate genus *Scrippsiella* Balech 1959, which was "validly published" under the ICZN; when this genus is treated under the ICN its name does not require further validation, regardless of the absence of a Latin diagnosis. The reverse situation also applies and this caused some notable re-interpretations in the 1998 edition of the Index. Thus the generic name *Hystrichosphaera* was "not validly published" in Wetzel (1932; 1933b), because no type was designated — a necessity since Wetzel was treating his fossils as protozoa and was using zoological nomenclature (ICZN Article 69). The name *Hystrichosphaera* was unwittingly validated by Deflandre (1937b) who designated a type. This re-interpretation changed the date of valid publication of several specific names: for example, *Hystrichosphaera cornigera* Wetzel, 1933b ex Deflandre, 1937b was cited in Lentin and Williams, 1993 as *Hystrichosphaera cornigera* Wetzel, 1933b.

Citations

Articles 46 to 50 deal with citations. **Article 46.1** states that in some publications "... it may be desirable, even when no bibliographic reference to the protologue is made, to cite the author of the name" It is important to emphasize here the use of the word "may" in Article 46.1 — it is not a rule that authorship must be cited. Although useful, authorship citations can make text more difficult to read, and hence authors are increasingly including nomenclatural authorships in an Appendix (e.g. Schiøler et al., 1997) — a practice that we encourage.

Article 47.1 indicates that a change of a taxon's diagnostic characters (or, by implication, description) or circumscription "... does not warrant a change of the author citation."

Recommendation 47A1 continues this theme by noting that, when such an alteration "... has been considerable, the nature of the change *may* be indicated by adding such words as ... "emendavit" (emend.) followed by the name of the author responsible for the change ..." (italics added here). Hence, an "emendation" is not a formal nomenclatural device (actually, it is not nomenclatural at all, but a taxonomic device), and an emending authorship is at no time part of the formal name of the taxon. An emendation should be cited for information purposes only — and generally only if the author making the citation agrees with the intent of the emendation. Long strings of cited emendations incorporated as part of a taxon's name should generally be avoided. In the Index, we list only those emendations avowedly acknowledged by the author at the time of the revision, and cite them separately from the formal nomenclatural authorship. We include as emendations cases where an author has used an equivalent term such as "revised description". We recommend that if authors feel they have something significant to say about the concept of a taxon, they should flag it as an emendation; otherwise important insights might be missed by later authors.

Article 48.1 stipulates that when an author adopts an existing name but explicitly excludes its original type, he has in effect created a later homonym of which he is sole author. Several examples, including *Tenua* Davey, 1978, were given above under the discussion of Article 14. For the citation of names at generic and lower rank, **Article 49.1** requires the use of parentheses around the name of the author of an earlier, epithet-bringing legitimate name in cases of change of taxonomic rank or generic assignment. The name in parentheses is then followed, outside parentheses, by that of the author who effected the alteration in rank or assignment. For example, the species *Cyclonephelium vitilare* Cookson, 1965b was transferred to the genus *Renidinium* by Stover and Evitt (1978): the correct citation is *Renidinium vitilare* (Cookson, 1965b) Stover and Evitt, 1978. *Hystrichosphaera ramosa* var. *granosa* Davey and Williams, 1966a was transferred by Corradini (1973) to *Spiniferites* as *Spiniferites ramosus* var. *granosus* (Davey and Williams, 1966a) Corradini, 1973. Lentin and Williams (1973) raised this taxon to subspecific rank but retained it in *Spiniferites*. Thus, the correct citation is *Spiniferites ramosus* subsp. *granosus* (Davey and Williams, 1966a) Lentin and Williams, 1973. We emphasize that the protologue is the key reference for any taxon and should be fully referenced in taxonomic

works; thus in our view the aforementioned species should not be cited as *Renidinium vitilare* (Cookson) Stover and Evitt, 1978; the key diagnostic information for this species is in Cookson (1965b).

Rejection of Names

Articles 51 to 58 deal with rejection of names. **Article 52.1** states that a name is illegitimate if it was nomenclaturally superfluous when published — i.e. if the taxon to which the name was applied definitely included the type of another name, which ought to have been given priority. Thus, *Agerasphaera* Harland, 1979a is illegitimate since it is a nomenclatural junior synonym of *Alisocysta* Stover and Evitt, 1978, which has the same type.

However, **Article 52.2** specifies that definite inclusion of the type of a name is effected, in part, by citation of the name itself "... unless the type is at the same time excluded either explicitly or by implication." In Fensome and Williams (2004) (and thus DINOFLAJ2), we invoked Article 52.2 to justify retention of the species name *Votadinium calvum* (and in consequence the generic name *Votadinium*), in future we may use a revised Article 11.8 (if ratified) to justify its acceptance (see discussion above). Lentin and Williams (1993) considered the name *Votadinium calvum* to be an illegitimate superfluous name (in the sense of Article 52.1), since in proposing the species as new, Reid (1977) considered it to represent the encysted stage of *Protoperidinium oblongum*; strict application of Article 52.1 thus prescribes that *Votadinium calvum* is a nomenclatural junior synonym of *Protoperidinium oblongum*, the two names referring to the same biological species according to Reid. However, as discussed above and by Head et al. (2016) duality of nomenclature is accepted practice for dinoflagellates. Since Reid (1977) clearly viewed the two names *Votadinium calvum* and *Protoperidinium oblongum* as representing distinct entities, one based on cysts, the other on the motile stage, and since he clearly did not propose the name *Votadinium calvum* to replace *Protoperidinium oblongum*, Fensome and Williams (2004) invoke Article 52.2 to retain the former name. Most names based on cysts are fossil and can be clearly retained under the ICN as fossil-taxa, regardless of whether their motile equivalent is known.

Article 53.1 states that "A name of a family, genus or species ... is illegitimate if it is a later homonym, that is, if it is spelled exactly like a name based on a different type that was previously and validly published for a taxon of the same rank." An example is *Albertia*

Vozzhennikova, 1967, a junior homonym of *Albertia* Schimper, 1837 and therefore an illegitimate name. Lentin and Williams (1976) thus proposed to replace it with the new name *Alterbia*, but while doing so inadvertently included the "type species" of the earlier generic names *Senegalinium* and *Andalusiella*. Following Article 52.1, therefore, *Alterbia* was a superfluous, and hence illegitimate, name. Consequently, Lentin and Williams (1985) proposed a second new name for *Albertia* Vozzhennikova, *Alterbidinium*, this time excluding the "type species" of *Andalusiella* and *Senegalinium*. Fensome et al. (1993b) considered the name *Danea* Morgenroth, 1968 to be a junior homonym of *Danaea* Smith 1793, an extant fern genus, and proposed the generic name *Damassadinium* as a replacement for *Danea* Morgenroth. However, we agree with the entry in the *Index Nominum Algarum* (<http://ucjeps.berkeley.edu/cgi-bin/porp.cgi.pl?105660>) that *Damassadinium* is an illegitimate superfluous name, as *Danea* Morgenroth is not an exact homonym of *Danaea* Smith; we have thus made the appropriate adjustments in in this version of the Index and DINOFLAJ3.

According to **Article 55.1**, a name of a species or subdivision of a genus may be legitimate even if its name/epithet was originally combined with an illegitimate generic name. Thus, *Albertia curvicornis* is a validly published name, even though the generic name *Albertia* Vozzhennikova is illegitimate.

Orthography and Gender

Articles 60 to 61 deal with the orthography of names and epithets. Some of the rules and recommendations are very hard to follow, especially for those of us without classical training. **Article 60.1** specifies that the original spelling of a name or epithet is to be retained, except for, firstly, the correction of typographic or orthographic errors and, secondly, modifications indicated by standardizations specified in **Articles 60.5 to 60.12**. **Article 60.2** states that the "original spelling" is the spelling of a name at its valid publication. Hence, the name *Kisselevia* is the correct version of the name as it was spelled at it the time of its validation by Vozzhennikova (1967), rather than *Kisseljovia* in Vozzhennikova (1961) and *Kisselovia* in Vozzhennikova (1963). **Article 60.3** notes that the liberty of correcting a name is to be used with reserve, especially if it affects the first letter or syllable. According to **Article 60.6**, diacritical signs are not used in Latin plant names. In names "... drawn from words in which such signs appear, the signs are to be suppressed with the necessary transcription of the letters so

modified" Thus, the specific name introduced by Morgenroth (1966a) as *Impletosphaeridium krömmelbeinii* is correctly cited as *Impletosphaeridium kroemmelbeinii*.

The use of hyphens is treated differently depending on taxonomic rank. **Article 60.9** specifies that use of a hyphen in a compound epithet is treated as an error to be corrected by deletion of the hyphen. "A hyphen is permitted only when the epithet is formed of words that usually stand independently, or when the letters before and after the hyphen are the same." Use of the word "epithet" implies that this article is dealing with names at species (or maybe subgenus) and lower rank. Applying this article to the species name *Bonetocardiella ponce-de-leoni*, we tentatively retain the hyphens as the three words would have presumably stood independently. Although not relating to dinoflagellates, but of interest as a palynological example, it has recently come to light that some well-used spore-based generic names were originally spelled with a hyphen — for example *Cicatricosi-sporites*. Although no palynologist as far as we know has used this spelling for decades, technically it is still the correct spelling. A proposal has been published to revise the Code so that hyphens in such generic names follow the same rule as specific epithets — that is that the hyphen be dropped in such cases (Anderson et al., 2016).

Article 60.12 states that "The use of an incorrect termination (for example -i, -ii, -ae, -iae, -anus, or -ianus ... is treated as an error to be corrected". Thus the name originally proposed as *Canningia ringnesii* Manum and Cookson, 1964, named after the Ringnes brothers, is correctly written as *Canningia ringnesiorum* Manum and Cookson, 1964. The species name *Chatangiella bondarenkii* (Vozzhennikova, 1967) Lentin and Williams, 1976, named after N.M. Bondarenko, is correctly cited as *Chatangiella bondarenkoi* (Vozzhennikova, 1967) Lentin and Williams, 1976. And we have changed the epithet proposed as *Senoniasphaera whitenessii* to *Senoniasphaera whitenessensis* because it is named after a place (White Ness) rather than a person.

Recommendations 60A through 60I provide further guidance on correct orthography. For example, **Recommendation 60C.2** notes that personal names already in Greek or Latin, or possessing a well-established latinized form, should be given their appropriate Latin genitive, such as *alexandri* from Alexander, *augusti* from Augustus, *martini* from Martinus or Martin or *linnaei* from Linnaeus. To the present authors (and perhaps others lacking classical training), the limits of this recommendation are not clear, but we have tried to adhere to it in obvious

situations, such as *Achomosphaera neptuni*, based in large part on advice from the late Jan Jansonius. According to **Recommendation 60C.5a**, "The Scottish patronymic prefix 'Mac', 'Mc' or 'M', meaning 'son of', should be spelled 'mac' and united with the rest of the name. However, this is a recommendation, not an Article, and the original spelling of the epithet must be followed. For example, with regard to the name *Chatangiella mcintyreii*, the preferred spelling of the epithet following Recommendation 60C.5a would be "*macintyreii*", but since the author, Nøhr-Hansen (1996), gave the epithet as "*mcintyreii*", the latter spelling is correct.

It is relevant to note again that specific epithets, if adjectival, must agree grammatically with the generic name (Article 23.5). However, when the specific epithet is a noun in apposition (N.I.A.), it is not to be changed as if it were an adjective, but stays in the nominative, as in *Discorsia nannus* (the epithet meaning dwarf). **Recommendation 60G** deals with the formation of compound epithets — i.e. those epithets that are derived from two or more words, for example *perforoconum* (as in *Sentusidinium perforoconum*). In this compound epithet, the first part is related to the Latin adjective "perforatus" (perforate) and the second part is derived from the Latin noun "conus" (cone). The recommendation is rather obtuse, but we follow Nicolson (1986, p.324), who averred that unless the original author indicates otherwise, it is general botanical practice to treat such compound epithets as adjectives, even though the last part (in this case "conus") may be a noun. Hence, "*Sentusidinium perforoconum*" is the correct orthography, rather than "*Sentusidinium perforoconus*"

Article 62 is concerned with gender. A generic name retains the gender assigned by botanical tradition. A generic name without a botanical tradition retains the gender assigned by its author. Thus, *Hystrichokolpoma* is regarded as neuter. For a further discussion of orthography in botanical taxonomic names, see Jansonius (1997a, b).

Key dates

Here are some key dates associated with the ICN:

1820 onward — names for fossils can be considered (Article 13.1f)

1908 onward — an annotated illustration in place of written description or diagnosis not allowed (Article 38.7)

1912 onward — illustration required for new fossil-taxa of genus or lower rank (Article 43.2)

- 1953 onward — rank must be clear (Article 37.1)
- 1953 onward — for new combinations, etc., a full and direct reference to the basionym is required (Article 41.5)
- 1958 onward — designation of holotype necessary for valid publication (Article 40.1)
- 1958 onward — new taxa of living algae require an illustration (Article 44.2)
- 1973 onward — conditions for valid publication must be all met in one place (Article 33.1)
- 1990 onward — indication of a type must include the word *typus* or equivalent (Article 40.6)
- 1990 onward — the repository of the type must be specified (Article 40.7) in full or as abbreviation
- 1996 onward — each new fossil-taxon must be accompanied by a Latin or English description or diagnosis (Article 43.1)
- 2001 onward — for fossils, at least one illustration must be identified as the holotype (Article 43.3)
- 2012 onward — electronically published names considered for effective publication (Article 29.1)
- 2012 onward — all new taxa must have Latin or English description or diagnosis (as was already the case for fossils) (Article 39.1)

FORMAT

Entries

In each genus entry, the generic name is immediately followed by the authorship citation and, in a separate sentence, any emendations. Where the genus represents calcareous or siliceous fossils, there is a statement to that effect. Thus:

ORTHOCARINELLUM Keupp, 1987, p.41. Emendation: Kienel, 1994, p.37. Calcareous dinoflagellate genus.

This information is sequentially followed by information in the following categories, as appropriate: validity and legitimacy (including senior homonym), substitute name, nomenclatural

history, senior synonym(s), junior synonym(s), junior homonym(s), other comments, and type. Subgenera and sections are treated in a similar way to genera, but species attributed to these are listed as formal entries under the genus, not under the subgenus or section. Beneath each genus entry is a list of all species names that have at some time or other been included in the genus, the currently correct ones in bold.

For each species entry, the specific epithets is in bold, followed by citations for original and, where appropriate, validating or combining authors. There then follows information, where appropriate, on emendation(s), holotype, lectotype, neotype, validity and legitimacy (including senior homonym), substitute name, nomenclatural history (including retention and questionable assignment statements), senior synonym(s), junior synonym(s), junior homonym(s), motile equivalent, other comments, and age. The age cited for each species, unless otherwise specified, is that attributed to it in the protologue. It is not intended to be a full or up-to-date statement of the range of the species; users are advised to consult the literature for potentially more detailed and precise information. The letters "N.I.A." immediately before the age indicate that a particular epithet is a noun in apposition (see above and Glossary).

Entries for infraspecific taxa are inset and preceded by the name of the rank ("subsp.", "var.", "forma"). Except where a definite hierarchy of infraspecific taxa is clearly involved (e.g. *Gonyaulacysta jurassica* subsp. *longicornis* var. *longicornuta*), we treat all infraspecific taxa as being of equivalent rank. The format adopted for the infraspecific ranks is essentially the same as that for the specific entries, except in the case of autonyms. For each autonym, we give the word "autonym", emendation(s), holotype, lectotype, neotype, and nomenclatural history. If no other infraspecific taxa within a particular species are currently accepted, the phrase "**Now redundant**" will appear as part of the nomenclatural history. There is a tendency in the literature for autonyms and the taxa that they represent to be ignored or neglected. However, they are real entities — the subspecies, varieties and forms containing the type of the species — and should be referred to as such in descriptions and comparisons.

Names not enclosed by quotation marks are validly published, legitimate, and correct (in the sense of the ICN). All other names are enclosed by quotation marks. For all names in quotation marks, one or more statements in bold type will explain the current status. Thus, under *Pseudoceratium*, there is:

“eopelliferum” Herngreen et al., 1994, p.386. **Name not validly published:** no description or illustration.

The statement of nomenclatural history of a particular taxon may include: a "NOW" statement, which indicates current assignment; a "sequencing" statement that provides the nomenclatural history in full; a "retention" statement if the taxon has been retained under a combination that was not the latest to be proposed; and a "questionable assignment" statement, discussed below. Thus the statement of nomenclatural history in the entry for *Hystrichosphaeridium capitatum* is:

NOW *Prolixosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Prolixosphaeridium*, thirdly *Tenua* Eisenack, fourthly *Batiacasphaera*.

And under *Prolixosphaeridium capitatum*:

Originally *Hystrichosphaeridium*, subsequently (and now) *Prolixosphaeridium*, thirdly *Tenua* Eisenack, fourthly *Batiacasphaera*. Lentin and Williams (1981, p.233) retained this species in *Prolixosphaeridium*.

The citation "*Tenua* Eisenack" includes the name's author to distinguish it from the homonym, "*Tenua* Davey".

The sequencing statement for *Achilleodinium biformoides* is as follows:

Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma*, fourthly (and now) *Achilleodinium*, fifthly *Florentinia*. Lentin and Williams (1981, p.2) retained this species in *Achilleodinium*.

The parenthetic statement after "subsequently *Baltisphaeridium*" indicates that the entry for *Baltisphaeridium biformoides* can be found in Appendix A.

Names or combinations that are not validly published or illegitimate are similarly indicated. Where a species has been questionably assigned to a genus, this is indicated in the "sequencing"

statement and in a "questionable assignment" statement. For example, the entry for *Canningia? granulata* in part reads as follows:

Originally *Canningia*, subsequently (and now) *Canningia?*. Questionable assignment: Stover and Evitt (1978, p.25), as a problematic species.

Where taxa have changed rank, this is reflected in the "sequencing" statement. For example, the statement for *Sophismatia crassiramosa* is:

Originally *Wetzeliella tenuivirgula* var. *crassiramosa*, subsequently *Wetzeliella tenuivirgula* subsp. *crassiramosa*, thirdly *Kisselevia tenuivirgula* subsp. *crassiramosa*, fourthly *Kisselevia crassiramosa*, fifthly *Charlesdownia crassiramosa*, sixthly (and now) *Sophismatia crassiramosa*.

In such cases, the full taxon names, rather than just generic names, are included for clarity.

In cases where a motile equivalent for a cyst can be identified, we have provided this information. For example, under the entry for *Tuberculodinium vancampoae*, we include the statement:

Motile equivalent: *Pyrophacus steinii* (Schiller, 1935) Wall and Dale, 1971, according to Matsuoka et al. (1989, p.94).

Note on Citations

With regard to reference citations, following Xu Zhaoran and Nicolson (1992), we give names of Chinese and Korean authors in full: i.e. "Mao Shaozhi" rather than just "Mao". We thus also cite Chinese names with family name first and personal name second ("Mao Shaozhi") as they themselves would cite the name, hence avoiding the nowadays common (but in our view discourteous) temptation to westernize the name ("Shaozhi Mao").

Throughout the Index, author citations are given as they appeared at publication. An example is Jiabo (1978). The word Jiabo, used on the publication, was given as a collective

name for the authors. We were asked by He Chengquan, prior to publication of the 1981 Index, to list the individual contributors: thus, *Bohaidina* Jiabo would be cited as *Bohaidina* Sung Zhichen, He Chengquan, Qian Zeshu, Pan Zhaorin, Zheng Guoguang and Zheng Yuefang. Unfortunately, we could not accede to this request since, in accordance with ICN (then ICBN) Article 46.2, we should maintain the integrity of the protologue, which cites the authorship as "Jiabo".

GLOSSARY

autonym: According to ICN Article 26.1: "The name of any infraspecific taxon that includes the type of the ... legitimate name of the species to which it is assigned is to repeat the specific epithet unaltered as its final epithet, not followed by an author citation. Such names are termed autonyms" An autonym may be a subspecies, variety or form; and the taxon that an autonym represents may be referred to as the "type subspecies", "type variety" or "type form" of the species. Subspecific taxa not including the type species are most appropriately compared with the type infraspecific taxon, not with the species.

basionym: The first validly published, legitimate name of a taxon.

Code: An abbreviation for the International Code of Nomenclature for Algae, Fungi, and Plants (McNeill et al., 2012; the Melbourne Code). Previous editions of the Code were published as the International Code for Botanical Nomenclature (see Williams and Fensome 2016 for further discussion).

combination not validly published: statement used when a species or infraspecific taxon with a validly published basionym is assigned to another genus or species and the combination is not validly published.

comb. nov., combinatio nova: Latin, new combination: "... a combination ... validly published ... for the first time, and based on a previously ... validly published combination (basionym

...), from which the word peculiar to the taxon (epithet ...) is transferred ..." (Jeffrey, 1977, p.57).

compound name/epithet: A compound name or epithet is one that combines elements from two or more words, e.g. "*conispiniferum*" in *Hystrichosphaeridium conispiniferum*. Compound epithets for species and infraspecific taxa, regardless of whether their components are nouns or adjectives, are generally made to agree with the gender of the generic name. See further discussion under Orthography and Gender above.

correct name: "... the correct name of a taxon with a particular circumscription, position and rank is the legitimate name which must be adopted for it under the rules" (ICN Article 6.6.) The one senior, validly published and legitimate name among a group of names, legitimate and validly published or otherwise, that are considered to be taxonomic synonyms.

description: "... a statement of the attributes of a specimen or taxon" (Jeffrey, 1977, p.58).

diagnosis: "... a statement of that which in the opinion of its author distinguishes the taxon from others" (ICN Article 37.2). A statement, terse by comparison to a description, that is restricted to answering the question "How is this taxon different from other described taxa?"

emend., emendatus, emendavit, emendavunt: Latin: "... altered (by); "indicates a change in circumscription of a taxon without exclusion of the type of its name: the abbreviation emend. follows the authority [i.e. original author of the taxon] and precedes the name of the author who effected the change." (Jeffrey, 1977, p.59.) We prefer to use the English word "emendation". Especially in palynology, emendations have been cited as if they were part of the name of the taxon. However, emendations have no formal status under the ICN (see discussion above relating to ICN Article 47.1).

emendation: see "emend."

epithet: "... a word, other than a generic name or a term indicative of rank, forming part of a combination" (Jeffrey, 1977, p.59.) For example, in the name *Gonyaulacysta jurassica* subsp. *desmos*, the words "*jurassica*" and "*desmos*" are the specific and subspecific epithets respectively.

epitype: "... a specimen ... selected to serve as an interpretative type when the holotype, lectotype or ... neotype ..." or any protologue material are "... demonstrably ambiguous ..." (Article 9.8). Article 9.20 specifies that the author who first designates an epitype must be followed, and a new epitype may be designated only if the original epitype is lost, destroyed, or in conflict with the protologue.

ex: Latin: "... from, according to ... used to connect two author citations, the second of which validly published a name proposed but not validly published by the first." (Jeffrey, 1977, p.59.) For example, the authorship of the species *Areoligera medusettiformis* is "Wetzel, 1933b ex Lejeune-Carpentier, 1938[a]". The name *Hystriosphera penicillata* forma *medusettiformis* was not validly published in Wetzel (1933b); it was subsequently validated by Lejeune-Carpentier (1938a). It is technically correct, but less informative (and courteous), to give the citation as *Areoligera medusettiformis* Lejeune-Carpentier, 1938a.

form, forma: The rank of infraspecific taxa immediately below variety.

holotype: "... the one specimen ... used by the author, or designated by the author as the nomenclatural type" of a species or infraspecific taxon (ICN Article 9.1).

homonym: "... a name identical in orthography with another (or treated as such ...) and based on a different type" (Jeffrey, 1977, p.61). For example, the dinoflagellate generic name *Speetonia* Duxbury, 1977 is a junior homonym of the coccolith generic name *Speetonia* Black, 1971. Names with similar pronunciation but different spellings are generally not considered to be homonyms; for example *Danea* Morgenroth, 1968 is not considered a homonym of *Danaea* Smith 1793.

ICBN.: Previous editions of the ICN (see below) were called the International Code of Botanical Nomenclature.

ICN: The International Code of Nomenclature for Algae, Fungi, and Plants (Melbourne Code) (McNeill et al., 2012). See also ICBN. Changes to a Code must be proposed to the General Committee, generally via publication in the journal *Taxon*. Proposals concerning fossils and (modern) algae are referred to special committees for the respective groups for consideration and recommendations. Changes to the Code, based on this process, must be validated at an International Botanical Congress, these being held usually every six years.

ICZN: International Code of Zoological Nomenclature (Ride et al., 2012).

illegitimate name: "... a validly published name that is not in accordance with the rules in such a way that it must not be taken into consideration for the purposes of priority (except for the purposes of homonymy ...) when the correct name of a taxon is being decided." (Jeffrey, 1977, p.65.) Note that names that are not validly published can be referred to as "not legitimate" but not "illegitimate". Illegitimate names cannot be re-used, since a homonym would be created; if a name is simply "not legitimate", it may be validated and thus rendered legitimate as long as it is neither a homonym nor includes the type of an earlier name.

junior homonym: "... the later [validly] published of two homonyms" (Jeffrey, 1977, p.61).

junior synonym, junior taxonomic synonym: see "nomenclatural synonym" and "taxonomic synonym".

lectotype: "... a specimen ... designated from the original material as the nomenclatural type ... when no holotype was indicated at the time of publication [or] when it is missing..." (ICN Article 9.2).

legitimate name: a name "... that is in accordance with the rules ..." (ICN Article 6.5). Note that legitimate in the sense of the ICN is not the converse of illegitimate (which see).

misspelling: an unintentional, incorrect spelling of a taxon name.

name not validly published: a name that is not in accordance with Articles 32 to 45 of the ICN.

neotype: "... a specimen ... selected to serve as nomenclatural type as long as all of the material on which the name of the taxon was based is missing" (ICN Article 9.7).

new combination: see comb. nov.

new name: "A new name published as a replacement name (... nomen novum) for an older name is typified by the type of the older name ..." (ICN Article 7.4).

new species: a species name validly published for the first time.

N.I.A.: noun in apposition; refers to the use of the substantive as a specific or infraspecific epithet of a species name. The nominative orthography ("original correct spelling") of such an epithet is retained, regardless of the gender of the generic name — e.g. "*Cordosphaeridium cantharellus*" not "*Cordosphaeridium cantharellum*". ("*Cantharellus*" is a genus of mushroom — all generic names are nouns.)

nomenclatural synonym: a synonym of the same rank and based on the same type; in the ICZN the equivalent term is objective synonym. An earlier, validly published nomenclatural synonym is a "nomenclatural senior synonym" relative to a later, validly published nomenclatural synonym, which is thus a "nomenclatural junior synonym". (See also the discussion above under ICN Article 52.)

nomenclatural type: "A nomenclatural type ... is that element to which the name of a taxon is permanently attached, whether as a correct name or as a synonym. The nomenclatural type is not necessarily the most typical or representative element of a taxon" (ICN Article 7.2). See also "holotype" and "type".

nom. nov. subst. pro: Latin, a new name in substitution for. This Latin phrase is used in the publication in which the new name is proposed; subsequent publications should use the term "nom. subst. pro".

nom. nud., nomen nudum: Latin for “naked name”; a name that is not validly published. In the Index we prefer the clearer equivalent "name not validly published".

nom. subst. pro: Latin, a name in substitution for. This Latin phrase is used to signify replacement names proposed in earlier publications. We prefer to use the term "substitute name" in this Index.

Now redundant: indicates an autonym that has been required in the past but is no longer needed because the species currently contains no other correct (“active”) infraspecific taxa .

objective synonym: the ICZN term for a nomenclatural synonym. Also termed obligate synonym.

obligate synonym: see objective synonym.

original material: "... those specimens and illustrations ... upon which it can be shown that the description or diagnosis validating the name was based ..." (ICN Article 9.3).

orthographic variant: an incorrect, but intentional spelling of a name, as opposed to an unintentional misspelling.

protologue: "... everything associated with a name at its valid publication, i.e. description or diagnosis, illustrations, references, synonymy, geographical data, citation of specimens, discussion, and comments" (ICN, footnote to Recommendation 8A.4.)

senior homonym: "... the earlier published of two homonyms" (Jeffrey, 1977, p.61).

senior synonym; senior taxonomic synonym: see nomenclatural synonym and taxonomic synonym.

sp. nov., species nova: Latin, new species; indicates a species name validly published for the first time.

stat. nov., status novus: Latin, new status; "... used in citation to indicate that a taxon has been altered in rank but retains in its name the epithet from its name in the former rank" (Jeffrey, 1977, p.69).

subjective synonym: the ICZN term for taxonomic synonym.

subsp.: subspecies: the rank of infraspecific taxa immediately below species.

substitute name: A replacement name substituting for an illegitimate name.

synonym: "One of two or more names applied to the same taxon" (Jeffrey, 1977, p.70). In the Index, without further qualifiers, "synonym" refers to a taxonomic synonym.

tautonym: a name of a species in which the specific epithet exactly repeats the generic name.

taxonomic synonym: a synonym based on a different type; in the ICZN the equivalent term is subjective synonym. An earlier taxonomic synonym is a "taxonomic senior synonym" relative to a later, validly published taxonomic synonym, which is thus a "taxonomic junior synonym". (The terms junior taxonomic synonym and senior taxonomic synonym are also used.)

type (of a genus): "The type of a name of a genus ... is the type of the name of a species" (ICN Article 10.1.) See holotype.

type species: the now informal designation of the correct name of the species that includes the type of the generic name. See explanation of the symbols "*" and "+" below.

validly published: In order to be validly published, a name of a taxon (autonyms excepted) must be in accordance with ICN articles 32 to 45. Requirements for the valid publication of a name include effective publication (Articles 29–31), the provision of a description or diagnosis or by a reference to a previously and effectively published description or diagnosis, and the designation of a type. For a more comprehensive summary of articles relating to valid publication, see above.

var., varietas: Latin, variety. The rank of infraspecific taxa immediately below subspecies.

*: species containing the type of the genus, as designated at the valid publication of the generic name.

+: the taxonomic senior synonym of the species name containing the nomenclatural type of the genus. Thus, correct (in the sense of the ICN), but not the originally designated name of the "type species".

ACKNOWLEDGEMENTS

Updating the Index after a lapse of twelve years was a massive task that would have been impossible without the unstinted support of numerous colleagues. These include: Peter Bijl, Henk Brinkhuis, Chris Clowes, Erica Crouch, Stijn De Schepper, Karen Dybkjær, Lucy Edwards, Malte Elbrachter, Susanne Feist-Burkhardt, Rahul Garg, Marc Gottschling, Raquel Guerstein, Rex Harland, Claus Heilmann-Clausen, Martin Head, Alina Iakovleva, Laurent Londeix, Stephan Louwye, Daniel Mantle, Fabienne Marret-Davies, Edwige Masure, Francine McCarthy, Kenneth Mertens, Peta Mudie, Dirk Munsterman, Henrik Nøhr-Hansen, Martin Pearce, Daniel Peyrot, Michael Prauss, Joe Prebble, Jim Riding, André Rochon, Francesca Sangiorgi, Paul Schioler, Hamid Slimani, Appy Sluijs, Ali Soliman, Michael Streng, Gerard

Versteegh, Karin Zonneveld. We apologize to anyone we inadvertently omitted. Susanne Feist-Burkhardt pointed out some errors in our references to the papers by C.G. Ehrenberg in previous versions of the Index and assisted us in correcting these mistakes; however, any errors that remain are fully our responsibility. Malte Elbrächter, Marc Gottschling and Michael Streng were towers of strength in helping us to update the entries for the calcareous dinoflagellate cysts and in providing us with several, otherwise inaccessible reprints. We owe an especial debt of gratitude to Michael for responding to our numerous queries promptly and expertly. We are grateful to Jennifer Galloway, Raquel Guerstein and Martin Head for reviewing all or parts of the manuscript. We are indebted to Bill MacMillan and Nelly Koziel for technical support. And we thank Judi Lentin, Jim Riding and Bob Clarke for managing the publication aspects of both the Index and DINOFLAJ. Finally, we are grateful to the Geological Survey of Canada (GSC) and Saint Mary's University for providing the facilities for production of this edition of the Index. Indeed there would not be an Index, without the continuing support of the GSC since 1973. This is ESS Contribution no. 20160153.

MAIN INDEX

"**ABANTOSPHAERIDIUM**" Banerjee and Rawat, 1991, p.42. **Name not validly published**: no description.

ABRATOPDINIUM Mao Shaozhi and Mohr, 1992, p.317–318. Type: Mao Shaozhi and Mohr, 1992, pl.1, fig.1, as *Abratopdinium kerguelense*.

cardioforme Mao Shaozhi and Mohr, 1992, p.318, pl.1, figs.3–4. Holotype: Mao Shaozhi and Mohr, 1992, pl.1, fig.4. Age: late Campanian–early Maastrichtian.

***kerguelense** Mao Shaozhi and Mohr, 1992, p.318, pl.1, figs.1–2,6. Holotype: Mao Shaozhi and Mohr, 1992, pl.1, fig.1. Age: late Campanian–early Maastrichtian.

"**ACANTHAULAX**" Sarjeant, 1968, p.227. Emendations: Sarjeant, 1982b, p.46; Brenner, 1988, p.33. Substitute name for *Acanthogonyaulax* Sarjeant, 1966b, p.132 (an illegitimate name). **Taxonomic senior synonym**: *Cribroperidinium*, according to Poulsen (1996, p.71). Taxonomic junior synonym: *Meristaulax* Sarjeant, by implication in Brenner (1988, p.35), who included the type of *Meristaulax* Sarjeant in *Acanthaulax*. Type: Klement, 1960, pl.5, figs.10–11, as *Gonyaulax venusta*.

"**acanthosphaera**" (Sarjeant, 1961a, p.94–95, pl.13, fig.14; text-fig.4) Sarjeant, 1968, p.227. Emendation: Sarjeant, 1976c, p.12, as *Meiourogonyaulax? acanthosphaera*. Holotype: Sarjeant, 1961a, pl.13, fig.14; text-fig.4; Sarjeant, 1976c, pl.5, figs.2,4. **NOW** *Meiourogonyaulax?*. Originally *Gonyaulax* (Appendix B), subsequently *Acanthogonyaulax* (combination not validly published), thirdly *Acanthaulax*, fourthly *Meiourogonyaulax*, fifthly (and now) *Meiourogonyaulax?*, sixthly *Lithodinia*, seventhly *Lithodinia?*. Age: early Oxfordian.

"**aceras**" (Eisenack, 1958a, p.391, pl.21, figs.1–2) Stover and Evitt, 1978, p.137. Emendation: Sarjeant, 1985a, p.57,59, as *Cribroperidinium aceras*. Holotype: Eisenack, 1958a, pl.21, fig.1; Sarjeant, 1985a, pl.4, figs.1–2; Jan du Chêne et al., 1986a, pl.2, figs.6–7. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta?* (combination not validly published), thirdly *Leptodinium*, fourthly *Acanthaulax?*, fifthly (and now) *Cribroperidinium*. Questionable assignment: Stover and Evitt (1978, p.137). Age: Aptian.

"**aculeata**" (Klement, 1960, p.42, pl.5, figs.6–9; text-fig.21) Stover and Evitt, 1978, p.137. Holotype: Klement, 1960, pl.5, figs.6–7. **NOW** *Tehamadinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Acanthaulax*, fourthly *Occisucysta*, fifthly (and now) *Tehamadinium*. Age: early Kimmeridgian.

"**angulosa**" (Gitmez, 1970, p.252, pl.2, figs.4–5; text-figs.7A–B) Stover and Evitt, 1978, p.137. Holotype: Gitmez, 1970, pl.2, figs.4–5; text-figs.7A–B; Jan du Chêne et al., 1986a, pl.2, figs.11–15. **NOW** *Cribroperidinium*. Originally *Gonyaulacysta*, subsequently *Acanthaulax*, thirdly *Meristaulax* Sarjeant, fourthly *Acanthaulax?*, fifthly *Rhynchodiniopsis*, sixthly (and now) *Cribroperidinium*. Questionable assignment: Jan du Chêne et al. (1986a, p.26). Taxonomic senior synonym: *Gonyaulax* (now *Cribroperidinium*) *granulata*, according to Fisher and Riley (1980, p.321) — however, Sarjeant and Gocht in Sarjeant (1984a, p.160) retained *Acanthaulax?* (as *Meristaulax*, now *Cribroperidinium*) *angulosa*. Age: early Kimmeridgian.

"**areolata**" (Sarjeant, 1961a, p.95–96, pl.13, fig.13; text-fig.5) Riley and Fenton, 1982, p.199. Holotype: Sarjeant, 1961a, pl.13, fig.13; text-fig.5; Jan du Chêne et al., 1986a, pl.3, figs.1–2. **Combination illegitimate** — **nomenclatural senior synonym**: *Gonyaulacysta scarburghensis*. **NOW** *Trichodinium scarburghense*. Originally *Gonyaulax areolata* (name illegitimate; Appendix B), subsequently *Gonyaulacysta scarburghensis*, thirdly *Gonyaulacysta areolata* (combination illegitimate), fourthly *Acanthaulax areolata* (combination illegitimate), fifthly *Acanthaulax scarburghensis*, sixthly *Liesbergia scarburghensis*, seventhly (and now) *Trichodinium scarburghense*. Taxonomic junior synonym: *Acanthaulax senta*, according to Berger (1986, p.343). This combination was not validly published in Riley and Fenton (1980, p.340), since these authors did not reference the basionym. Age: late Callovian–early Oxfordian.

"*compta*" (Duxbury, 1980, p.122–123, pl.2, figs.1–2,4) Sarjeant, 1982b, p.47. Holotype: Duxbury, 1980, pl.2, figs.1–2,4; Jan du Chêne et al., 1986a, pl.10, figs.9–10. Originally *Gonyaulacysta*, subsequently *Cribroperidinium*, thirdly *Acanthaulax*, fourthly *Apteodinium*. **Taxonomic senior synonym:** *Millioudodinium* (now *Cribroperidinium*) *spinoreticulatum*, according to Lucas-Clark (1987, p.178). Age: middle-late Barremian.

"*crispa*" (Wetzel, 1967a, p.870, pl.15, figs.4a–b) Woollam and Riding, 1983, p.3. Emendations: Sarjeant, 1980b, p.119–120, as *Hystrichogonyaulax crispa*; Fenton, 1981, p.255,257, as *Cribroperidinium crispum*. Holotype: Wetzel, 1967a, pl.15, figs.4a–b; Dietz et al., 1999, text-fig.5a. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly *Hystrichogonyaulax*, fifthly (and now) *Cribroperidinium*, sixthly *Acanthaulax*. Age: Middle Jurassic.

"?*downiei*" (Sarjeant, 1960a, p.138–139) Sarjeant, 1976c, p.6. Holotype: Downie, 1957, pl.20, fig.10, as *Hystrichosphaeridium pattei*; Jan du Chêne et al., 1986a, pl.3, figs.7–9. **NOW** *Cribroperidinium*?. Originally *Baltisphaeridium* (Appendix A), subsequently *Acanthaulax*, thirdly *Acanthaulax*?, fourthly *Cyclonephelium*, fifthly (and now) *Cribroperidinium*? Questionable assignment: Stover and Evitt (1978, p.137) — however, Sarjeant (1982b, p.47) retained the species in *Acanthaulax* without question. Age: Kimmeridgian.

"*granulata*" (Klement, 1960, p.39–41, pl.4, figs.10–13; text-figs.18–20) Brenner, 1988, p.35. Emendation: Sarjeant, 1984a, p.161–162, as *Meristaulax granulata*. Holotype: Klement, 1960, pl.4, figs.10–11; text-figs.18–20; Fensome et al., 1995, figs.1–2 — p.1525; disintegrated according to Sarjeant (1984a, p.162). Lectotype (designated by Sarjeant, 1984a, p.162): Sarjeant, 1984a, pl.3, figs.3–4; text-fig.3; Jan du Chêne et al., 1986a, pl.27, figs.7–10; Brenner, 1988, pl.3, figs.2a–b; Fensome et al., 1995, figs.5–6 — p.1525 — however, Brenner (1988, p.35) argued that this specimen is not conspecific with the holotype. Lectotype (designated by Brenner, 1988, p.35): Brenner, 1988, pl.1, figs.3a–c; Fensome et al., 1995, figs.7–9 — p.1525. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Cribroperidinium*, fourthly *Rhynchodiniopsis*, fifthly *Meristaulax* Sarjeant, sixthly *Acanthaulax*. Poulsen (1996, p.73) retained this species in *Cribroperidinium*. Taxonomic junior synonyms: *Gonyaulax* (as *Cribroperidinium*) *venusta*, according to Schrank (2005, p.56); *Gonyaulax* (now *Cribroperidinium*) *granuligera*, according to Fisher and Riley (1980, p.321) — however, Sarjeant (1984a, p.156–158) retained *Gonyaulax* (as *Cryptarchaeodinium*) *granuligera*; *Gonyaulacysta* (as *Acanthaulax*?, now *Cribroperidinium*) *angulosa*, according to Fisher and Riley (1980, p.321) — however, Sarjeant and Gocht in Sarjeant (1984a, p.160) retained *Gonyaulacysta* (as *Meristaulax*) *angulosa*. For further discussion, see *Cribroperidinium granulatum*. Age: middle Oxfordian–early Kimmeridgian.

"*granuligera*" (Klement, 1960, p.41–42, pl.5, figs.4–5) Brenner, 1988, p.35–36. Emendation: Sarjeant, 1984a, p.156, as *Cryptarchaeodinium granuligerum*. Holotype: Klement, 1960, pl.5, figs.4–5; Sarjeant, 1984a, pl.1, figs.3–4; text-fig.1; Jan du Chêne et al., 1986a, pl.27, figs.11–14. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Cribroperidinium*, fourthly *Rhynchodiniopsis*, fifthly *Cryptarchaeodinium*, sixthly *Acanthaulax*. Taxonomic senior synonym: *Gonyaulax* (as *Gonyaulacysta*) *granulata*, according to Fisher and Riley (1980, p.321) — however, Sarjeant (1984a, p.156) retained *Acanthaulax* (as *Cryptarchaeodinium*) *granuligera*. Age: middle Oxfordian–early Kimmeridgian.

"*magna*" (Jain, 1977b, p.175–176, pl.4, figs.40–42) Khowaja-Ateequzaman, 1993, p.131. Holotype: Jain, 1977b, pl.4, figs.41–42; Jan du Chêne et al., 1986a, pl.122, fig.8. **NOW** *Cribroperidinium*. Originally *Trichodinium*, subsequently *Acanthaulax*, thirdly (and now) *Cribroperidinium*. Age: early Albian.

"*miocenica*" Zevenboom and Santarelli in Zevenboom, 1995, p.149, pl.1, figs.1–6. Holotype: Zevenboom, 1995, pl.1, figs.1–3. **Name not validly published:** considered a manuscript name by the authors. Age: Tortonian–Messinian.

"?*paliuros*" (Sarjeant, 1962a, p.260, pl.1, fig.7; text-fig.5) Sarjeant, 1968, p.227–228. Holotype: Sarjeant, 1962a, pl.1, fig.7. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Acanthogonyaulax* (combination not validly published), thirdly *Acanthaulax*, fourthly *Acanthaulax*?, fifthly (and now) *Cribroperidinium*?. Questionable assignment: Stover and Evitt (1978, p.137). Age: Oxfordian.

"*saetosa*" Wilson in Masure, 1985, p.205. **Name not validly published:** no description or illustration. **Taxonomic senior synonym:** *Acanthaulax* (now *Cribroperidinium*) *wilsonii*, according to Slimani (2001a, p.192).

"*scarburghensis*" (Sarjeant, 1964b, p.472–473) Lentin and Williams, 1985, p.2. Holotype: Sarjeant, 1961a, pl.13, fig.13; text-fig.5; Jan du Chêne et al., 1986a, pl.3, figs.1–2. **NOW** *Trichodinium scarburghense*. Originally *Gonyaulax areolata* (name illegitimate; Appendix B), subsequently *Gonyaulacysta scarburghensis*, thirdly *Gonyaulacysta areolata* (combination illegitimate), fourthly *Acanthaulax areolata* (combination illegitimate), fifthly *Acanthaulax scarburghensis*, sixthly *Liesbergia scarburghensis*, seventhly (and now) *Trichodinium scarburghense*. *Gonyaulacysta scarburghensis* is the substitute name for *Gonyaulax areolata* Sarjeant, 1961a, p.95–96, pl.13, fig.13; text-fig.5. Taxonomic junior synonym: *Acanthaulax senta*, according to Berger (1986, p.343) and Kunz (1990, p.14). Age: late Callovian–early Oxfordian.

"*senta*" Drugg, 1978, p.62, pl.3, fig.13; pl.4, figs.1–3. Holotype: Drugg, 1978, pl.4, fig.2; Jan du Chêne et al., 1986a, pl.4, figs.1–2. **Taxonomic senior synonym:** *Gonyaulacysta* (now *Trichodinium*) *scarburghensis*, according to Berger (1986, p.343) and Kunz (1990, p.14). Age: Oxfordian.

"*septata*" Hultberg, 1985c, p.104–105, pl.1, fig.C. Holotype: Hultberg, 1985c, pl.1, fig.C. **NOW** *Cribroperidinium*. Originally *Acanthaulax*, subsequently (and now) *Cribroperidinium*. Age: late Maastrichtian–Danian.

"?*spinossissima*" (Deflandre, 1939a, p.179, pl.9, fig.11 ex Deflandre and Cookson, 1955, p.258) Sarjeant, 1972, p.22. Holotype: Deflandre, 1939a, pl.9, fig.11. **NOW** *Pareodinia*?. Originally *Palaeoperidinium* (name not validly published), subsequently *Palaeohystrichophora*, thirdly *Acanthaulax*?, fourthly *Pareodinia*, fifthly (and now) *Pareodinia*?. Questionable assignment: Sarjeant (1972, p.22). Age: Late Jurassic.

"*systemmatus*" (Gitmez and Sarjeant, 1972, p.204–205, pl.5, figs.7–8) Brenner, 1988, p.36. Holotype: Gitmez and Sarjeant, 1972, pl.5, figs.7–8; Jan du Chêne et al., 1986a, pl.29, figs.4–7. Originally *Gonyaulacysta*, subsequently *Cribroperidinium*, thirdly *Millioudodinium*, fourthly *Cribroperidinium*?, fifthly *Acanthaulax*. **Taxonomic senior synonym:** *Gonyaulacysta* (as and now *Cribroperidinium*) *globata*, according to Poulsen (1996, p.72). Age: early Kimmeridgian.

"?*tenuiceras*" (Eisenack, 1958a, p.389–391, pl.21, figs.14–15; pl.22, figs.1–3; pl.24, fig.2; text-figs.4a–c,5) Sarjeant, 1985a, p.63. Emendations: Sarjeant, 1985a, p.63,65, as *Acanthaulax tenuiceras*; Jan du Chêne et al., 1986b, p.29–30, as *Tehamadinium tenuiceras*. Holotype: Eisenack, 1958a, pl.21, fig.15; Sarjeant, 1985a, pl.6, figs.1–2; text-fig.3; Jan du Chêne et al., 1986a, pl.118, fig.1; Jan du Chêne et al., 1986b, pl.24, fig.5. **NOW** *Cribroperidinium*?. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*?, thirdly *Diacanthum*, fourthly *Occisucysta*, fifthly *Acanthaulax*?, sixthly *Tehamadinium*, seventhly (and now) *Cribroperidinium*?. Questionable assignment: Sarjeant (1985a, p.63). Taxonomic junior synonym: *Occisucysta victorii*, according to Pöthe de Baldis and Ramos (1988, p.33). Age: late Barremian–Aptian.

"*venusta*" (Klement, 1960, p.44–45, pl.5, figs.10–13; text-fig.22) Sarjeant, 1968, p.227. Holotype: Klement, 1960, pl.5, figs.10–11. **Taxonomic senior synonym:** *Gonyaulax* (as *Cribroperidinium*) *granulata*, according to Schrank (2005, p.56). Originally *Gonyaulax* (Appendix B), subsequently *Acanthogonyaulax* (combination not validly published), thirdly *Acanthaulax*, fourthly *Gonyaulacysta*, fifthly *Cribroperidinium*. Age: middle Oxfordian–Kimmeridgian.

"*wilsonii*" Yun Hyesu, 1981, p.7–8, pl.1, figs.2–3,6–7a–b. Holotype: Yun Hyesu, 1981, pl.1, fig.6; Jan du Chêne et al., 1986a, pl.2, fig.18; Fensome et al., 1991, fig.3 — p.773. **NOW** *Cribroperidinium*. Originally *Acanthaulax*, subsequently (and now) *Cribroperidinium*. Taxonomic junior synonym: *Acanthaulax saetosa* (name not validly published), according to Slimani (2001a, p.192). Age: late Campanian.

"**ACANTHOGONYAULAX**" Sarjeant, 1966b, p.132. **Name illegitimate** — **senior homonym:** *Acanthogonyaulax* Kofoid, 1911. **Substitute name:** *Acanthaulax*. Type: Klement, 1960, pl.5, figs.10–11, as *Gonyaulax venusta*.

"*acanthosphaera*" (Sarjeant, 1961a, p.94–95, pl.13, fig.14; text-fig.4) Sarjeant, 1966b, p.132. Emendation: Sarjeant, 1976c, p.12, as *Meiourogonyaulax? acanthosphaera*. Holotype: Sarjeant, 1961a, pl.13, fig.14; text-fig.4; Sarjeant, 1976c, pl.5, figs.2,4. **Combination not validly published:** basionym not fully referenced. **NOW** *Meiourogonyaulax*?. Originally *Gonyaulax* (Appendix B), subsequently *Acanthogonyaulax* (combination not

validly published), thirdly *Acanthaulax*, fourthly *Meiourogonyaulax*, fifthly (and now) *Meiourogonyaulax?*, sixthly *Lithodinia*, seventhly *Lithodinia?*. Age: early Oxfordian.

"*paliuros*" (Sarjeant, 1962a, p.260, pl.1, fig.7; text-fig.5) Sarjeant, 1966b, p.132. Holotype: Sarjeant, 1962a, pl.1, fig.7. **Combination not validly published:** basionym not fully referenced. **NOW** *Cribroperidinium?*. Originally *Gonyaulax* (Appendix B), subsequently *Acanthogonyaulax* (combination not validly published), thirdly *Acanthaulax*, fourthly *Acanthaulax?*, fifthly (and now) *Cribroperidinium?*. Age: Oxfordian.

"*venusta*" (Klement, 1960, p.44–45, pl.5, figs.10–13; text-fig.22) Sarjeant, 1966b, p.132. Holotype: Klement, 1960, pl.5, figs.10–11. **Taxonomic senior synonym:** *Gonyaulax* (as *Cribroperidinium*) *granulata*, according to Schrank (2005, p.56). Originally *Gonyaulax* (Appendix B), subsequently *Acanthogonyaulax* (combination not validly published), thirdly *Acanthaulax*, fourthly *Gonyaulacysta*, fifthly *Cribroperidinium*. Age: middle Oxfordian–Kimmeridgian.

ACHILLEODINIUM Eaton, 1976, p.234. Taxonomic senior synonym: *Florentinia*, according to Duxbury (1980, p.119), Below (1982c, p.7) and Duxbury (1983, p.46) — however, Lentin and Williams (1981, p.1) and Lentin and Williams (1985, p.2) retained *Achilleodinium*. Type: Eisenack, 1954b, pl.11, fig.18, as *Hystrichosphaeridium biformoides*.

?*arboriforme* Marheinecke, 1992, p.55–56, pl.9, figs.7–8,10–11. Holotype: Marheinecke, 1992, pl.9, figs.7–8,10. Questionable assignment: Marheinecke (1992, p.55). Contrary to the opinion of Lentin and Williams (1993, p.4), this name was considered validly published by Williams et al. (1998, p.21). Age: early–late Maastrichtian.

bianii Hultberg, 1985c, p.105, pl.6, figs.F–H. Holotype: Hultberg, 1985c, pl.6, fig.F. Schiøler et al. (1997, p.83) considered this species to be a possible taxonomic junior synonym of *Kleithriasphaeridium truncatum*. Age: late Maastrichtian.

**biformoides* (Eisenack, 1954b, p.68, pl.11, figs.16–20) Eaton, 1976, p.234. Holotype: Eisenack, 1954b, pl.11, fig.18. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma*, fourthly (and now) *Achilleodinium*, fifthly *Florentinia*. Lentin and Williams (1981, p.2) retained this species in *Achilleodinium*. Age: late Eocene–early Oligocene.

fibrapendiculum Islam, 1983b, p.335, pl.1, figs.1–3; text-fig.5. Holotype: Islam, 1983b pl.1, figs.1–2; text-fig.5. Age: middle Eocene.

latispinosum (Davey and Williams, 1966b, p.88–89, pl.5, fig.8) Bujak et al., 1980, p.26. Holotype: Davey and Williams, 1966b, pl.5, fig.8; Bujak et al., 1980, pl.8, figs.7–9. Originally *Cordosphaeridium*, subsequently (and now) *Achilleodinium*, thirdly *Tityrosphaeridium?*. Lentin and Williams (1985, p.3) retained this species in *Achilleodinium*. Age: early Eocene.

palaeoeocenicum Khanna and Singh, 1981b, p.400,402, fig.3, no.1; text-fig.13. Holotype: Khanna and Singh, 1981b, fig.3, no.1. This name was a not validly published in Singh et al. (1979, p.35–36) and Khanna (1979, p.218), since in neither publication was a description provided. Age: early Eocene.

ACHOMOSPHAERA Evitt, 1963, p.163. Taxonomic senior synonym: *Spiniferites*, according to Duxbury (1983, p.54–55) — however, Lentin and Williams (1989, p.3) retained *Achomosphaera*. Taxonomic junior synonym: *Hystrichostrogylon*, by implication in Eaton (1976, p.237), who included the "type species", *Hystrichostrogylon membraniphorum*, in *Achomosphaera* — however, Stover and Evitt (1978, p.165) retained *Hystrichostrogylon*. Type: Deflandre, 1937b, pl.14 (al. pl.11), fig.5, as *Hystrichosphaeridium ramuliferum*.

alcicornu (Eisenack, 1954b, p.65, pl.10, figs.1–2; text-fig.5) Davey and Williams, 1966a, p.50. Holotype: Eisenack, 1954b, pl.10, fig.2. Originally *Hystrichosphaeridium*, subsequently (and now) *Achomosphaera*. Taxonomic junior synonyms: *Galea lychnea* and *Hystrichosphaeridium leptodermum*, both according to Sarjeant (1983, p.100–101).

May (1980, p.64) considered *Hystrichosphaera* (as *Spiniferites*) *pseudofurcatus* to be the possible taxonomic senior synonym of this species. Age: Oligocene.

"forma *alcicornu*". Autonym. Holotype: Eisenack, 1954b, pl.10, fig.2. **Now redundant.**

subsp. *alcicornu*. Autonym. Holotype: Eisenack, 1954b, pl.10, fig.2.

"forma *columnaeformis*" Aristova, 1971, p.117–118, pl.1, fig.2. Holotype: Aristova, 1971, pl.1, fig.2. **NOW** *Achomosphaera alcicornu* subsp. *columnaeformis*. Originally *Achomosphaera alcicornu* forma *columnaeformis*, subsequently (and now) *Achomosphaera alcicornu* subsp. *columnaeformis*. Age: Eocene.

subsp. *columnaeformis* (Aristova, 1971, p.117–118, pl.1, fig.2) Lentin and Williams, 1989, p.3. Holotype: Aristova, 1971, pl.1, fig.2. Originally *Achomosphaera alcicornu* forma *columnaeformis*, subsequently (and now) *Achomosphaera alcicornu* subsp. *columnaeformis*. Age: Eocene.

andalousiensis Jan du Chêne, 1977, p.112, pl.1, figs.1–4. Emendation: Jan du Chêne and Londeix, 1988, p.239, as *Achomosphaera andalousiensis*. Holotype: Jan du Chêne, 1977, pl.1, fig.1, lost according to Jan du Chêne and Londeix (1988, p.237). Lectotype: Jan du Chêne and Londeix, 1988, pl.1, figs.1–3, designated by Jan du Chêne and Londeix (1988, p.244). Originally (and now) *Achomosphaera*, subsequently *Spiniferites*. Head (1997, p.169) retained this species in *Achomosphaera*. Taxonomic junior synonyms: *Spiniferites septentrionalis*, according to Harland (1983, p.103–104) — however, Londeix et al. (2009, p.67–68) retained *Spiniferites septentrionalis*; *Spiniferites aquilonius*, according to Strauss in Strauss and Lund (1992, p.169). The synonymy of *Achomosphaera andalousiensis* and *Spiniferites septentrionalis* was questioned in Head and Wrenn (1992, p.2). Age: Miocene (Andalusian).

subsp. *andalousiensis*. Autonym. Holotype: Jan du Chêne, 1977, pl.1, fig.1, lost according to Jan du Chêne and Londeix (1988, p.237). Lectotype: Jan du Chêne and Londeix, 1988, pl.1, figs.1–3, designated by Jan du Chêne and Londeix (1988, p.244).

subsp. *suttonensis* Head, 1997, p.169,171, fig.4, nos.3–11; fig.15, nos.2–9. Holotype: Head, 1997, fig.4, nos.3–8. Age: middle Pliocene.

antleriformis Schiøler, 1993, p.102,104, pl.3, figs.1–6; text-figs.2a–c. Holotype: Schiøler, 1993, pl.3, fig.2; text-figs.2a–b. Age: Maastrichtian.

argesensis Demetrescu, 1989, p.51–54, pl.1, figs.1–6; pl.2, figs.1–4; text-fig.2; text-figs.3A–E. Holotype: Demetrescu, 1989, pl.1, figs.1–5; text-fig.2; text-figs.3A,C. Age: early Pliocene.

bullae Cookson and Eisenack, 1974, p.55, pl.23, fig.13. Holotype: Cookson and Eisenack, 1974, pl.23, fig.13. N.I.A. Age: Paleocene.

callosa Matsuoka, 1983b, p.128–129, pl.11, figs.6a–c,7a–b,8; text-figs.15A–B. Holotype: Matsuoka, 1983b, pl.11, figs.6a–c. Age: Pliocene.

"*cambræ*" Sah et al., 1970, p.144, pl.1, fig.3. Holotype: Sah et al., 1970, pl.1, fig.3. Originally *Achomosphaera*, subsequently *Spiniferites*. **Taxonomic senior synonym:** *Galea* (now *Spiniferites*) *twistingiensis*, by implication in Jain (1982, p.51), who considered *Achomosphaera cambræ* to be a taxonomic junior synonym (at subspecific rank) of *Hystrichosphaera ramosa* var. *multibrevis* (as *Spiniferites ramosus* var. *multibrevis*), which is now considered a taxonomic junior synonym (at specific rank) of *Galea* (now *Spiniferites*) *twistingiensis*. Age: Late Cretaceous.

"*communis*" (Corradini, 1973, p.151, pl.22, figs.1a–b; pl.33, figs.1,3) Sarjeant, 1981, p.122. Holotype: Corradini, 1973, pl.22, figs.1a–b. **NOW** *Cordosphaeridium*. Originally (and now) *Cordosphaeridium*, subsequently *Achomosphaera*. Lentin and Williams (1985, p.3) retained this species in *Cordosphaeridium*. Age: Late Cretaceous.

?*convexa* Sah et al., 1970, p.145–146, pl.1, figs.12–13. Holotype: Sah et al., 1970, pl.1, fig.12. Originally *Achomosphaera*, subsequently (and now) *Achomosphaera*?. Questionable assignment: Stover and Evitt (1978, p.139). Age: Late Cretaceous.

"?*cracenospinosa*" (Davey and Williams, 1966b, p.87, pl.3, fig.3) Sarjeant, 1981, p.123. Holotype: Davey and Williams, 1966b, pl.3, fig.3; Bujak et al., 1980, pl.7, fig.9. **NOW** *Cordosphaeridium*?. Originally *Cordosphaeridium*, subsequently (and now) *Cordosphaeridium*?, thirdly *Achomosphaera*?. Questionable assignment: Sarjeant (1981, p.123). Age: early Eocene.

crassipellis (Deflandre and Cookson, 1955, p.265, pl.6, figs.2–3; text-fig.20) Stover and Evitt, 1978, p.138. Holotype: Deflandre and Cookson, 1955, pl.6, figs.2–3. Originally *Hystrichosphaera*, subsequently *Spiniferites*, thirdly (and now) *Achomosphaera*. Taxonomic junior synonyms: *Achomosphaera recurvata* and *Hystrichosphaera* (subsequently *Spiniferites*) *membranosa*, according to Quattrocchio and Sarjeant (1996, p.116). May (1980, p.64) considered *Achomosphaera sagena* to be a possible taxonomic junior synonym of this species. Age: early Eocene.

danica (Wetzel, 1952, p.396–397, pl.A, figs.5–6; text-fig.8) Sarjeant, 1984c, p.129, pl.1, fig.4. Emendation: Sarjeant, 1984c, p.129–130, as *Achomosphaera danica*. Holotype: Wetzel, 1952, pl.A, fig.6; Dietz et al., 1999, text-fig.6b. Originally *Areoligera*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichosphaeridium*, fourthly *Cleistosphaeridium*?, fifthly (and now) *Achomosphaera*. Taxonomic senior synonym: *Areoligera senonensis*, according to Lejeune-Carpentier and Sarjeant (1981, p.15) — however, Sarjeant (1984c, p.129) retained *Achomosphaera danica*. Age: Paleocene.

?*delicata* Sah et al., 1970, p.144–145, pl.1, figs.4–5. Holotype: Sah et al., 1970, pl.1, fig.4. Originally *Achomosphaera*, subsequently (and now) *Achomosphaera*?. Questionable assignment: Stover and Evitt (1978, p.139). Age: Late Cretaceous.

expansa Stover and Hardenbol, 1994, p.33–34, pl.5, figs.30a–b, 31a–c; pl.6, figs.32a–b. Holotype: Stover and Hardenbol, 1994, pl.5, figs.30a–b. Age: Rupelian.

fenestra Kirsch, 1991, p.54–55, pl.2, figs.4, 6–12; text-figs.35a–b, 36a–j. Holotype: Kirsch, 1991, pl.2, figs.7–9. N.I.A. Age: early-middle Campanian.

?*globata* Sah et al., 1970, p.145, pl.1, figs.10–11. Holotype: Sah et al., 1970, pl.1, fig.10. Originally *Achomosphaera*, subsequently (and now) *Achomosphaera*?. Questionable assignment: Stover and Evitt (1978, p.139). Age: Late Cretaceous.

grallaeformis (Brosius, 1963, p.42, pl.5, fig.3; text-fig.2) Davey and Williams, 1969, p.4. Holotype: Brosius, 1963, pl.5, fig.3. Originally *Hystrichosphaeridium*, subsequently (and now) *Achomosphaera*, thirdly *Spiniferites* (combination not validly published). Taxonomic junior synonym: *Spiniferites solidago*, according to Strauss et al. (2001, p.412). This combination was not validly published in Davey and Williams (1966b, p.104), since these authors did not fully reference the basionym. Age: Oligocene.

granulata Mao Shaozhi, 1989, p.139, pl.28, figs.9–10. Holotype: Mao Shaozhi, 1989, pl.28, fig.10. Mao Shaozhi (1989, p.139) gave the citation "*Achomosphaera granurata* sp.nov.". Age: Quaternary.

heterostyla (Heisecke, 1970, p.238, 240, pl.5, figs.1–4; pl.6, figs.4–5) Stover and Evitt, 1978, p.138. Holotype: Heisecke, 1970, pl.5, figs.3–4; pl.6, fig.4. Originally *Hystrichosphaera*, subsequently *Spiniferites*, thirdly (and now) *Achomosphaera*. Age: Danian.

"*hirundo*" (Eisenack, 1958a, p.404–405, pl.24, fig.12) Davey and Williams, 1969, p.4. Emendation: Sarjeant, 1985a, p.76–77, as *Achomosphaera hirundo*. Holotype: Eisenack, 1958a, pl.24, fig.12. **NOW** *Cordosphaeridium*?. Originally *Hystrichosphaeridium*, subsequently *Achomosphaera*, thirdly *Lanternosphaeridium*, fourthly (and now) *Cordosphaeridium*?, fifthly *Spiniferites*. This combination was not validly published in Davey and Williams (1966b, p.104), since these authors did not fully reference the basionym. N.I.A. Age: Early Cretaceous.

"hyperacantha" (Deflandre and Cookson, 1955, p.264–265, pl.6, fig.7) Davey and Williams, 1969, p.4. Holotype: Deflandre and Cookson, 1955, pl.6, fig.7. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently *Achomosphaera*, thirdly (and now) *Spiniferites*. Taxonomic junior synonym (at specific rank): *Hystrichosphaera furcata* var. *multiplicata*, according to Matsuoka (1985a, p.35) — however, Londeix et al. (2009, p.66) retained both taxa. Motile equivalent: *Gonyaulax spinifera* complex, according to Matsuoka et al. (1989, p.94). Age: Miocene.

improcera Islam, 1983c, p.80–81, pl.1, figs.1–2. Holotype: Islam, 1983c, pl.1, fig.1. Age: early-middle Eocene.

linifera (Cookson and Eisenack, 1967b, p.253, pl.40, fig.9; pl.41, figs.7–8) Stover and Evitt, 1978, p.138–139. Holotype: Cookson and Eisenack, 1967b, pl.41, fig.8. Originally *Baltisphaeridium* (Appendix A), subsequently *Taeniophora*, thirdly (and now) *Achomosphaera*. Age: late Paleocene.

?**longispinosa** He Chengquan, 1991, p.148, pl.23, fig.16. Holotype: He Chengquan, 1991, pl.23, fig.16. Questionable assignment: He Chengquan (1991, p.148). Age: Paleocene–early Eocene.

?**malleofera** (White, 1842, p.37, pl.4, div.3, fig.7) Sarjeant, 1991, p.88. Holotype: White, 1842, pl.4, div.3, fig.7; Sarjeant, 1991, fig.4.6. Originally *Xanthidium* (Appendix A), subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Achomosphaera*?, fourthly *Hystrichosphaeridium* (combination not validly published). Questionable assignment: Sarjeant (1991, p.88). Age: Late Cretaceous.

marianneae (Philippot, 1949, p.56–57; text-fig.2) Stover and Evitt, 1978, p.139. Holotype: Philippot, 1949, text-fig.2. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Achomosphaera*. Age: Late Cretaceous.

subsp. **marianneae**. Autonym. Holotype: Philippot, 1949, text-fig.2.

subsp. **philippotii** Marheinecke, 1992, p.35, pl.4, fig.10. Holotype: Marheinecke, 1986, pl.2, fig.4, as *Achomosphaera* sp.; Marheinecke, 1992, pl.4, fig.10. Contrary to the opinion of Lentin and Williams (1993, p.7), Williams et al. (1998, p.24) considered this name to be validly published. Age: early–early late Maastrichtian.

"membraniphora" (Agelopoulos, 1964, p.674; text-figs.1–2) Eaton, 1976, p.237. Emendation: Eaton, 1976, p.237, as *Achomosphaera membraniphora*. Holotype: Agelopoulos, 1964, text-fig.1. **NOW** *Hystrichostrogylon*. Originally (and now) *Hystrichostrogylon*, subsequently *Achomosphaera*. Age: late Eocene.

microreticulata Salujha and Kindra, 1981, p.51, pl.2, fig.47. Holotype: Salujha and Kindra, 1981, pl.2, fig.47. Jain and Garg (1982, p.69) stated that this species is based on two incomplete specimens and that the name should be restricted to the holotype. Age: early Paleocene.

"microtriaina" (Klumpp, 1953, p.390, pl.17, figs.6–7) Sarjeant, 1981, p.110–112. Emendation: Sarjeant, 1981, p.110–112, as *Achomosphaera microtriaina*. Holotype: Klumpp, 1953, pl.17, figs.6–7; Sarjeant, 1981, pl.2, figs.1–2; text-fig.2. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly *Cordosphaeridium*?, fourthly *Polysphaeridium*, fifthly *Achomosphaera*, sixthly (and now) *Operculodinium*. Age: late Eocene.

minor He Chengquan, 1991, p.148, pl.23, fig.6; text-fig.31. Holotype: He Chengquan, 1991, pl.23, fig.6; text-fig.31. Age: Paleocene.

minuta He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989, p.37, pl.20, fig.7. Holotype: He Chengquan et al., 1989, pl.20, fig.7. Age: Early Tertiary.

multifurcata Jain and Tandon, 1981, p.7, pl.1, fig.10. Holotype: Jain and Tandon, 1981, pl.1, fig.10. Age: middle Eocene.

neptuni (Eisenack, 1958a, p.399, pl.26, figs.7–8; text-fig.8) Davey and Williams, 1966a, p.51–52. Emendations: Duxbury, 1983, p.55, as *Spiniferites neptuni*; Sarjeant, 1985a, p.89–90, 92, as *Florentinia? neptuni*. Holotype:

Eisenack, 1958a, pl.26, fig.7. Originally *Baltisphaeridium* (Appendix A), subsequently (and now) *Achomosphaera*, thirdly *Achomosphaera?*, fourthly *Spiniferites*, fifthly *Florentinia?*. Questionable assignment: Stover and Evitt (1978, p.139) — however, Lister and Batten (1988b, p.31–32) retained this species in *Achomosphaera* without question. Since the epithet is based on a familiar name with an existing Latin genitive, it ends in "i" rather than "ii" (I.C.N. Recommendation 60C.2). Age: Early Cretaceous.

"*operculata*" Sah et al., 1970, p.144, pl.1, figs.1–2. Holotype: Sah et al., 1970, pl.1, fig.1. **NOW** *Operculodinium*. Originally *Achomosphaera*, subsequently *Achomosphaera?*, thirdly (and now) *Operculodinium*. Questionable assignment: Stover and Evitt (1978, p.139). Age: Late Cretaceous.

pachyderma Heilmann-Clausen in Heilmann-Clausen and Thomsen, 1995, p.287–288, pl.10, figs.5–10. Holotype: Heilmann-Clausen and Thomsen, 1995, pl.10, figs.5–6. Age: early Aptian.

quadrata Antolinez-Delgado and Oboh-Ikuenobe, 2007, p.54–55, pl.1, fig.6. Holotype: Antolinez-Delgado and Oboh-Ikuenobe, 2007, pl.1, fig.6. Age: Paleocene–?earliest Eocene.

ramosasimilis (Yun Hyesu, 1981, p.14–15, pl.1, figs.1,8; text-fig.3b) Londeix et al., 1999, p.86. Holotype: Yun Hyesu, 1981, pl.1, fig.1; text-fig.3b; Fensome et al., 1991, figs.1–2 — p.719; fig.4 — p.721. Originally *Achomosphaera ramulifera* subsp. *ramosasimilis*, subsequently (and now) *Achomosphaera ramosasimilis*. Age: early Santonian.

ramosissima He Chengquan, 1991, p.149, pl.23, figs.10–11. Holotype: He Chengquan, 1991, pl.23, fig.10. Age: Paleocene.

**ramulifera* (Deflandre, 1937b, p.74, pl.14 [al. pl.11], figs.5–6; pl.17 [al. pl.14], fig.10) Evitt, 1963, p.163. Holotype: Deflandre, 1937b, pl.14 (al. pl.11), fig.5; Fensome et al., 1991, fig.1 — p.721; fig.1 — p.725. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (combination not validly published, Appendix A), thirdly (and now) *Achomosphaera*, fourthly *Spiniferites*. Lentin and Williams (1981, p.3) retained this species in *Achomosphaera*. Taxonomic junior synonym: *Hystrichosphaeridium rehdense*, according to Sarjeant (1983, p.97–99). Age: Late Cretaceous.

subsp. *gabonensis* (Boltenhagen, 1977, p.36–37, pl.3, figs.7a–b,8–9) Lentin and Williams, 1981, p.3. Holotype: Boltenhagen, 1977, pl.3, figs.7a–b; Fensome et al., 1993a, figs.1–2 — p.1209. Originally *Achomosphaera ramulifera* var. *gabonensis*, subsequently (and now) *Achomosphaera ramulifera* subsp. *gabonensis*. Age: Campanian–Maastrichtian.

"var. *gabonensis*" Boltenhagen, 1977, p.36–37, pl.3, figs.7a–b,8–9. Holotype: Boltenhagen, 1977, pl.3, figs.7a–b; Fensome et al., 1993a, figs.1–2 — p.1209. **NOW** *Achomosphaera ramulifera* subsp. *gabonensis*. Originally *Achomosphaera ramulifera* var. *gabonensis*, subsequently (and now) *Achomosphaera ramulifera* subsp. *gabonensis*. Age: Campanian–Maastrichtian.

subsp. *perforata* (Davey and Williams, 1966a, p.50, pl.5, figs.1,4) Lentin and Williams, 1973, p.10. Holotype: Davey and Williams, 1966a, pl.5, fig.4; Bujak et al., 1980, pl.5, fig.1; Fensome et al., 1991, fig.2 — p.705; fig.3 — p.721. Originally *Achomosphaera ramulifera* var. *perforata*, subsequently (and now) *Achomosphaera ramulifera* subsp. *perforata*. Age: early Eocene.

"var. *perforata*" Davey and Williams, 1966a, p.50, pl.5, figs.1,4. Holotype: Davey and Williams, 1966a, pl.5, fig.4; Bujak et al., 1980, pl.5, fig.1; Fensome et al., 1991, fig.2 — p.705; fig.3 — p.721. **NOW** *Achomosphaera ramulifera* subsp. *perforata*. Originally *Achomosphaera ramulifera* var. *perforata*, subsequently (and now) *Achomosphaera ramulifera* subsp. *perforata*. Age: early Eocene.

"subsp. *ramosasimilis*" Yun Hyesu, 1981, p.14–15, pl.1, figs.1,8; text-fig.3b. Holotype: Yun Hyesu, 1981, pl.1, fig.1; text-fig.3b; Fensome et al., 1991, figs.1–2 — p.719; fig.4 — p.721. **NOW** *Achomosphaera ramosasimilis*. Originally *Achomosphaera ramulifera* subsp. *ramosasimilis*, subsequently (and now) *Achomosphaera ramosasimilis*. Age: early Santonian.

subsp. *ramulifera*. Autonym. Holotype: Deflandre, 1937b, pl.14 (al. pl.11), fig.5; Fensome et al., 1991, fig.1 — p.721; fig.1 — p.725.

"var. *ramulifera*". Autonym. Holotype: Deflandre, 1937b, pl.14 (al. pl.11), fig.5; Fensome et al., 1991, fig.1 — p.721; fig.1 — p.725. **Now redundant.**

"*recurvata*" Jain et al., 1975, p.8, pl.3, figs.36–37,39. Holotype: Jain et al., 1975, pl.3, fig.36. **Taxonomic senior synonym:** *Hystrichosphaera* (as and now *Achomosphaera*) *crassipellis*, according to Quattrocchio and Sarjeant (1996, p.116). Age: Maastrichtian.

regiensis Corradini, 1973, p.171, pl.27, fig.2; text-fig.8. Holotype: Corradini, 1973, pl.27, fig.2. Age: Senonian.

"*reticulata*" Clarke and Verdier, 1967, p.41–42, pl.8, figs.2–3; text-fig.16. Holotype: Clarke and Verdier, 1967, pl.8, fig.2. **Taxonomic senior synonym:** *Achomosphaera sagena*, according to Fechner (1985, p.115). Age: Cenomanian–Santonian.

?*robusta* Sah et al., 1970, p.145, pl.1, figs.6–7. Holotype: Sah et al., 1970, pl.1, fig.6. Originally *Achomosphaera*, subsequently (and now) *Achomosphaera*?. Questionable assignment: Stover and Evitt (1978, p.139). Age: Late Cretaceous.

sagena Davey and Williams, 1966a, p.51, pl.2, figs.1–2. Holotype: Davey and Williams, 1966a, pl.2, figs.1–2. Taxonomic junior synonym: *Achomosphaera reticulata*, according to Fechner (1985, p.115). May (1980, p.64) considered *Hystrichosphaera* (now *Spiniferites*) *crassipellis* to be the possible taxonomic senior synonym of this species. N.I.A. Age: Cenomanian.

"*septata*" (Cookson and Eisenack, 1967b, p.253–254, pl.42, figs.6–10; text-fig.1) Stover and Evitt, 1978, p.139. Emendation: McLean, 1971, p.730, as *Spiniferites septatus*. Holotype: Cookson and Eisenack, 1967b, pl.42, fig.6; Eisenack and Kjellström, 1975b, uppermost figure — p.984w; Fensome et al., 1996, fig.1 — p.2356. **NOW** *Hafniasphaera*. Originally *Baltisphaeridium* (Appendix A), subsequently *Spiniferites*, thirdly (and now) *Hafniasphaera*, fourthly *Achomosphaera*, fifthly *Rivernookia*. Age: late Paleocene.

spongiosa Matsuoka and Bujak, 1988, p.37–38, pl.1, figs.5–7; pl.2, figs.1–3. Holotype: Matsuoka and Bujak, 1988, pl.2, fig.2. Age: late Oligocene–early Miocene.

taiwaniana Shaw Chenglong, 1999b, p.176, figs.52–53. Holotype: Shaw Chenglong, 1999b, figs.52–53. Age: Eocene.

transculenta (Sah et al., 1970, p.147, pl.2, figs.18–19) Jain, 1982, p.52. Holotype: Sah et al., 1970, pl.2, fig.18. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaeridium*?, thirdly (and now) *Achomosphaera*. Jain (1982, p.52) considered the specimen illustrated by Sah et al. (1970, pl.2, fig.19) to be *Cordosphaeridium inodes*. Age: Late Cretaceous.

triangulata (Gerlach, 1961, p.194–195, pl.29, fig.1) Davey and Williams, 1969, p.4. Emendation: Sarjeant, 1984b, p.82–83, as *Achomosphaera triangulata*. Holotype: Gerlach, 1961, pl.29, fig.1; Sarjeant, 1984b, pl.1, figs.4–5. Originally *Baltisphaeridium* (Appendix A), subsequently (and now) *Achomosphaera*. Age: middle Oligocene–mid Miocene.

"*tridactylites*" (Valensi, 1955a, p.37–38, fig.1D) Deflandre and Sarjeant, 1970, p.1. Holotype: Valensi, 1955a, fig.1D. **NOW** *Florentinia*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma* (combination not validly published), fourthly *Achomosphaera*, fifthly *Silicisphaera*, sixthly (and now) *Florentinia*. Age: Cretaceous.

"*valianta*" Sah et al., 1970, p.145, pl.1, figs.8–9. Holotype: Sah et al., 1970, pl.1, fig.8. Originally *Achomosphaera*, subsequently *Cordosphaeridium*. **Taxonomic senior synonym:** *Cordosphaeridium fibrospinosum*, according to Fensome et al. (2009, p.23). Taxonomic senior synonym: *Cordosphaeridium exilimurum*, according to Jain (1982, p.52). Age: Late Cretaceous.

verdierei Below, 1982c, p.3, pl.8, figs.10a–b,11a–c; text-figs.1a–d. Emendation: Lister and Batten, 1988b, p.32. Holotype: Below, 1982c, pl.8, figs.11a–c. Age: Hauterivian–Albian.

ACTINISCUS (Ehrenberg, 1841, p.149–150) Ehrenberg, 1843a, p.103. Siliceous dinoflagellate genus. Originally *Dictyocha* subgenus *Actiniscus*, subsequently (and now) *Actiniscus*. Taxonomic junior synonyms: *Lutetianella* (name not validly published) and *Microdistephanus* (name not validly published), both according to Dumitrică (1973, p.820); *Gymnaster*, according to Dumitrică (1973, p.820). The designation of *Actiniscus pentasterius* as "type species" by Downie and Sarjeant (January, 1965, p.81–82) has precedence over the designation of *Actiniscus elegans* as "type species" by Norris and Sarjeant (March, 1965, p.9). Dumitrică (1973, p.820) considered the extant genus *Diaster* Meunier, 1909 to be a possible taxonomic junior synonym of *Actiniscus*. The name *Actiniscus* was first used in Ehrenberg (1841), who cited the name twice as as sub-entity of *Dictyocha* — "*Dictyocha (Actiniscus) Pentasterias*" (p.149) and "*Dictyocha (Actiniscus) Sirius*" (p.150). It was next mentioned by Ehrenberg (1843a, p.103) as "*Actiniscus Sol und septenarius*" within non-descriptive text. It is not clear to us that the generic name *Actiniscus* should be considered validly published by Ehrenberg (1841, 1843a) as it lacks a description in those publications. But for now we follow the general consensus in accepting the name as valid as of 1841 as a subgenus, raised to generic rank in Ehrenberg (1843a). Type: not designated; "type species" is *Actiniscus pentasterias*, designated by Downie and Sarjeant (January, 1965, p.81–82).

?*discus* Ehrenberg, 1844a, p.62,75. Holotype: Ehrenberg, 1854, pl.21, fig.49. Originally *Actiniscus*, subsequently (and now) *Actiniscus*? Questionable assignment: Ehrenberg 1854, caption to pl. 21, fig. 49. Contrary to the statement in Fensome and Williams (2004, p.30), Ehrenberg (1844a, p. 75) provided a Latin description for this species. N.I.A. Age: Pliocene.

elegans (Ehrenberg, 1844a, p.79) Ehrenberg, 1854, pl.22, fig.51. Holotype: Ehrenberg, 1854, pl.22, fig.51. Originally *Dictyocha* (Appendix A), subsequently (and now) *Actiniscus*. Dumitrică (1973, p.822) considered *Dictyocha* (now *Actiniscus*) *pentasterias* to be the questionable taxonomic senior synonym of this species. Age: Pliocene.

elongatus Dumitrică, 1968, p.240, pl.4, figs.22,26. Holotype: Dumitrică, 1968, pl.4, fig.22. Age: Tortonian.

?*heptagonus* (Ehrenberg, 1843c, p.417, pl.1, section 3, fig.26) Ehrenberg, 1854, caption to pl.20, section 1, fig.49. Holotype: Ehrenberg, 1843c, p.417, pl.1, section 3, fig.26. Originally *Mesocena*? (Appendix A), subsequently (and now) *Actiniscus*? Questionable assignment: Ehrenberg 1854, caption to pl.20, section 1, fig.49. Age: Pliocene.

**pentasterias* (Ehrenberg, 1841, p.111,149) Ehrenberg, 1844a, p.68. Holotype: not designated. Originally *Dictyocha* subgenus *Actiniscus* (Appendix A), subsequently (and now) *Actiniscus*, thirdly *Gymnaster*. Downie and Sarjeant (1965, p.82) retained this species in *Actiniscus*. Illustrations of this species were provided by Ehrenberg (1854, pl.18, fig.61; pl.19, fig.45; pl.20, fig.48; pl.33 (XVII), fig.1 and pl.33 (XVIII), fig.1. Dumitrică (1973, p.822) considered *Dictyocha* (now *Actiniscus*) *elegans* and *Dictyocha* (now *Actiniscus*) *sirius* to be questionable taxonomic junior synonyms of this species. Age: Pliocene.

quinarius Ehrenberg, 1844a, p.76. Holotype: not designated. Age: unknown.

"*radicula*" Dumitrică, 1973, p.822, pl.2, figs.15–17; pl.3, figs.1–5; pl.5, fig.4. **Name not validly published:** holotype not designated. N.I.A. Age: late Miocene–early Pliocene.

?*rota* Ehrenberg, 1844a, p.62,76. Holotype: Ehrenberg, 1854, caption to pl.21, fig.50. Originally *Actiniscus*, subsequently (and now) *Actiniscus*? Questionable assignment: Ehrenberg 1854, caption to pl. 21, fig. 50. Contrary to the statement in Fensome and Williams (2004), Ehrenberg (1844a, p.76) provided a Latin description for this species. N.I.A. Age: Pliocene.

sexfurcatus Ehrenberg, 1854, pl.35B, section 4, fig.15. Holotype: Ehrenberg, 1854, pl.35B, section 4, fig.15. Age: extant.

sirius (Ehrenberg, 1841, p.150) Ehrenberg 1844a, p.68. Holotype: not designated Originally *Dictyochoa* subgenus *Actiniscus*, subsequently (and now) *Actiniscus*, thirdly *Distephanus* (name not validly published; Appendix A), fourthly *Gymnaster*. Illustrations of this species were provided by Ehrenberg (1854, pl.18, figs.59–60; and pl.33–XV, fig.1). For an explanation of earlier treatments of this species in the Lentin and Williams Index, see Fensome and Williams (2004, p.31). In his synonymy list for this species, Schütt (1891) indicated that the name *Distephanus sirius* was cited by Haeckel (date not specified). Dumitrică (1973, p.822) considered *Dictyochoa* (now *Actiniscus*) *pentasterius* to be the questionable taxonomic senior synonym of this species. N.I.A. Age: Miocene.

?*stella* (Ehrenberg, 1839a, p.129, pl.4, fig.11p) Ehrenberg, 1844a, p.62. Holotype: Ehrenberg, 1839a, pl.4, fig.11p. Originally *Dictyochoa*?, subsequently *Dictyochoa* subgenus *Actiniscus*, thirdly *Actiniscus*, fourthly (and now) *Actiniscus*? Questionable assignment: Ehrenberg, 1854, captions to pl.20, fig.47, pl.21, fig.48, pl.22, fig.52. Ehrenberg (1839a, p.129) provided the plate citation indicated here, but location of a pertinent specimen is not obvious in the plate. N.I.A. Age: Pliocene.

talmadgei Parke, 1974, p.81–82, pl.1, figs.1–9. Holotype: Parke, 1974, pl.1, fig.3. Age: late Miocene.

tetrasterias Ehrenberg, 1844a, p.68,76. Holotype: Ehrenberg, 1854, pl.18, fig.62. Originally (and now) *Actiniscus*, subsequently *Gymnaster*. Age: Miocene.

ACTINOTHECA Cookson and Eisenack, 1960a, p.9. Type: Cookson and Eisenack, 1960a, pl.2, fig.20, as *Actinotheca aphroditae*.

**aphroditae* Cookson and Eisenack, 1960a, p.9, pl.2, figs.19–20. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.20; Helby et al., 1987, fig.39H. Age: Turonian.

ornata Cookson and Eisenack, 1970a, p.147, pl.13, figs.1–2. Holotype: Cookson and Eisenack, 1970a, pl.13, fig.1. Age: Senonian.

?*rara* Corradini, 1973, p.183, pl.30, fig.1. Holotype: Corradini, 1973, pl.30, fig.1. Originally *Actinotheca*, subsequently (and now) *Actinotheca*?. Questionable assignment: Stover and Evitt (1978, p.200). Age: Late Cretaceous–?Paleocene.

ADELIESPHAERA Bijl and Brinkhuis, 2015, p.92. Type: Bijl and Brinkhuis, 2015 pl.2A–B, as *Adeliesphaera ohanlonii*.

**ohanlonii* Bijl and Brinkhuis, 2015, p.90–92, pl.1G–R, pl.2A–L, N, O, pl.3A–F, pl.4, figs.A–G. Holotype: Bijl and Brinkhuis, 2015, pl.2A–B. Age: Ypresian.

ADNATOSPHAERIDIUM Williams and Downie, 1966c, p.215. Emendation: Stancliffe and Sarjeant, 1990, p.199–200. Type: Williams and Downie, 1966c, pl.24, fig.7; text-fig.56, as *Adnatosphaeridium vittatum*.

"*aemulum*" (Deflandre, 1939a, p.187–189, pl.9, fig.12; pl.10, figs.5–8; pl.11, figs.1,7) Williams and Downie, 1969, p.17. Emendation: Below, 1982b, p.139–140, as *Rigaudella aemula*. Holotype: Deflandre, 1939a, pl.11, fig.1; Eisenack and Kjellström, 1972, figure to left on p.43; Fensome et al., 1995, fig.1 — p.1473, fig.2 — p.1477. **NOW** *Rigaudella*. Originally *Hystrichosphaeridium*, subsequently *Cannosphaeropsis*, thirdly *Adnatosphaeridium*, fourthly (and now) *Rigaudella*. Taxonomic junior synonym: *Cannosphaeropsis paucispina*, according to Below (1982b, p.139). This combination was not validly published in Williams and Downie (1966c, p.218), since these authors did not fully reference the basionym. Age: Oxfordian.

"subsp. *aemulum*". Autonym. Holotype: Deflandre, 1939a, pl.11, fig.1; Eisenack and Kjellström, 1972, figure to left on p.43; Fensome et al., 1995, fig.1 — p.1473, fig.2 — p.1477. **NOW** *Rigaudella aemula* subsp. *aemula*. Originally *Cannosphaeropsis aemula* subsp. *aemula*, subsequently *Adnatosphaeridium aemulum* subsp. *aemulum*, thirdly (and now) *Rigaudella aemula* subsp. *aemula*.

"subsp. **integrum**" (Cookson and Eisenack, 1958, p.47, pl.7, figs.6–7) Eisenack and Kjellström, 1972, p.45. Holotype: Cookson and Eisenack, 1958, pl.7, fig.6; Fensome et al., 1995, fig.1 — p.1565; Fauconnier and Masure, 2004, pl.68, figs.8–9. **NOW** *Rigaudella aemula* subsp. *integra*. Originally *Cannosphaeropsis aemula* subsp. *integra*, subsequently *Adnatosphaeridium aemulum* subsp. *integrum*, thirdly (and now) *Rigaudella aemula* subsp. *integra*. Age: Late Jurassic.

"**apenninicum**" Corradini, 1973, p.163–164, pl.25, figs.4a–b; pl.36, figs.1a–b. Holotype: Corradini, 1973, pl.25, figs.4a–b; Fauconnier and Masure, 2004, pl.68, figs.10–12. **NOW** *Rigaudella*. Originally *Adnatosphaeridium*, subsequently (and now) *Rigaudella*. Age: Campanian–?Paleocene.

"**apiculatum**" (Cookson and Eisenack, 1960b, p.254, pl.39, fig.15) Lentin and Williams, 1973, p.11. Emendation: Davey, 1988, p.42–43, as *Papuadinium apiculatum*. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.15; Fensome et al., 1993a, fig.1 — p.927. **NOW** *Papuadinium*. Originally *Cannosphaeropsis*, subsequently *Adnatosphaeridium*, thirdly *Rigaudella*, fourthly (and now) *Papuadinium*. Age: Tithonian.

buccinum Hultberg, 1985c, p.106, pl.1, figs.A–B. Holotype: Hultberg, 1985c, pl.1, fig.A. Age: late Maastrichtian.

"?**capilatum**" de Coninck, 1969, p.39, pl.11, figs.9–14, 21–24. Holotype: de Coninck, 1969, pl.11, figs.12–13. Questionable assignment: de Coninck (1969, p.39). **Taxonomic senior synonym:** *Impletosphaeridium implicatum*, according to Eaton (1976, p.306). Age: early Eocene.

caulleryi (Deflandre, 1939a, p.189, pl.11, figs.2–3) Williams and Downie, 1969, p.17. Emendation: Stancliffe and Sarjeant, 1990, p.200, as *Adnatosphaeridium caulleryi*. Holotype: Deflandre, 1939a, pl.11, fig.2; Stancliffe and Sarjeant, 1990, pl.1, figs.3,5; Fauconnier and Masure, 2004, pl.1, figs.7–8. Originally *Hystrichosphaeridium*, subsequently *Cannosphaeropsis*, thirdly (and now) *Adnatosphaeridium*, fourthly *Polystephanephorus*. Stancliffe and Sarjeant (1990, p.200) retained this species in *Adnatosphaeridium*. This combination was not validly published in Williams and Downie (1966c, p.218), since these authors did not fully reference the basionym. Age: early Oxfordian.

?**chonetum** (Cookson and Eisenack, 1962b, p.493, pl.4, figs.8–10) Davey, 1969a, p.171. Holotype: Cookson and Eisenack, 1962b, pl.4, fig.8. Originally *Cannosphaeropsis?*, subsequently *Adnatosphaeridium*, thirdly (and now) *Adnatosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.15). Age: ?Cenomanian.

"?**delicatum**" (Horowitz, 1975, p.24, pl.1, fig.2) Stover and Evitt, 1978, p.15. Holotype: Horowitz, 1975, pl.1, fig.2. **Combination not validly published:** basionym not fully referenced. **NOW** *Areoligera?*. Originally *Areoligera*, subsequently *Adnatosphaeridium?* (combination not validly published), thirdly (and now) *Areoligera?*. Questionable assignment: Stover and Evitt (1978, p.15), as a problematic species. Age: Late Triassic (probably not in place).

densifilum (Cookson and Eisenack, 1974, p.70, pl.24, fig.13) Stancliffe and Sarjeant, 1990, p.201. Holotype: Cookson and Eisenack, 1974, pl.24, fig.13; Stancliffe and Sarjeant, 1990, pl.4, fig.1; Fauconnier and Masure, 2004, pl.1, fig.4. Originally *Cannosphaeropsis*, subsequently *Cannosphaeropsis?*, thirdly (and now) *Adnatosphaeridium*. Age: Late Jurassic.

"**filamentosum**" (Cookson and Eisenack, 1958, p.47–48, pl.7, figs.8–9; pl.8, figs.1–2) Williams and Downie, 1969, p.17. Holotype: Cookson and Eisenack, 1958, pl.7, fig.9. **NOW** *Rigaudella*. Originally *Cannosphaeropsis*, subsequently *Adnatosphaeridium*, thirdly (and now) *Rigaudella*. Taxonomic junior synonym: *Cannosphaeropsis perforata*, according to Stancliffe and Sarjeant (1990, p.206). This combination was not validly published in Williams and Downie (1966c, p.218), since these authors did not fully reference the basionym. Age: Middle-Late Jurassic.

filiferum (Cookson and Eisenack, 1958, p.46, pl.7, fig.4) Williams and Downie, 1969, p.17. Holotype: Cookson and Eisenack, 1958, pl.7, fig.4; Fauconnier and Masure, 2004, pl.1, figs.1–2. Originally *Cannosphaeropsis utinensis* subsp. *filifera*, subsequently *Cannosphaeropsis filifera*, thirdly (and now) *Adnatosphaeridium filiferum*.

This combination was not validly published in Williams and Downie (1966c, p.218), since these authors did not fully reference the basionym. Age: Campanian–early Maastrichtian.

?huenickenii Archangelsky, 1969b, p.201,203, pl.5, figs.5–7. Holotype: Archangelsky, 1969b, pl.5, figs.5–6. Originally *Adnatosphaeridium*, subsequently (and now) *Adnatosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.15), as a problematic species. Age: Eocene.

?membraniphorum Jan du Chêne and Adedirán, 1985, p.10, pl.20, figs.1–6; pl.21, figs.1–10; pl.22, figs.1–4. Holotype: Jan du Chêne and Adedirán, 1985, pl.20, figs.1–3. Originally *Adnatosphaeridium*, subsequently (and now) *Adnatosphaeridium?*. Questionable assignment: Stancliffe and Sarjeant (1990, p.200). Age: late Paleocene–early Eocene.

"multispinosum" Williams and Downie, 1966c, p.216–217, pl.24, fig.5; text-fig.57. Holotype: Williams and Downie, 1966c, text-fig.57. **Taxonomic senior synonym:** *Adnatosphaeridium vittatum*, according to Fensome et al. (2009, p.13). Age: early Eocene.

"?patulum" Williams and Downie, 1966c, p.217–218, pl.24, figs.1–2; text-fig.58. Holotype: Williams and Downie, 1966c, pl.24, fig.2; text-fig.58. **NOW** *Thalassiphora*. Originally *Adnatosphaeridium?*, subsequently (and now) *Thalassiphora*. Questionable assignment: Williams and Downie (1966c, p.217). Taxonomic senior synonym: *Thalassiphora pelagica*, according to Benedek and Gocht (1981, p.59) — however, Lentin and Williams (1985, p.354) retained *Thalassiphora patula*. Taxonomic junior synonym: *Subathua sahnii*, according to Stover and Williams (1987, p.207) and Lentin and Williams (1989, p.354). Age: early Eocene.

"paucispinum" (Klement, 1960, p.72, pl.10, figs.9–10) Gitmez and Sarjeant, 1972, p.234. Holotype: Klement, 1960, pl.10, fig.9; Sarjeant, 1984a, pl.3, figs.5–6. Originally *Cannosphaeropsis*, subsequently *Adnatosphaeridium*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as and now *Rigaudella*) *aemulum*, according to Below (1982b, p.139). Age: late Oxfordian.

"perforatum" (Alberti, 1961, p.37, pl.9, fig.14) Riley and Sarjeant, 1972, p.3. Holotype: Alberti, 1961, pl.9, fig.14. Originally *Cannosphaeropsis*, subsequently *Adnatosphaeridium*, thirdly *Rigaudella*. **Taxonomic senior synonym:** *Cannosphaeropsis* (now *Rigaudella*) *filamentosa*, according to Stancliffe and Sarjeant (1990, p.206). Age: ?Callovian.

regulatum Willumsen, 2012, p.55,57–58, pl.1, figs.1–6. Holotype: Willumsen, 2012, pl.1, figs.1–2. Age: latest Maastrichtian–earliest Paleocene.

"reticulense" (Patiels, 1948, p.49, pl.5, figs.7–10) de Coninck, 1969, p.40. Emendation: Sarjeant, 1986, p.9,11, as *Nematosphaeropsis reticulensis*. Holotype: Patiels, 1948, pl.5, fig.10; unrecognizable, according to Sarjeant (1986, p.11). Lectotype: Patiels, 1948, pl.5, fig.7; Sarjeant, 1986, pl.3, fig.6; designated by Sarjeant (1986, p.11). **NOW** *Nematosphaeropsis*. Originally *Cannosphaeropsis*, subsequently *Adnatosphaeridium*, thirdly (and now) *Nematosphaeropsis*. Age: early Eocene.

robustum (Morgenroth, 1966a, p.19, pl.4, fig.1) de Coninck, 1975, p.47–48. Holotype: Morgenroth, 1966a, pl.4, fig.1. Originally *Cannosphaeropsis*, subsequently (and now) *Adnatosphaeridium*. Eaton (1976, p.239) also proposed this combination. Age: early Eocene.

?speciosum (Alberti, 1961, p.37, pl.9, fig.13) Stancliffe and Sarjeant, 1990, p.202. Holotype: Alberti, 1961, pl.9, fig.13; Stancliffe and Sarjeant, 1990, pl.5, fig.6. Originally *Cannosphaeropsis*, subsequently *Polystephanephorus*, thirdly *Cannosphaeropsis?*, fourthly (and now) *Adnatosphaeridium?*. Questionable assignment: Stancliffe and Sarjeant (1990, p.202). Age: Bathonian–Callovian.

tutulosum (Cookson and Eisenack, 1960a, p.8, pl.2, figs.12–13) Morgan, 1980, p.14. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.13; Fauconnier and Masure, 2004, pl.1, fig.3. Originally *Cannosphaeropsis*, subsequently *Cannosphaeropsis?*, thirdly (and now) *Adnatosphaeridium*. Age: Cenomanian.

"*uncinatum*" Norvick, 1976, p.74–75, pl.8, figs.11–12. Holotype: Norvick, 1976, pl.8, fig.11; Fauconnier and Masure, 2004, pl.17, figs.10–11. **NOW** *Cyclonephelium*. Originally *Adnatosphaeridium*, subsequently (and now) *Cyclonephelium*. Age: Cenomanian.

"*vetusculum*" Davey, 1974, p.45, pl.1, figs.1–2. Holotype: Davey, 1974, pl.1, fig.2. **NOW** *Nexosispinum*. Originally *Adnatosphaeridium*, subsequently *Systematophora*, thirdly (and now) *Nexosispinum*, fourthly *Kiokansium*. Age: early Barremian.

**vittatum* Williams and Downie, 1966c, p.215, pl.24, figs.3,7; text-fig.56. Holotype: Williams and Downie, 1966c, pl.24, fig.7; text-fig.56. Taxonomic junior synonym: *Adnatosphaeridium multispinosum*, according to Fensome et al. (2009, p.13). Age: early Eocene.

williamsii Islam, 1983c, p.81–82, pl.4, figs.9–10. Holotype: Islam, 1983c, pl.4, fig.9. Age: early-middle Eocene.

?*williereae* de Coninck, 1975, p.49, pl.2, figs.9–11. Holotype: de Coninck, 1975, pl.2, figs.10–11; Fauconnier and Masure, 2004, pl.1, fig.5. Questionable assignment: de Coninck (1975, p.49). Age: Ypresian.

"**AGERASPHERA**" Harland, 1979a, p.28–29. **Name illegitimate — nomenclatural senior synonym:** *Alisocysta*, which has the same type. Taxonomic senior synonym: *Eisenackia*, according to Quattrocchio and Sarjeant (2003, p.144) — however, Fensome et al. (in press) retained *Alisocysta*, with *Agerasphaera* as its nomenclatural junior synonym. Type: Drugg, 1967, pl.1, fig.12, as *Eisenackia circumtabulata*.

"**circumtabulata*" (Drugg, 1967, p.15, pl.1, figs.12–13) Harland, 1979a, p.29. Holotype: Drugg, 1967, pl.1, fig.12; Damassa, 1979b, pl.3, figs.14–16; Fensome et al., 1993a, fig.1 — p.1061. **Combination illegitimate:** the generic name *Agerasphaera* is illegitimate. **NOW** *Alisocysta*. Originally *Eisenackia*, subsequently *Hystrichokolpoma*, thirdly (and now) *Alisocysta*, fourthly *Agerasphaera* (generic name illegitimate). Taxonomic junior synonym: *Hystrichokolpoma mentitum*, according to Schumacker-Lambry (1978, p.42) — however, Lentin and Williams (1981, p.135) retained *Hystrichokolpoma mentitum*. Age: Danian.

"*margarita*" Harland, 1979a, p.29,31,33, pl.1, figs.1–12; pl.2, figs.1–10. Holotype: Harland, 1979a, pl.1, figs.5–6; pl.2, figs.5–6; Fauconnier and Masure, 2004, pl.2, fig.1. **NOW** *Alisocysta*. Originally *Agerasphaera* (generic name illegitimate), subsequently (and now) *Alisocysta*, thirdly *Eisenackia*. Taxonomic junior synonym: *Alisocysta rugolirata*, according to Damassa and Harland in Lentin and Williams (1989, p.10). Following I.C.N. Article 55.1, the species name *Agerasphaera margarita* is validly published even though the generic name *Agerasphaera* is illegitimate. Age: late Paleocene.

AIDELOCYSTA Riding, Helby and Stevens in Riding and Helby, 2001g, p.178–179. Taxonomic junior synonym: *Vespadinia* (name not validly published), by implication in Riding and Helby (2001g, p.179,181), who included the only species name, *Vespadinia clavata* (name not validly published), in synonymy with *Aidelocysta clavata*. Type: Riding and Helby, 2001g, figs.11–L, as *Aidelocysta clavata*.

**clavata* Riding, Helby and Stevens in Riding and Helby, 2001g, p.179,181, figs.1A–P. Holotype: Riding and Helby, 2001g, figs.11–L. Taxonomic junior synonym: *Vespadinia clavata* (name not validly published), according to Riding and Helby (2001g, p.179,181). Age: Tithonian–Berriasian.

AIORA Cookson and Eisenack, 1960a, p.9. Junior homonym: *Aiora* Davey, 1978. Stover and Evitt (1978, p.225) indicated that they were emending the diagnosis of this genus; however, no emendation was provided. Type: Deflandre and Cookson, 1955, pl.3, fig.2, as *Cannosphaeropsis fenestrata*.

**fenestrata* (Deflandre and Cookson, 1955, p.283, pl.3, fig.2; text-fig.43) Cookson and Eisenack, 1960a, p.9. Holotype: Deflandre and Cookson, 1955, pl.3, fig.2. Originally *Cannosphaeropsis*, subsequently (and now) *Aiora*. Wilson and Clowes (1980, p.10) retained this species in *Aiora* Cookson and Eisenack. Age: Turonian–Santonian.

"**AIORA**" Davey, 1978, p.892. **Name illegitimate** — **senior homonym**: *Aiora* Cookson and Eisenack, 1960a. **Nomenclatural senior synonym**: *Balteocysta*, which has the same type. Type: Cookson and Eisenack, 1960a, pl.2, fig.17, as *Aiora fenestrata*.

"***perforata**" Davey, 1978, p.892. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.17 (as *Aiora fenestrata*); Fensome et al., 1996, fig.1 — p.2267; designated by Davey (1978, p.892). **NOW** *Balteocysta*. Originally *Aiora*, subsequently (and now) *Balteocysta*. Nomenclatural junior synonym: *Balteocysta rotula*, which has the same holotype. Following I.C.N. Article 55.1, the species name *Aiora perforata* is validly published even though the generic name *Aiora* Davey is illegitimate. Age: Turonian.

AIREIANA Cookson and Eisenack, 1965a, p.127. Type: Cookson and Eisenack, 1965a, pl.14, figs.11–12, as *Aireiana verrucosa*.

salicta Damassa, 1979a, p.817–818, pl.1, figs.4–9; text-fig.2. Holotype: Damassa, 1979a, pl.1, fig.4. Age: early-middle Eocene.

taiwaniana Shaw Chenglong, 1999b, p.165, figs.4–6. Holotype: Shaw Chenglong, 1999b, figs.4–6. Age: Eocene.

***verrucosa** Cookson and Eisenack, 1965a, p.127, pl.14, figs.11–13. Emendation: Stover, 1975, p.43–44. Holotype: Cookson and Eisenack, 1965a, pl.14, figs.11–12. Age: late Eocene.

"**ALASKADINIUM**" Duxbury, 1977, p.37. **Taxonomic senior synonym**: *Nelchinopsis*, according to Stover and Williams (1987, p.11). Type: Wiggins, 1972, pl.1, fig.A, as *Nelchinopsis kostromiensis*.

"***wigginsii**" Duxbury, 1977, p.37. Holotype: Wiggins, 1972, pl.1, fig.A (as *Nelchinopsis kostromiensis*); Fensome et al., 1995, fig.1 — p.1915. **Taxonomic senior synonym**: *Gonyaulax* (now *Nelchinopsis*) *kostromiensis*, according to Stover and Williams (1987, p.11). Age: Neocomian (?Valanginian or early Hauterivian).

ALASPHAERA Keupp, 1979b, p.285. Calcareous dinoflagellate genus (see Streng et al. 2004, p.481 and Elbrächter et al., 2008, p.1298). Type: Keupp, 1979b, text-figs.2–3, as *Alasphaera caudata*.

"***caudata**" Keupp, 1979b, p.285–287,289, text-figs.1–7. Holotype: Keupp, 1979b, text-figs.2–3. **Taxonomic senior synonym**: *Pithonella* (now *Alasphaera*) *tuberculata*, according to Monnet (1993, p.41), who considered *Alasphaera caudata* to be the senior name. The nomenclatural type of the genus *Alasphaera* remains the holotype of *Alasphaera caudata*. Age: Hauterivian.

+**tuberculata** (Pflaumann and Krasheninnikov, 1978, p.820–821, pl.1, figs.7a–c,8) Keupp, 1981, p.55. Holotype: Pflaumann and Krasheninnikov, 1978, pl.1, figs.7a–c. Originally *Pithonella*, subsequently (and now) *Alasphaera*. Taxonomic junior synonyms: *Alasphaera verrucosa*, according to Keupp (1981, p.55); *Alasphaera caudata*, according to Monnet (1993, p.41), who considered *Alasphaera caudata* to be the senior name. The nomenclatural type of the genus *Alasphaera* remains the holotype of *Alasphaera caudata*. Age: late Valanginian–early Hauterivian.

"**verrucosa**" Keupp, 1979c, p.656,658, pl.6, figs.1–5. Holotype: Keupp, 1979c, pl.6, fig.1. **Taxonomic senior synonym**: *Pithonella* (now *Alasphaera*) *tuberculata*, according to Keupp (1981, p.55). Age: early Hauterivian.

"**ALBERTIA**" Vozzhennikova, 1967, p.150–151. **Name illegitimate** — **senior homonym**: *Albertia* Schimper, 1837. **Substitute name**: *Alterbidinium*. Substitute name: *Alterbia* (name illegitimate). Type: Vozzhennikova, 1967, pl.77, fig.2, as *Albertia recticornis* (see discussion under *Alterbidinium recticorne*).

"*curvicornis*" Vozzhennikova, 1967, p.151, pl.76, figs.1–4. Holotype: Vozzhennikova, 1967, pl.76, fig.2. Originally *Albertia* (generic name illegitimate), subsequently *Alterbia* (combination illegitimate). **Taxonomic senior synonym:** *Deflandrea* (now *Alterbidinium*) *acutula*, according to Whitney (1979, p.125). Following I.C.N. Article 55.1, the species name *Albertia curvicornis* is validly published even though the generic name *Albertia* is illegitimate. Age: Campanian.

"**recticornis*" Vozzhennikova, 1967, p.151–152, pl.77, figs.1–4; pl.78, figs.1–3; pl.79, figs.1–2. Holotype: Vozzhennikova, 1967, pl.77, fig.2; Lentin and Vozzhennikova, 1990, pl.3, fig.10; text-fig.13B (see discussion under *Alterbidinium recticorne*). Lectotype: Vozzhennikova, 1967, pl.77, fig.1, designated by Stover and Evitt (1978, p.93); however, see discussion under *Alterbidinium recticorne*. Originally *Albertia* (generic name illegitimate), subsequently *Alterbia* (combination illegitimate), thirdly *Alterbidinium*. **Taxonomic senior synonym:** *Deflandrea* (now *Alterbidinium*) *acutula*, according to Whitney (1979, p.125) and Lentin and Williams (1993, p.14). Following I.C.N. Article 55.1, the species name *Albertia recticornis* is validly published even though the generic name *Albertia* is illegitimate. Age: Turonian.

ALDORFIA Stover and Evitt, 1978, p.140. Riding and Fensome (2003, p.19) considered that *Aldorfia* may be a taxonomic junior synonym of *Apteodinium*. Type: Gocht, 1970b, pl.31, figs.10a–c, as *Gonyaulacysta aldorfensis*.

**aldorfensis* (Gocht, 1970b, p.136–138, pl.30, figs.1–2,3a–d; pl.31, figs.9a–b,10a–c,11; pl.32, figs.1–2,3a–b; text-figs.5,9a–b) Stover and Evitt, 1978, p.140. Holotype: Gocht, 1970b, pl.31, figs.10a–c; Jan du Chêne et al., 1986a, pl.6, figs.1–3; Fensome et al., 1993a, figs.1–3 — p.897. Originally *Gonyaulacysta*, subsequently (and now) *Aldorfia*. Jan du Chêne et al. (1986a, p.35) considered *Scriniodinium galeritum* subsp. *reticulatum* to be a possible taxonomic synonym of this species. Age: early Bathonian.

"*corticata*" Norris and Jux, 1984, p.162–163, pl.2, figs.5–16; pl.3, figs.6–7; pl.6, figs.1–5. Holotype: Norris and Jux, 1984, pl.2, figs.7–8. **NOW** *Apteodinium*. Originally *Aldorfia*, subsequently (and now) *Apteodinium*. Age: late Kimmeridgian–Portlandian.

"*deflandrei*" (Clarke and Verdier, 1967, p.26–28, pl.3, figs.10–12; text-fig.10) Stover and Evitt, 1978, p.140. Emendation: Lucas-Clark, 1987, p.172–173, as *Apteodinium deflandrei*. Holotype: Clarke and Verdier, 1967, pl.3, fig.10; Jan du Chêne et al., 1986a, pl.8, figs.10–11. **NOW** *Apteodinium*. Originally *Gardodinium*, subsequently *Aldorfia*, thirdly (and now) *Apteodinium*. Age: Cenomanian–Santonian.

"*dictyophora*" (Deflandre, 1939a, p.178, pl.8, figs.1–3 ex Sarjeant, 1967b, p.249–250) Stover and Evitt, 1978, p.140. Holotype: Deflandre, 1939a, pl.8, fig.1; Jan du Chêne et al., 1986a, pl.7, figs.1–5. **NOW** *Scriniodinium*?. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta*, thirdly *Aldorfia*, fourthly *Scriniodinium*, fifthly (and now) *Scriniodinium*?. Age: Oxfordian.

"*dictyota*" (Cookson and Eisenack, 1960b, p.248–249, pl.37, figs.8–9) Davey, 1982b, p.25. Holotype: Cookson and Eisenack, 1960b, pl.37, fig.9; Jan du Chêne et al., 1986a, pl.5, fig.1; pl.7, fig.6. **NOW** *Scriniodinium*. Originally (and now) *Scriniodinium*, subsequently *Scriniocassis*, thirdly *Aldorfia*. Age: Oxfordian–Tithonian.

"subsp. *dictyota*". Autonym. Holotype: Cookson and Eisenack, 1960b, pl.37, fig.9; Jan du Chêne et al., 1986a, pl.5, fig.1; pl.7, fig.6. **NOW** *Scriniodinium dictyotum* subsp. *dictyotum*. Originally (and now) *Scriniodinium dictyotum* subsp. *dictyotum*, subsequently *Scriniocassis dictyota* subsp. *dictyota*, thirdly *Aldorfia dictyota* subsp. *dictyota*.

"subsp. *osmingtonensis*" (Gitmez, 1970, p.310–311, pl.1, fig.3; pl.8, fig.12) Jan du Chêne et al., 1986a, p.35. Holotype: Gitmez, 1970, pl.8, fig.12; Jan du Chêne et al., 1986a, pl.7, figs.10–11. **NOW** *Scriniodinium dictyotum* subsp. *osmingtonense*. Originally (and now) *Scriniodinium dictyotum* subsp. *osmingtonense*, subsequently *Scriniocassis dictyotus* subsp. *osmingtonensis*, thirdly *Aldorfia dictyota* subsp. *osmingtonensis*. Taxonomic senior synonym: *Scriniocassis weberi*, according to Davies (1983, p.24) — however, Jan du Chêne et al. (1986a, p.35) retained *Aldorfia dictyota* subsp. *osmingtonensis*. Age: early Kimmeridgian.

"subsp. *papillata*" (Gitmez, 1970, p.311, pl.9, fig.11) Jan du Chêne et al., 1986a, p.35. Holotype: Gitmez, 1970, pl.9, fig.11. **NOW** *Scriniodinium dictyotum* subsp. *papillatum*. Originally (and now) *Scriniodinium dictyotum* subsp. *papillatum*, subsequently *Scriniocassis dictyotus* subsp. *papillatus*, thirdly *Scriniocassis papillatus*, fourthly *Aldorfia dictyota* subsp. *papillata*. Age: early Kimmeridgian.

"subsp. *pyrum*" (Gitmez, 1970, p.311,313, pl.10, fig.1; pl.13, figs.1–2; text-figs.33a–b) Jan du Chêne et al., 1986a, p.36. Holotype: Gitmez, 1970, pl.13, figs.1–2; text-fig.33a; Jan du Chêne et al., 1986a, pl.7, figs.7–8. **NOW** *Scriniodinium dictyotum* subsp. *pyrum*. Originally (and now) *Scriniodinium dictyotum* subsp. *pyrum*, subsequently *Scriniocassis dictyota* subsp. *pyrum*, thirdly *Scriniocassis pyrum*, fourthly *Aldorfia dictyota* subsp. *pyrum*. N.I.A. Age: early Kimmeridgian.

sibirica Pestchevitskaya, 2009, p.108–110, pl.1, figs.1a–c,2a–b; text-fig.2B. Holotype: Pestchevitskaya, 2009, pl.1, figs.1a–c. Age: early Valanginian.

"*spongiosa*" (McIntyre and Brideaux, 1980, p.12, pl.2, figs.8–12) Davey, 1982b, p.25. Holotype: McIntyre and Brideaux, 1980, pl.2, figs.11–12; Jan du Chêne et al., 1986a, pl.8, figs.4–5. **NOW** *Apteodinium*. Originally (and now) *Apteodinium*, subsequently *Aldorfia*. Age: Valanginian.

"*vectensis*" Duxbury, 1983, p.39, pl.4, figs.3,7,10. Holotype: Duxbury, 1983, pl.4, figs.3,7,10; Jan du Chêne et al., 1986a, pl.8, figs.6–9. **NOW** *Apteodinium*. Originally *Aldorfia*, subsequently (and now) *Apteodinium*. Age: late Aptian.

"*warringtonii*" Poulsen, 1996, p.69–70, pl.11, figs.1–4; pl.12, figs.1–4. Holotype: Poulsen, 1996, pl.11, figs.1–3. **NOW** *Apteodinium*. Originally *Aldorfia*, subsequently (and now) *Apteodinium*. Age: late Oxfordian?–earliest Volgian.

ALGIDASPHERIDIUM Matsuoka and Bujak, 1988, p.35–36. See Rochon et al. (1999, p.52) regarding dinoflagellate affinity of this genus. Type: Matsuoka and Bujak, 1988, pl.2, fig.5, as *Algidasphaeridium capillatum*.

**capillatum* Matsuoka and Bujak, 1988, p.36–37, pl.2, figs.4a–b,5–6. Holotype: Matsuoka and Bujak, 1988, pl.2, fig.5; Head, 1994b, pl.1, figs.1–3. Age: late Miocene.

"*euaxum*" Head, 1993, p.24,26, fig.16, nos.1–8,11; fig.26, no.4. Holotype: Head, 1993, fig.16, no.11. **NOW** *Echinidinium*. Originally *Algidasphaeridium?*, subsequently (and now) *Echinidinium*. Questionable assignment: Head (1993, p.24). Age: latest Pliocene.

"*minutum*" (Harland and Reid in Harland et al., 1980, p.216,218, figs.2M–O) Matsuoka and Bujak, 1988, p.36. Holotype: Harland et al., 1980, fig.2O. **NOW** *Islandinium*. Originally *Multispinula*, subsequently *Multispinula?*, thirdly *Algidasphaeridium?*, fourthly (and now) *Islandinium*. Questionable assignment: Matsuoka and Bujak (1988, p.36). Taxonomic junior synonym: *Cantiacidinium conicum* (name not validly published), according to Head et al. (2001, p.629). Age: Holocene.

"var. *cezare*" de Vernal et al., 1989, p.2463, pl.2, figs.5,10 ex de Vernal in Rochon et al., 1999, p.53. Emendation: Head et al., 2001, p.631, as *Islandinium cezare*. Holotype: de Vernal et al., 1989, pl.2, fig. 10, designated by Rochon et al., 1999, p.53. **NOW** *Islandinium? cezare*. Originally *Algidasphaeridium? minutum* var. *cezare*, subsequently (and now) *Islandinium? cezare*. This name was not validly published in de Vernal et al. (1989) since no holotype was designated. Age: late Pleistocene.

"var. *minutum*". Autonym. Holotype: Harland et al., 1980, fig.2O. **Now redundant**.

"*spongium*" Zonneveld, 1997, p.322–323,325, pl.1, figs.1–6; text-figs.3A–B. Emendation: Zonneveld and Jurkschat, 1999, p.158, as *Bitectatodinium spongium*. Holotype: Zonneveld, 1997, pl.1, figs.1,3,5; Zonneveld and Jurkschat, 1999, pl.1, figs.2–4 (not 1). **NOW** *Bitectatodinium*. Originally *Algidasphaeridium?*, subsequently (and now) *Bitectatodinium*. Questionable assignment: Zonneveld (1997, p.322–323). Age: Holocene.

ALISOCYSTA Stover and Evitt, 1978, p.15–16. Taxonomic senior synonym: *Eisenackia*, according to Quattrocchio and Sarjeant (2003, p.144) — however, Fensome et al. (in press) retained *Alisocysta*. Nomenclatural junior synonym: *Agerasphaera*, which has the same type. Type: Drugg, 1967, pl.1, fig.12, as *Eisenackia circumtabulata*.

"**brevivallata**" Harker and Sarjeant in Harker et al., 1990, p.97–98, pl.5, figs.5,9–17; text-figs.20a–b ex Harker and Sarjeant, 1991, p.708. Holotype: Harker et al., 1990, pl.5, figs.11–12; text-figs.20a–b. **NOW** *Eisenackia*. Originally *Alisocysta*, subsequently (and now) *Eisenackia*. This name was not validly published in Harker et al. (1990), since the lodgement of the holotype was not cited (I.C.N. Article 40.7). Age: late Campanian.

***circumtabulata** (Drugg, 1967, p.15, pl.1, figs.12–13) Stover and Evitt, 1978, p.16. Holotype: Drugg, 1967, pl.1, fig.12; Damassa, 1979b, pl.3, figs.14–16; Fensome et al., 1993a, fig.1 — p.1061. Originally *Eisenackia*, subsequently *Hystrichokolpoma*, thirdly (and now) *Alisocysta*, fourthly *Agerasphaera* (generic name illegitimate). Taxonomic junior synonym: *Hystrichokolpoma mentitum*, according to Schumacker-Lambry (1978, p.42) — however, Lentin and Williams (1981, p.135) retained *Hystrichokolpoma mentitum*. Fensome et al. (in press) retained this species in *Alisocysta*. Age: Danian.

margarita (Harland, 1979a, p.29,31,33, pl.1, figs.1–12; pl.2, figs.1–10) Harland, 1979a, p.35. Holotype: Harland, 1979a, pl.1, figs.5–6; pl.2, figs.5–6; Fauconnier and Masure, 2004, pl.2, fig.1. Originally *Agerasphaera* (generic name illegitimate), subsequently (and now) *Alisocysta*, thirdly *Eisenackia*. Taxonomic junior synonym: *Alisocysta rugolirata*, according to Damassa and Harland in Lentin and Williams (1989, p.10). Fensome et al. (in press) retained this species in *Alisocysta*. Age: late Paleocene.

"**ornata**" (Cookson and Eisenack, 1965a, p.124, pl.13, figs.1–8) Stover and Evitt, 1978, p.16. Holotype: Cookson and Eisenack, 1965a, pl.13, figs.1–2. **NOW** *Stoveracysta*. Originally *Eisenackia*, subsequently *Alisocysta*, thirdly (and now) *Stoveracysta*. Age: late Eocene.

"**reticulata**" Damassa, 1979b, p.196,198,200, pl.3, figs.1–6; pl.4, figs.4–5; text-fig.3. Holotype: Damassa, 1979b, pl.4, figs.4–5; text-fig.3. **NOW** *Eisenackia*. Originally *Alisocysta*, subsequently (and now) *Eisenackia*. Age: early Paleocene.

"**rugolirata**" Damassa, 1979b, p.193–194,196, pl.3, figs.7–13,21,23,27; text-fig.2. Holotype: Damassa, 1979b, pl.3, figs.7–11; Fauconnier and Masure, 2004, pl.2, figs.7–11. Originally *Alisocysta*, subsequently *Eisenackia*. **Taxonomic senior synonym:** *Agerasphaera* (now *Eisenackia*) *margarita*, according to Damassa and Harland in Lentin and Williams (1989, p.10). Age: early Paleocene.

ALISOGYMNIIUM Lentin and Vozzhennikova, 1990, p.24–25. Type: Vozzhennikova, 1967, pl.3, fig.1, as *Gymnodinium sphaerocephalum*.

assamicum (Jain et al., 1975, p.4, pl.2, figs.28–29) Lentin and Vozzhennikova, 1990, p.28. Holotype: Jain et al., 1975, pl.2, fig.28; Lentin and Vozzhennikova, 1990, Appendix A, fig.37. Originally *Dinogymnium*, subsequently (and now) *Alisogymnium*. Taxonomic senior synonym: *Gymnodinium* (now *Dinogymnium*) *sphaerocephalum*, according to Jain (1977a, p.133–134) — however, Lentin and Vozzhennikova (1990, p.28) retained *Alisogymnium assamicum*. Age: Maastrichtian.

cerviculum (Cookson and Eisenack, 1970a, p.138, pl.10, fig.6) Lentin and Vozzhennikova, 1990, p.28. Holotype: Cookson and Eisenack, 1970a, pl.10, fig.6; Lentin and Vozzhennikova, 1990, Appendix A, fig.34. Originally *Dinogymnium*, subsequently (and now) *Alisogymnium*. Age: Senonian.

deflandrei (Boltenhagen, 1977, p.67–68, pl.9, figs.1b–c,2a–b,3a–b,4a–b) Lentin and Vozzhennikova, 1990, p.28. Holotype: Boltenhagen, 1977, pl.9, figs.1b–c; Lentin and Vozzhennikova, 1990, Appendix A, fig.31. Originally *Dinogymnium*, subsequently (and now) *Alisogymnium*. Age: late Senonian.

downiei (Boltenhagen, 1977, p.77–78, pl.11, figs.8a–c,9a–b,10) Lentin and Vozzhennikova, 1990, p.28. Holotype: Boltenhagen, 1977, pl.11, figs.8a–c; Lentin and Vozzhennikova, 1990, Appendix A, fig.36. Originally *Dinogymnium*, subsequently (and now) *Alisogymnium*. Age: Campanian–Maastrichtian.

euclaense (Cookson and Eisenack, 1970a, p.139, pl.10, figs.9–12) Lentin and Vozzhennikova, 1990, p.28. Holotype: Cookson and Eisenack, 1970a, pl.10, fig.12; Lentin and Vozzhennikova, 1990, Appendix A, fig.35. Originally *Dinogymnium*, subsequently (and now) *Alisogymnium*. Age: Senonian.

evittii (Boltenhagen, 1977, p.66–67, pl.8, figs.9a–c,10–11) Lentin and Vozzhennikova, 1990, p.28. Holotype: Boltenhagen, 1977, pl.8, figs.9a–c; Lentin and Vozzhennikova, 1990, Appendix A, fig.33. Originally *Dinogymnium*, subsequently (and now) *Alisogymnium*. Age: Senonian.

laeve (Vozzhennikova, 1967, p.48, pl.1, fig.4; pl.2, fig.5) Lentin and Vozzhennikova, 1990, p.26. Emendation: Lentin and Vozzhennikova, 1990, p.26–27, as *Alisogymnium laeve*. Holotype: Vozzhennikova, 1967, pl.2, fig.5; Lentin and Vozzhennikova, 1990, pl.2, fig.7a; lost according to Lentin and Vozzhennikova (1990, p.26). Neotype: Harland, 1973, pl.85, figs.2–3 (as *Dinogymnium longicornis*); Lentin and Vozzhennikova, 1990, pl.2, fig.7b; designated by Lentin and Vozzhennikova (1990, p.27). Originally *Gymnodinium sphaerocephalum* var. *laeve* (Appendix B), subsequently *Dinogymnium sphaerocephalum* subsp. *laeve*, thirdly (and now) *Alisogymnium laeve*. Age: Senonian.

**sphaerocephalum* (Vozzhennikova, 1967, p.48, pl.2, fig.7; pl.3, fig.1) Lentin and Vozzhennikova, 1990, p.25. Emendation: Lentin and Vozzhennikova, 1990, p.25–26, as *Alisogymnium sphaerocephalum*. Holotype: Vozzhennikova, 1967, pl.3, fig.1; Lentin and Vozzhennikova, 1990, pl.2, figs.6,11–12; text-fig.10; Appendix A, fig.30. Originally *Gymnodinium* (Appendix B), subsequently *Dinogymnium*, thirdly (and now) *Alisogymnium*. Taxonomic junior synonym: *Dinogymnium* (now *Alisogymnium*) *assamicum*, according to Jain (1977a, p.133–134) — however, Lentin and Vozzhennikova (1990, p.28) retained *Dinogymnium* (as *Alisogymnium*) *assamicum*. Age: Senonian.

"**ALTERBIA**" Lentin and Williams, 1976, p.47–48. **Name illegitimate**: in proposing the generic name *Alterbia*, Lentin and Williams (1976) included the type of the senior names *Andalusiella* and *Senegalinium*. **Substitute name**: *Alterbidinium*. Substitute name for *Albertia* Vozzhennikova, 1967, p.151. Type: Vozzhennikova, 1967, pl.77, fig.2, as *Albertia recticornis* (see discussion under *Alterbidinium recticorne*).

"*acribes*" (Davey and Verdier, 1971, p.38–39, pl.2, figs.10,12) Lentin and Williams, 1976, p.48. Emendation: Goodman and Evitt, 1981, p.48,50,52–53, as *Angustidinium acribes*. Holotype: Davey and Verdier, 1971, pl.2, fig.10; Fensome et al., 1993a, fig.1 — p.875. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Angustidinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Alterbia?* (combination illegitimate), fourthly (and now) *Angustidinium*, fifthly *Moesiodinium*. Questionable assignment: Stover and Evitt (1978, p.93) as a problematic species. Age: early Albian.

"*acuminata*" (Cookson and Eisenack, 1958, p.27, pl.4, figs.5–8) Lentin and Williams, 1976, p.48. Holotype: Cookson and Eisenack, 1958, pl.4, fig.5. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Senegalinium*, fourthly (and now) *Isabelidinium*. Age: Cenomanian–early Turonian.

"*acutula*" (Wilson, 1967b, p.225–226, figs.11–12) Lentin and Williams, 1976, p.48. Emendation: Khowaja-Ateequzaman et al., 1991, p.41–42, as *Alterbidinium acutululum*. Holotype: Wilson, 1967b, fig.12. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Alterbidinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Alterbidinium*. Taxonomic junior synonyms: *Albertia curvicornis* and *Albertia* (subsequently *Alterbia*) *recticornis*, both according to Whitney (1979, p.125). The nomenclatural type of the genus *Alterbia* remains the holotype of *Alterbia recticornis*. Age: ?Maastrichtian (see Wilson, 1972).

"*ambigua*" He Chengquan, 1991, p.72–73, pl.29, figs.1–6. Holotype: He Chengquan, 1991, pl.29, fig.3. **NOW** *Alterbidinium*. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*. Following

I.C.N. Article 55.1, the species name *Alterbia ambigua* is validly published even though the generic name *Alterbia* is illegitimate. Age: Cenomanian–middle Eocene.

"*amphiata*" (McIntyre, 1975, p.65–66, pl.2, figs.5–8) Yun Hyesu, 1981, p.64. Holotype: McIntyre, 1975, pl.2, figs.5–6. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Isabelidinium?*. Originally *Deflandrea*, subsequently *Isabelia?* (combination illegitimate), thirdly *Alterbia* (combination illegitimate), fourthly (and now) *Isabelidinium?*. Age: Paleocene–early Eocene.

"*asymmetrica*" (Wilson, 1967a, p.62–63, figs.17–21) Lentin and Williams, 1976, p.48. Holotype: Wilson, 1967a, figs.19–21. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Alterbidinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Senegalinium?*, fourthly (and now) *Alterbidinium*, fifthly *Magallanesium*. Age: ?Eocene (erratic).

"*bakeri*" (Deflandre and Cookson, 1955, p.251, pl.4, figs.1–4) Yun Hyesu, 1981, p.65. Emendation: Stover, 1974, p.169–170, as a "revised description" for *Deflandrea bakeri*. Holotype: Deflandre and Cookson, 1955, pl.4, fig.1. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*, fourthly *Alterbia* (combination illegitimate). Age: Paleocene–early Eocene.

"*balmei*" (Cookson and Eisenack, 1962b, p.486) Lentin and Williams, 1976, p.48. Emendation: Morgan, 1977, p.130, as *Alterbia minor*. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.1; Morgan, 1977, text-fig.2. **NOW** *Spinidinium balmei*. Originally *Deflandrea minor* (name illegitimate), subsequently *Deflandrea balmei*, thirdly *Alterbia balmei* (combination illegitimate), fourthly *Isabelidinium balmei*, fifthly (and now) *Spinidinium balmei*, sixthly *Magallanesium balmei*. Taxonomic senior synonym: *Palaeohystrichophora* (as *Diconodinium*) *minuta*, according to Morgan (1977, p.130) — however, Lentin and Williams (1981, p.156) retained *Deflandrea* (as *Isabelidinium*, now *Spinidinium*) *balmei*. Age: Late Cretaceous.

"*bellula*" He Chengquan, 1991, p.73, pl.29, fig.12. Holotype: He Chengquan, 1991, pl.29, fig.12. **NOW** *Alterbidinium*. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*. Following I.C.N. Article 55.1, the species name *Alterbia bellula* is validly published even though the generic name *Alterbia* is illegitimate. This name was not validly published in Xu Jinli (1987, p.150), who cited it as "*Alterbia bellula* He (MS)" — as a provisional manuscript name. Age: middle Eocene.

"*bicavata*" (Jain and Millepied, 1973, p.23, pl.1, figs.1–4; text-fig.1B) Lentin and Williams, 1976, p.49. Holotype: Jain and Millepied, 1973, pl.1, figs.1–3; Fensome et al., 1993a, figs.1–2 — p.975. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Senegalinium*. Originally (and now) *Senegalinium*, subsequently *Deflandrea*, thirdly *Alterbia* (combination illegitimate). Age: Campanian–Maastrichtian.

"*bicellula*" Islam, 1983b, p.335–336, pl.1, figs.6–7. Holotype: Islam, 1983b, pl.1, fig.6. **NOW** *Alterbidinium?*. Originally *Alterbia?* (generic name illegitimate), subsequently (and now) *Alterbidinium?*. Questionable assignment: Islam (1983b, p.335). Following I.C.N. Article 55.1, the species name *Alterbia? bicellula* is validly published even though the generic name *Alterbia* is illegitimate. Age: middle Eocene.

"*circula*" Heilmann-Clausen, 1985, p.16–17, pl.1, figs.1–8; text-fig.5. Holotype: Heilmann-Clausen, 1985, pl.1, figs.1–2. **NOW** *Alterbidinium*. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*. Following I.C.N. Article 55.1, the species name *Alterbia circula* is validly published even though the generic name *Alterbia* is illegitimate. Age: early Paleocene.

"*curvicornis*" (Vozzhennikova, 1967, p.151, pl.76, figs.1–4) Lentin and Williams, 1976, p.49. Holotype: Vozzhennikova, 1967, pl.76, fig.2; Lentin and Vozzhennikova, 1990, pl.3, fig.9; text-fig.13a. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. Originally *Albertia* (generic name illegitimate), subsequently *Alterbia* (combination illegitimate). **Taxonomic senior synonym**: *Deflandrea* (now *Alterbidinium*) *acutula*, according to Whitney (1979, p.125). Age: Campanian.

"*daveyi*" Stover and Evitt, 1978, p.93. **Name not validly published**: holotype not designated. Originally *Alterbia* (name not validly published), subsequently *Alterbidinium* (name not validly published). Age: Albian–Cenomanian.

"*dilwynensis*" (Cookson and Eisenack, 1965c, p.141, pl.18, figs.6–9) Lentin and Williams, 1976, p.49. Holotype: Cookson and Eisenack, 1965c, pl.18, figs.7–8. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Senegalinium*?. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Senegalinium*?. Age: Paleocene.

"*distincta*" (Wilson, 1967a, p.63–64, figs.9–10) Lentin and Williams, 1976, p.49. Holotype: Wilson, 1967a, fig.9. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Alterbidinium*?. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Alterbia*? (combination illegitimate), fourthly (and now) *Alterbidinium*?. Questionable assignment: Stover and Evitt (1978, p.93). Age: Early Tertiary (erratic).

"*earnleyensis*" Islam, 1983b, p.336, pl.1, figs.10–11. Holotype: Islam, 1983b, pl.1, fig.10. **NOW** *Alterbidinium*?. Originally *Alterbia*? (generic name illegitimate), subsequently (and now) *Alterbidinium*?. Questionable assignment: Islam (1983b, p.336). Following I.C.N. Article 55.1, the species name *Alterbia earnleyensis* is validly published even though the generic name *Alterbia* is illegitimate. Age: middle Eocene.

"*ectorugosa*" (Archangelsky, 1969b, p.192, pl.1, figs.5–7) Lentin and Williams, 1976, p.49. Holotype: Archangelsky, 1969b, pl.1, figs.5–6. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Senegalinium*. Age: Eocene.

"*eyrensis*" (Cookson and Eisenack, 1971, p.217–218, pl.7, figs.2–3) Lentin and Williams, 1976, p.49. Holotype: Cookson and Eisenack, 1971, pl.7, fig.3. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Eurydinium*. Originally *Deflandrea*, subsequently *Alterbia*? (combination illegitimate), thirdly (and now) *Eurydinium*. Questionable assignment: Lentin and Williams (1976, p.49). Age: Albian–Cenomanian.

"*foliacea*" (Eisenack and Cookson, 1960, p.2, pl.1, fig.3) Lentin and Williams, 1976, p.49. Holotype: Eisenack and Cookson, 1960, pl.1, fig.3. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Subtilisphaera*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Subtilisphaera*. Age: Turonian–middle Senonian.

"*ingramii*" (Cookson and Eisenack, 1970a, p.143, pl.12, figs.7–9) Lentin and Williams, 1976, p.49. Holotype: Cookson and Eisenack, 1970a, pl.12, fig.9; Eisenack and Kjellström, 1975a, figure to left — p.190a; Fensome et al., 1996, fig.3 — p.2167. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Eurydinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Senegalinium*, fourthly (and now) *Eurydinium*. Age: Albian–Cenomanian.

"*macrocysta*" (Cookson and Eisenack, 1960a, p.3, pl.1, figs.7–8) Lentin and Williams, 1976, p.49. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.7. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Senegalinium*. Age: Campanian.

"*mauthei*" (Riegel, 1974, p.357–360, pl.2, figs.1–7; text-figs.5–6) Lentin and Williams, 1976, p.149. Emendation: Riegel and Sarjeant, 1982, p.289, as *Andalusiella mauthei*. Holotype: Riegel, 1974, pl.2, fig.4; Riegel and Sarjeant, 1982, figs.1A–C,4A,5A; Fensome et al., 1995, figs.2,5–6 — p.1613. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Andalusiella*. Originally (and now) *Andalusiella*, subsequently *Alterbia* (combination illegitimate). Taxonomic senior synonym: *Svalbardella* (now *Andalusiella*) *polymorpha*, according to Lentin and Williams (1976, p.149) — however, Lentin and Williams (1977b, p.8) retained *Andalusiella mauthei*. Age: ?Senonian.

"*microgranulata*" (Stanley, 1965, p.219, pl.19, figs.4–6) Lentin and Williams, 1976, p.49. Holotype: Stanley, 1965, pl.19, figs.4–5. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Senegalinium*. Age: Paleocene.

"*minor*" (Alberti, 1959b, p.98, pl.9, figs.9–11) Lentin and Williams, 1976, p.49. Emendation: Khowaja-Atequzzaman et al., 1991, p.44, as *Alterbidinium minus*. Holotype: Alberti, 1959b, pl.9, fig.10. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Alterbidinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Alterbidinium*. Age: late Senonian.

"*montanaensis*" (Harland, 1977a, p.184–185, pl.25, figs.4,6–7,10–12) Lentin and Williams, 1981, p.10. Holotype: Harland, 1977a, pl.25, fig.4. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Alterbidinium*. Originally *Deflandrea*, subsequently *Spinidinium*, thirdly *Alterbia* (combination illegitimate), fourthly (and now) *Alterbidinium*. Age: late Campanian–Maastrichtian.

"*obscura*" (Drugg, 1967, p.17, pl.2, figs.8–9; pl.9, fig.5) Lentin and Williams, 1976, p.49. Holotype: Drugg, 1967, pl.2, fig.8. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Senegalinium*. Age: Maastrichtian–Danian.

"*ovalis*" He Chengquan, 1991, p.73, pl.29, figs.7–10. Holotype: He Chengquan, 1991, pl.29, fig.7. **NOW** *Alterbidinium*. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*. Following I.C.N. Article 55.1, the species name *Alterbia ovalis* is validly published even though the generic name *Alterbia* is illegitimate. Age: Turonian–middle Eocene.

"*pellucida*" (Deflandre and Cookson, 1955, p.251, pl.4, fig.3) Yun Hyesu, 1981, p.64. Holotype: Deflandre and Cookson, 1955, pl.4, fig.3; Cookson and Eisenack, 1958, pl.4, fig.9; Stover, 1974, pl.1, figs.7a–b. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Isabelidinium pellucidum*. Originally *Deflandrea bakeri* forma *pellucida*, subsequently *Deflandrea pellucida*, thirdly *Isabelia pellucida* (combination illegitimate), fourthly (and now) *Isabelidinium pellucidum*, fifthly *Alterbia pellucida* (combination illegitimate). Age: Paleocene–early Eocene.

"?*pentaradiata*" (Cookson and Eisenack, 1965c, p.139–140, pl.18, figs.1–2) Lentin and Williams, 1976, p.49. Holotype: Cookson and Eisenack, 1965c, pl.18, fig.1; Stover, 1974, pl.2, figs.6a–b. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Alterbidinium?*. Originally *Deflandrea*, subsequently *Alterbia?* (combination illegitimate), thirdly (and now) *Alterbidinium?*. Questionable assignment: Lentin and Williams (1976, p.49). Age: Paleocene.

"subsp. *pentaradiata*". Autonym. Holotype: Cookson and Eisenack, 1965c, pl.18, fig.1; Stover, 1974, pl.2, figs.6a–b. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Alterbidinium?* *pentaradiatum* subsp. *pentaradiatum*. Originally *Deflandrea pentaradiata* subsp. *pentaradiata*, subsequently *Alterbia?* *pentaradiata* subsp. *pentaradiata* (combination illegitimate), thirdly (and now) *Alterbidinium?* *pentaradiatum* subsp. *pentaradiatum*.

"subsp. *preceda*" (Cookson and Eisenack, 1974, p.49, pl.20, figs.1–2) Lentin and Williams, 1976, p.50. Holotype: Cookson and Eisenack, 1974, pl.20, fig.1. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Alterbidinium?* *pentaradiatum* subsp. *precedum*. Originally *Deflandrea pentaradiata* subsp. *preceda*, subsequently *Alterbia?* *pentaradiata* subsp. *preceda* (combination illegitimate), thirdly (and now) *Alterbidinium?* *pentaradiatum* subsp. *precedum*. Age: Paleocene.

"*pilosa*" (Davey, 1969b, p.9, pl.3, figs.2–5) Lentin and Williams, 1976, p.50. Holotype: Davey, 1969b, pl.3, figs.2,5. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Alterbidinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Alterbidinium*. Age: Campanian–Maastrichtian.

"*polymorpha*" (Malloy, 1972, p.63–64, pl.1, figs.8–16,21) Lentin and Williams, 1976, p.50. Holotype: Malloy, 1972, pl.1, fig.15. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Andalusiella*. Originally *Svalbardella*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Andalusiella*. Taxonomic junior synonyms: *Palaeocystodinium microgranulatum*, according to Lentin and Williams (1976, p.89); *Senegalinium trisinum*, according to Lentin and Williams (1976, p.164); *Palaeocystodinium punctatum*, according to Lentin and Williams (1976, p.89) — however, Schrank (1987, p.265) retained that taxon as the subspecies

Andalusiella polymorpha subsp. *punctata*; *Andalusiella mauthei*, according to Lentin and Williams (1976, p.149) — however, Lentin and Williams (1977b, p.8) retained *Andalusiella mauthei*. Age: Maastrichtian.

"*puyangensis*" Jin Guangxing, He Chengquan and Zhu Shenzhao in He Chengquan et al., 1989, p.37–38, pl.3, fig.7; text-fig.1. Holotype: He Chengquan et al., 1989, pl.3, fig.7; text-fig.1. **NOW** *Subtilisphaera*. Originally *Alterbia* (generic name illegitimate), subsequently *Alterbidinium*, thirdly (and now) *Subtilisphaera*. Following I.C.N. Article 55.1, the species name *Alterbia puyangensis* is validly published even though the generic name *Alterbia* is illegitimate. Age: Early Tertiary.

"*raijae*" (Kjellström, 1973, p.20–22, fig.16) Lentin and Williams, 1976, p.50. Holotype: Kjellström, 1973, fig.16. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Eurydinium*, fourthly (and now) *Manumiella*. Age: middle-late Maastrichtian.

"**recticornis*" (Vozzhennikova, 1967, p.151–152, pl.77, figs.1–4; pl.78, figs.1–3; pl.79, figs.1–2) Lentin and Williams, 1976, p.47. Holotype: Vozzhennikova, 1967, pl.77, fig.2; Lentin and Vozzhennikova, 1990, pl.3, fig.10; text-fig.13B (see discussion under *Alterbidinium recticorne*). Lectotype: Vozzhennikova, 1967, pl.77, fig.1, designated by Stover and Evitt (1978, p.93); however, see discussion under *Alterbidinium recticorne*. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. Originally *Albertia* (generic name illegitimate), subsequently *Alterbia* (combination illegitimate), thirdly *Alterbidinium*. **Taxonomic senior synonym**: *Deflandrea* (now *Alterbidinium*) *acutula*, according to Whitney (1979, p.125) and Lentin and Williams (1993, p.14). The nomenclatural type of the genus *Alterbia* remains the holotype of *Alterbia recticornis*. Age: Turonian.

"*rhombohedra*" (Benson, 1976, p.195, pl.9, figs.10–12) Lentin and Williams, 1977b, p.7. Holotype: Benson, 1976, pl.9, figs.10–12. **Combination illegitimate**: the generic name *Alterbia* is illegitimate. **NOW** *Andalusiella*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Andalusiella*. Age: early Paleocene.

"*subtilis*" He Chengquan in Zheng Yahui and He Chengquan, 1984, p.90–91, pl.6, figs.1–6; pl.10, figs.1–2. Holotype: Zheng Yahui and He Chengquan, 1984, pl.6, fig.3. **NOW** *Alterbidinium*. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*. Following I.C.N. Article 55.1, the species name *Alterbia subtilis* is validly published even though the generic name *Alterbia* is illegitimate. Age: Campanian.

"*xinjiangensis*" He Chengquan, 1991, p.73–74, pl.28, figs.1–6. Holotype: He Chengquan, 1991, pl.28, fig.3. **NOW** *Alterbidinium*. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*. Following I.C.N. Article 55.1, the species name *Alterbia xinjiangensis* is validly published even though the generic name *Alterbia* is illegitimate. Age: Paleocene.

ALTERBIDINIUM Lentin and Williams, 1985, p.14. Substitute name for *Albertia* Vozzhennikova, 1967, p.150–151 (an illegitimate name) and *Alterbia* Lentin and Williams, 1976, p.47–48 (an illegitimate name). Emendation: Khowaja-Ateequzzaman et al., 1991, p.38. Originally *Albertia* (name illegitimate), subsequently *Alterbia* (name illegitimate), thirdly (and now) *Alterbidinium*. Type: Vozzhennikova, 1967, pl.77, fig.2, as *Albertia recticornis* (see discussion under *Alterbidinium recticorne*).

+*acutulum* (Wilson, 1967b, p.225–226, figs.11–12) Lentin and Williams, 1985, p.14. Emendation: Khowaja-Ateequzzaman et al., 1991, p.41–42, as *Alterbidinium acutulum*. Holotype: Wilson, 1967b, fig.12. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Alterbidinium*. Taxonomic junior synonyms: *Albertia recticornis*, according to Whitney (1979, p.125) and Lentin and Williams (1993, p.14); *Albertia curvicornis*, according to Whitney (1979, p.125). The nomenclatural type of the genus *Alterbidinium* remains the holotype of *Alterbidinium recticorne*. Age: ?Maastrichtian (see Wilson, 1972, p.184).

ambiguum (He Chengquan, 1991, p.72–73, pl.29, figs.1–6) Lentin and Williams, 1993, p.21. Holotype: He Chengquan, 1991, pl.29, fig.3. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*. Age: Cenomanian–middle Eocene.

asymmetricum (Wilson, 1967a, p.62–63, figs.17–21) Levy and Harwood, 2000, p.202. Holotype: Wilson, 1967a, figs.19–21. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Senegalinium*?, fourthly (and now) *Alterbidinium*, fifthly *Magallanesium*. Sluijs et al. (2009, p.50) also proposed the transfer of this species to *Alterbidinium*, thereby retaining it in the genus. Age: ?Eocene (erratic).

austrinum Roncaglia and Schiøler, 1999, p.124–125,127–128, pl.1, figs.1–9; pl.2, figs.1–6; text-figs.3A–F. Holotype: Roncaglia and Schiøler, 1999, pl.1, figs.1–2; text-fig.3A. Age: middle-late Campanian.

bellulum (He Chengquan, 1991, p.73, pl.29, fig.12) Lentin and Williams, 1993, p.22. Holotype: He Chengquan, 1991, pl.29, fig.12. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*. This species was not validly published in Xu Jinli (1987, p.150), who gave the citation, "*Alterbia bellula* He (MS)". Age: middle Eocene.

?*bicellulum* (Islam, 1983b, p.335–336, pl.1, figs.6–7) Lentin and Williams, 1985, p.14. Holotype: Islam, 1983b, pl.1, fig.6. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*?. Questionable assignment: Lentin and Williams (1985, p.14). Age: middle Eocene.

circulum (Heilmann-Clausen, 1985, p.16–17, pl.1, figs.1–8; text-fig.5) Lentin and Williams, 1989, p.13. Holotype: Heilmann-Clausen, 1985, pl.1, figs.1–2. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*. Age: early Paleocene.

compactum Vasilyeva in Andreeva-Grigorovich et al., 2011, p.40–42, pl.11, figs. 1–4; text-fig. 18a ex Williams and Fensome, 2016, p.138. Holotype: Andreeva-Grigorovich et al., 2011, text-fig.18a, pl.11, fig.1, designated by Williams and Fensome (2016, p.138). This name was not validly published by Vasilyeva in Andreeva-Grigorovich et al. (2011, p.41) since the holotype citation (pl.11, figs.1–4 and text-fig.18a) includes more than one specimen. The holotype was clearly designated in Williams and Fensome (2016), thus validating the name *Alterbidinium compactum*. Age: Selandian.

"*daveyi*" (Stover and Evitt, 1978, p.93) Lentin and Williams, 1985, p.14. **Name not validly published:** holotype not designated. Originally *Alterbia* (name not validly published), subsequently *Alterbidinium* (name not validly published). Age: Albian–Cenomanian.

dictyotum Harker and Sarjeant in Harker et al., 1990, p.105–106, pl.8, figs.1–5; text-fig.21 ex Harker and Sarjeant, 1991, p.709. Holotype: Harker et al., 1990, pl.8, fig.1; text-fig.21. This name was not validly published in Harker et al. (1990) since the lodgement of the holotype was not cited (I.C.N. Article 40.7). Age: early Campanian.

?*distinctum* (Wilson, 1967a, p.63–64, figs.9–10) Lentin and Williams, 1985, p.14. Holotype: Wilson, 1967a, fig.9. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Alterbia*? (combination illegitimate), fourthly (and now) *Alterbidinium*?. Questionable assignment: Lentin and Williams (1985, p.14). Age: Early Tertiary (erratic).

?*earnleyense* (Islam, 1983b, p.336, pl.1, figs.10–11) Lentin and Williams, 1985, p.14. Holotype: Islam, 1983b, pl.1, fig.10. Originally *Alterbia*? (generic name illegitimate), subsequently (and now) *Alterbidinium*?. Questionable assignment: Lentin and Williams (1985, p.14). Age: middle Eocene.

ellentonense Lucas-Clark, 2006, p.189–190, pl.1, figs.3–6. Holotype: Lucas-Clark, 2006, pl.1, figs.3–4. Age: Paleocene.

emulatum Mao Shaozhi and Norris, 1988, p.41–42, pl.9, figs.1–2; text-fig.12. Holotype: Mao Shaozhi and Norris, 1988, pl.9, fig.1. Age: Late Cretaceous.

ioannidesii Pearce, 2010, p.66–67, pl.1, figs.1–6. Holotype: Pearce, 2010, pl.1, figs.1–6. Age: early Campanian.

kirschii Slimani, 1994, p.89–90, pl.14, figs.1–4. Holotype: Slimani, 1994, pl.14, figs.1–3. Age: late early Maastrichtian.

longicornutum Roncaglia et al., 1999, p.297,299, fig.15, nos.1–5. Holotype: Roncaglia et al., 1999, fig.15, no.5. Age: Maastrichtian.

mcmillanii Willumsen, 2012, p.58–59, pl.1, figs.12,16–18; pl.2, figs.7–12. Holotype: Willumsen, 2012, pl.2, figs.7–12. Age: latest Maastrichtian–earliest Paleocene.

microverrusum (Yu Jingxian and Zhang Wangping, 1980, p.109, pl.3, figs.1–2) He Chengquan et al., 2009, p.416. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.3, fig.2. Originally *Deflandrea*, subsequently *Isabelidinium?*, thirdly (and now) *Alterbidinium*. Yu Jingxian and Zhang Wangping (1980, p.109) spelled the epithet as "*microverrusum*" in their text, but as "*microverrucosa*" in their plate caption. Previous editions of the "Lentin and Williams Index" and DINOFLAJ2 have cited the epithet as "*microverrucosa* / *microverrucosum*", but He Chengquan et al. (2009, p.416) used "*microverrusum*", which we follow here. Age: Campanian–early Maastrichtian.

minus (Alberti, 1959b, p.98, pl.9, figs.9–11) Lentin and Williams, 1985, p.14. Emendation: Khowaja-Ateequzzaman et al., 1991, p.44, as *Alterbidinium minus*. Holotype: Alberti, 1959b, pl.9, fig.10. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Alterbidinium*. Age: late Senonian.

montanaense (Harland, 1977a, p.184–185, pl.25, figs.4,6–7,10–12) Lentin and Williams, 1985, p.14. Holotype: Harland, 1977a, pl.25, fig.4. Originally *Deflandrea*, subsequently *Spinidinium*, thirdly *Alterbia* (combination illegitimate), fourthly (and now) *Alterbidinium*. Age: late Campanian–Maastrichtian.

?novozealandicum Schiøler et al., 2001, p.146,148–150, figs.4A–F,5A–G. Holotype: Schiøler et al., 2001, fig.4A. Questionable assignment: Schiøler et al. (2001, p.146). Age: middle-late Campanian.

nuculum Vasilyeva in Andreeva-Grigorovich et al., 2011, p.42–43, pl.11, figs.5–8,11–14; text-fig.18b ex Williams and Fensome, 2016, p.138. Holotype: Andreeva-Grigorovich et al., 2011, pl.11, figs.5–6; text-fig.18b, designated by Williams and Fensome (2016, p.138). This name was not validly published by Vasilyeva in Andreeva-Grigorovich et al. (2011, p.42–43) since the holotype citation (pl.11, figs.5–8,11–14 and text-fig.18b) includes more than one specimen. The holotype was clearly designated in Williams and Fensome (2016), thus validating the name *Alterbidinium nuculum*. Age: Thanetian–Ypresian.

nummuliforme Vasilyeva in Andreeva-Grigorovich et al., 2011, p. 43, pl.11, figs.15–17; text-fig.18c ex Williams et al., herein. Holotype: Andreeva-Grigorovich et al., 2011, pl.11, fig.15; text-fig.18c, designated by Williams and Fensome (2016, p.138). This name was not validly published by Vasilyeva in Andreeva-Grigorovich et al. (2011, p.43) since the holotype citation (pl.11, figs.15–17 and text-fig.18c) includes more than one specimen. The holotype was clearly designated in Williams and Fensome (2016), thus validating the name *Alterbidinium nummuliforme*. Age: Thanetian–Ypresian.

ovale (He Chengquan, 1991, p.73, pl.29, figs.7–10) Lentin and Williams, 1993, p.22. Holotype: He Chengquan, 1991, pl.29, fig.7. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*. Age: Turonian–middle Eocene.

papillatum Khowaja-Ateequzzaman et al., 1991, p.38,40–41, pl.1, figs.1–7; pl.2, figs.5–6; text-figs.1A–B,2A–B,3A–B. Holotype: Khowaja-Ateequzzaman et al., 1991, pl.1, figs.4–7; text-figs.1A–B. Age: Turonian–Santonian.

pentangulare Vasilyeva in Andreeva-Grigorovich et al., 2011, p.44, pl.11, figs.9–10; text-fig.18d ex Williams and Fensome, 2016, p.138. Holotype: Andreeva-Grigorovich et al., 2011, pl.11, figs.10; text-fig. 18d, designated by Williams and Fensome (2016, p.138). This name was not validly published by Vasilyeva in Andreeva-Grigorovich et al. (2011, p.44) since the holotype citation (pl.11, figs.9–10 and text-fig.18d) includes more than one specimen. The holotype was clearly designated in Williams and Fensome (2016), thus validating the name *Alterbidinium pentangulare*. Age:Ypresian.

?pentaradiatum (Cookson and Eisenack, 1965c, p.139–140, pl.18, figs.1–2) Lentin and Williams, 1985, p.15. Holotype: Cookson and Eisenack, 1965c, pl.18, fig.1; Stover, 1974, pl.2, figs.6a–b. Originally *Deflandrea*,

subsequently *Alterbia*? (combination illegitimate), thirdly (and now) *Alterbidinium*? Questionable assignment: Lentin and Williams (1985, p.15). Age: Paleocene.

subsp. *pentaradiatum*. Autonym. Holotype: Cookson and Eisenack, 1965c, pl.18, fig.1; Stover, 1974, pl.2, figs.6a–b. Originally *Deflandrea pentaradiata* subsp. *pentaradiata*, subsequently *Alterbia*? *pentaradiata* subsp. *pentaradiata* (combination illegitimate), thirdly (and now) *Alterbidinium*? *pentaradiatum* subsp. *pentaradiatum*.

subsp. *precedum* (Cookson and Eisenack, 1974, p.49, pl.20, figs.1–2) Lentin and Williams, 1985, p.15. Holotype: Cookson and Eisenack, 1974, pl.20, fig.1. Originally *Deflandrea pentaradiata* subsp. *preceda*, subsequently *Alterbia*? *pentaradiata* subsp. *preceda* (combination illegitimate), thirdly (and now) *Alterbidinium*? *pentaradiatum* subsp. *precedum*. Age: Paleocene.

pilosum (Davey, 1969b, p.9, pl.3, figs.2–5) Lentin and Williams, 1985, p.15. Holotype: Davey, 1969b, pl.3, figs.2,5. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Alterbidinium*. Age: Campanian–Maastrichtian.

prominense Vasilyeva in Andreeva-Grigorovich et al., 2011, p.44–45, pl.12, figs.5–6,9–11; text-fig.18e ex Williams and Fensome, 2016, p.139. Holotype: Andreeva-Grigorovich et al., 2011, pl.12, figs.10–11; text-fig.18e, designated by Williams and Fensome (2016, p.139). This name was not validly published by Vasilyeva in Andreeva-Grigorovich et al. (2011, p.44–45) since the holotype citation (pl.12, figs.5–6, 9–11 and text-fig.18e) includes more than one specimen. The holotype was clearly designated in Williams and Fensome (2016), thus validating the name *Alterbidinium prominense*. Age: Danian–Selandian.

pseudocirculum Vasilyeva in Andreeva-Grigorovich et al., 2011, p.45–46, pl.11, figs.20–24; text-fig.18f ex Williams and Fensome, 2016, p.139. Holotype: Andreeva-Grigorovich et al., 2011, pl.11, figs.23–24; text-fig.18f, designated by Williams and Fensome (2016, p.139). This name was not validly published by Vasilyeva in Andreeva-Grigorovich et al. (2011, p.45–46) since the holotype citation (pl.11, figs.20–24 and text-fig.18f) includes more than one specimen. The holotype was clearly designated in Williams and Fensome (2016), thus validating the name *Alterbidinium pseudocirculum*. In the caption to text-fig.18, the species is referred to as *Alterbidinium pseudocingulum*. Age: Danian–Selandian.

"*puyangense*" (Jin Guangxing, He Chengquan and Zhu Shenzhao in He Chengquan et al., 1989, p.37–38, pl.3, fig.7; text-fig.1) Lentin and Williams, 1993, p.23. Holotype: He Chengquan et al., 1989, pl.3, fig.7; text-fig.1. **NOW** *Subtilisphaera*. Originally *Alterbia* (generic name illegitimate), subsequently *Alterbidinium*, thirdly (and now) *Subtilisphaera*. Age: Early Tertiary.

"*recticorne*" (Vozzhennikova, 1967, p.151–152, pl.77, figs.1–4; pl.78, figs.1–3; pl.79, figs.1–2) Harker and Sarjeant in Harker et al., 1990, p.104. Holotype: Vozzhennikova, 1967, pl.77, fig.2; Lentin and Vozzhennikova, 1990, pl.3, fig.10; text-fig.13B. Lectotype: Vozzhennikova, 1967, pl.77, fig.1, designated by Stover and Evitt (1978, p.93); however, see discussion below. Originally *Albertia* (generic name illegitimate), subsequently *Alterbia* (combination illegitimate), thirdly *Alterbidinium*. **Taxonomic senior synonym:** *Deflandrea* (now *Alterbidinium*) *acutula*, according to Whitney (1979, p.125) and Lentin and Williams (1993, p.14). The nomenclatural type of the genus *Alterbidinium* remains the holotype of *Alterbidinium recticorne*. Vozzhennikova (1967, p.151) designated the holotype by means of a "preparation" number and reference to her pl.77, figs.1–2. However, these two illustrations are of different specimens. I.C.N. Article 43.3 indicates that for fossils prior to 2001, holotype designation does not need to be tied directly to a particular figure and hence this species name was validly published by Vozzhennikova (1967). Stover and Evitt (1978, p.93) designated the specimen illustrated in Vozzhennikova (1967, pl.77, fig.1) as lectotype. However, Lentin and Vozzhennikova (1990, p.32) implied that the originally intended holotype is the specimen illustrated in Vozzhennikova (1967, pl.77, fig.2); so the latter must supersede Stover and Evitt's lectotype designation. Age: Turonian.

rugulum Iakovleva and Kulkova, 2001, p.16, pl.8, figs.8,12–14; text-fig.10. Holotype: Iakovleva and Kulkova, 2001, pl.8, figs.8,12–14. Age: early Eocene (Ypresian).

saltanovae Vasilyeva in Andreeva-Grigorovich et al., 2011, p.46–47, pl.11, figs.25–28; text-fig.18g ex Williams and Fensome, 2016, p.139. Holotype: Andreeva-Grigorovich et al., 2011, pl.11, figs.25–26; text-fig. 18g, designated by Williams and Fensome (2016, p.139). This name was not validly published by Vasilyeva in Andreeva-Grigorovich et al. (2011, p.46–47) since the holotype citation (pl.11, figs.25–28 and text-fig.18g) includes more than one specimen. The holotype was clearly designated in Williams and Fensome (2016), thus validating the name *Alterbidinium saltanovae*. Age: Danian–Selandian.

simplex Vasilyeva in Andreeva-Grigorovich et al., 2011, p.47–48, pl.12, figs.1–4; text-fig.18h ex Williams and Fensome, 2016, p.139. Holotype: Andreeva-Grigorovich et al., 2011, pl.12, figs.1–2; text-fig. 18h, designated by Williams and Fensome (2016, p.139). This name was not validly published by Vasilyeva in Andreeva-Grigorovich et al. (2011, p.47–48) since the holotype citation (pl.12, figs.1–4 and text-fig.18h) includes more than one specimen. The holotype was clearly designated in Williams and Fensome (2016), thus validating the name *Alterbidinium simplex*. Age: Thanetian–Ypresian.

subtile (He Chengquan in Zheng Yahui and He Chengquan, 1984, p.90–91, pl.6, figs.1–6; pl.10, figs.1–2) Lentin and Williams, 1989, p.14. Holotype: Zheng Yahui and He Chengquan, 1984, pl.6, fig.3. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*. Age: Campanian.

?*ulloriaq* Nøhr-Hansen, 1996, p.28–29, pl.14, figs.4–12. Holotype: Nøhr-Hansen, 1996, pl.14, fig.4. Questionable assignment: Nøhr-Hansen (1996, p.28). Age: earliest Paleocene.

varium Kirsch, 1991, p.98–99, pl.19, figs.1–10; text-figs.46a–h,47a–b. Holotype: Kirsch, 1991, pl.19, figs.1–2; text-fig.46a. Age: early Maastrichtian.

xinjiangense (He Chengquan, 1991, p.73–74, pl.28, figs.1–6) Lentin and Williams, 1993, p.23. Holotype: He Chengquan, 1991, pl.28, fig.3. Originally *Alterbia* (generic name illegitimate), subsequently (and now) *Alterbidinium*. Age: Paleocene.

AMBONOSPHAERA Fensome, 1979, p.50–51. Emendation: Prauss, 1989, p.31. Taxonomic senior synonym: *Polygonifera*, according to Brenner (1988, p.68) — however, Prauss (1989, p.31) retained *Ambonosphaera*. Type: Fensome, 1979, pl.7, figs.3,6,9; text-figs.16B–C, as *Ambonosphaera calloviana*.

"*bavarica*" Lund and Ecke, 1988, p.348,351, pl.1, figs.2a–b,4; text-figs.3a–b. Holotype: Lund and Ecke, 1988, pl.1, figs.2a–b; text-fig.3a. **NOW** *Polygonifera*. Originally *Ambonosphaera*, subsequently (and now) *Polygonifera*. Age: ?late middle Oxfordian.

**calloviana* Fensome, 1979, p.51–54, pl.7, figs.3,5–6,8–9; text-figs.16A–D,17A–B. Holotype: Fensome, 1979, pl.7, figs.3,6,9; text-figs.16B–C; Fensome et al., 1993a, figs.1–3,7–8 — p.1007. Originally (and now) *Ambonosphaera*, subsequently *Polygonifera*. Prauss (1989, p.31) retained this species in *Ambonosphaera*. Age: early Callovian.

delicata Lebedeva in Lebedeva and Nikitenko, 1998, p.810–811, pl.1, figs.5–7; text-figs.7a–b. Holotype: Lebedeva and Nikitenko, 1998, pl.1, fig.5. Age: Berriasian–Valanginian.

hemicavata Prauss, 1989, p.31–32, pl.10, figs.8–15; text-fig.9. Holotype: Prauss, 1989, pl.10, figs.8,12; text-fig.9. Age: late Bajocian–early Callovian.

"*jurassica*" (Gitmez and Sarjeant, 1972, p.240–241, pl.14, figs.5,8) Fensome, 1979, p.51. Emendation: Poulsen and Riding, 1992, p.28, as *Senoniasphaera jurassica*. Holotype: Gitmez and Sarjeant, 1972, pl.14, fig.5; Poulsen and Riding, 1992, text-figs.3C–D. **NOW** *Senoniasphaera*. Originally *Hexagonifera*, subsequently (and now) *Senoniasphaera*, thirdly *Ambonosphaera*. Taxonomic senior synonym: *Meiourogonya* (now *Lithodinia*?) *staffinensis*, according to Williams et al. (1993, p.32) — however, in the same publication, Williams et al. (1993, p.56) retained *Hexagonifera* (now *Senoniasphaera*) *jurassica*. Age: Kimmeridgian.

?*staffinensis* (Gitmez, 1970, p.276–278, pl.3, fig.1; text-figs.20A–B) Poulsen and Riding, 1992, p.26. Emendation: Poulsen and Riding, 1992, p.26, as *Ambonosphaera*? *staffinensis*. Holotype: Gitmez, 1970, pl.3, fig.1; text-

figs.20A–B; Poulsen and Riding, 1992, pl.1, fig.6; text-figs.1A–B. Originally *Meiourogonya*, subsequently *Lithodinia*, thirdly *Polygonifera*, fourthly (and now) *Ambonosphaera*?, fifthly *Lithodinia*?. Williams et al. (1998, p.39) retained this species in *Ambonosphaera*?. Questionable assignment: Poulsen and Riding (1992, p.26). Taxonomic junior synonym: *Senoniasphaera*? *frisia*, according to Poulsen and Riding (1992, p.26); *Hexagonifera* (now *Senoniasphaera*) *jurassica*, according to Williams et al. (1993, p.32) — however, elsewhere in the same publication, Williams et al. (1993, p.56) retained *Hexagonifera* (now *Senoniasphaera*) *jurassica*. Age: early Kimmeridgian.

AMICULOSPHERA Harland, 1979b, p.535. Type: Harland, 1979b, pl.2, figs.1–3, as *Amiculosphaera umbraculum*.

***umbraculum** Harland, 1979b, p.535, pl.1, figs.11–14,22–23; pl.2, figs.1–3. Holotype: Harland, 1979b, pl.2, figs.1–3; Fensome et al., 1995, figs.1–3 — p.1857. N.I.A. Age: middle Miocene–Pleistocene.

AMPHIDIADEMA Cookson and Eisenack, 1960a, p.4. Emendation: Lentin and Williams, 1976, p.60–61. Type: Cookson and Eisenack, 1960a, pl.1, fig.11, as *Amphidiadema denticulata*.

***denticulata** Cookson and Eisenack, 1960a, p.4, pl.1, fig.11. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.11. Age: Senonian.

nucula (Cookson and Eisenack, 1962b, p.486, pl.1, fig.13) Lentin and Williams, 1976, p.61. Holotype: Cookson and Eisenack, 1962b, pl.1, fig.13. Originally *Deflandrea*, subsequently (and now) *Amphidiadema*. N.I.A. Age: Senonian.

rectangularis (Cookson and Eisenack, 1962b, p.486, pl.1, figs.14–15) Lentin and Williams, 1976, p.61. Holotype: Cookson and Eisenack, 1962b, pl.1, fig.14; Jan du Chêne et al., 1986a, pl.48, figs.14–15. Originally *Deflandrea*, subsequently (and now) *Amphidiadema*. Contrary to the belief of Stover and Evitt (1978, p.94), Gocht (1976, p.322) did not consider this species to be a taxonomic junior synonym of *Triblastula* (now *Hystrichosphaeropsis*) *quasicribrata*. Age: late Turonian–mid Senonian.

"subsp. **rectangularis**". Autonym. Holotype: Cookson and Eisenack, 1962b, pl.1, fig.14; Jan du Chêne et al., 1986a, pl.48, figs.14–15. **Now redundant**. Originally *Deflandrea rectangularis* subsp. *rectangularis*, subsequently *Amphidiadema rectangularis* subsp. *rectangularis*.

"subsp. **samuelsonii**" (Kjellström, 1973, p.22, fig.18) Lentin and Williams, 1976, p.61. Holotype: Kjellström, 1973, fig.18. Originally *Deflandrea rectangularis* var. *samuelsonii*, subsequently *Deflandrea rectangularis* subsp. *samuelsonii*, thirdly *Amphidiadema rectangularis* subsp. *samuelsonii*. **Taxonomic senior synonym**: *Triblastula* (now *Hystrichosphaeropsis*) *quasicribrata*, according to Gocht (1976, p.322). Age: early–late Maastrichtian.

?**similis** Marheinecke, 1992, p.80–81, pl.16, figs.5–7; text-fig.14. Holotype: Marheinecke, 1992, pl.16, fig.7. Questionable assignment: Marheinecke (1992, p.80). Contrary to the opinion of Lentin and Williams (1993, p.24), Williams et al. (1998, p.39) considered this name to be validly published. Age: early–late Maastrichtian.

AMPHIGYMNium Lentin and Vozzhennikova, 1990, p.28–29. Type: Vozzhennikova, 1967, pl.1, fig.2, as *Amphidinium mitratum*.

cooksoniae (Boltenhagen, 1977, p.75–76, pl.11, figs.5a–c,6–7) Lentin and Vozzhennikova, 1990, p.30. Holotype: Boltenhagen, 1977, pl.11, figs.5a–c; Lentin and Vozzhennikova, 1990, Appendix A, fig.40. Originally *Dinogymnium*, subsequently (and now) *Amphigymnium*. Age: Campanian.

***mitratum** (Vozzhennikova, 1967, p.40, pl.1, figs.2–3; pl.5, figs.1–2,4) Lentin and Vozzhennikova, 1990, p.29. Emendation: Lentin and Vozzhennikova, 1990, p.29–30, as *Amphigymnium mitratum*. Holotype: Vozzhennikova,

1967, pl.1, fig.2; Lentin and Vozzhennikova, 1990, pl.1, figs.10–11; text-fig.12; Appendix A, fig.38. Originally *Amphidinium* (Appendix B), subsequently *Dinogymnium*, thirdly (and now) *Amphigymnium*. Age: Turonian–Senonian.

rigaudiae (Boltenhagen, 1977, p.73, pl.11, figs.1a–b,2–4) Lentin and Vozzhennikova, 1990, p.30. Holotype: Boltenhagen, 1977, pl.11, figs.1a–b; Lentin and Vozzhennikova, 1990, Appendix A, fig.39. Originally *Dinogymnium*, subsequently (and now) *Amphigymnium*. Age: Campanian–Maastrichtian.

"**AMPHORA**" Willems, 1995a, p.66–67. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1298, who noted that the cyst wall is pithonelloid and so dinoflagellate affinity is questionable). **Name illegitimate** — **senior homonym**: *Amphora* Ehrenberg ex Kützing, 1844. **Substitute name**: *Coronadinium*. Type: Willems, 1995a, pl.3, figs.1–3, as *Amphora coronata*.

"**coronata*" Willems, 1995a, p.67,69, pl.3, figs.1–6; pl.4, figs.1–4. Holotype: Willems, 1995a, pl.3, figs.1–3. **NOW** *Coronadinium*. Originally *Amphora* (generic name illegitimate), subsequently (and now) *Coronadinium*. Age: early Campanian.

AMPHOROSPHAERIDIUM Davey, 1969c, p.30. Taxonomic senior synonym: *Lanternosphaeridium*, according to Norvick (1976, p.50) — however, Stover and Evitt (1978, p.140–141) retained *Amphorosphaeridium*. Type: Davey, 1969c, pl.3, figs.1–2, as *Amphorosphaeridium fenestratum*.

?*almae* Schiøler, 2005, p.28–29, pl.12, figs.11–13; text-figs.5a–h. Holotype: Schiøler, 2005, pl.12, fig.11. Questionable assignment: Schiøler (2005, p.28). Age: middle to late Rupelian.

"*axiale*" (Eisenack, 1965b, p.150, pl.15, figs.1–4) Davey, 1969c, p.35. Holotype: Eisenack, 1965b, pl.15, fig.2. **NOW** *Fibrocysta*. Originally *Cordosphaeridium*, subsequently *Lanternosphaeridium*, thirdly *Amphorosphaeridium*, fourthly (and now) *Fibrocysta*. Age: late Eocene–early Oligocene.

"*bipolare*" (Cookson and Eisenack, 1965b, p.135, pl.16, figs.7–8) Davey, 1969c, p.35. Holotype: Cookson and Eisenack, 1965b, pl.16, fig.8. **NOW** *Fibrocysta*. Originally *Cordosphaeridium*, subsequently *Lanternosphaeridium*, thirdly *Amphorosphaeridium*, fourthly (and now) *Fibrocysta*. Age: early Eocene.

**fenestratum* Davey, 1969c, p.30–33, pl.1, fig.6; pl.2, figs.2,4–6; pl.3, figs.1–3; text-fig.1, nos.2a–e; text-fig.2. Holotype: Davey, 1969c, pl.3, figs.1–2; Fensome et al., 1993a, fig.1 — p.1181; figs.1–2 — p.1183. Age: Campanian–Maastrichtian.

subsp. *dividum* (Davey, 1969c, p.32–33, pl.2, figs.5–6; text-fig.2) Lentin and Williams, 1973, p.13. Holotype: Davey, 1969c, pl.2, fig.5; Fensome et al., 1993a, fig.1 — p.1135; fig.2 — p.1181. Originally *Amphorosphaeridium fenestratum* var. *dividum*, subsequently (and now) *Amphorosphaeridium fenestratum* subsp. *dividum*. Age: Campanian–Maastrichtian.

"var. *dividum*" Davey, 1969c, p.32–33, pl.2, figs.5–6; text-fig.2. Holotype: Davey, 1969c, pl.2, fig.5; Fensome et al., 1993a, fig.1 — p.1135; fig.2 — p.1181. **NOW** *Amphorosphaeridium fenestratum* subsp. *dividum*. Originally *Amphorosphaeridium fenestratum* var. *dividum*, subsequently (and now) *Amphorosphaeridium fenestratum* subsp. *dividum*. Age: Campanian–Maastrichtian.

subsp. *fenestratum*. Autonym. Holotype: Davey, 1969c, pl.3, figs.1–2; Fensome et al., 1993a, fig.1 — p.1187; figs.1–2 — p.1183.

"var. *fenestratum*". Autonym. Holotype: Davey, 1969c, pl.3, figs.1–2; Fensome et al., 1993a, fig.1 — p.1187; figs.1–2 — p.1183. **Now redundant**.

latitubulum Davey, 1969c, p.34–35, pl.4, figs.2,7; text-fig.1, no.4. Holotype: Davey, 1969c, pl.4, fig.2. Age: Campanian–Maastrichtian.

"*majus*" (Lejeune-Carpentier, 1940, p.B220–B221; text-fig.13) Lejeune-Carpentier and Sarjeant, 1981, p.12. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.12, as *Amphorosphaeridium majus*. Holotype: Lejeune-Carpentier, 1940, text-fig.13; Strel et al., 1977, pl.1, fig.7; Lejeune-Carpentier and Sarjeant, 1981, pl.2, figs.6–7; text-fig.7. **NOW** *Exochosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*?, thirdly *Cordosphaeridium*, fourthly *Dapsilidinium*? (combination not validly published), fifthly *Amphorosphaeridium*, sixthly (and now) *Exochosphaeridium*. Taxonomic junior synonyms: *Baltisphaeridium* (as *Exochosphaeridium bifidum*) and *Exochosphaeridium bifidum* var. *involutum* (as *Exochosphaeridium bifidum* subsp. *involutum*), both according to Peyrot (2011, p.284). Age: Late Cretaceous.

multibrevum Davey, 1969c, p.33–34, pl.3, figs.5–6; pl.4, fig.1; text-fig.1, no.3. Holotype: Davey, 1969c, pl.3, fig.5. Age: Campanian–Maastrichtian.

?*multispinosum* (Davey and Williams, 1966b, p.89–90, pl.3, fig.6) Sarjeant, 1981, p.123. Holotype: Davey and Williams, 1966b, pl.3, fig.6; Bujak et al., 1980, pl.7, figs.1–2. Originally *Cordosphaeridium*, subsequently (and now) *Amphorosphaeridium*?. Questionable assignment: Sarjeant (1981, p.123). Age: early Eocene.

?*robustum* (Salujha and Kindra, 1981, p.52, pl.3, figs.55–56) Jain and Garg, 1982, p.69. Holotype: Salujha and Kindra, 1981, pl.3, fig.55. Originally *Hystrichokolpoma*, subsequently (and now) *Amphorosphaeridium*?. Questionable assignment: Jain and Garg (1982, p.69). Jain and Garg (1982, p.69) indicated that one of the two specimens illustrated by Salujha and Kindra (1981, pl.3, fig.56) is assignable to a species of *Achomosphaera*. Age: early Paleocene.

"**AMPHORULA**" Dodekova, 1969, p.19. Emendations: Zotto et al., 1987, p.203; Monteil, 1990, p.602. **Name illegitimate — senior homonym:** *Amphorula* Grove 1922. **Substitute name:** *Amphorulacysta* Chen, 2013, p.295. Type: Dodekova, 1969, pl.4, figs.1–3, as *Amphorula metaelliptica*.

"*delicata*" van Helden, 1986, p.188, pl.4, figs.4–7. Holotype: van Helden, 1986, pl.4, fig.4. **NOW** *Amphorulacysta*. Originally *Amphorula* (generic name illegitimate), subsequently (and now) *Amphorulacysta*. Age: Portlandian–early Berriasian.

"*dodekovae*" Zotto et al., 1987, p.203–204, pl.2, fig.1; pl.3, fig.4; text-fig.7. Emendation: Monteil, 1990, p.604. Holotype: Zotto et al., 1987, pl.2, fig.1. **NOW** *Amphorulacysta*? Originally *Amphorula* (generic name illegitimate), subsequently (and now) *Amphorulacysta*? Age: Kimmeridgian.

"*expirata*" (Davey, 1982b, p.28–29, pl.8, figs.13–16) Courtinat, 1989, p.174. Holotype: Davey, 1982b, pl.8, figs.13–14. **NOW** *Amphorulacysta*? Originally *Egmontodinium*, subsequently *Amphorula* (generic name illegitimate), thirdly (and now) *Amphorulacysta*? Age: early Portlandian–earliest Ryazanian.

"**metaelliptica*" Dodekova, 1969, p.20, pl.4, figs.1–6; text-figs.E–F. Emendation: Monteil, 1990, p.603, as *Amphorula metaelliptica*. Holotype: Dodekova, 1969, pl.4, figs.1–3. **NOW** *Amphorulacysta*. Originally *Amphorula*, (generic name illegitimate), subsequently (and now) *Amphorulacysta*. Age: Tithonian.

"?monteilii" Dodekova, 1994, p.18–19, pl.1, figs.6–11,13–14; pl.2, figs.6–10; text-figs.4a–b. Holotype: Dodekova, 1994, pl.1, figs.13–14. **NOW** *Amphorulacysta*? Originally *Amphorula*? (generic name illegitimate), subsequently (and now) *Amphorulacysta*? Questionable assignment: Dodekova (1994, p.18). Age: late Tithonian–Berriasian.

AMPHORULACYSTA Chen, 2013, p.293. Substitute name for *Amphorula* Dodekova, 1969 (an illegitimate name). Emendations: Zotto et al., 1987, p.203 and Monteil, 1990, p.602, both for *Amphorula*. Chen (2013, p.295) used the term "emendation" but was clearly referring to the change of name and did not intend to provide a revised description or diagnosis. Type: Dodekova, 1969, pl.4, figs.1–3, as *Amphorula metaelliptica*.

delicata (van Helden, 1986, p.188, pl.4, figs.4–7) Williams and Fensome 2016, p.139. Holotype: van Helden, 1986, pl.4, fig.4. Originally *Amphorula* (generic name illegitimate), subsequently (and now) *Amphorulacysta*. This

combination was not validly published in Chen (2013, p.295), since that author did not fully reference the basionym. Age: Portlandian–early Berriasian.

?*dodekova* (Zotto et al., 1987, p.203–204, pl.2, fig.1; pl.3, fig.4; text-fig.7) Williams and Fensome 2016, p.139. Holotype: Zotto et al., 1987, pl.2, fig.1. Originally *Amphorula* (generic name illegitimate), subsequently (and now) *Amphorulacysta*? Questionable assignment: Williams and Fensome (2016, p.139). Age: Kimmeridgian.

?*expirata* (Davey, 1982b, p.28–29, pl.8, figs.13–16) Williams and Fensome 2016, p.139. Holotype: Davey, 1982b, pl.8, figs.13–14. Originally *Egmontodinium*, subsequently *Amphorula* (generic name illegitimate), thirdly (and now) *Amphorulacysta*? Questionable assignment: Williams and Fensome (2016, p.139). Age: early Portlandian–earliest Ryazanian.

**metaelliptica* (Dodekova, 1969, p.20, pl.4, figs.1–6; text-figs.E–F) Williams and Fensome 2016, p.139. Emendation: Monteil, 1990, p.603, as *Amphorula metaelliptica*. Holotype: Dodekova, 1969, pl.4, figs.1–3. Originally *Amphorula*, (generic name illegitimate), subsequently (and now) *Amphorulacysta*. The combination was not validly published in Chen (2013, p.295), since that author did not fully reference the basionym. Age: Tithonian.

?*monteilii* (Dodekova, 1994, p.18–19, pl.1, figs.6–11,13–14; pl.2, figs.6–10; text-figs.4a–b) Williams and Fensome 2016, p.139. Holotype: Dodekova, 1994, pl.1, figs.13–14. Originally *Amphorula*? (generic name illegitimate), subsequently (and now) *Amphorulacysta*? Questionable assignment: Williams and Fensome (2016, p.139). Age: late Tithonian–Berriasian.

AMPULLADINIUM Riding, Helby and Parker in Riding and Helby, 2001g, p.181,183. Type: Riding and Helby, 2001g, figs.2I–L, as *Ampulladinium variabile*.

aiax Mantle, 2009b, p.113–114, pl.5, figs.8–11; text-figs.5A–B. Holotype: Mantle, 2009b, pl.5, fig.8. Age: Callovian.

"*minutispinosum*" Parker in Riding and Helby, 2001g, p.183. **Name not validly published:** no description. **Taxonomic senior synonym:** *Ampulladinium variabile*, according to Riding and Helby (2001g, p.183).

"*robustum*" Parker in Riding and Helby, 2001g, p.200. **Name not validly published:** no description. **Taxonomic senior synonym:** *Dissimulidinium purattense*, according to Riding and Helby (2001g, p.200).

**variabile* Riding, Helby and Parker in Riding and Helby, 2001g, p.183–184, figs.2A–P. Holotype: Riding and Helby, 2001g, figs.2I–L. Taxonomic junior synonym: *Ampulladinium minutispinosum* (name not validly published), according to Riding and Helby (2001g, p.183). Age: Tithonian.

ANDALUSIELLA Riegel, 1974, p.357. Emendations: Riegel and Sarjeant, 1982, p.287,289; Masure et al., 1996, p.172–173,177. Nomenclatural junior synonym: *Alterbia*, by implication in Lentin and Williams (1976, p.149), who illegitimately included the "type species" of the senior generic name *Andalusiella*, *Andalusiella mauthei*, in *Alterbia*. See discussion under *Alterbia*. Type: Riegel, 1974, pl.2, fig.4, as *Andalusiella mauthei*.

acicornuta Srivastava, 1995, p.264–265,268, pl.3, figs.1–6. Holotype: Srivastava, 1995, pl.3, figs.1–2. Age: Maastrichtian.

basita Slimani et al., 2012, p.349–350, fig.6G–K. Holotype: Slimani et al., 2012, fig.6G–I. Age: late Maastrichtian–early Danian.

dubia (Jain and Millepied, 1973, p.25, pl.2, figs.12–13) Lentin and Williams, 1980, p.41. Emendation: Masure et al., 1996, p.180, as *Andalusiella dubia*. Holotype: Jain and Millepied, 1973, pl.2, fig.13. Originally *Senegalinium*, subsequently *Deflandrea*, thirdly *Deflandrea*?, fourthly *Andalusiella*?, fifthly (and now) *Andalusiella*. Questionable assignment: Lentin and Williams (1980, p.41) — however, Masure et al. (1996, p.180) included the species in *Andalusiella* without question. Age: Maastrichtian.

gabonensis (Stover and Evitt, 1978, p.115) Wrenn and Hart, 1988, p.362. Holotype: Malloy, 1972, pl.1, fig.17, as *Svalbardella australina*. Originally *Palaeocystodinium*, subsequently (and now) *Andalusiella*. This species is based on material described by Malloy (1972, p.63, pl.1, fig.17 not pl.1, fig.20). Age: Maastrichtian.

inflata (Rauscher and Doubinger, 1982, p.104–105, pl.1, figs.13–17) Lentin and Williams, 1985, p.17. Holotype: Rauscher and Doubinger, 1982, pl.1, figs.13–15. Originally *Svalbardella*, subsequently (and now) *Andalusiella*. Age: Maastrichtian.

ivoirensis Masure et al., 1996, p.177,179–180, pl.1, figs.1–10; pl.2, figs.1–5; text-figs.3–4. Holotype: Masure et al., 1996, pl.1, figs.1–2; text-fig.3. Age: Maastrichtian.

"*laevigata*" (Malloy, 1972, p.64, pl.1, figs.1–7) Lentin and Williams, 1977b, p.8. Holotype: Malloy, 1972, pl.1, fig.5. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently *Lejeunia* (combination illegitimate), thirdly *Andalusiella*, fourthly *Lejeunecysta*, fifthly (and now) *Senegalinium*. Taxonomic junior synonym: *Senegalinium psilatum*, according to Herngreen (1975, p.61). Age: Senonian.

**mauthei* Riegel, 1974, p.357–360, pl.2, figs.1–7; text-figs.5A–B,6A–B. Emendation: Riegel and Sarjeant, 1982, p.289, as *Andalusiella mauthei*. Holotype: Riegel, 1974, pl.2, fig.4; Riegel and Sarjeant, 1982, figs.1A–C,4A,5A; Fensome et al., 1995, figs.2,5–6 — p.1613. Originally (and now) *Andalusiella*, subsequently *Alterbia* (combination illegitimate). Taxonomic senior synonym: *Svalbardella* (now *Andalusiella*) *polymorpha*, according to Lentin and Williams (1976, p.50) — however, Lentin and Williams (1977b, p.8) retained *Andalusiella mauthei*. Although Masure et al. (1996, p.180) indicated that they were emending this species, no emendation was provided. Age: ?Senonian.

subsp. *aegyptiaca* (Schrank, 1988, p.131–132, pl.1, figs.1–6) Masure et al., 1996, p.180. Holotype: Schrank, 1988, pl.1, fig.1. Originally *Andalusiella polymorpha* subsp. *aegyptiaca*, subsequently (and now) *Andalusiella mauthei* subsp. *aegyptiaca*. Age: late Campanian.

subsp. *mauthei*. Autonym. Holotype: Riegel, 1974, pl.2, fig.4; Riegel and Sarjeant, 1982, figs.1A–C,4A,5A.

subsp. *punctata* (Jain and Millepied, 1973, p.29, pl.2, fig.24; pl.3, figs.26–28) Masure et al., 1996, p.180. Emendation: Masure et al., 1996, p.180–181, as *Andalusiella mauthei* subsp. *punctata*. Holotype: Jain and Millepied, 1973, pl.3, fig.27. Originally *Palaeocystodinium punctatum*, subsequently *Andalusiella polymorpha* subsp. *punctata*, thirdly (and now) *Andalusiella mauthei* subsp. *punctata*. Taxonomic senior synonym: *Svalbardella* (now *Andalusiella*) *polymorpha*, according to Lentin and Williams (1976, p.89) — however, Schrank (1987, p.265) retained this taxon as the subspecies *Andalusiella polymorpha* subsp. *punctata*. Jain and Millepied (1973, p.32 — figure caption) mislabelled the specimen illustrated in their pl.2, fig.24 as *Palaeocystodinium microgranulatum*. Age: Maastrichtian.

polymorpha (Malloy, 1972, p.63–64, pl.1, figs.8–16,21) Lentin and Williams, 1977b, p.8. Holotype: Malloy, 1972, pl.1, fig.15. Originally *Svalbardella*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Andalusiella*. Taxonomic junior synonyms: *Palaeocystodinium microgranulatum*, according to Lentin and Williams (1976, p.89); *Senegalinium trisinum*, according to Lentin and Williams (1976, p.164); *Palaeocystodinium punctatum*, according to Lentin and Williams (1976, p.89) — however, Schrank (1987, p.265) retained that taxon as the subspecies *Andalusiella polymorpha* subsp. *punctata*; *Andalusiella mauthei*, according to Lentin and Williams (1976, p.149) — however, Lentin and Williams (1977b, p.8) retained *Andalusiella mauthei*. Age: Maastrichtian.

"subsp. *aegyptiaca*" Schrank, 1988, p.131–132, pl.1, figs.1–6. Holotype: Schrank, 1988, pl.1, fig.1. **NOW** *Andalusiella mauthei* subsp. *aegyptiaca*. Originally *Andalusiella polymorpha* subsp. *aegyptiaca*, subsequently (and now) *Andalusiella mauthei* subsp. *aegyptiaca*. Age: late Campanian.

"subsp. *polymorpha*". Autonym. Holotype: Malloy, 1972, pl.1, fig.15. **Now redundant.**

"subsp. *punctata*" (Jain and Millepied, 1973, p.29, pl.2, fig.24; pl.3, figs.26–28) Schrank, 1987, p.265. Emendation: Masure et al., 1996, p.180–181, as *Andalusiella mauthei* subsp. *punctata*. Holotype: Jain and Millepied, 1973, pl.3, fig.27. **NOW** *Andalusiella mauthei* subsp. *punctata*. Originally *Palaeocystodinium punctatum*, subsequently *Andalusiella polymorpha* subsp. *punctata*, thirdly (and now) *Andalusiella mauthei* subsp. *punctata*. Taxonomic senior synonym: *Svalbardella* (now *Andalusiella*) *polymorpha*, according to Lentin and Williams (1976, p.89) — however, Schrank (1987, p.265) retained this taxon as the subspecies *Andalusiella polymorpha* subsp. *punctata*. Age: Maastrichtian.

rhombohedra (Benson, 1976, p.195, pl.9, figs.10–12) Stover and Evitt, 1978, p.95. Holotype: Benson, 1976, pl.9, figs.10–12. Originally *Deflandrea*, subsequently *Alterbia* (generic name illegitimate), thirdly (and now) *Andalusiella*. Age: early Paleocene.

rhomboides (Boltenhagen, 1977, p.106–107, pl.20, figs.1a–b,2a–b,3) Lentin and Williams, 1980, p.41. Emendation: Masure et al., 1996, p.182, as *Andalusiella rhomboides*. Holotype: Boltenhagen, 1977, pl.20, figs.1a–b. Originally *Svalbardella*, subsequently (and now) *Andalusiella*. Age: Campanian.

spicata (May, 1980, p.79, pl.9, figs.18–20) Lentin and Williams, 1981, p.13. Holotype: May, 1980, pl.9, fig.19. Originally *Deflandrea*, subsequently (and now) *Andalusiella*. Age: Campanian–Maastrichtian.

spinosa Guler et al., 2005, p.420–421, figs.4A–O. Holotype: Guler et al., 2005, figs.4I–J. Age: late Maastrichtian.

vozhennikovae (Boltenhagen, 1977, p.108, pl.19, figs.5a–c,6–7) Lentin and Williams, 1980, p.41. Emendation: Masure et al., 1996, p.182, as *Trithyrodinium vozhennikovae*. Holotype: Boltenhagen, 1977, pl.19, figs.5a–c. **NOW** *Trithyrodinium*. Originally *Svalbardella*, subsequently *Andalusiella*, thirdly (and now) *Trithyrodinium*. Age: Campanian.

"ANDREEDINIUM" Below, 1987a, p.112. **Taxonomic senior synonym:** *Phallocysta*, according to Riding (1994, p.13). Type: Below, 1987a, pl.22, figs.1–3,6,8, as *Andreedinium arcticum*.

"*arcticum" Below, 1987a, p.112–113, pl.22, figs.1–8; text-fig.64. Holotype: Below, 1987a, pl.22, figs.1–3,6,8; Fensome et al., 1993a, figs.1–3,5 — p.929. **NOW** *Phallocysta*. Originally *Andreedinium*, subsequently (and now) *Phallocysta*. Age: Toarcian.

elongatum (Beju, 1971, p.289–290, pl.3, figs.7–10; text-figs.6A–E) Feist-Burkhardt and Monteil in Feist-Burkhardt, 1990, p.615. Emendations: Feist-Burkhardt and Monteil, 1994, p.9, as *Andreedinium elongatum*; Riding, 1994, p.16, as *Phallocysta elongata*. Holotype: Beju, 1971, pl.3, fig.7; text-fig.6A. **NOW** *Phallocysta*. Originally *Fromea* (Appendix A), subsequently *Fromea?* (Appendix A), thirdly *Walloodinium*, fourthly *Palaeostomocystis* (Appendix A), fifthly *Andreedinium*, sixthly (and now) *Phallocysta*. Nomenclatural junior synonym: *Phallocysta minuta*; refer to that species for details. Taxonomic senior synonym: *Prismatocystis* (now *Walloodinium*) *cylindricum*, according to Duxbury (1983, p.68) — however, Feist-Burkhardt and Monteil in Feist-Burkhardt (1990, p.615) retained *Andreedinium elongatum*. Taxonomic junior synonym: *Phallocysta subconica*, according to Riding (1994, p.16). Age: Bajocian–Oxfordian.

erregulense (Filatoff, 1975, p.90, pl.29, figs.12–14) Below, 1987a, p.112. Emendation: Stover and Helby, 1987a, p.111, as *Phallocysta erregulensis*, as a revised description. Holotype: Filatoff, 1975, pl.29, fig.14; Stover and Helby, 1987a, figs.11L–M. **NOW** *Phallocysta?*. Originally *Evansia*, subsequently *Evansia?*, thirdly *Phallocysta*, fourthly *Andreedinium*, fifthly (and now) *Phallocysta?*. Age: Bajocian.

"ANDRIELLA" Bolli 1974, p.845. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1298). **Taxonomic senior synonym:** *Pithonella*, according to Wendler et al. (2013, p.1098). This name was casually introduced in running text and its validity might be in question under the I.C.N.; however, Elbrächter et al. (2008, p.1298) implied that it can be accepted as valid since it was proposed under the I.C.Z.N. Type: *Pithonella trejoi*.

"**trejoi*" (Bonet, 1956, p.459–461, pl.27, figs.1–part,2) Bolli 1974, p.845. Holotype: not designated. **NOW** *Pithonella*. Originally (and now) *Pithonella*, subsequently *Andriella*. Although no holotype was designated, Elbrächter et al. (2008, p.1298) implied that this name can be accepted as valid since it was proposed under the I.C.Z.N. Similarly, the combination *Andriella trejoi* was not accompanied by a basionym citation, but again Elbrächter et al. (2008, p.1298) implied that it can be accepted as valid since it was proposed under the I.C.Z.N. Age: late Albian–Turonian.

ANGUSTIDINIUM Goodman and Evitt, 1981, p.47–48. Taxonomic senior synonym: *Moesiodinium*, according to Below (1987a, p.129) — however, Lentin and Williams (1989, p.17) retained *Angustidinium*. Type: Davey and Verdier, 1971, pl.2, fig.10, as *Deflandrea acribes*.

**acribes* (Davey and Verdier, 1971, p.38–39, pl.2, figs.10,12) Goodman and Evitt, 1981, p.48. Emendation: Goodman and Evitt, 1981, p.48,50,52–53, as *Angustidinium acribes*. Holotype: Davey and Verdier, 1971, pl.2, fig.10; Fensome et al., 1993a, fig.1 — p.875. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Alterbia?* (combination illegitimate), fourthly (and now) *Angustidinium*, fifthly *Moesiodinium*. Lentin and Williams (1989, p.17) retained this species in *Angustidinium*. Age: early Albian.

vozhennikovae (Below, 1987a, p.130–131, pl.19, figs.1–10; text-figs.69a–f) Lentin and Williams, 1989, p.17. Holotype: Below, 1987a, pl.19, figs.1,4–6,8; Fensome et al., 1993a, figs.1,3–6 — p.1381. Originally *Moesiodinium*, subsequently (and now) *Angustidinium*. Age: late Volgian.

"**ANHYSTRICHOSPHERA**" Deflandre in West, 1961, p.452. **Name not validly published**: no description or validly published species. Williams et al. (1998, p.43, 654) incorrectly cited this name as "*Anhystrichosphaeridium*".

"**multiplex**" Deflandre in West, 1961, p.452. **Name not validly published**: no description or illustration. **NOW** *Impagidinium*. Originally *Anhystrichosphaera* (name not validly published), subsequently *Leptodinium*, thirdly (and now) *Impagidinium*. Age: early Pleistocene.

ANTHOSPHAERIDIUM Cookson and Eisenack, 1968, p.115. Fensome and Williams (2004) were incorrect in listing this as an acritarch genus. It's dinoflagellate affinity was confirmed by Schiøler and Wilson (1998, p323), who described an archeopyle for the type. Type: Cookson and Eisenack, 1968, fig.4A, as *Anthosphaeridium convolvuloides*.

**convolvuloides* Cookson and Eisenack, 1968, p.115, figs.4A–D. Holotype: Cookson and Eisenack, 1968, fig.4A. Age: Santonian–early Campanian.

APECTODINIUM (Costa and Downie, 1976, p.608) Lentin and Williams, 1977b, p.8. Emendation: Williams, Damassa, Fensome and Guerstein in Fensome et al., 2009, p.13–14, as *Apectodinium*. Originally *Wetzeliiella* subgenus *Apectodinium*, subsequently (and now) *Apectodinium*. Costa and Downie (1979, p.36) also proposed the elevation of this name to generic rank. Type: Deflandre and Cookson, 1955, pl.5, fig.7, as *Wetzeliiella homomorpha*.

africaense (Jan du Chêne and Adediran, 1985, p.30–31, pl.6, figs.5–6) Williams et al., 2015, p.300. Holotype: Jan du Chêne and Adediran, 1985, pl.6, fig.5. Originally *Wetzeliiella*, subsequently (and now) *Apectodinium*. Age: late Paleocene–early Eocene.

"*augustum*" (Harland, 1979c, p.63, pl.2, figs.13–15) Lentin and Williams, 1981, p.14. Holotype: Harland, 1979c, pl.2, fig.13. **NOW** *Axiodinium*. Originally *Wetzeliiella* subgenus *Apectodinium*, subsequently *Apectodinium*, thirdly (and now) *Axiodinium*. Age: latest Paleocene.

"*caiobense*" (Regali et al., 1974, p.290, pl.24, fig.4) Lentin and Williams, 1981, p.14. Holotype: Regali et al., 1974, pl.24, fig.4. Originally *Hystrichosphaeridium*, subsequently *Apectodinium*. **Taxonomic senior synonym:** *Wetziella* (now *Apectodinium*) *homomorpha*, according to Williams et al. (1993, p.57). Age: Paleocene.

capitulatum He Chengquan, 1991, p.89, pl.27, fig.15. Holotype: He Chengquan, 1991, pl.27, fig.15. Age: Paleocene.

cornufruticosum Islam, 1983c, p.82, pl.1, figs.5,8. Holotype: Islam, 1983c, pl.1, fig.5. Age: middle Eocene.

"*folliculum*" Islam, 1983b, p.336–337, pl.1, figs.8–9. Holotype: Islam, 1983b, pl.1, fig.8. **Taxonomic senior synonym:** *Wetziella* (now *Apectodinium*) *homomorpha*, according to Williams et al. (1993, p.57). Age: early-middle Eocene.

geometricum (Pastiels, 1948, p.41, pl.4, figs.1–11 ex Downie and Sarjeant, 1965, p.90) Fensome et al., 1990, p.617. Holotype: Pastiels, 1948, pl.4, fig.4. Originally *Hystrichosphaeridium geometricum* (name illegitimate), subsequently *Baltisphaeridium geometricum* (Appendix A), thirdly *Apectodinium pastielsii* (name illegitimate), fourthly *Apectodinium geometricum*. Nomenclatural junior synonym: *Apectodinium pastielsii*, which has the same type. Taxonomic junior synonym (at specific rank): *Wetziella homomorpha* var. *quinquelata* (as *Wetziella quinquelata*, now *Apectodinium quinquelatum*), by implication in Harland (1979c, p.67), who considered the latter to be the senior name — however, Lentin and Williams (1989, p.18) retained *Apectodinium quinquelatum*. The name *Hystrichosphaeridium geometricum* Pastiels is an illegitimate junior homonym of *Hystrichosphaeridium geometricum* Deflandre, 1945a. By "transferring" Pastiels' species to *Baltisphaeridium*, Downie and Sarjeant (1965, p.90) created the valid and legitimate name *Baltisphaeridium geometricum* Pastiels, 1948 ex Downie and Sarjeant, 1965. The name *Apectodinium pastielsii* Lentin and Williams, 1989, is thus superfluous. Deflandre and Cookson (1955, p.254) identified the specimen illustrated in Pastiels (1948, pl.4, fig.8) as *Wetziella* (now *Apectodinium*) *homomorpha*. Age: Ypresian.

**homomorphum* (Deflandre and Cookson, 1955, p.254, pl.5, fig.7; text-fig.19, not text-figs.17–18 as indicated by Deflandre and Cookson, 1955, p.254) Lentin and Williams, 1977b, p.8. Emendation: Harland, 1979c, p.64, as *Apectodinium* *homomorphum*. Holotype: Deflandre and Cookson, 1955, pl.5, fig.7; text-fig.19; Eisenack and Klement, 1964, p.829; Fensome et al., 1995, figs.1–2 — p.1553. Originally *Wetziella*, subsequently *Wetziella* subgenus *Apectodinium*, thirdly (and now) *Apectodinium*. Taxonomic junior synonyms: *Hystrichosphaeridium* (as *Apectodinium*) *caiobense* and *Apectodinium* *folliculum*, both according to Williams et al. (1993, p.57). Costa and Downie (1976, p.608) designated this species as the type of *Wetziella* subgenus *Apectodinium*. See *Apectodinium pastielsii*. Age: early Eocene.

"subsp. *homomorphum*". Autonym. Holotype: Deflandre and Cookson, 1955, pl.5, fig.7; text-fig.19; Eisenack and Klement, 1964, p.829; Fensome et al., 1995, figs.1–2 — p.1553. **Now redundant.** Originally *Wetziella homomorpha* subsp. *homomorpha*, subsequently *Apectodinium homomorphum* subsp. *homomorphum*.

"subsp. *quinquelatum*" (Williams and Downie, 1966b, p.191–192, pl.18, fig.7) Lentin and Williams, 1977b, p.8. Holotype: Williams and Downie, 1966b, pl.18, fig.7. **NOW** *Apectodinium quinquelatum*. Originally *Wetziella homomorpha* var. *quinquelata*, subsequently *Wetziella homomorpha* subsp. *quinquelata*, thirdly *Apectodinium homomorphum* subsp. *quinquelatum*, fourthly *Wetziella quinquelata*, fifthly (and now) *Apectodinium quinquelatum*. Taxonomic senior synonym (at specific rank): *Hystrichosphaeridium* (now *Apectodinium*) *geometricum*, by implication in Harland (1979c, p.67), who considered the latter to be the junior name — however, Lentin and Williams (1989, p.18) retained *Apectodinium quinquelatum*. Age: early Eocene.

"subsp. *tesselatum*" Châteauneuf and Gruas-Cavagnetto, 1978, p.65–66, pl.1, figs.1–2. Holotype: Châteauneuf and Gruas-Cavagnetto, 1978, pl.1, figs.1–2. **NOW** *Axiodinium tessellatum*. Originally *Apectodinium homomorphum* subsp. *tesselatum*, subsequently *Wilsonidium tessellatum*, thirdly (and now) *Axiodinium tessellatum*. Age: early Eocene.

hyperacanthum (Cookson and Eisenack, 1965b, p.134–135, pl.16, figs.3–6) Lentin and Williams, 1977b, p.8. Holotype: Cookson and Eisenack, 1965b, pl.16, fig.5. Originally *Wetzeliella*, subsequently *Wetzeliella* subgenus *Apectodinium*, thirdly (and now) *Apectodinium*. Costa and Downie (1976, p.609) assigned this species to *Wetzeliella* subgenus *Apectodinium*. Age: Paleocene.

longispinosum (Wilson, 1968, p.59–60, figs.1–10) Bujak and Davies, 1983, p.162. Holotype: Wilson, 1968, fig.4. Originally *Deflandrea*, subsequently *Wetzeliella*, thirdly (and now) *Apectodinium*. Age: Paleocene or early Eocene.

paniculatum (Costa and Downie, 1976, p.608–609, pl.92, fig.1) Lentin and Williams, 1977b, p.9. Holotype: Costa and Downie, 1976, pl.92, fig.1. Originally *Wetzeliella*, subsequently (and now) *Apectodinium*. Taxonomic junior synonym: *Fibrocyta variabilis*, according to Garg et al. (1995, p.364). Age: early Eocene.

paradoxum He Chengquan, 1991, p.90, pl.27, figs.13–14; text-fig.10. Holotype: He Chengquan, 1991, pl.27, fig.14. Age: Paleocene.

parvum (Alberti, 1961, p.8–9, pl.1, figs.14–18; pl.12, figs.10–12) Lentin and Williams, 1977b, p.9. Emendation: Harland, 1979c, p.65–66, as *Apectodinium parvum*. Holotype: Alberti, 1961, pl.1, fig.14. Originally *Wetzeliella*, subsequently *Wetzeliella* subgenus *Apectodinium*, thirdly (and now) *Apectodinium*. Costa and Downie (1976, p.609) assigned this species to *Wetzeliella* subgenus *Apectodinium*. Age: late Paleocene–early Eocene.

"pastsielsii" Lentin and Williams, 1989, p.18. Holotype: Pastsiels, 1948, pl.4, fig.4. **Name illegitimate — nomenclatural senior synonym:** *Baltisphaeridium* (now *Apectodinium*) *geometricum* Pastsiels, 1948 ex Downie and Sarjeant, 1965, which has the same holotype. This was proposed as a substitute name for *Hystrichosphaeridium geometricum* Pastsiels, 1948, p.41, pl.4, figs.1–11. Originally *Hystrichosphaeridium geometricum* (name illegitimate), subsequently *Baltisphaeridium geometricum* (Appendix A), thirdly *Apectodinium pastielsii* (name illegitimate), fourthly *Apectodinium geometricum*. According to Lentin and Williams (1989, p.18): "When Deflandre and Cookson (1955) created the species *Wetzeliella homomorpha* they placed *Hystrichosphaeridium geometricum* Pastsiels in the synonymy and referred to 'Pastsiels, 1945 pars.' but did not expressly include the holotype (Pastsiels, 1948, pl.4, fig.4). By selecting a holotype for *Wetzeliella homomorpha* from their own material they created a new species, not a new name, as was assumed in previous issues of this index." Hence, Lentin and Williams (1989, p.18) proposed *Apectodinium pastielsii* as a new name. However, Fensome et al. (1990, p.617) noted that "... *Hystrichosphaeridium geometricum* Pastsiels, is an illegitimate junior homonym of *Hystrichosphaeridium geometricum* Deflandre, 1945[a]. By 'transferring' Pastsiels' species to *Baltisphaeridium*, Downie and Sarjeant (1965, [p.40]) created the valid and legitimate name *Baltisphaeridium geometricum* Pastsiels ex Downie and Sarjeant. The name *Apectodinium pastielsii* is thus superfluous." Age: Eocene.

quinquelatum (Williams and Downie, 1966b, p.191–192, pl.18, fig.7) Costa and Downie, 1979, p.43. Holotype: Williams and Downie, 1966b, pl.18, fig.7. Originally *Wetzeliella homomorpha* var. *quinquelata*, subsequently *Wetzeliella homomorpha* subsp. *quinquelata*, thirdly *Apectodinium homomorphum* subsp. *quinquelatum*, fourthly *Wetzeliella quinquelata*, fifthly (and now) *Apectodinium quinquelatum*. Taxonomic senior synonym (at specific rank): *Hystrichosphaeridium* (now *Apectodinium*) *geometricum*, by implication in Harland (1979c, p.67), who considered the latter to be the junior name — however, Lentin and Williams (1989, p.18) retained *Apectodinium quinquelatum*. Age: early Eocene.

rarityformium Shaw Chenglong, 1999a, p.36, figs.11–13. Holotype: Shaw Chenglong, 1999a, figs.11–13. Age: Eocene.

summissum (Harland, 1979c, p.66–67, pl.1, fig.12) Lentin and Williams, 1981, p.14. Holotype: Harland, 1979c, pl.1, fig.12. Originally *Wetzeliella* subgenus *Apectodinium*, subsequently (and now) *Apectodinium*, thirdly *Krutzschidinium* (combination not validly published). Strauss (1991a, p.57) considered this species to be the possible senior synonym of *Krutzschidinium spinosum*. Age: late Paleocene.

"verrucosum" (Oleinik, 1976, p.85, pl.1, figs.1–3) Lentin and Williams, 1981, p.14. Holotype: Oleinik, 1976, pl.1, fig.1. **NOW** *Apteodinium*. Originally (and now) *Apteodinium*, subsequently *Apectodinium*. This name was erroneously listed in *Apectodinium* by Lentin and Williams (1981, p.14); in the same publication, Lentin and Williams (1981, p.17) correctly listed it as a species of *Apteodinium*. Age: late Eocene.

?*williereae* (Boltenhagen, 1977, p.42–43, pl.3, figs.3a–b,4–6) Lentin and Williams, 1981, p.14. Holotype: Boltenhagen, 1977, pl.3, figs.3a–b. Originally *Polysphaeridium*, subsequently (and now) *Apectodinium*?. Questionable assignment: Lentin and Williams (1981, p.14). Age: Paleocene.

"*APICULADINIUM*" Yu Jingxian et al., 1981, p.261–262. **Taxonomic senior synonym:** *Laciniadinium*, according to He Chengquan et al. (2009, p.386). Chen et al. (1988, p.6) considered *Bellatudinium* to be a possible taxonomic synonym of this genus. Type: Yu Jingxian et al., 1981, pl.1, fig.36, as *Apiculadinium ovatum*.

"**ovatum*" Yu Jingxian et al., 1981, p.262, pl.1, figs.19,28,32,35–37; text-fig.3. Holotype: Yu Jingxian et al., 1981, pl.1, fig.36. **NOW** *Laciniadinium*. Originally *Apiculadinium*, subsequently (and now) *Laciniadinium*. Age: Late Cretaceous.

APROBOLOCYSTA Duxbury, 1977, p.52. Emendations: Duxbury, 1980, p.112; Mehrotra and Sarjeant, 1986, p.721; Pourtoy, 1988, p.386,388; Pestchevitskaya, 2006, p.S639,641. Taxonomic senior synonym: *Necrobroomea*, according to Below (1990, p.52) — however, Lentin and Williams (1993, p.31) retained *Aprobolocysta*. Stover and Williams (1987, p.19) considered Davey's (1982b, p.21) treatment of *Aprobolocysta* to be an emendation. Type: Duxbury, 1977, pl.14, figs.4–5; text-fig.19B, as *Aprobolocysta eilema*.

alata Backhouse, 1987, p.211–212, figs.5A–D,9A–D. Holotype: Backhouse, 1987, figs.5A–B,9A–B; Fensome et al., 1996, figs.1–2,5–6 — p.2019. Originally (and now) *Aprobolocysta*, subsequently *Necrobroomea*. Lentin and Williams (1993, p.31) retained this species in *Aprobolocysta*. Age: middle Hauterivian–early Barremian.

?*arguta* Yu Jingxian, 1982, p.238, pl.1, fig.4. Holotype: Yu Jingxian, 1982, pl.1, fig.4. Originally *Aprobolocysta*, subsequently (and now) *Aprobolocysta*?. Questionable assignment: Stover and Williams (1987, p.19). Age: Late Jurassic–Early Cretaceous.

bipartita Backhouse, 1987, p.212, figs.9E–H. Holotype: Backhouse, 1987, figs.9E–F; Fensome et al., 1996, figs.1–2 — p.2067. Originally (and now) *Aprobolocysta*, subsequently *Necrobroomea*. Lentin and Williams (1993, p.31) retained this species in *Aprobolocysta*. Age: middle Hauterivian.

cornuta Pestchevitskaya, 2006, p.S642, pl. 7, fig.16; text-fig.3D. Holotype: Pestchevitskaya, 2006, pl.7, fig.16. Age: late Hauterivian–early Barremian.

**eilema* Duxbury, 1977, p.52–53, pl.14, figs.4–5,8; text-figs.19A–B. Holotype: Duxbury, 1977, pl.14, figs.4–5; text-fig.19B; Pourtoy, 1988, pl.3, figs.1–3,5–6; Fensome et al., 1993a, figs.1–2,5 — p.1139. Originally (and now) *Aprobolocysta*, subsequently *Necrobroomea*. Lentin and Williams (1993, p.31) retained this species in *Aprobolocysta*. N.I.A. Age: late Hauterivian.

extrema Duxbury, 2001, p.99, fig.2, nos.1–4. Holotype: Duxbury, 2001, fig.2, no.1. Age: early Valanginian.

galeata Backhouse, 1987, p.212, figs.9I–L. Holotype: Backhouse, 1987, figs.9I–J; Fensome et al., 1996, figs.1–2 — p.2135. Originally (and now) *Aprobolocysta*, subsequently *Necrobroomea*. Lentin and Williams (1993, p.31) retained this species in *Aprobolocysta*. Age: Valanginian–earliest Hauterivian.

neista Duxbury, 1980, p.112–113, pl.2, figs.8–9; text-fig.5. Holotype: Duxbury, 1980, pl.2, figs.8–9; text-fig.5; Pourtoy, 1988, pl.4, figs.4–5,7–9. Originally (and now) *Aprobolocysta*, subsequently *Necrobroomea*. Lentin and Williams (1993, p.31) retained this species in *Aprobolocysta*. Duxbury (1980) cited the epithet as "*neistosa*" but indicated that it was based on the Greek adjective "*neistos*". According to the I.C.N., taxon names are to be treated as Latin; thus under Article 60.12, this epithet should be rendered as "*neista*", in agreement with the feminine gender of the generic name. The neuter form would be "*neistum*" and the masculine form "*neistus*". Age: Barremian.

pustulosa Smith and Harding, 2004, p.359,361,363, pl.1, figs.1,2,9–11. Holotype: Smith and Harding, 2004, pl.1, figs.1–2. Age: earliest Valanginian.

trycheria Pourtoy, 1988, p.388–389, pl.1, figs.1–6,8; pl.5, figs.1–2,5,9. Holotype: Pourtoy, 1988, pl.1, figs.1–3. Originally (and now) *Aprobolocysta*, subsequently *Necrobroomea*. Lentin and Williams (1993, p.31) retained this species in *Aprobolocysta*. Age: late Valanginian.

"?*varigranosa*" Duxbury, 1977, p.53–54, pl.14, figs.6–7; text-figs.20a–b. Holotype: Duxbury, 1977, pl.14, fig.6; text-fig.20b; Pourtoy, 1988, pl.2, figs.1–2. Originally *Aprobolocysta*, subsequently *Batioladinium*, thirdly *Aprobolocysta*?. Questionable assignment: Lentin and Vozzhennikova (1990, p.82). **Taxonomic senior synonym:** *Batioladinium*? (as *Necrobroomea*) *gochtii*, according to Below (1990, p.53). Age: early Valanginian–early Hauterivian.

APTEA Eisenack, 1958a, p.393. Emendations: Davey and Verdier, 1974, p.640–641; Dörhöfer and Davies, 1980, p.33. Taxonomic senior synonym: *Pseudoceratium*, according to Bint (1986, p.144) — however, Quattrocchio and Sarjeant (1992, p.2–234) retained *Aptea*. Taxonomic junior synonym: *Doidyx*, according to Sarjeant and Stover (1978, p.51). Type: Eisenack, 1958a, pl.22, fig.5, as *Aptea polymorpha*.

"*almohadensis*" Below, 1984, p.635, pl.1, figs.5A–B,6–7. Holotype: Below, 1984, pl.1, figs.5A–B. **NOW** *Pseudoceratium*. Originally *Aptea*, subsequently (and now) *Pseudoceratium*. Age: middle-late Aptian.

"*anaphrissa*" (Sarjeant, 1966c, p.206, pl.22, fig.8; pl.23, fig.6; text-fig.55) Sarjeant and Stover, 1978, p.51. Emendation: Harding, 1990b, p.17–18, as *Pseudoceratium anaphrissum*. Holotype: Sarjeant, 1966c, pl.22, fig.8; text-fig.55. **NOW** *Pseudoceratium*. Originally *Doidyx*, subsequently *Tenua* Eisenack, thirdly *Aptea*, fourthly (and now) *Pseudoceratium*. Age: early Barremian.

"*attadalica*" (Cookson and Eisenack, 1962b, p.495, pl.5, figs.12–15) Davey and Verdier, 1974, p.643. Holotype: Cookson and Eisenack, 1962b, pl.5, fig.13. **NOW** *Circulodinium*. Originally *Cyclonephelium*?, subsequently *Aptea*, thirdly *Canningia*, fourthly (and now) *Circulodinium*. Age: Aptian–Albian.

"*eisenackii*" (Davey, 1969a, p.170–171, pl.8, figs.3–4; pl.9, fig.4; text-figs.16a–b) Davey and Verdier, 1974, p.643. Holotype: Davey, 1969a, pl.8, fig.4. **NOW** *Pseudoceratium*. Originally *Cyclonephelium*, subsequently *Aptea*, thirdly (and now) *Pseudoceratium*. Taxonomic senior synonym: *Aptea polymorpha*, according to Cookson and Eisenack (1974, p.74) — however, Below (1981a, p.7) retained *Aptea eisenackii*. Age: late Albian.

notialis Quattrocchio and Sarjeant, 1992, p.83 (al. 2–235), pl.5, figs.1–4; pl.7, figs.7–8. Holotype: Quattrocchio and Sarjeant, 1992, pl.5, fig.1. Age: middle-late Tithonian.

"*plera*" Duxbury, 1983, p.22,25, pl.1, figs.7–8,11; pl.10, fig.3; text-figs.5–6. Holotype: Duxbury, 1983, pl.1, fig.7. **NOW** *Pseudoceratium*. Originally *Aptea*, subsequently (and now) *Pseudoceratium*. Age: early Aptian.

**polymorpha* Eisenack, 1958a, p.394, pl.22, figs.5–12; pl.24, fig.5. Emendation: Dörhöfer and Davies, 1980, p.34–36, as *Aptea polymorpha*. Holotype: Eisenack, 1958a, pl.22, fig.5; Sarjeant, 1985a, pl.7, fig.4. Originally (and now) *Aptea*, subsequently *Pseudoceratium*. By retaining *Aptea*, Quattrocchio and Sarjeant (1992, p.2–234) effectively retained *Aptea polymorpha*, the "type species", as a species of *Aptea*. Taxonomic junior synonym: *Aptea* (now *Pseudoceratium*) *eisenackii*, according to Cookson and Eisenack (1974, p.74) — however, Below (1981a, p.7) retained *Aptea eisenackii*. Age: Aptian.

"*rugulosa*" Clarke and Verdier, 1967, p.57–58, pl.12, figs.5–6; text-fig.23. Holotype: Clarke and Verdier, 1967, pl.12, fig.6. **NOW** *Canningia*. Originally *Aptea*, subsequently (and now) *Canningia*. Age: Santonian.

"*securigera*" Davey and Verdier, 1974, p.642–643, pl.91, figs.2–3; text-fig.5(vii). Holotype: Davey and Verdier, 1974, pl.91, fig.3. **NOW** *Pseudoceratium*. Originally *Aptea*, subsequently (and now) *Pseudoceratium*. Age: early Aptian.

APTEODINIUM Eisenack, 1958a, p.385. Emendations: Sarjeant, 1985a, p.78; Lucas-Clark, 1987, p.168,170. Taxonomic junior synonyms: *Archeotectatum*, *Coniferatum*, *Dodekovia* and *Emslandia*, all according to Stover and Evitt (1978, p.141–142) — however, Prauss (1989, p.18) retained *Dodekovia* and Lentin and Williams (1981, p.18; 1989, p.24) retained *Archeotectatum*. Riding and Fensome (2003, p.19) considered that *Aldorfia* may be a junior synonym of *Apteodinium*. Type: Eisenack, 1958a, pl.23, fig.9, as *Apteodinium granulatum*.

?*albertii* Lentin and Williams, 1981, p.15. Holotype: Alberti, 1961, pl.4, fig.16. Originally *Pareodinia spinosa*, subsequently *Apteodinium? spinosum* (combination illegitimate), thirdly (and now) *Apteodinium? albertii*. Questionable assignment: Stover and Evitt (1978, p.142). Substitute name for *Apteodinium spinosum* (Alberti, 1961, p.24, pl.4, fig.16) Stover and Evitt, 1978, p.142 (an illegitimate name). Age: late Barremian.

apiatum McIntyre and Brideaux, 1980, p.11–12, pl.2, figs.1–7. Holotype: McIntyre and Brideaux, 1980, pl.2, figs.1–2; Jan du Chêne et al., 1986a, pl.13, figs.7–8. Age: early-middle Valanginian.

australiense (Deflandre and Cookson, 1955, p.248, pl.5, fig.1) Williams, 1978, p.794. Holotype: Deflandre and Cookson, 1955, pl.5, fig.1. Originally *Gymnodinium* (Appendix B), subsequently *Emslandia* (combination not validly published), thirdly *Scrinioidinium*, fourthly (and now) *Apteodinium*. Taxonomic junior synonym: *Emslandia crassimurata*, according to Lucas-Clark (1987, p.174). Age: middle Miocene.

blandum Yu Jingxian, 1982, p.244, pl.1, fig.15. Holotype: Yu Jingxian, 1982, pl.1, fig.15. Age: Late Jurassic–Early Cretaceous.

bucculiatum Davies, 1983, p.20, pl.4, figs.13–18; text-fig.15. Holotype: Davies, 1983, pl.4, figs.13–14; Jan du Chêne et al., 1986a, pl.150, fig.19. Age: Callovian–Oxfordian.

"*ciliatum*" Gocht, 1959, p.65, pl.8, figs.5–6. Holotype: Gocht, 1959, pl.8, fig.5. **NOW** *Trichodinium*. Originally *Apteodinium*, subsequently (and now) *Trichodinium*. Taxonomic junior synonym: *Trichodinium castanea*, by implication in Clarke and Verdier (1967, p.19), who believed *Trichodinium castanea* to be the senior name — however, Harding (1990b, p.38) retained the two species. Age: late Hauterivian.

cingulatum He Chengquan, 1991, p.110–111, pl.3, figs.17–20; text-figs.15a–b. Holotype: He Chengquan, 1991, pl.3, fig.19. Age: Cenomanian.

"*comptum*" (Duxbury, 1980, p.122–123, pl.2, figs.1–2,4) Helenes, 1984, p.132. Holotype: Duxbury, 1980, pl.2, figs.1–2,4; Jan du Chêne et al., 1986a, pl.10, figs.9–10. Originally *Gonyaulacysta*, subsequently *Cribroperidinium*, thirdly *Acanthaulax*, fourthly *Apteodinium*. **Taxonomic senior synonym:** *Millioudodinium* (now *Cribroperidinium spinoreticulatum*, according to Lucas-Clark (1987, p.178). Age: middle-late Barremian.

confusum (Vozzhennikova, 1967, p.80, pl.17, figs.1a–b; pl.25, figs.4–5; pl.27, figs.3–4) Helenes, 1984, p.132. Holotype: Vozzhennikova, 1967, pl.25, fig.5, lost according to Lentin and Vozzhennikova (1990, p.93). Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium?*, fourthly *Rhynchodiniopsis?*, fifthly (and now) *Apteodinium*. Lentin and Vozzhennikova (1990, p.93–94) retained this species in *Apteodinium*. According to Lentin and Vozzhennikova (1990, p.93), no potential lectotype is available. Lentin and Williams (1989, p.20) recommended that this name be restricted to the holotype. Age: Late Jurassic.

conicum He Chengquan, 1991, p.111, pl.4, figs.1–6. Holotype: He Chengquan, 1991, pl.4, fig.6. Age: Cenomanian–Turonian.

"*conjunctum*" Eisenack and Cookson, 1960, p.5, pl.1, figs.7–8. Holotype: Eisenack and Cookson, 1960, pl.1, fig.7; Jan du Chêne et al., 1986a, pl.33, figs.7–9. Originally *Apteodinium*, subsequently *Cribroperidinium*. **Taxonomic senior synonym:** *Apteodinium maculatum*, according to Backhouse (1988, p.74). Age: Aptian.

cornutum Cookson and Eisenack, 1974, p.51, pl.24, fig.9. Holotype: Cookson and Eisenack, 1974, pl.24, fig.9; Jan du Chêne et al., 1986a, pl.14, figs.1–4. Age: Paleocene.

corticatum (Norris and Jux, 1984, p.162–163, pl.2, figs.5–16; pl.3, figs.6–7; pl.6, figs.1–5) Lucas-Clark, 1987, p.176. Holotype: Norris and Jux, 1984, pl.2, figs.7–8. Originally *Aldorfia*, subsequently (and now) *Apteodinium*. Age: late Kimmeridgian–Portlandian.

crassum Slimani and Louwye, 2013, p.13, pl.1, figs.1–16. Holotype: Slimani and Louwye, 2013, pl.1, figs.1–4. Age: late Campanian.

?*cribrosum* Cookson and Eisenack, 1968, p.112, fig.1L. Holotype: Cookson and Eisenack, 1968, fig.1L; Jan du Chêne et al., 1986a, pl.14, fig.5. Originally *Apteodinium*, subsequently (and now) *Apteodinium*?. Questionable assignment: Stover and Evitt (1978, p.142). Age: Santonian or early Campanian.

daveyi Poulsen, 1996, p.70–71, pl.13, figs.1–4. Holotype: Poulsen, 1996, pl.13, figs.1–3. Age: latest Jurassic–earliest Cretaceous.

deflandrei (Clarke and Verdier, 1967, p.26–28, pl.3, figs.10–12; text-fig.10) Lucas-Clark, 1987, p.172. Emendation: Lucas-Clark, 1987, p.172–173, as *Apteodinium deflandrei*. Holotype: Clarke and Verdier, 1967, pl.3, fig.10; Jan du Chêne et al., 1986a, pl.8, figs.10–11. Originally *Gardodinium*, subsequently *Aldorfia*, thirdly (and now) *Apteodinium*. Age: Cenomanian–Santonian.

delicatum (Davey, 1975, p.156–157, pl.2, figs.8–9,11–12) Schrank, 1987, p.262. Holotype: Davey, 1975, pl.2, fig.8. Originally *Trichodinium*, subsequently (and now) *Apteodinium*. Age: Senonian (?Campanian).

donghaiense He Chengquan and Wang Kede, 1990, p.409–410,422–423, pl.1, figs.17–19. Holotype: He Chengquan and Wang Kede, 1990, pl.1, fig.18. Age: early Eocene.

ellipticum He Chengquan et al. 2005a, p.246–247; pl.19, figs.1–7. Holotype: He Chengquan et al. 2005a, pl.19, fig.2. Age: Late Jurassic.

emslandense (Gerlach, 1961, p.172–173, pl.26, figs.13–14) Stover and Evitt, 1978, p.141. Emendation: Benedek and Sarjeant, 1981, p.316–318, as *Apteodinium emslandense*. Holotype: Gerlach, 1961, pl.26, fig.13; Benedek and Sarjeant, 1981, fig.1, no.1; Jan du Chêne et al., 1986a, pl.10, figs.17–19. Originally *Emslandia*, subsequently (and now) *Apteodinium*. Age: middle Oligocene–middle Miocene.

fallax (Morgenroth, 1968, p.535–536, pl.41, figs.4–6) Stover and Evitt, 1978, p.142. Holotype: Morgenroth, 1968, pl.41, figs.4–5. Originally *Gonyaulacysta*, subsequently (and now) *Apteodinium*. Age: Danian.

?*foveolatum* (Sütő-Szentai, 1982a, p.211–212,219, pl.2, figs.1–5) Lentin and Williams, 1989, p.21. Holotype: Sütő-Szentai, 1982a, pl.2, fig.1. Originally *Millioudodinium*, subsequently (and now) *Apteodinium*?. Questionable assignment: Lentin and Williams (1989, p.21). Age: late Miocene.

frontierense (Burgess, 1971, p.81, pl.1, figs.6,9; text-fig.13) Stover and Evitt, 1978, p.142. Holotype: Burgess, 1971, pl.1, fig.9; Jan du Chêne et al., 1986a, pl.15, figs.1–6. Originally *Coniferatium*, subsequently (and now) *Apteodinium*. Age: Albian–early Cenomanian.

gerasimovii Iosifova, 1996, p.207,209, pl.3, figs.4a–b,6. Holotype: Iosifova, 1996, pl.3, figs.4a–b. Age: Ryazanian.

"*gottisii*" (Dupin, 1968, p.4, pl.1, figs.7–12) Helenes, 1984, p.134. Holotype: Dupin, 1968, pl.1, fig.7; Jan du Chêne et al., 1986a, pl.12, fig.11 and pl.94, figs.9–10. Originally *Gonyaulacysta*, subsequently *Millioudodinium*?, thirdly *Apteodinium*. **Taxonomic senior synonym:** *Gonyaulax* (now *Rhynchodiniopsis*) *cladophora*, according to Jan du Chêne et al. (1986a, p.48) and Jan du Chêne and Fauconnier (1986, p.55). Age: Late Jurassic.

"*grande*" Cookson and Hughes, 1964, p.52, pl.6, figs.8–9. Holotype: Cookson and Hughes, 1964, pl.6, fig.9; Jan du Chêne et al., 1986a, pl.13, fig.5. **NOW** *Apteodinium maculatum* subsp. *grande*. Originally *Apteodinium grande*, subsequently (and now) *Apteodinium maculatum* subsp. *grande*. Age: late Albian–early Cenomanian.

granorugosum He Chengquan, 1991, p.111, pl.5, figs.34–35. Holotype: He Chengquan, 1991, pl.5, fig.34. Age: middle-late Eocene.

***granulatum** Eisenack, 1958a, p.386–387, pl.23, figs.8–14. Emendations: Sarjeant, 1985a, p.79–81,83; Lucas-Clark, 1987, p.170,172. Holotype: Eisenack, 1958a, pl.23, fig.9; Jan du Chêne et al., 1986a, pl.10, figs.1–2. Taxonomic junior synonym: *Apteodinium thelium*, according to Jan du Chêne et al. (1986a, p.46) — however, Sarjeant in Lentin and Williams (1989, p.21) retained *Apteodinium thelium*. Age: Aptian.

granuliferum Iosifova, 1996, p.209,211, pl.13, figs.3a–b; pl.15, figs.6a–c; pl.18, figs.2a–c. Holotype: Iosifova, 1996, pl.18, figs.2a–c. Age: Ryazanian–?Hauterivian.

helicoides He Chengquan, 1991, p.111–112, pl.3, figs.21–25. Holotype: He Chengquan, 1991, pl.3, fig.22. Age: middle-late Eocene.

?**indicosum** (Brideaux, 1971, p.83) Stover and Evitt, 1978, p.142. Holotype: Singh, 1964, pl.18, figs.2–3. Originally *Palaeoperidinium granulatum* Singh (name not validly published), subsequently *Gonyaulacysta indicosa*, thirdly (and now) *Apteodinium? indicosum*. Questionable assignment: Stover and Evitt (1978, p.142). *Gonyaulacysta indicosa* is the substitute name for *Palaeoperidinium granulatum* Singh, 1964, p.135, pl.18, figs.2–3 (name not validly published); the name *Apteodinium granulatum* is preoccupied. The name *Palaeoperidinium granulatum* Singh 1964 was not validly published since the generic name *Palaeoperidinium* was not validly published until 1967. Age: middle-late Albian.

maculatum Eisenack and Cookson, 1960, p.4–5 pl.2, figs.1–3. Holotype: Eisenack and Cookson, 1960, pl.2, fig.1; Jan du Chêne et al., 1986a, pl.14, figs.6–7. Taxonomic junior synonym: *Cribooperidinium conjunctum*, according to Backhouse (1988, p.74). Age: Aptian–Albian.

subsp. **grande** (Cookson and Hughes, 1964, p.52, pl.6, figs.8–9) Below, 1981a, p.25. Holotype: Cookson and Hughes, 1964, pl.6, fig.9; Jan du Chêne et al., 1986a, pl.13, fig.5. Originally *Apteodinium grande*, subsequently (and now) *Apteodinium maculatum* subsp. *grande*. Lentin and Williams (1989, p.21) retained this taxon as a subspecies of *Apteodinium maculatum*. Age: late Albian–early Cenomanian.

subsp. **maculatum**. Autonym. Holotype: Eisenack and Cookson, 1960, pl.2, fig.1; Jan du Chêne et al., 1986a, pl.14, figs.6–7.

mecsekense (Nagy, 1969, p.292, pl.1, figs.6,8) Helenes, 1984, p.132. Holotype: Nagy, 1969, pl.1, figs.6,8; Jan du Chêne et al., 1986a, pl.11, figs.10–12. Originally *Palaeoperidinium*, subsequently *Gonyaulacysta?*, thirdly *Millioudodinium?*, fourthly (and now) *Apteodinium*. Age: late Miocene.

?**micracanthum** Cookson and Eisenack, 1974, p.51–52, pl.25, figs.2–3. Holotype: Cookson and Eisenack, 1974, pl.25, fig.3. Originally *Apteodinium*, subsequently (and now) *Apteodinium?*. Questionable assignment: Stover and Evitt (1978, p.142), as a problematic species. Age: Albian–Senonian.

microceratum Cookson and Eisenack, 1982, p.26, pl.1, fig.2. Holotype: Cookson and Eisenack, 1982, pl.1, fig.2. Age: latest Turonian–Coniacian.

minimum Yu Jingxian, 1989, p.125, pl.59, figs.5–6. Holotype: Yu Jingxian, 1989, pl.59, fig.6. Age: late Eocene.

minus He Chengquan, 1991, p.112, pl.4, figs.7–10. Holotype: He Chengquan, 1991, pl.4, fig.10. Age: late Eocene.

?**monacanthum** (Deflandre, 1936b, p.176–177, pl.5, fig.10 ex Sarjeant, 1967b, p.252) Helenes, 1984, p.134. Holotype: Deflandre, 1935, pl.6, fig.1; Deflandre, 1936b, pl.5, fig.10; lost according to Jan du Chêne et al. (1986a, p.48). Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly *Apteodinium*, fifthly (and now) *Apteodinium?*. Questionable assignment: Jan du Chêne et al. (1986a, p.48), as a problematic species. Jan du Chêne et al. (1986a, p.48) recommended that the name be restricted to the holotype. The name *Palaeoperidinium monacanthum* was not validly published in Deflandre (1935) since the generic name *Palaeoperidinium* was not validly published until 1967. Williams et al. (1998, p.49)

accepted Sarjeant's (1967b) indirect reference to Deflandre (1935) as indication of a type (I.C.N. Article 40.1). Age: Late Cretaceous.

nanhaicum He Chengquan and Li Peng, 1981, p.61–62, pl.31, figs.10–12. Holotype: He Chengquan and Li Peng, 1981, pl.31, fig.10. Age: late Oligocene.

"nuciforme" (Deflandre, 1939a, p.180, pl.8, figs.4–6 ex Sarjeant, 1962a, p.482–483, pl.69, fig.6; text-fig.4) Stover and Evitt, 1978, p.142. Holotype: Deflandre, 1939a, pl.8, fig.6; Jan du Chêne et al., 1986a, pl.11, figs.1–3. **NOW** *Cribroperidinium*. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulax* (Appendix B), thirdly *Gonyaulacysta*, fourthly *Apteodinium*, fifthly *Millioudodinium*, sixthly (and now) *Cribroperidinium*. Taxonomic junior synonym: *Palaeoperidinium nuciformoides*, according to Sarjeant (1968, p.227). Age: Oxfordian.

palliatum Stevens, 1987, p.185–186, figs.3A–G. Holotype: Stevens, 1987, figs.3A–B; Fensome et al., 1996, figs.1–2 — p.2261. Age: early Berriasian.

reticulatum Singh, 1971, p.312, pl.47, figs.1–4. Holotype: Singh, 1971, pl.47, figs.1–2; Jan du Chêne et al., 1986a, pl.13, figs.3–4. Junior homonym: *Apteodinium reticulatum* Yu Jingxian, 1982. Age: late Albian.

"reticulatum" Yu Jingxian, 1982, p.244, pl.1, figs.13–14. Holotype: Yu Jingxian, 1982, pl.1, fig.14. **Name illegitimate** — **senior homonym:** *Apteodinium reticulatum* Singh, 1971. **Substitute name:** *Apteodinium suibinense*. Originally *Apteodinium reticulatum* (name illegitimate), subsequently (and now) *Apteodinium suibinense*. Age: Late Jurassic–Early Cretaceous.

rhombiforme He Chengquan, 1991, p.112, pl.3, figs.1–2. Holotype: He Chengquan, 1991, pl.3, fig.1. This name was not validly published in He Chengquan and Wang Kede (1990, p.410), who gave the citation "*Apteodinium rhombiforme* He". Age: Paleocene–Eocene.

"sarjeantii" (Habib, 1972, p.376, pl.5, figs.3–4) Stover and Evitt, 1978, p.142. Holotype: Habib, 1972, pl.5, fig.3; Fensome et al., 1995, fig.1 — p.1763. **NOW** *Archeotectatum*. Originally (and now) *Archeotectatum*, subsequently *Apteodinium*. Age: Oxfordian–Kimmeridgian.

"senegalense" Stover and Evitt, 1978, p.142. Holotype: Jain and Millepied, 1975, pl.2, fig.27; Jan du Chêne et al., 1986a, pl.12, figs.8–10. **Name illegitimate** — **nomenclatural senior synonym:** *Apteodinium spinosum* Jain and Millepied, 1975, which has the same holotype. Age: Aptian–Albian.

sparsum He Chengquan, 1991, p.112–113; pl.5, fig.36; text-fig.16. Holotype: He Chengquan, 1991, pl.5, fig.36; text-fig.16. Age: Cenomanian.

"spinoreticulatum" (McIntyre and Brideaux, 1980, p.15–16, pl.3, figs.4,8–12) Helenes, 1984, p.134. Holotype: McIntyre and Brideaux, 1980, pl.3, figs.4,9,12; Jan du Chêne et al., 1986a, pl.13, figs.9–11. **NOW** *Cribroperidinium*. Originally *Millioudodinium*, subsequently *Apteodinium*, thirdly (and now) *Cribroperidinium*. Taxonomic junior synonym: *Gonyaulacysta compta*, according to Lucas-Clark (1987, p.178). Age: Valanginian.

"?spinosum" (Alberti, 1961, p.24, pl.4, fig.16) Stover and Evitt, 1978, p.142. Holotype: Alberti, 1961, pl.4, fig.16. **Combination illegitimate** — **senior homonym:** *Apteodinium spinosum* Jain and Millepied, 1975. **Substitute name:** *Apteodinium albertii*. Originally *Pareodinia spinosa*, subsequently *Apteodinium? spinosum* (combination illegitimate), thirdly (and now) *Apteodinium albertii*. Questionable assignment: Stover and Evitt (1978, p.142). Age: late Barremian.

spinosum Jain and Millepied, 1975, p.139–140, pl.2, fig.27. Holotype: Jain and Millepied, 1975, pl.2, fig.27; Jan du Chêne et al., 1986a, pl.12, figs.8–10. Junior homonym: *Apteodinium? spinosum* (Alberti, 1961) Stover and Evitt, 1978. Nomenclatural junior synonym: *Apteodinium senegalense* Stover and Evitt, 1978, which has the same holotype. Age: Aptian–Albian.

spiridoides Benedek, 1972, p.5, pl.2, figs.1a–b; pl.15, figs.1–6. Emendation: Benedek and Sarjeant, 1981, p.318–320, as *Emslandia spiridoides*. Holotype: Benedek, 1972, pl.2, figs.1a–b; Benedek and Sarjeant, 1981, fig.2, nos.1–

3; Jan du Chêne et al., 1986a, pl.11, figs.6–9. Originally (and now) *Apteodinium*, subsequently *Emslandia*. Jan du Chêne et al. (1986a, p.48) retained this species in *Apteodinium*. Taxonomic junior synonym: *Apteodinium tectatum*, according to Lucas-Clark (1987, p.178) — however, Jan du Chêne in Head and Wrenn (1992, p.3) retained *Apteodinium tectatum*. Age: middle Oligocene.

spongiosum McIntyre and Brideaux, 1980, p.12, pl.2, figs.8–12. Holotype: McIntyre and Brideaux, 1980, pl.2, figs.11–12; Jan du Chêne et al., 1986a, pl.8, figs.4–5. Originally (and now) *Apteodinium*, subsequently *Aldorfia*. Lucas-Clark (1987, p.178) retained this species in *Apteodinium*. Age: Valanginian.

subtile He Chengquan, 1991, p.113, pl.3, figs.4–10. Holotype: He Chengquan, 1991, pl.3, fig.8. Age: middle Eocene.

suibinense Lentin and Williams, 1985, p.23. Holotype: Yu Jingxian, 1982, pl.1, fig.14. Originally *Apteodinium reticulatum* Yu Jingxian (name illegitimate), subsequently (and now) *Apteodinium suibinense*. Substitute name for: *Apteodinium reticulatum* Yu Jingxian, 1982, p.244, pl.1, figs.13–14 (an illegitimate name). Age: Late Jurassic–Early Cretaceous.

"*syzygium*" (Dörhöfer and Davies, 1980, p.26, figs.11,23B,E,H,26A–D,F–G) Stover and Williams, 1987, p.87. Emendation: Below, 1987a, p.121–122, as *Dodekovia syzygia*. Holotype: Dörhöfer and Davies, 1980, figs.26A–D; Fensome et al., 1995, figs.1–4 — p.1827. **NOW** *Dodekovia*. Originally (and now) *Dodekovia*, subsequently *Apteodinium*. Prauss (1989, p.19) retained this species in *Dodekovia*. Taxonomic junior synonym: *Ovalicysta hiata*, according to Below (1987a, p.121) — however, Lentin and Williams (1989, p.269) retained *Ovalicysta hiata*. Age: Toarcian–Bathonian.

"*tamboviense*" Vozzhennikova, 1967, p.61, pl.41, fig.1. Holotype: Vozzhennikova, 1967, pl.41, fig.1; Lentin and Vozzhennikova, 1990, pl.14, fig.9; text-fig.49. **NOW** *Pareodinia*. Originally *Apteodinium*, subsequently *Apteodinium?*, thirdly (and now) *Pareodinia*. Questionable assignment: Stover and Evitt (1978, p.142). Age: Barremian.

tectatum Piasecki, 1980, p.63,66, pl.2, figs.1–6. Holotype: Piasecki, 1980, pl.2, figs.4–6; Jan du Chêne et al., 1986a, pl.10, figs.5–8. Taxonomic senior synonym: *Apteodinium spiridoides*, according to Lucas-Clark (1987, p.178) — however, Jan du Chêne in Head and Wrenn (1992, p.3) retained *Apteodinium tectatum*. Age: middle Miocene.

tenuicinctum He Chengquan, 1991, p.113, pl.5, fig.33; text-fig.17. Holotype: He Chengquan, 1991, pl.5, fig.33; text-fig.17. Age: middle-late Eocene.

thelium Sarjeant, 1985a, p.83, pl.3, figs.2–3; pl.8, figs.3–4. Holotype: Sarjeant, 1985a, pl.8, figs.3–4. Taxonomic senior synonym: *Apteodinium granulatum*, according to Jan du Chêne et al. (1986a, p.46) — however, Sarjeant in Lentin and Williams (1989, p.21) retained *Apteodinium thelium*. Age: late Barremian–late Aptian.

tuberculatum Cookson and Eisenack, 1970a, p.146–147, pl.12, fig.14. Holotype: Cookson and Eisenack, 1970a, pl.12, fig.14; Jan du Chêne et al., 1986a, pl.14, figs.9–11. Age: Senonian.

unicornum (Kar, 1985, p.206, pl.49, fig.8) Jain and Garg, 1991, p.72. Emendation: Jain and Garg, 1991, p.72–73, as *Apteodinium unicornum*. Holotype: Kar, 1985, pl.49, fig.8. Originally *Millioudinium*, subsequently (and now) *Apteodinium*. Age: Miocene.

variabile He Chengquan, 1991, p.113–114, pl.3, figs.11–16. Holotype: He Chengquan, 1991, pl.3, fig.11. Age: Cenomanian–Eocene.

vectense (Duxbury, 1983, p.39, pl.4, figs.3,7,10) Lucas-Clark, 1987, p.179. Holotype: Duxbury, 1983, pl.4, figs.3,7,10; Jan du Chêne et al., 1986a, pl.8, figs.6–9. Originally *Aldorfia*, subsequently (and now) *Apteodinium*. Age: late Aptian.

verrucosum Oleinik, 1976, p.85, pl.1, figs.1–3. Holotype: Oleinik, 1976, pl.1, fig.1. Originally (and now) *Apteodinium*, subsequently *Apectodinium*. This name was erroneously listed in *Apectodinium* (Costa and Downie, 1976) Lentin and Williams, 1977b in Lentin and Williams (1981, p.14); in the same publication, Lentin and Williams (1981, p.17) correctly listed it as a species of *Apteodinium*. Age: late Eocene.

?**vescum** Matsuoka, 1983b, p.139, pl.5, figs.7–8. Holotype: Matsuoka, 1983b, pl.5, fig.7; Jan du Chêne et al., 1986a, pl.12, fig.7. Originally *Apteodinium*, subsequently (and now) *Apteodinium*?. Questionable assignment: Lucas-Clark (1987, p.180). Age: early-middle Miocene.

warringtonii (Poulsen, 1996, p.69–70, pl.11, figs.1–4; pl.12, figs.1–4) Riding and Fensome, 2003, p.19. Holotype: Poulsen, 1996, pl.11, figs.1–3. Originally *Aldorfia*, subsequently (and now) *Apteodinium*. Age: late Oxfordian?–earliest Volgian.

"**wilsonii**" Slimani, 1994, p.90–91, pl.14, figs.5–11. Holotype: Slimani, 1994, pl.14, figs.5–9. **NOW** *Cribroperidinium graemei*. Originally *Apteodinium wilsonii*, subsequently *Cribroperidinium wilsonii* (name illegitimate), thirdly (and now) *Cribroperidinium graemei*. Taxonomic junior synonym: *Gonyaulacysta filosa* (name not validly published), according to Slimani (2001a, p.192). Age: early Campanian–late Maastrichtian.

ARACHNODINIUM Wilson and Clowes, 1982, p.97–98. Type: Wilson, 1967a, fig.37, as *Aiora fenestrata*.

***antarcticum** Wilson and Clowes, 1982, p.98,100,102, pl.1, figs.1–12; pl.2, figs.1–10; text-figs.2A–B. Holotype: Wilson, 1967a, fig.37 (as *Aiora fenestrata*); Wilson and Clowes, 1982, pl.1, figs.1–3; Fensome et al., 1993a, figs.1–3 — p.917; Fauconnier and Masure, 2004, pl.2, figs.18–20. Age: Eocene–Oligocene.

ARANEOSPHAERA Eaton, 1976, p.239–240. Type: Eaton, 1976, pl.2, fig.6; text-fig.6A, as *Araneosphaera araneosa*.

***araneosa** Eaton, 1976, p.240,242, pl.2, figs.5–8; text-figs.6A–D. Holotype: Eaton, 1976, pl.2, fig.6; text-figs.6A–B; Bujak et al., 1980, pl.6, figs.4–5. Age: middle-late Eocene.

consociata Jain and Tandon, 1981, p.7–8, pl.2, figs.36–37; pl.3, fig.47. Holotype: Jain and Tandon, 1981, pl.3, fig.47. Age: middle Eocene.

minuta Khanna and Singh, 1981b, p.399–400, fig.3, no.2; text-fig.10. Holotype: Khanna and Singh, 1981b, fig.3, no.2. This name was not validly published in Khanna (1979, p.217), since that author gave no description or illustration. Age: early Eocene.

stephanophora (Benedek, 1972, p.30–31, pl.9, fig.6; text-fig.10) Benedek and Sarjeant, 1981, p.349–350. Emendation: Benedek and Sarjeant, 1981, p.349–350, as *Araneosphaera stephanophora*. Holotype: Benedek, 1972, pl.9, fig.6. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaeridium*?, thirdly (and now) *Araneosphaera*. Age: middle-late Oligocene.

ARCHEOTECTATUM Habib, 1972, p.375–376. Taxonomic senior synonym: *Apteodinium*, according to Stover and Evitt (1978, p.142) — however, Lentin and Williams (1989, p.24) retained *Archeotectatum*. Type: Habib, 1972, pl.5, fig.3, as *Archeotectatum sarjeantii*.

reticulatum Khowaja-Atequzaman and Jain, 1992, p.142, pl.4, fig.5; pl.6, fig.8. Holotype: Khowaja-Atequzaman and Jain, 1992, pl.4, fig.5. Age: Hauterivian–Barremian.

***sarjeantii** Habib, 1972, p.376, pl.5, figs.3–4. Holotype: Habib, 1972, pl.5, fig.3; Fensome et al., 1995, fig.1 — p.1763. Originally (and now) *Archeotectatum*, subsequently *Apteodinium*. Lentin and Williams (1981, p.16) retained this species in *Archeotectatum*. Age: Oxfordian–Kimmeridgian.

ARCTICACYSTA Sangiorgi et al., 2009, p.251–252,254. Type: Sangiorgi et al., 2009, pl.1, figs.1–3, as *Arcticacysta backmanii*.

**backmanii* Sangiorgi et al., 2009, p.254–255, pl.1, figs.1–12, pl.2, figs.1–9, pl.3, figs.1–2. Holotype: Sangiorgi et al., 2009, pl.1, figs.1–3. Age: ?early Miocene.

moraniae Sangiorgi et al., 2009, p.255–256, pl.3, figs.3–6, pl.4, figs.1–12. Holotype: Sangiorgi et al., 2009, pl.4, figs.1–4. Age: ?early Miocene.

AREOLIGERA Lejeune-Carpentier, 1938a, p.B164. Emendation: Williams and Downie, 1966c, p.227–228. Type: Lejeune-Carpentier, 1938a, text-fig.2, as *Areoligera senonensis*.

"*birama*" Maier, 1959, p.304, pl.29, fig.2. Holotype: Maier, 1959, pl.29, fig.2. **Taxonomic senior synonym:** *Xanthidium* (now *Spiniferites*) *ramosum*, according to Morgenroth (1968, p.550). Age: middle Oligocene.

campoensis Caro, 1973, p.344,347–348, pl.1, figs.1–2. Holotype: Caro, 1973, pl.1, figs.1–2; Fauconnier and Masure, 2004, pl.3, fig.1. Age: middle Paleocene.

"*cassiculus*" Drugg, 1970b, p.811, figs.2B,3A–B. Holotype: Drugg, 1970b, fig.3A. **NOW** *Gerdiocysta*. Originally *Areoligera*, subsequently (and now) *Gerdiocysta*. N.I.A. Age: early Eocene.

coronata (Wetzel, 1933b, p.41, caption to pl.4, fig.17 ex Deflandre, 1937b, p.75) Lejeune-Carpentier, 1938a, p.B170. Holotype: Wetzel, 1933b, pl.4, fig.17; Lejeune-Carpentier, 1938a, fig.6. Originally *Hystrichosphaera penicillata* forma *coronata* (name not validly published), subsequently *Hystrichosphaeridium penicillatum* forma *coronatum*, thirdly (and now) *Areoligera coronata*. Taxonomic junior synonyms (at specific rank): *Hystrichosphaera penicillata* subsp. *medusettiformis* (now *Areoligera medusettiformis*), according to Morgenroth (1968, p.551) — however, Eaton (1976, p.245) retained *Hystrichosphaera penicillata* subsp. *medusettiformis* (as *Areoligera medusettiformis*); *Hystrichosphaera penicillata* subsp. *rhizopodiphora* (subsequently *Areoligera rhizopodiphora*), according to Lentin and Williams (1981, p.19). Age: Senonian.

crenatis Damassa, 1979b, p.192–193, pl.1, figs.1–13. Holotype: Damassa, 1979b, pl.1, figs.9–11; Fauconnier and Masure, 2004, pl.3, figs.4–5. Age: early Paleocene.

"*danica*" Wetzel, 1952, p.396–397, pl.A, figs.5–6; text-fig.8. Emendation: Sarjeant, 1984c, p.129–130, as *Achomosphaera danica*. Holotype: Wetzel, 1952, pl.A, fig.6; Dietz et al., 1999, text-fig.6b. **NOW** *Achomosphaera*. Originally *Areoligera*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichosphaeridium*, fourthly *Cleistosphaeridium?*, fifthly (and now) *Achomosphaera*. Taxonomic senior synonym: *Areoligera senonensis*, according to Lejeune-Carpentier and Sarjeant (1981, p.15) — however, Sarjeant (1984c, p.130) retained *Areoligera* (as *Achomosphaera*) *danica*. Age: Paleocene.

?*delicata* Horowitz, 1975, p.24, pl.1, fig.2. Holotype: Horowitz, 1975, pl.1, fig.2. Originally *Areoligera*, subsequently *Adnatosphaeridium?* (combination not validly published), thirdly (and now) *Areoligera?*. Questionable assignment: Stover and Evitt (1978, p.19). Age: Late Triassic (probably not in place).

"*dermatica*" Maier, 1959, p.305, pl.29, fig.3. Holotype: Maier, 1959, pl.29, fig.3. **Taxonomic senior synonym:** *Xanthidium* (now *Spiniferites*) *ramosum*, according to Morgenroth (1968, p.550). Age: middle Oligocene.

"*digitata*" Kar, 1985, p.180–181, pl.40, fig.3; pl.41, figs.2–3. Holotype: Kar, 1985, pl.41, fig.2. **Taxonomic senior synonym:** *Homotryblium plectilum*, according to Jain and Garg (1991, p.77). Age: early Eocene.

"*espiritasantensis*" (Regali et al., 1974, p.290, pl.24, fig.3) Lentin and Williams, 1981, p.18. Holotype: Regali et al., 1974, pl.24, fig.3; irretrievably damaged according to Arai in Fauconnier and Masure (2004, p.246). Lectotype: Fauconnier and Masure, 2004, pl.31, figs.1–3, designated by Arai in Fauconnier and Masure (2004, p.246). **NOW**

Glaphyrocysta. Originally *Hystrichosphaeridium*, subsequently *Areoligera*, thirdly (and now) *Glaphyrocysta*. Age: Maastrichtian.

fimbriata He Chengquan, 1991, p.134, pl.28, fig.10; pl.59, fig.1. Holotype: He Chengquan, 1991, pl.28, fig.10. Age: Paleocene–middle Eocene.

flandriensis Slimani, 1994, p.92–93, pl.15, figs.10–12; pl.16, figs.15–16. Holotype: Slimani, 1994, pl.15, figs.10–12; Fauconnier and Masure, 2004, pl.3, figs.8–10. Age: late Campanian–early Maastrichtian.

"***galea***" (Maier, 1959, p.306–307, pl.29, fig.4) Davey et al., 1969, p.15. Emendation: Sarjeant, 1983, p.10, as *Chiropteridium galea*. Holotype: Maier, 1959, pl.29, fig.4; Eisenack and Kjellström, 1975b, p.88a; Fensome et al., 1995, fig.1 — p.1495. **NOW** *Chiropteridium*. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Areoligera*, fourthly *Areoligera?*, fifthly (and now) *Chiropteridium*. Questionable assignment: Stover and Evitt (1978, p.19). Taxonomic junior synonyms: *Chiropteridium dispersum*, *Galea* (al. *Baltisphaeridium*) *mespilatum* and *Galea* (al. *Baltisphaeridium*) *levis*, all according to Sarjeant (1983, p.108–109); *Membranophoridium multispinatum*, according to Brosius (1963, p.48) and Gocht (1969, p.63), who considered *Membranophoridium multispinatum* to be a taxonomic junior synonym of *Galea* (as *Chiropteridium*) *dispersa*, which is now a taxonomic junior synonym of *Galea* (now *Chiropteridium*) *galea*; *Membranophoridium* (subsequently *Chiropteridium*) *partispinatum*, by implication in Matsuoka and Bujak (1988, p.40), who considered *Membranophoridium partispinatum* to be a taxonomic junior synonym of *Galea* (as *Chiropteridium*) *mespilana*, which is now a taxonomic junior synonym of *Galea* (now *Chiropteridium*) *galea*. N.I.A. Age: Oligocene.

gippingensis Jolley, 1992, p.26,28,30–31, pl.1, figs.1–6; pl.2, figs.1–6; text-figs.2a–d,3. Holotype: Jolley, 1992, pl.1, figs.1–2; text-fig.2a. Age: Thanetian.

guembelii Kirsch, 1991, p.89, pl.15, figs.1–3. Holotype: Kirsch, 1991, pl.15, figs.1–3. Age: middle Maastrichtian.

"***incerta***" Klumpp, 1953, p.389–390, pl.17, figs.1–2. Emendations: Morgenroth, 1966a, p.15, as *Hystrichosphaera incerta*; Sarjeant, 1981, p.109–110, as *Spiniferites incertus*. Holotype: Klumpp, 1953, pl.17, figs.1–2. **NOW** *Spiniferites*. Originally *Areoligera*, subsequently *Hystrichosphaera*, thirdly (and now) *Spiniferites*. Taxonomic junior synonym: *Hystrichokibotium* (now *Spiniferites*) *pseudofurcatum*, according to Morgenroth (1966a, p.15) — however, Sarjeant (1981, p.108–109) retained *Hystrichokibotium* (as and now *Spiniferites*) *pseudofurcatum*. Age: late Eocene.

lemniscata (Stanley, 1965, p.229–230, pl.24, figs.1–6) Stover and Evitt, 1978, p.18. Holotype: Stanley, 1965, pl.24, figs.1–2. Originally *Cyclonephelium*, subsequently (and now) *Areoligera*. Age: Paleocene.

longispinata Xu Jinli et al., 1997, p.88, pl.25, figs.1–2; pl.27, figs.1,4 ex He Chengquan et al., 2009, p.648. Holotype: Xu Jinli et al., 1997, pl.27, fig.1. The name was not validly published in Xu Jinli et al., (1997), since no English or Latin description was provided. He Chengquan et al. (2009, p.648) validated the name by publishing a diagnosis in English. Age: middle-late Eocene.

"***lychnea***" (Maier, 1959, p.310, pl.30, fig.6) Davey et al., 1969, p.15. Holotype: Maier, 1959, pl.30, fig.6. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Areoligera*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Achomosphaera*) *alcicornu*, according to Sarjeant (1983, p.100–101). Age: Miocene.

medusettiformis Wetzel, 1933b, caption to pl.4, fig.19 — p.41 ex Lejeune-Carpentier, 1938a, p.B170. Holotype: Wetzel, 1933b, pl.4, fig.19; Lejeune-Carpentier, 1938a, fig.7. Originally *Hystrichosphaera penicillata* forma *medusettiformis* (name not validly published), subsequently (and now) *Areoligera medusettiformis*. Taxonomic senior synonym (at specific rank): *Hystrichosphaera penicillata* forma *coronata* (now *Areoligera coronata*), according to Morgenroth (1968, p.551) — however, Eaton (1976, p.245) retained *Areoligera medusettiformis*. The name *Hystrichosphaera penicillata* forma *medusettiformis* was not validly published in Wetzel (1933b), since the specific combination *Hystrichosphaera penicillata* was not validly published. Age: Senonian.

microreticulata Slimani, 1994, p.93–94, pl.15, figs.13–15; pl.16, figs.9–12. Holotype: Slimani, 1994, pl.15, figs.13–15; Fauconnier and Masure, 2004, pl.4, figs.1–3. Taxonomic junior synonym: *Areoligera reticulata* (name not validly published), according to Slimani (2001a, p.192). Age: late Campanian.

"*reticulata*" Wilson in Slimani, 1994, p.93. **Name not validly published**: no description or illustration.

Taxonomic senior synonym: *Areoligera microreticulata*, according to Slimani (2001a, p.192).

"*rhizopodiphora*" Wetzel, 1933b, p.41, caption to pl.4, fig.18 ex Lejeune-Carpentier, 1938a, p.B170. Holotype: Wetzel, 1933b, pl.4, fig.18. Originally *Hystrichosphaera penicillata* subsp. *rhizopodiphora* (name not validly published), subsequently *Areoligera rhizopodiphora*. **Taxonomic senior synonym** (at specific rank): *Hystrichosphaera penicillata* forma *coronata* (now *Areoligera coronata*), according to Lentin and Williams (1981, p.19). Lejeune-Carpentier (1938a, p.B170) considered *Hystrichosphaera penicillata* forma *medusettiformis* (now *Areoligera medusettiformis*) to be a possible taxonomic senior synonym of this taxon. The name *Hystrichosphaera penicillata* forma *rhizopodiphora* was not validly published in Wetzel (1933b), since the specific combination *Hystrichosphaera penicillata* was not validly published. Age: Senonian.

"*semicirculata*" (Morgenroth, 1966b, p.9–10, pl.2, figs.3–4) Stover and Evitt, 1978, p.18. Holotype: Morgenroth, 1966b, pl.2, fig.3. **NOW** *Licracysta*? Originally *Cyclonephelium*, subsequently *Areoligera*, thirdly (and now) *Licracysta*? Age: middle Oligocene.

**senonensis* Lejeune-Carpentier, 1938a, p.B164–B166, text-figs.1–3. Holotype: Lejeune-Carpentier, 1938a, text-fig.2; Streel et al., 1977, pl.1, fig.2; Lejeune-Carpentier and Sarjeant, 1981, pl.3, figs.5–6. Taxonomic junior synonym: *Areoligera* (now *Achomosphaera*) *danica*, according to Lejeune-Carpentier and Sarjeant (1981, p.15) — however, Sarjeant (1984c, p.130) retained *Achomosphaera danica*. Age: Late Cretaceous.

sentosa Eaton, 1976, p.246, pl.4, figs.1–2; pl.5, figs.1,3; text-fig.8A. Holotype: Eaton, 1976, pl.4, figs.1–2; Bujak et al., 1980, pl.9, figs.4–5. Age: middle Eocene (see Aubry, 1986).

taiwaniana Shaw Chenglong, 1999b, p.180, figs.70–71. Holotype: Shaw Chenglong, 1999b, figs.70–71. Age: Eocene.

tauloma Eaton, 1976, p.247, pl.4, figs.3,5; pl.5, figs.5–6; text-fig.8B. Holotype: Eaton, 1976, pl.4, figs.3,5; Bujak et al., 1980, pl.9, figs.1–2; Fauconnier and Masure, 2004, pl.4, figs.7–8. Age: middle Eocene (see Aubry, 1986).

tenuicapillata (Wetzel, 1933b, p.42, pl.4, figs.20–22 ex Deflandre, 1937b, p.78) Lejeune-Carpentier, 1938a, p.B170. Holotype: Wetzel, 1933b, pl.4, fig.20. Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium*, thirdly (and now) *Areoligera*. The name *Hystrichosphaera tenuicapillata* was not validly published in Wetzel (1933b), since the generic name *Hystrichosphaera* was not validly published until 1937. Age: Senonian.

"subsp. *irregularis*" Wetzel, 1933b, p.42–43, pl.4, fig.20 ex Lentin and Williams, 1973, p.16. Holotype: Wetzel, 1933b, pl.4, fig.20. **Combination illegitimate** — **nomenclatural senior synonym**: *Areoligera tenuicapillata* subsp. *tenuicapillata*, which has the same holotype. Originally *Hystrichosphaera tenuicapillata* forma *irregularis* (name not validly published), subsequently *Areoligera tenuicapillata* subsp. *irregularis* (name illegitimate). The name *Hystrichosphaera tenuicapillata* forma *irregularis* was not validly published in Wetzel (1933b), since the species name was not validly published until 1937. Age: Senonian.

"forma *pinopollina*" Wetzel, 1933b, p.42–43, pl.4, fig.22 ex Downie and Sarjeant, 1965, p.86. Holotype: Wetzel, 1933b, pl.4, fig.22. **NOW** *Areoligera tenuicapillata* subsp. *pinopollina*. Originally *Hystrichosphaera tenuicapillata* forma *pinopollina* (name not validly published), subsequently *Areoligera tenuicapillata* forma *pinopollina*, thirdly (and now) *Areoligera tenuicapillata* subsp. *pinopollina*. The name *Hystrichosphaera tenuicapillata* forma *pinopollina* was not validly published in Wetzel (1933b), since the species name was not validly published until 1937. Age: Senonian.

subsp. *pinopollina* (Wetzel, 1933b, p.42–43, pl.4, fig.22 ex Downie and Sarjeant, 1965, p.86) Lentin and Williams, 1973, p.16. Holotype: Wetzel, 1933b, pl.4, fig.22. Originally *Hystrichosphaera tenuicapillata* forma *pinopollina* (name not validly published), subsequently *Areoligera tenuicapillata* forma *pinopollina*, thirdly (and now) *Areoligera tenuicapillata* subsp. *pinopollina*. Lejeune-Carpentier (1938a, p.B167) speculated that this taxon might be based on coniferous pollen. Lentin and Williams (1989, p.26) believed it may be a damaged specimen of *Hystrichosphaeridium* (now *Florentinia?*) *flosculus*. The name *Hystrichosphaera tenuicapillata* forma *pinopollina* was not validly published in Wetzel (1933b), since the species name was not validly published until 1937. Age: Senonian.

"forma *tenuicapillata*". Autonym. Holotype: Wetzel, 1933b, pl.4, fig.20. **Now redundant.** Nomenclatural junior synonym: *Hystrichosphaera* (subsequently *Areoligera*) *tenuicapillata* forma *irregularis*, which has the same holotype.

subsp. *tenuicapillata*. Autonym. Holotype: Wetzel, 1933b, pl.4, fig.20. Nomenclatural junior synonym: *Hystrichosphaera* (subsequently *Areoligera*) *tenuicapillata* subsp. *irregularis*, which has the same holotype.

subsp. *turbilineata* (Wetzel, 1933b, p.42, pl.4, fig.21 ex Downie and Sarjeant, 1965, p.86) Lentin and Williams, 1981, p.20. Holotype: Wetzel, 1933b, pl.4, fig.21; Sarjeant, 1985b, pl.4, fig.2. Originally *Hystrichosphaera tenuicapillata* forma *turbilineata* (name not validly published), subsequently *Areoligera turbilineata*, thirdly (and now) *Areoligera tenuicapillata* subsp. *turbilineata*. Sarjeant (1985b, p.153–154) provided a detailed discussion of this taxon. Age: Senonian.

"*turbilineata*" Wetzel, 1933b, p.42, pl.4, fig.21 ex Downie and Sarjeant, 1965, p.86. Holotype: Wetzel, 1933b, pl.4, fig.21; Sarjeant, 1985b, pl.4, fig.2. **NOW** *Areoligera tenuicapillata* subsp. *turbilineata*. Originally *Hystrichosphaera tenuicapillata* forma *turbilineata* (name not validly published), subsequently *Areoligera turbilineata*, thirdly (and now) *Areoligera tenuicapillata* subsp. *turbilineata*. The name *Hystrichosphaera tenuicapillata* forma *turbilineata* was not validly published in Wetzel (1933b), since the specific name *Hystrichosphaera tenuicapillata* was not validly published until 1937. Age: Senonian.

"*twistringiensis*" (Maier, 1959, p.308–309, pl.30, figs.3–4) Davey et al., 1969, p.15. Holotype: Maier, 1959, pl.30, fig.3; Sarjeant, 1983, pl.5, fig.3. **NOW** *Spiniferites*. Originally *Galea* (combination illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Areoligera*, fourthly (and now) *Spiniferites*. Taxonomic junior synonyms (at specific rank): *Hystrichosphaera ramosa* var. *multibrevis* (as *Spiniferites multibrevis*), according to Sarjeant (1983, p.94–95) and *Achomosphaera* (al. *Spiniferites*) *cambra*, by implication in Jain (1982, p.51), who considered this species to be taxonomic junior synonym of *Hystrichosphaera ramosa* var. *multibrevis* (as *Spiniferites ramosus* subsp. *multibrevis*). Age: middle Miocene.

undulata Eaton, 1976, p.248, pl.4, figs.4,6; pl.5, figs.2,4; text-figs.8c,9. Holotype: Eaton, 1976, pl.4, figs.4,6; text-fig.9; Bujak et al., 1980, pl.9, figs.7–8; Fauconnier and Masure, 2004, pl.5, figs.1–3. Originally (and now) *Areoligera*, subsequently *Glaphyrocysta?*. Jain and Garg (1986a, p.111) retained this species in *Areoligera*. Age: middle Eocene (see Aubry, 1986).

vermiculata Corradini, 1973, p.159–160, pl.24, figs.6–7; pl.34, fig.5. Holotype: Corradini, 1973, pl.24, fig.7; Fauconnier and Masure, 2004, pl.5, figs.4–7. Age: Maastrichtian.

volata Drugg, 1967, p.21, pl.3, figs.11–13; pl.9, fig.4. Holotype: Drugg, 1967, pl.3, fig.11. Age: Danian.

AREOSPHERIDIUM Eaton, 1971, p.357–358. Emendation: Stover and Williams, 1995, p.100. Type: Klumpp, 1953, pl.18, figs.3–4, as *Hystrichosphaeridium diktyoplokum*.

"*actinocoronatum*" (Benedek, 1972, p.34, pl.12, fig.13; text-fig.13) Stover and Evitt, 1978, p.20. Emendation: Bujak and Matsuoka, 1986, p.238–239, as *Reticulosphaera actinocoronata*. Holotype: Benedek, 1972, pl.12, fig.13; Benedek and Sarjeant, 1981, fig.10, no.5; text-fig.11; Sarjeant et al., 1987, pl.2, fig.4; Fensome et al., 1993a, fig.1 — p.879. **NOW** *Reticulosphaera*. Originally *Cleistosphaeridium*, subsequently *Areosphaeridium?*, thirdly

(and now) *Reticulosphaera*. Questionable assignment: Stover and Evitt (1978, p.20). Taxonomic junior synonym: *Reticulosphaera stellata*, according to Bujak and Matsuoka (1986, p.238). Age: middle-late Oligocene.

"**arcuatum**" Eaton, 1971, p.360–363, pl.3, figs.1–9; text-figs.4–5. Emendation: Stover and Williams, 1995, p.109, as *Enneadocysta arcuata*. Holotype: Eaton, 1971, pl.3, fig.1; text-fig.4; Bujak et al., 1980, pl.2, fig.6. **NOW** *Enneadocysta*. Originally *Areosphaeridium*, subsequently (and now) *Enneadocysta*. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Enneadocysta?*) *dictyostilum*, according to Sarjeant (1981, p.115–116) — however, Lentin and Williams (1985, p.26) retained *Areosphaeridium* (now *Enneadocysta*) *arcuatum*. Age: middle Eocene.

"**argentinense**" Pöthe de Baldis, 1986, p.172, pl.1, figs.1–2. Holotype: Pöthe de Baldis, 1986, pl.1, fig.1. **NOW** *Surculosphaeridium?*. Originally *Areosphaeridium*, subsequently (and now) *Surculosphaeridium?*. Age: Santonian–Campanian.

asteriphorum He Chengquan et al., 1999, p.188, 198–199, pl.3, fig.7; text-fig.2. Holotype: He Chengquan et al., 1999, pl.3, fig.7; text-fig.2. Age: late Hauterivian–Barremian.

calicigerum de Coninck, 1986b, p.10, pl.1, figs.8–13. Emendation: Michoux and Masure in Fauconnier and Masure, 2004, p.63. Holotype: de Coninck, 1986b, pl.1, figs.11–13; Fauconnier and Masure, 2004, pl.7, figs.1–3. Originally *Areosphaeridium?*, subsequently *Surculosphaeridium?*, thirdly (and now) *Areosphaeridium*. Questionable assignment: de Coninck (1986b, p.10) — however, Michoux and Masure in Fauconnier and Masure (2004, p.63) retained this species in *Areosphaeridium* without question (but did not acknowledge the earlier transfer to *Surculosphaeridium*). Age: late Eocene (Tongrian).

"**capricornum**" (Cookson and Eisenack, 1965a, p.128–129, pl.15, figs.1–9) Stover and Evitt, 1978, p.20. Emendation: Stover and Williams, 1995, p.107, as *Cooksonidium capricornum*. Holotype: Cookson and Eisenack, 1965a, pl.15, fig.7; Fauconnier and Masure, 2004, pl.7, figs.7–10. **NOW** *Cooksonidium*. Originally *Cordosphaeridium*, subsequently *Systematophora?*, thirdly *Areosphaeridium*, fourthly (and now) *Cooksonidium*. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Enneadocysta?*) *dictyostilum*, according to Sarjeant (1981, p.115–116) — however, Lentin and Williams (1985, p.26) retained *Areosphaeridium* (now *Cooksonidium*) *capricornum*. Age: late Eocene.

"**coniunctum**" Prössl, 1992b, p.106–108, pl.2, figs.1–2, 4–5, 7, 9, 12–14; pl.3, figs.1, 4, 7, 12–14. Holotype: Prössl, 1992b, pl.3, figs.1, 4, 7; Fauconnier and Masure, 2004, pl.8, figs.1–3. **NOW** *Cooksonidium*. Originally *Areosphaeridium*, subsequently (and now) *Cooksonidium*. Age: middle Eocene.

"**dictyostilum**" (Menéndez, 1965, p.11–12, pl.2, fig.6; pl.3, figs.18–22) Sarjeant, 1981, p.115. Emendation: Sarjeant, 1981, p.115, as *Areosphaeridium dictyostilum*. Holotype: Menéndez, 1965, pl.2, fig.6; pl.3, figs.18–20. **NOW** *Enneadocysta?*. Originally *Hystrichosphaeridium*, subsequently *Oligosphaeridium?*, thirdly *Areosphaeridium*, fourthly (and now) *Enneadocysta?*. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Areosphaeridium*) *diktyoplokum*, according to Eaton (1971, p.359) — however, Sarjeant (1981, p.115) retained *Areosphaeridium* (now *Enneadocysta?*) *dictyostilum*. Taxonomic junior synonyms: *Areosphaeridium* (now *Enneadocysta*) *arcuatum* and *Cordosphaeridium* (now *Cooksonidium*) *capricornum*, both according to Sarjeant (1981, p.115–116) — however, Lentin and Williams (1985, p.26) retained *Areosphaeridium* (now *Enneadocysta*) *arcuatum* and *Cordosphaeridium* (now *Cooksonidium*) *capricornum*. Age: Tertiary.

***diktyoplokum** (Klumpp, 1953, p.392, pl.18, figs.3–7 [not pl.18, figs.8–10, which are now *Cordosphaeridium latum*]) Eaton, 1971, p.358–359. Emendations: Eaton, 1971, p.359 and Stover and Williams, 1995, p.102, both as *Areosphaeridium diktyoplokum*. Holotype: Klumpp, 1953, pl.18, figs.3–4. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly (and now) *Areosphaeridium*. Taxonomic junior synonym: *Hystrichosphaeridium* (now *Enneadocysta?*) *dictyostilum*, according to Eaton (1971, p.359) — however, Sarjeant (1981, p.115) retained *Hystrichosphaeridium* (as *Areosphaeridium*, now *Enneadocysta?*) *dictyostilum*. Age: middle-late Eocene.

"subsp. **diktyoplokum**". Autonym. Holotype: Klumpp, 1953, pl.18, figs.3–4. **Now redundant**. Originally *Hystrichosphaeridium diktyoplokum* subsp. *diktyoplokum*, subsequently *Cordosphaeridium diktyoplokum* subsp. *diktyoplokum*, thirdly *Areosphaeridium diktyoplokum* subsp. *diktyoplokum*.

"subsp. *latum*" (Klumpp, 1953, p.392, pl.18, figs.8–10) Lentin and Williams, 1973, p.16. Emendation: Sarjeant, 1981, p.106–107, as *Plethysyrinx lata* — however, see Lentin and Williams (1985, p.72). Holotype: Klumpp, 1953, pl.18, figs.8–9. **NOW** *Cordosphaeridium latum*. Originally *Hystrichosphaeridium diktyoplokum* subsp. *latum*, subsequently *Cordosphaeridium diktyoplokum* subsp. *latum*, thirdly *Areosphaeridium diktyoplokum* subsp. *latum*, fourthly *Plethysyrinx? lata*, fifthly (and now) *Cordosphaeridium latum*. Age: Eocene.

ebdonii Bujak, 1994, p.119–121, pl.2, figs.8–9. Holotype: Bujak, 1994, pl.2, figs.8–9. Age: late Ypresian–Lutetian.

"*fenestratum*" Bujak, 1976, p.107,109–110, pl.2, figs.9–12; pl.3, figs.1–4; text-figs.3D–F. Emendation: Stover and Williams, 1995, p.110, as *Enneadocysta fenestrata*. Holotype: Bujak, 1976, pl.3, fig.2. **NOW** *Enneadocysta*. Originally *Areosphaeridium*, subsequently (and now) *Enneadocysta*. Age: middle Eocene (see Aubry, 1986).

michoudii Bujak, 1994, p.121, pl.1, figs.1–3. Holotype: Bujak, 1994, pl.1, figs.1–2; Fauconnier and Masure, 2004, pl.7, fig.11. Age: Ypresian–Priabonian.

"*multicornutum*" Eaton, 1971, p.363–364, pl.4, figs.1–7; text-fig.6. Emendation: Stover and Williams, 1995, p.112–113, as *Enneadocysta multicornuta*. Holotype: Eaton, 1971, pl.4, fig.1; text-fig.6. **NOW** *Enneadocysta*. Originally *Areosphaeridium*, subsequently (and now) *Enneadocysta*. Taxonomic senior synonym: *Baltisphaeridium* (now *Enneadocysta*) *pectiniforme*, according to Sarjeant (1984b, p.83–84,86) — however, Stover and Williams (1995, p.112) retained *Areosphaeridium* (as *Enneadocysta*) *multicornutum*. Age: Eocene.

"*pectiniforme*" (Gerlach, 1961, p.195–196, pl.28, fig.14; text-fig.18) Stover and Evitt, 1978, p.20. Emendations: Sarjeant, 1984b, p.83–84,86, as *Areosphaeridium pectiniforme*; Stover and Williams, 1995, p.114, as *Enneadocysta pectiniformis*. Holotype: Gerlach, 1961, pl.28, fig.14; Sarjeant, 1984b, pl.1, fig.2; pl.4, fig.2; Fauconnier and Masure, 2004, pl.7, figs.4–5. **NOW** *Enneadocysta*. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Areosphaeridium*, fourthly *Areosphaeridium?*, fifthly (and now) *Enneadocysta*. Taxonomic junior synonym: *Areosphaeridium* (now *Enneadocysta*) *multicornutum*, according to Sarjeant (1984b, p.83–84,86) — however, Stover and Williams (1995, p.112) retained *Areosphaeridium* (as *Enneadocysta*) *multicornutum*. Questionable assignment: Stover and Evitt (1978, p.20) — however, Sarjeant (1984b, p.83) included this species in *Areosphaeridium* without question. Age: middle Oligocene.

"*polypetellum*" Islam, 1983c, p.82,84, pl.2, figs.1–6. Holotype: Islam, 1983c, pl.2, fig.1. **NOW** *Cleistosphaeridium*. Originally *Areosphaeridium*, subsequently (and now) *Cleistosphaeridium*. Taxonomic senior synonym: *Cleistosphaeridium* (as *Systematophora*) *diversispinosum*, according to Islam (1993, p.88) — however, Eaton et al. (2001, p.194) retained *Cleistosphaeridium polypetellum*. Age: early-middle Eocene.

"*suggestium*" McMinn, 1988, p.146–148, figs.3A–F,4. Holotype: McMinn, 1988, figs.3A,C; Fensome et al., 1996, figs.1–2 — p.2389. **NOW** *Surculosphaeridium*. Originally *Areosphaeridium*, subsequently (and now) *Surculosphaeridium*. Age: Santonian–mid Campanian.

ARKELLEA Below, 1990, p.42. Type: Sarjeant, 1961a, pl.15, fig.9; text-figs.9a–b, as *Cymatiosphaera teichophera*.

**teichophera* (Sarjeant, 1961a, p.107–108, pl.15, fig.9; text-figs.9a–b) Below, 1990, p.42–43. Emendation: Below, 1990, p.42–43, as *Arkellea teichophera*. Holotype: Sarjeant, 1961a, pl.15, fig.9; text-figs.9a–b; Sarjeant, 1976c, pl.6, fig.3. Originally *Cymatiosphaera* (Appendix A), subsequently *Heslertonia*, thirdly (and now) *Arkellea*. Age: early Oxfordian.

"**ARKELLIDINIUM**" Beju, 1979, p.1,4. **Taxonomic senior synonym:** *Sirmiodiniopsis*, according to Beju in Lentin and Williams (1981, p.21). Type: Beju, 1979, fig.1, no.1; figs.2A–A', as *Arkellidium triapertum*.

"*apiapertum*" Beju, 1978, p.4. **Name not validly published:** no description or illustration.

"**triapertum*" Beju, 1979, p.4–5, fig.1, nos.1–6; figs.2A–A',B–E. Holotype: Beju, 1979, fig.1, no.1; figs.2A–A'; Fensome et al., 1995, figs.1,7–8 — p.1847. Originally *Arkellidium*, subsequently *Sirmiodiniopsis*. **Taxonomic senior synonym:** *Sirmiodiniopsis orbis*, according to Riley and Fenton (1982, p.199). Age: late Callovian.

ARVALIDINIUM Lentin and Vozzhennikova, 1990, p.33–34. Type: Marshall, 1988, figs.17M–R, as *Chatangiella arvensis*.

**arvense* (Marshall, 1988, p.201,203, figs.7,17M–X) Lentin and Vozzhennikova, 1990, p.33. Holotype: Marshall, 1988, figs.7,17M–R; Fensome et al., 1996, figs.1–4,8–10 — p.2037. Originally *Chatangiella*, subsequently (and now) *Arvalidinium*. Age: Santonian.

cristatum Lucas-Clark, 2006, p.192, pl.1. figs.7–15; text-figs.4A–B. Holotype: Lucas-Clark, 2006, pl.1, figs.7–10. Age: early Paleocene.

scheii (Manum, 1963, p.56–58, pl.1, figs.1–16; text-fig.1) Lentin and Vozzhennikova, 1990, p.34. Holotype: Manum, 1963, pl.1, figs.1–4; text-fig.1. Originally *Deflandrea*, subsequently *Cooksoniella*, thirdly *Chatangiella?*, fourthly (and now) *Arvalidinium*. Age: Middle Cretaceous (early Late Cretaceous, according to Manum and Cookson, 1964).

ASCODINIUM Cookson and Eisenack, 1960a, p.5. Emendation: Helenes, 1983, p.258–260. Taxonomic junior synonyms: *Pocockia* and *Ovoidinium*, both according to Helenes (1983, p.258), and by implication *Evittia* Pocock (an illegitimate name for which *Pocockia* is the substitute) — however, Lentin and Williams (1989, p.269) retained *Ovoidinium* (including by implication *Pocockia* and *Evittia*). Type: Cookson and Eisenack, 1960a, pl.1, fig.19, as *Ascodinium acrophorum*.

**acrophorum* Cookson and Eisenack, 1960a, p.5, pl.1, figs.19–20. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.19. Age: late Albian–Cenomanian.

"*cinctum*" (Cookson and Eisenack, 1958, p.26, pl.4, figs.1–3) Helenes, 1983, p.260. Holotype: Cookson and Eisenack, 1958, pl.4, fig.3. **NOW** *Ovoidinium*. Originally *Deflandrea*, subsequently *Evittia* (combination illegitimate), thirdly *Pocockia*, fourthly (and now) *Ovoidinium*, fifthly *Ascodinium*. Age: late Neocomian–early Aptian.

"*diversum*" (Davey, 1979b, p.558, pl.6, figs.6–16) Helenes, 1983, p.260. Holotype: Davey, 1979b, pl.6, fig.9. **NOW** *Ovoidinium*. Originally (and now) *Ovoidinium*, subsequently *Ascodinium*. Age: late Aptian–early Albian.

fissilum Harding, 1990b, p.16–17; pl.2, figs.1–8 ex Harding in Williams et al., 1998, p.57. Holotype: Harding, 1990b, pl.2, fig.6. This name was not validly published in Harding (1990b) since the lodgement of the holotype was not specified (I.C.N. Article 40.7). Age: early Barremian.

"?*fragile*" (Norvick, 1976, p.88, pl.13, figs.1,8; pl.17, fig.7) Lentin and Williams, 1985, p.28. Holotype: Norvick, 1976, pl.13, fig.1. **NOW** *Ovoidinium?*. Originally (and now) *Ovoidinium?*, subsequently *Ascodinium?*. Questionable assignment: Lentin and Williams (1985, p.28). Age: Cenomanian.

"*hialinum*" Balteş, 1963, p.585, pl.8, figs.1–3. **Name not validly published:** holotype not designated. Age: Senonian.

"*implanum*" (Davey, 1979b, p.558–559, pl.5, figs.7–9,11–12) Helenes, 1983, p.260. Holotype: Davey, 1979b, pl.5, figs.7,11. **NOW** *Ovoidinium*. Originally (and now) *Ovoidinium*, subsequently *Ascodinium*. Age: late Albian.

"*incomptum*" (Duxbury, 1983, p.64, pl.10, figs.4–5,9; text-figs.30A–C) Lentin and Williams, 1985, p.28. Holotype: Duxbury, 1983, pl.10, figs.5,9; text-fig.30C. **NOW** *Ovoidinium*. Originally (and now) *Ovoidinium*, subsequently *Ascodinium*. Age: late Aptian.

"incorporeum" (Duxbury, 1983, p.65, pl.10, fig.14; text-figs.31A–B) Lentin and Williams, 1985, p.28. Holotype: Duxbury, 1983, pl.10, fig.14; text-figs.31A–B. **NOW** *Ovoidinium*. Originally (and now) *Ovoidinium*, subsequently *Ascodinium*. Age: late Aptian–early Albian.

"?kansanum" (Tasch in Tasch et al., 1964, p.196, pl.1, fig.1) Lentin and Williams, 1985, p.28. Holotype: Tasch et al., 1964, pl.1, fig.1. **NOW** *Ovoidinium*?. Originally *Peridinium* (Appendix B), subsequently *Deflandrea*?, thirdly (and now) *Ovoidinium*?, fourthly *Ascodinium*?. Questionable assignment: Lentin and Williams (1985, p.28). Age: Albian.

"lingfengense" Yu Jingxian, 1989, p.158, pl.38, figs.9–10. Holotype: Yu Jingxian, 1989, pl.38, fig.10. **NOW** *Leberidocysta*. Originally *Ascodinium*, subsequently (and now) *Leberidocysta*. Age: Paleocene.

longangularium Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.51–52, pl.15, fig.1. Holotype: Liu Zhili et al., 1992, pl.15, fig.1. Age: Early Tertiary.

"lordii" Cookson and Eisenack, 1968, p.112, figs.11–K. Holotype: Cookson and Eisenack, 1968, fig.11J. **NOW** *Senoniasphaera*. Originally *Ascodinium*, subsequently (and now) *Senoniasphaera*. Age: Santonian–early Campanian.

"?microreticulatum" Jiabo, 1978, p.90, pl.6, fig.13. Holotype: Jiabo, 1978, pl.6, fig.13. **NOW** *Pareodinia*?. Originally *Ascodinium*?, subsequently (and now) *Pareodinia*?. Questionable assignment: Jiabo (1978, p.90). Age: Early Tertiary.

orbiculatum Yu Jingxian, 1989, p.158, pl.38, figs.12–13. Holotype: Yu Jingxian, 1989, pl.38, fig.12. Age: Paleocene.

"ovale" Cookson and Eisenack, 1970a, p.145, pl.13, fig.8. Holotype: Cookson and Eisenack, 1970a, pl.13, fig.8. **NOW** *Ovoidinium*. Originally *Ascodinium*, subsequently (and now) *Ovoidinium*. Age: Albian–Cenomanian.

ovatum Prössl, 1990, p.106–107, pl.15, figs.5–7 ex Prössl, 1992b, p.113. Holotype: Prössl, 1990, pl.15, figs.6–7. This name was not validly published in Prössl (1990, p.106–107), since that author did not specify the lodgment of the holotype. Age: late Cenomanian.

parvum (Cookson and Eisenack, 1958, p.28, pl.4, figs.12–13) Cookson and Eisenack, 1960a, p.5. Holotype: Cookson and Eisenack, 1958, pl.4, fig.12; lost according to Cookson and Eisenack (1960a, p.5). Neotype: Cookson and Eisenack, 1960a, pl.1, fig.23, designated by Cookson and Eisenack (1960a, p.5). Originally *Deflandrea*, subsequently (and now) *Ascodinium*. Age: late Albian–Cenomanian.

"pontis-mariae" (Deflandre, 1936b, p.167, pl.2, figs.7–9) Deflandre, 1966, p.3. Holotype: Deflandre, 1936b, pl.2, fig.7. **NOW** *Subtilisphaera*. Originally *Gymnodinium* (Appendix B), subsequently *Deflandrea*, thirdly *Ascodinium*, fourthly (and now) *Subtilisphaera*. Age: ?Senonian.

"scabrosum" Cookson and Hughes, 1964, p.40–41, pl.5, figs.1–3. Holotype: Cookson and Hughes, 1964, p.40, pl.5, fig.1. **NOW** *Ovoidinium*. Originally *Ascodinium*, subsequently (and now) *Ovoidinium*. Age: late Albian–early Cenomanian.

serratum Cookson and Eisenack, 1960a, p.5, pl.1, figs.21–22. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.22. Age: Albian–Cenomanian.

"stagonoides" Benedek, 1972, p.10, pl.2, fig.12; text-fig.5. Emendation: Benedek and Sarjeant, 1981, p.324, as *Ascodinium stagonoides*. Holotype: Benedek, 1972, pl.2, fig.12; and Benedek and Sarjeant, 1981, fig.3, nos.1,3. **NOW** *Senoniasphaera*. Originally *Ascodinium*, subsequently *Deflandrea*, thirdly (and now) *Senoniasphaera*. Age: late Oligocene.

"*trendallii*" Cookson and Eisenack, 1970a, p.145–146, pl.12, figs.5–6. Emendation: Pavlishina, 1995, p.138–139, as *Trithyrodinium trendallii*. Holotype: Cookson and Eisenack, 1970a, pl.12, fig.5. **NOW** *Trithyrodinium*. Originally *Ascodinium*?, subsequently *Subtilisphaera*?, thirdly (and now) *Trithyrodinium*. Questionable assignment: Cookson and Eisenack (1970a, p.145). Age: Albian–Cenomanian.

"*verrucosum*" Cookson and Hughes, 1964, p.41, pl.5, figs.4–7. Holotype: Cookson and Hughes, 1964, pl.5, fig.4. **NOW** *Ovoidinium*. Originally *Ascodinium*, subsequently (and now) *Ovoidinium*. Age: late Albian–early Cenomanian.

"subsp. *ostium*" (Davey, 1970, p.353, pl.4, figs.5–6; text-fig.1B) Lentin and Williams, 1985, p.29. Holotype: Davey, 1970, pl.4, fig.5. **NOW** *Ovoidinium verrucosum* subsp. *ostium*. Originally *Ovoidinium ostium*, subsequently *Ovoidinium verrucosum* var. *ostium*, thirdly (and now) *Ovoidinium verrucosum* subsp. *ostium*, fourthly *Ascodinium verrucosum* subsp. *ostium*. Age: Albian–early Cenomanian.

"subsp. *verrucosum*". Autonym. Holotype: Cookson and Hughes, 1964, pl.5, fig.4. **NOW** *Ovoidinium verrucosum* subsp. *verrucosum*. Originally (and now) *Ovoidinium verrucosum* subsp. *verrucosum*, subsequently *Ascodinium verrucosum* subsp. *verrucosum*.

"*waltonii*" (Pocock, 1972, p.93, pl.22, figs.13–14) Helenes, 1983, p.261. Holotype: Pocock, 1972, pl.22, fig.14. **NOW** *Ovoidinium*. Originally *Evittia* (generic name illegitimate), subsequently *Pocockia*, thirdly (and now) *Ovoidinium*, fourthly *Ascodinium*. Age: ?Toarcian–?Bajocian.

"**ASTROCYSTA**" Davey, 1970, p.359. **Taxonomic senior synonym:** *Palaeoperidinium*, according to Lentin and Williams (1976, p.150). This name was not validly published in Sarjeant (1967b, p.243), since no description was given. Type: Pocock, 1962, pl.14, fig.219, as *Palaeoperidinium cretaceum*.

"*ampla*" (Harland, 1973, p.673–674, pl.84, figs.1,7; text-fig.8) Harker and Sarjeant, 1975, p.264. Holotype: Harland, 1973, pl.84, fig.1. **Combination not validly published:** basionym not fully referenced. Originally *Lejeunia* (generic name illegitimate), subsequently *Astrocysta* (combination not validly published), thirdly *Palaeoperidinium*. **Taxonomic senior synonym:** *Palaeoperidinium cretaceum*, according to Harker and Sarjeant in Harker et al. (1990, p.128). Age: late Campanian.

"**cretacea*" Pocock, 1962, p.80, pl.14, figs.219–221 ex Davey, 1970, p.359. Emendation: Harding, 1990a, p.44, as *Palaeoperidinium cretaceum*. Holotype: Pocock, 1962, pl.14, fig.219. **NOW** *Palaeoperidinium*. Originally *Palaeoperidinium* (name not validly published), subsequently *Astrocysta*, thirdly *Lejeunia*? (combination illegitimate), fourthly *Subtilisphaera*, fifthly (and now) *Palaeoperidinium*. Taxonomic junior synonyms: *Lejeunia* (as *Palaeoperidinium*) *ampla*, according to Harker and Sarjeant in Harker et al. (1990, p.128); and *Astrocysta* (subsequently *Palaeoperidinium*) *manumcooksonii*, according to Lentin and Williams (1976, p.110). The name *Palaeoperidinium cretaceum* was not validly published in Pocock (1962) since the generic name *Palaeoperidinium* was not validly published until 1967. The name *Astrocysta cretacea* was not validly published in Sarjeant (1967b, p.243) since the generic name *Astrocysta* was not validly published until 1970. Davey (1970, p.359), while validating this name, proposed an "emended diagnosis". Age: Albian–Aptian.

"*kozłowskii*" (Górka, 1963, p.41, pl.5, fig.4) Davey, 1970, p.360. Holotype: Górka, 1963, pl.5, fig.4. **NOW** *Phelodinium*. Originally *Lejeunia* (generic name illegitimate), subsequently *Astrocysta*, thirdly *Senegalinium*, fourthly (and now) *Phelodinium*. Taxonomic senior synonym: *Lejeunia* (now *Phelodinium*) *tricuspis*, according to Harker and Sarjeant (1975, p.223) — however, Lindgren (1984, p.181) retained *Lejeunia* (as *Phelodinium*) *kozłowskii*. Age: late Maastrichtian.

"*manumcooksonii*" Corradini, 1973, p.176–177, pl.28, figs.4,6. Holotype: Corradini, 1973, pl.28, fig.4. Originally *Astrocysta*, subsequently *Palaeoperidinium*. **Taxonomic senior synonym:** *Palaeoperidinium cretaceum*, according to Lentin and Williams (1976, p.110). Age: Late Cretaceous–Paleocene.

"*tricuspis*" (Wetzel, 1933a, p.166, pl.2, fig.14) Davey, 1970, p.360. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.20, as *Lejeunecysta tricuspis*. Holotype: Wetzel, 1933a, pl.2, fig.14; Lejeune-Carpentier, 1942, fig.21; and

Lejeune-Carpentier and Sarjeant, 1981, pl.6, fig.5. **NOW** *Phelodinium*. Originally *Peridinium* (Appendix B), subsequently *Lejeunia* (combination illegitimate), thirdly *Astrocysta*, fourthly *Senegalinium*, fifthly *Lejeunecysta*, sixthly (and now) *Phelodinium*. Taxonomic junior synonym: *Lejeunia* (now *Phelodinium*) *kozłowskii*, according to Harker and Sarjeant (1975, p.223) — however, Lindgren (1984, p.181) retained *Phelodinium kozłowskii*. Age: Senonian.

ASYMMETROPECYSTA He Chengquan et al., 2009, p.509–510,643. Type: Mao Shaozhi, 1989, pl.30, fig 6, as a cyst of *Protoperidinium* (*Protoperidinium* section *Asymmetropedinium*) *punctulatum*.

**scabrata* He Chengquan et al., 2009, p.510,643–644, pl.13, figs.13,15–16. Holotype: Mao Shaozhi, 1989, pl.30, fig 6. Age: middle-late Pleistocene.

ATAXIODINIUM Reid, 1974, p.588. Taxonomic senior synonym: *Planinosphaeridium*, by implication in Wall et al. (1977, p.149), who transferred the "type species" of *Ataxiodinium*, *Ataxiodinium choane*, to *Planinosphaeridium* — however, Edwards and Andrlé (1992, p.265) retained *Ataxiodinium*. Type: Reid, 1974, pl.1, figs.1–2, as *Ataxiodinium choane*.

**choane* Reid, 1974, p.588–589, pl.1, figs.1–2. Holotype: Reid, 1974, pl.1, figs.1–2; and Fensome et al., 1993a, figs.1–2 — p.1053. Originally (and now) *Ataxiodinium*, subsequently *Planinosphaeridium*. Edwards and Andrlé (1992, p.265) retained this species in *Ataxiodinium*. Taxonomic senior synonym: *Planinosphaeridium membranaceum*, according to Dale (1976, p.45; footnote to table II) — however, Wall et al. (1977, p.149) retained *Ataxiodinium* (as *Planinosphaeridium*) *choane*. N.I.A. Age: Holocene.

confusum Versteegh and Zevenboom in Versteegh, 1995, p.87–88, pl.1, figs.1–9; pl.3, fig.9. Holotype: Versteegh, 1995, pl.1, figs.1,4,7; Versteegh and Zevenboom, 1995, pl.1, figs.1,4,7. Versteegh and Zevenboom (1995, p.217) also proposed this name. Age: early–late Pliocene (early Zanclean–mid Piacenzian).

"*elongatum*" Zevenboom and Santarelli in Zevenboom, 1995, p.141–142, pl.1, figs.7–12. Holotype: Zevenboom, 1995, pl.1, figs.7–9. **Name not validly published**: considered a manuscript name by the authors. **Taxonomic senior synonym**: *Ataxiodinium zevenboomii*, according to Head (1997, p.171–172). Age: ?late Miocene–early Pliocene.

scaldemense Louwye, 2001, p.123, fig.3, nos.1–12. Holotype: Louwye, 2001, fig.3, nos.1–4. Age: early-middle Miocene.

zevenboomii Head, 1997, p.171–172, fig.5; fig.6, nos.4–6,16; fig.18, nos.5–6. Holotype: Head, 1997, fig.6, nos.4–9. Taxonomic junior synonym: *Ataxiodinium elongatum* (name not validly published), according to Head (1997, p.171–172). Age: middle Pliocene.

ATHIGMATOCYSTA Duxbury, 1977, p.23–24. Taxonomic senior synonyms: *Endoscrinium*, according to Below (1981a, p.48); and *Scriniodinium*, according to Stover and Williams (1987, p.27) — however, Harding (1990b, p.28) and Riding and Fensome (2003, p.23–24) retained *Athigmatocysta*. Type: Duxbury, 1977, pl.11, figs.1,6; text-fig.3, as *Athigmatocysta glabra*.

**glabra* Duxbury, 1977, p.24, pl.11, figs.1,6; text-fig.3. Holotype: Duxbury, 1977, pl.11, figs.1,6; text-fig.3; Jan du Chêne et al., 1986a, pl.111, figs.9–10; and Fensome et al., 1995, figs.1–2 — p.1511. Originally (and now) *Athigmatocysta*, subsequently *Endoscrinium*, thirdly *Scriniodinium*. Harding (1990b, p.28) retained this species in *Athigmatocysta*. Age: late Berriasian–mid Barremian.

"*granulata*" Raynaud, 1978, p.391–392, pl.2, figs.6,12. Holotype: Raynaud, 1978, pl.2, fig.6; and Jan du Chêne et al., 1986a, pl.111, figs.13–14. **NOW** *Endoscrinium*. Originally *Athigmatocysta*, subsequently (and now) *Endoscrinium*, thirdly *Scriniodinium*. Age: late Kimmeridgian–Portlandian.

ATLANTODINIUM Zotto et al., 1987, p.202. Type: Zotto et al., 1987, pl.4, figs.6a–b, as *Atlantodinium jurassicum*.

**jurassicum* Zotto et al., 1987, p.202–203, pl.4, figs.6a–b; text-figs.6a–b. Holotype: Zotto et al., 1987, pl.4, figs.6a–b; and Fensome et al., 1995, figs.1–2 — p.1581. Age: Kimmeridgian.

ATOPODINIUM Drugg, 1978, p.62. Emendations: Masure, 1991, p.64–65; Slimani, 2004, p.182. Taxonomic junior synonyms: *Maghrebinia*, *Bejuia*, and *Burtonia* Beju (illegitimate name) all according to Masure (1991, p.64) and Masure in Fauconnier and Masure (2004, p.88). Type: Drugg, 1978, pl.1, fig.1, as *Atopodinium prostatum*.

"*chleuh*" (Below, 1981a, p.22–23, pl.1, figs.5a–b; pl.12, fig.5; text-figs.13a–b) Masure, 1991, p.65. Emendation: Masure, 1988a, p.365–366, as *Maghrebinia chleuh*. Holotype: Below, 1981a, pl.1, figs.5a–b; text-figs.13a–b; and Masure, 1988a, pl.2, figs.1–8; text-figs.3a–b; Fensome et al., 1991, figs.1–4 — p.619; Fauconnier and Masure, 2004, pl.9, figs.1–3. **NOW** *Montanarocysta*. Originally *Maghrebinia*, subsequently *Atopodinium*, thirdly (and now) *Montanarocysta*. N.I.A. Age: Vraconian–Cenomanian.

"*cretaceum*" Prössl, 1990, p.107–108, pl.5, figs.4–5; pl.6, fig.9 ex Prössl, 1992b, p.113. Holotype: Prössl, 1990, pl.5, figs.4–5; Fauconnier and Masure, 2004, pl.9, fig.10. **Taxonomic senior synonym:** *Atopodinium haromense*, according to Masure in Fauconnier and Masure (2004, p.74). This name was not validly published in Prössl (1990, p.107–108), since that author did not specify the lodgment of the holotype. Age: early Hauterivian–early Barremian.

haromense Thomas and Cox, 1988, p.319–321,323, pl.1, figs.1–6; text-fig.4. Holotype: Thomas and Cox, 1988, pl.1, figs.1–2; text-fig.4; Masure, 1991, pl.1, figs.1–3; text-figs.1a–b; Fauconnier and Masure, 2004, pl.9, fig.4. Taxonomic junior synonyms: *Maghrebinia breviornata*, according to Masure (1991, p.65); and *Atopodinium cretaceum*, according to Masure in Fauconnier and Masure (2004, p.74). Age: late Oxfordian–early Kimmeridgian.

iuvene Prössl, 1990, p.108, pl.17, figs.2,5,8,10 ex Prössl, 1992b, p.113. Holotype: Prössl, 1990, pl.17, figs.2,5; Fauconnier and Masure, 2004, pl.9, fig.11. This name was not validly published in Prössl (1990, p.108), since that author did not specify the lodgment of the holotype. Age: late Turonian.

"*mirabile*" (Below, 1984, p.635–636, pl.6, fig.2) Masure, 1991, p.68. Emendation: Masure, 1988a, p.366–368, as *Maghrebinia mirabilis*. Holotype: Below, 1981a, pl.1, figs.1a–c, as *Maghrebinia perforata*; Masure, 1988a, pl.3, figs.1–11; text-figs.4a–c; Fauconnier and Masure, 2004, pl.10, figs.1–4. **NOW** *Montanarocysta mirabilis*. Originally *Maghrebinia perforata* subsp. *mirabilis*, subsequently *Maghrebinia mirabilis*, thirdly *Atopodinium mirabile*, fourthly (and now) *Montanarocysta mirabilis*. Age: late Albian–early Cenomanian.

perforatum (Clarke and Verdier, 1967, p.36–37, pl.6, figs.1–3; text-fig.15) Masure, 1991, p.68. Emendations: Davey and Verdier, 1971, p.30, as *Pterodinium perforatum*; Below, 1981a, p.23–24 and Masure, 1988a, p.363–364, both as *Maghrebinia perforata*. Holotype: Clarke and Verdier, 1967, pl.6, figs.1–2; Masure, 1988a, pl.1, figs.1–9; text-figs.1a–b; Fensome et al., 1995, figs.1–2 — p.1653; Fauconnier and Masure, 2004, pl.10, figs.5–6. Originally *Dinopterygium*, subsequently *Pterodinium*, thirdly *Pterodinium?*, fourthly *Maghrebinia*, fifthly (and now) *Atopodinium*. Age: early Cenomanian.

polygonale (Beju, 1983, p.107,109,111; text-figs.3A–F,4A–F,5A–D) Masure, 1991, p.68. Emendation: Masure, 1991, p.68,70–71, as *Atopodinium polygonale*. Holotype: Beju, 1983, text-figs.4A–B; Masure, 1991, pl.2, figs.1,4; text-figs.3a–b; Fensome et al., 1995, figs.1–4 — p.1675; Fauconnier and Masure, 2004, pl.10, figs.8–11. Originally *Burtonia* (generic name illegitimate), subsequently *Bejuia*, thirdly (and now) *Atopodinium*. Age: early Bathonian.

**prostatum* Drugg, 1978, p.63, pl.1, figs.1–7; text-figs.1A–D. Emendation: Masure, 1991, p.71–72,74,76. Holotype: Drugg, 1978, pl.1, fig.1; Masure, 1991, pl.3, figs.1–2; Fensome et al., 1995, fig.1 — p.1701; Fauconnier and Masure, 2004, pl.10, fig.12. Age: late Callovian–early Oxfordian.

"**AUSTRALIELLA**" Vozzhennikova, 1967, p.129–130. **Taxonomic senior synonym:** *Chatangiella*, according to Lentin and Williams (1976, p.151–152). Type: Cookson and Eisenack, 1960a, pl.1, fig.10, as *Deflandrea tripartita*.

"**bondarenkoi**" Vozzhennikova, 1967, p.130–131, pl.59, figs.1a–b; pl.60, fig.2. Emendations: Lentin and Vozzhennikova, 1990, p.41 and Lebedeva in Ilyina et al., 1994, p.68–69, both as *Chatangiella bondarenkoi*. Holotype: Vozzhennikova, 1967, pl.59, fig.1b; pl.60, fig.2; Lentin and Vozzhennikova, 1990, pl.4, figs.6–7; text-fig.17. **NOW** *Chatangiella*. Originally *Australiella*, subsequently (and now) *Chatangiella*. Taxonomic junior synonyms: *Australiella* (now *Chatangiella*) *chetiensis* and *Chatangiella obtusa*, both according to Lentin and Vozzhennikova (1990, p.41) — however, Lebedeva in Ilyina et al. (1994, p.67) retained *Australiella* (as and now *Chatangiella*) *chetiensis* and *Chatangiella obtusa* is now considered a taxonomic junior synonym of *Australiella* (as and now *Chatangiella*) *chetiensis*. Age: Santonian.

"**chetiensis**" Vozzhennikova, 1967, p.131, pl.60, figs.1a–b. Emendation: Lebedeva in Ilyina et al., 1994, p.67–68, as *Chatangiella chetiensis*. Holotype: Vozzhennikova, 1967, pl.60, fig.1. **NOW** *Chatangiella*. Originally *Australiella*, subsequently (and now) *Chatangiella*. Taxonomic senior synonym: *Australiella* (now *Chatangiella*) *bondarenkoi*, according to Lentin and Vozzhennikova (1990, p.41) — however, Lebedeva in Ilyina et al. (1994, p.67) retained *Australiella* (as *Chatangiella*) *chetiensis*. Taxonomic junior synonym: *Chatangiella obtusa*, according to Lebedeva in Ilyina et al. (1994, p.67). Age: Santonian.

"**cooksoniae**" (Alberti, 1959b, p.97, pl.9, figs.1–6) Vozzhennikova, 1967, p.132. Holotype: Alberti, 1959b, pl.9, fig.2. **NOW** *Isabelidium*. Originally *Deflandrea*, subsequently *Australiella*, thirdly *Isabelia* (combination illegitimate), fourthly (and now) *Isabelidium*. Taxonomic junior synonyms: *Deflandrea* (as *Isabelidium*) *belfastensis* and *Isabelidium bujakii*, according to Fensome et al. (2009, p.39). Age: Late Cretaceous.

"**granulifera**" (Manum, 1963, p.61, pl.3, figs.5–9) Vozzhennikova, 1967, p.132–133. Holotype: Manum, 1963, pl.3, figs.5–6. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Taxonomic junior synonym: *Cooksoniella* (as and now *Chatangiella*) *vnigrii*, according to Lentin and Vozzhennikova (1990, p.47) — however, Lebedeva in Ilyina et al. (1994, p.70) retained *Cooksoniella* (as and now *Chatangiella*) *vnigrii*. Age: Senonian.

"subsp. **granulifera**". Autonym. Holotype: Manum, 1963, pl.3, figs.5–6. **NOW** *Chatangiella granulifera* subsp. *granulifera*. Originally *Australiella granulifera* subsp. *granulifera*, subsequently (and now) *Chatangiella granulifera* subsp. *granulifera*.

"subsp. **tenuis**" (Davey, 1970, p.340–341, pl.2, fig.1) Lentin and Williams, 1973, p.18. Holotype: Davey, 1970, pl.2, fig.1. **NOW** *Chatangiella granulifera* subsp. *tenuis*. Originally *Deflandrea granulifera* var. *tenuis*, subsequently *Australiella granulifera* subsp. *tenuis*, thirdly (and now) *Chatangiella granulifera* subsp. *tenuis*. Age: Albian.

"**micracantha**" (Cookson and Eisenack, 1960a, p.3, pl.1, fig.9) Lentin and Williams, 1973, p.18. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.9; Cookson and Manum, 1964, pl.76, figs.9–11. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Age: Campanian.

"**spasica**" Grigorovich, 1969b, p.67–68, pl.1, fig.1. Holotype: Grigorovich, 1969b, pl.1, fig.1. **NOW** *Isabelidium*. Originally *Australiella*, subsequently (and now) *Isabelidium*. Age: Late Cretaceous.

"**spectabilis**" (Alberti, 1959b, p.99, pl.9, fig.78) Lentin and Williams, 1973, p.18. Emendation: Lebedeva in Ilyina et al., 1994, p.66, as *Chatangiella spectabilis*. Holotype: Alberti, 1959b, pl.9, fig.78. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Age: late Senonian.

"***tripartita**" (Cookson and Eisenack, 1960a, p.2–3, pl.1, fig.10) Vozzhennikova, 1967, p.134–135. Emendation: Cookson and Manum, 1964, p.521–522, as *Deflandrea tripartita*. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.10; Cookson and Manum, 1964, pl.76, figs.1–2. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Age: Senonian.

"**verrucosa**" (Manum, 1963, p.60–61, pl.3, figs.1–4) Lentin and Williams, 1973, p.18. Holotype: Manum, 1963, pl.3, figs.1–2. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently *Trithyrodinium*, thirdly *Australiella*, fourthly (and now) *Chatangiella*. Taxonomic junior synonym: *Cooksoniella* (now *Chatangiella*) *vnigrii*, according to Yun Hyesu (1981, p.66) — however, Lebedeva in Ilyina et al. (1994, p.70) retained *Cooksoniella* (now *Chatangiella*) *vnigrii*. Age: Middle Cretaceous.

"**victoriensis**" (Cookson and Manum, 1964, p.522, pl.76, figs.3–8) Lentin and Williams, 1973, p.19. Emendation: Lebedeva in Ilyina et al., 1994, p.67, as *Chatangiella victoriensis*. Holotype: Cookson and Manum, 1964, pl.76, figs.3–4; Helby et al., 1987, fig.41A. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Age: Senonian.

AUSTRALISPHAERA Davey, 1978, p.892. Emendations: Duxbury, 1983, p.25; Harding, 1986a, p.100 — however, see Harding (1990b, p.21). Type: Davey, 1978, pl.2, fig.1, as *Australisphaera verrucosa*.

"**cruciata**" Qiao Xiuyun et al., 1992, p.31,35–36, pl.1, figs.13–15. Holotype: Qiao Xiuyun et al., 1992, pl.1, fig.13; Gao Ruiqi et al., 1992b, pl.6, fig.10. **Taxonomic senior synonym:** *Vesperopsis glabra*, according to Mao Shaozhi et al. (1999, p.150). Age: Berriasian–Barremian.

"**digitata**" (Duxbury, 1983, p.35–36, pl.3, fig.15; text-fig.15) Jain and Khowaja-Ateequzzaman, 1984, p.39. Holotype: Duxbury, 1983, pl.3, fig.15; text-fig.15. **NOW** *Vesperopsis*. Originally *Muderongia*?, subsequently *Australisphaera*, thirdly (and now) *Vesperopsis*, fourthly *Vesperopsis*?. Age: late Aptian.

"**dolabella**" Duxbury, 1983, p.25–26, pl.3, fig.11; text-fig.7. Holotype: Duxbury, 1983, pl.3, fig.11; text-fig.7. **NOW** *Vesperopsis*. Originally *Australisphaera*, subsequently (and now) *Vesperopsis*, thirdly *Vesperopsis*?. Age: early Albian.

"**fragilis**" Harding, 1986a, p.100–101, pl.16, figs.6–9; pl.17, fig.9; text-fig.2. Holotype: Harding, 1986a, pl.16, fig.6. **NOW** *Vesperopsis*. Originally *Australisphaera*, subsequently (and now) *Vesperopsis*. Age: late Hauterivian.

"**longicornis**" Batten and Lister, 1988, p.340–341, figs.1b–e.g. Emendation: Harding, 1990b, p.21–22, as *Vesperopsis longicornis*. Holotype: Batten and Lister, 1988, figs.1b–c. **NOW** *Vesperopsis*. Originally *Australisphaera*, subsequently (and now) *Vesperopsis*. Age: Barremian.

"**pannosa**" (Duxbury, 1980, p.129–130, pl.10, figs.3,6; text-figs.12A–B) Duxbury, 1983, p.27. Holotype: Duxbury, 1980, pl.10, fig.3; text-fig.12B. **NOW** *Nyktericysta*?. Originally *Muderongia*, subsequently *Australisphaera*, thirdly (and now) *Nyktericysta*?. Age: middle Barremian.

"**pseudovitrea**" Lister and Batten, 1988b, p.25–27, pl.3, figs.2–3; text-fig.6B, nos.1–4. Holotype: Lister and Batten, 1988b, pl.3, fig.3; text-fig.6B, no.1. **NOW** *Vesperopsis*. Originally *Australisphaera*, subsequently (and now) *Vesperopsis*. Age: latest Barremian–early Aptian.

***verrucosa** Davey, 1978, p.893, pl.2, figs.1–5. Holotype: Davey, 1978, pl.2, fig.1; Fensome et al., 1995, fig.1 — p.1901. Age: Campanian–Maastrichtian.

"**vitrea**" Duxbury, 1983, p.26–27, pl.2, fig.11; pl.3, fig.5; text-fig.8. Holotype: Duxbury, 1983, pl.2, fig.11; text-fig.8. **NOW** *Nyktericysta*?. Originally *Australisphaera*, subsequently (and now) *Nyktericysta*?. Age: early Aptian.

AVELLODINIUM Duxbury, 1977, p.24. Emendation: Backhouse, 1988, p.75. Taxonomic senior synonyms: *Callaiosphaeridium*, according to Below (1981a, p.27) — however, Lentin and Williams (1981, p.23) retained *Avellodinium*; *Dichadogonyaulax*, by implication in Davey (1982b, p.26), who transferred the "type species" of *Dichadogonyaulax*, *Dichadogonyaulax culmula*, to *Avellodinium* — however, Lentin and Williams (1985, p.31) retained *Avellodinium*. Type: Duxbury, 1977, pl.5, figs.1–2, as *Avellodinium falsificum*.

"culmula" (Norris, 1965, p.793–795, figs.1–2,6–9) Davey, 1982b, p.26. Holotype: Norris, 1965, figs.8–9. **NOW** *Dichadogonyaulax*. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly *Avellodinium*. N.I.A. Age: Portlandian.

***falsificum** Duxbury, 1977, p.24–26, pl.5, figs.1–3; text-fig.4. Holotype: Duxbury, 1977, pl.5, figs.1–2; Fensome et al., 1993a, figs.1–2 — p.1171. Originally (and now) *Avellodinium*, subsequently *Callaiosphaeridium*. Lentin and Williams (1981, p.23) retained this species in *Avellodinium*. Taxonomic junior synonym (at specific rank): *Hystrichosphaera furcata* forma *aulosphaeropsis* (subsequently *Spiniferites ramosus?* subsp. *aulosphaeropsis*), according to Sarjeant (1985b, p.156–157). Age: late Berriasian–early Barremian.

flagellatum Davey, 1988, p.34–35, pl.1, figs.1–5. Holotype: Davey, 1988, pl.1, figs.1–2; Fensome et al., 1996, figs.1–2 — p.2127. Age: Valanginian.

?hauteriviense Prössl, 1990, p.99–100, pl.1, figs.3,7,14–15 ex Prössl, 1992b, p.113. Holotype: Prössl, 1990, pl.1, figs.3,7. This name was not validly published in Prössl (1990, p.99–100), since that author did not specify the lodgment of the holotype. Questionable assignment: Prössl (1990, p.99). Age: early–late Hauterivian.

lepidum Backhouse, 1988, p.75, pl.19, figs.3a–b,4–5,6a–b,7; pl.47, fig.1. Holotype: Backhouse, 1988, pl.19, figs.6a–b; Fensome et al., 1996, figs.5–6 — p.2191. Age: late Valanginian–early Aptian.

AXIODINIUM Williams, Damassa, Fensome and Guerstein in Fensome et al., 2009, p.16. Type: Williams and Downie, 1966b, pl.18, fig.1, as *Wetzeliella articulata*.

abortivum (Yu Jingxian, 1989, p.154–155, pl.56, fig.4; pl.57, fig.4) Williams et al., 2015, p.301. Holotype: Yu Jingxian, 1989, pl.56, fig.4. Originally *Wetzeliella*, subsequently (and now) *Axiodinium*. Age: Eocene.

augustum (Harland, 1979c, p.63, pl.2, figs.13–15) Williams et al., 2015, p.301. Holotype: Harland, 1979c, pl.2, fig.13. Originally *Wetzeliella* subgenus *Apectodinium*, subsequently *Apectodinium*, thirdly (and now) *Axiodinium*. Age: latest Paleocene.

degeneratum (Yu Jingxian, 1989, p.152, pl.54, figs.2–3) Williams et al., 2015, p.301. Holotype: Yu Jingxian, 1989, pl.54, fig.2. Originally *Wetzeliella*, subsequently (and now) *Axiodinium*. Age: Paleocene.

lunare (Gocht, 1969, p.13–15, pl.10, figs.1–3; text-fig.6) Williams et al. 2015, p.301. Holotype: Gocht, 1969, pl.10, fig.3. Originally *Wetzeliella*, subsequently (and now) *Axiodinium*. Age: early–?late Eocene.

***prearticulatum** Williams, Damassa, Fensome and Guerstein in Fensome et al., 2009, p.16–17, pl.3, figs.g,r. Holotype: Williams and Downie, 1966b, pl.18, fig.1, as *Wetzeliella articulata*. Age: Ypresian.

sparnacium Iakovleva, 2016, p.4 (on PDF initially published online), pl.1, figs.6,9–11; text-fig.4b (part). Holotype: Iakovleva, 2016, pl.1, figs.10–11. Age: earliest Eocene.

tesselatum (Châteauneuf and Gruas-Cavagnetto, 1978, p.65–66, pl.1, figs.1–2) Williams et al., 2015, p.301. Holotype: Châteauneuf and Gruas-Cavagnetto, 1978, pl.1, figs.1–2. Originally *Apectodinium homomorphum* subsp. *tesselatum*, subsequently *Wilsonidium tesselatum*, thirdly (and now) *Axiodinium tesselatum*. Age: early Eocene.

"BACCHIDINIUM" Davey, 1979b, p.555. **Taxonomic senior synonym:** *Kiokansium*, according to Below (1982c, p.13–15) and Davey (1982a, p.377). Type: Cookson and Eisenack, 1962b, pl.4, figs.11–13, as *Hystrichosphaeridium recurvatum* subsp. *polypes*.

***"polypes"** (Cookson and Eisenack, 1962b, p.491–492, pl.4, figs.11–13) Davey, 1979b, p.555. Emendation: Duxbury, 1983, p.49, as *Kiokansium polypes*. Holotype: Cookson and Eisenack, 1962b, pl.4, figs.11–13; Fensome et al., 1996, figs.1–3 — p.2283. Originally *Hystrichosphaeridium recurvatum* subsp. *polypes*, subsequently *Polysphaeridium?* *polypes* (combination not validly published), thirdly *Cleistosphaeridium polypes*, fourthly

Bacchidinium polypes, fifthly *Impletosphaeridium polypes*, sixthly *Kiokansium polypes*. **Taxonomic senior synonym** (at specific rank): *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, by implication in Duxbury (1983, p.49), who considered *Hystrichosphaeridium recurvatum* subsp. *polypes* (as *Kiokansium polypes*) to be the senior name. Taxonomic junior synonym: *Cleistosphaeridium?* *solidum*, according to Below (1982c, p.16). Age: Albian–Cenomanian.

"subsp. *clavulum*" (Davey, 1969a, p.154–155, pl.6, figs.9–10) Lentin and Williams, 1981, p.24. Holotype: Davey, 1969a, pl.6, fig.9; Fauconnier and Masure, 2004, pl.50, fig.1. **NOW** *Impletosphaeridium?* *clavulum*. Originally *Cleistosphaeridium polypes* var. *clavulum*, subsequently *Cleistosphaeridium polypes* subsp. *clavulum*, thirdly *Impletosphaeridium polypes* subsp. *clavulum*, fourthly *Bacchidinium polypes* subsp. *clavulum*, fifthly *Cleistosphaeridium clavulum*, sixthly *Impletosphaeridium clavulum*, seventhly (and now) *Impletosphaeridium?* *clavulum*. This combination was not validly published in Davey (1979b, p.553), since that author did not fully reference the basionym. Age: Cenomanian.

"subsp. *polypes*". Autonym. Holotype: Cookson and Eisenack, 1962b, pl.4, figs.11–13; Fensome et al., 1996, figs.1–3 — p.2283. **Now redundant**. Originally *Cleistosphaeridium polypes* subsp. *polypes*, subsequently *Bacchidinium polypes* subsp. *polypes*, thirdly *Impletosphaeridium polypes* subsp. *polypes*, fourthly *Kiokansium polypes* subsp. *polypes*.

"*sarmentum*" Davey, 1979b, p.555, pl.1, figs.8–12. Holotype: Davey, 1979b, pl.1, figs.8–9,12. **NOW** *Kleithriasphaeridium?*. Originally *Bacchidinium*, subsequently *Kiokansium*, thirdly (and now) *Kleithriasphaeridium?*. N.I.A. Age: late Aptian–middle Albian.

"**BAILEYELLA**" Özdikmen, 2009, p.234. **Name illegitimate** — **nomenclatural senior synonym**: *Durotrigia*. Özdikmen (2009) considered *Durotrigia* Bailey to be illegitimate because it is a junior homonym of *Durotrigia* Hoffstetter, 1967; however, *Durotrigia* Hoffstetter is an animal and under the I.C.N. it does not pre-empt *Durotrigia* Bailey. Type: Bailey, 1987, pl.2, figs.1,4,9, as *Durotrigia daveyi*.

"**daveyi*" (Bailey, 1987, p.89,91,94, pl.1, figs.1–5; pl.2, figs.1–11; text-figs.2A–D) Özdikmen, 2009, p.234. Holotype: Bailey, 1987, pl.2, figs.1,4,9; Fensome et al., 1993a, figs.1–2 — p.1095. **NOW** *Durotrigia*. Originally (and now) *Durotrigia*, subsequently *Baileyella* (generic name illegitimate). Although Özdikmen (2009) did not fully reference the basionym when proposing the transfer of this species to *Baileyella*, he did so under the aegis of the I.C.Z.N., so the combination can be considered validly published. Age: early Bajocian.

BALCATTIA Cookson and Eisenack, 1974, p.78. Emendation: Riding, Helby and Stevens in Riding and Helby, 2001g, p.184. Type: Cookson and Eisenack, 1974, pl.24, fig.8, as *Balcattia cirrifera*.

cheleusis Riding, Helby and Stevens in Riding and Helby, 2001g, p.184,186, figs.3A–P. Holotype: Riding and Helby, 2001g, figs.3E–F. Taxonomic junior synonyms: *Emmetrocyta cheleusis* and *Rigaudella separata* (both names not validly published), both according to Riding and Helby (2001g, p.184). Age: Tithonian.

cirribarbata Cookson and Eisenack, 1982, p.48, pl.8, fig.15. Holotype: Cookson and Eisenack, 1982, pl.8, fig.15. Age: late Albian–Cenomanian.

**cirrifera* Cookson and Eisenack, 1974, p.78, pl.24, fig.8; pl.28, fig.16. Holotype: Cookson and Eisenack, 1974, pl.24, fig.8. Age: Albian–Cenomanian.

"**BALMULA**" Bint, 1986, p.158. **Taxonomic senior synonym**: *Nyktericysta*, according to Fensome et al. (2009, p.46). Type: Bint, 1986, pl.6, figs.10,14–16, as *Balmula tripenta*.

"*granorugosa*" Qiao Xiuyun et al., 1992, p.31,36, pl.2, fig.10. Holotype: Qiao Xiuyun et al., 1992, pl.2, fig.10; Gao Ruiqi et al., 1992b, pl.2, fig.5; Gao Ruiqi et al., 1992c, pl.1, fig.11. **NOW** *Nyktericysta*. Originally *Balmula*, subsequently (and now) *Nyktericysta*. Age: Berriasian–Barremian.

"*granulata*" Gao Ruiqi et al., 1992a, p.17–18,23–24, pl.1, fig.19. Holotype: Gao Ruiqi et al., 1992a, pl.1, fig.19; Gao Ruiqi et al., 1992b, pl.8, fig.9. **NOW** *Nyktericysta*. Originally *Balmula*, subsequently (and now) *Nyktericysta*. Age: Campanian.

"*pentaradiata*" (Singh, 1983, p.127, pl.43, fig.5) Bint, 1986, p.158. Holotype: Singh, 1983, pl.43, fig.5. **NOW** *Nyktericysta*. Originally *Muderongia*, subsequently *Balmula*, thirdly (and now) *Nyktericysta*. Age: early Cenomanian.

"*spinosa*" Gao Ruiqi et al., 1992a, p.18,24, pl.1, figs.17–18. Emendation: Mao Shaozhi et al., 1999, p.157, as *Quantouendinium spinosum*. Holotype: Gao Ruiqi et al., 1992a, pl.1, fig.17; Gao Ruiqi et al., 1992b, pl.8, fig.1; Mao Shaozhi et al., 1999, pl.4, fig.2. **NOW** *Nyktericysta*. Originally *Balmula*, subsequently *Quantouendinium*, thirdly (and now) *Nyktericysta*. He Chengquan et al. (2009, p.294) retained this species in *Balmula*. Age: Campanian.

"**tripenta*" Bint, 1986, p.158,160, pl.6, figs.9–17; pl.7, fig.8; text-figs.6A–B. Holotype: Bint, 1986, pl.6, figs.10,14–16; text-fig.6B; Fensome et al., 1995, figs.1,4,7 — p.1851. **NOW** *Nyktericysta*. Originally *Balmula*, subsequently (and now) *Nyktericysta*. Age: late Albian.

BALTEOCYSTA Stover and Evitt, 1978, p.226. Nomenclatural junior synonym: *Aiora* Davey (name illegitimate), which has the same type. Type: Cookson and Eisenack, 1960a, pl.2, fig.17, as *Aiora fenestrata*.

**perforata* (Davey, 1978, p.892) Wilson and Clowes, 1980, p.19. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.17 (as *Aiora fenestrata*); Fensome et al., 1996, fig.1 — p.2267; designated by Davey (1978, p.892). Originally *Aiora*, subsequently (and now) *Balteocysta*. Nomenclatural junior synonym: *Balteocysta rotula*, which has the same type. Lentin and Williams (1981, p.7) assumed that Davey named this species for the perforations it possesses: since it was perforate, he used the Latin "perforare", which is equivalent to the English infinitive "to perforate"; the Latin for the past participle is "perforatus". Age: Turonian.

"*rotula*" Stover and Evitt, 1978, p.226. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.17, as *Aiora fenestrata*; Fensome et al., 1996, fig.1 — p.2267, as *Balteocysta perforata*. **Name illegitimate** — **nomenclatural senior synonym**: *Balteocysta perforata*, which has the same type. N.I.A. Age: Turonian.

BARBATACYSTA Courtinat, 1989, p.185. Type: Erkmen and Sarjeant, 1980, text-fig.2, as *Sentusidinium creberbarbatum*.

baculata (Dodekova, 1975, p.28–29, pl.6, figs.1–3; text-fig.7) Courtinat, 1989, p.185. Holotype: Dodekova, 1975, pl.6, figs.1–3. Originally *Tenua* Eisenack, subsequently *Sentusidinium*, thirdly (and now) *Barbatacysta*. Age: late Bathonian.

brevispinosa (Courtinat in Courtinat and Gaillard, 1980, p.60, pl.9, figs.4,7,11; text-fig.10e) Courtinat, 1989, p.185. Holotype: Courtinat and Gaillard, 1980, p.60, pl.9, fig.7; Fauconnier and Masure, 2004, pl.11, fig.1. Originally *Sentusidinium*, subsequently (and now) *Barbatacysta*. Taxonomic junior synonym: *Barbatacysta lemoignei*, according to Courtinat in Fauconnier and Masure (2004, p.83). Age: late Oxfordian.

capitata (Cookson and Eisenack, 1960b, p.252, pl.39, fig.9) Schrank, 2005, p.548. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.9; Fauconnier and Masure, 2004, pl.66, fig.1. Originally *Hystrichosphaeridium*, subsequently *Prolixosphaeridium*, thirdly *Tenua* Eisenack, fourthly *Batiacasphaera*, fifthly (and now) *Barbatacysta*. Age: Oxfordian–Kimmeridgian.

**creberbarbata* (Erkmen and Sarjeant, 1980, p.52–54, text-fig.2.) Courtinat, 1989, p.186. Holotype: Erkmen and Sarjeant, 1980, text-fig.2. Originally *Sentusidinium*, subsequently (and now) *Barbatacysta*. Taxonomic junior synonym: *Sentusidinium parvum*, according to Courtinat in Fauconnier and Masure (2004, p.83–84). Age: Oxfordian–Kimmeridgian.

"lemoinei" Courtinat, 1989, p.186–187, pl.18, figs.4–6,8; pl.21, fig.17; text-fig.80B. Holotype: Courtinat, 1989, pl.21, fig.17; Fauconnier and Masure, 2004, pl.11, fig.5. **Taxonomic senior synonym:** *Sentusidinium* (now *Barbatocysta*) *brevispinosum*, according to Courtinat in Fauconnier and Masure (2004, p.83). Age: Oxfordian.

"parva" (Kunz, 1990, p.33–34, pl.8, figs.14a–c,15a–c,16a–b; text-fig.11) Courtinat in Fauconnier and Masure, 2004, p.84. **Combination not validly published:** not accepted by its author. Holotype: Kunz, 1990, pl.8, figs.14a–c; text-fig.11. Originally *Sentusidinium*, subsequently *Barbatocysta* (name not validly published). **Taxonomic senior synonym:** *Sentusidinium* (now *Barbatocysta*) *creberbarbatum*, according to Courtinat in Fauconnier and Masure (2004, p.83–84). Courtinat in Fauconnier and Masure (2004) proposed this transfer while simultaneously and clearly proposing the species to be a junior synonym: he thus clearly did not accept *Barbatocysta parva* as a correct name. Age: late Oxfordian.

pelionensis (Fensome, 1979, p.13–15, pl.1, figs.5–9; text-fig.5B) Courtinat, 1989, p.187. Holotype: Fensome, 1979, pl.1, figs.5,7; text-fig.5B; Fauconnier and Masure, 2004, pl.11, fig.4. Originally *Sentusidinium*, subsequently (and now) *Barbatocysta*. Age: Bajocian–Bathonian.

pilosa (Ehrenberg, 1854, pl.37, section 8, fig.4) Courtinat, 1989, p.187. Emendation: Erkmen and Sarjeant, 1980, p.51, as *Sentusidinium pilosum*. Holotype: Ehrenberg, 1854, pl.37, section 8, fig.4. Originally *Xanthidium pilosum* (Appendix A), subsequently *Hystrichosphaera pilosa* (combination not validly published), thirdly *Hystrichosphaeridium pilosum*, fourthly *Baltisphaeridium pilosum* (Appendix A), fifthly *Ovum hispidum* subsp. *pilosum* (combination not validly published; Appendix A), sixthly *Cleistosphaeridium pilosum* (combination not validly published), seventhly *Tenua pilosa*, eighthly *Sentusidinium pilosum*, ninthly *Batiacasphaera pilosa*, tenthly (and now) *Barbatocysta pilosa*. This species may not have been validly published in Ehrenberg (1854) as no description has subsequently been referenced (or found by the present authors in the Ehrenberg's huge tome). In transferring this species to *Hystrichosphaeridium*, Deflandre (1937b, p.79) noted that Ehrenberg's figure appeared insufficient for meaningful identification. The validity/authorship of this name may need to be reconsidered as it appears that Ehrenberg (1854) did not provide a description. Age: Oxfordian.

verrucosa (Sarjeant, 1968, p.232, pl.1, fig.17; pl.2, figs.3,6) Courtinat, 1989, p.187. Holotype: Sarjeant, 1968, pl.1, fig.17; pl.2, figs.3,6; Fauconnier and Masure, 2004, pl.11, figs.2–3. Originally *Tenua* Eisenack, subsequently *Batiacasphaera*, thirdly *Sentusidinium*, fourthly (and now) *Barbatocysta*. Age: late Callovian.

BARSSIDINIUM Lentin et al., 1994, p.575,577. Emendation: De Schepper et al., 2004, p.634. Type: Lentin et al., 1994, pl.2, figs.2,5, as *Barssidinium wrennii*.

evangelinae Lentin et al., 1994, p.578–579, pl.2, figs.3,7–8; pl.3, figs.1–6; text-fig.3H. Holotype: Lentin et al., 1994, pl.2, fig.8. Age: Tortonian–Pleistocene.

graminosum Lentin et al., 1994, p.579, pl.2, figs.9,11,12; text-fig.3C. Holotype: Lentin et al., 1994, pl.2, fig.11. Age: latest middle-late Miocene.

olymposum Warny and Wrenn, 1997, p.299,301, pl.9, figs.1–6. Holotype: Warny and Wrenn, 1997, pl.9, figs.3–5. Age: late Miocene.

pliocenicum (Head, 1993, p.40–41, fig.22, nos.5–14; fig.23) Head, 1994a, p.296. Emendation: De Schepper et al., 2004, p.634,636, as *Barssidinium pliocenicum*. Holotype: Head, 1993, fig.22, no.11; De Schepper et al., 2004, fig.10.7–9. Originally *Sumatradinium*, subsequently (and now) *Barssidinium*. Taxonomic junior synonym: *Barssidinium wrennii*, according to De Schepper et al. (2004, p.634). Age: latest Pliocene.

taxandrianum Louwye, 1999, p.119–121, pl.4, figs.1–6; pl.5, figs.1–2. Holotype: Louwye, 1999, pl.4, figs.4–6. Age: late Miocene.

"**wrenni*" Lentin et al., 1994, p.578, pl.1, fig.8; pl.2, figs.2,4–6,10; text-fig.3G. Holotype: Lentin et al., 1994, pl.2, figs.2,5. **Taxonomic senior synonym:** *Barssidinium pliocenicum*, according to De Schepper et al. (2004, p.634). Age: Serravallian?–Pliocene.

"**BASERUS**" Özdikmen, 2009, p.237. **Name illegitimate — nomenclatural senior synonym:** *Suessia*, which has the same type. In proposing the name *Baserus*, Özdikmen (2009, p.237) considered *Suessia* Morbey to be illegitimate because it is a junior homonym of *Suessia* Deslongchamps 1855; however, *Suessia* Deslongchamps is an animal and under the I.C.N. it does not pre-empt *Suessia* Morbey. Type: Morbey, 1975, pl.14, fig.5; pl.17, fig.4; text-figs.12a–c, as *Suessia swabiana*.

"**swabiana*" (Morbey, 1975, p.39–40, pl.14, figs.5–11; pl.17, figs.4–9; text-figs.12a–c,13a–c,14a–b,15) Özdikmen, 2009, p.237. Emendation: Below, 1987a, p.94–96 (as *Suessia swabiana*). **NOW** *Suessia*. Originally (and now) *Suessia*, subsequently *Baserus* (generic name illegitimate). Holotype: Morbey, 1975, pl.14, fig.5; pl.17, fig.4; text-figs.12a–c; Fensome et al., 1995, figs.1,7–9 — p.1819. Below (1987a, p.94) considered *Rhombodella* (now *Heibergella*) *kendelbachia* to be a questionable junior synonym of this species. Age: Rhaetian.

BATIACASPHAERA Drugg, 1970b, p.813. Emendations: Morgan, 1975, p.161; Dörhöfer and Davies, 1980, p.40. Taxonomic junior synonyms: *Sentusidinium*, according to Dörhöfer and Davies (1980, p.40) — however, Lentin and Williams (1981, p.253) retained *Sentusidinium*; *Pseudobohaidina*, according to He Chengquan et al. (2009, p.326). Type: Drugg, 1970b, figs.6A–B, as *Batiacasphaera compta*.

agglutinata (McIntyre and Brideaux, 1980, p.25, pl.12, figs.5–12) Jan du Chêne et al., 1985a, p.15. Holotype: McIntyre and Brideaux, 1980, pl.12, figs.7–9. Originally *Kallosphaeridium?*, subsequently (and now) *Batiacasphaera*. Age: early-middle Valanginian.

angularis Stevens and Helby, 1987, p.165–166, figs.2A–I,3A–B. Holotype: Stevens and Helby, 1987, figs.2A–B; Fensome et al., 1996, figs.1–2 — p.2027. Age: early Berriasian.

"**aptiensis**" (Burger, 1980a, p.76, pl.23, figs.1,5; pl.24, fig.1) Kumar, 1986a, p.32. Holotype: Burger, 1980a, pl.23, fig.1; Fauconnier and Masure, 2004, pl.63, figs.11–12. **NOW** *Pilosidinium*. Originally *Tenua* Eisenack, subsequently *Sentusidinium*, thirdly *Batiacasphaera*, fourthly (and now) *Pilosidinium*. Taxonomic junior synonym: *Tenua* (as *Sentusidinium*) *microrobusta*, according to Backhouse (1988, p.107). Age: Aptian.

asperata Backhouse, 1987, p.215, figs.10A–C,14E. Holotype: Backhouse, 1987, figs.10A–B; Fensome et al., 1996, figs.1–2 — p.2045. Age: Valanginian–early Hauterivian.

baculata Drugg, 1970b, p.814, fig.6F. Holotype: Drugg, 1970b, fig.6F. Age: late Eocene.

?**bellula** (Jiabo, 1978, p.51, pl.23, figs.14–16) Jan du Chêne et al., 1985a, p.15. Holotype: Jiabo, 1978, pl.23, fig.15. Originally *Tenua* Eisenack, subsequently *Kallosphaeridium?*, thirdly *Batiacasphaera*, fourthly (and now) *Batiacasphaera?*, fifthly *Sentusidinium*. Questionable assignment: Marheinecke (1992, p.76). In transferring this species to *Sentusidinium*, Xu Jinli et al. (1997, p.46) did not discuss the full history of this taxon; we therefore prefer to retain it questionably in *Batiacasphaera*. Age: Early Tertiary.

bergenensis Schreck and Matthiessen, 2014, p.102–103, pl.1, figs.1–16. Holotype: Schreck and Matthiessen, 2014, pl.1, figs.1–9. Age: latest Langhian–early Tortonian.

"**biornata**" (Jiabo, 1978, p.52, pl.22, figs.21–29; pl.23, figs.1–4) Jan du Chêne et al., 1985a, p.15. Holotype: Jiabo, 1978, pl.22, fig.24. **NOW** *Sentusidinium*. Originally *Tenua biornata*, subsequently *Kallosphaeridium biornatum* (combination not validly published), thirdly *Kallosphaeridium biparatum*, fourthly *Batiacasphaera biornata*, fifthly (and now) *Sentusidinium biornatum*. Lentin and Williams (1993, p.53) retained this species in *Batiacasphaera*, but He Chengquan et al. (2009, p.249) retained it in *Sentusidinium*. Age: Early Tertiary.

"subsp. *biornata*". Autonym. Holotype: Jiabo, 1978, pl.22, fig.24. **NOW** *Sentusidinium biornatum* subsp. *biornatum*. Originally *Tenua biornata* subsp. *biornata*, subsequently *Kallosphaeridium biornatum* subsp. *biornatum* (combination not validly published), thirdly *Kallosphaeridium biparatum* subsp. *biparatum*, fourthly *Batiacasphaera biornata* subsp. *biornata*, fifthly (and now) *Sentusidinium biornatum* subsp. *biornatum*.

"subsp. *conspicula*" (Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.84–85, pl.9, figs.10–11) Fensome and Williams, 2004, p.74. Holotype: Liu Zhili et al., 1992, pl.9, fig.11. **NOW** *Batiacasphaera conspicula*. Originally *Sentusidinium biornatum* subsp. *conspiculum*, subsequently *Batiacasphaera biornata* subsp. *conspicula*, thirdly (and now) *Batiacasphaera conspicula*. Age: Early Tertiary.

"subsp. *crassa*" (Jiabo, 1978, p.52, pl.23, figs.1–4) Lentin and Williams, 1989, p.34. Holotype: Jiabo, 1978, pl.23, fig.3. **NOW** *Sentusidinium biornatum* subsp. *crassum*. Originally *Tenua biornata* subsp. *crassa*, subsequently *Kallosphaeridium biornatum* subsp. *crassum* (combination not validly published), thirdly *Kallosphaeridium biparatum* subsp. *crassum*, fourthly *Batiacasphaera biornata* subsp. *crassa*, fifthly (and now) *Sentusidinium biornatum* subsp. *crassum*. Age: Early Tertiary.

brachyspinosa (Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.85, pl.18, figs.12–17) He Chengquan et al., 2009, p.327. Holotype: Liu Zhili et al., 1992, pl.18, fig.16. Originally *Sentusidinium*, subsequently (and now) *Batiacasphaera*. Age: Early Tertiary.

"*capitata*" (Cookson and Eisenack, 1960b, p.252, pl.39, fig.9) Dörhöfer and Davies, 1980, p.40. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.9; Fauconnier and Masure, 2004, pl.66, fig.1. **NOW** *Barbatacysta*. Originally *Hystrichosphaeridium*, subsequently *Prolixosphaeridium*, thirdly *Tenua* Eisenack, fourthly *Batiacasphaera*, fifthly (and now) *Barbatacysta*. Age: Oxfordian–Kimmeridgian.

cassiculus Wilson, 1988, p.14; pl.2, figs.5–6. Holotype: Wilson, 1988, pl.2, fig.5; Fensome et al., 1996, fig.1 — p.2083. N.I.A. Age: middle Eocene.

"?*cephalum*" (Kar, 1979, p.34, pl.4, figs.66a–b,67) Lentin and Williams, 1981, p.25. Holotype: Kar, 1979, pl.4, figs.66a–b. Originally *Polysphaeridium*, subsequently *Sumatradinium*, thirdly *Batiacasphaera*?. Lentin and Williams (1985, p.33) questionably retained this species in *Batiacasphaera*. Questionable assignment: Lentin and Williams (1981, p.25). **Taxonomic senior synonym:** *Operculodinium placitum*, according to Jain and Garg (1991, p.81). N.I.A. Age: Oligocene.

"*circularis*" (Cookson and Eisenack, 1971, p.219, pl.8, fig.6) Dörhöfer and Davies, 1980, p.40. Holotype: Cookson and Eisenack, 1971, pl.8, fig.6. **NOW** *Kallosphaeridium*?. Originally *Canningia*, subsequently *Canningia*?, thirdly *Batiacasphaera*, fourthly (and now) *Kallosphaeridium*?. Age: Albian–Cenomanian.

**compta* Drugg, 1970b, p.813–814, figs.6A–E,7A–B. Holotype: Drugg, 1970b, figs.6A–B. Age: late Eocene.

conspicula (Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.84–85, pl.9, figs.10–11) He Chengquan et al., 2009, p.328. Holotype: Liu Zhili et al., 1992, pl.9, fig.11. Originally *Sentusidinium biornatum* subsp. *conspiculum*, subsequently *Batiacasphaera biornata* subsp. *conspicula*, thirdly (and now) *Batiacasphaera conspicula*. Age: Early Tertiary.

consolida Pan Zhaoren in Xu Jinli et al., 1997, p.72, pl.37, fig.12; pl.38, figs.11,16 ex He Chengquan et al., 2009, p.328,648. Holotype: Xu Jinli et al., 1997, pl.37, fig.12. Originally *Pyxidinospis* (name not validly published), subsequently (and now) *Batiacasphaera*. The name *Pyxidinospis consolida* was not validly published in Xu Jinli et al. (1997), since no English or Latin description was provided; He Chengquan et al. (2009, p.648) validated the name by publishing an English diagnosis on proposing the transfer to *Batiacasphaera*. Age: Oligocene.

?*cooperi* Hannah et al., 1998, p.534–535, figs.4j–k. Holotype: Hannah et al., 1998, figs.4j–k (not figs.5a–b, as indicated in Hannah et al., 1998, p.534). Questionable assignment: Clowes et al., 2016, p.80. Clowes et al. (2016, p.80) implied that this species might be a taxonomic synonym of *Brigantedinium pynei*. Age: Miocene.

"crassicingulata" (Burger, 1980b, p.268, figs.4C,D1–2) Kumar, 1986a, p.32. Holotype: Burger, 1980b, fig.4D1–2; Fensome et al., 1993a, figs.2–3 — p.1081. **NOW** *Levisphaera*. Originally *Canningia*, subsequently *Batiacasphaera*, thirdly (and now) *Levisphaera*. Helby (1987, p.324–325) also proposed this combination. Age: Berriasian–Valanginian.

curiosa (Bujak, 1984, p.188, pl.2, figs.17–20) Jan du Chêne et al., 1985a, p.15. Holotype: Bujak, 1984, pl.2, fig.19. Originally *Kallosphaeridium*, subsequently (and now) *Batiacasphaera*. Age: middle-late Eocene.

deheinzelinii Louwye, 1999, p.117, pl.2, figs.10–13; pl.3, figs.1–7. Holotype: Louwye, 1999, pl.2, figs.10–12. Age: late Miocene.

"dictydia" (Sarjeant, 1972, p.41, pl.3, fig.3; pl.6, fig.6) Davey, 1979d, p.217. Holotype: Sarjeant, 1972, pl.6, fig.6. **NOW** *Valensiella*. Originally *Chytroeisphaeridia*, subsequently *Batiacasphaera*, thirdly *Escharisphaeridia*, fourthly *Cassiculosphaeridia*, fifthly (and now) *Valensiella*. Age: Bathonian–Callovian.

dictyophora Gao Ruiqi et al., 1992b, p.40–41,61, pl.11, fig.4. Holotype: Gao Ruiqi et al., 1992b, pl.11, fig.4. Age: Late Cretaceous.

"echinata" (Gitmez and Sarjeant, 1972, p.190, pl.1, figs.1,9) Dörhöfer and Davies, 1980, p.40. Holotype: Gitmez and Sarjeant, 1972, pl.1, fig.1; Fauconnier and Masure, 2004, pl.63, fig.14. **NOW** *Pilosidinium*. Originally *Tenua* Eisenack, subsequently *Sentusidinium*, thirdly *Batiacasphaera*, fourthly (and now) *Pilosidinium*. Age: early–late Kimmeridgian.

edwardsiae Louwye et al., 2008, p.134,136, pl.1, figs.1–9. Holotype: Louwye et al., 2008, pl.1, figs.1–7. Age: middle Miocene.

euteiches (Davey, 1969a, p.141, pl.3, figs.8–9) Davey, 1979d, p.217. Holotype: Davey, 1969a, pl.3, fig.8. Originally *Chytroeisphaeridia*, subsequently (and now) *Batiacasphaera*. Age: Cenomanian.

explanata (Bujak in Bujak et al., 1980, p.44, pl.13, figs.13–14) Islam, 1983a, p.235. Holotype: Bujak et al., 1980, pl.13, figs.13–14. Originally *Chytroeisphaeridia*, subsequently (and now) *Batiacasphaera*. Matsuoka (1984a, p.376) also proposed this combination. Age: middle Eocene (see Aubry, 1986).

extravermiculata Shaw Chenglong, 1999b, p.183–185, figs.87–95. Holotype: Shaw Chenglong, 1999b, figs.87–89. Age: Eocene.

floralis He Chengquan et al., 2005a, p.67–68,247–248; pl.16, figs.8–12. Holotype: He Chengquan et al., 2005a, pl.16, fig.9. Age: Middle to Late Jurassic.

gemmata Head et al., 1989c, p.488, pl.9, figs.1–4. Holotype: Head et al., 1989c, pl.9, figs.1–3. Age: early Miocene.

grandis Roncaglia et al., 1999, p.299,301, fig.18, nos.1–6. Holotype: Roncaglia et al., 1999, fig.18, no.1. Age: late Campanian–early Maastrichtian.

granofoveolata Pan Zhaoren in Xu Jinli et al., 1997, p.43, pl.39, fig.1 ex He Chengquan et al., 2009, p.649. Holotype: Xu Jinli et al., 1997, pl.39, fig.1. This name was not validly published in Xu Jinli et al. (1997), since no English or Latin description was provided; He Chengquan et al. (2009, p.649) validated it by publishing a diagnosis in English. Age: Oligocene.

granospina He Chengquan, 1991, p.53, pl.6, figs.22–23. Holotype: He Chengquan, 1991, pl.6, fig.23. Age: Paleocene.

granulata Shaw Chenglong, 1999b, p.186, figs.78–81. Holotype: Shaw Chenglong, 1999b, figs.78–79. Age: Eocene.

granulosa (Cookson and Eisenack, 1974, p.79, pl.28, fig.10) Jansonius, 1989, p.67. Holotype: Cookson and Eisenack, 1974, pl.28, fig.10. Originally *Palaeostomocystis* (Appendix A), subsequently *Fromea* (Appendix A), thirdly (and now) *Batiacasphaera*. Junior homonym: *Batiacasphaera granulosa* He Chengquan, 1991. Age: Albian–Cenomanian.

"**granulosa**" He Chengquan, 1991, p.53, pl.6, fig.7. Holotype: He Chengquan, 1991, pl.6, fig.7. **Name illegitimate** — **senior homonym**: *Batiacasphaera granulosa* (Cookson and Eisenack, 1974) Jansonius, 1989. **Substitute name**: *Batiacasphaera xinjiangensis*. Originally *Batiacasphaera granulosa* (name illegitimate), subsequently (and now) *Batiacasphaera xinjiangensis*. Age: Paleocene.

henanensis He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989, p.38, pl.7, fig.10. Holotype: He Chengquan et al., 1989, pl.7, fig.10. Taxonomic junior synonym: *Batiacasphaera vermiculata* (name not validly published), according to He Chengquan et al. (2009, p.330). Age: Early Tertiary.

hirsuta Stover, 1977, p.72–73, pl.1, figs.1–3. Holotype: Stover, 1977, pl.1, figs.1–2. Age: middle Oligocene–early Miocene.

hystricosa Mao Shaozhi and Norris, 1988, p.40, pl.8, figs.17–20. Holotype: Mao Shaozhi and Norris, 1988, pl.8, fig.18. The epithet was spelled "*hystricosa*" in the protologue, but the authors state that it is derived from the classical word meaning "thorny" — i.e. "*hystricosus*". Age: late Eocene.

imperfecta Stover and Helby, 1987d, p.261–262, figs.2A–O. Holotype: Stover and Helby, 1987d, figs.2A–B; Fensome et al., 1996, figs.1–2 — p.2155. Age: Barremian–early Aptian.

"**jiaboi**" Lentin and Williams, 1989, p.35. Name not validly published: incorrect citation for the substitute name for *Batiacasphaera minor* (Jiabo). **NOW** *Sentusidinium minus*. Originally *Tenua hystrix* subsp. *minor*, subsequently *Kallosphaeridium?* *minus*, thirdly *Batiacasphaera minor* (combination illegitimate), fourthly *Batiacasphaera sinensis*, fifthly *Batiacasphaera jiaboi* (name not validly published), sixthly (and now) *Sentusidinium minus*. Age: Early Tertiary.

kekerengensis Schiøler and Wilson, 1998, p.323–324, pl.7, figs.1–8. Holotype: Schiøler and Wilson, 1998, pl.7, fig.2. Age: late Coniacian–early Campanian.

?**kutharensis** (Khanna and Singh, 1981b, p.389–390, fig.1, nos.3,5; text-fig.1) Lentin and Williams, 1993, p.55. Holotype: Khanna and Singh, 1981b, fig.1, no.3. Originally *Tenua* Eisenack, subsequently (and now) *Batiacasphaera?*. Questionable assignment: Lentin and Williams (1993, p.55). This was not validly published in Khanna (1979, p.216) and Singh et al. (1979, p.35–36), since in neither publication was a description provided. Age: late Paleocene.

laevigata (Smelror, 1988b, p.152–153, figs.10G–H) Feist-Burkhardt and Monteil, 1997, p.40. Holotype: Smelror, 1988b, fig.10G. Originally *Escharisphaeridia*, subsequently (and now) *Batiacasphaera*. Taxonomic senior synonym: *Escharisphaeridia psilata*, according to Poulsen (1996, p.80) — however, Feist-Burkhardt and Monteil (1997, p.40) retained *Batiacasphaera laevigata*. Taxonomic junior synonym: *Escharisphaeridia nuda*, according to Prauss in Lentin and Williams (1993, p.213). Age: late Bathonian–early Oxfordian.

macbethiae Mantle, 2009b, p.100–101, pl.8; figs.1,3–5. Holotype: Mantle, 2009b, pl.8, fig.1. Age: Bathonian–Callovian.

macrogranulata Morgan, 1975, p.162, pl.2, figs.3a–d. Holotype: Morgan, 1975, pl.2, figs.3a–d. Taxonomic junior synonym: *Parabohaidina granulata*, according to He Chengquan et al. (2009, p.331). Age: Neocomian.

macropyla He Chengquan et al., 2009, p.331–332,644, pl.56, fig.6. Holotype: He Chengquan et al., 2009, pl.56, fig.6. Age: Cenomanian.

mica Harding, 1990b, p.48, pl.25, figs.10–19 ex Harding in Williams et al., 1998, p.67. Holotype: Harding, 1990b, pl.25, fig.10. This name was not validly published in Harding (1990b) since the lodgement of the holotype was not specified (I.C.N. Article 40.7). N.I.A. Age: early Barremian.

micropapillata Stover, 1977, p.73, pl.1, figs.7–8. Holotype: Stover, 1977, pl.1, fig.7. Head in Head and Wrenn (1992, p.3) and Schreck and Matthiessen (2013, p.295) considered this species to be the possible taxonomic senior synonym of *Tectatodinium* (now *Batiacasphaera*) *minutum*. Age: middle Oligocene–early Miocene.

microreticulata Shaw Chenglong, 1999b, p.180–182, figs.66–69,82–83. Holotype: Shaw Chenglong, 1999b, figs.66–67. Age: Eocene.

var. *microreticulata*. Autonym. Holotype: Shaw Chenglong, 1999b, figs.66–67.

var. *minima* Shaw Chenglong, 1999b, p.182, figs.82–83. Holotype: Shaw Chenglong, 1999b, figs.82–83. Age: Eocene.

"*minor*" (Cookson and Hughes, 1964, p.43, pl.8, figs.1–3,5) Dörhöfer and Davies, 1980, p.40. Holotype: Cookson and Hughes, 1964, pl.8, fig.1. **NOW** *Kallosphaeridium?* *helbyi*. Originally *Canningia minor*, subsequently *Canningia?* *minor*, thirdly *Batiacasphaera minor*, fourthly *Chytroeisphaeridia minor*, fifthly *Kallosphaeridium?* *minus* (combination illegitimate), sixthly (and now) *Kallosphaeridium?* *helbyi*. Age: late Albian–early Cenomanian.

"*minor*" (Jiabo, 1978, p.52–53, pl.23, figs.5–7) Jan du Chêne et al., 1985a, p.15. Holotype: Jiabo, 1978, pl.23, fig.5. **Combination illegitimate** — **senior homonym:** *Batiacasphaera minor* (Cookson and Hughes, 1964) Dörhöfer and Davies, 1980. Substitute name: *Batiacasphaera sinensis*. **NOW** *Sentusidinium minus*. Originally *Tenua hystrix* subsp. *minor*, subsequently *Kallosphaeridium?* *minus*, thirdly *Batiacasphaera minor* (combination illegitimate), fourthly *Batiacasphaera sinensis*, fifthly *Batiacasphaera jiaboi* (name not validly published), sixthly (and now) *Sentusidinium minus*. Age: Early Tertiary.

minuta (Matsuoka, 1983b, p.127, pl.5, fig.6; pl.6, fig.7) Matsuoka and Head, 1992, p.167. Emendation: Matsuoka and Head, 1992, p.167, as *Batiacasphaera minuta*. Holotype: Matsuoka, 1983b, pl.6, fig.7; Matsuoka and Head, 1992, pl.1, figs.1–11; text-figs.1A–C. Originally *Tectatodinium*, subsequently (and now) *Batiacasphaera*. Head in Head and Wrenn (1992, p.3) and Schreck and Matthiessen (2013, p.295) considered this species to be a possible taxonomic junior synonym of *Batiacasphaera micropapillata*. Age: late early–early middle Miocene.

norvickii (Burger, 1980a, p.73–74, pl.26, figs.7–8) Lentin and Williams, 1989, p.35. Holotype: Burger, 1980a, pl.26, fig.7. Originally *Membranosphaera*, subsequently *Kallosphaeridium*, thirdly (and now) *Batiacasphaera*. This combination was not validly published in Burger (1980b, p.267–268), since that author did not clearly use the name *Batiacasphaera norvickii*; the combination was not validly published in Jan du Chêne et al. (1985a, p.15), since those authors did not fully reference the basionym. Age: Albian.

oblongata Xu Jinli et al., 1997, p.49, pl.42, fig.6 ex He Chengquan et al., 2009, p.332,649. Holotype: Xu Jinli et al., 1997, pl.42, fig.6. Originally *Pseudobohaidina* (name not validly published), subsequently (and now) *Batiacasphaera*. The name *Pseudobohaidina oblongata* was not validly published in Xu Jinli et al. (1997), since no English or Latin description was provided; He Chengquan et al. (2009, p.649) validated the name by publishing an English diagnosis on proposing the transfer to *Batiacasphaera*. Age: middle-late Eocene.

oligacantha He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989, p.39, pl.7, fig.13. Holotype: He Chengquan et al., 1989, pl.7, fig.13. Mao Shaozhi et al. (1995, p.99) indicated that this name should be restricted to the holotype. Age: Early Tertiary.

ovata Backhouse, 1987, p.215, figs.10D–F. Holotype: Backhouse, 1987, fig.10D; Fensome et al., 1996, fig.1 — p.2255. Age: middle Hauterivian.

"*pilosa*" (Ehrenberg, 1854, pl.37, section 8, fig.4) Dörhöfer and Davies, 1980, p.40. Emendation: Erkmen and Sarjeant, 1980, p.51, as *Sentusidinium pilosum*. Holotype: Ehrenberg, 1854, pl.37, section 8, fig.4. **NOW** *Barbatacysta pilosa*. Originally *Xanthidium pilosum* (Appendix A), subsequently *Hystrichosphaera pilosa*

(combination not validly published), thirdly *Hystrichosphaeridium? pilosum*, fourthly *Baltisphaeridium pilosum* (Appendix A), fifthly *Ovum hispidum* subsp. *pilosum* (combination not validly published; Appendix A), sixthly *Cleistosphaeridium pilosum* (combination not validly published), seventhly *Tenua pilosa*, eighthly *Sentusidinium pilosum*, ninthly *Baticasphaera pilosa*, tenthly (and now) *Barbatacysta pilosa*. Age: Oxfordian.

?reticulata (Davey, 1969b, p.14, pl.4, figs.3–4,6) Davey, 1979d, p.217. Holotype: Davey, 1969b, pl.4, fig.3. Originally *Chytroeisphaeridia*, subsequently *Fromea* (Appendix A), thirdly *Baticasphaera*, fourthly (and now) *Baticasphaera?*. Questionable assignment: Mohr and Mao Shaozhi (1997, p.58). Age: Campanian–Maastrichtian.

retirugosa Xu Jinli et al., 1997, p.48–49, pl.42, fig.3 ex He Chengquan et al., 2009, p.649. Holotype: Xu Jinli et al., 1997, pl.42, fig.3. Originally *Pseudobohaidina* (name not validly published), subsequently (and now) *Baticasphaera*. The name *Pseudobohaidina retirugosa* was not validly published in Xu Jinli et al. (1997), since no English or Latin description was provided; He Chengquan et al. (2009, p.649) validated the name by publishing an English diagnosis on proposing the transfer to *Baticasphaera*. Age: middle-late Eocene.

rifensis Slimani et al., 2008, p.338,340, figs.9A–F. Holotype: Slimani et al., 2008, figs.9D–E. Age: early Danian.

"ringnesiorum" (Manum and Cookson, 1964, p.15, pl.2, fig.10) Dörrhöfer and Davies, 1980, p.40. Holotype: Manum and Cookson, 1964, pl.2, fig.10. **NOW** *Kallosphaeridium?*. Originally *Canningia*, subsequently *Canningia?*, thirdly *Baticasphaera*, fourthly *Chytroeisphaeridia*, fifthly (and now) *Kallosphaeridium?*. Age: Campanian–Maastrichtian.

"rioultii" (Sarjeant, 1968, p.231, pl.1, figs.12,22; pl.2, figs.1–2,4) Dörrhöfer and Davies, 1980, p.41. Emendation: Courtinat, 1989, p.192, as *Sentusidinium rioultii*. Holotype: Sarjeant, 1968, pl.1, fig.22; pl.2, fig.1; Eisenack and Kjellström, 1972, p.1043, figure to left; Fensome et al., 1995, fig.1 — p.1743; Fauconnier and Masure, 2004, pl.70, fig.4. **NOW** *Sentusidinium*. Originally *Tenua* Eisenack, subsequently *Baticasphaera*, thirdly (and now) *Sentusidinium*; fourthly *Tenua* Davey (combination illegitimate). Age: late Callovian.

"rotundata" (Cookson and Eisenack, 1961a, p.72, pl.12, figs.1–5) Dörrhöfer and Davies, 1980, p.41. Holotype: Cookson and Eisenack, 1961a, pl.12, fig.1. **NOW** *Canningia?*. Originally *Canningia*, subsequently (and now) *Canningia?*, thirdly *Baticasphaera*. Age: Senonian.

rugulata Schiøler and Wilson, 1998, p.324, pl.6, figs.11–14. Holotype: Schiøler and Wilson, 1998, pl.6, fig.11. Age: late Coniacian–early Santonian.

?sahii (Khanna and Singh, 1981b, p.391,393, fig.2, nos.1–3; fig.4, no.4; text-figs.4–5) Lentin and Williams, 1993, p.56. Holotype: Khanna and Singh, 1981b, fig.2, no.2. Originally *Hexagonifera*, subsequently (and now) *Baticasphaera?*. Questionable assignment: Lentin and Williams (1993, p.56). This name was not validly published in Singh et al. (1979, p.35–36), Khanna (1979, p.216) and Khanna et al. (1981, p.261) since no description was provided. Age: early-middle Eocene.

saidensis Below, 1981a, p.26, pl.10, figs.1,2a–b; text-fig.15. Holotype: Below, 1981a, pl.10, figs.2a–b; text-fig.15; Fensome et al., 1991, figs.2–4 — p.729. Age: Hauterivian–early Aptian (Bedoulian).

"scrobiculata" (Deflandre and Cookson, 1955, p.291, pl.3, fig.3; text-fig.57) Burger, 1980b, p.268. Holotype: Deflandre and Cookson, 1955, pl.3, fig.3. **NOW** *Pyxidiella?*. Originally *Leiosphaera* (Appendix A), subsequently *Pyxidiella*, thirdly *Leiosphaeridia* (Appendix A), fourthly *Palaeostomocystis* (Appendix A), fifthly (and now) *Pyxidiella?*, sixthly *Baticasphaera*. Age: Santonian–Eocene.

setulosa Shaw Chenglong, 1999b, p.182, figs.72–77,84–86. Holotype: Shaw Chenglong, 1999b, figs.72–73. Age: Eocene.

var. *minima* Shaw Chenglong, 1999b, p.182, figs.84–86. Holotype: Shaw Chenglong, 1999b, figs.84–86. Age: Eocene.

var. *setulosa*. Autonym. Holotype: Shaw Chenglong, 1999b, figs.72–73.

?simlaensis (Khanna and Singh, 1981b, p.389–390, fig.1, nos.8–9; text-fig.2) Lentin and Williams, 1993, p.56. Holotype: Khanna and Singh, 1981b, fig.1, no.8. Originally *Tenua* Eisenack, subsequently (and now) *Baticasphaera*?. Questionable assignment: Lentin and Williams (1993, p.56). This name was not validly published in Khanna (1979, p.216) and Singh et al. (1979, p.35–36) since no description was provided. Age: early Eocene.

"*sinensis*" Lentin and Williams, 1989, p.36. Holotype: Jiabo, 1978, pl.23, fig.5. **NOW** *Sentusidinium minus*. Originally *Tenua hystrix* subsp. *minor*, subsequently *Kallosphaeridium? minus*, thirdly *Baticasphaera minor* (combination illegitimate), fourthly (and now) *Baticasphaera sinensis*, fifthly *Baticasphaera jiaboi* (name not validly published), sixthly (and now) *Sentusidinium minus*. Lentin and Williams (1993, p.56) retained this species in *Baticasphaera*, but He Chengquan et al. (2009, p.251) retained it in *Sentusidinium*. Substitute name for *Baticasphaera minor* (Jiabo, 1978) Jan du Chêne et al., 1985a (an illegitimate name). Age: Early Tertiary.

solida Slimani, 2003, p.268–269,271,273, pl.1, figs.1–7. Holotype: Slimani, 2003, pl.1, fig.1. Taxonomic junior synonym: *Chytroeisphaeridia solida* (name not validly published) according to Slimani (2003, p.268–269). Age: Campanian.

sparsa He Chengquan, 1991, p.53–54, pl.6, fig.4. Holotype: He Chengquan, 1991, pl.6, fig.4. Age: late Eocene.

sphaerica Stover, 1977, p.73, pl.1, figs.4–6. Holotype: Stover, 1977, pl.1, fig.4. Age: early Miocene.

spumosa (Brideaux, 1977, p.12, pl.3, figs.9–14) Below, 1981a, p.26. Holotype: Brideaux, 1977, pl.3, figs.9,14. Originally *Canningia*, subsequently *Baticasphaera*?, thirdly (and now) *Baticasphaera*. Questionable assignment: Below (1981a, p.26) — however, Kumar (1986a, p.32) retained this species in *Baticasphaera* without question. Helby (1987, p.324–325) also proposed this combination without question. Age: Aptian.

subtilis Stover and Helby, 1987c, p.228–230, figs.2A–F,3A–L. Holotype: Stover and Helby, 1987c, figs.2A–B; Fensome et al., 1996, figs.1–2 — p.2385. Age: Hauterivian–Barremian.

"*taugourdeau*" (Varma and Dangwal, 1964, p.68, pl.2, fig.9) Dörhöfer and Davies, 1980, p.41. Holotype: Varma and Dangwal, 1964, pl.2, fig.9. Originally *Tenua* Eisenack, subsequently *Hemicystodinium?*, thirdly *Baticasphaera*. **Taxonomic senior synonym:** *Polysphaeridium subtile*, according to Lentin and Williams (1993, p.275). Taxonomic senior synonym: *Hystrichosphaeridium* (now *Polysphaeridium*) *zoharyi*, according to Lentin and Williams (1981, p.26,127) — however, *Tenua taugourdeau* is now considered a taxonomic junior synonym of *Polysphaeridium subtile*. Age: Eocene–Oligocene.

"*tenulla*" Xu Jinli et al., 1997, p.44, pl.59, figs.4,5a–b,6. Holotype: not designated. **Name not validly published:** no English or Latin description or type. **Taxonomic senior synonym:** *Bosedinia granulata*, according to He Chengquan et al. (2009, p.457). Age: Oligocene.

"*torulosa*" (Davey and Verdier, 1973, p.180,183, pl.1, figs.2,5,8) Dörhöfer and Davies, 1980, p.41. Holotype: Davey and Verdier, 1973, pl.1, fig.2. **NOW** *Canningia*. Originally (and now) *Canningia*, subsequently *Baticasphaera*, thirdly *Ovoidinium*. Age: late Albian–early Cenomanian.

tuberculata He Chengquan, 1991, p.54, pl.6, fig.2. Holotype: He Chengquan, 1991, pl.6, fig.2. Age: middle Eocene.

"*vermiculata*" Xu Jinli et al., 1997, pl.36, fig.20. Holotype: Xu Jinli et al., 1997, pl.36, fig.20. **Name not validly published:** no English or Latin description. **Taxonomic senior synonym:** *Baticasphaera henanensis*, according to He Chengquan et al. (2009, p.330). Age: Oligocene.

verrucatum Xu Jinli et al., 1997, p.47, pl.35, figs.12a–b,13a–b,15a–b,16a–b,17–20,21a–b ex He Chengquan et al., 2009, p.334, 650. Holotype: Xu Jinli et al., 1997, pl.35, figs.15a–b. Originally *Sentusidinium?* (name not validly published), subsequently (and now) *Baticasphaera*. The name *Sentusidinium? verrucatum* was not validly published in Xu Jinli et al. (1997), since no English or Latin description was provided; He Chengquan et al. (2009,

p.649) validated the name by publishing an English diagnosis on proposing the transfer to *Batiacasphaera*. Age: Oligocene.

"**verrucosa**" (Sarjeant, 1968, p.232, pl.1, fig.17; pl.2, figs.3,6) Dörhöfer and Davies, 1980, p.41. Holotype: Sarjeant, 1968, pl.1, fig.17; pl.2, figs.3,6; Fauconnier and Masure, 2004, pl.11, figs.2–3. **NOW** *Barbatacysta*. Originally *Tenua* Eisenack, subsequently *Batiacasphaera*, thirdly *Sentusidinium*, fourthly (and now) *Barbatacysta*. Age: late Callovian.

"**villersensis**" (Sarjeant, 1968, p.231–232, pl.1, fig.16; pl.2, figs.5–10) Dörhöfer and Davies, 1980, p.41. Holotype: Sarjeant, 1968, pl.1, fig.16; Fauconnier and Masure, 2004, pl.70, fig.5. **NOW** *Sentusidinium*. Originally *Tenua* Eisenack, subsequently *Batiacasphaera*, thirdly (and now) *Sentusidinium*. Age: early Callovian–early Oxfordian.

xinjiangensis Lentin and Williams, 1993. Holotype: He Chengquan, 1991, pl.6, fig.7. Originally *Batiacasphaera granulosa* He Chengquan, subsequently (and now) *Batiacasphaera xinjiangensis*. Substitute name for *Batiacasphaera granulosa* He Chengquan, 1991, p.53, pl.6, fig.7 (an illegitimate name). Age: Paleocene.

BATIOLADINIUM Brideaux, 1975, p.1241. Emendation: Pourtoy, 1988, p.390 — however, see Lentin and Vozzhennikova (1990, p.82) and Riding and Helby (2001g, p.187). Taxonomic senior synonym: *Imbatodinium*, according to Dörhöfer and Davies (1980, p.36) — however, Lentin and Williams (1985, p.35) retained *Batioladinium*. Taxonomic junior synonym: *Necrobroomea*, according to Brideaux (1977, p.10). With respect to the synonymy of *Necrobroomea* and *Batioladinium*, Below (1990, p.52) considered *Necrobroomea* to be the senior name. However, Fensome et al. (1993b, p.78) gave the following statement: "Below (1990, p.52) listed *Batioladinium* Brideaux 1975 as a taxonomic junior synonym of *Necrobroomea* Wiggins 1975 rather than the reverse, as is customarily the case. Below stated that '... the genus *Necrobroomea* Wiggins (publication date 25 April 1975 in *Geoscience and Man*, volume 11) has priority over *Batioladinium* Brideaux 1975 (publication date 15 June 1975 in the *Canadian Journal of Botany*, volume 53(12))' [translation]. However, Below was clearly unaware that Brideaux (1977, p.10) stated that '*Necrobroomea* Wiggins, 1975 appeared in *Geoscience and Man*, v.11, the date of publication being given as April 25th, 1975. However, in a letter to the writer, acting editor, Ruth B. Hubert, established that no copies of this volume were available to the public before July 23rd, 1975, and that there was no prior distribution of the volume.' On the basis of this evidence and the observation that the *Canadian Journal of Botany* v.53, no.12 did appear in June 1975 (W.W. Brideaux, personal communication to R.A.F.), *Necrobroomea* must be considered junior to *Batioladinium* if these two taxa are considered congeneric." Type: Alberti, 1961, pl.5, fig.2, as *Broomea jaegeri*.

daviesii Lentin and Vozzhennikova, 1990, p.82–83; text-fig.45. Holotype: Dörhöfer and Davies, 1980, fig.30D, as *Imbatodinium kondratjevii* Vozzhennikova, 1967; Lentin and Vozzhennikova, 1990, text-fig.45. Age: late Valanginian.

?**exiguum** (Alberti, 1961, p.26–27, pl.5, fig.14) Brideaux, 1975, p.1240. Holotype: Alberti, 1961, pl.5, fig.14. Originally *Broomea*, subsequently (and now) *Batioladinium*?, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Questionable assignment: Brideaux (1975, p.1240). Lentin and Williams (1993, p.58) retained this species in *Batioladinium*. Below (1990, p.53) suggested that this species may be a taxonomic synonym of *Batioladinium*? (as *Necrobroomea*) *pelliferum*. Age: early Hauterivian–?late Barremian.

"**fractum**" (Mehrotra and Sarjeant, 1984a, p.217–218, pl.1, figs.1–7; pl.2, figs.1–7; text-figs.1a–e) Lentin and Williams, 1985, p.35. Holotype: Mehrotra and Sarjeant, 1984a, pl.1, fig.1; pl.2, fig.7; text-figs.1a–e. Originally *Imbatodinium*, subsequently *Batioladinium*. **Taxonomic senior synonym:** *Broomea* (as *Necrobroomea*) *mipodum*, according to Below (1990, p.56). Age: Aptian.

?**gochtii** (Alberti, 1961, p.27, pl.5, figs.8–10,?16) Lentin and Williams, 1977b, p.14. Holotype: Alberti, 1961, pl.5, fig.8. Originally *Broomea*, subsequently (and now) *Batioladinium*?, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Lentin and Williams (1993, p.58) retained this species in *Batioladinium*. Questionable assignment: Lentin and Williams (1977b, p.14). Taxonomic junior synonyms: *Batioladinium pomum* and *Batioladinium varigranosum*, both according to Below (1990, p.53). Below (1990, p.53) considered *Batioladinium?* *gochtii* to be a possible taxonomic synonym of *Broomea* (now *Batioladinium*) *jaegeri*. Age: Valanginian–?Hauterivian.

subsp. *gochtii*. Autonym. Holotype: Alberti, 1961, pl.5, fig.8.

subsp. *rude* (Iosifova, 1992, p.59, pl.10, figs.4a–b,5) Iosifova, 1996, p.211. Holotype: Iosifova, 1992, pl.10, figs.4a–b; Iosifova, 1996, pl.14, fig.5. Originally *Batioladinium pomum* subsp. *rude*, subsequently (and now) *Batioladinium gochtii* subsp. *rude*. Age: Ryazanian.

"*imbatodinense*" (Vozzhennikova, 1967, p.55, pl.12, figs.4a–c) Lentin and Williams, 1985, p.35. Emendation: Lentin and Vozzhennikova, 1990, p.91–92, as *Protobatioladinium imbatodinense*. Holotype: Vozzhennikova, 1967, pl.12, fig.4a. **NOW** *Protobatioladinium*. Originally *Imbatodinium*, subsequently *Necrobroomea*?, thirdly *Pareodinia*, fourthly *Pareodinia*?, fifthly *Batioladinium*, sixthly (and now) *Protobatioladinium*, seventhly *Gochteodinia*. Age: Late Jurassic.

**jaegeri* (Alberti, 1961, p.26, pl.5, figs.1–7) Brideaux, 1975, p.1240. Emendation: Below, 1990, p.53–54, as *Necrobroomea jaegeri*. Holotype: Alberti, 1961, pl.5, fig.2; Eisenack and Klement, 1964, p.67; Fensome et al., 1995, fig.2 — p.1571. Originally *Broomea*, subsequently (and now) *Batioladinium*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Lentin and Williams (1993, p.58) retained this species in *Batioladinium*. Taxonomic junior synonym: *Pseudoceratium gochtii* Pocock (subsequently *Pseudoceratium hansgochtii*), according to Singh (1971, p.320). Brideaux (1977, p.10) and Below (1990, p.53) indicated that Davey (1974, p.64) had considered *Broomea* (as *Necrobroomea*; now *Batioladinium*) *micropoda* to be the taxonomic senior synonym of *Broomea* (now *Batioladinium*) *jaegeri*; however, Davey did not include the holotype of *Broomea* (now *Batioladinium*) *jaegeri* in his synonymy for *Broomea* (now *Batioladinium*) *micropoda*. Below (1990, p.53) considered *Broomea* (as *Necrobroomea*; now *Batioladinium*) *gochtii* to be a possible taxonomic synonym of this species. Age: late Barremian.

longicornutum (Alberti, 1961, p.27–28, pl.5, figs.18–21; pl.6, figs.1–2) Brideaux, 1975, p.1240. Emendation: Below, 1990, p.56, as *Necrobroomea longicornuta*. Holotype: Alberti, 1961, pl.5, fig.19; Eisenack and Klement, 1964, p.69; Fensome et al., 1996, fig.1 — p.2205. Originally *Broomea*?, subsequently (and now) *Batioladinium*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Lentin and Williams (1993, p.58) retained this species in *Batioladinium*. Taxonomic junior synonym: *Batioladinium radiculatum*, according to Below (1990, p.53). Age: late Hauterivian–late Barremian.

matyjae Poulsen, 1996, p.60, pl.3, fig.7. Holotype: Poulsen, 1996, pl.3, fig.7. Age: Volgian–early Valanginian.

micropodum (Eisenack and Cookson, 1960, p.7–8, pl.2, figs.8–9) Brideaux, 1975, p.1240. Emendation: Below, 1990, p.56, as *Necrobroomea micropoda*. Holotype: Eisenack and Cookson, 1960, pl.2, fig.9. Originally *Broomea*, subsequently (and now) *Batioladinium*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Lentin and Williams (1993, p.59) retained this species in *Batioladinium*. Taxonomic junior synonyms: *Imbatodinium fractum*, according to Below (1990, p.56); *Broomea* (now *Batioladinium*?) *pellifera*, according to Wiggins (1975, p.111) — however, Dörhöfer and Davies (1980, p.38) retained *Broomea* (as *Batioladinium*?) *pellifera*. Brideaux (1977, p.10) and Below (1990, p.53) indicated that Davey (1974, p.64) considered *Broomea* (now *Batioladinium*) *micropoda* to be a taxonomic senior synonym of *Broomea* (as *Necrobroomea*, now *Batioladinium*) *jaegeri*; however, Davey (1974, p.64) did not include the holotype of *Broomea* (now *Batioladinium*) *jaegeri* in his synonymy for *Broomea* (now *Batioladinium*) *micropoda*. Age: Aptian–Albian.

"?*mulingense*" Zhao Chuanben and Qiao Xiuyun, 1993, p.454,456, pl.2, figs.1–6. **Name not validly published**: holotype not designated. Questionable assignment: Zhao Chuanben and Qiao Xiuyun, 1993, p.454. Age: Aptian–Albian.

paeminosum Riding and Helby, 2001g, p.187,189, figs.4A–P. Holotype: Riding and Helby, 2001g, figs.4N–P. Taxonomic junior synonym: *Batioladinium protojaegeri* (name not validly published), according to Riding and Helby (2001g, p.187). Age: Tithonian.

?*pelliferum* (Alberti, 1961, p.26, pl.5, figs.11–13) Brideaux, 1975, p.1240. Holotype: Alberti, 1961, pl.5, fig.11. Originally *Broomea*, subsequently (and now) *Batioladinium*?, thirdly *Imbatodinium*, fourthly *Necrobroomea*. Lentin and Williams (1993, p.59) questionably retained this species in *Batioladinium*. Questionable assignment:

Brideaux (1975, p.1240). Taxonomic senior synonym: *Broomea* (now *Batioladinium*) *micropoda*, according to Wiggins (1975, p.111) — however, Dörhöfer and Davies (1980, p.38) retained *Broomea* (as *Batioladinium*?) *pellifera*. Below (1990, p.53) considered *Broomea* (as *Necrobroomea*, now *Batioladinium*) *exigua* to be a possible taxonomic synonym of this species. Age: late Barremian–early Aptian.

"*pomum*" Davey, 1982b, p.21, pl.5, figs.2–4. Holotype: Davey, 1982b, pl.5, fig.3. Originally *Batioladinium*, subsequently *Imbatodinium*. Lentin and Williams (1985, p.36) retained this species in *Batioladinium*. **Taxonomic senior synonym:** *Broomea* (as *Necrobroomea*, now *Batioladinium*?) *gochtii*, according to Below (1990, p.53). N.I.A. Age: Ryazanian–early Valanginian.

"subsp. *pomum*". Autonym. Holotype: Davey, 1982b, pl.5, fig.3. **Now redundant.**

"subsp. *rude*" Iosifova, 1992, p.59, pl.10 (not pl.9), figs.4a–b,5. Holotype: Iosifova, 1992, pl.10 (not pl.9), figs.4a–b; Iosifova, 1996, pl.14, fig.5. **NOW** *Batioladinium*? *gochtii* subsp. *rude*. Originally *Batioladinium pomum* subsp. *rude*, subsequently (and now) *Batioladinium*? *gochtii* subsp. *rude*. Age: Ryazanian.

"*protojaegeri*" Helby in Riding and Helby, 2001g, p.187. **Name not validly published:** no description. **Taxonomic senior synonym:** *Batioladinium paeminosum*, according to Riding and Helby (2001g, p.187).

"*radiculatum*" Davey, 1982b, p.21–22, pl.5, figs.1,7–9. Holotype: Davey, 1982b, pl.5, fig.8. Originally *Batioladinium*, subsequently *Imbatodinium*. Lentin and Williams (1985, p.36) retained this species in *Batioladinium*. **Taxonomic senior synonym:** *Broomea* (as *Necrobroomea*, now *Batioladinium*) *longicornutum*, according to Below (1990, p.53). Age: early–late Ryazanian.

reticulatum Stover and Helby, 1987a, p.101–103, figs.1A–N. Holotype: Stover and Helby, 1987a, figs.1E–G; Helby et al., 1987, fig.25I; Fensome et al., 1996, figs.1–3 — p.2325. Originally (and now) *Batioladinium*, subsequently *Necrobroomea*. Lentin and Williams (1993, p.59) retained this species in *Batioladinium*. Age: Berriasian.

"*rossicum*" Iosifova, 1992, p.59–61, pl.9, figs.2a–b; pl.10, figs.1a–b. Emendation: Iosifova, 1996, p.227,229, as *Protobatioladinium rossicum*. Holotype: Iosifova, 1992, pl.10, figs.1a–b; Iosifova, 1996, pl.7, figs.4a–c; text-figs.10A–B. **NOW** *Protobatioladinium*. Originally *Batioladinium*, subsequently (and now) *Protobatioladinium*. Age: Ryazanian.

shaftesburiense Nøhr-Hansen, 1993, p.46–47, pl.2, figs.5,12–13. Holotype: Nøhr-Hansen, 1993, pl.2, fig.5. Age: middle Albian.

simplex (Yun Hyesu, 1981, p.56–57, pl.13, figs.10,15) Jansonius, 1989, p.68. Holotype: Yun Hyesu, 1981, pl.13, fig.15. Originally *Fromea* (Appendix A), subsequently (and now) *Batioladinium*. Age: early Santonian.

?*tricornoides* (Alberti, 1961, p.28, pl.5, fig.17) Lentin and Williams, 1977b, p.14. Holotype: Alberti, 1961, pl.5, fig.17. Originally *Broomea*?, subsequently (and now) *Batioladinium*?, thirdly *Necrobroomea*?, fourthly *Imbatodinium*?. Questionable assignment: Lentin and Williams (1977b, p.14). Age: late Hauterivian.

"*varigranosum*" (Duxbury, 1977, p.53–54, pl.14, figs.6–7; text-figs.20a–b) Davey, 1982b, p.22. Holotype: Duxbury, 1977, pl.14, fig.6; text-fig.20b; Pourtoy, 1988, pl.2, figs.1–2. Originally *Aprobolocysta*, subsequently *Batioladinium*, thirdly *Aprobolocysta*?. **Taxonomic senior synonym:** *Broomea* (as *Necrobroomea*) *gochtii*, according to Below (1990, p.53). Age: early Valanginian–early Hauterivian.

BEAUMONTELLA Below, 1987a, p.69–70. Type: Wall, 1965a, pl.6, fig.9; pl.9, fig.9, as *Hystrichosphaeridium langii*.

?*caminuspina* (Wall, 1965a, p.165, pl.9, fig.4) Below, 1987a, p.70. Holotype: Wall, 1965a, pl.9, fig.4. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*?, thirdly *Dapsilidinium*?, fourthly (and now) *Beaumontella*?

Questionable assignment: Below (1987a, p.70). Taxonomic junior synonym: *Cleistosphaeridium mojsisovicsii*, according to Below (1987a, p.70). Age: early Sinemurian.

?*delicata* (Wall, 1965a, p.156, pl.1, figs.11–13; pl.7, fig.6) Below, 1987a, p.70. Holotype: Wall, 1965a, pl.1, fig.11. Originally *Baltisphaeridium* (Appendix A), subsequently *Solisphaeridium* (combination not validly published, Appendix A), thirdly (and now) *Beaumontella*?. Questionable assignment: Below (1987a, p.70). Age: Hettangian–early Sinemurian.

**langii* (Wall, 1965a, p.165, pl.6, figs.9–11; pl.9, fig.9) Below, 1987a, p.70–71. Emendations: Morbey, 1975, p.41–42, as *Hystrichosphaeridium langii*; Below, 1987a, p.70–71, as *Beaumontella langii*. Holotype: Wall, 1965a, pl.6, fig.9; pl.9, fig.9; Fensome et al., 1995, figs.1–2 — p.1595. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*?, thirdly *Dapsilidinium*?, fourthly (and now) *Beaumontella*. Age: Hettangian–early Sinemurian.

"**BEJUIA**" Stover and Williams, 1987, p.37. Substitute name for *Burtonia* Beju, 1983, p.106 (an illegitimate name). **Taxonomic senior synonym:** *Atopodinium*, according to Masure (1991, p.64) and Masure in Fauconnier and Masure (2004, p.88). Type: Beju, 1983, text-figs.3A–B,4A–B, as *Burtonia polygonalis*.

"**polygonalis*" (Beju, 1983, p.107,109,111; text-figs.3A–F,4A–F,5A–D) Stover and Williams, 1987, p.38. Emendation: Masure, 1991, p.68,70–71, as *Atopodinium polygonale*. Holotype: Beju, 1983, text-figs.3A–B,4A–B; Masure, 1991, pl.2, figs.1,4; text-figs.3a–b,4a–b; Fensome et al., 1995, figs.1–4 — p.1675; Fauconnier and Masure, 2004, pl.10, figs.8–11. **NOW** *Atopodinium*. Originally *Burtonia* (generic name illegitimate), subsequently *Bejuia*, thirdly (and now) *Atopodinium*. Age: early Bathonian.

"**BELLATUDINIUM**" Yu Jingxian et al., 1981, p.261. **Taxonomic senior synonym:** *Laciniadinium*, according to He Chengquan et al. (2009, p.386). Chen et al. (1988, p.6) considered *Apiculadinium* to be a possible taxonomic synonym of this genus. Type: Yu Jingxian et al., 1981, pl.1, fig.20, as *Bellatudinium conspicuum*.

"**conspicuum*" Yu Jingxian et al., 1981, p.261, pl.1, figs.20–22,24; text-fig.2. Holotype: Yu Jingxian et al., 1981, pl.1, fig.20. **NOW** *Laciniadinium*. Originally *Bellatudinium*, subsequently (and now) *Laciniadinium*. Age: Late Cretaceous.

"*fusum*" Yu Jingxian et al., 1981, p.261, pl.1, figs.25–27,29–31. Holotype: Yu Jingxian et al., 1981, pl.1, fig.27. **NOW** *Laciniadinium*. Originally *Bellatudinium*, subsequently (and now) *Laciniadinium*. Age: Late Cretaceous.

"*hokkaidoanum*" Kurita and Matsuoka, 1995, p.146–147, pl.1, figs.1–7. Holotype: Kurita and Matsuoka, 1995, pl.1, fig.1. **NOW** *Laciniadinium*. Originally *Bellatudinium* subsequently (and now) *Laciniadinium*. Age: late middle to late Eocene.

BELODINIUM Cookson and Eisenack, 1960b, p.249. Emendations: Dodekova, 1975, p.23; Stover and Helby, 1987d, p.275, as a revised description. Type: Cookson and Eisenack, 1960b, pl.37, fig.14, as *Belodinium dysculum*.

"*asaphum*" Drugg, 1978, p.63–64, pl.2, figs.8–10. Holotype: Drugg, 1978, pl.2, fig.8. **NOW** *Clathroctenocystis*. Originally *Belodinium*, subsequently (and now) *Clathroctenocystis*. Age: early Oxfordian.

**dysculum* Cookson and Eisenack, 1960b, p.250, pl.37, fig.14; pl.39, fig.10. Emendation: Stover and Helby, 1987d, p.275,277, as a revised description. Holotype: Cookson and Eisenack, 1960b, pl.37, fig.14. Age: ?Tithonian.

neridis Stevens and Helby, 1987, p.166–168,170, figs.4A–C,5A–O. Holotype: Stevens and Helby, 1987, figs.5A–B; Fensome et al., 1996, figs.1–2 — p.2243. N.I.A. Age: early Berriasian.

obsoletum Dodekova, 1975, p.23–24, pl.4, figs.1–12; text-fig.5. Holotype: Dodekova, 1975, pl.4, figs.1–4. Originally (and now) *Belodinium*, subsequently *Clathroctenocystis*. Dodekova (1990, p.7) retained this species in *Belodinium*. Age: late Bathonian.

"**BELOWIA**" Riding and Helby, 2001g, p.189,191,193. **Name illegitimate** — **senior homonym**: *Belowia* Moquin-Tandon, 1849. **Substitute name**: *Belowicysta* Riding and Zijlstra, 2006. Type: Riding and Helby, 2001g, figs.6A–C, as *Belowia balteus*. N.I.A. Age: Tithonian.

"***balteus**" Riding and Helby, 2001g, p.191,193,195, figs.5A–L,6A–F,7A–L. Holotype: Riding and Helby, 2001g, figs.6A–C. **NOW** *Belowicysta*. Originally *Belowia* (generic name illegitimate), subsequently (and now) *Belowicysta*. N.I.A. Age: Tithonian.

BELOWICYSTA Riding and Zijlstra, 2006, p.313–314. Substitute name for *Belowia* Moquin-Tandon, 1849. Type: Riding and Helby, 2001g, figs.6A–C, as *Belowia balteus*.

***balteus** (Riding and Helby, 2001g, p.191,193,195, figs.5A–L,6A–F,7A–L) Riding and Zijlstra, 2006, p.314. Holotype: Riding and Helby, 2001g, figs.6A–C. Originally *Belowia balteus* (generic name illegitimate), subsequently (and now) *Belowicysta*. N.I.A. Age: Tithonian.

"**BELOWIUS**" Özdikmen, 2009, p.237. **Name illegitimate** — **nomenclatural senior synonym**: *Wanneria*, which has the same type. Özdikmen (2009) considered *Wanneria* Below to be illegitimate because it is a junior homonym of *Wanneria* Walcott 1908; however, *Wanneria* Walcott is an animal and under the I.C.N. it does not pre-empt *Wanneria* Below. Type: Below, 1987a, pl.2, figs.2–10, as *Wanneria misolensis*.

"***misolensis**" (Below, 1987a, p.80,86, pl.1, figs.15–18; pl.2, figs.1–10,14–15; pl.3, figs.2–10,12–13,15; text-figs.36a–g,37a–h,39–47; table 2) Özdikmen, 2009, p.238. Holotype: Below, 1987a, pl.2, figs.2–10; Fensome et al., 1993a, figs.2–3 — p.1257. **NOW** *Wanneria*. Originally (and now) *Wanneria*, subsequently *Belowius* (generic name illegitimate). Although Özdikmen (2009) did not fully reference the basionym when proposing the transfer of this species to *Belowius*, he did so under the aegis of the I.C.Z.N., so the combination can be considered validly published. Age: Norian.

BEYRICHODINIUM Below, 1990, p.69–70. Contrary to the opinion of Lentin and Williams (1993, p.60), this name is validly published since the name of the "type species" is validly published. Type: Below, 1990, pl.17, figs.6–10, as *Beyrichodinium radiatum*.

hystrix Below, 1990, p.70–71, pl.17, figs.1–5. Holotype: Below, 1990, pl.17, figs.1–5. Contrary to the opinion of Lentin and Williams (1993, p.61), we consider this name to be validly published. Below (1987a, p.6) stated that, unless otherwise indicated, all the material is in his personal collection. Since Below (1987a, 1987b, 1990) are parts I to III of a single study, we agree with J. Jansonius (personal communication) that Below's (1987a) repository statement refers to all three publications, fulfilling the requirement of I.C.N. Article 40.7 (see also the discussion on Article 40.7 in the Introduction). Age: early Hauterivian.

***radiatum** Below, 1990, p.71, pl.17, figs.6–15; text-fig.20. Holotype: Below, 1990, pl.17, figs.6–10. Contrary to the opinion of Lentin and Williams (1993, p.61), we consider this name to be validly published. Below (1987a, p.6) stated that, unless otherwise indicated, all the material is in his personal collection. Since Below (1987a, 1987b, 1990) are parts I to III of a single study, we agree with J. Jansonius (personal communication) that Below's (1987a) repository statement refers to all three publications, fulfilling the requirement of I.C.N. Article 40.7 (see also the discussion on Article 40.7 in the Introduction). Age: early Hauterivian.

BIANCHINA Schiøler, 2015, p.408,410 (p.3,5 on PDF initially published online). Type: Schiøler, 2015, pl.1, figs.6–7, as *Bianchina hieroglyphica*.

***hieroglyphica** Schiøler, 2015, p.410–411 (p.5–6 in PDF initially published online), pl.1, figs.1–12; text-fig.3. Holotype: Schiøler, 2015, pl.1, figs.6–7. Age: late Albian–middle Cenomanian

BICARINELLUM Deflandre, 1948, p.212. Emendation: Keupp, 1984, p.17–18, as a revised diagnosis. Calcareous dinoflagellate genus (see Streng et al., 2004, p.481 and Elbrächter et al., 2008, p.1298). Taxonomic junior synonyms: *Biechelerella*, according to Keupp (1984, p.20); *Calcisphaerellum*, by implication in Keupp (1984, p.20), who considered the "type species" of *Calcisphaerellum*, *Calcisphaerellum flosculus*, to be a taxonomic junior synonym of *Bicarinellum jurassicum*. Type: Deflandre, 1948, figs.28–29, as *Bicarinellum castaninium*.

calvum Keupp, 1979a, p.38–39, pl.10, figs.1–10. Holotype: Keupp, 1979a, pl.10, figs.1–2. Age: early Barremian.

***castaninium** Deflandre, 1948, p.212–215, figs.28–31,34. Holotype: Deflandre, 1948, figs.28–29. Age: middle Eocene.

?**cristatum** Keupp, 1981, p.49–50, pl.43, figs.1–8. Holotype: Keupp, 1981, pl.43, figs.1–4; Keupp, 1982, pl.6.2–9, figs.7–9,12. Questionable assignment: Keupp (1993, p.32). Keupp (1982, p.335) also cited this species as new. Age: late Aptian–early Albian.

eulineatum Keupp, 1987, p.47, pl.10, figs.1–5; text-fig.7. Holotype: Keupp, 1987, pl.10, figs.1–3. Age: middle Albian–early Cenomanian.

jurassicum (Deflandre, 1948, p.210–211, figs.26–27) Keupp, 1984, p.20. Holotype: Deflandre, 1948, figs.26–27. Originally *Biechelerella*, subsequently (and now) *Bicarinellum*. Taxonomic junior synonym: *Calcisphaerellum flosculus*, according to Keupp (1984, p.20). Age: Late Jurassic.

pulchrum Keupp and Kowalski, 1992, p.221, pl.5, fig.13; pl.6, figs.1–2,4. Holotype: Keupp and Kowalski, 1992, pl.6, fig.1. Keupp and Kowalski (1992, p.221) placed the generic name in quotes. The Latin adjective "pulcher" (masculine) is declined as "pulchra" (feminine) and "pulchrum" (neuter). Age: middle to late Albian.

"**tricarinelloides**" Versteegh, 1993, p.357,359,360, pl.1, figs.1–12; text-figs.4A–D. Holotype: Versteegh, 1993, pl.1, figs.4–5. **NOW** *Posoniella*. Originally *Bicarinellum*, subsequently (and now) *Posoniella*. Age: late Pliocene–late Pleistocene.

tumulosum Willems, 1988, p.458–461, pl.6, figs.28–29. Holotype: Willems, 1988, pl.6, fig.28. Age: early Campanian.

BICONIDINIUM Islam, 1983c, p.84. Type: Islam, 1983c, pl.1, fig.3, as *Biconidinium longissimum*.

***longissimum** Islam, 1983c, p.84–85, pl.1, figs.3–4; text-fig.10. Holotype: Islam, 1983c, pl.1, fig.3; Fensome et al., 1995, fig.1 — p.1607. Age: early Eocene.

"**parvum**" Wilson in Slimani, 2001a, p.192. **Name not validly published**: no description. **Taxonomic senior synonym**: *Diconodinium wilsonii*, according to Slimani (2001a, p.192).

reductum (May, 1980, p.84–85, pl.21, fig.20) Kirsch, 1991, p.120. Emendation: Kirsch, 1991, p.120, as *Biconidinium reductum*. Holotype: May, 1980, pl.12, fig.20. Originally *Palaeocystodinium*, subsequently (and now) *Biconidinium*. Taxonomic junior synonym: *Svalbardella parva* (name not validly published), according to Slimani (2001a, p.192). Age: late Campanian–early Maastrichtian.

"**BIECHELERELLA**" Deflandre, 1948, p.209–210. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1298). **Taxonomic senior synonym**: *Bicarinellum*, according to Keupp (1984, p.20). Type: Deflandre, 1948, figs.26–27, as *Biechelerella jurassica*.

"**jurassica*" Deflandre, 1948, p.210–211, figs.26–27. Holotype: Deflandre, 1948, figs.26–27. **NOW** *Bicarinellum*. Originally *Biechelerella*, subsequently (and now) *Bicarinellum*. Taxonomic junior synonym: *Calcisphaerellum flosculus*, according to Keupp (1984, p.20). Age: Late Jurassic.

BINZHOUDINIUM Xu Jinli et al., 1997, p.52,146–147. Type: Xu Jinli et al., 1997, pl.7, fig.1, as *Binzhoudinium longispinosum*.

"*branospinosum*" Xu Jinli et al., 1997, p.53, pl.6, figs.6–7. Holotype: Xu Jinli et al., 1997, pl.6, fig.6. **Name not validly published**: no English or Latin description. Age: middle-late Eocene.

**longispinosum* Xu Jinli et al., 1997, p.52–53,147, pl.5, fig.13; pl.7, figs.1–3; text-fig.2. Holotype: Xu Jinli et al., 1997, pl.7, fig.1. Taxonomic junior synonym: *Binzhoudinium recedens*, according to He Chengquan et al. (2009, p.335). Age: middle-late Eocene.

membranospinosum Xu Jinli et al., 1997, p.53, pl.6, figs.6–7 ex He Chengquan et al. 2009, p.335–336,650. Holotype: Xu Jinli et al., 1997, pl.6, fig.6. This name (with the epithet misspelled as "*branospinosum*") was not validly published in Xu Jinli et al. (1997), since no English or Latin description was provided; He Chengquan et al. (2009, p.651) validated the name by publishing an English diagnosis. Age: middle-late Eocene.

multispinosum Xu Jinli et al., 1997, p.54, pl.5, figs.15–16; pl.6, figs.9–10; pl.7, figs.4–9 ex He Chengquan et al., 2009, p.336,651. Holotype: Xu Jinli et al., 1997, pl.5, fig.16. This name was not validly published in Xu Jinli et al. (1997), since no English or Latin description was provided; He Chengquan et al. (2009, p.651) validated the name by publishing an English diagnosis. Age: middle-late Eocene.

"*recedens*" Xu Jinli et al., 1997, p.54, pl.5, fig.14; pl.7, figs.10–11. Holotype: Xu Jinli et al., 1997, pl.7, fig.10. **Name not validly published**: no English or Latin description. **Taxonomic senior synonym**: *Binzhoudinium longispinosum*, according to He Chengquan et al. (2009, p.335). Age: middle-late Eocene.

BIORBIFERA Habib, 1972, p.377. Emendations: Below, 1987b, p.63; Riding and Helby, 2001g, p.195,197. Type: Habib, 1972, pl.10, fig.3, as *Biorbifera johnewingii*.

"*aggressiva*" Helby in Riding and Helby, 2001g, p.197. **Name not validly published**: no description. **Taxonomic senior synonym**: *Biorbifera ferox*, according to Riding and Helby (2001g, p.197).

ferox Riding and Helby, 2001g, p.197,199, figs.9A–T. Holotype: Riding and Helby, 2001g, figs.9I–L. Taxonomic junior synonym: *Biobifera aggressiva* (name not validly published), according to Riding and Helby (2001g, p.197). Age: Tithonian.

**johnewingii* Habib, 1972, p.377–378, pl.10, figs.2–3. Emendation: Below, 1987b, p.63–64. Holotype: Habib, 1972, pl.10, fig.3; Fensome et al., 1995, fig.2 — p.1577. Age: Early Cretaceous.

"BIPOLARIBUCINA" Jiabo, 1978, p.57. Although the "type species" was not validly transferred by Jiabo (1978), the generic name *Bipolaribucina* was validly published by these authors, since it is based on a previously validly published species name (I.C.N. Article 40.3). **Taxonomic senior synonym**: *Distatodinium*, according to Chen et al. (1988, p.6–7). Type: Brosius, 1963, pl.4, fig.6, as *Hystrichosphaeridium paradoxum*.

"?*biornata*" He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989, p.39, pl.22, figs.18–19. Holotype: He Chengquan et al., 1989, pl.22, fig.18. **NOW** *Songiella*. Originally *Bipolaribucina*?, subsequently *Distatodinium*, thirdly (and now) *Songiella*. Questionable assignment: He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al. (1989, p.39). Taxonomic senior synonym: *Membranilarnacia paucitubata*, according to Mao Shaozhi et al. (1995, p.44) — however, He Chengquan et al. (2009, p.366) retained this species as *Songiella biornata*. Age: Early Tertiary.

"*conicosa*" Jiabo, 1978, p.57, pl.29, figs.4–5. Holotype: Jiabo, 1978, pl.29, fig.4. **NOW** *Palaeohystrichodinium*. Originally *Bipolaribucina*, subsequently *Impletosphaeridium*, thirdly (and now) *Palaeohystrichodinium*. Age: Early Tertiary.

"*huanghuaensis*" Jiabo, 1978, p.57, pl.29, figs.9–10. Holotype: Jiabo, 1978, pl.29, fig.9. **NOW** *Songiella*. Originally *Bipolaribucina*, subsequently *Impletosphaeridium*, thirdly (and now) *Songiella*. Age: Early Tertiary.

"*liaoningensis*" Jiabo, 1978, p.58, pl.29, figs.6–8. Holotype: Jiabo, 1978, pl.29, fig.7. **NOW** *Peltiphoridium*. Originally *Bipolaribucina*, subsequently *Impletosphaeridium*, thirdly (and now) *Peltiphoridium*. Age: Early Tertiary.

"*oblongata*" Jiabo, 1978, p.58, pl.29, figs.1–3. Holotype: Jiabo, 1978, pl.29, fig.2. **NOW** *Peltiphoridium oblongatum*. Originally *Bipolaribucina oblongata*, subsequently *Impletosphaeridium oblongatum* (combination illegitimate), thirdly *Impletosphaeridium elongatum*, fourthly (and now) *Peltiphoridium oblongatum*. Age: Early Tertiary.

"*paradoxa*" (Brosius, 1963, p.41–42, pl.4, figs.1,6; text-fig.2, nos.1a–c) Lentin and Williams, 1981, p.28. Holotype: Brosius, 1963, pl.4, fig.6; Fensome et al., 1995, fig.2 — p.1639. **NOW** *Distatodinium*. Originally *Hystrichosphaeridium*, subsequently *Tanyosphaeridium*, thirdly *Oligosphaeridium?*, fourthly (and now) *Distatodinium*, fifthly *Bipolaribucina*. Taxonomic junior synonym: *Distatodinium craterum*, according to Fensome et al. (2009, p.31). Age: late Oligocene.

"*pusilla*" Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.53–54, pl.12, figs.1–6. Holotype: Liu Zhili et al., 1992, pl.12, fig.2. Originally *Bipolaribucina*, subsequently *Distatodinium*. **Taxonomic senior synonym:** *Oligosphaeridium minus*, according to He Chengquan et al. (2009, p.116). Age: Early Tertiary.

"*tianjinensis*" Jiabo, 1978, p.59, pl.29, figs.13–14. Holotype: Jiabo, 1978, pl.29, fig.13. **NOW** *Impletosphaeridium*. Originally *Bipolaribucina*, subsequently (and now) *Impletosphaeridium*. Age: Early Tertiary.

"?*tuberculata*" Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.54, pl.12, fig.13. Holotype: Liu Zhili et al., 1992, pl.12, fig.13. **NOW** *Gagiella*. Originally *Bipolaribucina?*, subsequently *Distatodinium*, thirdly (and now) *Gagiella*. Questionable assignment: Zheng Yuefang and Liu Xuexian in Liu Zhili et al. (1992, p.54). Age: Early Tertiary.

BITECTATODINIUM Wilson, 1973, p.351. Taxonomic junior synonym: *Caledonidinium*, by implication in Harland (1977b, p.93), who considered the "type species" of *Caledonidinium*, *Caledonidinium vermiculatum*, to be a taxonomic junior synonym of *Bitectatodinium tepikiense*. Type: Wilson, 1973, fig.2, nos.1–4, as *Bitectatodinium tepikiense*.

?*arborichiarum* Louwye, 1999, p.112,115, pl.1, figs.1–8. Holotype: Louwye, 1999, pl.1, figs.1–3. Questionable assignment: Louwye, 1999, p.112. Age: late Miocene.

heistense Louwye, 2001, p.127,129, fig.5, nos.1–7; text-fig.6. Holotype: Louwye, 2001, fig.5, nos.1–4; text-fig.6. Age: early-middle Miocene.

raedwaldii Head, 1997, p.175, fig.7, nos.7–20; fig.15, nos.15–17; fig.16, nos.1–3. Holotype: Head, 1997, fig.7, nos.7–11. Age: middle Pliocene.

?*serratum* (Head et al., 1989b, p.457, pl.3, figs.14–16) Lentin and Williams, 1993, p.62. Holotype: Head et al., 1989b, pl.3, figs.14–16. Originally *Gongylocladus*, subsequently (and now) *Bitectatodinium?*. Questionable assignment: Lentin and Williams (1993, p.62). Age: late Miocene.

spongium (Zonneveld, 1997, p.322–323,325, pl.1, figs.1–6; text-figs.3A–B) Zonneveld and Jurkschat, 1999, p.158. Emendation: Zonneveld and Jurkschat, 1999, p.158, as *Bitectatodinium spongium*. Holotype: Zonneveld, 1997, pl.1,

figs.1,3,5; Zonneveld and Jurkschat, 1999, pl.1, figs.2–4 (not 1). Originally *Algidasphaeridium*?, subsequently (and now) *Bitectatodinium*. Age: Holocene.

**tepikiense* Wilson, 1973, p.351,353, fig.2, nos.1–12. Holotype: Wilson, 1973, fig.2, nos.1–4. Taxonomic junior synonym: *Caledonidinium vermiculatum*, according to Harland (1977b, p.93). Motile equivalent: *Gonyaulax spinifera* (Claparède and Lachmann, 1859) Diesing, 1866, according to Dale (1976, table 2 — p.45), and *Gonyaulax digitale* (Pouchet) Kofoid according to Lewis et al. (2001). Age: middle Pleistocene.

BITORUS Keupp, 1992a, p.500. Calcareous dinoflagellate genus (see Streng et al., 2004, p.481 and Elbrächter et al., 2008, p.1298). Type: Keupp, 1992a, pl.4, figs.1–2, as *Bitorus turbiformis*.

bulbjergensis Kienel, 1994, p.39–40, pl.6, figs.1–6. Holotype: Kienel, 1994, pl.6, figs.1–2. Age: Danian.

truncus Hildebrand-Habel and Willems, 1999, p.90,93, pl.1, figs.1–7. Holotype: Hildebrand-Habel and Willems, 1999, pl.1, figs.2–6. N.I.A. Age: late Eocene.

**turbiformis* Keupp, 1992a, p.500, pl.4, figs.1–9; pl.5, figs.1–7; text-figs.2a–b. Holotype: Keupp, 1992a, pl.4, figs.1–2. Age: ?late Berriasian–Valanginian.

BITUBERICYSTA Soncini, 1992, p.326. Type: Soncini, 1992, pl.1, figs.1–3, as *Bitubericysta boroujiana*.

**boroujiana* Soncini, 1992, p.326–327,329, pl.1, figs.1–11; pl.2, fig.1; text-figs.4a–b. Holotype: Soncini, 1992, pl.1, figs.1–3. Age: Ypresian.

BLYSMATODINIUM McMinn, 1992, p.434. Type: McMinn, 1992, pl.3, figs.1–3, as *Blysmatodinium argoi*.

**argoi* McMinn, 1992, p.434, pl.3, figs.1–4. Holotype: McMinn, 1992, pl.3, figs.1–3. Age: late Miocene–Pliocene.

BOHAIDINA Jiabo, 1978, p.37. Emendations: Xu Jinli and Mao Shaozhi, 1989, p.215–216; Sun Xuekun, 1994, p.70–71. Taxonomic junior synonym: *Prominangularia*, according to Sun Xuekun (1994, p.70); see *Bohaidina* subgenus *Prominangularia*. Type: Jiabo, 1978, pl.13, fig.1, as *Bohaidina laevigata*.

alveolae Xu Jinli and Mao Shaozhi, 1989, p.216–217,222, pl.1, figs.1–6,7a–b,8–11; pl.3, figs.2–5. Holotype: Xu Jinli and Mao Shaozhi, 1989, pl.1, fig.1. Age: Early Tertiary.

apiciporata Zhu Shenzhao, He Chengquan and Jin Guangxing in He Chengquan et al., 1989, p.40, pl.12, figs.9–14. Holotype: He Chengquan et al., 1989, pl.12, fig.14. Age: Early Tertiary.

apicornicula Jiabo, 1978, p.39, pl.8, fig.7. Holotype: Jiabo, 1978, pl.8, fig.7. Age: Early Tertiary.

"*arcteverrucosa*" Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.55, pl.3, figs.7–10. Holotype: Liu Zhili et al., 1992, pl.3, fig.7. **NOW** *Parabohaidina*. Originally *Bohaidina*, subsequently (and now) *Parabohaidina*. Age: Early Tertiary.

arenula nom. nov. subst. pro *Bohaidina granulata* (Jiabo, 1978) He Chengquan et al. 2009 non *Bohaidina granulata* Jiabo 1978.

Prominangularia granulata Jiabo, 1978, p.47–48, pl.19, figs.7–12; pl.46, figs.1a–b; text-fig.8.

Emendation: Xu Jinli and Mao Shaozhi, 1989, p.303, as *Prominangularia granulata*. Holotype: Jiabo, 1978, pl.19, fig.7. Originally *Prominangularia granulata*, subsequently *Bohaidina granulata* (Jiabo) He Chengquan et al. (combination illegitimate, non *Bohaidina granulata* Jiabo), thirdly (and now) *Bohaidina arenula*. Taxonomic senior synonym: *Bohaidina granulata* Jiabo, according to Sun Xuekun (1994, p.71) — however, He Chengquan et al. (2009, p.454) retained this species separately. The name *Bohaidina arenula* is proposed here as a substitute name for

the illegitimate combination *Bohaidina granulata* (Jiabo) He Chengquan et al. The epithet derives from the Latin arenula, grain of sand. N.I.A. Age: Early Tertiary.

"*aspera*" Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.55, pl.4, figs.10–12. Holotype: Liu Zhili et al., 1992, pl.4, fig.12. **Taxonomic senior synonym:** *Bohaidina granulata* according to He Chengquan et al. (2009, p. 446). He Chengquan et al. (2009, p. 446) also listed this species as a taxonomic junior synonym of the subspecies *Bohaidina granulata* subsp. *biconica*. Age: Early Tertiary.

asymmetrosa Jiabo, 1978, p.39, pl.9, fig.2. Holotype: Jiabo, 1978, pl.9, fig.2. Age: Early Tertiary.

dongyingensis (Jiabo, 1978, p.48, pl.19, figs.13–17) He Chengquan et al., 2009, p.453. Holotype: Jiabo, 1978, pl.19, fig.14. Originally *Prominangularia*, subsequently (and now) *Bohaidina*. Taxonomic senior synonym: *Bohaidina granulata*, according to Sun Xuekun (1994, p.71) — however, He Chengquan et al. (2009, p.453) retained the species separately as *Bohaidina dongyingensis*. Age: Early Tertiary.

dorsiprominentis Jiabo, 1978, p.39, pl.15, figs.1a–e,2a–b,3a–c. Emendation: Xu Jinli and Mao Shaozhi, 1989, p.219. Holotype: Jiabo, 1978, pl.15, figs.1a–e. Originally (and now) *Bohaidina*, subsequently *Bohaidina*?. Questionable assignment: Chen et al. (1988, p.11) — however, Xu Jinli and Mao Shaozhi (1989, p.219) included the species in *Bohaidina* without question. Age: Early Tertiary.

enodis nom. nov. subst. pro *Bohaidina laevigata* (Jiabo, 1978) He Chengquan et al. 2009 non *Bohaidina laevigata* Jiabo 1978.

Prominangularia laevigata Jiabo, 1978, p.48, pl.19, figs.5–6. Holotype: Jiabo, 1978, pl.19, fig.6. Originally *Prominangularia laevigata*, subsequently *Bohaidina laevigata* (Jiabo) He Chengquan et al. (illegitimate combination, non *Bohaidina laevigata* Jiabo), thirdly (and now) *Bohaidina enodis*. Taxonomic senior synonym: *Bohaidina laevigata* Jiabo, according to Sun Xuekun (1994, p.71) — however, He Chengquan et al. (2009, p.454) retained this species separately. The name *Bohaidina enodis* is proposed here as a substitute name for the illegitimate combination *Bohaidina laevigata* (Jiabo) He Chengquan et al. The epithet derives from the Latin enodis, without knots, smooth. Age: Early Tertiary.

fusiforma Jiabo, 1978, p.39–40, pl.8, fig.6. Holotype: Jiabo, 1978, pl.8, fig.6. Age: Early Tertiary.

"*granulata*" (Jiabo, 1978, p.47–48, pl.19, figs.7–12; pl.46, figs.1a–b; text-fig.8) He Chengquan et al., 2009, p.454. Emendation: Xu Jinli and Mao Shaozhi, 1989, p.303. Holotype: Jiabo, 1978, pl.19, fig.7. **Combination illegitimate — senior homonym:** *Bohaidina granulata* Jiabo 1978. **NOW** *Bohaidina arenula*. Originally *Prominangularia granulata*, subsequently *Bohaidina granulata* (Jiabo) He Chengquan et al. (combination illegitimate, non *Bohaidina granulata* Jiabo), thirdly (and now) *Bohaidina arenula*. Taxonomic senior synonym: *Bohaidina granulata* Jiabo, according to Sun Xuekun (1994, p.71) — however, He Chengquan et al. (2009, p.454) retained this species separately. Age: Early Tertiary.

granulata Jiabo, 1978, p.40–41, pl.8, fig.8; pl.11, figs.1–3,5; pl.12, figs.1–8; pl.13, figs.4–9. Emendation: Xu Jinli and Mao Shaozhi, 1989, p.219. Holotype: Jiabo, 1978, pl.12, fig.8. Taxonomic junior synonyms: *Prominangularia granulata* and *Prominangularia dongyingensis*, both according to Sun Xuekun (1994, p.71) — however He Chengquan et al. (2009, p.453–454) retained both species separately; and *Bohaidina aspera* and *Bohaidina microgranulosa*, both according to He Chengquan et al. (2009, p. 446). Junior homonym: *Bohaidina granulata* (Jiabo) He Chengquan et al. 2009. Age: Early Tertiary.

subsp. *biconica* Jiabo, 1978, p.40, pl.12, figs.1,4; pl.13, figs.4–9. Holotype: Jiabo, 1978, pl.13, fig.7. He Chengquan et al. (2009, p. 446) listed *Bohaidina aspera* as a taxonomic synonym of this subspecies as well as of the species *Bohaidina granulata*. Age: Early Tertiary.

subsp. *granulata*. Autonym. Holotype: Jiabo, 1978, pl.12, fig.8.

subsp. *minor* Jiabo, 1978, p.40–41, pl.11, figs.1–3. Holotype: Jiabo, 1978, pl.11, fig.2. Age: Early Tertiary.

"laevigata" (Jiabo, 1978, p.48, pl.19, figs.5–6) He Chengquan et al., 2009, p.454. Holotype: Jiabo, 1978, pl.19, fig.6. **Combination illegitimate — senior homonym:** *Bohaidina laevigata* Jiabo 1978. **NOW** *Bohaidina enodis*. Originally *Prominangularia laevigata*, subsequently *Bohaidina laevigata* (Jiabo) He Chengquan et al. (illegitimate combination, non *Bohaidina laevigata* Jiabo), thirdly (and now) *Bohaidina enodis*. Taxonomic senior synonym: *Bohaidina laevigata* Jiabo, according to Sun Xuekun (1994, p.71)) — however, He Chengquan et al. (2009, p.454) retained this species separately. Age: Early Tertiary.

**laevigata* Jiabo, 1978, p.38–39, pl.13, figs.1–3; pl.14, figs.1–10. Emendation: Xu Jinli and Mao Shaozhi, 1989, p.219–220. Holotype: Jiabo, 1978, pl.13, fig.1. Taxonomic junior synonym: *Prominangularia laevigata*, according to Sun Xuekun (1994, p.71) — however, He Chengquan et al. (2009, p. 454) retained that species separately. Junior homonym: *Bohaidina granulata* (Jiabo) He Chengquan et al., 2009. Age: Early Tertiary.

subsp. *biconica* Jiabo, 1978, p.38, pl.13, fig.3. Holotype: Jiabo, 1978, pl.13, fig.3. Age: Early Tertiary.

"forma *laevigata*". Autonym. Holotype: Jiabo, 1978, pl.13, fig.1. **Now redundant.** Xu Jinli and Mao Shaozhi (1989, p.220) gave the citation "*Bohaidina laevigata* forma *laevigata* Jiabo, 1978, stat. et emend. nov."

subsp. *laevigata*. Autonym. Holotype: Jiabo, 1978, pl.13, fig.1. Lentin and Williams (1993, p.63) retained this taxon at subspecific rank.

"forma *minor*" (Jiabo, 1978, p.38–39, pl.14, figs.1–6) Xu Jinli and Mao Shaozhi, 1989, p.220. Emendation: Xu Jinli and Mao Shaozhi, 1989, p.220, as *Bohaidina laevigata* forma *minor*. Holotype: Jiabo, 1978, pl.14, fig.2. **NOW** *Bohaidina laevigata* subsp. *minor*. Originally (and now) *Bohaidina laevigata* subsp. *minor*, subsequently *Bohaidina laevigata* forma *minor*. Age: Early Tertiary.

subsp. *minor* Jiabo, 1978, p.38–39, pl.14, figs.1–6. Emendation: Xu Jinli and Mao Shaozhi, 1989, p.220, as *Bohaidina laevigata* forma *minor*. Holotype: Jiabo, 1978, pl.14, fig.2. Originally (and now) *Bohaidina laevigata* subsp. *minor*, subsequently *Bohaidina laevigata* forma *minor*. Lentin and Williams (1993, p.63) retained this taxon at subspecific rank. Age: Early Tertiary.

"laxituberculata" Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.57, pl.3, fig.13. Holotype: Liu Zhili et al., 1992, pl.3, fig.13. **Taxonomic senior synonym:** *Parabohaidina tuberculata* He Chengquan, according to He Chengquan et al. (2009, p.471). Age: Early Tertiary.

micirugosa (He Chengquan, 1984b, p.158, pl.2, figs.12–17) He Chengquan et al., 2009, p.454. Holotype: He Chengquan, 1984b, pl.2, fig.14. Originally *Prominangularia*, subsequently (and now) *Bohaidina*. Taxonomic senior synonym: *Bohaidina rugosa*, according to Sun Xuekun (1994, p.71) — however, He Chengquan et al. (2009, p.454) retained this species separately. Age: Tertiary.

"microgranulosa" Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.57, pl.4, figs.5–8. Holotype: Liu Zhili et al., 1992, pl.4, fig.6. **Taxonomic senior synonym:** *Bohaidina granulata*, according to He Chengquan et al. (2009, p. 446). Age: Early Tertiary.

microreticulata Jiabo, 1978, p.41, pl.10, figs.1–8b. Emendation: Xu Jinli and Mao Shaozhi, 1989, p.220–221. Holotype: Jiabo, 1978, pl.10, fig.2. Age: Early Tertiary.

minuta Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.58–59, pl.1, figs.15–18 ex He Chengquan et al., 2009, p.449. Holotype: Liu Zhili et al., 1992, pl.1, fig.17, designated by He Chengquan et al. (2009, p.449). This name was not validly published in Liu Zhili et al. (1992) as the type was not designated; the authors apparently cited both illustrated specimens as type (Mao Shaozhi, personal communication). Age: Early Tertiary.

primitiva Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.58, pl.5, figs.12–13. Holotype: Liu Zhili et al., 1992, pl.5, fig.13. Age: Early Tertiary.

prolata Zhu Shenzhao, He Chengquan and Jin Guangxing in He Chengquan et al., 1989, p.42, pl.13, figs.1–2. Holotype: He Chengquan et al., 1989, pl.13, fig.2. Age: Early Tertiary.

reticulata (Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.79–80, pl.5, figs.14–17; text-fig.7) Fensome and Williams, 2004, p.86. Holotype: Liu Zhili et al., 1992, pl.5, fig.17. Originally *Prominangularia*, subsequently (and now) *Bohaidina*. He Chengquan et al. (2009, p.455) also proposed this combination. Age: Early Tertiary.

retirugosa Jiabo, 1978, p.41, pl.7, figs.7–11; pl.8, figs.1–5; pl.9, figs.3–9; pl.10, figs.9–10; pl.11, figs.7–12. Emendation: Xu Jinli and Mao Shaozhi, 1989, p.221. Holotype: Jiabo, 1978, pl.9, fig.8. Age: Early Tertiary.

subsp. *brachorhombica* Jiabo, 1978, p.41–42, pl.10, figs.9–10. Holotype: Jiabo, 1978, pl.10, fig.9. Age: Early Tertiary.

subsp. *minor* Jiabo, 1978, p.42, pl.11, figs.7–12. Holotype: Jiabo, 1978, pl.11, fig.9. Age: Early Tertiary.

subsp. *retirugosa*. Autonym. Holotype: Jiabo, 1978, pl.9, fig.8.

rivularisa Jiabo, 1978, p.42, pl.11, fig.4. Holotype: Jiabo, 1978, pl.11, fig.4. Age: Early Tertiary.

rugosa Jiabo, 1978, p.42, pl.9, fig.1. Holotype: Jiabo, 1978, pl.9, fig.1. Taxonomic junior synonym: *Prominangularia micirugosa*, according to Sun Xuekun (1994, p.71) — however, He Chengquan et al. (2009, p.454) retained that species separately. Age: Early Tertiary.

spinosa Xu Jinli and Mao Shaozhi, 1989, p.217–218,222, pl.1, figs.12–16; pl.2, figs.1–2; pl.3, fig.1; text-figs.2–4. Holotype: Xu Jinli and Mao Shaozhi, 1989, pl.1, fig.12. Age: Early Tertiary.

"forma *fusiforma*" Xu Jinli and Mao Shaozhi, 1989, p.218, pl.1, figs.14–15; text-fig.3. Holotype: Xu Jinli and Mao Shaozhi, 1989, pl.1, fig.14. **NOW** *Bohaidina spinosa* subsp. *fusiforma*. Originally *Bohaidina spinosa* forma *fusiforma*, subsequently (and now) *Bohaidina spinosa* subsp. *fusiforma*. Age: Early Tertiary.

subsp. *fusiforma* (Xu Jinli and Mao Shaozhi, 1989, p.218, pl.1, figs.14–15; text-fig.3) Lentin and Williams, 1993, p.64. Holotype: Xu Jinli and Mao Shaozhi, 1989, pl.1, fig.14. Originally *Bohaidina spinosa* forma *fusiforma*, subsequently (and now) *Bohaidina spinosa* subsp. *fusiforma*. Age: Early Tertiary.

"forma *quadrata*" Xu Jinli and Mao Shaozhi, 1989, p.218, pl.1, fig.16; pl.2, figs.1–2; text-fig.4. Holotype: Xu Jinli and Mao Shaozhi, 1989, pl.2, fig.2. **NOW** *Bohaidina spinosa* subsp. *quadrata*. Originally *Bohaidina spinosa* forma *quadrata*, subsequently (and now) *Bohaidina spinosa* subsp. *quadrata*. Age: Early Tertiary.

subsp. *quadrata* (Xu Jinli and Mao Shaozhi, 1989, p.218, pl.1, fig.16; pl.2, figs.1–2; text-fig.4) Lentin and Williams, 1993, p.64. Holotype: Xu Jinli and Mao Shaozhi, 1989, pl.2, fig.2. Originally *Bohaidina spinosa* forma *quadrata*, subsequently (and now) *Bohaidina spinosa* subsp. *quadrata*. Age: Early Tertiary.

"forma *spinosa*". Autonym. Holotype: Xu Jinli and Mao Shaozhi, 1989, pl.1, fig.12. **Now redundant**.

subsp. *spinosa*. Autonym. Holotype: Xu Jinli and Mao Shaozhi, 1989, pl.1, fig.12.

tuberculata Sun Xuekun, 1994, p.71, pl.4, figs.6–8. Holotype: Sun Xuekun, 1994, pl.4, fig.6. He Chengquan et al. (2009, p.455) incorrectly considered *Bohaidina tuberculata* to be a new combination. Age: late Eocene.

verrugosa (Jiabo, 1978, p.45, pl.17, fig.10) Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.58. Holotype: Jiabo, 1978, pl.17, fig.10. Originally *Parabohaidina*, subsequently (and now) *Bohaidina*. Age: Early Tertiary.

"**BOHAIDINA** subgenus **BOHAIDINA**". Autonym. **Name redundant**. He Chengquan et al. (2009, p.444–453) included the following species in this subgenus: *Bohaidina alveolae*, *Bohaidina apiciporata*, *Bohaidina apicornicula*, *Bohaidina asymmetrosa*, *Bohaidina dorsiprominentis*, *Bohaidina fusiformis*, *Bohaidina granulata*, *Bohaidina laevigata*, *Bohaidina microreticulata*, *Bohaidina minuta*, *Bohaidina primitiva*, *Bohaidina prolata*, *Bohaidina retirugosa*, *Bohaidina rivularisa*, *Bohaidina rugosa* and *Bohaidina spinosa*. Type: Jiabo, 1978, pl.13, fig.1, as *Bohaidina laevigata*.

"**BOHAIDINA** subgenus **PROMINANGULARIA**" (Jiabo, 1978, p.47) He Chengquan et al., 2009, p.453. Emendation: Xu Jinli and Mao Shaozhi, 1989, p.303, as *Prominangularia*. **Combination not validly published**: no clear indication of rank. We assume that the rank of subgenus was implied by He Chengquan et al. (2009) and so treat it as such here; but in doing so do not intend to validate the name. Chen et al. (1988, p.23) included this taxon (as *Prominangularia*) in the acritarchs; however, Lentin in Lentin and Williams (1989, p.304) considered it to be a freshwater ceratioid dinoflagellate cyst. He Chengquan et al. (2009, p.453–455) included the following species in this subgenus: *Bohaidina dongyingensis*, *Bohaidina granulata*, *Bohaidina laevigata*, *Bohaidina micirugosa*, *Bohaidina reticulata* and *Bohaidina tuberculata*. Type: Jiabo, 1978, pl.19, fig.7, as *Prominangularia granulata*.

BONBONADINIUM Helby and Partridge, 2001, p.221. Type: Helby and Partridge, 2001, figs.1K–L, as *Bonbonadinium granulatum*.

***granulatum** Helby and Partridge, 2001, p.221,223–224, figs.1A–N. Holotype: Helby and Partridge, 2001, figs.1K–L. Helby and Partridge (2001, p.223) attributed this name to an unpublished thesis by F.M. Parker. Age: Tithonian.

"**BONETIELLA**" Trejo, 1983, p.6. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1298, who noted that the cyst wall is pithonelloid and so dinoflagellate affinity is questionable). **Name illegitimate — senior homonym**: *Bonetiella* Rzedowski, 1957, an anacardiacean. **Taxonomic senior synonym**: *Bonetocardiella*, provisionally, according to Elbrächter et al., 2008, p.1298). If considered a separate genus, a new name would be required. Type: Trejo, 1983, pl.36, fig.1, as *Bonetiella peregrinaensis*.

"***peregrinaensis**" Trejo, 1983, p.6, pl.36, figs.1–6; pl.44, figs.5,7,9. Holotype: Trejo, 1983, pl.36, fig.1. **NOW** *Bonetocardiella*. Originally *Bonetiella* (generic name illegitimate), subsequently (and now) *Bonetocardiella*. Following I.C.N. Article 55.1, the species name *Bonetiella prergrinaensis* is validly published even though the generic name *Bonetiella* is illegitimate. Age: Albian.

BONETOCARDIELLA Dufour, 1968, p.1948. Emendations: Villain, 1975, p.196; Masters and Scott, 1978, p.215. Calcareous dinoflagellate genus (see Kienel, 1994, p.53 and Elbrächter et al., 2008, p.1298, the latter noting that the cyst wall is pithonelloid and so dinoflagellate affinity is questionable). Taxonomic junior synonym: *Bonetiella* (name illegitimate), provisionally according to Elbrächter et al. (2008, p.1289). Nomenclatural junior synonym: *Conejoconus*, which has the same proposed type (see also Villain, 1975, p.196). Fensome and Williams (2004) considered this generic name to be not validly published because it lacked a type. However, as it was published under the I.C.Z.N., Elbrächter et al. (2008, p.1289) implied that it can be considered validly published. Type: not designated; "type species" — *Stomiosphaera conoidea*.

betica (Azéma, 1966, p.838–840, pl.1, figs.7–8; pl.2, fig.9) Dufour, 1968, p.1948. Holotype: information not available. Originally *Stomiosphaera*, subsequently (and now) *Bonetocardiella*. Fensome and Williams (2004) considered this name to be not validly published on the incorrect basis that the generic name is not validly published. Villain (1977, p.155) indicated that this species is attributable to *Conorbina* or some other genus of benthic foraminifer. Age: information not available.

"**cardiiformis**" (Ayala Castañares and Seigle, 1962, p.16–17, pl.1, figs.1–5,7–9) Dufour, 1968, p.1948. Holotype: information not available. Originally *Stomiosphaera*, subsequently *Bonetocardiella*, thirdly *Conejoconus* (generic name illegitimate). **Taxonomic senior synonym**: *Leptodermella maestrichtiensis* (Appendix A), according to

Villain (1975, p.198). Taxonomic junior synonym: *Bonetocardiella conoidea*, according to Andri (1972, p.15) — however, the latter species has generally been retained as the type of *Bonetocardiella*. Dufour did not reference the basionym when proposing this combination, but this was not a requirement since he was using zoological nomenclature. Fensome and Williams (2004) considered this name to be not validly published on the incorrect basis that the generic name is not validly published. Age: information not available.

**conoidea* (Bonet, 1956, p.454–456, pl.22, figs.1[part]–2; pl.27, fig.1[part]) Dufour, 1968, p.1948. Holotype: not designated. Originally *Stomiosphaera*, subsequently (and now) *Bonetocardiella*, thirdly *Conejoconus* (generic name illegitimate). Taxonomic junior synonym: *Stomiosphaera cardiiformis*, according to Andri (1972, p.15) — however that species was later considered to be a taxonomic junior synonym of *Leptodermella* (now *Bonetocardiella*) *maastrichtiensis*. Fensome and Williams (2004) indicated that designation of a holotype was a requirement under the I.C.Z.N. at the time that Bonet (1956) proposed this name; however, Elbrächter et al. (2008, p.1289) implied that it can be considered validly published as the name was proposed under the I.C.Z.N. Elbrächter et al. (2008, p.1289) cited "fig. 4" as the type of *Bonetocardiella*, but it is not clear to which reference this pertained to. Dufour did not reference the basionym when proposing this combination, but this was not a requirement since he was using zoological nomenclature. Age: Middle Cretaceous.

"var. *extraflexa*" Andri, 1972, p.16, pl.1, fig.12; pl.2, figs.4–5; text-fig.2, nos.12,16–17,30,34–35,42,49,51.
Name not validly published: holotype not designated. Age: Albian–Cenomanian.

"*maastrichtiensis*" (Visser, 1951, p.211, pl.7, fig.13) Villain, 1975, p.198. Holotype: Visser, 1951, pl.7, fig.13. **NOW** *Inocardion*. Originally *Leptodermella* (Appendix A), subsequently *Bonetocardiella*, thirdly (and now) *Inocardion*. Taxonomic junior synonym: *Stomiosphaera cardiiformis*, according to Villain (1975, p.198). Fensome and Williams (2004) considered this combination to be not validly published on the incorrect basis that the generic name is not validly published. Age: Maastrichtian.

"*neumanniae*" Villain, 1975, p.199–200, pl.2, figs.7–8; pl.6, figs.1–17, pl.1, figs.1d–e; tableau 2, figs.1–12; tableau 15, fig.2. Holotype: Villain, 1975, pl.6, fig.4. **NOW** *Inocardion*. Originally *Bonetocardiella*, subsequently (and now) *Inocardion*. Fensome and Williams (2004) considered this name to be not validly published on the incorrect basis that the generic name is not validly published. Age: Late Cretaceous.

"*paulaworstelliae*" Bolli, 1978b, p.912, pl.1, figs.1–12. Holotype: Bolli, 1978b, pl.1, figs.7–9. **NOW** *Heptasphaera*. Originally *Bonetocardiella*, subsequently (and now) *Heptasphaera*. Fensome and Williams (2004) considered this combination to be not validly published on the incorrect basis that the generic name is not validly published. Age: Oxfordian–Kimmeridgian.

peregrinaensis (Trejo, 1983, p.6, pl.36, figs.1–6; pl.44, figs.5,7,9) Williams and Fensome, 2016, p.140. Holotype: Trejo, 1983, pl.36, fig.1. Originally *Bonetiella* (generic name illegitimate), subsequently (and now) *Bonetocardiella*. Age: Albian.

ponce-de-leoni Trejo, 1983, p.6–7, pl.36, figs.7–9; pl.37, figs.1–2. Holotype: Trejo, 1983, pl.37, fig.1.
 Age: Albian–Cenomanian.

vachardii Villain, 1977, p.155–156, pl.5, figs.1–3,5–7. Holotype: Villain, 1977, pl.5, figs.5–6. Fensome and Williams (2004) considered this name to be not validly published on the incorrect basis that the generic name is not validly published. Age: Maastrichtian–?Danian.

"*williamsonii*" Bolli, 1978b, p.912–913, pl.2, figs.1–12; pl.3, figs.1–12. Holotype: Bolli, 1978b, pl.2, figs.1–3. **NOW** *Pirumella*. Originally *Bonetocardiella*, subsequently *Pithonella*, thirdly *Obliquipithonella*, fourthly *Orthopithonella*, fifthly (and now) *Pirumella*. Fensome and Williams (2004) considered this name to be not validly published on the incorrect basis that the generic name is not validly published. Age: Oxfordian–Kimmeridgian.

BOREOCYSTA Stover and Evitt, 1978, p.22–23. Emendation: Århus, 1992, p.306. Type: Wiggins, 1969, pl.2, figs.1–2, as *Omatia butticula*.

**butticula* (Wiggins, 1969, p.150, pl.2, figs.1–5) Stover and Evitt, 1978, p.23. Holotype: Wiggins, 1969, pl.2, figs.1–2; Fensome et al., 1993a, figs.1–2 — p.1005. Originally *Omatia*, subsequently (and now) *Boreocysta*. Age: Neocomian, ?late Valanginian or early Hauterivian.

isfjordica Århus, 1992, p.310, figs.4A–I. Holotype: Århus, 1992, fig.4E. Age: Valanginian.

"**BOSEA**" He Chengquan and Qian Zeshu, 1979, p.177–178. Name illegitimate — senior homonym: *Bosea* Srivastava, 1975, p.19. Substitute name: *Bosedinia*. Type: He Chengquan and Qian Zeshu, 1979, pl.1, fig.2, as *Bosea granulata*.

"*granorugosa*" He Chengquan and Qian Zeshu, 1979, p.178–179, pl.1, figs.12–13. Holotype: He Chengquan and Qian Zeshu, 1979, pl.1, fig.2. **NOW** *Bosedinia*. Originally *Bosea* (generic name illegitimate), subsequently (and now) *Bosedinia*. Age: late Eocene–Oligocene.

"**granulata*" He Chengquan and Qian Zeshu, 1979, p.178, pl.1, figs.1–5. Holotype: He Chengquan and Qian Zeshu, 1979, pl.1, fig.2. **NOW** *Bosedinia*. Originally *Bosea* (generic name illegitimate), subsequently (and now) *Bosedinia*. Age: late Eocene–Oligocene.

"*laevigata*" Jiabo, 1978, p.126–127, pl.32, fig.23 ex He Chengquan and Qian Zeshu, 1979, p.179. Holotype: Jiabo, 1978, pl.32, fig.23. **NOW** *Bosedinia laevigata*. Originally *Palaeostomocystis laevigata* (name illegitimate; Appendix A), subsequently *Bosea laevigata* (generic name illegitimate), thirdly *Fromea laevigata* (combination illegitimate; Appendix A), fourthly *Fromea psilata* (Appendix A), fifthly (and now) *Bosedinia laevigata*. The name *Palaeostomocystis laevigata* was illegitimate in Jiabo (1978) since this name is preoccupied. By "transferring" the species to *Bosea*, He Chengquan and Qian Zeshu (1979) effectively created a "new name". Following I.C.N. Article 55.1, the species name *Bosea laevigata* is validly published even though the generic name *Bosea* is illegitimate. Age: Early Tertiary.

"*operculata*" (Jiabo, 1978, p.107, pl.40, figs.17–20; pl.48, figs.3a–b) He Chengquan and Qian Zeshu, 1979, p.179. Holotype: Jiabo, 1978, pl.40, fig.19. **Combination not validly published:** basionym not fully referenced. **NOW** *Bosedinia*. Originally *Rugasphaera* (Appendix A), subsequently *Bosea* (generic name illegitimate), thirdly (and now) *Bosedinia*. Age: late Eocene–Oligocene.

BOSEDINIA He Chengquan, 1984b, p.172–173. Emendations: Chen et al., 1988, p.12–13; Prauss, 2012, p.286,289. Substitute name for *Bosea* He Chengquan and Qian Zeshu, 1979, p.177–178 (an illegitimate name). Type: He Chengquan and Qian Zeshu, 1979, pl.1, fig.2, as *Bosea granulata*.

alveolata Prauss, 2012, p.289, figs.2A–F,M,3A–H,N–O. Holotype: Prauss, 2012, fig.2A. Age: late Turonian–late Coniacian.

elegans He Chengquan, 1991, p.172–173, pl.6, fig.3. Holotype: He Chengquan, 1991, pl.6, fig.3. Age: early Eocene.

"subsp. *minor*" Tang in Cai Zhiguo et al., 1998, p.253, pl.85, figs.9–10 Holotype: Cai Zhiguo et al., 1998, pl.85, fig.9. **Name not validly published: no Latin or English description or diagnosis.** Age: early Oligocene.

granorugosa (He Chengquan and Qian Zeshu, 1979, p.178–179, pl.1, figs.12–13) He Chengquan, 1984b, p.173. Holotype: He Chengquan and Qian Zeshu, 1979, pl.1, fig.13. Originally *Bosea* (generic name illegitimate), subsequently (and now) *Bosedinia*. Age: late Eocene–Oligocene.

**granulata* (He Chengquan and Qian Zeshu, 1979, p.178, pl.1, figs.1–5) He Chengquan, 1984b, p.172. Holotype: He Chengquan and Qian Zeshu, 1979, pl.1, fig.2. Originally *Bosea* (generic name illegitimate), subsequently (and now) *Bosedinia*. Taxonomic junior synonym: *Batiacasphaera tenulla*, according to He Chengquan et al. (2009, p.457). Age: late Eocene–Oligocene.

hepuensis He Chengquan, 1984b, p.173–174, pl.8, figs.9–11. Holotype: He Chengquan, 1984b, pl.8, fig.10. Age: late Oligocene–early Miocene.

infragranulata He Chengquan, 1984b, p.174, pl.6, figs.17–23. Holotype: He Chengquan, 1984b, pl.6, fig.17. Age: late Oligocene–early Miocene.

kuantanensis Cole, 1992, p.188, pl.2, fig.4; pl.3, figs.1–2; text-figs.3I,4A–B. Holotype: Cole, 1992, pl.3, fig.1. Age: late Oligocene–middle Miocene.

laevigata (Jiabo, 1978, p.126–127, pl.32, fig.23 ex He Chengquan and Qian Zeshu, 1979, p.179) He Chengquan, 1984b, p.174. Holotype: Jiabo, 1978, pl.32, fig.23. Originally *Palaeostomocystis laevigata* (name illegitimate; Appendix A), subsequently *Bosea laevigata* (generic name illegitimate), thirdly *Fromea laevigata* (combination illegitimate; Appendix A), fourthly *Fromea psilata* (Appendix A), fifthly (and now) *Bosedinia laevigata*. The name *Palaeostomocystis laevigata* was illegitimate in Jiabo (1978), since that name is preoccupied. See *Bosea laevigata* for further discussion. Age: Early Tertiary.

subsp. *laevigata*. Autonym. Holotype: Jiabo, 1978, pl.32, fig.23.

"var. *laevigata*". Autonym. Holotype: Jiabo, 1978, pl.32, fig.23. **Now redundant.**

subsp. *minor* (He Chengquan, 1991, p.173, pl.6, fig.19) He Chengquan et al., 2009, p.459. Holotype: He Chengquan, 1991, pl.6, fig.19. Originally *Bosedinia minor*, subsequently (and now) *Bosedinia laevigata* subsp. *minor*. Taxonomic junior synonym: *Bosedinia laevigata* var. *minuta*, according to He Chengquan et al. (2009, p.459). Although *Bosedinia laevigata* var. *minuta* was the first infraspecific taxon in *Bosedinia laevigata*, it was at variety rather than subspecific rank. At subspecific rank, the epithet *minor* has priority. Age: early Eocene.

"var. *minuta*" Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.59, pl.15, figs.14–17. Holotype: Liu Zhili et al., 1992, pl.15, fig.14. **Taxonomic senior synonym:** *Bosedinia laevigata* subsp. *minor*, according to He Chengquan et al. (2009, p.459). Although *Bosedinia laevigata* var. *minuta* was the first infraspecific taxon in *Bosedinia laevigata*, it was at variety rather than subspecific rank. At subspecific rank, the epithet *minor* has priority. Age: Early Tertiary.

liuzhuangensis Qian Zeshu et al., 1986, p.22, pl.1, fig.36. Holotype: Qian Zeshu et al., 1986, pl.1, fig.36. Age: Paleocene–Eocene.

micirugosa He Chengquan, 1984b, p.174–175, pl.7, figs.16–20; pl.8, figs.6–8. Holotype: He Chengquan, 1984b, pl.7, fig.16. Age: latest Eocene–early Miocene.

subsp. *micirugosa*. Autonym. Holotype: He Chengquan, 1984b, pl.7, fig.16.

subsp. *minor* He Chengquan, 1984b, p.175, pl.8, figs.6–8. Holotype: He Chengquan, 1984b, pl.8, fig.8. Age: middle Oligocene–early Miocene.

microgranulosa (Jain, 1977b, p.176, pl.6, fig.74) Jansonius, 1989, p.67. Holotype: Jain, 1977b, pl.6, fig.74. Originally *Fromea* (Appendix A), subsequently (and now) *Bosedinia*. Age: early Albian.

"*minor*" He Chengquan, 1991, p.173, pl.6, fig.19. Holotype: He Chengquan, 1991, pl.6, fig.19. **NOW** *Bosedinia laevigata* subsp. *minor*. Originally *Bosedinia minor*, subsequently (and now) *Bosedinia laevigata* subsp. *minor*. Taxonomic junior synonym: *Bosedinia laevigata* var. *minuta*, according to He Chengquan et al. (2009, p.459). Age: early Eocene.

obovata (Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.74, pl.16, figs.7–12; text-fig.5) He Chengquan et al., 2009, p.460. Holotype: Liu Zhili et al., 1992, pl.16, fig.10; text-fig.5. Originally *Liaohedina*, subsequently (and now) *Bosedinia*. Age: Early Tertiary.

operculata (Jiabo, 1978, p.107, pl.40, figs.17–20; pl.48, figs.3a–b) He Chengquan, 1984b, p.175. Holotype: Jiabo, 1978, pl.40, fig.19. Originally *Rugasphaera* Jiabo (Appendix A), subsequently *Bosea* (combination illegitimate), thirdly (and now) *Bosedinia*. Age: late Eocene–Oligocene.

radiata He Chengquan, 1984b, p.176, pl.8, fig.23. Holotype: He Chengquan, 1984b, pl.8, fig.23. Age: Oligocene.

reticulata Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.60, pl.15, figs.18–20,22; pl.16, figs.1–3,5–6. Holotype: Liu Zhili et al., 1992, pl.16, fig.1. Age: Early Tertiary.

retirugosa He Chengquan, 1984b, p.175, pl.8, figs.1–4. Holotype: He Chengquan, 1984b, pl.8, fig.4. Age: Oligocene.

scabrata (Jiabo, 1978, p.127, pl.32, figs.24–25; pl.46, figs.3a–b) Song Zhichen et al., 1985, p.46. Holotype: Jiabo, 1978, pl.32, fig.25. Originally *Palaeostomocystis* (Appendix A), subsequently *Fromea* (Appendix A), thirdly (and now) *Bosedinia*. Jansonius (1989, p.67–68) also proposed this combination. Age: Early Tertiary.

sinensis He Chengquan, 1984b, p.176, pl.7, figs.9–13. Holotype: He Chengquan, 1984b, pl.7, fig.12. Age: late Oligocene–early Miocene.

spinosa Prauss, 2012, p.289–290, figs.2J–K,N,3I–J. Holotype: Prauss, 2012, fig.2K. Age: late Turonian.

tarfayensis Prauss, 2012, p.290, figs.2H–I,3K–L. Holotype: Prauss, 2012, fig.2I. Age: late Turonian.

tuberculata He Chengquan, 1984b, p.176, pl.6, fig.24. Holotype: He Chengquan, 1984b, pl.6, fig.24. Age: middle-late Oligocene.

verrurugosa He Chengquan, 1984b, p.176–177, pl.8, fig.5. Holotype: He Chengquan, 1984b, pl.8, fig.5. Age: middle-late Oligocene.

whelkaris Cole, 1992, p.188,190, pl.3, figs.3–5; text-figs.4C–D. Holotype: Cole, 1992, pl.3, fig.4; text-fig.4D. Age: late Oligocene–middle Miocene.

BOURKIDINIUM Morgan, 1975, p.160. Emendation: Nøhr-Hansen, 1993, p.47–48. Type: Morgan, 1975, pl.2, figs.2a–c, as *Bourkidinium granulatum*.

?*cylindricum* Dolding, 1992, p.313,315, figs.3c–e,4a–d,h. Holotype: Dolding, 1992, figs.3c,4a–c. Questionable assignment: Dolding (1992, p.313). Contrary to the statement of Lentin and Williams (1993, p.66), the repository for the holotype of this species was cited in Dolding (1992, p.313). Age: late Campanian.

elegans Torricelli, 1997, p.343,345, pl.2, figs.1–9. Holotype: Torricelli, 1997, pl.2, fig.4. Age: early Hauterivian.

**granulatum* Morgan, 1975, p.160–161, pl.2, figs.2a–c. Emendations: Nøhr-Hansen, 1993, p.48,50; Torricelli, 2000, p.261. Holotype: Morgan, 1975, pl.2, figs.2a–c; Fensome et al., 1996, figs.1–3 — p.2141; Fauconnier and Masure, 2004, pl.11, fig.7. Age: late Aptian–early Albian.

psilatam Singh, 1983, p.125, pl.42, figs.8–9; pl.43, fig.1. Holotype: Singh, 1983, pl.42, fig.8; Fauconnier and Masure, 2004, pl.11, fig.6. Age: early Cenomanian.

BRADLEYELLA Woollam, 1983, p.194. Type: Fenton et al., 1980, pl.14, fig.3; text-figs.3A–B, as *Dichadogonyaulax adela*.

**adela* (Fenton et al., 1980, p.155–156, pl.14, figs.1–4; text-figs.3A–B) Woollam, 1983, p.194. Holotype: Fenton et al., 1980, pl.14, fig.3; text-figs.3A–B; Fensome et al., 1993a, fig.1 — p.883. Originally *Dichadogonyaulax*,

subsequently *Ctenidodinium*, thirdly (and now) *Bradleyella*. Fenton et al. (1980) cited the epithet as "*adelos*", the Greek adjective for "obscure". Since taxon names are to be treated as Latin under the I.C.N., the epithet should be rendered as "*adela*", in agreement with the feminine gender of the generic name; "*adelum*" would be the neuter form, and "*adelus*" the masculine form. Age: late Bajocian.

"**BREEDOXELLA**" Norris, 1978, p.12. **Taxonomic senior synonym:** *Mendicodinium*, according to Stover and Williams (1987, p.45). Type: Brideaux, 1977, pl.7, figs.8–9, as *Mendicodinium caperatum*.

"**caperata*" (Brideaux, 1977, p.19–20, pl.7, figs.7–11) Norris, 1978, p.12. Holotype: Brideaux, 1977, pl.7, figs.8–9; Fensome et al., 1993a, figs.1–2 — p.1025. **NOW** *Mendicodinium*. Originally (and now) *Mendicodinium*, subsequently *Breedoxella*. Age: Aptian–early Albian.

BRIGANTEDINIUM Reid, 1977, p.432 ex Lentin and Williams, 1993, p.67. Originally *Brigantedinium* (name not validly published), subsequently *Protoperidinium* subgenus *Protoperidinium* section *Brigantedinium* (name not validly published), thirdly (and now) *Brigantedinium*. The generic name *Brigantedinium* was not validly published in Reid (1977) since the name of the "type species", *Brigantedinium simplex* (which see), was not validly published, there being no accompanying Latin diagnosis, a requirement prior to 2012 since this species is based on living material (I.C.N. Article 39). The name *Brigantedinium* was not validly published in Harland et al. (1980, p.22), since these authors did not provide a direct reference to the diagnosis for the genus (I.C.N. Article 33.1). By providing complete citations for the names *Brigantedinium* and *Brigantedinium simplex*, including Latin diagnoses, Lentin and Williams (1993, p.67) validated both names. Reid (1977, p.432) provided a Latin diagnosis. Type: Wall, 1965b, text-figs.7,20, as *Chytroeisphaeridia simplex*.

asymmetricum Matsuoka, 1987, p.56, pl.5, figs.10–12; text-fig.4B ex Head, 1996b, p.1231. Holotype: Matsuoka, 1987, pl.5, figs.10–11. This name was not validly published in Matsuoka (1987, p.56) since the generic name *Brigantedinium* was not validly published at that time. Age: Holocene.

auranteum Reid, 1977, p.432–433, pl.1, fig.1 ex Lentin and Williams, 1993, p.67. Holotype: Reid, 1977, pl.1, fig.1. This species name was not validly published in Reid (1977), since the generic name *Brigantedinium* was not validly published at that time. Age: Holocene.

cariacoense (Wall, 1967, p.113, pl.16, figs.13–14) Lentin and Williams, 1993, p.67. Emendation: Matsuoka, 1987, p.53, as *Brigantedinium cariacense*. Holotype: Wall, 1967, pl.16, fig.14. Originally *Chytroeisphaeridia*, subsequently (and now) *Brigantedinium*. Motile equivalent: *Protoperidinium avellana* (Meunier, 1919) Balech, 1974, according to Wall and Dale (1967, p.350) and Harland (1981, p.68). This combination was not validly published in Reid (1977, p.434) since the generic name *Brigantedinium* was not validly published at that time. Age: Quaternary.

grande Matsuoka, 1987, p.55–56, pl.5, figs.1–2; text-fig.4D ex Head, 1996b, p.1231. Holotype: Matsuoka, 1987, pl.5, figs.1–2. This name was not validly published in Matsuoka (1987, p.55–56) since the generic name *Brigantedinium* was not validly published at that time. Age: Holocene.

irregulare Matsuoka, 1987, p.56–57, pl.5, figs.13–16; text-fig.4C ex Head, 1996b, p.1231. Holotype: Matsuoka, 1987, pl.5, figs.15–16. Motile equivalent: *Protoperidinium denticulatum* (Gran and Braarud 1935) Balech, 1974, according to Matsuoka (1987, p.57). This name was not validly published in Matsuoka (1987, p.56–57) since the generic name *Brigantedinium* was not validly published at that time. Age: Holocene.

majusculum Reid, 1977, p.434–435, pl.1, fig.5 ex Lentin and Williams, 1993, p.67. Holotype: Reid, 1977, pl.1, fig.5. This species name was not validly published in Reid (1977) since the generic name *Brigantedinium* was not validly published at that time. Motile equivalent: *Protoperidinium shanghaiense* Gu Haifeng et al., 2015, according to Gu Haifeng et al. (2015, p. p.49). Age: Holocene.

pynei Hannah et al., 1998, p.535, figs.5a–b. Holotype: Hannah et al., 1998, figs.5a–b (not figs.5c–d, as indicated in Hannah et al., 1998, p.535) (lost according to Clowes et al. (2016, p.80). Clowes et al. (2016, p.80) implied that this species might be a taxonomic synonym of *Batiacasphaera cooperi*. Age: Miocene.

**simplex* Wall, 1965b, p.308; text-figs.7,20 ex Lentin and Williams, 1993, p.67. Holotype: Wall, 1965b, text-figs.7,20; Eisenack and Kjellström, 1972, p.187; Fensome et al., 1995, fig.1 — p.1785. Originally *Chytroeisphaeridia* (name not validly published), subsequently (and now) *Brigantedinium*. Motile equivalent: *Protopteridinium conicoides* (Paulsen, 1905) Balech, 1974, according to Harland (1981, p.68). The species name *Chytroeisphaeridia simplicia* was not validly published in Wall (1965b, p.308), since that author did not provide a Latin diagnosis, a requirement since this species is based on living material (I.C.N. Article 39). For the same reason, the combination *Brigantedinium simplex* (Wall, 1965b) Reid, 1977, p.435 was also not validly published. Harland and Reid in Harland et al. (1980, p.222–223) provided a Latin diagnosis, but the name *Brigantedinium simplex* was still not validly published since the generic name *Brigantedinium* was not validly published at that time. Lentin and Williams (1993, p.67) validly published the generic name *Brigantedinium* and the species name *Brigantedinium simplex* by providing a complete citation to both the protologue and a Latin diagnosis. Farr et al. (1986, p.18) considered "*B. [Brigantedinium] simplex* P.C. Reid" to be an illegitimate name since "... cysts of the type species were referred by the author [implying Reid] to an extant species [*Protopteridinium conicoides*]." As noted by Fensome et al. (1995, p.1787), this would only be a possible interpretation if Reid were the validating author. Lentin and Williams (1993, p.67), when validating this name, followed Reid (1977, p.435) in rendering the epithet as "*simplex*". Age: extant.

BROOMEA Cookson and Eisenack, 1958, p.41. Emendations: Lentin and Williams, 1976, p.143–144; Mantle, 2009a, p.43–44. Taxonomic senior synonym: *Pareodinia*, according to Wiggins (1975, p.102) — however, Lentin and Williams (1976, p.144) retained *Broomea*. Type: Cookson and Eisenack, 1958, pl.6, fig.7, as *Broomea ramosa*.

"*exigua*" Alberti, 1961, p.26–27, pl.5, fig.14. Holotype: Alberti, 1961, pl.5, fig.14. **NOW** *Batioladinium?*. Originally *Broomea*, subsequently (and now) *Batioladinium?*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Age: early Hauterivian–?late Barremian.

fusiforma Oлару, 1978a, p.81–82, pl.13, fig.12. Holotype: Oлару, 1978a, pl.13, fig.12. Age: late Eocene–early Oligocene.

fusticula Mantle, 2009a, p.44–46, pl.6, figs.1–8; text-fig.9. Holotype: Mantle, 2009a, pl.6, fig.1. Age: Callovian.

"*gochtii*" Alberti, 1961, p.27, pl.5, figs.8–10,?16. Holotype: Alberti, 1961, pl.5, fig.8. **NOW** *Batioladinium?*. Originally *Broomea*, subsequently (and now) *Batioladinium?*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Taxonomic junior synonyms: *Batioladinium pomum* and *Batioladinium varigranosum*, both according to Below (1990, p.53). Age: Valanginian–?Hauterivian.

"*jaegeri*" Alberti, 1961, p.26, pl.5, figs.1–7. Emendation: Below, 1990, p.53–54, as *Necrobroomea jaegeri*. Holotype: Alberti, 1961, pl.5, fig.2; Eisenack and Klement, 1964, p.67; Fensome et al., 1995, fig.2 — p.1571. **NOW** *Batioladinium*. Originally *Broomea*, subsequently (and now) *Batioladinium*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Taxonomic junior synonym: *Pseudoceratium gochtii* Pocock (subsequently *Pseudoceratium hansgochtii*), according to Singh (1971, p.320). Age: late Barremian.

"?*longicornuta*" Alberti, 1961, p.27–28, pl.5, figs.18–21; pl.6, figs.1–2. Emendation: Below, 1990, p.56, as *Necrobroomea longicornuta*. Holotype: Alberti, 1961, pl.5, fig.19; Eisenack and Klement, 1964, p.69; Fensome et al., 1996, fig.1 — p.2205. **NOW** *Batioladinium*. Originally *Broomea?*, subsequently (and now) *Batioladinium*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Questionable assignment: Alberti (1961, p.27). Taxonomic junior synonym: *Batioladinium radiculatum*, according to Below (1990, p.53). Age: late Hauterivian–late Barremian.

"*micropoda*" Eisenack and Cookson, 1960, p.7–8, pl.2, figs.8–9. Emendation: Below, 1990, p.56, as *Necrobroomea micropoda*. Holotype: Eisenack and Cookson, 1960, pl.2, fig.9. **NOW** *Batioladinium*. Originally *Broomea*, subsequently (and now) *Batioladinium*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Taxonomic junior synonyms: *Imbatodinium fractum*, according to Below (1990, p.56); *Broomea* (as *Batioladinium?*) *pellifera*,

according to Wiggins (1975, p.111) — however, Dörhöfer and Davies (1980, p.38) retained *Broomea* (as *Batioladinium?*) *pellifera*. Age: Aptian–Albian.

"*pellifera*" Alberti, 1961, p.26, pl.5, figs.11–13. Holotype: Alberti, 1961, pl.5, fig.11. **NOW** *Batioladinium?*. Originally *Broomea*, subsequently (and now) *Batioladinium?*, thirdly *Imbatodinium*, fourthly *Necrobroomea*. Taxonomic senior synonym: *Broomea* (as and now *Batioladinium*) *micropoda*, according to Wiggins (1975, p.111) — however, Dörhöfer and Davies (1980, p.38) retained *Batioladinium?* *pelliferum*. Age: late Barremian–early Aptian.

**ramosa* Cookson and Eisenack, 1958, p.41–42, pl.6, figs.6–8. Holotype: Cookson and Eisenack, 1958, pl.6, fig.7. Originally (and now) *Broomea*, subsequently *Pareodinia*. Lentin and Williams (1976, p.144) retained this species in *Broomea*. Age: Middle-Late Jurassic.

"*seelandica*" Lange, 1969, p.113–114, pl.2, fig.10; pl.3, fig.3. Emendation: Firth, 1987, p.213–214, as *Manumiella seelandica*. Holotype: Lange, 1969, pl.3, fig.3; Fensome et al., 1995, fig.2 — p.1773. **NOW** *Manumiella*. Originally *Broomea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Manumiella*. Taxonomic junior synonym: *Deflandrea* (as *Manumiella*) *druggii*, according to Firth (1987, p.213) — however Thorn et al. (2009, p.443) retained *Deflandrea* (as *Manumiella*) *druggii*. Age: Danian

simplex Cookson and Eisenack, 1958, p.42, pl.6, fig.9. Holotype: Cookson and Eisenack, 1958, pl.6, fig.9. Originally (and now) *Broomea*, subsequently *Necrobroomea*. Lentin and Williams (1976, p.144) retained this species in *Broomea*. Age: Late Jurassic.

"*tabulata*" Ott in Riding and Helby, 2001d, p.95. **Name not validly published**: no description. **Taxonomic senior synonym**: *Voodooia tabulata*, according to Riding and Helby (2001d, p.95).

"?*tricornoides*" Alberti, 1961, p.28, pl.5, fig.17. Holotype: Alberti, 1961, pl.5, fig.17. **NOW** *Batioladinium?*. Originally *Broomea?*, subsequently (and now) *Batioladinium?*, thirdly *Necrobroomea?*, fourthly *Imbatodinium?*. Questionable assignment: Alberti (1961, p.28). Age: late Hauterivian.

"**BROTZENIA**" Horowitz, 1975, p.25. **Taxonomic senior synonym**: *Dichadogonyaulax*, by implication in Fensome and Sarjeant (1982, p.56), who transferred the "type species" of *Brotzenia*, *Brotzenia cristata*, to *Dichadogonyaulax*. Taxonomic senior synonym: *Ctenidodinium*, according to Stover and Evitt (1978, p.203) — however, *Brotzenia* is now considered a taxonomic junior synonym of *Dichadogonyaulax*. Type: Horowitz, 1975, pl.1, fig.8, as *Brotzenia cristata*.

*"*cristata*" Horowitz, 1975, p.25, pl.1, fig.8. Emendation: Wheeler and Sarjeant, 1990, p.306–307, as *Dichadogonyaulax cristata*. Holotype: Horowitz, 1975, pl.1, fig.8; Fensome et al., 1995, fig.1 — p.1479; lost according to Sarjeant (1988, p.177). Neotype: Wheeler and Sarjeant, 1990, pl.8, fig.4; text-figs.10a–b; Fensome et al., 1995, fig.2 — p.1479; designated by Wheeler and Sarjeant (1992, p.382). **NOW** *Dichadogonyaulax*. Originally *Brotzenia*, subsequently *Ctenidodinium?*, thirdly (and now) *Dichadogonyaulax*. Taxonomic senior synonym: *Ctenidodinium ornatum*, according to Woollam (1983, p.190) — however, Sarjeant (1988, p.180) retained this species as *Dichadogonyaulax cristata*. Age: Late Triassic (probably not in place).

BULBODINIUM Wetzel, 1960, p.82. Lentin and Williams (1976, p.93–94) considered *Chatangiella* to be a possible taxonomic junior synonym of this genus. Type: Wetzel, 1960, pl.1, fig.1, as *Bulbodinium seitzi*.

altipetax Wetzel, 1960, p.83, pl.1, figs.3,5,9. Holotype: Wetzel, 1960, pl.1, fig.5. Klement (1961, p.489–492) suggested that this species is assignable to *Deflandrea*, but did not effect a formal transfer. Age: Senonian.

oistoides Wetzel, 1960, p.83–84, pl.1, figs.6–7. Holotype: Wetzel, 1960, pl.1, fig.6. Klement (1961, p.489–492) suggested that this species is possibly a species of *Scriniodinium*, but did not effect a formal transfer. Age: Senonian.

**seitzii* Wetzel, 1960, p.82–83, pl.1, figs.1–2,4,8,10–13. Holotype: Wetzel, 1960, pl.1, fig.1. Klement (1961, p.489–492) suggested that this species is assignable to *Deflandrea*, but did not effect a formal transfer. Age: Senonian.

"**BULBOSIA**" Ott in Riding and Helby, 2001e, p.128. **Name not validly published**: no description. **Taxonomic senior synonym**: *Tringadinium*, by implication in Riding and Helby (2001e, p.128), who included the only species name, *Bulbosia tithonica* (name not validly published), in synonymy with *Tringadinium bjaerkei*.

"*tithonica*" Ott in Riding and Helby, 2001e, p.128. **Name not validly published**: no description. **Taxonomic senior synonym**: *Tringadinium bjaerkei*, according to Riding and Helby (2001e, p.128).

BUROCRATUS Trejo, 1983, p.8. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1298, who noted that the cyst wall is pithonelloid and so dinoflagellate affinity is questionable). Type: Trejo, 1983, pl.10, fig.7, as *Burocratus perniciosus*.

**perniciosus* Trejo, 1983, p.8, pl.10, figs.6–8; pl.11, fig.9; pl.39, fig.9; pl.43, figs.2–4; pl.44, figs.1–4,8. Holotype: Trejo, 1983, pl.10, fig.7. Age: Late Cretaceous.

"**BURTONIA**" Beju, 1983, p.106. **Name illegitimate** — **senior homonym**: *Burtonia* Brown, 1811. Substitute name: *Bejuia*. **Taxonomic senior synonym**: *Atopodinium*, according to Masure, 1991, p.64. Type: Beju, 1983, text-figs.3A–B,4A–B, as *Burtonia polygonalis*.

polygonalis* Beju, 1983, p.107,109,111; text-figs.3A–F,4A–F,5A–D. Emendation: Masure, 1991, p.68,70–71, as *Atopodinium polygonale*. Holotype: Beju, 1983, text-figs.3A–B,4A–B; Masure, 1991, pl.2, figs.1,4; text-figs.3a–b,4a–b; Fensome et al., 1995, figs.1–4 — p.1675; Fauconnier and Masure, 2004, pl.10, figs.8–11. **NOW *Atopodinium*. Originally *Burtonia*, subsequently *Bejuia*, thirdly (and now) *Atopodinium*. Age: early Bathonian.

"**CADDASPHAERA**" Fenton et al., 1980, p.164. **Taxonomic senior synonym**: *Pareodinia*, by implication in Prauss (1989, p.42), who transferred the "type species" of *Caddasphaera*, *Caddasphaera halosa*, to *Pareodinia*. **Taxonomic senior synonym**: *Pterocystidiopsis*, by implication by Courtinat in Courtinat and Gaillard (1980, p.80), who transferred the "type species" of the genus *Caddasphaera*, *Caddasphaera halosa*, to *Pterocystidiopsis* — however, Lentin and Williams (1981, p.31,237) retained *Caddasphaera*. Type: Filatoff, 1975, pl.29, fig.10, as *Kalyptea halosa*.

halosa* (Filatoff, 1975, p.91, pl.29, figs.10–11) Lentin and Williams, 1981, p.31. Emendation: Prauss, 1989, p.42, as *Pareodinia halosa*. Holotype: Filatoff, 1975, pl.29, fig.10. **NOW *Pareodinia*. Originally *Kalyptea*, subsequently *Kalyptea?*, thirdly *Caddasphaera*, fourthly *Pterocystidiopsis* (Appendix A), fifthly (and now) *Pareodinia*. This combination was not validly published in Fenton et al. (1980, p.164,169), since these authors did not fully reference the basionym. Age: Bajocian.

"*treptensis*" (Courtinat in Courtinat and Gaillard, 1980, p.81–82. pl.6, figs.4,6) Courtinat, 1989, p.225. Holotype: Courtinat and Gaillard, 1980, pl.6, fig.4. **NOW** *Pterocystidiopsis* (Appendix A). Originally (and now) *Pterocystidiopsis* (Appendix A), subsequently *Caddasphaera*. Age: late Oxfordian.

CADOSINA Wanner, 1940, p.79. Calcareous dinoflagellate genus, originally described as a foraminifer (see Elbrächter et al., 2008, p.1298). Emendation: Masters and Scott, 1978, p.220. **Taxonomic senior synonym**: *Stomiosphaera*, according to Bonet (1956, p.447–448 — however, I. Nagy (1966, p.87) proposed the retention of *Cadosina*. **Taxonomic junior synonyms**: *Hemistomiosphaera*, according to Řehánek and Cecca (1993, p.155); *Obliquipithonella*, according to Řeháková and Michalík (1996, p.93) — however, *Obliquipithonella* is now considered a taxonomic junior synonym of *Pirumella*. Fensome and Williams (2004) considered this genus to be not validly published because a type was not designated. However, Elbrächter et al. (2008, p.1298) implied that this

generic name can be considered validly published as it was proposed under the I.C.Z.N. Thus, we have revised the status of the contained species as appropriate, as well as reconsidered the generic synonymies. According to Řehánek and Cecca (1993, p.155), Řehánek (1985a) provided an emendation; however, the latter author did not indicate that he was emending *Cadosina*. Type: not designated; "type species" — *Cadosina fusca*.

"*borzae*" I. Nagy, 1966, p.92,99–100, pl.5, figs.15–16. Holotype: I. Nagy, 1966, pl.5, fig.15. **NOW** *Carpistomiosphaera*. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Carpistomiosphaera*. Age: Kimmeridgian.

"*fibrata*" I. Nagy, 1966, p.92–93,100, pl.5, figs.14,22. Holotype: I. Nagy, 1966, pl.5, fig.14. **NOW** *Colomisphaera*. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Colomisphaera*. Age: Oxfordian.

**fusca* Wanner, 1940, p.79–81, pl.1, figs.1–2 (parts); pl.2, figs.3–5; text-figs.19–30. Holotype: not designated. Originally (and now) *Cadosina*, subsequently *Stomiosphaera* (name not validly published). Fensome and Williams (2004) considered this name to be not validly published because a type was not designated. However, Elbrächter et al. (2008, p.1298) implied that this generic name can be considered validly published as it was proposed under the I.C.Z.N. Age: Late Jurassic?

subsp. *fusca*. Autonym. Holotype: not designated.

subsp. *misolensis* Vogler, 1941, p.281, pl.20, fig.7. Holotype: Vogler, 1941, pl.20, fig.7. Originally (and now) *Cadosina fusca* subsp. *misolensis*, subsequently *Stomiosphaera fusca* subsp. *misolensis* (name not validly published). Vogler (1941) gave the citation "*Cadosina fusca misolensis* n.sp.". For convenience of treatment we have arbitrarily listed it as a subspecies. Age: Late Jurassic?–Neocomian?

gracillima (Seguenza in de Lapparent, 1918, p.19, pl.3, fig.1–part) Vogler, 1941, p.282. Holotype: not designated: although the caption to de Lapparent's pl.3, fig.1 suggests a single specimen ("g"), there is no indication as to which specimen this refers. Originally *Lagena* (Appendix A), subsequently *Cadosina*. Age: Cretaceous.

"*heliosphaera*" Vogler, 1941, p.281, pl.20, fig.6. Holotype: Vogler, 1941, pl.20, fig.6. **NOW** *Colomisphaera*. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Colomisphaera*. Age: Neocomian? (Oxfordian–Berriasian according to I. Nagy, 1966, p.88).

ingens Vogler, 1941, p.281–282, pl.21, fig.59. Holotype: Vogler, 1941, pl.21, fig.59. Age: Cretaceous.

"*lapidosa*" Vogler, 1941, p.281, pl.21, fig.58. Holotype: Vogler, 1941, pl.21, fig.58. **NOW** *Colomisphaera*. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Colomisphaera*. Age: Neocomian? (Oxfordian to Berriasian according to I. Nagy, 1966, p.87).

"*malmica*" (Borza, 1964, p.192, pl.1, figs.5–6) I. Nagy, 1966, p.93,101. Holotype: Borza, 1964, pl.1, fig.5. **NOW** *Parastomiosphaera*. Originally *Stomiosphaera*, subsequently *Cadosina*, thirdly (and now) *Parastomiosphaera*. Age: Kimmeridgian.

"*misolensis*" Vogler, 1941, p.281, pl.20, figs.1b [indicated as 1a in plate caption],8. Holotype: not designated. **NOW** *Stomiosphaera*. Originally *Cadosina*, subsequently (and now) *Stomiosphaera*. Age: Late Jurassic?–Neocomian?

parvula I. Nagy, 1966, p.93,101, pl.5, fig.17. Holotype: I. Nagy, 1966, pl.5, fig.17. Originally (and now) *Cadosina*, subsequently *Hemistomiosphaera*. This species is retained in *Cadosina* since *Hemistomiosphaera* is now considered a taxonomic junior synonym of that genus. Age: Kimmeridgian.

"*pulla*" (Borza, 1964, p.192–193, pl.2, figs.1–2) I. Nagy, 1966, p.93,101. Holotype: Borza, 1964, pl.2, fig.1. **NOW** *Colomisphaera*. Originally *Stomiosphaera*, subsequently *Cadosina*, thirdly (and now) *Colomisphaera*. Age: Kimmeridgian.

"*radiata*" Vogler, 1941, p.281, pl.20, fig.1. Holotype: Vogler, 1941, pl.20, fig.1. **NOW** *Stomiosphaera*. Originally *Cadosina*, subsequently (and now) *Stomiosphaera*. Age: Neocomian? (Kimmeridgian according to I. Nagy, 1966, p.88).

salebrosa Řehánek, 1985a, p.370, pl.2, figs.1–4. Holotype: Řehánek, 1985a, pl.2, figs.1–2. Age: middle Kimmeridgian.

"*semiradiata*" Wanner, 1940, p.81, text-figs.36–37. **NOW** *Crustocadosina*. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Crustocadosina*. Age: Late Jurassic?

spinosa Borza, 1972, p.142, text-figs.7–12. Holotype: Borza, 1972, text-fig.7. Age: Late Cretaceous.

"*sublapidosa*" Vogler, 1941, p.280–281, pl.20, fig.5. Holotype: Vogler, 1941, pl.20, fig.5. **NOW** *Committosphaera*. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Committosphaera*. Age: Neocomian?

"*tenuis*" I. Nagy, 1966, p.93,100–101, pl.5, fig.18. Holotype: I. Nagy, 1966, pl.5, fig.18. **NOW** *Colomisphaera*. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Colomisphaera*. Age: Oxfordian.

undosa Borza, 1972, p.139,141–142, text-figs.1–6. Holotype: Borza, 1972, text-fig.2. Age: Late Cretaceous.

CADOSINELLA Vogler, 1941, p.282. A calcareous dinoflagellate genus according to Elbrächter et al. (2008, p.1298). Wendler et al. (2013, p.1098) considered *Cadosinella* to be a taxonomic senior synonym of *Pithonella*, but did not propose any species transfers. This genus was previously considered to encompass nannofossils. Type: Vogler, 1941, pl.21, fig.63, as *Cadosinella gracillimoides*.

**gracillimoides* Vogler, 1941, p.282, pl.21, fig.63. Holotype: Vogler, 1941, pl.21, fig.63. Andri (1972, p.22) considered this species to be a possible taxonomic synonym of *Pithonella perlonga* (name not validly published). Age: Cenomanian–Maastrichtian.

CALCICARPINUM Deflandre, 1948, p.216. Emendations: Keupp, 1984, p.22; Versteegh, 1993, p.361. Calcareous dinoflagellate genus (see Streng et al., 2004, p.481 and Elbrächter et al., 2008, p.1298). Type: Deflandre, 1948, text-figs.36–37, as *Calcicarpinum tetraedricum*.

bivalvum Versteegh, 1993, p.361,363, pl.3, figs.1–8; text-figs.5A–D. Holotype: Versteegh, 1993, pl.3, figs.1–2. Motile equivalent: *Pentapharsodinium tyrrhenicum* (Balech, 1990) Montresor et al., 1993 ex Head, 1996b, according to Montresor et al. (1995, p.51). Age: late Pliocene–late Pleistocene.

?*fallax* Taugourdeau-Lantz and Rosset, 1966, p.190, pl.1, figs.1–4,7–13. Holotype: Taugourdeau-Lantz and Rosset, 1966, pl.1, figs.1–3. Questionable assignment: Taugourdeau-Lantz and Rosset, (1966, p.190). Streng et al. (2004, p.481) noted that this species is too large to be a dinoflagellate cyst and is more likely a calcified megaspore. Age: Oligocene.

macrogranulum Hildebrand-Habel and Willems, 1997, p.183, pl.2, figs.8–10 ex Hildebrand-Habel and Willems, 2004, p.183. Holotype: Hildebrand-Habel and Willems, 1997, pl.2, fig.8 and Hildebrand-Habel and Willems, 2004, pl.1, figs.7–9. The name was not validly published in Hildebrand-Habel and Willems (1997), since these authors did not designate a holotype. Age: middle Coniacian–late Santonian.

"*mutterlosei*" Keupp, 1979a, p.41, pl.10, figs.11–12; pl.11, figs.1–5. Holotype: Keupp, 1979a, pl.11, figs.1–3. **NOW** *Praecalcionellum*. Originally *Calcicarpinum*, subsequently *Calcigonellum*, thirdly (and now) *Praecalcionellum*. Age: early Barremian.

perfectum Versteegh, 1993, p.363,365,367, pl.4, figs.1–11; text-figs.6A–D. Holotype: Versteegh, 1993, pl.4, figs.6–7,10. Age: late Pliocene.

var. *perfectum*. Autonym. Holotype: Versteegh, 1993, pl.4, figs.6–7,10.

var. *poratum* Banasová et al., 2007, p.113, pl.2. figs.15–16 ex Streng et al., 2009, p.229. Holotype: Streng et al., 2009, p.229, pl.1, fig.13. This name was not validly published in Banasová et al., (2007), since it was used in anticipation of future acceptance of the name (I.C.N. Article 36.1). Age: middle Miocene.

primum Keupp, 1995, p.159–160, pl.3, figs.10–12; pl.4, figs.1–3. Holotype: Keupp, 1995, pl.3, figs.10–12. Age: late Albian.

**tetraedricum* Deflandre, 1948, p.216,218; text-figs.35–37. Holotype: Deflandre, 1948, text-figs.36–37. Age: Eocene.

tetramurum Kienel, 1994, p.51, pl.10, figs.12–15; pl.11, figs.1–3. Holotype: Kienel, 1994, pl.10, figs.12–15. Age: Danian.

CALCICONUS Streng et al., 2009, p.229–230. Calcareous dinoflagellate genus (see Gottschling and Soehner, 2013, p.127). Taxonomic synonym: *Trigonus* (name not validly published) according to Streng et al. (2009, p.229). Type: Streng et al., 2009, pl.2, fig.1, as *Calciconus irregularis*.

**irregularis* Streng et al., 2009, p.230, pl.2, figs.1–10. Holotype: Streng et al., 2009, pl.2, fig.1. Taxonomic synonym: *Trigonus conicus* (name not validly published), according to Streng et al. (2009, p.230). Age: middle Miocene.

CALCIGONELLUM Deflandre, 1948, p.206. Emendations: Keupp, 1984, p.14; Keupp and Versteegh, 1989, p.211. Calcareous dinoflagellate genus (see Streng et al., 2004, p.481 and Elbrächter et al., 2008, p.1298). Taxonomic junior synonym: *Calciogranellum*, according to Keupp (1984, p.15–16). Type: Deflandre, 1948, figs.13–14, as *Calcigonellum infula*.

"*ansatum*" (Hildebrand-Habel and Willems, 1999, p.93, pl.1, figs.8–12; pl.2, figs.1–6; text-fig.2) Streng et al., 2009, p.237. Holotype: Hildebrand-Habel and Willems, 1999, pl.1, figs.8–10. **NOW** *Juergenella*. Originally *Calcigonellum*, subsequently ?*Calcigonellum*, thirdly (and now) *Juergenella*. Questionable assignment: Streng et al. (2004, p.481). Age: late Eocene.

"*dolium*" Keupp, 1979a, p.39–40, pl.9, figs.7–9. Holotype: Keupp, 1979a, pl.9, figs.7–9. **NOW** *Praealcigonellum*. Originally *Calcigonellum*, subsequently (and now) *Praealcigonellum*. Age: early Barremian.

"*granulatum*" Kohring, 1993a, p.55–57, pl.32, figs.g–m; text-fig.9. Holotype: Kohring, 1993a, pl.32, fig.k. **NOW** *Juergenella*. Originally *Calcigonellum*, subsequently ?*Calcigonellum*, thirdly (and now) *Juergenella*. Questionable assignment: Streng et al. (2004, p.481). Age: middle Oligocene.

**infula* Deflandre, 1948, p.206–207, figs.13–18. Emendation: Keupp, 1984, p.14–15. Holotype: Deflandre, 1948, figs.13–14. N.I.A. Age: late Miocene.

"*limbatum*" (Deflandre, 1948, p.204–206, figs.10–12) Keupp, 1984, p.15. Holotype: Deflandre, 1948, figs.10–12. **NOW** *Calciodinellum*. Originally *Calciogranellum*, subsequently *Calcigonellum*, thirdly (and now) *Calciodinellum*. Age: late Miocene.

?*minutum* Keupp, 1987, p.40–41, pl.6, figs.1–7; text-fig.2a. Holotype: Keupp, 1987, pl.6, figs.5–6. Originally *Calcigonellum*, subsequently *Keuppisphaera* (combination not validly published), thirdly (and now) ?*Calcigonellum*. Questionable assignment: Streng et al. (2004, p.481). Age: middle Albian–early Cenomanian.

"*mutterlosei*" (Keupp, 1979a, p.41, pl.10, figs.11–12; pl.11, figs.1–5) Keupp, 1980a, p.127. Holotype: Keupp, 1979a, pl.11, figs.1–3. **NOW** *Praecalcionellum*. Originally *Calcicarpinum*, subsequently *Calcigonellum*, thirdly (and now) *Praecalcionellum*. Age: early Barremian.

"*polymorphum*" Keupp, 1980a, p.128, p.130–131, pl.15, figs.7–15; pl.16, figs.1–6. Holotype: Keupp, 1980a, pl.15, figs.7–8. **NOW** *Praecalcionellum*. Originally *Calcigonellum*, subsequently (and now) *Praecalcionellum*. Age: late Aptian–early Albian.

"subsp. *dentatum*" Keupp, 1980a, p.131, pl.15, figs.13–15; pl.16, fig.1. Holotype: Keupp, 1980a, pl.15, fig.13. **NOW** *Praecalcionellum polymorphum* subsp. *dentatum*. Originally *Calcigonellum polymorphum* subsp. *dentatum*, subsequently (and now) *Praecalcionellum polymorphum* subsp. *dentatum*. Age: Aptian (late Gargasian).

"subsp. *polymorphum*". Autonym. Holotype: Keupp, 1980a, pl.15, figs.7–8. **NOW** *Praecalcionellum polymorphum* subsp. *polymorphum*. Originally *Calcigonellum polymorphum* subsp. *polymorphum*, subsequently (and now) *Praecalcionellum polymorphum* subsp. *polymorphum*.

"subsp. *tenuis*" Keupp, 1980a, p.131–132, pl.16, figs.2–6. Holotype: Keupp, 1980a, pl.16, figs.2–3. **NOW** *Praecalcionellum polymorphum* subsp. *tenuis*. Originally *Calcigonellum polymorphum* subsp. *tenuis*, subsequently (and now) *Praecalcionellum polymorphum* subsp. *tenuis*. Age: Aptian (late Clansayesian).

"*sulcatum*" Keupp, 1979c, p.658, pl.6, figs.16–21. Holotype: Keupp, 1979c, pl.2, figure labelled as "*C. sulcatum*". **NOW** *Praecalcionellum*. Originally *Calcigonellum*, subsequently (and now) *Praecalcionellum*. Age: early Hauterivian.

CALCIODINELLUM Deflandre, 1947b, p.1781–1782. Emendation: Janofske and Karwath, 2000, p.100. Calcareous dinoflagellate genus (see Streng et al., 2004, p.481 and Elbrächter et al., 2008, p.1298). Taxonomic junior synonym: *Sphaerodinella*, by implication in Janofske and Karwath (2000, p.100), who transferred the type, *Sphaerodinella albatrosiana*, to *Calciodinellum*. Type: Deflandre, 1947b, figs.1–2, as *Calciodinellum operosum*.

albatrosianum (Kamptner, 1963, p.177–178, pl.5, fig.30) Janofske and Karwath, 2000, p.100. Emendation: Janofske and Karwath, 2000, p.100–101. Holotype: Kamptner, 1963, pl.5, fig.30. Originally *Thoracosphaera*, subsequently *Orthopithonella*, thirdly *Sphaerodinella*, fourthly (and now) *Calciodinellum*. Taxonomic junior synonyms: *Thoracosphaera ricaseta*, according to Fütterer (1976, p.134); and *Thoracosphaera rela* according to Fütterer (1978, p.716). Age: Pleistocene.

var. *albatrosianum*. Autonym. Holotype: Kamptner, 1963, pl.5, fig.30. Originally *Sphaerodinella albatrosiana* var. *albatrosiana*, subsequently (and now) *Calciodinellum albatrosianum* var. *albatrosianum*.

var. *spinulosum* (Versteegh, 1993, p.377–378, pl.4, figs.12–16) Fensome and Williams, 2004, p.96. Holotype: Versteegh, 1993, pl.4, figs.12–13,16. Originally *Sphaerodinella albatrosiana* var. *spinulosa*, subsequently (and now) *Calciodinellum albatrosianum* var. *spinulosum*. Age: late Pliocene.

clamosum Streng et al., 2004, p.464–465, fig.3, nos.7–14; fig.8, nos.2–3. Holotype: Streng et al., 2004, fig.3, nos.11,14. Age: Paleocene

subsp. *clamosum*. Autonym. Holotype: Streng et al., 2004, p.465–466, fig.3, nos.11,14.

subsp. *latum* Streng et al., 2004, p.465–466, fig.3, nos.7,9–10,12; fig.8, no.3. Holotype: Streng et al., 2004, fig.3, nos.10,12. Age: late Paleocene.

elongatum (Hildebrand-Habel et al., 1999, p.83, pl.5, figs.5–7; text-fig.6A–B) Streng et al., 2006, p.191. Holotype: Hildebrand-Habel et al., 1999, pl.5, figs.5–6. Originally *Sphaerodinella? tuberosa* forma *elongata*, subsequently *Calciodinellum elongatum* (combination not validly published), thirdly *Pernambugia tuberosa* forma *elongata*,

fourthly (and now) *Calciodinellum elongatum*. The combination *Calciodinellum elongatum* was not validly published by Meier et al. (2002) as these authors did not fully reference the basionym. Age: middle Eocene.

kerquelse Streng et al., 2004, p.466–467, fig.9, nos.1–6. Holotype: Streng et al., 2004, fig.9, no.1. Age: late Miocene–early Pliocene.

levantinum Meier et al., 2002, p.604–607, text-fig.2; figs.3a–i. Holotype: Meier et al., 2002, figs.3a–b. Age: Holocene.

forma ***levantinum***. Autonym. Holotype: Meier et al., 2002, figs.3a–b.

forma ***variospinosum*** (Hildebrand-Habel et al., 1999, p.83–84, pl.5, figs.8–15, text-fig.7A–C) Streng et al. 2006, p.191. Holotype: Hildebrand-Habel et al., 1999, pl.5, figs.8–11. Originally *Sphaerodinella? tuberosa* forma *variospinosa*, subsequently *Pernambugia tuberosa* forma *variospinosa*, thirdly (and now) *Calciodinellum levantinum* forma *variospinosum*. Age: middle Eocene.

limbatum (Deflandre, 1948, p.204–206, figs.10–12) Kohring, 1993a, p.59. Holotype: Deflandre, 1948, figs.10–12. Originally *Calcio granellum*, subsequently *Calcigonellum*, thirdly (and now) *Calciodinellum*. Age: late Miocene.

operosum Deflandre, 1947b, p.1781–1782, figs.1–6. Emendation: Montresor et al., 1997, p.123–124. Holotype: Deflandre, 1947b, figs.1–2. Taxonomic junior synonym: *Thoracosphaera edwardsii*, according to Fütterer (1978, p.718). Age: late Miocene.

"**CALCIOGRANELLUM**" Deflandre, 1948, p.204. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1298). **Taxonomic senior synonym:** *Calcigonellum*, according to Keupp (1984, p.15–16). Type: Deflandre, 1948, figs.10–12, as *Calcio granellum limbatum*.

"***limbatum***" Deflandre, 1948, p.204–206, figs.10–12. Holotype: Deflandre, 1948, figs.10–12. **NOW** *Calciodinellum*. Originally *Calcio granellum*, subsequently *Calcigonellum*, thirdly (and now) *Calciodinellum*. Age: late Miocene.

CALCIPERIDINIUM Versteegh, 1993, p.360. Calcareous dinoflagellate genus (see Streng et al., 2004, p.481 and Elbrächter et al., 2008, p.1298). Type: Versteegh, 1993, pl.2, figs.1–3, as *Calciperidinium asymmetricum*.

asymmetricum Versteegh, 1993, p.360–361, pl.2, figs.1–8. Holotype: Versteegh, 1993, pl.2, figs.1–3. Age: late Pleistocene.

CALCIPTERELLUM Deflandre, 1948, p.207. Emendation: Keupp, 1984, p.17. Calcareous dinoflagellate genus (see Streng et al., 2004, p.481 and Elbrächter et al., 2008, p.1298–1299). Type: Deflandre, 1948, figs.19–21, as *Calcipterellum colomii*.

colomii Deflandre, 1948, p.208, figs.19–21. Emendation: Keupp, 1984, p.17–18. Holotype: Deflandre, 1948, figs.19–21. Age: late Miocene.

"**CALCISPHAERELLUM**" Deflandre, 1948, p.215. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1299). **Taxonomic senior synonym:** *Bicarinellum*, according to Keupp (1984, p.18). Type: Deflandre, 1948, figs.32–33, as *Calcisphaerellum flosculus*.

"***flosculus***" Deflandre, 1948, p.215–216, figs.32–33. Holotype: Deflandre, 1948, figs.32–33. **Taxonomic senior synonym:** *Biechelerella* (now *Bicarinellum*) *jurassica*, according to Keupp (1984, p.20). N.I.A. Age: Oxfordian.

"**CALCISPHAERULA**" Bonet, 1956, p.441–443. **Taxonomic senior synonym:** *Pithonella*, according to Villain (1977, p.144) and Wendler et al. (2013, p.1098) (but see Elbrächter et al., 2008, p.1299). Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1299). Fensome and Williams (2004) considered this genus to be not validly published because a type was not designated. However, Elbrächter et al. (2008, p.1298) implied that this generic name can be considered validly published as it was proposed under the I.C.Z.N. Type: not designated; "type species" — *Calcisphaerula innominata*.

"***innominata**" Bonet, 1956, p.443–447, pl.22, fig.1 (part); pl.24, figs.1–2; pl.27, fig.1 (part). Emendation: Villain, 1977, as *Pithonella innominata*. Holotype: not designated (see comments under *Calcisphaerula*). **NOW** *Pithonella*. Originally *Calcisphaerula*, subsequently (and now) *Pithonella*. Age: Albian–Santonian.

CALCISTHECA Trejo, 1983, p.10. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1299). Type: Trejo, 1983, pl.52, fig.4, as *Calcistheca cuadrangulata*.

***cuadrangulata** Trejo, 1983, p.10, pl.51, figs.1–2,4–7; pl.52, figs.1–5 (not all figures identified), pl.53, figs.1–3. Holotype: Trejo, 1983, pl.52, fig.4. Age: Late Cretaceous.

"**CALEDONIDINIUM**" Reid, 1974, p.589. **Taxonomic senior synonym:** *Bitectatodinium*, by implication in Harland (1977b, p.93), who considered the "type species" of *Caledonidinium*, *Caledonidinium vermiculatum*, to be a taxonomic junior synonym of *Bitectatodinium tepikiense*. Type: Reid, 1974, pl.1, figs.4–5, as *Caledonidinium vermiculatum*.

"***vermiculatum**" Reid, 1974, p.589–590, pl.1, figs.3–5. Holotype: Reid, 1974, pl.1, figs.4–5; Fensome et al., 1995, figs.2–3 — p.1899. **Taxonomic senior synonym:** *Bitectatodinium tepikiense*, according to Harland (1977b, p.93). Age: Holocene.

"**CALICIPEDINIUM**" Dumitrică, 1973, p.825, pl.4, figs.5–14. Siliceous dinoflagellate genus. **Name not validly published:** no validly published species.

"**hexastylus**" Dumitrică, 1973, p.825, pl.4, figs.5–14. **Name not validly published:** holotype not designated. Age: middle Miocene.

"***quadripes**" Dumitrică, 1973, p.825, pl.3, figs.19–26; pl.4, figs.1–4. **Name not validly published:** holotype not designated. Age: middle Miocene.

CALIGODINIUM Drugg, 1970b, p.814–815. Emendation: Manum and Williams, 1995, p.185. Type: Drugg, 1970b, fig.9A, as *Caligodinium amiculum*.

aceras (Manum and Cookson, 1964, p.27–28, pl.6, figs.9–11) Lentin and Williams, 1973, p.21. Holotype: Manum and Cookson, 1964, pl.6, fig.9. Originally *Kalyptea*, subsequently (and now) *Caligodinium*, thirdly *Pareodinia*. Lentin and Williams (1975, p.2148) retained this species in *Caligodinium*. Taxonomic junior synonym: *Caligodinium amiculum*, according to Heilmann-Clausen (1985, p.18) — however, Lentin and Williams (1989, p.44) retained *Caligodinium amiculum*. Age: Cenomanian.

***amiculum** Drugg, 1970b, p.815, figs.8A–B,9A–E. Holotype: Drugg, 1970b, fig.9A; Biffi and Manum, 1988, text-fig.11D. Originally (and now) *Caligodinium*, subsequently *Kalyptea*. Lentin and Williams (1977b, p.17) retained this species in *Caligodinium*. Taxonomic senior synonym: *Kalyptea* (as *Caligodinium*) *aceras*, according to Heilmann-Clausen (1985, p.18) — however, Lentin and Williams (1989, p.44) retained *Caligodinium amiculum*. N.I.A. Age: Danian.

endoreticulatum Stover and Hardenbol, 1994, p.34, pl.1, figs.3a–b,4. Holotype: Stover and Hardenbol, 1994, pl.1, figs.3a–b. Age: Rupelian.

goeranii Slimani, 1994, p.94–95, pl.14, figs.34–37. Holotype: Slimani, 1994, pl.14, figs.34–36. Age: early Campanian–earliest Danian.

?*granulatum* (Jiabo, 1978, p.91, pl.6, fig.20) Lentin and Williams, 1981, p.32. Holotype: Jiabo, 1978, pl.6, fig.20. Originally *Kalyptea*, subsequently *Caligodinium*, thirdly (and now) *Caligodinium*?. Questionable assignment: Manum and Williams (1995, p.188). Age: Early Tertiary.

perforatum Guler et al., 2005, p.422,425, figs.4A–O. Holotype: Guler et al., 2005, p.420–421, figs.5C–D. Age: late Maastrichtian.

pychnum Biffi and Manum, 1988, p.178,180,184, pl.1, figs.11,13–19; pl.2, figs.1–18; pl.3, figs.1–9,11; text-fig.10A. Holotype: Biffi and Manum, 1988, pl.2, figs.1,4,7,15. Age: early Miocene.

CALLAIOSPHAERIDIUM Davey and Williams, 1966b, p.103. Emendations: Duxbury, 1980, p.113; Below, 1981a, p.27. Nomenclatural junior synonym: *Hexasphaera* Clarke and Verdier, 1967, which has the same type. Taxonomic junior synonym: *Avellodinium*, according to Below (1981a, p.27) — however, Lentin and Williams (1981, p.23) retained *Avellodinium*. Type: Deflandre and Courteville, 1939, pl.4, fig.1, as *Hystrichosphaeridium asymmetricum*.

**asymmetricum* (Deflandre and Courteville, 1939, p.100–101, pl.4, figs.1–2) Davey and Williams, 1966b, p.104. Emendation: Clarke and Verdier, 1967, p.43, as *Hexasphaera asymmetrica*. Holotype: Deflandre and Courteville, 1939, pl.4, fig.1; Fensome et al., 1993a, fig.1 — p.949. Originally *Hystrichosphaeridium*, subsequently (and now) *Callaiosphaeridium*, thirdly *Hexasphaera* (combination illegitimate). Age: Senonian.

subsp. *asymmetricum*. Autonym. Holotype: Deflandre and Courteville, 1939, pl.4, fig.1.

subsp. *latum* Heilmann-Clausen in Heilmann-Clausen and Thomsen, 1995, p.290–291, pl.14, figs.3–4; text-fig.13. Holotype: Heilmann-Clausen and Thomsen, 1995, pl.14, fig.3; text-fig.13. Age: early Barremian.

"*falsificum*" (Duxbury, 1977, p.24–26, pl.5, figs.1–3; text-fig.4) Below, 1981a, p.28. Holotype: Duxbury, 1977, pl.5, figs.1–2; Fensome et al., 1993a, figs.1–2 — p.1171. **NOW** *Avellodinium*. Originally (and now) *Avellodinium*, subsequently *Callaiosphaeridium*. Taxonomic junior synonym (at specific rank): *Hystrichosphaera furcata* forma *aulosphaeropsis* (subsequently *Spiniferites? ramosus* subsp. *aulosphaeropsis*), according to Sarjeant (1985b, p.156–157). Age: late Berriasian–early Barremian.

scabratum Khowaja-Ateequzaman and Garg, 2004a, p.100,102, pl.1, figs.1–9. Holotype: Khowaja-Ateequzaman and Garg, 2004a, pl.1, figs.1–3. Age: early Turonian.

trycherium Duxbury, 1980, p.114, pl.11, figs.6,9. Holotype: Duxbury, 1980, pl.11, fig.6. Age: Barremian.

CANGXIANELLA Xu Jinli et al., 1997, p.113,150–151. Type: Jiabo, 1978, pl.1, fig.9, as *Lejeunia fissurata*.

elongata (Jiabo, 1978, p.54–55, pl.1, figs.5–7) Xu Jinli et al., 1997, p.114. Holotype: Jiabo, 1978, pl.1, fig.6. Originally *Lejeunia* (generic name illegitimate), subsequently *Ceratiopsis* (combination illegitimate), thirdly *Cerodinium*, fourthly (and now) *Cangxianella*. Age: Early Tertiary.

**fissurata* (Jiabo, 1978, p.54–55, pl.1, figs.4,8–10) Xu Jinli et al., 1997, p.114. Holotype: Jiabo, 1978, pl.1, fig.9. Originally *Lejeunia* (generic name illegitimate), subsequently *Ceratiopsis* (combination illegitimate), thirdly *Cerodinium*, fourthly (and now) *Cangxianella*. Age: Early Tertiary.

granospinosa Pan Zhaoren in Xu Jinli et al., 1997, p.113, pl.40, fig.10 ex He Chengquan et al., 2009, p.382–383,651. Holotype: Xu Jinli et al., 1997, pl.40, fig.10. The name was not validly published in Xu Jinli et al. (1997),

since no English or a Latin description was provided; He Chengquan et al. (2009, p.651) validated the name by publishing an English diagnosis. Age: Oligocene.

CANNINGIA Cookson and Eisenack, 1960b, p.251. Emendations: Dörhöfer and Davies, 1980, p.36; Below, 1981a, p.30 — however, see Hedlund and Norris (1986, p.295); Helby, 1987, p.321–322. Taxonomic junior synonym: *Hashenia*, according to Chen et al. (1988, p.16); *Circulodinium*, according to Millioud (1969, p.425) — however, Jansonius (1986, p.204) and Helby (1987, p.321–322) retained *Circulodinium*. Type: Cookson and Eisenack, 1960b, pl.38, fig.1, as *Canningia reticulata*.

"*americana*" Pöthe de Baldis and Ramos, 1983, p.432–433, pl.1, figs.6,9. Holotype: Pöthe de Baldis and Ramos, 1983, pl.1, fig.9. **NOW** *Tenua* Eisenack. Originally *Canningia*, subsequently (and now) *Tenua* Eisenack. Age: early Aptian.

apiculata Jain and Garg in Jain et al., 1984, p.71–72, pl.2, figs.27–29. Holotype: Jain et al., 1984, pl.2, fig.27. Age: Kimmeridgian–early Tithonian.

"?*aspera*" Singh, 1971, p.322, pl.50, fig.1. Holotype: Singh, 1971, pl.50, fig.1; Fauconnier and Masure, 2004, pl.14, fig.1. **NOW** *Circulodinium*. Originally *Canningia*, subsequently *Canningia?*, thirdly *Epelidosphaeridia*, fourthly *Cyclonephelium*, fifthly (and now) *Circulodinium*. Questionable assignment: Stover and Evitt (1978, p.25). Age: middle Albian.

"*attadalica*" (Cookson and Eisenack, 1962b, p.495, pl.5, figs.12–15) Stover and Evitt, 1978, p.24–25. Holotype: Cookson and Eisenack, 1962b, pl.5, fig.13. **NOW** *Circulodinium*. Originally *Cyclonephelium?*, subsequently *Aptea*, thirdly *Canningia*, fourthly (and now) *Circulodinium*. Age: Aptian–Albian.

bassensis Marshall, 1990a, p.13–14, figs.9F–G,15A–K. Holotype: Marshall, 1990a, figs.9F–G,15D–F; Fensome et al., 1996, figs.4–6,8–9 — p.2065. Age: Campanian.

"?*brevispinosa*" (Pocock, 1962, p.81, pl.14, figs.222–223) Stover and Evitt, 1978, p.25. Emendation: Brideaux, 1977, p.15–16, as *Tenua brevispinosa*. Holotype: Pocock, 1962, pl.14, fig.222; Jansonius, 1986, pl.4, fig.6; Fauconnier and Masure, 2004, pl.14, figs.7–8. **NOW** *Circulodinium*. Originally *Palaeohystrichophora*, subsequently *Tenua* Eisenack, thirdly *Canningia?*, fourthly *Cyclonephelium*, fifthly (and now) *Circulodinium*. Questionable assignment: Stover and Evitt (1978, p.25). Age: Barremian.

"*chinensis*" He Chengquan, 1991, p.54–55, pl.9, figs.17–18. Holotype: He Chengquan, 1991, pl.9, fig.17. **NOW** *Circulodinium*. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: middle Eocene.

"?*circularis*" Cookson and Eisenack, 1971, p.219, pl.8, fig.6. Holotype: Cookson and Eisenack, 1971, pl.8, fig.6. **NOW** *Kallosphaeridium?*. Originally *Canningia*, subsequently *Canningia?*, thirdly *Batiacasphaera*, fourthly (and now) *Kallosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.25). Age: Middle Cretaceous, ?Turonian.

"*colliveri*" Cookson and Eisenack, 1960b, p.251, pl.38, figs.3–4. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.4; Bint, 1986, text-fig.14E. **NOW** *Circulodinium*. Originally *Canningia*, subsequently (and now) *Circulodinium*, thirdly *Canninginopsis*. Fauconnier and Londeix in Fauconnier and Masure (2004, p.113) retained this species in *Circulodinium*. Age: Aptian.

"*compta*" Davey, 1982b, p.268, pl.8, figs.3–6. Holotype: Davey, 1982b, pl.8, fig.3. **NOW** *Circulodinium*. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: early Portlandian–earliest Valanginian.

"*crassicingulata*" Burger, 1980b, p.268, figs.4C,D1–2. Holotype: Burger, 1980b, fig.4D1–2. **NOW** *Levisphaera*. Originally *Canningia*, subsequently *Batiacasphaera*, thirdly (and now) *Levisphaera*. Age: Berriasian–Valanginian.

"?*dicrypta*" (Gitmez and Sarjeant, 1972, p.225–226, pl.7, fig.6; text-fig.22) Below, 1981a, p.31. Holotype: Gitmez and Sarjeant, 1972, pl.7, fig.6; text-fig.22. **NOW** *Escharisphaeridia*. Originally *Meiourogonaulax*, subsequently

Lithodinia, thirdly *Meiourogonyaulax*?, fourthly *Canningia*?, fifthly (and now) *Escharisphaeridia*. Questionable assignment: Below (1981a, p.31). Age: early–late Kimmeridgian.

duxburyi Harding, 1990b, p.22–23, pl.5, figs.1–13; text-fig.8 ex Harding in Williams et al., 1998, p.88. Holotype: Harding, 1990b, pl.5, fig.1. This name was not validly published in Harding (1990b) since the lodgement of the holotype was not specified (I.C.N. Article 40.7). Age: late Hauterivian–early Barremian.

"*elongata*" He Chengquan, 1991, p.55, pl.9, fig.1. Holotype: He Chengquan, 1991, pl.9, fig.1. **NOW** *Circulodinium*. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: Turonian.

fairfieldensis Willumsen, 2012, p.59–60, pl.2, figs.1–6. Holotype: Willumsen, 2012, pl.2, figs.1–2. Age: early Paleocene.

"*floreticulata*" Slimani, 1994, p.96–97, pl.15, figs.1–6. Holotype: Slimani, 1994, pl.15, figs.1–4. **NOW** *Cyclonephelium*. Originally *Canningia*, subsequently (and now) *Cyclonephelium*. Age: early–late Campanian.

grandis Helby, 1987, p.324–326, figs.29A–D,30A–D. Holotype: Helby, 1987, figs.30A–D; Fensome et al., 1996, figs.1–4 — p.2137. Age: Hauterivian.

?*granulata* Morgenroth, 1966a, p.12, pl.2, fig.10. Holotype: Morgenroth, 1966a, pl.2, fig.10. Originally *Canningia*, subsequently (and now) *Canningia*?. Questionable assignment: Stover and Evitt (1978, p.25), as a problematic species. Age: early Eocene.

"*hirtella*" (Alberti, 1961, p.28, pl.4, fig.20) Millioud, 1969, p.425. Holotype: Alberti, 1961, pl.4, fig.20. **NOW** *Circulodinium*. Originally (and now) *Circulodinium*, subsequently *Canningia*, thirdly *Cyclonephelium*. Age: Valanginian–Hauterivian.

hulinensis He Chengquan et al., 1999, p.192,199–200, pl.1, figs.1–6; text-fig.3. Holotype: He Chengquan et al., 1999, pl.1, figs.1–3; text-fig.3. Age: late Hauterivian–Barremian.

"*insignis*" He Chengquan, 1991, p.55–56, pl.9, figs.9–10. Holotype: He Chengquan, 1991, pl.9, fig.9. **NOW** *Circulodinium*. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: Cenomanian.

keiemensis Louwye, 1997, p.149, pl.1, figs.1–6. Holotype: Louwye, 1997, pl.1, figs.1–3,6. Age: latest Cenomanian–Santonian.

"*kukebaiensis*" Mao Shaozhi and Norris, 1988, p.31, pl.1, figs.6–8. Holotype: Mao Shaozhi and Norris, 1988, pl.1, fig.7. **NOW** *Circulodinium*. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: Turonian–Santonian.

macroreticulata Lebedeva in Ilyina et al., 1994, p.71, pl.30, figs.6–7; pl.31, figs.1–6; text-fig.10. Holotype: Ilyina et al., 1994, pl.30, figs.6–7. Age: late Coniacian.

"?*micibaculata*" Jiabo, 1978, p.54, pl.7, figs.1–2. Holotype: Jiabo, 1978, pl.7, fig.1. **NOW** *Circulodinium*?. Originally *Canningia*, subsequently *Canningia*?, thirdly (and now) *Circulodinium*?. Questionable assignment: Helby (1987, p.324–325). Lentin and Williams (1981, p.33) misspelled the specific epithet "*microbaculata*". Age: Early Tertiary.

?*microciliata* Jain, 1977b, p.178, pl.3, fig.25; pl.6, fig.78. Holotype: Jain, 1977b, pl.3, fig.25. Originally *Canningia*, subsequently (and now) *Canningia*?. Questionable assignment: Helby (1987, p.324–325). Age: early Albanian.

"*microreticulata*" (Brideaux and McIntyre, 1975, p.35, pl.11, figs.7–12; pl.12, figs.1–8) Below, 1981a, p.31. Holotype: Brideaux and McIntyre, 1975, pl.11, figs.7–9; pl.12, fig.1. **NOW** *Senoniasphaera*. Originally (and now) *Senoniasphaera*, subsequently *Canningia*. Age: middle Albanian.

"?*minor*" Cookson and Hughes, 1964, p.43, pl.8, figs.1–3,5. Holotype: Cookson and Hughes, 1964, pl.8, fig.1. **NOW** *Kallosphaeridium? helbyi*. Originally *Canningia minor*, subsequently *Canningia? minor*, thirdly *Batiacasphaera minor*, fourthly *Chytroeisphaeridia minor*, fifthly *Kallosphaeridium? minus* (combination illegitimate), sixthly (and now) *Kallosphaeridium? helbyi*. Questionable assignment: Stover and Evitt (1978, p.25). Age: late Albian–early Cenomanian.

"subsp. *minor*". Autonym. Holotype: Cookson and Hughes, 1964, pl.8, fig.1. **NOW** *Kallosphaeridium? helbyi* subsp. *helbyi*. Originally *Canningia? minor* subsp. *minor*, subsequently *Chytroeisphaeridia minor* subsp. *minor*, thirdly (and now) *Kallosphaeridium? helbyi* subsp. *helbyi*.

"var. *minor*". Autonym. Holotype: Cookson and Hughes, 1964, pl.8, fig.1. **Now redundant**.

"subsp. *psilata*" (Burger, 1980a, p.71, pl.25, figs.5–11) Lentin and Williams, 1981, p.33. Holotype: Burger, 1980a, pl.25, fig.10. **NOW** *Kallosphaeridium? helbyi* subsp. *psilatatum*. Originally *Canningia? minor* var. *psilata*, subsequently *Canningia? minor* subsp. *psilata*, thirdly *Chytroeisphaeridia minor* subsp. *psilata*, fourthly (and now) *Kallosphaeridium? helbyi* subsp. *psilatatum*. Age: late Albian–early Cenomanian.

"var. *psilata*" Burger, 1980a, p.71, pl.25, figs.5–11. Holotype: Burger, 1980a, pl.25, fig.10. **NOW** *Kallosphaeridium? helbyi* subsp. *psilatatum*. Originally *Canningia? minor* var. *psilatatum*, subsequently *Canningia? minor* subsp. *psilata*, thirdly *Chytroeisphaeridia minor* subsp. *psilata*, fourthly (and now) *Kallosphaeridium? helbyi* subsp. *psilatatum*. Age: late Albian–early Cenomanian.

"*palliata*" Brideaux, 1977, p.11–12, pl.3, figs.1–8. Holotype: Brideaux, 1977, pl.3, figs.1–4. Originally *Canningia*, subsequently *Cyclonephelium*. **Taxonomic senior synonym:** *Canningia reticulata*, according to Helby (1987, p.322–323). Age: Barremian.

"*pentagona*" He Chengquan, 1991, p.56, pl.9, figs.13–14. Holotype: He Chengquan, 1991, pl.9, fig.13. **NOW** *Circulodinium*. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: Late Cretaceous.

pitica Helby, 1987, p.326–327, figs.29E–L,30E–L. Holotype: Helby, 1987, figs.30I–L; Fensome et al., 1996, figs.4–7 — p.2281. Age: Hauterivian.

**reticulata* Cookson and Eisenack, 1960b, p.251, pl.38, figs.1–2. Emendations: Below, 1981a, p.32; Helby, 1987, p.322–323. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.1; Helby, 1987, fig.27J. Taxonomic junior synonym: *Canningia palliata*, according to Helby (1987, p.322–323). Age: Tithonian.

"*retirugosa*" He Chengquan, 1991, p.56, pl.8, fig.11. Holotype: He Chengquan, 1991, pl.8, fig.11. **NOW** *Kallosphaeridium*. Originally *Canningia*; subsequently (and now) *Kallosphaeridium*. Age: Late Cretaceous.

"?*ringnesiorum*" Manum and Cookson, 1964, p.15, pl.2, fig.10. Holotype: Manum and Cookson, 1964, pl.2, fig.10. **NOW** *Kallosphaeridium?*. Originally *Canningia*, subsequently *Canningia?*, thirdly *Batiacasphaera*, fourthly *Chytroeisphaeridia*, fifthly (and now) *Kallosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.25). Age: Campanian–Maastrichtian.

?*rotundata* Cookson and Eisenack, 1961a, p.72, pl.12, figs.1–5. Holotype: Cookson and Eisenack, 1961a, pl.12, fig.1. Originally *Canningia*, subsequently (and now) *Canningia?*, thirdly *Batiacasphaera*. Questionable assignment: Stover and Evitt (1978, p.25). Age: Senonian.

rugulosa (Clarke and Verdier, 1967, p.57–58, pl.12, figs.5–6; text-fig.23) Stover and Evitt, 1978, p.25. Holotype: Clarke and Verdier, 1967, pl.12, fig.6. Originally *Aptea*, subsequently (and now) *Canningia*. Age: Santonian.

scabrosa Cookson and Eisenack, 1970a, p.146, pl.13, figs.6–7. Holotype: Cookson and Eisenack, 1970a, pl.13, fig.6. Age: Albian–Cenomanian.

senonica Clarke and Verdier, 1967, p.20–21, pl.1, figs.12–14; text-fig.7. Holotype: Clarke and Verdier, 1967, pl.1, fig.12. Age: Santonian.

spongireticulata Prössl, 1990, p.97, pl.13, figs.2,5,13 ex Prössl, 1992b, p.113–114. Holotype: Prössl, 1990, pl.13, figs.2,5. This name was not validly published in Prössl (1990, p.97), since that author did not specify the lodgment of the holotype. Age: late Albian–middle Turonian.

"*spumosa*" Brideaux, 1977, p.12, pl.3, figs.9–14. Holotype: Brideaux, 1977, pl.3, figs.9,14. **NOW** *Batiacasphaera*. Originally *Canningia*, subsequently *Batiacasphaera*?, thirdly (and now) *Batiacasphaera*. Age: Aptian.

torulosa Davey and Verdier, 1973, p.180,183, pl.1, figs.2,5,8. Holotype: Davey and Verdier, 1973, pl.1, fig.2. Originally (and now) *Canningia*, subsequently *Batiacasphaera*, thirdly *Ovoidinium*. Lentin and Williams (1981, p.34; 1985, p.44) retained this species in *Canningia*. Age: late Albian–early Cenomanian.

transitoria Stover and Helby, 1987d, p.262–263, figs.3A–P,4A–B. Holotype: Stover and Helby, 1987d, figs.3A–E; Fensome et al., 1996, figs.1–5 — p.2405. Age: Barremian–early Aptian.

?*turruta* Brideaux, 1977, p.13, pl.4, figs.1–9. Holotype: Brideaux, 1977, pl.4, figs.1–3. Originally (and now) *Canningia*?, subsequently *Ovoidinium*. Questionable assignment: Brideaux (1977, p.13). Sangiorgi et al. (2009, p.252) speculated that this species may belong to *Arcticacysta*. Age: Barremian.

"*wulagenensis*" He Chengquan, 1991, p.57, pl.9, fig.16. Holotype: He Chengquan, 1991, pl.9, fig.16. **NOW** *Circulodinium*. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: Late Cretaceous.

xinjiangensis Chen et al., 1988, p.16. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.2, fig.1. Substitute name for *Hashenia reticulata* Yu Jingxian and Zhang Wangping, 1980, p.107, pl.1, fig.17; pl.2, figs.1–2; the name *Canningia reticulata* is preoccupied. Age: Turonian–Maastrichtian.

CANNINGINOPSIS Cookson and Eisenack, 1962b, p.488. Emendation: Marshall, 1990b, p.80–82. Type: Cookson and Eisenack, 1962b, pl.1, fig.16, as *Canninginopsis denticulata*.

bretonica Marshall, 1990b, p.84–86, figs.4L–T,5F–H,6L–U. Holotype: Marshall, 1990b, figs.4N,5F–G,6N–O; Fensome et al., 1996, figs.1–2,7 — p.2069. Age: late Campanian–mid Maastrichtian.

"*colliveri*" (Cookson and Eisenack, 1960b, p.251, pl.38, figs.3–4) Backhouse, 1988, p.77. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.4. **NOW** *Circulodinium*. Originally *Canningia*, subsequently (and now) *Circulodinium*, thirdly *Canninginopsis*. Fauconnier and Londeix in Fauconnier and Masure (2004, p.113) retained this species in *Circulodinium*. Age: Aptian.

**denticulata* Cookson and Eisenack, 1962b, p.488, pl.1, figs.16–19; text-fig.2. Holotype: Cookson and Eisenack, 1962b, pl.1, fig.16; Bint, 1986, text-fig.14F; Helby et al., 1987, fig.38A. Age: Albian–Cenomanian.

intermedia Morgan, 1980, p.18, pl.3, figs.4–8. Holotype: Morgan, 1980, pl.3, figs.7–8; Helby et al., 1987, figs.29E–F. Age: early Albian.

maastrichtiensis Slimani, 1994, p.97–98, pl.16, figs.5–8,13–14. Holotype: Slimani, 1994, pl.16, figs.5–7. Taxonomic junior synonym: *Canninginopsis verrucosa* (name not validly published), according to Slimani (2001a, p.192). Age: late Maastrichtian.

ordospinosa Smith, 1992, p.342, figs.5g–h,k–l,n,p,11i. Holotype: Smith, 1992, fig.5l. Age: late Campanian–early Maastrichtian.

"*ovalis*" (Vozzhennikova, 1967, p.99, pl.40, figs.1a–b,2a–b) Lentin and Williams, 1977b, p.147. Holotype: Vozzhennikova, 1967, pl.40, figs.1a–b, lost according to Lentin and Vozzhennikova (1990, p.69), who stated that no

potential lectotype is available. **NOW** *Spinidinium*. Originally *Canninginopsis*, subsequently *Spinidinium?*, thirdly (and now) *Spinidinium*. Age: Paleocene–Eocene.

"*tabulata*" (Davey and Verdier, 1974, p.630,632, pl.92, figs.1–4; pl.93, fig.6) Duxbury, 1977, p.27. Holotype: Davey and Verdier, 1974, pl.92, figs.1,4; Eisenack and Kjellström, 1981b, p.328b; Sarjeant, 1992b, figs.3–4; Fensome et al., 1995, figs.1–2 — p.1833. **NOW** *Cerbia*. Originally *Cyclonephelium*, subsequently *Canninginopsis*, thirdly (and now) *Cerbia*. Taxonomic senior synonym: *Tenua hystrix*, according to Sarjeant (1985a, p.94; 1992b, p.681) — however, by retaining *Cerbia*, Duxbury (2002, p.76.78) retained *Cerbia tabulata* by implication. Age: Aptian.

"*verrucosa*" Wilson in Slimani, 1994, p.97. **Name not validly published:** no description or illustration. **Taxonomic senior synonym:** *Canninginopsis maastrichtiensis*, according to Slimani (2001a, p.192).

CANNOSPHAEROPSIS Wetzel, 1933b, p.6. Emendations: Williams and Downie, 1966c, p.222; Duxbury, 1980, p.114; Marheinecke, 1992, p.41. This name was not validly published in Wetzel (1932, p.136) since it was merely used in anticipation of future acceptance of the name (I.C.N. Article 36.1). This interpretation is in contrast to that of Lentin and Williams (1993, p.77). Type: Wetzel, 1933b, pl.3, figs.9a–b, as *Cannosphaeropsis utinensis*.

"*aemula*" (Deflandre, 1939a, p.187–189, pl.9, fig.12; pl.10, figs.5–8; pl.11, figs.1,7) Deflandre, 1947a, p.1576. Emendation: Below, 1982b, p.139–140, as *Rigaudella aemula*. Holotype: Deflandre, 1939a, pl.11, fig.1; Eisenack and Kjellström, 1972, figure to left on p.43; Fensome et al., 1995, fig.1 — p.1473; fig.2 — p.1475. **NOW** *Rigaudella*. Originally *Hystrichosphaeridium*, subsequently *Cannosphaeropsis*, thirdly *Adnatosphaeridium*, fourthly (and now) *Rigaudella*. Taxonomic junior synonym: *Cannosphaeropsis paucispina*, according to Below (1982b, p.139). Age: Oxfordian.

"subsp. *aemula*". Autonym. Holotype: Deflandre, 1939a, pl.11, fig.1; Eisenack and Kjellström, 1972, figure to left on p.43; Fensome et al., 1995, fig.1 — p.1473; fig.2 — p.1475. **NOW** *Rigaudella aemula* subsp. *aemula*. Originally *Cannosphaeropsis aemula* subsp. *aemula*, subsequently *Adnatosphaeridium aemulum* subsp. *aemulum*, thirdly (and now) *Rigaudella aemula* subsp. *aemula*.

"subsp. *integra*" Cookson and Eisenack, 1958, p.47, pl.7, figs.6–7. Holotype: Cookson and Eisenack, 1958, pl.7, fig.6; Fensome et al., 1995, fig.1 — p.1565; Fauconnier and Masure, 2004, pl.68, figs.8–9. **NOW** *Rigaudella aemula* subsp. *integra*. Originally *Cannosphaeropsis aemula* subsp. *integra*, subsequently *Adnatosphaeridium aemulum* subsp. *integrum*, thirdly (and now) *Rigaudella aemula* subsp. *integra*. Age: Late Jurassic.

"*apiculata*" Cookson and Eisenack, 1960b, p.254, pl.39, fig.15. Emendation: Davey, 1988, p.42–43, as *Papuadinium apiculatum*. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.15; Fensome et al., 1993a, fig.1 — p.927. **NOW** *Papuadinium*. Originally *Cannosphaeropsis*, subsequently *Adnatosphaeridium*, thirdly *Rigaudella*, fourthly (and now) *Papuadinium*. Age: Tithonian.

australis Riding and Helby, 2001h, p.227,229, figs.1A–I. Holotype: Riding and Helby, 2001h, figs.1D–F. Taxonomic junior synonym: *Hapsocysta spinosa* (name not validly published), according to Riding and Helby (2001h, p.227). Age: late Aptian–late Albian.

"*caulleryi*" (Deflandre, 1939a, p.189, pl.11, figs.2–3) Sarjeant, 1961a, p.103. Emendation: Stancliffe and Sarjeant, 1990, p.200, as *Adnatosphaeridium caulleryi*. Holotype: Deflandre, 1939a, pl.11, fig.2; Stancliffe and Sarjeant, 1990, pl.1, figs.3,5; Fauconnier and Masure, 2004, pl.1, figs.7–8. **NOW** *Adnatosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Cannosphaeropsis*, thirdly (and now) *Adnatosphaeridium*, fourthly *Polystephanephorus*. Age: early Oxfordian.

"?*choneta*" Cookson and Eisenack, 1962b, p.493, pl.4, figs.8–10. Holotype: Cookson and Eisenack, 1962b, pl.4, fig.8. **NOW** *Adnatosphaeridium?*. Originally *Cannosphaeropsis?*, subsequently *Adnatosphaeridium*, thirdly (and now) *Adnatosphaeridium?*. Questionable assignment: Cookson and Eisenack (1962b, p.493). Age: ?Cenomanian.

?densa Cookson and Eisenack, 1962b, p.493, pl.4, figs.1–3. Holotype: Cookson and Eisenack, 1962b, pl.4, fig.1. Originally *Cannosphaeropsis*, subsequently (and now) *Cannosphaeropsis?*. Questionable assignment: Stover and Evitt (1978, p.144), as a problematic species. Age: late Albian–Cenomanian.

"?densifilosa" Cookson and Eisenack, 1974, p.70, pl.24, fig.13. Holotype: Cookson and Eisenack, 1974, pl.24, fig.13; Stancliffe and Sarjeant, 1990, pl.4, fig.1; Fauconnier and Masure, 2004, pl.1, fig.4. **NOW** *Adnatosphaeridium*. Originally *Cannosphaeropsis*, subsequently *Cannosphaeropsis?*, thirdly (and now) *Adnatosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.144), as a problematic species. Age: Late Jurassic.

"densiradiata" Cookson and Eisenack, 1962b, p.493, pl.4, figs.5–7. Holotype: Cookson and Eisenack, 1962b, pl.4, figs.5–6. **NOW** *Nematosphaeropsis*. Originally *Cannosphaeropsis*, subsequently (and now) *Nematosphaeropsis*. Age: Cenomanian.

"?elegantula" Drugg, 1967, p.25, pl.4, fig.17. Holotype: Drugg, 1967, pl.4, fig.17. **NOW** *Trabeculidium*. Originally *Cannosphaeropsis*, subsequently *Cannosphaeropsis?*, thirdly (and now) *Trabeculidium*, fourthly *Nematosphaeropsis*. Questionable assignment: Stover and Evitt (1978, p.144) as a problematic species. Age: Danian.

"fenestrata" Deflandre and Cookson, 1955, p.283, pl.3, fig.2; text-fig.43. Holotype: Deflandre and Cookson, 1955, pl.3, fig.2. **NOW** *Aiora* Cookson and Eisenack, 1960a. Originally *Cannosphaeropsis*, subsequently (and now) *Aiora*. Age: Turonian–Santonian.

"filamentosa" Cookson and Eisenack, 1958, p.47–48, pl.7, figs.8–9; pl.8, figs.1–2. Holotype: Cookson and Eisenack, 1958, pl.7, fig.9. **NOW** *Rigaudella*. Originally *Cannosphaeropsis*, subsequently *Adnatosphaeridium*, thirdly (and now) *Rigaudella*. Taxonomic junior synonym: *Cannosphaeropsis perforata*, according to Stancliffe and Sarjeant (1990, p.206). Age: Middle-Late Jurassic.

"filifera" (Cookson and Eisenack, 1958, p.46, pl.7, fig.4) Cookson and Eisenack, 1960a, p.8. Holotype: Cookson and Eisenack, 1958, pl.7, fig.4; Fauconnier and Masure, 2004, pl.1, figs.1–2. **NOW** *Adnatosphaeridium filiferum*. Originally *Cannosphaeropsis utinensis* subsp. *filifera*, subsequently *Cannosphaeropsis filiferum*, thirdly (and now) *Adnatosphaeridium filiferum*. Age: Campanian–early Maastrichtian.

franciscana Damassa, 1979b, p.204–205, pl.4, fig.9; pl.5, figs.1–11. Holotype: Damassa, 1979b, pl.5, figs.1–2,6. Age: early Paleocene.

?glabra Cookson and Eisenack, 1974, p.70, pl.24, fig.12. Holotype: Cookson and Eisenack, 1974, pl.24, fig.12. Originally *Cannosphaeropsis*, subsequently (and now) *Cannosphaeropsis?*. Questionable assignment: Stover and Evitt (1978, p.144) as a problematic species. Age: Middle Cretaceous.

hughesii Harding, 1990b, p.24–25, pl.6, figs.9–16 ex Harding in Williams et al., 1998, p.92. Holotype: Harding, 1990b, pl.6, figs.10,14. This name was not validly published in Harding (1990b) since the lodgement of the holotype was not specified (I.C.N. Article 40.7). Age: late Hauterivian.

?hyperacantha Cookson and Eisenack, 1960a, p.9, pl.2, figs.14–15. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.14. Originally *Cannosphaeropsis*, subsequently (and now) *Cannosphaeropsis?*. Questionable assignment: Stover and Evitt (1978, p.144) as a problematic species. Age: Campanian.

"mirabilis" Cookson and Eisenack, 1958, p.48, pl.8, figs.3–5. Holotype: Cookson and Eisenack, 1958, pl.8, fig.3. **NOW** *Peridictyocysta*. Originally *Cannosphaeropsis*, subsequently (and now) *Peridictyocysta*. Age: Late Jurassic.

passio de Verteuil and Norris, 1996a, p.130,132,134,136, pl.7, figs.1–8; pl.8, figs.1–6; pl.17, figs.1,3–5; text-fig.33. Holotype: de Verteuil and Norris, 1996a, pl.7, figs.1–3,5–6,8. N.I.A. Age: late middle Miocene.

- "paucispina"** Klement, 1960, p.72, pl.10, figs.9–10. Holotype: Klement, 1960, pl.10, fig.9; Sarjeant, 1984a, pl.3, figs.5–6. Originally *Cannosphaeropsis*, subsequently *Adnatosphaeridium*. **Taxonomic senior synonym:** *Cannosphaeropsis* (as *Rigaudella*) *aemula*, according to Below (1982b, p.139). Age: late Oxfordian.
- "perforata"** Alberti, 1961, p.37, pl.9, fig.14. Holotype: Alberti, 1961, pl.9, fig.14. Originally *Cannosphaeropsis*, subsequently *Adnatosphaeridium*, thirdly *Rigaudella*. **Taxonomic senior synonym:** *Cannosphaeropsis* (now *Rigaudella*) *filamentosa*, according to Stancliffe and Sarjeant (1990, p.206). Age: ?Callovian.
- "?peridictya"** Eisenack and Cookson, 1960, p.8, pl.3, figs.5–6. Emendation: Davey, 1979b, p.556, as *Hapsocysta peridictya*. Holotype: Eisenack and Cookson, 1960, pl.3 fig.6; Fensome et al., 1995, fig.2 — p.1661; Heilmann-Clausen and Van Simaey, 2005, text-figs.6A–B. **NOW** *Hapsocysta*. Originally *Cannosphaeropsis*, subsequently *Cannosphaeropsis?*, thirdly (and now) *Hapsocysta*. Questionable assignment: Stover and Evitt (1978, p.144). Age: late Albian–Cenomanian.
- "philippotii"** Deflandre, 1947a, p.1574; text-figs.2–3. Holotype: Deflandre, 1947a, text-fig.3. **NOW** *Nematosphaeropsis*. Originally *Cannosphaeropsis*, subsequently (and now) *Nematosphaeropsis*, thirdly *Nematosphaeropsis?*. Taxonomic junior synonym: *Nematosphaeropsis delicata* (name not validly published), according to Slimani (2001a, p.193). Age: Senonian.
- ?praetexta** Corradini, 1973, p.163, pl.25, figs.7a–b,8; pl.35, fig.5. Holotype: Corradini, 1973, pl.25, figs.7a–b. Originally *Cannosphaeropsis*, subsequently (and now) *Cannosphaeropsis?*. Questionable assignment: Stover and Evitt (1978, p.144). Age: Late Cretaceous–Paleocene.
- ?pulchra** Alberti, 1961, p.37, pl.10, fig.5. Holotype: Alberti, 1961, pl.10, fig.5. Originally *Cannosphaeropsis*, subsequently (and now) *Cannosphaeropsis?*. Questionable assignment: Stover and Evitt (1978, p.144) as a problematic species. Age: Coniacian.
- "pusulosa"** Morgenroth, 1966b, p.8, pl.2, fig.6. Holotype: Morgenroth, 1966b, pl.2, fig.6; Sarjeant et al., 1987, pl.1, fig.8. **NOW** *Trabeculidium*. Originally *Cannosphaeropsis*, subsequently *Nematosphaeropsis*, thirdly (and now) *Trabeculidium*. Age: early Oligocene.
- quattrocchiaie** Guerstein et al. 2001, p.158–160, pl.1, figs.1–12, pl.2, figs.1–8, text-figs.4a–b. Holotype: Guerstein et al., 2001, pl.1, figs.4–8, text-figs.4a–b (not 4e–f as indicated by Guerstein et al., 2001, p.158). Age: youngest occurrence probably early Miocene.
- "reticulensis"** PASTIELS, 1948, p.49, pl.5, figs.7–10. Emendation: Sarjeant, 1986, p.9,11, as *Nematosphaeropsis reticulensis*. Holotype: PASTIELS, 1948, pl.5, fig.10; unrecognizable, according to Sarjeant (1986, p.11). Lectotype: PASTIELS, 1948, pl.5, fig.7; Sarjeant, 1986, pl.3, fig.6; designated by Sarjeant (1986, p.11). **NOW** *Nematosphaeropsis*. Originally *Cannosphaeropsis*, subsequently *Adnatosphaeridium*, thirdly (and now) *Nematosphaeropsis*. Age: early Eocene.
- "robusta"** Morgenroth, 1966a, p.19, pl.4, fig.1. Holotype: Morgenroth, 1966a, pl.4, fig.1. **NOW** *Adnatosphaeridium*. Originally *Cannosphaeropsis*, subsequently (and now) *Adnatosphaeridium*. Age: early Eocene.
- ?scaffoldii** (Baksi, 1962, p.17, pl.2, fig.25) Downie and Sarjeant, 1965, p.101. Holotype: Baksi, 1962, pl.2, fig.25. Originally *Hystrichosphaeridium*, subsequently *Cannosphaeropsis*, thirdly (and now) *Cannosphaeropsis?*. Questionable assignment: Stover and Evitt (1978, p.144) as a problematic species. Age: Eocene.
- "?speciosa"** Alberti, 1961, p.37, pl.9, fig.13. Holotype: Alberti, 1961, pl.9, fig.13; Stancliffe and Sarjeant, 1990, pl.5, fig.6. **NOW** *Adnatosphaeridium?*. Originally *Cannosphaeropsis*, subsequently *Polystephanephorus*, thirdly *Cannosphaeropsis?*, fourthly (and now) *Adnatosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.144) as a problematic species. Age: Bathonian–Callovian.
- "thule"** Davey, 1982b, p.26–27, pl.8, figs.7–11. Emendation: Riding and Davey, 1989, p.109,112, as *Rotosphaeropsis thule*. Holotype: Davey, 1982b, pl.8, figs.8–11; Riding and Davey, 1989, pl.1. fig.4. **NOW**

Rotosphaeropsis. Originally *Cannosphaeropsis*, subsequently (and now) *Rotosphaeropsis*. N.I.A. Age: latest Kimmeridgian–late Ryazanian.

"?*tutulosa*" Cookson and Eisenack, 1960a, p.8, pl.2, figs.12–13. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.13; Fauconnier and Masure, 2004, pl.1, fig.3. **NOW** *Adnatosphaeridium*. Originally *Cannosphaeropsis*, subsequently *Cannosphaeropsis*?, thirdly *Adnatosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.144) as a problematic species. Age: Cenomanian.

"*urnaformis*" Cookson, 1953, p.118, pl.2, figs.41–43. Holotype: Cookson, 1953, pl.2, figs.41–42. **NOW** *Emmetrocysta*. Originally *Cannosphaeropsis*, subsequently *Polystephanephorus*, thirdly (and now) *Emmetrocysta*. Age: Oligocene.

"*ursulae*" Morgenroth, 1966a, p.20, pl.3, figs.11–12. Holotype: Morgenroth, 1966a, pl.3, fig.11; Eisenack and Kjellström, 1972, figure to left — p.143; Fensome et al., 1995, fig.1 — p.1865. **NOW** *Eatonicysta*. Originally *Cannosphaeropsis*, subsequently *Membranilarnacia*, thirdly (and now) *Eatonicysta*. Taxonomic junior synonyms: *Membranilarnacia diktyophora*, according to Eaton (1976, p.277); *Membranilarnacia reticulata*, according to de Coninck (1969, p.43) and Gocht (1969, p.65). Age: early Eocene.

**utinensis* Wetzel, 1933b, p.6, pl.3, figs.9–17; text-fig.12. Emendations: May, 1980, p.45; Duxbury, 1980, p.114–115; Sarjeant, 1985b, p.147–149; Marheinecke, 1992, p.41–42. Holotype: Wetzel, 1933b, pl.3, figs.9a–b; lost according to Sarjeant (1985b, p.148). Lectotype: Wetzel, 1933b, pl.3, fig.11; Sarjeant, 1985b, pl.5, figs.1–2; Dietz et al., 1999, fig.10, no.7; designated by Sarjeant (1985b, p.148). This name was not validly published in Wetzel (1932, p.140) since it was merely used in anticipation of future acceptance of the name (I.C.N. Article 36.1). This interpretation is in contrast to that of Lentin and Williams (1993, p.80). Age: Late Cretaceous.

"subsp. *filifera*" Cookson and Eisenack, 1958, p.46, pl.7, fig.4. Holotype: Cookson and Eisenack, 1958, pl.7, fig.4; Fauconnier and Masure, 2004, pl.1, figs.1–2. **NOW** *Adnatosphaeridium filiferum*. Originally *Cannosphaeropsis utinensis* subsp. *filifera*, subsequently *Cannosphaeropsis filifera*, thirdly (and now) *Adnatosphaeridium filiferum*. Age: Campanian–early Maastrichtian.

"subsp. *utinensis*". Autonym. Holotype: Cookson and Eisenack, 1958, pl.7, fig.4. **Now redundant.**

williamsii Sarjeant, 1986, p.33–34. Holotype: Williams and Downie, 1966c, pl.24, fig.8 (as *Cannosphaeropsis reticulensis*). Age: early Eocene.

"**CANTIACIDINIUM**" Reid in Head et al., 2001, p.629. **Name not validly published:** no description or illustration. **Taxonomic senior synonym:** *Islandinium*, by implication in Head et al. (2001, p.629), who considered the only recorded species name, *Cantiacidinium conicum* (name not validly published), to be a taxonomic junior synonym of *Islandinium minutum*.

"*conicum*" Reid in Head et al., 2001, p.629. **Name not validly published:** no description or illustration. **Taxonomic senior synonym:** *Multispinula*? (now *Islandinium minuta*, according to Head et al. (2001, p.629).

CANTULODINIUM Alberti, 1961, p.23. Emendation: van Helden, 1986, p.190. Taxonomic senior synonym: *Muderongia*, according to Dörhöfer and Davies (1980, p.14) — however, Lentin and Williams (1981, p.36) retained *Cantulodinium*. Type: Alberti, 1961, pl.3, fig.20, as *Cantulodinium speciosum*.

arthuriae van Helden, 1986, p.192,194, pl.1, figs.1–6; pl.2, figs.1–8; text-figs.5a–e. Holotype: van Helden, 1986, pl.1, figs.1–2; text-fig.5b. Age: Portlandian–early Berriasian.

?*protuberatum* Wall, 1965a, p.160, pl.4, figs.14–20; pl.8, fig.8. Holotype: Wall, 1965a, pl.4, fig.15; pl.8, fig.8. Originally *Cantulodinium*, subsequently (and now) *Cantulodinium*?. Questionable assignment: Stover and Evitt (1978, p.98) as a problematic species. Age: Pliensbachian–Toarcian.

**speciosum* Alberti, 1961, p.23, pl.3, figs.20–23; pl.12, fig.3. Holotype: Alberti, 1961, pl.3, fig.20. Age: Valanginian.

CAPILLICYSTA Matsuoka and Bujak in Matsuoka et al., 1987, p.226. Emendation: de Verteuil and Norris, 1992, p.397–398, in text. Type: Matsuoka et al., 1987, pl.1, figs.1–2, as *Capillicysta fusca*.

"*applanata*" (Bradford, 1977 [April], p.47–49, fig.2, nos.1–8) Matsuoka et al., 1987, p.228. Holotype: Bradford, 1977, fig.2, nos.1–4. **NOW** *Trinovantedinium*. Originally *Lejeunia* (generic name illegitimate), subsequently *Lejeunecysta*, thirdly (and now) *Trinovantedinium*, fourthly *Capillicysta*. Taxonomic junior synonym: *Trinovantedinium capitatum* Reid 1977 [November], by implication in Matsuoka (1984b, p.6), who did not specify priority, and de Verteuil and Norris (1992, p.408). Motile equivalent: *Protoperidinium pentagonum* (Gran, 1902) Balech, 1974, according to Bradford and Wall (1984, p.48–49). Age: Holocene.

**fusca* Matsuoka and Bujak in Matsuoka et al., 1987, p.226,228, pl.1, figs.1–12; pl.2, figs.10–11. Holotype: Matsuoka et al., 1987, pl.1, figs.1–2; Head, 1994b, pl.2, figs.7–9; Fensome et al., 1995, figs.1–2 — p.1493. Age: middle-late Miocene.

"*gloriana*" Head et al., 1989b, p.453, pl.5, figs.4,8,10–12. Holotype: Head et al., 1989b, pl.5, figs.11–12. **NOW** *Trinovantedinium*. Originally *Capillicysta*, subsequently (and now) *Trinovantedinium*. Age: late Miocene–earliest Pliocene.

CAPISOCYSTA Warny and Wrenn, 1997, p.297. Emendation: Head, 1998b, p.800. Type: Warny and Wrenn, 1997, pl.8, figs.7,10, as *Capisocysta wallii*.

lata Head, 1998b, p.802,806–807, fig.1, nos.1,3,5; fig.2, nos.1–6; fig.3, nos.1–12; fig.4, nos.1–15. Holotype: Head, 1998b, fig.1, no.1; fig.2, nos.1–2. Age: early Pliocene–Holocene.

lyellii Head, 1998b, p.807–808, fig.1, nos.2,4,6; fig.5, nos.1–6. Holotype: Head, 1998b, fig.1, no.2; fig.5, nos.3–4. Age: early Pliocene.

**wallii* Warny and Wrenn, 1997, p.298–299, pl.8, figs.1–10; text-figs.3A–C. Holotype: Warny and Wrenn, 1997, pl.8, figs.7,10. Age: Miocene–Holocene.

CARACOMIA Streng et al., 2002, p.398. Calcareous dinoflagellate genus (see Streng et al., 2004, p.481 and Elbrächter et al., 2008, p.1299). Type: Gilbert and Clark, 1983, pl.1, fig.1, as *Thoracosphaera arctica*.

**arctica* (Gilbert and Clark, 1983, p.400, pl.1, figs.1–15) Streng et al., 2002, p.398. Holotype: Gilbert and Clark, 1983, pl.1, fig.1. Originally *Thoracosphaera*, subsequently *Sphaerodinella*, thirdly (and now) *Caracomia*. Age: late Miocene–Holocene.

forma *arctica*. Autonym. Holotype: Gilbert and Clark, 1983, pl.1, fig.1.

var. *arctica*. Autonym. Holotype: Gilbert and Clark, 1983, pl.1, fig.1.

forma *duplicata* Streng et al., 2009, p.240–241, pl.11, figs.1–5,10. Holotype: Streng et al., 2009, pl.11, figs.1,4,10. Age: middle Miocene.

forma *rossensis* Streng et al., 2011, p.602–603, figs.2a,e–f,k–m; figs.3a–f. Holotype: Streng et al., 2011, fig.2a. Age: Pleistocene.

forma *spinosa* Hildebrand-Habel and Streng, 2003, p.313–314, pl.2, figs.13–15; pl.3, figs.1–6; text-fig.5, nos.1–2. Holotype: Hildebrand-Habel and Streng, 2003, pl.2, figs.13–14. Age: latest middle Miocene.

var. *stupaviensis* Banasová et al., 2007, p.110–111,122, pl.1, figs.1–5. Holotype: Banasová et al., 2007, pl. figs.1–3. Age: Burdigalian.

stella Streng et al., 2002, p.398–399,401, fig.7, nos.1–5; fig.8, nos.8–10. Holotype: Streng et al., 2002, fig.7, no.1; fig.8, no.10. N.I.A. Age: early Miocene–late Pliocene.

CARDUIFOLIA Hovasse, 1932b, p.469. Siliceous dinoflagellate genus (see Dumitrică, 1973, p.824). This name was not validly published in Hovasse (1932a, p.126) since that author did not provide a description or diagnosis. Type: Hovasse, 1932b, fig.9, as *Carduifolia onopordoides*.

apiculata Hovasse, 1932b, p.469, figs.22–23. Holotype: not designated. Age: Tertiary.

gracilis Hovasse, 1932a, p.127, fig.10 ex Hovasse, 1932b, p.469. Holotype: Hovasse, 1932a, fig.10. This name was not validly published in Hovasse (1932a) since the generic name *Carduifolia* was not validly published until later in 1932. Age: middle Miocene.

"var. *spinosa*" Hovasse, 1932b, p.469. **Name not validly published:** no illustration.

lata Hovasse, 1932b, p.470, figs.24–25. Holotype: not designated. Age: Paleocene–middle Miocene.

**onopordoides* Hovasse, 1932a, p.126, fig.9 ex Hovasse, 1932b, p.469. Holotype: Hovasse, 1932a, fig.9. This name was not validly published in Hovasse (1932a) since the generic name *Carduifolia* was not validly published until later in 1932. The name *Carduifolia onopordoides* was not directly cited by Hovasse (1932b), in which publication he validated the generic name *Carduifolia*. However, given the liberal rules governing citation at that time, we accept the name as validated there, as apparently also did Loeblich Jr. and Loeblich III (1966, p.19). Age: early Paleocene.

CARINASPHERA Kohring, 1993a, p.29. Calcareous dinoflagellate genus (see Streng et al., 2004, p.481 and Elbrächter et al., 2008, p.1299). Type: Kohring, 1993a, pl.4, figs.a–e, as *Carinasphaera cimbra*.

**cimbra* Kohring, 1993a, p.29–30, pl.4, figs.a–e; pl.42, fig.k. Holotype: Kohring, 1993a, pl.4, figs.a–e. Age: late middle Eocene.

CARINELLUM Keupp, 1981, p.50–51. Calcareous dinoflagellate genus (see Streng et al., 2004, p.481 and Elbrächter et al., 2008, p.1299). Type: Keupp, 1981, pl.41, figs.1–3, as *Carinellum monocarinatum*.

conulum Keupp, 1981, p.52–53, pl.42, figs.1–6. Holotype: Keupp, 1981, pl.42, figs.1–3. Age: early Barremian.

hyalinum Keupp, 1987, p.49, pl.13, figs.1–5; pl.14, figs.10–11. Holotype: Keupp, 1987, pl.13, figs.1–2; pl.14, figs.10–11. Keupp (1995, p.158) placed the generic name in quotes. Age: middle Albian–early Cenomanian.

lenticulare Keupp, 1987, p.48–49, pl.12, figs.1–12; pl.14, fig.9. Holotype: Keupp, 1987, pl.12, fig.3. Keupp (1995, p.158) placed the generic name in quotes. Age: middle Albian–early Cenomanian.

**monocarinatum* Keupp, 1981, p.51–52, pl.40, figs.4–15; pl.41, figs.1–12. Holotype: Keupp, 1981, pl.41, figs.1–3. Age: late Hauterivian.

parasolis Keupp, 1984, p.22, pl.10, figs.9–12. Holotype: Keupp, 1984, pl.10, figs.9–10. N.I.A. Age: Eocene.

turbosimile Kienel, 1994, p.50–51, pl.10, figs.7–11. Holotype: Kienel, 1994, pl.10, figs.7–8,10–11. Age: Danian.

"*vimineum*" Keupp, 1987, p.49–50, pl.13, figs.7–12; pl.14, figs.1–8. Holotype: Keupp, 1987, pl.13, figs.7–8. **NOW** *Pentadinellum*. Originally *Carinellum*, subsequently (and now) *Pentadinellum*. Age: middle Albian–early Cenomanian.

CARNARVONODINIUM Parker, 1988, p.167–168. Type: Parker, 1988, fig.3A, as *Carnarvonodinium morganii*.

granulatum Jiang Qinghua in Jiang Qinghua et al., 1992, p.81, pl.1, figs.1–3. Holotype: Jiang Qinghua et al., 1992, pl.1, fig.2. Age: Kimmeridgian–Tithonian.

**morganii* Parker, 1988, p.168,170, figs.3A–F. Holotype: Parker, 1988, fig.3A; Fensome et al., 1996, fig.1 — p.2233. Age: Tithonian.

striatigranulatum Parker, 1988, p.170, figs.3G–K. Holotype: Parker, 1988, figs.3G–H; Fensome et al., 1996, figs.1–2 — p.2381. Age: Tithonian.

CARPATELLA Grigorovich, 1969a, p.74. Emendations: Fechner and Mohr, 1986, p.183–184; Damassa, 1988, p.168,170,172. Taxonomic junior synonym: *Paraireiana*, according to Chen et al. (1988, p.21). Type: Grigorovich, 1969a, pl.1, fig.1, as *Carpatella cornuta*.

circularis (He Chengquan, 1991, p.171, pl.8, fig.13) Lentin and Williams, 1993, p.81. Holotype: He Chengquan, 1991, pl.8, fig.13. Originally *Paraireiana*, subsequently (and now) *Carpatella*. Age: Paleocene.

**cornuta* Grigorovich, 1969a, p.74–75, pl.1, figs.1–6. Emendations: Fechner and Mohr, 1986, p.184,186–187; Damassa, 1988, p.170,172. Holotype: Grigorovich, 1969a, pl.1, fig.1, lost according to Damassa (1988, p.174). Neotype: Damassa, 1988, pl.1, figs.1,4,7, designated by Damassa (1988, p.174). Age: Danian.

fusifformis (He Chengquan, 1991, p.171, pl.8, figs.6–8) Lentin and Williams, 1993, p.81. Holotype: He Chengquan, 1991, pl.8, fig.6. Originally *Paraireiana*, subsequently (and now) *Carpatella*. Age: middle Eocene.

humera He Chengquan, 1991, p.104–105, pl.7, figs.10–11. Holotype: He Chengquan, 1991, pl.7, fig.10. Age: Paleocene.

lamprota (He Chengquan, 1991, p.171–172, pl.8, figs.15–16) Lentin and Williams, 1993, p.82. Holotype: He Chengquan, 1991, pl.8, fig.15. Originally *Paraireiana*, subsequently (and now) *Carpatella*. Age: early Eocene.

scabrota (He Chengquan, 1991, p.172, pl.8, fig.14) Lentin and Williams, 1993, p.82. Holotype: He Chengquan, 1991, pl.8, fig.14. Originally *Paraireiana*, subsequently (and now) *Carpatella*. Age: Paleocene.

septata Willumsen, 2004, p.120–121,123, pl.1, figs.3–4; pl.2, figs.1–6. Holotype: Willumsen, 2004, pl.1, fig.4. Age: latest Maastrichtian–earliest Paleocene.

sinensis (He Chengquan, 1984a, p.769, pl.1, figs.8–11) Chen et al., 1988, p.21. Holotype: He Chengquan, 1984a, pl.1, fig.8. Originally *Paraireiana*, subsequently (and now) *Carpatella*. Age: Paleocene–Eocene.

truncata Willumsen, 2004, p.124, pl.1, figs. 5–6. Holotype: Willumsen, 2004, pl.1, fig.6. Age: earliest Paleocene.

CARPATODINIUM Drugg, 1978, p.64. Emendation: Below, 1990, p.44. Type: Beju, 1971, pl.4, figs.4a–b; text-fig.5, as *Meiourogonyaulax? predae*.

**predae* (Beju, 1971, p.288–289, pl.4, figs.4a–b,5–7; text-fig.5) Drugg, 1978, p.64. Emendations: Drugg, 1978, p.64 and Below, 1990, p.45–46, both as *Carpathodinium predae*. Holotype: Beju, 1971, pl.4, figs.4a–b; text-fig.5; Eisenack and Kjellström, 1975b, p.792d; Fensome et al., 1995, figs.1–4 — p.1679. Originally *Meiourogonyaulax?*, subsequently *Lithodinia?*, thirdly (and now) *Carpathodinium*. Age: Callovian–early Oxfordian.

CARPISTOMIOSPHAERA Nowak, 1968, p.301. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1299). Type: I. Nagy, 1966, pl.5, fig.15, as *Cadosina borzae*.

***borzae** (I. Nagy, 1966, p.92, pl.5, figs.15–16) Nowak, 1968, p.301. Holotype: I. Nagy, 1966, pl.5, fig.15. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Carpistomiosphaera*. Age: Kimmeridgian.

moraviensis Řehánek, 1985a, p.375–376, pl.6, figs.1–6. Holotype: Řehánek, 1985a, pl.6, figs.1–2. Age: late Albian.

tithonica Nowak, 1968, p.303, pl.31, fig.7. Holotype: Nowak, 1968, pl.31, fig.7. Age: Tithonian.

CARPODINIUM Cookson and Eisenack, 1962b, p.489. Emendation: Leffingwell and Morgan, 1977, p.297. Type: Cookson and Eisenack, 1962b, pl.1, figs.6–9, as *Carpodinium granulatum*.

***granulatum** Cookson and Eisenack, 1962b, p.489, pl.1, figs.6–10. Emendation: Leffingwell and Morgan, 1977, p.297–298. Holotype: Cookson and Eisenack, 1962b, pl.1, figs.6–9; Jan du Chêne et al., 1986a, pl.16, figs.1–4. Age: Albian.

obliquicostatum Cookson and Hughes, 1964, p.48, pl.6, figs.1–6. Holotype: Cookson and Hughes, 1964, pl.6, fig.1; Jan du Chêne et al., 1986a, pl.16, figs.10–12. Age: late Albian–early Cenomanian.

CASPIDIINIUM Marret in Marret et al., 2004, p.7–9. Type: Marret et al., 2004, pl.1, figs.1–5, as *Caspidium rugosum*.

***rugosum** Marret in Marret et al., 2004, p.9–11, pl.1, figs.1–9: text-figs.3A–E. Holotype: Marret et al., 2004, pl.1, figs.1–5. Age: late Holocene.

CASSICULOSPHAERIDIA Davey, 1969a, p.141. Taxonomic senior synonym: *Valensiella*, according to Courtinat (1989, p.182) — however, Slimani (1994, p.98) retained *Cassiculosphaeridia*. Type: Davey, 1969a, pl.4, fig.3, as *Cassiculosphaeridia reticulata*.

alta Pearce, 2010, p.64, p.64,66, pl.1, figs.7–9. Holotype: pl.1, figs.7–9. Age: early Cenomanian–mid Coniacian.

"**altomurata**" Courtinat in Courtinat and Gaillard, 1980, p.11–12, pl.2, fig.16; pl.5, fig.7. Holotype: Courtinat and Gaillard, 1980, pl.2, fig.16; pl.5, fig.7. **NOW** *Valensiella*. Originally *Cassiculosphaeridia*, subsequently (and now) *Valensiella*. Age: late Oxfordian.

?**cribrosa** Dodekova, 1994, p.20, pl.2, figs.1–5,12–13. Holotype: Dodekova, 1994, pl.2, figs.1–3. Questionable assignment: Dodekova (1994, p.20). Age: Tithonian.

"**delicata**" Stover and Helby, 1987a, p.103, figs.2A–H. Holotype: Stover and Helby, 1987a, figs.2A–C; Stevens, 1987, figs.9K–M; Fensome et al., 1996, figs.1–3 — p.2107. **NOW** *Valensiella*. Originally *Cassiculosphaeridia*, subsequently (and now) *Valensiella*. Age: Berriasian.

"**dictydia**" (Sarjeant, 1972, p.41, pl.3, fig.3; pl.6, fig.6) Riley and Fenton, 1982, p.199. Holotype: Sarjeant, 1972, pl.6, fig.6. **NOW** *Valensiella*. Originally *Chytroesphaeridia*, subsequently *Batiacasphaera*, thirdly *Escharisphaeridia*, fourthly *Cassiculosphaeridia*, fifthly (and now) *Valensiella*. This combination was not validly published in Riley and Fenton (1980, p.340), since these authors did not reference the basionym. Age: Bathonian–Callovian.

?*intermedia* Slimani, 1994, p.99–100, pl.18, figs.13–15. Holotype: Slimani, 1994, pl.18, figs.14–15. Questionable assignment: Slimani (1994, p.99). Taxonomic junior synonym: *Chytroisphaeridia everricula* (name not validly published), according to Slimani (1994, p.99). Age: late Campanian–Danian.

magna Davey, 1974, p.46, pl.1, figs.3–7. Emendation: Harding, 1990b, p.49, as *Cassiculosphaeridia magna*. Holotype: Davey, 1974, pl.1, fig.6. Originally (and now) *Cassiculosphaeridia*, subsequently *Valensiella*. Slimani (1994, p.100) retained this species in *Cassiculosphaeridia*. Age: early–late Barremian.

"*ovalis*" Harker and Sarjeant in Harker et al., 1990, p.87–88, pl.2, figs.7–8, 11–12; text-fig.19 ex Harker and Sarjeant, 1991, p.708. Holotype: Harker et al., 1990, pl.2, fig.7; text-fig.19. **NOW** *Valensiella*. Originally *Cassiculosphaeridia*, subsequently (and now) *Valensiella*. This name was not validly published by Harker and Sarjeant in Harker et al. (1990), since these authors did not specify place of lodgement of the holotype (I.C.N. Article 40.7). Age: late Campanian.

"*parvula*" Batten and Lister, 1988, p.341,343, figs.1h,2c–d. Holotype: Batten and Lister, 1988, figs.2c–d. **NOW** *Valensiella*. Originally *Cassiculosphaeridia*, subsequently (and now) *Valensiella*. Age: Barremian.

"*pontiformis*" He Chengquan, 1991, p.57–58, pl.8, figs.1–5; pl.54, fig.5. Holotype: He Chengquan, 1991, pl.8, fig.4. **NOW** *Valensiella*. Originally *Cassiculosphaeridia*, subsequently (and now) *Valensiella*. Age: middle-late Eocene.

pygmaeus Stevens, 1987, p.186,188, figs.4L–Q. Holotype: Stevens, 1987, figs.4L–N; Fensome et al., 1996, figs.1–3 — p.2309. Originally (and now) *Cassiculosphaeridia*, subsequently *Valensiella*. Slimani (1994, p.100) retained this species in *Cassiculosphaeridia*. N.I.A. Age: early Berriasian.

**reticulata* Davey, 1969a, p.142, pl.3, fig.7; pl.4, fig.3. Holotype: Davey, 1969a, pl.4, fig.3. Originally (and now) *Cassiculosphaeridia*, subsequently *Valensiella*. Slimani (1994, p.98) retained this species in *Cassiculosphaeridia*. Age: Cenomanian.

"*sarstedtensis*" Below, 1982d, p.344–345, figs.1–2. Holotype: Below, 1982d, fig.1. **NOW** *Valensiella*. Originally *Cassiculosphaeridia*, subsequently (and now) *Valensiella*. Age: late Aptian.

solida Riding and Helby, 2001g, p.199–200, figs.10A–P. Holotype: Riding and Helby, 2001g, figs.10E–G. Age: Oxfordian–Tithonian.

"*tazadensis*" Below, 1981a, p.33–34, pl.10, figs.8–10; pl.12, fig.16. Holotype: Below, 1981a, pl.10, fig.10; Fensome et al., 1991, fig.3 — p.755. **NOW** *Valensiella*. Originally *Cassiculosphaeridia*, subsequently (and now) *Valensiella*. Age: Hauterivian–early Barremian.

?*tocheri* Schiøler, 1993, p.104, pl.4, figs.4–12. Holotype: Schiøler, 1993, pl.4, figs.4–5. Questionable assignment: Schiøler (1993, p.104). Age: late Maastrichtian.

unicata Harding, 1990b, p.49–50, pl.27, figs.9–14 ex Harding in Williams et al. 1998, p.97. Holotype: Harding, 1990b, pl.27, figs.9,11. This name was not validly published in Harding (1990b) since the lodgement of the holotype was not specified (I.C.N. Article 40.7). Age: late Hauterivian.

CASSIDIUM Drugg, 1967, p.22. Type: Harris, 1965, pl.27, fig.5, as *Ovoidites fragilis*.

filosum Wilson, 1988, p.14–15, pl.2, figs.8a–b,9; pl.3, figs.2a–b. Holotype: Wilson, 1988, pl.2, figs.8a–b; Fensome et al., 1996, figs.1–2 — p.2125. Age: Paleocene.

**fragile* (Harris, 1965, p.97, pl.27, figs.4–5) Drugg, 1967, p.22. Holotype: Harris, 1965, pl.27, fig.5. Originally *Ovoidites* (Appendix A), subsequently (and now) *Cassidium*. Age: early Eocene.

"*hexalobosum*" Cookson and Eisenack, 1974, p.76, pl.26, figs.6–7. Holotype: Cookson and Eisenack, 1974, pl.26, fig.7. **NOW** *Cyclonephelium*?. Originally *Cassidium*, subsequently *Cyclonephelium*, thirdly (and now) *Cyclonephelium*?. Age: Middle Cretaceous–Senonian.

CASTELLODINIUM Williams et al., 2015, p.301–302. Type: Michoux, 1988, pl.1, figs.1–3; text-figs.13A–B, as *Wilsonidium compactum*.

**compactum* (Michoux, 1988, p.38–39, pl.9, figs.1–9; pl.10, figs.1–9 (not fig.10); text-figs.13A–B,14) Williams et al., 2015, p.301. Holotype: Michoux, 1988, pl.9, figs.1–3; text-figs.13A–B. Originally *Wilsonidium*, subsequently (and now) *Castellodinium*. Age: middle Eocene.

?*intermedium* (Cookson and Eisenack, 1961b, p.40, pl.1, figs.5–6) Williams et al., 2015, p.302. Holotype: Cookson and Eisenack, 1961b, pl.1, fig.5. Originally *Wetzeliella*, subsequently *Rhombodinium*, thirdly *Wilsonidium*, fourthly (and now) *Castellodinium*. Questionable assignment: Williams et al. (2015, p.302). Age: Eocene.

?*tuberosuturatum* (He Chengquan, 1991, p.103, pl.37, figs.7–8) Williams et al., 2015, p.302. Holotype: He Chengquan, 1991, pl.37, fig.8. Originally *Wilsonidium*, subsequently (and now) *Castellodinium*? Questionable assignment: Williams et al. (2015, p.302). Age: middle Eocene.

CATASTOMOCYSTIS Singh, 1983, p.151. Type: Singh, 1983, pl.55, figs.1–2, as *Catastomocystis spinosa*.

microreticulata Singh, 1983, p.153, pl.56, figs.4–6. Holotype: Singh, 1983, pl.56, fig.4. Age: early Cenomanian.

**spinosa* Singh, 1983, p.152, pl.55, figs.1–8; pl.56, figs.1–3; text-fig.18. Holotype: Singh, 1983, pl.55, figs.1–2; Fensome et al., 1995, fig.1 — p.1795. Age: early Cenomanian.

CAUCA Davey and Verdier, 1971, p.14. Taxonomic senior synonym: *Hystrichodinium*, according to Below (1981b, p.120–121) — however, Lentin and Williams (1985, p.48) retained *Cauca*. Type: Alberti, 1961, pl.9, fig.4, as *Hystrichodinium parvum*.

bayuiana Mantle, 2009b, p.102,103, pl.9, figs.1–9; text-fig.2. Holotype: Mantle, 2009b, pl.9, fig.3. Age: Callovian.

**parva* (Alberti, 1961, p.16, pl.9, figs.1–4) Davey and Verdier, 1971, p.14–15. Holotype: Alberti, 1961, pl.9, fig.4. Originally *Hystrichodinium*, subsequently (and now) *Cauca*. Age: early Aptian–Albian.

?*velata* (Wetzel, 1952, p.403–404, pl.A, fig.7; text-fig.24) Sarjeant, 1984c, p.133. Emendation: Sarjeant, 1984c, p.133, as *Cauca? velata*. Holotype: Wetzel, 1952, pl.A, fig.7; text-fig.24; Sarjeant, 1984c, pl.3, figs.4–6; text-fig.6. Originally *Hystrichosphaeridium oligacanthum* subsp. *velatum*, subsequently *Baltisphaeridium oligacanthum* subsp. *velatum* (Appendix A), thirdly *Cleistosphaeridium? oligacanthum* subsp. *velatum*, fourthly (and now) *Cauca? velata*. Questionable assignment: Sarjeant (1984c, p.133–134). Age: Paleocene.

CAUVERIDINIUM Khowaja-Ateequzzaman and Jain, 1990, p.172,174. Type: Khowaja-Ateequzzaman and Jain, 1990, pl.1, figs.1–5; text-figs.1A–C, as *Cauveridinium indicum*.

**indicum* Khowaja-Ateequzzaman and Jain, 1990, p.174,176, pl.1, figs.1–6; pl.2, fig.6; pl.3, figs.5–6; text-figs.1A–D. Holotype: Khowaja-Ateequzzaman and Jain, 1990, pl.1, figs.1–5; text-figs.1A–C; Fauconnier and Masure, 2004, pl.12, figs.1–2,4. Age: Turonian–Santonian.

intermedium Khowaja-Ateequzzaman and Jain, 1990, p.178, pl.2, figs.1–5; text-figs.2A–B. Holotype: Khowaja-Ateequzzaman and Jain, 1990, pl.2, figs.1–5; text-figs.2A–B; Fauconnier and Masure, 2004, pl.12, figs.5,7–9. Age: Turonian–Santonian.

longispinosum Khowaja-Ateequzzaman and Jain, 1990, p.178–179, pl.3, figs.1–4; text-fig.3. Holotype: Khowaja-Ateequzzaman and Jain, 1990, pl.3, figs.1–4; text-fig.3; Fauconnier and Masure, 2004, pl.12, figs.10–11. Age: Turonian–Santonian.

membraniphorum (Cookson and Eisenack, 1962b, p.495, pl.6, figs.8–14) Masure in Fauconnier and Masure, 2004, p.97. Holotype: Cookson and Eisenack, 1962b, pl.6, fig.9. Originally *Cyclonephelium*, subsequently *Maghrebinia*, thirdly (and now) *Cauveridinium*. Age: Albian–Cenomanian.

CAVATODISSILIODINIUM Feist-Burkhardt and Monteil, 2001, p.50,52. Type: Feist-Burkhardt and Monteil, 2001, fig.2, nos.6–7; fig.18, nos.7–8; fig.19, no.2, as *Cavatodissiliodinium hansgochti*.

***hansgochti** Feist-Burkhardt and Monteil, 2001, p.52,54,56, fig.2, nos.1–7; fig.18, nos.1–8, fig.19, no.2. Holotype: Feist-Burkhardt and Monteil, 2001, fig.2, nos.6–7; fig.18, nos.7–8; fig.19, no.2. Age: early Bajocian.

CENTOSPHAERA Wind and Wise in Wise and Wind, 1977, p.299. Calcareous dinoflagellate genus (see Fütterer, 1990, p.541, Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1299). Type: Wise and Wind, 1977, pl.25, figs.1–3, as *Centosphaera barbata*.

***barbata** Wind and Wise in Wise and Wind, 1977, p.299, pl.25, figs.1–6; pl.26, figs.1–3; pl.27, figs.1–7. Holotype: Wise and Wind, 1977, pl.25, figs.1–3. Age: Maastrichtian.

CEPADINIUM Duxbury, 1983, p.58. Type: Duxbury, 1983, pl.9, fig.8; text-figs.27A–E, as *Cepadinium variable*.

****variable**" Duxbury, 1983, p.58,61, pl.9, figs.1,4,8; text-figs.27A–E,28A–F. Holotype: Duxbury, 1983, pl.9, fig.8; text-figs.27A–E; Fensome et al., 1995, figs.3,6 — p.1877. **Taxonomic senior synonym:** *Deflandrea* (now *Cepadinium*) *ventriosum* Alberti, 1959b, according to Lister and Batten (1988b, p.43). The nomenclatural type of the genus *Cepadinium* remains the holotype of *Cepadinium variable*. Age: early Aptian.

+**ventriosum** (Alberti, 1959b, p.101, pl.9, figs.14–15) Lentin and Williams, 1989, p.51. Holotype: Alberti, 1959b, pl.9, fig.14; Eisenack and Klement, 1964, p.239; Fensome et al., 1995, fig.1 — p.1895. Originally *Deflandrea*, subsequently *Subtilisphaera*, thirdly (and now) *Cepadinium*. Taxonomic junior synonym: *Cepadinium variable*, according to Lister and Batten (1988b, p.43). The nomenclatural type of the genus *Cepadinium* remains the holotype of *Cepadinium variable*. Age: early Aptian.

"**CERATIOPSIS**" Vozzhennikova, 1963, p.181. Emendation: Bujak et al., 1980, p.27. **Name illegitimate** — **senior homonym:** *Ceratiopsis* de Wildeman, 1896. **Taxonomic senior synonym:** *Cerodinium*, by implication in Lentin and Williams (1977b, p.20), who considered *Ceratiopsis* to be the senior name. Taxonomic senior synonym: *Deflandrea*, according to Lentin and Williams (1976, p.153) — however, Lentin and Williams (1985, p.48) retained *Ceratiopsis*. Lindgren (1985, p.670) maintained that the name *Ceratiopsis* was not validly published in Vozzhennikova 1963, stating that the species *Ceratiopsis leptoderma* was described, but not the genus *Ceratiopsis* and that the latter was not monotypic, containing three species. However, since only one species, *Ceratiopsis leptoderma*, was assigned to *Ceratiopsis* by Vozzhennikova (1963), the single description provided can be applied to both genus and species and the name *Ceratiopsis* can be deemed to have been validly published in Vozzhennikova (1963) (I.C.N. Article 38.5). Type: Vozzhennikova, 1963, text-fig.8, as *Ceratiopsis leptoderma*.

"**albertii**" (Corradini, 1973, p.174–175, pl.27, figs.7a–b,8; pl.28, fig.2) Lentin and Williams, 1977b, p.20. Holotype: Corradini, 1973, pl.27, figs.7a–b. **Combination illegitimate:** the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Senegalinium*, thirdly *Ceratiopsis* (combination illegitimate), fourthly (and now) *Cerodinium*. Taxonomic junior synonym (at specific rank): *Peridinium pedunculatum* forma *divaricans* (subsequently *Phelodinium tricuspe* subsp. *divaricans*), according to Sarjeant (1985b, p.158) and Lentin and Williams (1993, p.504,511). Age: Late Cretaceous–Paleocene.

"*baltica*" (Vozzhennikova, 1967, p.154, pl.117, figs.2a–b) Lentin and Williams, 1977b, p.20. Holotype: Vozzhennikova, 1967, pl.117, figs.2a–b; Lentin and Vozzhennikova, 1990, pl.3, figs.4–6; text-fig.14. **Combination illegitimate:** the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally (and now) *Cerodinium*, subsequently *Deflandrea*, thirdly *Ceratiopsis* (combination illegitimate). Age: Eocene.

"*boloniensis*" (Riegel, 1974, p.354–355, pl.1, figs.6–10; text-fig.3) Lentin and Williams, 1977b, p.20. Emendation: Riegel and Sarjeant, 1982, p.296–297, as *Phelodinium boloniense*. Holotype: Riegel, 1974, pl.1, fig.7; Sarjeant et al., 1987, pl.2, fig.2. **Combination illegitimate:** the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly *Senegalinium*, fourthly *Phelodinium*, fifthly (and now) *Cerodinium*. Age: ?Senonian.

"*cordifera*" (May, 1980, p.74–75, pl.8, fig.4) Lentin and Williams, 1981, p.37. Holotype: May, 1980, pl.8, fig.4. **Combination illegitimate:** the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: Maastrichtian.

"*crassistriata*" (Jain et al., 1975, p.8–9, pl.6, figs.64–65) Lentin and Williams, 1977b, p.20. Holotype: Jain et al., 1975, pl.6, fig.65. **Combination illegitimate:** the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: Danian.

"*dartmooria*" (Cookson and Eisenack, 1965b, p.133–134, pl.16, figs.1–2; text-fig.1) Lentin and Williams, 1981, p.38. Holotype: Cookson and Eisenack, 1965b, pl.16, figs.1–2; text-fig.1; Stover, 1974, pl.3, figs.4a–b; pl.4, figs.1a–d. **Combination illegitimate:** the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: Paleocene.

"*depressa*" (Morgenroth, 1966a, p.8, pl.1, fig.2) Lentin and Williams, 1977b, p.20. Holotype: Morgenroth, 1966a, pl.1, fig.2. **Combination illegitimate:** the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: early Eocene.

"*diebelii*" (Alberti, 1959b, p.99–100, pl.9, figs.18–21) Vozzhennikova, 1967, p.159. Holotype: Alberti, 1959b, pl.9, fig.18. **Combination illegitimate:** the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: late Senonian–Paleocene.

"*elongata*" (Jiabo, 1978, p.54–55, pl.1, figs.5–7) Lentin and Williams, 1981, p.38. Holotype: Jiabo, 1978, pl.1, fig.6. **Combination illegitimate:** the generic name *Ceratiopsis* is illegitimate. **NOW** *Cangxianella*. Originally *Lejeunia* (generic name illegitimate), subsequently *Ceratiopsis* (combination illegitimate), thirdly *Cerodinium*, fourthly (and now) *Cangxianella*. Age: Early Tertiary.

"*fissurata*" (Jiabo, 1978, p.55, pl.1, figs.4,8–10) Lentin and Williams, 1981, p.38. Holotype: Jiabo, 1978, pl.1, fig.9. **Combination illegitimate:** the generic name *Ceratiopsis* is illegitimate. **NOW** *Cangxianella*. Originally *Lejeunia* (generic name illegitimate), subsequently *Ceratiopsis* (combination illegitimate), thirdly *Cerodinium*, fourthly (and now) *Cangxianella*. Age: Early Tertiary.

"*fusiformis*" He Chengquan, 1991, p.75, pl.34, figs.15–16. Holotype: He Chengquan, 1991, pl.34, fig.16. **NOW** *Cerodinium*. Originally *Ceratiopsis* (generic name illegitimate), subsequently (and now) *Cerodinium*. Following I.C.N. Article 55.1, the species name *Ceratiopsis fusiformis* is validly published even though the generic name *Ceratiopsis* is illegitimate. Age: Paleocene.

"*granulostrata*" (Jain and Millepied, 1973, p.24–25, pl.1, figs.7–11; pl.2, fig.18; pl.3, fig.29) Lentin and Williams, 1977b, p.21. Holotype: Jain and Millepied, 1973, pl.1, fig.7. **Combination illegitimate:** the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Senegalinium*, subsequently *Deflandrea*, thirdly *Ceratiopsis* (combination illegitimate), fourthly (and now) *Cerodinium*. Age: Maastrichtian.

"**leptoderma*" Vozzhennikova, 1963, p.181; text-fig.8. Holotype: Vozzhennikova, 1963, text-fig.8; Lentin and Vozzhennikova, 1990, pl.4, figs.4–5; text-fig.15. **NOW** *Cerodinium*. Originally *Ceratiopsis* (generic name

illegitimate), subsequently *Deflandrea*, thirdly (and now) *Cerodinium*. Following I.C.N. Article 55.1, the species name *Ceratiopsis leptoderma* is validly published even though the generic name *Ceratiopsis* is illegitimate. Age: Paleocene.

"*markovae*" Vozzhennikova, 1967, p.159, pl.119, figs.5,7; pl.120, figs.1–4. Holotype: Vozzhennikova, 1967, pl.120, fig.2; Lentin and Vozzhennikova, 1990, pl.3, figs.7–8; text-fig.16. **NOW** *Cerodinium*. Originally *Ceratiopsis* (generic name illegitimate), subsequently *Deflandrea*, thirdly (and now) *Cerodinium*. Following I.C.N. Article 55.1, the species name *Ceratiopsis markovae* is validly published even though the generic name *Ceratiopsis* is illegitimate. Age: Paleocene.

"*medcalfii*" (Stover, 1974, p.175–176, pl.3, figs.3a–c; text-figs.3G,6C) Heilmann-Clausen, 1985, p.19. Holotype: Stover, 1974, pl.3, figs.3a–c. **Combination illegitimate**: the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium medcalfii*. Originally *Deflandrea medcalfii*, subsequently *Deflandrea dartmooria* subsp. *medcalfii*, thirdly *Ceratiopsis medcalfii* (combination illegitimate), fourthly (and now) *Cerodinium medcalfii*. Age: middle Paleocene.

"*navarriana*" Srivastava, 1995, p.274, pl.7, figs.1–3. Holotype: Srivastava, 1995, pl.7, fig.2. **NOW** *Cerodinium*. Originally *Ceratiopsis* (generic name illegitimate), subsequently (and now) *Cerodinium*. Following I.C.N. Article 55.1, the species name *Ceratiopsis navarriana* is validly published even though the generic name *Ceratiopsis* is illegitimate. Age: Maastrichtian.

"*obliquipes*" (Deflandre and Cookson, 1955, p.252, pl.4, fig.6) Lentin and Williams, 1980, p.41. Holotype: Deflandre and Cookson, 1955, pl.4, fig.6. **Combination illegitimate**: the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Deflandrea?*, thirdly *Ceratiopsis* (combination illegitimate), fourthly (and now) *Cerodinium*. Age: middle Paleocene–early Eocene.

"*pannucea*" (Stanley, 1965, p.220, pl.22, figs.1–4,8–10) Lentin and Williams, 1977b, p.21. Holotype: Stanley, 1965, pl.22, figs.3–4. **Combination illegitimate**: the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Senegalinium*, thirdly *Deflandrea?*, fourthly *Ceratiopsis* (combination illegitimate), fifthly (and now) *Cerodinium*. Age: Paleocene.

"*pedibaculifera*" He Chengquan, 1991, p.75–76, pl.34, fig.14. Holotype: He Chengquan, 1991, pl.34, fig.14. **NOW** *Cerodinium*. Originally *Ceratiopsis* (generic name illegitimate), subsequently (and now) *Cerodinium*. Following I.C.N. Article 55.1, the species name *Ceratiopsis pedibaculifera* is validly published even though the generic name *Ceratiopsis* is illegitimate. Age: Paleocene.

"*prutensis*" Grigorovich, 1971, p.92,94, pl.2, fig.2. Holotype: Grigorovich, 1971, pl.2, fig.2. **NOW** *Cerodinium*. Originally *Ceratiopsis* (generic name illegitimate), subsequently *Deflandrea?*, thirdly (and now) *Cerodinium*. Following I.C.N. Article 55.1, the species name *Ceratiopsis prutensis* is validly published even though the generic name *Ceratiopsis* is illegitimate. Age: Paleocene.

"*sibirica*" (Vozzhennikova, 1963, p.181; text-figs.9–10) Lentin and Williams, 1977b, p.21. Emendation: Lentin and Vozzhennikova, 1990, p.39–40, as *Cerodinium sibiricum*. Holotype: Vozzhennikova, 1963, text-fig.9; Lentin and Vozzhennikova, 1990, pl.4, figs.1–2. **Combination illegitimate**: the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally (and now) *Cerodinium*, subsequently *Ceratiopsis* (combination illegitimate), thirdly *Deflandrea*. Age: Paleocene–Eocene.

"*speciosa*" (Alberti, 1959b, p.97, pl.9, figs.12–13) Lentin and Williams, 1977b, p.21. Holotype: Alberti, 1959b, pl.9, fig.13. **Combination illegitimate**: the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: late Paleocene.

"*striata*" (Drugg, 1967, p.18, pl.2, figs.13–14) Lentin and Williams, 1977b, p.21. Holotype: Drugg, 1967, pl.2, fig.13. **Combination illegitimate**: the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: early Paleocene.

"*subquadra*" (Corradini, 1973, p.175–176, pl.28, fig.1) Lentin and Williams, 1977b, p.22. Holotype: Corradini, 1973, pl.28, fig.1. **Combination illegitimate**: the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Senegalinium*?, thirdly *Ceratiopsis* (combination illegitimate), fourthly (and now) *Cerodinium*. Age: Senonian.

"*taenialis*" He Chengquan, 1991, p.76, pl.32, figs.1–5. Holotype: He Chengquan, 1991, pl.32, fig.1. **NOW** *Cerodinium*. Originally *Ceratiopsis* (generic name illegitimate), subsequently (and now) *Cerodinium*. Following I.C.N. Article 55.1, the species name *Ceratiopsis taenialis* is validly published even though the generic name *Ceratiopsis* is illegitimate. Age: Paleocene.

"*wardenensis*" (Williams and Downie, 1966c, p.233, pl.26, fig.5) Bujak et al., 1980, p.27. Holotype: Williams and Downie, 1966c, pl.26, fig.5; Bujak et al., 1980, pl.11, fig.3. **Combination illegitimate**: the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: early Eocene.

"*warrenii*" (Schumacker-Lambry, 1978, p.40–41, pl.4, figs.5–6) Lentin and Williams, 1981, p.40. Holotype: Schumacker-Lambry, 1978, pl.4, fig.6. **Combination illegitimate**: the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: Paleocene (Landenian).

"subsp. *brevicornis*" Vozzhennikova, 1967, p.160. **Name not validly published**: no illustrations.

"subsp. *diebelii*". Autonym. Holotype: Alberti, 1959b, pl.9, fig.18. **NOW** *Cerodinium diebelii* subsp. *diebelii*. Originally *Deflandrea diebelii* subsp. *diebelii*, subsequently *Ceratiopsis diebelii* subsp. *diebelii* (combination illegitimate), thirdly (and now) *Cerodinium diebelii* subsp. *diebelii*.

"subsp. *rigida*" (May, 1980, p.75–76, pl.8, figs.9–10,15) Lentin and Williams, 1981, p.38. Holotype: May, 1980, pl.8, figs.9,15. **Combination illegitimate**: the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium diebelii* subsp. *rigidum*. Originally *Deflandrea diebelii* subsp. *rigida*, subsequently *Ceratiopsis diebelii* subsp. *rigida* (combination illegitimate), thirdly (and now) *Cerodinium diebelii* subsp. *rigidum*. Age: Maastrichtian.

"subsp. *elongata*" Mao Shaozhi and Norris, 1988, p.42, pl.9, figs.10–12. Holotype: Mao Shaozhi and Norris, 1988, pl.9, fig.10. **NOW** *Cerodinium speciosum* subsp. *elongatum*. Originally *Ceratiopsis* (generic name illegitimate) *speciosa* subsp. *elongata*, subsequently (and now) *Cerodinium speciosum* subsp. *elongatum*. Age: late Paleocene.

"subsp. *glabra*" (Gocht, 1969, p.10, text-fig.3) Lentin and Williams, 1977b, p.21. Holotype: Gocht, 1969, text-fig.3. **Combination illegitimate**: the generic name *Ceratiopsis* is illegitimate. **NOW** *Cerodinium glabrum*. Originally *Deflandrea speciosa* forma *glabra*, subsequently *Deflandrea speciosa* subsp. *glabra*, thirdly *Ceratiopsis speciosa* subsp. *glabra* (combination illegitimate), fourthly *Cerodinium speciosum* subsp. *glabrum*, fifthly (and now) *Cerodinium glabrum*. Age: late Paleocene.

"subsp. *speciosa*". Autonym. Holotype: Alberti, 1959b, pl.9, fig.13. **NOW** *Cerodinium speciosum* subsp. *speciosum*. Originally *Deflandrea speciosa* subsp. *speciosa*, subsequently *Ceratiopsis speciosa* subsp. *speciosa* (combination illegitimate), thirdly (and now) *Cerodinium speciosum* subsp. *speciosum*.

CERBIA Below, 1981a, p.8. Taxonomic senior synonym: *Tenua* Eisenack, according to Sarjeant (1985a, p.93–94; 1992b, p.678) — however, Duxbury (2002, p.76,78) retained *Cerbia*. Type: Davey and Verdier, 1974, pl.92, figs.1,4, as *Cyclonephelium tabulatum*.

"*aucda*" Below, 1981a, p.8–9, pl.4, figs.3,5a–b; pl.12, fig.20; text-figs.6a–c,g. Holotype: Below, 1981a, pl.4, fig.3; Fensome et al., 1991, fig.1 — p.577. **NOW** *Tenua* Eisenack. Originally *Cerbia*, subsequently (and now) *Tenua* Eisenack. N.I.A. Age: Barremian.

"*formosa*" Mao Shaozhi and Norris, 1988, p.31–32, pl.1, figs.9–10; text-fig.8, nos.1–2. Holotype: Mao Shaozhi and Norris, 1988, pl.1, fig.9; text-fig.8, no.2. **NOW** *Tenua* Eisenack. Originally *Cerbia*, subsequently (and now) *Tenua* Eisenack. Age: late Eocene–early Oligocene.

magna Duxbury, 2001, p.101–102, fig.4, nos.1–4. Holotype: Duxbury, 2001, fig.4, no.3. Age: late Barremian.

monile Duxbury, 2002, p.78, pl.1, figs.7–8,10–12. Holotype: Duxbury, 2002, pl.1, figs.7–8. Since Duxbury expressly derived the specific epithet from the Latin noun "*monile*" (necklace), it should be cited as *monile*, not *monilis*. NIA. Age: late Aptian–early Albian.

"*suturispinosa*" He Chengquan, 1991, p.173, pl.10, figs.1–3. Holotype: He Chengquan, 1991, pl.10, fig.1. **NOW** *Tenua* Eisenack. Originally *Cerbia*, subsequently (and now) *Tenua* Eisenack. Age: middle Eocene.

**tabulata* (Davey and Verdier, 1974, p.630,632, pl.92, figs.1–4; pl.93, fig.6) Below, 1981a, p.9. Holotype: Davey and Verdier, 1974, pl.92, figs.1,4; Eisenack and Kjellström, 1981b, p.328b; Sarjeant, 1992b, figs.3–4; Fensome et al., 1995, figs.1–2 — p.1833. Originally *Cyclonephelium*, subsequently *Canninginopsis*, thirdly (and now) *Cerbia*. Taxonomic senior synonym: *Tenua hystrix*, according to Sarjeant (1985a, p.94; 1992b, p.681) — however, by retaining *Cerbia*, Duxbury (2002, p.76,78) retained *Cerbia tabulata* by implication. Age: Aptian.

CEREBROCYSTA Bujak in Bujak et al., 1980, p.42. Type: Bujak et al., 1980, pl.13, figs.4–5, as *Cerebrocysta bartonensis*.

**bartonensis* Bujak in Bujak et al., 1980, p.42, pl.13, figs.4–11. Holotype: Bujak et al., 1980, pl.13, figs.4–5; Fensome et al., 1993a, figs.1–2 — p.967. Age: middle Eocene (see Aubry, 1986).

"*cassinascoenis*" Zevenboom and Santarelli in Zevenboom, 1995, p.155–156, pl.7, figs.13–18. Holotype: Zevenboom, 1995, pl.7, figs.13–15. **Name not validly published**: considered a manuscript name by the authors. Age: Langhian–earliest Serravallian.

irregularis Schreck et al., 2012, p.90–91, pl.3, figs.11–20. Holotype: Schreck et al., 2012, pl.3, figs.11–14. Age: latest Langhian–early Tortonian.

lagae Louwye, 1999, p.117,119, pl.3, figs.8–11. Holotype: Louwye, 1999, pl.3, figs.8–11. Age: late Miocene.

magna Bujak, 1994, p.121, pl.2, figs.10–11. Holotype: Bujak, 1994, pl.2, fig.10. Age: Ypresian–Lutetian.

mediterranea Biffi and Manum, 1988, p.202,204, pl.11, figs.8–14. Holotype: Biffi and Manum, 1988, pl.11, fig.11. Age: early Miocene.

?*namocensis* Head et al., 1989b, p.453–454,456, pl.3, figs.10–11,18–22. Holotype: Head et al., 1989b, pl.3, figs.10–11. Questionable assignment: Head et al. (1989b, p.453). Age: late Miocene.

"*perforocresta*" Zevenboom and Santarelli in Zevenboom, 1995, p.156–157, pl.8, figs.1–3. Holotype: Zevenboom, 1995, pl.8, figs.1–3. **Name not validly published**: considered a manuscript name by the authors. Age: Serravallian–early Tortonian.

poulsenii de Verteuil and Norris, 1996a, p.148–149, pl.12, figs.9–21; pl.13, figs.1–12. Holotype: de Verteuil and Norris, 1996a, pl.12, figs.9–14. Age: early–late Miocene.

"*powellii*" Zevenboom and Santarelli in Zevenboom, 1995, p.157, pl.7, figs.19–20. Holotype: Zevenboom, 1995, pl.7, figs.19–20. **Name not validly published**: considered a manuscript name by the authors. Age: early Langhian–earliest Serravallian.

satchelliae de Verteuil and Norris, 1996a, p.149–150, pl.13, figs.13–15; pl.14, figs.1–6. Holotype: de Verteuil and Norris, 1996a, pl.14, figs.1–4. Age: early Miocene.

waipawaensis (Wilson, 1988, p.28, pl.17, figs.4,5a–b) Fensome et al., 2009, p.18. Holotype: Wilson, 1988, pl.17, fig.5a–b; Fensome et al., 1996, figs.2–3 — p.2441. Originally *Pyxidinospis*, subsequently (and now) *Cerebrocysta*. Age: middle to late Eocene.

CERIOCYSTA Xu Jinli et al., 1997, p.49,145. Type: Xu Jinli et al., 1997, pl.1, figs.1a–c, as *Ceriocysta crassa*.

cervicalis Xu Jinli et al., 1997, p.51, pl.3, figs.1a–b,2 ex He Chengquan et al., 2009, p.339, 652. Holotype: Xu Jinli et al., 1997, pl.3, figs.1a–b. This name was not validly published in Xu Jinli et al. (1997), since no English or Latin description was provided; He Chengquan et al. (2009, p.652) validated the name by publishing an English diagnosis. Age: middle-late Eocene.

**crassa* Xu Jinli et al., 1997, p.50–51,145–146, pl.1, figs.1a–c,2a–c,3a–b,4; pl.2, figs.1,2a–b; pl.3, fig.3; pl.4, figs.1a–b,2a–b,3a–b; pl.46, figs.1–2,4; pl.47, fig.1; text-fig.1. Holotype: Xu Jinli et al., 1997, pl.1, figs.1a–c. Age: middle-late Eocene.

"*intermedia*" Xu Jinli et al., 1997, p.51, pl.1, figs.5a–b,6; pl.2, fig.3; pl.46, figs.5a–b; pl.47, figs.2a–b,3a–c. **Name not validly published:** holotype not designated. The holotype was not designated in Xu Jinli et al. (1997), nor did these authors provide a Latin or English description. He Chengquan et al. (2009, p.651) provided an English description, but effectively did not designate a holotype: they referred to the measurements of the holotype but do not clearly indicate the figure in which it is illustrated, and thus according to I.C.N. Article 43.3, this name remains not validly published. Age: middle-late Eocene.

CERNICYSTA Stover and Helby, 1987d, p.263,265. Type: Morgan, 1980, pl.18, figs.4–6, as *Lithodinia helbyi*.

**helbyi* (Morgan, 1980, p.26, pl.18, figs.4–7) Stover and Helby, 1987d, p.265,267. Holotype: Morgan, 1980, pl.18, figs.4–6; Fensome et al., 1996, figs.1–3 — p.2149. Originally *Lithodinia*, subsequently (and now) *Cernicysta*. Age: middle Aptian–early Albian.

CERODINIUM Vozzhennikova, 1963, p.181. Emendation: Lentin and Williams, 1987, p.114. Taxonomic senior synonym: *Deflandrea*, according to Lentin and Williams (1976, p.154) — however, Lentin and Williams (1987, p.114) retained *Cerodinium*. Taxonomic junior synonym: *Ceratiopsis*, by implication in Lentin and Williams (1977b, p.20), who considered *Ceratiopsis* to be the senior name. Type: Vozzhennikova, 1963, text-fig.9, as *Cerodinium sibiricum*.

albertii (Corradini, 1973, p.174–175, pl.27, figs.7a–b,8; pl.28, fig.2) Lentin and Williams, 1987, p.114. Holotype: Corradini, 1973, pl.27, figs.7a–b. Originally *Deflandrea*, subsequently *Senegalinium?*, thirdly *Ceratiopsis* (combination illegitimate), fourthly (and now) *Cerodinium*. Taxonomic junior synonym (at specific rank): *Peridinium pedunculatum* forma *divaricans* (subsequently *Phelodinium tricuspe* subsp. *divaricans*), according to Sarjeant (1985b, p.158) and Lentin and Williams (1993, p.504,511). Age: Late Cretaceous–Paleocene.

angulatum Crouch et al., 2014, p.65, pl.2, figs.1–9. Holotype: Crouch et al., 2014, pl.2, figs.1–2. Age: late Paleocene–early Eocene.

balticum Vozzhennikova, 1967, p.154, pl.117, figs.2a–b. Holotype: Vozzhennikova, 1967, pl.117, figs.2a–b; Lentin and Vozzhennikova, 1990, pl.3, figs.4–6; text-fig.14. Originally (and now) *Cerodinium*, subsequently *Deflandrea*, thirdly *Ceratiopsis* (combination illegitimate). Lentin and Vozzhennikova (1990, p.34–35) provided an "expanded description" for this species. Age: Eocene.

boloniense (Riegel, 1974, p.354–355, pl.1, figs.6–10; text-fig.3) Lentin and Williams, 1989, p.54. Emendation: Riegel and Sarjeant, 1982, p.296–297, as *Phelodinium boloniense*. Holotype: Riegel, 1974, pl.1, fig.7; Sarjeant et

al., 1987, pl.2, fig.2. Originally *Deflandrea*, subsequently *Senegalinium*, thirdly *Ceratiopsis* (combination illegitimate), fourthly *Phelodinium*, fifthly (and now) *Cerodinium*. Age: ?Senonian.

conspicuum Marheinecke, 1992, p.70–71, pl.17, figs.1–4,12; text-fig.15. Holotype: Marheinecke, 1986, pl.19, figs.3–6, as "*Deflandrea* i.w.S.sp."; Marheinecke, 1992, pl.17, figs.1–3. Contrary to the opinion of Lentin and Williams (1993, p.90), Williams et al. (1998, p.102) considered this name to be validly published. Age: late Maastrichtian.

cordiferum (May, 1980, p.74–75, pl.8, fig.4) Lentin and Williams, 1987, p.114. Holotype: May, 1980, pl.8, fig.4. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: Maastrichtian.

crassistriatum (Jain et al., 1975, p.8–9, pl.6, figs.64–65) Lentin and Williams, 1987, p.114. Holotype: Jain et al., 1975, pl.6, fig.65. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: Danian.

dartmoorium (Cookson and Eisenack, 1965b, p.133–134, pl.16, figs.1–2; text-fig.1) Lentin and Williams, 1987, p.114. Holotype: Cookson and Eisenack, 1965b, pl.16, figs.1–2; text-fig.1; Stover, 1974, pl.3, figs.4a–b; pl.4, figs.1a–d. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: Paleocene.

depressum (Morgenroth, 1966a, p.8, pl.1, fig.2) Lentin and Williams, 1987, p.114. Holotype: Morgenroth, 1966a, pl.1, fig.2. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: early Eocene.

diebelii (Alberti, 1959b, p.99–100, pl.9, figs.18–21) Lentin and Williams, 1987, p.114. Holotype: Alberti, 1959b, pl.9, fig.18. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: late Senonian–Paleocene.

subsp. **diebelii**. Autonym. Holotype: Alberti, 1959b, pl.9, fig.18. Originally *Deflandrea diebelii* subsp. *diebelii*, subsequently *Ceratiopsis diebelii* subsp. *diebelii* (combination illegitimate), thirdly (and now) *Cerodinium diebelii* subsp. *diebelii*.

subsp. **rigidum** (May, 1980, p.75–76, pl.8, figs.9–10,15) Lentin and Williams, 1987, p.114. Holotype: May, 1980, pl.8, figs.9,15. Originally *Deflandrea diebelii* subsp. *rigida*, subsequently *Ceratiopsis diebelii* subsp. *rigida* (combination illegitimate), thirdly (and now) *Cerodinium diebelii* subsp. *rigidum*. Age: Maastrichtian.

"elongatum" (Jiabo, 1978, p.54–55, pl.1, figs.5–7) Lentin and Williams, 1987, p.114. Holotype: Jiabo, 1978, pl.1, fig.6. **NOW** *Cangxianella*. Originally *Lejeunia* (generic name illegitimate), subsequently *Ceratiopsis* (combination illegitimate), thirdly *Cerodinium*, fourthly (and now) *Cangxianella*. Age: Early Tertiary.

"fissuratum" (Jiabo, 1978, p.55, pl.1, figs.4,8–10) Lentin and Williams, 1987, p.114. Holotype: Jiabo, 1978, pl.1, fig.9. **NOW** *Cangxianella*. Originally *Lejeunia* (generic name illegitimate), subsequently *Ceratiopsis* (combination illegitimate), thirdly *Cerodinium*, fourthly (and now) *Cangxianella*. Age: Early Tertiary.

fusiforme (He Chengquan, 1991, p.75, pl.34, figs.15–16) Lentin and Williams, 1993, p.91. Holotype: He Chengquan, 1991, pl.34, fig.16. Originally *Ceratiopsis* (generic name illegitimate), subsequently (and now) *Cerodinium*. Age: Paleocene.

glabrum (Gocht, 1969, p.10, text-fig.3) Fensome et al., 2009, p.19. Holotype: Gocht, 1969, text-fig.3. Originally *Deflandrea speciosa* forma *glabra*, subsequently *Deflandrea speciosa* subsp. *glabra*, thirdly *Ceratiopsis speciosa* subsp. *glabra* (combination illegitimate), fourthly *Cerodinium speciosum* subsp. *glabrum*, fifthly (and now) *Cerodinium glabrum*. Age: late Paleocene.

granulostriatum (Jain and Millepied, 1973, p.24–25, pl.1, figs.7–11; pl.2, fig.18; pl.3, fig.29) Lentin and Williams, 1987, p.114. Holotype: Jain and Millepied, 1973, pl.1, fig.7. Originally *Senegalinium*, subsequently *Deflandrea*, thirdly *Ceratiopsis* (combination illegitimate), fourthly (and now) *Cerodinium*. Age: Maastrichtian.

kangiliense Hansen in Nøhr-Hansen and Heilmann-Clausen, 2001, p.158,160,162–164, fig.4, nos.1–9, fig.5, nos.1–9. Holotype: Nøhr-Hansen and Heilmann-Clausen, 2001, fig.4, nos.1–3. Nøhr-Hansen and Heilmann-Clausen (2001, p.158) cited the authorship as "n. sp. ex Hansen 1980" in reference to an unpublished thesis by Hansen. Since the use of this name by Nøhr-Hansen and Heilmann-Clausen (2001) represents its first effective publication as well as its first valid publication, the authorship citation is here given as "Hansen in Nøhr-Hansen and Heilmann-Clausen" rather than "Hansen ex Nøhr-Hansen and Heilmann-Clausen". Age: middle Danian–earliest Selandian.

leptodermum (Vozzhennikova, 1963, p.181; text-fig.8) Lentin and Williams, 1987, p.114. Holotype: Vozzhennikova, 1963, text-fig.8; Lentin and Vozzhennikova, 1990, pl.4, figs.4–5; text-fig.15. Originally *Ceratiopsis* (generic name illegitimate), subsequently *Deflandrea*, thirdly (and now) *Cerodinium*. Lentin and Vozzhennikova (1990, p.36) provided an "expanded description" for this species. Age: Paleocene.

markovae (Vozzhennikova, 1967, p.159, pl.119, figs.5,7; pl.120, figs.1–4) Lentin and Williams, 1987, p.114. Holotype: Vozzhennikova, 1967, pl.120, fig.2; Lentin and Vozzhennikova, 1990, pl.3, figs.7–8; text-fig.16. Originally *Ceratiopsis* (generic name illegitimate), subsequently *Deflandrea*, thirdly (and now) *Cerodinium*. Lentin and Vozzhennikova (1990, p.38) provided an "expanded description" for this species. Age: Paleocene–Eocene.

medcalfii (Stover, 1974, p.175–176, pl.3, figs.3a–c; text-figs.3G,6C) Lentin and Williams, 1987, p.114. Holotype: Stover, 1974, pl.3, figs.3a–c. Originally *Deflandrea medcalfii*, subsequently *Deflandrea dartmooria* subsp. *medcalfii*, thirdly *Ceratiopsis medcalfii* (combination illegitimate), fourthly (and now) *Cerodinium medcalfii*. Age: middle Paleocene.

mediterraneum Slimani et al., 2008, p.340, figs.9G–L. Holotype: Slimani et al., 2008, figs.9G–H. Age: early Danian.

navarrianum (Srivastava, 1995, p.274, pl.7, figs.1–3) Williams et al., 1998, p.103. Holotype: Srivastava, 1995, pl.7, fig.2. Originally *Ceratiopsis* (generic name illegitimate), subsequently (and now) *Cerodinium*. Age: Maastrichtian.

nielsii Willumsen, 2011, p.218–219, figs.7D,J. Holotype: Willumsen, 2011, fig.7J. Age: early Paleocene.

obliquipes (Deflandre and Cookson, 1955, p.252, pl.4, fig.6) Lentin and Williams, 1987, p.114. Holotype: Deflandre and Cookson, 1955, pl.4, fig.6. Originally *Deflandrea*, subsequently *Deflandrea?*, thirdly *Ceratiopsis* (combination illegitimate), fourthly (and now) *Cerodinium*. Age: middle Paleocene–early Eocene.

panuceum (Stanley, 1965, p.220, pl.22, figs.1–4,8–10) Lentin and Williams, 1987, p.115. Holotype: Stanley, 1965, pl.22, figs.3–4. Originally *Deflandrea*, subsequently *Senegalinium?*, thirdly *Deflandrea?*, fourthly *Ceratiopsis* (combination illegitimate), fifthly (and now) *Cerodinium*. Age: Paleocene.

pedibaculiferum (He Chengquan, 1991, p.75–76, pl.34, fig.14) Lentin and Williams, 1993, p.92. Holotype: He Chengquan, 1991, pl.34, fig.14. Originally *Ceratiopsis* (generic name illegitimate), subsequently (and now) *Cerodinium*. Age: Paleocene.

prutense (Grigorovich, 1971, p.92,94, pl.2, fig.2) Lentin and Williams, 1987, p.115. Holotype: Grigorovich, 1971, pl.2, fig.2. Originally *Ceratiopsis* (generic name illegitimate), subsequently *Deflandrea?*, thirdly (and now) *Cerodinium*. Age: Paleocene.

quiriquinaense (Takahashi, 1979, p.33, pl.1, figs.1a–c,2a–b,3) Lentin and Williams, 1989, p.55. Holotype: Takahashi, 1979, pl.1, figs.1a–c. Originally *Deflandrea*, subsequently (and now) *Cerodinium*. Age: Late Cretaceous.

**sibiricum* Vozzhennikova, 1963, p.181, text-figs.9–10. Emendation: Lentin and Vozzhennikova, 1990, p.39–40, as *Cerodinium sibiricum*. Holotype: Vozzhennikova, 1963, text-fig.9; Lentin and Vozzhennikova, 1990, pl.4, figs.1–2. Originally (and now) *Cerodinium*, subsequently *Ceratiopsis* (combination illegitimate), thirdly *Deflandrea*. Age: Paleocene–Eocene.

speciosum (Alberti, 1959b, p.97, pl.9, figs.12–13) Lentin and Williams, 1987, p.115. Holotype: Alberti, 1959b, pl.9, fig.13. Originally *Deflandrea*, subsequently (and now) *Ceratiopsis* (combination illegitimate), thirdly *Cerodinium*. Age: late Paleocene.

subsp. *elongatum* (Mao Shaozhi and Norris, 1988, p.42, pl.9, figs.10–12) Lentin and Williams, 1989, p.55. Holotype: Mao Shaozhi and Norris, 1988, pl.9, fig.10. Originally *Ceratiopsis* (an illegitimate generic name) *speciosa* subsp. *elongata* subsequently (and now) *Cerodinium speciosum* subsp. *elongatum*. Age: late Paleocene.

"subsp. *glabrum*" (Gocht, 1969, p.10, text-fig.3) Lentin and Williams, 1987, p.115. Holotype: Gocht, 1969, text-fig.3. **NOW** *Cerodinium glabrum*. Originally *Deflandrea speciosa* forma *glabra*, subsequently *Deflandrea speciosa* subsp. *glabra*, thirdly *Ceratiopsis speciosa* subsp. *glabra* (combination illegitimate), fourthly *Cerodinium speciosum* subsp. *glabrum*, fifthly (and now) *Cerodinium glabrum*. Age: late Paleocene.

subsp. *speciosum*. Autonym. Holotype: Alberti, 1959b, pl.9, fig.13. Originally *Deflandrea speciosa* subsp. *speciosa*, subsequently *Ceratiopsis speciosa* subsp. *speciosa* (combination illegitimate), thirdly (and now) *Cerodinium speciosum* subsp. *speciosum*.

striatum (Drugg, 1967, p.18, pl.2, figs.13–14) Lentin and Williams, 1987, p.115. Holotype: Drugg, 1967, pl.2, fig.13. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: early Paleocene.

subquadrum (Corradini, 1973, p.175–176, pl.28, fig.1) Lentin and Williams, 1987, p.115. Holotype: Corradini, 1973, pl.28, fig.1. Originally *Deflandrea*, subsequently *Senegalinium?*, thirdly *Ceratiopsis* (combination illegitimate), fourthly (and now) *Cerodinium*. Age: Senonian.

taeniale (He Chengquan, 1991, p.76, pl.32, figs.1–5) Lentin and Williams, 1993, p.93. Holotype: He Chengquan, 1991, pl.32, fig.1. Originally *Ceratiopsis* (generic name illegitimate), subsequently (and now) *Cerodinium*. Age: Paleocene.

verrucosum (Heisecke, 1970, p.232,234, pl.9, figs.2–3; pl.10, fig.3) Lentin and Williams, 1989, p.56. Holotype: Heisecke, 1970, pl.9, fig.2; pl.10, fig.3. Originally *Scriniodinium*, subsequently *Scriniodinium?*, thirdly (and now) *Cerodinium*. Age: Danian.

wardenense (Williams and Downie, 1966c, p.233, pl.26, fig.5) Lentin and Williams, 1987, p.115. Holotype: Williams and Downie, 1966c, pl.26, fig.5; Bujak et al., 1980, pl.11, fig.3. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: early Eocene.

warrenii (Schumacker-Lambry, 1978, p.40–41, pl.4, figs.5–6) Lentin and Williams, 1987, p.115. Holotype: Schumacker-Lambry, 1978, pl.4, fig.6. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: Paleocene (Landenian).

CERVISIELLA Hildebrand-Habel et al., 1999, p.78. Emendation: Streng et al., 2004, p.467. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1299). Type: Stradner, 1961, fig.71, as *Thoracosphaera saxea*.

operculata (Bramlette and Martini, 1964, p.305–306, pl.5, figs.3–7) Streng et al., 2004, p.467. Emendation: Streng et al., 2004, p.467, by provision of a "new diagnosis" and a "new description" for *Cervisiella operculata*. Holotype: Bramlette and Martini, 1964, pl.5, figs.4–5. Originally *Thoracosphaera*, subsequently *Obliquipithonella*, thirdly

Pirumella, fourthly *Operculodinella*, fifthly (and now) *Cervisiella*. Taxonomic junior synonym: *Thoracosphaera atlantica*, according to Fütterer (1990, p.540). Age: Maastrichtian–Paleocene.

**saxea* (Stradner, 1961, p.84, fig.71) Hildebrand-Habel et al., 1999, p.78. Holotype: Stradner, 1961, fig.71. Originally *Thoracosphaera*, subsequently *Obliquipithonella* (combination not validly published), thirdly *Pirumella*, fourthly (and now) *Cervisiella*. Age: Danian.

CHAENOSPHAERULA Damassa, 1997, p.167,169. Type: Damassa, 1997, pl.1, figs.1–2; text-fig.6B, as *Chaenosphaerula magnifica*.

**magnifica* Damassa, 1997, p.169,171,173, pl.1, figs.1–12; pl.2, figs.4–7; pl.3, figs.1–3,6–9; text-figs.6A–D,7A–D,8A–D,9A–D. Holotype: Damassa, 1997, pl.1, figs.1–2; text-fig.6B. Age: late Oligocene.

CHARLESDOWNIEA Lentin and Vozzhennikova, 1989, p.225,227. Emendation: Williams et al., 2015, p.302. Type: Williams and Downie, 1966b, pl.18, fig.8; text-fig.47, as *Wetzeliella coleothrypta*.

"*aculeata*" (Michoux, 1988, p.24,26, pl.1, figs.1,4,7–8; pl.2, figs.1–2; text-figs.5A–B,6A–B) Lentin and Vozzhennikova, 1990, p.74. Holotype: Michoux, 1988, pl.1, figs.1,4,7; text-figs.5A–B. **NOW** *Michouxdinium*. Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Michouxdinium*. Age: early Eocene.

"*clathrata*" (Eisenack, 1938b, p.187; text-fig.5) Lentin and Vozzhennikova, 1989, p.227. Holotype: Eisenack, 1938b, text-fig.5; Eisenack, 1954b, pl.7, fig.12. **NOW** *Talladinium*? Originally *Wetzeliella*, subsequently *Kisselevia*?, thirdly *Charlesdowniea*, fourthly (and now) *Talladinium*? Taxonomic senior synonym: *Wetzeliella* (as *Hystriospheraidium*) *articulata*, according to PASTIELS (1948, p.42) — however, this synonymy has not been generally accepted. Age: late Eocene–early Oligocene.

"subsp. *angulosa*" (Châteauneuf and Gruas-Cavagnetto, 1978, p.69–70, pl.5, figs.8–9) Lentin and Vozzhennikova, 1989, p.227. Holotype: Châteauneuf and Gruas-Cavagnetto, 1978, pl.5, figs.8–9. **NOW** *Talladinium*? *angulosum*. Originally *Kisselevia clathrata* subsp. *angulosa*, subsequently *Charlesdowniea*? *clathrata* subsp. *angulosa*, thirdly (and now) *Talladinium*? *angulosum*. Age: early Oligocene (Sannoisian).

"subsp. *clathrata*". Autonym. Holotype: Eisenack, 1938b, text-fig.5; Eisenack, 1954b, pl.7, fig.12. **Now redundant**. Originally *Wetzeliella clathrata* subsp. *clathrata*, subsequently *Kisselevia*? *clathrata* subsp. *clathrata*, thirdly *Charlesdowniea clathrata* subsp. *clathrata*.

**coleothrypta* (Williams and Downie, 1966b, p.185–186, pl.18, figs.8–9; text-fig.47) Lentin and Vozzhennikova, 1989, p.225. Holotype: Williams and Downie, 1966b, pl.18, fig.8; text-fig.47; Bujak et al., 1980, pl.12, figs.7–8. Originally *Wetzeliella*, subsequently *Kisselevia*, thirdly (and now) *Charlesdowniea*. Age: early Eocene.

"subsp. *coleothrypta*". Autonym. Holotype: Williams and Downie, 1966b, pl.18, fig.8; text-fig.47; Bujak et al., 1980, pl.12, figs.7–8. **Now redundant**. Originally *Kisselevia coleothrypta* subsp. *coleothrypta*, subsequently *Charlesdowniea coleothrypta* subsp. *coleothrypta*.

"subsp. *rotundata*" (Châteauneuf and Gruas-Cavagnetto, 1978, p.68–69, pl.3, fig.5) Lentin and Vozzhennikova, 1989, p.227. Holotype: Châteauneuf and Gruas-Cavagnetto, 1978, pl.3, fig.5. **NOW** *Charlesdowniea*? *rotundata*. Originally *Kisselevia coleothrypta* subsp. *rotundata*, subsequently *Charlesdowniea coleothrypta* subsp. *rotundata*, thirdly (and now) *Charlesdowniea*? *rotundata*. Age: middle Eocene (Lutetian–Bartonian).

"*columna*" (Michoux, 1988, p.28,30, pl.1, figs.2–3,5–6; pl.2, figs.3–5; text-figs.7A–B) Lentin and Vozzhennikova, 1990, p.74. Holotype: Michoux, 1988, pl.1, figs.2–3. **NOW** *Piladinium*. Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Piladinium*. N.I.A. Age: early Eocene.

"*crassoramosa*" (Williams and Downie, 1966b, p.189–190; pl.19, figs.1,5,7; text-fig.50) Lentin and Vozzhennikova, 1989, p.227. Holotype: Williams and Downie, 1966b, pl.19, fig.7. **NOW** *Sophismatia crassoramosa*. Originally *Wetzeliella tenuivirgula* var. *crassoramosa*, subsequently *Wetzeliella tenuivirgula* subsp. *crassoramosa*, thirdly *Kisselevia tenuivirgula* subsp. *crassoramosa*, fourthly *Kisselevia crassoramosa*, fifthly *Charlesdowniea crassoramosa*, sixthly (and now) *Sophismatia crassoramosa*. Age: early Eocene.

"*edwardsii*" (Wilson, 1967c, p.477, figs.8–9) Lentin and Vozzhennikova, 1989, p.227. Holotype: Wilson, 1967c, fig.8. **NOW** *Piladinium*. Originally *Wetzeliella*, subsequently *Kisselevia*, thirdly *Charlesdowniea*, fourthly (and now) *Piladinium*. Age: early Eocene.

?*fasciata* (Rozen, 1965, p.296–297; pl.2, fig.13; text-fig.4) Lentin and Vozzhennikova, 1989, p.227. Holotype: Rozen, 1965, pl.2, fig.13; text-fig.4. Originally *Wetzeliella clathrata* var. *fasciata*, subsequently *Wetzeliella clathrata* subsp. *fasciata*, thirdly *Kisselevia? clathrata* subsp. *fasciata*, fourthly *Kisselevia fasciata*, fifthly *Charlesdowniea fasciata*, sixthly *Charlesdowniea? fasciata*. Questionable assignment: Williams et al. (2015, p.302). Age: late Eocene.

"*fusiformis*" (Mao Shaozhi and Norris, 1988, p.49–50, pl.13, figs.2–4) Lentin and Williams, 1993, p.94. Holotype: Mao Shaozhi and Norris, 1988, pl.13, fig.3. **NOW** *Talladinium*. Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Talladinium*. Age: early Oligocene.

"*limitata*" Stover and Hardenbol, 1994, p.34–35, pl.10, figs.70a–c, 71a–c. Holotype: Stover and Hardenbol, 1994, pl.10, figs.70a–c. **NOW** *Michouxdinium*. Originally *Charlesdowniea*, subsequently (and now) *Michouxdinium*. Age: Rupelian.

"*marginata*" Andreeva-Grigorovich and Savitskaya, 1993, p.43–44, pl.2, figs.1–3. Holotype: Andreeva-Grigorovich and Savitskaya, 1993, pl.2, fig.2; Andreeva-Grigorovich et al., 2011, pl.18, fig.4. **NOW** *Talladinium*. Originally *Charlesdowniea*, subsequently (and now) *Talladinium*. Age: Rupelian–Chattian.

?*pengchiahsuensis* (Shaw Chenglong, 1999a, p.40, figs.5–7, 14–15) Fensome and Williams, 2004, p.118. Holotype: Shaw Chenglong, 1999a, figs.5–7. Originally *Kisselevia*, subsequently (and now) *Charlesdowniea*. Questionable assignment: Williams et al. (2015, p.302). Age: Eocene.

"*proserpina*" van Mourik et al., 2001, p.239,241, figs.7a–e. Holotype: van Mourik et al., 2001, figs.7b–c. **NOW** *Michouxdinium*. Originally *Charlesdowniea*, subsequently (and now) *Michouxdinium*. N.I.A. Age: late Eocene.

"*reticulata*" (Williams and Downie, 1966b, p.187–188, pl.19, figs.3,6; text-fig.48) Lentin and Vozzhennikova, 1989, p.227. Holotype: Williams and Downie, 1966b, pl.19, figs.3,6; text-fig.48. **NOW** *Sophismatia*. Originally *Wetzeliella*, subsequently *Kisselevia*, thirdly *Charlesdowniea*, fourthly (and now) *Sophismatia*. Age: early Eocene.

"*rhomboidalis*" (He Chengquan, 1991, p.93, pl.35, figs.11–13) Lentin and Williams, 1993, p.94. Holotype: He Chengquan, 1991, pl.35, figs.11–12. **NOW** *Michouxdinium?* Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Michouxdinium?* Age: middle Eocene

?*rotundata* (Châteauneuf and Gruas-Cavagnetto, 1978, p.68–69, pl.3, fig.5) Williams et al., 2015, p.302. Holotype: Châteauneuf and Gruas-Cavagnetto, 1978, pl.3, fig.5. Originally *Kisselevia coleothrypta* subsp. *rotundata*, subsequently *Charlesdowniea coleothrypta* subsp. *rotundata*, thirdly (and now) *Charlesdowniea? rotundata*. Questionable assignment: Williams et al. (2015, p.302). Age: middle Eocene (Lutetian–Bartonian).

"*stellata*" (Damassa, 1979a, p.834,837, pl.7, figs.1–7) Lentin and Vozzhennikova, 1989, p.227. Holotype: Damassa, 1979a, pl.7, figs.1–2. **NOW** *Vallodinium*. Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Vallodinium*. Age: early-middle Eocene.

?*taiwaniana* (Shaw Chenglong, 1999a, p.38–39, figs.8–10, 19–21) Fensome and Williams, 2004, p.118. Holotype: Shaw Chenglong, 1999a, figs.8–10. Originally *Kisselevia*, subsequently (and now) *Charlesdowniea*. Questionable assignment: Williams et al. (2015, p.302). Age: Eocene.

"*tenuivirgula*" (Williams and Downie, 1966b, p.188–189, pl.19, figs.1–2,4–5,7; text-figs.49–50) Lentin and Vozzhennikova, 1989, p.227. Holotype: Williams and Downie, 1966b, pl.19, figs.2,4; text-fig.49. **NOW** *Sophismatia*. Originally *Wetziella*, subsequently *Kisselevia*, thirdly *Charlesdowniea*, fourthly (and now) *Sophismatia*. Age: early Eocene.

"subsp. *conopia*" (Williams and Downie, 1966b, p.184, pl.18, fig.5) Lentin and Vozzhennikova, 1989, p.227. Holotype: Williams and Downie, 1966b, pl.18, fig.5. **NOW** *Sophismatia conopia*. Originally *Wetziella articulata* var. *conopia*, subsequently *Wetziella articulata* subsp. *conopia*, thirdly *Kisselevia tenuivirgula* subsp. *conopia*, fourthly *Charlesdowniea tenuivirgula* subsp. *conopia*, fifthly (and now) *Sophismatia conopia*. Age: early Eocene.

"subsp. *exouros*" (Islam, 1983c, p.88, pl.3, figs.3–4) Lentin and Vozzhennikova, 1989, p.228. Holotype: Islam, 1983c, pl.3, fig.3. **NOW** *Sophismatia? exouros*. Originally *Kisselevia tenuivirgula* subsp. *exouros*, subsequently *Charlesdowniea tenuivirgula* subsp. *exouros*, thirdly (and now) *Sophismatia? exouros*. Age: middle Eocene.

"subsp. *tenuivirgula*". Autonym. Holotype: Williams and Downie, 1966b, pl.19, figs.2,4; text-fig.49. **NOW redundant**. Originally *Wetziella tenuivirgula* subsp. *tenuivirgula*, subsequently *Kisselevia tenuivirgula* subsp. *tenuivirgula*, thirdly *Charlesdowniea tenuivirgula* subsp. *tenuivirgula*.

"*variabilis*" (Bujak in Bujak et al., 1980, p.67, pl.17, figs.1–6; text-fig.16) Lentin and Vozzhennikova, 1989, p.228. Holotype: Bujak et al., 1980, pl.17, figs.1–3. **NOW** *Michouxdinium*. Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Michouxdinium*. Age: middle Eocene (see Aubry, 1986).

"*wulagenensis*" (Mao Shaozhi and Norris, 1988, p.50, pl.13, figs.5–10) Lentin and Williams, 1993, p.95. Holotype: Mao Shaozhi and Norris, 1988, pl.13, fig.6. **NOW** *Talladinium*. Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Talladinium*. Age: late Eocene.

CHATANGIELLA Vozzhennikova, 1967, p.128–129. Emendations: Lentin and Williams, 1976, p.51–52; Marshall, 1988, p.199–200 — however, see Lentin and Vozzhennikova (1990, p.40). Taxonomic junior synonyms: *Australiella* and *Cooksoniella*, both according to Lentin and Williams (1976, p.155 and p.151–152 respectively). Lentin and Williams (1976, p.93–94) considered *Chatangiella* to be a possible taxonomic junior synonym of *Bulbodinium*. Type: Vozzhennikova, 1967, pl.56, fig.1; pl.57, fig.1, as *Chatangiella niiga*.

"*?armata*" (Cookson and Eisenack, 1970a, p.142–143, pl.13, fig.9) Lentin and Williams, 1976, p.53. Holotype: Cookson and Eisenack, 1970a, pl.13, fig.9. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Chatangiella*, thirdly *Chatangiella?*, fourthly (and now) *Isabelidinium*. Questionable assignment: Stover and Evitt (1978, p.99). Age: Senonian.

"*arvensis*" Marshall, 1988, p.201,203, figs.7,17M–X. Holotype: Marshall, 1988, figs.7,17M–R; Fensome et al., 1996, figs.1–4,8–10 — p.2037. **NOW** *Arvalidinium*. Originally *Chatangiella*, subsequently (and now) *Arvalidinium*. Age: Santonian.

"*biapertura*" (McIntyre, 1975, p.66, pl.3, figs.5–8) Lentin and Williams, 1976, p.53. Holotype: McIntyre, 1975, pl.3, figs.5–6. Originally *Deflandrea*, subsequently (and now) *Chatangiella?*. Questionable assignment: Lentin and Williams (1976, p.53). Age: Campanian–Maastrichtian.

bondarenkoi (Vozzhennikova, 1967, p.130–131, pl.59, figs.1a–b; pl.60, fig.2) Lentin and Williams, 1976, p.53. Emendations: Lentin and Vozzhennikova, 1990, p.41 and Lebedeva in Ilyina et al., 1994, p.68–69, both as *Chatangiella bondarenkoi*. Holotype: Vozzhennikova, 1967, pl.59, fig.1b; pl.60, fig.2; Lentin and Vozzhennikova, 1990, pl.4, figs.6–7; text-fig.17. Originally *Australiella*, subsequently (and now) *Chatangiella*. Taxonomic junior synonyms: *Australiella* (as *Chatangiella*) *chetiensis* and *Chatangiella obtusa*, both according to Lentin and Vozzhennikova (1990, p.41) — however, Lebedeva in Ilyina et al. (1994, p.67) retained *Chatangiella chetiensis* and *Chatangiella obtusa* is now considered a taxonomic junior synonym of *Australiella* (as and now *Chatangiella chetiensis*). Age: Santonian.

"*campbellensis*" (Wilson, 1967b, p.225, figs.2–3) Lentin and Williams, 1976, p.53. Holotype: Wilson, 1967b, fig.2. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Chatangiella*, thirdly (and now) *Isabelidinium*. Age: Maastrichtian (see Wilson, 1972).

cassidea Lebedeva, 1988, p.76–77, pl.19, figs.1–4. Holotype: Lebedeva, 1988, pl.19, figs.1–2. Taxonomic senior synonym: *Chatangiella niiga*, according to Lentin and Vozzhennikova (1990, p.45) — however, Lebedeva in Ilyina et al. (1994, p.69) retained *Chatangiella cassidea*. Age: Santonian.

chetiensis (Vozzhennikova, 1967, p.131, pl.60, figs.1a–b) Lentin and Williams, 1976, p.54. Emendation: Lebedeva in Ilyina et al., 1994, p.67–68, as *Chatangiella chetiensis*. Holotype: Vozzhennikova, 1967, pl.60, figs.1a–b. Originally *Australiella*, subsequently (and now) *Chatangiella*. Taxonomic senior synonym: *Australiella* (as *Chatangiella*) *bondarenkoi*, according to Lentin and Vozzhennikova (1990, p.41) — however, Lebedeva in Ilyina et al. (1994, p.67) retained *Chatangiella chetiensis*. Taxonomic junior synonym: *Chatangiella obtusa*, according to Lebedeva in Ilyina et al. (1994, p.67). Age: Santonian.

coronata (McIntyre, 1975, p.64–65, pl.3, figs.1–4) Lentin and Williams, 1976, p.54. Holotype: McIntyre, 1975, pl.3, figs.1–2. Originally *Deflandrea*, subsequently (and now) *Chatangiella*. Age: Campanian.

?*dakotaensis* (Stanley, 1965, p.217–218, pl.19, figs.1–3) Stover and Evitt, 1978, p.99. Holotype: Stanley, 1965, pl.19, figs.1–3. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Chatangiella*?. Questionable assignment: Stover and Evitt (1978, p.99); and Lebedeva (2000, p.112,121). Age: Paleocene.

decorosa (McIntyre, 1975, p.63–64, pl.2, figs.1–4) Lentin and Williams, 1976, p.54. Holotype: McIntyre, 1975, pl.2, fig.1. Originally *Deflandrea*, subsequently (and now) *Chatangiella*. Taxonomic junior synonym: *Deflandrea ditissima*, according to Harker and Sarjeant in Harker et al. (1990, p.110) — however, Harker and Sarjeant in Harker et al. (1990, p.111) also retained *Chatangiella ditissima*. Age: Campanian–Maastrichtian.

ditissima (McIntyre, 1975, p.62–63, pl.1, figs.1–4) Lentin and Williams, 1976, p.54. Holotype: McIntyre, 1975, pl.1, figs.1–2. Originally *Deflandrea*, subsequently (and now) *Chatangiella*. Taxonomic senior synonym: *Deflandrea* (as *Chatangiella*) *decorosa*, according to Harker and Sarjeant in Harker et al. (1990, p.111) — however, Harker and Sarjeant in Harker et al. (1990, p.111) also retained *Chatangiella ditissima*. Age: Santonian–Maastrichtian.

eminens Pearce, 2010, p.67, pl.2, figs.1–6. Holotype: Pearce, 2010, pl.2, figs.1–6. Age: middle to late Santonian.

granulifera (Manum, 1963, p.61–64, pl.3, figs.5–9) Lentin and Williams, 1976, p.54. Holotype: Manum, 1963, pl.3, figs.5–6. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Taxonomic junior synonym: *Cooksoniella* (as and now *Chatangiella*) *vnigrii*, according to Lentin and Vozzhennikova (1990, p.47) — however, Lebedeva in Ilyina et al. (1994, p.70) retained *Cooksoniella* (as and now *Chatangiella*) *vnigrii*. Age: Senonian.

"subsp. *echinata*" (Wheeler and Sarjeant, 1990, p.317–318, pl.15, figs.1–4; text-figs.13a–b ex Wheeler and Sarjeant, 1992, p.382) Lentin and Williams, 1993, p.96. Holotype: Wheeler and Sarjeant, 1990, pl.15, figs.1–2; text-figs.13a–b. Originally *Chatangiella vnigrii* subsp. *echinata*, subsequently *Chatangiella granulifera* subsp. *echinata*. **Taxonomic senior synonym** (at specific rank): *Chatangiella madura*, according to Lebedeva (2000, p.115). This name was not validly published in Wheeler and Sarjeant (1990), since the lodgement of the holotype was not specified (I.C.N. Article 40.7). Age: Campanian.

subsp. *granulifera*. Autonym. Holotype: Manum, 1963, pl.3, figs.5–6. Originally *Australiella granulifera* subsp. *granulifera*, subsequently (and now) *Chatangiella granulifera* subsp. *granulifera*.

subsp. *tenuis* (Davey, 1970, p.340–341, pl.2, fig.1) Lentin and Williams, 1976, p.54. Holotype: Davey, 1970, pl.2, fig.1. Originally *Deflandrea granulifera* var. *tenuis*, subsequently *Australiella granulifera* subsp. *tenuis*, thirdly (and now) *Chatangiella granulifera* subsp. *tenuis*. Age: Albanian.

hexacalpis Harker and Sarjeant in Harker et al., 1990, p.117–118, pl.8, figs.11–12,14–16; text-figs.22A–B ex Harker and Sarjeant, 1991, p.709. Holotype: Harker et al., 1990, pl.8, fig.11; text-figs.22A–B. The name was not validly published in Harker and Sarjeant (1991), since the lodgement of the holotype was not specified (I.C.N. Article 40.7). Age: late Campanian.

"*karinae*" Kirsch, 2000, p.33–34, pl.4, figs.9–11; text-fig.9. Holotype: Kirsch, 2000, pl.4, fig.9. **Name not validly published:** no English or Latin description. Age: ?middle-late Campanian.

madura Lentin and Williams, 1976, p.54. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.10. Originally *Deflandrea manumii*, subsequently *Chatangiella manumii* (combination illegitimate), thirdly (and now) *Chatangiella madura*. Substitute name for *Chatangiella manumii* (Cookson and Eisenack, 1970a, p.141–142, pl.11, figs.10–11) Lentin and Williams, 1976, p.54 (an illegitimate name). Taxonomic junior synonym (at specific rank): *Chatangiella vnigrii* subsp. *echinata* (subsequently *Chatangiella granulifera* subsp. *echinata*), according to Lebedeva (2000, p.115). Age: Senonian.

"*magna*" (Davey, 1970, p.342–343, pl.2, figs.6–8) Lentin and Williams, 1976, p.54. Holotype: Davey, 1970, pl.2, fig.6. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Chatangiella*, thirdly (and now) *Isabelidinium*. Age: Cenomanian.

"*manumii*" (Cookson and Eisenack, 1970a, p.141–142, pl.11, figs.10–11) Lentin and Williams, 1976, p.54. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.10; Lentin and Vozzhennikova, 1990, pl.4, fig.3; text-fig.19. **Combination illegitimate** — **senior homonym:** *Chatangiella manumii* (Vozzhennikova, 1967) Lentin and Williams, 1976. **Substitute name:** *Chatangiella madura*. Originally *Deflandrea manumii*, subsequently *Chatangiella manumii* (combination illegitimate), thirdly (and now) *Chatangiella madura*. Lentin and Vozzhennikova (1990, p.43–44) provided an "expanded description" for this species. Taxonomic junior synonym (at specific rank): *Chatangiella vnigrii* subsp. *echinata* (subsequently *Chatangiella granulifera* subsp. *echinata*), according to Lebedeva (2000, p.115). Age: Senonian.

manumii (Vozzhennikova, 1967, p.184–185, pl.108, figs.1–4) Lentin and Williams, 1976, p.54. Holotype: Vozzhennikova, 1967, pl.108, fig.1; Lentin and Vozzhennikova, 1990, pl.4, fig.3; text-fig.19. Originally *Cooksoniella*, subsequently (and now) *Chatangiella*. Junior homonym: *Chatangiella manumii* (Cookson and Eisenack, 1970a) Lentin and Williams, 1976. Lentin and Vozzhennikova (1990, p.43–44) provided an "expanded description" for this species. Age: Turonian–Campanian.

mcintyreii Nøhr-Hansen, 1996, p.31–32, pl.2, figs.4–9. Holotype: Nøhr-Hansen, 1996, pl.2, fig.4. Age: early Coniacian.

micracantha (Cookson and Eisenack, 1960a, p.3, pl.1, fig.9) Lentin and Williams, 1976, p.54. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.9; Cookson and Manum, 1964, pl.76, figs.9–11. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Age: Campanian.

?*multispinosa* (Cookson and Eisenack, 1970a, p.141, pl.11, figs.7–9) Lentin and Williams, 1976, p.54. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.8. Originally *Deflandrea*, subsequently *Chatangiella*, thirdly (and now) *Chatangiella?*. Questionable assignment: Stover and Evitt (1978, p.99); and Lebedeva (2000, p.112,121). Age: Albian–Cenomanian.

**niiga* Vozzhennikova, 1967, p.129, pl.56, figs.1–4; pl.57, figs.1–4; pl.58, figs.1–4. Emendation: Lentin and Vozzhennikova, 1990, p.45–46. Holotype: Vozzhennikova, 1967, pl.56, fig.1; pl.57, fig.1; Lentin and Vozzhennikova, 1990, pl.5, figs.1–2; text-fig.20. Taxonomic junior synonym: *Chatangiella cassidea*, according to Lentin and Vozzhennikova (1990, p.45) — however, Lebedeva in Ilyina et al. (1994, p.69) retained *Chatangiella cassidea*. Age: Santonian.

"*obtusa*" Lebedeva, 1988, p.75–76, pl.18, figs.5–6. Holotype: Lebedeva, 1988, pl.18, figs.5–6. **Taxonomic senior synonym:** *Australiella* (as and now *Chatangiella*) *chetiensis*, according to Lebedeva in Ilyina et al. (1994, p.67). Taxonomic senior synonym: *Australiella* (as and now *Chatangiella*) *bondarenkoi*, according to Lentin and

Vozzhennikova (1990, p.41) — however, *Chatangiella obtusa* is now considered a taxonomic junior synonym of *Australiella* (as and now *Chatangiella*) *chetiensis*. Age: Santonian.

packhamii Marshall, 1990a, p.20,22, figs.11A–I,12D,22L–M,23A–H. Holotype: Marshall, 1990a, figs.11A,23G–H; Fensome et al., 1996, figs.5–6,9 — p.2257. Age: Campanian.

porata Aurisano, 1984, p.1–2, figs.3A–E. Holotype: Aurisano, 1984, fig.3A. Age: late Campanian.

porosa Marshall, 1988, p.200, figs.6A–F,16A–T. Holotype: Marshall, 1988, figs.6A,16A–F; Fensome et al., 1996, figs.1–6,12 — p.2291. Age: Santonian.

?*robusta* (Benson, 1976, p.199,200,202, pl.11, figs.9–12; pl.12, fig.1) Stover and Evitt, 1978, p.99. Holotype: Benson, 1976, pl.11, figs.9–12; pl.12, fig.1. Originally *Trithyrodinium*, subsequently (and now) *Chatangiella*?. Questionable assignment: Stover and Evitt (1978, p.99); and Lebedeva (2000, p.112,121). Taxonomic junior synonym: *Trithyrodinium inequale* (name not validly published), according to Slimani (2001a, p.192). Age: late Maastrichtian.

"?scheii" (Manum, 1963, p.56–58, pl.1, figs.1–16; text-fig.1) Lentin and Williams, 1976, p.54. Holotype: Manum, 1963, pl.1, figs.1–4; text-fig.1. **NOW** *Arvalidinium*. Originally *Deflandrea*, subsequently *Cooksoniella*, thirdly *Chatangiella*?, fourthly (and now) *Arvalidinium*. Questionable assignment: Lentin and Williams (1976, p.54). Age: Middle Cretaceous (early Late Cretaceous, according to Manum and Cookson, 1964).

serratula (Cookson and Eisenack, 1958, p.28, pl.4, fig.4) Lentin and Williams, 1976, p.55. Holotype: Cookson and Eisenack, 1958, pl.4, fig.4. Originally *Deflandrea*, subsequently (and now) *Chatangiella*. N.I.A. Age: Campanian–early Maastrichtian.

spectabilis (Alberti, 1959b, p.99, pl.9, fig.78) Lentin and Williams, 1976, p.55. Emendation: Lebedeva in Ilyina et al., 1994, p.66, as *Chatangiella spectabilis*. Holotype: Alberti, 1959b, pl.9, fig.78. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Age: late Senonian.

spinata Lebedeva, 2000, p.116, pl.1, figs.7–8. Holotype: Lebedeva, 2000, pl.1, fig.7. This name was not validly published in Ilyina et al. (1994, p.58), since these authors did not provide a description or illustration. Age: Campanian.

tanamaensis Lebedeva, 1988, p.74–75, pl.18, figs.1–4. Holotype: Lebedeva, 1988, pl.18, figs.1–3. Age: Santonian.

tripartita (Cookson and Eisenack, 1960a, p.2–3, pl.1, fig.10) Lentin and Williams, 1976, p.55. Emendation: Cookson and Manum, 1964, p.521–522, as *Deflandrea tripartita*. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.10; Cookson and Manum, 1964, pl.76, figs.1–2. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Age: Senonian.

?*tubifera* (Cookson and Eisenack, 1982, p.31–32, pl.3, figs.12–14) Lentin and Williams, 1985, p.54. Holotype: Cookson and Eisenack, 1982, pl.3, fig.12. Originally *Deflandrea*, subsequently (and now) *Chatangiella*?. Questionable assignment: Lentin and Williams (1985, p.54); and Lebedeva (2000, p.113,121). Age: Barremian–early Aptian.

turbo Harker and Sarjeant in Harker et al., 1990, p.118–120, pl.9, figs.5–8; text-fig.23 ex Harker and Sarjeant, 1991, p.709. Holotype: Harker et al., 1990, pl.9, fig.7; text-fig.23. This name was not validly published in Harker et al. (1990), since the lodgement of the holotype was not specified (I.C.N. Article 40.7). N.I.A. Age: Campanian.

verrucosa (Manum, 1963, p.60–61, pl.3, figs.1–4) Lentin and Williams, 1976, p.55. Holotype: Manum, 1963, pl.3, figs.1–2. Originally *Deflandrea*, subsequently *Trithyrodinium*, thirdly *Australiella*, fourthly (and now) *Chatangiella*. Taxonomic junior synonym: *Cooksoniella* (as and now *Chatangiella*) *vnigrii*, according to Yun Hyesu (1981, p.66) — however, Lebedeva in Ilyina et al. (1994, p.70) retained *Cooksoniella* (as and now *Chatangiella*) *vnigrii*. Age: Middle Cretaceous.

victoriensis (Cookson and Manum, 1964, p.522, pl.76, figs.3–8) Lentin and Williams, 1976, p.55. Emendation: Lebedeva in Ilyina et al., 1994, p.67, as *Chatangiella victoriensis*. Holotype: Cookson and Manum, 1964, pl.76, figs.3–4; Helby et al., 1987, fig.41A. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Age: Senonian.

vnigrii (Vozzhennikova, 1967, p.185, pl.59, fig.2; pl.79, fig.3; pl.107, fig.1; pl.109, figs.1–2; pl.110, figs.2–3) Lentin and Williams, 1976, p.55. Emendation: Lebedeva in Ilyina et al., 1994, p.70, as *Chatangiella vnigrii*. Holotype: Vozzhennikova, 1967, pl.109, figs.2a–b (not pl.107, fig.1. as indicated in the caption); Lentin and Vozzhennikova, 1990, pl.5, figs.4–5; text-fig.21. Originally *Cooksoniella*, subsequently *Chatangiella*. Taxonomic senior synonym: *Deflandrea* (as and now *Chatangiella*) *granulifera*, according to Lentin and Vozzhennikova (1990, p.47) and *Deflandrea* (as and now *Chatangiella*) *verrucosa*, according to Yun Hyesu (1981, p.66) — however, Lebedeva in Ilyina et al. (1994, p.70) retained *Chatangiella vnigrii*. Wheeler and Sarjeant (1990, p.317) suggested that the correct spelling for the species epithet could be "*vnigrorum*"; however, the correct epithet is "*vnigrii*", since it is derived from the name of a single institution. Age: Turonian–Santonian.

"subsp. *echinata*" Wheeler and Sarjeant, 1990, p.317–318, pl.15, figs.1–4; text-figs.13a–b ex Wheeler and Sarjeant, 1992, p.382. Holotype: Wheeler and Sarjeant, 1990, pl.15, figs.1–2; text-figs.13a–b. Originally *Chatangiella vnigrii* subsp. *echinata*, subsequently *Chatangiella granulifera* subsp. *echinata*. **Taxonomic senior synonym** (at specific rank): *Chatangiella madura*, according to Lebedeva (2000, p.115). This name was not validly published in Wheeler and Sarjeant (1990), since the lodgement of the holotype was not specified (I.C.N. Article 40.7). Age: Campanian.

"subsp. *vnigrii*". Autonym. Holotype: Vozzhennikova, 1967, pl.109, figs.2a–b (not pl.107, fig.1 as indicated in the caption); Lentin and Vozzhennikova, 1990, pl.5, figs.4–5; text-fig.21. **Now redundant.**

williamsii Yun Hyesu, 1981, p.66–67, pl.13, figs.8,12,14. Holotype: Yun Hyesu, 1981, pl.13, fig.12; Fensome et al., 1991, fig.2 — p.769. Age: early Santonian.

"**CHATEAUNEUFACYSTA**" Ionescu, 2003, p.40. **Name not validly published:** name of type not validly published. Type: Ionescu, 2003, pl.1, fig.2, as *Chateauneufacysta moesica*.

"**moesica*" Ionescu, 2003, p.40, pl.1, figs.1–6. **Name not validly published:** lodgement of holotype not specified. Holotype: Ionescu, 2003, pl.1, fig.2. Age: Bartonian–Priabonian.

"**CHELINOCYSTA**" Sarjeant, 1967a, p.327. **Name not validly published:** no description. Taxonomic junior synonym: *Chelinocysta* (name not validly published), by implication in Clarke et al. (1968, p.182, who considered *Chelinocysta lita* (name not validly published) to be a taxonomic junior synonym of *Ellipsodinium rugulosum*.

"*lita*" Sarjeant, 1967a, p.327. **Name not validly published:** no description or illustration. **Taxonomic senior synonym:** *Ellipsodinium rugulosum*, according to Clarke et al. (1968, p.182).

CHICHAOUADINIUM Below, 1981a, p.122–123. Type: Below, 1981a, pl.10, figs.13a–c; text-fig.81h (not 81e), as *Chichaouadinium arabicum*.

**arabicum* Below, 1981a, p.123–124, pl.10, figs.11–12,13a–c,15a–b,16–17; text-figs.81a–i. Holotype: Below, 1981a, pl.10, figs.13a–c; text-fig.81h (not 81e); Fensome et al., 1991, figs.1–3 — p.571. Age: Albanian.

boydii (Morgan, 1975, p.159–160, pl.1, figs.3a–d) Bujak and Davies, 1983, p.162. Holotype: Morgan, 1975, pl.1, figs.3a–d; Helby et al., 1987, fig.29D. Originally *Spinidinium*, subsequently (and now) *Chichaouadinium*. Age: late Aptian–Albanian.

"*davidii*" (Morgan, 1975, p.157–159, pl.1, figs.1a–b,2a–d) Bujak and Davies, 1983, p.162. Holotype: Morgan, 1975, pl.1, figs.1a–b; Helby et al., 1987, fig.29A. **NOW** *Diconodinium*. Originally (and now) *Diconodinium*, subsequently *Chichaouadinium*. Age: Aptian–Albian.

"*limpidum*" (Singh, 1971, p.359–361, pl.61, figs.1–12; text-fig.62) Below, 1981a, p.123. Holotype: Singh, 1971, pl.61, figs.1–2. Originally *Deflandrea*, subsequently *Chichaouadinium*. **Taxonomic senior synonym:** *Deflandrea* (as *Spinidinium?*) *vestita*, according to Lentin and Williams (1973, p.43). Age: middle-late Albian.

vestitum (Brideaux, 1971, p.99–101, pl.29, figs.99–103; text-figs.10a,d) Bujak and Davies, 1983, p.162. Holotype: Brideaux, 1971, pl.29, figs.99,102–103; text-figs.10a,d. Originally *Spinidinium*, subsequently *Deflandrea*, thirdly *Spinidinium?*, fourthly (and now) *Chichaouadinium*. Taxonomic junior synonym: *Deflandrea* (subsequently *Chichaouadinium*) *limpida*, according to Lentin and Williams (1973, p.43). Age: late Albian–early Cenomanian.

CHIROPTERIDIUM Gocht, 1960, p.221. Taxonomic junior synonym: *Galea* Maier (an illegitimate name), by implication in Sarjeant (1983, p.108), who transferred the "type species" of *Galea*, *Galea galea*, to *Chiropteridium*. Taxonomic junior synonym: *Membranophoridium*, according to Brosius (1963, p.47) and Schindler (1992, p.202) — however, Lentin and Williams (1993, p.421) retained *Membranophoridium*. Type: Gocht, 1960, pl.17, fig.1, as *Chiropteridium lobospinosum*.

"*aspinatum*" (Gerlach, 1961, p.199–201, pl.29, figs.7–8) Brosius, 1963, p.48. Holotype: designated by Gerlach (1961), but not clearly related to an illustration. Lectotype: Gerlach, 1961, pl.29, fig.7; Fensome et al., 1993a, fig.1 — p.945; designated by Gocht (1969, p.61). **NOW** *Membranophoridium*. Originally (and now) *Membranophoridium*, subsequently *Chiropteridium*. Age: middle Oligocene.

"*brevifolium*" Schindler, 1992, p.204–206, figs.6a–d. Holotype: Schindler, 1992, fig.6b. **Taxonomic Senior Synonym:** *Chiropteridium lobospinosum*, according to Pross (1997, p.102). Age: middle Oligocene.

conispinum Williams, 1978, p.794,797, pl.2, figs.1–6. Holotype: Williams, 1978, pl.2, figs.1–2. Age: Oligocene.

"*dispersum*" Gocht, 1960, p.227, pl.18, figs.1–16; text-figs.16–27. Holotype: Gocht, 1960, pl.18, fig.1. **Taxonomic senior synonym:** *Galea* (as *Chiropteridium*) *galea*, according to Sarjeant (1983, p.108–109). Taxonomic junior synonym: *Membranophoridium multispinatum*, according to Brosius (1963, p.48) and Gocht (1969, p.63). Age: middle Oligocene.

eocenicum Heilmann-Clausen and Van Simaëys, 2005, p.154, pl.2, figs.1–5. Holotype: Heilmann-Clausen and Van Simaëys, 2005, pl.2, figs.1–2. Age: middle Eocene.

galea (Maier, 1959, p.306, pl.29, fig.4; text-fig.2) Sarjeant, 1983, p.108. Emendation: Sarjeant, 1983, p.110, as *Chiropteridium galea*. Holotype: Maier, 1959, pl.29, fig.4; Eisenack and Kjellström, 1975b, p.88a; Fensome et al., 1995, fig.1 — p.1495. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Areoligera*, fourthly *Areoligera?*, fifthly (and now) *Chiropteridium*. Taxonomic junior synonyms: *Chiropteridium dispersum*, *Galea* (subsequently *Baltisphaeridium*) *mespilana* and *Galea* (subsequently *Baltisphaeridium*) *levis*, all according to Sarjeant (1983, p.108–109); *Membranophoridium multispinatum*, by implication in Brosius (1963, p.48) and Gocht (1969, p.63), who considered *Membranophoridium multispinatum* to be a taxonomic junior synonym of *Galea* (as *Chiropteridium dispersa*, which is now a taxonomic junior synonym of *Galea* (now *Chiropteridium*) *galea*; *Membranophoridium* (subsequently *Chiropteridium*) *partispinatum*, by implication in Matsuoka and Bujak (1988, p.40), who considered *Membranophoridium partispinatum* to be a taxonomic junior synonym of *Galea* (as *Chiropteridium mespilana*, which is now a taxonomic junior synonym of *Galea* (now *Chiropteridium*) *galea*. Fensome et al. (1990, p.622) stated: "The following observations can be made: Article 68.1 [effectively equivalent to Article 55.1 in the I.C.N.] of the I.C.B.N. implies that a specific epithet is to be considered valid at the date of its original proposal provided all requirements for valid publication are met, except that the generic name is illegitimate; apart from the fact that the generic name *Galea* is an illegitimate homonym, Maier (1959) fulfilled all requirements for the equivalent of valid publication under the I.C.Z.N.; and the I.C.B.N. accepts all names thus published under alternate recognized codes from the dates of their valid publication (or equivalent), if these names are transferred into the jurisdiction of the I.C.B.N. Thus *Baltisphaeridium* (now

Chiropteridium *galea* (Maier, 1959) Sarjeant, 1964a can be considered to be a validly published botanical name, with priority of the specific epithet dating back to 1959. In considering *Galea* (as *Chiropteridium*) *galea* Maier, 1959, *Galea* (al. *Baltisphaeridium*) *levis* Maier, 1959 and *Galea* (al. *Baltisphaeridium*) *mespilanum* Maier, 1959 to be synonymous, Sarjeant (1983, p.108–109) chose *Galea* (as *Chiropteridium*) *galea* to be the senior name; as the first synonymizing author, his choice of epithet has priority. Lentin and Williams (1989, p.59) considered *Galea* (as *Chiropteridium*) *mespilana* to be the senior name." N.I.A. Age: Oligocene.

"*inornatum*" Drugg, 1970b, p.811–812, figs.3C–F. Holotype: Drugg, 1970b, fig.3C. **NOW** *Senoniasphaera*. Originally *Chiropteridium*, subsequently (and now) *Senoniasphaera*. Age: Danian.

"*korykos*" (Maier, 1959, p.310–311, pl.30, figs.7–8) Lentin and Williams, 1973, p.25. Holotype: Maier, 1959, pl.30, fig.7, lost according to Sarjeant (1983, p.91–92). Lectotype: Maier, 1959, pl.30, fig.8, designated by Sarjeant (1983, p.91–92). Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Chiropteridium*?, fourthly *Hystrichosphaeridium*?. **Taxonomic senior synonym:** *Xanthidium* (as and now *Spiniferites*) *ramosum*, according to Sarjeant (1983, p.91–92). Questionable assignment: Lentin and Williams (1973, p.25). N.I.A. Age: late Oligocene–middle Miocene.

**lobospinosum* Gocht, 1960, p.222–223, 226–227, pl.17, figs.1–16; text-figs.1–15. Holotype: Gocht, 1960, pl.17, fig.1; Fauconnier and Masure, 2004, pl.13, figs.3–4. Originally *Hystrichosphaeridium* (name not validly published), subsequently (and now) *Chiropteridium*, thirdly *Baltisphaeridium* (combination not validly published; Appendix A). Taxonomic junior synonym: *Chiropteridium brevifolium*, according to Pross (1997, p.102). The name *Hystrichosphaeridium lobospinosum* was not validly published in Weiler (1956, p.138–139) and Maier (1959, p.314) since it was merely used in anticipation of future acceptance of the name (I.C.N. Article 36.1b). Age: middle Oligocene.

"*mespilanum*" (Maier, 1959, p.306–307, pl.29, figs.5–6) Lentin and Williams, 1973, p.26. Holotype: Maier, 1959, pl.29, fig.5. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Chiropteridium*, fourthly *Hystrichosphaeridium*. **Taxonomic senior synonym:** *Galea* (now *Chiropteridium*) *galea*, according to Sarjeant (1983, p.108–109). Taxonomic junior synonym: *Membranophoridium* (subsequently *Chiropteridium*) *partispinatum*, according to Matsuoka and Bujak (1988, p.40). Age: middle Oligocene–middle Miocene.

"*partispinatum*" (Gerlach, 1961, p.201, pl.29, figs.3,6) Brosius, 1963, p.48. Holotype: Gerlach, 1961, pl.29, fig.6; Fauconnier and Masure, 2004, pl.13, figs.1–2. Originally *Membranophoridium*, subsequently *Chiropteridium*. **Taxonomic senior synonym:** *Galea* (as and now *Chiropteridium*) *galea*, by implication in Matsuoka and Bujak (1988, p.40), who considered *Chiropteridium partispinatum* to be a taxonomic junior synonym of *Chiropteridium mespilanum*, which is now a taxonomic junior synonym of *Galea* (now *Chiropteridium*) *galea*. Age: middle-late Oligocene.

CHLAMYDOPHORELLA Cookson and Eisenack, 1958, p.56. Emendation: Duxbury, 1983, p.41. Taxonomic junior synonyms: *Gardodinium*, by implication in Davey (1978, p.893), who transferred the "type species" of *Gardodinium*, *Gardodinium trabeculosum*, to *Chlamydophorella* — however, Lentin and Williams (1981, p.108) retained *Gardodinium*; *Sepispinula*, by implication in Schiøler and Wilson (1998, p.328), who considered the type, *Sepispinula ancoriferum*, to be a taxonomic junior synonym of *Chlamydophorella ambigua* — however, Masure in Fauconnier and Masure (2004, p.499) retained *Sepispinula*. Type: Cookson and Eisenack, 1958, pl.11, fig.1, as *Chlamydophorella nyei*.

"*albertii*" (Neale and Sarjeant, 1962, p.445–446, pl.19, fig.8; text-figs.4a–b [not fig.6]) Davey, 1978, p.893. Holotype: Neale and Sarjeant, 1962, pl.19, fig.8; text-figs.4a–b. Originally *Gardodinium*, subsequently *Chlamydophorella*. **Taxonomic senior synonym:** *Scriniodinium* (as and now *Gardodinium*) *trabeculosum*, according to Harding (1996, p.359). Age: Hauterivian.

"*ambigua*" (Deflandre, 1937b, p.81, pl.16 [al. pl.13], figs.8–9) Stover and Helby, 1987d, p.277. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), fig.8; Fauconnier and Masure, 2004, pl.71, figs.6–7. **NOW** *Sepispinula*?. Originally *Micrhystridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Polysphaeridium*, fourthly

Chlamydophorella, fifthly *Dapsilidinium*, sixthly *Gorgonisphaeridium* (Appendix A), seventhly (and now) *Sepispinula*?. Taxonomic junior synonyms: *Hystrichosphaeridium* (now *Sepispinula*?) *huguoniotii*, according to Clarke and Verdier (1967, p.54) and *Hystrichosphaeridium* (now *Sepispinula*) *ancoriferum*, both according to Yun Hyesu (1981, p.44) and Schiøler and Wilson (1998, p.328) — however, Masure in Fauconnier and Masure (2004, p.499–500) retained *Sepispinula ancorifera* and *Sepispinula huguoniotii*. Age: Late Cretaceous.

"*apiculata*" Cookson and Eisenack, 1970a, p.150–151, pl.13, fig.3. Holotype: Cookson and Eisenack, 1970a, pl.13, fig.3. Originally *Chlamydophorella*, subsequently *Chlamydophorella*?. **Taxonomic senior synonym:** *Chlamydophorella nyei*, according to Morgan (1980, p.18–19). Questionable assignment: Stover and Evitt (1978, p.28). Age: Albian–Cenomanian.

delicata Hultberg, 1985c, p.114–115, pl.2, fig.B. Holotype: Hultberg, 1985c, pl.2, fig.B. Age: late Danian.

discreta Clarke and Verdier, 1967, p.24, pl.2, figs.9–10; text-fig.9. Holotype: Clarke and Verdier, 1967, pl.2, fig.10. Age: Cenomanian–Santonian.

ectotabulata Smelror, 1989, p.141–143,145, pl.1, figs.1–4; pl.2, figs.1–4; pl.3, figs.1–5; text-figs.2A–C. Holotype: Smelror, 1989, pl.2, fig.1 (labelled as pl.2, fig.2 in the plate caption). This name was not validly published in Smelror (1988b, p.151,155), who did not provide a description. Age: late Bathonian–Oxfordian.

"*elongata*" (Singh, 1971, p.381–383, pl.68, figs.3–4) Davey, 1978, p.893. Holotype: Singh, 1971, pl.68, fig.3. Originally *Gardodinium*, subsequently *Chlamydophorella*. **Taxonomic senior synonym:** *Gardodinium eisenackii*, according to Brideaux and McIntyre (1975, p.33). Age: middle Albian.

fenestrata Jain and Garg in Jain et al., 1984, p.72, pl.1, figs.18–19. Holotype: Jain et al., 1984, pl.1, fig.19. Age: Kimmeridgian–early Tithonian.

?*grossa* Manum and Cookson, 1964, p.17–18, pl.5, fig.1–2. Holotype: Manum and Cookson, 1964, pl.5, fig.1. Originally *Chlamydophorella*, subsequently (and now) *Chlamydophorella*?. Questionable assignment: Ioannides (1986, p.16). Age: Cenomanian.

haigii Backhouse, 2006, p.58,60, pl.1, figs.1–8. Holotype: Backhouse, 2006, pl.1, figs.1–2. Age: early-middle Albian.

"*huguoniotii*" (Valensi, 1955a, p.38–39, text-fig.2a) Davey, 1978, p.893. Holotype: Valensi, 1955a, text-fig.2a; Fauconnier and Masure, 2004, pl.72, figs.1–3. **NOW** *Sepispinula*?. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Cleistosphaeridium*?, fifthly *Chlamydophorella*, sixthly *Sepispinula*, seventhly (and now) *Sepispinula*?. Taxonomic senior synonym: *Micrhystridium* (as *Polysphaeridium*, now *Sepispinula*?) *ambiguum*, according to Yun Hyesu (1981, p.44) and Schiøler and Wilson (1998, p.328) — however, Masure in Fauconnier and Masure (2004, p.500) retained *Hystrichosphaeridium* (as and now *Sepispinula*) *huguoniotii*. Taxonomic junior synonym: *Hystrichosphaeridium* (now *Sepispinula*) *ancoriferum*, according to Clarke and Verdier (1967, p.54) — however, Masure in Fauconnier and Masure (2004, p.499) retained *Hystrichosphaeridium* (as and now *Sepispinula*) *ancoriferum*. Age: Late Cretaceous.

"*inconscripita*" Wilson in Slimani, 2001a, p.192. **Name not validly published:** no description. **Taxonomic senior synonym:** *Histiocysta? variornata*, according to Slimani (2001a, p.192).

"*lagena*" Cookson and Eisenack, 1970a, p.151, pl.13, fig.4. Holotype: Cookson and Eisenack, 1970a, pl.13, fig.4. **Taxonomic senior synonym:** *Chlamydophorella nyei*, according to Morgan (1980, p.18–19). Age: Albian–Cenomanian.

largissima Singh, 1971, p.378, pl.67, figs.5–6. Holotype: Singh, 1971, pl.67, figs.5–6. Originally (and now) *Chlamydophorella largissima*, subsequently *Chlamydophorella nyei* subsp. *largissima*. Lentin and Williams (1981, p.44) retained this taxon at the species rank. Age: middle Albian.

"*magnifica*" Beju, 1978, p.4. **Name not validly published:** no description or illustration.

"?*membranoidea*" Vozzhennikova, 1967, p.114–115, pl.48, figs.1–2,3a–b,4a–b,5–8,9a–c,10. Emendation: Lentin and Vozzhennikova, 1990, p.103, as *Lagenadinium? membranoideum*. Holotype: Vozzhennikova, 1967, pl.48, figs.9a–b; Lentin and Vozzhennikova, 1990, text-fig.58; lost according to Lentin and Vozzhennikova (1990, p.103). Lectotype: ?Vozzhennikova, 1967, pl.48, fig.6; Lentin and Vozzhennikova, 1990, pl.10, figs.6–7; designated by Lentin and Vozzhennikova (1990, p.103). **NOW** *Stephanelyton*. Originally *Chlamydophorella*, subsequently *Chlamydophorella?*, thirdly *Lagenadinium?*, fourthly (and now) *Stephanelyton*. Questionable assignment: Stover and Evitt (1978, p.28). Taxonomic junior synonym: *Stephanelyton cretaceum*, according to Heilmann-Clausen in Heilmann-Clausen and Thomsen (1995, p.301) — however, Courtinat (1999, p.178) retained *Stephanelyton cretaceum*. Age: Late Jurassic.

membranoperforata Below, 1982d, p.345, fig.3. Holotype: Below, 1982d, fig.3. Age: late Barremian.

?*multifibrata* Schiøler, 1993, p.104,106, pl.5, figs.7–12. Holotype: Schiøler, 1993, pl.5, fig.9. Questionable assignment: Schiøler (1993, p.104). Age: Maastrichtian.

**neyi* Cookson and Eisenack, 1958, p.56, pl.11, figs.1–3. Holotype: Cookson and Eisenack, 1958, pl.11, fig.1. Taxonomic junior synonyms: *Chlamydophorella apiculata* and *Chlamydophorella lagena*, both according to Morgan (1980, p.18–19). Age: Aptian–Turonian.

"subsp. *largissima*" (Singh, 1971, p.378, pl.67, figs.5–6) Below, 1981a, p.34. Holotype: Singh, 1971, pl.67, figs.5–6. **NOW** *Chlamydophorella largissima*. Originally (and now) *Chlamydophorella largissima*, subsequently *Chlamydophorella neyi* subsp. *largissima*. Age: middle Albian.

"subsp. *neyi*". Autonym. Holotype: Cookson and Eisenack, 1958, pl.11, fig.1. **Now redundant.**

"*ordinalis*" (Davey, 1974, p.51, pl.3, figs.5–6) Davey, 1978, p.893. Holotype: Davey, 1974, pl.3, fig.6. **NOW** *Gardodinium*. Originally (and now) *Gardodinium*, subsequently *Chlamydophorella*. Age: Aptian–Turonian.

ovulum Wheeler and Sarjeant, 1990, p.315–316, pl.12, figs.4–6; text-figs.12a–b ex Wheeler and Sarjeant, 1992, p.381. Holotype: Wheeler and Sarjeant, 1990, pl.12, fig.4. This name was not validly published in Wheeler and Sarjeant (1990), since the lodgement of the holotype was not specified (I.C.N. Article 40.7). N.I.A. Age: late Callovian–early Oxfordian.

"*pyriformis*" (Vozzhennikova, 1967, p.179, pl.100, figs.1,4) Davey, 1978, p.893. Holotype: Vozzhennikova, 1967, pl.100, fig.4; Lentin and Vozzhennikova, 1990, text-fig.57; lost according to Lentin and Vozzhennikova (1990, p.101). Neotype: Lentin and Vozzhennikova, 1990, pl.12, figs.8–10, designated by Lentin and Vozzhennikova (1990, p.101). Originally *Gardodinium*, subsequently *Chlamydophorella*. **Taxonomic senior synonym:** *Scriniodinium* (as and now *Gardodinium*) *trabeculosum*, according to Harding (1996, p.359). Lentin and Vozzhennikova (1990, p.102) provided an "expanded description" for the species, as *Gardodinium pyriforme*. Age: Early Cretaceous (Barremian).

raritubula Dodekova, 1975, p.27–28, pl.1, figs.7–10; pl.6, figs.13–16; text-fig.6. Holotype: Dodekova, 1975, pl.6, figs.13–14. Age: late Bathonian.

regularis (Xu Jinli et al., 1997, p.115,152, pl.36, figs.1a–b,2a–b,3a–b,4a–b,5–6) He Chengquan et al., 2009, p.342. Holotype: Xu Jinli et al., 1997, pl.36, figs.1a–b. Originally *Ctenophora*, subsequently (and now) *Chlamydophorella*. This name was cited as "*Ctenosphaera regularis*" by Xu Jinli et al. (1997, p.115). Age: Oligocene.

solida Morgan, 1980, p.19, pl.30, figs.7–16. Holotype: Morgan, 1980, pl.30, figs.9–12. Age: middle Aptian–earliest Albian.

?*suemegensis* (Góczán, 1962, p.192, pl.2, figs.12–14) Sarjeant and Stancliffe, 1994, p.56. Holotype: Góczán, 1962, pl.2, figs.12–14. Originally *Micrhystridium* (Appendix A), subsequently (and now) *Chlamyphorella*?. Questionable assignment: Sarjeant and Stancliffe (1994, p.56). Age: early Aptian.

?*tabulata* Singh, 1971, p.379, pl.67, fig.7. Holotype: Singh, 1971, pl.67, fig.7. Questionable assignment: Stover and Evitt (1978, p.28). Age: middle Albian.

"*trabeculosa*" (Gocht, 1959, p.62, pl.4, fig.5) Davey, 1978, p.893. Emendation: Harding, 1996, p.359,361,363, as *Gardodinium trabeculosum*. Holotype: Gocht, 1959, pl.4, fig.5; Harding, 1996, pl.3, figs.1,6–7. **NOW** *Gardodinium*. Originally *Scriniodinium*, subsequently (and now) *Gardodinium*, thirdly *Chlamyphorella*. Taxonomic junior synonyms: *Gardodinium eisenackii*, according to Davey (1974, p.51); *Gardodinium albertii* and *Gardodinium pyriforme*, both according to Harding (1996, p.359); *Gardodinium elongatum*, by implication in Brideaux and McIntyre (1975, p.33), who considered *Gardodinium elongatum* to be a taxonomic junior synonym of *Gardodinium eisenackii*. Age: Hauterivian.

?*urna* Cookson and Eisenack, 1960a, p.10, pl.3, fig.7. Holotype: Cookson and Eisenack, 1960a, pl.3, fig.7. Questionable assignment: Stover and Evitt (1978, p.28). N.I.A. Age: late Albian–Cenomanian.

wallala Cookson and Eisenack, 1960b, p.255, pl.38, fig.13; pl.39, fig.11. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.13. N.I.A. Age: Oxfordian–early Kimmeridgian.

CHLONOVIELLA Lebedeva in Ilyina et al., 1994, p.63. Type: Ilyina et al., 1994, pl.20, figs.6–7, as *Chlonoviella agapica*.

**agapica* Lebedeva in Ilyina et al., 1994, p.63–64, pl.19, figs.7–8; pl.20, figs.1–9; text-fig.8. Holotype: Ilyina et al., 1994, pl.20, figs.6–7. Age: late Cenomanian–early Santonian.

CHYTROEISPHAERIDIA (Sarjeant, 1962a, p.492) Downie and Sarjeant, 1965, p.102. Emendations: Pocock, 1972, p.99–100 and Davey, 1979d, p.211, both as *Chytroeisphaeridia*. Originally *Leiosphaeridia* subgenus *Chytroeisphaeridia* (Appendix A), subsequently (and now) *Chytroeisphaeridia*. Taxonomic junior synonym: *Tapeinosphaeridium*, according to Davey (1979d, p.211). Type: Sarjeant, 1962a, pl.70, fig.13, as *Leiosphaeridia* subgenus *Chytroeisphaeridia chytrooides*.

baetica Riegel, 1974, p.349–350,353–354, pl.1, figs.1–5; text-fig.2. Emendation: Riegel and Sarjeant, 1982, p.299–300. Holotype: Riegel, 1974, pl.1, fig.2. Questionable assignment: Davey (1979d, p.216) — however, Riegel and Sarjeant (1982, p.299–300) retained the species in *Chytroeisphaeridia* without question. Age: ?Senonian.

"*caddaensis*" Filatoff, 1975, p.89–90, pl.29, figs.7–9. Holotype: Filatoff, 1975, pl.29, fig.7; Helby et al., 1987, figs.16A–B. **NOW** *Dissiliodinium*. Originally *Chytroeisphaeridia*, subsequently (and now) *Dissiliodinium*. Age: Bajocian.

"*cariacoensis*" Wall, 1967, p.113, pl.16, figs.13–14. Emendation: Matsuoka, 1987, p.53, as *Brigantedinium cariaeoense*. Holotype: Wall, 1967, pl.16, fig.14. **NOW** *Brigantedinium*. Originally *Chytroeisphaeridia*, subsequently (and now) *Brigantedinium*. Motile equivalent: *Protoperidinium avellanum* (Meunier, 1919) Balech, 1974, according to Wall and Dale (1967, p.350) and Harland (1981, p.68). Age: Quaternary.

cerastes Davey, 1979d, p.212,214, pl.2, figs.8–9. Holotype: Davey, 1979d, pl.2, fig.8. N.I.A. Age: early Oxfordian.

**chytrooides* (Sarjeant, 1962a, p.493–494, pl.70, figs.13,16) Downie and Sarjeant, 1965, p.103. Emendation: Davey, 1979d, p.211, as *Chytroeisphaeridia chytrooides*. Holotype: Sarjeant, 1962a, pl.70, fig.13. Originally *Leiosphaeridia* subgenus *Chytroeisphaeridia* (Appendix A), subsequently (and now) *Chytroeisphaeridia*. Age: Oxfordian.

"*dictydia*" Sarjeant, 1972, p.41, pl.3, fig.3; pl.6, fig.6. Holotype: Sarjeant, 1972, pl.6, fig.6. **NOW** *Valensiella*. Originally *Chytroeisphaeridia*, subsequently *Batiacasphaera*, thirdly *Escharisphaeridia*, fourthly *Cassiculospaeridia*, fifthly (and now) *Valensiella*. Age: Bathonian–Callovian.

elongata He Chengquan, 1991, p.115, pl.6, fig.6. Holotype: He Chengquan, 1991, pl.6, fig.6. Age: Paleocene.

"*euteiches*" Davey, 1969a, p.141, pl.3, figs.8–9. Holotype: Davey, 1969a, pl.3, fig.8. **NOW** *Batiacasphaera*. Originally *Chytroeisphaeridia*, subsequently (and now) *Batiacasphaera*. Age: Cenomanian.

"*everricula*" Wilson in Slimani, 1994, p.99. **Name not validly published**: no description or illustration. **Taxonomic senior synonym**: *Cassiculospaeridia? intermedia*, according to Slimani (1994, p.99). Slimani (2001a, p.192) spelled the epithet "*everrecula*".

"*explanata*" Bujak in Bujak et al., 1980, p.44, pl.13, figs.13–14. Holotype: Bujak et al., 1980, pl.13, figs.13–14. **NOW** *Batiacasphaera*. Originally *Chytroeisphaeridia*, subsequently (and now) *Batiacasphaera*. Age: middle Eocene (see Aubry, 1986).

gochti (Dodekova, 1975, p.31, pl.3, figs.8,10–13) Jansonius, 1986, p.205. Holotype: Dodekova, 1975, pl.3, fig.10. Originally *Tectatodinium*, subsequently *Dodekovia*, thirdly (and now) *Chytroeisphaeridia*. Lentin and Williams (1989, p.61) retained this species in *Chytroeisphaeridia*. Age: late Bathonian.

"*granulata*" Courtinat in Courtinat and Gaillard, 1980, p.13–14, pl.1, figs.4,6; text-fig.2b. Holotype: Courtinat and Gaillard, 1980, pl.1, fig.6. **NOW** *Escharisphaeridia*. Originally *Chytroeisphaeridia*, subsequently (and now) *Escharisphaeridia*, thirdly *Sentusidinium*. Age: late Oxfordian.

"*grossa*" Smelror, 1988b, p.150,152, figs.10C,E. Holotype: Smelror, 1988b, fig.10C. **Taxonomic senior synonym**: *Tapeinosphaeridium* (as *Chytroeisphaeridia*) *hyalinum*, according to Riding (1990, p.311). Age: early Callovian–early Oxfordian.

"*hungarica*" Sütő-Szentai, 1990, p.851, pl.4, figs.5a–b. Holotype: Sütő-Szentai, 1990, pl.4, figs.5a–b. **Name not validly published**: lodgement of holotype not specified (I.C.N. Article 40.7). Age: late Miocene.

hyalina (Raynaud, 1978, p.394–395, pl.2, fig.18) Lentin and Williams, 1981, p.45. Holotype: Raynaud, 1978, pl.2, fig.18. Originally *Tapeinosphaeridium*, subsequently (and now) *Chytroeisphaeridia*. Taxonomic junior synonym: *Chytroeisphaeridia grossa*, according to Riding (1990, p.311). This combination was not validly published in Riley and Fenton (1980, p.340), since these authors did not reference the basionym. Age: early-middle Callovian.

"*kendelbachia*" (Morbey, 1975, p.38, pl.14, figs.1–4; pl.17, figs.1–3) Stover and Evitt, 1978. Holotype: Morbey, 1975, pl.14, fig.1; pl.17, fig.1. **NOW** *Heibergella*. Originally *Rhombodella* (Appendix A), subsequently *Chytroeisphaeridia*, thirdly (and now) *Heibergella*. Below (1987a, p.94) considered this species to be a questionable taxonomic junior synonym of *Suessia swabiana*. Age: Rhaetian.

"*laevigata*" Grabowska in Malinowskiej and Piwockiego, 1996, p.364–365, pl.109, fig.4. Holotype: Malinowskiej and Piwockiego, 1996, pl.109, fig.4. **Name not validly published**: no Latin or English description. Questionable assignment: Grabowska in Malinowskiej and Piwockiego (1996, p.364). Age: late Eocene–early Oligocene.

"*mantelli*" Gitmez and Sarjeant, 1972, p.186, pl.1, figs.3–4; pl.12, fig.3. Holotype: Gitmez and Sarjeant, 1972, pl.1, fig.3. **NOW** *Escharisphaeridia*. Originally *Chytroeisphaeridia*, subsequently *Chytroeisphaeridia?*, thirdly (and now) *Escharisphaeridia*. Questionable assignment: Stover and Evitt (1978, p.29). Age: early–late Kimmeridgian.

microgranulata He Chengquan, 1991, p.116, pl.49, figs.14–18; pl.51, figs.3–12. Holotype: He Chengquan, 1991, pl.49, fig.17; pl.51, fig.6. He Chengquan et al. (2009, p.218) indicated that they were validating this species, but it is not clear why they considered the name to have been invalid in He Chengquan (1991). Age: early Eocene.

"*minor*" (Cookson and Hughes, 1964, p.43, pl.8, figs.1–3,5) Morgan, 1980, p.19. Holotype: Cookson and Hughes, 1964, pl.8, fig.1. **NOW** *Kallosphaeridium? helbyi*. Originally *Canningia minor*, subsequently *Canningia? minor*, thirdly *Batiacasphaera minor*, fourthly *Chytroeisphaeridia minor*, fifthly *Kallosphaeridium? minus* (name illegitimate), sixthly (and now) *Kallosphaeridium? helbyi*. Age: late Albian–early Cenomanian.

"subsp. *minor*". Autonym. Holotype: Cookson and Hughes, 1964, pl.8, fig.1. **NOW** *Kallosphaeridium? helbyi* subsp. *helbyi*. Originally *Canningia? minor* subsp. *minor*, subsequently *Chytroeisphaeridia minor* subsp. *minor*, thirdly (and now) *Kallosphaeridium? helbyi* subsp. *helbyi*.

"subsp. *psilata*" (Burger, 1980a, p.71, pl.25, figs.5–11) Lentin and Williams, 1985, p.58. Holotype: Burger, 1980a, pl.25, fig.10. **NOW** *Kallosphaeridium? helbyi* subsp. *psilatum*. Originally *Canningia? minor* var. *psilata*, subsequently *Canningia? minor* subsp. *psilata*, thirdly *Chytroeisphaeridia minor* subsp. *psilata*, fourthly (and now) *Kallosphaeridium? helbyi* subsp. *psilatum*. Age: Aptian–Albian.

minuta Qian Zeshu et al., 1986, p.22–23, pl.1, figs.7–10,12–14; pl.3, figs.1–9. Holotype: Qian Zeshu et al., 1986, pl.1, fig.10. Age: Paleocene–Eocene.

"*ovata*" Yu Jingxian and Zhang Wangping, 1980, p.106, pl.1, figs.12–13. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.1, fig.13. **NOW** *Escharisphaeridia?*. Originally *Chytroeisphaeridia*, subsequently (and now) *Escharisphaeridia?*. Age: Late Cretaceous.

"?*parva*" Grabowska in Malinowskiej and Piwockiego, 1996, p.365, pl.109, figs.2a–c,3. Holotype: Malinowskiej and Piwockiego, 1996, pl.109, figs.2a–c. **Name not validly published**: no Latin or English description. Questionable assignment: Grabowska in Malinowskiej and Piwockiego (1996, p.365). This name was also not validly published in Słodkowska (1994, p.17) since that author did not provide a description. Age: late Eocene–early Oligocene.

pericompsa (Ioannides et al., 1977, p.463, pl.5, figs.1–4; text-fig.13) Davey, 1979d, p.216. Holotype: Ioannides et al., 1977, pl.5, fig.1. Originally *Tapeinosphaeridium*, subsequently (and now) *Chytroeisphaeridia*. Age: middle Kimmeridgian.

"*pocockii*" Sarjeant, 1968, p.230, pl.3, fig.9. Holotype: Sarjeant, 1968, pl.3, fig.9; Eisenack and Kjellström, 1972, p.185; Davey, 1979d, pl.2, figs.7,10; Fensome et al., 1995, fig.1 — p.1673. **NOW** *Escharisphaeridia*. Originally *Chytroeisphaeridia*, subsequently *Lithodinia*, thirdly (and now) *Escharisphaeridia*. Age: late Callovian.

"*reticulata*" Davey, 1969b, p.14, pl.4, figs.3–4,6. Holotype: Davey, 1969b, pl.4, fig.3. **NOW** *Batiacasphaera?*. Originally *Chytroeisphaeridia*, subsequently *Fromea* (Appendix A), thirdly *Batiacasphaera*, fourthly (and now) *Batiacasphaera?*. Age: Campanian–Maastrichtian.

"*ringnesiorum*" (Manum and Cookson, 1964, p.15, pl.2, fig.10) Morgan, 1980, p.19. Holotype: Manum and Cookson, 1964, pl.2, fig.10. **NOW** *Kallosphaeridium?*. Originally *Canningia*, subsequently *Canningia?*, thirdly *Batiacasphaera*, fourthly *Chytroeisphaeridia*, fifthly (and now) *Kallosphaeridium?*. The plural ending is necessary because the species is named after the Ringnes brothers. Age: Campanian–Maastrichtian.

"*rugosa*" Courtinat in Courtinat and Gaillard, 1980, p.15–16, pl.1, fig.12; pl.2, fig.1; text-fig.2d. Holotype: Courtinat and Gaillard, 1980, pl.2, fig.1. **NOW** *Escharisphaeridia*. Originally *Chytroeisphaeridia*, subsequently (and now) *Escharisphaeridia*. Age: late Oxfordian.

?*scabrata* Pocock, 1972, p.100, pl.27, figs.23–25. Holotype: Pocock, 1972, pl.27, figs.24–25; Jansonius, 1986, pl.3, figs.13–14. Originally *Chytroeisphaeridia*, subsequently (and now) *Chytroeisphaeridia?*. Questionable assignment: Stover and Evitt (1978, p.28) as a problematic species. Age: late Bajocian.

"*shangsica*" He Chengquan, 1984b, p.162, pl.8, figs.16–19. Holotype: He Chengquan, 1984b, pl.8, fig.16. **NOW** *Escharisphaeridia*. Originally *Chytroeisphaeridia*, subsequently (and now) *Escharisphaeridia*. Age: Tertiary.

"*simplicia*" Wall, 1965b, p.308; text-figs.7,20. Holotype: Wall, 1965b, text-figs.7,20; Eisenack and Kjellström, 1972, p.187; Fensome et al., 1995, fig.1 — p.1785. **Name not validly published:** no Latin diagnosis. **NOW** *Brigantedinium*. Originally *Chytrioisphaeridia simplicia* (name not validly published), subsequently (and now) *Brigantedinium simplex*. Motile equivalent: *Protoperidinium conicoides* (Paulsen, 1905) Balech, 1974, according to Harland (1981, p.68). This name was not validly published in Wall (1965b), since that author did not provide a Latin diagnosis, a requirement prior to 2012 since this species is based on living material (I.C.N. Article 39). Age: extant.

"*solida*" Wilson in Slimani, 2001a, p.192. **Name not validly published:** no description. **Taxonomic senior synonym:** *Batiacasphaera solida*, according to Slimani (2003, p.268–269).

"*spinosa*" Boltenhagen, 1977, p.54–55, pl.7, figs.1a–b,2,3a–b,4a–b,5a–b. Emendation: Masure in Fauconnier and Masure, 2004, p.116–117, as *Trichodinium boltenhagenii*. Holotype: Boltenhagen, 1977, pl.7, figs.1a–b; Fauconnier and Masure, 2004, pl.15, fig.6. **NOW** *Trichodinium boltenhagenii*. Originally *Chytrioisphaeridia spinosa*, subsequently *Cleistosphaeridium? spinosum*, thirdly *Circulodinium spinosum*, fourthly (and now) *Trichodinium boltenhagenii*. Age: Cenomanian–Turonian.

"*suibinensis*" Sun Xuekun and He Chengquan, 1992, p.197,204, pl.2, figs.4–5. Holotype: Sun Xuekun and He Chengquan, 1992, pl.2, figs.4–5. **NOW** *Pyxidinospis*. Originally *Chytrioisphaeridia*, subsequently (and now) *Pyxidinospis*. Age: Late Jurassic.

tuberosa Sütő-Szentai, 1982a, p.212,219–220 pl.6, figs.1–4. Holotype: Sütő-Szentai, 1982a, pl.6, fig.1. Age: late Miocene.

"?*variabilis*" Pocock, 1972, p.100, pl.23, figs.14–16. Holotype: Pocock, 1972, pl.23, fig.15; Jansonius, 1986, pl.3, figs.15–17; text-fig.8; Jan du Chêne et al., 1986a, pl.39, figs.5–7. **NOW** *Endoscrinium?*. Originally *Chytrioisphaeridia*, subsequently *Chytrioisphaeridia?*, thirdly *Gonyaulacysta*, fourthly *Gonyaulacysta?*, fifthly (and now) *Endoscrinium?*. Questionable assignment: Lentin and Williams (1977b, p.26). Age: late Bajocian.

yujingxianii He Chengquan et al., 2009, p.219–220,644–645, pl.70, figs.7–8. Holotype: Yu Jingxian, 1982, pl.4, fig.17, as *Chytrioisphaeridia euteiches*. Age: Berriasian–Valanginian.

"**CILIOSPHAERIDIUM**" Grigorovich, 1971, p.94. **Taxonomic senior synonym:** *Impletosphaeridium*, according to Stover and Evitt (1978, p.232–233). Type: Grigorovich, 1971, pl.2, fig.1, as *Ciliosphaeridium cingulatum*.

"**cingulatum*" Grigorovich, 1971, p.94, pl.2, fig.1. Holotype: Grigorovich, 1971, pl.2, fig.1; Fensome et al., 1993a, fig.1 — p.1059. **NOW** *Impletosphaeridium*. Originally *Ciliosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Paleocene.

CINCTACTINISCUS Dumitrică, 1973, p.823. Siliceous dinoflagellate genus. Type: Hovasse, 1943, fig.3, as *Gymnaster cinctus*.

**cinctus* (Hovasse, 1943, p.279, fig.3) Dumitrică, 1973, p.824. Holotype: Hovasse, 1943, fig.3. Originally *Gymnaster*, subsequently (and now) *Cinctactiniscus*. Age: early Miocene.

intermedius Dumitrică, 1973, p.824, pl.1, figs.5,7–8; pl.5, fig.2. Holotype: Dumitrică, 1973, pl.1, fig.8. Age: early Oligocene–early Miocene.

robustus Dumitrică, 1973, p.823–824, pl.1, figs.1–4; pl.5, figs.1,3. Holotype: Dumitrică, 1973, pl.1, fig.1. Age: early Oligocene.

CIRCULODINIUM Alberti, 1961, p.28. Taxonomic senior synonyms: *Canningia*, according to Millioud (1969, p.425) and *Cyclonephelium*, according to Davey (1978, p.894) — however, Jansonius (1986, p.204) retained

Circulodinium. Duxbury (2002, p.78) considered that *Circulodinium* may be a taxonomic junior synonym of *Tenua* Eisenack. Type: Alberti, 1961, pl.4, fig.20, as *Circulodinium hirtellum*.

?*araneosum* (Brideaux, 1977, p.22–23, pl.9, figs.1–3) Fauconnier in Fauconnier and Masure, 2004, p.115. Holotype: Brideaux, 1977, pl.9, figs.1–2. Originally *Cleistosphaeridium*, subsequently *Heterosphaeridium*, thirdly (and now) *Circulodinium*?. Questionable assignment: Fauconnier and Londeix in Fauconnier and Masure (2004, p.115–116). Age: Aptian–Albian.

asperum (Singh, 1971, p.322, pl.50, fig.1) Helby, 1987, p.324–325. Holotype: Singh, 1971, pl.50, fig.1; Fauconnier and Masure, 2004, pl.14, fig.1. Originally *Canningia*, subsequently *Canningia*?, thirdly *Epelidosphaeridia*, fourthly *Cyclonephelium*, fifthly (and now) *Circulodinium*. Age: middle Albian.

asymmetricum (Burger, 1980b, p.270, figs.6c,7a–c) He Chengquan and Sun Xuekun, 2000, p.52. Holotype: Burger, 1980b, fig.7a; Fauconnier and Masure, 2004, pl.14, fig.2. Originally *Cyclonephelium*, subsequently (and now) *Circulodinium*. This combination was also proposed by Fauconnier in Fauconnier and Masure (2004, p.113). Age: Neocomian.

attadalicum (Cookson and Eisenack, 1962b, p.495, pl.5, figs.12–15) Helby, 1987, p.324–325. Holotype: Cookson and Eisenack, 1962b, pl.5, fig.13. Originally *Cyclonephelium*?, subsequently *Aptea*, thirdly *Canningia*, fourthly (and now) *Circulodinium*. Age: Aptian–Albian.

"*australe*" (Burger, 1980b, p.268–269, figs.5C–D,6A) Islam, 1993, p.83. Emendation: Fauconnier in Fauconnier and Masure, 2004, p.116, as *Trichodinium australe*. Holotype: Burger, 1980b, fig.5D; Fauconnier and Masure, 2004, pl.15, figs.3–5. **NOW** *Trichodinium*. Originally *Cleistosphaeridium*, subsequently *Circulodinium*, thirdly (and now) *Trichodinium*. Age: Neocomian.

barbiferum (Cookson and Eisenack, 1982, p.42, pl.7, figs.8–9) Fauconnier in Fauconnier and Masure, 2004, p.113. Holotype: Cookson and Eisenack, 1982, pl.7, fig.9. Originally *Cyclonephelium*?, subsequently (and now) *Circulodinium*. Age: Albian–Cenomanian.

brevispinatum (Millioud, 1969, p.427–428, pl.1, figs.8–9) Fauconnier in Fauconnier and Masure 2004, p.114. Holotype: Millioud, 1969, pl.1, figs.8–9. Originally *Cyclonephelium distinctum* var. *brevispinatum*, subsequently *Cyclonephelium distinctum* subsp. *brevispinatum*, thirdly *Cyclonephelium brevispinatum*, fourthly (and now) *Circulodinium brevispinatum*. This combination was not validly published by Below in Davey (1994, p.13) since the basionym was not fully referenced. Age: late Hauterivian–early Aptian.

brevispinosum (Pocock, 1962, p.81, pl.14, figs.222–223) Jansonius, 1986, p.204. Emendation: Brideaux, 1977, p.15–16, as *Tenua brevispinosa*. Holotype: Pocock, 1962, pl.14, fig.222; Jansonius, 1986, pl.4, fig.6; Fauconnier and Masure, 2004, pl.14, figs.7–8. Originally *Palaeohystrichophora*, subsequently *Tenua* Eisenack, thirdly *Canningia*?, fourthly *Cyclonephelium*, fifthly (and now) *Circulodinium*. Helby (1987, p.324–325) also proposed this combination. Age: Barremian.

chinense (He Chengquan, 1991, p.54–55, pl.9, figs.17–18) He Chengquan et al., 2009, p.268. Holotype: He Chengquan, 1991, pl.9, fig.17. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: middle Eocene.

cingulatum He Chengquan et al., 1999, p.193, pl.2, figs.1–3. Holotype: He Chengquan et al., 1999, pl.2, fig.1. Age: late Hauterivian–Barremian.

colliveri (Cookson and Eisenack, 1960b, p.251, pl.38, figs.3–4) Helby, 1987, p.324–325. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.4. Originally *Canningia*, subsequently (and now) *Circulodinium*, thirdly *Canninginopsis*. Fauconnier and Londeix in Fauconnier and Masure (2004, p.113) retained this species in *Circulodinium*. Age: Aptian.

compta (Davey, 1982b, p.268, pl.8, figs.3–6) Helby, 1987, p.324–325. Holotype: Davey, 1982b, pl.8, fig.3. Originally *Canningia*, subsequently (and now) *Circulodinium*. Davey (1988, p.36) also proposed this combination. Age: early Portlandian–earliest Valanginian.

copei Bailey et al., 1997, p.235–236, figs.3a–f. Holotype: Bailey et al., 1997, fig.3a. Age: late Kimmeridgian.

deflandrei Alberti, 1961, p.29, pl.4, figs.7–13. Holotype: Alberti, 1961, pl.4, fig.13. Taxonomic senior synonym: *Cyclonephelium distinctum*, according to Millioud (1969, p.427) and Harker and Sarjeant in Harker et al. (1990, p.80) — however, Fauconnier and Londeix in Fauconnier and Masure (2004, p.114) retained *Circulodinium deflandrei*. Age: late Barremian.

densebarbatum (Cookson and Eisenack, 1960b, p.253, pl.38, figs.9–10) Fauconnier in Fauconnier and Masure, 2004, p.114. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.10; Fauconnier and Masure, 2004, pl.14, figs.3–4. Originally *Cyclonephelium*, subsequently (and now) *Circulodinium*. Age: Tithonian.

distinctum (Deflandre and Cookson, 1955, p.285–286, pl.2, fig.14; text-figs.47–48) Jansonius, 1986, p.204. Holotype: Deflandre and Cookson, 1955, pl.2, fig.14. Originally *Cyclonephelium*, subsequently (and now) *Circulodinium*. Taxonomic junior synonym: *Circulodinium deflandrei*, according to Millioud (1969, p.427) and Harker and Sarjeant in Harker et al. (1990, p.80) — however, Fauconnier and Londeix in Fauconnier and Masure (2004, p.114) retained *Circulodinium deflandrei*. Age: Senonian.

subsp. **distinctum**. Autonym. Holotype: Deflandre and Cookson, 1955, pl.2, fig.14. Originally *Cyclonephelium distinctum* subsp. *distinctum*, subsequently (and now) *Circulodinium distinctum* subsp. *distinctum*.

subsp. **laevigatum** (Mehrotra and Sarjeant, 1986, p.719–720, pl.8, figs.1–2; pl.9, fig.2; text-fig.7a) Lentin and Williams, 1989, p.63. Holotype: Mehrotra and Sarjeant, 1986, pl.9, fig.2; text-fig.7a. Originally *Cyclonephelium distinctum* subsp. *laevigatum*, subsequently (and now) *Circulodinium distinctum* subsp. *laevigatum* Age: Valanginian.

"subsp. **longispinatum**" (Davey, 1978, p.894, pl.3, figs.4,7–8) Lentin and Williams, 1989, p.63. Holotype: Davey, 1978, pl.3, fig.7. **NOW** *Cyclonephelium longispinatum*. Originally *Cyclonephelium distinctum* subsp. *longispinatum*, subsequently *Circulodinium distinctum* subsp. *longispinatum*, thirdly (and now) *Cyclonephelium longispinatum*. Age: Turonian.

subsp. **psilatum** (Yu Jingxian and Zhang Wangping, 1980, p.115, pl.6, figs.1–2) Lentin and Williams, 1989, p.63. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.6, fig.2. Originally *Cyclonephelium distinctum* var. *psilatum*, subsequently *Cyclonephelium distinctum* subsp. *psilatum*, thirdly (and now) *Circulodinium distinctum* subsp. *psilatum*. Age: Turonian–Santonian.

elongatum (He Chengquan, 1991, p.55, pl.9, fig.1) He Chengquan et al., 2009, p.270. Holotype: He Chengquan, 1991, pl.9, fig.1. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: Turonian.

"**formosum**" Iosifova, 1992, p.61, pl.9, figs.3a–c; text-figs.1c–d. Holotype: Iosifova, 1992, pl.9, figs.3a–c; text-figs.1c–d; Iosifova, 1996, pl.16, figs.6a–b; text-figs.5A–B. **NOW** *Cyclonephelium*. Originally *Circulodinium*, subsequently (and now) *Cyclonephelium*. Age: Valanginian.

***hirtellum** Alberti, 1961, p.28–29, pl.4, fig.20. Holotype: Alberti, 1961, pl.4, fig.20. Originally (and now) *Circulodinium*, subsequently *Canningia*, thirdly *Cyclonephelium*. Helby (1987, p.322,324–325) retained this species in *Circulodinium*. Backhouse (1988, p.83) considered this species to be a possible taxonomic junior synonym of *Tenua* (as *Cyclonephelium*) *hystrix*. Age: Valanginian–Hauterivian.

?**indicum** Mehrotra and Sarjeant, 1987, p.163, pl.2, fig.2; pl.7, fig.1 ex Lentin and Williams, 1989, p.63. Holotype: Mehrotra and Sarjeant, 1987, pl.2, fig.2. Originally *Cyclonephelium* (name illegitimate), subsequently *Circulodinium*, thirdly (and now) *Circulodinium*?. Questionable assignment: Fauconnier and Londeix in Fauconnier and Masure (2004, p.116). The name *Cyclonephelium indicum* was illegitimate in Mehrotra and Sarjeant (1987) since that name is preoccupied. By "transferring" the species to *Circulodinium*, Lentin and Williams (1989) effectively created a "new name". Age: Paleocene.

insigne (He Chengquan, 1991, p.55–56, pl.9, figs.9–10) He Chengquan et al., 2009, p.271. Holotype: He Chengquan, 1991, pl.9, fig.9. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: Cenomanian.

kukebaiense (Mao Shaozhi and Norris, 1988, p.31, pl.1, figs.6–8) He Chengquan et al., 2009, p.271. Holotype: Mao Shaozhi and Norris, 1988, pl.1, fig.7. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: Turonian–Santonian.

latoaculeum (Yun Hyesu, 1981, p.42–43, pl.11, figs.17–19) Prince et al., 1999, p.160. Holotype: Yun Hyesu, 1981, pl.11, fig.18; Fensome et al., 1991, fig.2 — p.657; fig.2 — p.693 (mislabelled as *Cleistosphaeridium multifurcatum* subsp. *multifurcatum*); Fensome et al., 1993a, fig.2 — p.1261; Fauconnier and Masure, 2004, pl.35, figs.9–10. Originally *Cleistosphaeridium multifurcatum* subsp. *latoaculeum*, subsequently *Heterosphaeridium latoaculeum*, thirdly (and now) *Circulodinium latoaculeum*. Age: early Santonian.

?*micibaculatum* (Jiabo, 1978, p.54, pl.7, figs.1–2) He Chengquan et al., 2009, p.271. Holotype: Jiabo, 1978, pl.7, fig.1. Originally *Canningia*, subsequently *Canningia?*, thirdly (and now) *Circulodinium?*. Questionable assignment: He Chengquan et al. (2009, p.271). Age: Early Tertiary.

paucispinum (Davey, 1969a, p.170, pl.9, figs.1–2) Fauconnier in Fauconnier and Masure, 2004, p.115. Holotype: Davey, 1969a, pl.9, fig.1; pl.14, figs.5–6; Fauconnier and Masure, 2004, pl.14, figs.5–6. Originally *Cyclonephelium*, subsequently (and now) *Circulodinium*. Age: Cenomanian.

pentagonum (He Chengquan, 1991, p.56, pl.9, figs.13–14) He Chengquan et al., 2009, p.272. Holotype: He Chengquan, 1991, pl.9, fig.13. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: Late Cretaceous.

"*spinosum*" (Boltenhagen, 1977, p.54–55, pl.7, figs.1a–b,2,3a–b,4a–b,5a–b) Islam, 1993, p.83. Emendation: Masure in Fauconnier and Masure, 2004, p.116–117, as *Trichodinium boltenhagenii*. Holotype: Boltenhagen, 1977, pl.7, figs.1a–b; Fauconnier and Masure, 2004, pl.15, fig.6. **NOW** *Trichodinium boltenhagenii*. Originally *Chytroeisphaeridia spinosa*, subsequently *Cleistosphaeridium? spinosum*, thirdly *Circulodinium spinosum*, fourthly (and now) *Trichodinium boltenhagenii*. Age: Cenomanian–Turonian.

vermiculatum Stover and Helby, 1987c, p.230, figs.4A–M. Holotype: Stover and Helby, 1987c, figs.4C–D; Fensome et al., 1996, figs.2–3 — p.2427. Age: late Hauterivian–Barremian.

wulagenense (He Chengquan, 1991, p.57, pl.9, fig.16) He Chengquan et al., 2009, p.272. Holotype: He Chengquan, 1991, pl.9, fig.16. Originally *Canningia*, subsequently (and now) *Circulodinium*. Age: Late Cretaceous.

CIRRUSPHAERA Monteil, 1992a, p.277. Type: Monteil, 1992a, pl.2, figs.1–9, as *Cirrusphaera dissimilis*.

**dissimilis* Monteil, 1992a, p.277, pl.2, figs.1–12. Holotype: Monteil, 1992a, pl.2, figs.1–9; Fauconnier and Masure, 2004, pl.16, figs.1–3. Age: middle-late Berriasian.

CLADOPYXIDIUM McLean, 1972, p.862. Emendations: Stover and Evitt, 1978, p.29–30; Below, 1987b, p.32–33. Taxonomic senior synonym: *Palaeostomocystis*, by implication in Marheinecke (1992, p.105) who transferred the "type species" of *Palaeostomocystis*, *Palaeostomocystis reticulata*, to *Cladopyxidium* — however, Lentin and Williams (1993, p.107) retained *Cladopyxidium*. Type: McLean, 1972, pl.1, figs.5–8, as *Cladopyxidium septatum*.

exilimuratum Schumacker-Lambry, 1978, p.37, pl.2, figs.5–8. Holotype: Schumacker-Lambry, 1978, pl.2, figs.5–6. Originally (and now) *Cladopyxidium*, subsequently *Phanerodinium*. Lentin and Williams (1989, p.64) retained this species in *Cladopyxidium*. Age: late Paleocene (Landenian).

foveolatum McMinn, 1988, p.148–150, figs.5A–F,6A–B. Emendation: Marheinecke, 1992, p.105. Holotype: McMinn, 1988, figs.5A,C,E; Fensome et al., 1996, figs.1–3 — p.2131. Age: Maastrichtian.

globosum Marheinecke, 1992, p.104–105, pl.22, figs.1–2. Holotype: Marheinecke, 1992, pl.22, figs.1–2. Contrary to the opinion of Lentin and Williams (1993, p.107), Williams et al. (1998, p.118) considered this name to be validly published. Age: late Maastrichtian.

?**halebayense** Slimani, 1994, p.10–11, pl.1, figs.1–4,21–23. Holotype: Slimani, 1994, pl.1, figs.3–4,23. Questionable assignment: Slimani (1994, p.10). Age: late Maastrichtian.

marheinecke Williams et al., 1998, p.118. Holotype: Marheinecke, 1992, pl.21, figs.8–10, as *Cladopyxidium velatum*. Originally *Cladopyxidium velatum* Marheinecke, subsequently (and now) *Cladopyxidium marheinecke*. This is the substitute name for *Cladopyxidium velatum* Marheinecke 1992, p.104, pl.21, figs.8–10; pl.22, figs.13–15 (an illegitimate name). Age: late Maastrichtian.

paucireticulatum Slimani, 1994, p.11–12, pl.1, figs.14–15,28–30. Holotype: Slimani, 1994, pl.1, figs.14–15,28–29. Age: early–late Maastrichtian.

"**reticulatum**" (Deflandre, 1937b, p.53–54, pl.12 [al. pl.9], figs.4–5) Marheinecke, 1992, p.105. Emendation: Marheinecke, 1992, p.105–106, as *Cladopyxidium reticulatum*. Holotype: Deflandre, 1935, pl.9, fig.13; Deflandre, 1936a, fig.133; Deflandre, 1937b, pl.12 (al. pl.9), fig.4. **Combination illegitimate**: this is the "type species" of the genus *Palaeostomocystis*, which is senior to *Cladopyxidium*. **NOW** *Palaeostomocystis* (Appendix A). Originally (and now) *Palaeostomocystis* (Appendix A), subsequently *Cladopyxidium*. Lentin and Williams (1993, p.107) retained this species in *Palaeostomocystis*. Age: Late Cretaceous.

+**saeptum** (Morgenroth, 1968, p.536–537, pl.41, figs.7–9; pl.42, fig.1) Stover and Evitt, 1978, p.30. Holotype: Morgenroth, 1968, pl.41, fig.7; Eisenack and Kjellström, 1971, p.516a; Fensome et al., 1995, fig.1 — p.1755. Originally *Microdinium*, subsequently (and now) *Cladopyxidium*. Taxonomic junior synonyms: *Microdinium robustum* and *Cladopyxidium septatum*, both according to Stover and Evitt (1978, p.30). The nomenclatural type of the genus *Cladopyxidium* remains the holotype of *Cladopyxidium septatum*. Age: Danian.

"***septatum**" McLean, 1972, p.862–863, pl.1, figs.1–3,5–8,10–12. Holotype: McLean, 1972, pl.1, figs.5–8; Fensome et al., 1995, figs.4–6,9 — p.1779. **Taxonomic senior synonym**: *Cladopyxidium saeptum*, according to Stover and Evitt (1978, p.30). The nomenclatural type of the genus *Cladopyxidium* remains the holotype of *Cladopyxidium septatum*. Age: late Paleocene.

septocrispum Below, 1987b, p.33–34, pl.18, figs.6–10,12–13,15. Holotype: Below, 1987b, pl.18, fig.6; Fensome et al., 1993a, fig.1 — p.1333. Age: late Maastrichtian.

svalbardense (Below, 1987b, p.60, pl.29, figs.1–6; text-figs.13a–g) Lentin and Williams, 1989, p.64. Holotype: Below, 1987b, pl.29, figs.1,3–4,6; text-figs.13c–g; Fensome et al., 1993a, figs.1,3–4,6 — p.1361. Originally *Cladopyxis* (Appendix B), subsequently (and now) *Cladopyxidium*. Age: Toarcian.

velatum Below, 1987b, p.34–36, pl.18, figs.1–5,11,14,16; text-figs.9a–f. Holotype: Below, 1987b, pl.18, figs.1–3; Fensome et al., 1993a, figs.1–3 — p.1369. Junior homonym: *Cladopyxidium velatum* Marheinecke, 1992. Age: late Maastrichtian.

"**velatum**" Marheinecke, 1992, p.104, pl.21, figs.8–10; pl.22, figs.13–15. Holotype: Marheinecke, 1992, pl.21, figs.8–10. **Name illegitimate** — **senior homonym**: *Cladopyxidium velatum* Below, 1987b. **Substitute name**: *Cladopyxidium marheinecke*. Originally *Cladopyxidium velatum* Marheinecke (name illegitimate), subsequently (and now) *Cladopyxidium marheinecke*. Age: late Maastrichtian.

verrucosum Marheinecke, 1992, p.103, pl.22, figs.5–8,12. Holotype: Marheinecke, 1992, pl.22, figs.7–8,12. Contrary to the opinion of Lentin and Williams (1993, p.108), Williams et al. (1998, p.118) considered this name to be validly published. Age: early Maastrichtian.

CLATHROCTENOCYSTIS Wiggins, 1972, p.302–303. Type: Wiggins, 1972, pl.2, figs.A–C, as *Clathroctenocystis elegans*.

asaphes (Drugg, 1978, p.63–64, pl.2, figs.8–10) Stover and Helby, 1987d, p.277. Holotype: Drugg, 1978, pl.2, fig.8. Originally *Belodinium*, subsequently (and now) *Clathroctenocystis*. The epithet is based on a Greek adjective that has the same Latinized ending for all three genders (J. Jansonius, personal communication). Age: early Oxfordian.

calabaza Stevens and Helby, 1987, p.170–172, figs.6A–F,7A–H. Holotype: Stevens and Helby, 1987, figs.7A–C; Fensome et al., 1996, figs.1–3 — p.2077. N.I.A. Age: early Berriasian.

***elegans** Wiggins, 1972, p.303–304, pl.2, figs.A–C; pl.3, figs.A–D; text-fig.3. Holotype: Wiggins, 1972, pl.2, figs.A–C. Age: Neocomian, ?Valanginian or early Hauterivian.

"**obsoleta**" (Dodekova, 1975, p.23–24, pl.4, figs.1–12; text-fig.5) Stover and Helby, 1987d, p.277. Holotype: Dodekova, 1975, pl.4, figs.1–4. **NOW** *Belodinium*. Originally (and now) *Belodinium*, subsequently *Clathroctenocystis*. Age: late Bathonian.

CLEISTOSPHAERIDIUM Davey et al., 1966, p.166. Emendation: Eaton et al., 2001, p.176. Taxonomic senior synonym: *Systematophora*, according to Islam (1993, p.88) — however, Eaton et al. (2001, p.176) retained *Cleistosphaeridium*. Taxonomic junior synonym: *Laticavodinium*, according to Stover and Williams (1987, p.145) — however, *Laticavodinium* is now considered to be a taxonomic junior synonym of *Impletosphaeridium*. Type: Davey et al., 1966, pl.10, fig.7, as *Cleistosphaeridium diversispinosum*.

"**aciculare**" Davey, 1969a, p.158, pl.6, figs.11–12. Holotype: Davey, 1969a, pl.6, figs.11–12; Fauconnier and Masure, 2004, pl.23, fig.9. **NOW** *Downiesphaeridium?*. Originally *Cleistosphaeridium*, subsequently *Downiesphaeridium*, thirdly (and now) *Downiesphaeridium?*. Questionable assignment: Davey (1969a, p.158). Age: Albian–Cenomanian.

"**actinocoronatum**" Benedek, 1972, p.34, pl.12, fig.13; text-fig.13. Emendation: Bujak and Matsuoka, 1986, p.238–239, as *Reticulosphaera actinocoronata*. Holotype: Benedek, 1972, pl.12, fig.13; Benedek and Sarjeant, 1981, fig.10, no.5; text-fig.11; Sarjeant et al., 1987, pl.2, fig.4; Fensome et al., 1993a, fig.1 — p.879. **NOW** *Reticulosphaera*. Originally *Cleistosphaeridium*, subsequently *Areosphaeridium?*, thirdly (and now) *Reticulosphaera*. Taxonomic junior synonym: *Reticulosphaera stellata*, according to Bujak and Matsuoka (1986, p.238). Age: middle-late Oligocene.

"**ambiguum**" (Deflandre, 1937b, p.81, pl.16 [al. pl.13], figs.8–9) Jiabo, 1978, p.60. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), fig.8; Fauconnier and Masure, 2004, pl.71, figs.6–7. **NOW** *Sepispinula?*. Originally *Micrhystridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Polysphaeridium*, fourthly *Chlamydophorella*, fifthly *Dapsilidinium*, sixthly *Gorgonisphaeridium* (Appendix A), seventhly (and now) *Sepispinula?*. Taxonomic junior synonyms: *Hystrichosphaeridium* (now *Sepispinula?*) *huguoniotii*, according to Clarke and Verdier (1967, p.54) and *Hystrichosphaeridium* (now *Sepispinula*) *ancoriferum*, both according to Yun Hyesu (1981, p.44) and Schiøler and Wilson (1998, p.328) — however, Masure in Fauconnier and Masure (2004, p.499–500) retained *Sepispinula ancorifera* and *Sepispinula? huguoniotii*. Age: Late Cretaceous.

"**ancoriferum**" (Cookson and Eisenack, 1960a, p.8, pl.2, fig.11) Davey et al., 1966, p.167. Emendation: Cookson and Eisenack, 1968, p.119–120, as *Cleistosphaeridium ancoriferum*. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.11. **NOW** *Sepispinula*. Originally *Hystrichosphaeridium*, subsequently *Cleistosphaeridium*, thirdly (and now) *Sepispinula*. Taxonomic senior synonym: *Micrhystridium* (as *Polysphaeridium*, now *Sepispinula?*) *ambiguum*, according to Yun Hyesu (1981, p.44) and Schiøler and Wilson (1998, p.328) — however, Masure in Fauconnier and Masure (2004, p.499) retained *Sepispinula ancorifera*. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Sepispinula?*) *huguoniotii*, according to Clarke and Verdier (1967, p.54) — however, Masure in Fauconnier and Masure (2004, p.499) retained *Sepispinula ancorifera*. Age: Albian–Cenomanian.

ancyreum (Cookson and Eisenack, 1965a, p.126, pl.14, figs.1–3) Eaton et al., 2001, p.191. Holotype: Cookson and Eisenack, 1965a, pl.14, fig.1; Fauconnier and Masure, 2004, pl.76, figs.1–3. Originally *Systematophora ancyrea*, subsequently *Systematophora placacantha* var. *ancyrea* (combination not validly published), thirdly (and now)

Cleistosphaeridium ancyreum. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Cleistosphaeridium*) *placacanthum*, according to Stover and Evitt (1978, p.84) — however, Lentin and Williams (1981, p.272) retained *Systematophora ancyrea*. Age: late Eocene.

"**araneosum**" Brideaux, 1977, p.22–23, pl.9, figs.1–3. Holotype: Brideaux, 1977, pl.9, figs.1–2. **NOW** *Circulodinium?*. Originally *Cleistosphaeridium*, subsequently *Heterosphaeridium*, thirdly (and now) *Circulodinium?*. Age: Aptian–Albian.

"**armatum**" (Deflandre, 1937b, p.76–77, pl.16 (al. pl.13), figs.6–7) Davey, 1969a, p.153. Emendation: Davey, 1969a, p.153, as *Cleistosphaeridium armatum*. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), fig.6; Fauconnier and Masure, 2004, pl.23, figs.1–3. **NOW** *Downiesphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly (and now) *Downiesphaeridium*. Age: late Senonian.

"**ashdodense**" (Rossignol, 1962, p.132, pl.2, fig.2) Davey et al., 1969, p.15. Holotype: Rossignol, 1962, pl.2, fig.2. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*. **Taxonomic senior synonym:** *Lingulodinium machaerophorum*, according to Wall (1967, p.109). This combination was not validly published in Davey et al. (1966, p.170), since these authors did not fully reference the basionym. Age: Pleistocene.

"**australe**" Burger, 1980b, p.268–269, figs.5C–D,6A. Emendation: Fauconnier in Fauconnier and Masure, 2004, p.116, as *Trichodinium australe*. Holotype: Burger, 1980b, fig.5D; Fauconnier and Masure, 2004, pl.15, figs.3–5. **NOW** *Trichodinium*. Originally *Cleistosphaeridium*, subsequently *Circulodinium*, thirdly (and now) *Trichodinium*. Age: Neocomian.

"**baculatum**" He Chengquan and Li Peng, 1981, p.62, pl.34, figs.21–22. Holotype: He Chengquan and Li Peng, 1981, pl.34, fig.21; Fauconnier and Masure, 2004, pl.4, fig.7. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: late Oligocene.

"**?bahiaense**" (Regali et al., 1974, p.289–290, pl.23, fig.5) Lentin and Williams, 1981, p.47. Holotype: Regali et al., 1974, pl.23, fig.5. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Cleistosphaeridium?*, thirdly *Impletosphaeridium?*, fourthly (and now) *Operculodinium*. Questionable assignment: Lentin and Williams (1981, p.47). Age: Eocene–Oligocene.

"**bergmannii**" Archangelsky, 1969a, p.414–415, pl.2, figs.8,11. Holotype: Archangelsky, 1969a, pl.2, fig.11. **NOW** *Lingulodinium*. Originally *Cleistosphaeridium*, subsequently *Operculodinium*, thirdly *Downiesphaeridium*, fourthly (and now) *Lingulodinium*. Taxonomic junior synonyms: *Solisphaeridium filamentosum* (Appendix A) and *Impletosphaeridium charrieri*, both according to Quattrocchio and Sarjeant (2003, p.142). Age: Eocene.

"**?bifide**" (Jiabo, 1978, p.51–52, pl.22, figs.7–16) Lentin and Williams, 1981, p.48. Holotype: Jiabo, 1978, pl.22, fig.8. **NOW** *Sentusidinium*. Originally *Tenua* Eisenack, subsequently *Cleistosphaeridium?*, thirdly (and now) *Sentusidinium*. Questionable assignment: Lentin and Williams (1981, p.48). Age: Early Tertiary.

"**bifurcatum**" Jiabo, 1978, p.60–61, pl.20, figs.11–12. Holotype: Jiabo, 1978, pl.20, fig.11. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Early Tertiary.

"**brevibaculum**" Song Zhichen in Song Zhichen et al., 1985, p.31, pl.4, fig.10. Holotype: Song Zhichen et al., 1985, pl.4, fig.10. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Cenozoic.

"**?brevispinosum**" Jain and Millepied, 1975, p.150, pl.5, figs.80–82. Holotype: Jain and Millepied, 1975, pl.5, figs.80–81. **NOW** *Sentusidinium? millepiedii*. Originally *Cleistosphaeridium? brevispinosum*, subsequently *Sentusidinium brevispinosum* (combination illegitimate), thirdly *Sentusidinium? brevispinosum* (combination illegitimate), fourthly (and now) *Sentusidinium? millepiedii*. Questionable assignment: Stover and Evitt (1978, p.31). Age: Aptian.

"**bulbum**" Yu Jingxian, 1989, p.140, pl.51, figs.8–9. Holotype: Yu Jingxian, 1989, pl.51, fig.8. **NOW** *Downiesphaeridium?*. Originally *Cleistosphaeridium*, subsequently *Downiesphaeridium*, thirdly (and now) *Downiesphaeridium?*. Age: Eocene.

"**centrocarpum**" (Deflandre and Cookson, 1955, p.272–273, pl.8, figs.3–4) Jiabo, 1978, p.61. Holotype: Deflandre and Cookson, 1955, pl.8, figs.3–4; Matsuoka et al., 1997, pl.1, figs.1–6. **NOW** *Operculodinium centrocarpum*. Originally *Hystrichosphaeridium centrocarpum*, subsequently *Baltisphaeridium centrocarpum* (Appendix A), thirdly *Cordosphaeridium centrocarpum*, fourthly *Cordosphaeridium tiara* subsp. *centrocarpum*, fifthly (and now) *Operculodinium centrocarpum*, sixthly *Cordosphaeridium microtriainum* subsp. *centrocarpum*, seventhly *Cleistosphaeridium centrocarpum*. Taxonomic junior synonyms: *Operculodinium? echigoense*, according to Matsuoka et al. (1997, p.22); *Membranilarnacia delicata*, according to Jain (1980, p.140). Motile equivalent: *Peridinium* (now *Protoceratium*) *reticulatum* Claparède and Lachmann, 1859 (as *Gonyaulax grindleyi* Reinecke, 1967), according to Wall and Dale (1966, p.1025–1026) — however, see Head (1996b, p.1211). Age: Miocene.

"**cephalum**" Kar, 1985, p.181, pl.40, figs.1–2; pl.41, fig.1. Holotype: Kar, 1985, pl.40, fig.1. **Taxonomic senior synonym:** *Baltisphaeridium* (as *Operculodinium*) *israelianum*, according to Jain and Garg (1991, p.78). Age: early Eocene.

"**clavulum**" (Davey, 1969a, p.154–155, pl.6, figs.9–10) Below, 1982c, p.15. Holotype: Davey, 1969a, pl.6, fig.9; Fauconnier and Masure, 2004, pl.50, fig.1. **NOW** *Impletosphaeridium? clavulum*. Originally *Cleistosphaeridium polypes* var. *clavulum*, subsequently *Cleistosphaeridium polypes* subsp. *clavulum*, thirdly *Impletosphaeridium polypes* subsp. *clavulum*, fourthly *Bacchidinium polypes* subsp. *clavulum*, fifthly *Cleistosphaeridium clavulum*, sixthly *Impletosphaeridium clavulum*, seventhly (and now) *Impletosphaeridium? clavulum*. Age: Cenomanian.

"**commixtum**" Jiabo, 1978, p.61–62, pl.21, figs.3–5. Holotype: Jiabo, 1978, pl.21, fig.3. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Early Tertiary.

"**danicum**" (Wetzel, 1952, p.396–397, pl.A, figs.5–6; text-fig.8) Davey et al., 1969, p.15. Emendation: Sarjeant, 1984c, p.129–130, as *Achomosphaera danica*. Holotype: Wetzel, 1952, pl.A, fig.6; Dietz et al., 1999, text-fig.6b. **NOW** *Achomosphaera*. Originally *Areoligera*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichosphaeridium*, fourthly *Cleistosphaeridium?*, fifthly (and now) *Achomosphaera*. Questionable assignment: Davey et al. (1969, p.15). Taxonomic senior synonym: *Areoligera senonensis*, according to Lejeune-Carpentier and Sarjeant (1981, p.15) — however, Sarjeant (1984c, p.130) retained *Cleistosphaeridium* (as *Achomosphaera*) *danicum*. This combination was not validly published in Davey et al. (1966, p.170), since those authors did not fully reference the basionym. Age: Paleocene.

"**deflandrei**" Courtinat, 1989, p.166, pl.12, fig.5; pl.13, fig.12. Holotype: Deflandre, 1939a, pl.10, fig.9; Deflandre, 1947c, fig.1, no.5. **Name illegitimate** — **nomenclatural senior synonym:** *Hystrichosphaeridium* (now *Impletosphaeridium*) *ehrenbergii*, which has the same type. Courtinat (1989, p.166) erected the species *Cleistosphaeridium deflandrei* and designated as holotype the specimen illustrated in Deflandre (1939a, pl.10, fig.9) and Deflandre (1947c, fig.1, no.5). This is the only specimen of *Hystrichosphaeridium ehrenbergii* illustrated by Deflandre (1947c) when he erected that species, and which thus must be considered its holotype. Courtinat (1989, p.166) considered *Hystrichosphaeridium ehrenbergii* to be not validly published, since Deflandre (1947c) did not give a diagnosis or designate a holotype. I.C.N. Article 40.1 implies that designation of a holotype was not required before 1958. Also, according to I.C.N. Article 38.1), "In order to be validly published, a name of a new taxon ... must ... be accompanied by a description or diagnosis ... or ... by a reference to a previously and effectively published description or diagnosis ...". Deflandre (1947c, fig.1, no.5) referred to "*H. cf. hirsutum* (Ehr.) Defl. 1938", this reference including a description by Deflandre (1939a, p.191). Hence, *Hystrichosphaeridium ehrenbergii* must be regarded as having been validly published by Deflandre (1947c); consequently *Cleistosphaeridium deflandrei* is an illegitimate name. Age: Jurassic.

"**digitale**" He Chengquan, 1991, p.141, pl.25, figs.14–16; text-fig.26. Holotype: He Chengquan, 1991, pl.25, fig.14. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: early Eocene.

"disjunctum" Davey et al., 1966, p.169–170, pl.11, fig.9. Holotype: Davey et al., 1966, pl.11, fig.9; Bujak et al., 1980, pl.8, figs.1–2. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as *Lingulodinium*) *machaerophorum*, according to Reid (1974, p.591). Age: early Eocene.

***diversispinosum** Davey et al., 1966, p.167, pl.10, fig.7. Emendation: Eaton et al., 2001, p.177. Holotype: Davey et al., 1966, pl.10, fig.7; Bujak et al., 1980, pl.7, figs.7–8; Islam, 1993, pl.1, figs.1–10; text-figs.1A–B; Eaton et al., 2001, figs.1A–B, 2A–B; Fauconnier and Masure, 2004, pl.77, fig.9. Originally (and now) *Cleistosphaeridium*, subsequently *Systematophora*. Eaton et al. (2001, p.177) retained this species in *Cleistosphaeridium*. Taxonomic junior synonym: *Areosphaeridium polypetellum*, according to Islam (1993, p.88) — however, Eaton et al. (2001, p.194) retained *Cleistosphaeridium polypetellum*. Age: early Eocene.

"echinoides" (Maier, 1959, p.318–319, pl.32, figs.5–6) Davey et al., 1969, p.15. Holotype: Maier, 1959, pl.32, fig.6. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*. **Taxonomic senior synonym:** *Xanthidium* (as *Spiniferites*) *ramosum*, according to Sarjeant (1983, p.91–92). This combination was not validly published in Davey et al. (1966, p.170), since these authors did not fully reference the basionym. Age: middle Oligocene–middle Miocene.

"?ehrenbergii" (Deflandre, 1947c, fig.1, no.5) Davey et al., 1969, p.16. Emendation: Masure in Fauconnier and Masure, 2004, p.337–338, as *Impletosphaeridium ehrenbergii*. Holotype: Deflandre, 1939a, pl.10, fig.9, as *Hystrichosphaeridium* cf. *hirsutum*; Deflandre, 1947c, fig.1, no.5; Fauconnier and Masure, 2004, pl.48, figs.9,11. **NOW** *Impletosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Cleistosphaeridium?*, fifthly (and now) *Impletosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.32) as a problematic species. For a full discussion see *Impletosphaeridium ehrenbergii*. Age: Oxfordian.

"elegans" He Chengquan, 1991, p.141–142, pl.24, figs.5–6; text-fig.27. Holotype: He Chengquan, 1991, pl.24, fig.5. **Name illegitimate** — **senior homonym:** *Cleistosphaeridium elegans* He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989. **Substitute name:** *Cleistosphaeridium xinjiangense*. **NOW** *Impletosphaeridium xinjiangense*. Originally *Cleistosphaeridium elegans* He Chengquan, 1991 (name illegitimate), subsequently *Cleistosphaeridium xinjiangense*, thirdly (and now) *Impletosphaeridium xinjiangense*. Age: Paleocene.

"elegans" He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989, p.43, pl.18, figs.1–4. Holotype: He Chengquan et al., 1989, pl.18, fig.1. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Junior homonym: *Cleistosphaeridium elegans* He Chengquan, 1991. Age: Early Tertiary.

"eocenicum" Mehrotra and Sah, 1982, p.129, pl.3, fig.8. **Name not validly published:** no description. Age: Eocene.

"?erectum" (Manum and Cookson, 1964, p.14, pl.3, figs.5–6) Stover and Evitt, 1978, p.31. Holotype: Manum and Cookson, 1964, pl.3, fig.5. **NOW** *Kiokansium?*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cordosphaeridium?*, fourthly *Cleistosphaeridium?*, fifthly (and now) *Kiokansium?*. Questionable assignment: Stover and Evitt (1978, p.31). Age: Albion–Turonian.

"flexuosum" Davey et al., 1966, p.169, pl.2, fig.5. Emendation: Sarkar and Singh, 1988, p.39, as *Cleistosphaeridium flexuosum*. Holotype: Davey et al., 1966, pl.2, fig.5; Fauconnier and Masure, 2004, pl.23, fig.8. **NOW** *Downiesphaeridium*. Originally *Cleistosphaeridium?*, subsequently *Polysphaeridium?*, thirdly *Cleistosphaeridium*, fourthly (and now) *Downiesphaeridium*. Questionable assignment: Davey et al. (1966, p.169) — however, Sarkar and Singh (1988, p.39) included the species in *Cleistosphaeridium* without question. Age: Cenomanian.

"fungosum" Harding, 1990b, p.43–44, pl.25, figs.1–9. Holotype: Harding, 1990b, pl.25, fig.1. **Name not validly published:** lodgement of holotype not specified (I.C.N. Article 40.7). **NOW** *Sentusidinium*. Originally *Cleistosphaeridium* (name not validly published), subsequently (and now) *Sentusidinium*. Age: early Barremian.

"*furcillatum*" Prössl, 1990, p.100, pl.7, figs.12,14 ex Prössl, 1992b, p.113–114. Holotype: Prössl, 1990, pl.7, figs.12,14; Fauconnier and Masure, 2004, pl.49, figs.1–2. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. This name was not validly published in Prössl (1990, p.100), since that author did not specify the lodgment of the holotype. Age: Hauterivian–early Barremian.

"*garampaniense*" Mehrotra and Sah, 1982, p.129, pl.3, fig.9. **Name not validly published**: no description. Age: Eocene.

"*giganteum*" (Caro, 1973, p.360–361, pl.2, fig.12) Stover and Evitt, 1978, p.31. Holotype: Caro, 1973, pl.2, fig.12; Fauconnier and Masure, 2004, pl.49, figs.13–14. **NOW** *Exochosphaeridium*. Originally *Polysphaeridium*, subsequently *Cleistosphaeridium*, thirdly *Impletosphaeridium*, fourthly (and now) *Exochosphaeridium*. Age: early Eocene.

"*granulatum*" Burger, 1980a, p.77, pl.33, figs.2–4,6–10. Holotype: Burger, 1980a, pl.33, fig.2; Fauconnier and Masure, 2004, pl.49, figs.3–4. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Albian.

"*hallembayense*" Wilson in Slimani, 2001a, p.193. **Name not validly published**: no description. **Taxonomic senior synonym**: *Pervosphaeridium elegans*, according to Slimani (2001a, p.193).

"*heteracanthum*" (Deflandre and Cookson, 1955, p.276, pl.2, figs.5–6; text-figs.40–41) Davey et al., 1966, p.168. Emendation: Radmacher et al., 2014, p.33,36, as *Heterosphaeridium heteracanthum*. Holotype: Deflandre and Cookson, 1955, pl.2, fig.5; Fauconnier and Masure, 2004, pl.35, figs.7–8. **NOW** *Heterosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly (and now) *Heterosphaeridium*, fifthly *Heterosphaeridium?* Age: Late Cretaceous–early Eocene.

"*huguoniotii*" (Valensi, 1955a, p.38–39, text-fig.2a) Davey, 1969a, p.155–156. Holotype: Valensi, 1955a, text-fig.2a; Fauconnier and Masure, 2004, pl.72, figs.1–3. **NOW** *Sepispinula?*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Cleistosphaeridium?*, fifthly *Chlamydophorella*, sixthly *Sepispinula*, seventhly (and now) *Sepispinula?*. Questionable assignment: Stover and Evitt (1978, p.32) as a problematic species. Taxonomic senior synonym: *Micrhystridium* (as *Polysphaeridium*, now *Sepispinula?*) *ambiguum*, according to Yun Hyesu (1981, p.44) and Schiøler and Wilson (1998, p.328) — however, Masure in Fauconnier and Masure (2004, p.500) retained *Hystrichosphaeridium* (as and now *Sepispinula?*) *huguoniotii*. Taxonomic junior synonym: *Hystrichosphaeridium* (subsequently *Sepispinula*) *ancoriferum*, according to Clarke and Verdier (1967, p.54) — however, Masure in Fauconnier and Masure (2004, p.499) retained *Hystrichosphaeridium* (as and now *Sepispinula*) *ancoriferum*. Age: Late Cretaceous.

"subsp. *huguoniotii*". Autonym. Holotype: Valensi, 1955a, text-fig.2a; Fauconnier and Masure, 2004, pl.72, figs.1–3. **Now redundant**. Originally *Cleistosphaeridium huguoniotii* subsp. *huguoniotii*, subsequently *Cleistosphaeridium? huguoniotii* subsp. *huguoniotii*, thirdly *Sepispinula huguoniotii* subsp. *huguoniotii*.

"var. *huguoniotii*". Autonym. Holotype: Valensi, 1955a, text-fig.2a. **Now redundant**.

"subsp. *pertusum*" (Davey, 1969a, p.156–157, pl.7, figs.6–7,9) Lentin and Williams, 1973, p.28. Holotype: Davey, 1969a, pl.7, fig.7. **NOW** *Sepispinula pertusa*. Originally *Cleistosphaeridium huguoniotii* var. *pertusum*, subsequently *Cleistosphaeridium huguoniotii* subsp. *pertusum*, thirdly *Cleistosphaeridium? huguoniotii* subsp. *pertusum*, fourthly *Dapsilidinium ambiguum* subsp. *pertusum*, fifthly *Sepispinula huguoniotii* subsp. *pertusa*, sixthly (and now) *Sepispinula pertusa*. Age: late Cenomanian.

"var. *pertusum*" Davey, 1969a, p.156–157, pl.7, figs.6–7,9. Holotype: Davey, 1969a, pl.7, fig.7. **NOW** *Sepispinula pertusa*. Originally *Cleistosphaeridium huguoniotii* var. *pertusum*, subsequently *Cleistosphaeridium huguoniotii* subsp. *pertusum*, thirdly *Cleistosphaeridium? huguoniotii* subsp. *pertusum*,

fourthly *Dapsilidinium ambiguum* subsp. *pertusum*, fifthly *Sepispinula huguoniotii* subsp. *pertusa*, sixthly (and now) *Sepispinula pertusa*. Age: late Cenomanian.

"iaculigerum" (Klement, 1960, p.57–58, pl.7, fig.10) Brenner, 1988, p.42–43. Emendation: Sarjeant, 1984a, p.171, as *Operculodinium? iaculigerum*. Holotype: Klement, 1960, pl.7, fig.10; Sarjeant, 1984a, pl.2, fig.5; text-fig.7; Brenner, 1988, pl.14, fig.7; Fauconnier and Masure, 2004, pl.23, figs.4–5. **NOW** *Downiesphaeridium*. Originally *Baltisphaeridium* (Appendix A), subsequently *Operculodinium?*, thirdly *Cleistosphaeridium*, fourthly (and now) *Downiesphaeridium*. Taxonomic junior synonym: *Cleistosphaeridium? polyacanthum*, according to Brenner (1988, p.42) — however, Islam (1993, p.84) retained *Cleistosphaeridium?* (as *Downiesphaeridium*) *polyacanthum*. Age: middle Kimmeridgian.

"?insolitum" (Eaton, 1976, p.308, pl.21, figs.5,8; text-fig.25B) Stover and Evitt, 1978, p.31. Holotype: Eaton, 1976, pl.21, fig.5; Fauconnier and Masure, 2004, pl.49, figs.5–6. **NOW** *Impletosphaeridium*. Originally (and now) *Impletosphaeridium*, subsequently *Cleistosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.31). Age: early-middle Eocene (see Aubry, 1986).

"?israelianum" (Rossignol, 1962, p.132, pl.2, fig.3) Davey et al., 1966, p.170. Holotype: Rossignol, 1962, pl.2, fig.3. Combination not validly published: basionym not fully referenced. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium* (combination not validly published), fourthly (and now) *Operculodinium*, fifthly *Cordosphaeridium* (combination not validly published). Taxonomic junior synonyms: *Cleistosphaeridium cephalum*, according to Jain and Garg (1991, p.78); *Operculodinium crassum*, according to Edwards and Andrieu (1992, p.262) — however, Head (1996b, p.1231) retained *Operculodinium crassum*; and *Hystrichosphaeridium westii* (name not validly published), by implication in Wall and Dale (1968a, p.315, as "hystrichosphere type x of West"). Motile equivalent: *Peridinium* (now *Protoceratium*) *reticulatum* Claparède and Lachmann, 1859, questionably according to Wall and Dale (1968c, p.272), and without question according to Matsuoka (1989, p.224). Age: Pleistocene.

lacustre Köhler and Clausen, 2000, p.42–43, pl.1, figs.1–6, figs.3a–d. Holotype: Köhler and Clausen, 2000, pl.1, figs.1–2,4. Age: late Oligocene.

"laxabaculum" Song Zhichen in Song Zhichen et al., 1985, p.31–32, pl.4, fig.11. Holotype: Song Zhichen et al., 1985, pl.4, fig.11. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: ?early Pleistocene.

"leve" (Maier, 1959, p.308, pl.30, figs.1–2) Davey et al., 1969, p.16. Holotype: Maier, 1959, pl.30, fig.1; Sarjeant, 1983, pl.2, fig.3, pl.5, fig.1; text-fig.2. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*. **Taxonomic senior synonym:** *Galea* (now *Chiropteridium*) *galea*, according to Sarjeant (1983, p.108–109). This combination was not validly published in Davey et al. (1966, p.170), since these authors did not fully reference the basionym. Age: late Oligocene–middle Miocene.

"?lumectum" (Sarjeant, 1960a, p.139–140, pl.6, fig.1; text-fig.2) Davey et al., 1969, p.16. Holotype: Sarjeant, 1960a, pl.6, fig.1; text-fig.2. **NOW** *Impletosphaeridium*. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Cleistosphaeridium?*, fourthly (and now) *Impletosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.32) as a problematic species. This combination was not validly published in Davey et al. (1966, p.170), since these authors did not fully reference the basionym. Age: late Oxfordian.

"machaerophorum" (Deflandre and Cookson, 1955, p.274, pl.9, figs.4,8) Davey et al., 1966, p.170. Holotype: Deflandre and Cookson, 1955, pl.9, fig.4. **Combination not validly published:** basionym not fully referenced. **NOW** *Lingulodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium* (combination not validly published), fourthly (and now) *Lingulodinium*. Taxonomic junior synonyms: *Cleistosphaeridium disjunctum*, according to Reid (1974, p.591); *Cleistosphaeridium mikirii*, according to Jain and Garg (1983, p.61); *Hystrichosphaeridium ashdodense*, according to Wall (1967, p.109); *Baltisphaeridium* (subsequently *Lingulodinium*) *funginum*, *Lingulodinium brevispinosum* and *Lingulodinium sadoense*, all according to Kokinos and Anderson (1995, p.162); *Hystrichosphaeridium redonense*, questionably according to Harland (1977b, p.94) and according to Rochon et al. (1999, p.20). Motile equivalent: *Gonyaulax* (now *Lingulodinium*) *polyedra* Stein, 1883, according to Wall and Dale (1968c, p.271). Age: Miocene.

"*mediterraneum*" Corradini, 1973, p.137–138, pl.19, figs.5a–b; text-fig.4. Holotype: Corradini, 1973, text-fig.4. **NOW** *Pervosphaeridium*. Originally *Cleistosphaeridium*, subsequently *Impletosphaeridium*, thirdly (and now) *Pervosphaeridium*. Age: Senonian.

"*microcystum*" (Bujak in Bujak et al., 1980, p.88,90, pl.22, figs.2–5) Lentin and Williams, 1981, p.49. Holotype: Bujak et al., 1980, pl.22, figs.2–3; Fauconnier and Masure, 2004, pl.64, figs.4–5. **NOW** *Pilosidinium*. Originally *Tenua* Eisenack, subsequently *Cleistosphaeridium*, thirdly *Sentusidinium*, fourthly (and now) *Pilosidinium*. Age: middle Eocene (see Aubry, 1986).

"*mikirii*" Mehrotra, 1981, p.14–15, pl.1, figs.2–5. Holotype: Mehrotra, 1981, pl.1, fig.2. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as and now *Lingulodinium*) *machaerophorum*, according to Jain and Garg (1983, p.61). Mehrotra and Sah (1982, p.129) also proposed this name. Age: middle Eocene.

"*minus*" Jiabo, 1978, p.62, pl.20, figs.13–16. Holotype: Jiabo, 1978, pl.20, fig.16. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Early Tertiary.

"*mojsisovicsii*" Morbey, 1975, p.40, pl.15, figs.5a–b,6–9. Holotype: Morbey, 1975, pl.15, figs.5a–b. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Beaumontella*) *caminuspinum*, according to Below (1987a, p.70). Questionable assignment: Stover and Evitt (1978, p.31). Age: Rhaetian–Hettangian.

"*multifurcatum*" (Deflandre, 1937b, p.76, pl.16 [al. pl.13], figs.1–3) Davey et al., 1969, p.16. Emendation: Masure in Fauconnier and Masure, 2004, p.270, as *Exochosphaeridium multifurcatum*. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), figs.1–2; Fensome et al., 1991, figs.1–2 — p.691; fig.1 — p.693; Fensome et al., 1993a, fig.1 — p.1261; figs.1–2 — p.1265; Fauconnier and Masure, 2004, pl.37, figs.10–11. **NOW** *Exochosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Cleistosphaeridium?*, fifthly *Heterosphaeridium*, sixthly (and now) *Exochosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.31). This combination was not validly published in Davey et al. (1966, p.170), since these authors did not fully reference the basionym. Age: Late Cretaceous.

"subsp. *latoaculeum*" Yun Hyesu, 1981, p.42–43, pl.11, figs.17–19. Holotype: Yun Hyesu, 1981, pl.11, fig.18; Fensome et al., 1991, fig.2 — p.657; fig.2 — p.693 (mislabelled as *Cleistosphaeridium multifurcatum* subsp. *multifurcatum*); Fensome et al., 1993a, fig.2 — p.1261; Fauconnier and Masure, 2004, pl.35, figs.9–10. **NOW** *Circulodinium latoaculeum*. Originally *Cleistosphaeridium multifurcatum* subsp. *latoaculeum*, subsequently *Heterosphaeridium latoaculeum*, thirdly (and now) *Circulodinium latoaculeum*. Age: early Santonian.

"subsp. *multifurcatum*". Autonym. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), figs.1–2; Fensome et al., 1991, figs.1–2 — p.691; fig.1 — p.693; Fensome et al., 1993a, fig.1 — p.1261; figs.1–2 — p.1265. **Now redundant.**

"*multifurcillatum*" Prössl, 1990, p.100–101, pl.9, figs.2,8,11 ex Prössl, 1992b, p.113–114. Holotype: Prössl, 1990, pl.9, figs.8,11; Fauconnier and Masure, 2004, pl.49, figs.9–10. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. This name was not validly published in Prössl (1990, p.100–101), since that author did not specify the lodgment of the holotype. Age: early Hauterivian–late Barremian.

"*multispinosum*" (Singh, 1964, p.141–142, pl.20, figs.1–2) Brideaux, 1971, p.93. Holotype: Singh, 1964, pl.20, fig.1; Fauconnier and Masure, 2004, pl.23, fig.10. **NOW** *Cometodinium*. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Cleistosphaeridium?*, fourthly *Downiesphaeridium*, fifthly (and now) *Cometodinium*. Questionable assignment: Stover and Evitt (1978, p.31). Age: middle Albian–early Cenomanian.

"*nanus*" (Rozen, 1965, p.311, pl.2, figs.7–8; text-fig.21) Sarjeant, 1981, p.122. Holotype: Rozen, 1965, pl.2, figs.7–8. **NOW** *Impletosphaeridium nanus*. Originally *Cordosphaeridium microtriainum* var. *nanus*, subsequently *Cordosphaeridium microtriainum* subsp. *nanus*, thirdly *Cleistosphaeridium? nanus*, fourthly (and now) *Impletosphaeridium nanus*. Questionable assignment: Sarjeant (1981, p.122). N.I.A. Age: late Eocene.

"*nenjiangense*" Gao Ruiqi et al., 1992a, p.18,24, pl.3, figs.1–9; pl.4, figs.1–7. Holotype: Gao Ruiqi et al., 1992a, pl.3, fig.1. Originally *Cleistosphaeridium*, subsequently *Impletosphaeridium*, thirdly *Spicadinium* (Appendix A). **Taxonomic senior synonym:** *Spicadinium akidoton* (Appendix A), according to Mao Shaozhi et al. (1999, p.159). Age: Campanian.

"*oligacanthum*" (Wetzel, 1952, p.402–405, pl.A, figs.4,7–8,11a–b; text-figs.21–25) Davey et al., 1969, p.16. Emendation: Wilson and Sarjeant in Sarjeant, 1984c, p.128, as *Laticavodinium oligacanthum*. Holotype: Wetzel, 1952, pl.A, fig.8; Sarjeant, 1984c, pl.2, figs.4–5; text-fig.2; Fensome et al., 1995, figs.1–5 — p.1625; Dietz et al., 1999, text-fig.6g. **NOW** *Impletosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium?*, fourthly *Laticavodinium*, fifthly (and now) *Impletosphaeridium?*. Questionable assignment: Davey et al. (1969, p.16). This combination was not validly published in Davey et al. (1966, p.170), since these authors did not fully reference the basionym. Age: Danian.

"subsp. *complanatum*" (Wetzel, 1952, p.404–405, pl.A, figs.11a–b) Lentin and Williams, 1973, p.29. Emendation: Sarjeant, 1984c, p.142, as *Solisphaeridium stimulierum* subsp. *complanatum*. Holotype: Wetzel, 1952, pl.A, figs.11a–b; Sarjeant, 1984c, pl.4, fig.6; text-fig.13. **NOW** *Micrhystridium stimulierum?* subsp. *complanatum* (Appendix A). Originally *Hystrichosphaeridium oligacanthum* subsp. *complanatum*, subsequently *Baltisphaeridium oligacanthum* subsp. *complanatum* (Appendix A), thirdly *Cleistosphaeridium? oligacanthum* subsp. *complanatum*, fourthly *Solisphaeridium stimulierum* subsp. *complanatum* (Appendix A), fifthly (and now) *Micrhystridium stimulierum?* subsp. *complanatum* (Appendix A). Age: Paleocene.

"subsp. *granulatum*" (Wetzel, 1952, p.404, text-fig.25) Lentin and Williams, 1973, p.29. Emendation: Sarjeant, 1984c, p.136, as *Surculosphaeridium? granulatum*. Holotype: Wetzel, 1952, text-fig.25; Sarjeant, 1984c, pl.5, figs.1–3; text-fig.8. **NOW** *Surculosphaeridium? granulatum*. Originally *Hystrichosphaeridium oligacanthum* subsp. *granulatum*, subsequently *Baltisphaeridium oligacanthum* subsp. *granulatum* (Appendix A), thirdly *Cleistosphaeridium? oligacanthum* subsp. *granulatum*, fourthly (and now) *Surculosphaeridium? granulatum*. Age: Paleocene.

"subsp. *oligacanthum*". Autonym. Holotype: Wetzel, 1952, pl.A, fig.8; Sarjeant, 1984c, pl.2, figs.4–5; text-fig.2; Fensome et al., 1995, figs.1–5 — p.1625. **Now redundant.** Originally *Hystrichosphaeridium oligacanthum* subsp. *oligacanthum*, subsequently *Baltisphaeridium oligacanthum* subsp. *oligacanthum* (Appendix A), thirdly *Cleistosphaeridium? oligacanthum* subsp. *oligacanthum*.

"subsp. *stella*" (Wetzel, 1952, p.403, pl.A, fig.4; text-fig.23) Lentin and Williams, 1973, p.29. Emendation: Sarjeant, 1984c, p.135, as *Surculosphaeridium phoenix* subsp. *stella*. Holotype: Wetzel, 1952, pl.A, fig.4; Dietz et al. 1999, text-fig.6f. **NOW** *Surculosphaeridium? stella*. Originally *Hystrichosphaeridium oligacanthum* subsp. *stella*, subsequently *Baltisphaeridium oligacanthum* subsp. *stella* (Appendix A), thirdly *Cleistosphaeridium? oligacanthum* subsp. *stella*, fourthly *Surculosphaeridium? phoenix* subsp. *stella*, fifthly (and now) *Surculosphaeridium? stella*. N.I.A. Age: Paleocene.

"subsp. *velatum*" (Wetzel, 1952, p.403–404, pl.A, fig.7; text-fig.24) Lentin and Williams, 1973, p.29. Emendation: Sarjeant, 1984c, p.133, as *Cauca? velata*. Holotype: Wetzel, 1952, pl.A, fig.7; text-fig.24; Sarjeant, 1984c, pl.3, figs.4–6; text-fig.6. **NOW** *Cauca? velata*. Originally *Hystrichosphaeridium oligacanthum* subsp. *velatum*, subsequently *Baltisphaeridium oligacanthum* subsp. *velatum* (Appendix A), thirdly *Cleistosphaeridium? oligacanthum* subsp. *velatum*, fourthly (and now) *Cauca? velata*. Age: Paleocene.

"*panniforme*" (Gerlach, 1961, p.196–198, pl.28, fig.13) Stover and Evitt, 1978, p.31. Holotype: Gerlach, 1961, pl.28, fig.13. **NOW** *Impletosphaeridium*. Originally *Baltisphaeridium*, subsequently (and now) *Impletosphaeridium*, thirdly *Cleistosphaeridium*. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Cleistosphaeridium*) *placacanthum*, according to Sarjeant (1984b, p.86–87) — however, Eaton et al. (2001, p.191) retained *Baltisphaeridium* (as and now *Impletosphaeridium*) *panniforme*. Age: middle Oligocene.

"*panshanense*" Jiabo, 1978, p.63, pl.22, figs.1–6. Holotype: Jiabo, 1978, pl.22, fig.1. **NOW** *Sentusidinium*. Originally *Cleistosphaeridium*, subsequently (and now) *Sentusidinium*. Age: Early Tertiary.

"*parvum*" Davey, 1969a, p.157–158, pl.7, figs.11–12. Holotype: Davey, 1969a, pl.7, fig.11. **Taxonomic senior synonym:** *Palaeostomocystis* (as and now *Diacrocanthidium*) *echinulatum* (Appendix A), according to Bujak in Bujak et al. (1980, p.52). Age: early–late Cenomanian.

"*patagonicum*" Archangelsky, 1969b, p.200–201, pl.3, figs.9–10. Holotype: Archangelsky, 1969b, pl.3, figs.9–10. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently *Cleistosphaeridium?*, thirdly (and now) *Impletosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.32) as a problematic species. Age: Eocene.

"*paucifurcatum*" Cookson and Eisenack, 1982, p.39, pl.8, figs.5–6. Holotype: Cookson and Eisenack, 1982, pl.8, fig.5. **NOW** *Spiniferites?*. Originally *Cleistosphaeridium*, subsequently *Impletosphaeridium?*, thirdly (and now) *Spiniferites?*. Age: Paleocene.

"*pectiniforme*" (Gerlach, 1961, p.195–196, pl.28, fig.14; text-fig.18) Davey et al., 1969, p.16. Emendations: Sarjeant, 1984b, p.83–84,86, as *Areosphaeridium pectiniforme*; Stover and Williams, 1995, p.114, as *Enneadocysta pectiniformis*. Holotype: Gerlach, 1961, pl.28, fig.14; Sarjeant, 1984b, pl.1, fig.2; pl.4, fig.2; Fauconnier and Masure, 2004, pl.7, figs.4–5. **NOW** *Enneadocysta*. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Areosphaeridium?*, fourthly *Areosphaeridium*, fifthly (and now) *Enneadocysta*. Taxonomic junior synonym: *Areosphaeridium* (now *Enneadocysta*) *multicornutum*, according to Sarjeant (1984b, p.83–84,86) — however, Stover and Williams (1995, p.112) retained *Areosphaeridium* (as *Enneadocysta*) *multicornutum*. This combination was not validly published in Davey et al. (1966, p.170), since these authors did not fully reference the basionym. Age: middle Oligocene.

"*perforoconum*" Yun Hyesu, 1981, p.43, pl.15, figs.1–4. Holotype: Yun Hyesu, 1981, pl.15, fig.4; Fensome et al., 1991, fig.4 — p.707; Fauconnier and Masure, 2004, pl.70, figs.2–3. **NOW** *Sentusidinium*. Originally *Cleistosphaeridium*, subsequently (and now) *Sentusidinium*. Age: early Santonian.

"*pilosum*" (Ehrenberg, 1854, pl.37, section 8, fig.4) Davey et al., 1966, p.170. Emendation: Erkmen and Sarjeant, 1980, p.51, as *Sentusidinium pilosum*. Holotype: Ehrenberg, 1854, pl.37, section 8, fig.4. **Combination not validly published:** basionym not fully referenced. **NOW** *Barbatacysta pilosa*. Originally *Xanthidium pilosum* (Appendix A), subsequently *Hystrichosphaera pilosa* (combination not validly published), thirdly *Hystrichosphaeridium? pilosum*, fourthly *Baltisphaeridium pilosum* (Appendix A), fifthly *Ovum hispidum* subsp. *pilosum* (combination not validly published; Appendix A), sixthly *Cleistosphaeridium pilosum* (combination not validly published), seventhly *Tenua pilosa*, eighthly *Sentusidinium pilosum*, ninthly *Batiacasphaera pilosa*, tenthly (and now) *Barbatacysta pilosa*. Age: Oxfordian.

"*placacanthum*" (Deflandre and Cookson, 1955, p.276–277, pl.9, figs.1–3) Eaton et al., 2001, p.190. Emendation: May, 1980, p.68, as *Systematophora placacantha*. Holotype: Deflandre and Cookson, 1955, pl.9, figs.1–2; Fauconnier and Masure, 2004, pl.76, figs.14–16. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Impletosphaeridium*, fourthly *Systematophora*, fifthly (and now) *Cleistosphaeridium*. Taxonomic junior synonyms: *Baltisphaeridium* (now *Impletosphaeridium*) *panniforme*, according to Sarjeant (1984b, p.86–87) — however, Eaton et al. (2001, p.191) retained *Baltisphaeridium* (as and now *Impletosphaeridium*) *panniforme*; *Systematophora ancyrea*, according to Stover and Evitt (1978, p.84) — however, Lentin and Williams (1981, p.272) retained *Systematophora ancyrea*. Age: Miocene.

"*polyacanthum*" Gitmez, 1970, p.284–286, pl.12, fig.10; text-fig.22. Holotype: Gitmez, 1970, pl.12, fig.10; text-fig.22b; Fauconnier and Masure, 2004, pl.23, figs.6–7. Originally *Cleistosphaeridium*, subsequently *Cleistosphaeridium?*, thirdly *Downiesphaeridium*. Questionable assignment: Stover and Evitt (1978, p.31). **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Impletosphaeridium?*) *polytrichum*, according to Masure in Fauconnier and Masure (2004, p.196). Taxonomic senior synonym: *Baltisphaeridium* (as *Cleistosphaeridium*) *iaculigerum*, according to Brenner (1988, p.42) — however, neither Islam (1993, p.84), who retained *Downiesphaeridium polyacanthum*, nor Masure in Fauconnier and Masure (2004, p.196) followed this synonymy. Age: early Kimmeridgian.

"?*polyozum*" (Brosius, 1963, p.45, pl.1, fig.6; pl.6, fig.5; text-figs.2a–d) Stover and Evitt, 1978, p.31–32. Holotype: Brosius, 1963, pl.1, fig.6. **NOW** *Impletosphaeridium?*. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium?*, thirdly *Surculosphaeridium*, fourthly (and now) *Impletosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.31). For etymology, see under *Impletosphaeridium? polyozum*. Age: late Oligocene.

"*polypes*" (Cookson and Eisenack, 1962b, p.491–492, pl.4, figs.11–13) Davey, 1969a, p.154. Emendation: Duxbury, 1983, p.49, as *Kiokansium polypes*. Holotype: Cookson and Eisenack, 1962b, pl.4, figs.11–13; Fensome et al., 1996, figs.1–3 — p.2283. Originally *Hystrichosphaeridium recurvatum* subsp. *polypes*, subsequently *Polysphaeridium? polypes* (combination not validly published), thirdly *Cleistosphaeridium polypes*, fourthly *Bacchidinium polypes*, fifthly *Impletosphaeridium polypes*, sixthly *Kiokansium polypes*. **Taxonomic senior synonym** (at specific rank): *Hystrichosphaeridium* (as and now *Kiokansium*) *unituberculatum*, by implication in Duxbury (1983, p.49), who considered *Hystrichosphaeridium recurvatum* subsp. *polypes* (as *Kiokansium polypes*) to be the senior name. Taxonomic junior synonym: *Cleistosphaeridium? solidum*, according to Below (1982c, p.16). Age: Albian–Cenomanian.

"subsp. *clavulum*" (Davey, 1969a, p.154–155, pl.6, figs.9–10) Lentin and Williams, 1973, p.30. Holotype: Davey, 1969a, pl.6, fig.9; Fauconnier and Masure, 2004, pl.50, fig.1. **NOW** *Impletosphaeridium? clavulum*. Originally *Cleistosphaeridium polypes* var. *clavulum*, subsequently *Cleistosphaeridium polypes* subsp. *clavulum*, thirdly *Impletosphaeridium polypes* subsp. *clavulum*, fourthly *Bacchidinium polypes* subsp. *clavulum*, fifthly *Cleistosphaeridium clavulum*, sixthly *Impletosphaeridium clavulum*, seventhly (and now) *Impletosphaeridium? clavulum*. Age: Cenomanian.

"var. *clavulum*" Davey, 1969a, p.154–155, pl.6, figs.9–10. Holotype: Davey, 1969a, pl.6, fig.9; Fauconnier and Masure, 2004, pl.50, fig.1. **NOW** *Impletosphaeridium? clavulum*. Originally *Cleistosphaeridium polypes* var. *clavulum*, subsequently *Cleistosphaeridium polypes* subsp. *clavulum*, thirdly *Impletosphaeridium polypes* subsp. *clavulum*, fourthly *Bacchidinium polypes* subsp. *clavulum*, fifthly *Cleistosphaeridium clavulum*, sixthly *Impletosphaeridium clavulum*, seventhly (and now) *Impletosphaeridium? clavulum*. Age: Cenomanian.

"subsp. *polypes*". Autonym. Holotype: Cookson and Eisenack, 1962b, pl.4, figs.11–13; Fensome et al., 1996, figs.1–3 — p.2283. **Now redundant**. Originally *Cleistosphaeridium polypes* subsp. *polypes*, subsequently *Bacchidinium polypes* subsp. *polypes*, thirdly *Impletosphaeridium polypes* subsp. *polypes*, fourthly *Kiokansium polypes* subsp. *polypes*.

"var. *polypes*". Autonym. Holotype: Cookson and Eisenack, 1962b, pl.4, figs.11–13; Fensome et al., 1996, figs.1–3 — p.2283. **Now redundant**.

polypetellum (Islam, 1983c, p.82,84, pl.2, figs.1–6) Stover and Williams, 1995, p.102. Holotype: Islam, 1983c, pl.2, fig.1. Originally *Areosphaeridium*, subsequently (and now) *Cleistosphaeridium*. Taxonomic senior synonym: *Cleistosphaeridium* (as *Systematophora*) *diversispinosum*, according to Islam (1993, p.88) — however, Eaton et al. (2001, p.194) retained *Cleistosphaeridium polypetellum*. Eaton et al. (2001, p.194) also proposed this combination. Age: early-middle Eocene.

"*polytrichum*" (Valensi, 1947, p.818, text-fig.4) Davey et al., 1969, p.16. Holotype: Valensi, 1947, text-fig.4; Fauconnier and Masure, 2004, pl.24, figs.1–6. **NOW** *Impletosphaeridium?* Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Impletosphaeridium*, fifthly *Downiesphaeridium*, sixthly (and now) *Impletosphaeridium?*. Taxonomic junior synonym: *Cleistosphaeridium* (as *Downiesphaeridium*) *polyacanthum*, according to Masure in Fauconnier and Masure (2004, p.196). The combination *Cleistosphaeridium polytrichum* was not validly published in Davey et al. (1966, p.170), since these authors did not fully reference the basionym. Age: late Bathonian.

"*radiculopse*" Mao Shaozhi and Norris, 1988, p.38, pl.7, figs.21–23. Holotype: Mao Shaozhi and Norris, 1988, pl.7, fig.21. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Late Cretaceous.

regulatum Zhou Heyi, 1985, p.7, pl.1, figs.16–17,19–21. Holotype: Zhou Heyi, 1985, pl.1, fig.16. Originally (and now) *Cleistosphaeridium*, subsequently *Impletosphaeridium*, thirdly *Sepispinula*?. He Chengquan et al. (2009, p.290) retained this species in *Cleistosphaeridium*. Age: middle Oligocene.

reticuloideum Xu Jinli et al., 1997, p.98, pl.32, fig.17; pl.34, figs.25a–b,26a–b,27; pl.35, figs.1a–b,4a–c,6a–b,7a–b,8a–b ex He Chengquan et al., 2009, p.653. Holotype: Xu Jinli et al., 1997, pl.35, figs.4a–c. The name was not validly published in Xu Jinli et al. (1997), since no English or a Latin description was provided; He Chengquan et al. (2009, p.653) validated the name by publishing an English diagnosis. Age: Oligocene.

"sarmentum" Stancliffe, 1991, p.187–188, pl.1, figs.1–2; pl.2, fig.6; text-figs.5A–B. Holotype: Stancliffe, 1991, pl.1, figs.1–2; text-figs.5A–B. **NOW** *Downiesphaeridium*. Originally *Cleistosphaeridium*, subsequently *Impletosphaeridium*, thirdly (and now) *Downiesphaeridium*. N.I.A. Age: late Oxfordian.

"selseyense" Islam, 1983b, p.337, pl.2, figs.3,7. Holotype: Islam, 1983b, pl.2, fig.3. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: middle Eocene.

"separatum" McIntyre and Brideaux, 1980, p.19–20, pl.6, figs.4–5,7–8. Holotype: McIntyre and Brideaux, 1980, pl.6, figs.4–5. **NOW** *Sentusidinium*. Originally *Cleistosphaeridium*, subsequently (and now) *Sentusidinium*. Taxonomic junior synonym: *Sentusidinium cuculliforme*, according to Courtinat in Fauconnier and Masure (2004, p.486). Age: Valanginian.

"shandongense" He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989, p.44, pl.18, figs.5–6; pl.30, figs.3–6. Holotype: He Chengquan et al., 1989, pl.18, fig.6. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Early Tertiary.

sijuense Saxena and Sarkar, 2000, p.257, pl.1, figs.7–8. Holotype: Saxena and Sarkar, 2000, pl.1, fig.8. Age: middle Eocene.

"?solidum" Yun Hyesu, 1981, p.43–44, pl.11, figs.9,13–14. Holotype: Yun Hyesu, 1981, pl.11, fig.13; Fensome et al., 1991, fig.2 — p.739. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, by implication in Below (1982c, p.16), who considered *Cleistosphaeridium solidum* to be a taxonomic junior synonym of *Hystrichosphaeridium recurvatum* subsp. *polypes* (as *Kiokansium polypes*), which is now a taxonomic junior synonym of *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*. Questionable assignment: Yun Hyesu (1981, p.43). Age: early Santonian.

"?sphericum" Horowitz, 1975, p.24, pl.1, fig.5. Holotype: Horowitz, 1975, pl.1, fig.5. **NOW** *Impletosphaeridium*?. Originally *Cleistosphaeridium*, subsequently *Cleistosphaeridium*?, thirdly (and now) *Impletosphaeridium*?. Questionable assignment: Stover and Evitt (1978, p.32) as a problematic species. Age: Late Jurassic.

"?spinsum" (Boltenhagen, 1977, p.54–55, pl.7, figs.1a–b,2,3a–b,4a–b,5a–b) Lentin and Williams, 1981, p.51. Emendation: Masure in Fauconnier and Masure, 2004, p.116–117, as *Trichodinium boltenhagenii*. Holotype: Boltenhagen, 1977, pl.7, figs.1a–b; Fauconnier and Masure, 2004, pl.15, fig.6. **NOW** *Trichodinium boltenhagenii*. Originally *Chytroisphaeridia spinosa*, subsequently *Cleistosphaeridium? spinosum*, thirdly *Circulodinium spinosum*, fourthly (and now) *Trichodinium boltenhagenii*. Questionable assignment: Lentin and Williams (1981, p.51). Age: Cenomanian–Turonian.

"spinulastrum" Islam, 1983b, p.337–338, pl.2, figs.1–2. Holotype: Islam, 1983b, pl.2, fig.1; Islam, 1993, pl.1, fig.11. **NOW** *Downiesphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Downiesphaeridium*. Age: middle Eocene.

"?spiralisetum" (de Wit, 1943, p.383; text-figs.2,11) Davey et al., 1969, p.16. Holotype: de Wit, 1943; text-figs.2,11, lost according to R. de Wit (personal communication to G.L.W.). **NOW** *Impletosphaeridium*?. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly (and now) *Impletosphaeridium*?. Questionable assignment: Davey et al. (1969, p.16). This combination was not validly

published in Davey et al. (1966, p.170), since these authors did not fully reference the basionym. Age: Late Cretaceous.

"*spissum*" McIntyre and Brideaux, 1980, p.20, pl.7, figs.1–9. Holotype: McIntyre and Brideaux, 1980, pl.7, figs.1–4. **NOW** *Prolixosphaeridiopsis* (Appendix A). Originally *Cleistosphaeridium*, subsequently *Prolixosphaeridium?*, thirdly (and now) *Prolixosphaeridiopsis* (Appendix A). Age: Valanginian.

"*tenuae*" Harris, 1974, p.164, pl.2, figs.7–9. Holotype: Harris, 1974, pl.2, figs.8–9. **NOW** *Sepispinula?*. Originally *Cleistosphaeridium*, subsequently *Impletosphaeridium*, thirdly (and now) *Sepispinula?*. Age: Paleocene.

"*tenuifilum*" Cookson and Eisenack, 1982, p.40, pl.8, fig.14. Holotype: Cookson and Eisenack, 1982, pl.8, fig.14. **NOW** *Impletosphaeridium?*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium?*. Age: Paleocene.

"*tianshanense*" He Chengquan, 1991, p.142, pl.25, figs.4–7; text-fig.28. Holotype: He Chengquan, 1991, pl.25, fig.4. **NOW** *Impletosphaeridium*. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: early Eocene.

"*tiara*" (Klumpp, 1953, p.390–391, pl.17, figs.8–10) Davey et al., 1969, p.16. Holotype: Klumpp, 1953, pl.17, figs.8–9. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cordosphaeridium*, fourthly *Cleistosphaeridium*, fifthly (and now) *Operculodinium*. This combination was not validly published in Davey et al. (1966, p.170), since these authors did not fully reference the basionym. N.I.A. Age: Eocene.

"subsp. *centrocarpum*" (Deflandre and Cookson, 1955, p.272–273, pl.8, figs.3–4) Morgenroth, 1966a, p.26. Holotype: Deflandre and Cookson, 1955, pl.8, figs.3–4. **NOW** *Operculodinium centrocarpum*. Originally *Hystrichosphaeridium centrocarpum*, subsequently *Baltisphaeridium centrocarpum* (Appendix A), thirdly *Cordosphaeridium tiara* subsp. *centrocarpum*, fourthly (and now) *Operculodinium centrocarpum*, fifthly *Cordosphaeridium microtriainum* subsp. *centrocarpum*, sixthly *Cleistosphaeridium centrocarpum*. Motile equivalent: *Peridinium* (now *Protoceratium*) *reticulatum* Claparède and Lachmann, 1859 (as *Gonyaulax grindleyi* Reinecke, 1967), according to Wall and Dale (1966, p.1025–1026) — however, see Head (1996b, p.1211). Age: Miocene.

"subsp. *tiara*". Autonym. Holotype: Klumpp, 1953, pl.17, figs.8–9. **Now redundant**. N.I.A.

"*tribuliferum*" (Sarjeant, 1962a, p.487–488, pl.70, fig.4; text-figs.6c,7) Davey et al., 1969, p.16. Holotype: Sarjeant, 1962a, pl.70, fig.4; Fauconnier and Masure, 2004, pl.23, fig.11. **NOW** *Downiesphaeridium*. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Cleistosphaeridium?*, fourthly *Impletosphaeridium*, fifthly (and now) *Downiesphaeridium*. Questionable assignment: Stover and Evitt (1978, p.32). This combination was not validly published in Davey et al. (1966, p.170), since these authors did not fully reference the basionym. Age: Oxfordian.

"*uncinispinosum*" (de Coninck, 1969, p.32–33, pl.9, figs.6–8) Sarjeant, 1981, p.123–124. Holotype: de Coninck, 1969, pl.9, figs.6–8. **NOW** *Operculodinium*. Originally *Cordosphaeridium*, subsequently *Cordosphaeridium?*, thirdly *Cleistosphaeridium*, fourthly (and now) *Operculodinium*. Age: early Eocene.

"*varispinosum*" (Sarjeant, 1959, p.338–340, pl.13, fig.7; text-fig.6) Woollam and Riding, 1983, p.3. Holotype: Sarjeant, 1959, pl.13, fig.7; text-fig.6; Fauconnier and Masure, 2004, pl.49, fig.8. **NOW** *Impletosphaeridium*. Originally *Baltisphaeridium* (Appendix A), subsequently *Tenua* Eisenack, thirdly *Sentusidinium*, fourthly *Sentusidinium?*, fifthly *Cleistosphaeridium*, sixthly (and now) *Impletosphaeridium*. Age: early Callovian.

"*williamsii*" (Boltenhagen, 1977, p.41–42, pl.2, figs.6–7) Lentin and Williams, 1981, p.51. Holotype: Boltenhagen, 1977, pl.2, fig.6; Fauconnier and Masure, 2004, pl.50, fig.6. **NOW** *Impletosphaeridium*. Originally *Polysphaeridium*, subsequently *Cleistosphaeridium?*, thirdly (and now) *Impletosphaeridium*. Questionable assignment: Lentin and Williams (1981, p.51). Age: Cenomanian–early Turonian.

"*xinjiangense*" Lentin and Williams, 1993, p.117. Holotype: He Chengquan, 1991, pl.24, fig.5. **NOW** *Impletosphaeridium xinjiangense*. Originally *Cleistosphaeridium elegans* He Chengquan (name illegitimate), subsequently *Cleistosphaeridium xinjiangense*, thirdly (and now) *Impletosphaeridium xinjiangense*. Substitute name for *Cleistosphaeridium elegans* He Chengquan, 1991, p.141–142, pl.24, figs.5–6; text-fig.27 (an illegitimate name). Age: Paleocene.

"**COCCOPTERUM**" Silva, 1970, p.942. Substitute name for *Pterococcus* Lohmann 1904, p.47 (an illegitimate name). **Taxonomic senior synonym:** *Nematosphaeropsis*, by implication in Reid (1974, p.592), who included the "type species" of *Coccolpaterum*, *Coccolpaterum labyrinthus*, in *Nematosphaeropsis*, and Fensome et al. (1993b, p.93). Type: Ostenfeld, 1903, fig.127, as *Pterosperma labyrinthus*.

"**labyrinthus*" (Ostenfeld, 1903, p.578, fig.127) Silva, 1970, p.942. Holotype: Ostenfeld, 1903, fig.127. **NOW** *Nematosphaeropsis*. Originally *Pterosperma* (Appendix A), subsequently *Pterococcus* (combination illegitimate), thirdly *Coccolpaterum*, fourthly (and now) *Nematosphaeropsis*. Taxonomic junior synonym: *Nematosphaeropsis balcombiana*, according to Reid (1974, p.592) — however, Wrenn (1988, p.139) retained *Nematosphaeropsis balcombiana*. Motile equivalent: *Gonyaulax spinifera* (Claparède and Lachmann, 1859) Diesing, 1866, according to Dodge (1989, p.289). N.I.A. Age: extant.

"**CODONIA**" Cookson and Eisenack, 1960a, p.11. **Name illegitimate** — **senior homonym:** *Codonia* Dumortier, 1822. **Substitute name:** *Codoniella*. Type: Cookson and Eisenack, 1960a, pl.3, fig.1, as *Codonia campanulata*.

"**campanulata*" Cookson and Eisenack, 1960a, p.11, pl.3, figs.1–3. Emendation: Davey, 1979b, p.556, as *Codoniella campanulata*. Holotype: Cookson and Eisenack, 1960a, pl.3, fig.1. **NOW** *Codoniella*. Originally *Codonia* (generic name illegitimate), subsequently (and now) *Codoniella*. Age: Santonian.

CODONIELLA Cookson and Eisenack, 1961a, p.75. Emendation: Davey, 1979b, p.555. Substitute name for *Codonia* Cookson and Eisenack, 1960a (an illegitimate name). Type: Cookson and Eisenack, 1960a, pl.3, fig.1, as *Codonia campanulata*.

**campanulata* (Cookson and Eisenack, 1960a, p.11, pl.3, figs.1–3) Downie and Sarjeant, 1965, p.103. Emendation: Davey, 1979b, p.556, as *Codoniella campanulata*. Holotype: Cookson and Eisenack, 1960a, pl.3, fig.1. Originally *Codonia* (generic name illegitimate), subsequently (and now) *Codoniella*. Age: Santonian.

?*langparensis* Jain et al., 1975, p.12, pl.4, fig.56; pl.5, figs.57–58. Holotype: Jain et al., 1975, pl.5, fig.58. Originally *Codoniella*, subsequently (and now) *Codoniella*? Questionable assignment: Stover and Evitt (1978, p.227). Age: Danian.

psygma Davey, 1979b, p.556, pl.2, figs.9–14. Holotype: Davey, 1979b, pl.2, figs.9–10. N.I.A. Age: Aptian–Albian.

COLOMISPHAERA Nowak, 1968, p.304. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1299). Fensome and Williams (2004) considered this genus to be not validly published because a type was not designated. However, Elbrächter et al. (2008, p.1299) implied that this generic name can be considered validly published as it was proposed under the I.C.Z.N. Řehánek and Cecca (1993, p.153) indicated that Řehánek (1985a) provided an emendation for this genus; however, the latter author did not indicate that he was emending *Colomisphaera*. Type: not designated; type species — *Fibrosphaera minutissima*.

carpathica (Borza, 1964, p.191, pl.1, figs.3–4) Nowak, 1968, p.307. Holotype: Borza, 1964, pl.1, fig.3. Originally *Stomiosphaera*, subsequently (and now) *Colomisphaera*. Age: Kimmeridgian.

cieszynica Nowak, 1968, p.309–310, pl.30, figs.1–5. Holotype: Nowak, 1968, pl.30, figs.1–2. Although Nowak (1968, p.308) cites this as a new species and designated a holotype, he listed "*Stomiosphaera cieszynica* Nowak 1965" as a synonym; we have been unable to confirm the earlier name and reference. Age: Tithonian.

conferta Řehánek, 1985b, p.171–173, pl.1, figs.1–8. Holotype: Řehánek, 1985b, pl.1, figs.1–2. Age: early Valanginian.

fibrata (I. Nagy, 1966, p.92–93,100, pl.5, figs.14,22) Nowak, 1968, p.306. Holotype: I. Nagy, 1966, pl.5, fig.14. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Colomisphaera*. Age: Oxfordian.

fortis Řehánek, 1982, p.220–221, table 1 — p.224; pl.1, figs.1–8. Holotype: Řehánek, 1982, pl.1, figs.1–2. Age: late Tithonian.

heliosphaera (Vogler, 1941, p.281, pl.20, fig.6) Řehánek and Cecca, 1993, p.154. Holotype: Vogler, 1941, pl.20, fig.6. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Colomisphaera*. Age: Neocomian? (Oxfordian–Berriasian, according to I. Nagy, 1966, p.88).

lapidosa (Vogler, 1941, p.281, pl.21, fig.58) Řehánek, 1987a, p.278. Holotype: Vogler, 1941, pl.21, fig.58. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Colomisphaera*. Age: Neocomian?

**minutissima* (Colom, 1935, p.12, pl.2, fig.8; text-fig.4a [four specimens]) Nowak, 1968, p.304. Holotype not designated. Originally *Fibroesphaerae* (generic name not validly published; Appendix A), subsequently *Stomiosphaera*, thirdly (and now) *Colomisphaera*, fourthly *Schizosphaerella*. Fensome and Williams (2004) considered this name to be not validly published because a type was not designated. However, Elbrächter et al. (2008, p.1298) implied that it can be considered validly published as it was proposed under the I.C.Z.N. Elbrächter et al. (2008, p.1299) effectively retained this species in *Colomisphaera*. Age: Late Early Jurassic.

modica Řehánek, 1984, p.180–182, pl.83, figs.1–6. Holotype: Řehánek, 1984, pl.83, figs.1–2. Age: Late Cretaceous.

ornata Nowak, 1968, p.308–309, pl.31, figs.4–5. Holotype: Nowak, 1968, pl.31, figs.4–5. Age: Tithonian.

pokornyi Řehánek, 1985a, p.373–374, pl.4, figs.1–6. Holotype: Řehánek, 1985a, pl.4, figs.1–2. Age: late Albanian.

pulla (Borza, 1964, p.192–193, pl.2, figs.1–2) Nowak, 1968, p.310. Holotype: Borza, 1964, pl.2, fig.1. Originally *Stomiosphaera*, subsequently *Cadosina*, thirdly (and now) *Colomisphaera*. Age: Kimmeridgian.

tenuis (I. Nagy, 1966, p.93, pl.5, fig.18) Řehánek, 1987a, p.278. Holotype: I. Nagy, 1966, pl.5, fig.18. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Colomisphaera*. Age: Oxfordian.

varia Řehánek, 1982, p.222,224,226–227, pl.2, figs.1–9. Holotype: Řehánek, 1982, pl.2, figs.1–2. Age: Late Cretaceous.

verrucosa Řehánek, 1985a, p.374, pl.5, figs.1–6. Holotype: Řehánek, 1985a, pl.5, fig.1. Age: late Albanian.

COLONSAYDINIUM Hunt in Hunt et al., 1985, p.103. Type: Hunt et al., 1985, pl.2, figs.4–5, as *Colonsaydinium psilatatum*.

**psilatatum* Hunt in Hunt et al., 1985, p.108, pl.2, figs.4–9; text-fig.3, nos.1–2. Holotype: Hunt et al., 1985, pl.2, figs.4–5; Fensome et al., 1995, figs.1–2 — p.1713. Age: late Quaternary.

COMETODINIUM Deflandre and Courteville, 1939, p.98. Emendation: Monteil, 1991a, p.440. Type: Deflandre and Courteville, 1939, pl.2, fig.1, as *Cometodinium obscurum* (which see for lectotype).

breve Beilstein, 1994, p.199–200, pl.31, figs.7–8. Holotype: Beilstein, 1994, pl.31, fig.7. Age: Campanian–Maastrichtian.

?*comatum* Srivastava, 1984, p.29, pl.7, figs.4–8. Holotype: Srivastava, 1984, pl.7, fig.4; Monteil, 1991a, pl.1, fig.3. Questionable assignment: Monteil (1991a, p.440). Age: late Barremian.

habibii Monteil, 1991a, p.441–443, pl.3, figs.1a–b,2a–b,5; pl.4, figs.1–4; pl.5, figs.1–3; pl.6, fig.1; text-fig.3. Holotype: Monteil, 1991a, pl.3, figs.1a–b; Fauconnier and Masure, 2004, pl.16, fig.11. Age: Tithonian–earliest Valanginian to ?early Aptian.

jurassicum Poulsen, 1996, p.79–80, pl.2, figs.3–4. Holotype: Poulsen, 1996, pl.2, fig.4. Age: middle Oxfordian–early Volgian.

multispinosum (Singh, 1964, p.141, pl.20, figs.1–2) Masure in Fauconnier and Masure, 2004, p.133. Holotype: Singh, 1964, pl.20, fig.1; Fauconnier and Masure, 2004, pl.23, fig.10. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Cleistosphaeridium*?, fourthly *Downiesphaeridium*, fifthly (and now) *Cometodinium*. Age: middle Albian–early Cenomanian.

**obscurum* Deflandre and Courteville, 1939, p.99, pl.2, fig.1. Emendation: Monteil, 1991a, p.443–444. Holotype: Deflandre and Courteville, 1939, pl.2, fig.1, lost according to Monteil (1991a, p.439). Lectotype: Monteil, 1991a, pl.1, figs.1a–b, designated by Monteil (1991a, p.444); Fauconnier and Masure, 2004, pl.16, figs.5–6. Age: Turonian.

whitei (Deflandre and Courteville, 1939, p.103, pl.3, figs.5–6) Stover and Evitt, 1978, p.227. Emendation: Monteil, 1991a, p.444, as *Cometodinium whitei*. Holotype: Deflandre and Courteville, 1939, pl.3, fig.5, lost according to Monteil (1991a, p.439). Neotype: Monteil, 1991a, pl.2, figs.1a–c; pl.3, fig.9, designated by Monteil (1991a, p.444); Fauconnier and Masure, 2004, pl.16, figs.7–8. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Impletosphaeridium*, fourthly *Comasphaeridium* (Appendix A), fifthly *Cometodinium*?, sixthly (and now) *Cometodinium*. Questionable assignment: Stover and Evitt (1978, p.227); however, Monteil (1991a, 444) assigned the species to *Cometodinium* without question. Age: Senonian.

COMMITTOSPHAERA Řehánek, 1985a, p.376. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1299). Type: Vogler, 1941, pl.20, fig.5, as *Cadosina sublapidosa*.

czestochowiensis Řehánek in Řehánek and Heliasz, 1993, p.87–88, pl.2, figs.1–5. Holotype: Řehánek and Heliasz, 1993, pl.2, fig.1. Age: middle Oxfordian.

palaviensis Řehánek, 1985a, p.376–377, pl.2, figs.5–7. Holotype: Řehánek, 1985a, pl.2, figs.5,7. Age: middle Tithonian.

**sublapidosa* Vogler, 1941, p.280–281, pl.20, fig.5 ex Řehánek, 1985a, p.376–377. Holotype: Vogler, 1941, pl.20, fig.5. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Committosphaera*. In proposing this name, Řehánek (1985a, p.377) did not fully reference the "basonym"; however, since he was using zoological nomenclature, this was not a requirement. Age: Neocomian?

"**COMPARODINIUM**" Morbey, 1975, p.43. Emendation: Wille and Gocht, 1979, p.226,228. **Taxonomic senior synonym:** *Valvaeodinium*, according to Below (1987b, p.64). Type: Morbey, 1975, pl.15, figs.14a–b; text-fig.19a, no.a, as *Comparodinium koessenium*.

"*aquilonium*" Dörhöfer and Davies, 1980, p.24,26, figs.26E,I,28A–H. Emendation: Below, 1987b, p.69, as *Valvaeodinium aquilonium*. Holotype: Dörhöfer and Davies, 1980, fig.26E. **NOW** *Valvaeodinium*. Originally *Comparodinium*, subsequently (and now) *Valvaeodinium*. Age: Toarcian to Bajocian–Bathonian.

"?*cavum*" Davies, 1983, p.16, pl.2, figs.10–15; text-fig.9. Emendation: Below, 1987b, p.70, as *Valvaeodinium cavum*. Holotype: Davies, 1983, pl.2, figs.10–11. **NOW** *Valvaeodinium*. Originally *Comparodinium*?, subsequently (and now) *Valvaeodinium*. Questionable assignment: Davies (1983, p.16). Age: Toarcian–Bajocian.

"*diacrorhaetium*" Morbey, 1975, p.44, pl.16, figs.3–6; text-fig.20. Holotype: Morbey, 1975, pl.16, figs.3–6; text-fig.20a. Originally *Comparodinium*, subsequently *Valvaeodinium*. **Taxonomic senior synonym:** *Comparodinium* (now *Valvaeodinium*) *koessenium*, according to Below (1987b, p.66). Age: Rhaetian.

"**koessenium*" Morbey, 1975, p.44, pl.15, figs.14a–b; pl.16, figs.1–2; text-figs.19a,nos.a–b; 19b, no.i. Holotype: Morbey, 1975, pl.15, figs.14a–b; text-fig.19a, no.a; Fensome et al., 1995, figs.1–3 — p.1589. **NOW** *Valvaeodinium*. Originally *Comparodinium*, subsequently (and now) *Valvaeodinium*. Taxonomic junior synonym: *Comparodinium* (subsequently *Valvaeodinium*) *diacrorhaetium*, according to Below (1987b, p.66). Age: Rhaetian–Hettangian.

"*lineatum*" Wille and Gocht, 1979, p.235,237, figs.13a–b,14a–b,15a–b,16a–b; fig.24, nos.10–11; fig.27, nos.7a–b; figs.8–9,10a–b,11; fig.28, nos.1a–b. Holotype: Wille and Gocht, 1979, figs.13a–b; fig.27, nos.9a–b. **NOW** *Valvaeodinium*. Originally *Comparodinium*, subsequently (and now) *Valvaeodinium*. Age: Pliensbachian–Toarcian.

"*perpunctatum*" Wille and Gocht, 1979, p.238, figs.24, no.4; fig.28, nos.7–8). Holotype: Wille and Gocht, 1979, fig.28, no.7. **NOW** *Valvaeodinium*. Originally *Comparodinium*, subsequently (and now) *Valvaeodinium*. Age: Pliensbachian.

"*punctatum*" Wille and Gocht, 1979, p.228–231, figs.3a–b,4a–b,5a–d,6–8,9a–b,10a–b; fig.24, nos.6–9; fig.26, nos.1a–b,2a–b,3a–b,4–5,6a–b,7a–b,8–9,10a–b,11,12a–b. Emendation: Below, 1987b, p.73, as *Valvaeodinium punctatum*. Holotype: Wille and Gocht, 1979, figs.3a–b; fig.26, nos.1a–b. **NOW** *Valvaeodinium*. Originally *Comparodinium*, subsequently (and now) *Valvaeodinium*. Age: Pliensbachian–Toarcian.

"subsp. *magnum*" (Wille and Gocht, 1979, p.231, fig.24, no.9; fig.26, no.11) Lentin and Williams, 1981, p.53. Holotype: Wille and Gocht, 1979, fig.26, no.11. **NOW** *Valvaeodinium punctatum* subsp. *magnum*. Originally *Comparodinium punctatum* var. *magnum*, subsequently *Comparodinium punctatum* subsp. *magnum*, thirdly *Valvaeodinium punctatum* var. *magnum*, fourthly (and now) *Valvaeodinium punctatum* subsp. *magnum*. Age: Toarcian.

"var. *magnum*" Wille and Gocht, 1979, p.231, fig.24, no.9; fig.26, no.11. Holotype: Wille and Gocht, 1979, fig.26, no.11. **NOW** *Valvaeodinium punctatum* subsp. *magnum*. Originally *Comparodinium punctatum* var. *magnum*, subsequently *Comparodinium punctatum* subsp. *magnum*, thirdly *Valvaeodinium punctatum* var. *magnum*, fourthly (and now) *Valvaeodinium punctatum* subsp. *magnum*. Age: Toarcian.

"subsp. *punctatum*". Autonym. Holotype: Wille and Gocht, 1979, figs.3a–b; fig.26, nos.1a–b. **NOW** *Valvaeodinium punctatum* subsp. *punctatum*. Originally *Comparodinium punctatum* subsp. *punctatum*, subsequently (and now) *Valvaeodinium punctatum* subsp. *punctatum*.

"var. *punctatum*". Autonym. Holotype: Wille and Gocht, 1979, figs.3a–b; fig.26, nos.1a–b. **Now redundant.**

"*scalatum*" Wille and Gocht, 1979, p.231,233–234, figs.11a–b,12a–b; fig.24, nos.12–13; fig.28, nos.2a–b,3a–c,4a–b,5–6. Emendation: Below, 1987b, p.74, as *Valvaeodinium scalatum*. Holotype: Wille and Gocht, 1979, figs.11a–b; fig.28, nos.2a–b. **NOW** *Valvaeodinium*. Originally *Comparodinium*, subsequently (and now) *Valvaeodinium*. Age: Pliensbachian–Toarcian.

"*stipulatum*" Wille and Gocht, 1979, p.237–238, figs.17a–b; fig.24, no.5; fig.28, nos.9–12. Emendation: Below, 1987b, p.79, as *Valvaeodinium stipulatum*. Holotype: Wille and Gocht, 1979, figs.17a–b; fig.28, nos.9–12. **NOW** *Valvaeodinium*. Originally *Comparodinium*, subsequently (and now) *Valvaeodinium*. Age: Pliensbachian.

COMPOSITOSPHAERIDIUM Dodekova, 1974, p.25–26. Emendations: Courtinat, 1989, p.164; Stancliffe and Sarjeant, 1990, p.202. Junior homonym: *Compositosphaeridium* Erkmen and Sarjeant, 1980. Taxonomic junior synonym: *Compositosphaeridium* Dodekova, by implication in Lentin and Williams (1981, p.53), who included the "type species" of *Compositosphaeridium* Erkmen and Sarjeant, *Compositosphaeridium bulgaricum*, in *Compositosphaeridium* Dodekova. Type: Davey and Williams, 1966b, pl.10, fig.4, as *Hystrichosphaeridium costatum*.

?*bahamaense* Masure, 1988b, p.128, pl.2, figs.1A–C (not figs.1,2A–B); figs.2A–D (not figs.2C,3A–C). Holotype: Masure, 1988b, pl.2, figs.1A–C (not figs.1,2A–B); Fauconnier and Masure, 2004, pl.16, figs.12–13. Questionable assignment: Masure (1988b, p.128). Age: Cenomanian.

bulgaricum (Erkmen and Sarjeant, 1980, p.66–67) Lentin and Williams, 1981, p.53. Holotype: Dodekova, 1974, pl.1, figs.4–6; text-fig.1; Stancliffe and Sarjeant, 1990, pl.5, fig.5; text-fig.3, no.5, both as *Compositosphaeridium costatum*. Originally *Compositosphaeridium* Erkmen and Sarjeant (generic name illegitimate), subsequently (and now) *Compositosphaeridium* Dodekova. Taxonomic senior synonym: *Hystrichosphaeridium* (as *Compositosphaeridium*) *polonicum*, according to Dodekova (1990, p.9) — however, Stancliffe and Sarjeant (1990, p.203) retained *Compositosphaeridium bulgaricum*. Age: Bathonian.

**costatum* (Davey and Williams, 1966b, p.62, pl.10, fig.4) Dodekova, 1974, p.26. Holotype: Davey and Williams, 1966b, pl.10, fig.4; Stancliffe and Sarjeant, 1990, pl.3, fig.1. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly (and now) *Compositosphaeridium* Dodekova. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Compositosphaeridium*?) *polonicum*, according to Beju (1971, p.292) — however, Masure in Fauconnier and Masure (2004, p.137) retained *Compositosphaeridium costatum*. If the latter synonymy is followed, the nomenclatural type of the genus *Compositosphaeridium* Dodekova would remain the holotype of *Compositosphaeridium costatum*. Age: Oxfordian.

?*polonicum* (Górka, 1965, p.306–307, pl.3, figs.5–6) Lentin and Williams, 1981, p.53. Emendations: Erkmen and Sarjeant, 1980, p.68, as *Compositosphaeridium polonicum*; Courtinat, 1989, p.164, as *Compositosphaeridium polonicum* — however, see Stancliffe and Sarjeant (1990, p.203). Holotype: Górka, 1965, pl.3, fig.5. Originally *Hystrichosphaeridium*, subsequently *Compositosphaeridium* Erkmen and Sarjeant (combination illegitimate), thirdly *Compositosphaeridium* Dodekova, fourthly (and now) *Compositosphaeridium?* Dodekova. Questionable assignment: Masure in Fauconnier and Masure (2004, p.138). Taxonomic junior synonyms: *Hystrichosphaeridium* (subsequently *Compositosphaeridium*) *costatum*, according to Beju (1971, p.292); *Compositosphaeridium bulgaricum*, according to Dodekova (1990, p.9) — however, Stancliffe and Sarjeant (1990, p.203) retained *Compositosphaeridium bulgaricum* and Masure in Fauconnier and Masure (2004, p.137) retained *Compositosphaeridium costatum*. If the synonymy of *Compositosphaeridium costatum* with *Compositosphaeridium?* *polonicum* were to be followed, the nomenclatural type of the genus *Compositosphaeridium* Dodekova would remain the holotype of *Compositosphaeridium costatum*. Age: Oxfordian.

"**COMPOSITOSPHAERIDIUM**" Erkmen and Sarjeant, 1980, p.65–66. **Name illegitimate — senior homonym:** *Compositosphaeridium* Dodekova, 1974. **Taxonomic senior synonym:** *Compositosphaeridium* Dodekova, by implication in Lentin and Williams (1981, p.53), who included the "type species" of *Compositosphaeridium* Erkmen and Sarjeant, *Compositosphaeridium bulgaricum*, in *Compositosphaeridium* Dodekova. Erkmen and Sarjeant cited the generic name as "*Compositosphaeridium* Dodekova, 1974" but gave the "type species" as "*Compositosphaeridium bulgaricum* Erkmen and Sarjeant sp. nov., nom. nov. pro *Compositosphaeridium costatum* Dodekova, 1974, non Davey and Williams, 1966 [1966b herein]" Since a type once designated is permanent (I.C.N. Article 7.2) except through formal conservation, Erkmen and Sarjeant (1980) effectively and validly published a new generic name, *Compositosphaeridium* Erkmen and Sarjeant, which is illegitimate as a junior homonym of *Compositosphaeridium* Dodekova. Type: Dodekova, 1974, pl.1, figs.4–6, text-fig.1, as *Compositosphaeridium costatum*, designated by Erkmen and Sarjeant (1980, p.67).

"**bulgaricum*" Erkmen and Sarjeant, 1980, p.66–67. Holotype: Dodekova, 1974, pl.1, figs.4–6, text-fig.1, as *Compositosphaeridium costatum*, designated by Erkmen and Sarjeant (1980, p.67). **NOW** *Compositosphaeridium* Dodekova. Originally *Compositosphaeridium* Erkmen and Sarjeant, subsequently (and now) *Compositosphaeridium* Dodekova. Taxonomic senior synonym: *Hystrichosphaeridium* (as *Compositosphaeridium*)

polonicum, according to Dodekova (1990, p.9) — however, Stancliffe and Sarjeant (1990, p.203) retained *Compositosphaeridium bulgaricum*. Following I.C.N. Article 55.1, the species name *Compositosphaeridium bulgarium* is validly published even though the generic name *Compositosphaeridium* Erkmén and Sarjeant is illegitimate. Age: Bathonian.

"**polonicum**" (Górka, 1965, p.306–307, pl.3, figs.5–6) Erkmén and Sarjeant, 1980, p.67. Emendations: Erkmén and Sarjeant, 1980, p.68, as *Compositosphaeridium polonicum*; Courtinat, 1989, p.164, as *Compositosphaeridium polonicum* — however see Stancliffe and Sarjeant (1990, p.203). Holotype: Górka, 1965, pl.3, fig.5. **Combination illegitimate**: generic name illegitimate. **NOW** *Compositosphaeridium?* Dodekova. Originally *Hystrichosphaeridium*, subsequently *Compositosphaeridium* Erkmén and Sarjeant (combination illegitimate), thirdly *Compositosphaeridium* Dodekova, fourthly (and now) *Compositosphaeridium?* Dodekova. Taxonomic junior synonyms: *Hystrichosphaeridium* (subsequently *Compositosphaeridium*) *costatum*, according to Beju (1971, p.292); *Compositosphaeridium bulgaricum*, according to Dodekova (1990, p.9) — however, Stancliffe and Sarjeant (1990, p.203) retained *Compositosphaeridium bulgaricum* and Masure in Fauconnier and Masure (2004, p.137) retained *Compositosphaeridium costatum*. Age: Oxfordian.

"**CONEJOCONUS**" Knauer, 1970, p.89. **Name illegitimate** — **nomenclatural senior synonym**: *Bonetocardiella*, which has the same type (see also Villain (1975, p.196)). Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1298, who noted that the cyst wall is pithonelloid and so dinoflagellate affinity is questionable). Fensome and Williams (2004) considered this genus to be not validly published because a type was not designated. However, Elbrächter et al. (2008, p.1298) implied that this generic name can be considered validly published as it was proposed under the I.C.Z.N. Type: not designated; "type species" — *Stomiosphaera conoidea*.

"**cardiiformis**" (Ayala Castañares and Seigle, 1962, p.16–17, pl.1, figs.1–5, 7–9) Knauer, 1970, p.89. Holotype: information not available. Originally *Stomiosphaera*, subsequently *Bonetocardiella*, thirdly *Conejoconus* (generic name illegitimate). **Taxonomic senior synonym**: *Leptodermella* (now *Bonetocardiella*) *maestrichtiensis*, according to Villain (1975, p.198). Taxonomic junior synonym: *Stomiosphaera conoidea*, according to Andri (1972, p.15) — however, the latter species has generally been retained as the type of *Bonetocardiella*. Age: information not available.

"***conoideus**" (Bonet, 1956, p.454–456, pl.22, figs.1[part]–2; pl.27, fig.1[part]) Knauer, 1970, p.89. Holotype not designated. **NOW** *Bonetocardiella*. Originally *Stomiosphaera*, subsequently *Bonetocardiella* thirdly *Conejoconus* (generic name illegitimate). Taxonomic junior synonym: *Stomiosphaera cardiiformis*, according to Andri (1972, p.15) — however that species was later considered to be a taxonomic junior synonym of *Leptodermella* (now *Bonetocardiella*) *maestrichtiensis*. Age: Middle Cretaceous.

CONGRUENTIA Kohring in Keupp et al., 1991, p.168. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1299). Type: Keupp et al., 1991, pl.5, figs.7–8, as *Congruentia eocaenica*.

***eocaenica** Kohring in Keupp et al., 1991, p.168, pl.5, figs.5–10. Holotype: Keupp et al., 1991, pl.5, figs.7–8. Age: late Eocene.

"**CONICOIDIUM**" Jiabo, 1978, p.45–46. Emendation Xu Jinli and Mao Shaozhi, 1989, p.302. **Taxonomic senior synonym**: *Parabohaidina*, according to Sun Xuekun (1994, p.80). He Chengquan et al. (2009, p.465) considered this taxon to be a subgenus of *Parabohaidina*, *Parabohaidina* subgenus *Conicoidium*, which see. Chen et al. (1988, p.15) and Fensome et al. (1990, p.153) included this genus in the acritarchs; however, Xu Jinli and Mao Shaozhi (1989, p.302) showed that it is a dinoflagellate. Type: Jiabo, 1978, pl.18, fig.7, as *Conicoidium tuberculatum*.

"**granorugosum**" Jiabo, 1978, p.46, pl.18, figs.11–12. Holotype: Jiabo, 1978, pl.18, fig.12. **NOW** *Parabohaidina*. Originally *Conicoidium*, subsequently (and now) *Parabohaidina*. Taxonomic senior synonym: *Parabohaidina retirugosa*, according to Sun Xuekun (1994, p.82) — however, He Chengquan et al. (2009, p.465) retained this species separately. Age: Early Tertiary.

"**granulatum**" He Chengquan, 1984b, p.156–157, pl.2, figs.22–27; text-fig.1. Emendation: Xu Jinli and Mao Shaozhi, 1989, p.302. Holotype: He Chengquan, 1984b, pl.2, fig.26. **NOW** *Parabohaidina arenata*. Originally *Conicoidium granulatum*, subsequently *Parabohaidina granulata* (Jiabo) He Chengquan et al. (illegitimate combination, non *Parabohaidina granulata* Jiabo), thirdly (and now) *Parabohaidina arenata*. Taxonomic senior synonym: *Parabohaidina granulata*, according to Sun Xuekun (1994, p.82)) — however, He Chengquan et al. (2009, p.454) retained this species separately. Age: Tertiary.

"subsp. **minor**" Tang in Cai Zhiguo et al., 1998, p.239, pl.80, figs.8. Holotype: Cai Zhiguo et al., 1998, pl.80, figs.8. **Name not validly published**: no English or Latin description or diagnosis. Originally *Conicoidium granulatum* subsp. *minor* (name not validly published), subsequently *Parabohaidina granulata* (He Chengquan) subsp. *minor* (name not validly published).

"**laevigatum**" Jiabo, 1978, p.46, pl.18, fig.1. Holotype: Jiabo, 1978, pl.18, fig.1. **NOW** *Parabohaidina runcinatus*. Originally *Conicoidium laevigatum*, subsequently *Parabohaidina laevigata* (Jiabo) He Chengquan et al. (illegitimate combination, non *Parabohaidina laevigata* Jiabo), thirdly (and now) *Parabohaidina runcinatus*. Taxonomic senior synonym: *Parabohaidina laevigata*, according to Sun Xuekun (1994, p.82)) — however, He Chengquan et al. (2009, p.466) retained this species separately. Age: Early Tertiary.

"***tuberculatum**" Jiabo, 1978, p.46, pl.18, figs.5–10; text-fig.7. Holotype: Jiabo, 1978, pl.18, fig.7. **NOW** *Parabohaidina bulla*. Originally *Conicoidium tuberculatum*, subsequently *Parabohaidina tuberculata* (Jiabo) He Chengquan et al. (illegitimate name, non *Parabohaidina tuberculata* He Chengquan), thirdly (and now) *Parabohaidina bulla*. Taxonomic senior synonym: *Parabohaidina tuberculata*, according to Sun Xuekun (1994, p.82) — however, He Chengquan et al. (2009, p.466) retained this species separately. Age: Early Tertiary.

"**CONIFERATIUM**" Burgess, 1971, p.80–81. **Taxonomic senior synonym**: *Apteodinium*, according Stover and Evitt (1978, p.141–142). Type: Burgess, 1971, pl.1, fig.9, as *Coniferatium frontierense*.

"***frontierense**" Burgess, 1971, p.81, pl.1, figs.6,9; text-fig.13. Holotype: Burgess, 1971, pl.1, fig.9; Jan du Chêne et al., 1986a, pl.15, figs.1–6. **NOW** *Apteodinium*. Originally *Coniferatium*, subsequently (and now) *Apteodinium*. Age: Albian–early Cenomanian.

CONNEXIMURA May, 1980, p.45–46. Emendation: Marheinecke, 1992, p.112. Type: Morgenroth, 1968, pl.45, figs.7–8, as *Hystrichokolpoma? fimbriata*.

***fimbriata** (Morgenroth, 1968, p.547–548, pl.45, figs.7–8) May, 1980, p.46. Emendations: May, 1980, p.46 and Marheinecke, 1992, p.112–113, both as *Conneximura fimbriata*. Holotype: Morgenroth, 1968, pl.45, figs.7–8; Eisenack and Kjellström, 1972, p.515; Fensome et al., 1995, figs.1–2 — p.1483. Originally *Hystrichokolpoma?*, subsequently *Danea*, thirdly (and now) *Conneximura*. Age: Danian.

CONOSPHAERIDIUM Cookson and Eisenack, 1969, p.5. Taxonomic senior synonym: *Litosphaeridium*, by implication in Sarjeant (1969, p.14), who transferred the "type species" of *Conosphaeridium*, *Conosphaeridium striatoconum*, to *Litosphaeridium* — however, Lentin and Williams (1973, p.31) retained *Conosphaeridium*. Type: Deflandre and Cookson, 1955, text-fig.36, as *Hystrichosphaeridium striatoconum*.

abbreviatum Wilson, 1984c, p.552,554, figs.11–13. Holotype: Wilson, 1984c, fig.11; Fensome et al., 1996, fig.1 — p.2017. Age: late Santonian–Campanian; however, see Fensome et al. (1996, p.2018).

lifum Slimani et al., 2012, p.341–342, fig.3A–L. Holotype: Slimani et al., 2012, fig.3A–C,E. Age: late Maastrichtian–early Danian.

***striatoconum** (Deflandre and Cookson, 1955, p.275, pl.2, fig.10; text-fig.36) Cookson and Eisenack, 1969, p.5. Holotype: Deflandre and Cookson, 1955; text-fig.36. Originally *Hystrichosphaeridium*, subsequently

Baltisphaeridium (Appendix A), thirdly *Litosphaeridium*?, fourthly (and now) *Conosphaeridium*. Age: middle Senonian.

truncatum He Chengquan, 1991, p.157, pl.14, fig.12. Holotype: He Chengquan, 1991, pl.14, fig.12. Age: middle Eocene.

"**tubulosum**" Cookson and Eisenack, 1969, p.5,7, pl.2, figs.D–F. Holotype: Cookson and Eisenack, 1969, pl.2, fig.E. **NOW** *Kleithriasphaeridium*. Originally *Conosphaeridium*, subsequently (and now) *Kleithriasphaeridium*. Age: Albian–Cenomanian.

"**CONTRANGULARIA**" Wan Chuanbiao and Zhang Ying, 1990, p.11,13–14. Emendation: Mao Shaozhi et al., 1999, p.154–155. **Taxonomic senior synonym:** *Vesperopsis*, by implication in He Chengquan et al. (2009, p.307). Originally *Contrangularia*, subsequently *Vesperopsis* subgenus *Contrangularia* (name not validly published). It appears that He Chengquan et al. (2009, p. 307) intended to change the rank of this taxon from genus to subgenus; however they neither gave a clear indication of the new rank nor provided a basionym citation. Type: Wan Chuanbiao and Zhang Ying, 1990, pl.3, fig.2, as *Contrangularia reticulata*.

"**granulata**" Wan Chuanbiao and Zhang Ying, 1990, p.12, pl.3, figs.7–9. Emendation: Mao Shaozhi et al., 1999, p.155. Holotype: Wan Chuanbiao and Zhang Ying, 1990, pl.3, fig.8. **NOW** *Vesperopsis*. Originally *Contrangularia*, subsequently (and now) *Vesperopsis*. Age: Early Cretaceous.

"***reticulata**" Wan Chuanbiao and Zhang Ying, 1990, p.11–12, pl.3, figs.2,4,6. Emendation: Mao Shaozhi et al., 1999, p.155. Holotype: Wan Chuanbiao and Zhang Ying, 1990, pl.3, fig.2; Mao Shaozhi et al., 1999, pl.4, fig.9. **NOW** *Vesperopsis*. Originally *Contrangularia*, subsequently (and now) *Vesperopsis*. Age: Early Cretaceous.

COOKSONIDIUM Stover and Williams, 1995, p.106–107. Type: Cookson and Eisenack, 1965a, pl.15, fig.7, as *Cordosphaeridium capricornum*.

***capricornum** (Cookson and Eisenack, 1965a, p.128–129, pl.15, figs.1–9) Stover and Williams, 1995, p.107. Emendation: Stover and Williams, 1995, p.107, as *Cooksonidium capricornum*. Holotype: Cookson and Eisenack, 1965a, pl.15, fig.7; Fauconnier and Masure, 2004, pl.7, figs.7–10. Originally *Cordosphaeridium*, subsequently *Systematophora*?, thirdly *Areosphaeridium*, fourthly (and now) *Cooksonidium*. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Areosphaeridium*) *dictyostilum*, according to Sarjeant (1981, p.115–116) — however, Lentin and Williams (1985, p.26) retained *Cooksonidium* (as *Areosphaeridium*) *capricornum*. Age: late Eocene.

coniunctum (Prössl, 1992b, p.106–108, pl.2, figs.1–2,4–5,7,9,12–14; pl.3, figs.1,4,7,12–14) Masure and Michoux in Fauconnier and Masure, 2004, p.143. Holotype: Prössl, 1992b, pl.3, figs.1,4,7; Fauconnier and Masure, 2004, pl.8, figs.1–3. Originally *Areosphaeridium*, subsequently (and now) *Cooksonidium*. Age: middle Eocene.

"**COOKSONIELLA**" Vozzhennikova, 1967, p.183–184. **Taxonomic senior synonym:** *Chatangiella*, according to Lentin and Williams (1976, p.155). Type: Vozzhennikova, 1967, pl.109, figs.2a–b, as *Cooksoniella vnigrii*.

"**?damasii**" (Lejeune-Carpentier, 1942, p.B185–B186, figs.9–14) Lentin and Williams, 1973, p.31. Holotype: Lejeune-Carpentier, 1942, fig.10; Lejeune-Carpentier and Sarjeant, 1981, pl.6, fig.3; text-fig.9a. **NOW** *Deflandrea*?. Originally *Peridinium* (Appendix B), subsequently *Cooksoniella*, thirdly *Palaeoperidinium*, fourthly *Deflandrea*, fifthly (and now) *Deflandrea*?. Questionable assignment: Lentin and Williams (1973, p.31). Age: Senonian.

"**larjakiensis**" (Vozzhennikova, 1967, p.71–72, pl.16, figs.1a–b,2a–b) Harker and Sarjeant, 1975, p.224. Holotype: Vozzhennikova, 1967, pl.16, figs.1a–b; Lentin and Vozzhennikova, 1990, text-fig.32; lost according to Lentin and Vozzhennikova (1990, p.61). Originally *Peridinium conicum* var. *larjakiense* (Appendix B), subsequently *Palaeoperidinium deflandrei* subsp. *larjakiense*, thirdly *Cooksoniella larjakiensis*, fourthly *Palaeoperidinium*

larjakiense. **Taxonomic senior synonym:** *Peridinium* (now *Palaeoperidinium*) *pyrophorum*, according to Lentin and Vozzhennikova (1990, p.61). Age: Paleocene.

"*manumii*" Vozzhennikova, 1967, p.184–185, pl.107, figs.1–4. Holotype: Vozzhennikova, 1967, pl.108, fig.1; Lentin and Vozzhennikova, 1990, pl.4, fig.3; text-fig.19. **NOW** *Chatangiella*. Originally *Cooksoniella*, subsequently (and now) *Chatangiella*. Age: Senonian.

"?*paleocenica*" (Cookson and Eisenack, 1965c, p.142–143, pl.19, figs.1–4; text-figs.2a–b) Lentin and Williams, 1973, p.31. Holotype: Cookson and Eisenack, 1965c, pl.19, figs.2–3. **NOW** *Ginginodinium*. Originally *Peridinium* (Appendix B), subsequently *Cooksoniella*?, thirdly *Palaeoperidinium*, fourthly (and now) *Ginginodinium*. Questionable assignment: Lentin and Williams (1973, p.31). Age: middle Paleocene.

"*scheii*" (Manum, 1963, p.56–58, pl.1, figs.1–16; text-fig.1) Lentin and Williams, 1973, p.31. Holotype: Manum, 1963, pl.1, figs.1–4; text-fig.1. **NOW** *Arvalidinium*. Originally *Deflandrea*, subsequently *Cooksoniella*, thirdly *Chatangiella*?, fourthly (and now) *Arvalidinium*. Age: Middle Cretaceous (early Late Cretaceous, according to Manum and Cookson, 1964).

"*sverdrupiana*" (Manum, 1963, p.59–60, pl.2, figs.6–15; text-fig.3) Williams and Brideaux, 1975, p.57. Emendation: Lebedeva in Ilyina et al., 1994, p.64, as *Spinidinium sverdrupianum*. Holotype: Manum, 1963, pl.2, figs.12–13. **NOW** *Spinidinium*. Originally *Deflandrea*, subsequently (and now) *Spinidinium*, thirdly *Subtilisphaera*, fourthly *Cooksoniella* (combination not validly published). Age: Cenomanian.

"**vnigrii*" Vozzhennikova, 1967, p.185, pl.59, fig.2; pl.79, fig.3; pl.107, fig.1; pl.109, figs.1–2; pl.110, figs.2–3. Emendation: Lebedeva in Ilyina et al., 1994, p.70, as *Chatangiella vnigrii*. Holotype: Vozzhennikova, 1967, pl.109, figs.2a–b (not pl.107, fig.1 as indicated in the caption); Lentin and Vozzhennikova, 1990, pl.5, figs.4–5; text-fig.21. **NOW** *Chatangiella*. Originally *Cooksoniella*, subsequently (and now) *Chatangiella*. Taxonomic senior synonyms: *Deflandrea* (as and now *Chatangiella*) *granulifera*, according to Lentin and Vozzhennikova (1990, p.47) and *Deflandrea* (as and now *Chatangiella*) *verrucosa*, according to Yun Hyesu (1981, p.66) — however, Lebedeva in Ilyina et al. (1994, p.70) retained *Cooksoniella* (as and now *Chatangiella*) *vnigrii*. Wheeler and Sarjeant (1990, p.317) suggested that the spelling for the species epithet could be "*vnigriorum*". Age: Turonian–Santonian.

"**CORBELLA**" Odin, 2008, p.24. Calcareous dinoflagellate genus (as a taxonomic junior synonym of *Coronadinium*). **Taxonomic senior synonym:** *Coronadinium*, according to Odin (2009, p.187). Odin (2008) did not provide an English or Latin description; however, the name *Corbella* can be considered validly published as Odin was using the I.C.Z.N. (fide Odin, 2008, p.42). Type: Odin, 2008, appendix pl.2, fig.29, as *Corbella vitilis*.

"**vitalis*" Odin 2008, p.24–26, pl.9, figs.138; pl.10, figs.155–163; appendix pl.2, figs.29–30. Holotype: Odin, 2008, appendix pl.2, fig.29. **NOW** *Coronadinium*. Originally *Corbella*, subsequently (and now) *Coronadinium*. Odin (2008) did not provide an English or Latin description; however, the name *Corbella vitilis* can be considered validly published as Odin was using the I.C.Z.N. (fide Odin, 2008, p.42). Age: Campanian–Maastrichtian.

"subsp. *biremis*" Odin 2008, p.25–26, pl.10, figs.160–163; appendix pl.2, fig.30. Holotype: Odin, 2008, appendix pl.2, fig.30. **NOW** *Coronadinium vitilis* subsp. *biremis*. Originally *Corbella vitilis* subsp. *biremis*, subsequently (and now) *Coronadinium vitilis* subsp. *biremis*. Odin (2008) did not provide an English or Latin description; however, the name *Corbella vitalis* can be considered validly published as Odin was using the I.C.Z.N. (fide Odin, 2008, p.42). Age: Campanian–Maastrichtian.

"subsp. *vitalis*" Autonym. Holotype: Odin, 2008, appendix pl.2, fig.29. **NOW** *Coronadinium vitilis* subsp. *vitalis*. Originally *Corbella vitilis* subsp. *vitalis*, subsequently (and now) *Coronadinium vitilis* subsp. *vitalis*. Age: Campanian–Maastrichtian.

CORCULODINIUM Batten and Lister, 1988, p.350. Emendation: Courtinat, 2000, p.172. Type: Batten and Lister, 1988, figs.3h–i, as *Corculodinium uniconicum*.

inaffectum (Drugg, 1978, p.68, pl.3, figs.10–12) Courtinat, 2000, p.173. Holotype: Drugg, 1978, pl.3, fig.10. Originally *Geiselodinium*, subsequently *Subtilisphaera*, thirdly *Subtilisphaera?*, fourthly (and now) *Corculodinium*. Taxonomic junior synonym: *Geiselodinium paeminosum*, according to Courtinat (2000, p.173). Age: early Kimmeridgian.

***uniconicum** Batten and Lister, 1988, p.350–351, figs.3h–k. Holotype: Batten and Lister, 1988, figs.3h–i. Age: Barremian.

CORDOSPHAERIDIUM Eisenack, 1963b, p.261. Emendations: Morgenroth, 1968, p.548; Davey, 1969c, p.35; Sarjeant, 1981, p.100–101; He Chengquan, 1991, p.157–158,213. Taxonomic junior synonym: *Tityrosphaeridium*, according to Lentin and Williams (1985, p.70; 1989, p.370) and Edwards (2001, p.G19). Type: Klumpp, 1953, pl.18, figs.1–2, as *Hystrichosphaeridium inodes*.

aulichnum He Chengquan, 1991, p.165, pl.14, figs.1–2; text-fig.38. Holotype: He Chengquan, 1991, pl.14, fig.2. He Chengquan (1991, p.165) included this species in *Cordosphaeridium* subgenus *Tarimocystium*. Age: middle Eocene.

"**axiale**" Eisenack, 1965b, p.150, pl.15, figs.1–4. Holotype: Eisenack, 1965b, pl.15, fig.2. **NOW** *Fibrocyta*. Originally *Cordosphaeridium*, subsequently *Lanternosphaeridium*, thirdly *Amphorosphaeridium*, fourthly (and now) *Fibrocyta*. Age: late Eocene–early Oligocene.

biarmatum Morgenroth, 1966a, p.21, pl.4, figs.6–7. Holotype: Morgenroth, 1966a, pl.4, figs.6–7. Originally (and now) *Cordosphaeridium*, subsequently *Tityrosphaeridium?*. Lentin and Williams (1985, p.70) retained this species in *Cordosphaeridium*. Age: early Eocene.

"**bipolare**" Cookson and Eisenack, 1965b, p.135, pl.16, figs.7–8. Holotype: Cookson and Eisenack, 1965b, pl.16, fig.8. **NOW** *Fibrocyta*. Originally *Cordosphaeridium*, subsequently *Lanternosphaeridium*, thirdly *Amphorosphaeridium*, fourthly (and now) *Fibrocyta*. Age: early Eocene.

brevispinum He Chengquan, 1991, p.165, pl.20, fig.9. Holotype: He Chengquan, 1991, pl.20, fig.9. He Chengquan (1991, p.165) included this species in *Cordosphaeridium* subgenus *Tarimocystium*. Age: middle Eocene.

brevitubulosum He Chengquan, 1991, p.166,214, pl.13, figs.9–12; text-fig.39. Holotype: He Chengquan, 1991, pl.13, fig.12; text-fig.39. He Chengquan (1991, p.165,213) designated this species as the "type species" of *Cordosphaeridium* subgenus *Tarimocystium*. Age: middle Eocene.

?**callosum** Morgenroth, 1966a, p.21, pl.4, figs.8–10. Holotype: Morgenroth, 1966a, pl.4, figs.9–10. Originally *Cordosphaeridium*, subsequently (and now) *Cordosphaeridium?*, thirdly *Tityrosphaeridium?*. Lentin and Williams (1985, p.70) retained this species in *Cordosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.147). Age: early Eocene.

cantharellus (Brosius, 1963, p.40–41, pl.6, fig.1; text-fig.2, nos.11a–c) Gocht, 1969, p.45. Holotype: Brosius, 1963, pl.6, fig.1; Fensome et al., 1993a, fig.1 — p.1021. Originally *Hystrichosphaeridium*, subsequently (and now) *Cordosphaeridium*, thirdly *Tityrosphaeridium*. This species was retained in *Cordosphaeridium* by Edwards (2001, p.G19). This combination, as a questionable assignment, was not validly published in Davey and Williams (1966b, p.91), since these authors did not fully reference the basionym. N.I.A. Age: late Oligocene.

capillaceum Schumacker-Lambry, 1978, p.37–38, pl.2, figs.11–12. Holotype: Schumacker-Lambry, 1978, pl.2, fig.11. Age: late Paleocene (Landenian).

"**capricornum**" Cookson and Eisenack, 1965a, p.128–129, pl.15, figs.1–9. Emendation: Stover and Williams, 1995, p.107, as *Cooksonidium capricornum*. Holotype: Cookson and Eisenack, 1965a, pl.15, fig.7; Fauconnier and Masure, 2004, pl.7, figs.7–10. **NOW** *Cooksonidium*. Originally *Cordosphaeridium*, subsequently *Systematophora?*, thirdly *Areosphaeridium*, fourthly (and now) *Cooksonidium*. Taxonomic senior synonym: *Hystrichosphaeridium* (as *Areosphaeridium*) *dictyostilum*, according to Sarjeant (1981, p.115–116) — however,

Lentin and Williams (1985, p.26) retained *Cordosphaeridium* (as *Areosphaeridium*, now *Cooksonidium*) *capricornum*. Age: late Eocene.

catherineae Pearce, 2010, p.51–52, pl.1, figs.10–13; text-fig.3. Holotype: Pearce, 2010, pl.1, figs.10–13; text-fig.3. Age: middle-late Santonian to mid-early Campanian.

"centrocarpum" (Deflandre and Cookson, 1955, p.272–273, pl.8, figs.3–4) de Coninck, 1965, p.33. Holotype: Deflandre and Cookson, 1955, pl.8, figs.3–4; Matsuoka et al., 1997, pl.1, figs.1–6. **NOW** *Operculodinium centrocarpum*. Originally *Hystrichosphaeridium centrocarpum*, subsequently *Baltisphaeridium centrocarpum* (Appendix A), thirdly *Cordosphaeridium centrocarpum*, fourthly *Cordosphaeridium tiara* subsp. *centrocarpum*, fifthly (and now) *Operculodinium centrocarpum*, sixthly *Cordosphaeridium microtrianum* subsp. *centrocarpum*, seventhly *Cleistosphaeridium centrocarpum*. Taxonomic junior synonyms: *Operculodinium? echigoense*, according to Matsuoka et al. (1997, p.22); *Membranilarnacia delicata*, according to Jain (1980, p.140). Motile equivalent: *Peridinium* (now *Protoceratium*) *reticulatum* Claparède and Lachmann, 1859 (as *Gonyaulax grindleyi* Reinecke, 1967), according to Wall and Dale (1966, p.1025–1026) — however, see Head (1996b, p.1211). Age: Miocene.

"chimaera" Cookson and Eisenack, 1968, p.118, caption to figs.5M–N. **Name not validly published:** no description. N.I.A.

commune Corradini, 1973, p.151, pl.22, figs.1a–b; pl.33, figs.1,3. Holotype: Corradini, 1973, pl.22, figs.1a–b. Originally (and now) *Cordosphaeridium*, subsequently *Achomosphaera*. Lentin and Williams (1985, p.70) retained this species in *Cordosphaeridium*. Age: Late Cretaceous–Paleocene.

cordium Shaw Chenglong, 1999b, p.165–167, figs.10–15. Holotype: Shaw Chenglong, 1999b, figs.10–15. Age: Eocene.

"costatum" (Davey and Williams, 1966b, p.62, pl.10, fig.4) Górka, 1970, p.489–490. Holotype: Davey and Williams, 1966b, pl.10, fig.4; Stancliffe and Sarjeant, 1990, pl.3, fig.1. **NOW** *Compositosphaeridium* Dodekova. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly (and now) *Compositosphaeridium* Dodekova. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Compositosphaeridium?*) *polonicum*, according to Beju (1971, p.292) — however, Masure in Fauconnier and Masure (2004, p.137) retained *Compositosphaeridium costatum*. Age: Oxfordian.

?*cracenospinosum* Davey and Williams, 1966b, p.87, pl.3, fig.3 (not 4). Holotype: Davey and Williams, 1966b, pl.3, fig.3 (not 4); Bujak et al., 1980, pl.7, fig.9. Originally *Cordosphaeridium*, subsequently (and now) *Cordosphaeridium?*, thirdly *Achomosphaera?*. Lentin and Williams (1985, p.70) retained this species in *Cordosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.147). Age: early Eocene.

crassum He Chengquan, 1991, p.166, pl.14, fig.3. Holotype: He Chengquan, 1991, pl.14, fig.3. He Chengquan (1991, p.165) included this species in *Cordosphaeridium* subgenus *Tarimocystium*. Age: middle Eocene.

delimurum Fensome et al., 2009, p.23, pl.2, figs.l–q. Holotype: Fensome et al., 2009, pl.2, figs.l,p. Age: youngest occurrence, Lutetian.

"?difficile" (Manum and Cookson, 1964, p.12–14, pl.3, figs.1–3,7) Davey and Williams, 1966b, p.91. Holotype: Manum and Cookson, 1964, pl.3, fig.1; Fauconnier and Masure, 2004, pl.36, figs.2–4. **Combination not validly published:** basionym not fully referenced. **NOW** *Heterosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium?* (combination not validly published), thirdly (and now) *Heterosphaeridium*. Questionable assignment: Davey and Williams (1966b, p.91). Age: Cenomanian.

"digitatum" Wilson in Slimani, 2001a, p.193. **Name not validly published:** no description. **Taxonomic senior synonym:** *Diversispina* (as and now *Kleithriasphaeridium*) *truncata*, according to Slimani (2001a, p.193).

digitiforme He Chengquan, 1991, p.158, pl.19, figs.1–2; text-fig.33. Holotype: He Chengquan, 1991, pl.19, fig.1. Age: middle Eocene.

"**diktyoplokum**" (Klumpp, 1953, p.392, pl.18, figs.3–7, not pl.18, figs.8–10, which are now *Cordosphaeridium latum*) Eisenack, 1963b, p.262. Emendation: Eaton, 1971, p.358–359, as *Areosphaeridium diktyoplokum*. Holotype: Klumpp, 1953, pl.18, figs.3–4. **NOW** *Areosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly (and now) *Areosphaeridium*. Taxonomic junior synonym: *Hystrichosphaeridium* (now *Areosphaeridium*) *dictyostilum*, according to Eaton (1971, p.359) — however, Sarjeant (1981, p.115) retained *Hystrichosphaeridium* (as and now *Areosphaeridium*) *dictyostilum*. Age: middle-late Eocene.

"subsp. **diktyoplokum**". Autonym. Holotype: Klumpp, 1953, pl.18, figs.3–4. **Now redundant**. Originally *Hystrichosphaeridium diktyoplokum* subsp. *diktyoplokum*, subsequently *Cordosphaeridium diktyoplokum* subsp. *diktyoplokum*, thirdly *Areosphaeridium diktyoplokum* subsp. *diktyoplokum*.

"subsp. **latum**" (Klumpp, 1953, p.392, pl.18, figs.8–10) Eisenack, 1963b, p.262. Emendation: Sarjeant, 1981, p.106–107, as *Plethysyrinx lata* — however, see Lentin and Williams (1985, p.72). Holotype: Klumpp, 1953, pl.18, figs.8–9. **NOW** *Cordosphaeridium latum*. Originally *Hystrichosphaeridium diktyoplokum* subsp. *latum*, subsequently *Cordosphaeridium diktyoplokum* subsp. *latum*, thirdly *Areosphaeridium diktyoplokum* subsp. *latum*, fourthly *Plethysyrinx lata*, fifthly (and now) *Cordosphaeridium latum*. Age: Eocene.

"**divergens**" (Eisenack, 1954b, p.67, pl.9, figs.13–16) Eisenack, 1963b, p.262. Holotype: Eisenack, 1954b, pl.9, fig.14. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (combination not validly published, Appendix A), thirdly *Cordosphaeridium*, fourthly (and now) *Operculodinium*. Age: early Oligocene.

"**einodes**" (Eisenack, 1958a, p.402, pl.27, figs.3–4) Eisenack, 1963b, p.262. Emendation: Sarjeant, 1985a, p.74–75, as *Kleithriasphaeridium einodes*. Holotype: Eisenack, 1958a, pl.27, fig.3; Sarjeant, 1985a, pl.5, figs.3–4. **NOW** *Kleithriasphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly (and now) *Kleithriasphaeridium*. Taxonomic junior synonym: *Hystrichosphaeridium* (as *Kleithriasphaeridium*) *simplicispinum*, according to Below (1982c, p.17). Age: late Aptian.

"**?erectum**" (Manum and Cookson, 1964, p.14, pl.3, figs.5–6) Davey and Williams, 1969, p.6. Holotype: Manum and Cookson, 1964, pl.3, fig.5. **NOW** *Kiokansium?*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cordosphaeridium?*, fourthly *Cleistosphaeridium?*, fifthly (and now) *Kiokansium?*. Questionable assignment: Davey and Williams (1969, p.6). This combination, as a questionable assignment, was not validly published in Davey and Williams (1966b, p.91), since these authors did not fully reference the basionym. Age: Albian–Turonian.

"**exilimurum**" Davey and Williams, 1966b, p.87–88, pl.11, fig.2. Holotype: Davey and Williams, 1966b, pl.11, fig.2; Bujak et al., 1980, pl.7, figs.4–5. Originally *Cordosphaeridium*, subsequently *Hystrichosphaerina?*, thirdly *Tityrosphaeridium?*. Lentin and Williams (1989, p.73) retained this species in *Cordosphaeridium*. **Taxonomic senior synonym:** *Cordosphaeridium fibrospinum*, according to Fensome et al. (2009, p.23). Taxonomic junior synonym: *Achomosphaera* (subsequently *Cordosphaeridium*) *valianta*, according to Jain (1982, p.52). Age: early Eocene.

"**?fasciatum**" Davey and Williams, 1966b, p.90, pl.7, figs.5–6. Holotype: Davey and Williams, 1966b, pl.7, fig.5. **NOW** *Kleithriasphaeridium*. Originally *Cordosphaeridium?*, subsequently (and now) *Kleithriasphaeridium*. Questionable assignment: Davey and Williams (1966b, p.90). Age: Barremian.

"**?fibroferum**" Cookson and Eisenack, 1982, p.40, pl.5, figs.6–9. Holotype: Cookson and Eisenack, 1982, pl.5, fig.7. Questionable assignment: Cookson and Eisenack (1982, p.40). Lentin and Williams (1985, p.71) considered *Florentinia verdieri* to be a possible taxonomic junior synonym of this species. Age: Albian–Cenomanian.

"**fibrospinum**" Davey and Williams, 1966b, p.86, pl.5, fig.5. Emendation: Davey, 1969c, p.36, as a revised diagnosis for *Cordosphaeridium fibrospinum*. Holotype: Davey and Williams, 1966b, pl.5, fig.5; Bujak et al., 1980, pl.7, figs.3,6. Originally (and now) *Cordosphaeridium*, subsequently *Emmetrocyta?*, thirdly *Tityrosphaeridium?*. Lentin and Williams (1989, p.74) retained this species in *Cordosphaeridium*. Taxonomic

junior synonyms: *Cordosphaeridium exilimurum* and *Achomosphaera* (subsequently *Cordosphaeridium*) *valianta*, both according to Fensome et al. (2009, p.23). Age: early Eocene.

"*filosum*" Wilson, 1967a, p.66, figs.2b,31–32,34. Holotype: Wilson, 1967a, figs.2b,32. **NOW** *Turbiosphaera*. Originally *Cordosphaeridium*, subsequently (and now) *Turbiosphaera*. Age: Paleocene–Oligocene.

"*floripes*" (Deflandre and Cookson, 1955, p.276, pl.7, figs.1–2,7) Eisenack, 1963b, p.262. Holotype: Deflandre and Cookson, 1955, pl.7, fig.1. **NOW** *Homotryblium*. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly (and now) *Homotryblium*. Taxonomic junior synonym: *Homotryblium plectilum*, according to Bujak in Bujak et al. (1980, p.64) — however, Stover in Lentin and Williams (1985, p.168) retained *Homotryblium plectilum*. Age: Early Tertiary.

"subsp. *breviradiatum*" (Cookson and Eisenack, 1961b, p.44, pl.2, figs.10–11) Eisenack, 1963b, p.262. Holotype: Cookson and Eisenack, 1961b, pl.2, figs.10–11. **NOW** *Homotryblium floripes* subsp. *breviradiatum*. Originally *Hystrichosphaeridium floripes* subsp. *breviradiatum*, subsequently *Cordosphaeridium floripes* subsp. *breviradiatum*, thirdly (and now) *Homotryblium floripes* subsp. *breviradiatum*. Age: late Eocene.

"subsp. *floripes*". Autonym. Holotype: Deflandre and Cookson, 1955, pl.7, fig.1. **NOW** *Homotryblium floripes* subsp. *floripes*. Originally *Hystrichosphaeridium floripes* subsp. *floripes*, subsequently *Cordosphaeridium floripes* subsp. *floripes*, thirdly (and now) *Homotryblium floripes* subsp. *floripes*.

funiculatum Morgenroth, 1966a, p.22–23, pl.6, figs.2–3. Emendation: Brinkhuis, 1992, p.97, as *Cordosphaeridium funiculatum*. Holotype: Morgenroth, 1966a, pl.6, fig.2. Originally (and now) *Cordosphaeridium*, subsequently *Tityrosphaeridium*?. Lentin and Williams (1985, p.71) retained this species in *Cordosphaeridium*. Age: early Eocene.

furcans He Chengquan, 1991, p.159–160, pl.51, figs.13–14. Holotype: He Chengquan, 1991, pl.51, fig.13. Age: Paleocene.

gracile (Eisenack, 1954b, p.66, pl.8, fig.17; pl.10, figs.3–8; pl.12, figs.7,21) Davey and Williams, 1966b, p.84. Emendation: Davey and Williams, 1966b, p.84–85, as *Cordosphaeridium gracile*. Holotype: Eisenack, 1954b, pl.10, fig.5. Originally *Hystrichosphaeridium inodes* subsp. *gracile*, subsequently *Cordosphaeridium inodes* subsp. *gracile*, thirdly (and now) *Cordosphaeridium gracile*, fourthly *Tityrosphaeridium gracile*. Lentin and Williams (1985, p.71) retained this species in *Cordosphaeridium*. Age: Oligocene.

forma *areolatum* (Eisenack, 1954b, p.67, pl.12, fig.21) Williams and Fensome, 2016, p.140. Holotype: Eisenack, 1954b, p.67, pl.12, fig.21. Originally *Hystrichosphaeridium inodes* subsp. *gracile* forma *areolatum*, subsequently (and now) *Cordosphaeridium gracile* forma *areolatum*. Williams and Fensome (2016, p.140) noted that the distinctive surface texture described by Eisenack (1954b) may be a preservational artifact, and hence they recommended that this taxon be restricted to its type. Age: Oligocene.

forma *gracile*. Autonym. Holotype: Eisenack, 1954b, pl.10, fig.5. Originally *Hystrichosphaeridium inodes* subsp. *gracile* forma *gracile*, subsequently (and now) *Cordosphaeridium gracile* forma *gracile*.

granulatum Khanna and Singh, 1981b, p.403, fig.2, nos.11–12; text-fig.14. Holotype: Khanna and Singh, 1981b, fig.2, no.11. Age: late middle Eocene.

?*hirundo* (Eisenack, 1958a, p.404–405, pl.24, fig.12) Stover and Evitt, 1978, p.147. Emendation: Sarjeant, 1985a, p.76–77, as *Achomosphaera hirundo*. Holotype: Eisenack, 1958a, pl.24, fig.12. Originally *Hystrichosphaeridium*, subsequently *Achomosphaera*, thirdly *Lanternosphaeridium*, fourthly (and now) *Cordosphaeridium*?, fifthly *Spiniferites*?. Lentin and Williams (1989, p.74) questionably retained this species in *Cordosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.47). N.I.A. Age: Early Cretaceous.

**inodes* (Klumpp, 1953, p.391, pl.18, figs.1–2) Eisenack, 1963b, p.261. Emendations: Morgenroth, 1968, p.549–550, as *Cordosphaeridium inodes*; Sarjeant, 1981, p.102–105, as *Cordosphaeridium inodes* — however, see Lentin and Williams (1985, p.72). Holotype: Klumpp, 1953, pl.18, figs.1–2. Originally *Hystrichosphaeridium*, subsequently (and now) *Cordosphaeridium*. Jain and Garg (1986b, p.64–65) considered *Cordosphaeridium sanghamallae* to be a possible taxonomic junior synonym of this species. Age: late Eocene.

"subsp. *gracile*" (Eisenack, 1954b, p.66, pl.8, fig.17; pl.10, figs.3–8; pl.12, figs.7,21) Eisenack, 1963b, p.261. Emendation: Davey and Williams, 1966b, p.84–85, as *Cordosphaeridium gracile*. Holotype: Eisenack, 1954b, pl.10, fig.5. **NOW** *Cordosphaeridium gracile*. Originally *Hystrichosphaeridium inodes* subsp. *gracile*, subsequently *Cordosphaeridium inodes* subsp. *gracile*, thirdly (and now) *Cordosphaeridium gracile*, fourthly *Tityrosphaeridium gracile*. Age: Oligocene.

subsp. *inodes*. Autonym. Holotype: Klumpp, 1953, pl.18, figs.1–2. Originally *Hystrichosphaeridium inodes* subsp. *inodes*, subsequently (and now) *Cordosphaeridium inodes* subsp. *inodes*.

subsp. *longipes* Hansen, 1977, p.17,19, figs.17C–E. Holotype: Hansen, 1977, fig.17E. Age: early Paleocene.

"subsp. *minimum*" Morgenroth, 1966a, p.24, pl.5, figs.6–7. Holotype: Morgenroth, 1966a, pl.5, figs.6–7. **Taxonomic senior synonym at specific rank:** *Hystrichosphaeridium* (now *Minisphaeridium*) *latrictum*, according to Fensome et al. (2009, p.44). Originally *Cordosphaeridium inodes* subsp. *minimum*, subsequently *Cordosphaeridium minimum*. Age: early Eocene.

"subsp. *minus*" Morgenroth, 1966a, p.24, pl.5, figs.4–5. Holotype: Morgenroth, 1966a, pl.5, figs.4–5. **NOW** *Cordosphaeridium minus*. Originally *Cordosphaeridium inodes* subsp. *minus*, subsequently (and now) *Cordosphaeridium minus*. Age: early Eocene.

subsp. *ovale* He Chengquan, 1991, p.161, pl.17, figs.1–3. Holotype: He Chengquan, 1991, pl.17, fig.3. Age: middle Eocene.

"subsp. *robustum*" Gocht, 1969, p.42, pl.2, figs.1–2. Emendation: Sarjeant, 1981, p.105–106, as *Cordosphaeridium robustum* — however, see Lentin and Williams (1985, p.73). Holotype: Gocht, 1969, pl.2, fig.1. **NOW** *Cordosphaeridium robustum*. Originally *Cordosphaeridium inodes* subsp. *robustum*, subsequently (and now) *Cordosphaeridium robustum*. Age: Eocene.

"*israelianum*" (Rossignol, 1962, p.132, pl.2, fig.3) Lentin and Williams 1993, p.126. Holotype: Rossignol, 1962, pl.2, fig.3. **Combination not validly published:** not intended. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium* (combination not validly published), fourthly (and now) *Operculodinium*, fifthly *Cordosphaeridium* (combination not validly published). Taxonomic junior synonyms: *Cleistosphaeridium cephalum*, according to Jain and Garg (1991, p.78); *Operculodinium crassum*, according to Edwards and Andrie (1992, p.262) — however, Head (1996b, p.1231) retained *Operculodinium crassum*; and *Hystrichosphaeridium westii* (name not validly published), by implication in Wall and Dale (1968a, p.315, as "hystrichosphere type x of West"). It is clear from the fact that Lentin and Williams (1989, p.126) attributed this combination to Davey et al. (1966) that they did not intend to effect this combination; Davey et al. proposed the combination *Cleistosphaeridium israelianum*. Motile equivalent: *Peridinium* (now *Protoceratium*) *reticulatum* Claparède and Lachmann, 1859, questionably according to Wall and Dale (1968c, p.272), and without question according to Matsuoka (1989, p.224). Age: Pleistocene.

"*klumppiae*" Corradini, 1973, p.152, pl.22, figs.2a–c. Holotype: Corradini, 1973, pl.22, figs.2a–c. **NOW** *Fibrocysta*. Originally *Cordosphaeridium*, subsequently (and now) *Fibrocysta*. Age: Late Cretaceous–Paleocene.

"*latispinosum*" Davey and Williams, 1966b, p.88, pl.5, fig.8. Holotype: Davey and Williams, 1966b, pl.5, fig.8; Bujak et al., 1980, pl.8, figs.7–9. **NOW** *Achilleodinium*. Originally *Cordosphaeridium*, subsequently (and now) *Achilleodinium*, thirdly *Tityrosphaeridium*?. Age: early Eocene.

latum (Klumpp, 1953, p.392, pl.18, figs.8–10) Lentin and Williams, 1985, p.72. Emendation: Sarjeant, 1981, p.106–107, as *Plethysyrinx lata* — however, see Lentin and Williams (1985, p.72). Holotype: Klumpp, 1953, pl.18, figs.8–9; Sarjeant, 1981, pl.5, figs.2–3 (not 3–4). Originally *Hystrichosphaeridium diktyoplokum* subsp. *latum*, subsequently *Cordosphaeridium diktyoplokum* subsp. *latum*, thirdly *Areosphaeridium diktyoplokum* subsp. *latum*, fourthly *Plethysyrinx lata*, fifthly (and now) *Cordosphaeridium latum*. Age: Eocene.

"*lemniscatum*" Corradini, 1973, p.152–153, pl.22, figs.4a–b,5; pl.33, figs.2,4; pl.39, fig.2. Holotype: Corradini, 1973, pl.22, fig.5; Fensome et al., 1995, fig.3 — p.1601. **NOW** *Disphaerogena*. Originally *Cordosphaeridium*, subsequently *Cordosphaeridium?*, thirdly *Plethysyrinx*, fourthly *Cyclapophysis*, fifthly (and now) *Disphaerogena*. Questionable assignment: Stover and Evitt (1978, p.147). Age: Late Cretaceous–Paleocene.

"*majus*" (Lejeune-Carpentier, 1940, p.B220–B221; text-fig.13) Corradini, 1973, p.149. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.12, as *Amphorosphaeridium majus*. Holotype: Lejeune-Carpentier, 1940, text-fig.13; Strel et al., 1977, pl.1, fig.7; Lejeune-Carpentier and Sarjeant, 1981, pl.2, figs.6–7; text-fig.7. **NOW** *Exochosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*, thirdly *Cordosphaeridium*, fourthly *Dapsilidinium?* (combination not validly published), fifthly *Amphorosphaeridium*, sixthly (and now) *Exochosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.76). Taxonomic junior synonym: *Baltisphaeridium* (as *Exochosphaeridium*) *bifidum*, including the subspecies *Exochosphaeridium bifidum* var. *involutum* (as *Exochosphaeridium bifidum* subsp. *involutum*), both according to Peyrot (2011, p.284). Age: Late Cretaceous.

"*microtriainum*" (Klumpp, 1953, p.390, pl.17, figs.6–7) Eisenack 1963b, p.263. Emendation: Sarjeant, 1981, p.110–112, as *Achomosphaera microtriaina*. Holotype: Klumpp, 1953, pl.17, figs.6–7; Sarjeant, 1981, pl.2, figs.1–2; text-fig.2. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly *Cordosphaeridium?*, fourthly *Polysphaeridium*, fifthly *Achomosphaera*, sixthly (and now) *Operculodinium*. Questionable assignment: Stover and Evitt (1978, p.147) as a problematic species. Age: late Eocene.

"subsp. *centrocarpum*" (Deflandre and Cookson, 1955, p.272–273, pl.8, figs.3–4) de Coninck, 1969, p.32. Holotype: Deflandre and Cookson, 1955, pl.8, figs.3–4; Matsuoka et al., 1997, pl.1, figs.1–6. **NOW** *Operculodinium centrocarpum*. Originally *Hystrichosphaeridium centrocarpum*, subsequently *Baltisphaeridium centrocarpum* (Appendix A), thirdly *Cordosphaeridium centrocarpum*, fourthly *Cordosphaeridium tiara* subsp. *centrocarpum*, fifthly (and now) *Operculodinium centrocarpum*, sixthly *Cordosphaeridium microtriainum* subsp. *centrocarpum*, seventhly *Cleistosphaeridium centrocarpum*. Taxonomic junior synonyms: *Operculodinium? echigoense*, according to Matsuoka et al. (1997, p.22); *Membranilarnacia delicata*, according to Jain (1980, p.140). Motile equivalent: *Peridinium* (now *Protoceratium*) *reticulatum* Claparède and Lachmann, 1859 (as *Gonyaulax grindleyi* Reinecke, 1967), according to Wall and Dale (1966, p.1025–1026) — however, see Head (1996b, p.1211). Age: Miocene.

"subsp. *microtriainum*". Autonym. Holotype: Klumpp, 1953, pl.17, figs.6–7 and Sarjeant, 1981, pl.2, figs.1–2; text-fig.2. **Now redundant**.

"var. *microtriainum*". Autonym. Holotype: Klumpp, 1953, pl.17, figs.6–7 and Sarjeant, 1981, pl.2, figs.1–2; text-fig.2. **Now redundant**.

"subsp. *nanus*" (Rozen, 1965, p.311, pl.2, figs.7–8; text-fig.21) Lentin and Williams, 1973, p.33. Holotype: Rozen, 1965, pl.2, figs.7–8. **NOW** *Impletosphaeridium nanus*. Originally *Cordosphaeridium microtriainum* var. *nanus*, subsequently *Cordosphaeridium microtriainum* subsp. *nanus*, thirdly *Cleistosphaeridium? nanus*, fourthly (and now) *Impletosphaeridium nanus*. N.I.A. Age: late Eocene.

"var. *nanus*" Rozen, 1965, p.311, pl.2, figs.7–8; text-fig.21. Holotype: Rozen, 1965, pl.2, figs.7–8. **NOW** *Impletosphaeridium nanus*. Originally *Cordosphaeridium microtriainum* var. *nanus*, subsequently *Cordosphaeridium microtriainum* subsp. *nanus*, thirdly *Cleistosphaeridium? nanus*, fourthly (and now) *Impletosphaeridium nanus*. N.I.A. Age: late Eocene.

"*minimum*" (Morgenroth, 1966a, p.24, pl.5, figs.6–7) Benedek, 1972, p.25–26. Holotype: Morgenroth, 1966a, pl.5, figs.6–7. **Taxonomic senior synonym at specific rank:** *Hystrichosphaeridium* (now *Minisphaeridium*) *latirictum*

according to Fensome et al. (2009, p.44). Originally *Cordosphaeridium inodes* subsp. *minimum*, subsequently *Cordosphaeridium minimum*. Age: early Eocene.

minus (Morgenroth, 1966a, p.24, pl.5, figs.4–5) Islam, 1983b, p.338. Holotype: Morgenroth, 1966a, pl.5, figs.4–5. Originally *Cordosphaeridium inodes* subsp. *minus*, subsequently (and now) *Cordosphaeridium minus*. Age: early Eocene.

mirabile He Chengquan, 1991, p.162, pl.15, fig.7; text-fig.34. Holotype: He Chengquan, 1991, pl.15, fig.7; text-fig.34. Age: Paleocene–middle Eocene.

moniliforme He Chengquan, 1991, p.161–162, pl.24, figs.9–12. Holotype: He Chengquan, 1991, pl.24, fig.10. Age: Paleocene.

"multispinosum" Davey and Williams, 1966b, p.89–90, pl.3, fig.6. Holotype: Davey and Williams, 1966b, pl.3, fig.6; Bujak et al., 1980, pl.7, figs.1–2. **NOW** *Amphorosphaeridium?*. Originally *Cordosphaeridium*, subsequently (and now) *Amphorosphaeridium?*. Age: early Eocene.

odontodes He Chengquan, 1991, p.163, pl.15, fig.6; pl.19, figs.3,8; text-fig.35. Holotype: He Chengquan, 1991, pl.19, fig.3. Age: middle Eocene.

operculatum He Chengquan, 1991, p.166–167, pl.14, figs.4–6; text-figs.40a–b. Holotype: He Chengquan, 1991, pl.14, fig.5; text-fig.40b. He Chengquan (1991, p.166) included this species in *Cordosphaeridium* subgenus *Tarimocystium*. Age: middle Eocene.

"palmatum" (White, 1842, p.39–40, pl.4, fig.12) de Coninck, 1965, p.32. Holotype: White, 1842, pl.4, fig.12. Originally *Xanthidium tubiferum* var. *palmatum* (Appendix A), subsequently *Xanthidium palmatum* (Appendix A), thirdly *Spiniferites palmatus*, fourthly *Cordosphaeridium palmatum*, fifthly *Hystrichosphaeridium palmatum* (combination illegitimate), sixthly *Hystrichosphaeridium duplum* (name illegitimate). **Nomenclatural senior synonym:** *Xanthidium tubiferum* var. *recurvatum* (as *Hystrichosphaeridium recurvatum*), which has the same type. Nomenclatural junior synonyms: *Xanthidium tubiferum* var. *palmaforme* and *Hystrichosphaeridium duplum*, both of which have the same holotype as *Hystrichosphaeridium palmatum*. This is not an illegitimate combination. For a full discussion, see *Hystrichosphaeridium recurvatum*. Age: Senonian.

reticulatum He Chengquan, 1991, p.163–164, pl.20, figs.6–7; text-fig.36. Holotype: He Chengquan, 1991, pl.20, fig.7. Age: Paleocene–early Eocene.

robustum (Gocht, 1969, p.42, pl.2, figs.1–2) Sarjeant, 1981, p.105. Emendation: Sarjeant, 1981, p.105–106, as *Cordosphaeridium robustum* — however, see Lentin and Williams (1985, p.73). Holotype: Gocht, 1969, pl.2, fig.1; Sarjeant, 1981, pl.2, figs.1–2. Originally *Cordosphaeridium inodes* subsp. *robustum*, subsequently (and now) *Cordosphaeridium robustum*. Islam (1983a, p.235) also proposed this combination. Age: Eocene.

sangchamallae Mehrotra and Sinha, 1981, p.153, pl.2, figs.7–8. Holotype: Mehrotra and Sinha, 1981, pl.2, fig.7. Jain and Garg (1986b, p.64–65) considered *Hystrichosphaeridium* (as *Cordosphaeridium*) *inodes* to be the possible senior synonym of this species. Age: Late Cretaceous (following Jain and Garg, 1986b, p.64–65).

senegalense Jain and Millepied, 1975, p.149, pl.5, fig.68. Holotype: Jain and Millepied, 1975, pl.5, fig.68. Originally (and now) *Cordosphaeridium*, subsequently *Tityrosphaeridium?*. Lentin and Williams (1985, p.73) retained this species in *Cordosphaeridium*. Age: Campanian–Maastrichtian.

?simplex Michael, 1964, p.32–33, pl.3, fig.4. Holotype: Michael, 1964, pl.3, fig.4. Originally *Cordosphaeridium*, subsequently (and now) *Cordosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.147). Age: early Barremian.

"solaster" Morgenroth, 1966a, p.25, pl.5, figs.8–9. Holotype: Morgenroth, 1966a, pl.5, figs.8–9. **NOW** *Exochosphaeridium?*. Originally *Cordosphaeridium*, subsequently (and now) *Exochosphaeridium?*. Age: early Eocene.

?*solidospinosum* Gedl, 1995, p.197, pl.4, fig.2; pl.5, figs.7–8. Holotype: Gedl, 1995, pl.5, figs.7–8. Questionable assignment: Gedl (1995, p.197). Age: early-middle Eocene.

"*spinosum*" (White, 1842, p.37, pl.4, fig.6) de Coninck, 1965, p.31. Holotype: White, 1842, pl.4, fig.6; lost according to Sarjeant (1966b, p.141). **Combination not validly published**: basionym not fully referenced. **NOW** *Exochosphaeridium*?. Originally *Xanthidium* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly *Baltisphaeridium* (Appendix A), fourthly *Cordosphaeridium* (combination not validly published), fifthly *Exochosphaeridium*, sixthly (and now) *Exochosphaeridium*?. Age: Late Cretaceous.

"var. *deflandrei*" (Lejeune-Carpentier, 1941, p.84, fig.6) de Coninck, 1965, p.31. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.14, as *Fibrocysta? deflandrei*. Holotype: Lejeune-Carpentier, 1941, fig.6; Lejeune-Carpentier and Sarjeant, 1981, pl.4, figs.5–6; text-fig.8. **Combination not validly published**: basionym not fully referenced. **NOW** *Fibrocysta? deflandrei*. Originally *Hystrichosphaeridium spinosum* var. *deflandrei*, subsequently *Baltisphaeridium spinosum* var. *deflandrei* (Appendix A), thirdly *Cordosphaeridium spinosum* var. *deflandrei* (combination not validly published), fourthly *Exochosphaeridium spinosum* var. *deflandrei*, fifthly *Exochosphaeridium spinosum* subsp. *deflandrei*, sixthly *Exochosphaeridium? spinosum* subsp. *deflandrei*, seventhly (and now) *Fibrocysta? deflandrei*. Age: Late Cretaceous.

taeniforme He Chengquan, 1991, p.164, pl.18, figs.8–9; text-fig.37. Holotype: He Chengquan, 1991, pl.18, fig.9. Age: middle Eocene.

taiwanianum Shaw Chenglong, 1999b, p.168, figs.16–19. Holotype: Shaw Chenglong, 1999b, figs.16–17. Age: Eocene.

?*tenuistriatum* Heisecke, 1970, p.245, pl.7, fig.1; pl.12, figs.3–4. Emendation: Quattrocchio and Sarjeant, 1996, p.118, as *Tityrosphaeridium tenuistriatum*. Holotype: Heisecke, 1970, pl.7, fig.1; pl.12, figs.3–4. Originally *Cordosphaeridium*, subsequently (and now) *Cordosphaeridium*?, thirdly *Tityrosphaeridium*?, fourthly *Tityrosphaeridium*. This species is here retained questionably in *Cordosphaeridium* since *Tityrosphaeridium* is now considered a taxonomic junior synonym of *Cordosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.147). Age: early Paleocene.

tianshanense He Chengquan, 1991, p.164, pl.18, figs.4–7. Holotype: He Chengquan, 1991, pl.18, fig.4. Age: middle Eocene.

"*tiara*" (Klumpp, 1953, p.390–391, pl.17, figs.8–10) Morgenroth, 1966a, p.25. Holotype: Klumpp, 1953, pl.17, figs.8–9. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cordosphaeridium*, fourthly *Cleistosphaeridium*, fifthly (and now) *Operculodinium*. N.I.A. Age: Eocene.

"subsp. *centrocarpum*" (Deflandre and Cookson, 1955, p.272–273, pl.8, figs.3–4) Morgenroth, 1966a, p.26. Holotype: Deflandre and Cookson, 1955, pl.8, figs.3–4; Matsuoka et al., 1997, pl.1, figs.1–6. **NOW** *Operculodinium centrocarpum*. Originally *Hystrichosphaeridium centrocarpum*, subsequently *Baltisphaeridium centrocarpum* (Appendix A), thirdly *Cordosphaeridium centrocarpum*, fourthly *Cordosphaeridium tiara* subsp. *centrocarpum*, fifthly (and now) *Operculodinium centrocarpum*, sixthly *Cordosphaeridium microtriainum* subsp. *centrocarpum*, seventhly *Cleistosphaeridium centrocarpum*. Taxonomic junior synonyms: *Operculodinium? echigoense*, according to Matsuoka et al. (1997, p.22); *Membranilarnacia delicata*, according to Jain (1980, p.140). Motile equivalent: *Peridinium* (now *Protoceratium*) *reticulatum* Claparède and Lachmann, 1859 (as *Gonyaulax grindleyi* Reinecke, 1967), according to Wall and Dale (1966, p.1025–1026) — however, see Head (1996b, p.1211). Age: Miocene.

"subsp. *tiara*". Autonym. Holotype: Klumpp, 1953, pl.17, figs.8–9. **Now redundant**. N.I.A.

?*trompetum* (Cookson and Eisenack, 1982, p.47, pl.4, fig.22) Lentin and Williams, 1985, p.74. Holotype: Cookson and Eisenack, 1982, pl.4, fig.22. Originally *Polysphaeridium*, subsequently (and now) *Cordosphaeridium*?. Questionable assignment: Lentin and Williams (1985, p.74). N.I.A. Age: Paleocene.

"truncigerum" (Deflandre, 1937b, p.71–72, pl.13 (al. pl.10), figs.6–7) de Coninck, 1975, p.80. Holotype: Deflandre, 1937b, pl.13 (al. pl.10), fig.6. **NOW** *Raetiaedinium*. Originally *Hystrichosphaeridium*, subsequently *Litosphaeridium?*, thirdly *Cordosphaeridium*, fourthly *Exochosphaeridium*, fifthly *Pervosphaeridium*, sixthly *Tityrosphaeridium?*, seventhly *Florentinia*, eighthly *Pervosphaeridium?*, ninthly (and now) *Raetiaedinium*. Taxonomic senior synonym: *Xanthidium* (now *Hystrichokolpoma*) *crassipes*, by implication in Yun Hyesu (1981, p.27), who considered *Cordosphaeridium* (as *Pervosphaeridium*) *truncigerum* to be the senior name — however, Lentin and Williams (1985, p.282) retained *Cordosphaeridium* (as *Pervosphaeridium*) *truncigerum*. Taxonomic junior synonym: *Laticavodinium latispinosum* (name not validly published), according to Slimani (2001a, p.194). Age: Senonian.

"?uncinispinosum" de Coninck, 1969, p.32–33, pl.9, figs.6–8. Holotype: de Coninck, 1969, pl.9, figs.6–8. **NOW** *Operculodinium*. Originally *Cordosphaeridium*, subsequently *Cordosphaeridium?*, thirdly *Cleistosphaeridium*, fourthly (and now) *Operculodinium*. Questionable assignment: Stover and Evitt (1978, p.147) as a problematic species. Age: early Eocene.

"valiantum" (Sah et al., 1970, p.145, pl.1, figs.8–9) Stover and Evitt, 1978, p.147. Holotype: Sah et al., 1970, pl.1, fig.8. Originally *Achomosphaera*, subsequently *Cordosphaeridium*. **Taxonomic senior synonym:** *Cordosphaeridium fibrospinosum*, according to Fensome et al. (2009, p.23). Taxonomic senior synonym: *Cordosphaeridium exilimurum*, according to Jain (1982, p.52). Age: Late Cretaceous.

varians May, 1980, p.47–48, pl.2, figs.4,7–8; pl.14, figs.1–3; pl.15, figs.2a–b,3a–d; pl.16, figs.6a–10b. Holotype: May, 1980, pl.2, figs.4,7–8. Age: Campanian–Maastrichtian.

vulgatum Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.64–65, pl.13, figs.10–13. Holotype: Liu Zhili et al., 1992, pl.13, fig.13. Age: Early Tertiary.

"xanthium" Benedek, 1972, p.27–28, pl.9, fig.8; text-fig.9. Emendation: Benedek and Sarjeant, 1981, p.342–343, as *Lingulodinium xanthium*. Holotype: Benedek, 1972, pl.9, fig.8; Benedek and Sarjeant, 1981, fig.9, no.5. **NOW** *Operculodinium*. Originally *Cordosphaeridium*, subsequently (and now) *Operculodinium*, thirdly *Lingulodinium*. Age: middle-late Oligocene.

CORDOSPHAERIDIUM subgenus **CORDOSPHAERIDIUM**. Autonym. All the species of the autonym are those included under the entry for the genus, but not specified as belonging to *Cordosphaeridium* subgenus *Tarimocystium*. Type: Klumpp, 1953, pl.18, figs.1–2, as *Hystrichosphaeridium inodes*.

CORDOSPHAERIDIUM subgenus **TARIMOCYSTIUM** He Chengquan, 1991, p.165,213–214. He Chengquan (1991, p.165) included the following species in this subgenus: *Cordosphaeridium aulichnum*, *Cordosphaeridium brevispinum*, *Cordosphaeridium brevitubulosum*, *Cordosphaeridium crassum*, and *Cordosphaeridium operculatum*. Citations for the above species are included under *Cordosphaeridium*. He Chengquan et al. (2009, p.148–150) also used this subgenus name. Type: He Chengquan, 1991, pl.13, fig.12; text-fig.39, as *Cordosphaeridium (Tarimocystium) brevitubulosum*.

CORNUDINIUM Pocock, 1972, p.93. Type: Pocock, 1972, pl.24, fig.15, as *Cornudinium stavelense*.

bicuneatum (Deflandre, 1939a, p.180, pl.8, fig.7 ex Sarjeant, 1967b, p.248) Courtinat, 1989, p.220. Holotype: Deflandre, 1939a, pl.8, fig.7. Originally *Palaeoperidinium*, subsequently *Scrinioidinium*, thirdly *Glossodinium*, fourthly *Dinopterygium*, fifthly (and now) *Cornudinium*. The name *Palaeoperidinium bicuneatum* was not validly published in Deflandre (1939a) since the generic name *Palaeoperidinium* was not validly published until 1967. Williams et al. (1998, p.141) accepted Sarjeant's (1967b) indirect reference to Deflandre (1939a), in which the name *Palaeoperidinium bicuneatum* was first proposed, as indication of a type (I.C.N. Article 40.3). Age: Oxfordian.

**stavelyense* Pocock, 1972, p.94, pl.24, figs.15–16. Holotype: Pocock, 1972, pl.24, fig.15; Jansonius, 1986, pl.5, figs.7–8. Age: ?late Callovian–Oxfordian (following Jansonius in Lentin and Williams, 1989, p.76).

CORONADINIUM Willems in Williams et al., 1998, p.141. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1299, the latter noting that the cyst wall is pithonelloid and so dinoflagellate affinity is questionable). Substitute name for *Amphora* Willems, 1995a, p.66–67 (an illegitimate name). Taxonomic junior synonym: *Corbella* Odin 2008, according to Odin (2009, p.187). Type: Willems, 1995a, pl.3, figs.1–3, as *Amphora coronata*.

**coronatum* (Willems, 1995a, p.67,69, pl.3, figs.1–6; pl.4, figs.1–4) Willems in Williams et al., 1998, p.142. Holotype: Willems, 1995a, pl.3, figs.1–3. Originally *Amphora* (generic name illegitimate), subsequently (and now) *Coronadinium*. Age: early Campanian.

vitis (Odin 2008, p.24–26, pl.9, figs.138; pl.10, figs.155–163; appendix pl.2, figs.29–30) Odin, 2009, p.187. Holotype: Odin, 2008, appendix pl.2, fig.29. Originally *Corbella*, subsequently (and now) *Coronadinium*. Age: Campanian–Maastrichtian.

subsp. *biremis* (Odin, 2008, p.25–26, pl.10, figs.160–163; appendix pl.2, fig.30) Odin 2009, p.187. Holotype: Odin, 2008, appendix pl.2, fig.30. Originally *Corbella vitilis* subsp. *biremis*, subsequently (and now) *Coronadinium vitilis* subsp. *biremis*. Odin (2009, p.187) did not fully reference the basionym when he proposed this combination; however, as he was using the I.C.Z.N., the name can be considered validly published. Age: Campanian–Maastrichtian.

subsp. *vitis* Autonym. Holotype: Odin, 2008, appendix pl.2, fig.29. Originally *Corbella vitilis* subsp. *vitis*, subsequently (and now) *Coronadinium vitilis* subsp. *vitis*. Age: Campanian–Maastrichtian.

CORONIFERA Cookson and Eisenack, 1958, p.45. Emendations: Davey, 1969a, p.161; Davey, 1974, p.47; May, 1980, p.48; Mao Shaozhi and Norris, 1988, p.35–36. Type: Cookson and Eisenack, 1958, pl.12, fig.6, as *Coronifera oceanica*.

albertii Millioud, 1969, p.425–426, pl.1, fig.4. Holotype: Millioud, 1969, pl.1, fig.4. Age: late Hauterivian.

caperata Jiabo, 1978, p.65, pl.23, fig.18; text-fig.10. Holotype: Jiabo, 1978, pl.23, fig.18; text-fig.10. Age: Early Tertiary.

granulata Slimani, 1994, p.71–72, pl.11, figs.1–4. Holotype: Slimani, 1994, pl.11, figs.1–4. Age: latest early–late Maastrichtian.

hebspina (Yun Hyesu, 1981, p.23–24, pl.12, figs.2,4,6a–b; text-fig.6b) Peyrot, 2011, p.288. Holotype: Yun Hyesu, 1981, pl.12, figs.6a–b; Fensome et al., 1991, figs.3–4 — p.643; fig.3 — p.697. Originally *Coronifera oceanica* subsp. *hebspina*, subsequently *Coronifera pedata* subsp. *hebspina*, thirdly (and now) *Coronifera hebspina*. Lentin and Williams (1989, p.77) inadvertently both transferred this taxon to *Coronifera pedata* and retained it as a subspecies of *Coronifera oceanica*. Lentin and Williams (1993, p.131) retained this taxon as a subspecies of *Coronifera oceanica*. Age: early Santonian.

"*kaiseri*" Ashraf, 1979, p.139–140, pl.8, figs.7–8. Holotype: Ashraf, 1979, pl.8, fig.7. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as *Florentinia*) *radiculatum*, according to Below (1982c, p.9). Age: Early Cretaceous.

kirae Prössl, 1992a, p.264–265, pl.2, figs.1–2,5–7,11; text-figs.3a–b. Holotype: Prössl, 1992a, pl.2, figs.5–6. Age: middle Albian.

minor (Yu Jingxian and Zhang Wangping, 1980, p.111–112, pl.4, figs.4–5) Mao Shaozhi and Norris, 1988, p.36. Emendation: Mao Shaozhi and Norris, 1988, p.36, as *Coronifera minor*. Holotype: Yu Jingxian and Zhang

Wangping, 1980, pl.4, fig.5. Originally *Diphyes*, subsequently (and now) *Coronifera*. Age: Cenomanian–Santonian.

minuta Xu Jinli et al., 1997, p.100–101, pl.22, fig.11 ex He Chengquan et al., 2009, p.653. Holotype: Xu Jinli et al., 1997, pl.22, fig.11. The name was not validly published in Xu Jinli et al. (1997), since no English or Latin description was provided; He Chengquan et al. (2009, p.653) validated the name by publishing an English diagnosis. Age: middle-late Eocene.

"*monstruosa*" (Tasch in Tasch et al., 1964, p.195, pl.1, fig.12) Stover and Evitt, 1978, p.148. Holotype: Tasch et al., 1964, pl.1, fig.12. Originally *Hystrichosphaeridium*, subsequently (and now) *Diphyes?*, thirdly *Coronifera*. Taxonomic senior synonym: *Coronifera oceanica*, according to Below (1982c, p.5) — however, Fauconnier in Fauconnier and Masure (2004, p.176) retained *Hystrichosphaeridium* (as *Diphyes?*) *monstruosum*. Age: Albian.

**oceanica* Cookson and Eisenack, 1958, p.45, pl.12, figs.5–6. Emendation: May, 1980, p.48–49. Holotype: Cookson and Eisenack, 1958, pl.12, fig.6; Fensome et al., 1991, fig.2 — p.697; fig.2 — p.701. Taxonomic senior synonym: *Hystrichosphaera?* (as *Coronifera*) *pedata*, according to Sarjeant (1985b, p.145–147) — however, Kirsch (1991, p.71) retained *Coronifera oceanica*. Taxonomic junior synonym: *Hystrichosphaeridium* (as *Coronifera*) *monstruosum*, according to Below (1982c, p.5) — however, Fauconnier in Fauconnier and Masure (2004, p.176) retained *Hystrichosphaeridium* (as *Diphyes?*) *monstruosum*. Age: Albian.

"subsp. *hebspina*" Yun Hyesu, 1981, p.23–24, pl.12, figs.2,4,6a–b; text-fig.6b. Holotype: Yun Hyesu, 1981, pl.12, figs.6a–b; Fensome et al., 1991, figs.3–4 — p.643; fig.3 — p.697. **NOW** *Coronifera hebspina*. Originally *Coronifera oceanica* subsp. *hebspina*, subsequently *Coronifera pedata* subsp. *hebspina*, thirdly (and now) *Coronifera hebspina*. Age: early Santonian.

subsp. *magna* (Wetzel, 1955, p.35,38, figs.9–10,14) Sarjeant, 1984c, p.138–139. Emendation: Sarjeant, 1984c, p.138–139, as *Coronifera oceanica* subsp. *magna*. Holotype: Wetzel, 1955, fig.9; Sarjeant, 1984c, pl.5, figs.4–5; text-fig.11 (two illustrations); Fensome et al., 1991, figs.1–3 — p.663; fig.1 — p.697. Originally *Hystrichosphaeridium pseudhystrichodinium* subsp. *magnum*, subsequently *Baltisphaeridium pseudhystrichodinium* subsp. *magnum* (Appendix A), thirdly (and now) *Coronifera oceanica* subsp. *magna*, fourthly *Coronifera pedata* subsp. *magna*. Lentin and Williams (1989, p.77) retained this taxon as a subspecies of *Coronifera oceanica*. Age: Paleocene.

subsp. *oceanica*. Autonym. Holotype: Cookson and Eisenack, 1958, pl.12, fig.6; Fensome et al., 1991, fig.2 — p.697; fig.2 — p.701.

?*ovata* Jiabo, 1978, p.66, pl.23, fig.19. Holotype: Jiabo, 1978, pl.23, fig.19. Questionable assignment: He Chengquan et al. (2009, p.221). Age: Early Tertiary.

pedata (Wetzel, 1933b, p.55–56, pl.4, fig.35 ex Downie and Sarjeant, 1965, p.119) Sarjeant, 1985b, p.145–147. Emendation: Sarjeant, 1985b, p.145–146, as *Coronifera pedata*. Holotype: Wetzel, 1933b, pl.4, fig.35; Sarjeant, 1985b, pl.4, fig.5. Originally *Hystrichosphaera?*, subsequently *Spiniferites?*, thirdly (and now) *Coronifera*. Taxonomic senior synonym: *Coronifera oceanica*, by implication in Sarjeant (1985b, p.145–147), who believed *Hystrichosphaera* (as *Coronifera*) *pedata* to be the senior name — however, Kirsch (1991, p.71) retained the two species. The name *Hystrichosphaera? pedata* was not validly published in Wetzel (1933b) since the generic name *Hystrichosphaera* was not validly published until 1937. Age: Late Cretaceous.

"subsp. *hebspina*" (Yun Hyesu, 1981, p.23–24, pl.12, figs.2,4,6a–b; text-fig.6b) Lentin and Williams, 1989, p.77. Holotype: Yun Hyesu, 1981, pl.12, figs.6a–b; Fensome et al., 1991, figs.3–4 — p.643; fig.3 — p.697. **NOW** *Coronifera hebspina*. Originally *Coronifera oceanica* subsp. *hebspina*, subsequently *Coronifera pedata* subsp. *hebspina*, thirdly (and now) *Coronifera hebspina*. Lentin and Williams (1989, p.77) incorrectly attributed this combination to Sarjeant (1985b, p.147). Age: early Santonian.

"subsp. *magna*" (Wetzel, 1955, p.35,38, figs.9–10,14) Sarjeant, 1985b, p.147. Emendation: Sarjeant, 1984c, p.138–139, as *Coronifera oceanica* subsp. *magna*. Holotype: Wetzel, 1955, fig.9; Sarjeant, 1984c, pl.5, figs.4–5; text-fig.11 (two illustrations), and Fensome et al., 1991, figs.1–3 — p.663; fig.1 — p.697.

NOW *Coronifera oceanica* subsp. *magna*. Originally *Hystrichosphaeridium pseudhystrichodinium* subsp. *magnum*, subsequently *Baltisphaeridium pseudhystrichodinium* subsp. *magnum* (Appendix A), thirdly (and now) *Coronifera oceanica* subsp. *magna*, fourthly *Coronifera pedata* subsp. *magna*. Age: Paleocene.

"subsp. *pedata*". Autonym. Holotype: Wetzel, 1933b, pl.4, fig.35; Sarjeant, 1985b, pl.4, fig.5. **Now redundant.**

striolata (Deflandre, 1937b, p.72–73, pl.15 [al. pl.12], figs.1–2) Stover and Evitt, 1978, p.148. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), fig.1. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Exochosphaeridium*, fourthly (and now) *Coronifera*. See also the discussion under *Operculodinium hirsutum*. Age: Late Cretaceous.

?subsp. **minor** Wetzel, 1933b, p.45–46, pl.4, fig.26 ex Sarjeant, 1984c, p.132. Holotype: Wetzel, 1933b, pl.4, fig.26. Originally *Hystrichosphaera hirsuta* forma *minor* (name not validly published), subsequently *Baltisphaeridium hirsutum* forma *minus* (combination not validly published; Appendix A), thirdly *Operculodinium hirsutum* subsp. *minus* (combination not validly published), fourthly (and now) *Coronifera striolata* subsp. *minor*?. Questionable assignment: Sarjeant (1984c, p.132). This taxon was first described and illustrated in Wetzel (1932, caption to pl.3, fig.13 — p.144; pl.3, fig.13) but the name was not validly published since the species name *Xanthidium hirsutum* Ehrenberg, 1837b was not validly published and additionally since the generic name *Hystrichosphaera* Wetzel, 1933b was not validly published at that time. Sarjeant (1984c, p.132) validly published this name, as *Coronifera striolata* subsp. *minor* and noted that the attribution was "emphatically provisional". This is possibly a taxonomic synonym of *Hystrichosphaera hirsuta* forma *minor* (name not validly published), which has a different holotype. Age: Late Cretaceous.

subsp. **striolata**. Autonym. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), fig.1.

?subsp. **varians** Wetzel, 1933b, p.47–48, pl.4, figs.27–29 ex Sarjeant, 1984c, p.132. Holotype not specified. Lectotype: Wetzel, 1933b, fig.29; designated by Lentin and Williams (1989, p.78). Originally *Hystrichosphaera hirsuta* forma *varians* (name not validly published), subsequently *Baltisphaeridium hirsutum* forma *varians* (combination not validly published; Appendix A), thirdly *Operculodinium hirsutum* subsp. *varians* (combination not validly published), fourthly (and now) *Coronifera striolata*? subsp. *varians*. Questionable assignment: Sarjeant (1984c, p.132). The name *Hystrichosphaera hirsuta* forma *varians* was not validly published in Wetzel (1933b), since the species name *Hystrichosphaera hirsuta* is not validly published. This is possibly a taxonomic synonym of *Hystrichosphaera hirsuta* forma *varians* (name not validly published), which has a different holotype. Age: Late Cretaceous.

?**tubulosa** Cookson and Eisenack, 1974, p.73, pl.28, fig.12. Holotype: Cookson and Eisenack, 1974, pl.28, fig.12. Originally *Coronifera*, subsequently (and now) *Coronifera*?. Questionable assignment: Stover and Evitt (1978, p.148). Age: Paleocene.

CORRADINISPHAERIDIUM Masure, 1986, p.110. Type: Corradini, 1973, pl.23, fig.6, as *Lanternosphaeridium personatum*.

horridum (Deflandre, 1937b, p.74, pl.15 [al. pl.12], figs.7–8) Masure, 1986, p.112. Emendation: Masure, 1986, p.112–113, as *Corradinisphaeridium horridum*. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), figs.7–8; Masure, 1986, pl.1, figs.4–6 and text-fig.2. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Corradinisphaeridium*. Taxonomic junior synonym: *Lanternosphaeridium* (as *Fibrocyta*?) *mutinense*, according to Masure (1986, p.112). Age: Senonian.

***personatum** (Corradini, 1973, p.157, pl.23, figs.5–6) Masure, 1986, p.110–112. Emendation: Masure, 1986, p.110–111, as *Corradinisphaeridium personatum*. Holotype: Corradini, 1973, pl.23, fig.6; Eisenack and Kjellström, 1981b, p.770f; Masure, 1986, pl.1, figs.1–3; text-figs.1a–b; Fensome et al., 1995, figs.1–3, 5–7 — p.1663. Originally *Lanternosphaeridium*, subsequently *Operculodinium*?, thirdly (and now) *Corradinisphaeridium*. Age: Senonian.

CORRUDINIUM Stover and Evitt, 1978, p.148–149. Type: Drugg, 1970b, figs.11–J, as *Gonyaulacysta incomposita*.

cristatum Châteauneuf, 1980, p.136, pl.21, figs.3–7. Holotype: Châteauneuf, 1980, pl.21, figs.3–4; Jan du Chêne et al., 1986a, pl.17, figs.7–8. Age: late Eocene (Auversian).

devernaliae Head and Norris, 2003, p.8, fig.7, nos.1–20. Holotype: Head and Norris, 2003, fig.7, nos.14–17. Age: early Pliocene.

eyrense Clowes and Wilson, 2006, p.404, figs.4J–L,5A–C. Holotype: Clowes and Wilson, 2006, figs.4J–L. Age: middle Ypresian.

harlandii Matsuoka, 1983b, p.117–118, pl.4, figs.5a–c,6a–c,7a–b; text-figs.11A–B. Holotype: Matsuoka, 1983b, pl.4, figs.6a–c; Jan du Chêne et al., 1986a, pl.17, figs.15–17. Age: Pliocene or younger.

***incompositum** (Drugg, 1970b, p.810–811, figs.1E–O,2A) Stover and Evitt, 1978, p.149. Holotype: Drugg, 1970b, figs.11–J; Eisenack and Kjellström, 1975a, page labelled "nach S.306d"; Jan du Chêne et al., 1986a, pl.17, figs.1–?2; Fensome et al., 1995, figs.1–2 — p.1561. Originally *Gonyaulacysta*, subsequently *Leptodinium*, thirdly (and now) *Corrudinium*. Age: Oligocene.

?labradori Head et al., 1989b, p.456, pl.3, figs.1–9,12. Holotype: Head et al., 1989b, pl.3, figs.1–3,5–6. Questionable assignment: Head et al. (1989b, p.456). Since the epithet is based on a geographic locality, a preferable epithet would have been *labradorensis* (I.C.N. Recommendation 60D). However, in the interests of stability, we do not correct the original spelling. Age: late Miocene–early Pliocene.

obscurum Wilson, 1988, p.16, pl.4, figs.3a–b,6a–b. Holotype: Wilson, 1988, pl.4, figs.6a–b; Fensome et al., 1996, figs.3–4 — p.2249. Age: early Eocene.

octagoense Clowes and Wilson, 2006, p.402, figs.4D–I. Holotype: Clowes and Wilson, 2006, figs.4D–F. Age: Lutetian–early Priabonian.

regulare Clowes and Wilson, 2006, p.402, figs.3G–L,4A–C. Holotype: Clowes and Wilson, 2006, figs.3G–I. Age: Lutetian–Rupelian.

"reticulatum" Grabowska in Malinowskiej and Piwockiego, 1996, p.353–354, pl.109, figs.1a–c. Holotype: Malinowskiej and Piwockiego, 1996, pl.109, figs.1a–c. **Name not validly published:** no Latin or English description. Age: early to late Eocene.

vermiculatum (Wilson, 1988, p.26–27, pl.16, figs.1–2) Clowes and Wilson, 2006, p.406. Holotype: Wilson, 1988, pl.16, fig.2; Fensome et al., 1996, fig.2 — p.2429. Originally *Ochetodinium*, subsequently (and now) *Corrudinium*. Age: early Eocene.

COSTACYSTA Heilmann-Clausen and Van Simaey, 2005, p.158. Type: Heilmann-Clausen and Van Simaey, 2005, pl.2, fig.15, as *Costacysta bucina*.

"bucina" Waagstein and Heilmann-Clausen, 1995, p.190. **Name not validly published:** no description or illustration.

***bucina** Heilmann-Clausen and Van Simaey, 2005, p.160, pl.2, figs.13–16. Holotype: Heilmann-Clausen and Van Simaey, 2005, pl.2, fig.15. Age: middle Eocene.

COUSTEAUDINIUM de Verteuil and Norris, 1996a, p.109,111. Type: de Verteuil and Norris, 1996a, pl.1, figs.1–3,6,9, as *Cousteaudinium aubryae*.

**aubryae* de Verteuil and Norris, 1996a, p.111–112,114, pl.1, figs.1–9; pl.2, figs.1–12; pl.18, figs.2–3. Holotype: de Verteuil and Norris, 1996a, pl.1, figs.1–3,6,9. Age: early–early middle Miocene.

subsp. *aubryae*. Autonym. Holotype: de Verteuil and Norris, 1996a, pl.1, figs.1–3,6,9.

subsp. *gonoperforatum* Strauss in Strauss et al., 2001, p.403–404, pl.1, figs.1–3. Holotype: Strauss et al., pl.1, fig.2. Originally *Thalassiphora gonoperforata* (name not validly published), subsequently (and now) *Coosteaudinium aubryae* subsp. *gonoperforatum*. Age: middle Miocene.

CRASPEDODINIUM Cookson and Eisenack, 1974, p.75. Emendation: Riding and Helby, 2001f, p.142–143. Taxonomic senior synonym: *Ovoidinium*, according to Lentin and Williams (1976, p.157) — however, Stover and Evitt (1978, p.34) retained *Craspedodinium*. Type: Cookson and Eisenack, 1974, pl.25, fig.7, as *Craspedodinium indistinctum*.

americanum (Habib, 1970, p.372, pl.10, fig.10) Stover and Evitt, 1978, p.34. Holotype: Habib, 1970, pl.10, fig.10. Originally *Xenikoon*, subsequently (and now) *Craspedodinium*. Age: Albian–Cenomanian.

"*defloccatum*" (Davey and Verdier, 1973, p.198, pl.3, figs.6,8) Mehrotra and Sarjeant, 1984c, p.48,50. Holotype: Davey and Verdier, 1973, pl.3, fig.8. **NOW** *Leberidocysta*. Originally *Hexagonifera*, subsequently *Thalassiphora*, thirdly (and now) *Leberidocysta*, fourthly *Disphaeria*, fifthly *Craspedodinium*. Age: late Albian–early Cenomanian.

**indistinctum* Cookson and Eisenack, 1974, p.76, pl.25, figs.6–8. Emendation: Riding and Helby, 2001h, p.229–230, as *Craspedodinium indistinctum*. Holotype: Cookson and Eisenack, 1974, pl.25, fig.7. Originally (and now) *Craspedodinium*, subsequently *Ovoidinium*?. Stover and Evitt (1978, p.34) retained this species in *Craspedodinium*. Age: late Albian (as revised by Riding and Helby, 2001h, p.232).

"*pergamentaceum*" (Burger, 1980a, p.88, pl.47, figs.2–3) Mehrotra and Sarjeant, 1984c, p.50. Holotype: Burger, 1980a, pl.47, fig.3. **NOW** *Leberidocysta*?. Originally *Palaeostomocystis* (Appendix A), subsequently (and now) *Leberidocysta*?, thirdly *Craspedodinium*. Age: Aptian.

swanense Riding and Helby, 2001f, p.143,145,147, figs.1A–L,2A–H. Holotype: Riding and Helby, 2001f, fig.1L. Age: Kimmeridgian.

"*turonicum*" Prössl, 1990, p.108–109, pl.16, figs.1–2,6–7 ex Prössl, 1992b, p.113–114. Holotype: Prössl, 1990, pl.16, figs.1–2. **NOW** *Senoniasphaera*. Originally *Craspedodinium*, subsequently (and now) *Senoniasphaera*. This name was not validly published in Prössl (1990, p.108–109), since that author did not specify the lodgement of the holotype. Taxonomic junior synonym: *Senoniasphaera rotundata* subsp. *alveolata*, according to Pearce et al. (2011, p.92). Age: middle Cenomanian–late Turonian.

CRIBROPERIDINIUM Neale and Sarjeant, 1962, p.443. Emendations: Davey, 1969a, p.125; Sarjeant, 1982b, p.40; Helenes, 1984, p.112. Taxonomic junior synonyms: *Acanthaulax*, according to Poulsen (1996, p.71); *Meristaulax* Brenner, 1988, by implication in Jan du Chêne et al. (1986a, p.76) and Lentin and Williams (1993, p.423), who listed *Meristaulax* Sarjeant as a taxonomic junior synonym of *Cribroperidinium* on the basis of the morphology of Sarjeant's lectotype of *Meristaulax granulata*, which is now the type of *Meristaulax* Brenner; *Meristaulax* Sarjeant, according to Poulsen (1996, p.71); *Millioudodinium*, according to Duxbury (1980, p.122) and Lentin and Williams (1993, p.134). See also Sarjeant (1988, p.287; 1989, p.94) for discussions. Type: Neale and Sarjeant, 1962, pl.19, fig.4; text-fig.3a–b, as *Cribroperidinium sepimentum*.

aceras (Eisenack, 1958a, p.391, pl.21, figs.1–2) Sarjeant, 1985a, p.57. Emendation: Sarjeant, 1985a, p.57,59, as *Cribroperidinium aceras*. Holotype: Eisenack, 1958a, pl.21, fig.1; Sarjeant, 1985a, pl.4, figs.1–2; Jan du Chêne et al., 1986a, pl.2, figs.6–7. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*? (combination not validly published), thirdly *Leptodinium*, fourthly *Acanthaulax*?, fifthly (and now) *Cribroperidinium*. Age: Aptian.

- ?aequum* (Mao Shaozhi and Norris, 1988, p.35, pl.2, figs.17–19; text-fig.9) Lentin and Williams, 1989, p.79. Holotype: Mao Shaozhi and Norris, 1988, pl.2, fig.17. Originally *Millioudodinium?*, subsequently (and now) *Cribrroperidinium?*. Questionable assignment: Lentin and Williams (1989, p.79). Age: Late Cretaceous.
- aichmetes* (Sarjeant, 1966b, p.123–124, pl.13, figs.5–6; text-fig.30) Helenes, 1984, p.118. Holotype: Sarjeant, 1966b, pl.13, figs.5–6; text-fig.30; Jan du Chêne et al., 1986a, pl.20, figs.5–7. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Cribrroperidinium*. Age: late Barremian.
- angulosum* (Gitmez, 1970, p.252, pl.2, figs.4–5; text-figs.7A–B) Poulsen, 1996, p.77. Holotype: Gitmez, 1970, pl.2, figs.4–5; text-figs.7A–B; Jan du Chêne et al., 1986a, pl.2, figs.11–15. Originally *Gonyaulacysta*, subsequently *Acanthaulax*, thirdly *Meristaulax* Sarjeant, fourthly *Acanthaulax?*, fifthly *Rhynchodiniopsis*, sixthly (and now) *Cribrroperidinium*. Taxonomic senior synonym: *Gonyaulax* (now *Cribrroperidinium*) *granulata*, according to Fisher and Riley (1980, p.321) — however, Sarjeant and Gocht in Sarjeant (1984a, p.160) retained *Acanthaulax?* (as *Meristaulax*, now *Cribrroperidinium*) *angulosa*. Age: early Kimmeridgian.
- aparsium* Stover and Helby, 1987c, p.230,232–234, figs.5A–D,6A–L. Holotype: Stover and Helby, 1987c, figs.6A–D; Fensome et al., 1996, figs.1–3 — p.2033. Age: Hauterivian–Aptian.
- apione* (Cookson and Eisenack, 1958, p.36, pl.3, fig.7; text-figs.3–4) Morgan, 1980, p.20. Holotype: Cookson and Eisenack, 1958, text-figs.3–4; Jan du Chêne et al., 1986a, pl.33, fig.6. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly (and now) *Cribrroperidinium*. Taxonomic senior synonym: *Gonyaulax* (as *Cribrroperidinium*) *edwardsii*, according to Burger (1980a, p.82) — however, Jan du Chêne et al. (1986a, p.76) retained *Cribrroperidinium apione*. Helenes (1984, p.118) also proposed this combination. Age: Albian.
- asarotum* Stevens, 1987, p.188, figs.5A–J. Holotype: Stevens, 1987, figs.5A–C; Fensome et al., 1996, figs.1–3 — p.2041. N.I.A. Age: early Berriasian.
- auctificum* (Brideaux, 1971, p.82–83, pl.23, figs.40–41; text-figs.9a–b) Stover and Evitt, 1978, p.150. Holotype: Brideaux, 1971, pl.23, figs.40–41; text-figs.9a–b; Jan du Chêne et al., 1986a, pl.30, figs.7–8. Originally *Gonyaulacysta*, subsequently (and now) *Cribrroperidinium*. Age: late Albian.
- ?birkelundiae* (Fensome, 1979, p.38–40, pl.5, figs.5,8,11; text-figs.14A–C) Helenes, 1984, p.126. Holotype: Fensome, 1979, pl.5, figs.5,8,11; text-figs.14A–B; Jan du Chêne et al., 1986a, pl.24, figs.1–3. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Cribrroperidinium?*. Questionable assignment: Helenes (1984, p.126). Age: Portlandian.
- boreas* (Davey, 1974, p.52–53, pl.4, figs.1–4; pl.7, fig.5) Helenes, 1984, p.121. Holotype: Davey, 1974, pl.4, figs.1–4; Jan du Chêne et al., 1986a, pl.21, figs.1–4. Originally *Gonyaulacysta*, subsequently *Millioudodinium?*, thirdly (and now) *Cribrroperidinium*. N.I.A. Age: late Barremian.
- "?cauda"* (Gitmez and Sarjeant, 1972, p.193–194, pl.2, figs.1–2,4–5) Helenes, 1984, p.124. Holotype: Gitmez and Sarjeant, 1972, pl.2, figs.1–2. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Rhynchodiniopsis*, fourthly *Cribrroperidinium?*. Questionable assignment: Helenes (1984, p.124) as a problematic species. **Taxonomic senior synonym:** *Gonyaulacysta* (as and now *Cribrroperidinium*) *globata*, according to Poulsen (1996, p.72). N.I.A. Age: early–late Kimmeridgian.
- colum* Duxbury, 2001, p.103–104, fig.5, nos.1–4. Holotype: Duxbury, 2001, fig.5, nos.1–2. N.I.A. Age: late Hauterivian–middle Barremian.
- complexum* Bailey, 1993, p.219–220, pl.1, figs.1–9. Holotype: Bailey, 1993, pl.1, figs.2–3. Age: early Kimmeridgian.
- "comptum"* (Duxbury, 1980, p.122–123, pl.2, figs.1–2,4) Lentin and Williams, 1981, p.59. Holotype: Duxbury, 1980, pl.2, figs.1–2,4; Jan du Chêne et al., 1986a, pl.10, figs.9–10. Originally *Gonyaulacysta*, subsequently

Cribroperidinium, thirdly *Acanthaulax*, fourthly *Apteodinium*. **Taxonomic senior synonym:** *Apteodinium* (now *Cribroperidinium*) *spinoreticulatum*, according to Lucas-Clark (1987, p.178). Age: middle-late Barremian.

confossum (Duxbury, 1977, p.33, pl.2, figs.2–4) Helenes, 1984, p.128. Holotype: Duxbury, 1977, pl.2, figs.3–4; Jan du Chêne et al., 1986a, pl.19, fig.5. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Cribroperidinium?*, fourthly (and now) *Cribroperidinium*. Questionable assignment: Helenes (1984, p.128) — however, Jan du Chêne et al. (1986a, p.77) included it in *Cribroperidinium* without question. Age: late Hauterivian.

"**conjunctum**" (Eisenack and Cookson, 1960, p.5, pl.1, figs.7–8) Helenes, 1984, p.121. Holotype: Eisenack and Cookson, 1960, pl.1, fig.7; Jan du Chêne et al., 1986a, pl.33, figs.7–9. Originally *Apteodinium*, subsequently *Cribroperidinium*. **Taxonomic senior synonym:** *Apteodinium maculatum*, according to Backhouse (1988, p.74). Age: Aptian.

conopium Duxbury, 1983, p.43, pl.4, fig.11. Holotype: Duxbury, 1983, pl.4, fig.11; Jan du Chêne et al., 1986a, pl.21, figs.6–7. Age: early Albian.

cooksoniae Norvick, 1976, p.36–37, pl.1, figs.1–3; text-figs.13a–d. Holotype: Norvick, 1976, pl.1, fig.2; Jan du Chêne et al., 1986a, pl.31, fig.7. Age: Cenomanian.

?**cornutum** Davey, 1974, p.48–49, pl.2, figs.1–5. Holotype: Davey, 1974, pl.2, figs.2–3; Jan du Chêne et al., 1986a, pl.21, figs.8–9. Originally *Cribroperidinium*, subsequently *Occisucysta*, thirdly (and now) *Cribroperidinium?*. Lentin and Williams (1981, p.55) retained this species in *Cribroperidinium*. Questionable assignment: Helenes (1984, p.128). Age: middle-late Barremian.

corrugatum Riding and Helby, 2001f, p.147,149–150, figs.3A–I,4A–B. Holotype: Riding and Helby, 2001f, fig.3A. Age: Kimmeridgian.

crassinervum (Deflandre, 1939b, p.144, pl.6, fig.5 ex Sarjeant, 1967b, p.248–249) Nøhr-Hansen, 1986, p.33. Emendation: Nøhr-Hansen, 1986, p.33, as *Cribroperidinium crassinervum*. Holotype: Deflandre, 1939b, pl.6, fig.5; Jan du Chêne et al., 1986a, pl.70, figs.1–4. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta*, thirdly *Leptodinium*, fourthly *Leptodinium?*, fifthly (and now) *Cribroperidinium*. The name *Palaeoperidinium crassinervum* was not validly published in Deflandre (1939b) since the generic name *Palaeoperidinium* was not validly published until 1967. Williams et al. (1998, p.146) accepted Sarjeant's (1967b) indirect reference to Deflandre (1939b) as indication of a type (I.C.N. Article 40.3). Jan du Chêne et al. (1986a, p.211) recommended that this name be restricted to the holotype. Age: Kimmeridgian.

crispum (Wetzel, 1967a, p.870, pl.15, figs.4a–b) Fenton, 1981, p.255. Emendations: Sarjeant, 1980b, p.119–120, as *Hystrichosphaeridium crispum*; Fenton, 1981, p.255,257, as *Cribroperidinium crispum*. Holotype: Wetzel, 1967a, pl.15, figs.4a–b; Dietz et al., 1999, text-fig.5a. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly *Hystrichogonyaulax*, fifthly (and now) *Cribroperidinium*, sixthly *Acanthaulax*. Poulsen (1996, p.77) retained this species in *Cribroperidinium*. Age: Middle Jurassic.

"**cristatum**" (Riley in Fisher and Riley, 1980, p.320, pl.1, figs.8,12) Lentin and Williams, 1985, p.77. Holotype: Fisher and Riley, 1980, pl.1, figs.8,12; Jan du Chêne et al., 1986a, pl.67, fig.20. **Combination not validly published:** basionym not fully referenced. **NOW** *Leptodinium volgense*. Originally *Gonyaulacysta cristata*, subsequently *Leptodinium cristatum* (combination illegitimate), thirdly (and now) *Leptodinium volgense*, fourthly *Millioudodinium cristatum*, fifthly *Cribroperidinium cristatum* (combination not validly published). Age: Volgian.

delicatum Backhouse, 1988, p.80, pl.23, figs.1a–c,2,3a–b,4a–b. Holotype: Backhouse, 1988, pl.23, figs.4a–b; Fensome et al., 1996, figs.6–7 — p.2109. Age: late Valanginian–Hauterivian.

"**diaphanum**" (Cookson and Eisenack, 1958, p.36, pl.3, figs.13–14; text-figs.10–11) Stover and Evitt, 1978, p.150. Holotype: Cookson and Eisenack, 1958, pl.3, figs.13–14; text-figs.10–11; Jan du Chêne et al., 1986a, pl.32, fig.6. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Cribroperidinium*. **Taxonomic senior synonym:** *Gonyaulax* (as *Cribroperidinium*) *muderongensis*, according to Backhouse (1988, p.80). Age: Aptian.

?*downiei* (Sarjeant, 1960a, p.138–139) Poulsen, 1996, p.77. Holotype: Downie, 1957, pl.20, fig.10, as *Hystrichosphaeridium pattei*; Jan du Chêne et al., 1986a, pl.3, figs.7–9. Originally *Baltisphaeridium* (Appendix A), subsequently *Acanthaulax*, thirdly *Acanthaulax*?, fourthly *Cyclonephelium*, fifthly (and now) *Cribroperidinium*?. Questionable assignment: Poulsen (1996, p.77). Age: Kimmeridgian.

?*edwardsii* (Cookson and Eisenack, 1958, p.32, pl.3, figs.5–6; text-fig.7) Davey, 1969a, p.128. Holotype: Cookson and Eisenack, 1958, pl.3, fig.6; text-fig.7; Jan du Chêne et al., 1986a, pl.32, fig.4; pl.33, fig.3. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Cribroperidinium*, fourthly (and now) *Cribroperidinium*?. Questionable assignment: Helenes (1984, p.125) as a problematic species. Taxonomic junior synonyms: *Gonyaulax* (now *Cribroperidinium*) *apione*, according to Burger (1980a, p.82) — however, Jan du Chêne et al. (1986a, p.76) retained *Cribroperidinium apione*; *Gonyaulax* (as *Cribroperidinium*) *orthoceras*, according to Davey and Verdier (1971, p.17) — however, Below (1981a, p.39–40) and Lentin and Williams (1985, p.79) retained *Cribroperidinium orthoceras*. Age: Albian–early Turonian.

?*ehrenbergii* (Gitmez, 1970, p.252–254, pl.2, figs.8–9; text-fig.8) Helenes, 1984, p.124. Holotype: Gitmez, 1970, pl.2, figs.8–9; text-fig.8, lost according to Jan du Chêne et al. (1986a, p.80). Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Cribroperidinium*?. Questionable assignment: Helenes (1984, p.124) as a problematic species. Lentin and Williams (1989, p.8) recommended that this name be restricted to the holotype. Age: early Kimmeridgian.

?*erymnoseptatum* Bailey, 1993, p.220, pl.2, figs.1–9. Holotype: Bailey, 1993, pl.2, figs.1–2. Age: Kimmeridgian.

?*exilicristatum* (Davey, 1969a, p.121, pl.1, figs.1–2; text-figs.9A–B) Stover and Evitt, 1978, p.150. Holotype: Davey, 1969a, pl.1, fig.1; text-figs.9A–B; Jan du Chêne et al., 1986a, pl.26, figs.1–4. Originally *Gonyaulacysta*, subsequently (and now) *Cribroperidinium*. Age: Cenomanian.

?*fetchemense* (Sarjeant, 1966b, p.128,130, pl.15, figs.1–2; text-fig.33) Helenes, 1984, p.121. Holotype: Sarjeant, 1966b, pl.15, figs.1–2; text-fig.33; Helenes, 1984, text-figs.4A–B; Jan du Chêne et al., 1986a, pl.20, figs.1–4; Fensome et al., 1993a, figs.1–2 — p.1189. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Cribroperidinium*. Age: early Cenomanian.

?*forulatum* (Yu Jingxian, 1982, p.241, pl.2, figs.3–4,6–8) Lentin and Williams, 1985, p.78. Holotype: Yu Jingxian, 1982, pl.2, fig.8. Originally *Gonyaulacysta*, subsequently (and now) *Cribroperidinium*?. Questionable assignment: Lentin and Williams (1985, p.78). Age: Late Jurassic–Early Cretaceous.

?*fragile* Duxbury, 2001, p.104–105, fig.6, nos.1–4. Holotype: Duxbury, 2001, fig.6, nos.1–2. Age: early Barremian.

?*gigas* (Raynaud, 1978, p.392–393, pl.2, fig.16) Helenes, 1984, p.128. Holotype: Raynaud, 1978, pl.2, fig.16; Jan du Chêne et al., 1986a, pl.30, fig.6. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Cribroperidinium*?. Questionable assignment: Helenes (1984, p.128). N.I.A. Age: late Kimmeridgian–Portlandian.

?*giuseppei* (Morgenroth, 1966a, p.5, pl.2, figs.3–6) Helenes, 1984, p.121. Holotype: Morgenroth, 1966a, pl.2, figs.3–4. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*?, fourthly *Rhynchodiniopsis*?, fifthly (and now) *Cribroperidinium*. Age: early Eocene.

"subsp. *giuseppei*". Autonym. Holotype: Morgenroth, 1966a, pl.2, figs.3–4. **Now redundant.** Originally *Gonyaulax giuseppei* subsp. *giuseppei* (Appendix B), subsequently *Gonyaulacysta giuseppei* subsp. *giuseppei*, thirdly *Millioudodinium? giuseppei* subsp. *giuseppei*, fourthly *Rhynchodiniopsis? giuseppei* subsp. *giuseppei*, fifthly *Cribroperidinium giuseppei* subsp. *giuseppei*. Taxonomic junior synonym: *Gonyaulax* (as *Rhynchodiniopsis?*) *giuseppei* subsp. *major*, according to Helenes (1984, p.121) and Lentin and Williams (1989, p.81).

"subsp. *majus*" (Morgenroth, 1966a, p.6, pl.2, figs.5–6) Lentin and Williams, 1985, p.78. Holotype: Morgenroth, 1966a, pl.2, figs.5–6. Originally *Gonyaulax giuseppei* subsp. *major* (Appendix B), subsequently *Gonyaulacysta giuseppei* subsp. *major*, thirdly *Millioudodinium? giuseppei* subsp. *majus*, fourthly *Rhynchodiniopsis? giuseppei* subsp. *major*, fifthly *Cribroperidinium giuseppei* subsp. *majus*.

Taxonomic senior synonym: *Gonyaulax* (as *Cribroperidinium*) *giuseppeii* subsp. *giuseppeii*, according to Helenes (1984, p.121) and Lentin and Williams (1989, p.81). Age: early Eocene.

globatum (Gitmez and Sarjeant, 1972, p.195,197, pl.3, figs.1–2; text-figs.5A–B) Helenes, 1984, p.124. Holotype: Gitmez and Sarjeant, 1972, pl.3, fig.1; text-fig.5A; Jan du Chêne et al., 1986a, pl.29, fig.3. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Rhynchodiniopsis*, fourthly *Cribroperidinium?*, fifthly (and now) *Cribroperidinium*. Questionable assignment: Helenes (1984, p.124) as a problematic species — however, Poulsen (1996, p.72) included the species in *Cribroperidinium* without question. Taxonomic junior synonyms: *Gonyaulacysta cauda* and *Gonyaulacysta systremmata*, both according to Poulsen (1996, p.72). Age: middle-late Kimmeridgian.

?**globosum** (Brideaux, 1971, p.81, pl.23, figs.37–38; text-figs.7g–h) Helenes, 1984, p.128. Holotype: Brideaux, 1971, pl.23, figs.37–38; text-fig.7g; Jan du Chêne et al., 1986a, pl.28, figs.10–11. Originally *Gonyaulacysta*, subsequently *Millioudodinium?*, thirdly (and now) *Cribroperidinium?*. Questionable assignment: Helenes (1984, p.128). Age: middle-late Albian.

graemei Williams et al., 1998, p.147. Holotype: Slimani, 1994, pl.14, figs.5–9. Originally *Apteodinium wilsonii*, subsequently *Cribroperidinium wilsonii* (name illegitimate), thirdly (and now) *Cribroperidinium graemei*. Substitute name for *Cribroperidinium wilsonii* (Slimani, 1994, p.90–91, pl.14, figs.5–11) Schiøler et al., 1997, p.81 (an illegitimate name). Taxonomic junior synonym: *Gonyaulacysta filosa* (name not validly published), according to Schiøler et al. (1997, p.81). Age: early Campanian–late Maastrichtian.

"subsp. **graemei**". Autonym. Holotype: Slimani, 1994, pl.14, figs.5–9. **Now redundant.**

"subsp. **trabeculosum**" (Slimani and Louwye, 2013, p.13,15; pll.2, figs.1–9,11,13) Williams and Fensome, 2016, p.140. Holotype: Slimani and Louwye, 2013, pl.2, figs.1–3. **NOW** *Cribroperidinium wilsonii* (Yun Hyesu, 1981) subsp. *trabeculosum*. Originally (and now) *Cribroperidinium wilsonii* (Yun Hyesu, 1981) subsp. *trabeculosum* subsequently *Cribroperidinium graemei* subsp. *trabeculosum*. Slimani and Louwye (2013) did not specify whether they were including this subspecies in *Cribroperidinium wilsonii* (Yun Hyesu, 1981) Poulsen or *Cribroperidinium wilsonii* (Slimani, 1994) Schiøler. Williams and Fensome (2016, p.140) assumed that the intended assignment was to the latter, which is illegitimate, and so transferred the subspecies to the substitute name *Cribroperidinium graemei*. However, H. Slimani (personal communication to GLW) affirms that the taxon was intended to be a subspecies of *Cribroperidinium wilsonii* (Yun Hyesu, 1981) Poulsen. Age: late Campanian.

?**granomembranceum** (Matsuoka, 1983b, p.121–122, pl.1, figs.1a–c,2,3a–b,4a–b,5a–b; text-figs.14A–B) Lentin and Williams, 1985, p.78. Holotype: Matsuoka, 1983b, pl.1, figs.1a–c; Jan du Chêne et al., 1986a, pl.27, figs.1–2. Originally *Millioudodinium*, subsequently (and now) *Cribroperidinium?*. Questionable assignment: Lentin and Williams (1985, p.78). Age: early-middle Miocene.

granulatum (Klement, 1960, p.39–41, pl.4, figs.10–13; text-figs.18–20) Stover and Evitt, 1978, p.150. Emendation: Sarjeant, 1984a, p.161–162, as *Meristaulax granulata*. Holotype: Klement, 1960, pl.4, figs.10–11; text-figs.18–20; Fensome et al., 1995, figs.1–2 — p.1525; disintegrated according to Sarjeant (1984a, p.162). Lectotype (designated by Sarjeant, 1984a, p.162): Sarjeant, 1984a, pl.3, figs.3–4; text-fig.3; Jan du Chêne et al., 1986a, pl.27, figs.7–10; Brenner, 1988, pl.3, figs.2a–b; Fensome et al., 1995, figs.5–6 — p.1525 — however, Brenner (1988, p.35) argued that this specimen is not conspecific with the holotype. Lectotype (designated by Brenner, 1988, p.35): Brenner, 1988, pl.1, figs.3a–c; Fensome et al., 1995, figs.7–9 — p.1525. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Cribroperidinium*, fourthly *Rhynchodiniopsis*, fifthly *Meristaulax* Sarjeant, sixthly *Acanthaulax*. Poulsen (1996, p.73) retained this species in *Cribroperidinium*. Taxonomic junior synonyms: *Gonyaulax* (as *Cribroperidinium*) *venusta*, according to Schrank (2005, p.56); *Gonyaulax* (now *Cribroperidinium*) *granuligera*, according to Fisher and Riley (1980, p.321) — however, Sarjeant (1984a, p.156–158) retained *Gonyaulax* (as *Cryptarchaeodinium*) *granuligera*; *Gonyaulacysta* (as *Acanthaulax?*, now *Cribroperidinium*) *angulosa*, according to Fisher and Riley (1980, p.321) — however, Sarjeant and Gocht in Sarjeant (1984a, p.160) retained *Gonyaulacysta* (as *Meristaulax*) *angulosa*. Brenner (1988, p.35) stated that the specimen designated as the lectotype by Sarjeant (1984a, p.102) cannot be a lectotype since it is not from the same sample as the holotype, citing Article 8 of the 1983 I.C.B.N. (Voss et al., 1983). The current I.C.N. Article 9 indicates that a lectotype must

be part of the original material, which can include any specimens seen by the original author, whether or not cited in the original publication, and thus not necessarily from the same sample. Hence, Sarjeant's lectotype cannot be invalidated for that reason. However, Brenner also argued that the morphology of Sarjeant's lectotype differs sufficiently from that of the holotype to constitute a separate species. Thus, Brenner proposed a new lectotype from the same sample as Klement's holotype and illustrated it (Brenner, 1988, pl.1, figs.3a–c); this specimen was not figured in Klement (1960). I.C.N. Article 9.18 specifies that the choice of a lectotype by an author may be superseded if it can be shown to be in serious conflict with the protologue. In contrast to Lentin and Williams (1993, p.2), Williams et al. (1998, p.148) followed Brenner (1988). See also discussion under *Meristaulax granulata* (Klement). Age: middle Oxfordian–early Kimmeridgian.

granuligerum (Klement, 1960, p.41–42, pl.5, figs.4–5) Stover and Evitt, 1978, p.150. Emendation: Sarjeant, 1984a, p.156, as *Cryptarchaeodinium granuligerum*. Holotype: Klement, 1960, pl.5, figs.4–5; Sarjeant, 1984a, pl.1, figs.3–4; text-fig.1; Jan du Chêne et al., 1986a, pl.27, figs.11–14. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Cribroperidinium*, fourthly *Rhynchodiniopsis*, fifthly *Cryptarchaeodinium*, sixthly *Acanthaulax*. Poulsen (1996, p.75) retained this species in *Cribroperidinium*. Taxonomic senior synonym: *Gonyaulax* (as *Cribroperidinium*) *granulata*, according to Fisher and Riley (1980, p.321) — however, Sarjeant (1984a, p.156–158) retained *Gonyaulax* (as *Cryptarchaeodinium*) *granuligera*. Age: middle Oxfordian–early Kimmeridgian.

hansenii Poulsen, 1996, p.75–76, pl.9, figs.1–4; pl.10, figs.1–3. Holotype: Poulsen, 1996, pl.9, figs.1–2. Age: middle Volgian–Valanginian.

?**intricatum** Davey, 1969a, p.125–128, pl.2, figs.1–3; text-figs.11a–b–12a–b. Holotype: Davey, 1969a, pl.2, fig.1; text-figs.11a, 12a; Jan du Chêne et al., 1986a, pl.24, figs.10–11. Originally *Cribroperidinium*, subsequently (and now) *Cribroperidinium*?. Questionable assignment: Helenes (1984, p.125) as a problematic species. Age: Albanian.

janinae Górka, 1982, p.106, 108, 110, pls.1–2; text-figs.A–D. Holotype: Górka, 1982, pl.1, fig.3. Age: early Hauterivian.

jubaris (Davies, 1983, p.19, pl.5, figs.13–20; text-fig.13) Lentin and Williams, 1985, p.79. Holotype: Davies, 1983, pl.5, fig.16; Jan du Chêne et al., 1986a, pl.150, figs.17–18. Originally *Millioudodinium*, subsequently (and now) *Cribroperidinium*. N.I.A. Age: Tithonian.

kashiense (He Chengquan, 1991, p.108–109, pl.4, figs.34–37) Lentin and Williams, 1993, p.138. Holotype: He Chengquan, 1991, pl.4, fig.37. Originally *Millioudodinium*, subsequently (and now) *Cribroperidinium*. Age: Paleocene–Eocene.

leedervillense Backhouse, 1988, p.80, pl.23, figs.7–9; pl.24, fig.1; pl.47, fig.2. Holotype: Backhouse, 1988, pl.23, fig.8 (not 7); Fensome et al., 1996, fig.2 — p.2189. Age: late Valanginian–early Barremian.

?**longicorne** (Downie, 1957, p.420, pl.20, fig.8; text-figs.2a–b) Lentin and Williams, 1985, p.79. Holotype: Downie, 1957, pl.20, fig.8; text-figs.2a–b; Jan du Chêne et al., 1986a, pl.30, fig.1. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Gonyaulacysta*?, fourthly *Millioudodinium*, fifthly (and now) *Cribroperidinium*?. Questionable assignment: Lentin and Williams (1985, p.79). Age: late Kimmeridgian.

magnificum Smith and Harding, 2004, p.367, 371–373, pl.2, figs.1–9; pl.6, figs.4–6; text-fig.5. Holotype: Smith and Harding, 2004, pl.2, figs.1, 4, 7. Age: middle to late Volgian.

magnum (Jain, 1977b, p.175–176, pl.4, figs.40–42) Williams et al., 1998, p.149. Holotype: Jain, 1977b, pl.4, figs.41–42; Jan du Chêne et al., 1986a, pl.122, fig.8. Originally *Trichodinium*, subsequently *Acanthaulax*, thirdly (and now) *Cribroperidinium*. Age: early Albanian.

?**muderongense** (Cookson and Eisenack, 1958, p.32, pl.3, figs.3–4; text-fig.15) Davey, 1969a, p.128. Holotype: Cookson and Eisenack, 1958, pl.3, fig.3; text-fig.15. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly *Cribroperidinium*, fourthly (and now)

Cribroperidinium?. Taxonomic junior synonym: *Gonyaulax* (as *Cribroperidinium*) *diaphana*, according to Backhouse (1988, p.80). Questionable assignment: Helenes (1984, p.125) as a problematic species. Age: Aptian.

?*murochoratum* Dürr, 1987, p.72–74, fig.2; fig.4, nos.1–2; fig.5, nos.6–7; fig.6, nos.4,6–8. Holotype: Dürr, 1987, fig.4, nos.1–2. Questionable assignment: Dürr (1987, p.72). Age: middle Kimmeridgian.

nuciforme (Deflandre, 1939a, p.180, pl.8, figs.4–6 ex Sarjeant, 1962a, p.482–483) Courtinat, 1989, p.203. Holotype: Deflandre, 1939a, pl.8, fig.6; Jan du Chêne et al., 1986a, pl.11, figs.1–3. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulax* (Appendix B), thirdly *Gonyaulacysta*, fourthly *Apteodinium*, fifthly *Millioudodinium*, sixthly (and now) *Cribroperidinium*. Taxonomic junior synonym: *Palaeoperidinium nuciformoides*, according to Sarjeant (1968, p.227). The name *Palaeoperidinium nuciforme* was not validly published in Deflandre (1939a) since the generic name *Palaeoperidinium* was not validly published until 1967. Age: Oxfordian.

?*obesum* (Brideaux, 1971, p.82, pl.23, fig.39; text-figs.8a–b) Helenes, 1984, p.130. Holotype: Brideaux, 1971, pl.23, fig.39; text-figs.8a–b; Jan du Chêne et al., 1986a, pl.30, fig.9. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Rhynchodiniopsis*, fourthly (and now) *Cribroperidinium?*. Questionable assignment: Helenes (1984, p.130). Age: late Albian.

orthoceras (Eisenack, 1958a, p.388, pl.21, figs.3–11; pl.24, fig.1) Davey, 1969a, p.128–129. Emendation: Sarjeant, 1985a, p.51,53, as *Cribroperidinium orthoceras*. Holotype: Eisenack, 1958a, pl.21, fig.5; Sarjeant, 1985a, pl.1, figs.1,4; text-fig.1; Jan du Chêne et al., 1986a, pl.24, figs.7–8. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Cribroperidinium*, fourthly *Cribroperidinium?*. Questionable assignment: Helenes (1984, p.125) and Jan du Chêne et al. (1986a, p.80) as a problematic species — however, Sarjeant (1985a, p.49) retained the species in *Cribroperidinium* without question. Taxonomic senior synonym: *Gonyaulax* (as *Cribroperidinium*) *edwardsii*, according to Davey and Verdier (1971, p.17) — however, Below (1981a, p.39–40) and Lentin and Williams (1985, p.79) retained *Cribroperidinium orthoceras*. Age: Aptian.

?*paliuros* (Sarjeant, 1962a, p.260, pl.1, fig.7; text-fig.5) Poulsen, 1996, p.77. Holotype: Sarjeant, 1962a, pl.1, fig.7. Originally *Gonyaulax* (Appendix B), subsequently *Acanthogonyaulax* (combination not validly published), thirdly *Acanthaulax*, fourthly *Acanthaulax?*, fifthly (and now) *Cribroperidinium?*. Questionable assignment: Poulsen (1996, p.77). N.I.A. Age: Oxfordian.

palla (Sarjeant, 1966b, p.113–114, pl.13, figs.3–4; text-fig.24) Helenes, 1984, p.124. Holotype: Sarjeant, 1966b, pl.13, figs.3–4; Jan du Chêne et al., 1986a, pl.27, figs.15–17. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Millioudodinium?*, fourthly *Rhynchodiniopsis*, fifthly (and now) *Cribroperidinium*. N.I.A. Age: early Barremian.

?*pannonicum* (Nagy, 1965, p.200–201, pl.1, figs.1–2; pl.2, fig.10; text-figs.1–2) Helenes, 1984, p.130. Holotype: Nagy, 1965, pl.1, figs.1–2; pl.2, fig.10; Jan du Chêne et al., 1986a, pl.31, figs.1–4. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium?*, fourthly (and now) *Cribroperidinium?*. Questionable assignment: Helenes (1984, p.130). Age: early Pliocene.

?*parorthoceras* (Davey, 1968, p.1) Helenes, 1984, p.130. Holotype: Sarjeant, 1966b, pl.14, figs.5–6; text-fig.29, as *Gonyaulacysta orthoceras*; Jan du Chêne et al., 1986a, pl.26, figs.6–8. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Cribroperidinium?*. Questionable assignment: Helenes (1984, p.130). Age: late Barremian.

?*perforans* (Cookson and Eisenack, 1958, p.30–32, pl.2, figs.1–4,7–8; text-figs.8–9) Morgan, 1980, p.21. Holotype: Cookson and Eisenack, 1958, pl.2, fig.1; text-figs.8–9; Jan du Chêne et al., 1986a, pl.32, fig.2. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Leptodinium?*, fourthly *Rhynchodiniopsis*, fifthly *Cribroperidinium*, sixthly (and now) *Cribroperidinium?*. Questionable assignment: Helenes (1984, p.130). Age: Late Jurassic.

subsp. *kunzeviense* (Vozzhennikova, 1967, p.87, pl.27, fig.6; pl.30, fig.2; pl.33, fig.6) Lentin and Williams, 1989, p.83. Holotype: Vozzhennikova, 1967, pl.30, fig.2, lost according to Lentin and Vozzhennikova

(1990, p.94). Originally *Gonyaulax perforans* var. *kunzeviensis* (Appendix B), subsequently *Gonyaulacysta kunzeviensis*, thirdly *Gonyaulacysta perforans* var. *kunzeviensis* (combination not validly published), fourthly (and now) *Cribroperidinium?* *perforans* subsp. *kunzeviense*. According to Lentin and Vozzhennikova (1990, p.94), no potential lectotype is available. Age: Valanginian.

subsp. *perforans*. Autonym. Holotype: Cookson and Eisenack, 1958, pl.2, fig.1; text-figs.8–9; Jan du Chêne et al., 1986a, pl.32, fig.2.

?*pyrum* (Drugg, 1967, p.14, pl.1, fig.17; pl.9, figs.6a–b) Stover and Evitt, 1978, p.150. Holotype: Drugg, 1967, pl.1, fig.17; Jan du Chêne et al., 1986a, pl.27, figs.3–5. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Cribroperidinium?*. Questionable assignment: Stover and Evitt (1978, p.150). N.I.A. Age: Maastrichtian–Danian.

reticulatum Quattrocchio and Volkheimer, 1985, p.192–193, pl.A, figs.1–3; pl.C, figs.a–b. Holotype: Quattrocchio and Volkheimer, 1985, pl.A, fig.1; pl.C, figs.a–b. Age: Berriasian.

?*saetigerum* (McIntyre and Brideaux, 1980, p.15, pl.3, figs.2–3,7) Helenes, 1984, p.130. Holotype: McIntyre and Brideaux, 1980, pl.3, figs.2–3,7; Jan du Chêne et al., 1986a, pl.24, figs.4–6. Originally *Millioudodinium*, subsequently (and now) *Cribroperidinium?*. Questionable assignment: Helenes (1984, p.130). Age: Valanginian.

sarjeantii (Vozzhennikova, 1967, p.87–89, pl.25, figs.1–2; pl.28, fig.4; pl.31, figs.1a–b,2a–b,3; pl.32, figs.1,2a–c,3,4a–b) Helenes, 1984, p.130. Holotype: Vozzhennikova, 1967, pl.31, fig.1a; Lentin and Vozzhennikova, 1990, text-fig.53, lost according to Lentin and Vozzhennikova (1990, p.95). Neotype: Vozzhennikova, 1967, pl.31, fig.3 and Lentin and Vozzhennikova, 1990, pl.16, fig.4, designated by Lentin and Vozzhennikova (1990, p.95). Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly *Rhynchodiniopsis*, fifthly *Cribroperidinium?*, sixthly (and now) *Cribroperidinium*. Questionable assignment: Helenes (1984, p.130) — however, Lentin and Vozzhennikova (1990, p.95–97) retained this species in *Cribroperidinium* without question and provided an "expanded description". Age: Tithonian.

subsp. *sarjeantii*. Autonym. Holotype: Vozzhennikova, 1967, pl.31, fig.1a; Lentin and Vozzhennikova, 1990, text-fig.53; lost according to Lentin and Vozzhennikova (1990, p.95). Neotype: Vozzhennikova, 1967, pl.31, fig.3; Lentin and Vozzhennikova, 1990, pl.16, fig.4; designated by Lentin and Vozzhennikova (1990, p.95). Originally *Gonyaulacysta sarjeantii* subsp. *sarjeantii*, subsequently *Millioudodinium sarjeantii* subsp. *sarjeantii*, thirdly *Rhynchodiniopsis sarjeantii* subsp. *sarjeantii*, fourthly *Cribroperidinium?* *sarjeantii* subsp. *sarjeantii*, fifthly (and now) *Cribroperidinium sarjeantii* subsp. *sarjeantii*.

subsp. *sphaericum* (Vozzhennikova, 1967, p.89, pl.25, figs.1–2; pl.28, fig.4; pl.32, figs.1–4) Lentin and Williams, 1985, p.80. Holotype: Vozzhennikova, 1967, pl.28, fig.4; Jan du Chêne et al., 1986a, pl.20, fig.9; lost according to Lentin and Vozzhennikova (1990, p.97). Lectotype: Lentin and Vozzhennikova, 1990, pl.16, figs.1–2, designated by Lentin and Vozzhennikova (1990, p.97). Originally *Gonyaulax sarjeantii* var. *sphaerica* (Appendix B), subsequently *Gonyaulacysta sarjeantii* subsp. *sphaerica*, thirdly *Millioudodinium sarjeantii* subsp. *sphaericum*, fourthly *Rhynchodiniopsis sarjeantii* subsp. *sphaerica*, fifthly *Cribroperidinium?* *sarjeantii* subsp. *sphaericum*, sixthly (and now) *Cribroperidinium sarjeantii* subsp. *sphaericum*. Lentin and Vozzhennikova (1990, p.97–98) provided an "expanded description" for this subspecies. Age: Tithonian.

?*scottii* (Cookson and Eisenack, 1958, p.30, pl.2, figs.5–6) Helenes, 1984, p.131. Holotype: Cookson and Eisenack, 1958, pl.2, fig.5; Jan du Chêne et al., 1986a, pl.33, fig.5. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium?*, fourthly (and now) *Cribroperidinium?*. Questionable assignment: Helenes (1984, p.130). Age: early-middle Kimmeridgian.

**sepimentum* Neale and Sarjeant, 1962, p.443–444, pl.19, fig.4; text-figs.3a–b. Holotype: Neale and Sarjeant, 1962, pl.19, fig.4; text-fig.3a–b; Jan du Chêne et al., 1986a, pl.19, fig.4. N.I.A. Age: Hauterivian.

septatum (Hultberg, 1985c, p.104–105, pl.1, fig.C) Poulsen, 1996, p.77. Holotype: Hultberg, 1985c, pl.1, fig.C. Originally *Acanthaulax*, subsequently (and now) *Cribroperidinium*. Age: late Maastrichtian–Danian.

spinoreticulatum (McIntyre and Brideaux, 1980, p.15–16, pl.3, figs.4,8–12) Århus, 1992, p.310. Holotype: McIntyre and Brideaux, 1980, pl.3, figs.4,9,12; Jan du Chêne et al., 1986a, pl.13, figs.9–11. Originally *Millioudodinium*, subsequently *Apteodinium*, thirdly (and now) *Cribroperidinium*. Taxonomic junior synonym: *Gonyaulacysta* (as *Apteodinium*) *compta*, according to Lucas-Clark (1987, p.178). Age: Valanginian.

?strigosum (Yu Jingxian, 1982, p.240–241, pl.2, figs.1–2; pl.3, fig.3) Lentin and Williams, 1985, p.80. Holotype: Yu Jingxian, 1982, pl.2, fig.2. Originally *Gonyaulacysta*, subsequently (and now) *Cribroperidinium?*. Questionable assignment: Lentin and Williams (1985, p.80). Age: Late Jurassic–Early Cretaceous.

swithini Williams et al., 1998, p.151. Holotype: Sarjeant, 1984a, pl.3, figs.3–4; text-fig.3; Jan du Chêne et al., 1986a, pl.27, figs.7–10; Brenner, 1988, pl.3, figs.2,5; Fensome et al., 1995, figs.5–6 — p.1525. Originally *Meristaulax granulata* Brenner (name illegitimate), subsequently *Cribroperidinium swithini*. Substitute name for *Meristaulax granulata* Brenner, 1988, p.65–66, pl.3, figs.2,5; the name *Cribroperidinium granulatum* is preoccupied. Since the epithet is based on a given name, it ends in "i" rather than "ii" (I.C.N. Recommendation 60C.2). Age: Late Jurassic.

"?systemmatus" (Gitmez and Sarjeant, 1972, p.204–205, pl.5, figs.7–8) Stover and Evitt, 1978, p.150. Holotype: Gitmez and Sarjeant, 1972, pl.5, figs.7–8; Jan du Chêne et al., 1986a, pl.29, figs.4–7. Originally *Gonyaulacysta*, subsequently *Cribroperidinium*, thirdly *Millioudodinium*, fourthly *Cribroperidinium?*, fifthly *Acanthaulax*. **Taxonomic senior synonym:** *Gonyaulacysta* (as and now *Cribroperidinium*) *globata*, according to Poulsen (1996, p.72). Questionable assignment: Helenes (1984, p.125) as a problematic species. N.I.A. Age: early Kimmeridgian.

tensiftense Below, 1981a, p.41–42, pl.1, figs.10,11a–b; pl.13, figs.3a–e,4–5; text-figs.24a–d. Holotype: Below, 1981a, pl.1, fig.10; Jan du Chêne et al., 1986a, pl.19, fig.8; Fensome et al., 1991, fig.1 — p.757. Age: Barremian–Albian.

?tenuiceras (Eisenack, 1958a, p.389–391, pl.21, figs.14–15; pl.22, figs.1–3; pl.24, fig.2; text-figs.4a–c,5) Poulsen, 1996, p.78. Emendations: Sarjeant, 1985a, p.63,65, as *Acanthaulax tenuiceras*; Jan du Chêne et al., 1986b, p.29–30, as *Tehamadinium tenuiceras*. Holotype: Eisenack, 1958a, pl.21, fig.15; Sarjeant, 1985a, pl.6, figs.1–2; text-fig.3; Jan du Chêne et al., 1986a, pl.118, fig.1; Jan du Chêne et al., 1986b, pl.24, fig.5. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta?*, thirdly *Diacanthum*, fourthly *Occisucysta*, fifthly *Acanthaulax?*, sixthly *Tehamadinium*, seventhly (and now) *Cribroperidinium?*. Questionable assignment: Poulsen (1996, p.78). Taxonomic junior synonym: *Occisucysta victorii*, according to Pöthe de Baldis and Ramos (1988, p.33). Age: late Barremian–Aptian.

tenuitabulatum (Gerlach, 1961, p.159, pl.25, figs.10–11; text-figs.1–3) Helenes, 1984, p.124. Emendation: Sarjeant, 1984b, p.76, as *Rhynchodiniopsis tenuitabulata*. Holotype: Gerlach, 1961, pl.25, figs.10–11, lost according to Sarjeant (1984b, p.78). Lectotype: Sarjeant, 1984b, pl.2, fig.3, designated by Sarjeant (1984b, p.78). Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly (and now) *Cribroperidinium*, fifthly *Rhynchodiniopsis*. Lentin and Williams (1985, p.81) retained this species in *Cribroperidinium*. Age: middle Oligocene–middle Miocene.

undoryense Smith and Harding, 2004, p.374,375, pl.3, figs.1–6; pl.4, figs.7–9; text-fig.6. Holotype: Smith and Harding, 2004, pl.3, figs.1–3. Age: middle Volgian.

ventriosum (Wetzel, 1933a, p.161–162, pl.2, figs.4–6; text-figs.1,8) Lentin and Williams, 1973, p.35. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.5, as *Cribroperidinium ventriosum*. Holotype: Wetzel, 1933a, pl.2, fig.4; Lejeune-Carpentier, 1946, fig.2; Lejeune-Carpentier and Sarjeant, 1981, pl.1, figs.3–4; text-fig.3. Originally *Peridinium* (Appendix B), subsequently *Palaeoperidinium* (combination not validly published), thirdly (and now) *Cribroperidinium*. This combination was not validly published in Sarjeant (1967b, p.257) since that author did not fully reference the basionym. Age: Senonian.

?*venulosum* (Mao Shaozhi and Norris, 1988, p.34–35, pl.3, figs.1–2; text-fig.9) Lentin and Williams, 1989, p.84. Holotype: Mao Shaozhi and Norris, 1988, pl.3, fig.1. Originally *Millioudodinium*?, subsequently (and now) *Cribroperidinium*?. Questionable assignment: Lentin and Williams (1989, p.84). Age: Late Cretaceous.

"*venustum*" (Klement, 1960, p.44–45, pl.5, figs.10–13; text-fig.22) Poulsen, 1996, p.76. Holotype: Klement, 1960, pl.5, figs.10–11. **Taxonomic senior synonym:** *Gonyaulax* (as *Cribroperidinium*) *granulata*, according to Schrank (2005, p.56). Originally *Gonyaulax* (Appendix B), subsequently *Acanthogonyaulax* (combination not validly published), thirdly *Acanthaulax*, fourthly *Gonyaulacysta*, fifthly *Cribroperidinium*. Age: middle Oxfordian–Kimmeridgian.

vexillum Prössl, 1990, p.101, pl.17, figs.3,6,9; pl.19, figs.5,7 ex Prössl, 1992b, p.113–114. Holotype: Prössl, 1990, pl.19, figs.5,7. This name was not validly published in Prössl (1990, p.101), since that author did not specify the lodgment of the holotype. Age: late Turonian.

volkovae Iosifova, 1996, p.215,217,219, pl.2, figs.4,6a–b; text-figs.6A–B. Holotype: Iosifova, 1996, pl.2, figs.6a–b; text-figs.6A–B. Age: Ryazanian–?Hauterivian.

wetzeli (Lejeune-Carpentier, 1939, p.B526; text-figs.1–2) Helenes, 1984, p.124. Emendations: Lejeune-Carpentier, 1946, p.B189–B190, as *Gonyaulax wetzeli*; Lejeune-Carpentier and Sarjeant, 1981, p.2–3, as *Gonyaulacysta wetzeli*. Holotype: Lejeune-Carpentier, 1939, text-figs.1–2; Lejeune-Carpentier and Sarjeant, 1981, pl.5, figs.5–6. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Gonyaulacysta*?, fourthly (and now) *Cribroperidinium*, fifthly *Millioudodinium*. Lentin and Williams (1989, p.84) retained this species in *Cribroperidinium*. Age: Senonian.

"*wilsonii*" (Slimani, 1994, p.90–91, pl.14, figs.5–11) Schiøler et al., 1997, p.81. Holotype: Slimani, 1994, pl.14, figs.5–9. **Combination illegitimate — senior homonym:** *Cribroperidinium wilsonii* (Yun Hyesu, 1981) Poulsen, 1996. **Substitute name:** *Cribroperidinium graemei*. Originally *Apteodinium wilsonii*, subsequently *Cribroperidinium wilsonii* (combination illegitimate), thirdly (and now) *Cribroperidinium graemei*. Taxonomic junior synonym: *Gonyaulacysta filosa*, according to Schiøler et al. (1997, p.81). Age: early Campanian–late Maastrichtian.

wilsonii (Yun Hyesu, 1981, p.7–8, pl.1, figs.2–3,6–7a–b) Poulsen, 1996, p.78. Holotype: Yun Hyesu, 1981, pl.1, fig.6; Jan du Chêne et al., 1986a, pl.2, fig.18; Fensome et al., 1991, fig.3 — p.773. Originally *Acanthaulax*, subsequently (and now) *Cribroperidinium*. Taxonomic junior synonym: *Acanthaulax saetosa* (name not validly published), according to Slimani (2001a, p.192). Junior homonym: *Cribroperidinium wilsonii* (Slimani, 1994) Schiøler et al., 1997. Age: late Campanian.

subsp. *trabeculosum* Slimani and Louwye, 2013, p.13,15; pl.2, figs.1–9,11,13. Holotype: Slimani and Louwye, 2013, pl.2, figs.1–3. Originally (and now) *Cribroperidinium wilsonii* (Yun Hyesu) subsp. *trabeculosum*, subsequently *Cribroperidinium graemei* subsp. *trabeculosum*. Slimani and Louwye (2013) did not specify whether they were including this subspecies in *Cribroperidinium wilsonii* (Yun Hyesu, 1981) Poulsen or *Cribroperidinium wilsonii* (Slimani, 1994) Schiøler. Williams and Fensome (2016, p.140) assumed that the intended assignment was to the latter, which is illegitimate, and so transferred the subspecies to the substitute name *Cribroperidinium graemei*. However, H. Slimani (personal communication to GLW) affirms that the taxon was intended to be a subspecies of *Cribroperidinium wilsonii* (Yun Hyesu, 1981) Poulsen. Age: late Campanian.

subsp. *wilsonii*. Autonym. Holotype: Holotype: Slimani, 1994, pl.14, figs.5–9.

xinjiangense (He Chengquan, 1991, p.109, pl.4, fig.21) Lentin and Williams, 1993, p.141. Holotype: He Chengquan, 1991, pl.4, fig.21. Originally *Millioudodinium*, subsequently (and now) *Cribroperidinium*. Age: Paleocene–late Eocene.

CRISTADINIUM Head et al., 1989b, p.456. Type: Head et al., 1989b, pl.1, figs.10–11, as *Cristadinium cristatoserratum*.

**cristoserratum* Head et al., 1989b, p.456, pl.1, figs.9–11,13–15. Holotype: Head et al., 1989b, pl.1, figs.10–11. Age: late Miocene.

diminutivum Head et al., 1989b, p.456–457, pl.1, figs.8,12,16; pl.2, figs.8–9. Holotype: Head et al., 1989b, pl.1, fig.8. Age: late Miocene–earliest Pliocene.

headii Willumsen et al., 2014, p.276–277, pl.1, figs.1–10. Holotype: Willumsen et al., pl.1, figs.1–4. Age: Aquitanian.

"**CRUSSOLIA**" Wolfard and Van Erve, 1981, p.323–325. Emendation: Smelror and Århus, 1989, p.39. **Taxonomic senior synonym:** *Evansia*, according to Below (1990, p.73). Type: Wolfard and Van Erve, 1981, pl.1, figs.1–2, as *Crussolia deflandrei*.

"*dalei*" Smelror and Århus, 1989, p.42, figs.2A–D,3A–D,4A–D. Holotype: Smelror and Århus, 1989, figs.3A–B. **NOW** *Evansia*. Originally *Crussolia*, subsequently (and now) *Evansia*. Age: late Callovian.

"**deflandrei*" Wolfard and Van Erve, 1981, p.325–326,328, pl.1, figs.1–2; pl.2, figs.1–4; text-fig.3. Holotype: Wolfard and Van Erve, 1981, pl.1, figs.1–2; Fensome et al., 1993a, figs.1–2 — p.1103. **NOW** *Evansia*. Originally *Crussolia*, subsequently (and now) *Evansia*. Age: Callovian–early Oxfordian.

"*labyrinth*" Partington et al., 1993, p.379. **Name not validly published:** no description or illustration.

"*perireticulata*" Århus et al., 1989, p.46, figs.5a–i. Holotype: Århus et al., 1989, fig.5a. **NOW** *Evansia*. Originally *Crussolia*, subsequently (and now) *Evansia*. Age: Callovian.

CRUSTOCADOSINA Řehánek, 1985a, p.371. Calcareous dinoflagellates genus (see Elbrächter et al., 2008, p.1299). Fensome and Williams (2004) considered this genus to be not validly published because a type was not designated. However, Elbrächter et al. (2008, p.1299) implied that this generic name can be considered validly published as it was proposed under the I.C.Z.N. Type: not designated; "type species" — *Cadosina semiradiata* (name not validly published).

fragilis Řehánek, 1985a, p.371–373, pl.3, figs.1–6. Holotype: Řehánek, 1985a, pl.3, figs.1–2. Age: late Albian.

**semiradiata* (Wanner, 1940, p.81, text-figs.36–37) Řehánek, 1985a, p.371–372. Originally *Cadosina*, subsequently *Stomiosphaera*, thirdly (and now) *Crustocadosina*. Fensome and Williams (2004) considered this name to be not validly published because a type was not designated. However, Elbrächter et al. (2008, p.1299) implied that this generic name can be considered validly published as it was proposed under the I.C.Z.N. Age: Late Jurassic?

CRYODINIUM Esper and Zonneveld, 2001, p.36–37. This name was also proposed by Esper and Zonneveld (2002, p.201–202). Type: Esper and Zonneveld, 2001, pl.3, figs.1–3, as *Cryodinium meridianum*.

**meridianum* Esper and Zonneveld, 2001, p.37–38, text-fig.13; pl.3, figs.1–9. Holotype: Esper and Zonneveld, 2001, pl.3, figs.1–3; Esper and Zonneveld, 2002, pl.2, figs.4–6. This name was also proposed by Esper and Zonneveld (2002, p.202–203). Age: Holocene.

CRYPTARCHAEODINIUM Deflandre, 1939b, p.145. Emendations: Gitmez, 1970, p.246; Stover and Evitt, 1978, p.228; Sarjeant, 1984a, p.155–156 — however, see Lentin and Williams (1985, p.81). Type: Deflandre, 1939b, pl.6, fig.6, as *Cryptarchaeodinium calcaratum*.

**calcaratum* Deflandre, 1939b, p.145, pl.6, fig.6. Emendation: Gitmez, 1970, p.246–248. Holotype: Deflandre, 1939b, pl.6, fig.6. Age: Kimmeridgian.

"*granuligerum*" (Klement, 1960, p.41–42, pl.5, figs.4–5) Sarjeant, 1984a, p.156. Emendation: Sarjeant, 1984a, p.156–158, as *Cryptoarchaeodinium granuligerum*. Holotype: Klement, 1960, pl.5, figs.4–5; Sarjeant, 1984a, pl.1, figs.3–4; text-fig.1; Jan du Chêne et al., 1986a, pl.27, figs.11–14. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Cribroperidinium*, fourthly *Rhynchodiniopsis*, fifthly *Cryptarchaeodinium*, sixthly *Acanthaulax*. Taxonomic senior synonym: *Gonyaulax* (as *Gonyaulacysta*) *granulata*, according to Fisher and Riley (1980, p.321) — however, Sarjeant (1984a, p.156) retained *Gonyaulax* (as *Cryptarchaeodinium*) *granuligera*. Age: middle Oxfordian–early Kimmeridgian.

longispinum He Chengquan, 1991, p.106, pl.21, figs.11–14; text-fig.13. Holotype: He Chengquan, 1991, pl.21, fig.13; text-fig.13. Age: early Eocene.

CTENIDODINIUM Deflandre, 1939a, p.181. Emendations: Sarjeant, 1966b, p.154; Sarjeant, 1975a, p.55; Woollam, 1983, p.190; Benson, 1985, p.150. Taxonomic junior synonyms: *Brotzenia*, according to Stover and Evitt (1978, p.203) — however, *Brotzenia* is now considered a taxonomic junior synonym of *Dichadogonyaulax*; *Hystrichogonyaulax*, by implication in Jan du Chêne et al. (1985b, p.110), who transferred the "type species" of *Hystrichogonyaulax*, *Hystrichogonyaulax cornigera*, to *Ctenidodinium*; *Dichadogonyaulax*, according to Lentin and Williams (1973, p.46) — however, Sarjeant (1975a, p.50) and Benson (1985, p.152) retained *Dichadogonyaulax*; *Korystocysta*, according to Courtinat (1989, p.208) — however, Lentin and Williams (1989, p.213) retained *Korystocysta*. Type: Eisenack, 1935, pl.4, fig.9, as *Lithodinia jurassica* var. *ornata*.

"*adelum*" (Fenton et al., 1980, p.155–156, pl.14, figs.1–4; text-figs.3A–B) Lentin and Williams, 1981, p.61. Holotype: Fenton et al., 1980, pl.14, fig.3; text-figs.3A–B; Fensome et al., 1993a, fig.1 — p.883. **NOW** *Bradleyella*. Originally *Dichadogonyaulax*, subsequently *Ctenidodinium*, thirdly (and now) *Bradleyella*. For etymology see under *Bradleyella*. Age: late Bajocian.

ancora Riding and Helby, 2001d, p.69,71, figs.3A–L. Holotype: Riding and Helby, 2001d, figs.3G, J. The epithet is avowedly based on the Latin noun *ancora* (anchor) and thus should be cited as "*ancora*", not "*ancorum*" as indicated in Riding and Helby. N.I.A. Age: latest Bathonian–Callovian.

capitatum Wheeler and Sarjeant, 1990, p.304,306, pl.7, figs.5–6; pl.8, figs.1–2; text-fig.9 ex Wheeler and Sarjeant, 1992, p.381. Holotype: Wheeler and Sarjeant, 1990, pl.7, figs.5–6; pl.8, fig.1; text-fig.9. This name was not validly published in Wheeler and Sarjeant (1990), since the lodgement of the holotype was not cited (I.C.N. Article 40.7). Age: Middle Jurassic.

"?*chondrum*" Drugg, 1978, p.66, pl.1, figs.8–11. Holotype: Drugg, 1978, pl.1, fig.10. **NOW** *Dichadogonyaulax*. Originally *Ctenidodinium*, subsequently *Ctenidodinium?*, thirdly (and now) *Dichadogonyaulax*. Questionable assignment: Woollam (1983, p.193). Age: early Kimmeridgian.

combazii Dupin, 1968, p.2, pl.1, figs.1–6; text-figs.1–4. Holotype: Dupin, 1968, pl.1, figs.4–5. Woollam (1983, p.193) considered *Gonyaulax* (as *Hystrichogonyaulax*) *cornigera* to be the possible taxonomic senior synonym of this species. Age: middle-late Bathonian.

complanatum Harding, 1990b, p.25–26, pl.7, figs.1–12; text-fig.9 ex Harding in Williams et al. 1998, p.153. Holotype: Harding, 1990b, pl.7, fig.1. This name was not validly published in Harding (1990b) since the lodgement of the holotype was not specified (I.C.N. Article 40.7). Age: late Hauterivian–late Barremian.

continuum Gocht, 1970b, p.141–142, pl.26, fig.3; pl.27, fig.5; pl.29, figs.1–2; pl.32, fig.15; pl.33, fig.8. Holotype: Gocht, 1970b, pl.32, fig.15. Age: early Bathonian.

cornigerum (Valensi, 1953, p.27, pl.1, figs.4,8,10; pl.2, figs.1–2; pl.13, fig.5; text-fig.2a) Jan du Chêne et al., 1985b, p.110. Emendation: Jan du Chêne et al., 1985b, p.110, as *Ctenidodinium cornigerum*. Holotype: Valensi, 1953, pl.1, fig.8. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta?* (combination not validly

published), thirdly *Hystrichogonyaulax*, fourthly (and now) *Ctenidodinium*. Woollam (1983, p.193) considered *Ctenidodinium combazii* to be a possible taxonomic junior synonym of this species. Age: Bathonian.

coronatum Prauss, 1989, p.35,37, pl.13, figs.5–8,11–12; text-fig.12. Holotype: Prauss, 1989, pl.13, figs.7–8; text-fig.12. Age: middle Callovian.

"?**cristatum**" (Horowitz, 1975, p.25, pl.1, fig.8) Stover and Evitt, 1978, p.204. Emendation: Wheeler and Sarjeant, 1990, p.306–307, as *Dichadogonyaulax cristata*. Holotype: Horowitz, 1975, pl.1, fig.8; Fensome et al., 1995, fig.1 — p.1479; lost according to Sarjeant (1988, p.177). Neotype: Wheeler and Sarjeant, 1990, pl.8, fig.4; text-figs.10a–b; Fensome et al., 1995, fig.1 — p.1479; designated by Wheeler and Sarjeant (1992, p.382). **NOW** *Dichadogonyaulax*. Originally *Brotzenia*, subsequently *Ctenidodinium?*, thirdly *Dichadogonyaulax*. Questionable assignment: Stover and Evitt (1978, p.204). Taxonomic senior synonym: *Lithodinia jurassica* var. *ornata* (as *Ctenidodinium ornatum*), according to Woollam (1983, p.190) — however, Sarjeant (1988, p.180) retained *Ctenidodinium* (as *Dichadogonyaulax*) *cristatum*. Age: Late Triassic (probably not in place).

"**culmula**" (Norris, 1965, p.793–795, figs.1–2,6–9) Lentin and Williams, 1973, p.35. Holotype: Norris, 1965, figs.8–9. **NOW** *Dichadogonyaulax*. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly *Avellodinium*. N.I.A. Age: Portlandian.

elegantulum Millioud, 1969, p.427, pl.2, figs.1–3. Emendation: Below, 1981a, p.42. Holotype: Millioud, 1969, pl.2, figs.1–2. Age: late Hauterivian–Barremian.

"**eodentatum**" Loy and Wille in Partington et al., 1993, p.380. **Name not validly published:** no description or illustration.

fuscibasilarum Riding and Helby, 2001d, p.71–72, figs.4A–L. Holotype: Riding and Helby, 2001d, figs.4J–K. Age: middle-late Callovian.

"**gochtii**" (Sarjeant, 1976a, p.11,13, pl.2, fig.1; pl.3, fig.4; text-figs.2A–C) Stover and Evitt, 1978, p.204. Holotype: Sarjeant, 1976a, pl.2, fig.1; text-figs.2A–B. **NOW** *Korystocysta*. Originally *Dichadogonyaulax*, subsequently *Ctenidodinium*, thirdly (and now) *Korystocysta*. Taxonomic senior synonym: *Gonyaulax* (now *Korystocysta*) *pachyderma*, by implication in Conway (1990, p.35), who considered *Dichadogonyaulax* (as *Korystocysta*) *kettonensis* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Dichadogonyaulax* (as *Korystocysta*) *gochtii*. Taxonomic junior synonym: *Dichadogonyaulax* (subsequently *Korystocysta*) *kettonensis*, according to Riley and Fenton (1982, p.199) and Hergreen et al. (2000, p.50). Age: Bathonian.

"**kettonense**" (Sarjeant, 1976a, p.13,15, pl.1, figs.1–2; pl.3, figs.1–2; pl.6, fig.1; text-figs.3A–D) Stover and Evitt, 1978, p.204. Holotype: Sarjeant, 1976a, pl.1, figs.1–2; Fensome et al., 1995, figs.1–4 — p.1583. Originally *Dichadogonyaulax*, subsequently *Ctenidodinium*, thirdly (and now) *Korystocysta*. **Taxonomic senior synonym:** *Dichadogonyaulax* (now *Korystocysta*) *gochtii*, according to Riley and Fenton (1982, p.199) and Hergreen et al. (2000, p.50). Taxonomic senior synonyms: *Gonyaulax* (now *Korystocysta*) *pachyderma* and *Leptodinium* (subsequently *Korystocysta*) *norrisii*, by implication in Conway (1990, p.35), who considered *Dichadogonyaulax* (as *Korystocysta*) *kettonensis* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Korystocysta kettonensis*. Age: Bathonian.

"?**mosaicum**" Dodekova, 1975, p.18–19, pl.1, figs.1–6; pl.2, figs.1–3,6. Holotype: Dodekova, 1975, pl.1, figs.1–3. **NOW** *Mosaicodinium*. Originally *Ctenidodinium*, subsequently *Ctenidodinium?*, thirdly *Eodinia*, fourthly (and now) *Mosaicodinium*. Questionable assignment: Benson (1985, p.152). Age: late Bathonian.

"**norrisii**" (Pocock, 1972, p.92–93, pl.24, figs.9–12; text-fig.9) Stover and Evitt, 1978, p.204. Holotype: Pocock, 1972, pl.24, fig.9; Jansonius, 1986, pl.2, figs.6–8; text-fig.5. Originally *Leptodinium*, subsequently *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly *Korystocysta*. **Taxonomic senior synonym:** *Gonyaulax* (now *Korystocysta*) *pachyderma*, according to Benson (1985, p.154). Taxonomic junior synonym: *Dichadogonyaulax* (subsequently *Korystocysta*) *kettonensis*, by implication in Conway (1990, p.35), who considered *Korystocysta kettonensis* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Dichadogonyaulax* (as *Korystocysta*) *kettonensis*. Age: Callovian.

***ornatum** (Eisenack, 1935, p.176, pl.4, figs.9–10; text-figs.1–4) Deflandre, 1939a, p.181. Holotype: Eisenack, 1935, pl.4, fig.9. Originally *Lithodinia jurassica* var. *ornata*, subsequently (and now) *Ctenidodinium ornatum*, thirdly *Gonyaulacysta ornata*. Lentin and Williams (1973, p.35) retained this species in *Ctenidodinium*. Taxonomic junior synonym: *Brotzenia* (as *Ctenidodinium*?; now *Dichadogonyaulax cristata*, according to Woollam (1983, p.190) — however, Sarjeant (1988, p.180) retained *Brotzenia* (as *Dichadogonyaulax cristata*). Age: Oxfordian.

"**?pachydermum**" (Deflandre, 1939a, p.176–178, pl.7, figs.6–10; text-figs.7–10) Gocht, 1970b, p.142–143. Holotype: Deflandre, 1939a, pl.7, figs.6–7. **NOW** *Korystocysta*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Ctenidodinium*, fourthly *Ctenidodinium*?, fifthly (and now) *Korystocysta*, sixthly *Dichadogonyaulax*. Questionable assignment: Stover and Evitt (1978, p.204). Taxonomic junior synonyms: *Leptodinium* (as *Korystocysta*) *norrisii*, according to Benson (1985, p.154); *Dichadogonyaulax* (subsequently *Korystocysta*) *kettonensis*, by implication in Conway (1990, p.35), who considered *Dichadogonyaulax kettonensis* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Dichadogonyaulax* (as *Korystocysta*) *kettonensis*. Age: Oxfordian.

"**panneum**" (Norris, 1965, p.796–798, figs.3,10–13) Lentin and Williams, 1973, p.36. Holotype: Norris, 1965, figs.10–12. **NOW** *Dichadogonyaulax*?. Originally *Leptodinium*, subsequently *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly (and now) *Dichadogonyaulax*?. Age: Kimmeridgian–Portlandian.

planocristatum Riding and Helby, 2001d, p.72–73, figs.5A–O. Holotype: Riding and Helby, 2001d, fig.5J. Age: middle-late Callovian.

?rotundum Dodekova, 1975, p.19–20, pl.4, figs.13–14; text-fig.1. Holotype: Dodekova, 1975, pl.4, figs.13–14; text-fig.1. Originally *Ctenidodinium*, subsequently *Dichadogonyaulax*, thirdly (and now) *Ctenidodinium*?. Questionable assignment: Benson (1985, p.152). Dodekova (1990, p.36) considered *Dichadogonyaulax stauromatos* to be a probable taxonomic junior synonym of this species. Age: late Bathonian.

"**saepitum**" (Ashraf, 1979, p.128, pl.2, fig.27; pl.3, figs.1–3,5) Jan du Chêne et al., 1986a, p.288. Holotype: Ashraf, 1979 pl.3, fig.2. **NOW** *Leptodinium*. Originally (and now) *Leptodinium*, subsequently *Hystrichogonyaulax*, thirdly *Rhynchodiniopsis*, fourthly *Ctenidodinium*. Age: Late Jurassic (Malm).

?schizoblatum (Norris, 1965, p.798–800, figs.4–5,14–17) Lentin and Williams, 1973, p.36. Holotype: Norris, 1965, figs.5,15–17. Originally *Leptodinium*, subsequently *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly (and now) *Ctenidodinium*?. Questionable assignment: Benson (1985, p.152). Age: Portlandian.

?scissum McIntyre and Brideaux, 1980, p.21, pl.8, figs.6–9; pl.9, figs.1–6. Holotype: McIntyre and Brideaux, 1980, pl.8, figs.6,8–9. Originally *Ctenidodinium*, subsequently (and now) *Ctenidodinium*?. Questionable assignment: Benson (1985, p.152). Age: Valanginian.

"**sellwoodii**" (Sarjeant, 1975a, p.52,55, pl.1, figs.A–H; pl.2, figs.I–K; pl.3, figs.L–Q) Stover and Evitt, 1978, p.204. Holotype: Sarjeant, 1975a, pl.1, figs.A–B; pl.2, figs.I–K. **NOW** *Dichadogonyaulax*. Originally (and now) *Dichadogonyaulax*, subsequently *Ctenidodinium*. Taxonomic junior synonym: *Dichadogonyaulax stauromatos*, according to Riley and Fenton (1982, p.199) and Lentin and Williams (1993, p.179–180). Age: Bathonian.

"**?stauromatos**" (Sarjeant, 1976a, p.9–11, pl.2, fig.4; pl.3, figs.5–6; text-figs.1A–C) Stover and Evitt, 1978, p.204. Holotype: Sarjeant, 1976a, pl.2, fig.4. Originally *Dichadogonyaulax*, subsequently *Ctenidodinium*, thirdly *Ctenidodinium*?. Questionable assignment: Benson (1985, p.152). **Taxonomic senior synonym:** *Dichadogonyaulax* (as *Ctenidodinium*) *sellwoodii*, according to Riley and Fenton (1982, p.199) and Conway (1990, p.35). Taxonomic senior synonym: *Ctenidodinium tenellum*, according to Courtinat (1989, p.209) — however, Lentin and Williams (1993, p.179–180) retained *Dichadogonyaulax stauromatos* as a taxonomic junior synonym of *Dichadogonyaulax sellwoodii*. Dodekova (1990, p.36) considered *Ctenidodinium? rotundum* to be a probable taxonomic senior synonym of this species. N.I.A. Age: Bathonian.

tenellum Deflandre, 1939a, p.182, pl.9, figs.9–10. Holotype: Deflandre, 1939a, pl.9, figs.9–10. Taxonomic junior synonym: *Dichadogonyaulax stauromatos*, according to Courtinat (1989, p.209) — however, Lentin and Williams

(1993, p.179–180) retained *Dichadogonyaulax stauromatos* as a taxonomic junior synonym of *Dichadogonyaulax sellwoodii*. Sarjeant (1978a, p.37) recommended "that this species name should be allowed to fall into disuse". Woollam (1980, p.250) considered *Dichadogonyaulax* (as *Ctenidodinium*) *sellwoodii* and *Dichadogonyaulax* (as *Ctenidodinium*) *stauromatos* to be possible taxonomic junior synonyms of this species. Age: Oxfordian.

?thulium (Davies, 1983, p.19–20, pl.5, figs.1–8,10–12; text-fig.14) Jan du Chêne et al., 1986b, p.32. Holotype: Davies, 1983, pl.5, figs.10–11. Originally *Occisucysta*, subsequently (and now) *Ctenidodinium*?. Questionable assignment: Jan du Chêne et al. (1986b, p.32). Age: middle Callovian–Oxfordian.

"**CTENOPHORA**" Xu Jinli et al., 1997, p.115,151–152. **Taxonomic senior synonym:** *Chlamydophorella*, by implication in He Chengquan et al. (2009, p.342), who transferred the type of *Ctenophora* to *Chlamydophorella*. Xu Jinli et al. (1997, p.115) spelled the name as "*Ctenosphaera*" but as "*Ctenophora*" on p.151 in association with the English diagnosis; thus we consider the latter spelling to be correct. Moreover, Xu Jinli et al. (1997, p.151) indicated that the name is derived from the Latin meaning "comb-bearer", and thus the spelling *Ctenophora* makes more sense than *Ctenosphaera* on the basis of the etymological derivation. Type: Xu Jinli et al., 1997, pl.36, figs.1a–b, as *Ctenophora regularis*.

"***regularis**" Xu Jinli et al., 1997, p.115,152, pl.36, figs.1a–b,2a–b,3a–b,4a–b,5–6. Holotype: Xu Jinli et al., 1997, pl.36, figs.1a–b. **NOW** *Chlamydophorella*. Originally *Ctenophora*, subsequently (and now) *Chlamydophorella*. This name was cited as "*Ctenosphaera regularis*" by Xu Jinli et al. (1997, p.115). Age: Oligocene.

"**CUBICULOSPHERA**" Harris, 1974, p.163–164. **Taxonomic senior synonym:** *Geiselodinium*, according to Stover and Evitt (1978, p.230–231). Type: Harris, 1974, pl.2, fig.10, as *Cubiculosphaera maslinensis*.

"***maslinensis**" Harris, 1974, p.164, pl.2, fig.10. Holotype: Harris, 1974, pl.2, fig.10. **NOW** *Geiselodinium*. Originally *Cubiculosphaera*, subsequently (and now) *Geiselodinium*. Age: middle Eocene.

CUBODINELLUM Keupp, 1987, p.48. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1299). Type: Keupp, 1987, pl.9, figs.5–6,9, as *Cubodinellum renei*.

***renei** Keupp, 1987, p.48, pl.9, figs.5–10. Holotype: Keupp, 1987, pl.9, figs.5–6,9. Age: middle Albian–early Cenomanian.

sulcatum Zügel, 1994, p.53–54, pl.11, figs.6–9. Holotype: Zügel, 1994, pl.11, figs.6–9. Age: late Cenomanian.

CULVERSPHAERA Prince et al., 2008, p.88. Type: Clarke and Verdier, 1967, pl.10, fig.2, as *Nematosphaeropsis velata*.

***velata** (Clarke and Verdier, 1967, p.51–52, pl.10, figs.1–2; text-fig.22) Prince et al., 2008, p.88. Holotype: Clarke and Verdier, 1967, pl.10, fig.2. Originally *Nematosphaeropsis*, subsequently *Spiniferites*?, thirdly (and now) *Culversphaera*. Age: Santonian.

"**CYCLAPOPHYSIS**" Benson, 1976, p.182. **Taxonomic senior synonym:** *Disphaerogena*, according to Sarjeant (1985b, p.140–141). Taxonomic junior synonym: *Plethysyrinx*, according to Stover and Williams (1987, p.179). Type: Benson, 1976, pl.1, figs.9–12, as *Cyclapophysis monmouthensis*.

***irregularis** Wilson, 1988, p.16, pl.4, figs.4–5,7a–b. Holotype: Wilson, 1988, pl.4, figs.7a–b; Fensome et al., 1996, figs.1–2 — p.2173. **NOW** *Disphaerogena*. Originally *Cyclapophysis*, subsequently (and now) *Disphaerogena*. Age: middle Eocene.

"*lemniscata*" (Corradini, 1973, p.152–153, pl.22, figs.4a–b,5; pl.33, figs.2,4; pl.39, fig.2) Lentin and Williams, 1985, July, p.84. Holotype: Corradini, 1973, pl.22, fig.5; Fensome et al., 1995, fig.3 — p.1601. **NOW** *Disphaerogena*. Originally *Cordosphaeridium*, subsequently *Cordosphaeridium*?, thirdly *Plethysyrinx*, fourthly *Cyclapophysis*, fifthly (and now) *Disphaerogena*. Heilmann-Clausen (1985, p.20; October) also proposed this combination. Age: Late Cretaceous–Paleocene.

"**monmouthensis*" Benson, 1976, p.183, pl.1, figs.9–12; pl.2, fig.1. Holotype: Benson, 1976, pl.1, figs.9–12. **Taxonomic senior synonym:** *Disphaerogena carposphaeropsis*, according to Sarjeant (1985b, p.141). Age: late Maastrichtian–early Paleocene.

CYCLONEPHELIUM Deflandre and Cookson, 1955, p.285. Emendations: Cookson and Eisenack, 1962b, p.493–494; Williams and Downie, 1966c, p.223; Ioannides et al., 1977, p.450; Sarjeant and Stover, 1978, p.51; Stover and Evitt, 1978, p.35; Dörhöfer and Davies, 1980, p.41. Taxonomic junior synonyms: *Circulodinium*, according to Davey (1978, p.894) — however, Jansonius (1986, p.204) retained *Circulodinium*; *Tenua* Eisenack, according to Sarjeant and Stover (1978, p.49) — however, Sarjeant (1985a, p.93) retained *Tenua* Eisenack. *Cyclonephelium* was a not validly published in Deflandre and Cookson (1954, p.1237), since these authors did not provide a description. Type: Deflandre and Cookson, 1955, pl.2, fig.12, as *Cyclonephelium compactum*.

?*ambiguum* He Chengquan, 1991, p.135, pl.28, figs.7–8. Holotype: He Chengquan, 1991, pl.28, fig.7. Questionable assignment: He Chengquan (1991, p.135). Age: Paleocene.

areolatum Cookson and Eisenack, 1960b, p.253, pl.38, figs.7–8. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.8. Originally (and now) *Cyclonephelium*, subsequently *Yalkalpodinium*. Stover and Williams (1987, p.231) retained this species in *Cyclonephelium*. Age: Tithonian.

"*asperum*" (Singh, 1971, p.322, pl.50, fig.1) Below, 1981a, p.10. Holotype: Singh, 1971, pl.50, fig.1; Fauconnier and Masure, 2004, pl.14, fig.1. **NOW** *Circulodinium*. Originally *Canningia*, subsequently *Canningia*?, thirdly *Epelidosphaeridia*, fourthly *Cyclonephelium*, fifthly (and now) *Circulodinium*. Age: middle Albian.

"*assamicum*" Jain et al., 1975, p.11, pl.5, figs.61–62; pl.6, fig.73. Holotype: Jain et al., 1975, pl.5, fig.61; Fauconnier and Masure, 2004, pl.30, figs.1–2. **NOW** *Glaphyrocysta*?. Originally *Cyclonephelium*, subsequently *Cyclonephelium*?, thirdly *Glaphyrocysta*, fourthly (and now) *Glaphyrocysta*? Questionable assignment: Stover and Evitt (1978, p.36). Age: Danian.

"*asymmetricum*" Burger, 1980b, p.270, figs.6c,7a–c. Holotype: Burger, 1980b, fig.7a; Fauconnier and Masure, 2004, pl.14, fig.2. **NOW** *Circulodinium*. Originally *Cyclonephelium*, subsequently (and now) *Circulodinium*. Age: Neocomian.

"?*attadalicum*" Cookson and Eisenack, 1962b, p.495, pl.5, figs.12–15. Holotype: Cookson and Eisenack, 1962b, pl.5, fig.13. **NOW** *Circulodinium*. Originally *Cyclonephelium*?, subsequently *Aptea*, thirdly *Canningia*, fourthly (and now) *Circulodinium*. Questionable assignment: Cookson and Eisenack (1962b, p.495). Age: Aptian–Albian.

"*australe*" (Pöthe de Baldis, 1966, p.225, pl.1, fig.h) Heisecke, 1970, p.252. Holotype: Pöthe de Baldis, 1966, fig.h. **NOW** *Membranilarnacia*?. Originally *Membranilarnax*, subsequently *Cyclonephelium*, thirdly *Membranilarnacia*, fourthly (and now) *Membranilarnacia*?. Age: Early Tertiary.

?*baculatum* Song Zhichen in Song Zhichen et al., 1985, p.30, pl.6, figs.1–3. Holotype: Song Zhichen et al., 1985, pl.6, figs.1–2. Questionable assignment: Song Zhichen in Song Zhichen et al. (1985, p.30). Age: ?early Pleistocene.

"?*barbiferum*" Cookson and Eisenack, 1982, p.42, pl.7, figs.8–9. Holotype: Cookson and Eisenack, 1982, pl.7, fig.9. **NOW** *Circulodinium*. Originally *Cyclonephelium*?, subsequently (and now) *Circulodinium*. Questionable assignment: Cookson and Eisenack (1982, p.42). Age: Albian–Cenomanian.

"*brevispinatum*" (Millioud, 1969, p.427–428, pl.1, figs.8–9) Below, 1981a, p.11 [February]. Holotype: Millioud, 1969, pl.1, figs.8–9. **NOW** *Circulodinium brevispinatum*. Originally *Cyclonephelium distinctum* var. *brevispinatum*, subsequently *Cyclonephelium distinctum* subsp. *brevispinatum*, thirdly *Cyclonephelium brevispinatum*, fourthly (and now) *Circulodinium brevispinatum*. Yun Hyesu (1981, p.51; May) also proposed this combination. Age: late Hauterivian–early Aptian.

"*brevispinosum*" (Pocock, 1962, p.81, pl.14, figs.222–223) Lentin and Williams, 1981, p.63. Emendation: Brideaux, 1977, p.15–16, as *Tenua brevispinosa*. Holotype: Pocock, 1962, pl.14, fig.222; Jansonius, 1986, pl.4, fig.6; Fauconnier and Masure, 2004, pl.14, figs.7–8. **NOW** *Circulodinium*. Originally *Palaeohystrichophora*, subsequently *Tenua* Eisenack, thirdly *Canningia*?, fourthly *Cyclonephelium*, fifthly (and now) *Circulodinium*. Age: Barremian.

?*bulbosum* Smith and Harding, 2004, p.375,376, pl.4, figs.6–10; pl.5, figs.4–6; text-fig.7. Holotype: Smith and Harding, 2004, pl.4, figs.6–8. Questionable assignment: Smith and Harding (2004, p.375). Age: middle Volgian.

"?*castelcasiense*" Corradini, 1973, p.161, pl.24, figs.2,5a–b; pl.35, figs.1–2. Holotype: Corradini, 1973, pl.24, fig.2; Fauconnier and Masure, 2004, pl.30, figs.3–7. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently *Cyclonephelium*?, thirdly (and now) *Glaphyrocysta*. Questionable assignment: Marheinecke (1992, p.73). Age: Late Cretaceous–Paleocene.

"subsp. *castelcasiense*". Autonym. Holotype: Corradini, 1973, pl.24, fig.2; Fauconnier and Masure, 2004, pl.30, figs.3–7. **NOW** *Glaphyrocysta castelcasiensis* subsp. *castelcasiensis*. Originally *Cyclonephelium?* *castelcasiense* subsp. *castelcasiense*, subsequently (and now) *Glaphyrocysta castelcasiensis* subsp. *castelcasiensis*.

"subsp. *prominentum*" Marheinecke, 1992, p.73–74, pl.15, figs.1–4. Holotype: Marheinecke, 1992, pl.15, figs.1–4; Fauconnier and Masure, 2004, pl.30, figs.8–10. **NOW** *Glaphyrocysta castelcasiensis* subsp. *prominenta*. Originally *Cyclonephelium?* *castelcasiense* subsp. *prominentum*, subsequently (and now) *Glaphyrocysta castelcasiensis* subsp. *prominenta*. Contrary to the opinion of Lentin and Williams (1993, p.147), Williams et al. (1998, p.157) considered this name to be validly published. Age: late Maastrichtian.

chabaca Below, 1981a, p.12–13, pl.4, figs.9–11; pl.9, figs.2–3; pl.15, fig.25. Holotype: Below, 1981a, pl.4, fig.9; Fensome et al., 1991, figs.1–2 — p.607; Fauconnier and Masure, 2004, pl.18, figs.1–3. N.I.A. Age: Aptian–Cenomanian.

circulatum He Chengquan, 1991, p.135, pl.10, figs.7–12. Holotype: He Chengquan, 1991, pl.10, fig.7. Age: middle-late Eocene.

clathromarginatum Cookson and Eisenack, 1962b, p.495, pl.6, figs.1–4. Holotype: Cookson and Eisenack, 1962b, pl.6, fig.2; Fauconnier and Masure, 2004, pl.17, fig.6. Age: late Albian–Cenomanian.

combibaculum Song Zhichen in Song Zhichen et al., 1985, p.29–30, pl.6, figs.10–11; Fauconnier and Masure, 2004, pl.32, fig.5. Holotype: Song Zhichen et al., 1985, pl.6, figs.10–11. Age: ?early Pleistocene.

"*combinatum*" Jiabo, 1978, p.78, pl.27, fig.3. Holotype: Jiabo, 1978, pl.27, fig.3; Fauconnier and Masure, 2004, pl.32, fig.5. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: Early Tertiary.

**compactum* Deflandre and Cookson, 1955, p.285, pl.2, figs.11–13; text-figs.44–46. Holotype: Deflandre and Cookson, 1955, pl.2, fig.12; Bint, 1986, text-fig.15A; Fauconnier and Masure, 2004, pl.17, figs.1–5. Age: Albian–Santonian.

crassimarginatum Cookson and Eisenack, 1974, p.74–75, pl.28, figs.1–4. Holotype: Cookson and Eisenack, 1974, pl.28, fig.3. Age: Middle Cretaceous.

"*cuculliforme*" (Davies, 1983, p.29, pl.10, figs.1–4; text-fig.26) Århus, 1992, p.312. Holotype: Davies, 1983, pl.10, figs.3–4; Fauconnier and Masure, 2004, pl.69, figs.1–3. Originally *Sentusidinium*, subsequently *Sentusidinium?*, thirdly *Cyclonephelium*. **Taxonomic senior synonym:** *Cleistosphaeridium* (now *Sentusidinium*) *separatum*, according to Courtinat in Fauconnier and Masure (2004, p.486). Age: Berriasian–Valanginian.

deconinckii Boltenhagen, 1977, p.52–53, pl.4, figs.5a–b,6. Holotype: Boltenhagen, 1977, pl.4, figs.5a–b; Fauconnier and Masure, 2004, pl.18, figs.5–6. Age: Campanian.

"*densebarbatum*" Cookson and Eisenack, 1960b, p.253, pl.38, figs.9–10. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.10; Fauconnier and Masure, 2004, pl.14, figs.3–4. **NOW** *Circulodinium*. Originally *Cyclonephelium*, subsequently (and now) *Circulodinium*. Age: Tithonian.

"*distinctum*" Deflandre and Cookson, 1955, p.285–286, pl.2, fig.14; text-figs.47–48. Holotype: Deflandre and Cookson, 1955, pl.2, fig.14. **NOW** *Circulodinium*. Originally *Cyclonephelium*, subsequently (and now) *Circulodinium*. Taxonomic junior synonym: *Circulodinium deflandrei*, according to Millioud (1969, p.427) and Harker and Sarjeant in Harker et al. (1990, p.80) — however, Fauconnier and Londeix in Fauconnier and Masure (2004, p.114) retained *Circulodinium deflandrei*. Age: Senonian.

"subsp. *brevispinatum*" (Millioud, 1969, p.427–428, pl.1, figs.8–9) Lentin and Williams, 1973, p.36. Holotype: Millioud, 1969, pl.1, figs.8–9. **NOW** *Circulodinium brevispinatum*. Originally *Cyclonephelium distinctum* var. *brevispinatum*, subsequently *Cyclonephelium distinctum* subsp. *brevispinatum*, thirdly *Cyclonephelium brevispinatum*, fourthly (and now) *Circulodinium brevispinatum*. Age: late Hauterivian–early Aptian.

"var. *brevispinatum*" Millioud, 1969, p.427–428, pl.1, figs.8–9. Holotype: Millioud, 1969, pl.1, figs.8–9. **NOW** *Circulodinium brevispinatum*. Originally *Cyclonephelium distinctum* var. *brevispinatum*, subsequently *Cyclonephelium distinctum* subsp. *brevispinatum*, thirdly *Cyclonephelium brevispinatum*, fourthly (and now) *Circulodinium brevispinatum*. Age: late Hauterivian–early Aptian.

"subsp. *distinctum*". Autonym. Holotype: Deflandre and Cookson, 1955, pl.2, fig.14. **NOW** *Circulodinium distinctum* subsp. *distinctum*. Originally *Cyclonephelium distinctum* subsp. *distinctum*, subsequently (and now) *Circulodinium distinctum* subsp. *distinctum*.

"var. *distinctum*". Autonym. Holotype: Deflandre and Cookson, 1955, pl.2, fig.14. **Now redundant.**

"subsp. *laevigatum*" Mehrotra and Sarjeant, 1986, p.719–720, pl.8, figs.1–2; pl.9, fig.2; text-fig.7a. Holotype: Mehrotra and Sarjeant, 1986, pl.9, fig.2; text-fig.7a. **NOW** *Circulodinium distinctum* subsp. *laevigatum*. Originally *Cyclonephelium distinctum* subsp. *laevigatum*, subsequently (and now) *Circulodinium distinctum* subsp. *laevigatum*. Age: Valanginian.

"subsp. *longispinatum*" Davey, 1978, p.894, pl.3, figs.4,7–8. Holotype: Davey, 1978, pl.3, fig.7. **NOW** *Cyclonephelium longispinatum*. Originally *Cyclonephelium distinctum* subsp. *longispinatum*, subsequently *Circulodinium distinctum* subsp. *longispinatum*, thirdly (and now) *Cyclonephelium longispinatum*. Age: Turonian.

"subsp. *psilatum*" (Yu Jingxian and Zhang Wangping, 1980, p.115, pl.6, figs.1–2) Lentin and Williams, 1985, p.86. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.6, fig.2. **NOW** *Circulodinium distinctum* subsp. *psilatum*. Originally *Cyclonephelium distinctum* var. *psilatum*, subsequently *Cyclonephelium distinctum* subsp. *psilatum*, thirdly (and now) *Circulodinium distinctum* subsp. *psilatum*. Age: Turonian–Santonian.

"var. *psilatum*" Yu Jingxian and Zhang Wangping, 1980, p.115, pl.6, figs.1–2. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.6, fig.2. **NOW** *Circulodinium distinctum* subsp. *psilatum*. Originally *Cyclonephelium distinctum* var. *psilatum*, subsequently *Cyclonephelium distinctum* subsp. *psilatum*, thirdly (and now) *Circulodinium distinctum* subsp. *psilatum*. Age: Turonian–Santonian.

"**divaricatum**" Williams and Downie, 1966c, p.223–224, pl.25, fig.1; text-fig.60. Holotype: Williams and Downie, 1966c, pl.25, fig.1; text-fig.60. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: early Eocene.

"**downiei**" (Sarjeant, 1960a, p.138) Ioannides et al., 1977, p.451. Holotype: Downie, 1957, pl.20, fig.10, as *Hystrichosphaeridium pattei*; Jan du Chêne et al., 1986a, pl.3, figs.7–9. **NOW** *Cribroperidinium?*. Originally *Baltisphaeridium* (Appendix A), subsequently *Acanthaulax*, thirdly *Acanthaulax?*, fourthly *Cyclonephelium*, fifthly (and now) *Cribroperidinium?*. Age: Kimmeridgian.

?**dubium** (Jain and Millepied, 1975, p.152, pl.5, figs.75–76) Sarjeant and Stover, 1978, p.52. Holotype: Jain and Millepied, 1975, pl.5, fig.76. Originally *Tenua* Eisenack, subsequently *Cyclonephelium*, thirdly (and now) *Cyclonephelium?*. Questionable assignment: Fauconnier and Londeix in Fauconnier and Masure (2004, p.147) as a problematic species. Age: Campanian–Maastrichtian.

"**eisenackii**" Davey, 1969a, p.170, pl.8, figs.3–4; pl.9, fig.4; text-figs.16a–b. Holotype: Davey, 1969a, pl.8, fig.4. **NOW** *Pseudoceratium*. Originally *Cyclonephelium*, subsequently *Aptea*, thirdly (and now) *Pseudoceratium*. Taxonomic senior synonym: *Aptea* (now *Pseudoceratium*) *polymorpha*, according to Cookson and Eisenack (1974, p.74) — however, Below (1981a, p.7) retained *Cyclonephelium* (as *Aptea*) *eisenackii*. Age: late Albian.

"?**expansum**" Corradini, 1973, p.161–162, pl.24, figs.8a–b; text-fig.7. Emendation: Roncaglia and Corradini, 1997, p.187–188, as *Glaphyrocysta expansa*. Holotype: Corradini, 1973, pl.24, figs.8a–b; Fauconnier and Masure, 2004, pl.32, figs.3–4. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently *Cyclonephelium?*, thirdly (and now) *Glaphyrocysta*. Questionable assignment: Stover and Evitt (1978, p.36) as a problematic species. Age: Late Cretaceous–Paleocene.

"**exuberans**" Deflandre and Cookson, 1955, p.285 ex Eaton, 1976, p.255. Emendation: Sarjeant, 1986, p.29–31, as *Glaphyrocysta exuberans*. Holotype: PASTIELS, 1948, pl.5, figs.11,13, as *Membranilarnax pterospermoides*, designated by Eaton (1976, p.255); lost according to Sarjeant (1986, p.30). Neotype: Eaton, 1976, pl.8, fig.2, designated by Sarjeant (1986, p.30). **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Name not validly published in Deflandre and Cookson (1955, p.285) since these authors did not provide a description or a direct reference to one (as required after 1952 by ICBN Article 32.3). Name not validly published in Williams and Downie (1966c, p.225) since holotype not designated. Age: Late Cretaceous.

filoreticulatum (Slimani, 1994, p.96–97, pl.15, figs.1–6) Prince et al., 1999, p.164. Holotype: Slimani, 1994, pl.15, figs.1–4. Originally *Canningia*, subsequently (and now) *Cyclonephelium*. Age: early–late Campanian.

formosum (Iosifova, 1992, p.61, pl.9, figs.3a–c; text-figs.1c–d) Fauconnier in Fauconnier and Masure, 2004, p.146. Holotype: Iosifova, 1992, pl.9, figs.3a–c; text-figs.1c–d; Iosifova, 1996, pl.16, figs.6a–b; text-figs.5A–B. Originally *Circulodinium*, subsequently (and now) *Cyclonephelium*. Age: Valanginian.

?**granulatum** (Horowitz, 1975, p.25, pl.1, fig.4) Stover and Evitt, 1978, p.36. Holotype: Horowitz, 1975, pl.1, fig.4. Originally *Doidyx*, subsequently (and now) *Cyclonephelium?*. Questionable assignment: Stover and Evitt (1978, p.36) as a problematic species. Conway and Cousminer (1983, p.35) questioned the age assigned to this species. Age: Late Triassic (probably not in place).

?**hexalobosum** (Cookson and Eisenack, 1974, p.76, pl.26, figs.6–7) Stover and Evitt, 1978, p.36. Holotype: Cookson and Eisenack, 1974, pl.26, fig.7. Originally *Cassidium*, subsequently *Cyclonephelium*, thirdly (and now) *Cyclonephelium?*. Questionable assignment: Fauconnier and Londeix in Fauconnier and Masure (2004, p.147) as a problematic species. Age: Middle Cretaceous–Senonian.

"**hirtellum**" (Alberti, 1961, p.28, pl.4, fig.20) Davey, 1978, p.894. Holotype: Alberti, 1961, pl.4, fig.20. **NOW** *Circulodinium*. Originally (and now) *Circulodinium*, subsequently *Canningia*, thirdly *Cyclonephelium*. Backhouse (1988, p.83) considered *Tenua* (as *Cyclonephelium*) *hystrix* to be the possible taxonomic senior synonym of this species. Below (1981a, p.10) also proposed this combination. Age: Valanginian–Hauterivian.

"hughesii" Clarke and Verdier, 1967, p.21–22, pl.2, fig.6; text-fig.8. Holotype: Clarke and Verdier, 1967, pl.2, fig.6; Fauconnier and Masure, 2004, pl.18, figs.7–8. Age: Cenomanian–early Turonian.

"hystrix" (Eisenack, 1958a, p.410, pl.23, figs.1–4; text-fig.10) Davey, 1978, p.894. Emendation: Sarjeant, 1985a, p.94–95, as *Tenua hystrix*. Holotype: Eisenack, 1958a, pl.23, fig.1; Sarjeant, 1985a, pl.10, fig.5; Sarjeant, 1992b, fig.1; Fauconnier and Masure, 2004, pl.80, fig.3. **NOW** *Tenua* Eisenack. Originally (and now) *Tenua* Eisenack, subsequently *Cyclonephelium*. Taxonomic junior synonyms: *Tenua hystricella*, according to Eisenack and Kjellström (1972, p.1039); *Cyclonephelium* (as *Cerbia*) *tabulata*, according to Sarjeant (1985a, p.95–96; 1992b, p.681). Backhouse (1988, p.83) considered *Circulodinium hirtellum* to be a possible taxonomic junior synonym of this species. Sarjeant and Stover (1978, p.52) also proposed this combination. N.I.A. Age: Aptian.

"inconspicuum" Duxbury, 1983, p.32–33, pl.3, fig.6. Holotype: Duxbury, 1983, pl.3, fig.6; Fauconnier and Masure, 2004, pl.17, fig.7. Age: late Aptian.

"incultum" Morgenroth, 1966b, p.9, pl.2, fig.5. Holotype: Morgenroth, 1966b, pl.2, fig.5. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: early Oligocene.

"indicum" Khanna and Singh, 1981b, p.405–406, fig.4, nos.1–2; text-fig.16. Holotype: Khanna and Singh, 1981b, fig.4, no.1. **NOW** *Glaphyrocysta jabliensis*. Originally *Cyclonephelium indicum*, subsequently (and now) *Glaphyrocysta jabliensis*. Junior homonym: *Cyclonephelium indicum* Mehrotra and Sarjeant, 1987. This name was not validly published in Khanna (1979, p.219), Singh et al. (1979, p.35–36) and Khanna and Singh (1981a, pl.4, fig.11), since these authors did not provide a description. Age: middle Eocene.

"indicum" Mehrotra and Sarjeant, 1987, p.163, pl.2, fig.2; pl.7, fig.1. Holotype: Mehrotra and Sarjeant, 1987, pl.2, fig.2. **Name illegitimate** — **senior homonym**: *Cyclonephelium indicum* Khanna and Singh, 1981b. **NOW** *Circulodinium*?. Originally *Cyclonephelium* (name illegitimate), subsequently *Circulodinium*, thirdly (and now) *Circulodinium*?. Age: Paleocene.

"intonsum" Duxbury, 1983, p.33–34, pl.2, fig.7; pl.10, fig.12; text-figs.13–14. Holotype: Duxbury, 1983, pl.2, fig.7; text-figs.13,14A; Fauconnier and Masure, 2004, pl.18, fig.9. Age: late Aptian–early Albian.

"intricatum" Eaton, 1971, p.365, pl.4, figs.8–10. Holotype: Eaton, 1971, pl.4, fig.8. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: middle Oligocene.

"laciniiforme" Gerlach, 1961, p.206, pl.29, fig.4. Holotype: Gerlach, 1961, pl.29, fig.4; Fauconnier and Masure, 2004, pl.33, fig.1. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: middle-late Oligocene.

"lemniscatum" Stanley, 1965, p.229–230, pl.24, figs.1–6. Holotype: Stanley, 1965, pl.24, figs.1–2. **NOW** *Areoligera*. Originally *Cyclonephelium*, subsequently (and now) *Areoligera*. Age: Paleocene.

"longispinatum" (Davey, 1978, p.894, pl.3, figs.4,7–8) Fauconnier in Fauconnier and Masure, 2004, p.146. Holotype: Davey, 1978, pl.3, fig.7. Originally *Cyclonephelium distinctum* subsp. *longispinatum*, subsequently *Circulodinium distinctum* subsp. *longispinatum*, thirdly (and now) *Cyclonephelium longispinatum*. This taxon was raised to specific rank by Fauconnier in Fauconnier and Masure (2004, p.146). Age: Turonian.

"longispinosum" He Chengquan, 1991, p.136, pl.9, fig.19; pl.60, fig.5. Holotype: He Chengquan, 1991, pl.9, fig.19. Age: middle Eocene.

"maugaad" Below, 1981a, p.15, pl.11, figs.2,3a–b; pl.15, fig.20. Holotype: Below, 1981a, pl.11, fig.2; Fensome et al., 1991, fig.1 — p.671; Fauconnier and Masure, 2004, pl.18, fig.10. N.I.A. Age: Hauterivian–Aptian.

"membraniphorum" Cookson and Eisenack, 1962b, p.495, pl.6, figs.8–14. Holotype: Cookson and Eisenack, 1962b, pl.6, fig.9. **NOW** *Cauveridinium*. Originally *Cyclonephelium*, subsequently *Maghrebina*, thirdly (and now) *Cauveridinium*. Age: Albian–Cenomanian.

"*microfenestratum*" Bujak, 1976, p.112, pl.3, fig.12; pl.4, figs.1–7; text-fig.31. Holotype: Bujak, 1976, pl.4, figs.4–5; Bujak et al., 1980, pl.14, fig.1; Fauconnier and Masure, 2004, pl.33, figs.2–3. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: middle Eocene.

"*operculatum*" Yu Jingxian, 1982, p.252–253, pl.7, figs.20–22. Holotype: Yu Jingxian, 1982, pl.7, fig.21. Questionable assignment: Fauconnier and Londeix in Fauconnier and Masure (2004, p.147) as a problematic species. Age: Late Jurassic–Early Cretaceous.

"*ordinatum*" Williams and Downie, 1966c, p.225–227, pl.25, fig.3; text-fig.62. Holotype: Williams and Downie, 1966c, pl.25, fig.3; text-fig.62. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: early Eocene.

"*palliatum*" (Brideaux, 1977, p.11–12, pl.3, figs.1–8) Below, 1981a, p.10. Holotype: Brideaux, 1977, pl.3, figs.1–4. Originally *Canningia*, subsequently *Cyclonephelium*. **Taxonomic senior synonym:** *Canningia reticulata*, according to Helby (1987, p.322). Age: Barremian.

"*pastielsii*" Deflandre and Cookson, 1955, p.285 ex de Coninck, 1965, p.44. Emendation: Sarjeant, 1986, p.27–29, as *Glaphyrocysta pastielsii*. Holotype: PASTIELS, 1948, pl.5, fig.15, as *Membranilarnacia* cf. *liradisoides*; Fauconnier and Masure, 2004, pl.33, fig.9. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Name not validly published in Deflandre and Cookson (1955, p.285) since these authors did not provide a description or a direct reference to one (as required after 1952 by ICBN Article 32.3). Age: early Eocene.

"*paucimarginatum*" Cookson and Eisenack, 1962b, p.494, pl.6, fig.5–7. Holotype: Cookson and Eisenack, 1962b, pl.6, fig.6; Bint, 1986, text-fig.15C; Fauconnier and Masure, 2004, pl.17, fig.8. Age: ?late Albian–Cenomanian.

"*paucispinum*" Davey, 1969a, p.170, pl.9, figs.1–2. Holotype: Davey, 1969a, pl.9, fig.1; Fauconnier and Masure, 2004, pl.14, figs.5–6. **NOW** *Circulodinium*. Originally *Cyclonephelium*, subsequently (and now) *Circulodinium*. Age: Cenomanian.

"*perforatum*" Wilson in Soncini and Rauscher, 1988, p.448. **Name not validly published:** no description. **Taxonomic senior synonym:** *Glaphyrocysta wilsonii*, according to Slimani (2001a, p.192).

"*reductum*" Châteauneuf, 1980, p.136, pl.21, fig.10. Holotype: Châteauneuf, 1980, pl.21, fig.10; Fauconnier and Masure, 2004, pl.18, figs.11–15. **NOW** *Tenua* Eisenack. Originally *Cyclonephelium*, subsequently (and now) *Tenua* Eisenack. Age: late Eocene (Marinesian–Ludian).

"*regulatum*" Jiabo, 1978, p.78, pl.27, figs.1–2. Holotype: Jiabo, 1978, pl.27, fig.1. **NOW** *Membranilarnacia*. Originally *Cyclonephelium*, subsequently *Membranophoridium?*, thirdly (and now) *Membranilarnacia*. Age: Early Tertiary.

"*reticulosum*" Gerlach, 1961, p.204, pl.29, fig.2. Holotype: Gerlach, 1961, pl.29, fig.2. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently *Glaphyrocysta?*, thirdly (and now) *Glaphyrocysta*. Age: middle-late Oligocene.

"*retiintextum*" Cookson, 1965a, p.88, pl.11, fig.4. Holotype: Cookson, 1965a, pl.11, fig.4; Eisenack and Kjellström, 1972, p.325; Fensome et al., 1996, fig.1 — p.2329. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: ?Senonian.

"*semicirculatum*" Morgenroth, 1966b, p.9–10, pl.2, figs.3–4. Holotype: Morgenroth, 1966b, pl.2, fig.3. **NOW** *Licracysta*. Originally *Cyclonephelium*, subsequently *Areoligera*, thirdly (and now) *Licracysta*. Age: middle Oligocene.

"*semitectum*" Bujak in Bujak et al., 1980, p.46,48,50, pl.14, figs.2–9; text-fig.13. Holotype: Bujak et al., 1980, pl.14, figs.4–6; Fauconnier and Masure, 2004, pl.33, figs.10–11. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*, thirdly *Riculacysta* (combination not validly published). Taxonomic senior

synonym: *Riculacysta perforata*, according to Köthe (1990, p.50) — however, Kirsch (1991, p.129) retained *Cyclonephelium* (as *Riculacysta*, now *Glaphyrocysta*) *semitectum*. Age: middle Eocene (see Aubry, 1986).

"*spinetum*" Eaton, 1976, p.259–260, pl.8, fig.3; text-fig.12. Holotype: Eaton, 1976, pl.8, fig.3; text-fig.12; Bujak et al., 1980, pl.9, figs.10–11; Fauconnier and Masure, 2004, pl.34, fig.1. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently *Glaphyrocysta*?, thirdly (and now) *Glaphyrocysta*. Age: early-middle Eocene.

"*tabulatum*" Davey and Verdier, 1974, p.630,632, pl.92, figs.1–4; pl.93, fig.6. Holotype: Davey and Verdier, 1974, pl.92, figs.1,4; Eisenack and Kjellström, 1981b, p.328b; Sarjeant, 1992b, figs.3–4; Fensome et al., 1995, figs.1–2 — p.1833. **NOW** *Cerbia*. Originally *Cyclonephelium*, subsequently *Canninginopsis*, thirdly (and now) *Cerbia*. Taxonomic senior synonym: *Tenua hystrix*, according to Sarjeant (1985a, p.94; 1992b, p.681) — however, by retaining *Cerbia*, Duxbury (2002, p.76,78) retained *Cerbia tabulata* by implication. Age: Aptian.

?*tarimense* He Chengquan, 1991, p.136–137, pl.28, fig.9. Holotype: He Chengquan, 1991, pl.28, fig.9. Questionable assignment: He Chengquan (1991, p.136). Age: Paleocene.

"*textum*" Bujak, 1976, p.110, pl.3, figs.6–11; text-figs.3G–H. Holotype: Bujak, 1976, pl.3, fig.7; Fauconnier and Masure, 2004, pl.34, figs.2–3. **NOW** *Glaphyrocysta*. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: middle Eocene (see Aubry, 1986).

uncinatum (Norvick, 1976, p.74–75, pl.8, figs.11–12) Stover and Evitt, 1978, p.36. Holotype: Norvick, 1976, pl.8, fig.11; Fauconnier and Masure, 2004, pl.17, figs.10–11. Originally *Adnatosphaeridium*, subsequently (and now) *Cyclonephelium*. Age: Cenomanian.

vannophorum Davey, 1969a, p.168,170, pl.9, fig.3; pl.11, figs.11–12; text-fig.16E. Holotype: Davey, 1969a, pl.9, fig.3; pl.11, fig.11; Fauconnier and Masure, 2004, pl.17, fig.12. Age: Cenomanian.

"*variabile*" Cookson and Eisenack, 1967a, p.134–135, pl.19, figs.9–11. Holotype: Cookson and Eisenack, 1967a, pl.19, fig.9; Fauconnier and Masure, 2004, pl.77, figs.6–8. **NOW** *Systematophora*?. Originally *Cyclonephelium*, subsequently *Systematophora*?. Age: Paleocene.

"*variatum*" Jiabo, 1978, p.78–79, pl.27, figs.6–10. Holotype: Jiabo, 1978, pl.27, fig.6. **NOW** *Membranilarnacia*. Originally *Cyclonephelium*, subsequently *Membranophoridium*, thirdly (and now) *Membranilarnacia*. Age: Early Tertiary.

"*vicinum*" Eaton, 1976, p.260–261, pl.8, figs.4–5; text-fig.13. Holotype: Eaton, 1976, pl.8, fig.4; text-fig.13; Bujak et al., 1980, pl.9, figs.9,12; Fauconnier and Masure, 2004, pl.34, figs.11–14. **NOW** *Glaphyrocysta*?. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*?. Age: early-middle Eocene (see Bujak et al., 1980, p.19 and Aubry, 1986).

"*vutilare*" Cookson, 1965b, p.138–139, pl.24, figs.1–7. Holotype: Cookson, 1965b, pl.24, figs.1–2. **NOW** *Renidinium*. Originally *Cyclonephelium*, subsequently (and now) *Renidinium*. Age: Paleocene.

CYGNUSICYSTA Riding and Helby, 2001e, p.112–114. Type: Riding and Helby, 2001e, fig.1L, as *Cygnusicysta taltarniana*.

**taltarniana* Riding and Helby, 2001e, p.114, figs.1A–L. Holotype: Riding and Helby, 2001e, fig.1L. Age: Jurassic (late Callovian)–Early Cretaceous.

CYLINDRATUS Banasová et al., 2007, p.113 ex Streng et al., 2009, p.230–232. Calcareous dinoflagellate genus (see Gottschling and Soehner, 2013, p.127). The name was not validly published in Banasová et al. (2007), since it was merely used in anticipation of future acceptance of the name (I.C.N. Article 36.1). Type: Streng et al., 2009, p.3, fig.2, as *Cylindratus borzae*.

**borzae* Banasová et al., 2007, p.113, pl.2, figs.17–20; pl.3, figs.1–2 ex Streng et al., 2009, p.232, pl.3, figs.1–9. Holotype: Streng et al., 2009, pl.3, fig.2. The name was not validly published in Banasová et al. (2007), since it was merely used in anticipation of future acceptance of the name (I.C.N. Article 36.1). Age: middle Miocene.

CYLINDRODINELLUM Zügel, 1994, p.56. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1299). Type: Zügel, 1994, pl.12, figs.1–2, as *Cylindrodinellum scriblitinum*.

**scriblitinum* Zügel, 1994, p.56–57, pl.12, figs.1–5. Holotype: Zügel, 1994, pl.12, figs.1–2. Age: middle Turonian.

CYMOSSOPHAERIDIUM Davey, 1982b, p.18. Type: Davey, 1982b, pl.3, figs.5,8,11, as *Cymosphaeridium validum*.

benmoreense Schiøler and Wilson, 1998, p.328,330, pl.9, figs.1–7. Holotype: Schiøler and Wilson, 1998, pl.9, fig.3. Age: middle Coniacian–mid Santonian.

?*phoenix* (Duxbury, 1980, p.124–125, pl.13, figs.5–6; text-fig.9) Fauconnier in Fauconnier and Masure, 2004, p.159. Holotype: Duxbury, 1980, pl.13, figs.5–6; text-fig.9; Fauconnier and Masure, 2004, pl.19, figs.4–11. Originally *Hystriosphæridium*?, subsequently *Surculosphaeridium*?, thirdly (and now) *Cymosphaeridium*?. Questionable assignment: Fauconnier in Fauconnier and Masure (2004, p.159). N.I.A. Age: Barremian.

**validum* Davey, 1982b, p.18–19, pl.3, figs.5–6,8,11. Holotype: Davey, 1982b, pl.3, figs.5,8,11; Fensome et al., 1995, figs.1–3 — p.1875; Fauconnier and Masure, 2004, pl.19, figs.1–3. Age: Hauterivian.

"**CYSTODINIOPSIS**" Vozzhennikova, 1963, p.185. **Taxonomic senior synonym:** *Palaeocystodinium*, by implication in Vozzhennikova (1967, p.152), who transferred the "type species" of *Cystodiniopsis* — *Cystodiniopsis hyperxantha*, to *Palaeocystodinium*. Type: Vozzhennikova, 1963, fig.20, as *Cystodiniopsis hyperxantha* (which see for lectotype).

"**hyperxantha*" Vozzhennikova, 1963, p.185, fig.20. Emendation: Lentin and Vozzhennikova, 1990, p.60, as *Palaeocystodinium hyperxanthum*. Holotype: Vozzhennikova, 1963, fig.20, lost according to Lentin and Vozzhennikova (1990, p.60). Lectotype: Lentin and Vozzhennikova, 1990, pl.7, fig.7; text-fig.31, designated by Lentin and Vozzhennikova (1990, p.60). **NOW** *Palaeocystodinium*?. Originally *Cystodiniopsis*, subsequently *Palaeocystodinium*, thirdly (and now) *Palaeocystodinium*?. Age: Paleocene.

"**CYSTODINIOPSIS**" Vozzhennikova, 1967, p.192. **Name not validly published:** no validly published species. See also Loeblich Jr. and Loeblich III (1969, p.194), Lindgren (1985, p.670) and Fensome et al. (1993b, p.132–133) for discussions. This name cannot be legitimized since it would create a junior homonym of the name *Cystodiniopsis* Vozzhennikova, 1963.

"*gracilis*" Vozzhennikova, 1967, p.192. **Name not validly published:** no type or illustration. Although Vozzhennikova (1967, p.192) indicated that this species was illustrated in her pl.38, fig.5, there is no such illustration in Vozzhennikova (1967). See also Loeblich Jr. and Loeblich III (1969, p.194) and Lindgren (1985, p.670) for discussions of the validity of this species. Age: Late Cretaceous.

DALELLA McMinn and Sun Xuekun, 1994, p.42–43. Emendation: Zevenboom and Santarelli in Zevenboom, 1995, p.142. Type: McMinn and Sun Xuekun, 1994, pl.1, figs.1–3, as *Dalella chathamensis*.

**chathamensis* McMinn and Sun Xuekun, 1994, p.43,45, pl.1, figs.1–12; text-figs.2A–C. Holotype: McMinn and Sun Xuekun, 1994, pl.1, figs.1–3. Age: Holocene.

"*siciliensis*" Zevenboom and Santarelli in Zevenboom, 1995, p.143, pl.3, figs.1–6. Holotype: Zevenboom, 1995, pl.3, figs.1–3. **Name not validly published:** considered a manuscript name by the authors. Age: latest middle Miocene–early late Miocene.

"**DAMASSADINIUM**" Fensome et al., 1993b, p.90. Substitute name for *Danea* Morgenroth, 1968. Emendation: Drugg, 1970b, p.815–816, for *Danea*. **Name illegitimate — nomenclatural senior synonym:** *Danea*, which is not an illegitimate junior homonym of *Danaea* Smith 1793 as was incorrectly postulated by Fensome et al. (1993b). Names can be considered homonyms only if they are spelled identically, unless conservation or rejection has been formally invoked. See Silva (undated: Index Nominum Algarum). Type: Morgenroth, 1968, pl.43, figs.5–6, as *Danea mutabilis*.

"*abbreviatum*" (Damassa, 1984, p.54–55, pl.1, figs.1–6; pl.3, figs.2–6; pl.4, figs.3–4) Fensome et al., 1993b, p.90. Holotype: Damassa, 1984, pl.1, figs.1–6. **NOW** *Danea*. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: early–late Eocene.

"*+californicum*" (Drugg, 1967, p.30, pl.5, figs.14–15; pl.9, fig.8) Fensome et al., 1993b, p.90. Holotype: Drugg, 1967, pl.5, fig.15. **NOW** *Danea*. Originally *Palmnickia*, subsequently *Samlandia*, thirdly (and now) *Danea*, fourthly *Damassadinium* (generic name illegitimate). Taxonomic junior synonym: *Danea mutabilis*, according to Damassa (1979b, p.193). The nomenclatural type of the genus *Damassadinium* (name illegitimate) remains the holotype of *Danea mutabilis*. Age: Danian.

"*chibane*" (Below, 1981a, p.43–45, pl.6, figs.3a–b,4a–c; pl.15, figs.1–2; text-figs.33a–d,34–39) Fensome et al., 1993b, p.90. Holotype: Below, 1981a, pl.6, figs.4a–c; Fensome et al., 1991, figs.1–3 — p.613. **NOW** *Danea*. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: middle Aptian (Gargasian).

"*crassimuratum*" (Wilson, 1988, p.17, pl.5, figs.1a–b,2,3a–b,4) Fensome et al., 1993b, p.90. Holotype: Wilson, 1988, pl.5, figs.1a–b; Fensome et al., 1996, figs.1–2 — p.2097. **NOW** *Danea*. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: early–middle Eocene.

"*fibrosum*" (Hultberg, 1985c, p.119–120, pl.3, figs.H–I) Fensome et al., 1993b, p.90. Holotype: Hultberg, 1985c, pl.3, fig.H. **NOW** *Danea*. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: late Maastrichtian.

"*heterospinosum*" (Matsuoka, 1983c, p.117–122, pl.1, figs.1a–g,2a–b; pl.2, figs.1a–b,2–6,7a–b,8; text-figs.2A–B,3A–D,4A–B) Fensome et al., 1993b, p.90. Holotype: Matsuoka, 1983c, pl.1, figs.1a–g;text-fig.2A–B. **NOW** *Danea*. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: middle Eocene.

"*impages*" (Damassa, 1979a, p.821–822, pl.1, figs.1–3; pl.2, figs.1–9; text-fig.3) Fensome et al., 1993b, p.91. Holotype: Damassa, 1979a, pl.1, figs.1–2. **NOW** *Danea*. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: early–middle Eocene.

"*manicatum*" (Damassa, 1984, p.55–56, pl.1, figs.7–12; pl.2, figs.1–3; pl.3, figs.1,7–8; pl.4, figs.1–2) Fensome et al., 1993b, p.91. Holotype: Damassa, 1984, pl.2, figs.1–3. **NOW** *Danea*. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: early Eocene.

"*spinosum*" Slimani et al., 2008, p.330–331, figs.3A–F. Holotype: Slimani et al. 2008, figs.3A–C. **NOW** *Danea*. Originally *Damassadinium* (generic name illegitimate), subsequently (and now) *Danea*. Age: early Danian.

"**DAMPIERODINIUM**" Parker in Riding and Helby, 2001g, p.212. **Name not validly published:** based on an unpublished thesis, listed in synonymy. **Taxonomic senior synonym:** *Stanfordella*, by implication in Riding and Helby (2001g, p.212).

"*ovum*" Parker in Riding and Helby, 2001g, p.212. **Name not validly published**: based on an unpublished thesis, listed in synonymy. **Taxonomic senior synonym**: *Stanfordella granulosa*, by implication in Riding and Helby (2001g, p.212).

DANEA Morgenroth, 1968, p.541–542. Emendation: Drugg, 1970b, p.815–816. Nomenclatural junior synonym: *Damassadinium*, which has the same type. *Danea* Morgenroth is not an illegitimate junior homonym of *Danaea* Smith 1793 as was incorrectly postulated by Fensome et al. (1993b). Names can be considered homonyms only if they are spelled identically, unless conservation or rejection has been formally invoked. See Silva (undated: Index Nominum Algarum). Type: Morgenroth, 1968, pl.48, figs.5–6, as *Danea mutabilis*.

abbreviata Damassa, 1984, p.54–55, pl.1, figs.1–6; pl.3, figs.2–6; pl.4, figs.3–4. Holotype: Damassa, 1984, pl.1, figs.1–6. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: early–late Eocene.

+*californica* (Drugg, 1967, p.30, pl.5, figs.14–15; pl.9, fig.8) Stover and Evitt, 1978, p.152. Holotype: Drugg, 1967, pl.5, fig.15. Originally *Palmnickia*, subsequently *Samlandia*, thirdly (and now) *Danea*, fourthly *Damassadinium* (generic name illegitimate). Taxonomic junior synonym: *Danea mutabilis*, according to Damassa (1979b, p.193). The nomenclatural type of the genus *Danea* remains the holotype of *Danea mutabilis*. Age: Danian.

chibanis Below, 1981a, p.43–45, pl.6, figs.3a–b,4a–c; pl.15, figs.1–2; text-figs.33a–d,34–39. Holotype: Below, 1981a, pl.6, figs.4a–c; Fensome et al., 1991, figs.1–3 — p.613. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: middle Aptian (Gargasian).

crassimurata Wilson, 1988, p.17, pl.5, figs.1a–b,2,3a–b,4. Holotype: Wilson, 1988, pl.5, figs.1a–b; Fensome et al., 1996, figs.1–2 — p.2097. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: early-middle Eocene.

fibrosa Hultberg, 1985c, p.119–120, pl.3, figs.H–I. Holotype: Hultberg, 1985c, pl.3, fig.H. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: late Maastrichtian.

"*fimbriata*" (Morgenroth, 1968, p.547–548, pl.45, figs.7–8) Stover and Evitt, 1978, p.152. Emendations: May, 1980, p.46, and Marheinecke, 1992, p.112–113, both as *Conneximura fimbriata*. Holotype: Morgenroth, 1968, pl.45, figs.7–8; Eisenack and Kjellström, 1972, p.515; Fensome et al., 1995, figs.1–2 — p.1483. **NOW** *Conneximura*. Originally *Hystrichokolpoma*?, subsequently *Danea*, thirdly (and now) *Conneximura*. Age: Danian.

heterospinosa Matsuoka, 1983c, p.117–122, pl.1, figs.1–2; pl.2, figs.1–8; text-figs.2–4. Holotype: Matsuoka, 1983c, pl.1, fig.1. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: middle Eocene.

impages Damassa, 1979a, p.821–822, pl.1, figs.1–3; pl.2, figs.1–9; text-fig.3. Holotype: Damassa, 1979a, pl.1, figs.1–2. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: early-middle Eocene.

manicata Damassa, 1984, p.55–56, pl.1, figs.7–12; pl.2, figs.1–3; pl.3, figs.1,7–8; pl.4, figs.1–2. Holotype: Damassa, 1984, pl.2, figs.1–3. Originally (and now) *Danea*, subsequently *Damassadinium* (generic name illegitimate). Age: early Eocene.

"**mutabilis*" Morgenroth, 1968, p.542–544, pl.43, figs.5–9; pl.44, figs.1–3. Holotype: Morgenroth, 1968, pl.43, figs.5–6. **Taxonomic senior synonym**: *Palmnickia* (as *Danea*) *californica*, according to Damassa (1979b, p.193). The nomenclatural type of the genus *Danea* remains the holotype of *Danea mutabilis*. Age: Danian.

spinosa (Slimani et al., 2008) comb. nov.

Damassadinium spinosa Slimani et al. 2008, p.330–331, figs.3A–F.

Holotype: Slimani et al. 2008, figs.3A–C. Originally *Damassadinium* (generic name illegitimate), subsequently (and

now) *Danea*. The combination *Danea spinosa* is proposed here since *Damassadinium* is a nomenclatural junior synonym of *Danea*. Age: early Danian.

DAPCODINIUM Evitt, 1961a, p.996. Emendations: Dörhöfer and Davies, 1980, p.23; Below, 1987a, p.141. Taxonomic junior synonyms: *Opaeopsomus*, *Mancodinium* and *Maturodinium*, all according to Dörhöfer and Davies (1980, p.23) — however, Lentin and Williams (1985, p.230–231) retained *Mancodinium* and *Maturodinium*. Type: Evitt, 1961a, pl.119, figs.1–2; text-figs.10–11, as *Dapcodinium priscus*.

"**coalitum**" Davies, 1983, p.14, pl.1, figs.1–8; text-fig.6. Holotype: Davies, 1983, pl.1, figs.7–8. **NOW** *Mancodinium*. Originally *Dapcodinium*, subsequently (and now) *Mancodinium*. Age: Toarcian–early Bajocian.

"**holotabulatum**" Davies, 1983, p.14–15, pl.1, figs.9–19; text-fig.7. Emendation: Below, 1987b, p.30, as *Rosswangia holotabulata*. Holotype: Davies, 1983, pl.1, figs.9–11. **NOW** *Rosswangia*. Originally *Dapcodinium*, subsequently (and now) *Rosswangia*. Age: Toarcian–Bathonian.

"**inornatum**" (Morgenroth, 1970, p.354–355, pl.13, figs.5–8 [plate caption transposed with that of pl.12, fig.6]) Dörhöfer and Davies, 1980, p.23. Holotype: Morgenroth, 1970, pl.13, figs.5–6; Fensome et al., 1993a, figs.1–2 — p.1237; figs.1–2 p.1241. **NOW** *Maturodinium*. Originally (and now) *Maturodinium*, subsequently *Dapcodinium*. Age: late Pliensbachian.

ovale Below, 1987a, p.141–144, pl.24, figs.1–15; pl.25, figs.1–7,11–12,14; text-figs.72a–f,73a–h. Holotype: Below, 1987a, pl.24, figs.2,5; Fensome et al., 1993a, fig.1 — p.1273; figs.1,3 — p.1277. Age: late Pliensbachian–Toarcian.

subsp. **granulatum** (Below, 1987a, p.144, pl.25, figs.1–7,11–12,14) Lentin and Williams, 1989, p.94. Holotype: Below, 1987a, pl.25, figs.1–4; Fensome et al., 1993a, figs.1–4 — p.1225; fig.2 — p.1273. Originally *Dapcodinium ovale* var. *granulatum*, subsequently (and now) *Dapcodinium ovale* subsp. *granulatum*. Age: late Pliensbachian–Aalenian.

"var. **granulatum**" Below, 1987a, p.144, pl.25, figs.1–7,11–12,14. Holotype: Below, 1987a, pl.25, figs.1–4; Fensome et al., 1993a, figs.1–4 — p.1225; fig.2 — p.1273. **NOW** *Dapcodinium ovale* subsp. *granulatum*. Originally *Dapcodinium ovale* var. *granulatum*, subsequently (and now) *Dapcodinium ovale* subsp. *granulatum*. Age: late Pliensbachian–Aalenian.

subsp. **ovale**. Autonym. Holotype: Below, 1987a, pl.25, figs.1–4; Fensome et al., 1993a, fig.1 — p.1273; figs.1,3 — p.1277.

"var. **ovale**". Autonym. Holotype: Below, 1987a, pl.25, figs.1–4; Fensome et al., 1993a, fig.1 — p.1273; figs.1,3 — p.1277. **Now redundant**.

polyedricum Below, 1987a, p.144–149, pl.23, figs.1–5,12–18; text-figs.74a–f,75,76a–k. Holotype: Below, 1987a, pl.23, figs.1,4–5; Fensome et al., 1993a, figs.3–4 — p.1285. Age: Norian.

***priscum** Evitt, 1961a, p.996–1001, pl.119, figs.1–14; text-figs.1–20. Emendation: Below, 1987a, p.149. Holotype: Evitt, 1961a, pl.119, figs.1–2; text-figs.10–11. The epithet was erroneously indicated as a noun in apposition in Fensome and Williams (2004). Age: Hettangian.

sacculus Below, 1987a, p.150, pl.25, figs.8–10,15. Holotype: Below, 1987a, pl.25, figs.9–10,15 (not 8); Fensome et al., 1993a, figs.2–4 — p.1309. N.I.A. Age: early Pliensbachian.

"**semitabulatum**" (Morgenroth, 1970, p.352–353, pl.12, figs.3–6; pl.13, figs.1–4) Dörhöfer and Davies, 1980, p.23. Emendation: Below, 1987b, p.23, as *Mancodinium semitabulatum*. Holotype: Morgenroth, 1970, pl.12, fig.3; Fensome et al., 1993a, fig.1 — p.1319; fig.1 — p.1323. **NOW** *Mancodinium*. Originally (and now) *Mancodinium*, subsequently *Dapcodinium*. Taxonomic junior synonym: *Parvulodinium penitabulatum*, according to Pruss (1989, p.25). Age: late Pliensbachian.

"*wapellense*" (Pocock, 1972, p.97, pl.24, fig.14) Dörhöfer and Davies, 1980, p.23. Emendation: Dörhöfer and Davies, 1980, p.23, as *Dapcodinium wapellense*. Holotype: Pocock, 1972, pl.24, fig.14. **NOW** *Opaeopsomus*. Originally (and now) *Opaeopsomus*, subsequently *Dapcodinium*, thirdly *Valvaeodinium*. Age: Callovian.

DAPSILIDINIUM Bujak et al., 1980, p.27–28. Type: Davey and Williams, 1966b, pl.4, fig.10, as *Polysphaeridium pastielsii*.

?*amalthei* (Wetzel, 1966, p.317, pl.31, figs.2,2a–b) Lentin and Williams, 1981, p.68. Holotype: Wetzel, 1966, pl.31, figs.2,2a. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*, thirdly *Polysphaeridium?*, fourthly (and now) *Dapsilidinium?*. Questionable assignment: Lentin and Williams (1981, p.68). Age: late Toarcian.

"*ambiguum*" (Deflandre, 1937b, p.81, pl.16 [al. pl.13], figs.8–9) Wheeler and Sarjeant, 1990, p.310–111. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), fig.8; Fauconnier and Masure, 2004, pl.71, figs.6–7. **NOW** *Sepispinula?*. Originally *Micrhystridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Polysphaeridium*, fourthly *Chlamydophorella*, fifthly *Dapsilidinium*, sixthly *Gorgonisphaeridium* (Appendix A), seventhly (and now) *Sepispinula?*. Taxonomic junior synonyms: *Hystrichosphaeridium* (now *Sepispinula?*) *huguoniotii*, according to Clarke and Verdier (1967, p.54) and *Hystrichosphaeridium* (now *Sepispinula*) *ancoriferum*, both according to Yun Hyesu (1981, p.44) and Schiöler and Wilson (1998, p.328) — however, Masure in Fauconnier and Masure (2004, p.499–500) retained *Sepispinula ancorifera* and *Sepispinula huguoniotii*. Age: Late Cretaceous.

"subsp. *ambiguum*". Autonym. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), fig.8; Fauconnier and Masure, 2004, pl.71, figs.6–7. **Now redundant.**

"subsp. *pertusum*" (Davey, 1969a, p.156–157, pl.7, figs.6–7,9) Lentin and Williams, 1993, p.156. Holotype: Davey, 1969a, pl.7, fig.7. **NOW** *Sepispinula pertusa*. Originally *Cleistosphaeridium huguoniotii* var. *pertusum*, subsequently *Cleistosphaeridium huguoniotii* subsp. *pertusum*, thirdly *Cleistosphaeridium huguoniotii* subsp. *pertusum*, fourthly *Dapsilidinium ambiguum* subsp. *pertusum*, fifthly *Sepispinula huguoniotii* subsp. *pertusa*, sixthly (and now) *Sepispinula pertusa*. Age: late Cenomanian.

"*asperum*" (Maier, 1959, p.319, pl.33, fig.2) Bujak et al., 1980, p.28. Emendation: Sarjeant, 1983, p.113–114, as *Polysphaeridium asperum*. Holotype: Maier, 1959, pl.33, fig.2. **NOW** *Polysphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*, thirdly *Dapsilidinium*, fourthly (and now) *Polysphaeridium*. Age: middle Miocene.

assamicum (Mehrotra, 1983, p.18, pl.5, figs.4,8–9) Lentin and Williams, 1985, p.91. Holotype: Mehrotra, 1983, pl.5, fig.4. Originally *Polysphaeridium*, subsequently (and now) *Dapsilidinium*. Age: Early Tertiary.

"?*belgicum*" (Sarjeant, 1969, p.15) Lentin and Williams, 1981, p.69. Holotype: Pastsiels, 1948, pl.3, fig.16, as *Hystrichosphaeridium fluctuans*, lost according to Sarjeant (1986, p.18). **NOW** *Polysphaeridium*. Originally (and now) *Polysphaeridium*, subsequently *Polysphaeridium?*, thirdly *Dapsilidinium?*. Questionable assignment: Lentin and Williams (1981, p.69). Age: early Eocene.

"?*caminuspinum*" (Wall, 1965a, p.165, pl.9, fig.4) Lentin and Williams, 1981, p.69. Holotype: Wall, 1965a, pl.9, fig.4. **NOW** *Beaumontella?*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*, thirdly *Dapsilidinium?*, fourthly (and now) *Beaumontella?*. Questionable assignment: Lentin and Williams (1981, p.69). Taxonomic junior synonym: *Cleistosphaeridium mojsisovicsii*, according to Below (1987a, p.70). Age: early Sinemurian.

chems (Below, 1982c, p.27–28, pl.2, figs.8a–b; text-fig.6b) Lentin and Williams, 1985, p.91. Holotype: Below, 1982c, pl.2, figs.8a–b; Fauconnier and Masure, 2004, pl.19, figs.12–13. Originally *Polysphaeridium*, subsequently (and now) *Dapsilidinium*. N.I.A. Age: late Hauterivian.

"?*conispinum*" (Davey and Verdier, 1973, p.193–194, pl.4, figs.4,6,8–9) Lentin and Williams, 1981, p.69. Emendation: Lucas-Clark, 1984, p.187, as *Litosphaeridium conispinum*. Holotype: Davey and Verdier, 1973, pl.4, fig.8. **NOW** *Litosphaeridium*. Originally (and now) *Litosphaeridium*, subsequently *Polysphaeridium*?, thirdly *Dapsilidinium*?. Questionable assignment: Lentin and Williams (1981, p.69). Age: late Albian.

daveyi (Boltenhagen, 1977, p.37–38,40, pl.2, figs.3–4) Lentin and Williams, 1981, p.69. Holotype: Boltenhagen, 1977, pl.2, fig.3; Fauconnier and Masure, 2004, pl.20, fig.3. Originally *Polysphaeridium*?, subsequently (and now) *Dapsilidinium*. Age: late Cenomanian–Turonian.

?*deflandrei* (Valensi, 1947, p.817; text-fig.3) Lentin and Williams, 1981, p.69. Holotype: Valensi, 1947, text-fig.3; Fauconnier and Masure, 2004, pl.21, figs.1–4. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*?, thirdly (and now) *Dapsilidinium*?. Questionable assignment: Lentin and Williams (1981, p.69). Age: Middle Jurassic.

duma (Below, 1982c, p.28, pl.2, figs.9a–b,10a–b,11–12; text-fig.6a) Lentin and Williams, 1985, p.92. Holotype: Below, 1982c, pl.2, figs.9a–b; Fauconnier and Masure, 2004, pl.19, figs.14–15. Originally *Polysphaeridium*, subsequently (and now) *Dapsilidinium*. N.I.A. Age: Hauterivian–Albian.

?*elongatum* (Jain and Millepied, 1975, p.150–151, pl.5, figs.73–74) Lentin and Williams, 1981, p.69. Holotype: Jain and Millepied, 1975, pl.5, fig.74. **NOW** *Exochosphaeridium*. Originally *Polysphaeridium*, subsequently *Polysphaeridium*?, thirdly *Dapsilidinium*?, fourthly (and now) *Exochosphaeridium*. Questionable assignment: Lentin and Williams (1981, p.69). Age: Maastrichtian.

"?*fucosum*" (Valensi, 1955a, p.40; text-fig.2b) Lentin and Williams, 1981, p.69. Holotype: Valensi, 1955a, text-fig.2b; Fauconnier and Masure, 2004, pl.52, figs.8–11. **NOW** *Litosphaeridium*. Originally *Micrhystridium* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly *Polysphaeridium*?, fourthly *Dapsilidinium*?, fifthly (and now) *Litosphaeridium*. Questionable assignment: Lentin and Williams (1981, p.69). Taxonomic junior synonyms (at specific rank): *Hystrichosphaeridium tubiferum* var. *brevispinum* and *Hystrichosphaeridium* (as *Litosphaeridium*) *arundum*, both according to Below (1982c, p.29) — however, Lentin and Williams (1985, p.190,227) retained *Hystrichosphaeridium tubiferum* subsp. *brevispinum* and *Litosphaeridium arundum*. Age: Late Cretaceous.

"*granulosum*" (Jain and Millepied, 1975, p.151–152, pl.5, figs.69–70) Lentin and Williams, 1981, p.69. Holotype: Jain and Millepied, 1975, pl.5, fig.69. **NOW** *Pervosphaeridium*?. Originally *Polysphaeridium*, subsequently *Dapsilidinium*, thirdly (and now) *Pervosphaeridium*?. Age: Campanian–Maastrichtian.

hystrichosum Islam, 1983a, p.235–236, pl.1, figs.4–6. Holotype: Islam, 1983a, pl.1, fig.4. Age: early Eocene.

laminaspinosum (Davey and Williams, 1966b, p.94–95, pl.8, fig.8) Lentin and Williams, 1981, p.69. Holotype: Davey and Williams, 1966b, pl.8, fig.8; Fauconnier and Masure, 2004, pl.19, fig.16. Originally *Polysphaeridium*, subsequently (and now) *Dapsilidinium*. Age: Cenomanian.

"?*langii*" (Wall, 1965a, p.165, pl.6, figs.9–11; pl.9, fig.9) Lentin and Williams, 1981, p.69. Emendations: Morbey, 1975, p.41–42, as *Hystrichosphaeridium langii*; Below, 1987a, p.70, as *Beaumontella langii*. Holotype: Wall, 1965a, pl.6, fig.9; pl.9, fig.9; Fensome et al., 1995, figs.1–2 — p.1595. **NOW** *Beaumontella*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*?, thirdly *Dapsilidinium*?, fourthly (and now) *Beaumontella*. Questionable assignment: Lentin and Williams (1981, p.69). Age: Hettangian–early Sinemurian.

"?*majus*" (Lejeune-Carpentier, 1940, p.B220–B221; text-fig.13) Lentin and Williams, 1981, p.69. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.12, as *Amphorosphaeridium majus*. Holotype: Lejeune-Carpentier, 1940, text-fig.13; Strel et al., 1977, pl.1, fig.7; Lejeune-Carpentier and Sarjeant, 1981, pl.2, figs.6–7; text-fig.7. **NOW** *Exochosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*?, thirdly *Cordosphaeridium*, fourthly *Dapsilidinium*? (combination not validly published), fifthly *Amphorosphaeridium*, sixthly (and now) *Exochosphaeridium*. Questionable assignment: Lentin and Williams (1981, p.69). Taxonomic junior synonyms: *Baltisphaeridium* (as *Exochosphaeridium*) *bifidum* and *Exochosphaeridium bifidum* var. *involutum* (as *Exochosphaeridium bifidum* subsp. *involutum*), both according to Peyrot (2011, p.284). Age: Late Cretaceous.

marinum Singh, 1983, p.121, pl.41, figs.7–9. Holotype: Singh, 1983, pl.41, fig.7; Fauconnier and Masure, 2004, pl.20, fig.1. Age: Cenomanian.

multispinosum (Davey, 1974, p.60, pl.7, fig.4) Bujak et al., 1980, p.28. Holotype: Davey, 1974, pl.7, fig.4. Originally *Polysphaeridium*, subsequently (and now) *Dapsilidinium*. Age: early–late Barremian.

"*pachydermum*" (Cookson and Eisenack, 1960b, p.251–252, pl.38, fig.5; text-fig.5) Lentin and Williams, 1993, p.158. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.5; Fauconnier and Masure, 2004, pl.48, fig.10. **NOW** *Impletosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*, thirdly *Hystrichosphaeridium?*, fourthly *Dapsilidinium*, fifthly (and now) *Impletosphaeridium*. Age: Oxfordian–Tithonian.

**pastielsii* (Davey and Williams, 1966b, p.92–93, pl.4, fig.10) Bujak et al., 1980, p.28. Holotype: Davey and Williams, 1966b, pl.4, fig.10; Eisenack and Kjellström, 1972, p.923; Bujak et al., 1980, pl.6, figs.6,9; Fensome et al., 1995, fig.1 — p.1647; Fauconnier and Masure, 2004, pl.19, figs.17–19. Originally *Polysphaeridium*, subsequently (and now) *Dapsilidinium*. Taxonomic junior synonym: *Polysphaeridium* (now *Dapsilidinium*) *pseudocolligerum* according to Mertens et al. (2014, p.532) — however, Fensome et al., in press retained *Dapsilidinium pseudocolligerum* as a separate species. Age: early Eocene.

?*paulinae* (Valensi, 1953, p.48, pl.12, fig.6) Lentin and Williams, 1981, p.70. Holotype: Valensi, 1953, pl.12, fig.6. Originally *Micrhystridium* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly *Polysphaeridium?*, fourthly (and now) *Dapsilidinium?*. Questionable assignment: Lentin and Williams (1981, p.70). Age: Middle Jurassic.

pseudocolligerum (Stover, 1977, p.74–75, pl.1, figs.14–19) Bujak et al., 1980, p.28. Holotype: Stover, 1977, pl.1, figs.14–16. Originally *Polysphaeridium*, subsequently (and now) *Dapsilidinium*. Taxonomic senior synonym: *Polysphaeridium* (now *Dapsilidinium*) *pastielsii* according to Mertens et al. (2014, p.532) — however, Fensome et al., in press retained *Dapsilidinium pseudocolligerum* as a separate species. Age: early Oligocene–early Miocene.

?*pumilum* (Davey and Williams, 1966b, p.93–94, pl.7, figs.3–4) Lentin and Williams, 1981, p.70. Holotype: Davey and Williams, 1966b, pl.7, fig.3; Fauconnier and Masure, 2004, pl.20, fig.2. Originally *Polysphaeridium*, subsequently *Polysphaeridium?*, thirdly (and now) *Dapsilidinium?*. Questionable assignment: Lentin and Williams (1981, p.93). Age: Cenomanian.

?*punctatum* (Jain and Millepieid, 1975, p.151, pl.5, figs.71–72) Lentin and Williams, 1981, p.70. Holotype: Jain and Millepieid, 1975, pl.5, fig.72. Originally *Polysphaeridium*, subsequently *Polysphaeridium?*, thirdly (and now) *Dapsilidinium?*. Questionable assignment: Lentin and Williams (1981, p.70). Age: Maastrichtian.

"?*rhabdophorum*" (Valensi, 1955b, p.593, pl.3, fig.7) Lentin and Williams, 1981, p.70. Holotype: Valensi, 1955b, pl.3, fig.7; Fauconnier and Masure, 2004, pl.20, figs.10–11. **NOW** *Exochosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*, thirdly *Dapsilidinium?*, fourthly (and now) *Exochosphaeridium*. Questionable assignment: Lentin and Williams (1981, p.70). Age: Late Cretaceous.

?*simplex* (White, 1842, p.38, pl.4, fig.10) Bujak et al., 1980, p.28. Holotype: White, 1842, pl.4, fig.10. Originally *Xanthidium tubiferum* var. *simplex* (Appendix A), subsequently *Xanthidium simplex* (Appendix A), thirdly *Hystrichosphaeridium simplex*, fourthly *Polysphaeridium? simplex*, fifthly (and now) *Dapsilidinium simplex*. Questionable assignment: Stover and Williams (1987, p.70). Age: Late Cretaceous.

stelacum Islam, 1983a, p.236, pl.1, figs.7–8. Holotype: Islam, 1983a, pl.1, fig.7. Age: early Eocene.

warrenii (Habib, 1976, p.383, pl.2, figs.4,6a–b) Lentin and Williams, 1981, p.70. Holotype: Habib, 1976, pl.2, figs.6a–b. Originally *Polysphaeridium*, subsequently (and now) *Dapsilidinium*. Age: Berriasian–Aptian?

DAVEYA Monteil, 1996, p.40–41. Type: Monteil, 1996, pl.1, figs.1–9; pl.2, figs.1–9, as *Daveya boresphaera*.

***boresphaera** Monteil, 1996, p.41–42, pl.1, figs.1–9; pl.2, figs.1–9; pl.3, figs.1–9, pl.4, figs.1–9; pl.5, figs.1–9; pl.6, figs.1–12; pl.7, figs.1–10; pl.8, figs.1–7; text-figs.2A–D,3A–D,4A–B. Holotype: Monteil, 1996, pl.1, figs.1–9; pl.2, figs.1–9. Age: late Ryazanian.

solaris (Davey, 1988, p.38, pl.4, figs.7–9) Davey, 1999, p.20. Holotype: Davey, 1988, pl.4, figs.7–9; Fensome et al., 1996, figs.1–3 — p.2367. Originally *Gonyaulacysta*, subsequently (and now) *Daveya*. N.I.A. Age: late Berriasian.

DEFLAGYMNium Oлару, 1978a, p.86 (al. p.82). Oлару (1978b, p.38) also cited this genus as new. Type: Oлару, 1978a, pl.8, fig.8, as *Deflagymnium elongatum*.

***elongatum** Oлару, 1978a, p.86 (al. p.82), pl.8, fig.8. Holotype: Oлару, 1978a, pl.8, fig.8; Oлару, 1978b, fig.3 (not pl.1, fig.2); Fensome et al., 1993a, fig.1 — p.1143. Oлару (1978b, p.38) also cited this species as new. Age: Maastrichtian.

DEFLANDREA Eisenack, 1938b, p.187. Emendations: Williams and Downie, 1966c, p.231; Stover, 1974, p.169–170, as a revised description; Lentin and Williams, 1976, p.35–36. Taxonomic junior synonyms: *Ceratiopsis* Vozzhennikova, 1963, according to Lentin and Williams (1976, p.153) — however, Lentin and Williams (1977b, p.20; 1985, p.48) retained *Ceratiopsis*; *Cerodinium*, according to Lentin and Williams (1976, p.154) — however, Lentin and Williams (1987, p.114) retained *Cerodinium*; *Senegalinium*, according to Herngreen (1975, p.60–61) — however, Lentin and Williams (1977b, p.144) retained *Senegalinium*. Type: Eisenack, 1938b, text-fig.6, as *Deflandrea phosphoritica*.

"acribes" Davey and Verdier, 1971, p.38–39, pl.2, figs.10,12. Emendation: Goodman and Evitt, 1981, p.48,50,52–53, as *Angustidinium acribes*. Holotype: Davey and Verdier, 1971, pl.2, fig.10; Fensome et al., 1993a, fig.1 — p.875. **NOW** *Angustidinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Alterbia?* (combination illegitimate), fourthly (and now) *Angustidinium*, fifthly *Moiesiodinium*. Age: early Albian.

"acuminata" Cookson and Eisenack, 1958, p.27, pl.4, figs.5–8. Holotype: Cookson and Eisenack, 1958, pl.4, fig.5. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Senegalinium*, fourthly (and now) *Isabelidinium*. Age: Cenomanian–early Turonian.

"acutula" Wilson, 1967b, p.225–226, figs.11–12. Emendation: Khowaja-Ateequzzaman et al., 1991, p.41–42, as *Alterbidinium acutulum*. Holotype: Wilson, 1967b, fig.12. **NOW** *Alterbidinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Alterbidinium*. Taxonomic junior synonyms: *Albertia* (as *Alterbia*) *recticornis*, according to Whitney (1979, p.125) and Lentin and Williams (1993, p.14); *Albertia* (as *Alterbia*) *curvicornis*, according to Whitney (1979, p.125). Age: Maastrichtian (see Wilson, 1972).

"aenigmatica" Boltenhagen, 1977, p.86–88, pl.14, figs.5a–b,6–10. Holotype: Boltenhagen, 1977, pl.14, figs.5a–b. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently (and now) *Senegalinium*. Age: latest Albian–Turonian.

"albertii" Corradini, 1973, p.174–175, pl.27, figs.7a–b,8; pl.28, fig.2. Holotype: Corradini, 1973, pl.27, figs.7a–b. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Senegalinium*, thirdly *Ceratiopsis* (combination illegitimate), fourthly (and now) *Cerodinium*. Taxonomic junior synonym (at specific rank): *Peridinium pedunculatum* forma *divaricans* (subsequently *Phelodinium tricuspe* subsp. *divaricans*), according to Sarjeant (1985b, p.158) and Lentin and Williams (1993, p.504,511). Age: Late Cretaceous–Paleocene.

amabilis He Chengquan, 1991, p.77, pl.30, figs.1–7. Holotype: He Chengquan, 1991, pl.30, fig.5. Age: middle-late Eocene.

"amphiata" McIntyre, 1975, p.65–66, pl.2, figs.5–8. Holotype: McIntyre, 1975, pl.2, figs.5–6. **NOW** *Isabelidinium?*. Originally *Deflandrea*, subsequently *Isabelia?* (combination illegitimate), thirdly *Alterbia* (combination illegitimate), fourthly (and now) *Isabelidinium?*. Age: Campanian–Maastrichtian.

andromiensis Vozzhennikova, 1967, p.142–143, pl.71, figs.3–4; pl.72, figs.1–2. Holotype: Vozzhennikova, 1967, pl.71, fig.3; Lentin and Vozzhennikova, 1990, pl.5, fig.7; text-fig.22. Lentin and Vozzhennikova (1990, p.49) provided an "expanded description" for this species. Age: Eocene.

antarctica Wilson, 1967a, p.58,60, figs.23–24,26–27. Holotype: Wilson, 1967a, fig.23. Age: ?Eocene (erratic).

"**?apicidentata**" Jiabo, 1978, p.81, pl.2, fig.11. Holotype: Jiabo, 1978, pl.2, fig.11. **NOW** *Geiselodinium*. Originally *Deflandrea*?, subsequently (and now) *Geiselodinium*. Questionable assignment: Jiabo (1978, p.81). Age: Early Tertiary.

apiculiformis Andreeva-Grigorovich and Savitskaya, 1993, p.45, pl.1, fig.6. Holotype: Andreeva-Grigorovich and Savitskaya, 1993, pl.1, fig.6. Age: early Eocene.

arcuata Vozzhennikova, 1967, p.143–144, pl.66, fig.1; pl.68, figs.3a–b. Emendation: Lentin and Vozzhennikova, 1990, p.50. Holotype: Vozzhennikova, 1967, pl.68, figs.3a–b; Lentin and Vozzhennikova, 1990, pl.6, figs.6–8; text-fig.23. Age: late Eocene–early Oligocene.

"forma **arcuata**". Autonym. Holotype: Vozzhennikova, 1967, pl.68, figs.3a–b; Lentin and Vozzhennikova, 1990, pl.6, figs.6–8; text-fig.23. **Now redundant**.

subsp. **arcuata**. Autonym. Holotype: Vozzhennikova, 1967, pl.68, figs.3a–b; Lentin and Vozzhennikova, 1990, pl.6, figs.6–8; text-fig.23.

"forma **oporiensis**" Grigorovich, 1971, p.92, pl.1, fig.5. Holotype: Grigorovich, 1971, pl.1, fig.5. **NOW** *Deflandrea arcuata* subsp. *oporiensis*. Originally *Deflandrea arcuata* forma *oporiensis*, subsequently (and now) *Deflandrea arcuata* subsp. *oporiensis*. Age: Eocene.

subsp. **oporiensis** (Grigorovich, 1971, p.92, pl.1, fig.5) Lentin and Williams, 1977b, p.40. Holotype: Grigorovich, 1971, pl.1, fig.5. Originally *Deflandrea arcuata* forma *oporiensis*, subsequently (and now) *Deflandrea arcuata* subsp. *oporiensis*. Age: Eocene.

"**armata**" Cookson and Eisenack, 1970a, p.142–143, pl.13, fig.9. Holotype: Cookson and Eisenack, 1970a, pl.13, fig.9. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Chatangiella*, thirdly *Chatangiella*?, fourthly (and now) *Isabelidinium*. Age: Senonian.

"**articulata**" Vozzhennikova in Paschenyi et al., 1992, p.71. **Name not validly published**: no description or illustration.

"**asymmetrica**" Davey and Verdier, 1971, p.39–40, pl.2, figs.4,6. Holotype: Davey and Verdier, 1971, pl.2, fig.6. **Name illegitimate** — **senior homonym**: *Deflandrea asymmetrica* Wilson, 1967a. Substitute name: *Deflandrea deformans*. **NOW** *Subtilisphaera deformans*. Originally *Deflandrea asymmetrica* (name illegitimate), subsequently *Deflandrea deformans*, thirdly *Deflandrea daveyi* (name illegitimate), fourthly *Subtilisphaera asymmetrica* (name illegitimate), fifthly (and now) *Subtilisphaera deformans*. Age: middle Albian.

"**asymmetrica**" Wilson, 1967a, p.62–63, figs.17–21. Holotype: Wilson, 1967a, figs.19–21. **NOW** *Alterbidinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Senegalinium*?, fourthly (and now) *Alterbidinium*, fifthly *Magallanesium*. Junior homonym: *Deflandrea asymmetrica*: Davey and Verdier, 1971. Age: ?Eocene (erratic).

"**bakeri**" Deflandre and Cookson, 1955, p.251, pl.4, figs.1–4. Emendation: Stover, 1974, p.169–170, as a "revised description" for *Deflandrea bakeri*. Holotype: Deflandre and Cookson, 1955, pl.4, fig.1. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*, fourthly *Alterbia* (combination illegitimate). Age: Paleocene–early Eocene.

"forma **bakeri**". Autonym. Holotype: Deflandre and Cookson, 1955, pl.4, fig.1. **Now redundant**.

- "forma *pellucida*" Deflandre and Cookson, 1955, p.251, pl.4, fig.3. Holotype: Deflandre and Cookson, 1955, pl.4, fig.3; Cookson and Eisenack, 1958, pl.4, fig.9; Stover, 1974, pl.1, figs.7a–b. **NOW** *Isabelidinium pellucidum*. Originally *Deflandrea bakeri* forma *pellucida*, subsequently *Deflandrea pellucida*, thirdly *Isabelia pellucida* (combination illegitimate), fourthly (and now) *Isabelidinium pellucidum*, fifthly *Alterbia pellucida* (combination illegitimate). Age: Paleocene–early Eocene.
- "*balcattensis*" Cookson and Eisenack, 1969, p.3–5, figs.1B–F. Holotype: Cookson and Eisenack, 1969, fig.1B. **NOW** *Subtilisphaera*. Originally *Deflandrea*, subsequently (and now) *Subtilisphaera*. Age: Albian–Cenomanian.
- "*balmei*" Cookson and Eisenack, 1962b, p.486. Emendation: Morgan, 1977, p.130, as *Alterbia minor*. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.1; Morgan, 1977, text-fig.2. **NOW** *Spinidinium balmei*. Originally *Deflandrea minor* (name illegitimate), subsequently *Deflandrea balmei*, thirdly *Alterbia balmei* (combination illegitimate), fourthly *Isabelidinium balmei*, fifthly (and now) *Spinidinium balmei*, sixthly *Magallanesium balmei*. Taxonomic senior synonym: *Palaeohystrichophora* (as *Diconodinium*) *minuta*, according to Morgan (1977, p.130) — however, Lentin and Williams (1981, p.156) retained *Deflandrea* (as *Isabelidinium*, now *Spinidinium*) *balmei*. Age: Late Cretaceous.
- "*baltica*" (Vozzhennikova, 1967, p.154, pl.117, figs.2a–b) Lentin and Williams, 1976, p.38. Holotype: Vozzhennikova, 1967, pl.117, figs.2a–b; Lentin and Vozzhennikova, 1990, pl.3 figs.4–6; text-fig.14. **NOW** *Cerodinium*. Originally (and now) *Cerodinium*, subsequently *Deflandrea*, thirdly *Ceratiopsis* (combination illegitimate). Age: Eocene.
- "*belfastensis*" Cookson and Eisenack, 1961a, p.71, pl.11, figs.4–6. Holotype: Cookson and Eisenack, 1961a, pl.11, fig.4; Helby et al., 1987, fig.41D. **Taxonomic senior synonym:** *Deflandrea* (now *Isabelidinium*) *cooksoniae*, according to Fensome et al. (2009, p.39). Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*. Age: Late Cretaceous.
- bella* He Chengquan, 1991, p.77–78, pl.30, fig.8; text-fig.9. Holotype: He Chengquan, 1991, pl.30, fig.8; text-fig.9. Age: middle Eocene.
- "*biapertura*" McIntyre, 1975, p.66, pl.3, figs.5–8. Holotype: McIntyre, 1975, pl.3, figs.5–6. **NOW** *Chatangiella*?. Originally *Deflandrea*, subsequently (and now) *Chatangiella*?. Age: Campanian–Maastrichtian.
- "*bicavata*" (Jain and Millepied, 1973, p.23, pl.1, figs.1–4; text-fig.1B) Henggreen, 1975, p.61. Holotype: Jain and Millepied, 1973, pl.1, figs.1–3; Fensome et al., 1993a, figs.1–2 — p.975. **NOW** *Senegalinium*. Originally (and now) *Senegalinium*, subsequently *Deflandrea*, thirdly *Alterbia* (combination illegitimate). Age: Campanian–Maastrichtian.
- "*boloniensis*" Riegel, 1974, p.354–355, pl.1, figs.6–10; text-fig.3. Emendation: Riegel and Sarjeant, 1982, p.296–297, as *Phelodinium boloniense*. Holotype: Riegel, 1974, pl.1, fig.7; Sarjeant et al., 1987, pl.2, fig.2. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly *Senegalinium*, fourthly *Phelodinium*, fifthly (and now) *Cerodinium*. Age: ?Senonian.
- "*campbellensis*" Wilson, 1967b, p.225, figs.2–3. Holotype: Wilson, 1967b, fig.2. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Chatangiella*, thirdly (and now) *Isabelidinium*. Age: Maastrichtian (see Wilson, 1972).
- carpatica* Grigorovich, 1969b, p.68–69, pl.1, fig.2. Holotype: Grigorovich, 1969b, pl.1, fig.2. Age: Paleocene.
- "*cincta*" Cookson and Eisenack, 1958, p.26, pl.4, figs.1–3. Holotype: Cookson and Eisenack, 1958, pl.4, fig.3. **NOW** *Ovoidinium*. Originally *Deflandrea*, subsequently *Evittia* Pocock (combination illegitimate), thirdly *Pocockia*, fourthly (and now) *Ovoidinium*, fifthly *Ascodinium*. Age: late Neocomian–early Aptian.
- communis* He Chengquan, 1991, p.78, pl.29, fig.18. Holotype: He Chengquan, 1991, pl.29, fig.18. Age: late Eocene.
- "*conica*" Vozzhennikova, 1960. **Name not validly published:** no description.

"*conorata*" Stover, 1974, p.171–172, pl.1, figs.8a–b; text-fig.3C. Holotype: Stover, 1974, pl.1, figs.8a–b. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidium*, fourthly *Eurydinium*, fifthly (and now) *Manumiella*. Age: early-middle Paleocene.

convexa Wilson, 1988, p.17, pl.6, figs.3–5. Holotype: Wilson, 1988, pl.6, fig.5; Fensome et al., 1996, fig.3 — p.2093. Age: middle Eocene.

"*cooksoniae*" Alberti, 1959b, p.97, pl.9, figs.1–6. Holotype: Alberti, 1959b, pl.9, fig.2. **NOW** *Isabelidium*. Originally *Deflandrea*, subsequently *Australiella*, thirdly *Isabelia* (combination illegitimate), fourthly (and now) *Isabelidium*. Taxonomic junior synonyms: *Deflandrea* (as *Isabelidium*) *belfastensis* and *Isabelidium bujakii*, according to Fensome et al. (2009, p.39). Age: Late Cretaceous.

"*cordifera*" May, 1980, p.74–75, pl.8, fig.4. Holotype: May, 1980, pl.8, fig.4. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: Maastrichtian.

cornumammillata Jan du Chêne and Châteauneuf, 1975, p.31–32, pl.2, figs.1–13. Holotype: Jan du Chêne and Châteauneuf, 1975, pl.2, figs.7–8. Age: early Eocene (early Ilerdian).

"*coronata*" McIntyre, 1975, p.64–65, pl.3, figs.1–4. Holotype: McIntyre, 1975, pl.3, figs.1–2. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently (and now) *Chatangiella*. Age: Paleocene.

"*corrugatella*" May, 1980, range chart 11, adjacent to p.21. **Name not validly published**: no description.

"*crassistriata*" Jain et al., 1975, p.8–9, pl.6, figs.64–65. Holotype: Jain et al., 1975, pl.6, fig.65. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: Danian.

"*cretacea*" Cookson, 1956, p.184–185, pl.1, figs.1–7 (but see discussion under *Isabelidium cretaceum*). Holotype: Cookson, 1956, pl.1, fig.1; Helby et al., 1987, fig.42L. **NOW** *Isabelidium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidium*, fourthly *Manumiella*? Age: Late Cretaceous.

"*cuvillieri*" Boltenhagen, 1977, p.99–100, pl.17, figs.3,4a–b,5a–b,6. Holotype: Boltenhagen, 1977, pl.17, fig.3. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently (and now) *Senegalinium*. Age: Campanian.

cygniformis Pöthe de Baldis, 1966, p.221–222, pl.2, fig.c. Holotype: Pöthe de Baldis, 1966, pl.2, fig.c. Age: Early Tertiary.

"*dakotaensis*" Stanley, 1965, p.217–218, pl.19, figs.1–3. Holotype: Stanley, 1965, pl.19, figs.1–3. **NOW** *Chatangiella*?. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidium*, fourthly (and now) *Chatangiella*?. Age: Paleocene.

?*damasii* (Lejeune-Carpentier, 1942, p.B185–B186, figs.9–14) Lejeune-Carpentier and Sarjeant, 1981, p.16. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.16, as *Deflandrea? damasii*. Holotype: Lejeune-Carpentier, 1942, fig.10; Lejeune-Carpentier and Sarjeant, 1981, pl.6, fig.3; text-fig.9a. Originally *Peridinium* (Appendix B), subsequently *Cooksoniella*?, thirdly *Palaeoperidinium*, fourthly *Deflandrea*, fifthly (and now) *Deflandrea*?. Questionable assignment: Lentin and Williams (1985, p.95). Age: Senonian.

danica Lange, 1969, p.114–115, pl.1, fig.6. Holotype: Lange, 1969, pl.1, fig.6. Age: Danian.

"*dartmooria*" Cookson and Eisenack, 1965b, p.133–134, pl.16, figs.1–2; text-fig.1. Holotype: Cookson and Eisenack, 1965b, pl.16, figs.1–2; text-fig.1; Stover, 1974, pl.3, figs.4a–b; pl.4, figs.1a–d. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: Paleocene.

"subsp. *dartmooria*". Autonym. Holotype: Cookson and Eisenack, 1965b, pl.16, figs.1–2; text-fig.1; Stover, 1974, pl.3, figs.4a–b; pl.4, figs.1a–d. **Now redundant.**

"subsp. *medcalfii*" (Stover, 1974, p.175–176, pl.3, figs.3a–c; text-figs.3G,6C) Lentin and Williams, 1976, p.39. Holotype: Stover, 1974, pl.3, figs.3a–c. **NOW** *Cerodinium medcalfii*. Originally *Deflandrea medcalfii*, subsequently *Deflandrea dartmooria* subsp. *medcalfii*, thirdly *Ceratiopsis medcalfii* (combination illegitimate), fourthly (and now) *Cerodinium medcalfii*. Age: middle Paleocene.

"*daveyi*" Lentin and Williams, 1973, p.40. Holotype: Davey and Verdier, 1971, pl.2, fig.6. **Name illegitimate — nomenclatural senior synonym:** *Deflandrea deformans*, which has the same type. **NOW** *Subtilisphaera deformans*. Originally *Deflandrea asymmetrica* (name illegitimate), subsequently *Deflandrea deformans*, thirdly *Deflandrea daveyi* (name illegitimate), fourthly *Subtilisphaera asymmetrica* (name illegitimate), fifthly (and now) *Subtilisphaera deformans*. Substitute name for *Deflandrea asymmetrica* Davey and Verdier, 1971, p.39–40, pl.2, figs.4,6 (an illegitimate name). Age: middle Albian.

"*decorosa*" McIntyre, 1975, p.63–64, pl.2, figs.1–4. Holotype: McIntyre, 1975, pl.2, fig.1. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently (and now) *Chatangiella*. Taxonomic junior synonym: *Deflandrea ditissima*, according to Harker and Sarjeant in Harker et al. (1990, p.110) — however, Harker and Sarjeant in Harker et al. (1990, p.111) also retained *Chatangiella ditissima*. Age: Campanian–Maastrichtian.

"*deformans*" Davey and Verdier, 1973, p.197. Holotype: Davey and Verdier, 1971, pl.2, fig.6. **NOW** *Subtilisphaera deformans*. Originally *Deflandrea asymmetrica* (name illegitimate), subsequently *Deflandrea deformans*, thirdly *Deflandrea daveyi* (name illegitimate), fourthly *Subtilisphaera asymmetrica* (name illegitimate), fifthly (and now) *Subtilisphaera deformans*. Substitute name for *Deflandrea asymmetrica* Davey and Verdier, 1971, p.39–40, pl.2, figs.4,6 (an illegitimate name). Nomenclatural junior synonym: *Deflandrea daveyi* Lentin and Williams, 1973, which has the same type. Age: middle Albian.

"*delicata*" Balteş, 1969, p.34, pl.1, fig.7 ex Lentin and Williams, 1973, p.40. Holotype: Balteş, 1969, pl.1, fig.7, designated by Lentin and Williams (1973, p.40). **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidium*, thirdly (and now) *Manumiella*. This name was not validly published in Balteş (1969, p.34), since that author considered the name to be provisional. Age: early Eocene.

delineata Cookson and Eisenack, 1965c, p.140–141, pl.18, figs.3–5; text-fig.1. Holotype: Cookson and Eisenack, 1965c, pl.18, figs.4–5; text-fig.1. Taxonomic junior synonym (at specific rank): *Ceratium fusus* forma *nodosum* (subsequently *Palaeocystodinium? rhomboides* subsp. *nodosum*), according to Sarjeant (1985b, p.157). Age: Paleocene.

denticulata Alberti, 1959b, p.102–103, text-fig.1. Holotype: Alberti, 1959b, text-fig.1. Age: Paleocene–early Eocene.

"forma *denticulata*". Autonym. Holotype: Alberti, 1959b, text-fig.1. **Now redundant.**

subsp. *denticulata*. Autonym. Holotype: Alberti, 1959b, text-fig.1.

"forma *minor*" de Coninck, 1969, p.16, pl.1, figs.16–17; pl.2, figs.1–2. Holotype: de Coninck, 1969, pl.1, figs.16–17. **NOW** *Deflandrea denticulata* subsp. *minor*. Originally *Deflandrea denticulata* forma *minor*, subsequently (and now) *Deflandrea denticulata* subsp. *minor*. Age: early Eocene.

subsp. *minor* (de Coninck, 1969, p.16, pl.1, figs.16–17; pl.2, figs.1–2) Lentin and Williams, 1973, p.40. Holotype: de Coninck, 1969, pl.1, figs.16–17. Originally *Deflandrea denticulata* forma *minor*, subsequently (and now) *Deflandrea denticulata* subsp. *minor*. Age: early Eocene.

"*depressa*" Morgenroth, 1966a, p.8, pl.1, fig.2. Holotype: Morgenroth, 1966a, pl.1, fig.2. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: early Eocene.

"*diebelii*" Alberti, 1959b, p.99–100, pl.9, figs.18–21. Holotype: Alberti, 1959b, pl.9, fig.18. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: late Senonian–Paleocene.

"subsp. *diebelii*". Autonym. Holotype: Alberti, 1959b, pl.9, fig.18. **NOW** *Cerodinium diebelii* subsp. *diebelii*. Originally *Deflandrea diebelii* subsp. *diebelii*, subsequently *Ceratiopsis diebelii* subsp. *diebelii* (combination illegitimate), thirdly (and now) *Cerodinium diebelii* subsp. *diebelii*.

"subsp. *rigida*" May, 1980, p.75–76, pl.8, figs.9–10,15. Holotype: May, 1980, pl.8, figs.9,15. **NOW** *Cerodinium diebelii* subsp. *rigidum*. Originally *Deflandrea diebelii* subsp. *rigida*, subsequently *Ceratiopsis diebelii* subsp. *rigida* (combination illegitimate), thirdly (and now) *Cerodinium diebelii* subsp. *rigidum*. Age: Maastrichtian.

"*dilwynensis*" Cookson and Eisenack, 1965c, p.141, pl.18, figs.6–9. Holotype: Cookson and Eisenack, 1965c, pl.18, figs.7–8. **NOW** *Senegalinium?*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Senegalinium?*. Age: Paleocene.

"*dingxingensis*" Tang in Cai Zhiguo et al., 1998, p.243, pl.82, figs.1–2. Holotype: Cai Zhiguo et al., 1998, pl.82, fig.1. **Name not validly published:** no Latin or English description or diagnosis. Age: early Eocene.

dissoluta Vozzhennikova, 1967, p.144, pl.73, figs.1–4. Holotype: Vozzhennikova, 1967, pl.73, fig.1, lost according to Lentin and Vozzhennikova (1990, p.51). Lectotype: Lentin and Vozzhennikova, 1990, pl.6, figs.1–5; text-fig.24, designated by Lentin and Vozzhennikova (1990, p.51). Lentin and Vozzhennikova (1990, p.52) provided an "expanded description" for this species. Age: Eocene.

"*distincta*" Wilson, 1967a, p.63–64, figs.9–10. Holotype: Wilson, 1967a, fig.9. **NOW** *Alterbidinium?*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Alterbidinium?*. Age: Early Tertiary (erratic).

"*ditissima*" McIntyre, 1975, p.62–63, pl.1, figs.1–4. Holotype: McIntyre, 1975, pl.1, figs.1–2. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently (and now) *Chatangiella*. Taxonomic senior synonym: *Deflandrea* (as *Chatangiella decorosa*, according to Harker and Sarjeant in Harker et al. (1990, p.110) — however, Harker and Sarjeant in Harker et al. (1990, p.111) also retained *Chatangiella ditissima*. Age: Santonian–Maastrichtian.

"*dongyingensis*" Jiabo, 1978, p.82, pl.4, figs.6–9; pl.5, figs.1–6. Holotype: Jiabo, 1978, pl.4, fig.6. **NOW** *Subtilisphaera*. Originally *Deflandrea*, subsequently (and now) *Subtilisphaera*. Age: Early Tertiary.

"*druggii*" Stover, 1974, p.171, pl.1, figs.3a–b,4; text-fig.3B. Holotype: Stover, 1974, pl.1, figs.3a–b. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidium*, fourthly (and now) *Manumiella*. Taxonomic senior synonym: *Broomea* (as and now *Manumiella seelandica*, according to Firth (1987, p.213) — however, Thorn et al. (2009, p.443) retained *Manumiella druggii*. Taxonomic junior synonym: *Isabelidium tingitanense*, according to Lentin and Williams (1985, p.201). Age: early-middle Paleocene.

"*dubia*" (Jain and Millepied, 1973, p.25, pl.2, figs.12–13) Hengreen, 1975, p.61. Emendation: Masare et al., 1996, p.180, as *Andalusiella dubia*. Holotype: Jain and Millepied, 1973, pl.2, fig.13. **NOW** *Andalusiella*. Originally *Senegalinium*, subsequently *Deflandrea*, thirdly *Deflandrea?*, fourthly *Andalusiella?*, fifthly (and now) *Andalusiella*. Questionable assignment: Lentin and Williams (1976, p.40). Age: Maastrichtian.

"*echinoidea*" Cookson and Eisenack, 1960a, p.2, pl.1, figs.5–6. Emendation: Sverdløve and Habib, 1974, p.58–59, as *Deflandrea echinoidea*. Holotype: Cookson and Eisenack, 1960a, pl.1, figs.5. **NOW** *Spinidium*. Originally *Deflandrea*, subsequently (and now) *Spinidium*, thirdly *Vozzhennikovia*, fourthly *Spinidium?* Age: Santonian–Campanian.

- "ectorugosa"** Archangelsky, 1969b, p.192, pl.1, figs.5–7. Holotype: Archangelsky, 1969b, pl.1, figs.5–6. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Senegalinium*. Age: Eocene.
- "elegantica"** Andreeva-Grigorovich and Savitskaya, 1993, p.45–46, pl.1, figs.1–2. Holotype: Andreeva-Grigorovich and Savitskaya, 1993, pl.1, fig.1. Age: Eocene–Oligocene.
- "endopapillata"** Archangelsky, 1969b, p.192–193, pl.1, figs.8–9; pl.2, figs.3–4. Holotype: Archangelsky, 1969b, pl.1, figs.8–9. **Taxonomic senior synonym:** *Deflandrea heterophlycta*, according to Stover and Evitt (1978, p.101). Age: late Eocene.
- "eocenica"** Balteş, 1969, p.34, pl.5, figs.8–9 ex Lentin and Williams, 1973, p.40. Holotype: Balteş, 1969, pl.5, fig.9, designated by Lentin and Williams (1973, p.40). This name was not validly published in Balteş (1969, p.34), since that author considered the name to be provisional. Age: early Eocene.
- "euthema"** Davey and Verdier, 1971, p.40, pl.3, figs.1–3. Holotype: Davey and Verdier, 1971, pl.3, fig.2. **NOW** *Eurydinium*. Originally *Deflandrea*, subsequently *Subtilisphaera?*, thirdly (and now) *Eurydinium*. Age: middle-late Albian.
- "extensa"** Stover, 1974, p.178–179, pl.5, figs.4a–c, 5a–d, 6. Holotype: Stover, 1974, pl.5, figs.4a–c; Fensome et al., 1993a, figs.1–3 — p.1167. **NOW** *Gippslandia*. Originally *Deflandrea*, subsequently *Vozzhennikovia?*, thirdly *Dioxya?*, fourthly *Lentinia*, fifthly (and now) *Gippslandia*. Age: middle-late Eocene.
- "extrema"** Cookson and Eisenack, 1974, p.48, pl.20, fig.4. Holotype: Cookson and Eisenack, 1974, pl.20, fig.4. **NOW** *Spongodinium?*. Originally *Deflandrea*, subsequently (and now) *Spongodinium?*, thirdly *Isabelidinium?*. Age: Albian–Cenomanian.
- "eyrensis"** Cookson and Eisenack, 1971, p.217–218, pl.7, figs.2–3. Holotype: Cookson and Eisenack, 1971, pl.7, fig.3. **NOW** *Eurydinium*. Originally *Deflandrea*, subsequently *Alterbia?* (combination illegitimate), thirdly (and now) *Eurydinium*. Age: Albian–Cenomanian.
- "?filigrana"** Benedek, 1972, p.12–13, pl.4, figs.3a–b. Holotype: Benedek, 1972, pl.4, figs.3a–b; Benedek and Sarjeant, 1981, fig.4, fig.8, nos.1–2. **NOW** *Phthanoperidinium*. Originally *Deflandrea?*, subsequently *Vozzhennikovia?*, thirdly *Dioxya*, fourthly (and now) *Phthanoperidinium*. Questionable assignment: Benedek (1972, p.12). Age: middle Oligocene.
- "flounderensis"** Stover, 1974, p.174–175, pl.3, figs.1a–c, 2a–b; text-figs.3F, 4E. Holotype: Stover, 1974, pl.3, figs.1a–c. Age: early Eocene.
- "foliacea"** Eisenack and Cookson, 1960, p.2, pl.1, fig.3. Holotype: Eisenack and Cookson, 1960, pl.1, fig.3. **NOW** *Subtilisphaera*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Subtilisphaera*. Age: Turonian–mid Senonian.
- "foveolata"** Wilson, 1984b, p.547, figs.2–11. Holotype: Wilson, 1984b, figs.2–4; Fensome et al., 1996, figs.1–3 — p.2129. Age: Paleocene.
- "fuegiensis"** Menéndez, 1965, p.8–9, pl.1, figs.1–3; pl.3, fig.16. Holotype: Menéndez, 1965, pl.1, fig.1; pl.3, fig.16. Age: Late Cretaceous.
- "gaditana"** Riegel, 1974, p.356–357, pl.2, figs.8–9; pl.3, figs.1–2. Emendation: Riegel and Sarjeant, 1982, p.297–299, as *Phelodinium gaditanum*. Holotype: Riegel, 1974, pl.2, figs.8–9; Riegel and Sarjeant, 1982, fig.7D. **NOW** *Phelodinium*. Originally *Deflandrea*, subsequently *Senegalinium*, thirdly *Lejeunia* (combination illegitimate), fourthly *Lejeunecysta*, fifthly (and now) *Phelodinium*. Age: ?Senonian.

galeata (Lejeune-Carpentier, 1942, p.B186–B188, figs.15–20) Lentin and Williams, 1973, p.41. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.18–19, as *Deflandrea galeata*. Holotype: Lejeune-Carpentier, 1942, figs.15–16. Originally *Peridinium* (Appendix B), subsequently (and now) *Deflandrea*. Age: Senonian.

"*gallia*" Davey and Verdier, 1973, p.196–197, pl.3, figs.1–4. Holotype: Davey and Verdier, 1973, pl.3, figs.1,3. **NOW** *Isabelidium*. Originally *Deflandrea*, subsequently *Spinidium*, thirdly (and now) *Isabelidium*. Age: late Albian–early Cenomanian.

"*gambangensis*" Cookson and Eisenack, 1970a, p.140, pl.11, figs.1–2. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.1. **NOW** *Eucladinium*. Originally *Deflandrea*, subsequently *Isabelidium*, thirdly (and now) *Eucladinium*. Age: Senonian.

"*glabra*" Cookson and Eisenack, 1969, p.3, fig.1A. Holotype: Cookson and Eisenack, 1969, fig.1A. **NOW** *Isabelidium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidium*. Age: Albian–Cenomanian.

"*globosa*" Davey, 1970, p.344, pl.2, fig.3. Holotype: Davey, 1970, pl.2, fig.3. **NOW** *Isabelidium*?. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidium*?. Age: Cenomanian.

"*glomerata*" Davey, 1970, p.343–344, pl.1, figs.7–9. Holotype: Davey, 1970, pl.1, figs.7–8. **NOW** *Eurydinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidium*, fourthly (and now) *Eurydinium*. Age: Cenomanian.

granulata Menéndez, 1965, p.9–10, pl.1, fig.4. Holotype: Menéndez, 1965, pl.1, fig.4. Age: Eocene–Oligocene.

"*granulifera*" Manum, 1963, p.61, pl.3, figs.5–9. Holotype: Manum, 1963, pl.3, figs.5–6. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Taxonomic junior synonym: *Cooksoniella* (as and now *Chatangiella*) *vnigrii*, according to Lentin and Vozzhennikova (1990, p.47) — however, Lebedeva in Ilyina et al. (1994, p.70) retained *Cooksoniella* (as and now *Chatangiella*) *granulifera*. Age: Senonian.

"var. *granulifera*". Autonym. Holotype: Manum, 1963, pl.3, figs.5–6. **Now redundant.**

"var. *tenuis*" Davey, 1970, p.340–341, pl.2, fig.1. Holotype: Davey, 1970, pl.2, fig.1. **NOW** *Chatangiella granulifera* subsp. *tenuis*. Originally *Deflandrea granulifera* var. *tenuis*, subsequently *Australiella granulifera* subsp. *tenuis*, thirdly (and now) *Chatangiella granulifera* subsp. *tenuis*. Age: Albian.

"*granulosa*" Cookson and Eisenack, 1965a, p.122, pl.11, figs.8–9. Holotype: Cookson and Eisenack, 1965a, pl.11, fig.8. **Taxonomic senior synonym:** *Deflandrea phosphoritica*, according to Stover (1974, p.177). Age: late Eocene.

"*granulostriata*" (Jain and Millepied, 1973, p.24–25, pl.1, figs.7–11; pl.2, fig.18; pl.3, fig.29) Lentin and Williams, 1976, p.41. Holotype: Jain and Millepied, 1973, pl.1, fig.7. **NOW** *Cerodinium*. Originally *Senegalinium*, subsequently *Deflandrea*, thirdly *Ceratiopsis* (combination illegitimate), fourthly (and now) *Cerodinium*. Age: Maastrichtian.

guangraoensis Xu Jinli, 1987, p.150–151; pl.2, figs.3–4,8–9. Holotype: Xu Jinli, 1987, pl.2, fig.4. Age: ?middle-late Eocene.

heterophlycta Deflandre and Cookson, 1955, p.249–250, pl.5, fig.6; text-fig.5. Holotype: Deflandre and Cookson, 1955, text-fig.5; Verdier, 1970, pl.1, figs.1–4. Taxonomic junior synonym: *Deflandrea endopapillata*, according to Stover and Evitt (1978, p.101). This name was not validly published in Deflandre and Cookson (1954, p.1236), since no description was given. Age: late Eocene.

"forma *heterophlycta*". Autonym. Holotype: Deflandre and Cookson, 1955, text-fig.5; Verdier, 1970, pl.1, figs.1–4. **Now redundant.**

"subsp. *heterophlycta*". Autonym. Holotype: Deflandre and Cookson, 1955, text-fig.5; Verdier, 1970, pl.1, figs.1–4. **Now redundant.**

"forma *pusulosa*" Rozen, 1965, p.293–294, pl.1, figs.3–4; text-fig.2. Holotype: Rozen, 1965, pl.1, figs.3–4. Originally *Deflandrea heterophlycta* forma *pusulosa*, subsequently *Deflandrea heterophlycta* subsp. *pusulosa*. **Taxonomic senior synonym:** *Deflandrea phosphoritica*, according to Lentin and Williams (1976, p.41). Age: late Eocene.

"subsp. *pusulosa*" (Rozen, 1965, p.293–294, pl.1, figs.3–4; text-fig.2) Lentin and Williams, 1973, p.41. Holotype: Rozen, 1965, pl.1, figs.3–4. Originally *Deflandrea heterophlycta* forma *pusulosa*, subsequently *Deflandrea heterophlycta* subsp. *pusulosa*. **Taxonomic senior synonym:** *Deflandrea phosphoritica*, according to Lentin and Williams (1976, p.41). Age: late Eocene.

hialina Balteş, 1969, p.34, pl.1, figs.3–4 ex Lentin and Williams, 1973, p.41. Holotype: Balteş, 1969, pl.1, fig.4, designated by Lentin and Williams (1973, p.41). This name was not validly published in Balteş (1969, p.34), since that author considered the name to be provisional. Age: Oligocene–early Miocene.

"*ingramii*" Cookson and Eisenack, 1970a, p.143, pl.12, figs.7–9. Holotype: Cookson and Eisenack, 1970a, pl.12, fig.9; Eisenack and Kjellström, 1975a, figure to left — p.190a; Fensome et al., 1996, fig.3 — p.2167. **NOW** *Eurydinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Senegalinium*, fourthly (and now) *Eurydinium*. Age: Albian–Cenomanian.

intrasphaerula Mao Shaozhi and Norris, 1988, p.43, pl.10, figs.4–6; text-fig.13. Holotype: Mao Shaozhi and Norris, 1988, pl.10, fig.4. Age: early Oligocene.

"*irmoechinata*" Heisecke, 1970, p.230, pl.1, fig.3; pl.2, figs.2–3. Holotype: Heisecke, 1970, pl.1, fig.3; pl.2, figs.2–3. **NOW** *Spinidinium?* Originally *Deflandrea*, subsequently *Gonyaulacysta*, thirdly (and now) *Spinidinium?*, fourthly *Volkheimeridium*. Age: early Paleocene.

"*kansana*" (Tasch in Tasch et al., 1964, p.196, pl.1, fig.1) Lentin and Williams, 1973, p.42. Holotype: Tasch et al., 1964, pl.1, fig.1. **NOW** *Ovoidinium?*. Originally *Peridinium* (Appendix B), subsequently *Deflandrea?*, thirdly (and now) *Ovoidinium?*, fourthly *Ascodinium?*. Questionable assignment: Lentin and Williams (1973, p.42). Age: Albian.

kashiensis He Chengquan, 1991, p.80, pl.29, figs.19–21. Holotype: He Chengquan, 1991, pl.29, fig.20. Age: middle-late Eocene.

"*korjonensis*" Cookson and Eisenack, 1958, p.27–28, pl.4, figs.10–11. Holotype: Cookson and Eisenack, 1958, pl.4, fig.10; Eisenack and Klement, 1964, p.191; Fensome et al., 1996, fig.1 — p.2187. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*. Age: Campanian–early Maastrichtian.

"*laevigata*" Malloy, 1972, p.64, pl.1, figs.1–7. Holotype: Malloy, 1972, pl.1, fig.5. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently *Lejeunia* (combination illegitimate), thirdly *Andalusiella*, fourthly *Lejeunecysta*, fifthly (and now) *Senegalinium*. Taxonomic junior synonym: *Senegalinium psilatatum*, according to Herngreen (1975, p.61). Age: Senonian.

"*lata*" Cookson and Eisenack, 1968, p.110, figs.1A–C. Holotype: Cookson and Eisenack, 1968, fig.1A. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Manumiella*. Age: ?Santonian–early Campanian.

"*leptoderma*" (Vozzhennikova, 1963, p.181; text-fig.8) Lentin and Williams, 1976, p.41. Holotype: Vozzhennikova, 1963, text-fig.8; Lentin and Vozzhennikova, 1990, pl.4, figs.4–5; text-fig.15. **NOW** *Cerodinium*. Originally *Ceratiopsis* (generic name illegitimate), subsequently *Deflandrea*, thirdly (and now) *Cerodinium*. Age: Paleocene.

leptodermata Cookson and Eisenack, 1965a, p.121–122, pl.11, figs.6–7. Holotype: Cookson and Eisenack, 1965a, pl.11, fig.6. Taxonomic junior synonym: *Deflandrea micropoda*, according to Stover and Evitt (1978, p.101). Age: late Eocene.

"limpida" Singh, 1971, p.359–361, pl.61, figs.1–12; text-fig.62. Holotype: Singh, 1971, pl.61, figs.1–2. Originally *Deflandrea*, subsequently *Chichaouadinium*. **Taxonomic senior synonym:** *Spinidinium* (now *Chichaouadinium*) *vestitum*, according to Lentin and Williams (1973, p.43). Age: middle-late Albian.

"longispinosa" Wilson, 1968, p.59–60, figs.1–10. Holotype: Wilson, 1968, fig.4. **NOW** *Apectodinium*. Originally *Deflandrea*, subsequently *Wetzeliella*, thirdly (and now) *Apectodinium*. Age: Paleocene or early Eocene.

lucyedwardsiae Lucas-Clark, 2006, p.192–194, pl.1, fig.16; pl.2, figs.1–9. Holotype: Lucas-Clark, 2006, pl.2, figs.1–3. Age: Paleocene.

"macmurdoensis" (Wilson, 1967a, p.60–62, figs.11–16,22; text-fig.2a) Lentin and Williams, 1976, p.64. Holotype: Wilson, 1967a, figs.11–13. **NOW** *Spinidinium*. Originally *Deflandrea*, subsequently (and now) *Spinidinium*, thirdly *Magallanesium*. Age: Early Tertiary.

"macrocyta" Cookson and Eisenack, 1960a, p.3, pl.1, figs.7–8. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.7. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Senegalinium*. Age: Campanian.

"madurensis" Cookson and Eisenack, 1970a, p.140, pl.11, figs.3–4. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.3; Eisenack and Kjellström, 1975a, page labelled "nach S.194"; Fensome et al., 1996, fig.1 — p.2219. **NOW** *Eucladinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eucladinium*. Age: Senonian.

"magna" Davey, 1970, p.342–343, pl.2, figs.6–8. Holotype: Davey, 1970, pl.2, fig.6. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Chatangiella*, thirdly (and now) *Isabelidinium*. Age: Cenomanian.

"magnifica" Stanley, 1965, p.218–219, pl.20, figs.1–6. Holotype: Stanley, 1965, pl.20, figs.4–6. **NOW** *Phelodinium*. Originally *Deflandrea*, subsequently *Lejeunia* (combination illegitimate), thirdly *Senegalinium*, fourthly *Lejeunecysta*, fifthly (and now) *Phelodinium*. Taxonomic junior synonym (at specific rank): *Peridinium crassipes* forma *altum*, according to Sarjeant (1985b, p.159) and Lentin and Williams (1993, p.503). Age: Paleocene.

"manumii" Cookson and Eisenack, 1970a, p.141–142, pl.11, figs.10–11. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.10; Lentin and Vozzhennikova, 1990, pl.4, fig.3; text-fig.19. **NOW** *Chatangiella madura*. Originally *Deflandrea manumii*, subsequently *Chatangiella manumii* (combination illegitimate), thirdly (and now) *Chatangiella madura*. Taxonomic junior synonym (at specific rank): *Chatangiella vnigrii* subsp. *echinata* (subsequently *Chatangiella granulifera* subsp. *echinata*), according to Lebedeva (2000, p.115). Age: Senonian.

"markovae" (Vozzhennikova, 1967, p.159, pl.119, figs.5,7; pl.120, figs.1–4) Lentin and Williams, 1976, p.42. Holotype: Vozzhennikova, 1967, pl.120, fig.2; Lentin and Vozzhennikova, 1990, pl.3, fig.7–8; text-fig.16. **NOW** *Cerodinium*. Originally *Ceratiopsis* (generic name illegitimate), subsequently *Deflandrea*, thirdly (and now) *Cerodinium*. Age: Paleocene–Eocene.

"medcalfii" Stover, 1974, p.175–176, pl.3, figs.3a–c; text-figs.3G,6C. Holotype: Stover, 1974, pl.3, figs.3a–c. **NOW** *Cerodinium medcalfii*. Originally *Deflandrea medcalfii*, subsequently *Deflandrea dartmooria* subsp. *medcalfii*, thirdly *Ceratiopsis medcalfii* (combination illegitimate), fourthly (and now) *Cerodinium medcalfii*. Age: middle Paleocene.

"menendezii" Pöthe de Baldis, 1966, p.223, pl.2, fig.a. Holotype: Pöthe de Baldis, 1966, pl.2, fig.a. **Taxonomic senior synonym:** *Deflandrea phosphoritica*, according to Lentin and Williams (1976, p.42). Age: Early Tertiary.

"*micracantha*" Cookson and Eisenack, 1960a, p.3, pl.1, fig.9. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.9; Cookson and Manum, 1964, pl.76, figs.9–11. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Age: Campanian.

"*microarma*" McIntyre, 1975, p.65, pl.1, figs.5–8. Holotype: McIntyre, 1975, pl.1, figs.5–6. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*. Age: Campanian–Maastrichtian.

"*microgranulata*" Stanley, 1965, p.219, pl.19, figs.4–6. Holotype: Stanley, 1965, pl.19, figs.4–5. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Senegalinium*. Age: Paleocene.

"*mikropoda*" Cookson and Eisenack, 1974, p.49, pl.27, fig.11. Holotype: Cookson and Eisenack, 1974, pl.27, fig.11. **Taxonomic senior synonym:** *Deflandrea leptodermata*, according to Stover and Evitt (1978, p.101). Age: late Eocene.

"*microspinosa*" Boltenhagen, 1977, p.98–99, pl.17, figs.1a–c, 2a–b. Holotype: Boltenhagen, 1977, pl.17, figs.1a–c. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently (and now) *Senegalinium*. Age: Campanian–Maastrichtian.

"?*microverrucosa*" Yu Jingxian and Zhang Wangping, 1980, p.109, pl.3, figs.1–2. **Incorrect orthographic variant** of *Deflandrea*? (now *Alterbidinium*) *microverrucosa*, which see.

"*microverrucosa*" Yu Jingxian and Zhang Wangping, 1980, p.109, pl.3, figs.1–2. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.3, fig.2. **NOW** *Alterbidinium*. Originally *Deflandrea*, subsequently *Isabelidinium*?, thirdly (and now) *Alterbidinium*. Yu Jingxian and Zhang Wangping (1980, p.109) spelled the epithet as "*microverrucosa*" in their text, but as "*microverrucosa*" in the plate caption. DINOFLAJ2 and later editions of the "Lentin and Williams Index" have cited the spelling as "*microverrucosa*", but He Chengquan et al. (2009, p.416) used "*microverrucosa*", a practice that we follow here. Age: Campanian–early Maastrichtian.

"*minor*" Alberti, 1959b, p.98, pl.9, figs.9–11. Emendation: Khowaja-Ateequzzaman et al., 1991, p.44, as *Alterbidinium minus*. Holotype: Alberti, 1959b, pl.9, fig.10. **NOW** *Alterbidinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Alterbidinium*. Junior homonym: *Deflandrea minor* Cookson and Eisenack, 1960a. Age: late Senonian.

"*minor*" Cookson and Eisenack, 1960a, p.2, pl.1, figs.1–4. Emendation: Morgan, 1977, p.130, as *Alterbia minor*. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.1; Morgan, 1977, text-fig.2. **Name illegitimate — senior homonym:** *Deflandrea minor* Alberti, 1959b. Substitute name: *Deflandrea balmei*. **NOW** *Spinidinium balmei*. Originally *Deflandrea minor* (name illegitimate), subsequently *Deflandrea balmei*, thirdly *Alterbia balmei* (combination illegitimate), fourthly *Isabelidinium balmei*, fifthly (and now) *Spinidinium balmei*, sixthly *Magallanesium balmei*. Taxonomic senior synonym: *Palaeohystrichophora* (as *Diconodinium*) *minuta*, according to Morgan (1977, p.130) — however, Lentin and Williams (1981, p.156) retained *Deflandrea minor* (as *Isabelidinium balmei*). Age: Late Cretaceous.

"*minuta*" Jiabo, 1978, p.83, pl.3, figs.10–11. Holotype: Jiabo, 1978, pl.3, fig.11. **NOW** *Saeptodinium*. Originally *Deflandrea*, subsequently *Sanshuia*, thirdly *Geiselodinium*, fourthly (and now) *Saeptodinium*. Age: Early Tertiary.

"*montanaensis*" Harland, 1977a, p.184–185, pl.25, figs.4, 6–7, 10–12. Holotype: Harland, 1977a, pl.25, fig.4. **NOW** *Alterbidinium*. Originally *Deflandrea*, subsequently *Spinidinium*, thirdly *Alterbia* (combination illegitimate), fourthly (and now) *Alterbidinium*. Age: late Campanian–Maastrichtian.

"*multispinosa*" Cookson and Eisenack, 1970a, p.141, pl.11, figs.7–9. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.8. **NOW** *Chatangiella*?. Originally *Deflandrea*, subsequently *Chatangiella*, thirdly (and now) *Chatangiella*?. Age: Albian–Cenomanian.

musculopsis Mao Shaozhi and Norris, 1988, p.43–44, pl.10, figs.7–10; text-fig.14. Holotype: Mao Shaozhi and Norris, 1988, pl.10, fig.8. Age: late Paleocene–early Oligocene.

"*nucula*" Cookson and Eisenack, 1962b, p.486, pl.1, fig.13. Holotype: Cookson and Eisenack, 1962b, pl.1, fig.13. **NOW** *Amphidiadema*. Originally *Deflandrea*, subsequently (and now) *Amphidiadema*. N.I.A. Age: Senonian.

"*obliquipes*" Deflandre and Cookson, 1955, p.252, pl.4, fig.6. Holotype: Deflandre and Cookson, 1955, pl.4, fig.6. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Deflandrea?*, thirdly *Ceratiopsis* (combination illegitimate), fourthly (and now) *Cerodinium*. Questionable assignment: Stover and Evitt (1978, p.101). Age: middle Paleocene–early Eocene.

"*obscura*" Drugg, 1967, p.17, pl.2, figs.8–9; pl.9, fig.5. Holotype: Drugg, 1967, pl.2, fig.8. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Senegalinium*. Age: Maastrichtian–Danian.

oebisfeldensis Alberti, 1959b, p.95–96, pl.8, figs.10–13. Holotype: Alberti, 1959b, pl.8, fig.13. Age: Paleocene–early Eocene.

"forma ***angustata***" Vozzhennikova, 1967, p.146–147, pl.72, figs.3–4. Holotype: Vozzhennikova, 1967, pl.72, fig.3; Lentin and Vozzhennikova, 1990, pl.5, fig.9; text-fig.25. **NOW** *Deflandrea oebisfeldensis* subsp. *angustata*. Originally *Deflandrea oebisfeldensis* forma *angustata*, subsequently (and now) *Deflandrea oebisfeldensis* subsp. *angustata*. Age: Eocene.

subsp. ***angustata*** (Vozzhennikova, 1967, p.146–147, pl.72, figs.3–4) Lentin and Williams, 1973, p.43. Holotype: Vozzhennikova, 1967, pl.72, fig.3; Lentin and Vozzhennikova, 1990, pl.5, fig.9; text-fig.25. Originally *Deflandrea oebisfeldensis* forma *angustata*, subsequently (and now) *Deflandrea oebisfeldensis* subsp. *angustata*. Lentin and Vozzhennikova (1990, p.53) provided an "expanded description" for this subspecies. Age: Eocene.

subsp. ***longicornis*** He Chengquan, 1991, p.81–82, pl.31, fig.11. Holotype: He Chengquan, 1991, pl.31, fig.11. Age: Paleocene.

"forma ***oebisfeldensis***". Autonym. Holotype: Alberti, 1959b, pl.8, fig.13. **Now redundant.**

subsp. ***oebisfeldensis***. Autonym. Holotype: Alberti, 1959b, pl.8, fig.13.

"forma ***ovalis***" Vozzhennikova, 1967, p.146, pl.71, fig.2. Holotype: Vozzhennikova, 1967, pl.71, fig.2; Lentin and Vozzhennikova, 1990, text-fig.26, lost according to Lentin and Vozzhennikova (1990, p.54). **NOW** *Deflandrea oebisfeldensis* subsp. *ovalis*. Originally *Deflandrea oebisfeldensis* forma *ovalis*, subsequently (and now) *Deflandrea oebisfeldensis* subsp. *ovalis*. Age: Eocene.

subsp. ***ovalis*** (Vozzhennikova, 1967, p.146, pl.71, fig.2) Lentin and Williams, 1973, p.43. Holotype: Vozzhennikova, 1967, pl.71, fig.2; Lentin and Vozzhennikova, 1990, text-fig.26, lost according to Lentin and Vozzhennikova (1990, p.54). Originally *Deflandrea oebisfeldensis* forma *ovalis*, subsequently (and now) *Deflandrea oebisfeldensis* subsp. *ovalis*. According to Lentin and Vozzhennikova (1990, p.54), no potential lectotype is available. Age: Eocene.

"*ornata*" (May, 1980, p.77–78, pl.9, figs.3–5) Lentin and Williams, 1981, p.258. Holotype: May, 1980, pl.9, figs.3–4. **NOW** *Spinidinium?* Originally *Deflandrea*, subsequently *Spinidinium*, thirdly (and now) *Spinidinium?* Age: Campanian–basal Maastrichtian.

"*ovata*" Jiabo, 1978, p.84, pl.4, figs.1–3. Emendation: Mao Shaozhi et al., 1995, p.51, as *Sanshuia ovata*. Holotype: Jiabo, 1978, pl.4, fig.2. **NOW** *Sanshuia*. Originally *Deflandrea*, subsequently *Subtilisphaera*, thirdly (and now) *Sanshuia*, fourthly *Geiselodinium*, fifthly *Saepodinium*. Age: Early Tertiary.

?*pachycera* Deflandre and Cookson, 1955, p.252, pl.4, fig.7. Holotype: Deflandre and Cookson, 1955, pl.4, fig.7. Originally *Deflandrea*, subsequently (and now) *Deflandrea*?. Questionable assignment: Stover and Evitt (1978, p.101). The derivation of the epithet *pachyceros* was not stated in the protologue. Since Principle 5 of the I.C.N. states that taxon names are to be treated as Latin and since compound epithets are conventionally treated as adjectives, the epithet should be rendered as "*pachycera*", in agreement with the feminine gender of the generic name (the neuter would be "*pachycerum*" and the masculine "*pachycerus*"). Age: late Paleocene–early Eocene.

"?pannucea" Stanley, 1965, p.220, pl.22, figs.1–4,8–10. Holotype: Stanley, 1965, pl.22, figs.3–4. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Senegalinium*?, thirdly *Deflandrea*?, fourthly *Ceratiopsis* (combination illegitimate), fifthly (and now) *Cerodinium*. Questionable assignment: Stover and Evitt (1978, p.101). Age: Paleocene.

?*papillata* Oleinik, 1975, p.226–227, pl.1, figs.6a–b,7. Holotype: Oleinik, 1975, pl.1, figs.6a–b. Originally *Deflandrea*, subsequently (and now) *Deflandrea*?. Questionable assignment: Lentin and Williams (1981, p.77). Age: late Eocene.

"*parva*" Cookson and Eisenack, 1958, p.28, pl.4, figs.12–13. Holotype: Cookson and Eisenack, 1958, pl.4, fig.12; lost according to Cookson and Eisenack (1960a, p.5). Neotype: Cookson and Eisenack, 1960a, pl.1, fig.23, designated by Cookson and Eisenack (1960a, p.5). **NOW** *Ascodinium*. Originally *Deflandrea*, subsequently (and now) *Ascodinium*. Age: late Albian–Cenomanian.

"*pellucida*" (Deflandre and Cookson, 1955, p.251, pl.4, fig.3) Cookson and Eisenack, 1958, p.27. Holotype: Deflandre and Cookson, 1955, pl.4, fig.3; Cookson and Eisenack, 1958, pl.4, fig.9; Stover, 1974, pl.1, figs.7a–b. **NOW** *Isabelidinium pellucidum*. Originally *Deflandrea bakeri* forma *pellucida*, subsequently *Deflandrea pellucida*, thirdly *Isabelia pellucida* (combination illegitimate), fourthly (and now) *Isabelidinium pellucidum*, fifthly *Alterbia pellucida* (combination illegitimate). Age: Paleocene–early Eocene.

"*pentagonalis*" Corradini, 1973, p.175, pl.28, fig.3. Holotype: Corradini, 1973, pl.28, fig.3; Eisenack and Kjellström, 1981a, page labelled "nach S.208"; Fensome et al., 1995, fig.1 — p.1649. **NOW** *Phelodinium*. Originally *Deflandrea*, subsequently *Lejeunia* (combination illegitimate), thirdly *Senegalinium*, fourthly *Lejeuncysta*, fifthly (and now) *Phelodinium*. Age: Senonian.

"*pentaradiata*" Cookson and Eisenack, 1965c, p.139–140, pl.18, figs.1–2. Holotype: Cookson and Eisenack, 1965c, pl.18, fig.1; Stover, 1974, pl.2, figs.6a–b. **NOW** *Alterbidinium*?. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Alterbidinium*?. Age: Paleocene.

"subsp. *pentaradiata*". Autonym. Holotype: Cookson and Eisenack, 1965c, pl.18, fig.1; Stover, 1974, pl.2, figs.6a–b. **NOW** *Alterbidinium*? *pentaradiatum* subsp. *pentaradiatum*. Originally *Deflandrea pentaradiata* subsp. *pentaradiata*, subsequently *Alterbia*? *pentaradiata* subsp. *pentaradiata* (combination illegitimate), thirdly (and now) *Alterbidinium*? *pentaradiatum* subsp. *pentaradiatum*.

"subsp. *preceda*" Cookson and Eisenack, 1974, p.49, pl.20, figs.1–2. Holotype: Cookson and Eisenack, 1974, pl.20, fig.1. **NOW** *Alterbidinium*? *pentaradiatum* subsp. *precedum*. Originally *Deflandrea pentaradiata* subsp. *preceda*, subsequently *Alterbia*? *pentaradiata* subsp. *preceda* (combination illegitimate), thirdly (and now) *Alterbidinium*? *pentaradiatum* subsp. *precedum*. Age: Paleocene.

"*perlucida*" Alberti, 1959b, p.102, pl.9, figs.16–17. Holotype: Alberti, 1959b, pl.9, fig.16. **NOW** *Subtilisphaera*. Originally *Deflandrea*, subsequently (and now) *Subtilisphaera*. Taxonomic junior synonyms: *Deflandrea* (as *Subtilisphaera*) *pirnaensis*, according to Fensome et al. (2009, p.60); by implication, *Scriniodinium cooksoniae*, which Sarjeant and Anderson (1969, p.232–233) considered to be a taxonomic junior synonym of *Deflandrea pirnaensis*; and *Deflandrea* (now *Subtilisphaera*) *rotundata*, according to Davey (1974, p.65) — however, Lentin and Williams (1976, p.119) retained *Deflandrea* (as *Subtilisphaera*) *rotundata*. Age: late Barremian.

**phosphoritica* Eisenack, 1938b, p.187; text-fig.6. Holotype: Eisenack, 1938b, text-fig.6; Eisenack, 1954b, pl.9, fig.11 (not pl.9, fig.8 as indicated in Eisenack, 1954b, caption to pl.9, fig.8 — p.91). Taxonomic junior synonyms: *Deflandrea granulosa*, according to Stover (1974, p.177); *Deflandrea menendezii*, according to Lentin and Williams

(1976, p.42); *Deflandrea heterophlycta* forma *pusulosa*, according to Lentin and Williams (1976, p.41). Age: late Eocene–early Oligocene.

subsp. *australis* Cookson and Eisenack, 1961b, p.39–40, pl.1, figs.2–3. Holotype: Cookson and Eisenack, 1961b, pl.1, fig.2. Age: Eocene.

"forma *australis*". Autonym. Holotype: Cookson and Eisenack, 1961b, pl.1, fig.2. **Now redundant.**

var. *australis*. Autonym. Holotype: Cookson and Eisenack, 1961b, pl.1, fig.2.

"forma *lata*" Vozzhennikova, 1967, p.142, pl.69, figs.5–6. Holotype: cited, but not related to an illustration. **NOW** *Deflandrea phosphoritica* subsp. *australis* var. *lata*. Originally *Deflandrea phosphoritica* subsp. *australis* forma *lata*, subsequently (and now) *Deflandrea phosphoritica* subsp. *australis* var. *lata*. According to Lentin and Vozzhennikova (1990, p.55), the original material is lost and no potential lectotype is available. Age: Eocene–early Oligocene.

var. *lata* (Vozzhennikova, 1967, p.142, pl.69, figs.5–6) Lentin and Williams, 1973, p.44. Holotype: cited, but not related to an illustration. Originally *Deflandrea phosphoritica* subsp. *australis* forma *lata*, subsequently (and now) *Deflandrea phosphoritica* subsp. *australis* var. *lata*. According to Lentin and Vozzhennikova (1990, p.55), the original material is lost and no potential lectotype is available. Age: Eocene–early Oligocene.

"forma *attenuata*" Vozzhennikova, 1967, p.140–141, pl.65, figs.2–4; pl.67, figs.2–4; pl.69, fig.4; pl.70, figs.1,4,6–7,10. Holotype: Reissinger, 1950, pl.19, fig.10; Lentin and Vozzhennikova, 1990, text-fig.28; current repository unknown, according to Lentin and Vozzhennikova (1990, p.56). **NOW** *Deflandrea phosphoritica* subsp. *phosphoritica* var. *attenuata*. Originally *Deflandrea phosphoritica* subsp. *phosphoritica* forma *attenuata*, subsequently (and now) *Deflandrea phosphoritica* subsp. *phosphoritica* var. *attenuata*. Age: Eocene–early Oligocene.

"forma *phosphoritica*". Autonym. Holotype: Eisenack, 1938b, text-fig.6; Eisenack, 1954b, pl.9, fig.11 (not pl.9, fig.8 as indicated in Eisenack, 1954b, caption to pl.9, fig.8 — p.91). **Now redundant.**

subsp. *phosphoritica*. Autonym. Holotype: Eisenack, 1938b, text-fig.6; Eisenack, 1954b, pl.9, fig.11 (not pl.9, fig.8 as indicated in Eisenack, 1954b, caption to pl.9, fig.8 — p.91).

var. *attenuata* (Vozzhennikova, 1967, p.140–141, pl.65, figs.2–4; pl.67, figs.2–4; pl.69, fig.4; pl.70, figs.1,4,6–7,10) Lentin and Williams, 1973, p.44. Holotype: Reissinger, 1950, pl.19, fig.10; Lentin and Vozzhennikova, 1990, text-fig.28; current repository unknown, according to Lentin and Vozzhennikova (1990, p.56). Originally *Deflandrea phosphoritica* subsp. *phosphoritica* forma *attenuata*, subsequently (and now) *Deflandrea phosphoritica* subsp. *phosphoritica* var. *attenuata*. Age: Eocene–early Oligocene.

var. *phosphoritica*. Autonym. Holotype: Eisenack, 1938b, text-fig.6; Eisenack, 1954b, pl.9, fig.11 (not pl.9, fig.8 as indicated in Eisenack, 1954b, caption to pl.9, fig.8 — p.91).

var. *spinulosa* (Alberti, 1959b, p.95, pl.8, figs.8–9) Strauss in Pross, 1997, p.118. Holotype: Alberti, 1959b, pl.8, fig.8. Originally *Deflandrea spinulosa*, subsequently (and now) *Deflandrea phosphoritica* var. *spinulosa*. Pross (1997, p.118) attributed this combination to an unpublished thesis by Strauss. Age: middle-late Oligocene.

subsp. *vozhennikovae* Grigorovich, 1972, p.66, pl.1, fig.3. Holotype: Grigorovich, 1972, pl.1, fig.3. Age: early Miocene.

"*pilosa*" Davey, 1969b, p.9, pl.3, figs.2–5. Holotype: Davey, 1969b, pl.3, figs.2,5. **NOW** *Alterbidinium*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Alterbidinium*. Age: Campanian–Maastrichtian.

"*pirnaensis*" Alberti, 1959b, p.100, pl.8, figs.1,5. Holotype: Alberti, 1959b, pl.8, fig.1. **Taxonomic senior synonym:** *Subtilisphaera perlucida*, according to Fensome et al. (2009, p.60). Originally *Deflandrea*, subsequently *Subtilisphaera*, thirdly *Subtilisphaera*? Taxonomic junior synonym: *Scriniodinium cooksoniae*, according to Sarjeant and Anderson (1969, p.232–233). Age: ?middle Turonian.

"*plea*" (Tasch in Tasch et al., 1964, p.196, pl.1, fig.15) Lentin and Williams, 1973, p.44. Holotype: Tasch et al., 1964, pl.1, fig.15. Originally *Peridinium* (Appendix B), subsequently (and now) *Deflandrea*?, thirdly *Gonyaulacysta*?. Stover and Evitt (1978, p.101) retained this species in *Deflandrea*. Questionable assignment: Lentin and Williams (1973, p.44). Age: Albian.

"*pontis-mariae*" (Deflandre, 1936b, p.167, pl.2, figs.7–9) Davey, 1970, p.341. Holotype: Deflandre, 1936b, pl.2, fig.7. **NOW** *Subtilisphaera*. Originally *Gymnodinium* (Appendix B), subsequently *Deflandrea*, thirdly *Ascodinium*, fourthly (and now) *Subtilisphaera*. This combination was not validly published in Vozzhennikova (1965, p.109–caption to pl.49, fig.5), since that author did not fully reference the basionym. Age: ?Senonian.

"*prutensis*" (Grigorovich, 1971, p.92,94, pl.2, fig.2) Stover and Evitt, 1978, p.101. Holotype: Grigorovich, 1971, pl.2, fig.2. **NOW** *Cerodinium*. Originally *Ceratiopsis* (generic name illegitimate), subsequently *Ceratiopsis*? (an illegitimate generic name), thirdly *Deflandrea*?, fourthly (and now) *Cerodinium*. Questionable assignment: Stover and Evitt (1978, p.101). Age: Paleocene.

"*psilata*" Yu Jingxian and Zhang Wangping, 1980, p.108–109, pl.2, figs.19–20. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.2, fig.20. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently (and now) *Isabelidinium*. Age: Campanian–early Maastrichtian.

"*pulchra*" Benson, 1976, p.194, pl.9, figs.4–9. Holotype: Benson, 1976, pl.9, figs.4–7. **NOW** *Spinidinium*? Originally *Deflandrea*, subsequently *Spinidinium*, thirdly *Magallanesium*, fourthly (and now) *Spinidinium*? Age: early Paleocene.

"*quiriquinaensis*" Takahashi, 1979, p.33, pl.1, figs.1a–c,2a–b,3. Holotype: Takahashi, 1979, pl.1, figs.1a–c. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently (and now) *Cerodinium*. Age: Late Cretaceous.

"*raijae*" Kjellström, 1973, p.20–22, fig.16. Holotype: Kjellström, 1973, fig.16. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Eurydinium*, fourthly (and now) *Manumiella*. Age: middle-late Maastrichtian.

"*rectangularis*" Cookson and Eisenack, 1962b, p.486, pl.1, figs.14–15. Holotype: Cookson and Eisenack, 1962b, pl.1, fig.14; Jan du Chêne et al., 1986a, pl.48, figs.14–15. **NOW** *Amphidiadema*. Originally *Deflandrea*, subsequently (and now) *Amphidiadema*. Taxonomic senior synonym: *Triblastula* (as *Hystrichosphaeropsis*) *quasicribrata*, according to Stover and Evitt (1978, p.94), who were following Gocht (1976, p.322) — however, Gocht (1976, p.322) had only included in synonymy the specimen of *Amphidiadema rectangularis* illustrated by Kjellström (1973, fig.17). Age: late Turonian–mid Senonian.

"subsp. *rectangularis*". Autonym. Holotype: Cookson and Eisenack, 1962b, pl.1, fig.14; Jan du Chêne et al., 1986a, pl.48, figs.14–15. **Now redundant.** Originally *Deflandrea rectangularis* subsp. *rectangularis*, subsequently *Amphidiadema rectangularis* subsp. *rectangularis*.

"var. *rectangularis*". Autonym. Holotype: Cookson and Eisenack, 1962b, pl.1, fig.14; Jan du Chêne et al., 1986a, pl.48, figs.14–15. **Now redundant.**

"subsp. *samuelsonii*" (Kjellström, 1973, p.22, fig.18) Lentin and Williams, 1975, p.2149. Holotype: Kjellström, 1973, fig.18. Originally *Deflandrea rectangularis* var. *samuelsonii*, subsequently *Deflandrea rectangularis* subsp. *samuelsonii*, thirdly *Amphidiadema rectangularis* subsp. *samuelsonii*. **Taxonomic senior synonym:** *Triblastula* (as and now *Hystrichosphaeropsis*) *quasicribrata*, according to Gocht (1976, p.322). Age: early–late Maastrichtian.

- "var. **samuelsonii**" Kjellström, 1973, p.22, fig.18. Holotype: Kjellström, 1973, fig.18. Originally *Deflandrea rectangularis* var. *samuelsonii*, subsequently *Deflandrea rectangularis* subsp. *samuelsonii*, thirdly *Amphidiadema rectangularis* subsp. *samuelsonii*. **Taxonomic senior synonym:** *Triblastula* (as and now *Hystrichosphaeropsis*) *quasicribrata*, according to Gocht (1976, p.322). Age: early–late Maastrichtian.
- "**rhombica**" Cookson and Eisenack, 1974, p.49–50, pl.20, figs.5–9. Holotype: Cookson and Eisenack, 1974, pl.20, fig.7. **NOW** *Spinidinium echinoideum* subsp. *rhombicum*. Originally *Deflandrea rhombica*, subsequently (and now) *Spinidinium echinoideum* subsp. *rhombicum*, thirdly *Spinidinium rhombicum*. Age: Albian–Cenomanian.
- "**rhombohedra**" Benson, 1976, p.195, pl.9, figs.10–12. Holotype: Benson, 1976, pl.9, figs.10–12. **NOW** *Andalusiella*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly (and now) *Andalusiella*. Age: early Paleocene.
- "**rhombovalis**" Cookson and Eisenack, 1970a, p.143, pl.12, figs.10–11. Holotype: Cookson and Eisenack, 1970a, pl.12, fig.11. **NOW** *Isabelidinium?*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Isabelidinium?*. Age: late Albian–Senonian.
- "**robusta**" Balteş, 1969, p.35, pl.5, fig.11. Holotype: not designated. **Name not validly published:** provisional designation. The name cannot be legitimized since it would be a junior homonym of *Deflandrea robusta* Deflandre and Cookson, 1955. Age: Eocene.
- robusta** Deflandre and Cookson, 1955, p.250, pl.4, fig.9. Holotype: Deflandre and Cookson, 1955, pl.4, fig.9; Stover, 1974, pl.2, fig.5. Age: Eocene.
- "**rotundata**" Eisenack and Cookson, 1960, p.2, pl.1, figs.1–2. Holotype: Eisenack and Cookson, 1960, pl.1, fig.1. **NOW** *Subtilisphaera*. Originally *Deflandrea*, subsequently (and now) *Subtilisphaera*. Taxonomic senior synonym: *Deflandrea* (as *Subtilisphaera*) *perlucida*, according to Davey (1974, p.65) — however, Lentin and Williams (1976, p.119) retained *Deflandrea* (as *Subtilisphaera*) *rotundata*. Age: Albian.
- "**sagittula**" Drugg, 1970b, p.809–810, figs.1A–C. Holotype: Drugg, 1970b, fig.1A. **NOW** *Spinidinium?* Originally *Deflandrea*, subsequently *Spinidinium*, thirdly (and now) *Spinidinium?* N.I.A. Age: early Eocene.
- scabrata** Wilson, 1988, p.18, pl.6, figs.1a–b,2. Holotype: Wilson, 1988, pl.6, fig.2; Fensome et al., 1996, fig.3 — p.2339. Age: early-middle Eocene; see Fensome et al. (1996, p.2340).
- "**scheii**" Manum, 1963, p.56–58, pl.1, figs.1–16; text-fig.1. Holotype: Manum, 1963, pl.1, figs.1–4; text-fig.1. **NOW** *Arvalidinium*. Originally *Deflandrea*, subsequently *Cooksoniella*, thirdly *Chatangiella?*, fourthly (and now) *Arvalidinium*. Age: Middle Cretaceous (early Late Cretaceous, according to Manum and Cookson, 1964).
- scitula** He Chengquan, 1991, p.83–84, pl.30, fig.13. Holotype: He Chengquan, 1991, pl.30, fig.13. Age: late Eocene.
- scolensis** Grigorovich, 1971, p.92, pl.1, fig.3. Holotype: Grigorovich, 1971, pl.1, fig.3. Age: Eocene.
- "**sergipensis**" Herngreen, 1975, p.61, pl.3, figs.13–15. Holotype: Herngreen, 1975, pl.3, figs.14–15. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently (and now) *Senegalinium*. Age: late Senonian.
- "**serrata**" Cookson and Eisenack, 1958, p.28, pl.4, fig.4. Holotype: Cookson and Eisenack, 1958, pl.4, fig.4. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently (and now) *Chatangiella*. N.I.A. Age: Campanian–Maastrichtian.
- severnensis** Benson, 1976, p.195–196, pl.10, figs.1–3. Holotype: Benson, 1976, pl.10, figs.1–3. Age: late Maastrichtian.

shandongensis Xu Jinli, 1987, p.151, pl.1, figs.2–4. Holotype: Xu Jinli, 1987, pl.1, fig.2. Age: ?middle-late Eocene.

"*sibirica*" (Vozzhennikova, 1963, p.181; text-figs.9–10) Lentin and Williams, 1976, p.44. Emendation: Lentin and Vozzhennikova, 1990, p.39–40, as *Cerodinium sibiricum*. Holotype: Vozzhennikova, 1963, text-fig.9; Lentin and Vozzhennikova, 1990, pl.4, figs.1–2. **NOW** *Cerodinium*. Originally (and now) *Cerodinium*, subsequently *Ceratiopsis* (combination illegitimate), thirdly *Deflandrea*. Age: Paleocene–Eocene.

"*speciosa*" Alberti, 1959b, p.97, pl.9, figs.12–13. Holotype: Alberti, 1959b, pl.9, fig.13. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: late Paleocene.

"forma *glabra*" Gocht, 1969, p.10, text-fig.3. Holotype: Gocht, 1969, text-fig.3, as *Deflandrea speciosa* forma *glabra*. **NOW** *Cerodinium glabrum*. Originally *Deflandrea speciosa* forma *glabra*, subsequently *Deflandrea speciosa* subsp. *glabra*, thirdly *Ceratiopsis speciosa* subsp. *glabra* (combination illegitimate), fourthly *Cerodinium speciosum* subsp. *glabrum*, fifthly (and now) *Cerodinium glabrum*. Age: late Paleocene.

"subsp. *glabra*" (Gocht, 1969, p.10; text-fig.3) Lentin and Williams, 1973, p.45. Holotype: Gocht, 1969, text-fig.3. **NOW** *Cerodinium glabrum*. Originally *Deflandrea speciosa* forma *glabra*, subsequently *Deflandrea speciosa* subsp. *glabra*, thirdly *Ceratiopsis speciosa* subsp. *glabra* (combination illegitimate), fourthly *Cerodinium speciosum* subsp. *glabrum*, fifthly (and now) *Cerodinium glabrum*. Age: late Paleocene.

"forma *speciosa*". Autonym. Holotype: Alberti, 1959b, pl.9, fig.13. **Now redundant**.

"subsp. *speciosa*". Autonym. Holotype: Alberti, 1959b, pl.9, fig.13. **NOW** *Cerodinium speciosum* subsp. *speciosum*. Originally *Deflandrea speciosa* subsp. *speciosa*, subsequently *Ceratiopsis speciosa* subsp. *speciosa* (combination illegitimate), thirdly (and now) *Cerodinium speciosum* subsp. *speciosum*.

"*spectabilis*" (Alberti, 1959b, p.99, pl.9, fig.78) Lentin and Williams, 1973, p.45. Emendation: Lebedeva in Ilyina et al., 1994, p.66, as *Chatangiella spectabilis*. Holotype: Alberti, 1959b, pl.9, fig.78. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Age: late Senonian.

"*spicata*" May, 1980, p.79, pl.9, figs.18–20. Holotype: May, 1980, pl.9, fig.19. **NOW** *Andalusiella*. Originally *Deflandrea*, subsequently (and now) *Andalusiella*. Age: Campanian–Maastrichtian.

"*spinosissima*" Cookson and Eisenack, 1970a, p.141, pl.11, figs.5–6. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.5. **NOW** *Eucladinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eucladinium*. Age: Senonian.

"*spinulosa*" Alberti, 1959b, p.95, pl.8, figs.8–9. Holotype: Alberti, 1959b, pl.8, fig.8. **NOW** *Deflandrea phosphoritica* var. *spinulosa*. Originally *Deflandrea spinulosa*, subsequently (and now) *Deflandrea phosphoritica* var. *spinulosa*. Age: middle-late Oligocene.

"*stagonoides*" (Benedek, 1972, p.10, pl.2, fig.12; text-fig.5) Lentin and Williams, 1976, p.44. Emendation: Benedek and Sarjeant, 1981, p.324, as *Ascodinium stagonoides*. Holotype: Benedek, 1972, pl.2, fig.12; Benedek and Sarjeant, 1981, fig.3, nos.1,3. **NOW** *Senoniasphaera*. Originally *Ascodinium*, subsequently *Deflandrea*, thirdly (and now) *Senoniasphaera*. Age: late Oligocene.

"*striata*" Drugg, 1967, p.18, pl.2, figs.13–14. Holotype: Drugg, 1967, pl.2, fig.13. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: early Paleocene.

"subquadra" Corradini, 1973, p.175–176, pl.28, fig.1. Holotype: Corradini, 1973, pl.28, fig.1. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Senegalinium*?, thirdly *Ceratiopsis* (combination illegitimate), fourthly (and now) *Cerodinium*. Age: Senonian.

subtilis He Chengquan, 1991, p.84, pl.29, figs.15–17. Holotype: He Chengquan, 1991, pl.29, fig.16. Age: late Eocene.

superposita He Chengquan, 1991, p.84–85, pl.34, figs.17–18. Holotype: He Chengquan, 1991, pl.34, fig.17. This species was not validly published in Xu Jinli (1987, p.151), who cited it as "*Deflandrea superposita* He (MS)", a manuscript name. Age: middle-late Eocene.

"suspecta" (Manum and Cookson, 1964, p.9–10, pl.1, figs.9–13) Davey, 1970, p.342. Holotype: Manum and Cookson, 1964, pl.1, fig.9. **NOW** *Trithyrodinium*. Originally *Hexagonifera*, subsequently (and now) *Trithyrodinium*, thirdly *Deflandrea*. Age: Cenomanian.

"sverdrupiana" Manum, 1963, p.59–60, pl.2, figs.6–15; text-fig.3. Emendation: Lebedeva in Ilyina et al., 1994, p.64, as *Spinidinium sverdrupianum*. Holotype: Manum, 1963, pl.2, figs.12–13. **NOW** *Spinidinium*. Originally *Deflandrea*, subsequently (and now) *Spinidinium*, thirdly *Subtilisphaera*, fourthly *Cooksoniella* (combination not validly published). Age: Cenomanian.

"?tenera" Krutzsch, 1962, p.44, pl.11, figs.20–22; text-fig.1e. Holotype: Krutzsch, 1962, pl.11, figs.20–22. **NOW** *Geiselodinium*. Originally *Deflandrea*?, subsequently *Vozzhennikovia*, thirdly *Dioxya*, fourthly (and now) *Geiselodinium*. Questionable assignment: Krutzsch (1962, p.44). Age: middle Eocene.

"terrula" Davey, 1974, p.65, pl.8, figs.4–5. Emendation: Harding, 1986a, p.101–102,104, as *Subtilisphaera terrula*. Holotype: Davey, 1974, pl.8, fig.4. **NOW** *Subtilisphaera*. Originally *Deflandrea*, subsequently *Subtilisphaera*?, thirdly (and now) *Subtilisphaera*. N.I.A. Age: middle Barremian.

"thomasii" Cookson and Eisenack, 1961a, p.71–72, pl.11, figs.7–10. Holotype: Cookson and Eisenack, 1961a, pl.11, fig.8. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*. Age: Senonian.

translucida Châteauneuf, 1980, p.138, pl.22, fig.9; pl.23, fig.6. Holotype: Châteauneuf, 1980, pl.22, fig.9. Age: Eocene (Lutetian–Ludian).

tribulosa Islam, 1983c, p.85, pl.1, figs.9–10. Holotype: Islam, 1983c, pl.1, fig.10. Age: middle Eocene.

"tripartita" Cookson and Eisenack, 1960a, p.2–3, pl.1, fig.10. Emendation: Cookson and Manum, 1964, p.521–522, as *Deflandrea tripartita*. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.10; Cookson and Manum, 1964, pl.76, figs.1–2. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Age: Senonian.

truncata Stover, 1974, p.176–177, pl.5, figs.2,3a–c; text-figs.3A,6I. Holotype: Stover, 1974, pl.5, figs.3a–c. Age: early Eocene.

tuberculata Hultberg, 1985c, p.120–121, pl.3, figs.A–C. Holotype: Hultberg, 1985c, pl.3, fig.A. Age: late Maastrichtian.

"tubifera" Cookson and Eisenack, 1982, p.31–32, pl.3, figs.12–14. Holotype: Cookson and Eisenack, 1982, pl.3, fig.12. **NOW** *Chatangiella*?. Originally *Deflandrea*, subsequently (and now) *Chatangiella*?. Age: Barremian–early Aptian.

"ventriosa" Alberti, 1959b, p.101, pl.9, figs.14–15. Holotype: Alberti, 1959b, pl.9, fig.14; Eisenack and Klement, 1964, p.239; Fensome et al., 1995, fig.1 — p.1895. **NOW** *Cepadinium*. Originally *Deflandrea*, subsequently *Subtilisphaera*, thirdly (and now) *Cepadinium*. Age: early Aptian.

"*verrucosa*" Manum, 1963, p.60–61, pl.3, figs.1–4. Holotype: Manum, 1963, pl.3, figs.1–2. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently *Trithyrodinium*, thirdly *Australiella*, fourthly (and now) *Chatangiella*. Taxonomic junior synonym: *Cooksoniella* (as and now *Chatangiella*) *vnigrii*, according to Yun Hyesu (1981, p.66) — however, Lebedeva in Ilyina et al. (1994, p.70) retained *Cooksoniella* (as and now *Chatangiella*) *vnigrii*. Age: Middle Cretaceous.

"*vestita*" (Brideaux, 1971, p.99–101, pl.29, figs.99–103; text-figs.10a,d) Sverdløve and Habib, 1974, p.59–60. Holotype: Brideaux, 1971, pl.29, figs.99,102–103; text-figs.10a,d. **NOW** *Chichaouadinium*. Originally *Spinidinium*, subsequently *Deflandrea*, thirdly *Spinidinium?*, fourthly (and now) *Chichaouadinium*. Taxonomic junior synonym: *Deflandrea limpida*, according to Lentin and Williams (1973, p.43). Age: late Albian–early Cenomanian.

"*victoriensis*" Cookson and Manum, 1964, p.522, pl.76, figs.3–8. Emendation: Lebedeva in Ilyina et al., 1994, p.67, as *Chatangiella victoriensis*. Holotype: Cookson and Manum, 1964, pl.76, figs.3–4; Helby et al., 1987, fig.41A. **NOW** *Chatangiella*. Originally *Deflandrea*, subsequently *Australiella*, thirdly (and now) *Chatangiella*. Age: Senonian.

"*wardenensis*" Williams and Downie, 1966c, p.233, pl.26, fig.5. Holotype: Williams and Downie, 1966c, pl.26, fig.5; Bujak et al., 1980, pl.11, fig.3. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: early Eocene.

"*warrenii*" Schumacker-Lambry, 1978, p.40–41, pl.4, figs.5–6. Holotype: Schumacker-Lambry, 1978, pl.4, fig.6. **NOW** *Cerodinium*. Originally *Deflandrea*, subsequently *Ceratiopsis* (combination illegitimate), thirdly (and now) *Cerodinium*. Age: late Paleocene (Landenian).

webbii Wrenn and Hart, 1988, p.352–353, fig.22, nos.2–4, fig.23, nos.4–5, fig.40, nos.1–4, fig.41 nos.1–4, fig.42, no.2. Holotype: Wrenn and Hart, 1988, fig.22, nos.2–4. Age: Eocene.

"?*wellingtoniana*" Tasch, 1963, p.336, pl.1, fig.9. Holotype: Tasch, 1963, pl.1, fig.9. **NOW** *Nannoceratopsiella* (Appendix A). Originally *Deflandrea?*, subsequently *Nannoceratopsiella* (Appendix A). Questionable assignment: Tasch (1963, p.336). Stover and Evitt (1978, p.265) considered this species to be based on a mineral grain. Age: Early Permian.

"*wetzeli*" Morgenroth, 1966a, p.9, pl.1, figs.4–5. Holotype: Morgenroth, 1966a, pl.1, figs.4–5. **NOW** *Lentinia?*. Originally *Deflandrea*, subsequently *Lentinia*, thirdly (and now) *Lentinia?* Age: early Eocene.

"**DELOZONOCYSTA**" Xu Jinli et al., 1997, p.116,152. **Taxonomic senior synonym:** *Tianjinella*, according to He Chengquan et al. (2009, p.126). Type: Xu Jinli et al., 1997, pl.8, figs.13a–b, as *Delozonocysta brevispinosa*.

"**brevispinosa*" Xu Jinli et al., 1997, p.116–117,153, pl.8, figs.12,13a–b,14a–b,15a–b,16–17; pl.9, figs.2,8; text-fig.12. **NOW** *Tianjinella*. Originally *Delozonocysta*, subsequently (and now) *Tianjinella*. Holotype: Xu Jinli et al., 1997, pl.8, figs.13a–b. Age: middle-late Eocene.

"*displicata*" Xu Jinli et al., 1997, p.117, pl.9, fig.7. Holotype: Xu Jinli et al., 1997, pl.9, fig.7. **Name not validly published:** no English or Latin description. **NOW** *Tianjinella*. Originally *Delozonocysta* (name not validly published), subsequently (and now) *Tianjinella*. Age: middle-late Eocene.

"*longispinosa*" Xu Jinli et al., 1997, p.117–118, pl.9, figs.1a–c,3a–b,4–6. Holotype: Xu Jinli et al., 1997, pl.9, figs.1a–c. **Name not validly published:** no English or Latin description. **NOW** *Tianjinella*. Originally *Delozonocysta* (name not validly published), subsequently (and now) *Tianjinella*. Age: middle-late Eocene.

"?*multispinosa*" Xu Jinli et al., 1997, p.118, pl.22, figs.7–8. Holotype: Xu Jinli et al., 1997, pl.22, fig.8. **Name not validly published:** no English or Latin description. **NOW** *Tetrachacysta*. Originally *Delozonocysta* (name not validly published), subsequently (and now) *Tetrachacysta*. Questionable assignment: Xu Jinli et al., (1997, p.118). Age: middle-late Eocene.

DESMOCYSTA Duxbury, 1983, p.43–44. Taxonomic junior synonym: *Klementia* (name not validly published, according to Duxbury (1983, p.44). Type: Duxbury, 1983, pl.8, fig.11; text-fig.20D, as *Desmocysta plekta*.

**plekta* Duxbury, 1983, p.45, pl.8, fig.11; text-figs.20A–D,21A–B. Holotype: Duxbury, 1983, pl.8, fig.11; text-fig.20D; Fensome et al., 1995, figs.1,7 — p.1671. Age: early–late Aptian.

simplex Duxbury, 2001, p.105–106, fig.7, nos.1–3. Holotype: Duxbury, 2001, fig.7, no.1. Age: late Hauterivian.

DESOTODINIUM De Schepper et al., 2004, p.431,433. Type: De Schepper et al., 2004, fig.7, nos.1–6, as *Desotodinium wrennii*.

**wrennii* De Schepper et al., 2004, p.633, fig.7, nos.1–16. Holotype: De Schepper et al., fig.7, nos.1–6. Age: Pliocene.

DIACANTHUM Habib, 1972, p.376. Emendation: Habib and Drugg, 1987, p.762. Taxonomic senior synonym: *Occisucysta*, according to Below (1981a, p.59) — however, Lentin and Williams (1981, p.90) retained *Diacanthum*. Type: Habib, 1972, pl.9, fig.1, as *Diacanthum hollisteri*.

argentinum Quattrocchio and Sarjeant, 1992, p.86–87(al. 2–238 — 2–239), pl.4, figs.10–13; pl.6, fig.4; text-figs.8A–B. Holotype: Quattrocchio and Sarjeant, 1992, pl.6, fig.4. Age: middle-late Tithonian.

"?*filapicatum*" (Gocht, 1970b, p.134–135, pl.26, figs.4,6–9; pl.27, figs.1–3,7; pl.28, fig.3; pl.31, figs.1–5; text-figs.2a,3–4) Stover and Evitt, 1978, p.152. Emendation: Riding and Bailey, 1991, p.101, as *Durotrigia filapicata*. Holotype: Gocht, 1970b, pl.31, fig.1. **NOW** *Durotrigia*. Originally *Gonyaulacysta*, subsequently *Diacanthum*, thirdly *Dichadogonyaulax*?, fourthly *Diacanthum*?, fifthly (and now) *Durotrigia*. Questionable assignment: Riding (1987a, p.260). Age: early Bathonian.

**hollisteri* Habib, 1972, p.376–377, pl.9, figs.1,3; pl.10, fig.1; text-fig.2. Emendation: Habib and Drugg, 1987, p.762, as *Diacanthum hollisteri*. Holotype: Habib, 1972, pl.9, fig.1; Fensome et al., 1995, fig.1 — p.1547. Originally (and now) *Diacanthum*, subsequently *Occisucysta*. Lentin and Williams (1981, p.80) retained this species in *Diacanthum*. Taxonomic senior synonym: *Gonyaulacysta* (as and now *Occisucysta*) *evittii*, according to Below (1982a, p.32–33) — however, Jan du Chêne et al. (1986b, p.122) and Habib and Drugg (1987, p.762–763) retained *Diacanthum hollisteri*. Age: ?Valanginian.

"*tenuiceras*" (Eisenack, 1958a, p.389–391 pl.21, figs.14–15; pl.22, figs.1–3; pl.24, fig.2; text-figs.4a–c,5) Stover and Evitt, 1978, p.152. Emendations: Sarjeant, 1985a, p.63,65–66, as *Acanthaulax? tenuiceras*; Jan du Chêne et al., 1986b, p.29–30, as *Tehamadinium tenuiceras*. Holotype: Eisenack, 1958a, pl.21, fig.15; Sarjeant, 1985a, pl.6, figs.1–2; text-fig.3; Jan du Chêne et al., 1986a, pl.118, fig.1; Jan du Chêne et al., 1986b, pl.24, fig.5. **NOW** *Cribroperidinium*?. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*?, thirdly *Diacanthum*, fourthly *Occisucysta*, fifthly *Acanthaulax*?, sixthly *Tehamadinium*, seventhly (and now) *Cribroperidinium*?. Taxonomic junior synonym: *Occisucysta victorii*, according to Pöthe de Baldis and Ramos (1988, p.33). Age: late Barremian–Aptian.

DICHADOGONYAULAX Sarjeant, 1966b, p.153. Emendations: Sarjeant, 1975a, p.50; Woollam, 1983, p.193; Benson, 1985, p.152. Taxonomic senior synonym: *Ctenidodinium*, according to Lentin and Williams (1973, p.46) — however, Sarjeant (1975a, p.50) and Benson (1985, p.152) retained *Dichadogonyaulax*. Taxonomic junior synonyms: *Brotzenia*, by implication in Fensome and Sarjeant (1982, p.56), who transferred the "type species" of *Brotzenia* — *Brotzenia cristata* — to *Dichadogonyaulax*; *Avellodinium*, by implication in Davey (1982b, p.26), who transferred the "type species" of *Dichadogonyaulax*, *Dichadogonyaulax* (originally *Gonyaulax*) *culmula*, to *Avellodinium* — however, Lentin and Williams (1985, p.31) retained that species in *Dichadogonyaulax* and retained *Avellodinium*. Although the "type species" was not validly transferred by Sarjeant (1966b, p.153), the generic name

Dichadogonyaulax was validly published by that author since it is based on a previously validly published species name (I.C.N. Article 40.3). Type: Norris, 1965, figs.8–9, as *Gonyaulax culmula*.

"*adela*" Fenton et al., 1980, p.155–156, pl.14, figs.1–4; text-figs.3A–B. Holotype: Fenton et al., 1980, pl.14, fig.3; text-figs.3A–B; Fensome et al., 1993a, fig.1 — p.883. **NOW** *Bradleyella*. Originally *Dichadogonyaulax*, subsequently *Ctenidodinium*, thirdly (and now) *Bradleyella*. For etymology see under *Bradleyella*. Age: late Bajocian.

bensonii Monteil, 1992a, p.274,276, pl.1, figs.1–6; pl.8, figs.5–6. Holotype: Monteil, 1992a, pl.1, figs.1–4. Age: Berriasian–early Valanginian.

?*brenneri* Poulsen, 1996, p.66, pl.14, figs.1–3. Holotype: Poulsen, 1996, pl.14, fig.1. Questionable assignment: Poulsen (1996, p.66). Age: Oxfordian–earliest Volgian.

chondra (Drugg, 1978, p.66, pl.1, figs.8–11) Courtinat, 1989, p.209. Holotype: Drugg, 1978, pl.1, fig.10. Originally *Ctenidodinium*, subsequently *Ctenidodinium?*, thirdly (and now) *Dichadogonyaulax*. Age: early Kimmeridgian.

cristata (Horowitz, 1975, p.25, pl.1, fig.8) Fensome and Sarjeant, 1982, p.56. Emendation: Wheeler and Sarjeant, 1990, p.306–307, as *Dichadogonyaulax cristata*. Holotype: Horowitz, 1975, pl.1, fig.8; Fensome et al., 1995, fig.1 — p.1479; lost according to Sarjeant (1988, p.177). Neotype: Wheeler and Sarjeant, 1990, pl.8, fig.4; text-figs.10a–b; Fensome et al., 1995, fig.1 — p.1479; designated by Wheeler and Sarjeant (1992, p.382). Originally *Brotzenia*, subsequently *Ctenidodinium?*, thirdly (and now) *Dichadogonyaulax*. Taxonomic senior synonym: *Ctenidodinium ornatum*, according to Woollam (1983, p.190) — however, Sarjeant (1988, p.180) retained *Dichadogonyaulax cristata*. Age: Late Triassic (probably not in place).

**culmula* (Norris, 1965, p.793–795, figs.1–2,6–9) Loeblich Jr. and Loeblich III, 1968, p.211. Holotype: Norris, 1965, figs.8–9. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly *Avellodinium*. Lentin and Williams (1985, p.105) and Benson (1985, p.152) retained this species in *Dichadogonyaulax*. N.I.A. Age: Portlandian.

subsp. *culmula*. Autonym. Holotype: Norris, 1965, figs.8–9.

"var. *culmula*". Autonym. Holotype: Norris, 1965, figs.8–9. **Now redundant**.

subsp. *curtospina* (Quattrocchio and Sarjeant, 1992, p.90 (al. 2–242), pl.6, figs.3,6) Lentin and Williams, 1993, p.178. Holotype: Quattrocchio and Sarjeant, 1992, pl.6, fig.6. Originally *Dichadogonyaulax culmula* var. *curtospina*, subsequently (and now) *Dichadogonyaulax culmula* subsp. *curtospina*. Age: middle-late Tithonian.

"var. *curtospina*" Quattrocchio and Sarjeant, 1992, p.90 (al. 2–242), pl.6, figs.3,6. Holotype: Quattrocchio and Sarjeant, 1992, pl.6, fig.6. **NOW** *Dichadogonyaulax culmula* subsp. *curtospina*. Originally *Dichadogonyaulax culmula* var. *curtospina*, subsequently (and now) *Dichadogonyaulax culmula* subsp. *curtospina*. Age: middle-late Tithonian.

"?*filapicata*" (Gocht, 1970b, p.134–135, pl.26, figs.4,6–9; pl.27, figs.1–3,7; pl.28, fig.3; pl.31, figs.1–5; text-figs.2a,3–4) Jan du Chêne et al., 1986a, p.11. Emendation: Riding and Bailey, 1991, p.101, as *Durotrigia filapicata*. Holotype: Gocht, 1970b, pl.31, fig.1. **NOW** *Durotrigia*. Originally *Gonyaulacysta*, subsequently *Diacanthum*, thirdly *Dichadogonyaulax?*, fourthly *Diacanthum?*, fifthly (and now) *Durotrigia*. Questionable assignment: Jan du Chêne et al. (1986a, p.11). Age: early Bathonian.

"*gochti*" Sarjeant, 1976a, p.11,13, pl.2, fig.1; pl.3, fig.4; text-figs.2A–C. Holotype: Sarjeant, 1976a, pl.2, fig.1; text-figs.2A–B. **NOW** *Korystocysta*. Originally *Dichadogonyaulax*, subsequently *Ctenidodinium*, thirdly (and now) *Korystocysta*. Taxonomic senior synonym: *Gonyaulax* (now *Korystocysta*) *pachyderma*, by implication in Conway (1990, p.35), who considered *Dichadogonyaulax* (as *Korystocysta*) *kettonensis* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Dichadogonyaulax* (as *Korystocysta*) *gochti*. Taxonomic

junior synonym: *Dichadogonyaulax* (subsequently *Korystocysta*) *kettonensis*, according to Riley and Fenton (1982, p.199) and Hengreen et al. (2000, p.50). Age: Bathonian.

irregularis Benson, 1985, p.154, pl.2, figs.5–12. Holotype: Benson, 1985, pl.2, figs.5–6. Age: Neocomian.

"*kettonensis*" Sarjeant, 1976a, p.13,15, pl.1, figs.1–2; pl.3, figs.1–2; pl.6, fig.1; text-figs.3A–D. Holotype: Sarjeant, 1976a, pl.1, figs.1–2; Fensome et al., 1995, figs.1–4 — p.1583. **NOW** *Korystocysta*. Originally *Dichadogonyaulax*, subsequently *Ctenidodinium*, thirdly (and now) *Korystocysta*. **Taxonomic senior synonym:** *Dichadogonyaulax* (now *Korystocysta*) *gochtii*, according to Riley and Fenton (1982, p.199) and Hengreen et al. (2000, p.50). Taxonomic senior synonyms: *Gonyaulax* (now *Korystocysta*) *pachyderma* and *Leptodinium* (subsequently *Korystocysta*) *norrisii*, by implication in Conway (1990, p.35), who considered *Dichadogonyaulax* (as *Korystocysta*) *kettonensis* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Korystocysta kettonensis*. Age: Bathonian.

"*norrisii*" (Pocock, 1972, p.92–93, pl.24, figs.9–12; text-fig.9) Sarjeant, 1975a, p.55. Holotype: Pocock, 1972, pl.24, fig.9; Jansonius, 1986, pl.2, figs.6–8; text-fig.5. Originally *Leptodinium*, subsequently *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly *Korystocysta*. **Taxonomic senior synonym:** *Gonyaulax* (now *Korystocysta*) *pachyderma*, according to Benson (1985, p.154). Taxonomic junior synonym: *Dichadogonyaulax* (subsequently *Korystocysta*) *kettonensis*, by implication in Conway (1990, p.35), who considered *Korystocysta kettonensis* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Dichadogonyaulax* (as *Korystocysta*) *kettonensis*. Age: Callovian.

"*pachyderma*" (Deflandre, 1939a, p.176–178, pl.7, figs.6–10; text-figs.7–10) Courtinat, 1989, p.211. Holotype: Deflandre, 1939a, pl.7, figs.6–7. **NOW** *Korystocysta*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Ctenidodinium*, fourthly *Ctenidodinium?*, fifthly (and now) *Korystocysta*, sixthly *Dichadogonyaulax*. Taxonomic junior synonyms: *Leptodinium* (as *Korystocysta*) *norrisii*, according to Benson (1985, p.154); *Dichadogonyaulax* (subsequently *Korystocysta*) *kettonensis*, by implication in Conway (1990, p.35), who considered *Dichadogonyaulax kettonensis* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Dichadogonyaulax* (as *Korystocysta*) *kettonensis*. Age: Oxfordian.

?*pannea* (Norris, 1965, p.796–798, figs.3,10–13) Sarjeant, 1969, p.14. Holotype: Norris, 1965, figs.10–12. Originally *Leptodinium*, subsequently *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly (and now) *Dichadogonyaulax?*. Benson (1985, p.152) retained this species in *Dichadogonyaulax*. Questionable assignment: Riding (1987a, p.260). This combination was not validly published in Sarjeant (1966b, p.153), since that author did not fully reference the basionym. Age: Kimmeridgian–Portlandian.

"*rotunda*" (Dodekova, 1975, p.19–20, pl.4, figs.13–14; text-fig.1) Woollam, 1983, p.193. Holotype: Dodekova, 1975, pl.4, figs.13–14; text-fig.1. **NOW** *Ctenidodinium?*. Originally *Ctenidodinium*, subsequently *Dichadogonyaulax*, thirdly (and now) *Ctenidodinium?*. Age: Bathonian.

"*schizoblata*" (Norris, 1965, p.798–800, figs.4–5,14–17) Sarjeant, 1969, p.14. Holotype: Norris, 1965, figs.5,15–17. **NOW** *Ctenidodinium?*. Originally *Leptodinium*, subsequently *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly (and now) *Ctenidodinium?*. This combination was not validly published in Sarjeant (1966b, p.153), since that author did not fully reference the basionym. Age: Portlandian.

sellwoodii Sarjeant, 1975a, p.52,55, pl.1, figs.A–H; pl.2, figs.I–K; pl.3, figs.L–Q. Holotype: Sarjeant, 1975a, pl.1, figs.A–B; pl.2, figs.I–K. Originally (and now) *Dichadogonyaulax*, subsequently *Ctenidodinium*. Lentin and Williams (1993, p.179) retained this species in *Dichadogonyaulax*. Taxonomic junior synonym: *Dichadogonyaulax stauromatos*, according to Riley and Fenton (1982, p.199) and Lentin and Williams (1993, p.179–180). Age: Bathonian.

"*stauromatos*" Sarjeant, 1976a, p.9–11, pl.2, fig.4; pl.3, figs.5–6; text-figs.1A–C. Holotype: Sarjeant, 1976a, pl.2, fig.4. Originally *Dichadogonyaulax*, subsequently *Ctenidodinium*, thirdly *Ctenidodinium?*. **Taxonomic senior synonym:** *Dichadogonyaulax* (as *Ctenidodinium*) *sellwoodii*, according to Riley and Fenton (1982, p.199) and Conway (1990, p.35). Taxonomic senior synonym: *Ctenidodinium tenellum*, according to Courtinat (1989, p.209)

— however, Lentin and Williams (1993, p.179–180) retained *Dichadogonyaulax stauromatos* as taxonomic junior synonym of *Dichadogonyaulax sellwoodii*. N.I.A. Age: Bathonian.

DICONODINIUM Eisenack and Cookson, 1960, p.3. Emendation: Morgan, 1977, p.125. Type: Deflandre and Cookson, 1955, pl.1, fig.5, as *Palaeohystrichophora multispina*.

"**acutum**" Jain and Millepied, 1973, p.30, pl.3, figs.41–42. Holotype: Jain and Millepied, 1973, pl.3, fig.41. **Taxonomic senior synonym:** *Diconodinium arcticum*, according to Morgan (1977, p.126). Age: Aptian.

"**arcticum**" Manum and Cookson, 1964, p.18–19, pl.6, figs.1–4. Holotype: Manum and Cookson, 1964, pl.6, fig.1. **NOW** *Laciniadinium*. Originally *Diconodinium*, subsequently (and now) *Laciniadinium*. Taxonomic junior synonym: *Diconodinium acutum*, according to Morgan (1977, p.126). Age: Cenomanian.

biconicum (Jin Guangxing, He Chengquan and Zhu Shenzhao in He Chengquan et al., 1989, p.62, pl.7, figs.1–6; text-fig.9) Mao Shaozhi et al., 1995, p.53. Holotype: He Chengquan et al., 1989, pl.7, fig.6; text-fig.9. Originally *Phthanoperidinium*, subsequently (and now) *Diconodinium*. Age: Early Tertiary.

brevispinum He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989, p.45–46, pl.5, fig.16; text-fig.2. Holotype: He Chengquan et al., 1989, pl.5, fig.16; text-fig.2. Mao Shaozhi et al. (1995, p.99) indicated that this name should be restricted to the holotype. Age: Early Tertiary.

?**caulleryi** Deflandre, 1935, p.229, pl.6, fig.4 ex Lentin and Williams, 1973, 46. Holotype: Deflandre, 1934, fig.7; Deflandre, 1935, pl.6, fig.4; Deflandre, 1936b, pl.5, figs.5,7. Originally *Palaeoperidinium* (name not validly published), subsequently *Diconodinium*, thirdly (and now) *Diconodinium*?. Questionable assignment: Morgan (1977, p.129). The name *Palaeoperidinium caulleryi* was not validly published in Deflandre (1935) since the generic name *Palaeoperidinium* was not validly published until 1967. The name *Diconodinium caulleryi* was not validly published in Deflandre (1966, p.4) since no holotype was indicated. A full description of this species was given in Deflandre (1936b, p.177). Age: Senonian.

cristatum Cookson and Eisenack, 1974, p.77, pl.24, figs.3–5. Emendation: Morgan, 1977, p.126. Holotype: Cookson and Eisenack, 1974, pl.24, fig.3. Age: Albian–Cenomanian.

"**dabendorfense**" (Alberti, 1961, p.5, pl.3, fig.4) Lentin and Williams, 1973, p.46. Holotype: Alberti, 1961, pl.3, fig.4. **NOW** *Luxadinium*?. Originally *Gymnodinium* (Appendix B), subsequently *Diconodinium*, thirdly (and now) *Luxadinium*?. Age: Valanginian.

davidii Morgan, 1975, p.157–159, pl.1, figs.1a–b,2a–d. Holotype: Morgan, 1975, pl.1, figs.1a–b; Helby et al., 1987, fig.29A. Originally (and now) *Diconodinium*, subsequently *Chichaouadinium*. Stover and Williams (1987, p.60) retained this species in *Diconodinium*. Age: Aptian–Albian.

"**dispersum**" (Cookson and Eisenack, 1958, p.39, pl.10, figs.12,14) Eisenack and Cookson, 1960, p.3. Emendation: Morgan, 1977, p.127, as *Diconodinium dispersum*. Holotype: Cookson and Eisenack, 1958, pl.10, fig.14; Morgan, 1977, pl.1, figs.2a–b. Originally *Palaeohystrichophora*, subsequently *Diconodinium*. **Taxonomic senior synonym:** *Palaeohystrichophora* (as and now *Diconodinium*) *multispina*, according to Stover and Helby (1987a, p.103). Age: Albian–Cenomanian.

distinctum Jain and Millepied, 1975, p.154–155, pl.6, figs.98–99. Holotype: Jain and Millepied, 1975, pl.6, fig.98. Age: Campanian–Maastrichtian.

ellipticum He Chengquan and Huang Guanjun, 1997, p.33–34,38, pl.1, fig.16. Holotype: He Chengquan and Huang Guanjun, 1997, pl.1, fig.16. Age: Callovian.

?**fehmarne** (Morgenroth, 1966a, p.4–5, pl.1, fig.1) Lentin and Williams, 1973, p.46. Holotype: Morgenroth, 1966a, pl.1, fig.1. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Diconodinium*?. Questionable assignment: Lentin and Williams (1973, p.46). Age: early Eocene.

"firmum" Harland, 1973, p.669–670, pl.84, figs.8–9,15; text-fig.6. Holotype: Harland, 1973, pl.84, fig.8. **NOW** *Laciniadinium*. Originally *Diconodinium*, subsequently (and now) *Laciniadinium*. Age: late Campanian.

?**glabrum** Eisenack and Cookson, 1960, p.3–4, pl.1, fig.11. Holotype: Eisenack and Cookson, 1960, pl.1, fig.11; Morgan, 1977, pl.2, figs.4a–c. Originally *Diconodinium*, subsequently (and now) *Diconodinium?*. Questionable assignment: Morgan (1977, p.129). Age: late Albian–Cenomanian.

gracile Oleinik, 1975, p.224–225, pl.1, figs.1–2. Holotype: Oleinik, 1975, pl.1, figs.1–2. Age: late Eocene–late Oligocene.

"inequicornutum" Balteş, 1971, p.5, pl.1, figs.8–12; pl.2, figs.1–3 ex Stover and Evitt, 1978, p.180. Holotype: Balteş, 1971, pl.2, fig.2; Fensome et al., 1996, fig.5 — p.2161; designated by Stover and Evitt (1978, p.180) as a lectotype. **NOW** *Komewuia*. Originally *Diconodinium* (name not validly published), subsequently *Pontiadinium*, thirdly (and now) *Komewuia*. This name was not validly published in Balteş (1971) since that author did not designate a holotype. Age: early Pliocene.

"inflatum" Eisenack and Cookson, 1960, p.4, pl.1, figs.12–13. Emendation: Morgan, 1977, p.136, as *Laciniadinium? inflatum*. Holotype: Eisenack and Cookson, 1960, pl.1, fig.13; Morgan, 1977, pl.2, figs.5a–c. **NOW** *Laciniadinium?*. Originally *Diconodinium*, subsequently (and now) *Laciniadinium?*. Age: late Albian–Cenomanian.

longicorne Olaru, 1978a, p.89, pl.12, fig.6. Holotype: Olaru, 1978a, pl.12, fig.6; Olaru, 1978b, pl.1, fig.2 (not 3). Olaru (1978b, p.38) also cited this species as new. Age: Campanian.

lurense Guerstein et al., 2005, p.333,335, figs.3A–C,4A–I,5A–I. Holotype: Guerstein et al., 2005, figs.3A,4A. Age: late Maastrichtian to Danian.

martianum Srivastava, 1995, p.286, pl.14, figs.1–10. Holotype: Srivastava, 1995, pl.14, figs.1–2. Age: Campanian.

micropunctatum Backhouse, 1988, p.84, pl.25, figs.10a–b,11; pl.26, figs.1a–b. Holotype: Backhouse, 1988, pl.26, figs.1a–b; Fensome et al., 1996, figs.3–4 — p.2227. Age: early Aptian.

minutum (Deflandre and Cookson, 1955, p.257, text-fig.4) Deflandre and Deflandre-Rigaud, 1966, fiche 2967. Holotype: Deflandre and Cookson, 1955, text-fig.4. Originally *Palaeohystrichophora*, subsequently (and now) *Diconodinium*. Taxonomic junior synonym: *Deflandrea* (as *Alterbia*; now *Isabelidinium*) *balmei*, according to Morgan (1977, p.130) — however, Lentin and Williams (1981, p.156) retained *Deflandrea* (as *Isabelidinium*) *balmei*. Age: Santonian.

***multispinum** (Deflandre and Cookson, 1955, p.257, pl.1, fig.5) Eisenack and Cookson, 1960, p.3. Emendation: Morgan, 1977, p.127–128, as *Diconodinium multispinum*. Holotype: Deflandre and Cookson, 1955, pl.1, fig.5; Morgan, 1977, pl.1, figs.1a–b. Originally *Palaeohystrichophora*, subsequently (and now) *Diconodinium*. Taxonomic junior synonyms: *Palaeohystrichophora* (as *Diconodinium*) *dispersa*, according to Stover and Helby (1987a, p.103); *Diconodinium pusillum*, according to Morgan (1977, p.127) — however, Below (1981a, p.124) retained *Diconodinium pusillum*. Age: Santonian.

"parvum" Wilson in Aurisano, 1984, p.5. **Name not validly published**: no description. Aurisano (1984, p.5) named *Diconodinium wilsonii* on the similarity (but not expressly the synonymy) between his new species and Wilson's unpublished species. *Diconodinium parvum* presumably equates with *Biconidinium parvum*, another thesis name, effectively published by Slimani (2001a, p.192), which Slimani synonymized with *Diconodinium wilsonii*.

paucigranulatum Burger, 1980a, p.86, pl.44, figs.1–3. Holotype: Burger, 1980a, pl.44, fig.3. Age: Aptian.

pelliferum (Cookson and Eisenack, 1958, p.38, pl.10, fig.11) Eisenack and Cookson, 1960, p.3. Emendation: Morgan, 1977, p.128, as *Diconodinium pelliferum*. Holotype: Cookson and Eisenack, 1958, pl.10, fig.11; Morgan, 1977, pl.1, figs.7a–b. Originally *Palaeohystrichophora*, subsequently (and now) *Diconodinium*. Age: Albian.

psilatum Morgan, 1977, p.128, pl.1, fig.5. Holotype: Morgan, 1977, pl.1, fig.5. Age: Albian–Maastrichtian.

pusillum Singh, 1971, p.383–384, pl.68, figs.5–8. Holotype: Singh, 1971, pl.68, fig.5. Taxonomic senior synonym: *Palaeohystrichophora* (as *Diconodinium*) *multispina*, according to Morgan (1977, p.127) — however, Below (1981a, p.124) retained *Diconodinium pusillum*. Age: middle-late Albian.

"***rhombiforme***" Vozzhennikova, 1967, p.50, pl.7, figs.1–4; pl.15, fig.5. Emendation: Lentin and Vozzhennikova, 1990, p.57–58, as *Laciniadinium rhombiforme*. Holotype: Vozzhennikova, 1967, pl.7, fig.3; pl.15, fig.5, lost according to Lentin and Vozzhennikova (1990, p.57). Neotype: Vozzhennikova, 1967, pl.7, fig.2; Lentin and Vozzhennikova, 1990, pl.10, figs.4–5; text-fig.29; designated by Lentin and Vozzhennikova (1990, p.57). **NOW** *Laciniadinium*. Originally *Diconodinium*, subsequently *Diconodinium?*, thirdly (and now) *Laciniadinium*. Questionable assignment: Morgan (1977, p.129). Age: Turonian.

sinense He Chengquan, 1991, p.174, pl.2, figs.1–4. Holotype: He Chengquan, 1991, pl.2, fig.3. Age: Cenomanian–Paleocene.

"***tenuistriatum***" Eisenack and Cookson, 1960, p.4, pl.1, figs.14–16. Holotype: Eisenack and Cookson, 1960, pl.1, figs.14–15; Morgan, 1977, pl.2, figs.3a–b. **NOW** *Laciniadinium*. Originally *Diconodinium*, subsequently (and now) *Laciniadinium*. Age: late Albian–Cenomanian.

ventriosum (Alberti, 1961, p.5–6, pl.3, fig.5) Lentin and Williams, 1973, p.47. Holotype: Alberti, 1961, pl.3, fig.5. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Diconodinium*. Morgan (1977, p.130) stated that *Gymnodinium ventriosum* was transferred to *Subtilisphaera* Jain and Millepied, 1973, by Jain and Millepied (1973, p.27); however, we have been unable to verify this. Age: Turonian.

vitricorne Roncaglia et al., 1999, p.303,305, fig.16, nos.1–5. Holotype: Roncaglia et al., 1999, fig.16, nos.1–2. Roncaglia et al. cited the epithet as "*vitricornu*", a compound of two Latin nouns, "*vitrum*" and "*cornu*". Since, in botanical tradition (Nicolson, 1986), compound epithets generally are made to agree with the gender of the generic name, we cite the specific epithet as "*vitricorne*". Age: Campanian.

wilsonii Aurisano, 1984, p.3,5, figs.4A–D. Holotype: Aurisano, 1984, figs.4A–C. Taxonomic junior synonym: *Biconodinium parvum* (name not validly published), according to Slimani (2001a, p.192). See also *Diconodinium parvum*. Age: late Campanian–latest Maastrichtian.

"**DICTYOPYXIDIA**" Eisenack, 1961, p.316. Substitute name for *Dictyopyxis* Cookson and Eisenack, 1960b (March), p.255 (an illegitimate name). **Taxonomic senior synonym:** *Ellipsoidictyum*, according to Sarjeant (1976a, p.23). Type: Cookson and Eisenack, 1960b, pl.39, fig.12, as *Dictyopyxis areolata*.

"***areolata***" (Cookson and Eisenack, 1960b, p.255, pl.39, figs.12–14) Eisenack and Kjellström, 1972, p.347. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.12. Originally *Dictyopyxis*, subsequently *Dictyopyxidia*. **Taxonomic senior synonym:** *Ellipsoidictyum cinctum*, according to Sarjeant (1976a, p.23–24). Age: Oxfordian–early Kimmeridgian.

"***circulata***" Clarke and Verdier, 1967, p.67–68, pl.1, fig.11; pl.2, fig.3; text-fig.28. Holotype: Clarke and Verdier, 1967, pl.1, fig.11. **NOW** *Elytrocysta*. Originally *Dictyopyxidia*, subsequently *Ellipsoidictyum*, thirdly (and now) *Elytrocysta*. Age: Cenomanian–Santonian.

"***imperfecta***" Brideaux and McIntyre, 1975, p.25–26, pl.7, figs.1–5. Holotype: Brideaux and McIntyre, 1975, pl.7, figs.1–3. **NOW** *Ellipsoidictyum*. Originally *Dictyopyxidia*, subsequently (and now) *Ellipsoidictyum*. Age: early–middle Albian.

"***punctata***" Jain, 1977b, p.186–187, pl.4, figs.51–52. Holotype: Jain, 1977b, pl.4, fig.51. **NOW** *Ellipsoidictyum*. Originally *Dictyopyxidia*, subsequently (and now) *Ellipsoidictyum*. Age: early Albian.

"reticulata" (Valensi, 1953, p.28, pl.2, figs.4–5,14,19; pl.13, fig.6; text-fig.2d ex Sarjeant, 1968, p.230) Lentin and Williams, 1973, p.47. Holotype: Valensi, 1953, pl.2, figs.4–5; Fauconnier and Masure, 2004, pl.28, figs.1–4. **NOW** *Epiplosphaera*. Originally *Palaeoperidinium* (name not validly published), subsequently *Dictyopyxis* (generic name illegitimate), thirdly *Dictyopyxidida*, fourthly *Ellipsoidictyum*, fifthly (and now) *Epiplosphaera*. Taxonomic senior synonym: *Epiplosphaera bireticulata*, by implication in Courtinat (1989, p.176), who believed *Palaeoperidinium* (as *Epiplosphaera*) *reticulatum* to be the senior name — however, Poulsen (1992a, p.66) retained the two species. Age: Bajocian.

"DICTYOPYXIS" Cookson and Eisenack, 1960b, p.255. **Name illegitimate** — **senior homonym:** *Dictyopyxis* Ehrenberg, 1844b. Substitute name: *Dictyopyxidida*. **Taxonomic senior synonym:** *Ellipsoidictyum*, according to Sarjeant (1976a, p.23). Type: Cookson and Eisenack, 1960b, pl.39, fig.12, as *Dictyopyxis areolata*.

"*areolata" Cookson and Eisenack, 1960b, p.255, pl.39, figs.12–14. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.12. Originally *Dictyopyxis* (generic name illegitimate), subsequently *Dictyopyxidida*. **Taxonomic senior synonym:** *Ellipsoidictyum cinctum*, according to Sarjeant (1976a, p.23–24). Following I.C.N. Article 55.1, the species name *Dictyopyxis areolata* is validly published even though the generic name *Dictyopyxis* is illegitimate. Age: Oxfordian–early Kimmeridgian.

"circulata" Habib, 1972, p.368. **Name not validly published:** no description or illustration.

"elliptica" Ott in Riding and Helby, 2001f, p.170. **Name not validly published:** no description. **Taxonomic senior synonym:** *Striatodinium ottii*, according to Riding and Helby (2001f, p.170).

"reticulata" Valensi, 1953, p.28, pl.2, figs.4–5,14,19; pl.13, fig.6; text-fig.2d ex Sarjeant, 1968, p.230. Holotype: Valensi, 1953, pl.2, figs.4–5; Fauconnier and Masure, 2004, pl.28, figs.1–4. **NOW** *Epiplosphaera*. Originally *Palaeoperidinium* (name not validly published), subsequently *Dictyopyxis* (generic name illegitimate), thirdly *Dictyopyxidida*, fourthly *Ellipsoidictyum*, fifthly (and now) *Epiplosphaera*. Taxonomic senior synonym: *Epiplosphaera bireticulata*, by implication in Courtinat (1989, p.176), who believed *Palaeoperidinium* (as *Epiplosphaera*) *reticulatum* to be the senior name — however, Poulsen (1992a, p.66) retained the two species. The name *Palaeoperidinium reticulatum* was not validly published in Valensi (1953) since the generic name *Palaeoperidinium* was not validly published until 1967. Following I.C.N. Article 55.1, the species name *Dictyopyxis reticulata* is validly published even though the generic name *Dictyopyxis* is illegitimate. Age: Bajocian.

"DIMIDIADINIUM" Brideaux, 1977, p.37. **Taxonomic senior synonym:** *Tubotuberella*, by implication in Sarjeant (1982b, p.42), who retained the type of the genus in *Tubotuberella*. Type: Sarjeant, 1968, pl.3, fig.8; text-fig.3, as *Gonyaulacysta dangeardii*.

"*dangeardii" (Sarjeant, 1968, p.226–227, pl.1, fig.21; pl.3, figs.8,15; text-fig.3) Brideaux, 1977, p.37. Emendation: Sarjeant, 1982b, p.42–43, as *Tubotuberella dangeardii*. Holotype: Sarjeant, 1968, pl.3, fig.8; text-fig.3; Sarjeant, 1982b, text-figs.5c–d; Jan du Chêne et al., 1986a, pl.127, figs.4–7; Fensome et al., 1993a, figs.1,3–4 — p.1089; figs.1,4–5 — p.1093. **NOW** *Tubotuberella*. Originally *Gonyaulacysta*, subsequently *Dimidiadinium*, thirdly (and now) *Tubotuberella*. Age: Oxfordian.

"sphaerocephalum" (Vozzhennikova, 1967, p.181, pl.103, figs.1a–b,2,3a–b; pl.104, figs.4,5a–b) Brideaux, 1977, p.38. Holotype: Vozzhennikova, 1967, pl.103, fig.2; Lentin and Vozzhennikova, 1990, text-fig.55; lost according to Lentin and Vozzhennikova (1990, p.98). Originally *Tubotuberella*, subsequently *Dimidiadinium*. **Taxonomic senior synonym:** *Gonyaulax* (as and now *Gonyaulacysta*) *eisenackii*, according to Sarjeant (1982b, p.32). Brenner (1988, p.93) considered *Leptodinium* (now *Tubotuberella*) *egemenii* and *Gonyaulacysta* (now *Tubotuberella*) *vozhennikovae*, to be questionable taxonomic junior synonyms of this species. According to Lentin and Vozzhennikova (1990, p.98), no potential lectotype is available. Age: Late Jurassic.

"uncinatum" Brideaux, 1977, p.38–39, pl.15, figs.2–5,7–8. Holotype: Brideaux, 1977, pl.15, figs.2–5; Jan du Chêne et al., 1986a, pl.127, figs.1–3. **NOW** *Tubotuberella*. Originally *Dimidiadinium*, subsequently (and now) *Tubotuberella*. Age: Hauterivian–Barremian.

DIMIDIUM Pearce, 2010, p.56–57. Type: Clarke and Verdier, 1967, pl.4, figs.11–13, as *Gonyaulacysta striata*.

**striata* (Clarke and Verdier, 1967, p.31, pl.4, figs.11–13; pl.5, fig.15; text-fig.12) Pearce, 2010, p.57. Holotype: Clarke and Verdier, 1967, pl.4, figs.11–13, Jan du Chêne et al., 1986a, pl.88, figs.9–11. Originally *Gonyaulacysta*, subsequently *Leptodinium*, thirdly *Impagidinium*, fourthly *Pterodinium*, fifthly (and now) *Dimidium*. Age: Santonian.

DIMORPHOSPHAERA Keupp, 1979a, p.21. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1299). Type: Keupp, 1979a, pl.3, figs.1–2, as *Dimorphosphaera aequatoriana*.

**aequatoriana* Keupp, 1979a, p.21,23, pl.3, figs.1–3. Holotype: Keupp, 1979a, pl.3, figs.1–2. Taxonomic junior synonym: *Dimorphosphaera pogonias*, according to Keupp (1981, p.26). Age: early Barremian.

"*pogonias*" Keupp, 1979c, p.658,660, pl.6, figs.13–15. Holotype: Keupp, 1979c, pl.6, figs.13–15. **Taxonomic senior synonym:** *Dimorphosphaera aequatoriana*, according to Keupp (1981, p.26). Age: middle Barremian.

DINAURELIA Wille and Gocht, 1985, p.129–131,133–135. Taxonomic senior synonym: *Rosswangia*, according to Below (1987b, p.29) — however, Stover and Williams (1987, p.79) retained *Dinaurelia*. Type: Wille and Gocht, 1985, pl.1, figs.1a–d, as *Dinaurelia pyrgos*.

**pyrgos* Wille and Gocht, 1985, p.129–131,133–135, pl.1, figs.1a–d,2–3; pl.2, figs.1a–d,2a–b,3,4a–b; pl.3, figs.1a–b,2–5; pl.4, figs.1a–b,2,3a–c,4a–b,5; pl.5, figs.1a–b; text-figs.1A–C,2A–B,3A–B,4A–B,5A–B,6B. Holotype: Wille and Gocht, 1985, pl.1, figs.1a–d; text-figs.2A–B; Fensome et al., 1995, figs.1–4,10 — p.1719. Originally (and now) *Dinaurelia*, subsequently *Rosswangia*. N.I.A. Age: late Bajocian.

DINGODINIUM Cookson and Eisenack, 1958, p.39. Emendations: Mehrotra and Sarjeant, 1984b, p.295; Stover and Helby (1987d, p.281) as a revised description. Taxonomic junior synonym: *Parvocavatus*, according to Fisher and Riley (1980, p.319–320). Type: Cookson and Eisenack, 1958, pl.1, fig.10, as *Dingodinium jurassicum*.

"*albertii*" Sarjeant, 1966c, p.210–211, pl.21, fig.3; pl.23, fig.1. Holotype: Sarjeant, 1966c, pl.21, fig.3. **Taxonomic senior synonym:** *Dingodinium cerviculum*, according to Haskell (1970, p.60) and Khowaja-Ateequzzaman et al. (1990, p.274). Questionable assignment: Sarjeant (1966c, p.210); however, Duxbury (1977, p.29) retained this species in *Dingodinium* without question. Age: early Barremian.

cerviculum Cookson and Eisenack, 1958, p.40, pl.1, figs.12–14. Emendations: Mehrotra and Sarjeant, 1984b, p.296–300; Khowaja-Ateequzzaman et al., 1990, p.274. Holotype: Cookson and Eisenack, 1958, pl.1, fig.14. Taxonomic junior synonym: *Dingodinium? albertii*, according to Haskell (1970, p.60) and Khowaja-Ateequzzaman et al. (1990, p.274). Age: late Neocomian–Aptian.

?*cooksoniae* Pocock, 1972, p.99, pl.23, fig.9; text-fig.16. Holotype: Pocock, 1972, pl.23, fig.9; Jansonius, 1986, pl.5, figs.4–5; text-fig.7. Originally *Dingodinium*, subsequently (and now) *Dingodinium?*. Questionable assignment: Jansonius (1986, p.207). Age: Oxfordian–Kimmeridgian.

europaeum Eisenack, 1958a, p.392–393, pl.24, fig.4. Emendation: Sarjeant, 1985a, p.85,87. Holotype: Eisenack, 1958a, pl.24, fig.4. Age: late Aptian.

?*exiguum* Lentin and Williams, 1981, p.84. Holotype: Jiabo, 1978, pl.6, fig.11. Originally *Dingodinium minutum* (name illegitimate), subsequently *Dingodinium exiguum*, thirdly (and now) *Dingodinium? exiguum*. Questionable assignment: Stover and Helby (1987d, p.282). Substitute name for *Dingodinium minutum* Jiabo, 1978, p.87, pl.6, fig.11 (an illegitimate name). Age: Early Tertiary.

harsveldtii Herngreen et al., 1984, p.8,10–11, pl.1, figs.4–8. Holotype: Herngreen et al., 1984, pl.1, figs.4–5. Age: middle Callovian–?Portlandian.

**jurassicum* Cookson and Eisenack, 1958, p.39, pl.1, figs.10–11. Holotype: Cookson and Eisenack, 1958, pl.1, fig.10; Helby et al., 1987, fig.18F. Age: Late Jurassic.

?*magnum* Jiabo, 1978, p.87, pl.6, fig.21. Holotype: Jiabo, 1978, pl.6, fig.21. Originally *Dingodinium*, subsequently (and now) *Dingodinium*?. Questionable assignment: Stover and Helby (1987d, p.282). Age: Early Tertiary.

minutum Dodekova, 1975, p.25, pl.5, figs.13–15. Emendation: Poulsen, 1996, p.82. Holotype: Dodekova, 1975, pl.5, figs.13–15. Junior homonym: *Dingodinium minutum* Jiabo, 1978. Taxonomic junior synonym: *Dingodinium scabratum*, according to Poulsen (1996, p.82). Age: late Bathonian.

"*minutum*" Jiabo, 1978, p.87, pl.6, fig.11. Holotype: Jiabo, 1978, pl.6, fig.11. **Name illegitimate** — **senior homonym**: *Dingodinium minutum* Dodekova, 1975. **Substitute name**: *Dingodinium? exiguum*. Originally *Dingodinium minutum* Jiabo, 1978 (name illegitimate), subsequently *Dingodinium exiguum*, thirdly (and now) *Dingodinium? exiguum*. Age: Early Tertiary.

?*ovatum* Jiabo, 1978, p.87, pl.6, fig.18. Holotype: Jiabo, 1978, pl.6, fig.18. Originally *Dingodinium*, subsequently (and now) *Dingodinium*?. Questionable assignment: Stover and Helby (1987d, p.282). Age: Early Tertiary.

"*pakistanicum*" Beju, 1978, p.4. **Name not validly published**: no description or illustration.

sanmartinoi Pöthe de Baldis and Ramos, 1983, p.437–438, pl.2, figs.1–2. Holotype: Pöthe de Baldis and Ramos, 1983, pl.2, figs.1–2. Age: early Aptian.

"*scabratum*" (Kumar, 1986b, p.399, pl.5, fig.3; pl.6, figs.4,6; text-fig.9) Lentin and Williams, 1989, p.111. Holotype: Kumar, 1986b, pl.6, fig.6. Originally *Parvocavatus*, subsequently *Dingodinium*. **Taxonomic senior synonym**: *Dingodinium minutum* Dodekova, according to Poulsen (1996, p.82). Age: Kimmeridgian–Tithonian.

?*spinosum* (Duxbury, 1977, p.46–47, pl.9, fig.3; text-fig.17) Davey, 1979c, p.60. Holotype: Duxbury, 1977, pl.9, fig.3; text-fig.17. Originally *Parvocavatus*, subsequently *Dingodinium*, thirdly (and now) *Dingodinium*?. Questionable assignment: Stover and Helby (1987d, p.282). This combination, as "*Dingodinium spinatum*", was not validly published in Fisher and Riley (1976, p.52), since these authors did not fully reference the basionym. Age: late Berriasian.

subtile Pestchevitskaya, 2006, p.S644–645, pl.7, figs.2,6–8,10–11; text-fig.3E. Holotype: Pestchevitskaya, 2006, pl.7, fig.2. Age: Berriasian–early Valanginian.

swanense Stover and Helby, 1987a, p.104–105,107, figs.3A–H. Holotype: Stover and Helby, 1987a, figs.3A–B; Fensome et al., 1996, figs.1–2 — p.2393. Age: Kimmeridgian.

tuberosum (Gitmez, 1970, p.307–308, pl.6, fig.9; text-fig.31) Fisher and Riley, 1980, p.319–320. Emendation: Poulsen, 1996, p.83, as *Dingodinium tuberosum*. Holotype: Gitmez, 1970, pl.6, fig.9; text-fig.31. Originally *Parvocavatus*, subsequently (and now) *Dingodinium*, thirdly *Dingodinium*?. Questionable assignment: Stover and Helby (1987d, p.282) — however, Poulsen (1996, p.83) retained this species in *Dingodinium* without question. This combination was not validly published in Fisher and Riley (1976, p.52), since these authors did not fully reference the basionym. Age: early Kimmeridgian.

DINOGYMNIOPSIS Gao Ruiqi et al., 1992a, p.18–19,24–25. Type: Gao Ruiqi et al., 1992a, pl.1, fig.10, as *Dinogymniopsis minor*.

daqingensis Gao Ruiqi et al., 1992b, p.50–51,61–62, pl.9, figs.15–24 ex He Chengquan et al., 2009, p.344. Holotype: Gao Ruiqi et al., 1992b, pl.9, fig.17, designated by He Chengquan et al. (2009, p.344). This name was not validly published in Gao Ruiqi et al. (1992b) as no holotype was designated. Age: Late Cretaceous.

"*granulata*" (Jiabo, 1978, p.94, pl.6, figs.7–8) Gao Ruiqi et al., 1992a, p.19,25. Holotype: Jiabo, 1978, pl.6, fig.7. **NOW** *Tetrachacysta*. Originally *Dinogymnium*, subsequently *Microdinium*, thirdly *Dinogymniopsis*, fourthly (and now) *Tetrachacysta*. Age: Early Tertiary.

**minor* Gao Ruiqi et al., 1992a, p.19,25–26, pl.1, figs.10–16. Holotype: Gao Ruiqi et al., 1992a, pl.1, fig.10. Age: Campanian.

"*spinulosa*" Gao Ruiqi et al., 1992a, p.19–20,26, pl.1, figs.7–8. **NOW** *Tetrachacysta*. Originally *Dinogymniopsis*, subsequently (and now) *Tetrachacysta*. Holotype: Gao Ruiqi et al., 1992a, pl.1, fig.7. Age: Cenomanian.

torosa Gao Ruiqi et al., 1992a, p.20,26–27, pl.1, fig.9. Holotype: Gao Ruiqi et al., 1992a, pl.1, fig.9. Age: Campanian.

"*tuberculata*" Gao Ruiqi et al., 1992a, p.20,27, pl.1, figs.5–6. Holotype: Gao Ruiqi et al., 1992a, pl.1, fig.5. **NOW** *Tetrachacysta*. Originally *Dinogymniopsis*, subsequently (and now) *Tetrachacysta*. Age: Cenomanian.

DINOGYMNIUM Evitt et al., 1967, p.4–8. Emendation: Lentin and Vozzhennikova, 1990, p.14. Type: Evitt et al., 1967, pl.1, figs.21–23; pl.2, fig.5; text-figs.16–18, as *Dinogymnium acuminatum*.

**acuminatum* Evitt et al., 1967, p.8–16, pls.1–2; pl.3, figs.1–8,10,12,20; text-figs.11–23. Holotype: Evitt et al., 1967, pl.1, figs.21–23; pl.2, fig.5; text-figs.16–18. Taxonomic junior synonyms: *Gymnodinium* (subsequently *Dinogymnium*) *kasachstanicum* and *Dinogymnium microgranulosum*, both according to Lentin and Vozzhennikova (1990, p.15). Age: Maastrichtian.

aerlicum Londeix et al., 1996, p.380, pl.1, figs.10a–c,11a–c; text-figs.7E–F. Holotype: Londeix et al., 1996, pl.1, figs.11a–c; text-fig.7E. Age: late Berriasian.

albertii Clarke and Verdier, 1967, p.33, pl.17, figs.3–4; text-fig.13. Holotype: Clarke and Verdier, 1967, pl.17, fig.3–4. Age: Santonian.

"?*amphidoxosum*" Jiabo, 1978, p.93, pl.6, fig.2. Holotype: Jiabo, 1978, pl.6, fig.2. **NOW** *Tetrachacysta*. Originally *Dinogymnium?*, subsequently *Microdinium*, thirdly (and now) *Tetrachacysta*. Questionable assignment: Jiabo (1978, p.93). Age: Early Tertiary.

"*assamicum*" Jain et al., 1975, p.4, pl.2, figs.28–29. Holotype: Jain et al., 1975, pl.2, fig.28. **NOW** *Alisogymnium*. Originally *Dinogymnium*, subsequently (and now) *Alisogymnium*. Taxonomic senior synonym: *Gymnodinium* (as *Dinogymnium*) *sphaerocephalum*, according to Jain (1977a, p.133–134) — however, Lentin and Vozzhennikova (1990, p.28) retained *Gymnodinium* (as *Alisogymnium*) *assamicum*. Age: Maastrichtian.

avellana (Lejeune-Carpentier, 1951, p.B309; text-fig.3) Evitt et al., 1967, p.16–17. Emendation: Lejeune-Carpentier and Sarjeant, 1983, p.10–11. Holotype: Lejeune-Carpentier, 1951, text-fig.3; Streel et al., 1977, pl.2, fig.7. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Boltenhagen (1977, p.76) also proposed this combination. N.I.A. Age: Maastrichtian.

biconicum Jain and Millepied, 1975, p.136, pl.1, figs.3–4. Holotype: Jain and Millepied, 1975, pl.1, fig.4. Age: Campanian–Maastrichtian.

"*cavituberculatum*" Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.66–67, pl.7, figs.11–12. Holotype: Liu Zhili et al., 1992, pl.7, fig.11. **Taxonomic senior synonym:** *Tetrachacysta tuberculata*, according to He Chengquan et al. (2009, p.377). Age: Early Tertiary.

"*cerviculum*" Cookson and Eisenack, 1970a, p.138, pl.10, fig.6. Holotype: Cookson and Eisenack, 1970a, pl.10, fig.6; Lentin and Vozzhennikova, 1990, Appendix A, fig.34. **NOW** *Alisogymnium*. Originally *Dinogymnium*, subsequently (and now) *Alisogymnium*. Age: Senonian.

"*cooksoniae*" Boltenhagen, 1977, p.75–76, pl.11, figs.5a–c,6–7. Holotype: Boltenhagen, 1977, pl.11, figs.5a–c; Lentin and Vozzhennikova, 1990, Appendix A, fig.40. **NOW** *Amphigymnium*. Originally *Dinogymnium*, subsequently (and now) *Amphigymnium*. Age: Campanian.

cretaceum (Deflandre, 1936b, p.164–165, pl.2, figs.1–3) Evitt et al., 1967, p.17–18. Holotype: Deflandre, 1934, figs.9–10; Deflandre, 1935, pl.5, figs.6–7; text-figs.4–5; Deflandre, 1936b, pl.2, figs.1–2. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Age: ?Senonian.

"subsp. *undulacostatum*" (Boltenhagen, 1977, p.68–69, pl.10, figs.1a–c,2a–b,3a–b,4a–b,5a–b) Lentin and Williams, 1981, p.85. **Combination not validly published**: holotype not designated. Originally *Dinogymnium cretaceum* var. *undulacostatum* (name not validly published), subsequently *Dinogymnium cretaceum* subsp. *undulacostatum* (combination not validly published). Age: Turonian–Maastrichtian.

"var. *undulacostatum*" Boltenhagen, 1977, p.68–69, pl.10, figs.1a–c,2a–b,3a–b,4a–b,5a–b. **Name not validly published**: holotype not designated. Originally *Dinogymnium cretaceum* var. *undulacostatum* (name not validly published), subsequently *Dinogymnium cretaceum* subsp. *undulacostatum* (combination not validly published). Age: Turonian–Maastrichtian.

"*curvatum*" (Vozzhennikova, 1967, p.43, pl.1, figs.10–12; pl.4, figs.2–3) Lentin and Williams, 1973, p.48. Holotype: Vozzhennikova, 1967, pl.1, fig.10; Lentin and Vozzhennikova, 1990, text-fig.5b; lost according to Lentin and Vozzhennikova (1990, p.18). Originally *Gymnodinium* (Appendix B), subsequently *Dinogymnium*. **Taxonomic senior synonym**: *Gymnodinium* (as *Dinogymnium*) *longicorne*, according to Lentin and Vozzhennikova (1990, p.18). Boltenhagen (1977, p.69) also proposed this combination. Age: Senonian.

decorum (Deflandre, 1943, p.503–504, pl.17, fig.2; text-figs.8–9) Evitt et al., 1967, p.18. Holotype: Deflandre, 1943, pl.17, fig.2; text-figs.8–9. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Age: Senonian.

"*deflandrei*" Boltenhagen, 1977, p.67–68, pl.9, figs.1b–c,2a–b,3a–b,4a–b. Holotype: Boltenhagen, 1977, pl.9, figs.1b–c; Lentin and Vozzhennikova, 1990, Appendix A, fig.31. **NOW** *Alisogymnium*. Originally *Dinogymnium*, subsequently (and now) *Alisogymnium*. Age: late Senonian.

denticulatum (Alberti, 1961, p.5, pl.3, figs.2–3) Evitt et al., 1967, p.18. Holotype: Alberti, 1961, pl.3, fig.2. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Herngreen (1975, p.63) implied that *Dinogymnium undulosum* is a possible taxonomic junior synonym of this species. Boltenhagen (1977, p.73) also proposed this combination. Age: Senonian.

digitus (Deflandre, 1936b, p.166–167, pl.2, figs.4–5) Evitt et al., 1967, p.18–19. Holotype: Deflandre, 1935, text-figs.7–8; Deflandre, 1936b, pl.2, figs.4–5. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. N.I.A. Age: Senonian.

subsp. *crassum* (Vozzhennikova, 1967, p.44, pl.5, figs.3,9–10) Lentin and Williams, 1973, p.49. Holotype: Vozzhennikova, 1967, pl.5, fig.9; Lentin and Vozzhennikova, 1990, text-fig.3; lost according to Lentin and Vozzhennikova (1990, p.16). Originally *Gymnodinium digitus* var. *crassum* (Appendix B), subsequently (and now) *Dinogymnium digitus* subsp. *crassum*. Age: Turonian.

subsp. *digitus*. Autonym. Holotype: Deflandre, 1935, text-figs.7–8; Deflandre, 1936b, pl.2, figs.4–5. N.I.A.

"var. *indicum*" Jain et al., 1975, p.5, pl.1, fig.7; pl.2, figs.18–19. **Name not validly published**: holotype not designated. Age: Maastrichtian.

"*downiei*" Boltenhagen, 1977, p.77–78, pl.11, figs.8a–c,9a–b,10. Holotype: Boltenhagen, 1977, pl.11, figs.8a–c; Lentin and Vozzhennikova, 1990, Appendix A, fig.36. **NOW** *Alisogymnium*. Originally *Dinogymnium*, subsequently (and now) *Alisogymnium*. Age: Campanian–Maastrichtian.

- "elongatum"** May, 1977, p.112,114, pl.2, figs.11–12. Holotype: May, 1977, pl.2, figs.11–12. **NOW** *Yolkinigymnium*. Originally *Dinogymnium*, subsequently (and now) *Yolkinigymnium*. Age: late Campanian–early Maastrichtian.
- "euclaense"** Cookson and Eisenack, 1970a, p.139, pl.10, figs.9–12. Holotype: Cookson and Eisenack, 1970a, pl.10, fig.12; Lentin and Vozzhennikova, 1990, Appendix A, fig.35. **NOW** *Alisogymnium*. Originally *Dinogymnium*, subsequently (and now) *Alisogymnium*. Age: Senonian.
- "evitti"** Boltenhagen, 1977, p.66–67, pl.8, figs.9a–c,10–11. Holotype: Boltenhagen, 1977, pl.8, figs.9a–c; Lentin and Vozzhennikova, 1990, Appendix A, fig.33. **NOW** *Alisogymnium*. Originally *Dinogymnium*, subsequently (and now) *Alisogymnium*. Age: Senonian.
- ?gabonense** (Deflandre, 1965, p.388,390, pl.1, figs.1–9) Lentin and Williams, 1993, p.187. Holotype: Deflandre, 1965, pl.1, figs.1–3. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Questionable assignment: Lentin and Williams (1993, p.187). Age: Tertiary.
- "granulatum"** Jiabo, 1978, p.94, pl.6, figs.7–8. Holotype: Jiabo, 1978, pl.6, fig.7. **NOW** *Tetrachacysta*. Originally *Dinogymnium*, subsequently *Microdinium*, thirdly *Dinogymniopsis*, fourthly (and now) *Tetrachacysta*. Age: Early Tertiary.
- heterocostatum** (Deflandre, 1936b, p.165–166, pl.2, fig.6) Evitt et al., 1967, p.19–20. Holotype: Deflandre, 1935, text-fig.6; Deflandre, 1936b, pl.2, fig.6. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Age: ?Senonian.
- subsp. **heterocostatum**. Autonym. Holotype: Deflandre, 1935, text-fig.6; Deflandre, 1936b, pl.2, fig.6.
- subsp. **kolpaschevii** (Vozzhennikova, 1967, p.45, pl.3, fig.5) Lentin and Williams, 1973, p.49. Holotype: Vozzhennikova, 1967, pl.3, fig.5; Lentin and Vozzhennikova, 1990, pl.3, fig.1; text-fig.4. Originally *Gymnodinium heterocostatum* var. *kolpaschevi* (Appendix B), subsequently (and now) *Dinogymnium heterocostatum* subsp. *kolpaschevii*. Lentin and Vozzhennikova (1990, p.17) provided an "expanded description" for this taxon. Age: Senonian.
- ?hexagonum** (Deflandre-Rigaud, 1954, p.58, text-figs.1–2) Evitt et al., 1967, p.20. Holotype: Deflandre-Rigaud, 1954, text-figs.1–2. Originally *Gymnodinium* (Appendix B), subsequently *Dinogymnium*, thirdly (and now) *Dinogymnium?*. Questionable assignment: Stover and Evitt (1978, p.38) as a problematic species. Age: Campanian–?Maastrichtian.
- "hyalinum"** (Vozzhennikova, 1967, p.45, pl.1, fig.9; pl.2, fig.6; pl.3, fig.4; pl.5, fig.11) Lentin and Williams, 1973, p.49. Holotype: Vozzhennikova, 1967, pl.3, fig.4; Lentin and Vozzhennikova, 1990, pl.2, fig.8; text-fig.7; lost according to Lentin and Vozzhennikova (1990, p.21). Originally *Gymnodinium* (Appendix B), subsequently *Dinogymnium*. **Taxonomic senior synonym:** *Gymnodinium* (as *Dinogymnium*) *nelsonense*, according to Lentin and Vozzhennikova (1990, p.21). Age: Senonian.
- "kasachstanicum"** (Vozzhennikova, 1967, p.45–46, pl.2, figs.4a–b; pl.3, figs.9a–b) Lentin and Williams, 1973, p.49. Holotype: Vozzhennikova, 1967, pl.2, figs.4a–b; pl.3, figs.9a–b; Lentin and Vozzhennikova, 1990, pl.1, figs.3–7; text-fig.2. Originally *Gymnodinium* (Appendix B), subsequently *Dinogymnium*. **Taxonomic senior synonym:** *Dinogymnium acuminatum*, according to Lentin and Vozzhennikova (1990, p.15). Age: Campanian–Maastrichtian.
- "lamareense"** Jaramillo and Yepes, 1994, p.5–6, pl.2, figs.13–18. Holotype: Jaramillo and Yepes, 1994, pl.2, figs.13–15. **Name not validly published:** lodgment of holotype not specified. Age: Santonian.
- "lanceolatum"** May, 1977, p.115, pl.2, figs.9–10. Holotype: May, 1977, pl.2, figs.9–10; Lentin and Vozzhennikova, 1990, Appendix A, fig.41. **NOW** *Yolkinigymnium*. Originally *Dinogymnium*, subsequently (and now) *Yolkinigymnium*. Age: late Campanian–early Maastrichtian.

laticinctum (Deflandre, 1943, p.501,503, pl.17, fig.3; text-fig.11) Evitt et al., 1967, p.20. Holotype: Deflandre, 1943, pl.17, fig.3; text-fig.11. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Boltenhagen (1977, p.74) also proposed this combination. Age: ?Senonian.

longicorne (Vozzhennikova, 1967, p.46, pl.1, fig.8; pl.3, fig.6; pl.4, figs.6a–b,7) Harland, 1973, p.678. Emendation: Lentin and Vozzhennikova, 1990, p.18–19, as *Dinogymnium longicorne*. Holotype: Vozzhennikova, 1967, pl.1, fig.8; Lentin and Vozzhennikova, 1990, pl.2, figs.1–2; text-fig.5a. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Taxonomic junior synonym: *Gymnodinium* (as *Dinogymnium*) *curvatum*, according to Lentin and Vozzhennikova (1990, p.18). Lentin and Williams (1973, p.49) also proposed this combination. Age: Senonian.

majus Jain and Millepied, 1975, p.135–136, pl.1, figs.1–2. Holotype: Jain and Millepied, 1975, pl.1, fig.2. Age: Campanian–Maastrichtian.

marthae (Deflandre, 1943, p.500, pl.17, fig.1; text-figs.1–4) Evitt et al., 1967, p.21. Holotype: Deflandre, 1943, pl.17, fig.1; text-figs.1–4. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Age: Senonian.

"microgranulosum" Clarke and Verdier, 1967, p.34–35, pl.5, figs.7–10; text-fig.14. Holotype: Clarke and Verdier, 1967, pl.5, fig.9. **Taxonomic senior synonym:** *Dinogymnium acuminatum*, according to Lentin and Vozzhennikova (1990, p.15). Age: Santonian.

"mitratum" (Vozzhennikova, 1967, p.40, pl.1, figs.2–3; pl.5, figs.1–2,4) Lentin and Williams, 1973, p.49. Emendation: Lentin and Vozzhennikova, 1990, p.29–30, as *Amphigymnium mitratum*. Holotype: Vozzhennikova, 1967, pl.1, fig.2; Lentin and Vozzhennikova, 1990, pl.1, figs.10–11; text-fig.12; Appendix A, fig.38. **NOW** *Amphigymnium*. Originally *Amphidinium* (Appendix B), subsequently *Dinogymnium*, thirdly (and now) *Amphigymnium*. Age: Turonian–Senonian.

muticum (Vozzhennikova, 1967, p.46–47, pl.1, figs.6–7; pl.2, fig.9) Lentin and Williams, 1973, p.49. Emendation: Lentin and Vozzhennikova, 1990, p.19–20, as *Dinogymnium muticum*. Holotype: Vozzhennikova, 1967, pl.1, fig.6; Lentin and Vozzhennikova, 1990, text-fig.6a; lost according to Lentin and Vozzhennikova (1990, p.19). Neotype: Vozzhennikova, 1967, pl.1, fig.7; Lentin and Vozzhennikova, 1990, pl.2, figs.13–14; text-fig.6b; designated by Lentin and Vozzhennikova (1990, p.20). Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Age: Senonian.

nelsonense (Cookson, 1956, p.183, pl.1, figs.8–11) Evitt et al., 1967, p.21–23. Holotype: Cookson, 1956, pl.1, fig.10; Helby et al., 1987, fig.42C; Lentin and Vozzhennikova, 1990, pl.2, fig.8. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Taxonomic junior synonym: *Gymnodinium* (as *Dinogymnium*) *hyalinum*, according to Lentin and Vozzhennikova (1990, p.21). Age: Senonian.

"ovatum" Jiabo, 1978, p.94, pl.6, fig.1. Holotype: Jiabo, 1978, pl.6, fig.1. **NOW** *Tianjinella ovata*. Originally *Dinogymnium ovatum*, subsequently *Microdinium jiaboense*, thirdly (and now) *Tianjinella ovata*. Age: Early Tertiary.

"parvatum" Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.67, pl.7, figs.26–28. Holotype: Liu Zhili et al., 1992, pl.7, fig.26. **NOW** *Tetrachacysta*. Originally *Dinogymnium*, subsequently (and now) *Tetrachacysta*. Age: Early Tertiary.

pustulicostatum May, 1977, p.115–118, pl.1, figs.1–13; pl.3, figs.1,3a–b,4a–b. Holotype: May, 1977, pl.1, figs.2–3. Age: late Campanian–early Maastrichtian.

"rigaudiae" Boltenhagen, 1977, p.73, pl.11, figs.1a–b,2–4. Holotype: Boltenhagen, 1977, pl.11, figs.1a–b; Lentin and Vozzhennikova, 1990, Appendix A, fig.39. **NOW** *Amphigymnium*. Originally *Dinogymnium*, subsequently (and now) *Amphigymnium*. Age: Campanian–Maastrichtian.

rugosum Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.67, pl.7, figs.13–16; text-fig.3. Holotype: Liu Zhili et al., 1992, pl.7, fig.14; text-fig.3. Age: Early Tertiary.

sibiricum (Vozzhennikova, 1967, p.47–48, pl.2, figs.2,3a–b; pl.3, figs.2–3) Lentin and Williams, 1973, p.50. Emendation: Lentin and Vozzhennikova, 1990, p.21–22, as *Dinogymnium sibiricum*. Holotype: Vozzhennikova, 1967, pl.3, figs.2–3; Lentin and Vozzhennikova, 1990, text-fig.8; lost according to Lentin and Vozzhennikova (1990, p.22). Lectotype: Vozzhennikova, 1967, pl.2, fig.2, designated by Lentin and Vozzhennikova (1990, p.22). Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. The combination *Dinogymnium sibiricum* was not validly published in Evitt et al. (1967, p.23), since the name *Gymnodinium sibiricum* was not validly published in Vozzhennikova (1963, text-fig.49b). Vozzhennikova (1967) validly published the species name. Age: Senonian.

"**sphaerocephalum**" (Vozzhennikova, 1967, p.48, pl.2, fig.7; pl.3, fig.1) Lentin and Williams, 1973, p.50. Emendation: Lentin and Vozzhennikova, 1990, p.25–26, as *Alisogymnium sphaerocephalum*. Holotype: Vozzhennikova, 1967, pl.3, fig.1; Lentin and Vozzhennikova, 1990, Appendix A, fig.30. **NOW** *Alisogymnium*. Originally *Gymnodinium* (Appendix B), subsequently *Dinogymnium*, thirdly (and now) *Alisogymnium*. Taxonomic junior synonym: *Dinogymnium assamicum*, according to Jain (1977a, p.133–134) — however, Lentin and Vozzhennikova (1990, p.28) retained *Dinogymnium* (as *Alisogymnium*) *assamicum*. Age: Senonian.

"subsp. **laeve**" (Vozzhennikova, 1967, p.48, pl.1, fig.4; pl.2, fig.5) Lentin and Williams, 1973, p.50. Emendation: Lentin and Vozzhennikova, 1990, p.26–27, as *Alisogymnium laeve*. Holotype: Vozzhennikova, 1967, pl.2, fig.5; Lentin and Vozzhennikova, 1990, pl.2, fig.7a; lost according to Lentin and Vozzhennikova (1990, p.26). Neotype: Harland, 1973, pl.85, figs.2–3 as *Dinogymnium* (originally *Gymnodinium*) *longicorne*; Lentin and Vozzhennikova, 1990, pl.2, fig.76; designated by Lentin and Vozzhennikova (1990, p.27). **NOW** *Alisogymnium laeve*. Originally *Gymnodinium sphaerocephalum* var. *laeve* (Appendix B), subsequently *Dinogymnium sphaerocephalum* subsp. *laeve*, thirdly (and now) *Alisogymnium laeve*. Age: Senonian.

"subsp. **sphaerocephalum**". Autonym. Holotype: Vozzhennikova, 1967, pl.3, fig.1; Lentin and Vozzhennikova, 1990, Appendix A, fig.30. **Now redundant**.

strombomorphum (Deflandre, 1943, p.501, pl.17, figs.4–6; text-figs.5–7) Evitt et al., 1967, p.23. Holotype: Deflandre, 1943, pl.17, figs.4–6; text-figs.5–7. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Age: ?Senonian.

undulosum Cookson and Eisenack, 1970a, p.138, pl.10, fig.3. Holotype: Cookson and Eisenack, 1970a, pl.10, fig.3. Hemgreen (1975, p.63) implied that *Gymnodinium* (as *Dinogymnium*) *denticulatum* is the possible taxonomic senior synonym of this species. Age: Senonian.

"**velutinum**" Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.68, pl.7, figs.20,24–25. Holotype: Liu Zhili et al., 1992, pl.7, fig.20. **Taxonomic senior synonym:** *Tetrachacysta spinulosa*, according to He Chengquan et al. (2009, p.377). Age: Early Tertiary.

vergonsense Londeix et al., 1996, p.377,379, pl.1, figs.1–3; text-fig.7A. Holotype: Londeix et al., 1996, pl.1, fig.1; text-fig.7A. Age: early Hauterivian.

vozhennikovae Lentin and Williams, 1973, p.50. Emendation: Lentin and Vozzhennikova, 1990, p.23, as *Dinogymnium vozhennikovae*. Holotype: Vozzhennikova, 1967, pl.5, fig.7; Lentin and Vozzhennikova, 1990, pl.3, figs.2–3; text-fig.9. Originally *Gymnodinium albertii* (Appendix B), subsequently (and now) *Dinogymnium vozhennikovae*. Substitute name for *Gymnodinium albertii* Vozzhennikova, 1967, p.41–42, pl.5, figs.7–8; the name *Dinogymnium albertii* is preoccupied. Age: Turonian.

westralium (Cookson and Eisenack, 1958, p.25, pl.1, fig.9) Evitt et al., 1967, p.23–24. Emendation: May, 1977, p.118, as *Dinogymnium westralium*. Holotype: Cookson and Eisenack, 1958, pl.1, fig.9. Originally *Gymnodinium* (Appendix B), subsequently (and now) *Dinogymnium*. Age: Senonian.

DINOPTERYGIUM Deflandre, 1935, p.231. Emendations: Stover and Evitt, 1978, p.204–205; Fensome et al., 2009, p.27–28. Taxonomic junior synonyms: *Oodnadattia*, according to Norris and Sarjeant (1965, p.44), Lentin and Williams (1985, p.259), and Fensome et al. (2009, p.27); *Toolongia*, according to Stover and Evitt (1978, p.205); *Glossodinium*, by implication in Drugg (1978, p.67), who transferred the "type species" of *Glossodinium*, *Glossodinium dimorphum*, to *Dinopterygium* — however, Courtinat in Courtinat and Gaillard (1980, p.30) and Poulsen (1992b, p.45) retained *Glossodinium*; *Xiphophoridium*, according to Fensome et al. 2009, p.27. Type: Deflandre, 1935, pl.8, fig.6, as *Dinopterygium cladoides*.

"**?absidatum**" Drugg, 1978, p.66–67, pl.4, figs.7–9. Emendation: Riding, 1987b, p.60,62, as *Limbodinium absidatum*. Holotype: Drugg, 1978, pl.4, fig.7; Riding, 1987b, pl.1, fig.7; Fensome et al., 1993a, fig.1 — p.871. **NOW** *Limbodinium*. Originally *Dinopterygium*, subsequently *Dinopterygium?*, thirdly (and now) *Limbodinium*. Questionable assignment: Riding (1987a, p.260). Age: early Oxfordian.

alatum (Cookson and Eisenack, 1962b, p.487–488, pl.2, figs.1–4) Fensome et al., 2009, p.28. Emendation: Sarjeant, 1966b, p.147, as *Xiphophoridium alatum*. Holotype: Cookson and Eisenack, 1962b, pl.2, fig.1; Fensome et al., 1993a, fig.1 — p.893; Fauconnier and Masure, 2004, pl.80, fig.6. Originally *Hystriochodinium*, subsequently *Xiphophoridium*, thirdly *Pyramidium* (combination illegitimate since generic name illegitimate), fourthly *Oodnadattia*, fifthly (and now) *Dinopterygium*. Age: Albian–Cenomanian.

asteriforme (Yun Hyesu, 1981) Williams and Fensome, 2016, p.140. Holotype: Yun Hyesu, 1981, pl.8, fig.9; Fensome et al., 1991, fig.2 — p.575; Fauconnier and Masure, 2004, pl.80, fig.4. Originally *Xiphophoridium*, subsequently (and now) *Dinopterygium*. Age: early Santonian.

"bicuneatum" (Deflandre, 1939a, p.180, pl.8, fig.7 ex Sarjeant, 1967b, p.248) Lentin and Williams, 1981, p.87. Holotype: Deflandre, 1939a, pl.8, fig.7. **NOW** *Cornudinium*. Originally *Palaeoperidinium* (name not validly published), subsequently *Scriniodinium*, thirdly *Glossodinium*, fourthly *Dinopterygium*, fifthly (and now) *Cornudinium*. Age: Oxfordian.

***cladoides** Deflandre, 1935, p.231, pl.8, fig.6. Holotype: Deflandre, 1935, pl.8, fig.6; Deflandre, 1936b, pl.8, figs.1–2. Taxonomic junior synonym: *Toolongia* (as *Dinopterygium*) *medusoides*, according to Yun Hyesu (1981, p.71); *Oodnadattia tuberculata*, according to Clarke and Verdier (1967, p.36) — however, Stover and Evitt (1978, p.205) retained *Oodnadattia* (as *Dinopterygium*) *tuberculata*. A full description of this species was given in Deflandre (1936b, p.181–182). Age: Senonian.

"cooksoniae" (Kimyai, 1966, p.471, pl.2, fig.21) Lentin and Williams, 1973, p.50. Holotype: Kimyai, 1966, pl.2, fig.21. Originally *Oodnadattia*, subsequently *Dinopterygium*. **Taxonomic senior synonym:** *Oodnadattia* (now *Dinopterygium*) *tuberculata*, according to Below (1981a, p.107). Age: Cenomanian.

"dimorphum" (Ioannides et al., 1977, p.453, pl.2, figs.13–14; text-fig.8) Drugg, 1978, p.67. Holotype: Ioannides et al., 1977, pl.2, fig.13. **NOW** *Glossodinium*. Originally (and now) *Glossodinium*, subsequently *Dinopterygium*. Age: Kimmeridgian.

"fehmarne" (Lentin and Williams, 1973, p.67) Stover and Evitt, 1978, p.205. **Name not validly published:** no holotype designated. **NOW** *Heteraulacacysta*. Originally *Heteraulacacysta* (name not validly published), subsequently *Dinopterygium* (name not validly published), thirdly (and now) *Heteraulacacysta*. Age: early Eocene.

konradense Prössl, 1990, p.101–102, pl.18, figs.3,5; pl.19, figs.1,3 ex Prössl, 1992b, p.113–114. Holotype: Prössl, 1990, pl.18, figs.3,5. This name was not validly published in Prössl (1990, p.101–102), since that author did not specify the lodgment of the holotype. Age: middle Cenomanian–late Turonian.

"medusoides" (Cookson and Eisenack, 1960a, p.14, pl.3, figs.11–12) Stover and Evitt, 1978, p.205. Holotype: Cookson and Eisenack, 1960a, pl.3, fig.11. Originally *Toolongia*, subsequently *Dinopterygium*. **Taxonomic senior synonym:** *Dinopterygium cladoides*, according to Yun Hyesu (1981, p.71). Age: Senonian.

"perforatum" Clarke and Verdier, 1967, p.36–37, pl.6, figs.1–3; text-fig.15. Emendations: Davey and Verdier, 1971, p.30, as *Pterodinium perforatum*; Below, 1981a, p.23–24 and Masure, 1988a, p.363–364, both as *Maghrebinia perforata*. Holotype: Clarke and Verdier, 1967, pl.6, figs.1–2; Masure, 1988a, pl.1, figs.1–9; text-figs.1a–b; Fensome et al., 1995, figs.1–2 — p.1653; Fauconnier and Masure, 2004, pl.10, figs.5–6. **NOW** *Atopodinium*. Originally *Dinopterygium*, subsequently *Pterodinium*, thirdly *Pterodinium?*, fourthly *Maghrebinia*, fifthly (and now) *Atopodinium*. Age: early Cenomanian.

pterophorum (Deflandre and Courteville, 1939, p.102, pl.2, figs.4–5) Lentin and Williams, 1981, p.88. Holotype: Deflandre and Courteville, 1939, pl.2, figs.4–5. Originally *Hystriosphera*, subsequently *Cymatiosphaera* (Appendix A), thirdly *Oodnadattia*, fourthly (and now) *Dinopterygium*. Age: Senonian.

reticulatum Singh, 1983, p.156, pl.57, figs.8–10. Holotype: Singh, 1983, pl.57, fig.8. Age: early Cenomanian.

tuberculatum (Eisenack and Cookson, 1960, p.6–7, pl.2, figs.10–14; text-fig.1) Stover and Evitt, 1978, p.205. Holotype: Eisenack and Cookson, 1960, pl.2, fig.10; Helby et al., 1987, fig.38G. Originally *Oodnadattia*, subsequently (and now) *Dinopterygium*. Taxonomic senior synonym: *Dinopterygium cladoides*, according to Clarke and Verdier (1967, p.36) — however, Stover and Evitt (1978, p.205) retained *Dinopterygium tuberculatum*. Taxonomic junior synonyms: *Oodnadattia cooksoniae* and *Leptodinium? micropunctatum*, both according to Below (1981a, p.107) — however, Lentin and Williams (1981, p.173) retained *Leptodinium? micropunctatum*. Age: Albian.

"verriculum" Piasecki, 1980, p.66–67, pl.1, figs.4–8; pl.5, figs.5–6. Holotype: Piasecki, 1980, pl.1, figs.7–8. **NOW** *Gramocysta*. Originally *Dinopterygium*, subsequently *Heteraulacacysta*, thirdly (and now) *Gramocysta*. Age: late Miocene.

DIOXYA Cookson and Eisenack, 1958, p.59. Emendation: Morgan, 1977, p.131. Taxonomic junior synonym: *Vozzhennikovia*, according to Morgan (1977, p.131) — however, Lentin and Williams (1981, p.88) retained *Vozzhennikovia*. Type: Cookson and Eisenack, 1958, pl.11, fig.11; text-fig.20, as *Dioxya armata*.

"apertura" (Wilson, 1967a, p.64–65, figs.3–5,8) Morgan, 1977, p.131. Holotype: Wilson, 1967a, figs.3–4; Fensome et al., 1993a, figs.1–2 — p.925. **NOW** *Vozzhennikovia*. Originally *Spinidinium*, subsequently (and now) *Vozzhennikovia*, thirdly *Dioxya*. N.I.A. Age: Paleocene–Oligocene.

***armata** Cookson and Eisenack, 1958, p.59, pl.11, fig.11; text-fig.20. Emendation: Morgan, 1977, p.131–132. Holotype: Cookson and Eisenack, 1958, pl.11, fig.11; text-fig.20. Age: Albian.

"denticulata" Pöthe de Baldis and Ramos, 1983, p.438, pl.2, figs.7,11; pl.4, fig.2. Holotype: Pöthe de Baldis and Ramos, 1983, pl.2, figs.7,11; pl.4, fig.2. **NOW** *Spinidinium argentinium*. Originally *Dioxya denticulata*, subsequently (and now) *Spinidinium argentinium*, thirdly *Magallanesium denticulatum*. *Spinidinium argentinium* is a substitute name, since the epithet "*denticulatum*" is preoccupied in *Spinidinium*. Age: early Aptian.

"?extensa" (Stover, 1974, p.178–179, pl.5, figs.4a–c,5a–d,6) Morgan, 1977, p.131. Holotype: Stover, 1974, pl.5, figs.4a–c; Fensome et al., 1993a, figs.1–3 — p.1167. **NOW** *Gippslandia*. Originally *Deflandrea*, subsequently *Vozzhennikovia?*, thirdly *Dioxya?*, fourthly *Lentinia*, fifthly (and now) *Gippslandia*. Questionable assignment: Morgan (1977, p.121). Age: middle-late Eocene.

"filigrana" (Benedek, 1972, p.12–13, pl.4, figs.3a–b) Morgan, 1977, p.131. Holotype: Benedek, 1972, pl.4, figs.3a–b; Benedek and Sarjeant, 1981, figs.4,8, nos.1–2. **NOW** *Phthanoperidinium*. Originally *Deflandrea?*, subsequently *Vozzhennikovia?*, thirdly *Dioxya*, fourthly (and now) *Phthanoperidinium*. Age: middle Oligocene.

?pignerata Norris, 1986, p.46, pl.14, figs.8–14. Holotype: Norris, 1986, pl.14, fig.12. Questionable assignment: Norris (1986, p.46). Age: Eocene.

"rotunda" (Wilson, 1967a, p.65–66, figs.6–7) Morgan, 1977, p.131. Holotype: Wilson, 1967a, fig.6. **NOW** *Vozzhennikovia*. Originally *Spinidinium*, subsequently (and now) *Vozzhennikovia*, thirdly *Dioxya*. Age: Eocene.

"tenella" (Morgenroth, 1966b, p.4–5, pl.1, figs.8–9) Morgan, 1977, p.131. Holotype: Morgenroth, 1966b, pl.1, fig.8. **NOW** *Lejeunecysta*. Originally *Lejeunia* (an illegitimate generic name), subsequently *Vozzhennikovia*, thirdly *Dioxya*, fourthly (and now) *Lejeunecysta*. Age: early Oligocene.

"tenera" (Krutzsch, 1962, p.44, pl.11, figs.20–22; text-fig.1e) Morgan, 1977, p.131. Holotype: Krutzsch, 1962, pl.11, figs.20–22. **NOW** *Geiselodinium*. Originally *Deflandrea?*, subsequently *Vozzhennikovia*, thirdly *Dioxya*, fourthly (and now) *Geiselodinium*. Age: middle Eocene.

villosa Eisenack and Cookson, 1960, p.10, pl.2, figs.15–16. Emendation: Morgan, 1977, p.134,136, as *Dioxya villosa*. Holotype: Eisenack and Cookson, 1960, pl.2, fig.15; Morgan, 1977, pl.2, figs.6a–b. Originally (and now) *Dioxya*, subsequently *Vozzhennikovia*. Lentin and Williams (1981, p.88) retained this species in *Dioxya*. Age: Albian.

"DIPHASIOSPHAERA" Duxbury, 1980, p.115–116. **Taxonomic senior synonym:** *Hystrichostrogylon*, according to Stover and Williams (1987, p.81). Type: Duxbury, 1980, pl.1, fig.5; text-fig.6, as *Diphassiosphaera stolidota*.

***"stolidota"** Duxbury, 1980, p.116–117, pl.1, figs.5,9; text-fig.6. Emendation: Harding, 1990b, p.29, as *Hystrichostrogylon stolidotum*. Holotype: Duxbury, 1980, pl.1, fig.5; text-fig.6; Fensome et al., 1995, figs.1–3 — p.1803. **NOW** *Hystrichostrogylon*. Originally *Diphassiosphaera*, subsequently (and now) *Hystrichostrogylon*. Age: middle Barremian.

DIPHYES Cookson, 1965a, p.85 nom. cons. Emendations: Davey and Williams, 1966b, p.95–96; Goodman and Witmer, 1985, p.76. Taxonomic junior synonym: *Lingulasphaera*, according to Stover and Evitt (1978, p.38). The proposal by Harris and Fensome (2000, p.281–282) to conserve the name *Diphyes* Cookson against the name *Diphyes* Blume was ratified at the 2005 Botanical Congress). Type: Deflandre and Cookson, 1955, pl.7, fig.3, as *Hystrichosphaeridium colligerum*.

appendiculare Cookson and Eisenack, 1970a, p.149, pl.13, fig.5. Holotype: Cookson and Eisenack, 1970a, pl.13, fig.5; Fauconnier and Masure, 2004, pl.21, figs.5–6. Age: Senonian.

bifidum Antolinez-Delgado and Oboh-Ikuenobe, 2007, p.55, pl.1, figs.4–5. Holotype: Antolinez-Delgado and Oboh-Ikuenobe, 2007, pl.1, fig.4. Age: Paleocene–?earliest Eocene.

brevispinum Bujak, 1994, p.121,123, pl.2, figs.4–6. Holotype: Bujak, 1994, pl.2, figs.4–5. Age: Ypresian.

***colligerum** (Deflandre and Cookson, 1955, p.278–279, pl.7, fig.3) Cookson, 1965a, p.86–87. Emendations: Cookson, 1965a, p.86 and Goodman and Witmer, 1985, p.77–78, both as *Diphyes colligerum*. Holotype: Deflandre and Cookson, 1955, pl.7, fig.3. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Diphyes*. Taxonomic junior synonym: *Diphyes pseudoficusoides* according to Fensome et al. (2009, p.30). Age: early Eocene.

cretaceum Yu Jingxian and Zhang Wangping, 1980, p.111, pl.4, figs.1–2. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.4, fig.2. Age: Cenomanian–early Turonian.

ficusoides Islam, 1983b, p.338, pl.2, figs.8–9. Holotype: Islam, 1983b, pl.2, fig.8; Bujak, 1994, pl.2, fig.1. Age: middle Eocene.

latiusculum Matsuoka, 1974, p.329, pl.44, figs.6a–b. Holotype: Matsuoka, 1974, pl.44, figs.6a–b. Age: early-middle Miocene.

"minus" Yu Jingxian and Zhang Wangping, 1980, p.111–112, pl.4, figs.4–5. Emendation: Mao Shaozhi and Norris, 1988, p.36, as *Coronifera minor*. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.4, fig.5. **NOW** *Coronifera*. Originally *Diphyes*, subsequently (and now) *Coronifera*. Age: Cenomanian–Santonian.

?*monstruosum* (Tasch in Tasch et al., 1964, p.195, pl.1, fig.12) Davey and Williams, 1969, p.7. Holotype: Tasch et al., 1964, pl.1, fig.12. Originally *Hystrichosphaeridium*, subsequently (and now) *Diphyes*?, thirdly *Coronifera*. Fauconnier in Fauconnier and Masure (2004, p.176) questionably retained this species in *Diphyes*. Questionable assignment: Davey and Williams (1969, p.7); and Fauconnier in Fauconnier and Masure (2004, p.176) as a problematic species. Taxonomic senior synonym: *Coronifera oceanica*, according to Below (1982c, p.5) — however. Fauconnier in Fauconnier and Masure (2004, p.176) retained *Hystrichosphaeridium* (as *Diphyes*?) *monstruosum*. This combination was not validly published in Davey and Williams (1966b, p.97), since these authors did not fully reference the basionym. Age: Albian.

"*nudum*" Cookson, 1965a, p.87, pl.10, figs.1–4. Holotype: Cookson, 1965a, pl.10, fig.1. **NOW** *Duosphaeridium*. Originally *Diphyes*, subsequently *Duosphaeridium*. Age: late Eocene.

"*pseudoficusoides*" Bujak, 1994, p.123,125, pl.2, figs.2–3. Holotype: Bujak, 1994, pl.2, fig.3. **Taxonomic senior synonym:** *Diphyes colligerum* according to Fensome et al. (2009, p.30). Age: Ypresian–Lutetian.

recurvatum May, 1980, p.50–51, pl.1, figs.18–20. Holotype: May, 1980, pl.1, figs.18–20. Age: Maastrichtian.

spinula (Drugg, 1970b, p.817–818, figs.10G,11D–E,12A–B) Stover and Evitt, 1978, p.39. Holotype: Drugg, 1970b, fig.11D. Originally *Lingulasphaera*, subsequently (and now) *Diphyes*. N.I.A. Age: early Eocene.

?*xinjiangense* Yu Jingxian and Zhang Wangping, 1980, p.111, pl.4, fig.3. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.4, fig.3. Originally *Diphyes*, subsequently *Diphyes*?. Questionable assignment: Fauconnier in Fauconnier and Masure (2004, p.176). Age: Cenomanian–early Turonian.

"**DIPLOTESTA**" Cookson and Eisenack, 1960b, p.256. **Name illegitimate** — **senior homonym:** *Diplotesta* Brongniart, 1874. **Substitute name:** *Wallodinium*. Type: Cookson and Eisenack, 1960b, pl.39, fig.4, as *Diplotesta glaessneri*.

"*anglica*" Cookson and Hughes, 1964, p.56–57, pl.11, figs.1–5. Holotype: Cookson and Hughes, 1964, pl.11, fig.2. **NOW** *Wallodinium*. Originally *Diplotesta* (generic name illegitimate), subsequently (and now) *Wallodinium*. Following I.C.N. Article 55.1, the species name *Diplotesta anglica* is validly published even though the generic name *Diplotesta* is illegitimate. Age: late Albian–early Cenomanian.

"*bidigitata*" Manum and Cookson, 1964, p.25–26, pl.5, figs.4–6. Holotype: Manum and Cookson, 1964, pl.5, fig.6. **NOW** *Wallodinium*. Originally *Diplotesta* (generic name illegitimate), subsequently (and now) *Wallodinium*. Following I.C.N. Article 55.1, the species name *Diplotesta bidigitata* is validly published even though the generic name *Diplotesta* is illegitimate. Age: Late Cretaceous.

"**glaessneri*" Cookson and Eisenack, 1960b, p.256, pl.39, figs.4–6. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.4. **NOW** *Wallodinium*. Originally *Diplotesta* (generic name illegitimate), subsequently (and now) *Wallodinium*. Following I.C.N. Article 55.1, the species name *Diplotesta glaessneri* is validly published even though the generic name *Diplotesta* is illegitimate. Age: Oxfordian–?Aptian.

"*inflata*" Habib, 1969, p.98, pl.3, figs.14–15; pl.4, fig.2. Holotype: Habib, 1969, pl.3, fig.14. **NOW** *Wallodinium*. Originally *Diplotesta* (generic name illegitimate), subsequently (and now) *Wallodinium*. Following I.C.N. Article 55.1, the species name *Diplotesta inflata* is validly published even though the generic name *Diplotesta* is illegitimate. Age: Albian–Cenomanian.

"*krutzschii*" Alberti, 1961, p.21, pl.7, figs.19–21; pl.12, figs.6–7. Holotype: Alberti, 1961, pl.7, fig.19. **NOW** *Wallodinium*. Originally *Diplotesta* (generic name illegitimate), subsequently (and now) *Wallodinium*. Following I.C.N. Article 55.1, the species name *Diplotesta krutzschii* is validly published even though the generic name *Diplotesta* is illegitimate. Age: Hauterivian–Barremian.

"*luna*" Cookson and Eisenack, 1960a, p.10–11, pl.3, fig.21. Holotype: Cookson and Eisenack, 1960a, pl.3, fig.21. **NOW** *Wallogdinium*. Originally *Diplotesta* (generic name illegitimate), subsequently (and now) *Wallogdinium*. Following I.C.N. Article 55.1, the species name *Diplotesta luna* is validly published even though the generic name *Diplotesta* is illegitimate. N.I.A. Age: ?late Albian–Cenomanian.

"*nodosa*" Ott in Riding and Helby, 2001f, p.157. **Name not validly published**: no description. **Taxonomic senior synonym**: *Indodinium khariense*, according to Riding and Helby (2001f, p.157).

DISCORSIA Duxbury, 1977, p.30. Emendation: Khowaja-Ateequzzaman et al., 1985, p.98. Type: Davey, 1974, pl.4, fig.9, as *Oligosphaeridium nannus*.

flabelliformis Xu Jinli et al., 1997, p.80, pl.19, figs.10–11; pl.20, figs.10–11 ex He Chengquan et al., 2009, p.654. Holotype: Xu Jinli et al., 1997, pl.20, fig.10. This name was not validly published in Xu Jinli et al. (1997), since no English or a Latin description was provided; He Chengquan et al. (2009, p.654) validated the name by publishing an English diagnosis. Age: middle-late Eocene.

**nannus* (Davey, 1974, p.59, pl.4, figs.9–10) Duxbury, 1977, p.31. Emendations: Duxbury, 1977, p.31 and Khowaja-Ateequzzaman et al., 1985, p.98,100, both as *Discorsia nannus*. Holotype: Davey, 1974, pl.4, fig.9; Fensome et al., 1995, fig.1 — p.1619; Fauconnier and Masure, 2004, pl.22, fig.1. Originally *Oligosphaeridium*, subsequently (and now) *Discorsia*. N.I.A. Age: early Barremian.

DISPHAERIA Cookson and Eisenack, 1960a, p.11. Emendation: Norvick, 1973, p.45. Taxonomic junior synonyms: *Thalassiphora*, according to Norvick (1973, p.45) — however, Lentin and Williams (1985, p.353) retained *Thalassiphora*; *Subathua*, by implication in Sarkar and Singh (1988, p.41), who transferred the "type species" of *Subathua*, *Subathua sahnii*, to *Disphaeria* — however, Lentin and Williams (1989, p.354) accepted *Subathua sahnii* as a taxonomic junior synonym of *Adnatosphaeridium* (as *Thalassiphora patulum*). Type: Cookson and Eisenack, 1960a, pl.3, fig.13, as *Disphaeria macropylla*.

"*balcanica*" (Balteş, 1971, p.6, pl.3, figs.3–7) Norvick, 1976, p.99. Holotype: Balteş, 1971, pl.3, figs.3–7. **NOW** *Thalassiphora*. Originally (and now) *Thalassiphora*, subsequently *Disphaeria*, thirdly *Subathua* (combination not validly published), fourthly *Spiniferites*. Taxonomic senior synonym: *Pterospermopsis* (as and now *Thalassiphora pelagica*, according to Stover and Evitt (1978, p.194) — however, Sütő-Szentai (2000, p.162) retained *Thalassiphora* (as *Spiniferites*) *balcanica*. Age: early Pliocene.

"*bononiensis*" (Corradini, 1973, p.185–186, pl.30, figs.5.6a–b,8a–b; pl.37, figs.5a–b; pl.38, fig.1; pl.39, fig.1) Yun Hyesu, 1981, p.70. Holotype: Corradini, 1973, pl.30, figs.6a–b. **NOW** *Thalassiphora*. Originally (and now) *Thalassiphora*, subsequently *Disphaeria*. Age: Late Cretaceous–Paleocene.

"*defloccata*" (Davey and Verdier, 1973, p.198, pl.3, figs.6,8) Yun Hyesu, 1981, p.70. Holotype: Davey and Verdier, 1973, pl.3, fig.8. **NOW** *Leberidocysta*. Originally *Hexagonifera*, subsequently *Thalassiphora*, thirdly (and now) *Leberidocysta*, fourthly *Disphaeria*, fifthly *Craspedodinium*. Age: late Albian–early Cenomanian.

"*delicata*" (Williams and Downie, 1966c, p.235, pl.26, fig.8) Norvick, 1973, p.46. Emendation: Eaton, 1976, p.287, as *Thalassiphora delicata*. Holotype: Williams and Downie, 1966c, pl.26, fig.8; Bujak et al., 1980, pl.10, fig.8. **NOW** *Thalassiphora*. Originally (and now) *Thalassiphora*, subsequently *Disphaeria*. Age: early Eocene.

"*flammea*" (Cookson and Eisenack, 1967b, p.252–253, pl.42, figs.1–5) Yun Hyesu, 1981, p.70. Holotype: Cookson and Eisenack, 1967b, pl.42, fig.1. **NOW** *Thalassiphora*. Originally (and now) *Thalassiphora*, subsequently *Disphaeria*. Age: late Paleocene.

"*hypoflata*" Yun Hyesu, 1981, p.70, pl.9, figs.1–3. Holotype: Yun Hyesu, 1981, pl.9, fig.1; Fensome et al., 1991, fig.1 — p.651. **NOW** *Turnhosphaera*. Originally *Disphaeria*, subsequently (and now) *Turnhosphaera*. Taxonomic junior synonym: *Nelsoniella glomerata* (name not validly published), according to Slimani (2001a, p.194). Age: early Santonian.

***macropylla** Cookson and Eisenack, 1960a, p.11, pl.3, figs.13–14. Emendation: Norvick, 1976, p.99–101. Holotype: Cookson and Eisenack, 1960a, pl.3, fig.13; Helby et al., 1987, fig.38I; Fensome et al., 1996, fig.1 — p.2215. Age: Turonian.

"maxima" (Jain and Millepied, 1975, p.146, pl.4, figs.53–54) Yun Hyesu, 1981, p.70. Holotype: Jain and Millepied, 1975, pl.4, fig.54. **NOW** *Thalassiphora*?. Originally *Thalassiphora*, subsequently (and now) *Thalassiphora*?, thirdly *Disphaeria*. Age: Campanian–Maastrichtian.

munda (Davey and Verdier, 1973, p.196, pl.3, figs.5,7,10) Norvick, 1976, p.99. Holotype: Davey and Verdier, 1973, pl.3, fig.10. Originally *Thalassiphora*, subsequently (and now) *Disphaeria*. Lentin and Williams (1981, p.90) retained this species in *Disphaeria*. Taxonomic senior synonym: *Erikania* (now *Thalassiphora*) *dynamica*, according to Yun Hyesu (1981, p.70) — however, Lentin and Williams (1985, p.353) retained *Thalassiphora munda*. Age: late Albian–Cenomanian.

"pelagica" (Eisenack, 1954b, p.71, pl.12, figs.17–18) Norvick, 1973, p.46. Emendation: Benedek and Sarjeant, 1981, p.59–61, as *Thalassiphora pelagica*. Holotype: Eisenack, 1954b, pl.12, fig.17. **NOW** *Thalassiphora*. Originally *Pterospermopsis* (Appendix A), subsequently (and now) *Thalassiphora*, thirdly *Disphaeria*. Taxonomic junior synonyms: *Thalassiphora sueroi* and *Thalassiphora* (as *Disphaeria*) *balcanica*, both according to Stover and Evitt (1978, p.194) — however, Sütő-Szentai (2000, p.162) retained *Thalassiphora* (as *Spiniferites*) *balcanica*; *Pterocystidiopsis* (as *Thalassiphora*) *velata* and *Adnatosphaeridium* (as *Thalassiphora*) *patulum*, both according to Benedek and Gocht (1981, p.59) — however, Lentin and Williams (1985, p.354) retained *Thalassiphora patula* and Brinkhuis and Biffi (1993, p.179) retained *Pterocystidiopsis* (as and now *Thalassiphora*) *velata*; *Subathua sahnii*, according to Lentin and Williams (1985, p.340) — however, *Subathua sahnii* is now considered to be a taxonomic junior synonym of *Adnatosphaeridium* (as and now *Thalassiphora*) *patulum*; *Subathua spinosa*, according to Lentin and Williams (1985, p.340) — however, Stover and Williams (1987, p.207) retained *Subathua* (as *Thalassiphora*) *spinosa* (now *Thalassiphora simlaensis*). Age: late Eocene–early Oligocene.

"petila" (Corradini, 1973, p.186, pl.31, figs.1–2) Yun Hyesu, 1981, p.70. Emendation: Slimani, 1994, p.68, as *Wilsonisphaera petila*. Holotype: Corradini, 1973, pl.31, fig.2. **NOW** *Wilsonisphaera*. Originally *Thalassiphora*?, subsequently *Disphaeria*, thirdly (and now) *Wilsonisphaera*. Taxonomic junior synonym: *Glaphyrosphaera glabra*, according to Schiøler and Wilson (1995, p.511). Age: Senonian.

"reticulata" (Morgenroth, 1966b, p.6–7, pl.2, figs.1–2) Norvick, 1973, p.46. Holotype: Morgenroth, 1966b, pl.2, figs.1–2; Sarjeant et al., 1987, pl.1, fig.4. **NOW** *Thalassiphora*. Originally (and now) *Thalassiphora*, subsequently *Disphaeria*. Age: early Oligocene.

"sahnii" (Khanna and Singh, 1980, p.308–309, pl.1, figs.1–3,5–9; text-figs.1–2) Sarkar and Singh, 1988, p.41. Emendation: Sarkar and Singh, 1988, p.41, as *Disphaeria sahnii*. Holotype: Khanna and Singh, 1980, pl.1, fig.2; Fensome et al., 1995, fig.2 — p.1759. Originally *Subathua*, subsequently *Disphaeria*. **Taxonomic senior synonym:** *Adnatosphaeridium* (as and now *Thalassiphora*) *patulum*, according to Stover and Williams (1987, p.207) and Lentin and Williams (1989, p.354). Taxonomic senior synonym: *Pterospermopsis* (as and now *Thalassiphora*) *pelagica*, according to Lentin and Williams (1985, p.340) — however, *Subathua sahnii* is now considered a taxonomic junior synonym of *Adnatosphaeridium* (now *Thalassiphora*) *patulum*. Age: Eocene.

"succincta" (Morgenroth, 1966b, p.7–8, pl.2, figs.7–9) Norvick, 1973, p.46. Holotype: Morgenroth, 1966b, pl.2, fig.7. **NOW** *Thalassiphora*. Originally (and now) *Thalassiphora*, subsequently *Disphaeria*. Age: early Oligocene.

"sueroi" (Pöthe de Baldis, 1966, p.224–225, pl.2, fig.d) Yun Hyesu, 1981, p.70. Holotype: Pöthe de Baldis, 1966, pl.2, fig.d. Originally *Thalassiphora*, subsequently *Disphaeria*. **Taxonomic senior synonym:** *Pterospermopsis* (as *Thalassiphora*) *pelagica*, according to Stover and Evitt (1978, p.174). Age: Early Tertiary.

tesselata Srivastava, 1984, p.37, pl.15, figs.1–8. Holotype: Srivastava, 1984, pl.15, fig.1. Age: late Barremian.

"velata" (Deflandre and Cookson, 1955, p.291, pl.8, fig.8) Yun Hyesu, 1981, p.70. Holotype: Deflandre and Cookson, 1955, pl.8, fig.8. **NOW** *Thalassiphora*. Originally *Pterocystidiopsis* (Appendix A), subsequently (and

now) *Thalassiphora*, thirdly *Disphaeria*. Taxonomic senior synonym: *Pterospermopsis* (as *Thalassiphora pelagica*, according to Benedek and Gocht (1981, p.59) and Sarjeant (1981, p.117) — however, Brinkhuis and Biffi (1993, p.179) retained *Disphaeria* (as and now *Thalassiphora velata*). Age: Early Tertiary.

DISPHAEROGENA Wetzel, 1933b, p.51. Emendation: Sarjeant, 1985b, p.140–141. Taxonomic junior synonyms: *Cyclapophysis*, according to Sarjeant (1985b, p.140–141); *Plethysyrinx*, by implication in Stover and Williams (1987, p.179), who considered *Plethysyrinx* to be a taxonomic junior synonym of *Cyclapophysis*. Stover and Evitt (1978, p.292) suggested that this is possibly a radiolarian genus. Type: Wetzel, 1933b, pl.4, fig.34, as *Disphaerogena carposphaeropsis*.

**carposphaeropsis* Wetzel, 1933b, p.51, pl.4, fig.34. Emendation: Sarjeant, 1985b, p.141–142. Holotype: Wetzel, 1933b, pl.4, fig.34; Sarjeant, 1985b, pl.3, figs.1,4; Fensome et al., 1993a, fig.1 — p.1039; Dietz et al., 1999, fig.10, no.1. Taxonomic junior synonym: *Cyclapophysis monmouthensis*, according to Sarjeant (1985b, p.141). Age: Late Cretaceous.

irregularis (Wilson, 1988, p.16, pl.4, figs.4–5, 7a–b) Lentin and Williams, 1993, p.195. Holotype: Wilson, 1988, pl.4, figs.7a–b; Fensome et al., 1996, figs.1–2 — p.2173. Originally *Cyclapophysis*, subsequently (and now) *Disphaerogena*. Age: middle Eocene.

lemniscata (Corradini, 1973, p.152–153, pl.22, figs.4a–b,5; pl.33, figs.2,4; pl.39, fig.2) Lentin and Williams, 1989, p.118. Holotype: Corradini, 1973 pl.22, fig.5; Fensome et al., 1995, fig.3 — p.1601. Originally *Cordosphaeridium*, subsequently *Cordosphaeridium?*, thirdly *Plethysyrinx*, fourthly *Cyclapophysis*, fifthly (and now) *Disphaerogena*. Age: Late Cretaceous–Paleocene.

DISSILIODINIUM Drugg, 1978, p.67–68. Emendations: Bailey and Partington, 1991, p.246; Feist-Burkhardt and Monteil, 2001, p.58,60,62. Taxonomic junior synonyms: *Okerisphaeridium*, according to Feist-Burkhardt and Monteil (2001, p.58); *Gongylodinium*, by implication in Prauss (1989, p.38), who transferred the "type species" of *Gongylodinium*, *Gongylodinium erymnoteichon*, to *Dissiliodinium* — however, Feist-Burkhardt and Monteil (1997, p.43; 2001, p.58) retained *Gongylodinium*. Type: Drugg, 1978, pl.4, fig.5, as *Dissiliodinium globulus*.

acmeum (Århus, 1992, p.312–313, figs.5E–F,H–I) Lentin and Williams, 1993, p.196. Holotype: Århus, 1992, fig.5I. Originally *Gongylodinium*, subsequently (and now) *Dissiliodinium*. Age: Valanginian.

baileyi Feist-Burkhardt and Monteil, 2001, p.68,71, fig.10, nos.1–5; fig.20, no.1; table 2 (part). Holotype: Feist-Burkhardt and Monteil, 2001, fig.10, nos.1–3; fig.20, no.1. Age: Bajocian–Bathonian.

caddaense (Filatoff, 1975, p.89–90, pl.29, figs.7–9) Stover and Helby, 1987a, p.107. Holotype: Filatoff, 1975, pl.29, fig.7; Helby et al., 1987, figs.16A–B. Originally *Chytroeisphaeridia*, subsequently (and now) *Dissiliodinium*. Age: Bajocian.

curiosum Burger and Sarjeant, 1995, p.120–122,124, figs.3,4a–c,5a–b,6a–b,7a–b,8a–b,9a–b,10a–b,11a–c,12a–b,13a–b,14a–b. Holotype: Burger and Sarjeant, 1995, figs.4a–c. Taxonomic senior synonym: *Dissiliodinium globulus*, according to Leereveld (1997, p.413) — however, Feist-Burkhardt and Monteil (2001, p.64,72) retained *Dissiliodinium curiosum*. Age: latest Jurassic–Early Cretaceous.

"*erymnoteichon*" (Fenton et al., 1980, p.158–159, pl.14, figs.6–9) Prauss, 1989, p.38. Holotype: Fenton et al., 1980, pl.14, figs.8–9; Fensome et al., 1993a, figs.2–3 — p.1149. **NOW** *Gongylodinium*. Originally (and now) *Gongylodinium*, subsequently *Dissiliodinium*. Age: late Bajocian–early Bathonian.

fragile (Kunz, 1990, p.22–23, pl.4, figs.11a–b,12a–b,13,14a–b,15; text-figs.9a–c) Feist-Burkhardt and Monteil, 2001, p.62. Holotype: Kunz, 1990, pl.4, figs.11a–b; figs.11a–b; text-figs.9a–c. Originally *Okerisphaeridium*, subsequently (and now) *Dissiliodinium*. Age: late Oxfordian.

giganteum Feist-Burkhardt, 1990, p.616–617, pl.5, figs.1,3; pl.6, figs.1,4,7; text-figs.6–7. Holotype: Feist-Burkhardt, 1990, pl.5, fig.1. Age: Aalenian–early Bajocian.

***globulus** Drugg, 1978, p.68, pl.4, figs.4–6. Holotype: Drugg, 1978, pl.4, fig.5; Fensome et al., 1995, fig.2 — p.1515. Taxonomic junior synonym: *Dissiliodinium curiosum*, according to Leereveld (1997, p.413) — however, Feist-Burkhardt and Monteil (2001, p.64,72) retained *Dissiliodinium curiosum*. N.I.A. Age: early Kimmeridgian.

?**hocneratum** (Fenton et al., 1980, p.159–160, pl.16, fig.2) Lentin and Williams, 1993, p.196. Holotype: Fenton et al., 1980, pl.16, fig.2. Originally *Gongylostinium*, subsequently *Dissiliodinium*, thirdly (and now) *Dissiliodinium*?. Questionable assignment: Feist-Burkhardt and Monteil (2001, p.64). Age: late Bajocian–early Bathonian.

lichenoides Feist-Burkhardt and Monteil, 2001, p.75–76, fig.5, nos.1–3; fig.6c; fig.17, nos.1–4; table 2 (part). Holotype: Feist-Burkhardt and Monteil, 2001, fig.5, nos.1–2; fig.17, no.4. Age: late Aalenian–early Bajocian.

minimum Feist-Burkhardt and Monteil, 2001, p.71–72, fig.3, nos.1–2; fig.6b; fig.11, nos.1–9; fig.12, nos.1–4; fig.19, no.1; table 2 (part). Holotype: Feist-Burkhardt and Monteil, 2001, fig.3, no.1; fig.11, nos.1–3. Age: late Bajocian–early Bathonian.

pauliae (Heilman-Clausen in Heilmann-Clausen and Thomsen, 1995, p.294–295, pl.5, figs.7–10,13; text-fig.14) Williams et al., 1998, p.200. Holotype: Heilmann-Clausen and Thomsen, 1995, pl.5, fig.13; text-fig.14. Originally *Gongylostinium*, subsequently (and now) *Dissiliodinium*. Age: late Barremian.

psilatam Prauss, 1989, p.39, pl.6, figs.14–16,19; text-fig.15. Holotype: Prauss, 1989, pl.6, fig.19; text-fig.15. Age: early Bajocian.

volkheimeri Quattrocchio and Sarjeant, 1992, p.70 (al. 2–222), pl.1, fig.2; pl.2, figs.1–6. Holotype: Quattrocchio and Sarjeant, 1992, pl.2, fig.1. Age: Callovian–late Tithonian.

willei Bailey and Partington, 1991, p.246, pl.1, figs.1–4; text-fig.2. Holotype: Bailey and Partington, 1991, pl.1, fig.1; text-fig.2. Age: early Bajocian–Callovian.

DISSIMULIDINIUM May et al., 1987, p.199–201. Emendation: Riding and Helby, 2001g, p.200. Type: May et al., 1987, figs.4A–C, as *Dissimulidinium lobispinosum*.

***lobispinosum** May et al., 1987, p.201–203, figs.2A–D,3A–N,4A–I. Holotype: May et al., 1987, figs.4A–C; Fensome et al., 1996, figs.1–3 — p.2201. Age: Berriasian.

purattense Riding and Helby, 2001g, p.200,202,204, figs.11A–P. Holotype: Riding and Helby, 2001g, figs.11C–D. Taxonomic junior synonym: *Ampulladinium robustum* (name not validly published), according to Riding and Helby (2001g, 200). Age: Tithonian.

DISTATODINIUM Eaton, 1976, p.262–263. Emendations: Zevenboom and Santarelli in Zevenboom, 1995, p.157–158; Fensome et al., 2009, p.30. Taxonomic junior synonym: *Bipolaribucina*, according to Chen et al. (1988, p.6–7). Type: Eaton, 1976, pl.9, fig.1, as *Distatodinium craterum*.

apenninicum Brinkhuis et al., 1992, p.237–238, pl.1, figs.1–9; pl.8 (not pl.7 as given in Brinkhuis et al., 1992, p.236), figs.1–4. Holotype: Brinkhuis et al., 1992, pl.1, figs.1–3. Age: early Miocene.

biffii Brinkhuis et al., 1992, p.238,240, pl.3, figs.1–4; pl.6, fig.4; pl.9, fig.4. Holotype: Brinkhuis et al., 1992, pl.3, figs.1–4. Brinkhuis et al. (1992, p.238) considered *Microsphaeridium ancistroides* to be the possible taxonomic senior synonym of this species. Age: latest Oligocene.

"?**biornatum**" (He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989, p.39, pl.22, figs.18–19) Lentin and Williams, 1993, p.197. Holotype: He Chengquan et al., 1989, pl.22, fig.18. **NOW** *Songiella*.

Originally *Bipolaribucina*?, subsequently *Distatodinium*, thirdly (and now) *Songiella*. Questionable assignment: Lentin and Williams (1993, p.197). Taxonomic senior synonym: *Membranilarnacia paucitubata*, according to Mao Shaozhi et al. (1995, p.44) — however, He Chengquan et al. (2009, p.366) retained this species as *Songiella biornata*. Age: Early Tertiary.

"*cavatum*" Zevenboom and Santarelli in Zevenboom, 1995, p.158–159, pl.8, figs.4–9. Holotype: Zevenboom, 1995, pl.8, figs.4–6. **Name not validly published**: considered a manuscript name by authors. Age: latest Oligocene–early Miocene.

"**craterum*" Eaton, 1976, p.263–264, pl.9, figs.1–5. Holotype: Eaton, 1976, pl.9, fig.1; Bujak et al., 1980, pl.2, figs.10–11; Fauconnier and Masure, 2004, pl.22, figs.4–6. **Taxonomic senior synonym**: *Distatodinium paradoxum*, according to Fensome et al. (2009, p.31). Contrary to the indication by Williams et al. (1998, p.200), Zevenboom and Santarelli in Zevenboom (1995) did not provide an emendation for this species. The nomenclatural type of the genus *Distatodinium* remains the holotype of *Distatodinium craterum*. Age: middle Eocene (see Aubry, 1986).

ellipticum (Cookson, 1965a, p.87–88, pl.11, figs.1–3,3a) Eaton, 1976, p.264. Holotype: Cookson, 1965a, pl.11, fig.1. Originally *Hystrichosphaeridium*, subsequently *Tanyosphaeridium*, thirdly (and now) *Distatodinium*. Age: late Eocene.

fusiforme (Matsuoka, 1974, p.332–333, pl.46, figs.4,9–10) Bujak and Matsuoka, 1986, p.236. Holotype: Matsuoka, 1974, pl.46, fig.4; Fauconnier and Masure, 2004, pl.22, fig.7. Originally *Tanyosphaeridium*, subsequently (and now) *Distatodinium*. Age: early-middle Miocene.

+*paradoxum* (Brosius, 1963, p.41–42, pl.4, figs.1,6; text-fig.2, nos.1a–c) Eaton, 1976, p.265. Holotype: Brosius, 1963, pl.4, fig.6; Fensome et al., 1995, fig.2 — p.1639. Originally *Hystrichosphaeridium*, subsequently *Tanyosphaeridium*, thirdly *Oligosphaeridium*?, fourthly (and now) *Distatodinium*, fifthly *Bipolaribucina*. Chen et al. (1988, p.7) retained this species in *Distatodinium*. Taxonomic junior synonym: *Distatodinium craterum*, according to Fensome et al. (2009, p.31). The nomenclatural type of the genus *Distatodinium* remains the holotype of *Distatodinium craterum*. Age: late Oligocene.

parisiense Châteauneuf, 1980, p.137, pl.21, figs.11–12. Holotype: Châteauneuf, 1980, pl.21, fig.12; Fauconnier and Masure, 2004, pl.22, figs.7–9. Age: middle-late Eocene (late Lutetian–Marinesian).

pilosum Heilmann-Clausen and Van Simaey, 2005, p.163, pl.3, figs.3–4,6. Holotype: Heilmann-Clausen and Van Simaey, 2005, pl.3, fig.3. Age: middle Eocene.

"*pusillum*" (Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.53–54, pl.12, figs.1–6) Fensome and Williams 2004, p.220. Holotype: Liu Zhili et al., 1992, pl.12, fig.2. Originally *Bipolaribucina*, subsequently *Distatodinium*. **Taxonomic senior synonym**: *Oligosphaeridium minus*, according to He Chengquan et al. (2009, p.116). Age: Early Tertiary.

scariosum Liengjarern et al., 1980, p.477,481, pl.54, fig.3. Holotype: Liengjarern et al., 1980, pl.54, fig.3. Age: early Oligocene.

solidum Châteauneuf, 1980, p.137, pl.22, figs.1–2. Holotype: Châteauneuf, 1980, pl.22, fig.1; Fauconnier and Masure, 2004, pl.22, fig.11. Age: middle-late Eocene (Lutetian–Ludian).

tenerum (Benedek, 1972, p.35, pl.10, figs.13–14; text-fig.14) Eaton, 1976, p.263. Emendation: Benedek and Sarjeant, 1981, p.347–348, as *Distatodinium tenerum*. Holotype: Benedek, 1972, pl.10, fig.13; Benedek and Sarjeant, 1981, fig.1, no.5. Originally *Tanyosphaeridium*, subsequently (and now) *Distatodinium*. Age: middle Oligocene.

"*tuberculatum*" (Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.54, pl.12, fig.13) Fensome and Williams 2004, p.221. Holotype: Liu Zhili et al., 1992, pl.12, fig.13. **NOW** *Gagiella*. Originally *Bipolaribucina*?, subsequently *Distatodinium*, thirdly (and now) *Distatodinium*. Age: Early Tertiary.

virgatum Stover, 1977, p.75–76, pl.1, figs.20–21. Holotype: Stover, 1977, pl.1, figs.20–21. Age: early Oligocene.

"**DIVERSISPINA**" Benson, 1976, p.184. **Taxonomic senior synonym:** *Kleithriasphaeridium*, according to Stover and Evitt (1978, p.167–168). Type: Benson, 1976, pl.2, figs.6–9, as *Diversispina truncata*.

"**truncata*" Benson, 1976, p.184–185, pl.2, figs.6–9. Holotype: Benson, 1976, pl.2, figs.6–9. **NOW** *Kleithriasphaeridium*. Originally *Diversispina*, subsequently (and now) *Kleithriasphaeridium*. Taxonomic junior synonym: *Cordosphaeridium digitatum* (name not validly published), according to Slimani (2001a, p.193). Age: late Maastrichtian–early Paleocene.

DODEKOVIA Dörrhöfer and Davies, 1980, p.26. Emendation: Below, 1987a, p.113–114. Taxonomic senior synonym: *Apteodinium*, according to Stover and Williams (1987, p.87) — however, Prauss (1989, p.18) and Fensome et al. (1993b, p.149–150) retained *Dodekovia*. Taxonomic junior synonyms: *Ovalicysta*, *Parvocysta* and *Susadinium*, all according to Below (1987a, p.113) — however, Stover and Williams (1987, p.169,171,209) and Lentin and Williams (1989, p.269,284,358) retained *Ovalicysta*, *Parvocysta* and *Susadinium*. Type: Dörrhöfer and Davies, 1980, figs.26A–D, as *Dodekovia syzygia*.

"*bullula*" (Bjaerke, 1980, p.62,64, pl.1, figs.2–6,9; text-fig.3C) Below, 1987a, p.115. Holotype: Bjaerke, 1980, pl.1, figs.4–5; Fensome et al., 1993a, figs.4–5 — p.997. **NOW** *Parvocysta*. Originally (and now) *Parvocysta*, subsequently *Dodekovia*. N.I.A. Age: Toarcian.

"*gochti*" (Dodekova, 1975, p.31, pl.3, figs.8,10–13) Dörrhöfer and Davies, 1980, p.26. Holotype: Dodekova, 1975, pl.3, fig.10. **NOW** *Chytroeisphaeridia*. Originally *Tectatodinium*, subsequently *Dodekovia*, thirdly (and now) *Chytroeisphaeridia*. Age: late Bathonian.

"*knertensis*" Below, 1987a, p.115–116, pl.16, figs.1–18. Holotype: Below, 1987a, pl.16, figs.3–6,14,18; Fensome et al., 1993a, figs.1–4,6 — p.1243. **NOW** *Susadinium*. Originally *Dodekovia*, subsequently (and now) *Susadinium*. Age: Toarcian.

"*pinna*" Below, 1987a, p.116–118, pl.14, figs.1–5,11; text-figs.65a–b. Holotype: Below, 1987a, pl.14, figs.1,3,5; Fensome et al., 1993a, figs.1,3–4 — p.1281. **NOW** *Susadinium*?. Originally *Dodekovia*, subsequently (and now) *Susadinium*?. N.I.A. Age: Toarcian.

"*pseudochytrooides*" Below, 1987a, p.118–119, pl.15, figs.4–10. Holotype: Below, 1987a, pl.15, figs.7–10; Fensome et al., 1993a, figs.3–6 — p.1291. **NOW** *Pareodinia*?. Originally *Dodekovia*, subsequently (and now) *Pareodinia*?. Age: Toarcian.

"*reticulata*" Below, 1987a, p.119, pl.15, figs.11–15. Holotype: Below, 1987a, pl.15, figs.11–15; Fensome et al., 1993a, figs.1–5 — p.1301. **NOW** *Pareodinia*?. Originally *Dodekovia*, subsequently (and now) *Pareodinia*?. Age: Toarcian.

"*scrofoides*" (Dörrhöfer and Davies, 1980, p.28–29, figs.13,24F,H–I,K,25A–D) Below, 1987a, p.120. Holotype: Dörrhöfer and Davies, 1980, fig.24I; Fensome et al., 1993a, fig.1 — p.1311; fig.2 — p.1315. **NOW** *Susadinium*. Originally (and now) *Susadinium*, subsequently *Dodekovia*. Taxonomic junior synonyms: *Parvocysta contracta* and *Facetodinium* (as *Susadinium*) *inflatum*, both according to Below (1987a, p.120). Below (1987a, p.120) provided an emendation, but apparently for *Dodekovia scrofoides* var. *scrofoides*. Age: Toarcian–Bathonian.

"var. *penicillus*" Below, 1987a, p.121, pl.17, figs.1–2,7–15,17,18. Holotype: Below, 1987a, pl.17, figs.9–12; Fensome et al., 1993a, figs.5–7 — p.1279; fig.2 — p.1311. **NOW** *Susadinium scrofoides* subsp. *penicillus*. Originally *Dodekovia scrofoides* var. *penicillus*, subsequently (and now) *Susadinium scrofoides* subsp. *penicillus*. N.I.A. Age: Toarcian.

"var. *scrofoides*". Autonym. Holotype: Dörrhöfer and Davies, 1980, fig.24I; Fensome et al., 1993a, fig.1 — p.1311; fig.2 — p.1315. **Now redundant**. Emendation: Below, 1987a, p.120.

**syzygia* Dörhöfer and Davies, 1980, p.26, figs.11,23B,E,H;26A–D,F–G. Emendation: Below, 1987a, p.121–122, as *Dodekovia syzygia*. Holotype: Dörhöfer and Davies, 1980, figs.26A–D; Fensome et al., 1995, figs.1–4 — p.1827. Originally (and now) *Dodekovia*, subsequently *Apteodinium*. Prauss (1989, p.19) retained this species in *Dodekovia*. Taxonomic junior synonym: *Ovalicysta hiata*, according to Below (1987a, p.121) — however, Lentin and Williams (1989, p.269) retained *Ovalicysta hiata*. Age: Toarcian–Bathonian.

"*tabulata*" Below, 1987a, p.123,125, pl.13, figs.1–15; text-figs.66a–i. Holotype: Below, 1987a, pl.13, figs.1,4,8,12,13; Fensome et al., 1993a, figs.1,3,5–6 — p.1365. **NOW** *Susadinium*?. Originally *Dodekovia*, subsequently (and now) *Susadinium*?. Age: Toarcian.

tegillata Prauss, 1989, p.19–20, pl.3, figs.1–6,10–12; text-fig.4. Holotype: Prauss, 1989, pl.3, figs.4–6; text-fig.4. Age: late Toarcian–early Aalenian.

"**DOIDYX**" Sarjeant, 1966c, p.205. **Taxonomic senior synonym:** *Pseudoceratium*, according to Bint (1986, p.144). Taxonomic senior synonym: *Aptea*, according to Sarjeant and Stover (1978, p.51) — however, *Aptea* is now considered to be a taxonomic junior synonym of *Pseudoceratium*. Type: Sarjeant, 1966c, pl.22, fig.8; text-fig.55, as *Doidyx anaphrissa*.

"**anaphrissa*" Sarjeant, 1966c, p.206, pl.22, fig.8; pl.23, fig.6; text-fig.55. Emendation: Harding, 1990b, p.17–18, as *Pseudoceratium anaphrissum*. Holotype: Sarjeant, 1966c, pl.22, fig.8; text-fig.55. **NOW** *Pseudoceratium*. Originally *Doidyx*, subsequently *Tenua* Eisenack, thirdly *Aptea*, fourthly (and now) *Pseudoceratium*. Age: early Barremian.

"*granulata*" Horowitz, 1975, p.25, pl.1, fig.4. Holotype: Horowitz, 1975, pl.1, fig.4. **NOW** *Cyclonephelium*?. Originally *Doidyx*, subsequently (and now) *Cyclonephelium*?. Age: Late Triassic (probably not in place).

DOLICHODINIUM Williams et al., 2015, p.303. Type: Michoux, 1988, pl.7, figs.1–5, text-fig.12, as *Wetziella uncinata*.

**uncinatum* (Michoux, 1988, p.36,38, pl.7, figs.1–6; pl.8, figs.1–7: text-fig.12) Williams et al. 2015, p.303. Holotype: Michoux, 1988, pl.7, figs.1–5; text-fig.12. Originally *Wetziella*, subsequently (and now) *Dolichodinium*. Age: early Eocene.

?*unicaudale* (Caro, 1973, p.366,368, pl.5, figs.1,9) Williams et al. 2015, p.303. Holotype: Caro, 1973, pl.5, fig.1. Originally *Wetziella*, subsequently (and now) *Dolichodinium*? Questionable assignment: Williams et al. (2015, p.303). Age: early Eocene.

DOLLIDIINIUM Helby and Stover, 1987b, p.159–160. Type: Cookson and Eisenack, 1960b, pl.38, fig.16, as *Palaeostomocystis sinuosa* (see *Dollidinium sinuosum* for lectotype).

**sinuosum* (Cookson and Eisenack, 1960b, p.258, pl.38, figs.16–17) Helby and Stover, 1987b, p.160. Emendation: Helby and Stover, 1987b, p.160, as *Dollidinium sinuosum*. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.16; Fensome et al., 1996, fig.1 — p.2363; lost according to Helby and Stover (1987b, p.164). Lectotype: Helby and Stover, 1987b, figs.4A–C; Fensome et al., 1996, fig.2 — p.2363; designated as a neotype by Helby and Stover (1987b, p.164). Originally *Palaeostomocystis* (Appendix A), subsequently (and now) *Dollidinium*. Age: Tithonian–Berriasian.

DOROCYSTA Davey, 1970, p.358. Type: Davey, 1970, pl.5, fig.6; text-fig.2A, as *Dorocysta litotes*.

**litotes* Davey, 1970, p.358–359, pl.5, figs.6–7; text-fig.2A. Holotype: Davey, 1970, pl.5, fig.6; text-fig.2A. Age: Cenomanian.

DOWNIESPHAERIDIUM Islam, 1993, p.83. Emendation: Masure in Fauconnier and Masure, 2004, p.195. Type: Islam, 1983b, pl.2, fig.1, as *Cleistosphaeridium spinulastrum*.

?**aciculare** (Davey, 1969a, p.158, pl.6, figs.11–12) Islam, 1993, p.83–84. Holotype: Davey, 1969a, pl.6, figs.11–12; Fauconnier and Masure, 2004, pl.23, fig.9. Originally *Cleistosphaeridium*, subsequently *Downiesphaeridium*, thirdly (and now) *Downiesphaeridium?*. Questionable assignment: Masure in Fauconnier and Masure (2004, p.196). Age: Albian–Cenomanian.

armatum (Deflandre, 1937b, p.76–77, pl.16 [al. pl.13], figs.6–7) Islam, 1993, p.84. Emendation: Davey, 1969a, p.153, as *Cleistosphaeridium armatum*. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), fig.6; Fauconnier and Masure, 2004, pl.23, figs.1–3. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly (and now) *Downiesphaeridium*. Age: late Senonian.

"**bergmannii**" (Archangelsky, 1969a, p.414–415, pl.2, figs.8,11) Quattrocchio and Sarjeant, 1996, p.119–120. Holotype: Archangelsky, 1969a, pl.2, fig.11. **NOW** *Lingulodinium*. Originally *Cleistosphaeridium*, subsequently *Operculodinium*, thirdly *Downiesphaeridium*, fourthly (and now) *Lingulodinium*. Taxonomic junior synonyms: *Solisphaeridium filamentosum* (Appendix A) and *Impletosphaeridium charrieri*, both according to Quattrocchio and Sarjeant (2003, p.142). Age: Eocene.

?**bulbum** (Yu Jingxian, 1989, p.140, pl.51, figs.8–9) Williams et al., 1998, p.203. Holotype: Yu Jingxian, 1989, pl.51, fig.8. Originally *Cleistosphaeridium*, subsequently *Downiesphaeridium*, thirdly (and now) *Downiesphaeridium?*. Questionable assignment: Masure in Fauconnier and Masure (2004, p.196). Age: Eocene.

flexuosum (Davey et al., 1966, p.169, pl.2, fig.5) Islam, 1993, p.84. Holotype: Davey et al., 1966, pl.2, fig.5; Fauconnier and Masure, 2004, pl.23, fig.8. Originally *Cleistosphaeridium?*, subsequently *Polysphaeridium?*, thirdly *Cleistosphaeridium*, fourthly (and now) *Downiesphaeridium*. Age: Cenomanian.

iaculigerum (Klement, 1960, p.57–58, pl.7, fig.10) Williams et al., 1998, p.203. Emendation: Sarjeant, 1984a, p.171, as *Operculodinium? iaculigerum*. Holotype: Klement, 1960, pl.7, fig.10; Sarjeant, 1984a, pl.2, fig.5; text-fig.7; Brenner, 1988, pl.14, fig.7; Fauconnier and Masure, 2004, pl.23, figs.4–5. Originally *Baltisphaeridium* (Appendix A), subsequently *Operculodinium?*, thirdly *Cleistosphaeridium*, fourthly (and now) *Downiesphaeridium*. Taxonomic junior synonym: *Cleistosphaeridium? polyacanthum*, according to Brenner (1988, p.42) — however, Islam (1993, p.84) retained *Cleistosphaeridium?* (as *Downiesphaeridium polyacanthum*). Age: middle Kimmeridgian.

multispinosum (Singh, 1964, p.141–142, pl.20, figs.1–2) Islam, 1993, p.84. Holotype: Singh, 1964, pl.20, fig.1; Fauconnier and Masure, 2004, pl.23, fig.10. **NOW** *Cometodinium*. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Cleistosphaeridium?*, fourthly *Downiesphaeridium*, fifthly (and now) *Cometodinium*. Age: middle Albian–early Cenomanian.

"**polyacanthum**" (Gitmez, 1970, p.284–286, pl.12, fig.10; text-fig.22) Islam, 1993, p.84. Holotype: Gitmez, 1970, pl.12, fig.10; text-fig.22b; Fauconnier and Masure, 2004, pl.23, figs.6–7. Originally *Cleistosphaeridium*, subsequently *Cleistosphaeridium?*, thirdly *Downiesphaeridium*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Impletosphaeridium?*) *polytrichum*, according to Masure in Fauconnier and Masure (2004, p.196). Taxonomic senior synonym: *Baltisphaeridium* (as *Cleistosphaeridium*) *iaculigerum*, according to Brenner (1988, p.42) — however, neither Islam (1993, p.84), who retained *Downiesphaeridium polyacanthum*, nor Masure in Fauconnier and Masure (2004, p.196) followed this synonymy. Age: early Kimmeridgian.

"**polytrichum**" (Valensi, 1947, p.818; text-fig.4) Masure in Fauconnier and Masure, 2004, p.196. Holotype: Valensi, 1947, text-fig.4; Fauconnier and Masure, 2004, pl.24, figs.1–6. **NOW** *Impletosphaeridium?* Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Impletosphaeridium*, fifthly *Downiesphaeridium*, sixthly (and now) *Impletosphaeridium?*. Taxonomic junior synonym: *Cleistosphaeridium* (as *Downiesphaeridium polyacanthum*), according to Masure in Fauconnier and Masure (2004, p.196). Age: late Bathonian.

sarmentum (Stancliffe, 1991, p.187–188, pl.1, figs.1–2; pl.2, fig.6; text-figs.5A–B) Masure in Fauconnier and Masure, 2004, p.196. Holotype: Stancliffe, 1991, pl.1, figs.1–2; text-figs.5A–B. Originally *Cleistosphaeridium*, subsequently *Impletosphaeridium*, thirdly (and now) *Downiesphaeridium*. N.I.A. Age: late Oxfordian.

***spinulastrum** (Islam, 1983b, p.337–338, pl.2, figs.1–2) Islam, 1993, p.84. Holotype: Islam, 1983b, pl.2, fig.1; Islam, 1993, pl.1, fig.11. Originally *Cleistosphaeridium*, subsequently (and now) *Downiesphaeridium*. Age: middle Eocene.

tribuliferum (Sarjeant, 1962a, p.487, pl.70, fig.4; text-figs.6c,7) Masure in Fauconnier and Masure, 2004, p.196). Holotype: Sarjeant, 1962a, pl.70, fig.4; Fauconnier and Masure, 2004, pl.23, fig.11. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Cleistosphaeridium?*, fourthly *Impletosphaeridium*, fifthly (and now) *Downiesphaeridium*. Age: Oxfordian.

DRACODINIUM Gocht, 1955, p.87. Emendations: Bujak et al., 1980, p.28; Williams et al., 2015, p.303. Taxonomic senior synonym: *Wetziella*, by implication in Williams and Downie (1966b, p.195), who transferred the "type species" of *Dracodinium*, *Dracodinium solidum*, to *Wetziella* — however, Costa and Downie (1979, p.36) and Lentin and Williams (1989, p.121) retained *Dracodinium*. Type: Gocht, 1955, text-figs.3a–b, as *Dracodinium solidum*.

astra (Denison in Costa et al., 1978, p.263, text-fig.2) Williams et al., 2015, p.304. Holotype: Costa et al., 1978, text-fig.2; Jolley and Spinner, 1989, pl.1, figs.3–4. Originally *Wetziella*, subsequently (and now) *Dracodinium*. N.I.A. Age: early Eocene.

?**brevicornutum** (Heilmann-Clausen in Heilmann-Clausen and Costa, 1989, p.472, pl.6, figs.1,6) Williams et al., 2015, p.304. Holotype: Heilmann-Clausen and Costa, 1989, pl.6, fig.1. Originally *Wetziella articulata* subsp. *brevicornuta*, subsequently (and now) *Dracodinium? brevicornutum*. Questionable assignment: Williams et al. (2015, p.304). Age: late Ypresian.

"**condylos**" (Williams and Downie, 1966b, p.193–194, pl.20, figs.1–2) Costa and Downie, 1979, p.43. Holotype: Williams and Downie, 1966b, pl.20, fig.1. **NOW** *Petalodinium*. Originally *Wetziella*, subsequently *Rhombodinium*, thirdly *Dracodinium*, fourthly (and now) *Petalodinium*. N.I.A. Age: early Eocene.

coronatum (Vozzhennikova, 1967, p.170–171, pl.89, figs.1–3,5; pl.90, figs.1–5) Williams et al. 2015, p.304. Holotype: Vozzhennikova, 1967, pl.89, fig.1; pl.90, fig.4; Lentin and Vozzhennikova, 1990, text-fig.43; lost according to Lentin and Vozzhennikova (1990, p.80). Neotype: Iakovleva and Heilmann-Clausen, 2010, pl.12, fig.4, designated by Iakovleva and Heilmann-Clausen (2010, p.211). Originally *Rhombodinium*, subsequently *Wetziella*, thirdly (and now) *Dracodinium*. Taxonomic senior synonym: *Wetziella articulata*, according to Costa and Downie (1979, p.430) — however, Iakovleva and Heilmann-Clausen (2010, p. 211,226) retained *Rhombodinium* (as *Wetziella*) *coronatum*. Age: Ypresian.

crispum (Agelopoulos, 1967, p.21–22, pl.3, fig.8; pl.4, figs.5a–b) Williams et al. 2015, p.304. Holotype: Agelopoulos, 1967, pl.3, fig.8. Originally *Wetziella*, subsequently (and now) *Dracodinium*. Age: late Eocene.

eocaenicum (Agelopoulos, 1967, p.16–17, pl.2, figs.6–7; pl.3, figs.1–7) Williams et al., 2015, p.304. Holotype: Agelopoulos, 1967, pl.3, fig.4. Originally *Wetziella*, subsequently (and now) *Dracodinium*. Taxonomic junior synonym: *Wetziella* (subsequently *Dracodinium*) *pachyderma*, by implication in Caro (1973, p.365), who considered the name *Wetziella eocaenica* to be not effectively published; and according to Williams et al. (2015, p.304). Age: latest Ypresian.

"**granulatum**" (Wilson, 1967c, p.493, figs.29–30) Lentin and Williams, 1981, p.92. Holotype: Wilson, 1967c, fig.30. **NOW** *Epelidinium? granulatum*. Originally *Wetziella* (*Rhombodinium*) *glabra* var. *granulata*, subsequently *Rhombodinium glabrum* subsp. *granulatum*, thirdly *Dracodinium granulatum*, fourthly (and now) *Epelidinium? granulatum*. Age: late Eocene.

"*laszczynskii*" Gedl, 1995, p.205, pl.7, figs.11,13. Holotype: Gedl, 1995, pl.7, fig.13. **NOW** *Petalodinium*. Originally *Dracodinium*, subsequently (and now) *Petalodinium*. Age: early-middle Eocene.

lobiscum (Williams and Downie, 1966b, p.196, pl.20, fig.3) Williams et al., 2015, p.304. Holotype: Williams and Downie, 1966b, pl.20, fig.3. Originally *Wetziella symmetrica* var. *lobisca*, subsequently *Wetziella symmetrica* subsp. *lobisca*, thirdly *Wetziella meckelfeldensis* subsp. *lobisca*, fourthly *Wetziella lobisca*, fifthly (and now) *Dracodinium lobiscum*. Age: earliest Eocene.

magnificum (Iakovleva and Kulkova, 2001, p.18, pl.6, figs.3–4; text-fig.11) Williams et al., 2015, p.304. Holotype: Iakovleva and Kulkova, 2001, pl.6, figs.3–4; text-fig.11. Originally *Wetziella coronata* subsp. *magnifica*, subsequently *Wetziella articulata* subsp. *magnifica*, thirdly (and now) *Dracodinium magnificum*. Age: Ypresian.

modestum Iakovleva, 2016, p.5 (on PDF initially published online), pl.3, figs.3,6; text-fig.4b (part). Holotype: Iakovleva, 2016, pl.3, figs.3,6. Age: earliest Eocene.

"*pachydermum*" (Caro, 1973, p.365, pl.3, figs.4–6) Costa and Downie, 1979, p.44. Holotype: Caro, 1973, pl.3, fig.4. Originally *Wetziella*, subsequently *Dracodinium*. **Taxonomic senior synonym:** *Wetziella* (now *Dracodinium*) *eocaenicum*, by implication in Caro (1973, p.365), who considered the name *Wetziella eocaenica* to be not effectively published; and according to Williams et al. (2015, p.304). Age: latest Ypresian.

parcilimbatum Vasilyeva, 2013, p.119,121, pl.2, figs.1–4. Holotype : Vasilyeva, 2013, pl.2, fig.2. Age: Ypresian–Lutetian.

"*politum*" Bujak et al., 1980, p.29, pl.11, fig.1. Holotype: Williams and Downie, 1966b, pl.19, fig.9 (see discussion below), as *Wetziella glabra*; not Bujak et al., 1980, pl.11, fig.1 as indicated in Williams et al. (1998, p.204). **NOW** *Rhadinodinium*. Originally *Dracodinium*, subsequently (and now) *Rhadinodinium*. Aside from the holotype of *Dracodinium* (now *Rhadinodinium*) *politum* being incorrectly indicated in Williams et al. (1998), confusion is caused by the fact that the plates and captions in the originally-issued protologue publication were mixed up. Hence, in Williams and Downie (1966b, original issue), the holotype appears as pl.19, fig.9, opposite the caption labelled plate 19 but clearly intended as caption to the plate labelled 20; the correct caption for the plate labelled 19 is opposite the plate labelled 20. In the 1983 issue of the monograph, these problems were corrected and the holotype of *Dracodinium* (now *Rhadinodinium*) *politum* is pl.20, fig.9. Age: early Eocene.

"subsp. *politum*". Autonym. **Now redundant.** Holotype: Williams and Downie, 1966b, pl.19, fig.9: see discussion under *Dracodinium politum*.

"subsp. *spinulum*" Islam, 1983a, p.236, pl.2, fig.4. **NOW** *Petalodinium spinulum*. Originally *Dracodinium politum* subsp. *spinulum*, subsequently (and now) *Petalodinium spinulum*. Holotype: Islam, 1983a, pl.2, fig.4. Age: early Eocene.

"*rhomboideum*" (Alberti, 1961, p.10, pl.1, figs.1–5; pl.12, fig.9) Costa and Downie, 1979, p.44. Holotype: Alberti, 1961, pl.1, fig.3; pl.12, fig.9. **NOW** *Petalodinium*. Originally *Wetziella* subgenus *Rhombodinium*, subsequently *Rhombodinium*, thirdly *Dracodinium*, fourthly (and now) *Petalodinium*. Age: late Eocene.

"subsp. *ovale*" Andreeva-Grigorovich and Savitskaya, 1993, p.44–45, pl.1, figs.5,7–8. Holotype: Andreeva-Grigorovich and Savitskaya, 1993, pl.1, fig.5; Andreeva-Grigorovich et al., 2011, pl.20, fig.2. **NOW** *Petalodinium rhomboideum?* subsp. *ovale*. Originally *Dracodinium rhomboideum?* subsp. *ovale*, subsequently (and now) *Petalodinium rhomboideum?* subsp. *ovale*. Andreeva-Grigorovich and Savitskaya (1993) cited this taxon as "*Dracodinium rhomboideum* subsp. *ovale* (Grigorovich, 1971) emend. Andreeva-Grigorovich and Savitskaya". However, *Rhombodinium rhomboideum* forma *ovale* was not validly published in Grigorovich (1971), since that author did not provide a description. Age: early Eocene.

subsp. *rhomboideum*. Autonym. Holotype: Alberti, 1961, pl.1, fig.3.

samladicum (Eisenack, 1954b, p.59, pl.8, figs.11–12) Costa and Downie, 1979, p.44. Holotype: Eisenack, 1954b, pl.8, fig.11. Originally *Wetziella*, subsequently (and now) *Dracodinium*. Neumann (1990, p.163) retained this

species in *Wetziella* — however, Williams et al. (2015, p.304) retained the species in *Dracodinium*. Age: early Eocene.

simile (Eisenack, 1954b, p.58–59, pl.8, figs.8–10) Costa and Downie, 1979, p.44. Holotype: Eisenack, 1954b, pl.8, fig.10. Originally *Wetziella*, subsequently (and now) *Dracodinium*. Age: early Oligocene.

**solidum* Gocht, 1955, p.88; text-figs.3a–b,4a–c,5a–c. Holotype: Gocht, 1955, text-figs.3a–b. Originally (and now) *Dracodinium*, subsequently *Wetziella*. Costa and Downie (1979, p.43) retained this species in *Dracodinium*. Age: Eocene or Oligocene.

"*variabile*" He Chengquan, 1991, p.92, pl.35, fig.1; text-fig.12. Holotype: He Chengquan, 1991, pl.35, fig.1; text-fig.12. **NOW** *Rhombodinium*. Originally *Dracodinium*, subsequently (and now) *Rhombodinium*. Age: late Eocene.

varielongitutum (Williams and Downie, 1966b, p.196–197, pl.20, figs.4,8) Costa and Downie, 1979, p.44. Holotype: Williams and Downie, 1966b, pl.20, fig.4. Originally *Wetziella*, subsequently (and now) *Dracodinium*. Age: early Eocene.

"*waipawaense*" (Wilson, 1967c, p.493–494, figs.18,20) Costa and Downie, 1979, p.44. Holotype: Wilson, 1967c, fig.18. **NOW** *Petalodinium*. Originally *Wetziella* subgenus *Rhombodinium*, subsequently *Rhombodinium*, thirdly *Dracodinium*, fourthly (and now) *Petalodinium*. Age: early Eocene.

wetziellii (Agelopoulos, 1967, p.17–18, pl.2, figs.4,5a–b) Williams et al., 2015, p.304. Holotype: Agelopoulos, 1967, pl.2, figs.5a–b. Originally *Wetziella*, subsequently (and now) *Dracodinium*. Age: late Eocene.

DRUGGIDIUM Habib, 1973, p.49,51. Emendation: Harding, 1986b, p.18–19. Taxonomic senior synonym: *Raphidodinium*, according to Below (1987b, p.57) — however, Lentin and Williams (1989, p.121) retained *Druggidium*. Type: Habib, 1973, pl.1, fig.3; text-fig.3, as *Druggidium apicopaucicum*.

**apicopaucicum* Habib, 1973, p.51–52, pl.1, figs.1–3; pl.3, figs.1–3; text-fig.3. Holotype: Habib, 1973, pl.1, fig.3; text-fig.3. Originally (and now) *Druggidium*, subsequently *Raphidodinium*. Lentin and Williams (1989, p.121) retained this species in *Druggidium*. Age: Berriasian–Barremian.

augustum Harding, 1986b, p.20–21, pl.2, figs.1–9; text-fig.3. Holotype: Harding, 1986b, pl.2, figs.1–2. Originally (and now) *Druggidium*, subsequently *Raphidodinium*. Lentin and Williams (1989, p.122) retained this species in *Druggidium*. Age: late Hauterivian–early Barremian.

deflandrei (Millioud, 1969, p.429–430, pl.2, figs.5–7) Habib, 1973, p.52. Emendations: Habib, 1973, p.52, as *Druggidium deflandrei*; Below, 1987b, p.58–59, as *Raphidodinium deflandrei*. Holotype: Millioud, 1969, pl.2, figs.5–6. Originally *Microdinium*, subsequently (and now) *Druggidium*, thirdly *Raphidodinium*. Lentin and Williams (1989, p.122) retained this species in *Druggidium*. Age: Barremian.

discretum Slimani and Louwye, 2011, p.43. pl.1, figs.1–15. Holotype: Slimani and Louwye, 2011, pl.1, figs.1–4. Age: latest Maastrichtian.

"*fourmarieri*" (Lejeune-Carpentier, 1951, p.B311; text-fig.7) Lejeune-Carpentier and Sarjeant, 1983, p.2. Emendations: Lejeune-Carpentier and Sarjeant, 1983, p.2, as *Druggidium fourmarieri*; Slimani and Louwye, 2011, p.48, as *Phanerodinium fourmarieri*. Holotype: Lejeune-Carpentier, 1951, text-fig.7; Streel et al., 1977, pl.2, fig.10. **NOW** *Phanerodinium*. Originally (and now) *Phanerodinium*, subsequently *Druggidium*, thirdly *Druggidium*? Questionable assignment: Below (1987b, p.39), as a "nomen dubium". Age: Late Cretaceous.

jubatam Duxbury, 1980, p.117, pl.3, figs.3–4. Emendation: Harding, 1986b, p.19–20. Holotype: Duxbury, 1980, pl.3, fig.3. Age: Barremian.

?*laeve* (Lejeune-Carpentier, 1951, p.B310–B311; text-fig.6) Lejeune-Carpentier and Sarjeant, 1983, p.4. Emendation: Lejeune-Carpentier and Sarjeant, 1983, p.4, as *Druggidium laeve*. Holotype: Lejeune-Carpentier,

1951, text-fig.6. Originally *Phanerodinium cayeuxi* var. *laeve*, subsequently *Phanerodinium cayeuxi* subsp. *laeve*, thirdly *Druggidium laeve*, fourthly (and now) *Druggidium? laeve*. Questionable assignment: Below (1987b, p.39), as a "nomen dubium". Harding (1986b, p.19) recommended that this name be restricted to the holotype. Age: Senonian.

meerensis Slimani and Louwye, 2011, p.43–44. pl.1, figs.16–25, pl.2, figs.1–5. Holotype: Slimani and Louwye, 2011, pl.1, figs.16–19. Age: late Maastrichtian–early Danian.

rhabdoreticulatum Habib, 1973, p.53, pl.2, figs.3–7. Holotype: Habib, 1973, pl.2, fig.6. Originally (and now) *Druggidium*, subsequently *Raphidodinium*. Lentin and Williams (1989, p.122) retained this species in *Druggidium*. Age: Valanginian–Albian.

DUBRIDINIUM Reid, 1977, p.449. Type: Reid, 1977, pl.3, figs.35–37, as *Dubridinium cavatum*.

caperatum Reid, 1977, p.451–452, pl.4, figs.38–41,44. Holotype: Reid, 1977, pl.4, figs.38–40. Motile equivalent: *Preperidinium meunieri* (Pavillard, 1912) Elbrächter, 1993, according to Reid (1977, p.451), who used the name *Diplopeltopsis minor* (Paulsen, 1907) Pavillard, 1913, now considered a taxonomic junior synonym of *Preperidinium meunieri* (see Head, 1996b, p.1211). Age: Holocene.

cassiculus Reid, 1977, p.452–453, pl.4, figs.42–43,45. Holotype: Reid, 1977, pl.4, figs.42–43. N.I.A. Age: Holocene.

**cavatum* Reid, 1977, p.449–450, pl.3, figs.34–37. Holotype: Reid, 1977, pl.3, figs.35–37; Fensome et al., 1993a, figs.1–3 — p.1041. Motile equivalent: *Diplopsalopsis orbicularis* (Paulsen, 1907) Meunier, 1909, questionably according to Reid (1977, p.431) and according to Dale (1983, p.92). Age: Holocene.

ulsterum Reid, 1977, p.453–454, pl.4, figs.46–48. Holotype: Reid, 1977, pl.4, figs.46–47. Age: Holocene.

DUOSPHERIDIUM Davey and Williams, 1966b, p.97. Although the "type species" was not validly transferred by Davey and Williams (1966b), the generic name *Duosphaeridium* was validly published by these authors, since it is based on a previously validly published species name. Type: Cookson, 1965a, pl.10, fig.1, as *Diphyes nudum*.

**nudum* (Cookson, 1965a, p.87, pl.10, figs.1–4) Loeblich Jr. and Loeblich III, 1968, p.211. Holotype: Cookson, 1965a, pl.10, fig.1. Originally *Diphyes*, subsequently (and now) *Duosphaeridium*. This combination was not validly published by Davey and Williams (1966b, p.97), since these authors did not fully reference the basionym. Age: late Eocene.

rugosum Drugg, 1970b, p.816–817, figs.11A–C. Holotype: Drugg, 1970b, figs.11A–B. Age: Danian.

DUOTRIGIA Bailey, 1987, p.89,91,94. Nomenclatural junior synonym: *Baileyella*. Özdikmen (2009, p.234) considered *Durotrigia* Bailey to be illegitimate because it is a junior homonym of *Durotrigia* Hoffstetter, 1967; however, *Durotrigia* Hoffstetter is an animal and under the I.C.N. it does not pre-empt *Durotrigia* Bailey. Type: Bailey, 1987, pl.2, figs.1,4,9, as *Durotrigia daveyi*.

asketa Bailey, 1990, p.140, pl.2, figs.1–5; text-fig.3. Holotype: Bailey, 1990, pl.2, figs.1–3. Age: early Bathonian–earliest Callovian.

aspera Bailey and Partington, 1991, p.246,248, pl.2, figs.1–6,9 (not text-fig.3). Holotype: Bailey and Partington, 1991, pl.2, figs.1–2. Age: Bathonian.

**daveyi* Bailey, 1987, p.89,91,94, pl.1, figs.1–5; pl.2, figs.1–11; text-figs.2A–D. Holotype: Bailey, 1987, pl.2, figs.1,4,9; Fensome et al., 1993a, figs.1–2 — p.1095. Originally (and now) *Durotrigia*, subsequently *Baileyella* (generic name illegitimate). Age: early Bajocian.

filipicata (Gocht, 1970b, p.134–135, pl.26, figs.4,6–9; pl.27, figs.1–3,7; pl.28, fig.3; pl.31, figs.1–5; text-figs.2a,3–4) Riding and Bailey, 1991, p.100. Emendation: Riding and Bailey, 1991, p.101, as *Durotrigia filipicata*. Holotype: Gocht, 1970b, pl.31, fig.1. Originally *Gonyaulacysta*, subsequently *Diacanthum*, thirdly *Dichadogonyaulax*?, fourthly *Diacanthum*?, fifthly (and now) *Durotrigia*. Age: early Bathonian.

magna Riding and Helby, 2001d, p.73,75, figs.6A–F. Holotype: Riding and Helby, 2001d, fig.6B. Age: late Callovian.

omentifera Feist-Burkhardt and Monteil, 2001, p.76–77, fig.7; fig.13, nos.1–3; fig.14, nos.1–5; fig.15, nos.1–5; fig.20, nos.2–6. Holotype: Feist-Burkhardt and Monteil, 2001, fig.13, no.1; fig.20, no.4. Age: late Bajocian–early Bathonian.

vesiculata Bailey, 1990, p.140–141, pl.1, figs.1–12; pl.3, figs.1–8. Holotype: Bailey, 1990, pl.1, figs.1–2. Age: late Bajocian–?late Bathonian.

EATONICYSTA Stover and Evitt, 1978, p.41. Emendation: Stover and Williams, 1995, p.103–104. Type: Morgenroth, 1966a, pl.3, fig.11, as *Cannosphaeropsis ursulae*.

exilis Pearce, 2010, p.60, pl.3, figs.6–12. Holotype: Pearce, 2010, pl.3, figs.6–12. Age: late Campanian–early Maastrichtian.

furensis (Heilmann-Clausen in Heilmann-Clausen and Costa, 1989, p.466, pl.11, figs.1–3,5–7) Stover and Williams, 1995, p.104. Holotype: Heilmann-Clausen, 1982, fig.3A; Heilmann-Clausen and Costa, 1989, pl.11, fig.7. Originally *Eatonicysta ursulae* subsp. *furensis*, subsequently (and now) *Eatonicysta furensis*. Age: early Eocene.

"*hapala*" Schiøler and Wilson, 1993, p.346–347, pl.2, figs.1–7; text-figs.12a–b. Holotype: Schiøler and Wilson, 1993, pl.2, fig.6. **NOW** *Membranilarnacia*. Originally *Eatonicysta*, subsequently (and now) *Membranilarnacia*. Age: late Campanian–early Maastrichtian.

"*intermedia*" Stover and Williams, 1995, p.100. **Name not validly published**: no description or illustration.

mutabilireta Pearce, 2010, p.60,62, pl.4, figs.1–6. Holotype: Pearce, 2010, pl.4, figs.1–6. Age: early Campanian.

"*pterococcoides*" (Wetzel, 1933b, p.53, pl.6, fig.4) Sarjeant, 1985b, p.154–155. Emendation: Sarjeant, 1985b, p.154–155. Holotype: Wetzel, 1933b, pl.6, fig.4; Sarjeant, 1985b, pl.4, figs.3,6 (not 1–2); Dietz et al., 1999, fig.10, no.3. **NOW** *Membranilarnacia*. Originally *Membranilarnax*, subsequently (and now) *Membranilarnacia*, thirdly *Membranilarnacia*?, fourthly *Eatonicysta*. Age: Senonian.

"subsp. *minuta*" (Rozen, 1965, p.312–313, pl.2, figs.4–5; text-figs.23–24) Sarjeant, 1985b, p.155. **Name not validly published**: no holotype designated. Originally *Membranilarnacia pterococcoides* var. *minuta* (name not validly published), subsequently *Membranilarnacia pterococcoides* subsp. *minuta* (name not validly published), thirdly *Eatonicysta pterococcoides* subsp. *minuta* (name not validly published). Age: late Eocene.

"*robusta*" Stover and Williams, 1995, p.100. **Name not validly published**: no description or illustration.

sequestra Stover and Williams, 1995, p.105, pl.2, figs.1a–d; text-fig.1C. Holotype: Stover and Williams, 1995, pl.2, figs.1a–d. N.I.A. Age: Lutetian.

**ursulae* (Morgenroth, 1966a, p.20, pl.3, figs.11–12) Stover and Evitt, 1978, p.41. Emendation: Stover and Williams, 1995, p.105–106, as *Eatonicysta ursulae*. Holotype: Morgenroth, 1966a, pl.3, fig.11; Eisenack and Kjellström, 1972, figure to left — p.143; Fensome et al., 1995, fig.1 — p.1865. Originally *Cannosphaeropsis*, subsequently *Membranilarnacia*, thirdly (and now) *Eatonicysta*. Taxonomic junior synonyms: *Membranilarnacia*

diktyophora, according to Eaton (1976, p.277); *Membranilarnacia reticulata*, according to de Coninck (1969, p.43) and Gocht (1969, p.65). Age: early Eocene.

"subsp. *furensis*" Heilmann-Clausen in Heilmann-Clausen and Costa, 1989, p.466, pl.11, figs.1–3,5–7. Holotype: Heilmann-Clausen, 1982, fig.3A; Heilmann-Clausen and Costa, 1989, pl.11, fig.7. **NOW** *Eatonicysta furensis*. Originally *Eatonicysta ursulae* subsp. *furensis*, subsequently (and now) *Eatonicysta furensis*. Age: early Eocene.

"subsp. *ursulae*". Autonym. Holotype: Morgenroth, 1966a, pl.3, fig.11. **Now redundant.**

?*vestita* (White, 1842, p.36, pl.4, div.3, fig.2) Sarjeant, 1991, p.88. Holotype: White, 1842, pl.4, div.3, fig.2; Sarjeant, 1991, fig.4.1. Originally *Xanthidium* (Appendix A), subsequently (and now) *Eatonicysta*?. Questionable assignment: Sarjeant (1991, p.88); and Fauconnier and Masure in Fauconnier and Masure (2004, p.209) as a problematic species. Age: Late Cretaceous.

ECHINIDINIUM Zonneveld, 1997, p.325 ex Head et al., 2001, p.633. This name was not validly published in Zonneveld (1997) since that author did not provide a Latin diagnosis; such a diagnosis is required since the type is from a sediment trap and thus must be considered modern and not fossil. Type: Zonneveld, 1997, pl.2, figs.1–4, as *Echinidinium granulatum*.

"*aculeatum*" Zonneveld, 1997, p.328–329, pl.3, figs.1–5; text-figs.5A–B. **Name not validly published:** no Latin description provided. Holotype: Zonneveld, 1997, pl.3, figs.1–3. The holotype is from a sediment trap and does not have a stratigraphic context; hence it must be treated as an extant form rather than a fossil, its name requiring a Latin diagnosis for validation (Head, 2003a, p.171–172). Age: Holocene.

bispiniformum Zonneveld, 1997, p.329,331,333, pl.4, figs.1–4; text-figs.7A–B ex Head, 2003a, p.171. Holotype: Zonneveld, 1997, pl.4, figs.1–3. The holotype is from ocean floor sediment and has a stratigraphic context; hence it may be treated as a fossil, its name not requiring a Latin diagnosis for validation (Head, 2003a, p.171–172). This name was not validly published in Zonneveld (1997) since the generic name was not validated until 2001. By fully citing the basionym, Head (2003a, p.171) validated the name *Echinidinium bispiniformum*. Age: Holocene.

delicatum Zonneveld, 1997, p.333–334, pl.4, figs.5–7; text-figs.8A–B ex Head 2003a, p.171. Holotype: Zonneveld, 1997, pl.4, figs.5–7. The holotype is from ocean floor sediment and has a stratigraphic context; hence it may be treated as a fossil, its name not requiring a Latin diagnosis for validation (Head, 2003a, p.171–172). This name was not validly published in Zonneveld (1997) since the generic name was not validated until 2001. By fully citing the basionym, Head (2003a, p.171) validated the name *Echinidinium delicatum*. Age: Holocene.

euaxum (Head, 1993, p.24,26, fig.16, nos.1–8,11; fig.26, no.4) Head et al., 2001, p.631. Holotype: Head, 1993, fig.16, no.11. Originally *Algidasphaeridium*?, subsequently (and now) *Echinidinium*. This combination was not validly published in Zonneveld (1997, p.334) since the generic name was not validated until 2001. Age: latest Pliocene.

**granulatum* Zonneveld, 1997, p.325,327–328, pl.2, figs.1–8; text-figs.4A–B ex Head et al., 2001, p.633. Holotype: Zonneveld, 1997, pl.2, figs.1–4. This name was not validly published in Zonneveld (1997) since that author did not provide a Latin diagnosis; such a diagnosis is required since the type is from a sediment trap and thus must be considered modern and not fossil. Age: Holocene.

karaense Head et al., 2001, p.633–634, pl.3, figs.i–o. Holotype: Head et al., 2001, pl.3, figs.i–k. Age: Holocene.

?*lucidum* Heilmann-Clausen and Van Simaëys, 2005, p.163–164, pl.4, figs.1–6; text-fig.5. Holotype: Heilmann-Clausen and Van Simaëys, 2005, pl.4, figs.1–2. Questionable assignment: Heilmann-Clausen and Van Simaëys (2005, p.163). Age: late Eocene.

nordlandense Head in Head et al., 2004, p.293–294, figs.3O–P,4A–L,7A–P. Holotype: Head et al. 2004, figs.3O–P. Age: Gelasian.

slieipnerense Head and Riding in Head et al., 2004, p.294, figs.4Q–S,5A–C. Holotype: Head et al., 2004, figs.5A–C. Age: Gelasian.

"*transparantum*" Zonneveld, 1997, p.329, pl.3, figs.6–10; text-figs.6A–B. **Name not validly published:** no Latin description provided. Holotype: Zonneveld, 1997, pl.3, figs.6–8; Head, 2003a, pl.2, figs.1–3. The holotype is from a sediment trap and does not have a stratigraphic context; hence it must be treated as an extant form rather than a fossil, its name requiring a Latin diagnosis for validation (Head, 2003a, p.171–173. Age: Holocene.

zonneveldiae Head, 2003a, p.172, pl.1, figs.1–12. Holotype: Head, 2003a, pl.1, figs.1–4. Age: late Pleistocene.

ECHINOCYSTA Xu Jinli et al., 1997, p.118–119,153. Type: Xu Jinli et al., 1997, pl.16, figs.13–14, as *Echinocysta echinoides*.

**echinoides* Xu Jinli et al., 1997, p.119,154, pl.16, figs.13–14; pl.17, fig.7; pl.55, figs.4–5; text-fig.13. Holotype: Xu Jinli et al., 1997, pl.16, figs.13–14. Age: middle-late Eocene.

"*multispinata*" Xu Jinli et al., 1997, p.120, pl.16, figs.9–10. **Name not validly published:** holotype not designated. The holotype was not designated in Xu Jinli et al. (1997), nor did these authors provide a Latin or English description. He Chengquan et al. (2009, p.651) provided an English description, but effectively did not designate a holotype: they referred to the measurements of the holotype but did not clearly indicate the figure in which it is illustrated, and thus according to I.C.N. Article 43.3, this name remains not validly published. Age: middle-late Eocene.

reticuloides Xu Jinli et al., 1997, p.119, pl.9, figs.14a–c; pl.41, figs.7,11 ex He Chengquan et al., 2009, p.655. Holotype: Xu Jinli et al., 1997, pl.9, figs.14a–c. This name was not validly published in Xu Jinli et al. (1997), since no English or Latin description was provided; He Chengquan et al. (2009, p.655) validated the name by publishing an English diagnosis. Age: middle-late Eocene.

ECHINODINELLA Keupp, 1980a, p.132–133. Emendation: Streng et al., 2004, p.467. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1299). Keupp (1992b, p.128) placed this name in quotes. Type: Keupp, 1980a, pl.16, fig.7, as *Echinodinella erinacea*.

**erinacea* Keupp, 1980a, p.133–134, pl.16, figs.7–15; pl.17, figs.1–9. Emendation: Streng et al., 2004, p.468. Holotype: Keupp, 1980a, pl.16, fig.7. Keupp (1992b, p.129) placed the generic name in quotes. Age: late Aptian.

levata Keupp, 1981, p.18–19, pl.8, figs.1–11. Holotype: Keupp, 1981, pl.8, fig.7. Keupp (1992b, p.129) placed the generic name in quotes. Age: late Hauterivian–late Aptian.

"*triangularis*" Keupp, 1980a, p.134–135, pl.17, figs.10–15. Holotype: Keupp, 1980a, pl.17, figs.10–13. **NOW** *Praecalcionellum*. Originally *Echinodinella*, subsequently (and now) *Praecalcionellum*. Age: late Gargasian.

"**ECTOSPHERIDIUM**" Zevenboom and Santarelli in Zevenboom, 1995, p.150. **Name not validly published:** considered a manuscript name by the authors. Type: Biffi and Manum, 1988, pl.7, figs.1,5,9,12, as *Membranilarnacia? picena*.

"**picenum*" (Biffi and Manum, 1988, p.190,192, pl.7, figs.1–3,5–7,9,12) Zevenboom and Santarelli in Zevenboom, 1995, p.150. Emendation: Zevenboom and Santarelli in Zevenboom, 1995, p.151, as *Ectosphaeridium picenum*. Holotype: Biffi and Manum, 1988, pl.7, figs.1,5,9,12; Fauconnier and Masure, 2004, pl.54, figs.12–13.

Combination not validly published: generic name not validly published. **NOW** *Membranilarnacia?*. Originally (and now) *Membranilarnacia*, subsequently *Ectosphaeridium* (combination not validly published). Age: early Miocene.

ECTOSPHEROPSIS Londeix and Jan du Chêne, 1988, p.252–253. Type: Londeix and Jan du Chêne, 1988, pl.1, figs.1–5, as *Ectospheropsis burdigalensis*.

***burdigalensis** Londeix and Jan du Chêne, 1988, p.253,255,257, pl.1, figs.1–9; pl.2, figs.1–9; pl.3, figs.1–9; text-figs.3a–c,a'-c',4a–b,a'-b'. Holotype: Londeix and Jan du Chêne, 1988, pl.1, figs.1–5; Fensome et al., 1993a, figs.1–3 — p.1001. Age: Burdigalian.

EDWARDSIELLA Versteegh and Zevenboom in Versteegh, 1995, p.88. Nomenclatural junior synonym: *Novedwardsiella* (name illegitimate). Özdikmen (2009, p.234) considered *Edwardsiella* Versteegh and Zevenboom to be illegitimate because it is a junior homonym of *Edwardsiella* Andres, 1883; however, *Edwardsiella* Andres is an animal and under the I.C.N. does not pre-empt *Edwardsiella* Versteegh and Zevenboom. Versteegh and Zevenboom (1995, p.217) also proposed this name. Type: Versteegh, 1995, pl.2, figs.1,4, as *Edwardsiella sexispinosa*.

***sexispinosa** Versteegh and Zevenboom in Versteegh, 1995, p.88–89, pl.2, figs.1–4. Holotype: Versteegh, 1995, pl.2, figs.1,4; Versteegh and Zevenboom, 1995, pl.2, figs.1,4. Originally (and now) *Edwardsiella*, subsequently *Novedwardsiella* (generic name illegitimate). Age: Chattian–mid Piacenzian.

EGMONTODINIUM Gitmez and Sarjeant, 1972, p.228–229. Type: Gitmez and Sarjeant, 1972, pl.8, figs.1–2; pl.11, figs.5–6; text-figs.24A–B, as *Egmontodinium polyplacophorum*.

?**diminutum** Davies, 1983, p.15–16, pl.2, figs.4–8; text-fig.8. Holotype: Davies, 1983, pl.2, figs.6–7; Fauconnier and Masure, 2004, pl.26, fig.3. Questionable assignment: Davies (1983, p.15). Age: late Bathonian–Oxfordian.

elongatum Mantle, 2005, p.253,255,256, pl.2, figs.1–9; text-figs.6A–B. Holotype: Mantle, 2005, pl. 2, figs.4–5, text-figs.6A–B. Age: Callovian–early Oxfordian.

"**expiratum**" Davey, 1982b, p.28–29, pl.8, figs.13–16. Holotype: Davey, 1982b, pl.8, figs.13–14. **NOW** *Amphorulacysta*? Originally *Egmontodinium*, subsequently *Amphorula*, thirdly (and now) *Amphorulacysta*? Age: early Portlandian–earliest Ryazanian.

minus Kumar, 1987a, p.240–241, pl.2, figs.5–6; text-fig.3. Holotype: Kumar, 1987a, pl.2, fig.5. Age: Kimmeridgian–Tithonian.

"**ovatum**" (Gitmez and Sarjeant, 1972, p.237, pl.14, figs.1–3) Riley, 1979, p.221. Holotype: Gitmez and Sarjeant, 1972, pl.14, figs.2–3; Fauconnier and Masure, 2004, pl.77, fig.10. **NOW** *Systematophora*?. Originally *Systematophora*, subsequently (and now) *Systematophora*?, thirdly *Egmontodinium*. Age: early–late Kimmeridgian.

***polyplacophorum** Gitmez and Sarjeant, 1972, p.229–231, pl.8, figs.1–4; pl.9, fig.3; pl.11, figs.5–6,8; text-figs.24A–D. Holotype: Gitmez and Sarjeant, 1972, pl.8, figs.1–2; pl.11, figs.5–6; text-fig.24A–B; Fauconnier and Masure, 2004, pl.26, fig.1. Age: middle-late Kimmeridgian.

toryna (Cookson and Eisenack, 1960b, p.252, pl.38, figs.6,15) Davey, 1979c, p.60. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.15. Originally *Hystriosphæridium*, subsequently *Prolixosphæridium*?, thirdly *Tanyosphæridium*, fourthly (and now) *Egmontodinium*. N.I.A. Age: Tithonian–Neocomian.

EISENACKIA Deflandre and Cookson, 1955, p.258. Emendations: Sarjeant, 1966b, p.152; Davey, 1969b, p.3, as a revised diagnosis; McLean, 1973a, p.262; Quattrocchio and Sarjeant, 2003, p.144. *Eisenackia* was not validly published in Deflandre and Cookson (1954, p.1237), since no description was given. Taxonomic junior synonyms: *Alisocysta* and *Agerasphaera* (name illegitimate), both according to Quattrocchio and Sarjeant (2003, p.144) — however, Fensome et al. (in press) retained *Alisocysta*, with *Agerasphaera* as its nomenclatural junior synonym. Type: Deflandre and Cookson, 1955, pl.5, fig.2, as *Eisenackia crassitabulata*.

brevivallata (Harker and Sarjeant in Harker et al., 1990, p.97–98, pl.5, figs.5,9–17; text-figs.20a–b ex Harker and Sarjeant, 1991, p.708) Quattrocchio and Sarjeant, 2003, p.146. Holotype: Harker et al., 1990, pl.5, figs.11–12; text-figs.20a–b. Originally *Alisocysta*, subsequently (and now) *Eisenackia*. The name *Alisocysta brevivallata* was not validly published in Harker et al. (1990), since the lodgement of the holotype was not cited (I.C.N. Article 40.7). Age: late Campanian.

chilensis Quattrocchio and Sarjeant, 2003, p.146, fig.3a–d, fig.7B–C, fig.10A–B. Holotype: Quattrocchio and Sarjeant, 2003, fig.3c–d, fig.7B–C. Age: Paleocene.

"*circumtabulata*" Drugg, 1967, p.15, pl.1, figs.12–13. Holotype: Drugg, 1967, pl.1, fig.12; Damassa, 1979b, pl.3, figs.14–16; Fensome et al., 1993a, fig.1 — p.1061. **NOW** *Alisocysta*. Originally *Eisenackia*, subsequently *Hystrichokolpoma*, thirdly (and now) *Alisocysta*, fourthly *Agerasphaera* (generic name illegitimate). Quattrocchio and Sarjeant (2003, p.146) retained this species in *Eisenackia*, but Fensome et al. (in press) returned it to *Alisocysta*. Taxonomic junior synonym: *Hystrichokolpoma mentitum*, according to Schumacker-Lambry (1978, p.42) — however, Lentin and Williams (1981, p.135) retained *Hystrichokolpoma mentitum*. Age: Danian.

**crassitabulata* Deflandre and Cookson, 1955, p.258–261, pl.5, fig.2; text-figs.6–16. Emendation: McLean, 1973a, p.262. Holotype: Deflandre and Cookson, 1955, pl.5, fig.2; Fauconnier and Masure, 2004, pl.26, figs.4–5. *Eisenackia crassitabulata* was not validly published in Deflandre and Cookson (1954, p.1236), since no description was given. Age: Paleocene–early Eocene.

formosana Shaw Chenglong, 1999b, p.195, figs.133–135. Holotype: Shaw Chenglong, 1999b, figs.133–135. Age: Eocene.

hatai Fuji, 1966, p.62, pl.12, figs.1–2. Holotype: Fuji, 1966, pl.12, figs.1–2. Age: late Miocene.

?*knokkensis* Louwye, 1997, p.149–150, pl.1, figs.7–9. Holotype: Louwye, 1997, pl.1, figs.8–9. Questionable assignment: Louwye (1997, p.149). Age: Campanian.

"*margarita*" (Harland, 1979a, p.29,31,33, pl.1, figs.1–12; pl.2, figs.1–10) Quattrocchio and Sarjeant, 2003, p.146. Holotype: Harland, 1979a, pl.1, figs.5–6; pl.2, figs.5–6; Fauconnier and Masure, 2004, pl.2, fig.1. **NOW** *Alisocysta*. Originally *Agerasphaera* (generic name illegitimate), subsequently (and now) *Alisocysta*, thirdly *Eisenackia*. Taxonomic junior synonym: *Alisocysta rugolirata*, according to Damassa and Harland in Lentin and Williams (1989, p.10). Age: late Paleocene.

msounensis Slimani et al., 2008, p.336,338, figs.7A–L,8A–B. Holotype: Slimani et al., 2008, figs.7A–F,J, 8A–B. Age: early Danian.

"*ornata*" Cookson and Eisenack, 1965a, p.124, pl.13, figs.1–8. Holotype: Cookson and Eisenack, 1965a, pl.13, figs.1–2. **NOW** *Stoveracysta*. Originally *Eisenackia*, subsequently *Alisocysta*, thirdly (and now) *Stoveracysta*. Age: late Eocene.

reticulata (Damassa, 1979b, p.196,198,200, pl.3, figs.1–6; pl.4, figs.4–5; text-fig.3) Quattrocchio and Sarjeant, 2003, p.146. Holotype: Damassa, 1979b, pl.4, figs.4–5; text-fig.3. Originally *Alisocysta*, subsequently (and now) *Eisenackia*. Age: early Paleocene.

"*rugolirata*" (Damassa, 1979b, p.193–194,196, pl.3, figs.7–13,21,23,27; text-fig.2) Quattrocchio and Sarjeant, 2003, p.146. Holotype: Damassa, 1979b, pl.3, figs.7–11; Fauconnier and Masure, 2004, pl.2, figs.7–11. **Taxonomic senior synonym:** *Agerasphaera* (now *Eisenackia*) *margarita*, according to Damassa and Harland in Lentin and Williams (1989, p.10). On proposing this combination, Quattrocchio and Sarjeant did not acknowledge its earlier proposed synonymy with *Agerasphaera margarita*; hence, we continue to follow the synonymy proposed by Damassa and Harland in Lentin and Williams (1989, p.10). Age: early Paleocene.

?*scrobiculata* Morgenroth, 1966a, p.12–13, pl.2, fig.12; pl.3, fig.1. Holotype: Morgenroth, 1966a, pl.2, fig.12. Originally *Eisenackia*, subsequently (and now) *Eisenackia*?. Questionable assignment: Stover and Evitt (1978, p.43) as a problematic species. Age: early Eocene.

?*sentictum* (Below, 1987b, p.52, pl.9, figs.11–15) Lentin and Williams, 1989, p.124. Holotype: Below, 1987b, pl.9, figs.11–15; Fensome et al., 1993a, figs.1–4 — p.1329. Originally *Phanerodinium*, subsequently (and now) *Eisenackia*?. Questionable assignment: Lentin and Williams (1989, p.124). N.I.A. Age: late Albian.

taiwaniana Shaw Chenglong, 1999b, p.196,198, figs.136–141. Holotype: Shaw Chenglong, 1999b, figs.136–138. Age: Eocene.

ELLIPSODINIUM Clarke and Verdier, 1967, p.68–69. Taxonomic junior synonym: *Chelinocysta* (name not validly published), by implication in Clarke et al. (1968, p.182), who considered *Chelinocysta lita* (name not validly published) to be a taxonomic junior synonym of *Ellipsodinium rugulosum*. Lentin and Williams (1985, p.123) incorrectly stated that *Dictyopyxia* is a taxonomic junior synonym of *Ellipsodinium*. Type: Clarke and Verdier, 1967, pl.14, fig.6, as *Ellipsodinium rugulosum*.

membraniferum Prince et al., 2008, p.92, pl.1, figs.4–6. Holotype: Prince et al., 2008, pl.1, figs.4–6. Age: late Santonian.

reticulatum Duxbury, 1980, p.117–118, pl.4, figs.4,8. Holotype: Duxbury, 1980, pl.4, figs.4,8. Age: middle-late Barremian.

**rugulosum* Clarke and Verdier, 1967, p.69, pl.14, figs.4–6; text-fig.29. Holotype: Clarke and Verdier, 1967, pl.14, fig.6. Taxonomic junior synonym: *Chelinocysta lita* (name not validly published), according to Clarke et al. (1968, p.182). Age: Cenomanian–Santonian.

tenuicinctum He Chengquan, 1991, p.116, pl.7, fig.12. Holotype: He Chengquan, 1991, pl.7, fig.12. Age: middle Eocene.

ELLIPSOIDICTYUM Klement, 1960, p.78. Taxonomic junior synonyms: *Dictyopyxis* Cookson and Eisenack and *Dictyopyxia*, both according to Sarjeant (1976a, p.23); *Opaeopsomus*, according to Stover and Evitt (1978, p.69) — however, Lentin and Williams (1993, p.465) retained *Opaeopsomus*. Type: Klement, 1960, pl.6, figs.15–16, as *Ellipsoidictyum cinctum*.

**cinctum* Klement, 1960, p.78–80, pl.6, figs.15–16; pl.7, figs.1–2; text-figs.36–37. Holotype: Klement, 1960, pl.6, figs.15–16. Taxonomic junior synonym: *Dictyopyxis* (subsequently) *Dictyopyxia areolata*, according to Sarjeant (1976a, p.23–24). Age: middle Oxfordian.

"*circulatum*" (Clarke and Verdier, 1967, p.67–68, pl.1, fig.11; pl.2, fig.3; text-fig.28) Lentin and Williams, 1977b, p.56. Holotype: Clarke and Verdier, 1967, pl.1, fig.11. **NOW** *Elytrocysta*. Originally *Dictyopyxia*, subsequently *Ellipsoidictyum*, thirdly (and now) *Elytrocysta*. Age: Cenomanian–Santonian.

fenestellum Mantle, 2009b, p.105,106, pl.11, figs.2–4; text-fig.3. Holotype: Mantle, 2009b, pl.11, fig.2. Age: Callovian–Oxfordian.

"*gochti*" Fensome, 1979, p.20–22, pl.2, figs.8–9,11–12; text-fig.8. Holotype: Fensome, 1979, pl.2, figs.8–9,11–12; text-fig.8. **NOW** *Epipllosphaera*. Originally *Ellipsoidictyum*, subsequently (and now) *Epipllosphaera*. Age: early Callovian.

"*groenlandicum*" Smelror, 1988a, p.288,292,294, pl.8, figs.3,5–6; text-fig.9. Holotype: Smelror, 1988a, pl.8, figs.5–6. **NOW** *Valvaeodinium*. Originally *Ellipsoidictyum*, subsequently (and now) *Valvaeodinium*, thirdly *Valensiella* (combination not validly published). Age: early Oxfordian.

imperfectum (Brideaux and McIntyre, 1975, p.25–26, pl.7, figs.1–5) Lentin and Williams, 1977b, p.56. Holotype: Brideaux and McIntyre, 1975, pl.7, figs.1–3. Originally *Dictyopyxidia*, subsequently (and now) *Ellipsoidictyum*. Age: early-middle Albian.

subsp. **imperfectum**. Autonym. Holotype: Brideaux and McIntyre, 1975, pl.7, figs.1–3.

subsp. **prolatum** Duxbury, 2001, p.106–107, fig.8, nos.1–3. Holotype: Duxbury, 2001, fig.8, nos.2. Age: late Aptian–early Albian.

punctatum (Jain, 1977b, p.186–187, pl.4, figs.51–52) Below, 1981a, p.47. Holotype: Jain, 1977b, pl.4, fig.51. Originally *Dictyopyxidia*, subsequently (and now) *Ellipsoidictyum*. Age: early Albian.

"reticulatum" (Valensi, 1953, p.28, pl.2, figs.4–5,14,19; pl.13, fig.6; text-fig.2d ex Sarjeant, 1968, p.230) Lentin and Williams, 1977b, p.56. Holotype: Valensi, 1953, pl.2, figs.4–5; Fauconnier and Masure, 2004, pl.28, figs.1–4. **NOW** *Epiplosphaera*. Originally *Palaeoperidinium* (name not validly published), subsequently *Dictyopyxis* (generic name illegitimate), thirdly *Dictyopyxidia*, fourthly *Ellipsoidictyum*, fifthly (and now) *Epiplosphaera*. Taxonomic senior synonym: *Epiplosphaera bireticulata*, by implication in Courtinat (1989, p.176), who believed *Palaeoperidinium* (as *Epiplosphaera*) *reticulatum* to be the senior name — however, Poulsen (1992a, p.66) retained the two species. Sarjeant (1978a, p.18) also proposed this combination. Age: Bajocian.

sagena (Duxbury, 1980, p.127, pl.3, figs.6,9,12–13) Below, 1982d, p.346. Emendation: Harding, 1990b, p.35, as *Meiourogonyaulax sagena*. Holotype: Duxbury, 1980, pl.3, figs.6,9,12. Originally *Lithodinia*, subsequently *Meiourogonyaulax*, thirdly (and now) *Ellipsoidictyum*. Williams et al. (1993, p.56) also proposed this combination. N.I.A. Age: middle-late Barremian.

"scutella" (Eisenack, 1958a, p.385, pl.24, fig.3) Below, 1982d, p.348. Emendation: Sarjeant, 1985a, p.87–89, as *Parvocavatus? scutella*. Holotype: Eisenack, 1958a, pl.24, fig.3; Sarjeant, 1985a, pl.7, fig.3; pl.9, figs.4–6; Jan du Chêne et al., 1986a, pl.111, fig.1. **NOW** *Scriniodinium?*. Originally *Scriniodinium*, subsequently *Ellipsoidictyum*, thirdly *Parvocavatus?*, fourthly (and now) *Scriniodinium?*. N.I.A. Age: late Aptian.

ELYTROCYSTA Stover and Evitt, 1978, p.43–44. Type: Drugg, 1967, pl.5, fig.12, as *Membranosphaera maastrichtica*.

brevis Stover and Hardenbol, 1994, p.35–36, pl.2, figs.10a–b,11a–b,12. Holotype: Stover and Hardenbol, 1994, pl.2, figs.10a–b. Age: Rupelian.

circulata (Clarke and Verdier, 1967, p.67–68, pl.1, fig.11; pl.2, fig.3; text-fig.28) Stover and Helby, 1987d, p.282. Holotype: Clarke and Verdier, 1967, pl.1, fig.11. Originally *Dictyopyxidia*, subsequently *Ellipsoidictyum*, thirdly (and now) *Elytrocysta*. Age: Cenomanian–Santonian.

***druggii** Stover and Evitt, 1978, p.44. Holotype: Drugg, 1967, pl.5, fig.12, as *Membranosphaera maastrichtica*; Fensome et al., 1993a, fig.1 — p.1137; designated by Stover and Evitt (1978, p.44). Age: Danian.

elongata Slimani and Louwye, 2013, p.18, pl.4, figs.1–10. Holotype: Slimani and Louwye, 2013, pl.4, figs.1–4. Age: early late Maastrichtian.

EMMETROCYSTA Stover, 1975, p.42. Type: Cookson, 1953, pl.2, figs.41–42, as *Cannosphaeropsis urnaformis*.

"cheleusis" Stevens and Helby in Riding and Helby, 2001g, p.184. **Name not validly published**: no description. **Taxonomic senior synonym**: *Balcattia cheleusis*, according to Riding and Helby (2001g, p.184).

denticulata He Chengquan and Li Peng, 1981, p.63, pl.34, figs.1–5. Holotype: He Chengquan and Li Peng, 1981, pl.34, fig.1. Age: late Oligocene.

"*fibrospinosa*" (Davey and Williams, 1966b, p.86, pl.5, fig.5) Sarjeant, 1981, p.123. Emendation: Davey, 1969c, p.36, as a revised diagnosis for *Cordosphaeridium fibrospinosum*. Holotype: Davey and Williams, 1966b, pl.5, fig.5; Bujak et al., 1980, pl.7, figs.3,6. **NOW** *Cordosphaeridium*. Originally (and now) *Cordosphaeridium*, subsequently *Emmetrocyta*?, thirdly *Tityrosphaeridium*?. Questionable assignment: Sarjeant (1981, p.123). Taxonomic junior synonyms: *Cordosphaeridium exilimurum* and *Achomosphaera* (subsequently *Cordosphaeridium*) *valianta*, both according to Fensome et al. (2009, p.23). Age: early Eocene.

sarjeantii (Gitmez, 1970, p.291–292, pl.11, fig.4; text-fig.25) Stover and Evitt, 1978, p.45. Holotype: Gitmez, 1970, pl.11, fig.4; text-fig.25; Fauconnier and Masure, 2004, pl.26, fig.7. Originally *Polystephanephorus*, subsequently (and now) *Emmetrocyta*, thirdly *Hystrichosphaerina*, fourthly *Stiphrosphaeridium*. Courtinat and Pourtoy in Fauconnier and Masure (2004, p.513) retained this species in *Emmetrocyta*. Age: early Kimmeridgian.

**urnaformis* (Cookson, 1953, p.118, pl.2, figs.41–43) Stover, 1975, p.42. Holotype: Cookson, 1953, pl.2, figs.41–42. Originally *Cannosphaeropsis*, subsequently *Polystephanephorus*, thirdly (and now) *Emmetrocyta*. Age: Oligocene.

"*EMSLANDIA*" Gerlach, 1961, p.171. Emendation: Benedek and Sarjeant, 1981, p.315–316. **Taxonomic senior synonym:** *Apteodinium*, according to Stover and Evitt (1978, p.141) and Lucas-Clark (1987, p.168). Type: Gerlach, 1961, pl.26, fig.13, as *Emslandia emslandensis*.

"*australiensis*" (Deflandre and Cookson, 1955, p.248, pl.5, fig.1) Nagy, 1965, p.202. Holotype: Deflandre and Cookson, 1955, pl.5, fig.1. **Combination not validly published:** basionym not fully referenced. **NOW** *Apteodinium*. Originally *Gymnodinium* (Appendix B), subsequently *Emslandia* (combination not validly published), thirdly *Scriniodinium*, fourthly (and now) *Apteodinium*. Taxonomic junior synonym: *Emslandia crassimurata*, according to Lucas-Clark (1987, p.174). Age: middle Miocene.

"*crassimurata*" Benedek and Sarjeant, 1981, p.320,322, fig.1, nos.2,4. Holotype: Benedek, 1972, pl.3, fig.15, as *Emslandia emslandensis*, and Benedek and Sarjeant, 1981, fig.1, nos.2,4. **Taxonomic senior synonym:** *Gymnodinium* (as and now *Apteodinium*) *australiense*, according to Lucas-Clark (1987, p.174). Age: Oligocene.

"*delicata*" Timbrell, 1993, p.119. **Name not validly published:** no description or illustration.

emslandensis*" Gerlach, 1961, p.172–173, pl.26, figs.13–14. Emendation: Benedek and Sarjeant, 1981, p.316–318, as *Apteodinium emslandense*. Holotype: Gerlach, 1961, pl.26, fig.13; Benedek and Sarjeant, 1981, fig.1, no.1; Jan du Chêne et al., 1986a, pl.10, figs.17–19. **NOW *Apteodinium*. Originally *Emslandia*, subsequently (and now) *Apteodinium*. Age: middle Oligocene–middle Miocene.

"*spiridoides*" (Benedek, 1972, p.5, pl.2, figs.1a–b; pl.15, figs.1–6) Benedek and Sarjeant, 1981, p.318. Emendation: Benedek and Sarjeant, 1981, p.319, as *Emslandia spiridoides*. Holotype: Benedek, 1972, pl.2, figs.1a–b; Benedek and Sarjeant, 1981, fig.2, nos.1–3; Jan du Chêne et al., 1986a, pl.11, figs.6–9. **NOW** *Apteodinium*. Originally (and now) *Apteodinium*, subsequently *Emslandia*. Taxonomic junior synonym: *Apteodinium tectatum*, according to Lucas-Clark (1987, p.178). Age: middle Oligocene.

ENDOCERATIUM Vozzhennikova, 1965, p.89. Taxonomic senior synonym: *Pseudoceratium*, according to Helby (1987, p.313–315) — however, Lentin and Williams (1989, p.125) retained *Endoceratium*. Although the "type species", *Endoceratium ludbrookiae*, was not validly transferred by Vozzhennikova (1965), the generic name *Endoceratium* was validly published by that author, since it is based on a previously validly published species name (I.C.N. Article 40.3). Type: Cookson and Eisenack, 1958, pl.5, fig.7, as *Ceratocystidiopsis ludbrookiae*.

dettmanniae (Cookson and Hughes, 1964, p.51–52, pl.7, figs.1–4) Stover and Evitt, 1978, p.45. Emendation: Harding and Hughes, 1990, p.312,314, as *Endoceratium dettmanniae*. Holotype: Cookson and Hughes, 1964, pl.7, fig.1. Originally *Pseudoceratium*, subsequently (and now) *Endoceratium*. Lentin and Williams (1989, p.125) retained this species in *Endoceratium*. Morgan (1980, p.22) also proposed this combination. Age: late Albian–early Cenomanian.

exquisitum Morgan, 1980, p.22, pl.10, figs.11–12. Holotype: Morgan, 1980, pl.10, figs.11–12; Helby et al., 1987, fig.29I. Originally (and now) *Endoceratium*, subsequently *Pseudoceratium*. Lentin and Williams (1989, p.125) retained this species in *Endoceratium*. Age: Albanian.

**ludbrookiae* (Cookson and Eisenack, 1958, p.52–54, pl.5, figs.7–8) Loeblich Jr. and Loeblich III, 1966, p.93. Emendation: Morgan, 1980, p.23, as *Endoceratium ludbrookiae*. Holotype: Cookson and Eisenack, 1958, pl.5, fig.7. Originally *Ceratocystidiopsis* (Appendix A), subsequently *Pseudoceratium*, thirdly (and now) *Endoceratium*. Lentin and Williams (1989, p.126) retained this species in *Endoceratium*. This combination was not validly published in Vozzhennikova (1965, p.89), since that author did not fully reference the basionym. Age: Albanian.

"*pentagonum*" Singh, 1983, p.128–129, pl.44, figs.2–3. Holotype: Singh, 1983, pl.44, fig.2. **NOW** *Nyktericysta*. Originally *Endoceratium*, subsequently (and now) *Nyktericysta*. Age: middle Cenomanian.

"*perforatum*" Vozzhennikova, 1967, p.188–189, pl.112, figs.1a–b,3; pl.113, fig.1. Emendation: Yun Hyesu, 1981, p.62, as *Xenascus perforatus*. Holotype: Vozzhennikova, 1967, pl.112, fig.1a; Lentin and Vozzhennikova, 1990, pl.16, fig.5; text-fig.69. **NOW** *Xenascus*. Originally *Endoceratium*, subsequently (and now) *Xenascus*. Taxonomic senior synonym: *Hystrichosphaera* (as *Phoberocysta*, now *Xenascus*) *ceratioides*, according to Davey and Verdier (1971, p.27) — however, Yun Hyesu (1981, p.62) retained *Xenascus perforatus*. Lentin and Vozzhennikova (1990, p.118–119) provided an "expanded description" for this species, as *Xenascus perforatus*. Age: Late Cretaceous.

pflugii Prössl, 1990, p.98, pl.3, figs.7–8 ex Prössl, 1992b, p.113–114. Holotype: Prössl, 1990, pl.3, fig.8. This name was not validly published in Prössl (1990, p.98), since that author did not specify the lodgment of the holotype. Age: late Hauterivian.

turneri (Cookson and Eisenack, 1958, p.55, pl.5, figs.2–6) Stover and Evitt, 1978, p.45. Holotype: Cookson and Eisenack, 1958, pl.5, fig.3. Originally *Pseudoceratium*, subsequently (and now) *Endoceratium*. Lentin and Williams (1989, p.126) retained this species in *Endoceratium*. Age: Aptian–Albanian.

ENDOSCRINIUM (Klement, 1960, p.18) Vozzhennikova, 1967, p.174. Emendations: Vozzhennikova, 1965, p.88; Gocht, 1970b, p.143–144; Riding and Fensome, 2003, p.19–20. Originally *Scriniodinium* subgenus *Endoscrinium*, subsequently *Endoscrinium*. Taxonomic senior synonym: *Scriniodinium*, according to Stover and Evitt (1978, p.187) and Dodekova (1990, p.30–31) — however, Lentin and Williams (1993, p.207) retained *Endoscrinium*. Taxonomic junior synonym: *Athigmatocysta*, according to Below (1981a, p.48) — however, Harding (1990b, p.28) and Riding and Fensome (2003, p.23–24) retained *Athigmatocysta*; *Wetzelopsis* (name not validly published) by implication, as the type of *Wetzelopsis*, as *Endoscrinium irregulare*, is now included in *Endoscrinium*. As a generic name, *Endoscrinium* was not validly published in Vozzhennikova (1965, p.88), since that author did not fully reference the basionym. Type: Deflandre, 1939a, pl.5, figs.7–8, as *Gymnodinium galeritum*.

acroferum (Prauss, 1989, p.45–46, pl.9, figs.1–2, pl.14, figs.17–22; text-fig.21) Riding and Fensome, 2003, p.21. Originally *Scriniodinium*, subsequently (and now) *Endoscrinium*. Holotype: Prauss, 1989, pl.14, figs.19–21; text-fig.21. Age: late Bathonian–late Callovian.

"*amalthei*" (Wetzel, 1966, p.318, pl.31, fig.6) Lentin and Williams, 1981, p.96. Emendation: Sarjeant, 1980b, p.117–118, as *Scriniodinium amalthei*. Holotype: Wetzel, 1966, pl.31, fig.6. **NOW** *Scriniodinium*?. Originally *Membranilarnacia*, subsequently *Membranilarnacia*?, thirdly *Scriniodinium*, fourthly *Endoscrinium*, fifthly (and now) *Scriniodinium*?. Age: late Pliensbachian.

"*anceps*" Raynaud, 1978, p.392, pl.1, fig.17. Holotype: Raynaud, 1978, pl.1, fig.17; Jan du Chêne et al., 1986a, pl.110, figs.6–8. **NOW** *Scriniodinium*. Originally *Endoscrinium*, subsequently (and now) *Scriniodinium*. Age: late Kimmeridgian–Valanginian.

asymmetricum Riding, 1987a, p.261, fig.7, nos.1,2,5; fig.12. Holotype: Riding, 1987a, fig.7, no.1. Originally (and now) *Endoscrinium*, subsequently *Scriniodinium*. Lentin and Williams (1993, p.207) retained this species in *Endoscrinium*. Age: late Bathonian–early Callovian.

attadalense (Cookson and Eisenack, 1958, p.25, pl.1, fig.7) Riding and Fensome, 2003, p.21. Holotype: Cookson and Eisenack, 1958, pl.1, fig.7; Jan du Chêne et al., 1986a, pl.112, figs.4–7; Riding and Fensome, 2003, text-fig.4B. Originally *Gymnodinium* (Appendix B), subsequently *Scriniodinium*, thirdly (and now) *Endoscrinium*. Riding and Fensome (2003, p.21) cited the basionym as *Scriniodinium attadalense* rather than *Gymnodinium attadalense*, but otherwise fully referenced the basionym; hence, their validation of the combination is accepted here. Age: Aptian.

bessebae Below, 1981a, p.48–49, pl.7, figs.4–6, 7a–b, 8; pl.14, figs.6, 7a–b, 8; text-figs.48a–b, 49a–b, 50–51, 52a–d. Holotype: Below, 1981a, pl.7, figs.7a–b; Jan du Chêne et al., 1986a, pl.104, figs.12–13; Fensome et al., 1991, figs.4–7 — p.589. Originally (and now) *Endoscrinium*, subsequently *Scriniodinium*. Lentin and Williams (1993, p.208) retained this species in *Endoscrinium*. N.I.A. Age: Barremian.

"*campanula*" (Gocht, 1959, p.61–62, pl.4, fig.6; pl.5, figs.1a–b) Vozzhennikova, 1967, p.175. Holotype: Gocht, 1959, pl.5, figs.1a–b; Jan du Chêne et al., 1986a, pl.110, figs.1–5; Fensome et al., 1991, figs.1–3 — p.593; figs.1–5 — p.597. Originally (and now) *Scriniodinium*, subsequently *Endoscrinium*, thirdly *Scriniodinium?*. Taxonomic junior synonym: *Gonyaulacysta fragosa*, according to Harker and Sarjeant (1975, p.224) and Brideaux and McIntyre (1975, p.33). N.I.A. Age: Hauterivian.

"subsp. *campanula*". Autonym. Holotype: Gocht, 1959, pl.5, figs.1a–b; Jan du Chêne et al., 1986a, pl.110, figs.1–5; Fensome et al., 1991, figs.1–3 — p.593; figs.1–5 — p.597. **NOW** *Scriniodinium campanula* subsp. *campanula*. Originally *Endoscrinium campanula* subsp. *campanula*, subsequently *Scriniodinium? campanula* subsp. *campanula*, thirdly (and now) *Scriniodinium campanula* subsp. *campanula*. N.I.A.

"subsp. *nichan*" Below, 1981a, p.50–51, pl.7, fig.2. Holotype: Below, 1981a, pl.7, fig.2; Jan du Chêne et al., 1986a, pl.110, figs.9–10; Fensome et al., 1991, figs.4–5 — p.593; figs.1–3 — p.695. **NOW** *Scriniodinium campanula* subsp. *nichan*. Originally *Endoscrinium campanula* subsp. *nichan*, subsequently *Scriniodinium? campanula* subsp. *nichan*, thirdly (and now) *Scriniodinium campanula* subsp. *nichan*. N.I.A. Age: Hauterivian.

"*eisenackii*" (Deflandre, 1939a, p.171, pl.6, figs.7–10; text-figs.3–4) Gocht, 1970b, p.146–147. Emendation: Sarjeant, 1982b, p.32–33, as *Gonyaulacysta eisenackii*. Holotype: Deflandre, 1939a, pl.6, figs.7–8; text-figs.3–4; Jan du Chêne et al., 1986a, pl.125, figs.5–9. **NOW** *Gonyaulacysta*. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Gonyaulacysta*, thirdly *Endoscrinium*, fourthly *Tubotuberella*. Taxonomic junior synonym: *Tubotuberella sphaerocephala*, according to Sarjeant (1982b, p.32). Age: Oxfordian.

"subsp. *eisenackii*". Autonym. Holotype: Deflandre, 1939a, pl.6, figs.7–8; text-figs.3–4; Jan du Chêne et al., 1986a, pl.125, figs.5–9. **Now redundant**. Originally *Gonyaulax eisenackii* subsp. *eisenackii* (Appendix B), subsequently *Endoscrinium eisenackii* subsp. *eisenackii*, thirdly *Gonyaulacysta eisenackii* subsp. *eisenackii*, fourthly *Tubotuberella eisenackii* subsp. *eisenackii*. Taxonomic junior synonym: *Gonyaulax* (as *Gonyaulacysta*) *eisenackii* subsp. *oligodentata*, according to Sarjeant (1982b, p.32). Age: Oxfordian.

"subsp. *oligodentatum*" (Cookson and Eisenack, 1958, p.30, pl.2, fig.11) Gocht, 1970b, p.146. Holotype: Cookson and Eisenack, 1958, pl.2, fig.11; Jan du Chêne et al., 1986a, pl.125, figs.10–11. Originally *Gonyaulax eisenackii* subsp. *oligodentata* (Appendix B), subsequently *Gonyaulacysta eisenackii* subsp. *oligodentata*, thirdly *Endoscrinium eisenackii* subsp. *oligodentatum*, fourthly *Tubotuberella eisenackii* subsp. *oligodentata*. **Taxonomic senior synonym:** *Gonyaulax* (as *Gonyaulacysta*, now *Endoscrinium*) *eisenackii* subsp. *eisenackii*, according to Sarjeant (1982b, p.32). Age: Late Jurassic.

**galeritum* (Deflandre, 1939a, p.167, pl.5, figs.7–9; pl.6, fig.1) Vozzhennikova, 1967, p.176. Emendation: Riding and Fensome, 2003, p.20. Holotype: Deflandre, 1939a, pl.5, figs.7–8; Eisenack and Klement, 1964, p.759, 761; Jan du Chêne et al., 1986a, pl.104, figs.10–11; Fensome et al., 1995, fig.1 — p.1501; figs.1–2 — p.1505. Originally *Gymnodinium* (Appendix B), subsequently *Scriniodinium*, thirdly (and now) *Endoscrinium*. Lentin and Williams (1993, p.208) retained this species in *Endoscrinium*. This combination was not validly published in Vozzhennikova (1965, p.88), since that author did not fully reference the basionym. Riding and Fensome (2003, p.23) considered

that this species may be the taxonomic senior synonym of *Scriniodinium* (now *Endoscrinium*) *obscurum*. Age: Oxfordian.

subsp. *fornicatum* (Klement, 1960, p.25–26, pl.1, figs.7–12) Lentin and Williams, 1973, p.54. Holotype: Klement, 1960, pl.1, figs.7–8; Jan du Chêne et al., 1986a, pl.107, figs.4–6; Fensome et al., 1995, figs.1–2 — p.1489. Originally *Scriniodinium galeritum* subsp. *fornicatum*, subsequently (and now) *Endoscrinium galeritum* subsp. *fornicatum*. Age: middle Oxfordian.

subsp. *galeritum*. Autonym. Holotype: Deflandre, 1939a, pl.5, figs.7–8; Eisenack and Klement, 1964, p.759,761; Jan du Chêne et al., 1986a, pl.104, figs.10–11; Fensome et al., 1995, fig.1 — p.1501; figs.1–2 — p.1505. Originally *Scriniodinium galeritum* subsp. *galeritum*, subsequently (and now) *Endoscrinium galeritum* subsp. *galeritum*.

subsp. *reticulatum* (Klement, 1960, p.26–27, pl.2, figs.1–2) Górka, 1970, p.491. Holotype: Klement, 1960, pl.2, figs.1–2; Eisenack and Klement, 1964, p.765; Jan du Chêne et al., 1986a, pl.108, figs.9–10; Fensome et al., 1995, figs.1–2 — p.1739; disintegrated according to Sarjeant (1984a, p.155). Originally *Scriniodinium galeritum* subsp. *reticulatum*, subsequently (and now) *Endoscrinium galeritum* subsp. *reticulatum*. Lentin and Williams (1973, p.54) also proposed this combination. Jan du Chêne et al. (1986a, p.316–317) and Riding and Fensome (2003, p.23) considered *Scriniodinium* (now *Endoscrinium*) *subvallare* to be a possible taxonomic synonym of this taxon. Age: middle Oxfordian.

"*glabrum*" (Duxbury, 1977, p.24, pl.11, figs.1,6; text-fig.3) Below, 1981a, p.48. Holotype: Duxbury, 1977, pl.11, figs.1,6; text-fig.3; Jan du Chêne et al., 1986a, pl.111, figs.9–10; Fensome et al., 1995, figs.1–2 — p.1511. **NOW** *Athigmatocysta*. Originally (and now) *Athigmatocysta*, subsequently *Endoscrinium*, thirdly *Scriniodinium*. Age: late Berriasian–mid Barremian.

"*gochti*" (Pocock, 1972, p.90, pl.22, fig.12; text-fig.6) Muir and Sarjeant, 1978, p.205. Holotype: Pocock, 1972, pl.22, fig.12; Jan du Chêne et al., 1986a, pl.93, figs.4–8. **NOW** *Rhynchodiniopsis*. Originally *Scriniodinium*, subsequently *Scriniodinium*?, thirdly *Endoscrinium*, fourthly (and now) *Rhynchodiniopsis*. Sarjeant (1978a, p.29) also proposed this combination. Age: late Bajocian.

granulatum (Raynaud, 1978, p.391–392, pl.2, figs.6,12) Lentin and Williams, 1981, p.97. Holotype: Raynaud, 1978, pl.2, fig.6; Jan du Chêne et al., 1986a, pl.111, figs.13–14. Originally *Athigmatocysta*, subsequently (and now) *Endoscrinium*, thirdly *Scriniodinium*. Lentin and Williams (1993, p.209) retained this species in *Endoscrinium*. Age: late Kimmeridgian–Portlandian.

hauterivianum (Duxbury, 2001, p.113–114, fig.13, nos.1–3) Riding and Fensome, 2003, p.21. Holotype: Duxbury, 2001, fig.13, no.2. Originally *Scriniodinium*, subsequently (and now) *Endoscrinium*. Age: early–early late Hauterivian.

heikeae (Prössl, 1990, p.106, pl.12, figs.1–2,4–5,9 ex Prössl, 1992b, p.113,116) Riding and Fensome, 2003, p.22. Holotype: Prössl, 1990, pl.12, figs.1,4,9. Originally *Scriniodinium*, subsequently (and now) *Endoscrinium*. This name was not validly published in Prössl (1990, p.106), since that author did not specify the lodgment of the holotype. Age: Albian.

indicum (Jain and Garg in Jain et al., 1984, p.72–73, pl.2, figs.22–23) Riding and Fensome, 2003, p.22. Holotype: Jain et al., 1984, pl.2, fig.22. Originally *Scriniodinium*, subsequently (and now) *Endoscrinium*. Age: Kimmeridgian–early Tithonian.

irregulare (Cookson and Eisenack, 1958, p.28–29, pl.10, figs.1–2) Riding and Fensome, 2003, p.22. Holotype: Cookson and Eisenack, 1958, pl.10, fig.1; Jan du Chêne et al., 1986a, pl.109, figs.1–2. Originally *Wetzeliella*, subsequently *Wetzeliopsis* (name not validly published), thirdly *Scriniodinium*?, fourthly *Tubotuberella*, fifthly (and now) *Endoscrinium*. Taxonomic junior synonym: *Wetzeliella meckelfeldensis*, according to Costa and Downie (1979, p.43) — however, Lentin and Williams (1981, p.290) retained *Wetzeliella meckelfeldensis*. Riding and Fensome (2003, p.22) cited the basionym as *Scriniodinium irregulare* rather than *Wetzeliella irregularis*, but

otherwise fully referenced the basionym; hence, their validation of the combination is accepted here. Age: Late Jurassic.

kempiae (Stover and Helby, 1987a, p.114–115, figs.14A–B,15A–F,16A–I) Lentin and Williams, 1989, p.127. Holotype: Stover and Helby, 1987a, figs.15A–F; Fensome et al., 1996, figs.1–6 — p.2183. Originally *Scriniodinium*, subsequently (and now) *Endoscrinium*. Age: early Callovian.

klementii (Pocock, 1972, p.91, pl.23, figs.1–2; text-fig.7) Sarjeant, 1978a, p.29. Holotype: Pocock, 1972, pl.23, figs.1–2; Jan du Chêne et al., 1986a, pl.108, figs.5–8. Originally *Scriniodinium*, subsequently *Scriniodinium?*, thirdly (and now) *Endoscrinium*, fourthly *Scrinioicassis*. This species was retained in *Endoscrinium* by Riding and Fensome (2003, p.22). Age: Callovian.

luridum (Deflandre, 1939a, p.166, pl.5, figs.4–6) Gocht, 1970b, p.144–146. Holotype: Deflandre, 1939a, pl.5, figs.4–5; Jan du Chêne et al., 1986a, pl.109, figs.6–8. Originally *Gymnodinium* (Appendix B), subsequently *Scriniodinium*, thirdly (and now) *Endoscrinium*, fourthly *Tubotuberella*. Lentin and Williams (1993, p.209) retained this species in *Endoscrinium*. Age: early Oxfordian.

?novissimum (Morgenroth, 1968, p.540–541, pl.43, figs.3–4) Riding and Fensome, 2003, p.23. Holotype: Morgenroth, 1968, pl.43, fig.4. Originally *Scriniodinium*, subsequently *Scriniodinium?*, thirdly (and now) *Endoscrinium?*. Questionable assignment: Riding and Fensome (2003, p.23). Age: Danian.

obscurum (Manum and Cookson, 1964, p.21–22, pl.4, figs.5–6) Riding and Fensome, 2003, p.23. Holotype: Manum and Cookson, 1964, pl.4, fig.6. **NOW** *Endoscrinium*. Originally *Scriniodinium*, subsequently *Scriniodinium?*, thirdly (and now) *Endoscrinium*. Riding and Fensome (2003, p.23) considered that this species may be a taxonomic junior synonym of *Endoscrinium galeritum*, the type being reworked. Age: Late Cretaceous.

"oxfordianum" (Sarjeant, 1962a, p.485, pl.69, figs.13–14) Vozzhennikova, 1967, p.177. Holotype: Sarjeant, 1962a, pl.69, fig.14. **NOW** *Scriniodinium?*. Originally *Scriniodinium*, subsequently *Endoscrinium*, thirdly *Sirmiodinium*, fourthly (and now) *Scriniodinium?*. Age: Oxfordian.

"pharo" Duxbury, 1977, p.32, pl.9, fig.5; text-fig.8. Holotype: Duxbury, 1977, pl.9, fig.5; Jan du Chêne et al., 1986a, pl.111, figs.11–12. **NOW** *Scriniodinium*. Originally *Endoscrinium*, subsequently (and now) *Scriniodinium*. Duxbury (1977) gave as derivation for the epithet the Greek "*pharos*" ("lighthouse"); however, he gave the epithet as "*pharo*". N.I.A. Age: late Berriasian–early Valanginian.

"prolatum" (Stevens, 1987, p.193–195, figs.9A–J) Lentin and Williams, 1989, p.128. Holotype: Stevens, 1987, figs.9A–C; Fensome et al., 1996, figs.1–3 — p.2299. **NOW** *Scriniodinium*. Originally (and now) *Scriniodinium*, subsequently *Endoscrinium*. Age: early Berriasian.

reticulatum (Pocock, 1972, p.91–92, pl.23, fig.3) Riding and Fensome, 2003, p.23. Holotype: Pocock, 1972, pl.23, fig.3; Jan du Chêne et al., 1986a, pl.108, figs.1–4. Originally *Scriniodinium*, subsequently *Scriniodinium?*, thirdly *Scrinioicassis*, fourthly (and now) *Endoscrinium*. Age: Callovian.

rostratum (Brideaux and McIntyre, 1975, p.33–34, pl.10, figs.6–14; pl.11, figs.1–3) Below, 1981a, p.51. Holotype: Brideaux and McIntyre, 1975, pl.10, figs.12–14; Jan du Chêne et al., 1986a, pl.111, figs.2–4. Originally *Scriniodinium*, subsequently (and now) *Endoscrinium*. Lentin and Williams (1993, p.210) retained this species in *Endoscrinium*. Age: middle Albian.

subvallare (Sarjeant, 1962b, p.262–263, pl.1, fig.10; text-fig.7) Lentin and Williams, 1973, p.54. Holotype: Sarjeant, 1962b, pl.1, fig.10; text-fig.7. Originally *Scriniodinium*, subsequently (and now) *Endoscrinium*. Lentin and Williams (1993, p.210) retained this species in *Endoscrinium*. Jan du Chêne et al. (1986a, p.316–317) and Riding and Fensome (2003, p.23) considered *Scriniodinium* (now *Endoscrinium*) *galeritum* subsp. *reticulatum* to be a possible taxonomic synonym of this species. Age: late Oxfordian.

?*tabulatum* Miles, 1990, p.81–82, pl.1, figs.1–12; text-figs.3A–B. Holotype: Miles, 1990, pl.1, figs.1–6. Questionable assignment: Riding and Fensome (2003, p.23); these authors considered that the species may belong to the genus *Impagidinium*. Age: late Albian.

?*variabile* (Pocock, 1972, p.100, pl.23, figs.14–16) Jansonius, 1986, p.207. Holotype: Pocock, 1972, pl.23, fig.15; Jansonius, 1986, pl.3, figs.15–17; text-fig.8; Jan du Chêne et al., 1986a, pl.39, figs.5–7. Originally *Chytroeisphaeridia*, subsequently *Chytroeisphaeridia*?, thirdly *Gonyaulacysta*, fourthly *Gonyaulacysta*?, fifthly (and now) *Endoscrinium*?. Questionable assignment: Jansonius (1986, p.207). Riding and Fensome (2003, p.23) recommended that the use of this name be restricted to the holotype. Age: late Bajocian.

velum Pestchevitskaya, 2009, p.106,108, pl.1, figs.3–4; text fig.2A. Holotype: Pestchevitskaya, 2009, pl.1, figs.3–4. Age: Berriasian–early Valanginian.

"**ENERGLYNIA**" Sarjeant, 1976b, p.164. **Taxonomic senior synonym:** *Wanaea*, according to Riley and Fenton (1982, p.199–200) and Lentin and Williams (1993, p.210). Type: Dodekova, 1975, pl.3, figs.1–4, as *Wanaea acollaris*.

"**+acollaris**" (Dodekova, 1975, p.20–21, pl.2, figs.9–10; pl.3, figs.1–7,9; text-fig.2) Sarjeant, 1978a, p.14. Holotype: Dodekova, 1975, pl.3, figs.1–4. **NOW** *Wanaea*. Originally (and now) *Wanaea*, subsequently *Energlynia*. Taxonomic junior synonyms: *Wanaea* (as *Energlynia*) *indotata*, according to Woollam (1980, p.250); *Energlynia kyrbasia*, according to Fenton and Fisher (1978, p.236) — however, Feist-Burkhardt and Monteil (1997, p.45) retained *Wanaea indotata*; *Wanaea zoharensis*, according to Fensome (1981, p.50) — however, Riding and Helby (2001b, p.51) retained *Wanaea zoharensis*. The nomenclatural type of the genus *Energlynia* remains the holotype of *Energlynia kyrbasia*. Age: late Bathonian.

"**indotata**" (Drugg, 1978, p.74–75, pl.8, figs.11–14) Fensome, 1981, p.51. Holotype: Drugg, 1978, pl.8, fig.12. **NOW** *Wanaea*. Originally (and now) *Wanaea*, subsequently *Energlynia*. Taxonomic senior synonym: *Wanaea* (as *Energlynia*) *acollaris*, according to Woollam (1980, p.250) — however, Feist-Burkhardt and Monteil (1997, p.45) retained *Wanaea indotata*. Age: Bajocian–Callovian.

"***kyrbasia**" Sarjeant, 1976b, p.166,168,170,172, figs.1–16. Holotype: Sarjeant, 1976b, figs.1,6–7. **Taxonomic senior synonym:** *Wanaea* (subsequently *Energlynia*) *acollaris*, according to Fenton and Fisher (1978, p.236). The nomenclatural type of the genus *Energlynia* remains the holotype of *Energlynia kyrbasia*. Age: late Bathonian.

ENNEADOCYSTA Stover and Williams, 1995, p.108–109. Emendation: Fensome et al., 2007, p.394. This name was not validly published in Bujak (1994, p.119), since it was merely used in anticipation of future acceptance of the name (I.C.N. Article 36.1b). Type: Gerlach, 1961, pl.28, fig.14, as *Baltisphaeridium pectiniforme*.

arcuata (Eaton, 1971, p.360–363, pl.3, figs.1–9; text-figs.4–5) Stover and Williams, 1995, p.108. Emendation: Stover and Williams, 1995, p.109, as *Enneadocysta arcuata*. Holotype: Eaton, 1971, pl.3, fig.1; text-fig.4; Bujak et al., 1980, pl.2, fig.6. Originally *Areosphaeridium*, subsequently (and now) *Enneadocysta*. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Enneadocysta*?) *dictyostilum*, according to Sarjeant (1981, p.115–116) — however, Lentin and Williams (1985, p.26) retained *Areosphaeridium* (now *Enneadocysta*) *arcuatum*. Age: middle Eocene.

brevistila Fensome et al., 2007, p.397,398,400,402, pl.4, figs.1–4,7,8. Holotype: Fensome et al. 2007, pl.4, figs.1,2. Age: early Priabonian.

deconinckii Stover and Williams, 1995, p.110, pl.2, figs.3a–f; pl.3, figs.1a–c; text-figs.1D,F. Holotype: Stover and Williams, 1995, pl.2, figs.3a–f. Age: Bartonian–Rupelian.

dictyostila (Menéndez, 1965, p.11–12, pl.2, fig.6; pl.3, figs.18–22) Stover and Williams, 1995, p.109. Emendations: Sarjeant, 1981, p.115, as *Areosphaeridium dictyostilum*; Fensome et al., 2007, p.396–397, as *Enneadocysta dictyostila*. Holotype: Menéndez, 1965, pl.2, fig.6; pl.3, figs.18–20. Originally *Hystrichosphaeridium*,

subsequently *Oligosphaeridium?*, thirdly *Areosphaeridium*, fourthly *Enneadocysta?*, fifthly (and now) *Enneadocysta*. Stover and Williams (1995, p.109) questionably assigned this species to *Enneadocysta*; however Fensome et al. (2007, p.396) included it without question. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Areosphaeridium*) *diktyoplokum*, according to Eaton (1971, p.359) — however, Sarjeant (1981, p.115) retained *Areosphaeridium* (now *Enneadocysta?*) *dictyostilum*. Taxonomic junior synonyms: *Enneadocysta partridgei*, according to Fensome et al. (2007, p.396); *Areosphaeridium* (now *Enneadocysta*) *arcuatum* and *Cordosphaeridium* (now *Cooksonidium*) *capricornum*, both according to Sarjeant (1981, p.115–116) — however, Lentin and Williams (1985, p.26) retained *Areosphaeridium* (now *Enneadocysta*) *arcuatum* and *Cordosphaeridium* (now *Cooksonidium*) *capricornum*. Age: Tertiary.

fenestrata (Bujak, 1976, p.107,109–110, pl.2, figs.9–12; pl.3, figs.1–4; text-figs.3D–F) Stover and Williams, 1995, p.108. Emendation: Stover and Williams, 1995, p.110, as *Enneadocysta fenestrata*. Holotype: Bujak, 1976, pl.3, fig.2. Originally *Areosphaeridium*, subsequently (and now) *Enneadocysta*. Age: middle Eocene (see Aubry, 1986).

harrisii Stover and Williams, 1995, p.111–112, pl.3, figs.2a–c,3,4a–d,5; text-figs.1D,H. Holotype: Cookson and Eisenack, 1965a, pl.15, fig.1. Age: late Eocene.

inessae Iakovleva in Oreshkina et al., 2015, p.75, fig.10, nos.8–9,11–12; fig.11, nos.1–11; fig.17, nos.3,6,10,14,18; fig.18, nos.1–15; text-fig.24. Holotype: Oreshkina et al., 2015, fig.11, nos.1–2,5–6. Age: Bartonian–Priabonian.

magna Fensome et al., 2007, p.394–396, pl.1, figs.1–20, pl.2, figs.1–19; text-figs.5A,B,6A–E. Holotype: Fensome et al., 2007, pl.1, figs.5–7. Age: Rupelian.

multicornuta (Eaton, 1971, p.363–364, pl.4, figs.1–7; text-fig.6) Stover and Williams, 1995, p.109. Emendation: Stover and Williams, 1995, p.112–113, as *Enneadocysta multicornuta*. Holotype: Eaton, 1971, pl.4, fig.1; text-fig.6. Originally *Areosphaeridium*, subsequently (and now) *Enneadocysta*. Taxonomic senior synonym: *Baltisphaeridium* (now *Enneadocysta*) *pectiniforme*, according to Sarjeant (1984b, p.83–84,86) — however, Stover and Williams (1995, p.112) retained *Areosphaeridium* (as *Enneadocysta*) *multicornutum*. Age: Eocene.

"partridgei" Stover and Williams, 1995, p.113–114, pl.4, figs.4a–e,5; pl.5, figs.1a–c,2a–c,3a–c,4,5a–b; text-figs.1D,J. Holotype: Stover and Williams, 1995, pl.4, figs.4a–e. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as *Enneadocysta*) *dictyostilum*, according to Fensome et al. (2007, p.396). Age: Bartonian–Rupelian.

****pectiniformis*** (Gerlach, 1961, p.195–196, pl.28, fig.14; text-fig.18) Stover and Williams, 1995, p.108. Emendations: Sarjeant, 1984b, p.83–84,86, as *Areosphaeridium pectiniforme*; Stover and Williams, 1995, p.114, as *Enneadocysta pectiniformis*. Holotype: Gerlach, 1961, pl.28, fig.14; Sarjeant, 1984b, pl.1, fig.2; pl.4, fig.2; Fauconnier and Masure, 2004, pl.7, figs.4–5. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Areosphaeridium?*, fourthly *Areosphaeridium*, fifthly (and now) *Enneadocysta*. Taxonomic junior synonym: *Areosphaeridium* (now *Enneadocysta*) *multicornuta*, according to Sarjeant (1984b, p.83–84,86) — however, Stover and Williams (1995, p.112) retained *Areosphaeridium* (as *Enneadocysta*) *multicornutum*. This combination was not validly published in Bujak (1994, p.119) since that author did not fully reference the basionym. Age: early Oligocene (see Stover and Williams, 1995).

robusta Stover and Williams, 1995, p.115, pl.7, figs.1a–c; text-fig.1K. Holotype: Stover and Williams, 1995, pl.7, figs.1a–c. Age: Lutetian.

EOCLADOPYXIS Morgenroth, 1966a, p.7. Emendation: Stover and Evitt, 1978, p.206–207. Type: Morgenroth, 1966a, pl.3, figs.2–3, as *Eocladopyxis peniculata*.

****peniculata*** Morgenroth, 1966a, p.7–8, pl.3, figs.2–3. Emendation: McLean, 1976, p.348, as a revised description. Holotype: Morgenroth, 1966a, pl.3, figs.2–3. Age: early Eocene.

tessellata Liengjareern et al., 1980, p.481–482, pl.53, fig.6. Holotype: Liengjareern et al., 1980, pl.53, fig.6. Age: late Eocene.

EODINIA Eisenack, 1936, p.73. Emendations: Gocht, 1975a, p.27; Berger, 1986, p.344. Type: Eisenack, 1936, text-fig.1, as *Eodinia pachythea*.

"*mosaica*" (Dodekova, 1975, p.18–19, pl.1, figs.1–6; pl.2, figs.1–3,6) Berger, 1986, p.344. Holotype: Dodekova, 1975, pl.1, figs.1–3. **NOW** *Mosaicodinium*. Originally *Ctenidodinium*, subsequently *Ctenidodinium?*, thirdly *Eodinia*, fourthly (and now) *Mosaicodinium*. Age: late Bathonian.

**pachythea* Eisenack, 1936, p.73–75, text-figs.1–6. Emendation: Gocht, 1975a, p.27. Holotype: Eisenack, 1936, text-fig.1; Gocht, 1975a, figs.21a–b. Age: Callovian.

poulsenii Barski, 2002, p.45,48–49, text-figs.4A–B, pl.1, figs.1–6; pl.2, figs.1–5. Holotype: Barski, 2002, pl.1, figs.1–2. Age: Bathonian.

"**EOPSEUDOCERATIUM**" (Neale and Sarjeant, 1962, p.446) Lentin and Williams, 1973, p.54. Originally *Pseudoceratium* subgenus *Eopseudoceratium*, subsequently *Eopseudoceratium*. **Taxonomic senior synonym:** *Pseudoceratium*, according to Stover and Evitt (1978, p.77) and Lentin and Williams (1985, p.127). Type: Neale and Sarjeant, 1962, pl.20, fig.3; text-fig.5, as *Pseudoceratium* subgenus *Eopseudoceratium gochtii*.

"**gochtii*" (Neale and Sarjeant, 1962, p.446–448, pl.20, figs.3–4; text-figs.5a–c) Lentin and Williams, 1973, p.54. Holotype: Neale and Sarjeant, 1962, pl.20, fig.3; text-fig.5a. **NOW** *Pseudoceratium*. Originally *Pseudoceratium* subgenus *Eopseudoceratium*, subsequently *Eopseudoceratium*, thirdly (and now) *Pseudoceratium*. Age: late Hauterivian–mid Barremian.

EPELIDINIUM Williams et al., 2015, p.305. Type: Iakovleva and Heilmann-Clausen, 2007, fig.2, nos.4–5; fig.3, no.1., as *Wilsonidium pechoricum*.

brinkhuisii Iakovleva, 2016, p.5,7–8 (on PDF initially published online), pl.2, figs.3–4; pl.4, figs.7–9,13; pl.5, figs.7–9,10,14; text-fig.4a (part). Holotype: Iakovleva, 2016, pl.5, figs.7–9. Age: earliest Eocene.

?*granulatum* (Wilson, 1967c, p.493, figs.29–30) Williams et al., 2015, p.305. Holotype: Wilson, 1967c, fig.30. Originally *Wetzelia* (*Rhombodinium*) *glabra* var. *granulata*, subsequently *Rhombodinium glabrum* subsp. *granulatum*, thirdly *Dracodinium granulatum*, fourthly (and now) *Epelidinium? granulatum*. Questionable assignment: Williams et al. (2015, p.305). Age: late Eocene.

leptotoichum Iakovleva, 2016, p.8–9 (on PDF initially published online), pl.4, figs.1–6,10–12; pl.5, figs.7–9,13; pl.6, figs.1–6,11–13; pl.6, figs.9–12; text-fig.4a (part). Holotype: Iakovleva, 2016, pl.4, figs.1–6. Age: earliest Eocene.

normandiense Iakovleva, 2016, p.9 (on PDF initially published online), pl.7, figs.4–5; text-fig.4a (part). Holotype: Iakovleva, 2016, pl.7, figs.4–5. Age: earliest Eocene.

**pechoricum* (Iakovleva and Heilmann-Clausen, 2007, p.1024,1025,1027–1031, fig.2, nos.1–5; fig.3, nos.1–12; fig.4, nos.1–6; fig.5, nos.1–4; fig.6, nos.1–4) Williams et al. 2015, p.305. Holotype: Iakovleva and Heilmann-Clausen, 2007, fig.2, nos.4–5, fig.3, no.1. Originally *Wilsonidium*, subsequently (and now) *Epelidinium*. Age: Earliest Eocene.

?*translucidum* (Michoux, 1988, p.31–32, pl.4, figs.1–5,7–8; text-fig.9) Williams et al., 2015, p.305. Holotype: Michoux, 1988, pl.4, fig.4. Originally *Rhombodinium*, subsequently (and now) *Epelidinium?* Questionable assignment: Williams et al. (2015, p.305). Age: early Eocene.

triangulatum (Yu Jingxian, 1989, p.155–156, pl.58, figs.2,5,8) Williams et al., 2015, p.305. Holotype: Yu Jingxian, 1989, pl.58, fig.2. Originally *Gochtodinium*, subsequently *Wetzeliella*, thirdly *Wilsonidium*, fourthly (and now) *Epelidinium*. Age: Eocene.

EPELIDOSPHAERIDIA Davey, 1969a, p.142. Type: Cookson and Hughes, 1964, pl.8, fig.8, as *Epelidosphaeridia spinosa*.

"*aspera*" (Singh, 1971, p.322, pl.50, fig.1) Morgan, 1980, p.23. Holotype: Singh, 1971, pl.50, fig.1; Fauconnier and Masure, 2004, pl.14, fig.1. **NOW** *Circulodinium*. Originally *Canningia*, subsequently *Canningia?*, thirdly *Epelidosphaeridia*, fourthly *Cyclonephelium*, fifthly (and now) *Circulodinium*. Age: middle Albian.

colligata (Morgan, 1980, p.32, pl.29, figs.6–11) Lentin and Williams, 1985, p.127. Holotype: Morgan, 1980, pl.29, figs.6–8. Originally *Tenua* Eisenack, subsequently (and now) *Epelidosphaeridia*. Age: Aptian–early Albian.

pentagona Morgan, 1980, p.23, pl.12, figs.11–15. Holotype: Morgan, 1980, pl.12, figs.14–15. Age: early–late Albian.

**spinosa* Cookson and Hughes, 1964, p.49, pl.8, figs.6–8 ex Davey, 1969a, p.143. Holotype: Cookson and Hughes, 1964, pl.8, fig.8. Originally *Palaeoperidinium* (name not validly published), subsequently (and now) *Epelidosphaeridia*. The name *Palaeoperidinium spinosum* was not validly published in Cookson and Hughes (1964) since the generic name *Palaeoperidinium* was not validly published until 1967. Age: early Cenomanian.

EPIPLOSPHAERA Klement, 1960, p.73. Emendation: Brenner, 1988, p.50. Type: Klement, 1960, pl.8, figs.1–2, as *Epiplosphaera bireticulata*.

?*areolata* Klement, 1960, p.76–77, pl.8, figs.5–9. Holotype: Klement, 1960, pl.8, figs.5–7; Fauconnier and Masure, 2004, pl.26, fig.8; pl.27, fig.1. Originally *Epiplosphaera*, subsequently *Lithodinia?*, thirdly (and now) *Epiplosphaera?*. Brenner (1988, p.50–51) retained this species in *Epiplosphaera*. Questionable assignment: Fauconnier and Masure in Fauconnier and Masure (2004, p.225–226). Age: early Kimmeridgian.

**bireticulata* Klement, 1960, p.74–75, pl.8, figs.1–4. Holotype: Klement, 1960, pl.8, figs.1–2; Fauconnier and Masure, 2004, pl.27, figs.2–5. Taxonomic junior synonym: *Palaeoperidinium* (now *Epiplosphaera*) *reticulatum*, by implication in Courtinat (1989, p.176), who believed *Palaeoperidinium* (as *Epiplosphaera*) *reticulatum* to be the senior name — however, Poulsen (1992a, p.66) retained the two species. Age: early Kimmeridgian.

gochtii (Fensome, 1979, p.20–22, pl.2, figs.8–9,11–12; text-fig.8) Brenner, 1988, p.51. Holotype: Fensome, 1979, pl.2, figs.8–9,11–12; text-fig.8. Originally *Ellipsoidictyum*, subsequently (and now) *Epiplosphaera*. Taxonomic junior synonym: *Sentusidinium* (as *Epiplosphaera*) *ornata*, according to Poulsen (1992a, p.68). Age: early Callovian.

"*ornata*" (Courtinat in Courtinat and Gaillard, 1980, p.61–62, pl.9, figs.2–3,5; text-fig.10a) Brenner, 1988, p.52. Holotype: Courtinat and Gaillard, 1980, pl.9, fig.2; Fauconnier and Masure, 2004, pl.28, figs.5–10. Originally *Sentusidinium*, subsequently *Epiplosphaera*. **Taxonomic senior synonym:** *Epiplosphaera gochtii*, according to Poulsen (1992a, p.68). Taxonomic senior synonym: *Epiplosphaera reticulospinosa*, according to Courtinat (1989, p.176) — however, Poulsen (1992a, p.68) considered *Epiplosphaera ornata* to be a taxonomic junior synonym of *Epiplosphaera gochtii*. Fauconnier and Masure in Fauconnier and Masure (2004, p.226) listed this taxon as a problematic species of *Epiplosphaera*, but did not refer to the proposal by Poulsen. Age: late Oxfordian.

reticulata (Valensi, 1953, p.28, pl.2, figs.4–5,14,19; pl.13, fig.6; text-fig.2d ex Sarjeant, 1968, p.230) Courtinat, 1989, p.176. Holotype: Valensi, 1953, pl.2, figs.4–5; Fauconnier and Masure, 2004, pl.28, figs.1–4. Originally *Palaeoperidinium* (name not validly published), subsequently *Dictyopyxis* (generic name illegitimate), thirdly *Dictyopyxidia*, fourthly *Ellipsoidictyum*, fifthly (and now) *Epiplosphaera*. Taxonomic senior synonym: *Epiplosphaera bireticulata*, by implication in Courtinat (1989, p.176), who believed *Palaeoperidinium* (as

Epiplosphaera) *reticulatum* to be the senior name — however, Poulsen (1992a, p.66) retained the two species. Age: Bajocian.

reticulospinosa Klement, 1960, p.75–76, pl.8, figs.10–12. Holotype: Klement, 1960, pl.8, figs.10–11; Fauconnier and Masure, 2004, pl.27, figs.6–8. Taxonomic junior synonym: *Sentusidinium* (subsequently *Epiplosphaera*) *ornatum*, according to Courtinat (1989, p.176) — however, Poulsen (1992a, p.68) considered *Epiplosphaera ornata* to be a taxonomic junior synonym of *Epiplosphaera gochtii*. Age: early Kimmeridgian.

saturnalis (Brideaux and Fisher, 1976, p.24–25, pl.6, figs.1–10; pl.7, figs.1–13) Dodekova, 1994, p.25. Holotype: Brideaux and Fisher, 1976, pl.6, figs.1–7. Originally *Lanterna*, subsequently *Lanterna?*, thirdly *Pandadinium*, fourthly (and now) *Epiplosphaera*. Age: late Oxfordian–late Kimmeridgian.

EPITRICYSTA Stover and Helby, 1987c, p.234. Type: Stover and Helby, 1987c, figs.8K,9E–G,M–N, as *Epitricysta vinckensis*.

****vinckensis*** Stover and Helby, 1987c, p.234–235,238, figs.7A–B,8A–L,9A–N. Holotype: Stover and Helby, 1987c, figs.8K,9E–G,M–N; Fensome et al., 1996, figs.4–6 — p.2433. Age: Hauterivian–Aptian.

"**ERIKANIA**" Morgenroth, 1966a, p.27. **Taxonomic senior synonym:** *Thalassiphora*, according to Stover and Evitt (1978, p.194). Type: Morgenroth, 1966a, pl.6, fig.8, as *Erikania dynamica*.

****dynamica***" Morgenroth, 1966a, p.27–28, pl.6, figs.7–8. Holotype: Morgenroth, 1966a, pl.6, fig.8. **NOW** *Thalassiphora*. Originally *Erikania*, subsequently (and now) *Thalassiphora*. Taxonomic junior synonym: *Thalassiphora* (as *Disphaeria*) *munda*, according to Yun Hyesu (1981, p.70) — however, Lentin and Williams (1985, p.353) retained *Thalassiphora* (as *Disphaeria*) *munda*. Age: early Eocene.

ERYMNODINIUM Lentin et al., 1994, p.579,581. Type: de Verteuil and Norris, 1992, pl.9, figs.3–4, as *Sumatradinium? delectabile*.

****delectabile*** (de Verteuil and Norris, 1992, p.401–402, pl.9, figs.2–6; text-fig.7) Lentin et al., 1994, p.581. Holotype: de Verteuil and Norris, 1992, pl.9, figs.3–4. Originally *Sumatradinium?*, subsequently (and now) *Erymnodinium*. Age: late Miocene.

ESCHARISPHAERIDIA Erkmen and Sarjeant, 1980, p.62–63. Type: Sarjeant, 1968, pl.3, fig.9, as *Chytroeisphaeridia pocockii*.

dicrypta (Gitmez and Sarjeant, 1972, p.225–226, pl.7, fig.6; text-fig.22) Williams et al., 1993, p.57. Holotype: Gitmez and Sarjeant, 1972, pl.7, fig.6; text-fig.22. Originally *Meiourogonyaulax*, subsequently *Lithodinia*, thirdly *Meiourogonyaulax?*, fourthly *Canningia*, fifthly (and now) *Escharisphaeridia*. Age: early–late Kimmeridgian.

"***dictydia***" (Sarjeant, 1972, p.41, pl.3, fig.3; pl.6, fig.6) Erkmen and Sarjeant, 1980, p.63. Holotype: Sarjeant, 1972, pl.6, fig.6. **NOW** *Valensiella*. Originally *Chytroeisphaeridia*, subsequently *Batiacasphaera*, thirdly *Escharisphaeridia*, fourthly *Cassiculosphaeridia*, fifthly (and now) *Valensiella*. Age: Bathonian–Callovian.

"***enayi***" Courtinat, 1989, p.181, pl.23, fig.6. Holotype: Courtinat, 1989, pl.23, fig.6. Originally *Escharisphaeridia*, subsequently *Omatidium*. **Taxonomic senior synonym:** *Escharisphaeridia psilata*, according to Poulsen (1996, p.80). Age: Oxfordian.

gaillardii Courtinat, 1989, p.178–179, pl.17, fig.7; pl.20, figs.5,8; pl.21, fig.10; pl.22, fig.13; pl.23, figs.2,7–8; text-fig.78A. Holotype: Courtinat, 1989, pl.23, fig.2. Age: Oxfordian–Kimmeridgian.

granulata (Courtinat in Courtinat and Gaillard, 1980, p.13–14, pl.1, figs.4,6; text-fig.2b) Stover and Williams, 1987, p.89. Holotype: Courtinat and Gaillard, 1980, pl.1, fig.6. Originally *Chytroeisphaeridia*, subsequently (and now) *Escharisphaeridia*, thirdly *Sentusidinium*. Courtinat in Fauconnier and Masure (2004, p.488) retained this species in *Escharisphaeridia*. Age: late Oxfordian.

"laevigata" Smelror, 1988b, p.152–153, figs.10G–H. Holotype: Smelror, 1988b, fig.10G. **NOW** *Batiacasphaera*. Originally *Escharisphaeridia*, subsequently (and now) *Batiacasphaera*. Taxonomic senior synonym: *Escharisphaeridia psilata*, according to Poulsen (1996, p.80) — however, Feist-Burkhardt and Monteil (1997, p.40) retained *Escharisphaeridia* (as and now *Batiacasphaera*) *laevigata*. Taxonomic junior synonym: *Escharisphaeridia nuda*, according to Prauss in Lentin and Williams (1993, p.213). Age: late Bathonian–early Oxfordian.

mantellii (Gitmez and Sarjeant, 1972, p.186, pl.1, figs.3–4; pl.12, fig.3) Courtinat, 1989, p.180. Holotype: Gitmez and Sarjeant, 1972, pl.1, fig.3. Originally *Chytroeisphaeridia*, subsequently *Chytroeisphaeridia?*, thirdly (and now) *Escharisphaeridia*. Age: early–late Kimmeridgian.

"nuda" Prauss, 1989, p.33, pl.10, figs.2–3; text-fig.10. Holotype: Prauss, 1989, pl.10, fig.2; text-fig.10. **Taxonomic senior synonym:** *Escharisphaeridia laevigata*, according to Prauss in Lentin and Williams (1993, p.213). Taxonomic senior synonym: *Escharisphaeridia psilata*, according to Poulsen (1996, p.80) — however, Feist-Burkhardt and Monteil (1997, p.40) retained *Escharisphaeridia nuda* as a taxonomic junior synonym of *Escharisphaeridia laevigata*. Age: middle Bajocian–late Callovian.

?ovata (Yu Jingxian and Zhang Wangping, 1980, p.106, pl.1, figs.12–13) He Chengquan et al., 2009, p.224. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.1, fig.13. Originally *Chytroeisphaeridia*, subsequently (and now) *Escharisphaeridia?*. Questionable assignment: He Chengquan et al. (2009, p.224). Age: Late Cretaceous.

"pelionensis" Poulsen, 1993, p.254. **Name not validly published:** no description or illustration.

***pocockii** (Sarjeant, 1968, p.230, pl.3, fig.9) Erkmen and Sarjeant, 1980, p.62. Holotype: Sarjeant, 1968, pl.3, fig.9; Eisenack and Kjellström, 1972, p.185; Davey, 1979d, pl.2, figs.7,10; Fensome et al., 1995, fig.1 — p.1673. Originally *Chytroeisphaeridia*, subsequently *Lithodinia*, thirdly (and now) *Escharisphaeridia*. Age: late Callovian.

psilata Kumar, 1986b, p.383,385, pl.2, fig.2; text-fig.3. Holotype: Kumar, 1986b, pl.2, fig.2; text-fig.3. Taxonomic junior synonyms: *Escharisphaeridia enayi*, *Escharisphaeridia laevigata* and *Escharisphaeridia nuda*, all according to Poulsen (1996, p.80) — however, Feist-Burkhardt and Monteil (1997, p.40) retained *Escharisphaeridia* (as and now *Batiacasphaera*) *laevigata*, and regarded *Escharisphaeridia nuda* as a taxonomic junior synonym of *Escharisphaeridia laevigata*. Age: early Kimmeridgian–Tithonian.

rudis Davies, 1983, p.28, pl.10, figs.7,10–18; text-fig.25. Emendation: Prauss, 1989, p.34. Holotype: Davies, 1983, pl.10, fig.13. Age: late Callovian–Valanginian.

rugosa (Courtinat in Courtinat and Gaillard, 1980, p.15–16, pl.1, fig.12; pl.2, fig.1; text-fig.2d) Courtinat, 1989, p.181. Holotype: Courtinat and Gaillard, 1980, pl.2, fig.1. Originally *Chytroeisphaeridia*, subsequently (and now) *Escharisphaeridia*. Age: late Oxfordian.

senegalensis Jan du Chêne, 1988, p.155, pl.15, figs.1–8. Holotype: Jan du Chêne, 1988, pl.15, figs.5–6. Age: Danian.

shangsica (He Chengquan, 1984b, p.162, pl.8, figs.16–19) He Chengquan et al., 2009, p.225. Holotype: He Chengquan, 1984b, pl.8, fig.16. Originally *Chytroeisphaeridia*, subsequently (and now) *Escharisphaeridia*. Age: Tertiary.

EUCLADINIUM Stover and Evitt, 1978, p.104. Type: Cookson and Eisenack, 1970a, pl.11, fig.3, as *Deflandrea madurensis*.

gambangense (Cookson and Eisenack, 1970a, p.140, pl.11, figs.1–2) Stover and Evitt, 1978, p.104. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.1. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eucladinium*. Age: Senonian.

kaikourense Schiøler and Wilson, 1998, p.332,334, pl.1, figs.1–9. Holotype: Schiøler and Wilson, 1998, pl.1, figs.1–2. Age: middle-late Santonian.

****madurense*** (Cookson and Eisenack, 1970a, p.140, pl.11, figs.3–4) Stover and Evitt, 1978, p.104. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.3; Eisenack and Kjellström, 1975a, page labelled "nach S.194"; Fensome et al., 1996, fig.1 — p.2219. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eucladinium*. Age: Senonian.

spinosissimum (Cookson and Eisenack, 1970a, p.141, pl.11, figs.5–6) Stover and Evitt, 1978, p.104. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.5. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eucladinium*. Age: Senonian.

EURYDINIUM Stover and Evitt, 1978, p.104–105. Type: Cookson and Eisenack, 1970a, pl.12, fig.9, as *Deflandrea ingramii*.

"conoratum" (Stover, 1974, p.171–172, pl.1, figs.8a–b; text-fig.3C) Stover and Evitt, 1978, p.105. Holotype: Stover, 1974, pl.1, figs.8a–b. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly *Eurydinium*, fifthly (and now) *Manumiella*. Age: early-middle Paleocene.

ellipticum Mao Shaozhi and Mohr, 1992, p.318, pl.2, figs.1–2,8–9; pl.10, fig.1. Holotype: Mao Shaozhi and Mohr, 1992, pl.2, fig.9. Age: Maastrichtian.

euthemum (Davey and Verdier, 1971, p.40, pl.3, figs.1–3) Stover and Evitt, 1978, p.105. Holotype: Davey and Verdier, 1971, pl.3, fig.2. Originally *Deflandrea*, subsequently *Subtilisphaera?*, thirdly (and now) *Eurydinium*. Age: middle-late Albian.

eyrense (Cookson and Eisenack, 1971, p.217–218, pl.7, figs.2–3) Stover and Evitt, 1978, p.105. Holotype: Cookson and Eisenack, 1971, pl.7, fig.3. Originally *Deflandrea*, subsequently *Alterbia?* (combination illegitimate), thirdly (and now) *Eurydinium*. Age: Albian–Cenomanian.

glomeratum (Davey, 1970, p.343–344, pl.1, figs.7–9) Stover and Evitt, 1978, p.105. Holotype: Davey, 1970, pl.1, figs.7–8. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eurydinium*. Age: Cenomanian.

****ingramii*** (Cookson and Eisenack, 1970a, p.143, pl.12, figs.7–9) Stover and Evitt, 1978, p.105. Holotype: Cookson and Eisenack, 1970a, pl.12, fig.9; Eisenack and Kjellström, 1975a, figure to left — p.190a; Fensome et al., 1996, fig.3 — p.2167. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Senegalinium*, fourthly (and now) *Eurydinium*. Age: Albian–Cenomanian.

obliquum He Chengquan, 1991, p.85–86, pl.29, figs.25–26. Holotype: He Chengquan, 1991, pl.29, fig.25. Age: Turonian.

"raijae" (Kjellström, 1973, p.20–22, fig.16) Stover and Evitt, 1978, p.105. Holotype: Kjellström, 1973, fig.16. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Eurydinium*, fourthly (and now) *Manumiella*. Age: middle-late Maastrichtian.

saxoniense Marshall and Batten, 1988, p.92,94, pl.1, figs.8,10–12. Holotype: Marshall and Batten, 1988, pl.1, figs.10–11. Age: late Cenomanian–early Turonian.

tempestivum Mao Shaozhi and Norris, 1988, p.44–45, pl.11, figs.15–17; text-fig.15. Holotype: Mao Shaozhi and Norris, 1988, pl.11, fig.17. Age: Turonian–Santonian.

"*EURYSPHAERIDIUM*" Wilson in Slimani, 1994, p.77. **Name not validly published:** no description. See discussion under *Neoeurysphaeridium*.

"*fibratum*" Wilson in Slimani, 2001a, p.192. **Name not validly published:** no description. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Florentinia*?) *flosculus*, according to Slimani (2001a, p.192).

"*glabrum*" Wilson in Slimani, 1994, p.78. **Name not validly published:** no description or illustration. **Taxonomic senior synonym:** *Neoeurysphaeridium glabrum*, according to Slimani (2001a, p.193).

EVANSIA Pocock, 1972, p.95. Emendations: Jansonius, 1986, p.208; Below, 1990, p.72. Taxonomic junior synonyms: *Glomodinium*, according to Jansonius (1986, p.208); *Crussolia*, according to Below (1990, p.73). Type: Pocock, 1972, pl.24, fig.7, as *Evansia granulata*.

alaskensis (Wiggins, 1975, p.104, pl.2, figs.7–8) Below, 1990, p.72. Holotype: Wiggins, 1975, pl.2, fig.7. Originally *Pareodinia*, subsequently *Glomodinium* (combination not validly published), thirdly (and now) *Evansia*. Taxonomic junior synonyms: *Pareodinia minuta* and *Pareodinia robusta*, both according to Below (1990, p.72) — however, Poulsen (1996, p.62) retained *Pareodinia robusta*. Below (1990, p.65) suggested that *Pareodinia arctica* may be a smooth variant of this species. Age: ?Callovian–mid Kimmeridgian.

barentsensis (Smelror, 1988a, p.296, pl.3, figs.4–5; text-fig.11) Below, 1990, p.72. Holotype: Smelror, 1988a, pl.3, fig.5. Originally *Pareodinia*, subsequently (and now) *Evansia*. Age: early Callovian–early Oxfordian.

cerebraloides (Århus et al., 1989, p.45, figs.4a–d) Lentin and Williams, 1993, p.214. Holotype: Århus et al., 1989, fig.4a. Originally *Glomodinium*, subsequently (and now) *Evansia*. Age: late Mid–early late Callovian.

dalei (Smelror and Århus, 1989, p.42, figs.2A–D,3A–D,4A–D) Below, 1990, p.73. Holotype: Smelror and Århus, 1989, figs.3A–B. Originally *Crussolia*, subsequently (and now) *Evansia*. Age: late Callovian.

deflandrei (Wolfard and Van Erve, 1981, p.325–326,328, pl.1, figs.1–2; pl.2, figs.1–4; text-fig.3) Below, 1990, p.73. Holotype: Wolfard and Van Erve, 1981, pl.1, figs.1–2; Fensome et al., 1993a, figs.1–2 — p.1103. Originally *Crussolia*, subsequently (and now) *Evansia*. Age: Callovian–early Oxfordian.

"*erregulensis*" Filatoff, 1975, p.90, pl.29, figs.12–14. Emendation: Stover and Helby, 1987a, p.111, as *Phallocysta erregulensis*, as a revised description. Holotype: Filatoff, 1975, pl.29, fig.14; Stover and Helby, 1987a, figs.11L–M. **NOW** *Phallocysta*?. Originally *Evansia*, subsequently *Evansia*?, thirdly *Phallocysta*, fourthly *Andreedinium*, fifthly (and now) *Phallocysta*?. Questionable assignment: Stover and Evitt (1978, p.230). Age: Bajocian.

eschachensis Below, 1990, p.73–74, pl.19, figs.2–5,14–15; pl.20, figs.1,3,6,9–11; text-figs.21a–g. Holotype: Below, 1990, pl.19, figs.2–5,15. Contrary to the opinion of Lentin and Williams (1993, p.215), this name is validly published. Below (1987a, p.6) stated that, unless otherwise indicated, all the material is in his personal collection. Since Below (1987a, 1987b, 1990) are parts I to III of a single study, we agree with J. Jansonius (personal communication) that Below's (1987a) repository statement refers to all three publications, fulfilling the requirement of I.C.N. Article 40.7 (see also the discussion on Article 40.7 in the Introduction). Age: Aalenian–Bajocian.

evittii (Pocock, 1972, p.94–95, pl.24, figs.6,8; text-fig.11) Jansonius, 1986, p.208. Holotype: Pocock, 1972, pl.24, fig.8, lost according to Jansonius (1986, p.208). Lectotype: Jansonius, 1986, pl.6, figs.8–9, designated by Jansonius (1986, p.208). Originally *Tenua* Eisenack, subsequently *Pareodinia*, thirdly *Glomodinium*, fourthly (and now) *Evansia*. Taxonomic junior synonyms: *Pareodinia tripartita*, according to Wiggins (1975, p.105) and Lentin and Williams (1989, p.131); (at specific rank) *Pareodinia tripartita* var. *rotunda*, according to Wiggins (1975, p.105) and Below (1990, p.73). Age: late Bajocian–Callovian.

granochagrinata Below, 1990, p.74,76, pl.18, figs.5–12,14–15. Holotype: Below, 1990, pl.18, figs.7–10,14. Contrary to the opinion of Lentin and Williams (1993, p.215), this name is validly published. Below (1987a, p.6) stated that, unless otherwise indicated, all the material is in his personal collection. Since Below (1987a, 1987b, 1990) are parts I to III of a single study, we agree with J. Jansonius (personal communication) that Below's (1987a) repository statement refers to all three publications, fulfilling the requirement of I.C.N. Article 40.7 (see also the discussion on Article 40.7 in the Introduction). Age: late Pliensbachian–Aalenian.

**granulata* Pocock, 1972, p.95, pl.24, fig.7; text-fig.12. Holotype: Pocock, 1972, pl.24, fig.7; Jansonius, 1986, pl.5, figs.1–3; text-figs.10a–b. Originally (and now) *Evansia*, subsequently *Glomodinium*. Lentin and Williams (1993, p.215) retained this species in *Evansia*. Age: late Bajocian.

janeae Piasecki, 2001, p.20,22,24,26, figs.3A–I. Holotype: Piasecki, 2001, fig.3B. Age: middle Bathonian–middle Callovian.

lacryma Mantle, 2005, p.252–254, pl.1, figs.1–9; text-figs.4A–B,5A–I. Holotype: Mantle, 2005, pl.1, figs.1–2. Age: Callovian–early Oxfordian.

?*opeasatos* (Davies, 1983, p.17, pl.3, figs.13–16; text-fig.10) Jansonius, 1986, p.208. Holotype: Davies, 1983, pl.3, fig.13; text-fig.10. Originally *Glomodinium*, subsequently (and now) *Evansia*. Questionable assignment: Below (1990, p.73). N.I.A. Age: late Bathonian–Oxfordian.

perireticulata (Århus et al., 1989, p.46, figs.5a–i) Lentin and Williams, 1993, p.215. Holotype: Århus et al., 1989, fig.5a. Originally *Crussolia*, subsequently (and now) *Evansia*. Age: Callovian.

polyedrica Below, 1990, p.76,78, pl.18, figs.1–4,13; text-figs.22a–e. Holotype: Below, 1990, pl.18, figs.1–4,13. Contrary to the opinion of Lentin and Williams (1993, p.215), this name is validly published. Below (1987a, p.6) stated that, unless otherwise indicated, all the material is in his personal collection. Since Below (1987a, 1987b, 1990) are parts I to III of a single study, we agree with J. Jansonius (personal communication) that Below's (1987a) repository statement refers to all three publications, fulfilling the requirement of I.C.N. Article 40.7 (see also the discussion on Article 40.7 in the Introduction). Age: late Toarcian.

reticulopilosa (Dodekova, 1975, p.26–27, pl.5, figs.1–6) Jansonius, 1986, p.208. Holotype: Dodekova, 1975, pl.5, figs.1–2. Originally *Glomodinium*, subsequently *Pareodinia*, thirdly (and now) *Evansia*. Age: late Bathonian.

spongogranulata Below, 1990, p.78–79, pl.19, figs.6–13; pl.20, figs.2,4–5,7–8; text-figs.23a–d. Holotype: Below, 1990, pl.19, figs.6–9,12. Contrary to the opinion of Lentin and Williams (1993, p.215), this name is validly published. Below (1987a, p.6) stated that, unless otherwise indicated, all the material is in his personal collection. Since Below (1987a, 1987b, 1990) are parts I to III of a single study, we agree with J. Jansonius (personal communication) that Below's (1987a) repository statement refers to all three publications, fulfilling the requirement of I.C.N. Article 40.7 (see also the discussion on Article 40.7 in the Introduction). Age: Aalenian–Bajocian.

"*tripartita*" (Johnson and Hills, 1973, p.208, pl.2, figs.12–14,17–18; pl.3, figs.1–2; text-figs.11A–C) Jansonius, 1986, p.208. Holotype: Johnson and Hills, 1973, pl.2, fig.18. Originally *Pareodinia*, subsequently *Glomodinium*, thirdly *Evansia*. **Taxonomic senior synonym:** *Tenua* (as *Pareodinia*, now *Evansia*) *evittii*, according to Wiggins (1975, p.105) and Lentin and Williams (1989, p.132). Age: late Bathonian.

"subsp. *rotunda*" (Johnson and Hills, 1973, p.209, pl.3, figs.1–2; text-figs.11C) Jansonius, 1986, p.208. Holotype: Johnson and Hills, 1973, pl.3, fig.2. Originally *Pareodinia tripartita* var. *rotundus*, subsequently *Pareodinia tripartita* subsp. *rotunda*, thirdly *Evansia tripartita* subsp. *rotunda*. **Taxonomic senior synonym** (at specific rank): *Tenua* (as *Pareodinia*, now *Evansia*) *evittii*, according to Wiggins (1975, p.105) and Lentin and Williams (1989, p.132). Age: late Bathonian.

"subsp. *tripartita*". Autonym. Holotype: Johnson and Hills, 1973, pl.2, fig.18. Originally *Pareodinia tripartita* subsp. *tripartita*, subsequently *Evansia tripartita* subsp. *tripartita*. **Taxonomic senior synonym:** *Tenua* (as *Pareodinia*, now *Evansia*) *evittii*, according to Wiggins (1975, p.105).

wigginsii (Smelror, 1988a, p.296,298, pl.8, figs.1–2; text-fig.12) Below, 1990, p.73. Holotype: Smelror, 1988a, pl.8, fig.2. Originally *Pareodinia*, subsequently (and now) *Evansia*. Age: early Oxfordian.

zabra (Davies, 1983, p.18, pl.3, figs.2–12; text-figs.11A–C) Jansonius, 1986, p.208. Holotype: Davies, 1983, pl.3, fig.12; text-figs.11A–C. Originally *Glomodinium*, subsequently (and now) *Evansia*. Age: Bathonian–Oxfordian.

"**EVITTIA**" Pocock, 1972, p.93. **Name illegitimate** — **senior homonym**: *Evittia* Brito, 1967, p.477 (Appendix A). Substitute name: *Pocockia*. **Taxonomic senior synonym**: *Ovoidinium*, by implication in Lentin and Williams (1976, p.162), who considered *Pocockia* to be a taxonomic junior synonym of *Ovoidinium*. Taxonomic senior synonym: *Ascodinium*, by implication in Helenes (1983, p.258), who considered both *Pocockia* and *Ovoidinium* to be taxonomic junior synonyms of that genus — however, *Ovoidinium* is now generally retained, with *Deflandrea* (as *Ovoidinium*) *cincta* assigned to it. Type: Cookson and Eisenack, 1958, pl.4, fig.3, as *Deflandrea cincta*.

"**cincta*" (Cookson and Eisenack, 1958, p.26, pl.4, figs.1–3) Pocock, 1972, p.93. Holotype: Cookson and Eisenack, 1958, pl.4, fig.3. **Combination illegitimate**: the generic name *Evittia* Pocock, 1972 is illegitimate. **NOW** *Ovoidinium*. Originally *Deflandrea*, subsequently *Evittia* Pocock (combination illegitimate), thirdly *Pocockia*, fourthly (and now) *Ovoidinium*, fifthly *Ascodinium*. Age: late Neocomian–early Aptian.

"*waltonii*" Pocock, 1972, p.93, pl.22, figs.13–14. Holotype: Pocock, 1972, pl.22, fig.13. **NOW** *Ovoidinium*. Originally *Evittia* Pocock (generic name illegitimate), subsequently *Pocockia*, thirdly (and now) *Ovoidinium*, fourthly *Ascodinium*. Following I.C.N. Article 55.1, the species name *Evittia waltonii* is validly published even though the generic name *Evittia* Pocock is illegitimate. Age: ?Toarcian–?Bajocian, according to Jansonius (1986, p.202).

EVITTODINIUM Deflandre, 1964, p.5030. Lentin and Williams (1976, p.159) considered this to be a "nomen dubium". Type: Deflandre, 1964, figs.1–5, as *Evittodinium giselae*.

**giselae* Deflandre, 1964, p.5030, figs.1–5. Holotype: Deflandre, 1964, figs.1–5. Lentin and Williams (1976, p.159) considered this to be a "nomen dubium". Age: Senonian.

EVITTOSPHAERULA Manum, 1979, p.242–243. Emendation: Damassa, 1997, p.161,163. Type: Manum, 1979, pl.2, figs.6–10, as *Evittosphaerula paratabulata*.

**paratabulata* Manum, 1979, p.243,246, pl.2, figs.1–12; text-figs.3–4. Emendation: Damassa, 1997, p.166. Holotype: Manum, 1979, pl.2, figs.6–10; Fensome et al., 1995, fig.1 — p.1643. Age: middle Oligocene–early Miocene.

EXIGUISPHAERA Duxbury, 1979a, p.198–199. Emendation: Jan du Chêne et al., 1986b, p.11. Type: Duxbury, 1979a, pl.2, figs.2–3; text-figs.1A–B, as *Exiguisphaera phragma*.

**phragma* Duxbury, 1979a, p.199, pl.2, figs.2–3,5; text-figs.1A–B,2. Emendation: Jan du Chêne et al., 1986b, p.11. Holotype: Duxbury, 1979a, pl.2, figs.2–3; text-figs.1A–B; Jan du Chêne et al., 1986a, pl.35, figs.1–6; Jan du Chêne et al., 1986b, pl.28, figs.1,3; Fensome et al., 1995, figs.1–4 — p.1667. N.I.A. Age: early Hauterivian.

pectilis Duxbury, 1980, p.118–119, pl.3, figs.5,8,11. Emendation: Jan du Chêne et al., 1986b, p.12. Holotype: Duxbury, 1980, pl.3, figs.5,8; Jan du Chêne et al., 1986a, pl.35, figs.10,12; Jan du Chêne et al., 1986b, pl.28, figs.5–9. Age: middle Barremian.

EXOCHOSPHAERIDIUM Davey et al., 1966, p.165. Emendation: Helenes, 2000, p.137. Type: Davey et al., 1966, pl.2, figs.9–10, as *Exochosphaeridium phragmites*.

"*acuminatum*" Wilson in Masure, 1985, p.205. **Name not validly published:** no description or illustration.
Taxonomic senior synonym: *Exochosphaeridium? masureae*, according to Slimani (2001a, p.192; 2001b, p.2).

alitosense Helenes, 2000, p.140, pl.1, figs.1–14,17–18; pl.2, figs.1–20; text-fig.3a–d. Holotype: Helenes, 2000, pl.1, figs.1–4. Age: late Albian.

arnace Davey and Verdier, 1973, p.184–185, pl.1, figs.3,6. Holotype: Davey and Verdier, 1973, pl.1, figs.3,6. Age: late Albian–early Cenomanian.

"*bifidum*" (Clarke and Verdier, 1967, p.72–73, pl.17, figs.5–6; text-fig.30) Clarke et al., 1968, p.182. Emendation: Davey, 1969b, p.26,28, as *Exochosphaeridium bifidum*. Holotype: Clarke and Verdier, 1967, pl.17, fig.5. Originally *Baltisphaeridium* (Appendix A), subsequently (and now) *Exochosphaeridium*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Exochosphaeridium*) *majus* according to Peyrot (2011, p.284). The emendation by Davey (1969b) was given under the heading for the species but probably more appropriately applies to the autonym. Davey (1969b, p.27,29) also proposed this combination, considering it to be not validly published in Clarke et al. (1968). Age: Cenomanian–Campanian.

"subsp. *bifidum*". Autonym. Emendation: Marheinecke, 1992, p.51, as *Exochosphaeridium bifidum* subsp. *bifidum*. Holotype: Clarke and Verdier, 1967, pl.17, fig.5. **Now redundant.**

"var. *bifidum*". Autonym. Emendation: Marheinecke, 1992, p.51, as *Exochosphaeridium bifidum* subsp. *bifidum*. Holotype: Clarke and Verdier, 1967, pl.17, fig.5. **Now redundant.**

"subsp. *involutum*" (Davey, 1969c, p.29, pl.2, figs.1–3) Lentin and Williams, 1973, p.56. Emendation: Marheinecke, 1992, p.52, as *Exochosphaeridium bifidum* subsp. *involutum*. Holotype: Davey, 1969c, pl.2, fig.3. Originally *Exochosphaeridium bifidum* var. *involutum*, subsequently *Exochosphaeridium bifidum* subsp. *involutum*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Exochosphaeridium*) *majus* according to Peyrot (2011, p.284). The possibility of this synonymy was earlier postulated by Marheinecke (1992, p.51). Age: Campanian–Maastrichtian.

"var. *involutum*" Davey, 1969c, p.29, pl.2, figs.1–3. Emendation: Marheinecke, 1992, p.52, as *Exochosphaeridium bifidum* subsp. *involutum*. Holotype: Davey, 1969c, pl.2, fig.3. Originally *Exochosphaeridium bifidum* var. *involutum*, subsequently *Exochosphaeridium bifidum* subsp. *involutum*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Exochosphaeridium*) *majus* according to Peyrot (2011, p.284). The possibility of this synonymy was earlier postulated by Marheinecke (1992, p.51). Age: Campanian–Maastrichtian.

brevispinosum Matsuoka, 1984a, p.381, pl.72, figs.6a–b,7a–b,8–9. Holotype: Matsuoka, 1984a, pl.72, fig.7a–b. Age: middle Eocene.

"?*brevispinum*" Norvick, 1976, p.53, pl.4, figs.5–6. Holotype: Norvick, 1976, pl.4, figs.5–6. **NOW** *Pervosphaeridium*. Originally *Exochosphaeridium*, subsequently *Exochosphaeridium?*, thirdly (and now) *Pervosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.154). Age: Cenomanian.

brevitricatum Slimani, 1994, p.72–73, pl.12, figs.15–19. Holotype: Slimani, 1994, pl.12, figs.15–17. Age: early Campanian–late Maastrichtian.

?*caputmedusae* Cookson and Eisenack, 1974, p.68, pl.25, fig.16. Holotype: Cookson and Eisenack, 1974, pl.25, fig.16. Originally *Exochosphaeridium*, subsequently (and now) *Exochosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.154). Age: Senonian.

"?*cenomaniense*" Norvick, 1976, p.52–53, pl.4, figs.4,8. Holotype: Norvick, 1976, pl.4, fig.4. **NOW** *Pervosphaeridium*. Originally *Exochosphaeridium*, subsequently *Exochosphaeridium?*, thirdly (and now) *Pervosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.154). Age: Cenomanian.

elongatum (Jain and Millepied, 1975, p.150–151, pl.5, figs.73–74) Measure in Fauconnier and Masure, 2004, p.163. Holotype: Jain and Millepied, 1975, pl.5, fig.74. Originally *Polysphaeridium*, subsequently *Polysphaeridium?*, thirdly *Dapsilidinium?*, fourthly (and now) *Exochosphaeridium*. Age: Maastrichtian.

giganteum (Caro, 1973, p.360–361, pl.2, fig.12) Hochuli and Masure in Fauconnier and Masure, 2004, p.345. Holotype: Caro, 1973, pl.2, fig.12; Fauconnier and Masure, 2004, pl.49, figs.13–14. Originally *Polysphaeridium*, subsequently *Cleistosphaeridium*, thirdly *Impletosphaeridium*, fourthly (and now) *Exochosphaeridium*. Age: early Eocene.

granulosum (Jain and Tandon, 1981, p.11, pl.2, figs.30–31; pl.3, fig.50) Measure in Fauconnier and Masure, 2004, p.345. Holotype: Jain and Tandon, 1981, pl.2, fig.30. Originally *Impletosphaeridium*, subsequently (and now) *Exochosphaeridium*. Age: middle Eocene.

?indicum Jain and Taugourdeau-Lantz, 1973, p.63, pl.3, fig.7. Holotype: Jain and Taugourdeau-Lantz, 1973, pl.3, fig.7. Originally *Exochosphaeridium*, subsequently (and now) *Exochosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.154). Age: Early Cretaceous.

insigne de Verteuil and Norris, 1996a, p.116,118, pl.3, figs.1–13; pl.5, figs.1–7. Holotype: de Verteuil and Norris, 1996a, pl.3, figs.5–6,8–10. Age: early Miocene.

longifilum Cookson and Eisenack, 1982, p.44, pl.8, fig.13. Holotype: Cookson and Eisenack, 1982, pl.8, fig.13. Age: latest Turonian–Coniacian.

majus (Lejeune-Carpentier, 1940, p.B220–B221; text-fig.13) Peyrot, 2011, p. 284. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.12, as *Amphorosphaeridium majus*. Holotype: Lejeune-Carpentier, 1940, text-fig.13; Strel et al., 1977, pl.1, fig.7; Lejeune-Carpentier and Sarjeant, 1981, pl.2, figs.6–7; text-fig.7. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*, thirdly *Cordosphaeridium*, fourthly *Dapsilidinium?* (combination not validly published), fifthly *Amphorosphaeridium*, sixthly (and now) *Exochosphaeridium*. Taxonomic junior synonyms: *Baltisphaeridium* (as *Exochosphaeridium*) *bifidum* and *Exochosphaeridium bifidum* var. *involutum* (as *Exochosphaeridium bifidum* subsp. *involutum*), both according to Peyrot (2011, p.284). The possibility of the latter synonymy was earlier postulated by Marheinecke (1992, p.51). Age: Late Cretaceous.

?masureae Slimani, 1996, p.373–374, pl.1, figs.H–L ex Slimani, 2001b, p.2–3, pl.1, figs.1–2,4–5; pl.2, fig.10. Holotype: Slimani, 1996, pl.1, figs.I,L; Slimani, 2001b, pl.1, figs.1–2. Questionable assignment: Slimani (1996, p.373; 2001b, p.2). Taxonomic junior synonym: *Exochosphaeridium acuminatum* (name not validly published), according to Slimani (2001a, p.192; 2001b, p.2). This name was not validly published in Slimani (1996) since no English or Latin description or diagnosis was provided. Age: Campanian.

muelleri Yun Hyesu, 1981, p.25–26, pl.4, figs.12,14–15; pl.5, figs.9,11. Holotype: Yun Hyesu, 1981, pl.4, fig.12; Fensome et al., 1991, fig.1 — p.685. Ziaja (1989, p.214) considered *Hystrichosphaeridium* (as *Exochosphaeridium*) *pseudhystrichodinium* to be the questionable taxonomic senior synonym of this species. Age: early Santonian.

multifurcatum (Deflandre, 1937b, p.76, pl.16 [al. pl.13], figs.1–3) Measure in Fauconnier and Masure, 2004, p.270. Emendation: Measure in Fauconnier and Masure, 2004, p.270, as *Exochosphaeridium multifurcatum*. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), figs.1–2; Fensome et al., 1991, figs.1–2 — p.691; fig.1 — p.693; Fensome et al., 1993a, fig.1 — p.1261; figs.1–2 — p.1265; Fauconnier and Masure, 2004, pl.37, figs.10–11. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Cleistosphaeridium?*, fifthly *Heterosphaeridium*, sixthly (and now) *Exochosphaeridium*. Age: Late Cretaceous.

?palmatum (Deflandre and Courteville, 1939, p.101, pl.3, fig.1) Davey et al., 1969, p.16. Holotype: Deflandre and Courteville, 1939, pl.3, fig.1. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Exochosphaeridium*, fourthly *Exochosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.154). **Taxonomic senior synonym:** *Hystrichosphaeridium* (as and now *Pervosphaeridium*) *pseudhystrichodinium*, according to Yun Hyesu (1981, p.29). This combination was not validly published in Davey et al. (1966, p.166), since these authors did not fully reference the basionym. Age: Late Cretaceous.

**phragmites* Davey et al., 1966, p.165–166, pl.2, figs.8–10. Holotype: Davey et al., 1966, pl.2, figs.9–10. Age: Cenomanian.

"?*pseudhystrichodinium*" (Deflandre, 1937b, p.73, pl.15 [al. pl.12], figs.3–4) Davey et al., 1969, p.16–17. Emendation: Davey, 1969a, p.163, as *Exochosphaeridium pseudhystrichodinium*. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), fig.3; Eisenack and Kjellström, 1972, p.415; Fensome et al., 1995, fig.1 — p.1705. **NOW** *Pervosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Exochosphaeridium?*, fourthly (and now) *Pervosphaeridium*. Questionable assignment: Davey et al. (1969, p.16). Taxonomic junior synonym: *Hystrichosphaeridium* (as *Exochosphaeridium?*) *palmatum*, according to Yun Hyesu (1981, p.29). Ziaja (1989, p.214) considered *Exochosphaeridium muelleri* to be a questionable taxonomic junior synonym of this species. This combination was not validly published in Davey et al. (1966, p.166), since these authors did not fully reference the basionym. Age: Late Cretaceous.

?*punctatum* (Jain and Millepied, 1975, p.151, pl.5, figs.71–72) Masure in Fauconnier and Masure, 2004, p.164. Holotype: Jain and Millepied, 1975, pl.5, fig.72. Originally *Polysphaeridium*, subsequently *Polysphaeridium?*, thirdly *Dapsilidinium?*, fourthly (and now) *Exochosphaeridium?*. Questionable assignment: Masure in Fauconnier and Masure (2004, p.164). Age: Maastrichtian.

reticulatum Matsuoka, 1984a, p.380–381, pl.72, figs.1a–b,2a–b,3–5. Holotype: Matsuoka, 1984a, pl.72, fig.1a–b. Age: middle Eocene.

rhabdophorum (Valensi, 1955b, p.593, pl.3, fig.7) Masure in Fauconnier and Masure, 2004, p.164. Holotype: Valensi, 1955b, pl.3, fig.7; Fauconnier and Masure, 2004, pl.20, figs.10–11. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*, thirdly *Dapsilidinium?*, fourthly (and now) *Exochosphaeridium*. Age: Late Cretaceous.

rhopalophorum (Valensi, 1955a, p.36, fig.1C) Lentin and Williams, 1985, p.131. Holotype: Valensi, 1955a, fig.1C. Originally *Hystrichosphaeridium*, subsequently (and now) *Exochosphaeridium*. Age: Late Cretaceous.

robustum Backhouse, 1988, p.85, pl.26, figs.9a–b,10a–b; pl.28, fig.7; pl.48, fig.1. Holotype: Backhouse, 1988, pl.26, figs.10a–b; Fensome et al., 1996, figs.3–4 — p.2331. Age: late Valanginian–early Barremian.

scitulum Singh, 1971, p.346–347, pl.57, figs.8–9. Holotype: Singh, 1971, pl.57, fig.8. Age: middle Albian.

?*solaster* (Morgenroth, 1966a, p.25, pl.5, figs.8–9) Stover and Evitt, 1978, p.154. Holotype: Morgenroth, 1966a, pl.5, figs.8–9. Originally *Cordosphaeridium*, subsequently (and now) *Exochosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.154). Age: early Eocene.

?*spinosum* (White, 1842, p.37, pl.4, fig.6) Davey 1969a, p.166. Holotype: White, 1842, pl.4, fig.6; lost according to Sarjeant (1966b, p.141). Originally *Xanthidium* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly *Baltisphaeridium* (Appendix A), fourthly *Cordosphaeridium* (combination not validly published), fifthly *Exochosphaeridium*, sixthly (and now) *Exochosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.154). Sarjeant (1966b, p.141) speculated that this species might be the senior synonym of *Hystrichodinium pulchrum*. Age: Late Cretaceous.

"subsp. *deflandrei*" (Lejeune-Carpentier, 1941, p.B84, fig.6) Lentin and Williams, 1973, p.56. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.14, as *Fibrocysta deflandrei*. Holotype: Lejeune-Carpentier, 1941, fig.6; Lejeune-Carpentier and Sarjeant, 1981, pl.4, figs.5–6; text-fig.8. **NOW** *Fibrocysta? deflandrei*. Originally *Hystrichosphaeridium spinosum* var. *deflandrei*, subsequently *Baltisphaeridium spinosum* var. *deflandrei* (Appendix A), thirdly *Cordosphaeridium spinosum* var. *deflandrei* (combination not validly published), fourthly *Exochosphaeridium spinosum* var. *deflandrei*, fifthly *Exochosphaeridium spinosum* subsp. *deflandrei*, sixthly *Exochosphaeridium? spinosum* subsp. *deflandrei*, seventhly (and now) *Fibrocysta? deflandrei*. Age: Late Cretaceous.

"var. *deflandrei*" (Lejeune-Carpentier, 1941, p.B84, fig.6) Davey, 1969a, p.166. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.14, as *Fibrocysta deflandrei*. Holotype: Lejeune-Carpentier, 1941, fig.6;

Lejeune-Carpentier and Sarjeant, 1981, pl.4, figs.5–6; text-fig.8. **NOW** *Fibrocysta? deflandrei*. Originally *Hystrichosphaeridium spinosum* var. *deflandrei*, subsequently *Baltisphaeridium spinosum* var. *deflandrei* (Appendix A), thirdly *Exochosphaeridium spinosum* var. *deflandrei*, fourthly *Exochosphaeridium spinosum* subsp. *deflandrei*, fifthly *Exochosphaeridium? spinosum* subsp. *deflandrei*, sixthly (and now) *Fibrocysta? deflandrei*. Age: Late Cretaceous.

"subsp. *spinosum*". Autonym. Holotype: White, 1842, pl.4, fig.6. **Now redundant**. Originally *Exochosphaeridium spinosum* subsp. *spinosum*, subsequently *Exochosphaeridium? spinosum* subsp. *spinosum*.

"var. *spinosum*". Autonym. Holotype: White, 1842, pl.4, fig.6. **Now redundant**. Originally *Hystrichosphaeridium spinosum* var. *spinosum*, subsequently *Baltisphaeridium spinosum* var. *spinosum* (Appendix A), thirdly *Exochosphaeridium spinosum* var. *spinosum*.

"*striolatum*" (Deflandre, 1937b, p.72–73, pl.15 [al. pl.12], figs.1–2) Davey, 1969a, p.164. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), fig.1. **NOW** *Coronifera*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Exochosphaeridium*, fourthly (and now) *Coronifera*. This combination was not validly published in Davey et al. (1966, p.166), since these authors did not fully reference the basionym. Age: Late Cretaceous.

"subsp. *striolatum*". Autonym. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), fig.1. **NOW** *Coronifera striolata* subsp. *striolata*. Originally *Exochosphaeridium striolatum* subsp. *striolatum*, subsequently (and now) *Coronifera striolata* subsp. *striolata*. Age: Late Cretaceous.

"var. *striolatum*". Autonym. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), fig.1. **Now redundant**.

"subsp. *truncatum*" (Davey, 1969a, p.164–166, pl.7, figs.1–3) Lentin and Williams, 1973, p.56. Emendations: Masure, 1988b, p.129 and Harker and Sarjeant in Harker et al., 1990, p.73–74, both as *Pervosphaeridium truncatum*. Holotype: Davey, 1969a, pl.7, fig.2; Masure, 1988b, pl.4, figs.6A–B; text-fig.5, nos.1–2. **NOW** *Pervosphaeridium truncatum*. Originally *Exochosphaeridium striolatum* var. *truncatum*, subsequently *Exochosphaeridium striolatum* subsp. *truncatum*, thirdly *Exochosphaeridium? truncatum*, fourthly (and now) *Pervosphaeridium truncatum*. Age: Cenomanian.

"var. *truncatum*" Davey, 1969a, p.164–166, pl.7, figs.1–3. Emendations: Masure, 1988b, p.129 and Harker and Sarjeant in Harker et al., 1990, p.73–74, both as *Pervosphaeridium truncatum*. Holotype: Davey, 1969a, pl.7, fig.2; Masure, 1988b, pl.4, figs.6A–B; text-fig.5, nos.1–2. **NOW** *Pervosphaeridium truncatum*. Originally *Exochosphaeridium striolatum* var. *truncatum*, subsequently *Exochosphaeridium striolatum* subsp. *truncatum*, thirdly *Exochosphaeridium? truncatum*, fourthly (and now) *Pervosphaeridium truncatum*. Age: Cenomanian.

"*truncatum*" (Davey, 1969a, p.164–166, pl.7, figs.1–3) Stover and Evitt, 1978, p.154. Emendations: Masure, 1988b, p.129 and Harker and Sarjeant in Harker et al., 1990, p.73–74, both as *Pervosphaeridium truncatum*. Holotype: Davey, 1969a, pl.7, fig.2; Masure, 1988b, pl.4, figs.6A–B; text-fig.5, nos.1–2. **NOW** *Pervosphaeridium truncatum*. Originally *Exochosphaeridium striolatum* var. *truncatum*, subsequently *Exochosphaeridium striolatum* subsp. *truncatum*, thirdly *Exochosphaeridium? truncatum*, fourthly (and now) *Pervosphaeridium truncatum*. Questionable assignment: Stover and Evitt (1978, p.154). Age: Cenomanian.

"*truncigerum*" (Deflandre, 1937b, p.71–72, pl.13 [al. pl.10], figs.6–7) Davey, 1978, p.894. Holotype: Deflandre, 1937b, pl.13 (al. pl.10), fig.6. **NOW** *Raetiaedinium*. Originally *Hystrichosphaeridium*, subsequently *Litosphaeridium?*, thirdly *Cordosphaeridium*, fourthly *Exochosphaeridium*, fifthly *Pervosphaeridium*, sixthly *Tityrosphaeridium?*, seventhly *Florentinia*, eighthly *Pervosphaeridium?*, ninthly (and now) *Raetiaedinium*. Taxonomic senior synonym: *Xanthidium* (now *Hystrichokolpoma*) *crassipes* Reade, 1839, by implication in Yun Hyesu (1981, p.27), who considered *Exochosphaeridium* (as *Pervosphaeridium*) *truncigerum* to be the senior synonym — however, Lentin and Williams (1985, p.282) retained *Hystrichosphaeridium* (as *Pervosphaeridium*) *truncigerum*. Taxonomic junior synonym: *Laticavodinium latispinosum* (name not validly published), according to Slimani (2001a, p.194). Age: Senonian.

"**EYACHIA**" Gocht, 1979, p.307–308. **Taxonomic senior synonym:** *Scriniocassis*, according to Prauss (1989, p.29) and Below (1990, p.30). Type: Gocht, 1979, figs.9a–c, as *Eyachia priscus*.

"***priscus**" Gocht, 1979, p.308,310,312–317, figs.1a–d,2a–b,3a–e,4a–d,5–6,7a–d,8a–b,9a–c,10. Emendation: Below, 1990, p.32, as *Eyachia priscus*. Holotype: Gocht, 1979, figs.9a–c; Fensome et al., 1995, figs.1–2 — p.1687. **NOW** *Scriniocassis*. Originally *Eyachia*, subsequently (and now) *Scriniocassis*. N.I.A. Age: Aalenian.

"**FACETODINIUM**" Bjaerke, 1980, p.69. **Taxonomic senior synonym:** *Susadinium*, according to Lentin and Williams (1985, p.133) and Lentin and Williams (1989, p.135). Taxonomic senior synonym: *Reutlingia*, according to Below (1987a, p.133) — however, Lentin and Williams (1989, p.135) retained *Facetodinium* as a junior synonym of *Susadinium*. Type: Bjaerke, 1980, pl.2, figs.1–3, as *Facetodinium faustum*.

"***faustum**" Bjaerke, 1980, p.69, pl.2, figs.1–6; text-figs.4A–D. Emendation: Below, 1987a, p.136–137, as *Reutlingia fausta*. Holotype: Bjaerke, 1980, pl.2, figs.1–3; Fensome et al., 1993a, figs.1–3 — p.1175. **NOW** *Susadinium*. Originally *Facetodinium*, subsequently (and now) *Susadinium*, thirdly *Reutlingia*. Age: Toarcian.

"**inflatum**" Bjaerke, 1980, p.69–71, pl.3, figs.1–13; text-fig.5. Holotype: Bjaerke, 1980, pl.3, figs.1–6. Originally *Facetodinium*, subsequently *Susadinium*. **Taxonomic senior synonym:** *Susadinium scrofoides*, according to Below (1987a, p.120) and Stover and Williams (1987, p.97). Age: Toarcian.

FALLACIODINIUM Harding, 1998, p.91. Type: Harding, 1998, pl.1, figs.1–2, as *Fallaciodinium minutum*.

***minutum** Harding, 1998, p.91,93,95–97, pl.1, figs.1–3,5–8,10–11; pl.2, figs.1–13; text-figs.1a–c. Holotype: Harding, 1998, pl.1, figs.1–2. Age: late Barremian.

"**FARRAGODINIUM**" Stevens and Helby in Riding and Helby, 2001g, p.212. **Name not validly published:** based on an unpublished manuscript, listed in synonymy. **Taxonomic senior synonym:** *Stanfordella*, by implication in Riding and Helby (2001g, p.212).

"**curiosum**" Stevens and Helby in Riding and Helby, 2001g, p.212. **Name not validly published:** based on an unpublished manuscript, listed in synonymy. **Taxonomic senior synonym:** *Stanfordella granulosa*, by implication in Riding and Helby (2001g, p.212).

"**FAVILARNAX**" Sarjeant, 1963a, p.720. **Name illegitimate — nomenclatural senior synonym:** *Valensiella*, which has the same type. Type: Deflandre, 1947d, text-fig.22, as *Membranilarnax ovulum*.

"**amandopolitana**" (Valensi, 1955b, p.590, pl.2, fig.7; pl.5, fig.2) Sarjeant, 1963a, p.720. Holotype: Valensi, 1955b, pl.2, fig.7. **NOW** *Valensiella*?. Originally *Membranilarnax*, subsequently *Favilarnax*, thirdly *Valensiella*, fourthly (and now) *Valensiella*?. Age: Middle Jurassic.

"***ovulum**" (Deflandre, 1947d, p.9–10; text-figs.22–23) Sarjeant, 1963a, p.720. Emendation: Courtinat, 1989, p.183, as *Valensiella ovulum*. Holotype: Deflandre, 1947d, text-fig.22; Eisenack and Kjellström, 1972, p.1095, figure to left; Fensome et al., 1995, fig.1 — p.1633. **NOW** *Valensiella*. Originally *Membranilarnax*, subsequently *Favilarnax*, thirdly (and now) *Valensiella*. N.I.A. Age: Bajocian.

FIBRADINIUM Morgenroth, 1968, p.537–538. Taxonomic senior synonym: *Phanerodinium*, according to Below (1987b, p.36) — however, Lentin and Williams (1993, p.221) retained *Fibradinium*. Type: Morgenroth, 1968, pl.42, fig.4, as *Fibradinium annetorpense*.

***annetorpense** Morgenroth, 1968, p.538, pl.42, figs.4–7; text-figs.1–2. Holotype: Morgenroth, 1968, pl.42, fig.4. Originally (and now) *Fibradinium*, subsequently *Phanerodinium*. Lentin and Williams (1989, p.135) retained this species in *Fibradinium*. Age: Danian.

?densibaculatum (Below, 1987b, p.44, pl.12, figs.4,9) Lentin and Williams, 1989, p.135. Holotype: Below, 1987b, pl.12, figs.4,9; Fensome et al., 1993a, figs.1–2 — p.1115. Originally *Phanerodinium*, subsequently (and now) *Fibradinium*?. Questionable assignment: Lentin and Williams (1989, p.135). Age: middle-late Albian.

?diatretiforme (Below, 1987b, p.46–47, pl.12, figs.2,7) Lentin and Williams, 1989, p.135. Holotype: Below, 1987b, pl.12, figs.2,7; Fensome et al., 1993a, figs.1–2 — p.1123. Originally *Phanerodinium*, subsequently (and now) *Fibradinium*?. Questionable assignment: Lentin and Williams (1989, p.135). Age: Oligocene.

?follis (Below, 1987b, p.47–48, pl.9, figs.1–6) Lentin and Williams, 1989, p.135. Holotype: Below, 1987b, pl.9, figs.1–5; Fensome et al., 1993a, figs.1–5 — p.1197. Originally *Phanerodinium*, subsequently (and now) *Fibradinium*?. Questionable assignment: Lentin and Williams (1989, p.135). N.I.A. Age: late Bajocian–middle Callovian.

?lacertum (Below, 1987b, p.50–51, pl.9, figs.7–10; pl.12, fig.5) Lentin and Williams, 1989, p.136. Holotype: Below, 1987b, pl.9, figs.7–10; pl.12, fig.5; Fensome et al., 1993a, figs.1–5 — p.1247. Originally *Phanerodinium*, subsequently (and now) *Fibradinium*?. Questionable assignment: Lentin and Williams (1989, p.136). Age: middle Albian.

?squamosum (Below, 1987b, p.54–56, pl.11, figs.1–15; pl.12, figs.1,6,11; pl.16, fig.13) Lentin and Williams, 1989, p.136. Holotype: Below, 1987b, pl.11, figs.1,3–6; Fensome et al., 1993a, figs.1,3–6 — p.1355. Originally *Phanerodinium*, subsequently (and now) *Fibradinium*?. Lentin and Williams (1993, p.222) retained this species in *Fibradinium*. Questionable assignment: Lentin and Williams (1989, p.136). Age: early Oligocene.

variculum Stover and Helby, 1987d, p.267, figs.7A–K. Holotype: Stover and Helby, 1987d, figs.7A–C; Fensome et al., 1996, figs.1–3 — p.2423. Age: Barremian–early Aptian.

"FIBROAESPHAERAE" Colom 1935, p.12. Possible calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1299). **Name not validly published** (see Elbrächter et al., 2008, p.1299). Type: not designated.

"*minutissima" Colom, 1935, p.12, pl.2, fig.8; text-fig.4a [four specimens]). Holotype not designated. **NOW** *Colomisphaera*. Originally *Fibroaesphaerae* (generic name not validly published), subsequently *Stomiosphaera*, thirdly (and now) *Colomisphaera*, fourthly *Schizosphaerella*. See Elbrächter et al. (2008, p.1298) for a discussion of the status of this species name. Age: Late Early Jurassic.

FIBROCYSTA Stover and Evitt, 1978, p.155. Type: Cookson and Eisenack, 1965b, pl.16, fig.8, as *Cordosphaeridium bipolare*.

acornuta Norris and Jux, 1984, p.161–162, pl.1, figs.17–20; pl.2, figs.1–4; pl.3, fig.5; pl.5, figs.1–6. Holotype: Norris and Jux, 1984, pl.2, figs.1–3. Age: late Kimmeridgian–late Tithonian.

axialis (Eisenack, 1965b, p.150, pl.15, figs.1–4) Stover and Evitt, 1978, p.155. Holotype: Eisenack, 1965b, pl.15, fig.2. Originally *Cordosphaeridium*, subsequently *Lanternosphaeridium*, thirdly *Amphorosphaeridium*, fourthly (and now) *Fibrocysta*. Age: late Eocene–early Oligocene.

baculata He Chengquan, 1991, p.168–169, pl.21, fig.1. Holotype: He Chengquan, 1991, pl.21, fig.1. Age: Paleocene.

***bipolaris** (Cookson and Eisenack, 1965b, p.135, pl.16, figs.7–8) Stover and Evitt, 1978, p.155. Holotype: Cookson and Eisenack, 1965b, pl.16, fig.8. Originally *Cordosphaeridium*, subsequently *Lanternosphaeridium*, thirdly *Amphorosphaeridium*, fourthly (and now) *Fibrocysta*. Age: early Eocene.

- brevispinosa* Slimani et al., 2012, p.346–347, fig.6A–F. Holotype: Slimani et al., 2012, figs.6A–C. Age: early Danian.
- capitata* Hultberg, 1985c, p.123–124, pl.4, fig.D. Holotype: Hultberg, 1985c, pl.4, fig.D. Age: early Danian.
- ?*ciliata* (Khanna and Singh, 1981b, p.402, fig.4, nos.7–8; text-fig.12) Lentin and Williams, 1993, p.222. Holotype: Khanna and Singh, 1981b, fig.4, no.8. Originally *Lanternosphaeridium*, subsequently (and now) *Fibrocysta*. Questionable assignment: Lentin and Williams (1993, p.222). Age: middle Eocene.
- ?*cincta* (Cookson and Eisenack, 1982, p.45, pl.2, fig.22) Lentin and Williams, 1985, p.133. Holotype: Cookson and Eisenack, 1982, pl.2, fig.22. Originally *Lanternosphaeridium*, subsequently (and now) *Fibrocysta*?. Questionable assignment: Lentin and Williams (1985, p.133). Age: Albian–Cenomanian.
- ?*deflandrei* (Lejeune-Carpentier, 1941, p.B84, fig.6) Lejeune-Carpentier and Sarjeant, 1981, p.14. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.14, as *Fibrocysta? deflandrei*. Holotype: Lejeune-Carpentier, 1941, fig.6; Lejeune-Carpentier and Sarjeant, 1981, pl.4, figs.5–6; text-fig.8. Originally *Hystrichosphaeridium spinosum* var. *deflandrei*, subsequently *Baltisphaeridium spinosum* var. *deflandrei* (Appendix A), thirdly *Cordosphaeridium spinosum* var. *deflandrei* (combination not validly published), fourthly *Exochosphaeridium spinosum* subsp. *deflandrei*, fifthly *Exochosphaeridium spinosum* subsp. *deflandrei*, sixthly *Exochosphaeridium? spinosum* subsp. *deflandrei*, seventhly (and now) *Fibrocysta? deflandrei*. Questionable assignment: Lejeune-Carpentier and Sarjeant (1981, p.14). Age: Late Cretaceous.
- donghaiensis* Yu Jingxian, 1989, p.131, pl.40, figs.2,4,4a,5,11. Holotype: Yu Jingxian, 1989, pl.40, fig.2. Age: Eocene.
- dongyingensis* Xu Jinli et al., 1997, p.109–110, pl.27, fig.10 ex He Chengquan et al., 2009, p.655–656. Holotype: Xu Jinli et al., 1997, pl.27, fig.10. This name was not validly published in Xu Jinli et al. (1997), since no English or Latin description was provided: He Chengquan et al. (2009, p.655–656) validated the name by publishing an English diagnosis. Age: middle-late Eocene.
- essentialis* (de Coninck, 1969, p.38, pl.11, figs.7–8) Brinkhuis and Zachariasse, 1988, p.187. Holotype: de Coninck, 1969, pl.11, figs.7–8. Originally *Lanternosphaeridium*, subsequently *Kenleyia?*, thirdly (and now) *Fibrocysta*. Age: early Eocene.
- exiguapicis* Islam, 1983b, p.338–339, pl.2, figs.10–11. Holotype: Islam, 1983b, pl.2, fig.10. Age: early Eocene.
- ?*fusiforma* Edwards, 1984, p.585, pl.4, figs.2–3a–b. Holotype: Edwards, 1984, pl.4, fig.2. Questionable assignment: Edwards (1984, p.585). Age: late Miocene.
- klumppiae* (Corradini, 1973, p.152, pl.22, figs.2a–c) Stover and Evitt, 1978, p.155. Holotype: Corradini, 1973, pl.22, figs.2a–c. Originally *Cordosphaeridium*, subsequently (and now) *Fibrocysta*. Age: Late Cretaceous–Paleocene.
- "*lappacea*" (Drugg, 1970b, p.812–813, figs.4A–D,5A–D) Stover and Evitt, 1978, p.155. Holotype: Drugg, 1970b, figs.4A–D. **NOW** *Ifecysta*. Originally *Lanternosphaeridium*, subsequently *Fibrocysta*, thirdly (and now) *Ifecysta*. Age: early Eocene.
- licia* (Jain et al., 1975, p.10, pl.4, figs.51–53) Stover and Evitt, 1978, p.155. Holotype: Jain et al., 1975, pl.4, fig.51. Originally *Lanternosphaeridium*, subsequently (and now) *Fibrocysta*. Age: Danian.
- mirabilis* He Chengquan, 1991, p.169–170, pl.21, fig.2; text-fig.41. Holotype: He Chengquan, 1991, pl.21, fig.2; text-fig.41. Age: Paleocene.

"*morgenrothii*" (Corradini, 1973, p.155, pl.23, fig.1) Stover and Evitt, 1978, p.155. Holotype: Corradini, 1973, pl.23, fig.1. **NOW** *Pervosphaeridium*. Originally *Lanternosphaeridium*, subsequently *Fibrocysta*, thirdly (and now) *Pervosphaeridium*. Age: Senonian.

mutabilis Yu Jingxian, 1989, p.131–132, pl.40, figs.6–10. Holotype: Yu Jingxian, 1989, pl.40, fig.7. Age: Paleocene.

"?*mutinensis*" (Corradini, 1973, p.155–156, pl.23, figs.2,9; pl.34, figs.2,3a–b) Stover and Evitt, 1978, p.155. Holotype: Corradini, 1973, pl.23, fig.2. Originally *Lanternosphaeridium*, subsequently *Fibrocysta*?. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as and now *Corradinisphaeridium*) *horridum*, according to Masure (1986, p.112). Questionable assignment: Stover and Evitt (1978, p.155). Age: Senonian.

ovalis (Hansen, 1977, p.17, figs.19F–G) Lentin and Williams, 1981, p.103. Holotype: Hansen, 1977, figs.19F–G. Originally *Lanternosphaeridium*, subsequently (and now) *Fibrocysta*. Age: Maastrichtian–Danian.

paleocenica Yu Jingxian, 1989, p.131, pl.38, figs.2–3. Holotype: Yu Jingxian, 1989, pl.38, fig.3. Age: Paleocene.

prolixa Harker and Sarjeant in Harker et al., 1990, p.78–79, pl.3, figs.15–17; pl.4, figs.1–2; text-fig.18 ex Harker and Sarjeant, 1991, p.708. Holotype: Harker et al., 1990, pl.3, fig.15; pl.4, figs.1–2; text-fig.18. This name was not validly published in Harker et al. (1990), since the lodgement of the holotype was not cited (I.C.N. Article 40.7). Age: early Campanian.

radiata (Morgenroth, 1966a, p.37–38, pl.10, figs.7–9) Stover and Evitt, 1978, p.155. Holotype: Morgenroth, 1966a, pl.10, figs.7–8. Originally *Lanternosphaeridium*, subsequently (and now) *Fibrocysta*. Age: early Eocene.

tarimensis He Chengquan, 1991, p.170, pl.20, fig.8. Holotype: He Chengquan, 1991, pl.20, fig.8. Age: middle Eocene.

variabilis Mehrotra and Sarjeant, 1987, p.155–156, pl.4, fig.2; pl.5, figs.1–2,5–6; pl.6, fig.5. Holotype: Mehrotra and Sarjeant, 1987, pl.4, fig.2; Mehrotra and Singh, 2003, pl.15, fig.1. Taxonomic senior synonym: *Wetzeliella* (now *Apectodinium*) *paniculatum*, according to Garg et al. (1995, p.364) — however, Mehrotra and Singh (2003, p.40–41) retained this species. Age: Maastrichtian–Paleocene.

vectensis (Eaton, 1976, p.275–276, pl.12, figs.4–6) Stover and Evitt, 1978, p.155. Holotype: Eaton, 1976, pl.12, fig.4; Bujak et al., 1980, pl.7, fig.10. Originally *Lanternosphaeridium*, subsequently (and now) *Fibrocysta*. Age: middle-late Eocene (see Aubry, 1986).

subsp. *cyomosapicis* Islam, 1983c, p.85–86, pl.3, figs.6–7. Holotype: Islam, 1983c, pl.3, fig.7. Age: middle Eocene.

subsp. *vectensis*. Autonym. Holotype: Eaton, 1976, pl.12, fig.4 and Bujak et al., 1980, pl.7, fig.10.

FILISPHAERA Bujak, 1984, p.185. Emendation: Head, 1994b, p.234–235. Taxonomic junior synonym: *Muraticysta*, according to Head (1994b, p.234). Type: Bujak, 1984, pl.1, figs.7–8, as *Filisphaera filifera*.

**filifera* Bujak, 1984, p.185, pl.1, figs.7–12. Emendation: Head, 1994b, p.235. Holotype: Bujak, 1984, pl.1, figs.7–8; Head, 1994b, pl.3, figs.1–3; Fensome et al., 1993a, figs.1–2 — p.1193. Age: late Miocene–early Pleistocene.

subsp. *filifera*. Autonym. Holotype: Bujak, 1984, pl.1, figs.7–8; Head, 1994b, pl.3, figs.1–3; Fensome et al., 1993a, figs.1–2 — p.1193. Head (1994b, p.236) provided an emended diagnosis for the autonym.

subsp. *pilosa* (Matsuoka and Bujak, 1988, p.44–45, pl.3, figs.5–6,7a–b,8,9a–b) Head, 1994b, p.234. Emendation: Head, 1994b, p.237, as *Filisphaera filifera* subsp. *pilosa*. Holotype: Matsuoka and Bujak, 1988, pl.3, figs.7a–b; Head, 1994b, pl.4, figs.7–9. Originally *Filisphaera pilosa*, subsequently (and now) *Filisphaera filifera* subsp. *pilosa*. Age: Pliocene.

microornata (Head et al., 1989b, p.458, pl.5, figs.1–3,5–7) Head, 1994b, p.235. Holotype: Head et al., 1989b, pl.5, figs.1–3,5; Head, 1994b, pl.5, figs.1–3. Originally *Muraticysta*, subsequently (and now) *Filisphaera*. Age: early Pliocene.

?**minuta** Strauss and Lund, 1992, p.162–163, pl.1, figs.4–7. Holotype: Strauss and Lund, 1992, pl.1, figs.5–6. Questionable assignment: Head (1994b, p.235). Head (1996a, p.551) considered *Habibacysta tectata* to be the possible taxonomic senior synonym of this species.

pachyderma Schiøler, 2005, p.29, pl.6, figs.16–21. Holotype: Schiøler, 2005, pl.6, figs.17–20. Age: Chattian–early Aquitanian.

"**pilosa**" Matsuoka and Bujak, 1988, p.44–45, pl.3, figs.5–6,7a–b,8,9a–b. Emendation: Head, 1994b, p.237, as *Filisphaera filifera* subsp. *pilosa*. Holotype: Matsuoka and Bujak, 1988, pl.3, figs.7a–b; Head, 1994b, pl.4, figs.7,9. **NOW** *Filisphaera filifera* subsp. *pilosa*. Originally *Filisphaera pilosa*, subsequently (and now) *Filisphaera filifera* subsp. *pilosa*. Age: Pliocene.

FISTULACYSTA Davey, 1988, p.37. Type: Davey, 1988, pl.8, fig.3, as *Fistulacysta simplex*.

***simplex** Davey, 1988, p.37, pl.8, figs.1–3. Holotype: Davey, 1988, pl.8, fig.3; Fensome et al., 1996, fig.3 — p.2359. Age: late Oxfordian–early Kimmeridgian.

FLAMINGOIA Stevens and Helby, 1987, p.172,174–175. Type: Stevens and Helby, 1987, figs.9A–C, as *Flamingoia cometa*.

***cometa** Stevens and Helby, 1987, p.175–178, figs.8A–C,9A–J. Holotype: Stevens and Helby, 1987, figs.9A–C; Fensome et al., 1993a, figs.1–3 — p.1063. N.I.A. Age: early Berriasian.

"**compta**" Lentin and Williams, 1989, p.137. **Name not validly published:** typographic error for *Flamingoia cometa*.

FLANDRECYSTA Slimani, 1994, p.53. Type: Slimani, 1994, pl.8, figs.15–18; text-figs.6A–B, as *Flandrecysta furcata*.

***furcata** Slimani, 1994, p.53–55, pl.8, figs.15–18; text-figs.6A–B. Holotype: Slimani, 1994, pl.8, figs.15–18; text-figs.6A–B. Age: early Campanian–early Maastrichtian.

"**inflata**" (Heilmann-Clausen in Thomsen and Heilmann-Clausen, 1985, p.355,361, pl.7, figs.3–8; text-figs.11A–F) Slimani, 1994, p.53. Holotype: Thomsen and Heilmann-Clausen, 1985, pl.7, figs.5–6; text-figs.11C–D.

Combination not validly published: basionym not fully referenced. **NOW** *Thalassiphora*. Originally (and now) *Thalassiphora*, subsequently *Flandrecysta* (combination not validly published). Age: Danian–early Seelandian.

tubulosa Slimani, 1994, p.55–57, pl.8, figs.19–21; pl.9, fig.17; pl.10, figs.13–14; text-figs.7A–B. Holotype: Slimani, 1994, pl.8, figs.19–21; text-figs.7A–B. Age: latest early Maastrichtian–Danian.

FLORENTINIA Davey and Verdier, 1973, p.185–186. Emendation: Duxbury, 1980, p.119. Taxonomic junior synonyms: *Silicisphaera* and *Achilleodinium*, both according to Duxbury (1980, p.119) — however, Lentin and Williams (1981, p.1) and Lentin and Williams (1985, p.2) retained *Achilleodinium*. Type: Davey and Verdier, 1973, pl.2, figs.1,3, as *Florentinia laciniata*.

abjuncta Duxbury, 1983, p.46–47, pl.6, figs.9–10. Holotype: Duxbury, 1983, pl.6, figs.9–10. Age: early Aptian.

"aculeata" Kirsch, 1991, p.85, pl.13, figs.1–4,12–13; pl.39, fig.8; text-fig.42. Holotype: Kirsch, 1991, pl.13, figs.3–4; text-fig.42. **Taxonomic senior synonym:** *Kleithriasphaeridium loffrense*, according to Fensome et al., (2009, p.42). Age: Coniacian–Maastrichtian.

berran Below, 1982c, p.7, pl.5, figs.1–4. Holotype: Below, 1982c, pl.5, fig.4. N.I.A. Age: Cenomanian.

"biformoides" (Eisenack, 1954b, p.68, pl.11, figs.16–20) Duxbury, 1980, p.121. Holotype: Eisenack, 1954b, pl.11, fig.18. **NOW** *Achilleodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma*, fourthly (and now) *Achilleodinium*, fifthly *Florentinia*. Age: late Eocene–early Oligocene.

buspina (Davey and Verdier, 1976, p.321–322, pl.2, figs.1–6; text-fig.3) Duxbury, 1980, p.121. Holotype: Davey and Verdier, 1976, pl.2, figs.1–3. Originally *Silicisphaera*, subsequently (and now) *Florentinia*. Age: Senonian.

causea Yu Jingxian and Zhang Wangping, 1980, p.113, pl.4, figs.9–10. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.4, fig.9. Age: Late Cretaceous.

clavigera (Deflandre, 1937b, p.71, pl.14 [al. pl.11], figs.1–2) Davey and Verdier, 1973, p.192. Emendation: Davey and Verdier, 1976, p.315, as *Florentinia clavigera*. Holotype: Deflandre, 1937b, pl.14 (al. pl.11), figs.1–2. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma*, fourthly (and now) *Florentinia*, fifthly *Hystrichosphaera*. Lentin and Williams (1993, p.224) retained this species in *Florentinia*. Age: Senonian.

"cooksoniae" (Singh, 1971, p.329–330, pl.51, figs.7–8; pl.52, figs.1–4) Duxbury, 1980, p.120. Emendation: Duxbury, 1980, p.120, as *Florentinia cooksoniae*. Holotype: Singh, 1971, pl.51, fig.7. **NOW** *Kleithriasphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Florentinia*, thirdly *Litosphaeridium*, fourthly (and now) *Kleithriasphaeridium*. Taxonomic senior synonym: *Hystrichosphaeridium* (as *Florentinia mantellii*, according to Below (1982c, p.8) — however, Lentin and Williams (1985, p.135) retained *Florentinia cooksoniae*. Taxonomic junior synonym: *Hystrichosphaeridium cylindratum*, according to Harker and Sarjeant (1975, p.225–226). Age: late Albian.

deanei (Davey and Williams, 1966b, p.58–59, pl.6, figs.4,8) Davey and Verdier, 1973, p.187. Holotype: Davey and Williams, 1966b, pl.6, fig.8; Davey and Verdier, 1973, pl.1, fig.9. Originally *Hystrichosphaeridium*, subsequently (and now) *Florentinia*. Davey and Verdier (1976, p.316) considered that this species may be a taxonomic synonym of *Hystrichokolpoma unispinum*, the type material of the latter representing possibly reworked Cretaceous specimens. Age: Cenomanian.

ferox (Deflandre, 1937b, p.72, pl.14 [al. pl.11], figs.3–4) Duxbury, 1980, p.121. Holotype: Deflandre, 1937b, pl.14 (al. pl.11), figs.3–4. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma*, fourthly *Silicisphaera*, fifthly (and now) *Florentinia*. Age: Senonian.

?flosculus (Deflandre, 1937b, p.75, pl.15 [al. pl.12], figs.5–6) Lentin and Williams, 1981, p.104. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), fig.5. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (combination not validly published; Appendix A), thirdly *Litosphaeridium?*, fourthly *Silicisphaera?*, fifthly (and now) *Florentinia?*. Questionable assignment: Lentin and Williams (1981, p.104). Taxonomic junior synonym: *Eurysphaeridium fibratum* (name not validly published), according to Slimani (2001a, p.192). See also *Areoligera tenuicapillata* subsp. *pinopollina*. N.I.A. Age: Senonian.

hypomagna Yun Hyesu, 1981, p.51–52, pl.6, figs.6,9–10; text-figs.14a–b. Holotype: Yun Hyesu, 1981, pl.6, fig.10; text-figs.14a–b; Fensome et al., 1991, figs.2–4 — p.653. Age: early Santonian.

interrupta Duxbury, 1980, p.121, pl.12, fig.3; text-figs.8A–B. Holotype: Duxbury, 1980, pl.12, fig.3. Age: middle Barremian.

kaldunii Below, 1982c, p.7–8, pl.4, figs.11,12a–b. Holotype: Below, 1982c, pl.4, fig.11. Age: Aptian–Albian.

**laciniata* Davey and Verdier, 1973, p.186–187, pl.2, figs.1,3–4,6–7,9. Holotype: Davey and Verdier, 1973, pl.2, figs.1,3. Age: late Albian–early Cenomanian.

subsp. *laciniata*. Autonym. Holotype: Davey and Verdier, 1973, pl.2, figs.1,3.

subsp. *propria* Mao Shaozhi and Norris, 1988, p.39–40, pl.8, figs.2–5; text-fig.11, nos.1–2. Holotype: Mao Shaozhi and Norris, 1988, pl.8, fig.2; text-fig.11, no.1. Age: late Eocene–early Oligocene.

subsp. *seghiris* Below, 1982c, p.8, pl.4, figs.5a–b,7a–b. Holotype: Below, 1982c, pl.4, figs.5a–b. Age: Cenomanian.

mantellii (Davey and Williams, 1966b, p.66, pl.6, fig.6) Davey and Verdier, 1973, p.191. Holotype: Davey and Williams, 1966b, pl.6, fig.6; Davey and Verdier, 1973, pl.4, figs.1,3. Originally *Hystrichosphaeridium*, subsequently (and now) *Florentinia*. Age: late Cenomanian.

mayi Kirsch, 1991, p.87, pl.13, figs.5–9. Holotype: Kirsch, 1991, pl.13, figs.7–8. Age: early Maastrichtian.

miscella Yun Hyesu, 1981, p.49–51, pl.6, figs.7,13–14; pl.8, fig.15; text-figs.13a–d. Holotype: Yun Hyesu, 1981, pl.6, fig.7; text-figs.13a–b; Fensome et al., 1991, figs.1,3–4 — p.677. Age: early Santonian.

"*neptuni*" (Eisenack, 1958a, p.399, pl.26, figs.7–8; text-fig.8) Sarjeant, 1985a, p.89–90,92–93. Emendations: Duxbury, 1983, p.55, as *Spiniferites neptuni*; Sarjeant, 1985a, p.89–90,92, as *Florentinia? neptuni*. Holotype: Eisenack, 1958a, pl.26, fig.7. **NOW** *Achomosphaera*. Originally *Baltisphaeridium* (Appendix A), subsequently (and now) *Achomosphaera*, thirdly *Achomosphaera?*, fourthly *Spiniferites*, fifthly *Florentinia?*. Questionable assignment: Sarjeant (1985a, p.89). For etymology see under *Achomosphaera*. Age: Early Cretaceous.

"*perforata*" Firth, 1993, p.193,195, pl.2, figs.1–7. Holotype: Firth, 1993, pl.2, figs.1–4. **NOW** *Kleithriasphaeridium*. Originally *Florentinia*, subsequently (and now) *Kleithriasphaeridium*. Age: early–late Maastrichtian.

radiculata (Davey and Williams, 1966b, p.65, pl.7, fig.9; pl.8, fig.6) Davey and Verdier, 1973, p.191. Emendation: Davey and Verdier, 1976, p.318, as *Florentinia radiculata*. Holotype: Davey and Williams, 1966b, pl.8, fig.6; Davey and Verdier, 1973, pl.4, fig.7. Originally *Hystrichosphaeridium*, subsequently (and now) *Florentinia*. Taxonomic junior synonym: *Coronifera kaisereri*, according to Below (1982c, p.9). Age: late Cenomanian.

ramulus (May, 1980, p.66–67, pl.2, figs.13–16) Lentin and Williams, 1981, p.105. Holotype: May, 1980, pl.2, figs.13–14. Originally *Silicisphaera*, subsequently (and now) *Florentinia*. N.I.A. (Williams et al., 1998, p.230, incorrectly cited the epithet as "*ramula*"). Age: Maastrichtian.

reichartii Sluijs and Brinkhuis, 2009, p.1765–1766, pl.3, figs.F–L; pl.4, figs.A–C. Holotype: Sluijs and Brinkhuis, 2009, pl.4, figs.A–C. Age: latest Paleocene–earliest Eocene.

resex Davey and Verdier, 1976, p.319–320, pl.4, figs.1–3; text-fig.2. Holotype: Davey and Verdier, 1976, pl.4, fig.1. N.I.A. Age: Turonian.

stellata (Maier, 1959, p.320–321, pl.33, figs.3–4) Below, 1982a, p.10. Holotype: Maier, 1959, pl.33, fig.3; Sarjeant, 1983, pl.7, figs.1–2. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaeridium?*, thirdly (and now) *Florentinia*, fourthly *Hystrichokolpoma*. Srivastava (1995, p.306) retained this species in *Florentinia*. Taxonomic senior synonym: *Hystrichokolpoma rigaudiae*, according to Sarjeant (1983, p.104) — however, Srivastava (1995, p.306) retained *Florentinia stellata*. Age: middle Oligocene–middle Miocene.

tenera (Davey and Verdier, 1976, p.326–327, pl.3, figs.8–12; text-fig.6) Duxbury, 1980, p.122. Holotype: Davey and Verdier, 1976, pl.3, figs.8–11. Originally *Silicisphaera*, subsequently (and now) *Florentinia*. Age: Senonian.

?*torulosa* (Davey and Verdier, 1976, p.328, pl.4, figs.10–12) Lentin and Williams, 1981, p.105. Holotype: Davey and Verdier, 1976, pl.4, figs.10–11. Originally *Silicisphaera*?, subsequently (and now) *Florentinia*?. Questionable assignment: Lentin and Williams (1981, p.105). Age: Turonian.

tridactylites (Valensi, 1955a, p.37–38, fig.1D) Duxbury, 1980, p.122. Holotype: Valensi, 1955a, fig.1D. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma* (combination not validly published), fourthly *Achomosphaera*, fifthly *Silicisphaera*, sixthly (and now) *Florentinia*. Age: Cretaceous.

"*truncigera*" (Deflandre, 1937b, p.71–72, pl.13 [al. pl.10], figs.6–7) Below, 1982c, p.10. Holotype: Deflandre, 1937b, pl.13 (al. pl.10), fig.6. **NOW** *Raetiaedinium*. Originally *Hystrichosphaeridium*, subsequently *Litosphaeridium*?, thirdly *Cordosphaeridium*, fourthly *Exochosphaeridium*, fifthly *Pervosphaeridium*, sixthly *Tityrosphaeridium*?, seventhly *Florentinia*, eighthly *Pervosphaeridium*?, ninthly (and now) *Raetiaedinium*. Taxonomic senior synonym: *Xanthidium* (now *Hystrichokolpoma*) *crassipes*, by implication in Yun Hyesu (1981, p.27), who considered *Florentinia* (as *Pervosphaeridium*) *truncigera* to be the senior name — however, Lentin and Williams (1985, p.282) retained *Florentinia* (as *Pervosphaeridium*) *truncigera*. Taxonomic junior synonym: *Laticavodinium latispinosum* (name not validly published), according to Slimani (2001a, p.194). Age: Senonian.

verdieri Singh, 1983, p.149, pl.53, figs.5–10; pl.54, figs.1–2. Holotype: Singh, 1983, pl.53, figs.5–6. Lentin and Williams (1985, p.71) considered *Cordosphaeridium fibroferum* to be the questionable taxonomic senior synonym of this species. Age: Cenomanian.

FOLIACTINISCUS Dumitrică, 1973, p.823. Siliceous dinoflagellate genus. Type: Hovasse, 1943, fig.1, as *Gymnaster folia*.

**folia* (Hovasse, 1943, p.278, fig.1) Dumitrică, 1973, p.823. Holotype: Hovasse, 1943, fig.1. Originally *Gymnaster*, subsequently (and now) *Foliactiniscus*. Age: early Miocene.

"*mirabilis*" Dumitrică, 1973, p.823, pl.1, figs.12–13,20; pl.2, figs.4,12–13. **Name not validly published**: holotype not designated. Age: Oligocene–Quaternary.

"*pannosus*" Dumitrică, 1973, p.823, pl.1, figs.18–19,21–23; pl.2, figs.1,5. **Name not validly published**: holotype not designated. Age: early Oligocene–early Miocene.

"*pyramis*" Dumitrică, 1973, p.823, pl.1, figs.14–17. **Name not validly published**: holotype not designated. Age: early Oligocene–early Miocene.

FOLLISDINELLUM Versteegh, 1993, p.367. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1300). Type: Versteegh, 1993, pl.5, figs.6,8–11, as *Follisdinellum splendidum*.

**splendidum* Versteegh, 1993, p.367,369,371, pl.5, figs.1–11. Holotype: Versteegh, 1993, pl.5, figs.6,8–11. Age: late Pleistocene.

"**FOSTERIA**" Riding and Helby, 2001e, p.114–115. **Name illegitimate** — **senior homonym** *Fosteria* Molseed, 1968. **Substitute name**: *Fostericysta*. Type: Riding and Helby, 2001e, fig.3I as *Fosteria eclipsiana*.

"**eclipsiana*" Riding and Helby, 2001e, p.115,117, figs.2A–B,3A–P. Holotype: Riding and Helby, 2001e, fig.3I. **NOW** *Fostericysta*. Originally *Fosteria* (generic name illegitimate), subsequently (and now) *Fostericysta*. Taxonomic junior synonym: *Horologinella eclipsiana* (name not validly published), according to Riding and Helby (2001e, p.115). Age: Callovian–Oxfordian.

FOSTERICYSTA Riding, 2005b, p.1091. Substitute name for *Fosteria* Riding and Helby, 2001e (an illegitimate name). Type: Riding and Helby, 2001e, fig.3I as *Fosteria eclipsiana*.

**eclipsiana* (Riding and Helby, 2001e, p.115,117, figs.2A–B,3A–P) Riding, 2005b, p.1091. Holotype: Riding and Helby, 2001e, fig.3I. Originally *Fosteria* (generic name illegitimate), subsequently (and now) *Fostericysta*. Taxonomic junior synonym: *Horologinella eclipsiana* (name not validly published), according to Riding and Helby (2001e, p.115). Age: Callovian–Oxfordian.

scarffei (Tykoezinski et al., 2001, p.84,86, pl.1, figs.1a–c,2a–c,3a–b,4a–c,5a–c; pl.4, figs.10–13) Mantel and Riding, 2012, p.55. Holotype: Tykoezinski et al., 2001, pl.1, figs.1a–c. Originally *Jansonia*, subsequently (and now) *Fostericysta*. Age: late Bathonian.

FOUCHERIA Monteil, 1992a, p.277–278. Type: Monteil, 1992a, pl.3, figs.1–4, as *Foucheria modesta*.

**modesta* Monteil, 1992a, p.278, pl.3, figs.1–7; pl.4, figs.1–7. Holotype: Monteil, 1992a, pl.3, figs.1–4; Fauconnier and Masure, 2004, pl.27, figs.9–10. Age: late Berriasian–early Valanginian.

FREBOLDINIUM Below, 1990, p.14. Contrary to the opinion of Lentin and Williams (1993, p.227), this name is validly published since the name of the "type species" is validly published. Type: Below, 1990, pl.1, figs.1–6, as *Freboldinium regulum*.

arcticum Below, 1990, p.15–16, pl.1, figs.13–15; pl.2, figs.1–15; text-figs.3a–b. Holotype: Below, 1990, pl.2, figs.1,6–11,15. Contrary to the opinion of Lentin and Williams (1993, p.227), this name is validly published. Below (1987a, p.6) stated that, unless otherwise indicated, all the material is in his personal collection. Since Below (1987a, 1987b, 1990) are parts I to III of a single study, we agree with J. Jansonius (personal communication) that Below's (1987a) repository statement refers to all three publications, fulfilling the requirement of I.C.N. Article 40.7 (see also the discussion on Article 40.7 in the Introduction). Age: Toarcian.

**regulum* Below, 1990, p.16–20, pl.1, figs.1–12; text-figs.4a–k. Holotype: Below, 1990, pl.1, figs.1–6. Contrary to the opinion of Lentin and Williams (1993, p.227), this name is validly published. Below (1987a, p.6) stated that, unless otherwise indicated, all the material is in his personal collection. Since Below (1987a, 1987b, 1990) are parts I to III of a single study, we agree with J. Jansonius (personal communication) that Below's (1987a) repository statement refers to all three publications, fulfilling the requirement of I.C.N. Article 40.7 (see also the discussion on Article 40.7 in the Introduction). Age: Toarcian.

serrulatum (Davies, 1983, p.26, pl.9, figs.1–6; text-figs.21A–B) Below, 1990, p.14. Holotype: Davies, 1983, pl.9, figs.3–4; text-figs.21A–B. Contrary to the opinion of Lentin and Williams (1993, p.227), this combination is validly published, since the generic name *Freboldinium* is validly published. Originally *Lithodinia*, subsequently (and now) *Freboldinium*. Age: Toarcian–early Bajocian.

FRIGATADINIUM Riding, 2004, p.237–238. Type: Riding, 2004, figs.3G–H, as *Frigatadinium frigatense*.

**frigatense* Riding, 2004, p.238–239,241–242, figs.2A–B,3A–I. Holotype: Riding, 2004, figs.3G–H. Age: early Oxfordian–mid Berriasian.

FUETTERERELLA Kohring, 1993a, p.88. Emendation: Streng et al. 2004, p.468–469. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1300). Type: Kohring, 1993a, pl.12, figs.g–m, as *Fuettererella conforma*.

belliata Streng et al. 2004, p.469, fig.11, nos.1–11. Holotype: Streng et al., 2004, fig.11, no.1. Age: early Eocene.

**conforma* Kohring, 1993a, p.88,91–92, pl.12, figs.g–m; text-fig.12. Holotype: Kohring, 1993a, pl.12, figs.g–m. Age: late Eocene.

deflandrei (Kamptner, 1956, p.448–455, figs.1–4) Hildebrand-Habel and Streng, 2003, p.315. Holotype: Kamptner, 1956, fig.1. Originally *Thoracosphaera*, subsequently *Orthopithonella*, thirdly (and now) *Fuettererella*. Taxonomic junior synonyms: *Thoracosphaera* (now *Orthopithonella*) *johnstonei* and *Orthopithonella?* *minuta*, according to Kohring (1993a, p.30) — however, Streng et al. (2004, p.482) retained *Pithonella* (as *Pirumella*) *johnstonei* and *Orthopithonella?* *minuta*. Age: Eocene.

elliptica Kohring, 1993a, p.93–94, pl.14, figs.a–l; pl.34, figs.k–l. Holotype: Kohring, 1993a, pl.14, fig.a. Age: late Eocene–Oligocene.

flora (Fütterer, 1990, p.538, pl.3, figs.1–7) Hildebrand-Habel and Streng, 2003, p.315. Holotype: Fütterer, 1990, pl.3, figs.1,3. Originally *Orthopithonella*, subsequently (and now) *Fuettererella*. N.I.A. Age: late Maastrichtian–Danian.

fungiforma Hildebrand-Habel and Willems, 1999, p.93–94, pl.2, figs.7–12. Holotype: Hildebrand-Habel and Willems, 1999, pl.2, figs.7–8. Age: middle Eocene to late Oligocene.

tesserula (Fütterer, 1978, p.715, pl.3, figs.1–8,10–11) Kohring, 1993a, p.92. Holotype: Fütterer, 1978, pl.3, figs.1,4,7,10. Originally *Thoracosphaera*, subsequently *Orthopithonella* (combination not validly published), thirdly (and now) *Fuettererella*. N.I.A. Age: Paleocene–late Oligocene.

FURZIDINIUM Stancliffe, 1991, p.188. Type: Stancliffe, 1991, pl.4, fig.5; text-figs.6A–B, as *Furzidinium sentum*.

***sentum** Stancliffe, 1991, p.188,190, pl.1, fig.4; pl.3, figs.4–5,9; pl.4, fig.5; text-figs.6A–B,7A–C. Holotype: Stancliffe, 1991, pl.4, fig.5; text-figs.6A–B. Age: Oxfordian.

FUSIFORMACYSTA Morgan, 1975, p.161. Emendation: Riding and Helby, 2001d, p.75. Taxonomic junior synonym: *Helbycysta* (name not validly published), by implication in Riding and Helby (2001d, p.79), who included the only species name, *Helbycysta psilata* (name not validly published) in synonymy with *Fusiformacysta terniana*. Type: Morgan, 1975, pl.2, figs.4a–c, as *Fusiformacysta salasii*.

challisiana Riding and Helby, 2001e, p.117,119, figs.4A–L. Holotype: Riding and Helby, 2001e, fig.4A. Taxonomic junior synonyms: *Helbycysta verrucosa* and *Komewuia challisiana* (names not validly published), both according to Riding and Helby (2001e, p.119). Age: Callovian–Oxfordian.

***salasii** Morgan, 1975, p.161, pl.2, figs.4a–c,5a–b. Holotype: Morgan, 1975, pl.2, figs.4a–c; Fensome et al., 1996, figs.1–3 — p.2337. Age: early Neocomian.

terniana Riding and Helby, 2001d, p.77,79,81, figs.8A–L,9A–D. Holotype: Riding and Helby, 2001d, fig.8J. Taxonomic junior synonym: *Helbycysta psilata* (name not validly published), according to Riding and Helby (2001d, p.79). Age: Bathonian–Callovian.

tumida Backhouse, 1988, p.86, pl.29, figs.1–6. Holotype: Backhouse, 1988, pl.29, fig.5; Fensome et al., 1996, fig.5 — p.2411. Age: late Tithonian–?earliest Valanginian.

GAGIELLA Backhouse, 1988, p.86. Type: Backhouse, 1988, pl.27, figs.1a–b; text-figs.23D,25G, as *Gagiella mutabilis*.

***mutabilis** Backhouse, 1988, p.86,88–89, pl.27, figs.1a–b,2–15; pl.28, figs.1–6; text-figs.23A–D,24D,25A–B,D–G. Holotype: Backhouse, 1988, pl.27, figs.1a–b; text-figs.23D,25G; Fensome et al., 1996, figs.1–2 — p.2239. Age: Valanginian.

tuberculata (Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.54, pl.12, fig.13) He Chengquan et al., 2009, p.348. Holotype: Liu Zhili et al., 1992, pl.12, fig.13. Originally *Bipolaribucina*?, subsequently *Distatodinium*, thirdly (and now) *Gagiella*. Age: Early Tertiary.

"*GALEA*" Maier, 1959, p.305. **Name illegitimate** — **senior homonyms**: *Galea*, Meuschen, 1787; *Galea* Cuvier, 1817; *Galea* Smith, 1817; *Galea* Meyen, 1833; *Galea* Moerch, 1852; *Galea* Kristan, 1957 (following Gerlach, 1961, p.198, who did not provide further information on the references except Kristan, 1957). **Taxonomic senior synonym**: *Chiropteridium*, by implication in Sarjeant (1983, p.108), who transferred the "type species" of *Galea*, *Galea galea*, to *Chiropteridium*. Type: Maier, 1959, pl.29, fig.4, as *Galea galea*.

"*densicomata*" Maier, 1959, p.307–308, pl.29, figs.7–8. Emendation: Sarjeant, 1983, p.111–113, as *Sentusidinium densicomatum*. Holotype: Maier, 1959, pl.29, fig.7. **NOW** *Pilosidinium*. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Impletosphaeridium*, fourthly *Impletosphaeridium*?, fifthly *Sentusidinium*, sixthly (and now) *Pilosidinium*. Following I.C.N. Article 55.1, the species name *Galea densicomata* is validly published even though the generic name *Galea* is illegitimate. Age: middle Oligocene–middle Miocene.

"**galea*" Maier, 1959, p.306, pl.29, fig.4; text-fig.2. Emendation: Sarjeant, 1983, p.110, as *Chiropteridium galea*. Holotype: Maier, 1959, pl.29, fig.4; Eisenack and Kjellström, 1975b, p.88a; Fensome et al., 1995, fig.1 — p.1495. **NOW** *Chiropteridium*. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Areoligera*, fourthly *Areoligera*?, fifthly (and now) *Chiropteridium*. Taxonomic junior synonyms: *Chiropteridium dispersum*, *Galea mespilanum* and *Galea levis*, all according to Sarjeant (1983, p.108–109); *Membranophoridium multispinatum*, according to Brosius (1963, p.48); *Membranophoridium* (al. *Chiropteridium*) *partispinatum*, by implication in Matsuoka and Bujak (1988, p.40), who considered *Chiropteridium mespilanum* to be the correct name. Following I.C.N. Article 55.1, the species name *Galea galea* is validly published even though the generic name *Galea* is illegitimate. N.I.A. Age: Oligocene.

"*korykos*" Maier, 1959, p.310–311, pl.30, figs.7–8. Holotype: Maier, 1959, pl.30, fig.7. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Chiropteridium*?, fourthly *Hytrichosphaeridium*?. **Taxonomic senior synonym**: *Xanthidium* (as *Spiniferites*) *ramosum*, according to Sarjeant (1983, p.91–92). Following I.C.N. Article 55.1, the species name *Galea korykos* is validly published even though the generic name *Galea* is illegitimate. N.I.A. Age: middle Miocene.

"*levis*" Maier, 1959, p.308, pl.30, figs.1–2. Holotype: Maier, 1959, pl.30, fig.1; Sarjeant, 1983, pl.2, fig.3; pl.5, fig.1; text-fig.2. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*. **Taxonomic senior synonym**: *Galea* (as *Chiropteridium*) *galea*, according to Sarjeant (1983, p.108–109). Following I.C.N. Article 55.1, the species name *Galea levis* is validly published even though the generic name *Galea* is illegitimate. Age: late Oligocene–middle Miocene.

"*lychnea*" Maier, 1959, p.310, pl.30, fig.6. Holotype: Maier, 1959, pl.30, fig.6. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Areoligera*. **Taxonomic senior synonym**: *Hytrichosphaeridium* (as *Achomosphaera*) *alcicornu*, according to Sarjeant (1983, p.100–101). Following I.C.N. Article 55.1, the species name *Galea lychnea* is validly published even though the generic name *Galea* is illegitimate. Age: Miocene.

"*mespilana*" Maier, 1959, p.306–307, pl.29, figs.5–6. Holotype: Maier, 1959, pl.29, fig.5. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Chiropteridium*, fourthly *Hytrichosphaeridium*. **Taxonomic senior synonym**: *Galea* (as *Chiropteridium*) *galea*, according to Sarjeant (1983, p.108–109). Following I.C.N. Article 55.1, the species name *Galea mespilana* is validly published even though the generic name *Galea* is illegitimate. Age: middle Oligocene–middle Miocene.

"*twistringiensis*" Maier, 1959, p.308–309, pl.30, figs.3–4. Holotype: Maier, 1959, pl.30, fig.3; Sarjeant, 1983, pl.5, fig.3. **NOW** *Spiniferites*. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Areoligera*, fourthly (and now) *Spiniferites*. Taxonomic junior synonyms: *Hytrichosphaera ramosa* var. *multibrevis* (now *Spiniferites multibrevis*), according to Sarjeant (1983, p.94–95), who correctly believed the epithet

"*multibrevis*" to be senior at the rank of variety; *Achomosphaera* (as *Spiniferites*) *cambra*, by implication in Jain (1982, p.51), who considered this species to be a taxonomic junior synonym of *Hystrichosphaera ramosa* var. *multibrevis* (as *Spiniferites ramosus* subsp. *multibrevis*). Following I.C.N. Article 55.1, the species name *Galea twistringiensis* is validly published even though the generic name *Galea* is illegitimate. According to Fensome et al. (1990, p.639) "Lentin and Williams (1985, p.140,333) and Lentin and Williams (1989, p.347) brought together the synonymies proposed by Jain (1982) and Sarjeant (1983), but also accepted the elevation of the variety (and later subspecies) '*multibrevis*' to specific rank as *Spiniferites multibrevis*. Lentin and Williams (1985, 1989) considered the epithet '*multibrevis*' to be senior. Since the latter epithet was not raised to specific rank until Below (1982c, p.35) did so, the epithets '*twistringiensis*' (validly published in 1964) and '*cambrus*' (erected in 1970) are both senior to '*multibrevis*' at specific rank. Thus, following the synonymies cited above and considering this taxon at specific rank, the correct name is *Spiniferites twistringiensis*.... The specific epithet has commonly been misspelled '*twistringense*'." Age: late Oligocene–middle Miocene.

"*xiphea*" Maier, 1959, p.309, pl.30, fig.5. Holotype: Maier, 1959, pl.30, fig.5. Originally *Galea* (generic name illegitimate), subsequently *Hystrichosphaeridium*, thirdly *Hystrichokolpoma*?. **Taxonomic senior synonym:** *Hystrichokolpoma rigaudiae*, according to Sarjeant (1983, p.104). Following I.C.N. Article 55.1, the species name *Galea xiphea* is validly published even though the generic name *Galea* is illegitimate. Age: middle Miocene.

GALEACYSTA Corradini and Biffi, 1988, p.225. Type: Corradini and Biffi, 1988, pl.1, figs.4–5, as *Galeacysta etrusca*.

**etrusca* Corradini and Biffi, 1988, p.225–226, pl.1, figs.1–12; pl.2, figs.1–7. Holotype: Corradini and Biffi, 1988, pl.1, figs.4–5; Fensome et al., 1993a, figs.1–2 — p.1151. Age: late Miocene (Messinian).

GARDODINIUM Alberti, 1961, p.18. Emendation: Harding, 1996, p.358. Taxonomic senior synonym: *Chlamydophorella*, by implication in Davey (1978, p.893), who transferred the "type species" of *Gardodinium*, *Gardodinium trabeculosum*, to *Chlamydophorella* — however, Lentin and Williams (1981, p.108; 1989, p.143) retained *Gardodinium*. Type: Alberti, 1961, pl.3, fig.11, as *Gardodinium eisenackii*.

"*albertii*" Neale and Sarjeant, 1962, p.445–446, pl.19, fig.8; text-figs.4a–b (not fig.6). Holotype: Neale and Sarjeant, 1962, pl.19, fig.8; text-figs.4a–b. Originally (and now) *Gardodinium*, subsequently *Chlamydophorella*. **Taxonomic senior synonym:** *Scriniodinium* (as and now *Gardodinium*) *trabeculosum*, according to Harding (1996, p.359). Lentin and Williams (1989, p.143) retained this species in *Gardodinium*. Age: Hauterivian.

angustum Riding, Helby and Stevens in Riding and Helby, 2001g, p.204,206, figs.12A–P,13A–P. Holotype: Riding and Helby, 2001g, figs.12E–H. Age: Tithonian–earliest Berriasian.

attenuatum Stover and Helby, 1987a, p.107–109, figs.5A–J,6B. Holotype: Stover and Helby, 1987a, figs.5A–C; Helby et al., 1987, figs.27F–G; Fensome et al., 1996, figs.1–3 — p.2051. Age: Valanginian.

"*deflandrei*" Clarke and Verdier, 1967, p.26–28, pl.3, figs.10–12; text-fig.10. Emendation: Lucas-Clark, 1987, p.172–173, as *Apteodinium deflandrei*. Holotype: Clarke and Verdier, 1967, pl.3, fig.10; Jan du Chêne et al., 1986a, pl.8, figs.10–11. **NOW** *Apteodinium*. Originally *Gardodinium*, subsequently *Aldorfia*, thirdly (and now) *Apteodinium*. Age: Cenomanian–Santonian.

"**eisenackii*" Alberti, 1961, p.18, pl.3, figs.8–13. Holotype: Alberti, 1961, pl.3, fig.11. **Taxonomic senior synonym:** *Scriniodinium* (as and now *Gardodinium*) *trabeculosum*, according to Davey (1974, p.51). Taxonomic junior synonym: *Gardodinium elongatum*, according to Brideaux and McIntyre (1975, p.33). The nomenclatural type of the genus *Gardodinium* remains the holotype of *Gardodinium eisenackii*. Age: Hauterivian–Aptian.

"*elongatum*" Singh, 1971, p.381–383, pl.68, figs.3–4. Holotype: Singh, 1971, pl.68, fig.3. **Taxonomic senior synonym:** *Gardodinium trabeculosum*, by implication in Brideaux and McIntyre (1975, p.33), who considered *Gardodinium elongatum* to be a taxonomic junior synonym of *Gardodinium eisenackii*, which is now a taxonomic junior synonym of *Gardodinium trabeculosum*. Age: middle Albian.

lowii Backhouse, 1987, p.215–216, figs.10G–J. Holotype: Backhouse, 1987, fig.10G; Fensome et al., 1996, fig.1 — p.2209. Age: middle Hauterivian.

ordinale Davey, 1974, p.51, pl.3, figs.5–6. Holotype: Davey, 1974, pl.3, fig.6. Originally (and now) *Gardodinium*, subsequently *Chlamydothorella*. Lentin and Williams (1989, p.143) retained this species in *Gardodinium*. Age: middle-late Barremian.

"pyriforme" Vozzhennikova, 1967, p.179, pl.100, figs.1,4. Holotype: Vozzhennikova, 1967, pl.100, fig.4; Lentin and Vozzhennikova, 1990, text-fig.57; lost according to Lentin and Vozzhennikova (1990, p.101). Neotype: Lentin and Vozzhennikova, 1990, pl.12, figs.8–10, designated by Lentin and Vozzhennikova (1990, p.101). Originally *Gardodinium*, subsequently *Chlamydothorella*. **Taxonomic senior synonym:** *Scriniodinium* (as and now *Gardodinium*) *trabeculosum*, according to Harding (1996, p.359). Lentin and Williams (1989, p.143) retained this species in *Gardodinium*. Lentin and Vozzhennikova (1990, p.102) provided an "expanded description" for this species. Age: Barremian.

+trabeculosum (Gocht, 1959, p.62, pl.4, fig.5) Alberti, 1961, p.18. Emendation: Harding, 1996, p.359,361,363, as *Gardodinium trabeculosum*. Holotype: Gocht, 1959, pl.4, fig.5; Harding, 1996, pl.3, figs.1,6–7. Originally *Scriniodinium*, subsequently (and now) *Gardodinium*, thirdly *Chlamydothorella*. Lentin and Williams (1989, p.143) retained this species in *Gardodinium*. Taxonomic junior synonyms: *Gardodinium eisenackii*, according to Davey (1974, p.51); *Gardodinium albertii* and *Gardodinium pyriforme*, both according to Harding (1996, p.359); *Gardodinium elongatum*, by implication in Brideaux and McIntyre (1975, p.33), who considered *Gardodinium elongatum* to be a taxonomic junior synonym of *Gardodinium eisenackii*. The nomenclatural type of the genus *Gardodinium* remains the holotype of *Gardodinium eisenackii*. Age: Hauterivian.

GEISELODINIUM Krutzsch, 1962, p.42. Taxonomic junior synonyms: *Cubiculosphaera*, according to Stover and Evitt (1978, p.230–231); *Sanshuia*, according to Chen et al. (1988, p.27) — however, Mao Shaozhi et al. (1995, p.50) retained *Sanshuia*. Type: Krutzsch, 1962, pl.11, figs.8–13, as *Geiselodinium geiseltalense*.

apicidentatum (Jiabo, 1978, p.81, pl.2, fig.11) Song Zhichen and He Chengquan, 1982, p.735. Holotype: Jiabo, 1978, pl.2, fig.11. Originally *Deflandrea?*, subsequently (and now) *Geiselodinium*. Age: Early Tertiary.

cenomanicum Lebedeva in Ilyina et al., 1994, p.55,60, pl.9, figs.1–7; text-fig.7. Holotype: Ilyina et al., 1994, pl.9, fig.1. Age: late Cenomanian.

"dalongshanense" (Yu Jingxian et al., 1981, p.259, pl.1, figs.7–10,15–16) Chen et al., 1988, p.27. Holotype: Yu Jingxian et al., 1981, pl.1, fig.7. **NOW** *Morkallacysta*. Originally *Sanshuia*, subsequently *Geiselodinium*, thirdly *Saeptodinium*, fourthly (and now) *Morkallacysta*. Age: Late Cretaceous.

eocenicum Krutzsch, 1962, p.44, pl.11, figs.17–19; text-fig.1d. Holotype: Krutzsch, 1962, pl.11, figs.17–19. Age: middle Eocene.

"fibrirugulare" (Yu Jingxian et al., 1981, p.260, pl.1, figs.11–12) Chen et al., 1988, p.27. Holotype: Yu Jingxian et al., 1981, pl.1, fig.11. **NOW** *Saeptodinium*. Originally *Sanshuia*, subsequently *Geiselodinium*, thirdly (and now) *Saeptodinium*. Age: Late Cretaceous.

***geiseltalense** Krutzsch, 1962, p.43, pl.11, figs.8–13; text-fig.1b. Holotype: Krutzsch, 1962, pl.11, figs.8–13. Age: middle Eocene.

hallense Krutzsch, 1962, p.44, pl.11, figs.14–16; text-fig.1c. Holotype: Krutzsch, 1962, pl.11, figs.14–16. Age: middle Eocene.

"inaffectum" Drugg, 1978, p.68, pl.3, figs.10–12. Holotype: Drugg, 1978, pl.3, fig.10. **NOW** *Corculodinium*. Originally *Geiselodinium*, subsequently *Subtilisphaera*, thirdly *Subtilisphaera?*, fourthly (and now) *Corculodinium*.

Taxonomic junior synonym: *Geiselodinium paeminosum*, according to Courtinat (2000, p.173). Age: early Kimmeridgian.

maslinense (Harris, 1974, p.164, pl.2, fig.10) Stover and Evitt, 1978, p.231. Holotype: Harris, 1974, pl.2, fig.10. Originally *Cubiculosphaera*, subsequently (and now) *Geiselodinium*. Age: middle Eocene.

"micropodum" (Yu Jingxian et al., 1981, p.259–260, pl.1, figs.3–4) Chen et al., 1988, p.28. Emendation: Mao Shaozhi et al., 1995, p.50–51, as *Sanshuia micropoda*. Holotype: Yu Jingxian et al., 1981, pl.1, fig.3. **NOW** *Sanshuia*. Originally (and now) *Sanshuia*, subsequently *Geiselodinium*, thirdly *Saeptodinium*. Age: Late Cretaceous.

"minus" (Yu Jingxian et al., 1981, p.260, pl.1, figs.13–14) Chen et al., 1988, p.28. Emendation: Mao Shaozhi et al., 1995, p.50, as *Sanshuia minor*. Holotype: Yu Jingxian et al., 1981, pl.1, fig.13. **NOW** *Sanshuia*. Originally (and now) *Sanshuia*, subsequently *Geiselodinium*, thirdly *Saeptodinium*. Age: Late Cretaceous.

"minutum" (Jiabo, 1978, p.83, pl.3, figs.10–11) Chen et al., 1988, p.28. Holotype: Jiabo, 1978, pl.3, fig.11. **NOW** *Saeptodinium*. Originally *Deflandrea*, subsequently *Sanshuia*, thirdly *Geiselodinium*, fourthly (and now) *Saeptodinium*. Age: Early Tertiary.

?miocenicum Nagy, 1965, p.201, pl.1, fig.3; pl.2, fig.11. Holotype: Nagy, 1965, pl.1, fig.3; pl.2, fig.11. Questionable assignment: Stover and Evitt (1978, p.231). Age: middle Miocene.

"ovatum" (Jiabo, 1978, p.84, pl.4, figs.1–3) Chen et al., 1988, p.28. Emendation: Mao Shaozhi et al., 1995, p.51, as *Sanshuia ovata*. Holotype: Jiabo, 1978, pl.4, fig.2. **NOW** *Sanshuia*. Originally *Deflandrea*, subsequently *Subtilisphaera*, thirdly (and now) *Sanshuia*, fourthly *Geiselodinium*, fifthly *Saeptodinium*. Age: Early Tertiary.

"paeminosum" Drugg, 1978, p.68–69, pl.3, figs.5–9. Holotype: Drugg, 1978, pl.3, fig.8. Originally *Geiselodinium*, subsequently *Subtilisphaera*, thirdly *Subtilisphaera?*. **Taxonomic senior synonym:** *Geiselodinium* (now *Corculodinium*) *inaffectum*, according to Courtinat (2000, p.173). Age: middle Kimmeridgian.

?psilatum Jain and Millepied, 1973, p.29–30, pl.2, figs.20–21. Holotype: Jain and Millepied, 1973, pl.2, fig.21. Originally *Geiselodinium*, subsequently (and now) *Geiselodinium?*. Questionable assignment: Stover and Evitt (1978, p.231) as a problematic species. Age: Campanian–Maastrichtian.

qingongense He Chengquan in Zheng Yahui and He Chengquan, 1984, p.91, pl.6, figs.7–9. Holotype: Zheng Yahui and He Chengquan, 1984, pl.6, fig.7. Age: Late Cretaceous.

"sphaericum" (Yu Jingxian et al., 1981, p.259, pl.1, figs.1–2,6) Chen et al., 1988, p.28. Emendation: Mao Shaozhi et al., 1995, p.52, as *Sanshuia sphaerica*. Holotype: Yu Jingxian et al., 1981, pl.1, fig.1. **NOW** *Sanshuia*. Originally (and now) *Sanshuia*, subsequently *Geiselodinium*, thirdly *Saeptodinium*. Age: Late Cretaceous.

tenerum (Krutzsch, 1962, p.44, pl.11, figs.20–22; text-fig.1e) Stover and Evitt, 1978, p.231. Holotype: Krutzsch, 1962, pl.11, figs.20–22. Originally *Deflandrea?*, subsequently *Vozzhennikovia*, thirdly *Dioxya*, fourthly (and now) *Geiselodinium*. Age: middle Eocene.

tyonekense Engelhardt, 1976, p.122, pl.1, figs.1–14. Holotype: Engelhardt, 1976, pl.1, fig.14. Age: Miocene.

GELATIA Bujak, 1984, p.185. Type: Bujak, 1984, pl.1, fig.16, as *Gelatia inflata*.

***inflata** Bujak, 1984, p.185–186, pl.1, figs.13–20; text-figs.2A–B. Holotype: Bujak, 1984, pl.1, fig.16; Fensome et al., 1995, fig.2 — p.1563. Age: late Eocene–late Oligocene.

GEONETTIA de Verteuil and Norris, 1996b, p.265–267. The name *Geonettia* was not validly published in de Verteuil and Norris (1996a, p.171) since these authors did not give a description. Type: de Verteuil and Norris, 1996b, pl.1, figs.1A–B,2A–B, as *Geonettia clineae*.

**clineae* de Verteuil and Norris, 1996b, p.267–268, pl.1, figs.1A–B,2A–B,3–4; pl.2, figs.1A–B,2A–B,3A–B,4A–B; pl.3, figs.1A–B,2A–B,3A–B,4A–B; pl.4, figs.1A–B,2A–B,3A–B,4A–B; pl.5, figs.1–12; pl.6, figs.1–12; text-fig.2 (not 1). Holotype: de Verteuil and Norris, 1996b, pl.1, figs.1A–B,2A–B. The name *Geonettia clineae* was not validly published in de Verteuil and Norris (1996a, p.171) since these authors did not give a description or provide any illustrations. Age: late Miocene.

waltonensis Head, 2000, p.819,821–825, fig.2; fig.3 (part), fig.4 (part), fig.6, nos.1–2; fig.7, nos.1–4; fig.8, nos.1–4; fig.9,nos.1–8; fig.10, nos.1–2. Holotype: Head, 2000, fig.6, nos.1–2; fig.7, nos.1–3. Age: late late Pliocene.

GERDIOCYSTA Liengjarearn et al., 1980, p.482. Type: Liengjarearn et al., 1980, pl.53, fig.2, as *Gerdiocysta conopeum*.

aciculata Châteauneuf, 1980, p.139, pl.24, figs.2,5. Holotype: Châteauneuf, 1980, pl.24, fig.5. Age: middle Eocene–Oligocene (Lutetian–Stampian).

cassiculus (Drugg, 1970b, p.811, figs.2B,3A–B) Liengjarearn et al., 1980, p.483. Holotype: Drugg, 1970b, fig.3A. Originally *Areoligera*, subsequently (and now) *Gerdiocysta*. N.I.A. Age: early Eocene.

**conopeum* Liengjarearn et al., 1980, p.483, pl.53, figs.1–2. Holotype: Liengjarearn et al., 1980, pl.53, fig.2; Fensome et al., 1993a, fig.2 — p.1073. N.I.A. Age: early Oligocene.

GERLACHIDIUM Benedek and Sarjeant, 1981, p.338,340. Type: Benedek, 1972, pl.5, fig.7; text-fig.17, as *Lejeunia aechmophora*.

**aechmophorum* (Benedek, 1972, p.41, pl.5, figs.7,11; text-fig.17) Benedek and Sarjeant, 1981, p.340. Emendation: Benedek and Sarjeant, 1981, p.340–341, as *Gerlachidium aechmophorum*. Holotype: Benedek, 1972, pl.5, fig.7; text-fig.17; Benedek and Sarjeant, 1981, figs.7,9, nos.1–2; Fensome et al., 1993a, figs.1–2 — p.887. Originally *Lejeunia* (generic name illegitimate), subsequently *Wilsonidium?*, thirdly *Lejeunecysta*, fourthly (and now) *Gerlachidium*. Lentin and Williams (1985, p.143) retained this species in *Gerlachidium*. Age: middle-late Oligocene.

"**GEULHEMMEBERGIA**" Willems, 1996, p.228. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1300). **Name not validly published:** no description.

"*turboformis*" Willems, 1996, p.228, pl.2, fig.12. Holotype: not designated. **Name not validly published:** no description. Age: Danian.

GILLINIA Cookson and Eisenack, 1960a, p.11–12. Type: Cookson and Eisenack, 1960a, pl.3, fig.4, as *Gillinia hymenophora*.

denticulata Slimani and Louwye, 2011, p.44,46,48, pl.2, figs.6–11. Holotype: Slimani and Louwye, 2011, pl.2, figs.6–8. Age: Campanian–Maastrichtian.

**hymenophora* Cookson and Eisenack, 1960a, p.12, pl.3, figs.4–6; text-fig.5. Holotype: Cookson and Eisenack, 1960a, pl.3, fig.4. Age: ?Turonian–Maastrichtian.

pyriformis Marshall, 1990a, p.14,16, figs.7A–H,17D–O. Holotype: Marshall, 1990a, figs.7G,17F–H; Fensome et al., 1996, figs.1–3,14 — p.2311. Age: Campanian.

GINGINODINIUM Cookson and Eisenack, 1960a, p.7. Emendation: Lentin and Williams, 1976, p.95–96. Type: Cookson and Eisenack, 1960a, pl.2, fig.9, as *Ginginodinium spinulosum*.

?*claustrum* Islam, 1983b, p.339, pl.2, figs.12–14; text-fig.6. Holotype: Islam, 1983b, pl.2, figs.12–13; text-fig.6. Questionable assignment: Islam (1983b, p.339). Age: early Eocene.

"*evittii*" Singh, 1983, p.135–136, pl.46, figs.7–10. Holotype: Singh, 1983, pl.46, fig.7. **NOW** *Trithyrodinium singhii*. Originally *Ginginodinium evittii*, subsequently (and now) *Trithyrodinium singhii*. Age: early Cenomanian.

ornatum (Felix and Burbridge, 1973, p.23–24, pl.4, fig.12) Lentin and Williams, 1976, p.97. Holotype: Felix and Burbridge, 1973, pl.4, fig.12. Originally *Trithyrodinium*, subsequently (and now) *Ginginodinium*. Age: Maastrichtian.

paleocenicum (Cookson and Eisenack, 1965c, p.142–143, pl.19, figs.1–4; text-figs.2a–b) Stover and Evitt, 1978, p.106. Holotype: Cookson and Eisenack, 1965c, pl.19, figs.2–3. Originally *Peridinium* (Appendix B), subsequently *Cooksoniella?*, thirdly *Palaeoperidinium*, fourthly (and now) *Ginginodinium*. Age: middle Paleocene.

**spinulosum* Cookson and Eisenack, 1960a, p.7, pl.2, fig.9. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.9. Age: late Albian–Cenomanian.

tabulatum Cookson and Eisenack, 1965c, p.143–144, pl.19, figs.5–8; text-fig.3. Holotype: Cookson and Eisenack, 1965c, pl.19, figs.6–7. Originally (and now) *Ginginodinium*, subsequently *Palaeoperidinium*. Stover and Evitt (1978, p.218) retained this species in *Ginginodinium*. Age: middle Paleocene.

GIPPSLANDIA Stover and Williams, 1987, p.107–108. Emendation: Sluijs et al., 2009, p.50. Nomenclatural junior synonym: *Neogippslandia*, which has the same type. Özdikmen (2009, p.235) considered *Gippslandia* Stover and Williams, 1987 to be illegitimate because it is a junior homonym of *Gippslandia* Bayly and Arnott 1969; however, *Gippslandia* Bayly and Arnott is an animal and under the I.C.N. it does not pre-empt *Gippslandia* Stover and Williams. Type: Stover, 1974, pl.5, figs.4a–c, as *Deflandrea extensa*.

**extensa* (Stover, 1974, p.178–179, pl.5, figs.4a–c, 5a–d, 6) Stover and Williams, 1987, p.107. Holotype: Stover, 1974, pl.5, figs.4a–c; Fensome et al., 1993a, figs.1–3 — p.1167. Originally *Deflandrea*, subsequently *Vozzhennikovia?*, thirdly *Dioxya?*, fourthly *Lentinia*, fifthly (and now) *Gippslandia*, sixthly *Neogippslandia* (generic name illegitimate). Age: middle-late Eocene.

"**GLABRIDINIUM**" Brideaux, 1977, p.35. **Taxonomic senior synonym:** *Tubotuberella*, according to Sarjeant (1982b, p.41). Type: Cookson and Eisenack, 1960b, pl.37, fig.12, as *Scriniodinium apatelum*.

apatelum*" (Cookson and Eisenack, 1960b, p.249, pl.37, figs.12–13) Brideaux, 1977, p.35. Emendation: Sarjeant, 1982b, p.42, as *Tubotuberella apatela*. Holotype: Cookson and Eisenack, 1960b, pl.37, fig.12; Jan du Chêne et al., 1986a, pl.124, figs.1–2; Fensome et al., 1993a, fig.1 — p.921. **NOW *Tubotuberella*. Originally *Scriniodinium*, subsequently *Psaligonyaulax*, thirdly (and now) *Tubotuberella*, fourthly *Glabridinium*. Age: Late Jurassic.

GLAPHYROCYSTA Stover and Evitt, 1978, p.49–50. Emendation: Fensome et al., 2009, p.32. Type: Cookson, 1965a, pl.11, fig.4, as *Cyclonephelium retiintextum*.

?*assamica* (Jain et al., 1975, p.11, pl.5, figs.61–62; pl.6, fig.73) Jain, 1982, p.52. Holotype: Jain et al., 1975, pl.5, fig.61; Fauconnier and Masure, 2004, pl.30, figs.1–2. Originally *Cyclonephelium*, subsequently *Cyclonephelium?*, thirdly *Glaphyrocysta*, fourthly (and now) *Glaphyrocysta?* Questionable assignment: Michoux and Soncini in Fauconnier and Masure (2004, p.249–250) as a problematic species. Age: Danian.

castelcasiensis (Corradini, 1973, p.161, pl.24, figs.2,5a–b; pl.35, figs.1–2) Michoux and Soncini in Fauconnier and Masure, 2004, p.245. Holotype: Corradini, 1973, pl.24, fig.2; Fauconnier and Masure, 2004, pl.30, figs.3–7. Originally *Cyclonephelium*, subsequently *Cyclonephelium?*, thirdly (and now) *Glaphyrocysta*. Age: Late Cretaceous–Paleocene.

subsp. *castelcasiensis*. Autonym. Holotype: Corradini, 1973, pl.24, fig.2; Fauconnier and Masure, 2004, pl.30, figs.3–7. Originally *Cyclonephelium?* *castelcasiense* subsp. *castelcasiense*, subsequently (and now) *Glaphyrocysta castelcasiensis* subsp. *castelcasiensis*.

subsp. *prominenta* (Marheinecke, 1992, p.73–74, pl.15, figs.1–4) Michoux and Soncini in Fauconnier and Masure, 2004, p.245. Holotype: Marheinecke, 1992, pl.15, figs.1–4; Fauconnier and Masure, 2004, pl.30, figs.8–10. Originally *Cyclonephelium?* *castelcasiense* subsp. *prominentum*, subsequently (and now) *Glaphyrocysta castelcasiensis* subsp. *prominenta*. Age: late Maastrichtian.

circularis Matsuoka, 1984a, p.378, pl.71, figs.2a–b,3,4a–b,5. Holotype: Matsuoka, 1984a, pl.71, fig.2a–b; Fauconnier and Masure, 2004, pl.32, fig.2. Age: middle Eocene.

"*combinata*" He Chengquan and Li Peng, 1981, p.63, pl.33, figs.5–6. Holotype: He Chengquan and Li Peng, 1981, pl.33, fig.6. **Name illegitimate** — **senior homonym**: *Glaphyrocysta combinata* (Jiabo, 1978) Lentin and Williams, 1981. **Substitute name**: *Glaphyrocysta heliana*. Originally *Glaphyrocysta combinata* (name illegitimate), subsequently (and now) *Glaphyrocysta heliana*. Age: late Oligocene.

combinata (Jiabo, 1978, p.78, pl.27, fig.3) Lentin and Williams, 1981, p.110. Holotype: Jiabo, 1978, pl.27, fig.3; Fauconnier and Masure, 2004, pl.32, fig.5. Junior homonym: *Glaphyrocysta combinata* He Chengquan and Li Peng, 1981. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: Early Tertiary.

delicata Wilson, 1988, p.20, pl.9, figs.5,6a–b. Holotype: Wilson, 1988, pl.9, figs.6a–b; Fensome et al., 1996, figs.2–3 — p.2101. Age: early Eocene.

dentata Matsuoka, 1984a, p.378–379, pl.71, figs.1a–c. Holotype: Matsuoka, 1984a, pl.71, figs.1a–c; Fauconnier and Masure, 2004, pl.32, fig.1. Age: middle Eocene.

divaricata (Williams and Downie, 1966c, p.223–224, pl.25, fig.1; text-fig.60) Stover and Evitt, 1978, p.50. Holotype: Williams and Downie, 1966c, pl.25, fig.1; text-fig.60. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: early Eocene.

espiritasantensis (Regali et al., 1974, p.290, pl.24, fig.3) Arai in Fauconnier and Masure, 2004, p.246. Holotype: Regali et al., 1974, pl.24, fig.3; irretrievably damaged according to Arai in Fauconnier and Masure (2004, p.246). Lectotype: Fauconnier and Masure, 2004, pl.31, figs.1–3, designated by Arai in Fauconnier and Masure (2004, p.246). Originally *Hystrichosphaeridium*, subsequently *Areoligera*, thirdly (and now) *Glaphyrocysta*. Age: Maastrichtian.

expansa (Corradini, 1973, p.161–162, pl.24, figs.8a–b; text-fig.7) Roncaglia and Corradini, 1997, p.187. Emendation: Roncaglia and Corradini, 1997, p.187–188, as *Glaphyrocysta expansa*. Holotype: Corradini, 1973, pl.24, figs.8a–b; Fauconnier and Masure, 2004, pl.32, figs.3–4. Originally *Cyclonephelium*, subsequently *Cyclonephelium?*, thirdly (and now) *Glaphyrocysta*. Age: Late Cretaceous–Paleocene.

extensa Fensome et al., 2009, p.32, pl.4, figs.c–h. Holotype: Fensome et al., 2009, pl.4, figs.c–d. Age: youngest occurrence, middle Priabonian.

exuberans (Deflandre and Cookson, 1955, p.285 ex Eaton, 1976, p.255–256) Stover and Evitt, 1978, p.50. Emendation: Sarjeant, 1986, p.29–31, as *Glaphyrocysta exuberans*. Holotype: Pasiels, 1948, pl.5, figs.11,13, as *Membranilarnax pterospermoides*, designated by Eaton (1976, p.255); lost according to Sarjeant (1986, p.30). Neotype: Eaton, 1976, pl.8, fig.2, designated by Sarjeant (1986, p.30). Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. The name *Cyclonephelium exuberans* was not validly published in Deflandre and Cookson (1955, p.255) since no description was provided or a direct reference to one (as required after 1952 by

ICBN Article 32.3), and in Williams and Downie (1966c, p.225) since no holotype was designated. In originally proposing the name *Cyclonephelium exuberans*, Deflandre and Cookson (1955, p.285) included several specimens illustrated by Pastsiels (1948, pl.5, figs.11–14) but did not designate a holotype. Contrary to the indication by Eaton (1976, p.256), this was not against ICBN rules in 1955, but was when Williams and Downie (1966c) used the name *Cyclonephelium exuberans*. Hence, Eaton (1976) was first to validate the name by providing a description and designating a holotype. Age: early Eocene.

heliana Lentin and Williams, 1985, p.144. Holotype: He Chengquan and Li Peng, 1981, pl.33, fig.6. Originally *Glaphyrocysta combinata* (name illegitimate), subsequently (and now) *Glaphyrocysta heliana*. Substitute name for *Glaphyrocysta combinata* He Chengquan and Li Peng, 1981, p.63, pl.33, figs.5–6 (an illegitimate name). Age: late Oligocene.

inculta (Morgenroth, 1966b, p.9, pl.2, fig.5) Stover and Evitt, 1978, p.50. Holotype: Morgenroth, 1966b, pl.2, fig.5. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: early Oligocene.

indica Jain and Garg, 1991, p.74,76; pl.4, figs.1–3,7–8,13–16. Holotype: Jain and Garg, 1991, pl.4, figs.14–16; Fauconnier and Masure, 2004, pl.32, figs.8–9. Age: Miocene.

intricata (Eaton, 1971, p.365, pl.4, figs.8–10) Stover and Evitt, 1978, p.50. Holotype: Eaton, 1971, pl.4, fig.8; Eaton, 1976, pl.8, fig.6. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: middle Eocene (see Aubry, 1986).

jabliensis Lentin and Williams, 1993, p.237. Holotype: Khanna and Singh, 1981b, fig.4, no.1, as *Cyclonephelium indicum*. Originally *Cyclonephelium indicum*, subsequently (and now) *Glaphyrocysta jabliensis*. This is the substitute name for *Cyclonephelium indicum*; the name *Glaphyrocysta indica* is preoccupied. Age: middle Eocene.

kachchhensis Jain and Tandon, 1981, p.9, pl.1, figs.17–19. Holotype: Jain and Tandon, 1981, pl.1, figs.17–18; Fauconnier and Masure, 2004, pl.32, figs.10–11. Age: middle Eocene.

laciniiformis (Gerlach, 1961, p.206, pl.29, fig.4) Stover and Evitt, 1978, p.50. Holotype: Gerlach, 1961, pl.29, fig.4; Fauconnier and Masure, 2004, pl.33, fig.1. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: middle-late Oligocene.

longicornis He Chengquan, 1991, p.138, pl.15, figs.1–3. Holotype: He Chengquan, 1991, pl.15, fig.3. Age: Paleocene–early Eocene.

marlboroughensis Schiøler and Wilson, 1998, p.336,338, pl.5, figs.1–6. Holotype: Schiøler and Wilson, 1998, pl.5, fig.5. Age: Santonian.

microfenestrata (Bujak, 1976, p.112, pl.3, fig.12; pl.4, figs.1–7; text-fig.31) Stover and Evitt, 1978, p.50. Holotype: Bujak, 1976, pl.4, figs.4–5; Bujak et al., 1980, pl.14, fig.1; Fauconnier and Masure, 2004, pl.33, figs.2–3. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: middle Eocene (see Aubry, 1986).

multi perforata He Chengquan and Li Peng, 1981, p.63–64, pl.33, figs.7–9. Holotype: He Chengquan and Li Peng, 1981, pl.33, fig.7. Age: late Oligocene.

ordinata (Williams and Downie, 1966c, p.225–227, pl.25, fig.3; text-fig.62) Stover and Evitt, 1978, p.50. Holotype: Williams and Downie, 1966c, pl.25, fig.3; text-fig.62. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: early Eocene.

paradoxa He Chengquan and Li Peng, 1981, p.64, pl.33, figs.1–2. Holotype: He Chengquan and Li Peng, 1981, pl.33, fig.1. Age: late Oligocene.

pastsielsii (Deflandre and Cookson, 1955, p.285 ex de Coninck, 1965, p.44) Stover and Evitt, 1978, p.50. Emendation: Sarjeant, 1986, p.27–29, as *Glaphyrocysta pastielsii*. Holotype: Pastsiels, 1948, pl.5, fig.15, as *Membranilarnax cf. liradiscoidea*; Fauconnier and Masure, 2004, pl.33, fig.9. Originally *Cyclonephelium*,

subsequently (and now) *Glaphyrocysta*. The name *Cyclonephelium pastielsii* was not validly published in Deflandre and Cookson (1955, p.285) since these authors did not provide a description or a direct reference to one (as required after 1952 by ICBN Article 32.3). Age: early Eocene.

paupercula Liengjarearn et al., 1980, p.483–484,486, pl.53, figs.3,5. Holotype: Liengjarearn et al., 1980, pl.53, fig.3. Age: early Oligocene.

?*pectinata* He Chengquan, 1991, p.139, pl.14, figs.7–9. Holotype: He Chengquan, 1991, pl.14, fig.8. Questionable assignment: He Chengquan (1991, p.139). Age: early Eocene.

perforata Hultberg and Malmgren, 1985, p.48–49, figs.11A–D. Holotype: Hultberg and Malmgren, 1985, fig.11A. Hultberg (1985b, p.63) and Hultberg (1985c, p.126) also indicated this species to be new. Hultberg (1985b, p.63) attributed this name to an unpublished thesis by Wilson. Age: late Maastrichtian–Danian.

priabonensis Brinkhuis, 1994, p.158–159, pl.1, fig.8; pl.2, figs.1–8; text-fig.16. Holotype: Brinkhuis, 1994, pl.2, figs.1–5. This name was not validly published in Brinkhuis (1992, p.98), since that author specified it to be a manuscript name. Age: late Eocene.

radiata Levy and Harwood, 2000, p.230–231, pl.5, figs.e–h. Holotype: Levy and Harwood, 2000, pl.5, fig.e. Age: middle-late Eocene.

reticulosa (Gerlach, 1961, p.204, pl.29, fig.2) Stover and Evitt, 1978, p.50. Holotype: Gerlach, 1961, pl.29, fig.2. Originally *Cyclonephelium*, subsequently *Glaphyrocysta*?, thirdly (and now) *Glaphyrocysta*. Questionable assignment: Stover and Evitt (1978, p.50) — however, Michoux and Soncini in Fauconnier and Masure (2004, p.249) retained this species in *Glaphyrocysta* without question. Age: middle-late Oligocene.

****retiintexta*** (Cookson, 1965a, p.88, pl.11, fig.4) Stover and Evitt, 1978, p.50. Holotype: Cookson, 1965a, pl.11, fig.4; Eisenack and Kjellström, 1972, p.325; Fensome et al., 1996, fig.1 — p.2329. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: ?Senonian.

semitecta (Bujak in Bujak et al., 1980, p.46,48,50, pl.14, figs.2–9; text-fig.13) Lentin and Williams, 1981, p.111. Holotype: Bujak et al., 1980, pl.14, figs.4–6; Fauconnier and Masure, 2004, pl.33, figs.10–11. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*, thirdly *Riculacysta* (combination not validly published). Lentin and Williams (1993, p.238) retained this species in *Glaphyrocysta*. Taxonomic senior synonym: *Riculacysta perforata*, according to Köthe (1990, p.50) — however, Kirsch (1991, p.129), retained *Cyclonephelium* (as *Riculacysta*, now *Glaphyrocysta*) *semitectum*. Age: middle Eocene (see Aubry, 1986).

spineta (Eaton, 1976, p.259–260, pl.8, fig.3; text-fig.12) Stover and Evitt, 1978, p.50. Holotype: Eaton, 1976, pl.8, fig.3; text-fig.12; Bujak et al., 1980, pl.9, figs.10–11; Fauconnier and Masure, 2004, pl.34, fig.1. Originally *Cyclonephelium*, subsequently *Glaphyrocysta*?, thirdly (and now) *Glaphyrocysta*. Questionable assignment: Stover and Evitt (1978, p.50) — however, Michoux and Soncini in Fauconnier and Masure (2004, p.249) retained this species in *Glaphyrocysta* without question. Age: early-middle Eocene.

texta (Bujak, 1976, p.110, pl.3, figs.6–11; text-figs.3G–H) Stover and Evitt, 1978, p.50. Holotype: Bujak, 1976, pl.3, fig.7; Fauconnier and Masure, 2004, pl.34, figs.2–3. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*. Age: middle Eocene (see Aubry, 1986).

"?*undulata*" (Eaton, 1976, p.248, pl.4, figs.4,6; pl.5, figs.2,4; text-figs.8c,9) Stover and Evitt, 1978, p.50. Holotype: Eaton, 1976, pl.4, figs.4,6; text-fig.9; Bujak et al., 1980, pl.9, figs.7–8; Fauconnier and Masure, 2004, pl.5, figs.1–3. **NOW** *Areoligera*. Originally (and now) *Areoligera*, subsequently *Glaphyrocysta*?. Questionable assignment: Stover and Evitt (1978, p.50). Age: middle Eocene (see Aubry, 1986).

?*vicina* (Eaton, 1976, p.260–261, pl.8, figs.4–5; text-fig.13) Stover and Evitt, 1978, p.50. Holotype: Eaton, 1976, pl.8, fig.4; text-fig.13; Bujak et al., 1980, pl.9, figs.9,12; Fauconnier and Masure, 2004, pl.34, figs.11–14. Originally *Cyclonephelium*, subsequently (and now) *Glaphyrocysta*?. Questionable assignment: Stover and Evitt (1978, p.50). Age: early-middle Eocene (see Bujak et al., 1980, p.19 and Aubry, 1986).

wilsonii Kirsch, 1991, p.92–93, pl.16, figs.2–3,5–8,10–11; pl.43, figs.10–12; text-fig.43. Holotype: Kirsch, 1991, pl.16, figs.10–11. Taxonomic junior synonym: *Cyclonephelium perforatum* (name not validly published), according to Slimani (2001a, p.192). Age: early-middle Maastrichtian.

?**xinjiangensis** He Chengquan, 1991, p.139–140, pl.15, figs.8–9; pl.60, figs.1–2; text-figs.24a–f. Holotype: He Chengquan, 1991, pl.15, figs.8–9. Originally *Glaphyrocysta*, subsequently *Glaphyrocysta*? Questionable assignment: Michoux and Soncini in Fauconnier and Masure (2004, p.250) as a problematic species. Age: late Eocene.

?**yinggehaica** He Chengquan and Li Peng, 1981, p.64, pl.32, figs.1–6; text-fig.5. Holotype: He Chengquan and Li Peng, 1981, pl.32, fig.1; text-fig.5. Originally *Glaphyrocysta*, subsequently *Glaphyrocysta*? Questionable assignment: Michoux and Soncini in Fauconnier and Masure (2004, p.250) as a problematic species. Age: late Oligocene.

"**GLAPHYROSPHAERA**" Schiøler and Wilson, 1994, p.140,142. **Taxonomic senior synonym:** *Wilsonisphaera*, according to Schiøler and Wilson (1995, p.511). The name *Glaphyrosphaera* was not validly published in Slimani (1994, p.68), who cited it in synonymy as an unpublished thesis name. Type: Schiøler and Wilson, 1994, figs.2B,6A–B, as *Glaphyrosphaera glabra*.

"***glabra**" Schiøler and Wilson, 1994, p.142–144, figs.2A–J,3A–D,4A–B,5,6A–B. Holotype: Schiøler and Wilson, 1994, figs.2B,6A–B. **Taxonomic senior synonym:** *Thalassiphora* (as and now *Wilsonisphaera*) *petila*, according to Schiøler and Wilson (1995, p.511). The name *Glaphyrosphaera glabra* was not validly published in Slimani (1994, p.68), who cited it in synonymy as an unpublished thesis name. Age: Maastrichtian.

"**GLOMODINIUM**" Dodekova, 1975, p.26. **Taxonomic senior synonym:** *Evansia*, according to Jansonius (1986, p.208) and Lentin and Williams (1993, p.214). Taxonomic senior synonym: *Pareodinia*, according to Stover and Evitt (1978, p.116–117) — however, Dörhöfer and Davies (1980, p.12) retained *Glomodinium*. Type: Dodekova, 1975, pl.5, figs.1–2, as *Glomodinium reticulopilosum*.

"**alaskense**" (Wiggins, 1975, p.104, pl.2, figs.7–8) Below, 1990, p.65. Holotype: Wiggins, 1975, pl.2, fig.7. **Combination not validly published:** basionym not fully referenced and combination not intended. **NOW** *Evansia*. Originally *Pareodinia*, subsequently *Glomodinium* (combination not validly published), thirdly (and now) *Evansia*. Taxonomic junior synonyms: *Pareodinia minuta* and *Pareodinia robusta*, both according to Below (1990, p.72). Age: ?Callovian–mid Kimmeridgian.

"**cerebraloides**" Århus et al., 1989, p.45, figs.4a–d. Holotype: Århus et al., 1989, fig.4a. **NOW** *Evansia*. Originally *Glomodinium*, subsequently (and now) *Evansia*. Age: late Mid–early late Callovian.

"**evittii**" (Pocock, 1972, p.94–95, pl.24, figs.6,8; text-fig.11) Davies, 1983, p.17. Holotype: Pocock, 1972, pl.24, fig.8, lost according to Jansonius (1986, p.208). Lectotype: Jansonius, 1986, pl.6, figs.8–9, designated by Jansonius (1986, p.208). **NOW** *Evansia*. Originally *Tenua* Eisenack, subsequently *Pareodinia*, thirdly *Glomodinium*, fourthly (and now) *Evansia*. Taxonomic junior synonym (at specific rank): *Pareodinia tripartita* (including *Pareodinia tripartita* var. *rotunda*), according to Wiggins (1975, p.105) and Below (1990, p.73). This combination was not validly published by Dodekova (1975, p.27), since that author did not fully reference the basionym. Age: late Bajocian–Callovian.

"**granulatum**" (Pocock, 1972, p.95, pl.24, fig.7; text-fig.12) Århus et al., 1989, p.45. Holotype: Pocock, 1972, pl.24, fig.7; Jansonius, 1986, pl.5, figs.1–3; text-figs.10a–b. **NOW** *Evansia*. Originally (and now) *Evansia*, subsequently *Glomodinium*. Age: late Bajocian.

"**opeasatos**" Davies, 1983, p.17, pl.3, figs.13–16; text-fig.10. Holotype: Davies, 1983, pl.3, fig.13; text-fig.10. **NOW** *Evansia*. Originally *Glomodinium*, subsequently (and now) *Evansia*. N.I.A. Age: late Bathonian–Oxfordian.

"**reticulopilosum*" Dodekova, 1975, p.26–27, pl.5, figs.1–6. Holotype: Dodekova, 1975, pl.5, figs.1–2. **NOW** *Evansia*. Originally *Glomodinium*, subsequently *Pareodinia*, thirdly (and now) *Evansia*. Age: late Bathonian.

"*tripartitum*" (Johnson and Hills, 1973, p.208, pl.2, figs.12–14,17–18; pl.3, figs.1–2; text-figs.11A–C) Davies, 1983, p.17. Holotype: Johnson and Hills, 1973, pl.2, fig.18. Originally *Pareodinia*, subsequently *Glomodinium*, thirdly *Evansia*. **Taxonomic senior synonym:** *Tenua* (now *Evansia*) *evittii*, according to Wiggins (1975, p.105). Age: late Bathonian.

"*zabrum*" Davies, 1983, p.18, pl.3, figs.2–12; text-figs.11A–C. Holotype: Davies, 1983, pl.3, fig.12; text-figs.11A–C. **NOW** *Evansia*. Originally *Glomodinium*, subsequently (and now) *Evansia*. Age: Bathonian–Oxfordian.

GLOSSODINIUM Ioannides et al., 1977, p.452–453. Emendation: Courtinat in Courtinat and Gaillard, 1980, p.30. Taxonomic senior synonym: *Dinopterygium*, by implication in Drugg (1978, p.67), who transferred the "type species" of *Glossodinium*, *Glossodinium dimorphum*, to *Dinopterygium* — however, Courtinat in Courtinat and Gaillard (1980, p.30) and Poulsen (1992b, p.45) retained *Glossodinium*. Type: Ioannides et al., 1977, pl.2, fig.13, as *Glossodinium dimorphum*.

"*bicuneatum*" (Deflandre, 1939a, p.180, pl.8, fig.7 ex Sarjeant, 1967b, p.248) Ioannides et al., 1977. Holotype: Deflandre, 1939a, pl.8, fig.7. **NOW** *Cornudinium*. Originally *Palaeoperidinium* (name not validly published), subsequently *Scrinioidinium*, thirdly *Glossodinium*, fourthly *Dinopterygium*, fifthly (and now) *Cornudinium*. Age: Oxfordian.

**dimorphum* Ioannides et al., 1977, p.453, pl.2, figs.13–14; text-fig.8. Holotype: Ioannides et al., 1977, pl.2, fig.13. Originally (and now) *Glossodinium*, subsequently *Dinopterygium*. Courtinat in Courtinat and Gaillard (1980, p.30) and Poulsen (1992b, p.45) retained this species in *Glossodinium*. Age: Kimmeridgian.

shihebeiense Yu Jingxian, 1982, p.246, pl.3, figs.1,5–7. Holotype: Yu Jingxian, 1982, pl.3, fig.6. Age: Late Jurassic–Early Cretaceous.

GLYPHANODINIUM Drugg, 1964, p.237–238. Type: Drugg, 1964, figs.1–2, as *Glyphanodinium facetum*.

**facetum* Drugg, 1964, p.238–239, figs.1–6. Holotype: Drugg, 1964, figs.1–2. Age: Danian.

GOCHTEODINIA Norris, 1978, p.7. Emendation: Below, 1990, p.47. Type: Vozzhennikova, 1967, pl.12, figs.3a–b; pl.15, fig.1, as *Imbatodinium villosum*.

antennata (Gitmez and Sarjeant, 1972, p.232–233, pl.11, figs.2–3) Below, 1990, p.48. Holotype: Gitmez and Sarjeant, 1972, pl.11, fig.3. Originally *Imbatodinium*, subsequently *Pareodinia*, thirdly (and now) *Gochteodinia*. Age: early–late Kimmeridgian.

"*imbatodinensis*" (Vozzhennikova, 1967, p.55, pl.12, figs.4a–c) Below, 1990, p.48. Emendation: Lentin and Vozzhennikova, 1990, p.91–92, as *Protobatioladinium imbatodinense*. Holotype: Vozzhennikova, 1967, pl.12, fig.4a; Lentin and Vozzhennikova, 1990, pl.11, figs.9–11; text-fig.50. **NOW** *Protobatioladinium*. Originally *Imbatodinium*, subsequently *Necrobroomea?*, thirdly *Pareodinia*, fourthly *Pareodinia?*, fifthly *Batioladinium*, sixthly (and now) *Protobatioladinium*, seventhly *Gochteodinia*. Age: Late Jurassic.

judilentiniae McIntyre and Brideaux, 1980, p.23–24, pl.11, figs.4–9. Holotype: McIntyre and Brideaux, 1980, pl.11, figs.4–5,7–8. Age: Valanginian.

mutabilis (Riley in Fisher and Riley, 1980, p.324–325, pl.3, figs.1–3) Fisher and Riley, 1982 (July), p.53. Emendation: Below, 1990, p.49, as *Gochteodinia mutabilis*. Holotype: Gitmez and Sarjeant, 1972, pl.11, fig.1. Originally *Pareodinia*, subsequently (and now) *Gochteodinia*. Davey (1982b, p.24; dated July 30th) also proposed

this combination. *Gochteodinia mutabilis* was not validly published in Fisher and Riley (1976, p.52), since no description or illustration was provided. Age: Volgian.

procera Riding in Abbink et al., 2001, p.300–301, figs.9L–O. Holotype: Abbink et al., 2001, fig.9L. Age: late Volgian.

tuberculata Below, 1990, p.49–50, pl.15, figs.7–10,23,24. Holotype: Below, 1990, pl.15, figs.7,9–10,23. Contrary to the opinion of Lentin and Williams (1993, p.240), this name is validly published. Below (1987a, p.6) stated that, unless otherwise indicated, all the material is in his personal collection. Since Below (1987a, 1987b, 1990) are parts I to III of a single study, we agree with J. Jansonius (personal communication) that Below's (1987a) repository statement refers to all three publications, fulfilling the requirement of I.C.N. Article 40.7 (see also the discussion on Article 40.7 in the Introduction). Age: Kimmeridgian.

verrucosa (Vozzhennikova, 1967, p.56, pl.12, fig.6) Dörrhöfer and Davies, 1980, p.30. Emendation: Lentin and Vozzhennikova, 1990, p.83–84, as *Gochteodinia verrucosa*. Holotype: Vozzhennikova, 1967, pl.12, fig.6; Lentin and Vozzhennikova, 1990, pl.11, fig.5; text-fig.46. Originally *Imbatodinium*, subsequently *Pareodinia*, thirdly (and now) *Gochteodinia*. Age: Late Jurassic.

***villosa** (Vozzhennikova, 1967, p.56, pl.12, figs.1a–b,2a–b,3a–b; pl.13, figs.1a–e,2,3a–d; pl.14, figs.1a–e,2a–i; pl.15, figs.1–2) Norris, 1978, p.7. Emendations: Lentin and Vozzhennikova, 1990, p.85 and Below, 1990, p.50, both as *Gochteodinia villosa*. Holotype: Vozzhennikova, 1967, pl.12, figs.3a–b; pl.15, fig.1; Eisenack and Kjellström, 1975b, figure to right — p.726f; Lentin and Vozzhennikova, 1990, pl.11, figs.7–8; text-fig.47; Fensome et al., 1995, fig.1 — p.1903; Fensome et al., 1996, figs.1–3 — p.2431. Originally *Imbatodinium villosum*, subsequently *Pareodinia villosa* (Vozzhennikova) (combination not validly published), thirdly *Pareodinia dasyforma*, fourthly (and now) *Gochteodinia villosa*. Age: Late Jurassic.

subsp. **multifurcata** Davey, 1982b, p.23, pl.6, fig.13. Holotype: Davey, 1982b, pl.6, fig.13; Fensome et al., 1996, fig.1 — p.2235. Age: late Ryazanian–Valanginian.

subsp. **villosa**. Autonym. Holotype: Vozzhennikova, 1967, pl.12, figs.3a–b; pl.15, fig.1; Eisenack and Kjellström, 1975b, figure to right — p.726f; Lentin and Vozzhennikova, 1990, pl.11, figs.7–8; text-fig.47; Fensome et al., 1995, fig.1 — p.1903; Fensome et al., 1996, figs.1–3 — p.2431.

virgula Davey, 1982b, p.23–24, pl.6, figs.2–3,7–8,10–11. Holotype: Davey, 1982b, pl.6, figs.2,7,10. Age: Portlandian.

"**GOCHTODINIUM**" Bujak, 1979, p.310–312. **Taxonomic senior synonym:** *Wetzeliiella*, according to Lentin and Vozzhennikova (1989, p.219 and 228). Type: Bujak, 1979, pl.3, figs.7–12, as *Gochtodinium simplex*.

"fornicale" Yu Jingxian, 1989, p.155, pl.58, figs.1,3. Holotype: Yu Jingxian, 1989, pl.58, fig.1. **NOW** *Rhombodinium*? Originally *Gochtodinium*, subsequently *Wetzeliiella*, thirdly (and now) *Rhombodinium*? Age: Eocene.

***simplex**" Bujak, 1979, p.312–313, pl.2, fig.10; pl.3, figs.1–12; text-figs.4B,8F. Holotype: Bujak, 1979, pl.3, figs.7–12; Bujak et al., 1980, pl.15, fig.5; Fensome et al., 1995, figs.1–5 — p.1793. **NOW** *Wetzeliiella*. Originally *Gochtodinium*, subsequently (and now) *Wetzeliiella*. Age: middle Eocene (see Aubry, 1986).

"spinula" (Bujak, 1979, p.313, pl.2, figs.3–9; text-fig.8E) Lentin and Vozzhennikova, 1989, p.228. Holotype: Bujak, 1979, pl.2, figs.3–5; Bujak et al., 1980, pl.15, fig.6. **NOW** *Rhombodinium*. Originally *Gochtodinium*, subsequently *Wetzeliiella*, thirdly (and now) *Rhombodinium*. N.I.A. Age: middle Eocene (see Aubry, 1986).

"triangulatum" Yu Jingxian, 1989, p.155–156, pl.58, figs.2,5,8. Holotype: Yu Jingxian, 1989, pl.58, fig.2. **NOW** *Epelidinium*. Originally *Gochtodinium*, subsequently *Wetzeliiella*, thirdly *Wilsonidium*, fourthly (and now) *Epelidinium*. Age: Eocene.

GODAVARIELLA Mehrotra and Sarjeant, 1987, p.166–167. Type: Mehrotra and Sarjeant, 1987, pl.1, fig.3; text-fig.3, as *Godavariella venkatachala*.

**venkatachala* Mehrotra and Sarjeant, 1987, p.167–168, pl.1, figs.2–6; text-fig.3. Holotype: Mehrotra and Sarjeant, 1987, pl.1, fig.3; text-fig.3; Fensome et al., 1995, figs.2,6 — p.1891; Mehrotra and Aswal, 2003, pl.28, fig.3. Age: Maastrichtian.

GONELLUM Keupp, 1987, p.45. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1300). Type: Keupp, 1987, pl.11, figs.1–2, as *Gonellum kurtii*.

calcipterelloides Keupp, 1987, p.46, pl.11, figs.11–15. Holotype: Keupp, 1987, pl.11, figs.11–12,15. Age: middle Albian–early Cenomanian.

**kurtii* Keupp, 1987, p.45–46, pl.11, figs.1–10; text-fig.6. Emendation: Keupp and Kowalski, 1992, p.220. Holotype: Keupp, 1987, pl.11, figs.1–2. Age: middle Albian–early Cenomanian.

prismaticum Keupp, 1991b, p.130–131, pl.2, figs.2–8. Holotype: Keupp, 1991b, pl.2, figs.2–5. Age: late Cenomanian.

GONGYLODINIUM Fenton et al., 1980, p.158. Emendation: Feist-Burkhardt and Monteil, 1997, p.43. Taxonomic senior synonym: *Dissiliodinium*, by implication in Prauss (1989, p.38), who transferred the "type species" of *Gongylostinium*, *Gongylostinium erymnoteichon*, to *Dissiliodinium* — however, Feist-Burkhardt and Monteil (1997, p.43; 2001, p.58) retained *Gongylostinium*. Type: Fenton et al., 1980, pl.14, figs.8–9, as *Gongylostinium erymnoteichon*.

"*acmeum*" Århus, 1992, p.312–313, figs.5E–F,H–I. Holotype: Århus, 1992, fig.5I. **NOW** *Dissiliodinium*. Originally *Gongylostinium*, subsequently (and now) *Dissiliodinium*. Age: Valanginian.

**erymnoteichon* Fenton et al., 1980, p.158–159, pl.14, figs.6–9. Emendation: Feist-Burkhardt and Monteil, 1997, p.43. Holotype: Fenton et al., 1980, pl.14, figs.8–9; Fensome et al., 1993a, figs.2–3 — p.1149. Originally (and now) *Gongylostinium*, subsequently *Dissiliodinium*. Feist-Burkhardt and Monteil (1997, p.43; 2001, p.64) retained this species in *Gongylostinium*. Age: late Bajocian–early Bathonian.

"*hocneratum*" Fenton et al., 1980, p.159–160, pl.16, fig.2. Holotype: Fenton et al., 1980, pl.16, fig.2. **NOW** *Dissiliodinium*?. Originally *Gongylostinium*, subsequently *Dissiliodinium*, thirdly (and now) *Dissiliodinium*?. Age: late Bajocian–early Bathonian.

"*pauliae*" Heilmann-Clausen in Heilmann-Clausen and Thomsen, 1995, p.294–295, pl.5, figs.7–10,13; text-fig.14. Holotype: Heilmann-Clausen and Thomsen, 1995, pl.5, fig.13; text-fig.14. **NOW** *Dissiliodinium*. Originally *Gongylostinium*, subsequently (and now) *Dissiliodinium*. Age: early–late Barremian.

"*serratum*" Head et al., 1989b, p.457, pl.3, figs.14–16. Holotype: Head et al., 1989b, pl.3, fig.14–16. **NOW** *Bitectatodinium*?. Originally *Gongylostinium*, subsequently (and now) *Bitectatodinium*?. Age: late Miocene.

GONYAULACYSTA Deflandre, 1964, p.5030. Emendations: Sarjeant, 1969, p.7–8; Stover and Evitt, 1978, p.157–158; Sarjeant, 1982b, p.27–28; Helenes and Lucas-Clark, 1997, p.175–176. Taxonomic senior synonym: *Rhynchodiniopsis*, by implication in Millioud (1969, p.428) who transferred the "type species" of *Rhynchodiniopsis*, *Rhynchodiniopsis aptiana*, to *Gonyaulacysta* — however, Lentin and Williams (1973, p.58,121) retained *Gonyaulacysta*. Taxonomic junior synonyms: *Nelchinopsis*, according to Duxbury (1977, p.37) — however, Stover and Williams (1987, p.11) retained *Nelchinopsis*; *Psaligonyaulax*, according to Below (1981a, p.52) — however, Lentin and Williams (1981, p.235) retained *Psaligonyaulax*. Although the "type species", *Gonyaulacysta jurassica*, was not validly transferred to *Gonyaulacysta* by Deflandre (1964), the generic name *Gonyaulacysta* was validly

published by that author since it is based on a previously validly published species name. Type: Deflandre, 1939a, pl.6, figs.2–3; text-figs.1–2, as *Gonyaulax jurassica*.

"*aceras*" (Eisenack, 1958a, p.391, pl.21, figs.1–2) Sarjeant, 1966b, p.131. Emendation: Sarjeant, 1985a, p.57,59, as *Cribroperidinium aceras*. Holotype: Eisenack, 1958a, pl.21, fig.1; Sarjeant, 1985a, pl.4, figs.1–2; Jan du Chêne et al., 1986a, pl.2, figs.6–7. **Combination not validly published:** basionym not fully referenced. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta?* (combination not validly published), thirdly *Leptodinium*, fourthly *Acanthaulax?*, fifthly (and now) *Cribroperidinium*. Questionable assignment: Sarjeant (1966b, p.131). Age: Aptian.

"*aculeata*" (Klement, 1960, p.42, pl.5, figs.6–9; text-fig.21) Sarjeant, 1969, p.8. Holotype: Klement, 1960, pl.5, figs.6–7. **NOW** *Tehamadinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Acanthaulax*, fourthly *Occisucysta*, fifthly (and now) *Tehamadinium*. This combination was not validly published in Sarjeant (1966b, p.130), since that author did not fully reference the basionym. Age: early Kimmeridgian.

"*aichmetes*" Sarjeant, 1966b, p.123–124, pl.13, figs.5–6; text-fig.30. Holotype: Sarjeant, 1966b, pl.13, figs.5–6; text-fig.30; Jan du Chêne et al., 1986a, pl.20, figs.5–7. **NOW** *Cribroperidinium*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Cribroperidinium*. Age: late Barremian.

"*aldorfensis*" Gocht, 1970b, p.136–138, pl.30, figs.1–2,3a–d; pl.31, figs.9a–b,10a–c,11; pl.32, figs.1–2,3a–b; text-figs.5,9a–b. Holotype: Gocht, 1970b, pl.31, figs.10a–c; Jan du Chêne et al., 1986a, pl.6, figs.1–3; Fensome et al., 1993a, figs.1–3 — p.897. **NOW** *Aldorfia*. Originally *Gonyaulacysta*, subsequently (and now) *Aldorfia*. Age: early Bathonian.

"*amabilis*" (Deflandre, 1939b, p.143, pl.6, fig.8) Dodekova, 1971, p.7. Emendation: Kunz, 1990, p.18–19, as *Leptodinium amabile*. Holotype: Deflandre, 1939b, pl.6, fig.8; Jan du Chêne et al., 1986a, pl.69, figs.1–3. **NOW** *Leptodinium*. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Leptodinium*, thirdly *Gonyaulacysta*, fourthly *Leptodinium?*. This combination was not validly published in Sarjeant (1966b, p.130), since that author did not fully reference the basionym. Age: Kimmeridgian.

"*ambigua*" (Deflandre, 1939b, p.144, pl.6, fig.2) Sarjeant, 1969, p.8. Holotype: Deflandre, 1939b, pl.6, fig.2; Jan du Chêne et al., 1986a, pl.68, figs.1–3. **NOW** *Leptodinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly *Rhynchodiniopsis*, fifthly (and now) *Leptodinium*. This combination was not validly published in Sarjeant (1966b, p.130), since that author did not fully reference the basionym. Age: Kimmeridgian.

"*anglese*" Zahiri, 1981, p.15, pl.3, figs.1–2; text-fig. — p.16. Holotype: Zahiri, 1981, pl.3, fig.2; text-fig. — p.16. Age: early Barremian.

"*angulosa*" Gitmez, 1970, p.252, pl.2, figs.4–5; text-figs.7A–B. Holotype: Gitmez, 1970, pl.2, figs.4–5; text-figs.7A–B; Jan du Chêne et al., 1986a, pl.2, figs.11–15. **NOW** *Cribroperidinium*. Originally *Gonyaulacysta*, subsequently *Acanthaulax*, thirdly *Meristaulax* Sarjeant, fourthly *Acanthaulax?*, fifthly *Rhynchodiniopsis*, sixthly (and now) *Cribroperidinium*. Taxonomic senior synonym: *Gonyaulax* (as and now *Cribroperidinium*) *granulatum*, according to Fisher and Riley (1980, p.321) — however, Sarjeant and Gocht in Sarjeant (1984a, p.160) retained *Gonyaulacysta* (as *Meristaulax*) *angulosa*. Age: early Kimmeridgian.

"*apionis*" (Cookson and Eisenack, 1958, p.36, pl.3, fig.7; text-figs.3–4) Sarjeant, 1969, p.8. Holotype: Cookson and Eisenack, 1958, text-figs.3–4; Jan du Chêne et al., 1986a, pl.33, fig.6. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly (and now) *Cribroperidinium*. Taxonomic senior synonym: *Gonyaulax* (now *Cribroperidinium*) *edwardsii*, according to Burger (1980a, p.82) — however, Jan du Chêne et al. (1986a, p.76) retained *Gonyaulacysta* (as *Cribroperidinium*) *apione*. This combination was not validly published in Sarjeant (1966b, p.130), since that author did not fully reference the basionym. Age: Albanian.

"*aptiana*" (Deflandre, 1935, p.231, pl.5, fig.10; pl.8, figs.7–10) Millioud, 1969, p.428. Emendation: Sarjeant, 1982b, p.36–37, as *Rhynchodiniopsis aptiana*. Holotype: Deflandre, 1935, pl.5, fig.10; pl.8, figs.7–9; Deflandre,

1936b, pl.7, figs.2–4. **Combination illegitimate**: this is the "type species" of the earlier generic name *Rhynchodiniopsis*. **NOW** *Rhynchodiniopsis*. Originally (and now) *Rhynchodiniopsis*, subsequently *Gonyaulacysta*. Taxonomic junior synonym: *Gonyaulacysta fimbriata*, according to Below (1981a, p.118) — however, Sarjeant (1982b, p.35) retained *Gonyaulacysta* (as *Rhynchodiniopsis*) *fimbriata*. This combination was not validly published in Sarjeant (1966b, p.130), since that author did not fully reference the basionym. Age: Senonian.

"*areolata*" (Sarjeant, 1961a, p.95–96, pl.13, fig.13; text-fig.5) Lentin and Williams, 1973, p.59. Holotype: Sarjeant, 1961a, pl.13, fig.13; text-fig.5; Jan du Chêne et al., 1986a, pl.3, figs.1–2. **Combination illegitimate** — **nomenclatural senior synonym**: *Gonyaulacysta scarburghensis*, which has the same type. **NOW** *Trichodinium scarburghense*. Originally *Gonyaulax areolata* (name illegitimate; Appendix B), subsequently *Gonyaulacysta scarburghensis*, thirdly *Gonyaulacysta areolata* (combination illegitimate), fourthly *Acanthaulax areolata* (combination illegitimate), fifthly *Acanthaulax scarburghensis*, sixthly *Liesbergia scarburghensis*, seventhly (and now) *Trichodinium scarburghense*. Taxonomic junior synonym: *Acanthaulax senta*, according to Berger (1986, p.343). Age: late Callovian–early Oxfordian.

"*auctifica*" Brideaux, 1971, p.82–83, pl.23, figs.40–41; text-figs.9a–b. Holotype: Brideaux, 1971, pl.23, figs.40–41; text-figs.9a–b; Jan du Chêne et al., 1986a, pl.30, figs.7–8. **NOW** *Cribroperidinium*. Originally *Gonyaulacysta*, subsequently (and now) *Cribroperidinium*. Age: late Albian.

axicerastes Sarjeant, 1966b, p.114–116, pl.13, figs.11–12; text-fig.25. Holotype: Sarjeant, 1966b, pl.13, figs.11–12; Jan du Chêne et al., 1986a, pl.45, figs.6–12. Age: middle Barremian.

"*birkelundiae*" Fensome, 1979, p.38–40, pl.5, figs.5,8,11; text-figs.14A–C. Holotype: Fensome, 1979, pl.5, figs.5,8,11; text-figs.14A–B; Jan du Chêne et al., 1986a, pl.24, figs.1–3. **NOW** *Cribroperidinium*?. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Cribroperidinium*?. Age: Portlandian.

"*boreas*" Davey, 1974, p.52–53, pl.4, figs.1–4; pl.7, fig.5. Holotype: Davey, 1974, pl.4, figs.1–4; Jan du Chêne et al., 1986a, pl.21, figs.1–4. **NOW** *Cribroperidinium*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*?, thirdly (and now) *Cribroperidinium*. N.I.A. Age: late Barremian.

"*canadensis*" Pocock, 1972, p.89, pl.24, figs.1–2; text-fig.4. Holotype: Pocock, 1972, pl.24, fig.1; Jan du Chêne et al., 1986a, pl.97, figs.1–4. Originally *Gonyaulacysta*, subsequently *Hystrihogonyaulax*, thirdly *Rhynchodiniopsis*. **Taxonomic senior synonym**: *Gonyaulax* (as *Gonyaulacysta* now *Rhynchodiniopsis*) *cladophora*, according to Fisher and Riley (1980, p.320) and Kunz (1990, p.23). Age: Oxfordian–Kimmeridgian.

"*cassidata*" (Eisenack and Cookson, 1960, p.3, pl.1, figs.5–6) Sarjeant, 1966b, p.125–126. Emendations: Sarjeant, 1966b, p.125, as *Gonyaulacysta cassidata*; Helenes and Lucas-Clark, 1997, p.190, as *Wrevittia cassidata*. Holotype: Eisenack and Cookson, 1960, pl.1, fig.5; Jan du Chêne et al., 1986a, pl.40, figs.6–7. **NOW** *Wrevittia cassidata*. Originally *Gonyaulax helicoidea* subsp. *cassidata*, subsequently *Gonyaulax cassidata*, thirdly *Gonyaulacysta cassidata*, fourthly (and now) *Wrevittia cassidata*. Age: Aptian–Cenomanian.

"*cauda*" Gitmez and Sarjeant, 1972, p.193–194, pl.2, figs.1–2,4–5. Holotype: Gitmez and Sarjeant, 1972, pl.2, figs.1–2. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Rhynchodiniopsis*, fourthly *Cribroperidinium*?. **Taxonomic senior synonym**: *Gonyaulacysta* (as and now *Cribroperidinium*) *globata*, according to Poulsen (1996, p.72). N.I.A. Age: early–late Kimmeridgian.

centriconnata Riding, 1983, p.197–200,202, pl.1, pl.2, figs.1–8; text-figs.2–3. Holotype: Riding, 1983, pl.1, figs.1–3; Jan du Chêne et al., 1986a, pl.40, figs.10–11. Age: middle Callovian–early Oxfordian.

ceratophora (Cookson and Eisenack, 1960b, p.249, pl.37, fig.7) Riding, 2005b, p.14. Emendation: Riding, 2005a, p.14,16,18, as *Gonyaulacysta ceratophora*. Holotype: Cookson and Eisenack, 1960b, pl.37, fig.7; Jan du Chêne et al., 1986a, pl.112, fig.1; Helby et al., 1987, fig.18C; Riding, 2005a, text-figs.2A–B. Originally *Scriniodinium*, subsequently *Scriniodinium*?, thirdly (and now) *Gonyaulacysta*. Taxonomic junior synonym: *Psaligonyaulax australica*, according to Jan du Chêne et al. (1986a, p.266) — however, *Psaligonyaulax australica* is now considered a taxonomic junior synonym of *Psaligonyaulax* (as *Gonyaulacysta*) *dualis*. Age: Oxfordian–early Kimmeridgian.

?*circumfoveolata* Prössl, 1990, p.103, pl.10, figs.6–10 ex Prössl, 1992b, p.113–115. Holotype: Prössl, 1990, pl.10, figs.8–10. This name was not validly published in Prössl (1990, p.103), since that author did not specify the lodgment of the holotype. Questionable assignment: Prössl (1990, p.103). Age: late Aptian.

"*cladophora*" (Deflandre, 1939a, p.173–176, pl.7, figs.1–5; text-figs.5–6) Dodekova, 1967, p.17–18. Holotype: Deflandre, 1939a, pl.7, fig.1; Jan du Chêne et al., 1986a, pl.94, fig.6. **NOW** *Rhynchodiniopsis*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Hystrichogonyaulax*, fourthly (and now) *Rhynchodiniopsis*. Taxonomic junior synonyms: *Gonyaulacysta gottisii*, according to Jan du Chêne et al. (1986a, p.48) and Jan du Chêne and Fauconnier (1986, p.55); *Gonyaulacysta downiei* and *Gonyaulacysta* (as *Hystrichogonyaulax*) *canadensis*, both according to Fisher and Riley (1980, p.320) and Kunz (1990, p.23). This combination was not validly published in Sarjeant (1966b, p.130), since that author did not fully reference the basionym. Age: early Oxfordian.

"subsp. *cladophora*". Autonym. Holotype: Deflandre, 1939a, pl.7, fig.1; Jan du Chêne et al., 1986a, pl.94, fig.6. **NOW** *Rhynchodiniopsis cladophora* subsp. *cladophora*. Originally *Gonyaulax cladophora* subsp. *cladophora* (Appendix B), subsequently *Gonyaulacysta cladophora* subsp. *cladophora*, thirdly *Hystrichogonyaulax cladophora* subsp. *cladophora*, fourthly (and now) *Rhynchodiniopsis cladophora* subsp. *cladophora*. Taxonomic junior synonyms: *Gonyaulax* (as *Rhynchidiniopsis*) *cladophora* subsp. *extensa*, *Gonyaulax* (as *Rhynchidiniopsis*) *cladophora* subsp. *hemipolyedrica* and *Gonyaulax* (as *Rhynchidiniopsis*) *cladophora* subsp. *isovalvata*, all by implication in Brenner (1988, p.72), who listed these subspecies as taxonomic junior synonyms of the species *Rhynchodiniopsis cladophora* — however, Lentin and Williams (1993, p.566) retained all three subspecies.

"subsp. *extensa*" (Klement, 1960, p.36–37, pl.4, figs.1–4; text-fig.16) Lentin and Williams, 1973, p.60. Holotype: Klement, 1960, pl.4, figs.1–3; Jan du Chêne et al., 1986a, pl.95, figs.4–5. **NOW** *Rhynchodiniopsis cladophora* subsp. *extensa*. Originally *Gonyaulax cladophora* subsp. *extensa* (Appendix B), subsequently *Gonyaulacysta cladophora* subsp. *extensa*, thirdly *Hystrichogonyaulax cladophora* subsp. *extensa*, fourthly (and now) *Rhynchodiniopsis cladophora* subsp. *extensa*. Taxonomic senior synonym: *Gonyaulax* (as *Rhynchodiniopsis*) *cladophora* subsp. *cladophora*, by implication in Brenner (1988, p.72), who listed the subspecies as a taxonomic junior synonym of the species *Rhynchodiniopsis cladophora* — however, Lentin and Williams (1993, p.566) retained *Gonyaulacysta* (as *Rhynchodiniopsis*) *cladophora* subsp. *extensa*. Age: early Kimmeridgian.

"subsp. *hemipolyedrica*" (Klement, 1960, p.36, pl.3, figs.10–12; text-figs.14–15) Lentin and Williams, 1973, p.60. Holotype: Klement, 1960, pl.3, figs.10–11. **NOW** *Rhynchodiniopsis cladophora* subsp. *hemipolyedrica*. Originally *Gonyaulax cladophora* subsp. *hemipolyedrica* (Appendix B), subsequently *Gonyaulacysta cladophora* subsp. *hemipolyedrica*, thirdly *Hystrichogonyaulax cladophora* subsp. *hemipolyedrica*, fourthly (and now) *Rhynchodiniopsis cladophora* subsp. *hemipolyedrica*. Taxonomic senior synonym: *Gonyaulax* (as *Rhynchodiniopsis*) *cladophora* subsp. *cladophora*, by implication in Brenner (1988, p.72), who listed the subspecies as a taxonomic junior synonym of the species *Rhynchodiniopsis cladophora* — however, Lentin and Williams (1993, p.566) retained *Gonyaulacysta* (as *Rhynchodiniopsis*) *cladophora* subsp. *hemipolyedrica*. Age: early Kimmeridgian.

"subsp. *isovalvata*" (Klement, 1960, p.37–38, pl.4, figs.5–9; text-fig.17) Lentin and Williams, 1973, p.60. Holotype: Klement, 1960, pl.4, figs.5–6. **NOW** *Rhynchodiniopsis cladophora* subsp. *isovalvata*. Originally *Gonyaulax cladophora* subsp. *isovalvata* (Appendix B), subsequently *Gonyaulacysta cladophora* subsp. *isovalvata*, thirdly *Hystrichogonyaulax cladophora* subsp. *isovalvata*, fourthly (and now) *Rhynchodiniopsis cladophora* subsp. *isovalvata*. Taxonomic senior synonym: *Gonyaulax* (as *Rhynchodiniopsis*) *cladophora* subsp. *cladophora*, by implication in Brenner (1988, p.72), who listed this subspecies as a taxonomic junior synonym of the species *Rhynchodiniopsis cladophora* — however, Lentin and Williams (1993, p.566) retained *Gonyaulacysta* (as *Rhynchodiniopsis*) *cladophora* subsp. *isovalvata*. Age: early Kimmeridgian.

"*clathrata*" (Cookson and Eisenack, 1960b, p.246–247, pl.37, fig.5; text-fig.2) Dodekova, 1971, p.10. Holotype: Cookson and Eisenack, 1960b, pl.37, fig.5; text-fig.2; Jan du Chêne et al., 1986a, pl.71, figs.10–12. **NOW**

Leptodinium. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Leptodinium*, thirdly *Gonyaulacysta*. This combination was not validly published in Sarjeant (1966b, p.130), since that author did not fully reference the basionym. Age: ?Tithonian.

"*compta*" Duxbury, 1980, p.122–123, pl.2, figs.1–2,4. Holotype: Duxbury, 1980, pl.2, figs.1–2,4; Jan du Chêne et al., 1986a, pl.10, figs.9–10. Originally *Gonyaulacysta*, subsequently *Cribroperidinium*, thirdly *Acanthaulax*, fourthly *Apteodinium*. **Taxonomic senior synonym:** *Millioudodinium* (now *Cribroperidinium*) *spinoreticulatum*, according to Lucas-Clark (1987, p.178). Age: middle-late Barremian.

"*confossa*" Duxbury, 1977, p.33, pl.2, figs.2–4. Holotype: Duxbury, 1977, pl.2, figs.3–4; Jan du Chêne et al., 1986a, pl.19, fig.5. **NOW** *Cribroperidinium?*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Cribroperidinium?*, fourthly (and now) *Cribroperidinium*. Age: late Hauterivian.

"*confusa*" (Vozzhennikova, 1967, p.80, pl.17, figs.1a–b; pl.25, figs.4–5; pl.27, figs.3–4) Sarjeant, 1969, p.9. Holotype: Vozzhennikova, 1967, pl.25, fig.5, lost according to Lentin and Vozzhennikova (1990, p.93). **NOW** *Apteodinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium?*, fourthly *Rhynchodiniopsis?*, fifthly (and now) *Apteodinium*. Age: Late Jurassic.

"?*cornigera*" (Valensi, 1953, p.27, pl.1, figs.4,8,10; pl.2, figs.1–2; pl.13, fig.5; text-fig.2a) Sarjeant, 1966b, p.131. Emendation: Jan du Chêne et al., 1985b, p.110, as *Ctenidodinium cornigerum*. Holotype: Valensi, 1953, pl.1, fig.8. **Combination not validly published:** basionym not fully referenced. **NOW** *Ctenidodinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta?* (combination not validly published), thirdly *Hystrichogonyaulax*, fourthly (and now) *Ctenidodinium*. Questionable assignment: Sarjeant (1966b, p.131). Age: Bathonian.

"*cornuta*" (Cookson and Eisenack, 1962b, p.490, pl.3, figs.1–6) Yun Hyesu, 1981, p.10. Holotype: Cookson and Eisenack, 1962b, pl.3, figs.1–3; Jan du Chêne et al., 1986a, pl.90, fig.1. **NOW** *Pterodinium?*. Originally *Pterodinium*, subsequently (and now) *Pterodinium?*, thirdly *Gonyaulacysta*. Age: Albian–?Aptian.

?*crassicornuta* (Klement, 1960, p.38–39, pl.5, figs.1–3) Sarjeant, 1969, p.9. Emendation: Sarjeant, 1984a, p.158–160, as *Rhynchodiniopsis crassicornuta*. Holotype: Klement, 1960, pl.5, fig.1; Sarjeant, 1984a, pl.2, figs.1–2; text-fig.2; Jan du Chêne et al., 1986a, pl.45, figs.1–4. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta?*, thirdly (and now) *Gonyaulacysta?*, fourthly *Rhynchodiniopsis*. Questionable assignment: Stover and Evitt (1978, p.158). This combination was not validly published in Sarjeant (1966b, p.130), since that author did not fully reference the basionym. Age: early Kimmeridgian.

"*crassinerva*" Deflandre, 1939b, p.144, pl.6, fig.5 ex Sarjeant, 1967b, p.248–249. Emendation: Nøhr-Hansen, 1986, p.33, as *Cribroperidinium crassinervum*. Holotype: Deflandre, 1939b, pl.6, fig.5; Jan du Chêne et al., 1986a, pl.70, figs.1–4. **NOW** *Cribroperidinium*. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta*, thirdly *Leptodinium*, fourthly *Leptodinium?*, fifthly (and now) *Cribroperidinium*. The name *Palaeoperidinium crassinervum* was not validly published in Deflandre (1939b) since the generic name *Palaeoperidinium* was not validly published until 1967. Williams et al. (1998, p.246) accepted Sarjeant's (1967b) indirect reference to Deflandre (1939b) as indication of a type (I.C.N. Article 40.3). Age: Kimmeridgian.

"*cretacea*" (Neale and Sarjeant, 1962, p.441–443, pl.19, figs.1–2; text-figs.2a–b) Sarjeant, 1969, p.9. Holotype: Neale and Sarjeant, 1962, pl.19, figs.1–2; text-figs.2a–b. **NOW** *Stanfordella?*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Stanfordella?*. This combination was not validly published in Sarjeant (1966b, p.130), since that author did not fully reference the basionym. Age: Hauterivian.

"*crispa*" (Wetzel, 1967a, p.870, pl.15, figs.4a–b) Sarjeant, 1969, p.9. Emendations: Sarjeant, 1980b, p.119–120, as *Hystrichogonyaulax crispa*; Fenton, 1981, p.255,257, as *Cribroperidinium crispum*. Holotype: Wetzel, 1967a, pl.15, figs.4a–b; Dietz et al., 1999, text-fig.5a. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly *Hystrichogonyaulax*, fifthly (and now) *Cribroperidinium*, sixthly *Acanthaulax*. Age: Middle Jurassic.

"*cristata*" Riley in Fisher and Riley, 1980, p.320, pl.1, figs.8,12. Holotype: Fisher and Riley, 1980, pl.1, figs.8,12; Jan du Chêne et al., 1986a, pl.67, fig.20. **NOW** *Leptodinium volgense*. Originally *Gonyaulacysta cristata*,

subsequently *Leptodinium cristatum* (combination illegitimate), thirdly (and now) *Leptodinium volgense*, fourthly *Millioudodinium cristatum*, fifthly *Cribroperidinium cristatum* (combination not validly published). Age: Volgian.

"*cypraea*" (Ioannides et al., 1977, p.460, pl.4, figs.5–8; text-fig.12) Sarjeant, 1982b, p.28. Holotype: Ioannides et al., 1977, pl.4, fig.5; text-fig.12; Jan du Chêne et al., 1986a, pl.85, figs.1–2; pl.86, figs.9–11. **NOW** *Psaligonyaulax*?. Originally *Psaligonyaulax*, subsequently (and now) *Psaligonyaulax*?, thirdly *Gonyaulacysta*?. Questionable assignment: Sarjeant (1982b, p.28). Age: Kimmeridgian.

"*dangeardii*" Sarjeant, 1968, p.226–227, pl.1, fig.21; pl.3, figs.8,15; text-fig.3. Emendation: Sarjeant, 1982b, p.42–43, as *Tubotuberella dangeardii*. Holotype: Sarjeant, 1968, pl.3, fig.8; text-fig.3; Sarjeant, 1982b, text-figs.5c–d; Jan du Chêne et al., 1986a, pl.127, figs.4–7; Fensome et al., 1993a, figs.1,3–4 — p.1089; figs.1,4–5 — p.1093. **NOW** *Tubotuberella*. Originally *Gonyaulacysta*, subsequently *Dimidiadinium*, thirdly (and now) *Tubotuberella*. Age: Oxfordian.

"*deflandrei*" Riley in Fisher and Riley, 1980, p.320–321, pl.1, figs.1–2. Holotype: Fisher and Riley, 1980, pl.1, figs.1–2; Jan du Chêne et al., 1986a, pl.75, fig.7. **NOW** *Leptodinium*. Originally *Gonyaulacysta*, subsequently (and now) *Leptodinium*, thirdly *Millioudodinium*. Junior homonym: *Gonyaulacysta deflandrei* (Sarjeant, 1966b) Below, 1981a. This name was not validly published in Fisher and Riley (1976, p.52) since no description or illustration was provided. Age: Volgian.

"*deflandrei*" (Sarjeant, 1966b, p.137–138, pl.14, figs.7–8; text-fig.35) Below, 1981a, p.53. Emendation: Sarjeant, 1982b, p.45–46, as *Psaligonyaulax deflandrei*. Holotype: Sarjeant, 1966b, pl.14, figs.7–8; text-fig.35; Jan du Chêne et al., 1986a, pl.85, figs.3–4; pl.86, figs.1–3. **Combination illegitimate** — **senior homonym:** *Gonyaulacysta deflandrei* Riley in Fisher and Riley, 1980. **NOW** *Psaligonyaulax*. Originally (and now) *Psaligonyaulax*, subsequently *Gonyaulacysta* (combination illegitimate). Taxonomic junior synonym: *Gonyaulacysta extensa*, according to Clarke et al. (1968, p.181). Age: Cenomanian.

"*delicata*" Davey, 1969a, p.123–124, pl.1, figs.7–8; text-figs.10A–B. Holotype: Davey, 1969a, pl.1, fig.7; text-figs.10A–B; Jan du Chêne et al., 1986a, pl.75, figs.1–3. **NOW** *Leptodinium*?. Originally *Gonyaulacysta*, subsequently *Leptodinium*, thirdly (and now) *Leptodinium*?. Age: Cenomanian.

"*dentata*" (Raynaud, 1978, p.395, pl.2, fig.13) Lentin and Vozzhennikova, 1990, p.116. Emendation: Riding, 2012, p.70,72, as *Gonyaulacysta dentata*. Holotype: Raynaud, 1978, pl.2, fig.13; Jan du Chêne et al., 1986a, pl.126, figs.1–3, lost according to Riding and Michoux (2013, p.51). Neotype: Fensome et al., 1996, pl.1, fig.20; Riding, 2012, pl.2, figs.1–2; Riding and Michoux, 2013, pl.1, figs.1–3; designated by Riding and Michoux (2013, p.51–52). Originally *Tubotuberella*, subsequently (and now) *Gonyaulacysta*. Age: middle-late Callovian.

"*diamanta*" (Churchill and Sarjeant, 1962, p.34–36, pl.1, fig.19; text-fig.3) Lentin and Williams, 1976, p.76. Holotype: Churchill and Sarjeant, 1962, pl.1, fig.19; text-fig.3. Originally *Peridinium*? (Appendix B), subsequently *Phthanoperidinium*?, thirdly (and now) *Gonyaulacysta*. Age: Holocene.

"*diaphana*" (Cookson and Eisenack, 1958, p.36, pl.3, figs.13–14; text-figs.10–11) Sarjeant, 1969, p.9. Holotype: Cookson and Eisenack, 1958, pl.3, figs.13–14; text-figs.10–11; Jan du Chêne et al., 1986a, pl.32, fig.6. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Cribroperidinium*. **Taxonomic senior synonym:** *Gonyaulax* (now *Cribroperidinium*) *muderongense*, according to Backhouse (1988, p.80). This combination was not validly published in Sarjeant (1966b, p.130), since that author did not fully reference the basionym. Age: Aptian.

"*dictyophora*" Deflandre, 1939a, p.178, pl.8, figs.1–3 ex Sarjeant, 1967b, p.249–250. Holotype: Deflandre, 1939a, pl.8, fig.1; Jan du Chêne et al., 1986a, pl.7, figs.1–5. **NOW** *Scriniodinium*?. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta*, thirdly *Aldorfia*, fourthly *Scriniodinium*, fifthly (and now) *Scriniodinium*?. The name *Palaeoperidinium dictyophorum* was not validly published in Deflandre (1939a) since the generic name *Palaeoperidinium* was not validly published until 1967. In validating this name, Sarjeant (1967b, p.249–250) provided an "emended diagnosis". Age: Oxfordian.

"*diutina*" Duxbury, 1977, p.34–35, pl.1, figs.3–4; text-fig.9. Holotype: Duxbury, 1977, pl.1, fig.3; text-fig.9; Jan du Chêne et al., 1986a, pl.41, figs.3–4. **NOW** *Wrevittia*?. Originally *Gonyaulacysta*, subsequently *Millioudodinium*?, thirdly (and now) *Wrevittia*?. Taxonomic senior synonym: *Gonyaulax* (as *Gonyaulacysta*, now *Wrevittia*) *helicoidea*, according to Stover and Helby (1987d, p.287) — however, Jan du Chêne et al. (1986a, p.130) and Lentin and Williams (1989, p.152) retained *Gonyaulacysta* (now *Wrevittia*?) *diutina*. Age: Berriasian–Hauterivian.

"subsp. *diutina*". Autonym. Holotype: Duxbury, 1977, pl.1, fig.3; text-fig.9; Jan du Chêne et al., 1986a, pl.41, figs.3–4. **NOW** *Wrevittia*? *diutina* subsp. *diutina*. Originally *Gonyaulacysta diutina* subsp. *diutina*, subsequently (and now) *Wrevittia*? *diutina* subsp. *diutina*.

"subsp. *tabulacornuta*" Prössl, 1990, p.102–103, pl.8, figs.1–2,4–5 ex Prössl, 1992b, p.113,115. Holotype: Prössl, 1990, pl.8, figs.1–2,4–5. **NOW** *Wrevittia*? *diutina* subsp. *tabulacornuta*. Originally *Gonyaulacysta diutina* subsp. *tabulacornuta*, subsequently (and now) *Wrevittia*? *diutina* subsp. *tabulacornuta*. This name was not validly published in Prössl (1990, p.102–103), since that author did not specify the lodgment of the holotype. Age: early Barremian.

"*downiei*" Pocock, 1972, p.87, pl.22, figs.1–2; text-fig.2. Holotype: Pocock, 1972, pl.22, figs.1–2; Jan du Chêne et al., 1986a, pl.97, figs.7–12. Originally *Gonyaulacysta*, subsequently *Hystrichosphaeropsis*, thirdly *Rhynchodiniopsis*?, fourthly *Rhynchodiniopsis*. **Taxonomic senior synonym:** *Gonyaulax* (as *Hystrichogonyaulax* now *Rhynchodiniopsis*) *cladophora*, according to Fisher and Riley (1980, p.320) and Kunz (1990, p.23). Age: Oxfordian–Kimmeridgian.

dualis (Brideaux and Fisher, 1976, p.18–20, pl.1, figs.4–6,8–12; pl.2, figs.1–2) Stover and Evitt, 1978, p.158. Holotype: Brideaux and Fisher, 1976, pl.1, figs.4–5; Jan du Chêne et al., 1986a, pl.37, figs.11–12. Originally *Psaligonyaulax*, subsequently (and now) *Gonyaulacysta*. Taxonomic senior synonym: *Gonyaulax* (as *Gonyaulacysta*) *jurassica*, according to Sarjeant (1982b, p.29) — however, Jan du Chêne et al. (1986a, p.131) retained *Gonyaulacysta dualis*. Taxonomic junior synonym: *Psaligonyaulax australica*, according to Brenner (1988, p.54). Age: late Oxfordian–late Kimmeridgian.

"*edwardsii*" (Cookson and Eisenack, 1958, p.32, pl.3, figs.5–6; text-fig.7) Clarke and Verdier, 1967, p.31. Holotype: Cookson and Eisenack, 1958, pl.3, fig.6; text-fig.7; Jan du Chêne et al., 1986a, pl.32, fig.4; pl.33, fig.3. **NOW** *Cribroperidinium*?. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Cribroperidinium*, fourthly (and now) *Cribroperidinium*?. Taxonomic junior synonyms: *Gonyaulax* (as *Cribroperidinium*) *apione*, according to Burger (1980a, p.82) — however, Jan du Chêne et al. (1986a, p.76) retained *Cribroperidinium apione*; *Gonyaulax* (as *Cribroperidinium*) *orthoceras*, according to Davey and Verdier (1971, p.17) — however, Below (1981a, p.39–40) and Lentin and Williams (1985, p.79) retained *Cribroperidinium orthoceras*. This combination was not validly published in Sarjeant (1966b, p.130), since that author did not fully reference the basionym. Age: Albian–early Turonian.

"*ehrenbergii*" Gitmez, 1970, p.252–254, pl.2, figs.8–9; text-fig.8. Holotype: Gitmez, 1970, pl.2, figs.8–9; text-fig.8. **NOW** *Cribroperidinium*?. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Cribroperidinium*?. Age: early Kimmeridgian.

eisenackii (Deflandre, 1939a, p.171, pl.6, figs.7–10; text-figs.3–4) Górka, 1965, p.299. Emendation: Sarjeant, 1982b, p.32–33, as *Gonyaulacysta eisenackii*. Holotype: Deflandre, 1939a, pl.6, figs.7–8; text-figs.3–4; Jan du Chêne et al., 1986a, pl.125, figs.5–9. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Gonyaulacysta*, thirdly *Endoscrinium*, fourthly *Tubotuberella*. Lentin and Williams (1989, p.152) retained this species in *Gonyaulacysta*. Taxonomic junior synonym: *Tubotuberella sphaerocephala*, according to Sarjeant (1982b, p.32). Dodekova (1967, p.18) and Sarjeant (1968, p.227) also proposed this combination. This combination was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: Oxfordian.

"subsp. *eisenackii*". Autonym. Holotype: Deflandre, 1939a, pl.6, figs.7–8; text-figs.3–4; Jan du Chêne et al., 1986a, pl.125, figs.5–9. **Now redundant.** Originally *Gonyaulax eisenackii* subsp. *eisenackii* (Appendix B), subsequently *Endoscrinium eisenackii* subsp. *eisenackii*, thirdly *Gonyaulacysta eisenackii*

subsp. *eisenackii*, fourthly *Tubotuberella eisenackii* subsp. *eisenackii*. Taxonomic junior synonym: *Gonyaulax* (as *Gonyaulacysta*) *eisenackii* subsp. *oligodentata*, according to Sarjeant (1982b, p.32).

"subsp. ***oligodentata***" (Cookson and Eisenack, 1958, p.30, pl.2, fig.11) Sarjeant, 1972, p.17. Holotype: Cookson and Eisenack, 1958, pl.2, fig.11; Jan du Chêne et al., 1986a, pl.125, figs.10–11. Originally *Gonyaulax eisenackii* subsp. *oligodentata* (Appendix B), subsequently *Gonyaulacysta eisenackii* subsp. *oligodentata*, thirdly *Endoscrinium eisenackii* subsp. *oligodentatum*, fourthly *Tubotuberella eisenackii* subsp. *oligodentata*. **Taxonomic senior synonym:** *Gonyaulax* (as *Gonyaulacysta*) *eisenackii* subsp. *eisenackii*, according to Sarjeant (1982b, p.32). Age: Late Jurassic.

?*elamii* Horowitz, 1975, p.25–26, pl.1, fig.9. Holotype: Horowitz, 1975, pl.1, fig.9. Originally *Gonyaulacysta*, subsequently (and now) *Gonyaulacysta*?. Questionable assignment: Stover and Evitt (1978, p.158) as a problematic species. Age: Late Triassic (probably not in place).

"***episoma***" Sarjeant, 1966b, p.118–119, pl.13, figs.9–10; text-fig.27. Holotype: Sarjeant, 1966b, pl.13, figs.9–10; text-fig.27; Jan du Chêne et al., 1986a, pl.67, figs.15–16. **NOW** *Leptodinium*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Rhynchodiniopsis*, fourthly (and now) *Leptodinium*. Age: late Barremian.

"***eumorpha***" (Cookson and Eisenack, 1960b, p.246, pl.37, figs.1–3; text-fig.3) Sarjeant, 1966b, p.131. Holotype: Cookson and Eisenack, 1960b, pl.37, fig.1; Jan du Chêne et al., 1986a, pl.75, fig.4. **Combination not validly published:** basionym not fully referenced. **NOW** *Leptodinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly (and now) *Leptodinium*. Age: Late Jurassic.

"***evittii***" Dodekova, 1969, p.14–15, pl.1, figs.1–6; pl.2, figs.1–12; text-figs.Aa–b. Emendation: Jan du Chêne et al., 1986b, p.26–27, as *Tehamadinium evittii*. Holotype: Dodekova, 1969, pl.1, figs.1–2; Jan du Chêne et al., 1986a, pl.117, figs.1–2; Jan du Chêne et al., 1986b, pl.20, figs.1–4. **NOW** *Tehamadinium*. Originally *Gonyaulacysta*, subsequently *Occisucysta*, thirdly (and now) *Tehamadinium*. Taxonomic junior synonym: *Diacanthum hollisteri*, according to Below (1982a, p.32–33) — however, Jan du Chêne et al. (1986b, p.122) and Habib and Drugg (1987, p.762–763) retained *Diacanthum hollisteri*. Age: Tithonian.

"***exilicristata***" Davey, 1969a, p.121, pl.1, figs.1–2; text-figs.9A–B. Holotype: Davey, 1969a, pl.1, fig.1; text-figs.9A–B; Jan du Chêne et al., 1986a, pl.26, figs.1–4. **NOW** *Cribroperidinium*. Originally *Gonyaulacysta*, subsequently (and now) *Cribroperidinium*. Age: Cenomanian.

"***exsanguia***" Duxbury, 1977, p.35–36, pl.1, figs.6–7; text-fig.10. Emendation: Harding, 1990b, p.31–32, as *Gonyaulacysta exsanguia*. Holotype: Duxbury, 1977, pl.1, fig.6; text-fig.10b; Jan du Chêne et al., 1986a, pl.40, figs.1–3. **NOW** *Stanfordella*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*?, thirdly (and now) *Stanfordella*. Age: Hauterivian–Barremian.

"***extensa***" Clarke and Verdier, 1967, p.30, pl.4, figs.7–9; text-fig.11. Holotype: Clarke and Verdier, 1967, pl.4, figs.8–9. **Taxonomic senior synonym:** *Psaligonyaulax deflandrei*, according to Clarke et al. (1968, p.181). Age: Cenomanian.

"***fallax***" Morgenroth, 1968, p.535–536, pl.41, figs.4–6. Holotype: Morgenroth, 1968, pl.41, figs.4–5. **NOW** *Apteodinium*. Originally *Gonyaulacysta*, subsequently (and now) *Apteodinium*. Age: Danian.

"***fastigiata***" Duxbury, 1977, p.36–37, pl.1, figs.8–9,12; text-fig.11. Emendation: Helenes and Lucas-Clark, 1997, p.184, as *Stanfordella fastigiata*. Holotype: Duxbury, 1977, pl.1, figs.8,12; text-fig.11; Jan du Chêne et al., 1986a, pl.43, figs.1–6. **NOW** *Stanfordella*. Originally *Gonyaulacysta*, subsequently (and now) *Stanfordella*. Questionable assignment: Sarjeant (1982b, p.28) — however, Jan du Chêne et al. (1986a, p.131) included the species in *Gonyaulacysta* without question. Age: early Hauterivian–early Barremian.

fenestrata Riding and Helby, 2001f, p.150–153, figs.5A–I,6A–B. Holotype: Riding and Helby, 2001f, fig.5D. See also the discussion under *Gonyaulacysta oligodentata* (name not validly published). Age: Kimmeridgian–Tithonian.

"*fetchamensis*" Sarjeant, 1966b, p.128,130, pl.15, figs.1–2; text-fig.33. Holotype: Sarjeant, 1966b, pl.15, figs.1–2; text-fig.33; Helenes, 1984, text-figs.4A–B; Jan du Chêne et al., 1986a, pl.20, figs.1–4; Fensome et al., 1993a, figs.1–2 — p.1189. **NOW** *Cribroperidinium*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Cribroperidinium*. Age: early Cenomanian.

"*filapicata*" Gocht, 1970b, p.134–135, pl.26, figs.4,6–9; pl.27, figs.1–3,7; pl.28, fig.3; pl.31, figs.1–5; text-figs.2a,3–4. Emendation: Riding and Bailey, 1991, p.100–101, as *Durotrigia filapicata*. Holotype: Gocht, 1970b, pl.31, fig.1. **NOW** *Durotrigia*. Originally *Gonyaulacysta*, subsequently *Diacanthum*, thirdly *Dichadogonyaulax?*, fourthly *Diacanthum?*, fifthly (and now) *Durotrigia*. Age: early Bathonian.

"*filosa*" Wilson in Schiøler et al., 1997, p.81. **Name not validly published**: no description. **Taxonomic senior synonym**: *Apteodinium wilsonii* (now *Cribroperidinium graemei*), according to Schiøler et al. (1997, p.81).

"*fimbriata*" Duxbury, 1980, p.123, pl.1, figs.1–3. Holotype: Duxbury, 1980, pl.1, figs.1–2; Jan du Chêne et al., 1986a, pl.98, figs.1–2. **NOW** *Rhynchodiniopsis*. Originally *Gonyaulacysta*, subsequently (and now) *Rhynchodiniopsis*. Taxonomic senior synonym: *Rhynchodiniopsis aptiana*, according to Below (1981a, p.118) — however, Sarjeant (1982b, p.36) and Jan du Chêne et al. (1986a, p.287) retained *Gonyaulacysta* (as *Rhynchodiniopsis*) *fimbriata*. Age: middle Barremian.

"*forulata*" Yu Jingxian, 1982, p.241, pl.2, figs.3–4,6–8. Holotype: Yu Jingxian, 1982, pl.2, fig.8. **NOW** *Cribroperidinium?*. Originally *Gonyaulacysta*, subsequently (and now) *Cribroperidinium?*. Age: Late Jurassic–Early Cretaceous.

"*fragosa*" Brideaux, 1971, p.83, pl.23, fig.42; pl.24, figs.44–45; text-figs.8c–d. Holotype: Brideaux, 1971, pl.24, figs.44–45; text-figs.8c–d. **Taxonomic senior synonym**: *Scriniodinium* (as *Endoscrinium*) *campanula*, according to Harker and Sarjeant (1975, p.224) and Brideaux and McIntyre (1975, p.33). Age: middle-late Albian.

"?*freakei*" (Sarjeant, 1963c, p.85–86, pl.1, figs.1–3) Sarjeant, 1966b, p.131. Holotype: Sarjeant, 1963c, pl.1, figs.1–3; Jan du Chêne et al., 1986a, pl.67, figs.13–14. **Combination not validly published**: basionym not fully referenced. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly *Leptodinium*. **Taxonomic senior synonym**: *Leptodinium subtile*, according to Brenner (1988, p.60). Questionable assignment: Sarjeant (1966b, p.131). Age: early Oxfordian.

?*giga* Horowitz, 1970, p.178, pl.4, fig.20. Holotype: Horowitz, 1970, pl.4, fig.20. Originally *Gonyaulacysta*, subsequently *Gonyaulacysta?*. Questionable assignment: Stover and Evitt (1978, p.158) as a problematic species. N.I.A. Age: Late Jurassic–Early Cretaceous.

"*gigas*" Raynaud, 1978, p.392–393, pl.2, fig.16. Holotype: Raynaud, 1978, pl.2, fig.16; Jan du Chêne et al., 1986a, pl.30, fig.6. **NOW** *Cribroperidinium?*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Cribroperidinium?*. N.I.A. Age: late Kimmeridgian–Portlandian.

"*giuseppei*" (Morgenroth, 1966a, p.5, pl.2, figs.3–6) Sarjeant, 1969, p.9. Holotype: Morgenroth, 1966a, pl.2, figs.3–4. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium?*, fourthly *Rhynchodiniopsis?*, fifthly (and now) *Cribroperidinium*. Age: early Eocene.

"subsp. *giuseppei*". Autonym. Holotype: Morgenroth, 1966a, pl.2, figs.3–4. **Now redundant**. Originally *Gonyaulax giuseppei* subsp. *giuseppei* (Appendix B), subsequently *Gonyaulacysta giuseppei* subsp. *giuseppei*, thirdly *Millioudodinium? giuseppei* subsp. *giuseppei*, fourthly *Rhynchodiniopsis? giuseppei* subsp. *giuseppei*, fifthly *Cribroperidinium giuseppei* subsp. *giuseppei*. Taxonomic junior synonym: *Gonyaulax* (as *Cribroperidinium*) *giuseppei* subsp. *majus*, according to Helenes (1984, p.121) and Lentin and Williams (1989, p.81). Age: early Eocene.

"subsp. *major*" (Morgenroth, 1966a, p.6, pl.2, figs.5–6) Lentin and Williams, 1973, p.61. Holotype: Morgenroth, 1966a, pl.2, figs.5–6. Originally *Gonyaulax giuseppei* subsp. *major* (Appendix B), subsequently *Gonyaulacysta giuseppei* subsp. *major*, thirdly *Millioudodinium? giuseppei* subsp. *majus*, fourthly *Rhynchodiniopsis? giuseppei* subsp. *major*, fifthly *Cribroperidinium giuseppei* subsp. *majus*.

Taxonomic senior synonym: *Gonyaulax* (as *Cribroperidinium*) *giuseppeii* subsp. *giuseppeii*, according to Helenes (1984, p.121) and Lentin and Williams (1989, p.81). Age: early Eocene.

"*globata*" Gitmez and Sarjeant, 1972, p.195,197, pl.3, figs.1–2; text-figs.5A–B. Holotype: Gitmez and Sarjeant, 1972, pl.3, fig.1; text-fig.5A; Jan du Chêne et al., 1986a, pl.29, fig.3. **NOW** *Cribroperidinium*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Rhynchodiniopsis*, fourthly *Cribroperidinium?*, fifthly (and now) *Cribroperidinium*. Taxonomic junior synonyms: *Gonyaulacysta cauda* and *Gonyaulacysta systremmata*, both according to Poulsen (1996, p.72). Age: middle-late Kimmeridgian.

"*globosa*" Brideaux, 1971, p.81, pl.23, figs.37–38; text-figs.7g–h. Holotype: Brideaux, 1971, pl.23, figs.37–38; text-fig.7g; Jan du Chêne et al., 1986a, pl.28, figs.10–11. **NOW** *Cribroperidinium?*. Originally *Gonyaulacysta*, subsequently *Millioudodinium?*, thirdly (and now) *Cribroperidinium?*. Age: middle-late Albanian.

"*gongylos*" Sarjeant, 1966b, p.111–113, pl.13, figs.1–2; text-fig.23. Holotype: Sarjeant, 1966b, pl.13, figs.1–2; text-fig.23; Jan du Chêne et al., 1986a, pl.93, figs.10–13. **NOW** *Rhynchodiniopsis*. Originally *Gonyaulacysta*, subsequently *Leptodinium?*, thirdly (and now) *Rhynchodiniopsis*. N.I.A. Age: early Oxfordian.

"*gottisii*" Dupin, 1968, p.4, pl.1, figs.7–12. Holotype: Dupin, 1968, pl.1, fig.7; Jan du Chêne et al., 1986a, pl.12, fig.11; pl.94, figs.9–10. Originally *Gonyaulacysta*, subsequently *Millioudodinium?*, thirdly *Apteodinium*.

Taxonomic senior synonym: *Gonyaulax* (now *Rhynchodiniopsis*) *cladophora*, according to Jan du Chêne et al. (1986a, p.48) and Jan du Chêne and Fauconnier (1986, p.55). Age: Late Jurassic.

"*granulata*" (Klement, 1960, p.39–41, pl.4, figs.10–13; text-figs.18–20) Sarjeant, 1969, p.9. Emendation: Sarjeant, 1984a, p.161–162, as *Meristaulax granulata*. Holotype: Klement, 1960, pl.4, figs.10–11; text-figs.18–20; Fensome et al., 1995, figs.1–2 — p.1525; disintegrated according to Sarjeant (1984a, p.162). Lectotype (designated by Sarjeant, 1984a, p.162): Sarjeant, 1984a, pl.3, figs.3–4; text-fig.3; Jan du Chêne et al., 1986a, pl.27, figs.7–10; Brenner, 1988, pl.3, figs.2a–b; Fensome et al., 1995, figs.5–6 — p.1525 — however, Brenner (1988, p.35) argued that this specimen is not conspecific with the holotype. Lectotype (designated by Brenner, 1988, p.35): Brenner, 1988, pl.1, figs.3a–c; Fensome et al., 1995, figs.7–9 — p.1525. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Cribroperidinium*, fourthly *Rhynchodiniopsis*, fifthly *Meristaulax* Sarjeant, sixthly *Acanthaulax*. Poulsen (1996, p.73) retained this species in *Cribroperidinium*. Taxonomic junior synonyms: *Gonyaulax* (as *Cribroperidinium*) *venusta*, according to Schrank (2005, p.56); *Gonyaulax* (now *Cribroperidinium*) *granuligera*, according to Fisher and Riley (1980, p.321) — however, Sarjeant (1984a, p.156–158) retained *Gonyaulax* (as *Cryptarchaeodinium*) *granuligera*; *Gonyaulacysta* (as *Acanthaulax?*, now *Cribroperidinium*) *angulosa*, according to Fisher and Riley (1980, p.321) — however, Sarjeant and Gocht in Sarjeant (1984a, p.160) retained *Gonyaulacysta* (as *Meristaulax*) *angulosa*. For further discussion, see *Cribroperidinium granulatum*. Age: middle Oxfordian–early Kimmeridgian.

"*granuligera*" (Klement, 1960, p.41–42, pl.5, figs.4–5) Sarjeant, 1969, p.10. Emendation: Sarjeant, 1984a, p.156, as *Cryptarchaeodinium granuligerum*. Holotype: Klement, 1960, pl.5, figs.4–5; Sarjeant, 1984a, pl.1, figs.3–4; text-fig.1; Jan du Chêne et al., 1986a, pl.27, figs.11–14. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Cribroperidinium*, fourthly *Rhynchodiniopsis*, fifthly *Cryptarchaeodinium*, sixthly *Acanthaulax*. Taxonomic senior synonym: *Gonyaulax* (as *Gonyaulacysta*) *granulata*, according to Fisher and Riley (1980, p.321) — however, Sarjeant (1984a, p.156) retained *Gonyaulacysta* (as *Cribroperidinium*) *granuligera*. This combination was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: middle Oxfordian–early Kimmeridgian.

"*hadra*" Sarjeant, 1966b, p.119–121, pl.14, fig.1; text-fig.28. Holotype: Sarjeant, 1966b, pl.14, fig.1. **NOW** *Leptodinium?*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Rhynchodiniopsis*, fourthly (and now) *Leptodinium?*. Age: late Barremian.

"*helicoidea*" (Eisenack and Cookson, 1960, p.2–3, pl.1, figs.4–6,9 [figs.5–6 are now *Gonyaulacysta cassidata*]) Sarjeant, 1966b, p.116–117. Emendations: Sarjeant, 1966b, p.116, as *Gonyaulacysta helicoidea*; Helenes and Lucas-Clark, 1997, p.187–188, as *Wrevittia helicoidea*. Holotype: Eisenack and Cookson, 1960, pl.1, fig.4; Jan du Chêne et al., 1986a, pl.40, figs.4–5. **NOW** *Wrevittia*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Wrevittia*. Taxonomic junior synonym: *Gonyaulacysta* (now *Wrevittia*) *diutina*,

according to Stover and Helby (1987d, p.287) — however, Jan du Chêne et al. (1986a, p.131) and Lentin and Williams (1989, p.152) retained *Gonyaulacysta* (now *Wrevittia?*) *diutina*. Age: Neocomian–Aptian.

"subsp. *helicoidea*". Autonym. Holotype: Eisenack and Cookson, 1960, pl.1, fig.4; Jan du Chêne et al., 1986a, pl.40, figs.4–5. **Now redundant.**

"var. *helicoidea*". Autonym. Holotype: Eisenack and Cookson, 1960, pl.1, fig.4; Jan du Chêne et al., 1986a, pl.40, figs.4–5. **Now redundant.** Originally *Gonyaulax helicoidea* var. *helicoidea* (Appendix B), subsequently *Gonyaulacysta helicoidea* var. *helicoidea*.

"subsp. *tuberculata*" (Vozzhennikova, 1967, p.83, pl.41, figs.3a–b) Lentin and Williams, 1973, p.62. Emendation: Lentin and Vozzhennikova, 1990, p.100, as *Gonyaulacysta? tuberculata*. Holotype: Vozzhennikova, 1967, pl.41, figs.3a–b; Lentin and Vozzhennikova, 1990, text-fig.56; lost according to Lentin and Vozzhennikova (1990, p.99). Neotype: Lentin and Vozzhennikova, 1990, pl.14, figs.7–8, designated by Lentin and Vozzhennikova (1990, p.99). **NOW** *Gonyaulacysta? tuberculata*. Originally *Gonyaulax helicoidea* var. *tuberculata* (Appendix B), subsequently *Gonyaulacysta helicoidea* var. *tuberculata*, thirdly *Gonyaulacysta helicoidea* subsp. *tuberculata*, fourthly (and now) *Gonyaulacysta? tuberculata*. Age: Tithonian.

"var. *tuberculata*" (Vozzhennikova, 1967, p.83, pl.41, figs.3a–b) Dodekova, 1971, p.10. Emendation: Lentin and Vozzhennikova, 1990, p.100, as *Gonyaulacysta? tuberculata*. Holotype: Vozzhennikova, 1967, pl.41, figs.3a–b; Lentin and Vozzhennikova, 1990, text-fig.56; lost according to Lentin and Vozzhennikova (1990, p.99). Neotype: Lentin and Vozzhennikova, 1990, pl.14, figs.7–8, designated by Lentin and Vozzhennikova (1990, p.99). **NOW** *Gonyaulacysta? tuberculata*. Originally *Gonyaulax helicoidea* var. *tuberculata* (Appendix B), subsequently *Gonyaulacysta helicoidea* var. *tuberculata*, thirdly *Gonyaulacysta helicoidea* subsp. *tuberculata*, fourthly (and now) *Gonyaulacysta? tuberculata*. Age: Tithonian.

"?*hyaloderma*" Deflandre, 1939b, p.144, pl.6, figs.3–4 ex Sarjeant, 1967b, p.252. Holotype: Deflandre, 1939b, pl.6, figs.3–4; Jan du Chêne et al., 1986a, pl.58, figs.1–5. **NOW** *Impagidinium?*. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta*, thirdly *Gonyaulacysta?*, fourthly *Rhynchodiniopsis?*, fifthly (and now) *Impagidinium?*. Questionable assignment: Stover and Evitt (1978, p.158) as a problematic species. The name *Palaeoperidinium hyalodermum* was not validly published in Deflandre (1939b) since the generic name *Palaeoperidinium* was not validly published until 1967. Williams et al. (1998, p.251) accepted Sarjeant's (1967b) indirect reference to Deflandre (1939b) as indication of a type (I.C.N. Article 40.3). Age: Kimmeridgian.

"*hyalodermopsis*" (Cookson and Eisenack, 1958, p.34, pl.3, figs.11–12; text-figs.5–6) Sarjeant, 1969, p.10. Holotype: Cookson and Eisenack, 1958, pl.3, figs.11–12; text-figs.5–6; Jan du Chêne et al., 1986a, pl.74, figs.9–10. **NOW** *Leptodinium?*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Leptodinium?*, fourthly *Rhynchodiniopsis*. This combination was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: Neocomian–Aptian.

"*incomposita*" Drugg, 1970b, p.810–811, figs.1E–O,2A. Holotype: Drugg, 1970b, figs.11–J; Eisenack and Kjellström, 1975a, page labelled "nach S.306d"; Jan du Chêne et al., 1986a, pl.17, figs.1–2; Fensome et al., 1995, figs.1–2 — p.1561. **NOW** *Corrudinium*. Originally *Gonyaulacysta*, subsequently *Leptodinium*, thirdly (and now) *Corrudinium*. Age: Oligocene.

"*indicosa*" Brideaux, 1971, p.83. Holotype: Singh, 1964, pl.18, figs.2–3, as *Palaeoperidinium granulatum*. **NOW** *Apteodinium? indicosum*. Originally *Palaeoperidinium granulatum* Singh (name not validly published), subsequently *Gonyaulacysta indicosa*, thirdly (and now) *Apteodinium? indicosum*. Substitute name for *Palaeoperidinium granulatum* Singh, 1964, p.135, pl.18, figs.2–3 (an invalid name); the name *Gonyaulacysta granulata* is preoccupied. The name *Palaeoperidinium granulatum* Singh 1964 was not validly published since the generic name *Palaeoperidinium* was not validly published until 1967. Age: middle-late Albian.

"*irmoechinata*" (Heisecke, 1970, p.230, pl.1, fig.3; pl.2, figs.2–3) Lentin and Williams, 1976, p.41. Holotype: Heisecke, 1970, pl.1, fig.3; pl.2, figs.2–3. **NOW** *Spinidinium?* Originally *Deflandrea*, subsequently *Gonyaulacysta*, thirdly (and now) *Spinidinium?*, fourthly *Volkheimeridium*. Age: early Paleocene.

"*italica*" Corradini, 1973, p.132–133, pl.19, figs.8a–b; pl.33, figs.5a–b; text-figs.3a–d. Holotype: Corradini, 1973, pl.19, figs.8a–b; text-figs.3a–d; Jan du Chêne et al., 1986a, pl.98, fig.11. **NOW** *Rhynchodiniopsis*?. Originally *Gonyaulacysta*, subsequently *Millioudodinium*?, thirdly *Hystrichogonyaulax*, fourthly (and now) *Rhynchodiniopsis*?. Age: Late Cretaceous–Paleocene.

**jurassica* (Deflandre, 1939a, p.168, pl.6, figs.2–5; text-figs.1–2) Norris and Sarjeant, 1965, p.65. Emendation: Sarjeant, 1982b, p.28–30, as *Gonyaulacysta jurassica*. Holotype: Deflandre, 1939a, pl.6, figs.2–3; text-figs.1–2; Jan du Chêne et al., 1986a, pl.37, figs.1–3. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Gonyaulacysta*. Taxonomic junior synonym: *Psaligonyaulax* (as and now *Gonyaulacysta*) *dualis*, according to Sarjeant (1982b, p.29) — however, Jan du Chêne et al. (1986a, p.131) retained *Gonyaulacysta dualis*. Górka (1965, p.298) also proposed this combination. Age: Oxfordian.

subsp. *adecta* Sarjeant, 1982b, p.30–31, pls.1–3; pl.4, figs.1–4,9; pl.6, figs.4–5,9. Holotype: Sarjeant, 1982b, pl.1, fig.2. Age: Callovian.

var. *adecta* (1982). Autonym. Holotype: Sarjeant, 1982b, pl.1, fig.2. Age: Callovian.

var. *longicornis* (Deflandre, 1938, p.171, pl.6, fig.6) Downie and Sarjeant, 1965, p.115. Emendation: Sarjeant, 1982b, p.31, as *Gonyaulacysta jurassica* subsp. *adecta* var. *longicornis*. Holotype: Deflandre, 1938, pl.6, fig.6; Jan du Chêne et al., 1986a, pl.37, figs.7–8. Originally *Gonyaulax jurassica* var. *longicornis* (Appendix B), subsequently *Gonyaulacysta jurassica* var. *longicornis*, thirdly *Gonyaulacysta jurassica* subsp. *longicornis*, fourthly (and now) *Gonyaulacysta jurassica* subsp. *adecta* var. *longicornis*. Taxonomic junior synonym: *Gonyaulax* (as *Gonyaulacysta*) *jurassica* subsp. *brevis*, according to Sarjeant (1982b, p.31). Age: Oxfordian.

"subsp. *brevis*" (Johnson and Hills, 1973, p.206, pl.1, figs.11,14) Lentin and Williams, 1975, p.2151. Holotype: Johnson and Hills, 1973, pl.1, fig.14. Originally *Gonyaulacysta jurassica* var. *brevis*, subsequently *Gonyaulacysta jurassica* subsp. *brevis*. **Taxonomic senior synonym:** *Gonyaulax* (now *Gonyaulacysta*) *jurassica* subsp. *adecta* var. *longicornis*, according to Sarjeant (1982b, p.31). Age: ?late Callovian–early Oxfordian.

"var. *brevis*" Johnson and Hills, 1973, p.206, pl.1, figs.11,14. Holotype: Johnson and Hills, 1973, pl.1, fig.14. Originally *Gonyaulacysta jurassica* var. *brevis*, subsequently *Gonyaulacysta jurassica* subsp. *brevis*. **Taxonomic senior synonym:** *Gonyaulax* (now *Gonyaulacysta*) *jurassica* subsp. *adecta* var. *longicornis*, according to Sarjeant (1982b, p.31). Age: ?late Callovian–early Oxfordian.

subsp. *desmos* Poulsen, 1991, p.213–214, pl.1, figs.3–6. Holotype: Poulsen, 1991, pl.1, fig.3. Age: early Oxfordian.

subsp. *jurassica*. Autonym. Holotype: Deflandre, 1939a, pl.6, figs.2–3; text-figs.1–2; Jan du Chêne et al., 1986a, pl.37, figs.1–3. Emendation: Poulsen, 1991, p.212–213.

var. *jurassica*. Autonym. Holotype: Deflandre, 1939a, pl.6, figs.2–3; text-figs.1–2; Jan du Chêne et al., 1986a, pl.37, figs.1–3. Originally *Gonyaulax jurassica* var. *jurassica* (Appendix B), subsequently (and now) *Gonyaulacysta jurassica* var. *jurassica*.

var. *longicornuta* Sarjeant, 1982b, p.31–32, pl.5, figs.5–6. Holotype: Sarjeant, 1982b, pl.5, figs.5–6. Age: early-middle Kimmeridgian.

"subsp. *longicornis*" (Deflandre, 1939a, p.171, pl.6, fig.6) Lentin and Williams, 1973, p.62. Emendation: Sarjeant, 1982b, p.31, as *Gonyaulacysta jurassica* subsp. *adecta* var. *longicornis*. Holotype: Deflandre, 1939a, pl.6, fig.6; Jan du Chêne et al., 1986a, pl.37, figs.7–8. **NOW** *Gonyaulacysta jurassica* subsp. *adecta* var. *longicornis*. Originally *Gonyaulax jurassica* var. *longicornis* (Appendix B), subsequently *Gonyaulacysta jurassica* var. *longicornis*, thirdly *Gonyaulacysta jurassica* subsp. *longicornis*, fourthly (and

now) *Gonyaulacysta jurassica* subsp. *adecta* var. *longicornis*. Taxonomic junior synonym: *Gonyaulax* (as *Gonyaulacysta*) *jurassica* subsp. *brevis*, according to Sarjeant (1982b, p.31). Age: Oxfordian.

var. ***longicornis*** (Deflandre, 1939a, p.171, pl.6, fig.6) Downie and Sarjeant, 1965, p.115. Emendation: Sarjeant, 1982b, p.31, as *Gonyaulacysta jurassica* subsp. *adecta* var. *longicornis*. Holotype: Deflandre, 1939a, pl.6, fig.6; Jan du Chêne et al., 1986a, pl.37, figs.7–8. Originally *Gonyaulax jurassica* var. *longicornis* (Appendix B), subsequently *Gonyaulacysta jurassica* var. *longicornis*, thirdly *Gonyaulacysta jurassica* subsp. *longicornis*, fourthly (and now) *Gonyaulacysta jurassica* subsp. *adecta* var. *longicornis*. Taxonomic junior synonym: *Gonyaulax* (as *Gonyaulacysta*) *jurassica* subsp. *brevis*, according to Sarjeant (1982b, p.31). Age: Oxfordian.

var. ***quadrata*** Kumar, 1986b, p.386,388, pl.1, fig.6; pl.3, fig.1; text-fig. 4. Holotype: Kumar, 1986b, pl.1, fig.6. Kumar (1987b, p.598) also cited this taxon as new. Age: Kimmeridgian–Tithonian.

?***kleithria*** Duxbury, 1983, p.47–48, pl.5, figs.1–2; text-fig.22. Holotype: Duxbury, 1983, text-fig.22. Questionable assignment: Duxbury (1983, p.47). Age: early Aptian.

"***kostroniensis***" (Vozzhennikova, 1967, p.85, pl.26, figs.1–6; pl.27, figs.1–2) Sarjeant, 1969, p.10. Emendation: Harding, 1996, p.353,355, as *Nelchinopsis kostroniensis*. Holotype: Vozzhennikova, 1967, pl.26, figs.1–6; Jan du Chêne et al., 1986a, pl.44, figs.7–8; Lentin and Vozzhennikova, 1990, text-fig.64; lost according to Lentin and Vozzhennikova (1990, p.109). Lectotype: Lentin and Vozzhennikova, 1990, pl.15, figs.5–6, designated by Lentin and Vozzhennikova (1990, p.109) and Harding, 1996, pl.1, fig.1. **NOW** *Nelchinopsis*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Nelchinopsis*. Taxonomic junior synonym: *Alaskadinium wigginsii*, according to Stover and Williams (1987, p.11). Age: Neocomian, ?Valanginian or early Hauterivian.

"***kunzeviensis***" (Vozzhennikova, 1967, p.87, pl.27, fig.6; pl.30, fig.2; pl.33, fig.6) Davies, 1983, p.18. Holotype: Vozzhennikova, 1967, pl.30, fig.2, lost according to Lentin and Vozzhennikova (1990, p.94). **NOW** *Cribroperidinium?* *perforans* subsp. *kunzeviense*. Originally *Gonyaulax perforans* var. *kunzeviensis* (Appendix B), subsequently *Gonyaulacysta kunzeviensis*, thirdly *Gonyaulacysta perforans* var. *kunzeviensis* (combination not validly published), fourthly (and now) *Cribroperidinium?* *perforans* subsp. *kunzeviensis*. Age: Valanginian.

?***lagenoides*** Olaru, 1978a, p.80–81, pl.14, fig.7. Questionable assignment: Jan du Chêne et al. (1986a, p.132), as a problematic species. Holotype: Olaru, 1978a, pl.14, fig.7. Age: middle Oligocene.

"***latisepta***" Beju, 1978, p.4. **Name not validly published**: no description or illustration.

"?***longicornis***" (Downie, 1957, p.420, pl.20, fig.8; text-figs.2a–b) Sarjeant, 1969, p.10. Holotype: Downie, 1957, pl.20, fig.8; text-figs.2a–b; Jan du Chêne et al., 1986a, pl.30, fig.1. **NOW** *Cribroperidinium?*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Gonyaulacysta?*, fourthly *Millioudodinium*, fifthly (and now) *Cribroperidinium?*. Questionable assignment: Stover and Evitt (1978, p.158). This combination, as a questionable assignment, was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: late Kimmeridgian.

"***magnoserrata***" (Cookson and Eisenack, 1962b, p.490, pl.3, figs.7–8) Yun Hyesu, 1981, p.10. Holotype: Cookson and Eisenack, 1962b, pl.3, figs.7–8. **NOW** *Spiniferites?*. Originally *Pterodinium*, subsequently (and now) *Spiniferites?*, thirdly *Gonyaulacysta*. Age: Aptian–?Albian.

"?***mamillifera***" (Deflandre, 1939b, p.143, pl.6, fig.1) Sarjeant, 1969, p.10. Holotype: Deflandre, 1939b, pl.6, fig.1; Jan du Chêne et al., 1986a, pl.72, figs.1–8. **NOW** *Leptodinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta?*, thirdly *Millioudodinium?*, fourthly *Rhynchodiniopsis?*, fifthly (and now) *Leptodinium*. Questionable assignment: Sarjeant (1969, p.10). This combination was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: Kimmeridgian.

"***margaritifera***" (Cookson and Eisenack, 1960a, p.5–6, pl.2, figs.1–2; text-fig.1) Sarjeant, 1966b, p.131. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.1; Jan du Chêne et al., 1986a, pl.54, fig.6. **Combination not validly**

published: basionym not fully referenced. **NOW** *Impagidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly *Leptodinium*, fourthly (and now) *Impagidinium*. Age: Campanian.

"?*mecsekensis*" (Nagy, 1969, p.292, pl.1, figs.6,8) Lentin and Williams, 1976, p.110. Holotype: Nagy, 1969, pl.1, figs.6,8; Jan du Chêne et al., 1986a, pl.11, figs.10–12. **NOW** *Apteodinium*. Originally *Palaeoperidinium*, subsequently *Gonyaulacysta?*, thirdly *Millioudodinium?*, fourthly (and now) *Apteodinium*. Questionable assignment: Lentin and Williams (1976, p.110). Age: late Miocene.

?*membranea* Yu Jingxian, 1982, p.241, pl.3, figs.9,11. Holotype: Yu Jingxian, 1982, pl.3, fig.9. Originally *Gonyaulacysta*, subsequently *Gonyaulacysta?*. Questionable assignment: Lentin and Williams (1985, p.154). Age: Late Jurassic–Early Cretaceous.

"*microceras*" (Eisenack, 1958a, p.391, pl.21, fig.13) Clarke and Verdier, 1967, p.31. Emendation: Sarjeant, 1985a, p.67, as *Rhynchodiniopsis microceras*. Holotype: Eisenack, 1958a, pl.21, fig.13; Sarjeant, 1985a, pl.6, figs.5–6; pl.7, fig.6; text-fig.4; Jan du Chêne et al., 1986a, pl.99, figs.5–6. **NOW** *Rhynchodiniopsis?*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Rhynchodiniopsis*, fourthly (and now) *Rhynchodiniopsis?*. This combination was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: late Aptian.

"*millioudii*" (Sarjeant, 1963c, p.87–88, pl.1, figs.4–7) Sarjeant, 1966b, p.131. Holotype: Sarjeant, 1963c, pl.1, figs.4–7; Jan du Chêne et al., 1986a, pl.71, figs.4–7. **Combination not validly published:** basionym not fully referenced. **NOW** *Leptodinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly (and now) *Leptodinium*. Age: early Oxfordian.

"*mirabilis*" (Klement, 1960, p.48–50, pl.6, figs.7–10; text-figs.25–27) Dodekova, 1967, p.19. Emendation: Sarjeant, 1984a, p.164–166, as *Leptodinium mirabile*. Holotype: Klement, 1960, pl.6, figs.7–8; text-figs.25–26; Sarjeant, 1984a, pl.4, figs.1–2; text-fig.5; Jan du Chêne et al., 1986a, pl.67, figs.5–8. **NOW** *Leptodinium*. Originally (and now) *Leptodinium*, subsequently *Gonyaulacysta*. Age: middle Oxfordian.

"*monacantha*" Deflandre, 1936b, p.176–177, pl.5, fig.10 ex Sarjeant, 1967b, p.252. Holotype: Deflandre, 1935, pl.6, fig.1; Deflandre, 1936b, pl.5, fig.10; lost according to Jan du Chêne et al. (1986a, p.48). **NOW** *Apteodinium?*. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly *Apteodinium*, fifthly (and now) *Apteodinium?*. The name *Palaeoperidinium monacanthum* was not validly published in Deflandre (1936b) since the generic name *Palaeoperidinium* was not validly published until 1967. Williams et al. (1998, p.253) accepted Sarjeant's (1967b) indirect reference to Deflandre (1935) as indication of a type (I.C.N. Article 40.3). Age: Late Cretaceous.

"*mosaicum*" Downie, 1957, p.424, pl.20, fig.7; text-fig.2f ex Sarjeant, 1967b, p.253. Emendation: Sarjeant, 1976c, p.6–7, as *Leptodinium mosaicum*. Holotype: Downie, 1957, pl.20, fig.7; text-fig.2f; Sarjeant, 1976c, pl.2, figs.3,5; text-figs.2a–b; Jan du Chêne et al., 1986a, pl.70, figs.5–6. **NOW** *Leptodinium?*. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta*, thirdly *Leptodinium*, fourthly (and now) *Leptodinium?*. The name *Palaeoperidinium mosaicum* was not validly published in Downie (1957) since the generic name *Palaeoperidinium* was not validly published until 1967. Williams et al. (1998, p.253) accepted Sarjeant's (1967b) indirect reference to Downie (1957) as indication of a type (I.C.N. Article 40.3). N.I.A. Age: late Kimmeridgian.

"*muderongensis*" (Cookson and Eisenack, 1958, p.32, pl.3, figs.3–4; text-fig.15) Sarjeant, 1966b, p.131. Holotype: Cookson and Eisenack, 1958, pl.3, fig.3; text-fig.15. **Combination not validly published:** basionym not fully referenced. **NOW** *Cribroperidinium?*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly *Cribroperidinium*, fourthly (and now) *Cribroperidinium?*. Taxonomic junior synonym: *Gonyaulax* (as *Cribroperidinium*) *diaphana*, according to Backhouse (1988, p.80). Age: Aptian.

"?*nannotrix*" (Deflandre, 1939b, p.143, pl.6, fig.7) Sarjeant, 1969, p.10. Holotype: Deflandre, 1939b, pl.6, fig.7; Jan du Chêne et al., 1986a, pl.69, figs.4–6. **NOW** *Leptodinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Gonyaulacysta?*, fourthly *Rhynchodiniopsis?*, fifthly (and now) *Leptodinium*. Questionable

assignment: Stover and Evitt (1978, p.159) as a problematic species. This combination was not validly published in Sarjeant (1966b, p.132), since that author did not fully reference the basionym. Age: Kimmeridgian.

"*nealei*" (Sarjeant, 1962a, p.480–481, pl.69, fig.1; text-fig.2) Sarjeant, 1966b, p.132. Holotype: Sarjeant, 1962a, pl.69, fig.1; text-fig.2. **Combination not validly published:** basionym not fully referenced. **NOW** *Rhynchodiniopsis?*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly *Hystrichogonyaulax*, fourthly *Hystrichogonyaulax?*, fifthly *Rhynchodiniopsis*, sixthly (and now) *Rhynchodiniopsis?*. Questionable assignment: Sarjeant (1966b, p.132). Age: Oxfordian.

"*nuciformis*" (Deflandre, 1939a, p.180, pl.8, figs.4–6 ex Sarjeant, 1962a, p.482–483) Sarjeant, 1968, p.227. Holotype: Deflandre, 1939a, pl.8, fig.6; Jan du Chêne et al., 1986a, pl.11, figs.1–3. **NOW** *Cribroperidinium*. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulax* (Appendix B), thirdly *Gonyaulacysta*, fourthly *Apteodinium*, fifthly *Millioudodinium*, sixthly (and now) *Cribroperidinium*. Taxonomic junior synonym: *Palaeoperidinium nuciformoides*, according to Sarjeant (1968, p.227). This combination, as a questionable assignment, was not validly published in Sarjeant (1966b, p.132), since that author did not fully reference the basionym. Age: Oxfordian.

"*nuda*" (Nagy, 1969, p.291, pl.1, fig.1) Lentin and Williams, 1976, p.110. Holotype: Nagy, 1969, pl.1, fig.1. **NOW** *Pyxidinospis? nuda*. Originally *Palaeoperidinium nudum* Nagy, subsequently *Palaeoperidinium pannonium* (name illegitimate), thirdly *Phthanoperidinium pannonium* (name illegitimate), fourthly *Gonyaulacysta? nuda*, fifthly *Tectatodinium nudum*, sixthly *Tectatodinium? pannonium* (name illegitimate), seventhly *Pyxidinospis? pannonia* (name illegitimate), eighthly *Pyxidinospis? nuda*. Questionable assignment: Lentin and Williams (1976, p.110). Nomenclatural junior synonym: *Palaeoperidinium* (subsequently *Phthanoperidinium*, *Tectatodinium?* and *Pyxidinospis?*) *pannonium*, which has the same holotype. See also the discussion under *Pyxidinospis? nuda*. Age: late Miocene.

"*obesa*" Brideaux, 1971, p.82, pl.23, fig.39; text-figs.8a–b. Holotype: Brideaux, 1971, pl.23, fig.39; text-figs.8a–b; Jan du Chêne et al., 1986a, pl.30, fig.9. **NOW** *Cribroperidinium?*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Rhynchodiniopsis*, fourthly (and now) *Cribroperidinium?*. Age: late Albian.

?obscura (Lejeune-Carpentier, 1946, p.B191, figs.3–5) Sarjeant, 1969, p.10. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.4, as *Gonyaulacysta obscura*. Holotype: Lejeune-Carpentier, 1946, figs.3–4; Lejeune-Carpentier and Sarjeant, 1981, pl.2, figs.3–4; text-fig.2. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Gonyaulacysta?*, fourthly *Millioudodinium*. Questionable assignment: Stover and Evitt (1978, p.158). This combination was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: Senonian.

"*oligodentata*" Helby in Riding and Helby, 2001f, p.150. **Name not validly published:** no description. This name was cited by Riding and Helby as a manuscript name and partial synonym of *Gonyaulacysta fenestrata*.

"*ordocava*" Duxbury, 1977, p.37–38, pl.1, figs.10–11; text-fig.12. Holotype: Duxbury, 1977, pl.1, figs.10–11; text-fig.12; Jan du Chêne et al., 1986a, pl.41, figs.1–2. **NOW** *Stanfordella*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Stanfordella*. Age: early–late Hauterivian.

"*ornata*" (Eisenack, 1935, p.176, pl.4, figs.9–10; text-figs.1–4) Pocock, 1972, p.87–88. Holotype: Eisenack, 1935, pl.4, fig.9. **NOW** *Ctenidodinium ornatum*. Originally *Lithodinia jurassica* var. *ornata*, subsequently (and now) *Ctenidodinium ornatum*, thirdly *Gonyaulacysta ornata*. Taxonomic junior synonym: *Brotzenia* (as *Ctenidodinium?*) *cristatum*, according to Woollam (1983, p.190). Age: Oxfordian.

"**orthoceras*" (Eisenack, 1958a, p.388, pl.21, figs.3–11; pl.24, fig.1) Sarjeant, 1966b, p.121. Emendation: Sarjeant, 1985a, p.51,53, as *Cribroperidinium orthoceras*. Holotype: Eisenack, 1958a, pl.21, fig.5; Sarjeant, 1985a, pl.1, figs.1,4; text-fig.1; Jan du Chêne et al., 1986a, pl.24, figs.7–8. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Cribroperidinium*, fourthly *Cribroperidinium?*. Taxonomic senior synonym: *Gonyaulax* (as *Cribroperidinium*) *edwardsii*, according to Davey and Verdier (1971, p.17) — however, Lentin and Williams (1985, p.79) retained *Gonyaulacysta* (as *Cribroperidinium*) *orthoceras*. Age: Aptian.

"*pachyderma*" (Deflandre, 1939a, p.176–178, pl.7, figs.6–10; text-figs.7–10) Sarjeant, 1969, p.10. Holotype: Deflandre, 1939a, pl.7, figs.6–7. **NOW** *Korystocysta*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Ctenidodinium*, fourthly *Ctenidodinium?*, fifthly (and now) *Korystocysta*, sixthly *Dichadogonyaulax*. Taxonomic junior synonyms: *Leptodinium norrisii*, according to Benson (1985, p.154); *Dichadogonyaulax* (subsequently *Korystocysta*) *kettonensis*, by implication in Conway (1990, p.35), who considered *Dichadogonyaulax kettonensis* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Dichadogonyaulax* (as *Korystocysta*) *kettonensis*. This combination was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: Oxfordian.

"*palla*" Sarjeant, 1966b, p.113–114, pl.13, figs.3–4; text-fig.24. Holotype: Sarjeant, 1966b, pl.13, figs.3–4; Jan du Chêne et al., 1986a, pl.27, figs.15–17. **NOW** *Cribroperidinium*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Millioudodinium?*, fourthly *Rhynchodiniopsis*, fifthly (and now) *Cribroperidinium*. Age: early Barremian.

"*pannonica*" (Nagy, 1965, p.200–201, pl.1, figs.1–2; pl.2, fig.10; text-figs.1–2) Lentin and Williams, 1973, p.63. Holotype: Nagy, 1965, pl.1, figs.1–2; pl.2, fig.10; Jan du Chêne et al., 1986a, pl.31, figs.1–4. **NOW** *Cribroperidinium?*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium?*, fourthly (and now) *Cribroperidinium?*. Age: early Pliocene.

"*parorthoceras*" Davey, 1968, p.1. Holotype: Sarjeant, 1966b, pl.14, figs.5–6; text-fig.29, as *Gonyaulacysta orthoceras*; Jan du Chêne et al., 1986a, pl.26, figs.6–8. **NOW** *Cribroperidinium?*. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly (and now) *Cribroperidinium?*. Age: late Barremian.

pectinigera (Gocht, 1970b, p.138–139, pl.33, figs.1–4; text-fig.11) Fensome, 1979, p.43. Emendation: Fensome, 1979, p.43, as *Gonyaulacysta pectinigera*. Holotype: Gocht, 1970b, pl.33, fig.1. Originally *Leptodinium subtile* subsp. *pectinigerum*, subsequently *Hystrichogonyaulax pectinigera*, thirdly (and now) *Gonyaulacysta pectinigera*, fourthly *Leptodinium pectinigerum*. Jan du Chêne et al. (1986a, p.131) retained this species in *Gonyaulacysta*. Age: early Bathonian.

"*pennata*" Riley in Fisher and Riley, 1980, p.321–322, pl.1, figs.10–11. Holotype: Fisher and Riley, 1980, pl.1, figs.10–11; Jan du Chêne et al., 1986a, pl.98, fig.5. **NOW** *Rhynchodiniopsis*. Originally *Gonyaulacysta*, subsequently *Hystrichogonyaulax*, thirdly *Millioudodinium*, fourthly (and now) *Rhynchodiniopsis*. This name was not validly published in Fisher and Riley (1976, p.52), who did not provide a description or illustration. Age: late Kimmeridgian.

"*perforans*" (Cookson and Eisenack, 1958, p.30–32, pl.2, figs.1–4, 7–8; text-figs.8–9) Sarjeant, 1969, p.10. Holotype: Cookson and Eisenack, 1958, pl.2, fig.1; text-figs.8–9; Jan du Chêne et al., 1986a, pl.32, fig.2. **NOW** *Cribroperidinium?*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Leptodinium?*, fourthly *Rhynchodiniopsis*, fifthly *Cribroperidinium*, sixthly (and now) *Cribroperidinium?*. This combination was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: Late Jurassic.

"var. *kunzeviensis*" (Vozzhennikova, 1967, p.87, pl.27, fig.6; pl.30, fig.2; pl.33, fig.6) Lentin and Williams, 1985, p.156. Holotype: Vozzhennikova, 1967, pl.30, fig.2, lost according to Lentin and Vozzhennikova (1990, p.94). **Combination not validly published:** basionym not fully referenced. **NOW** *Cribroperidinium?* *perforans* subsp. *kunzeviense*. Originally *Gonyaulax perforans* var. *kunzeviensis* (Appendix B), subsequently *Gonyaulacysta kunzeviensis*, thirdly *Gonyaulacysta perforans* var. *kunzeviensis* (combination not validly published), fourthly (and now) *Cribroperidinium?* *perforans* subsp. *kunzeviense*. Age: Valanginian.

"*perforobtusa*" Duxbury, 1977, p.39, pl.1, fig.1; text-fig.13. Holotype: Duxbury, 1977, pl.1, fig.1; text-fig.13; Jan du Chêne et al., 1986a, pl.44, figs.1–2. **NOW** *Wrevittia?*. Originally *Gonyaulacysta*, subsequently *Gonyaulacysta?*, thirdly *Wrevittia?*. Questionable assignment: Sarjeant (1982b, p.28) — however, Jan du Chêne et al. (1986a, p.131) included the species in *Gonyaulacysta* without question. Age: Hauterivian.

"*pilum*" Gocht, 1959, p.56, pl.6, fig.14; pl.8, fig.8 ex Sarjeant, 1967b, p.254. Holotype: Gocht, 1959, pl.6, fig.14; Jan du Chêne et al., 1986a, pl.73, figs.7–8. **NOW** *Leptodinium?*. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta?*, thirdly (and now) *Leptodinium?*. Questionable assignment: Sarjeant (1967b, p.254). The name *Palaeoperidinium pilum* was not validly published in Gocht (1959) since the generic name *Palaeoperidinium* was not validly published until 1967. Williams et al. (1998, p.255) accepted Sarjeant's (1967b) indirect reference to Gocht (1959) as indication of a type (I.C.N. Article 40.3). N.I.A. Age: Valanginian.

piriformis Conrad, 1941, p.9, pl.1, fig.G ex Sarjeant, 1967b, p.255. Holotype: Conrad, 1941, pl.1, fig.G. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta?*, thirdly (and now) *Gonyaulacysta*, fourthly *Palaeoperidinium?* (combination not validly published). Questionable assignment: Sarjeant (1967b, p.255) — however, Lentin and Williams (1976, p.111) included this species in *Gonyaulacysta* without question. The name *Palaeoperidinium piriforme* was not validly published in Conrad (1941) since the generic name *Palaeoperidinium* was not validly published until 1967. Williams et al. (1998, p.255) accepted Sarjeant's (1967b) indirect reference to Conrad (1941) as indication of a type (I.C.N. Article 40.3). Lentin and Williams (1976, p.111) also proposed this name as a "comb. nov.". Jan du Chêne et al. (1986a, p.132) recommended that this name be restricted to the holotype. Age: Maastrichtian.

"*plea*" (Tasch in Tasch et al., 1964, p.196, pl.1, fig.15) Lentin and Williams, 1976, p.43. Holotype: Tasch et al., 1964, pl.1, fig.15. **NOW** *Deflandrea?*. Originally *Peridinium* (Appendix B), subsequently (and now) *Deflandrea?*, thirdly *Gonyaulacysta?*. Questionable assignment: Lentin and Williams (1976, p.43). Age: Albanian.

polythyris Davey, 1979b, p.556, pl.3, figs.1–3. Holotype: Davey, 1979b, pl.3, figs.1–3; Jan du Chêne et al., 1986a, pl.39, figs.8–9. Age: Albanian.

"*porosa*" (Lejeune-Carpentier, 1946, p.B193,B196; text-fig.6) Sarjeant, 1966b, p.132. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.7–8, as *Leptodinium porosum*. Holotype: Lejeune-Carpentier, 1946, text-fig.6; Streel et al., 1977, pl.2, fig.4; Lejeune-Carpentier and Sarjeant, 1981, pl.3, figs.1–2; text-fig.4. **Combination not validly published**: basionym not fully referenced. **NOW** *Leptodinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly (and now) *Leptodinium*, fourthly *Leptodinium?*. Questionable assignment: Sarjeant (1966b, p.132). Age: Late Cretaceous.

"*prominoseptata*" Wilson in Slimani, 2001a, p.194. **Name not validly published**: no description.

"*pyrum*" (Drugg, 1967, p.14, pl.1, fig.17; pl.9, figs.6a–b) Eisenack, 1967, p.97 (al. 306d). Holotype: Drugg, 1967, pl.1, fig.17; Jan du Chêne et al., 1986a, pl.27, figs.3–5. **NOW** *Cribroperidinium?*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Cribroperidinium?*. N.I.A. Age: Maastrichtian–Danian.

?*rara* Kar et al., 1972, p.147, pl.1, figs.4–5. Holotype: Kar et al., 1972, pl.1, fig.4; Jan du Chêne et al., 1986a, pl.40, figs.12–13. Originally *Gonyaulacysta*, subsequently (and now) *Gonyaulacysta?*. Questionable assignment: Stover and Evitt (1978, p.159) as a problematic species. Jain (1982, p.52) recommended that this name be restricted to the holotype. Age: Tertiary.

"*sarjeantii*" (Vozzhennikova, 1967, p.87–89, pl.25, figs.1–2; pl.28, fig.4; pl.31, figs.1a–b,2a–b,3; pl.32, figs.1,2a–c,3,4a–b) Sarjeant, 1969, p.11. Holotype: Vozzhennikova, 1967, pl.31, fig.1a; Lentin and Vozzhennikova, 1990, text-fig.53; lost according to Lentin and Vozzhennikova (1990, p.95). Neotype: Vozzhennikova, 1967, pl.31, fig.3; Lentin and Vozzhennikova, 1990, pl.16, fig.4; designated by Lentin and Vozzhennikova (1990, p.95). **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly *Rhynchodiniopsis*, fifthly *Cribroperidinium?*, sixthly (and now) *Cribroperidinium*. Age: Tithonian.

"subsp. *sarjeantii*". Autonym. Holotype: Vozzhennikova, 1967, pl.31, fig.1a; Lentin and Vozzhennikova, 1990, text-fig.53; lost according to Lentin and Vozzhennikova (1990, p.95). Neotype: Vozzhennikova, 1967, pl.31, fig.3; Lentin and Vozzhennikova, 1990, pl.16, fig.4; designated by Lentin and Vozzhennikova (1990, p.95). **NOW** *Cribroperidinium sarjeantii* subsp. *sarjeantii*. Originally *Gonyaulacysta sarjeantii* subsp. *sarjeantii*, subsequently *Millioudodinium sarjeantii* subsp. *sarjeantii*, thirdly *Rhynchodiniopsis sarjeantii* subsp. *sarjeantii*, fourthly *Cribroperidinium? sarjeantii* subsp. *sarjeantii*, fifthly (and now) *Cribroperidinium sarjeantii* subsp. *sarjeantii*.

- "subsp. *sphaerica*" (Vozzhennikova, 1967, p.89, pl.25, figs.1–2; pl.28, fig.4; pl.32, figs.1–4) Lentin and Williams, 1973, p.63. Holotype: Vozzhennikova, 1967, pl.28, fig.4; Jan du Chêne et al., 1986a, pl.20, fig.9; lost according to Lentin and Vozzhennikova (1990, p.97). Lectotype: Lentin and Vozzhennikova, 1990, pl.16, fig.1–2, designated by Lentin and Vozzhennikova (1990, p.97). **NOW** *Cribroperidinium sarjeantii* subsp. *sphaericum*. Originally *Gonyaulax sarjeantii* var. *sphaerica* (Appendix B), subsequently *Gonyaulacysta sarjeantii* subsp. *sphaerica*, thirdly *Millioudodinium sarjeantii* subsp. *sphaericum*, fourthly *Rhynchodiniopsis sarjeantii* subsp. *sphaerica*, fifthly *Cribroperidinium?* *sarjeantii* subsp. *sphaericum*, sixthly (and now) *Cribroperidinium sarjeantii* subsp. *sphaericum*. Age: Tithonian.
- "*scarburghensis*" Sarjeant, 1964b, p.472–473. Holotype: Sarjeant, 1961a, pl.13, fig.13; text-fig.5; Jan du Chêne et al., 1986a, pl.3, figs.1–2. **NOW** *Trichodinium scarburghense*. Originally *Gonyaulax areolata* (name illegitimate; Appendix B), subsequently *Gonyaulacysta scarburghensis*, thirdly *Gonyaulacysta areolata* (combination illegitimate), fourthly *Acanthaulax areolata* (combination illegitimate), fifthly *Acanthaulax scarburghensis*, sixthly *Liesbergia scarburghensis*, seventhly (and now) *Trichodinium scarburghense*. Substitute name for *Gonyaulax areolata* Sarjeant, 1961a, p.95–96, pl.13, fig.13; text-fig.5 (an illegitimate name). Taxonomic junior synonym: *Acanthaulax senta*, according to Berger (1986, p.343). Age: late Callovian–early Oxfordian.
- "*scottii*" (Cookson and Eisenack, 1958, p.30, pl.2, figs.5–6) Sarjeant, 1969, p.11. Holotype: Cookson and Eisenack, 1958, pl.2, fig.5; Jan du Chêne et al., 1986a, pl.33, fig.5. **NOW** *Cribroperidinium?*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium?*, fourthly (and now) *Cribroperidinium?*. This combination was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: early-middle Kimmeridgian.
- "*serrata*" (Cookson and Eisenack, 1958, p.34, pl.3, fig.2; text-figs.12–14) Sarjeant, 1969, p.11. Holotype: Cookson and Eisenack, 1958, pl.3, fig.2; Jan du Chêne et al., 1986a, pl.99, figs.3–4. **NOW** *Rhynchodiniopsis*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Hystrichogonyaulax*, fourthly (and now) *Rhynchodiniopsis*. This combination was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: Late Jurassic–Neocomian.
- "*setcheyensis*" Sarjeant, 1976c, p.4–6, pl.1, fig.7; text-fig.1. Holotype: Sarjeant, 1976c, pl.1, fig.7; Jan du Chêne et al., 1986a, pl.74, figs.1–4. **NOW** *Impagidinium*. Originally *Gonyaulacysta*, subsequently *Leptodinium*, thirdly *Rhynchodiniopsis*, fourthly (and now) *Impagidinium*. Age: Kimmeridgian.
- "*solaris*" Davey, 1988, p.38, pl.4, figs.7–9. Holotype: Davey, 1988, pl.4, figs.7–9; Fensome et al., 1996, figs.1–3 — p.2367. **NOW** *Daveya*. Originally *Gonyaulacysta*, subsequently (and now) *Daveya*. N.I.A. Age: late Berriasian.
- speciosa* Harding, 1990b, p.33, pl.14, figs.1–15; pl.15, figs.12–14; text-fig.14 ex Harding in Williams et al., 1998, p.257. Holotype: Harding, 1990b, pl.14, fig.1. This name was not validly published in Harding (1990b) since the lodgement of the holotype was not specified (I.C.N. Article 40.7). Age: early Barremian.
- "*striata*" Clarke and Verdier, 1967, p.31, pl.4, figs.11–13; pl.5, fig.15; text-fig.12. Holotype: Clarke and Verdier, 1967, pl.4, figs.11–13; Jan du Chêne et al., 1986a, pl.88, figs.9–11. **NOW** *Pterodinium*. Originally *Gonyaulacysta*, subsequently *Leptodinium*, thirdly *Impagidinium*, fourthly (and now) *Pterodinium*. Age: Santonian.
- "*strigosa*" Yu Jingxian, 1982, p.240–241, pl.2, figs.1–2; pl.3, fig.3. Holotype: Yu Jingxian, 1982, pl.2, fig.2. **NOW** *Cribroperidinium?*. Originally *Gonyaulacysta*, subsequently (and now) *Cribroperidinium?*. Age: Late Jurassic–Early Cretaceous.
- "*?superornata*" (Wetzel, 1967a, p.869, pl.16, figs.8a–b) Eisenack and Kjellström, 1971, p.306g. Emendation: Sarjeant, 1980b, p.124–125, as *Meiourogononyaulax superornata*. Holotype: Wetzel, 1967a, pl.16, figs.8a–b. **NOW** *Meiourogononyaulax*. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Meiourogononyaulax*, thirdly *Gonyaulacysta?*, fourthly *Lithodinia*, fifthly *Lithodinia?*. Questionable assignment: Eisenack and Kjellström (1971, p.306g). Age: early Bathonian.

"*systemmata*" Gitmez and Sarjeant, 1972, p.204–205, pl.5, figs.7–8. Holotype: Gitmez and Sarjeant, 1972, pl.5, figs.7–8; Jan du Chêne et al., 1986a, pl.29, figs.4–7. Originally *Gonyaulacysta*, subsequently *Cribroperidinium*, thirdly *Millioudodinium*, fourthly *Cribroperidinium?*, fifthly *Acanthaulax*. **Taxonomic senior synonym:** *Gonyaulacysta* (as and now *Cribroperidinium*) *globata*, according to Poulsen (1996, p.72). Age: early Kimmeridgian.

teichos Davey, 1974, p.53–54, pl.4, figs.5–7. Emendation: Harding, 1990b, p.34. Holotype: Davey, 1974, pl.4, fig.5; Jan du Chêne et al., 1986a, pl.39, fig.4. N.I.A. Age: early Barremian.

"?*tenuiceras*" (Eisenack, 1958a, p.389–391, pl.21, figs.14–15; pl.22, figs.1–3; pl.24, fig.2; text-figs.4a–c,5) Sarjeant, 1969, p.11. Emendations: Sarjeant, 1985a, p.63,65–66, as *Acanthaulax? tenuiceras*; Jan du Chêne et al., 1986b, p.29–30, as *Tehamadinium tenuiceras*. Holotype: Eisenack, 1958a, pl.21, fig.15; Sarjeant, 1985a, pl.6, figs.1–2; text-fig.3; Jan du Chêne et al., 1986a, pl.118, fig.1; Jan du Chêne et al., 1986b, pl.24, fig.5. **NOW** *Cribroperidinium?*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta?*, thirdly *Diacanthum*, fourthly *Occisucysta*, fifthly *Acanthaulax?*, sixthly *Tehamadinium*, seventhly (and now) *Cribroperidinium?*. Questionable assignment: Sarjeant (1969, p.11). Taxonomic junior synonym: *Occisucysta victorii*, according to Pöthe de Baldis and Ramos (1988, p.33). This combination was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: late Barremian–Aptian.

"*tenuicornuta*" (Cookson and Eisenack, 1962b, p.478, pl.3, figs.12–13; text-figs.1a–b) Sarjeant, 1969, p.11. Holotype: Cookson and Eisenack, 1962b, pl.3, figs.12–13; text-figs.1a–b. **NOW** *Leptodinium?*. Originally *Leptodinium*, subsequently *Gonyaulacysta*, thirdly (and now) *Leptodinium?*. Age: Albanian.

"*tenuitabulata*" (Gerlach, 1961, p.159, pl.25, figs.10–11; text-figs.1–3) de Coninck, 1969, p.23. Emendation: Sarjeant, 1984b, p.76, as *Rhynchodiniopsis tenuitabulata*. Holotype: Gerlach, 1961, pl.25, figs.10–11. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly (and now) *Cribroperidinium*, fifthly *Rhynchodiniopsis*. Age: middle Oligocene–middle Miocene.

tianjianense Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.68–69, pl.1, figs.1–2. Holotype: Liu Zhili et al., 1992, pl.1, fig.1. Age: Early Tertiary.

?*transparens* (Sarjeant, 1959, p.334, pl.13, fig.3; text-fig.3) Sarjeant, 1969, p.11. Holotype: Sarjeant, 1959, pl.13, fig.3. Originally *Gonyaulax*, subsequently *Gonyaulacysta*, thirdly (and now) *Gonyaulacysta?*. Questionable assignment: Stover and Evitt (1978, p.159) as a problematic species. This combination, as a questionable assignment, was not validly published in Sarjeant (1966b, p.132), since that author did not fully reference the basionym. Age: early Callovian.

?*tuberculata* (Vozzhennikova, 1967, p.83, pl.41, figs.3a–b) Lentin and Vozzhennikova, 1990, p.99. Emendation: Lentin and Vozzhennikova, 1990, p.99, as *Gonyaulacysta? tuberculata*. Holotype: Vozzhennikova, 1967, pl.41, figs.3a–b; Lentin and Vozzhennikova, 1990, text-fig.56; lost according to Lentin and Vozzhennikova (1990, p.99). Neotype: Lentin and Vozzhennikova, 1990, pl.14, figs.7–8, designated by Lentin and Vozzhennikova (1990, p.99). Originally *Gonyaulax helicoidea* var. *tuberculata* (Appendix B), subsequently *Gonyaulacysta helicoidea* var. *tuberculata*, thirdly *Gonyaulacysta helicoidea* subsp. *tuberculata*, fourthly (and now) *Gonyaulacysta? tuberculata*. Questionable assignment: Lentin and Vozzhennikova (1990, p.99–101). Age: Early Cretaceous.

"?*variabilis*" (Pocock, 1972, p.100, pl.23, figs.14–16) Davey, 1979d, p.217. Holotype: Pocock, 1972, pl.23, fig.15; Jansonius, 1986, pl.3, figs.15–17; text-fig.8; Jan du Chêne et al., 1986a, pl.39, figs.5–7. **NOW** *Endoscrinium?*. Originally *Chytroeisphaeridia*, subsequently *Chytroeisphaeridia?*, thirdly *Gonyaulacysta*, fourthly *Gonyaulacysta?*, fifthly (and now) *Endoscrinium?*. Questionable assignment: Jan du Chêne et al. (1986a, p.133) as a problematic species. Age: late Bajocian.

"*venusta*" (Klement, 1960, p.44–45, pl.5, figs.10–13; text-fig.22) Dodekova, 1971, p.11. Holotype: Klement, 1960, pl.5, figs.10–11. **Taxonomic senior synonym:** *Gonyaulax* (as *Cribroperidinium*) *granulata*, according to Schrank (2005, p.56). Originally *Gonyaulax* (Appendix B), subsequently *Acanthogonyaulax* (combination not validly published), thirdly *Acanthaulax*, fourthly *Gonyaulacysta*, fifthly *Cribroperidinium*. Age: middle Oxfordian–Kimmeridgian.

vesicula Dodekova, 1994, p.38–39, pl.10, figs.14–19; text-figs.5a–c. Holotype: Dodekova, 1994, pl.10, figs.15–16. Age: late Tithonian–earliest Berriasian.

"**vozhennikovae**" Sarjeant, 1982b, p.33–34, pl.7, fig.8; pl.8, fig.9. Holotype: Sarjeant, 1982b, pl.8, fig.9. **NOW** *Tubotuberella*. Originally *Gonyaulacysta*, subsequently (and now) *Tubotuberella*. Age: early Oxfordian.

"**wetzelii**" (Lejeune-Carpentier, 1939, p.B526; text-figs.1–2) Sarjeant, 1969, p.11. Emendations: Lejeune-Carpentier, 1946, p.B189–B190, as *Gonyaulax wetzelii*; Lejeune-Carpentier and Sarjeant, 1981, p.2–3, as *Gonyaulacysta wetzelii*. Holotype: Lejeune-Carpentier, 1939, text-figs.1–2; Lejeune-Carpentier and Sarjeant, 1981, pl.5, figs.5–6. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Gonyaulacysta?*, fourthly (and now) *Cribroperidinium*, fifthly *Millioudodinium*. Questionable assignment: Stover and Evitt (1978, p.159). This combination was not validly published in Sarjeant (1966b, p.131), since that author did not fully reference the basionym. Age: Senonian.

"**whatleyi**" Sarjeant, 1972, p.19–21, pl.7, fig.1; text-fig.4. Holotype: Sarjeant, 1972, pl.7, fig.1; text-fig.4; Jan du Chêne et al., 1986a, pl.124, figs.10–11. **NOW** *Tubotuberella*. Originally *Gonyaulacysta*, subsequently (and now) *Tubotuberella*. Age: Bathonian–middle Callovian.

"**whitei**" Sarjeant, 1966b, p.126–128, pl.14, fig.2; text-fig.32. Holotype: Sarjeant, 1966b, pl.14, fig.2. **NOW** *Impagidinium?*. Originally *Gonyaulacysta*, subsequently (and now) *Impagidinium?*, thirdly *Rhynchodiniopsis*. Age: Cenomanian.

GORDIACYSTA Miles, 1990, p.84,86,88. Type: Miles, 1990, pl.3, figs.1–2, as *Gordiacysta coronata*.

***coronata** Miles, 1990, p.88, pl.3, figs.1–7. Holotype: Miles, 1990, pl.3, figs.1–2. Age: late Albian.

GORKADINIUM Loeblich Jr. and Loeblich III, 1966, p.93. Substitute name for *Tetrasphaera* Górká, 1965, p.307 (an illegitimate name). Type: Górká, 1965, pl.2, figs.6a–b, as *Gorkadinium rarum*.

***rarum** (Górká, 1965, p.307, pl.2, figs.6a–b) Loeblich Jr. and Loeblich III, 1966, p.93. Holotype: Górká, 1965, pl.2, figs.6a–b. Originally *Tetrasphaera* (generic name illegitimate), subsequently (and now) *Gorkadinium*. Age: early Kimmeridgian.

GRAMOCYSTA Lund and Lund-Christensen in Daniels et al., 1990, p.34. Type: Piasecki, 1980, pl.1, figs.7–8, as *Dinopterygium verricula*.

***verricula** (Piasecki, 1980, p.66–67, pl.1, figs.4–8; pl.5, figs.5–6) Lund and Lund-Christensen in Daniels et al., 1990, p.34. Holotype: Piasecki, 1980, pl.1, figs.7–8. Originally *Dinopterygium*, subsequently *Heteraulacacysta*, thirdly (and now) *Gramocysta*. Age: late Miocene.

GRANORETICELLA Jiabo, 1978, p.113–114. Emendation: Xu Jinli et al., 1997, p.68. Jiabo included this genus among the acritarchs, but Xu Jinli et al. considered it a dinoflagellate. Type: Jiabo, 1978, pl.42, figs.7a–b, as *Granoreticella conspicuis*.

aspera Jiabo, 1978, p.113–114, pl.43, figs.15–18. Holotype: Jiabo, 1978, pl.43, fig.18. Taxonomic junior synonym: *Granoreticella microreticulata*, according to He Chengquan et al. (2009, p.230). Age: late Oligocene.

***conspicuis** Jiabo, 1978, p.113, pl.42, figs.7a–b,8. Holotype: Jiabo, 1978, pl.42, figs.7a–b. Age: late Oligocene.

"*microgranulata*" Pan Zhaoren in Xu Jinli et al., 1997, p.68–69, pl.38, figs.17–19. Holotype: Xu Jinli et al., 1997, pl.38, fig.17. **Name not validly published**: no English or Latin description. **NOW** *Pyxidinospis*. Originally *Granoreticella* (name not validly published), subsequently (and now) *Pyxidinospis*. Age: Oligocene.

"*microreticulata*" Pan Zhaoren in Xu Jinli et al., 1997, p.69, pl.37, figs.21–23, Holotype: Xu Jinli et al., 1997, pl.37, fig.21. **Name not validly published**: no English or Latin description. **Taxonomic senior synonym**: *Granoreticella aspera*, according to He Chengquan et al. (2009, p.230). Age: Oligocene.

"*pseudospinea*" Pan Zhaoren in Xu Jinli et al., 1997, p.69, pl.38, figs.4–5,7. Holotype: Xu Jinli et al., 1997, pl.38, fig.7. **Name not validly published**: no English or Latin description. **Taxonomic senior synonym**: *Granoreticella tenuis*, according to He Chengquan et al. (2009, p. 231). Age: Oligocene.

stabilis Lu Mengning and Wang Ruoshan, 1980, p.375, pl.3, fig.29. Holotype: Lu Mengning and Wang Ruoshan, 1980, pl.3, fig.29. Age: Late Triassic.

tenuis Jiabo, 1978, p.114, pl.43, fig.19. Holotype: Jiabo, 1978, pl.43, fig.19. Taxonomic junior synonym: *Granoreticella pseudospinea*, according to He Chengquan et al. (2009, p. 231). Age: late Oligocene.

variabilis Jiabo, 1978, p.114, pl.14, figs.9–16. Holotype: Jiabo, 1978, pl.42, fig.9. Age: Oligocene.

GRAPTODINIUM Clowes, 2013, p.316–318. Type: Clowes, 2013, pl.1, figs.1–3, as *Graptodinium inconditum*.

**inconditum* Clowes, 2013, p.318,321, pl.1, figs.1–6, pl.2, figs.1–12. Holotype: Clowes, 2013, pl.1, figs.1–3. Age: Lutetian–Chattian.

omnireticulatum Clowes, 2013, p.321–322, pl.1, figs.10–12. Holotype: Clowes, 2013, pl.1, figs.10–12. Age: Lutetian–Priabonian.

GRESSLYODINIUM Below, 1990, p.50–51. Contrary to the opinion of Lentin and Williams (1993, p.268), this name is validly published since the name of the "type species" is validly published. Type: Below, 1990, pl.11, figs.2,4–7,10–11,14, as *Gresslyodinium mirabile*.

**mirabile* Below, 1990, p.51–52, pl.11, figs.1–16; text-fig.14. Holotype: Below, 1990, pl.11, figs.2,4–7,10–11,14. Contrary to the opinion of Lentin and Williams (1993, p.269), this name is validly published. Below (1987a, p.6) stated that, unless otherwise indicated, all the material is in his personal collection. Since Below (1987a, 1987b, 1990) are parts I to III of a single study, we agree with J. Jansonius (personal communication) that Below's (1987a) repository statement refers to all three publications, fulfilling the requirement of I.C.N. Article 40.7 (see also the discussion on Article 40.7 in the Introduction). Age: Bajocian.

"**GYMMASTER**" Schütt, 1891, p.19. Siliceous dinoflagellate genus. **Taxonomic senior synonym**: *Actiniscus*, according to Fensome et al. (1993b, p.50–51). Type: not designated.

"*cinctus*" Hovasse, 1943, p.279, fig.3. Holotype: Hovasse, 1943, fig.3. **NOW** *Cinctactiniscus*. Originally *Gymmaster*, subsequently (and now) *Cinctactiniscus*. Age: early Miocene.

"*pentasterias*" (Ehrenberg, 1841, p.111,149) Schütt, 1891, p.19. Holotype: not designated. **NOW** *Actiniscus*. Originally *Dictyochoa* subgenus *Actiniscus* (Appendix A), subsequently (and now) *Actiniscus*, thirdly *Gymmaster*. Downie and Sarjeant (1965, p.82) retained this species in *Actiniscus*. Age: Pliocene.

"*sirius*" (Ehrenberg, 1841, p.150) Schütt, 1891, p.20. Holotype: not designated **NOW** *Actiniscus*. Originally *Dictyochoa* subgenus *Actiniscus*, subsequently (and now) *Actiniscus*, thirdly *Distephanus* (name not validly published; Appendix A), fourthly *Gymmaster*. Dumitrică (1973, p.822) considered *Dictyochoa* (now *Actiniscus*) *pentasterius* to be the questionable taxonomic senior synonym of this species. N.I.A. Age: Miocene.

tetrasterias (Ehrenberg, 1844a, p.68,76) Schütt, 1891, p.19. Holotype: Ehrenberg, 1854, pl.18, fig.62. **NOW** *Actiniscus*. Originally (and now) *Actiniscus*, subsequently *Gymnaster*. Age: Miocene.

HABIBACYSTA Head et al., 1989b, p.457–458. Type: Head et al., 1989b, pl.4, figs.1–2,5–6, as *Habibacysta tectata*.

**tectata* Head et al., 1989b, p.458, pl.4, figs.1–6,9–10. Holotype: Head et al., 1989b, pl.4, figs.1–2,5–6; Head, 1994a, pl.5, figs.1–6. Head (1996a, p.551) considered *Filisphaera? minuta* to be a possible taxonomic junior synonym of this species. Age: late Miocene–early Pliocene.

HADRIANA Riding and Helby, 2001f, p.153–155. Type: Riding and Helby, 2001f, figs.8G–I, as *Hadriana cinctum*.

**cinctum* Riding and Helby, 2001f, p.155,157, figs.8A–I,9A–L. Holotype: Riding and Helby, 2001f, figs.8G–I. The epithet is avowedly based on the Latin noun *cinctum* (girdle or zone) and thus should be cited as "*cinctum*", not "*cincta*" as indicated in Riding and Helby. N.I.A. Age: Kimmeridgian–Tithonian.

HAFNIASPHAERA Hansen, 1977, p.13–14. Emendation: Fensome et al., 2009, p.34. Originally (and now) *Hafniasphaera*, subsequently *Spiniferites* subgenus *Hafniasphaera*. Taxonomic senior synonym: *Spiniferites*, according to Stover and Williams (1987, p.117) — however, Edwards (1996, p.989) retained *Hafniasphaera*. Taxonomic junior synonym: *Rivernookia*, according to Lentin and Williams (1985, p.311). Fensome et al. (2009, p.34) retained *Hafniasphaera* at generic rank. Type: Hansen, 1977, fig.18A, as *Hafniasphaera hyalospinosa*.

australis Guler et al., 2005, p.425,427, figs.5M–T,6A–E. Holotype: Guler et al., 2005, figs.5S–T. Age: Maastrichtian.

cryptovesiculata Hansen, 1977, p.14–15, figs.9–10,18C,E–F,19A–B. Holotype: Hansen, 1977, figs.18C,E–F. Originally (and now) *Hafniasphaera*, subsequently *Spiniferites*. Williams et al. (1998, p.261) retained this species in *Hafniasphaera*. Age: Danian.

delicata Fensome et al., 2009, p.34,35, pl.4, figs.1–p. Holotype: Fensome et al., 2009, pl.4, figs.1,p. Age: youngest occurrence, late Ypresian.

fluens Hansen, 1977, p.16, figs.13–14,19C–D. Holotype: Hansen, 1977, figs.19C–D. Originally (and now) *Hafniasphaera*, subsequently *Spiniferites*. Williams et al. (1998, p.261) retained this species in *Hafniasphaera*. Age: late Maastrichtian–Danian.

goodmanii Edwards, 1982, p.110,112–113, pl.1, figs.1–3,5–6,8–9. Holotype: Edwards, 1982, pl.1, figs.1–3. Originally (and now) *Hafniasphaera*, subsequently *Spiniferites*. Williams et al. (1998, p.261) retained this species in *Hafniasphaera*. Age: early Eocene.

graciosa Hansen, 1977, p.15, figs.11–12,18B,D. Holotype: Hansen, 1977, fig.18B. Originally (and now) *Hafniasphaera*, subsequently *Spiniferites*. Williams et al. (1998, p.261) retained this species in *Hafniasphaera*. Age: Danian.

**hyalospinosa* Hansen, 1977, p.14, figs.7–8,18A. Holotype: Hansen, 1977, fig.18A. Originally (and now) *Hafniasphaera*, subsequently *Spiniferites*. Williams et al. (1998, p.261) retained this species in *Hafniasphaera*. Age: Danian.

septata (Cookson and Eisenack, 1967b, p.253–254, pl.42, figs.6–10; text-fig.1) Hansen, 1977, p.16. Emendation: McLean, 1971, p.730, as *Spiniferites septatus*. Holotype: Cookson and Eisenack, 1967b, pl.42, fig.6; Eisenack and Kjellström, 1975b, uppermost figure — p.984w; Fensome et al., 1996, fig.1 — p.2356. Originally *Baltisphaeridium*

(Appendix A), subsequently *Spiniferites*, thirdly (and now) *Hafniasphaera*, fourthly *Achomosphaera*, fifthly *Rivernookia*. Williams et al. (1998, p.261) retained this species in *Hafniasphaera*. Age: late Paleocene.

HAPSIDAULAX Sarjeant, 1975b, p.143–144. Type: Sarjeant, 1975b, pl.1, figs.c–d; text-figs.1A–D, as *Hapsidaulax margarethae*.

**margarethae* Sarjeant, 1975b, p.144–147, pl.1, figs.a–d, pl.2, figs.a–d; text-figs.1A–D,2A–D,3A–D. Emendation: Stancliffe and Sarjeant, 1990, p.203. Holotype: Sarjeant, 1975b, pl.1, figs.c–d; text-figs.1A–D; Stancliffe and Sarjeant, 1990, text-fig.4, nos.1–3. Age: Bathonian.

HAPSOCYSTA Davey, 1979b, p.556. Emendation: Heilmann-Clausen and Van Simaey, 2005, p.166. Taxonomic junior synonym: *Piccoladinium*, by implication in Heilmann-Clausen and Van Simaey (2005, p.166), who transferred the "type species" of *Piccoladinium* to *Hapsocysta*. Type: Eisenack and Cookson, 1960, pl.3, fig.6, as *Cannosphaeropsis peridictya*.

?*benteae* Nøhr-Hansen, 1993, p.71–72, pl.25, figs.11–12; text-figs.10a–b,11a–b. Holotype: Nøhr-Hansen, 1993, pl.25, fig.11; text-figs.10a–b. Questionable assignment: Nøhr-Hansen (1993, p.71). Age: early–late Albian.

dictyota Davey, 1979b, p.557, pl.3, figs.5–10,13–14. Holotype: Davey, 1979b, pl.3, figs.5–6. Age: late Albian.

fenestrata (Versteegh and Zevenboom in Versteegh, 1995, p.91–92, pl.4, figs.1–7) Heilmann-Clausen and Van Simaey, 2005, p.166. Holotype: Versteegh, 1995, pl.4, figs.1,4. Originally *Piccoladinium*, subsequently (and now) *Hapsocysta*. Age: early Chattian–mid Piacenzian.

kysingensis Heilmann-Clausen and Van Simaey, 2005, p.166,168–170, pl.5, figs.1–6; text-fig.7A–C. Holotype: Heilmann-Clausen and Van Simaey, 2005, pl.5, figs.1–2; text-fig.7A. Age: late Eocene.

**peridictya* (Eisenack and Cookson, 1960, p.8, pl.3, figs.5–6) Davey, 1979b, p.556. Emendation: Davey, 1979b, p.556, as *Hapsocysta peridictya*. Holotype: Eisenack and Cookson, 1960, pl.3 fig.6; Fensome et al., 1995, fig.2 — p.1661; Heilmann-Clausen and Van Simaey, 2005, text-figs.6A–B. Originally *Cannosphaeropsis*, subsequently *Cannosphaeropsis?*, thirdly (and now) *Hapsocysta*. Age: late Albian–Cenomanian.

"*spinosa*" Robertson Research International in Riding and Helby, 2001h, p.227. **Name not validly published:** no description. **Taxonomic senior synonym:** *Cannosphaeropsis australis*, according to Riding and Helby (2001h, p.227).

susanae Duxbury, 2002, p.78–80, pl.1, figs.1–6,9; text-figs.3–5. Holotype: Duxbury, 2002, pl.1, figs.1–2; text-fig.3. Age: early-middle Albian.

"**HASHENIA**" Yu Jingxian and Zhang Wangping, 1980, p.107. **Taxonomic senior synonym:** *Canningia*, according to Chen et al. (1988, p.16). Type: Yu Jingxian and Zhang Wangping, 1980, pl.2, fig.1, as *Hashenia reticulata*.

reticulata* Yu Jingxian and Zhang Wangping, 1980, p.107, pl.1, fig.17; pl.2, figs.1–2. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.2, fig.1. **Substitute name: *Canningia xinjiangensis*. Originally *Hashenia reticulata*, subsequently (and now) *Canningia xinjiangensis*. Age: Turonian–Maastrichtian.

"**HEADINIUM**" Zevenboom and Santarelli in Zevenboom, 1995, p.152. **Name not validly published:** considered a manuscript name. Type: Zevenboom, 1995, pl.3, figs.7–9, as *Headinium miocenicum*.

"**miocenicum*" Zevenboom and Santarelli in Zevenboom, 1995, p.152–153, pl.3, figs.7–12. Holotype: Zevenboom, 1995, pl.3, figs.7–9. **Name not validly published:** considered a manuscript name. Age: late middle Miocene–late Miocene.

HEBECYSTA Bujak and Fisher, 1976, p.64. Type: Bujak and Fisher, 1976, pl.9, fig.11, as *Hebecysta brevicornuta*.

balmei (Stover and Helby, 1987a, p.109–110, figs.7A–H) Below, 1987a, p.126. Emendation: Below, 1987a, p.126, as *Hebecysta balmei*. Holotype: Stover and Helby, 1987a, figs.7A–B; Fensome et al., 1996, figs.1–2 — p.2061. Originally *Heibergella*, subsequently (and now) *Hebecysta*. Age: Norian.

**brevicornuta* Bujak and Fisher, 1976, p.64, pl.9, figs.11–15; text-figs.6A–B. Holotype: Bujak and Fisher, 1976, pl.9, fig.11. Age: Norian.

HEIBERGELLA Bujak and Fisher, 1976, p.52,54. Type: Bujak and Fisher, 1976, pl.8, figs.1–2, as *Heibergella asymmetrica*.

aculeata Bujak and Fisher, 1976, p.56,58, pl.8, figs.14–20; text-fig.4D. Holotype: Bujak and Fisher, 1976, pl.8, figs.14–16. Age: Norian.

**asymmetrica* Bujak and Fisher, 1976, p.54,56, pl.8, figs.1–8; text-figs.4A–B. Holotype: Bujak and Fisher, 1976, pl.8, figs.1–2. Age: Norian.

"*balmei*" Stover and Helby, 1987a, p.109–110, figs.7A–H. Emendation: Below, 1987a, p.126, as *Hebecysta balmei*. Holotype: Stover and Helby, 1987a, figs.7A–B; Fensome et al., 1996, figs.1–2 — p.2061. **NOW** *Hebecysta*. Originally *Heibergella*, subsequently (and now) *Hebecysta*. Age: Norian.

circularis He Chengquan and Li Peng, 1981, p.65, pl.31, figs.1–2. Holotype: He Chengquan and Li Peng, 1981, pl.31, fig.1. Age: late Oligocene.

kendelbachia (Morbey, 1975, p.38, pl.14, figs.1–4; pl.17, figs.1–3) Lentin and Williams, 1981, p.127. Holotype: Morbey, 1975, pl.14, fig.1; pl.17, fig.1. Originally *Rhombodella* (Appendix A), subsequently *Chytroeisphaeridia*, thirdly (and now) *Heibergella*. Below (1987a, p.94) considered *Suessia swabiana* to be the questionable taxonomic senior synonym of this species. Age: Rhaetian.

salebrosacea Bujak and Fisher, 1976, p.56, pl.8, figs.9–13; text-fig.4C. Holotype: Bujak and Fisher, 1976, pl.8, figs.9–10. Age: Norian.

"**HELBYCYSTA**" Morgan in Riding and Helby, 2001d, p.79. **Name not validly published:** no description. **Taxonomic senior synonym:** *Fusiformacysta*, by implication in Riding and Helby (2001d, p.79), who included the two species names, *Helbycysta psilata* and *Helbycysta verrucosa* (both names not validly published), in synonymy with *Fusiformacysta terniana* and *Fusiformacysta challisiana* respectively.

"*psilata*" Morgan in Riding and Helby, 2001d, p.79. **Name not validly published:** no description. **Taxonomic senior synonym:** *Fusiformacysta terniana*, according to Riding and Helby (2001d, p.79).

"*verrucosa*" Morgan in Riding and Helby, 2001e, p.119. **Name not validly published:** no description. **Taxonomic senior synonym:** *Fusiformacysta challisiana*, according to Riding and Helby (2001e, p.119).

HELBYDINIUM Snape, 1992, p.273. Type: Snape, 1992, figs.6a,e, as *Helbydinium scabratum*.

**scabratum* Snape, 1992, p.273,275, figs.6a–b,e. Holotype: Snape, 1992, figs.6a,e. Age: Tithonian.

"**HELIODINIUM**" Alberti, 1961, p.33. Emendation: Sarjeant, 1966b, p.142. **Taxonomic senior synonym:** *Hystrichodinium*, according to Clarke and Verdier (1967, p.37–38) and Lentin and Williams (1977b, p.72). Type: Alberti, 1961, pl.8, fig.2, as *Heliodium voigtii*.

"**patriciae**" Neale and Sarjeant, 1962, p.451–452, pl.19, fig.3; text-fig.7. Holotype: Neale and Sarjeant, 1962, pl.19, fig.3; text-fig.7. **NOW** *Hystrichodinium*. Originally *Heliodium*, subsequently (and now) *Hystrichodinium*. Age: Hauterivian.

"***voigtii**" Alberti, 1961, p.33, pl.8, figs.1–5. Emendation: Sarjeant, 1966b, p.142–144, as *Heliodium voigtii*. Holotype: Alberti, 1961, pl.8, fig.2. **NOW** *Hystrichodinium*. Originally *Heliodium*, subsequently (and now) *Hystrichodinium*. Age: Barremian–early Aptian.

"**HEMICYSTODINIUM**" Wall, 1967, p.110. **Taxonomic senior synonym:** *Polysphaeridium*, according to Bujak et al. (1980, p.34). Type: Rossignol, 1962, pl.2, fig.10, as *Hystrichosphaeridium zoharyi*.

"**congregatum**" Stover, 1977, p.79, pl.3, figs.39–44. Holotype: Stover, 1977, pl.3, figs.39–42. **NOW** *Polysphaeridium*. Originally *Hemicystodinium*, subsequently (and now) *Polysphaeridium*. Age: middle Oligocene.

"**parvum**" Huang Tsengchieng, 1981, p.50, pl.2, figs.1–2. Holotype: Huang Tsengchieng, 1981, pl.2, figs.1–2. **NOW** *Polysphaeridium*. Originally *Hemicystodinium*, subsequently (and now) *Polysphaeridium*. Age: Miocene.

"**taiwanianum**" Huang Tsengchieng, 1981, p.50, pl.2, figs.3–4. Holotype: listed but illustration not specified. **NOW** *Polysphaeridium*. Originally *Hemicystodinium*, subsequently (and now) *Polysphaeridium*. Age: Miocene.

"**?taugourdeau**" (Varma and Dangwal, 1964, p.68, pl.2, fig.9) Sarjeant and Stover, 1978, p.51. Holotype: Varma and Dangwal, 1964, pl.2, fig.9. Originally *Tenua* Eisenack, subsequently *Hemicystodinium?*, thirdly *Batiacasphaera*. **Taxonomic senior synonym:** *Polysphaeridium subtile*, according to Lentin and Williams (1993, p.275). Taxonomic senior synonym: *Hystrichosphaeridium* (now *Polysphaeridium*) *zoharyi*, according to Lentin and Williams (1981, p.26,127) — however, *Tenua taugourdeau* is now considered a taxonomic junior synonym of *Polysphaeridium subtile*. Questionable assignment: Sarjeant and Stover (1978, p.51). Age: Eocene–Oligocene.

"***zoharyi**" (Rossignol, 1962, p.132, pl.2, fig.10) Wall, 1967, p.110. Holotype: Rossignol, 1962, pl.2, fig.10. **NOW** *Polysphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?* (combination not validly published), thirdly *Hemicystodinium*, fourthly (and now) *Polysphaeridium*. Taxonomic junior synonyms: *Polysphaeridium subtile*, according to Islam (1983b, p.343) — however, Lentin and Williams (1989, p.300) retained *Polysphaeridium subtile*; *Tenua* (as *Hemicystodinium?*) *taugourdeau*, according to Lentin and Williams (1981, p.26,127) — however, *Tenua taugourdeau* is now considered a taxonomic junior synonym of *Polysphaeridium subtile*; *Membranilarnacia delicata*, according to Jain and Garg (1991, p.82). Motile equivalent: *Pyrodinium bahamense* Plate, 1906, according to Wall and Dale (1969, p.140); *Pyrodinium bahamense* var. *compressum* Böhm, 1931, according to Matsuoka (1989, p.220). Age: Pleistocene.

"subsp. **ktana**" (Rossignol, 1964, p.88, pl.2, figs.6–7,10; pl.3, fig.11) Lentin and Williams, 1973, p.67. Holotype: Rossignol, 1964, pl.2, fig.7. **NOW** *Polysphaeridium zoharyi* subsp. *ktana*. Originally *Hystrichosphaeridium zoharyi* var. *ktana*, subsequently *Hemicystodinium zoharyi* var. *ktana* (combination not validly published), thirdly *Hemicystodinium zoharyi* subsp. *ktana*, fourthly (and now) *Polysphaeridium zoharyi* subsp. *ktana*, fifthly *Polysphaeridium subtile* subsp. *ktana*. Taxonomic junior synonym (at subspecific rank): *Hystrichosphaeridium?* *breviatum*, according to Islam (1983b, p.343) — however, Masure and Foucher in Fauconnier and Masure (2004, p.309–310) retained *Hystrichosphaeridium?* *breviatum*. Age: Pleistocene.

"var. **ktana**" (Rossignol, 1964, p.88, pl.2, figs.6–7,10; pl.3, fig.11) Harland and Downie, 1969, p.232. Holotype: Rossignol, 1964, pl.2, fig.7. **Combination not validly published:** basionym not fully referenced. **NOW** *Polysphaeridium zoharyi* subsp. *ktana*. Originally *Hystrichosphaeridium zoharyi* var. *ktana*, subsequently *Hemicystodinium zoharyi* var. *ktana* (combination not validly published), thirdly

Hemicystodinium zoharyi subsp. *ktana*, fourthly *Polysphaeridium zoharyi* subsp. *ktana*, fifthly *Polysphaeridium subtile* subsp. *ktana*. Taxonomic junior synonym (at subspecific rank): *Hystrichosphaeridium? breviatum*, according to Islam (1983b, p.343) — however, Masure and Foucher in Fauconnier and Masure (2004, p.309–310) retained *Hystrichosphaeridium? breviatum*. Age: Pleistocene.

"subsp. *zoharyi*". Autonym. Holotype: Rossignol, 1962, pl.2, fig.10. **NOW** *Polysphaeridium zoharyi* subsp. *zoharyi*. Originally *Hemicystodinium zoharyi* subsp. *zoharyi*, subsequently (and now) *Polysphaeridium zoharyi* subsp. *zoharyi*. Age: Pleistocene.

HEMIPLACOPHORA Cookson and Eisenack, 1965a, p.125. Type: Cookson and Eisenack, 1965a, pl.14, figs.4–5, as *Hemiplacophora semilunifera*.

**semilunifera* Cookson and Eisenack, 1965a, p.126, pl.14, figs.4–9,16. Holotype: Cookson and Eisenack, 1965a, pl.14, figs.4–5; Fauconnier and Masure, 2004, pl.29, figs.6–9. Age: late Eocene.

HEMISPHAERIDIUM Bujak in Bujak et al., 1980, p.56. Type: Bujak et al., 1980, pl.15, fig.7, as *Hemisphaeridium fenestratum*.

**fenestratum* Bujak in Bujak et al., 1980, p.56,58, pl.15, figs.7–9. Holotype: Bujak et al., 1980, pl.15, fig.7; Fensome et al., 1993a, fig.1 — p.1187. Age: middle Eocene (see Aubry, 1986).

"**HEMISTOMIOSPHAERA**" Nowak, 1968, p.311–312. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1300). **Taxonomic senior synonym:** *Cadosina*, according to Řehánek and Cecca (1993, p.155). Type: I. Nagy, 1966, pl.5, fig.17, as *Cadosina parvula*.

"**parvula*" (I. Nagy, 1966, p.93, pl.5, fig.17) Nowak, 1968, p.312. Holotype: I. Nagy, 1966, pl.5, fig.17. **NOW** *Cadosina*. Originally (and now) *Cadosina*, subsequently *Hemistomiosphaera*. This species is retained in *Cadosina* since *Hemistomiosphaera* is now considered a taxonomic junior synonym of that genus. Age: Kimmeridgian.

HEPTASPHAERA Keupp, 1979a, p.41–42. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1300). Type: Keupp, 1979a, pl.11, fig.6, as *Heptasphaera michaelii*.

**michaelii* Keupp, 1979a, p.42–43, pl.11, figs.6–12. Holotype: Keupp, 1979a, pl.11, fig.6. Age: early Barremian.

paulaworstelliae (Bolli, 1978b, p.912, pl.1, figs.1–12) Lentin and Williams, 1985, p.379. Holotype: Bolli, 1978b, pl.1, figs.7–9. Originally *Bonetocardiella*, subsequently (and now) *Heptasphaera*. This combination was not validly published in Keupp (1981, p.57), since that author did not fully reference the basionym. Fensome and Williams (2004) were incorrect in considering this name to be not validly published; see discussion under *Bonetocardiella*. Age: Oxfordian–Kimmeridgian.

HERENDEENIA Wiggins, 1969, p.145–146. Taxonomic senior synonym: *Omatia*, according to Stover and Evitt (1978, p.280) — however, Stover and Helby (1987b, p.153–154) retained *Herendeenia*. Stover and Helby (1987b, p.153–154) gave a "redescription" of this genus. Type: Cookson and Eisenack, 1958, pl.8, fig.6, as *Omatia pisciformis*.

alaskaensis (Stover and Evitt, 1978, p.178) Stover and Helby, 1987b, p.155. Holotype: Wiggins, 1969, pl.1, figs.1–3, as *Herendeenia pisciformis*. Originally *Omatia*, subsequently (and now) *Herendeenia*. Stover and Helby (1987b, p.155–156) provided a revised description for this species. Age: Neocomian, ?late Hauterivian–Barremian.

**pisciformis* (Cookson and Eisenack, 1958, p.61, pl.8, fig.6) Wiggins, 1969, p.146. Emendation: Stover and Helby, 1987b, p.154, as *Herendeenia pisciformis*, as a revised description. Holotype: Cookson and Eisenack, 1958, pl.8,

fig.6. Originally *Omatia*, subsequently (and now) *Herendeenia*. Stover and Helby (1987b, p.154) retained this species in *Herendeenia*. Age: Late Jurassic.

postprojecta Stover and Helby, 1987c, p.238–241, figs.10A–D,11A–N,12A–L. Holotype: Stover and Helby, 1987c, figs.11A–E; Fensome et al., 1996, figs.1–5 — p.2295. Age: Hauterivian–Aptian.

HESLERTONIA Sarjeant, 1966b, p.133. Emendation: Duxbury, 1980, p.123. Type: Neale and Sarjeant, 1962, pl.19, fig.5; text-fig.1, as *Gonyaulax heslertonensis*.

cylindrata Yun Hyesu, 1981, p.72, pl.8, figs.3a–b,11; text-figs.15a–b. Holotype: Yun Hyesu, 1981, pl.8, figs.3a–b; text-figs.15a–b; Fensome et al., 1991, figs.1–4 — p.637. Age: early Santonian.

**heslertonensis* (Neale and Sarjeant, 1962, p.440–441, pl.19, fig.5; pl.20, fig.5; text-figs.1a–b) Sarjeant, 1966b, p.133. Emendation: Duxbury, 1980, p.124, as *Heslertonia heslertonensis*. Holotype: Neale and Sarjeant, 1962, pl.19, fig.5; text-figs.1a–b. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Heslertonia*. Age: Hauterivian.

?*pellucida* Gitmez, 1970, p.297–299, pl.4, fig.12; pl.14, fig.2; text-fig.26. Holotype: Gitmez, 1970, pl.14, fig.2; text-fig.26. Questionable assignment: Poulsen (1996, p.84). Age: early Kimmeridgian.

regula Yun Hyesu, 1981, p.72–73, pl.5, fig.12; pl.8, figs.1,2a–b,4,8. Holotype: Yun Hyesu, 1981, pl.8, figs.2a–b; Fensome et al., 1991, figs.2–3 — p.727. N.I.A. Age: early Santonian.

senecta Harding, 1990b, p.27, pl.8, figs.1–11; text-fig.10 ex Harding in Williams et al. 1998, p.265. Holotype: Harding, 1990b, pl.8, fig.1. This name was not validly published in Harding (1990b) since the lodgement of the holotype was not specified (I.C.N. Article 40.7). Age: late Barremian.

striata (Eisenack and Cookson, 1960, p.9, pl.3, figs.10–11) Norvick, 1976, p.47. Holotype: Eisenack and Cookson, 1960, pl.3, fig.11. Originally *Cymatiosphaera* (Appendix A), subsequently (and now) *Heslertonia*. Age: Cenomanian.

"*teichophera*" (Sarjeant, 1961a, p.107–108, pl.15, fig.9; text-figs.9a–b) Sarjeant, 1976c, p.8. Emendation: Below, 1990, p.42–43, as *Arkellea teichophera*. Holotype: Sarjeant, 1961a, pl.15, fig.9; text-figs.9a–b; Sarjeant, 1976c, pl.6, fig.3. **NOW** *Arkellea*. Originally *Cymatiosphaera* (Appendix A), subsequently *Heslertonia*, thirdly (and now) *Arkellea*. Age: early Oxfordian.

HETERAULACACYSTA Drugg and Loeblich Jr., 1967, p.183. Emendation: Bujak in Bujak et al., 1980, p.58. Type: Drugg and Loeblich Jr., 1967, pl.1, figs.8a–c, as *Heteraulacacysta campanula*.

**campanula* Drugg and Loeblich Jr., 1967, p.183–184, pl.1, figs.6–7,8a–c; text-fig.2. Holotype: Drugg and Loeblich Jr., 1967, pl.1, figs.8a–c. N.I.A. Age: middle Eocene.

everriculata Islam, 1983a, p.237, pl.2, figs.9–10. Holotype: Islam, 1983a, pl.2, fig.9. Age: early Eocene.

fehmarrensis Lentin and Williams, 1973, p.67 ex Williams et al., 1998, p.265. Holotype: Morgenroth, 1966a, pl.2, fig.8, as *Goniodoma polyedrica*, designated by Williams et al., 1998, p.265. Originally *Heteraulacacysta* (name not validly published), subsequently *Dinopterygium* (name not validly published), thirdly (and now) *Heteraulacacysta*. Jan du Chêne and Adediran (1985, p.17) proposed the retention of this species in *Heteraulacacysta*. This name was not validly published in Lentin and Williams (1973, p.67) since effectively no holotype was designated. Lentin and Williams cited Morgenroth, 1966a, pl.2, figs.7–8 as holotype; however, these figures represent separate specimens. Age: early Eocene.

granulata Jan du Chêne and Adediran, 1985, p.14–15, pl.19, fig.8; text-figs.3h–3i. Holotype: Jan du Chêne and Adediran, 1985, pl.19, fig.8. Age: late Paleocene–early Eocene.

leptalea Eaton, 1976, p.305–306, pl.21, figs.1–2. Holotype: Eaton, 1976, pl.21, fig.1; Bujak et al., 1980, pl.10, fig.7. Questionable assignment: Eaton (1976, p.305); however, Bujak in Bujak et al. (1980, p.60) assigned the species to *Heteraulacacysta* without question. Age: middle-late Eocene.

"**polyedrica**" (Pouchet, 1883, p.42, fig.34) Eisenack and Kjellström, 1972, p.445. Holotype: Pouchet, 1883, fig.34. **NOW** *Goniodoma* (Appendix B). Originally *Peridinium* (Appendix B), subsequently (and now) *Goniodoma* (Appendix B), thirdly *Heteraulacacysta*. Age: extant.

porosa Bujak in Bujak et al., 1980, p.62, pl.15, figs.10–13; text-figs.14B–C. Holotype: Bujak et al., 1980, pl.15, fig.10. Age: middle Eocene (see Aubry, 1986).

pustulata Jan du Chêne and Adediran, 1985, p.15, pl.19, figs.1–7,9–10; text-figs.3d–3g. Holotype: Jan du Chêne and Adediran, 1985, pl.19, fig.1. Age: late Paleocene–early Eocene.

"**verricula**" (Piasecki, 1980, p.66–67, pl.1, figs.4–8; pl.5, figs.5–6) Lentin and Williams, 1981, p.128. Holotype: Piasecki, 1980, pl.1, figs.7–8. **NOW** *Gramocysta*. Originally *Dinopterygium*, subsequently *Heteraulacacysta*, thirdly (and now) *Gramocysta*. Age: late Miocene.

HETEROSPHAERIDIUM Cookson and Eisenack, 1968, p.115. Emendation: Yun Hyesu, 1981, p.45–46. Type: Cookson and Eisenack, 1968, text-fig.4H, as *Heterosphaeridium conjunctum*.

"**araneosum**" (Brideaux, 1977, p.22–23, pl.9, figs.1–3) Islam, 1993, p.84. Holotype: Brideaux, 1977, pl.9, figs.1–2. **NOW** *Circulodinium*?. Originally *Cleistosphaeridium*, subsequently *Heterosphaeridium*, thirdly (and now) *Circulodinium*?. Islam (1993, p.84) cited the basionym as *Hystrichosphaeridium araneosum*. Age: Aptian–Albian.

bellii Radmacher et al., 2014, p.31–33, pl.1, figs.1–9. Holotype: Radmacher et al., 2014, pl.1, figs.1–3,9. Age: late Campanian–Maastrichtian.

***conjunctum** Cookson and Eisenack, 1968, p.115; text-figs.4G–H. Holotype: Cookson and Eisenack, 1968, text-fig.4H; Fauconnier and Masure, 2004, pl.36, fig.1. Age: Santonian–early Campanian.

cordiforme Yun Hyesu, 1981, p.46–47, pl.3, figs.4,7,10,15. Holotype: Yun Hyesu, 1981, pl.3, fig.15; Fensome et al., 1991, fig.4 — p.629; Fauconnier and Masure, 2004, pl.35, figs.1–3. Age: early Santonian.

difficile (Manum and Cookson, 1964, p.12–14, pl.3, figs.1–3,7) Ioannides, 1986, p.24. Holotype: Manum and Cookson, 1964, pl.3, fig.1; Fauconnier and Masure, 2004, pl.36, figs.2–4. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*? (combination not validly published), thirdly (and now) *Heterosphaeridium*. Age: Cenomanian.

?**galiciae** Masure, 1988c, p.439, pl.2, figs.5A–C,6A–B,7. Holotype: Masure, 1988c, pl.2, figs.5A–C; Fauconnier and Masure, 2004, pl.37, figs.7–9. Questionable assignment: Masure (1988c, p.439). Age: early Valanginian–mid Barremian.

heteracanthum (Deflandre and Cookson, 1955, p.276, pl.2, figs.5–6; text-figs.40–41) Eisenack and Kjellström, 1972, p.451. Emendation: Radmacher et al., 2014, p.33,36, as *Heterosphaeridium heteracanthum*. Holotype: Deflandre and Cookson, 1955, pl.2, fig.5; Fauconnier and Masure, 2004, pl.35, figs.7–8. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly (and now) *Heterosphaeridium*, fifthly *Heterosphaeridium*? Questionable assignment: Stover and Evitt (1978, p.52); however, Fauconnier and Begouën in Fauconnier and Masure (2004, p.269) considered that this species should be assigned to *Heterosphaeridium* without question. Age: ?Late Cretaceous–early Eocene.

subsp. **heteracanthum**. Autonym. Holotype: Deflandre and Cookson, 1955, pl.2, fig.5; Fauconnier and Masure, 2004, pl.35, figs.7–8. Originally *Hystrichosphaeridium heteracanthum* subsp. *heteracanthum*,

subsequently (and now) *Heterosphaeridium heteracanthum* subsp. *heteracanthum*, thirdly *Heterosphaeridium? heteracanthum* subsp. *heteracanthum*.

?subsp. *sparsiprocessum* (Varma and Dangwal, 1964, p.64, pl.1, fig.7) Eisenack and Kjellström, 1972, p.453. Holotype: Varma and Dangwal, 1964, pl.1, fig.7. Originally *Hystrichosphaeridium heteracanthum* subsp. *sparsiprocessum*, subsequently *Heterosphaeridium heteracanthum* subsp. *sparsiprocessum*, thirdly *Heterosphaeridium? heteracanthum* subsp. *sparsiprocessum*, fourthly (and now) *Heterosphaeridium heteracanthum? subsp. sparsiprocessum*. Questionable assignment: Fauconnier and Begouën in Fauconnier and Masure (2004, p.270) as a problematic taxon, suggesting that the name be restricted to the holotype. Age: Eocene–Oligocene.

"*latoaculeum*" (Yun Hyesu, 1981, p.42–43, pl.11, figs.17–19) Islam, 1993, p.84. Holotype: Yun Hyesu, 1981, pl.11, fig.18; Fensome et al., 1991, fig.2 — p.657; fig.2 — p.693 (mislabelled as *Cleistosphaeridium multifurcatum* subsp. *multifurcatum*); Fensome et al., 1993a, fig.2 — p.1261; Fauconnier and Masure, 2004, pl.35, figs.9–10. **NOW** *Circulodinium latoaculeum*. Originally *Cleistosphaeridium multifurcatum* subsp. *latoaculeum*, subsequently *Heterosphaeridium latoaculeum*, thirdly (and now) *Circulodinium latoaculeum*. Age: early Santonian.

"*multifurcatum*" (Deflandre, 1937b, p.76, pl.16 [al. pl.13], figs.1–3) Islam, 1993, p.84. Emendation: Masure in Fauconnier and Masure, 2004, p.270, as *Exochosphaeridium multifurcatum*. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), figs.1–2; Fensome et al., 1991, figs.1–2 — p.691; fig.1 — p.693; Fensome et al., 1993a, fig.1 — p.1261; figs.1–2 — p.1265; Fauconnier and Masure, 2004, pl.37, figs.10–11. **NOW** *Exochosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Cleistosphaeridium?*, fifthly *Heterosphaeridium*, sixthly (and now) *Exochosphaeridium*. Age: Late Cretaceous.

spinaconjunctum Yun Hyesu, 1981, p.47, pl.3, figs.8,11–12. Holotype: Yun Hyesu, 1981, pl.3, fig.11; Fensome et al., 1991, fig.2 — p.749; Fauconnier and Masure, 2004, pl.37, figs.1–2. Age: early Santonian.

verdiei Yun Hyesu, 1981, p.48, pl.3, figs.3,5. Holotype: Yun Hyesu, 1981, pl.3, fig.5; Fensome et al., 1991, fig.2 — p.767; Fauconnier and Masure, 2004, pl.37, figs.4–5. Age: early Santonian.

HEXAGONIFERA Cookson and Eisenack, 1961a, p.73. Emendations: Cookson and Eisenack, 1962b, p.496; Stover and Evitt, 1978, p.107–108. Type: Cookson and Eisenack, 1961a, pl.12, fig.11, as *Hexagonifera glabra*.

"?*chlamydata*" Cookson and Eisenack, 1962b, p.496, pl.7, figs.1–3,5–8. Emendations: Fechner, 1985, p.119 and Marheinecke, 1992, p.88, both as *Leberidocysta chlamydata*. Holotype: Cookson and Eisenack, 1962b, pl.7, fig.2; Fensome et al., 1993a, fig.2 — p.1049. **NOW** *Leberidocysta*. Originally *Hexagonifera*, subsequently *Hexagonifera?*, thirdly (and now) *Leberidocysta*, fourthly *Polygonifera*. Questionable assignment: Lentin and Williams (1976, p.84). Age: Albian–Cenomanian.

"*cylindrica*" (Habib, 1970, p.374, pl.10, fig.2) Habib, 1972, p.378. Emendations: Prauss, 1989, p.47–48, Riding, 1994, p.18 and Feist-Burkhardt and Monteil, 1994, p.7, all as *Wallodinium cylindricum*. Holotype: Habib, 1970, pl.10, fig.2. **NOW** *Wallodinium*. Originally *Prismatocystis* (Appendix A), subsequently *Hexagonifera*, thirdly (and now) *Wallodinium*. Taxonomic junior synonym: *Fromea* (now *Andreedinium*) *elongata*, according to Duxbury (1983, p.68) — however, Feist-Burkhardt and Monteil in Feist-Burkhardt (1990, p.615) retained *Fromea* (as *Andreedinium*) *elongata*. Age: Albian–Cenomanian.

"*defloccata*" Davey and Verdier, 1973, p.198, pl.3, figs.6,8. Holotype: Davey and Verdier, 1973, pl.3, fig.8. **NOW** *Leberidocysta*. Originally *Hexagonifera*, subsequently *Thalassiphora*, thirdly (and now) *Leberidocysta*, fourthly *Disphaeria*, fifthly *Craspedodinium*. Age: late Albian–early Cenomanian.

**glabra* Cookson and Eisenack, 1961a, p.74, pl.12, figs.9–13. Holotype: Cookson and Eisenack, 1961a, pl.12, fig.11. Age: Senonian.

"*jurassica*" Gitmez and Sarjeant, 1972, p.240–241, pl.14, figs.5,8. Emendation: Poulsen and Riding, 1992, p.28, as *Senoniasphaera jurassica*. Holotype: Gitmez and Sarjeant, 1972, pl.14, fig.5; Poulsen and Riding, 1992, text-

figs.3C–D. **NOW** *Senoniasphaera*. Originally *Hexagonifera*, subsequently (and now) *Senoniasphaera*, thirdly *Ambonosphaera*. Taxonomic senior synonym: *Meiourogonyaulax* (now *Lithodinia?*) *staffinensis*, according to Williams et al. (1993, p.32) — however, in the same publication, Williams et al. (1993, p.56) retained *Hexagonifera* (now *Senoniasphaera*) *jurassica*. Age: Kimmeridgian.

"?*laticaudata*" Vozzhennikova, 1967, p.125–126, pl.54, fig.1. Holotype: Vozzhennikova, 1967, pl.54, fig.1; Lentin and Vozzhennikova, 1990, text-fig.30; lost according to Lentin and Vozzhennikova (1990, p.59). **NOW** *Leberidocysta?*. Originally *Hexagonifera*, subsequently *Hexagonifera?*, thirdly (and now) *Leberidocysta?*. Questionable assignment: Lentin and Williams (1976, p.85). Age: Santonian.

"*perforata*" Wilson in Slimani, 2001a, p.194. **Name not validly published**: no description. **Taxonomic senior synonym**: *Pterospermopsis* (now *Thalassiphora?*) *spinosa*, according to Slimani (2001a, p.194).

"*reticulata*" Khanna and Singh, 1981b, p.391, fig.1, nos.4,6; text-fig.3. Holotype: Khanna and Singh, 1981b, fig.1, no.4. **NOW** *Senoniasphaera?*. Originally *Hexagonifera*, subsequently (and now) *Senoniasphaera?*. This name was not validly published in Singh et al. (1979, p.35–36), Khanna (1979, p.216) and Khanna et al. (1981, p.261) since no description was provided. Age: early-middle Eocene.

"*sahii*" Khanna and Singh, 1981b, p.391,393, fig.2, nos.1–3; fig.4, no.4; text-figs.4–5. Holotype: Khanna and Singh, 1981b, fig.2, no.2. **NOW** *Batiacasphaera?*. Originally *Hexagonifera*, subsequently (and now) *Batiacasphaera?*. This name was not validly published in Singh et al. (1979, p.35–36), Khanna (1979, p.216) and Khanna et al. (1981, p.261) since no description was provided. Age: early-middle Eocene.

"?*scabrata*" Jain and Taugourdeau-Lantz, 1973, p.64, pl.4, figs.11–12. Holotype: Jain and Taugourdeau-Lantz, 1973, pl.4, fig.11. **NOW** *Ovoidinium*. Originally *Hexagonifera*, subsequently *Leberidocysta?*, thirdly *Hexagonifera?*, fourthly (and now) *Ovoidinium*. Questionable assignment: Mehrotra and Sarjeant (1984c, p.50). Age: Early Cretaceous.

"*suspecta*" Manum and Cookson, 1964, p.9–10, pl.1, figs.9–13. Holotype: Manum and Cookson, 1964, pl.1, fig.9. **NOW** *Trithyrodinium*. Originally *Hexagonifera*, subsequently (and now) *Trithyrodinium*, thirdly *Deflandrea*. Age: Cenomanian.

"*vermiculata*" Cookson and Eisenack, 1961a, p.74, pl.12, figs.6–8. Holotype: Cookson and Eisenack, 1961a, pl.12, fig.6. **NOW** *Trithyrodinium*. Originally *Hexagonifera*, subsequently (and now) *Trithyrodinium*. Age: Senonian.

"*verrucosa*" Wilson in Slimani, 1994, p.111. **Name not validly published**: no description or illustration. **Taxonomic senior synonym**: *Leberidocysta?* *microverrucosa*, according to Slimani (2001a, p.193).

"**HEXASPHAERA**" Clarke and Verdier, 1967, p.42. **Name illegitimate** — **nomenclatural senior synonym**: *Callaiosphaeridium* Davey and Williams, 1966b, which has the same type. Junior homonym: *Hexasphaera* Keupp, 1987. Type: Deflandre and Courteville, 1939, pl.4, fig.1, as *Hystrichosphaeridium asymmetricum*.

"**asymmetrica*" (Deflandre and Courteville, 1939, p.100–101, pl.4, figs.1–2) Clarke and Verdier, 1967, p.43. Emendation: Clarke and Verdier, 1967, p.43, as *Hexasphaera asymmetrica*. Holotype: Deflandre and Courteville, 1939, pl.4, fig.1; Fensome et al., 1993a, fig.1 — p.949. **Combination illegitimate**: the generic name is illegitimate. **NOW** *Callaiosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Callaiosphaeridium*, thirdly *Hexasphaera* (combination illegitimate). Age: Senonian.

"**HEXASPHAERA**" Keupp, 1987, p.41. Emendation: Keupp and Kowalski, 1992, p.216, as *Keuppisphaera*. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1300). **Name illegitimate** — **senior homonym**: *Hexasphaera* Clarke and Verdier, 1967, p.42. **Substitute name**: *Keuppisphaera*. Keupp (1987, p.41) gave two additional spellings for *Hexasphaera*, *Hexasphaerae* and *Hexasphaera*. Type: Keupp, 1987, pl.6, figs.8–12, as *Hexasphaera radiata*.

"**radiata*" Keupp, 1987, p.41, pl.6, figs.8–12; text-fig.4. Emendation: Keupp and Kowalski, 1992, p.216–217, as *Keuppisphaera radiata*. Holotype: Keupp, 1987, pl.6, figs.8–12. **NOW** *Keuppisphaera*. Originally *Hexasphaera* (generic name illegitimate), subsequently (and now) *Keuppisphaera*. Following I.C.N. Article 55.1, the species name *Hexasphaera radiata* is validly published even though the generic name *Hexasphaera* is illegitimate. Age: Albian–early Cenomanian.

HISTIOCYSTA Davey, 1969a, p.138. Type: Davey, 1969a, pl.1, fig.5; text-figs.14A–B, as *Histiocysta palla*.

muendensis Kunz, 1990, p.30, pl.8, figs.20a–b,21; text-fig.10. Holotype: Kunz, 1990, pl.8, figs.20a–b; text-fig.10. Age: Tithonian.

outananensis Below, 1981a, p.55–56, pl.10, figs.18,19a–b,20a–b; pl.15, figs.8,9a–b; text-figs.55–58. Holotype: Below, 1981a, pl.10, figs.20a–b; text-fig.57; Fensome et al., 1991, figs.1–2 — p.703. Age: Hauterivian.

**palla* Davey, 1969a, p.138–140, pl.1, figs.5–6; text-figs.14A–B. Holotype: Davey, 1969a, pl.1, fig.5; text-figs.14A–B. Age: Cenomanian.

?*variornata* Slimani, 1994, p.18–19, pl.2, figs.19–20,24–33. Holotype: Slimani, 1994, pl.2, figs.19–20,30–33. Questionable assignment: Slimani (1994, p.18). Taxonomic junior synonym: *Chlamydophorella inconscripta* (name not validly published), according to Slimani (2001a, p.192). Age: late Campanian–early Maastrichtian.

HISTIOPHORA Klement, 1960, p.51. Type: Klement, 1960, pl.6, figs.11–13, as *Histiophora ornata*.

**ornata* Klement, 1960, p.51–53, pl.6, figs.11–14; text-figs.28–30. Holotype: Klement, 1960, pl.6, figs.11–13; Fauconnier and Masure, 2004, pl.37, figs.12–13. Age: Late Jurassic.

HOLMWOODINIUM Batten, 1985, p.432. Type: Batten, 1985, text-figs.3D,5K–L, as *Holmwoodinium notatum*.

**notatum* Batten, 1985, p.432,434, text-figs.3D–H,4M–O,5G–O. Holotype: Batten, 1985, text-figs.3D,5K–L; Fensome et al., 1995, figs.1–2,5 — p.1623. Age: late Barremian.

ovatum (He Chengquan and Li Peng, 1981, p.66, pl.31, fig.13) He Chengquan et al., 2009, p.441. Holotype: He Chengquan and Li Peng, 1981, pl.31, fig.13. Originally *Laciniadinium?*, subsequently (and now) *Holmwoodinium*. Age: late Oligocene.

HOMOTRYBLIUM Davey and Williams, 1966b, p.100. Type: Davey and Williams, 1966b, pl.12, fig.5, as *Homotryblium tenuispinosum*.

abbreviatum Eaton, 1976, p.267–268, pl.10, figs.2–4. Holotype: Eaton, 1976, pl.10, fig.3; Bujak et al., 1980, pl.1, figs.7–9. Age: early-middle Eocene (see Aubry, 1986).

aculeatum Williams, 1978, p.797, pl.4, figs.5–6,8–9. Holotype: Williams, 1978, pl.4, fig.9. Age: Eocene.

additense Dybkjær, 2004, p.52,55, pl.1, figs.1a–d,2a–b; pl.2, figs.1a–b,3a–b,4a–d,5a–b. Holotype: Dybkjær, 2004, pl.1, figs.1a–d. Age: latest Chattian and/or earliest Aquitanian.

?*bifurcatum* Caro, 1973, p.354,357, pl.2, fig.6. Holotype: Caro, 1973, pl.2, fig.6. Originally *Homotryblium*, subsequently (and now) *Homotryblium?*. Questionable assignment: Stover and Evitt (1978, p.210) as a problematic species. Age: middle Paleocene.

caliculum Bujak in Bujak et al., 1980, p.62,64, pl.16, fig.1. Holotype: Bujak et al., 1980, pl.16, fig.1. Age: middle Eocene (see Aubry, 1986).

conicum Gedl, 1995, p.202–203, pl.6, figs.1–4. Holotype: Gedl, 1995, pl.6, figs.3–4. Age: middle Eocene.

constrictum Islam, 1983c, p.86,88, pl.3, figs.1–2. Holotype: Islam, 1983c, pl.3, fig.1. Age: early Eocene.

deconinckii Islam, 1983b, p.340, pl.3, figs.1–3. Holotype: Islam, 1983b, pl.3, figs.1–2. Age: middle Eocene.

"**distinctum**" Salujha and Kindra, 1981, p.51, pl.2, fig.45–46. Holotype: Salujha and Kindra, 1981, pl.2, fig.45. **Taxonomic senior synonym:** *Xanthidium* (as and now *Spiniferites*) *ramosum*, according to Jain and Garg (1982, p.69), who considered *Homotryblium distinctum* to be a taxonomic junior synonym of *Spiniferites ramosus* subsp. *ramosus*. Age: Danian.

floripes (Deflandre and Cookson, 1955, p.276, pl.7, figs.1–2,7) Stover, 1975, p.36. Holotype: Deflandre and Cookson, 1955, pl.7, fig.1. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly (and now) *Homotryblium*. Taxonomic junior synonym: *Homotryblium plectilum*, according to Bujak in Bujak et al. (1980, p.64) — however, Stover in Lentin and Williams (1985, p.168) retained *Homotryblium plectilum*. Age: Early Tertiary.

subsp. **breviradiatum** (Cookson and Eisenack, 1961b, p.44, pl.2, figs.10–11) Lentin and Williams, 1977b, p.75. Holotype: Cookson and Eisenack, 1961b, pl.2, figs.10–11. Originally *Hystrichosphaeridium floripes* subsp. *breviradiatum*, subsequently *Cordosphaeridium floripes* subsp. *breviradiatum*, thirdly (and now) *Homotryblium floripes* subsp. *breviradiatum*. Age: late Eocene.

subsp. **floripes**. Autonym. Holotype: Deflandre and Cookson, 1955, pl.7, fig.1. Originally *Hystrichosphaeridium floripes* subsp. *floripes*, subsequently *Cordosphaeridium floripes* subsp. *floripes*, thirdly (and now) *Homotryblium floripes* subsp. *floripes*.

giganteum Salujha and Kindra, 1981, p.50–51, pl.2, fig.42. Holotype: Salujha and Kindra, 1981, pl.2, fig.42. Jain and Garg (1982, p.69) recommended that this name be restricted to the holotype. Age: Danian.

meghalayense Saxena and Rao, 1984, p.57, pl.2, figs.21–23. Holotype: Saxena and Rao, 1984, pl.2, fig.23. Age: early Miocene.

oceanicum Eaton, 1976, p.268, pl.10, figs.5–8. Holotype: Eaton, 1976, pl.10, fig.5; Bujak et al., 1980, pl.1, figs.10–12. Age: middle Eocene (see Aubry, 1986).

oujiangense Yu Jingxian, 1989, p.144, pl.47, figs.7–10,12,15–17. Holotype: Yu Jingxian, 1989, pl.47, fig.7. Age: Pleistocene.

"**pallidum**" Davey and Williams, 1966b, p.102–103, pl.12, figs.4,6; text-fig.22. Holotype: Davey and Williams, 1966b, pl.12, fig.6; Bujak et al., 1980, pl.1, figs.1–3. **Taxonomic senior synonym:** *Homotryblium tenuispinosum*, according to Edwards (1996, p.989). Age: early Eocene.

"subsp. **pallidum**". Autonym. Holotype: Davey and Williams, 1966b, pl.12, fig.6; Bujak et al., 1980, pl.1, figs.1–3. **Now redundant.**

"subsp. **variabile**" Yu Jingxian 1989, p.143–144, pl.47, figs.11,14. Holotype: Yu Jingxian 1989, pl.47, fig.11. **NOW** *Homotryblium tenuispinosum* subsp. *variabile*. Originally *Homotryblium pallidum* subsp. *variabile*, subsequently (and now) *Homotryblium tenuispinosum* subsp. *variabile*. Age: Pleistocene.

plectilum Drugg and Loeblich Jr., 1967, p.184–186, pl.2, figs.1–9; text-fig.3. Holotype: Drugg and Loeblich Jr., 1967, pl.2, fig.1. Taxonomic senior synonym: *Hystrichosphaeridium* (as *Homotryblium*) *floripes*, according to Bujak in Bujak et al. (1980, p.64) — however, Stover in Lentin and Williams (1985, p.168) retained *Homotryblium plectilum*. Taxonomic junior synonym: *Areoligera digitata*, according to Jain and Garg (1991, p.77). Age: Oligocene.

suggestatum Islam, 1983a, p.237–238, pl.2, figs.1,5. Holotype: Islam, 1983a, pl.2, fig.5. Age: early Eocene.

taiwanianum Shaw Chenglong, 1999b, p.186, figs.96–98. Holotype: Shaw Chenglong, 1999b, figs.96–98. Age: Eocene.

tasmaniense Cookson and Eisenack, 1967a, p.133–134, pl.20, figs.1–2. Holotype: Cookson and Eisenack, 1967a, pl.20, figs.1–2. Age: Paleocene.

**tenuispinosum* Davey and Williams, 1966b, p.101–102, pl.4, fig.11; pl.12, figs.1,5,7; text-fig.21. Holotype: Davey and Williams, 1966b, pl.12, fig.5. Taxonomic junior synonym: *Homotryblium pallidum*, according to Edwards (1996, p.989). Age: early Eocene.

subsp. *tenuispinosum*. Autonym. Holotype: Davey and Williams, 1966b, pl.12, fig.5.

subsp. *variabile* (Yu Jingxian, 1989, p.143–144, pl.47, figs.11,14) Williams et al. 1998, p.269. Holotype: Yu Jingxian, 1989, pl.47, fig.11. Originally *Homotryblium pallidum* subsp. *variabile*, subsequently (and now) *Homotryblium tenuispinosum* subsp. *variabile*. Age: Pleistocene.

terminale He Chengquan, 1991, p.128, pl.24, figs.7–8; text-fig.20. Holotype: He Chengquan, 1991, pl.24, fig.7; text-fig.20. Age: Paleocene.

umbellatum Islam, 1983b, p.340, pl.3, figs.7–8. Holotype: Islam, 1983b, pl.3, fig.7. Age: early Eocene.

vallum Stover, 1977, p.79–80, pl.3, figs.45–53. Holotype: Stover, 1977, pl.3, figs.45–48. Age: early Oligocene–early Miocene.

variabile Bujak in Bujak et al., 1980, p.64,66, pl.16, figs.4–9. Holotype: Bujak et al., 1980, pl.16, figs.4–5. Age: middle Eocene (see Aubry, 1986).

HOROLOGINELLA Cookson and Eisenack, 1962a, p.271. Emendations: Stover and Evitt, 1978, p.53–54; Backhouse, 1988, p.90; Pestchevitskaya, 2006, p. S635. Stover and Evitt (1978, p.54) considered that, of the species of *Horologinella* described to that date, only the "type species", *Horologinella lineata*, was a dinoflagellate. Pestchevitskaya (2006, p. S635) considered only *Horologinella lineata* and *Horologinella anabarensis* to be dinoflagellates. Type: Cookson and Eisenack, 1962a, pl.37, figs.1–2, as *Horologinella lineata*.

anabarensis Pestchevitskaya, 2001, p.96–100; text-figs.3–6; pl.I, figs.1–11; pl.II, figs.1–7. Holotype: Pestchevitskaya, 2001, pl.II, fig.2. Age: late Berriasian–Hauterivian.

angulata de Coninck, 1985, p.67–68, pl.1, figs.11–12. Holotype: de Coninck, 1985, pl.1, fig.11. Age: middle Eocene.

"*apiculata*" Cookson and Eisenack, 1962a, p.272, pl.37, fig.4. Holotype: Cookson and Eisenack, 1962a, pl.37, fig.4; Pestchevitskaya, 2001, pl.2, fig.13; Pestchevitskaya, 2003, pl.2, fig.6. **NOW** *Paucilobimorpha*? (Appendix A). Originally *Horologinella*, subsequently (and now) *Paucilobimorpha*?. Pestchevitskaya (2001, p.106; 2003, p.53) included this species in *Horologinella* but did not mention its transfer to *Paucilobimorpha*. Age: Campanian.

"*biconvexa*" Jiabo, 1978, p.95, pl.29, figs.20–21. Holotype: Jiabo, 1978, pl.29, fig.21. **NOW** *Tetrachacysta*. Originally *Horologinella*, subsequently (and now) *Tetrachacysta*. Age: Early Tertiary.

"subsp. *biconvexa*". Autonym. Holotype: Jiabo, 1978, pl.29, fig.21. **NOW** *Tetrachacysta biconvexa* subsp. *biconvexa*. Originally *Horologinella biconvexa* subsp. *biconvexa*, subsequently (and now) *Tetrachacysta biconvexa* subsp. *biconvexa*.

"subsp. *granulata*" Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.70, pl.10, figs.3–8. Holotype: Liu Zhili et al., 1992, pl.10, fig.7. **NOW** *Tetrachacysta biconvexa* subsp. *granulata*. Originally

Horologinella biconvexa subsp. *granulata*, subsequently (and now) *Tetrachacysta biconvexa* subsp. *granulata*. Taxonomic senior synonym: *Tetrachacysta allenii*, according to Xu Jinli et al. (1997, p.42) — however, He Chengquan et al., 2009, p.374) retained this taxon. Age: Early Tertiary.

"subsp. *laevigata*" Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.69–70, pl.10, figs.1–2. Holotype: Liu Zhili et al., 1992, pl.10, fig.2. **NOW** *Tetrachacysta biconvexa* subsp. *laevigata*. Originally *Horologinella biconvexa* subsp. *laevigata*, subsequently (and now) *Tetrachacysta biconvexa* subsp. *laevigata*. Age: Early Tertiary.

coninckii Slimani, 1994, p.103, pl.14, figs.12–15. Holotype: Slimani, 1994, pl.14, figs.12–13. Age: latest Maastrichtian–Danian.

?*corrugata* de Coninck, 1986b, p.13, pl.2, figs.11–14,17–19. Holotype: de Coninck, 1986b, pl.2, figs.11–12; Pestchevitskaya, 2001, pl.2, fig.11; Pestchevitskaya, 2003, pl.2, fig.18. Questionable assignment: de Coninck (1986b, p.13). Age: middle Eocene–early Oligocene (Bartonian–Tongrian).

"*dawanensis*" Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.70, pl.10, figs.13–14. Holotype: Liu Zhili et al., 1992, pl.10, fig.13. **NOW** *Tetrachacysta*. Originally *Horologinella*, subsequently (and now) *Tetrachacysta*. Age: Early Tertiary.

disparilis He Chengquan, 1984b, p.162–163, pl.8, fig.22. Holotype: He Chengquan, 1984b, pl.8, fig.22; Pestchevitskaya, 2001, pl.2, fig.18; Pestchevitskaya, 2003, pl.2, fig.13. Age: Oligocene–early Miocene (according to Pestchevitskaya, 2001, p.106).

"*eclipsiana*" Helby in Riding and Helby, 2001e, p.115. **Name not validly published**: no description. **Taxonomic senior synonym**: *Fosteria eclipsiana*, according to Riding and Helby (2001e, p.115). This is an unpublished manuscript name.

"?*extrema*" Cookson and Eisenack, 1962a, p.272–273, pl.37, fig.10. Holotype: Cookson and Eisenack, 1962a, pl.37, fig.10; Pestchevitskaya, 2001, pl.2, fig.16; Pestchevitskaya, 2003, pl.2, fig.4. **NOW** *Paucilobimorpha* (Appendix A). Originally *Horologinella*?, subsequently (and now) *Paucilobimorpha* (Appendix A). Questionable assignment: Cookson and Eisenack (1962a, p.272). Pestchevitskaya (2001, p.106; 2003, p.53) included this species in *Horologinella* but did not mention its transfer to *Paucilobimorpha*. Age: Cenomanian.

horologia (Staplin, 1960, p.6, pl.1, figs.4,6 ex Playford, 1963, p.659) Jardiné et al., 1972, p.296. Holotype: Staplin, 1960, pl.1, fig.4; Pestchevitskaya, 2003, pl.2, fig.16. Originally *Azonotetraporina* (name not validly published, Appendix A), subsequently *Tetraporina* (Appendix A), thirdly (and now) *Horologinella*. This species probably represents acritarchs. The name *Azonotetraporina horologia* was not validly published in Staplin (1960) since the generic name *Azonotetraporina* was not validly published. Age: Carboniferous (late Mississippian).

"*incurvata*" Cookson and Eisenack, 1962a, p.272, pl.37, fig.5. Holotype: Cookson and Eisenack, 1962a, pl.37, fig.5; Pestchevitskaya, 2001, pl.2, fig.14; Pestchevitskaya, 2003, pl.2, fig.5. **NOW** *Paucilobimorpha* (Appendix A). Originally *Horologinella*, subsequently (and now) *Paucilobimorpha* (Appendix A). Pestchevitskaya (2001, p.106; 2003, p.53) included this species in *Horologinella* but did not mention its transfer to *Paucilobimorpha*. Age: early Eocene.

**lineata* Cookson and Eisenack, 1962a, p.272, pl.37, figs.1–3. Holotype: Cookson and Eisenack, 1962a, pl.37, figs.1–2; Pestchevitskaya, 2001, pl.2, figs.17a–b; Pestchevitskaya, 2003, pl.2, fig.9 (not fig.8). Age: Aptian–?Albian.

"*magnusa*" Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.70–71, pl.10, fig.11; text-fig.4. Holotype: Liu Zhili et al., 1992, pl.10, fig.11; text-fig.4. **NOW** *Tetrachacysta*. Originally *Horologinella*, subsequently (and now) *Tetrachacysta*. Age: Early Tertiary.

micirugis He Chengquan, 1984b, p.163, pl.10, figs.12–14; text-fig.2. Holotype: He Chengquan, 1984b, pl.10, fig.14; Pestchevitskaya, 2001, pl.2, fig.20; Pestchevitskaya, 2003, pl.2, fig.12. Age: Oligocene–early Miocene (according to Pestchevitskaya, 2001, p.106).

"*minuta*" Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.70, pl.10, figs.9–10,12 (not text-fig.4). **NOW** *Tetrachacysta*. Originally *Horologinella*, subsequently (and now) *Tetrachacysta*. Holotype: Liu Zhili et al., 1992, pl.10, fig.9. Age: Early Tertiary.

?*obliqua* Cookson and Eisenack, 1962a, p.273, pl.37, fig.9. Holotype: Cookson and Eisenack, 1962a, pl.37, fig.9; Pestchevitskaya, 2001, pl.2, fig.15; Pestchevitskaya, 2003, pl.2, fig.7. Questionable assignment: Cookson and Eisenack (1962a, p.273). Age: ?late Albian–Cenomanian.

?*pentagonalis* Heilmann-Clausen and Van Simaey, 2005, p.170, pl.5, figs.10–13. Holotype: Heilmann-Clausen and Van Simaey, 2005, pl.5, fig.10. Questionable assignment: Heilmann-Clausen and Van Simaey (2005, p.170); the authors noted that "... none of the specimens ... exhibit diagnostic dinoflagellate cyst features" Age: late Eocene.

quadriscipina Jardiné et al., 1972, p.296, pl.1, figs.5–6. Holotype: Jardiné et al., 1972, pl.1, fig.5. This species probably represents acritarchs. Age: Late Devonian (Famennian–Strunian).

scabrosa He Chengquan, 1984b, p.162, pl.8, figs.20–21. Holotype: He Chengquan, 1984b, pl.8, fig.20; Pestchevitskaya, 2001, pl.2, fig.9; Pestchevitskaya, 2003, pl.2, fig.15. Age: Oligocene–early Miocene (according to Pestchevitskaya, 2001, p.106).

sichuanensis Zhang Lujin, 1984, p.64, pl.19, figs.18–19. Holotype: Zhang Lujin, 1984, pl.19, figs.18–19. This species probably represents acritarchs. Age: Late Triassic.

"?*spinosa*" Cookson, 1965a, p.89, pl.10, figs.10–12; pl.11, fig.10. Holotype: Cookson, 1965a, pl.10, fig.11; Pestchevitskaya, 2003, pl.2, fig.14. **NOW** *Paucilobimorpha* (Appendix A). Originally *Horologinella*?, subsequently (and now) *Paucilobimorpha* (Appendix A). Questionable assignment: Cookson (1965a, p.89). Pestchevitskaya (2003, p.53) included this species in *Horologinella* but did not mention its transfer to *Paucilobimorpha*. Age: late Eocene.

"*spinosigibberosa*" Brideaux and Fisher, 1976, p.22–24, pl.4, fig.9; pl.5, figs.1–16. Holotype: Brideaux and Fisher, 1976, pl.5, figs.1,5–8. **NOW** *Tetrachacysta*. Originally *Horologinella*, subsequently (and now) *Tetrachacysta*. Age: late Oxfordian–?Portlandian.

tenuissima He Chengquan, 1991, p.52, pl.5, fig.10; text-fig.6. Holotype: He Chengquan, 1991, pl.5, fig.10; text-fig.6; Pestchevitskaya, 2001, pl.2, fig.12; Pestchevitskaya, 2003, pl.2, fig.17. Age: Paleocene.

?*wicanderi* Martin, 1984, p.22–23, pl.4, figs.4–5,8. Holotype: Martin, 1984, pl.4, fig.4; Pestchevitskaya, 2001, pl.2, fig.8; Pestchevitskaya, 2003, pl.2, fig.11. Questionable assignment: Martin (1984, p.22–23). This species probably represents acritarchs. Age: Devonian (early Famennian).

HUANGHEDINIUM Zhu Shenzhao, He Chengquan and Jin Guangxing in He Chengquan et al., 1989, p.46. Type: He Chengquan et al., 1989, pl.2, fig.5; text-fig.3a, as *Huanghedinium granorugosum*.

**granorugosum* Zhu Shenzhao, He Chengquan and Jin Guangxing in He Chengquan et al., 1989, p.46–47, pl.2, figs.1–15; pl.29, fig.4; text-figs.3a–b. Holotype: He Chengquan et al., 1989, pl.2, fig.5; text-fig.3a. Age: Early Tertiary.

magnum Zhu Shenzhao, He Chengquan and Jin Guangxing in He Chengquan et al., 1989, p.47, pl.2, figs.19–20. Holotype: He Chengquan et al., 1989, pl.2, fig.20. Age: Early Tertiary.

HURLANDSIA Lister and Batten, 1988a, p.507. Type: Piasecki, 1984, pl.4, fig.1; text-fig.5, as *Mendicodinium rugarum*.

***rugara** (Piasecki, 1984, p.150–151, pl.4, figs.1–5,7–8; text-fig.5) Lister and Batten, 1988a, p.507. Holotype: Piasecki, 1984, pl.4, fig.1; text-fig.5; Fensome et al., 1995, figs.1,4–5 — p.1751. Originally *Mendicodinium*, subsequently (and now) *Hurlandsia*. Age: late Ryazanian–early Valanginian.

HURUNUIA Wilson, 1984a, p.215–216. Type: Wilson, 1984a, figs.2A–B,3–5, as *Hurunuia maxwellii*.

***maxwellii** Wilson, 1984a, p.216–217, figs.2A–B,3–11. Holotype: Wilson, 1984a, figs.2A–B,3–5; Fensome et al., 1996, figs.1–3 — p.2221. Age: Neocomian, according to Wilson and Helby (1988).

"**HYALOSPHERA**" Prauss, 1989, p.23. **Name illegitimate: senior homonym:** *Hyalosphaera* Volkheimer and Salas, 1976, an acritarch genus. **Substitute name:** *Praussia*. Type: Prauss, 1989, pl.5, fig.11; text-fig.6, as *Hyalosphaera ephemera*.

***ephemera**" Prauss, 1989, p.23–24, pl.5, figs.11–12,15–18; text-fig.6. Holotype: Prauss, 1989, pl.5, fig.11; text-fig.6. **NOW** *Praussia*. Originally *Hyalosphaera* (generic name illegitimate), subsequently (and now) *Praussia*. Following I.C.N. Article 55.1, the species name *Hyalosphaera ephemera* is validly published, even though the generic name *Hyalosphaera* Prauss is illegitimate. Age: late Toarcian–early Aalenian.

HYSTRICHODINIUM Deflandre, 1935, p.229–230. Emendations: Sarjeant, 1966b, p.140; Clarke and Verdier, 1967, p.37–38; Pestchevitskaya, 2009, p.111. Taxonomic junior synonyms: *Heliodinium*, according to Clarke and Verdier (1967, p.37–38) and Lentin and Williams (1977b, p.72); *Cauca*, according to Below (1981b, p.120–121) — however, Lentin and Williams (1985, p.48) retained *Cauca*. Type: Deflandre, 1935, pl.5, fig.1; text-figs.9–11, as *Hystrichodinium pulchrum*.

"**alatum**" Cookson and Eisenack, 1962b, p.487–488, pl.2, figs.1–4. Emendation: Sarjeant, 1966b, p.147, as *Xiphophoridium alatum*. Holotype: Cookson and Eisenack, 1962b, pl.2, fig.1; Fensome et al., 1993a, fig.1 — p.893; Fauconnier and Masure, 2004, pl.80, fig.6. **NOW** *Dinopterygium*. Originally *Hystrichodinium*, subsequently *Xiphophoridium*, thirdly *Pyramidium* (combination illegitimate, since the generic name is illegitimate), fourthly *Oodnadattia*, fifthly (and now) *Dinopterygium*. Age: Albian–Cenomanian.

"**?amphiacanthum**" Cookson and Eisenack, 1958, p.37, pl.5, fig.9. Holotype: Cookson and Eisenack, 1958, pl.5, fig.9; Fensome et al., 1993a, fig.1 — p.911. **NOW** *Omatidium*. Originally *Hystrichodinium*, subsequently *Hystrichodinium?*, thirdly (and now) *Omatidium*. Questionable assignment: Stover and Evitt (1978, p.161–162). Age: Late Jurassic or Neocomian.

compactum Alberti, 1961, p.15, pl.9, figs.5–6. Holotype: Alberti, 1961, pl.9, fig.5. Age: Valanginian.

?dasum Davey, 1969a, p.175–176, pl.10, figs.8–9. Holotype: Davey, 1969a, pl.10, fig.8. Originally *Hystrichodinium*, subsequently (and now) *Hystrichodinium?*. Questionable assignment: Stover and Evitt (1978, p.162). Principle 5 of the I.C.N. states that "... names of taxonomic groups are treated as Latin regardless of their origin." Thus, the epithet "*dasys*" should be Latinized to "*dasus*", with the neuter form being "*dasum*". Age: Cenomanian.

furcatum Alberti, 1961, p.16, pl.9, figs.7–8. Holotype: Alberti, 1961, pl.9, fig.8. Age: Hauterivian.

?infundibulum Jain et al., 1975, p.11–12, pl.3, fig.35. Holotype: Jain et al., 1975, pl.3, fig.35. Originally *Hystrichodinium*, subsequently (and now) *Hystrichodinium?*. Questionable assignment: Stover and Evitt (1978, p.162). N.I.A. Age: Maastrichtian.

isodiametricum (Cookson and Eisenack, 1958, p.38, pl.12, figs.11–12) Stover and Evitt, 1978, p.161. Holotype: Cookson and Eisenack, 1958, pl.12, figs.11–12. Originally *Palaeohystrichophora*, subsequently (and now) *Hystrichodinium*. Age: Campanian–early Maastrichtian.

?*lanceatum* Davies, 1983, p.22–23, pl.7, figs.1–12; text-fig.18. Holotype: Davies, 1983, pl.7, figs.1–2; text-fig.18B. Questionable assignment: Davies (1983, p.22). Age: late Callovian–Tithonian.

minusculum Prössl, 1990, p.103–104, pl.3, figs.4–6 ex Prössl, 1992b, p.113,115. Holotype: Prössl, 1990, pl.3, figs.4–6. This name was not validly published in Prössl (1990, p.103–104), since that author did not specify the lodgment of the holotype. Age: early–early late Hauterivian.

oligacanthum Deflandre and Cookson, 1955, p.255–257, pl.1, fig.1; text-figs.2–3. Holotype: Deflandre and Cookson, 1955, text-fig.2. Backhouse (1988, p.92) considered *Heliodinium* (as *Hystrichodinium*) *patriciae* and *Heliodinium* (as *Hystrichodinium*) *voigtii* to be possible taxonomic junior synonyms of this species. *Hystrichodinium oligacanthum* was not validly published in Deflandre and Cookson (1954, p.1236) since no description was provided. Age: Albian.

"*parvum*" Alberti, 1961, p.16, pl.9, figs.1–4. Holotype: Alberti, 1961, pl.9, fig.4. **NOW** *Cauca*. Originally *Hystrichodinium*, subsequently (and now) *Cauca*. Age: early Aptian–Albian.

patriciae (Neale and Sarjeant, 1962, p.451–452, pl.19, fig.3; text-fig.7) Lentin and Williams, 1975, p.2151. Holotype: Neale and Sarjeant, 1962, pl.19, fig.3; text-fig.7. Originally *Heliodinium*, subsequently (and now) *Hystrichodinium*. Backhouse (1988, p.92) considered *Hystrichodinium oligacanthum* to be a possible taxonomic junior synonym of this species. Age: Hauterivian.

polycheirum Heilmann-Clausen in Heilmann-Clausen and Thomsen, 1995, p.297–298, pl.11, figs.6–12; text-fig.16. Holotype: Heilmann-Clausen and Thomsen, 1995, pl.11, figs.7–8; text-fig.16. Age: late Barremian.

**pulchrum* Deflandre, 1935, p.229–230, pl.5, fig.1; text-figs.9–11. Holotype: Deflandre, 1935, pl.5, fig.1; text-figs.9–11; Deflandre, 1936b, pl.8, figs.3–4,7. A full description was given in Deflandre (1936b, p.182–184). Sarjeant (1966b, p.141) speculated that this species might be a junior synonym of *Xanthidium* (now *Exochosphaeridium*?) *spinosum*. Age: Late Cretaceous.

subsp. *areatum* Marheinecke, 1992, p.44, pl.6, figs.8–11. Holotype: Marheinecke, 1992, pl.6, figs.9–10. Contrary to the opinion of Lentin and Williams (1993, p.284), Williams et al. (1998, p.272) considered this name to be validly published. Age: early Maastrichtian.

subsp. *densispinum* (Deflandre, 1936a, p.183–184, pl.9, fig.3) Lentin and Williams, 1973, p.70. Holotype: Deflandre, 1936a, pl.9, fig.3. Originally *Hystrichodinium pulchrum* var. *densispinum*, subsequently (and now) *Hystrichodinium pulchrum* subsp. *densispinum*. Age: Senonian.

"var. *densispinum*" Deflandre, 1936b, p.183–184, pl.9, fig.3. Holotype: Deflandre, 1936b, pl.9, fig.3. **NOW** *Hystrichodinium pulchrum* subsp. *densispinum*. Originally *Hystrichodinium pulchrum* var. *densispinum*, subsequently (and now) *Hystrichodinium pulchrum* subsp. *densispinum*. Age: Senonian.

subsp. *globosum* (Deflandre, 1936a, p.183, pl.9, figs.1–2) Lentin and Williams, 1973, p.70. Holotype: Deflandre, 1936a, pl.9, fig.2. Originally *Hystrichodinium pulchrum* var. *globosum*, subsequently (and now) *Hystrichodinium pulchrum* subsp. *globosum*. Age: Senonian.

"var. *globosum*" Deflandre, 1936b, p.183, pl.9, figs.1–2. Holotype: Deflandre, 1936b, pl.9, fig.2. **NOW** *Hystrichodinium pulchrum* subsp. *globosum*. Originally *Hystrichodinium pulchrum* var. *globosum*, subsequently (and now) *Hystrichodinium pulchrum* subsp. *globosum*. Age: Senonian.

subsp. *pulchrum*. Autonym. Holotype: Deflandre, 1935, pl.5, fig.1; text-figs.9–11; Deflandre, 1936b, pl.8, figs.3–4.

"var. *pulchrum*". Autonym. Holotype: Deflandre, 1935, pl.5, fig.1; text-figs.9–11; Deflandre, 1936b, pl.8, figs.3–4. **Now redundant.**

?*qoimacoense* He Chengquan et al., 2005a, p.61–62, 248–249, pl.20, figs.10–11; text-fig.1.3. Holotype: He Chengquan et al., 2005a, pl.20, fig.10. Age: Middle Jurassic.

ramoides Alberti, 1961, p.15–16, pl.8, figs.11–13. Holotype: Alberti, 1961, pl.8, fig.13. Age: late Barremian.

solare Pestchevitskaya, 2009, p.111–112, pl.1, figs.6,10; text-fig.2D. Holotype: Pestchevitskaya, 2009, pl.1, fig.10. Age: Hauterivian.

"?*telaspinosum*" Fisher and Riley, 1980, p.322, pl.1, fig.5. Holotype: Fisher and Riley, 1980, pl.1, fig.5. **NOW** *Kleithriasphaeridium*. Originally *Hystrichodinium*?, subsequently (and now) *Kleithriasphaeridium*. Questionable assignment: Fisher and Riley (1980, p.322). Age: Volgian.

voigtii (Alberti, 1961, p.33, pl.8, figs.1–5) Davey, 1974, p.54. Emendation: Sarjeant, 1966b, p.142, as *Heliodinium voigtii*. Holotype: Alberti, 1961, pl.8, fig.2. Originally *Heliodinium*, subsequently (and now) *Hystrichodinium*. Backhouse (1988, p.92) considered *Hystrichodinium oligacanthum* to be the possible taxonomic senior synonym of this species. Age: Barremian–early Aptian.

"**HYSTRICHOGONYAULAX**" Sarjeant, 1969, p.13–14. **Taxonomic senior synonym:** *Ctenidodinium*, by implication in Jan du Chêne et al. (1985b, p.110), who transferred the "type species" of *Hystrichogonyaulax*, *Hystrichogonyaulax cornigera*, to *Ctenidodinium*. Type: Valensi, 1953, pl.1, fig.8, as *Gonyaulax cornigera*.

"*canadensis*" (Pocock, 1972, p.89, pl.24, figs.1–2; text-fig.4) Stover and Evitt, 1978, p.162. Holotype: Pocock, 1972, pl.24, fig.1; Jan du Chêne et al., 1986a, pl.97, figs.1–4. Originally *Gonyaulacysta*, subsequently *Hystrichogonyaulax*, thirdly *Rhynchodiniopsis*. **Taxonomic senior synonym:** *Gonyaulax* (as *Gonyaulacysta*) *cladophora*, according to Fisher and Riley (1980, p.320) and Kunz (1990, p.23). Age: Oxfordian–Kimmeridgian.

"*cladophora*" (Deflandre, 1939a, p.173–176, pl.7, figs.1–5; text-figs.5–6) Stover and Evitt, 1978, p.162. Holotype: Deflandre, 1939a, pl.7, fig.1; Jan du Chêne et al., 1986a, pl.94, fig.6. **NOW** *Rhynchodiniopsis*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Hystrichogonyaulax*, fourthly (and now) *Rhynchodiniopsis*. Taxonomic junior synonyms: *Gonyaulacysta gottisii*, according to Jan du Chêne et al. (1986a, p.48) and Jan du Chêne and Fauconnier (1986, p.55); *Gonyaulacysta downiei* and *Gonyaulacysta canadensis*, both according to Fisher and Riley (1980, p.320) and Kunz (1990, p.23). Age: early Oxfordian.

"subsp. *cladophora*". Autonym. Holotype: Deflandre, 1939a, pl.7, fig.1; Jan du Chêne et al., 1986a, pl.94, fig.6. **NOW** *Rhynchodiniopsis cladophora* subsp. *cladophora*. Originally *Gonyaulax cladophora* subsp. *cladophora* (Appendix B), subsequently *Gonyaulacysta cladophora* subsp. *cladophora*, thirdly *Hystrichogonyaulax cladophora* subsp. *cladophora*, fourthly (and now) *Rhynchodiniopsis cladophora* subsp. *cladophora*. Taxonomic junior synonyms: *Gonyaulax* (as *Rhynchodiniopsis*) *cladophora* subsp. *extensa*, *Gonyaulax* (as *Rhynchodiniopsis*) *cladophora* subsp. *hemipolyedrica* and *Gonyaulax* (as *Rhynchodiniopsis*) *cladophora* subsp. *isovalvata*, all by implication in Brenner (1988, p.72), who listed these subspecies as taxonomic junior synonyms of *Rhynchodiniopsis cladophora* — however, Lentin and Williams (1993, p.566) retained all three taxa.

"subsp. *extensa*" (Klement, 1960, p.36–37, pl.4, figs.1–4; text-fig.16) Stover and Evitt, 1978, p.162. Holotype: Klement, 1960, pl.4, figs.1–3; Jan du Chêne et al., 1986a, pl.95, figs.4–5. **NOW** *Rhynchodiniopsis cladophora* subsp. *extensa*. Originally *Gonyaulax cladophora* subsp. *extensa* (Appendix B), subsequently *Gonyaulacysta cladophora* subsp. *extensa*, thirdly *Hystrichogonyaulax cladophora* subsp. *extensa*, fourthly (and now) *Rhynchodiniopsis cladophora* subsp. *extensa*. Taxonomic senior synonym: *Gonyaulax* (as *Rhynchodiniopsis*) *cladophora* subsp. *cladophora*, by implication in Brenner (1988, p.72), who listed this subspecies as a taxonomic junior synonym of *Rhynchodiniopsis cladophora* — however, Lentin and Williams (1993, p.566) retained *Hystrichogonyaulax* (as *Rhynchodiniopsis*) *extensa*. Age: early Kimmeridgian.

"subsp. *hemipolyedrica*" (Klement, 1960, p.36, pl.3, figs.10–12; text-figs.14–15) Stover and Evitt, 1978, p.162. Holotype: Klement, 1960, pl.3, figs.10–11. **NOW** *Rhynchodiniopsis cladophora* subsp. *hemipolyedrica*. Originally *Gonyaulax cladophora* subsp. *hemipolyedrica* (Appendix B), subsequently *Gonyaulacysta cladophora* subsp. *hemipolyedrica*, thirdly *Hystrichogonyaulax cladophora* subsp. *hemipolyedrica*, fourthly (and now) *Rhynchodiniopsis cladophora* subsp. *hemipolyedrica*. Taxonomic senior synonym: *Gonyaulax* (as *Rhynchodiniopsis*) *cladophora* subsp. *cladophora*, by implication in Brenner (1988, p.72), who listed this subspecies as a taxonomic junior synonym of *Rhynchodiniopsis cladophora* — however, Lentin and Williams (1993, p.566) retained *Hystrichogonyaulax* (as *Rhynchodiniopsis*) *cladophora* subsp. *hemipolyedrica*. Age: early Kimmeridgian.

"subsp. *isovalvata*" (Klement, 1960, p.37–38, pl.4, figs.5–9; text-fig.17) Stover and Evitt, 1978, p.163. Holotype: Klement, 1960, pl.4, figs.5–6. **NOW** *Rhynchodiniopsis cladophora* subsp. *isovalvata*. Originally *Gonyaulax cladophora* subsp. *isovalvata* (Appendix B), subsequently *Gonyaulacysta cladophora* subsp. *isovalvata*, thirdly *Hystrichogonyaulax cladophora* subsp. *isovalvata*, fourthly (and now) *Rhynchodiniopsis cladophora* subsp. *isovalvata*. Taxonomic senior synonym: *Gonyaulax* (as *Rhynchodiniopsis*) *cladophora* subsp. *cladophora*, by implication in Brenner (1988, p.72), who listed this subspecies as a taxonomic junior synonym of *Rhynchodiniopsis cladophora* — however, Lentin and Williams (1993, p.566) retained *Hystrichogonyaulax* (as *Rhynchodiniopsis*) *cladophora* subsp. *isovalvata*. Age: early Kimmeridgian.

"*coreoides*" Benedek, 1972, p.20, pl.9, figs.4a–c. Emendation: Benedek and Sarjeant, 1981, p.328–330, as *Phthanoperidinium coreoides*. Holotype: Benedek, 1972, pl.9, figs.4a–c; Benedek and Sarjeant, 1981, fig.3, nos.2,4; fig.5. **NOW** *Phthanoperidinium*. Originally *Hystrichogonyaulax*, subsequently (and now) *Phthanoperidinium*. Taxonomic senior synonym: *Peridinium* (now *Phthanoperidinium*) *comatum*, according to Stover and Evitt (1978, p.118) — however, Benedek and Sarjeant (1981, p.328–330) retained *Phthanoperidinium coreoides*. Taxonomic junior synonym *Phthanoperidinium tritonium*, according to Fensome et al. (2009, p.54–55), which species had previously been considered a taxonomic junior synonym of *Phthanoperidinium comatum* by Bujak in Bujak et al. (1980, p.72). Age: middle Oligocene.

"**cornigera*" (Valensi, 1953, p.27, pl.1, figs.4,8,10; pl.2, figs.1–2; pl.13, fig.5; text-fig.2a) Sarjeant, 1969, p.14. Emendation: Jan du Chêne et al., 1985b, p.110, as *Ctenidodinium cornigerum*. Holotype: Valensi, 1953, pl.1, fig.8. **NOW** *Ctenidodinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*? (combination not validly published), thirdly *Hystrichogonyaulax*, fourthly (and now) *Ctenidodinium*. Age: Bathonian.

"*crispa*" (Wetzel, 1967a, p.870, pl.15, figs.4a–b) Sarjeant, 1980b, p.119. Emendations: Sarjeant, 1980b, p.119, as *Hystrichogonyaulax crispa*; Fenton, 1981, p.255,257, as *Cribroperidinium crispum*. Holotype: Wetzel, 1967a, pl.15, figs.4a–b; Dietz et al., 1999, text-fig.5a. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly *Hystrichogonyaulax*, fifthly (and now) *Cribroperidinium*, sixthly *Acanthaulax*. Age: Middle Jurassic.

"*italica*" (Corradini, 1973, p.132–133, pl.19, figs.8a–b; pl.33, figs.5a–b; text-figs.3a–d) Helenes, 1984, p.132. Holotype: Corradini, 1973, pl.19, figs.8a–b; text-figs.3a–d; Jan du Chêne et al., 1986a, pl.98, fig.11. **NOW** *Rhynchodiniopsis*?. Originally *Gonyaulacysta*, subsequently *Millioudodinium*?, thirdly *Hystrichogonyaulax*, fourthly (and now) *Rhynchodiniopsis*?. Age: Late Cretaceous–Paleocene.

"**nealei*" (Sarjeant, 1962a, p.480–481, pl.69, fig.1; text-fig.2) Sarjeant, 1969, p.14. Holotype: Sarjeant, 1962a, pl.69, fig.1; text-fig.2. **NOW** *Rhynchodiniopsis*?. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*? (combination not validly published), thirdly *Hystrichogonyaulax*, fourthly *Hystrichogonyaulax*?, fifthly *Rhynchodiniopsis*, sixthly (and now) *Rhynchodiniopsis*?. Questionable assignment: Stover and Evitt (1978, p.163). Age: Oxfordian.

"*pectinigera*" (Gocht, 1970b, p.138–139, pl.33, figs.1–4; text-fig.11) Stover and Evitt, 1978, p.163. Emendation: Fensome, 1979, p.43, as *Gonyaulacysta pectinigera*. Holotype: Gocht, 1970b, pl.33, fig.1. **NOW** *Gonyaulacysta pectinigera*. Originally *Leptodinium subtile* subsp. *pectinigerum*, subsequently *Hystrichogonyaulax pectinigera*, thirdly (and now) *Gonyaulacysta pectinigera*, fourthly *Leptodinium pectinigerum*. Age: early Bathonian.

"*pennata*" (Riley in Fisher and Riley, 1980, p.321–322, pl.1, figs.10–11) Lentin and Williams, 1981, p.133. Holotype: Fisher and Riley, 1980, pl.1, figs.10–11; Jan du Chêne et al., 1986a, pl.98, fig.5. **NOW** *Rhynchodiniopsis*. Originally *Gonyaulacysta*, subsequently *Hystrichogonyaulax*, thirdly *Millioudodinium*, fourthly (and now) *Rhynchodiniopsis*. Age: late Kimmeridgian.

"*polytrix*" Benedek, 1972, p.20, pl.6, figs.1a–b. Emendation: Benedek and Sarjeant, 1981, p.330–333, as *Phthanoperidinium polytrix*. Holotype: Benedek, 1972, pl.6, figs.1a–b; Benedek and Sarjeant, 1981, fig.2, nos.4,6, fig.6. **NOW** *Phthanoperidinium*. Originally *Hystrichogonyaulax*, subsequently *Phthanoperidinium?*, thirdly (and now) *Phthanoperidinium*. Age: middle Oligocene.

"*regalis*" (Gocht, 1970b, p.139–140, pl.33, figs.5–7; text-fig.10) Stover and Evitt, 1978, p.163. Holotype: Gocht, 1970b, pl.33, fig.6; text-fig.10; Jan du Chêne et al., 1986a, pl.98, figs.6–10. **NOW** *Rhynchodiniopsis?*. Originally *Leptodinium*, subsequently *Hystrichogonyaulax*, thirdly (and now) *Rhynchodiniopsis?*. Age: early Bathonian.

"*saepita*" (Ashraf, 1979, p.128, pl.2, fig.27; pl.3, figs.1–3,5) Lentin and Williams, 1981, p.134. Holotype: Ashraf, 1979, pl.3, fig.2. **NOW** *Leptodinium*. Originally (and now) *Leptodinium*, subsequently *Hystrichogonyaulax*, thirdly *Rhynchodiniopsis*, fourthly *Ctenidodinium*. Age: Late Jurassic (Malm).

"*serrata*" (Cookson and Eisenack, 1958, p.34, pl.3, fig.2; text-figs.12–14) Stover and Evitt, 1978, p.163. Holotype: Cookson and Eisenack, 1958, pl.3, fig.2; Jan du Chêne et al., 1986a, pl.99, figs.3–4. **NOW** *Rhynchodiniopsis*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Hystrichogonyaulax*, fourthly (and now) *Rhynchodiniopsis*. Age: Late Jurassic–Neocomian.

"**HYSTRICHOKIBOTIUM**" Klumpp, 1953, p.387. **Taxonomic senior synonym:** *Spiniferites*, by implication in Norris and Sarjeant (1965, p.33), who considered *Hystrichokibotium* to be a taxonomic junior synonym of *Hystrichosphaera*, which is now a taxonomic junior synonym of *Spiniferites*. Type: Klumpp, 1953, pl.16, figs.12,14, as *Hystrichokibotium pseudofurcatum*.

"**pseudofurcatum*" Klumpp, 1953, p.388, pl.16, figs.12–14. Emendation: Sarjeant, 1981, p.108–109, as *Spiniferites pseudofurcatus*. Holotype: Klumpp, 1953, pl.16, figs.12,14; Sarjeant, 1981, pl.3, figs.1–2; text-fig.2; Fensome et al., 1995, figs.1–2 — p.1709. **NOW** *Spiniferites*. Originally *Hystrichokibotium*, subsequently *Hystrichosphaera* (combination illegitimate), thirdly (and now) *Spiniferites*. Taxonomic senior synonym: *Areoligera* (as *Hystrichosphaera*, now *Spiniferites*) *incerta*, according to Morgenroth (1966a, p.15) — however, Sarjeant (1981, p.108–109) retained *Hystrichokibotium* (as and now *Spiniferites*) *pseudofurcatum*. Taxonomic junior synonyms: *Hystrichosphaera buccina*, according to Lentin and Williams (1973, p.126); *Hystrichosphaera tertiaria*, according to Gocht (1969, p.32) and Sarjeant (1970, p.76). Age: late Eocene.

"*trabeculiferum*" Deflandre and Cookson, 1955, p.269, pl.8, fig.6. Holotype: Deflandre and Cookson, 1955, pl.8, fig.6. **NOW** *Spiniferites?*. Originally *Hystrichokibotium*, subsequently *Spiniferites*, thirdly (and now) *Spiniferites?*. Age: middle Miocene.

HYSTRICHOKOLPOMA Klumpp, 1953, p.388. Emendations: Williams and Downie, 1966a, p.176; Zevenboom and Santarelli in Zevenboom, 1995, p.136; Foucher in Fauconnier and Masure, 2004, p.281. Type: Klumpp, 1953, pl.17, figs.3,5a, as *Hystrichokolpoma cinctum*.

"*biformoides*" (Eisenack, 1954b, p.68, pl.11, figs.16–20) Rozen, 1965, p.308. Holotype: Eisenack, 1954b, pl.11, fig.18. **NOW** *Achilleodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma*, fourthly (and now) *Achilleodinium*, fifthly *Florentinia*. Morgenroth (1966a, p.28) also proposed this combination. Age: late Eocene–early Oligocene.

bulbosum (Ehrenberg, 1837b, pl.1, fig.17) Morgenroth, 1968, p.546. Emendation: Morgenroth, 1968, p.546–547, as *Hystrichokolpoma bulbosum*. Holotype: Ehrenberg, 1837b, pl.1, fig.17. Neotype: Morgenroth, 1968, pl.44, fig.6, designated by Morgenroth (1968, p.546). Originally *Xanthidium bulbosum* (Appendix A), subsequently

Hystrichosphaera bulbosa (combination not validly published), thirdly *Hystrichosphaeridium bulbosum*, fourthly *Ovum hispidum* subsp. *bulbosum* (combination not validly published, Appendix A), fifthly (and now) *Hystrichokolpoma bulbosum*, sixthly *Baltisphaeridium bulbosum* (combination not validly published, Appendix A). Lentin and Williams (1977b, p.77) retained this species in *Hystrichokolpoma*. Taxonomic senior synonym: *Xanthidium* (as *Hystrichosphaeridium*) *tubiferum*, according to Stover and Evitt (1978, p.55) — however, Lentin and Williams (1981, p.134) retained *Hystrichokolpoma bulbosum*. The name *Xanthidium bulbosum* may not have been validly published in Ehrenberg (1837b) since no description in that publication has been referenced or found. Age: Danian.

"subsp. *bulbosum*". Autonym. Holotype: Ehrenberg, 1837b, pl.1, fig.17. **Now redundant.**

"subsp. *turgidum*" (Williams and Downie, 1966a, p.178–179, pl.17, fig.5) Lentin and Williams, 1981, p.134. Holotype: Williams and Downie, 1966a, pl.17, fig.5. **NOW** *Hystrichokolpoma cinctum* subsp. *turgidum*. Originally *Hystrichokolpoma eisenackii* var. *turgidum*, subsequently *Hystrichokolpoma eisenackii* subsp. *turgidum*, thirdly *Hystrichokolpoma bulbosum* subsp. *turgidum*, fourthly (and now) *Hystrichokolpoma cinctum* subsp. *turgidum*. This combination was erroneously made by Lentin and Williams (1981, p.134), when the subspecies should have been placed under *Hystrichokolpoma cinctum* Klumpp, 1953. Age: early Eocene.

bullatum Wilson, 1988, p.21–22, pl.10, figs.1,5a–b,6a–b. Holotype: Wilson, 1988, pl.10, figs.5a–b; Fensome et al., 1996, figs.1–2 — p.2071; Fauconnier and Masure, 2004, pl.38, fig.1. Age: early Eocene.

***cinctum** Klumpp, 1953, p.389, pl.17, figs.3–4,5a–d. Holotype: Klumpp, 1953, pl.17, figs.3,5a; Damassa, 1979a, text-fig.4. Taxonomic junior synonym: *Hystrichokolpoma eisenackii*, according to Damassa (1979a, p.823–824). Age: late Eocene.

subsp. **cinctum**. Autonym. Holotype: Klumpp, 1953, pl.17, figs.3,5a; Damassa, 1979a, text-fig.4.

subsp. **turgidum** (Williams and Downie, 1966a, p.178–179, pl.17, fig.5) Lentin and Williams, 1985, p.173. Holotype: Williams and Downie, 1966a, pl.17, fig.5. Originally *Hystrichokolpoma eisenackii* var. *turgidum*, subsequently *Hystrichokolpoma eisenackii* subsp. *turgidum*, thirdly *Hystrichokolpoma bulbosum* subsp. *turgidum*, fourthly (and now) *Hystrichokolpoma cinctum* subsp. *turgidum*. Age: early Eocene.

"**circumtabulatum**" (Drugg, 1967, p.15, pl.1, figs.12–13) Schumacker-Lambry, 1978, p.42. Holotype: Drugg, 1967, pl.1, fig.12; Damassa, 1979b, pl.3, figs.14–16; Fensome et al., 1993a, fig.1 — p.1061. **NOW** *Alisocysta*. Originally *Eisenackia*, subsequently *Hystrichokolpoma*, thirdly (and now) *Alisocysta*, fourthly *Agerasphaera* (generic name illegitimate). Taxonomic junior synonym: *Hystrichokolpoma mentitum*, according to Schumacker-Lambry (1978, p.42) — however, Lentin and Williams (1981, p.135) retained *Hystrichokolpoma mentitum*. Age: Danian.

"**clavigerum**" (Deflandre, 1937b, p.71, pl.14 [al. pl.11], figs.1–2) Williams and Downie, 1969, p.17. Emendation: Davey and Verdier, 1976, p.315, as *Florentinia clavigera*. Holotype: Deflandre, 1937b, pl.14 [al. pl.11], figs.1–2. **NOW** *Florentinia*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma*, fourthly (and now) *Florentinia*, fifthly *Hystrichosphaera*. This combination was not validly published in Williams and Downie (1966a, p.181), since these authors did not fully reference the basionym. Age: Senonian.

?**crassipes** (Reade, 1839, pl.9, figs.2–5) Lejeune-Carpentier and Sarjeant, 1981, p.10. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.10, as *Hystrichokolpoma? crassipes*. Holotype: Reade, 1839, pl.9, fig.2, lost according to Lejeune-Carpentier and Sarjeant (1981, p.11). Neotype: Lejeune-Carpentier, 1941, fig.9; Lejeune-Carpentier and Sarjeant, 1981, pl.3, fig.3; text-fig.6; designated by Lejeune-Carpentier and Sarjeant (1981, p.11). Originally *Xanthidium* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly *Litosphaeridium?*, fourthly (and now) *Hystrichokolpoma?*. Questionable assignment: Lejeune-Carpentier and Sarjeant (1981, p.10). Taxonomic junior synonym: *Hystrichosphaeridium* (as *Pervosphaeridium*) *truncigerum*, by implication in Yun Hyesu (1981, p.27), who considered *Hystrichosphaeridium* (as *Pervosphaeridium*) *truncigerum* to be the senior synonym — however, Lentin and Williams (1985, p.282) retained *Hystrichosphaeridium* (as *Pervosphaeridium*) *truncigerum*. Age: Late Cretaceous.

denticulatum Matsuoka, 1974, p.330–331, pl.44, figs.3–5. Holotype: Matsuoka, 1974, pl.44, fig.3; Fauconnier and Masure, 2004, pl.38, fig.2. Age: early-middle Miocene.

"*eisenackii*" Williams and Downie, 1966a, p.176–178, pl.17, figs.1–3; text-fig.46. Holotype: Williams and Downie, 1966a, pl.17, fig.2; text-fig.46. **Taxonomic senior synonym:** *Hystrichokolpoma cinctum*, according to Damassa (1979a, p.823–824). Age: early Eocene.

"subsp. *eisenackii*". Autonym. Holotype: Williams and Downie, 1966a, pl.17, fig.2; text-fig.46. **Now redundant.**

"var. *eisenackii*". Autonym. Holotype: Williams and Downie, 1966a, pl.17, fig.2; text-fig.46. **Now redundant.**

"subsp. *turgidum*" (Williams and Downie, 1966a, p.178–179, pl.17, fig.5) Lentin and Williams, 1973, p.71. Holotype: Williams and Downie, 1966a, pl.17, fig.5. **NOW** *Hystrichokolpoma cinctum* subsp. *turgidum*. Originally *Hystrichokolpoma eisenackii* var. *turgidum*, subsequently *Hystrichokolpoma eisenackii* subsp. *turgidum*, thirdly *Hystrichokolpoma bulbosum* subsp. *turgidum*, fourthly (and now) *Hystrichokolpoma cinctum* subsp. *turgidum*. Age: late Eocene.

"var. *turgidum*" Williams and Downie, 1966a, p.178–179, pl.17, fig.5. Holotype: Williams and Downie, 1966a, pl.17, fig.5. **NOW** *Hystrichokolpoma cinctum* subsp. *turgidum*. Originally *Hystrichokolpoma eisenackii* var. *turgidum*, subsequently *Hystrichokolpoma eisenackii* subsp. *turgidum*, thirdly *Hystrichokolpoma bulbosum* subsp. *turgidum*, fourthly (and now) *Hystrichokolpoma cinctum* subsp. *turgidum*. Age: late Eocene.

ellipticum Matsuoka, 1974, p.330, pl.44, fig.2. Holotype: Matsuoka, 1974, pl.44, fig.2; Fauconnier and Masure, 2004, pl.38, fig.3. Age: early-middle Miocene.

?*fenestratum* Jan du Chêne and Adediran, 1985, p.18, pl.16, figs.8–12; text-fig.5. Holotype: Jan du Chêne and Adediran, 1985, pl.16, figs.9–10. Questionable assignment: Jan du Chêne and Adediran (1985, p.18). Age: late Paleocene–early Eocene.

"*fenestreconum*" May, 1980, p.54–55, pl.3, figs.6–11. Holotype: May, 1980, pl.3, figs.6–8. **NOW** *Litosphaeridium*. Originally *Hystrichokolpoma*, subsequently (and now) *Litosphaeridium*. Age: Maastrichtian.

"*ferox*" (Deflandre, 1937b, p.72, pl.14 [al. pl.11], figs.3–4) Davey, 1969a, p.159. Holotype: Deflandre, 1937b, pl.14 (al. pl.11), figs.3–4. **NOW** *Florentinia*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma*, fourthly *Silicisphaera*, fifthly (and now) *Florentinia*. This combination was not validly published in Williams and Downie (1966a, p.181), since these authors did not fully reference the basonym. Age: Senonian.

"?*fimbriatum*" Morgenroth, 1968, p.547–548, pl.45, figs.7–8. Emendations: May, 1980, p.46 and Marheinecke, 1992, p.112–113, both as *Conneximura fimbriata*. Holotype: Morgenroth, 1968, pl.45, figs.7–8; Eisenack and Kjellström, 1972, p.515; Fensome et al., 1995, figs.1–2 — p.1483. **NOW** *Conneximura*. Originally *Hystrichokolpoma*?, subsequently *Danea* (combination illegitimate), thirdly (and now) *Conneximura*. Questionable assignment: Morgenroth (1968, p.547). Age: Danian.

?*gamospinum* Slimani, 1994, p.74–75, pl.11, figs.7–12. Holotype: Slimani, 1994, pl.11, figs.10–12; Fauconnier and Masure, 2004, pl.42, figs.10–11. Questionable assignment: Foucher in Fauconnier and Masure (2004, p.285). Age: late Campanian.

globulus Michoux, 1985, p.143, pl.1, figs.1–4,12; text-figs.2A–B. Holotype: Michoux, 1985, pl.1, figs.1–4; text-figs.2A–B; Fauconnier and Masure, 2004, pl.38, figs.4–5. N.I.A. Age: early Eocene.

granulatum Eaton, 1976, p.269–270, pl.10, figs.11–13; text-fig.15. Holotype: Eaton, 1976, pl.10, fig.11; text-fig.15; Bujak et al., 1980, pl.3, figs.4–6; Fauconnier and Masure, 2004, pl.38, figs.1–3. Age: early-middle Eocene.

grimmertingenense de Coninck, 2001, p.14–15, pl.6, figs.10–12. Holotype: de Coninck, 2001, p.14–15, pl.6, figs.10–12. Age: early Rupelian.

?incertum Michoux, 1985, p.143–144, pl.2, figs.5–7,9,12,13–15; pl.3, figs.11–12; text-figs.3A–B. Holotype: Michoux, 1985, pl.2, figs.5–7; text-figs.3A–B; Fauconnier and Masure, 2004, pl.42, figs.13–15. Questionable assignment: Michoux (1985, p.143). Age: early-middle Eocene.

"indicum" Khanna and Singh, 1981b, p.397–398, fig.2, nos.4,9; text-fig.9. Holotype: Khanna and Singh, 1981b, fig.2, no.4. **Name illegitimate** — **senior homonym**: *Hystrichokolpoma indicum* Salujha and Kindra, 1981. **Substitute name**: *Hystrichokolpoma kutharensis*. Originally *Hystrichokolpoma indicum* Khanna and Singh (name illegitimate), subsequently (and now) *Hystrichokolpoma kutharensis*. This name was not validly published in Singh et al. (1979, p.35–36), Khanna (1979, p.217) and Khanna and Singh (1981a, pl.4, fig.9), since no description was provided. Age: late Paleocene–early Eocene.

?indicum Salujha and Kindra, 1981, p.52, pl.3, figs.53–54. Holotype: Salujha and Kindra, 1981, pl.3, figs.53–54. Questionable assignment: Foucher in Fauconnier and Masure (2004, p.286). Junior homonym: *Hystrichokolpoma indicum* Khanna and Singh, 1981b. Jain and Garg (1982, p.69) recommended that the name be restricted to the holotype. Age: early Paleocene.

kutharensis Jain et al., 1991, p.75. Holotype: Khanna and Singh, 1981b, fig.2, no.4. Originally *Hystrichokolpoma indicum* Khanna and Singh (name illegitimate), subsequently (and now) *Hystrichokolpoma kutharensis*. Substitute name for *Hystrichokolpoma indicum* Khanna and Singh, 1981b, p.397–398, fig.2, nos.4,9; text-fig.9 (an illegitimate name). Age: late Paleocene–early Eocene.

manipulatum Islam, 1983a, p.238, pl.3, figs.1–2. Holotype: Islam, 1983a, pl.3, fig.1. Age: early Eocene.

mentitum McLean, 1974, p.68–69, pl.8, figs.1–5; text-fig.1B. Holotype: McLean, 1974, pl.8, figs.1–5. Taxonomic senior synonym: *Eisenackia* (as *Alisocysta*) *circumtabulata*, according to Schumacker-Lambry (1978, p.42) — however, Lentin and Williams (1981, p.135) retained *Hystrichokolpoma mentitum*. Age: late Paleocene.

minor He Chengquan, 1991, p.131–132, pl.15, fig.10; text-fig.22. Holotype: He Chengquan, 1991, pl.15, fig.10; text-fig.22. Age: Late Cretaceous.

okinawaium Matsuoka, 1979, p.54,56–57, pl.1, fig.6; pl.2, figs.1–4; text-figs.4,5B. Holotype: Matsuoka, 1979, pl.2, figs.3–4; Fauconnier and Masure, 2004, pl.39, fig.4. Age: early Pleistocene.

pacificum Matsuoka, 1979, p.51,53–54, pl.1, figs.1–5; text-figs.3,5A. Holotype: Matsuoka, 1979, pl.1, figs.1–3; Fauconnier and Masure, 2004, pl.39, fig.5. Age: early Pleistocene.

palaeocenicum Khanna and Singh, 1981b, p.396–397, fig.2, nos.7,10; text-fig.8. Holotype: Khanna and Singh, 1981b, fig.2, no.7. The name was not validly published in Singh et al. (1979, p.35–36) and Khanna (1979, p.217), since no description was provided. Age: late Paleocene–early Eocene.

?petasatum Islam, 1983b, p.340–341, pl.3, figs.4–5. Holotype: Islam, 1983b, pl.3, fig.5. Questionable assignment: Islam (1983b, p.340). Age: early-middle Eocene.

poculum Maier, 1959, p.312–313, pl.31, fig.3. Emendation: Sarjeant, 1983, p.104–105. Holotype: Maier, 1959, pl.31, fig.3; Sarjeant, 1983, pl.2, fig.4; text-fig.1. Age: middle Miocene.

proprium (Marheinecke, 1992, p.60–61, pl.11, figs.4–8) Foucher in Fauconnier and Masure, 2004, p.283. Holotype: Marheinecke, 1992, pl.11, figs.4–6; Fauconnier and Masure, 2004, pl.40, figs.1–3. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichokolpoma*. Contrary to the opinion of Lentin and Williams (1993, p.327), Williams

et al. (1998, p.310) considered the name *Hystrichosphaeridium proprium* to be validly published. Age: late Maastrichtian.

"*pseudooceanicum*" Zevenboom and Santarelli in Zevenboom, 1995, p.137–138, pl.4, figs.2–6. Holotype: Zevenboom, 1995, pl.4, figs.2–3. **Name not validly published:** considered a manuscript name. Age: middle early Oligocene–earliest Miocene.

pusillum Biffi and Manum, 1988, p.186,188, pl.5, figs.10–11,13–14,16–17. Holotype: Biffi and Manum, 1988, pl.5, figs.10–11,13; Fauconnier and Masure, 2004, pl.39, figs.6–8. Age: late Eocene–late Oligocene.

"*reductum*" Zevenboom and Santarelli in Zevenboom, 1995, p.138, pl.4, figs.7–12. Holotype: Zevenboom, 1995, pl.4, figs.7–9. **Name not validly published:** considered a manuscript name. Age: latest early Miocene.

reticulatum Hultberg, 1985c, p.132–133, pl.6, fig.I. Holotype: Hultberg, 1985c, pl.6, fig.I. Age: late Maastrichtian.

rigaudiae Deflandre and Cookson, 1955, p.279–281, pl.6, figs.6,10; text-fig.42. Holotype: Deflandre and Cookson, 1955, pl.6, fig.6. Taxonomic junior synonyms: *Galea xiphea* and *Hystrichosphaeridium stellatum*, both according to Sarjeant (1983, p.104) — however, Srivastava (1995, p.306) retained *Hystrichosphaeridium* (as and now *Florentinia*) *stellatum*; *Hystrichosphaeridium perifurcatum*, according to Jain (1982, p.53). This name was not validly published in Deflandre and Cookson (1954, p.1236), who did not give a description. Age: Eocene–Miocene.

subsp. *granulosa* Jain and Tandon, 1981, p.11, pl.1, fig.5. Holotype: Jain and Tandon, 1981, pl.1, fig.5; Fauconnier and Masure, 2004, pl.41, fig.1. Age: middle Eocene.

subsp. *rigaudiae*. Autonym. Holotype: Deflandre and Cookson, 1955, pl.6, fig.6.

"*robustum*" Salujha and Kindra, 1981, p.52, pl.3, figs.55–56. Holotype: Salujha and Kindra, 1981, pl.3, fig.55. **NOW** *Amphorosphaeridium*?. Originally *Hystrichokolpoma*, subsequently (and now) *Amphorosphaeridium*?. Age: early Paleocene.

salacia Eaton, 1976, p.271–272, pl.11, figs.1–3; text-figs.16A–B. Holotype: Eaton, 1976, pl.11, fig.1; text-figs.16A–B; Bujak et al., 1980, pl.3, figs.7–8; Fauconnier and Masure, 2004, pl.41, figs.2–3. N.I.A. Age: early-middle Eocene (see Aubry, 1986).

subsp. *furcatum* Yu Jingxian, 1989, p.138, pl.46, fig.7. Holotype: Yu Jingxian, 1989, pl.46, fig.7. Age: Eocene.

subsp. *salacia*. Autonym. Holotype: Eaton, 1976, pl.11, fig.1; text-figs.16A–B; Bujak et al., 1980, pl.3, figs.7–8; Fauconnier and Masure, 2004, pl.41, figs.2–3. N.I.A.

sequanaportum Deflandre and Deflandre-Rigaud, 1958, cards 1352–1353, 4 figs. ex Masure in Fauconnier and Masure, 2004, p.284–285, pl.42, fig.9; Fauconnier and Masure, 2004, pl.42, fig.9. Holotype: Fauconnier and Masure, pl.42, fig.9. This name was not validly published in Deflandre and Deflandre-Rigaud (1958) since no description was provided nor type designated. Age: Late Cretaceous.

spinosum Wilson, 1988, p.22, pl.10, figs.7a–b,8. Holotype: Wilson, 1988, pl.10, figs.7a–b; Fensome et al., 1996, figs.1–2 — p.2375; Fauconnier and Masure, 2004, pl.41, fig.4. Age: early-middle Eocene; see Fensome et al. (1996, p.2376).

"*stellatum*" (Maier, 1959, p.320–321, pl.33, figs.3–4) Truswell et al., 1985, p.290. Holotype: Maier, 1959, pl.33, fig.3; Sarjeant, 1983, pl.7, figs.1–2. **NOW** *Florentinia*. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaeridium*?, thirdly (and now) *Florentinia*, fourthly *Hystrichokolpoma*. Taxonomic senior synonym: *Hystrichokolpoma rigaudiae*, according to Sarjeant (1983, p.104) — however, Srivastava (1995, p.306) retained *Hystrichokolpoma* (as and now *Florentinia*) *stellatum*. Age: middle Oligocene–middle Miocene.

taperinum Shaw Chenglong, 1999b, p.188, figs.108–113. Holotype: Shaw Chenglong, 1999b, figs.108–110. Age: Eocene.

torquatum Damassa, 1979a, p.825–826, pl.3, figs.1–8; pl.4, figs.9–11; text-fig.7. Holotype: Damassa, 1979a, pl.3, fig.1; Fauconnier and Masure, 2004, pl.41, figs.5–6 (not 8–10). Age: early-middle Eocene.

"*tridactylites*" (Valensi, 1955a, p.37–38, fig.1D) Williams and Downie, 1966a, p.181. Holotype: Valensi, 1955a, fig.1D. **Combination not validly published:** basionym not fully referenced. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma* (combination not validly published), fourthly *Achomosphaera*, fifthly *Silicisphaera*, sixthly (and now) *Florentinia*. Age: Cretaceous.

truncatum Biffi and Manum, 1988, p.188, pl.6, figs.1–9. Holotype: Biffi and Manum, 1988, pl.6, figs.7–9; Fauconnier and Masure, 2004, pl.42, figs.1–3. Junior homonym: *Hystrichokolpoma truncatum* Wilson, 1988. Age: early Miocene.

"*truncatum*" Wilson, 1988 (December), p.22, pl.11, figs.1a–c, 2, 3a–b, 4a–b. Holotype: Wilson, 1988, pl.11, figs.1a–c; Fensome et al., 1996, figs.1–3 — p.2449. **Name illegitimate — senior homonym:** *Hystrichokolpoma truncatum* Biffi and Manum, 1988 (September). **Substitute name:** *Hystrichokolpoma wilsonii*. Originally *Hystrichokolpoma truncatum* Wilson, 1988 (name illegitimate), subsequently (and now) *Hystrichokolpoma wilsonii*. Age: middle Eocene.

tumescens McLean, 1974, p.66,68, pl.8, figs.6–9; text-fig.1A. Holotype: McLean, 1974, pl.8, figs.7–8. Age: late Paleocene.

unispinum Williams and Downie, 1966a, p.179–180, pl.17, figs.6–7. Holotype: Williams and Downie, 1966a, pl.17, fig.7; Bujak et al., 1980, pl.3, figs.1–3; Fauconnier and Masure, 2004, pl.42, figs.4–6. Davey and Verdier (1976, p.316) considered this species to be a possible taxonomic synonym of *Hystrichosphaeridium* (now *Florentinia*) *deanei*, the type material of *Hystrichokolpoma unispinum* representing possibly reworked Cretaceous specimens. Age: early Eocene.

wenzhouense He Chengquan and Wang Kede, 1990, p.413,423, pl.2, figs.10–13. Holotype: He Chengquan and Wang Kede, 1990, pl.2, fig.11. Age: Eocene.

wilsonii Lentin and Williams, 1993, p.291. Holotype: Wilson, 1988, pl.11, figs.1a–c; Fensome et al., 1996, figs.1–3 — p.2449. Originally *Hystrichokolpoma truncatum* Wilson (name illegitimate), subsequently (and now) *Hystrichokolpoma wilsonii*. Substitute name for *Hystrichokolpoma truncatum* Wilson, 1988, p.22, pl.11, figs.1a–c, 2, 3a–b, 4a–b (an illegitimate name). Age: middle Eocene.

"*xipheum*" (Maier, 1959, p.309, pl.30, fig.5) Davey and Williams, 1969, p.5. Holotype: Maier, 1959, pl.30, fig.5. Originally *Galea* (generic name illegitimate), subsequently *Hystrichosphaeridium*, thirdly *Hystrichokolpoma*?. Questionable assignment: Davey and Williams (1969, p.5). **Taxonomic senior synonym:** *Hystrichokolpoma rigaudiae*, according to Sarjeant (1983, p.104). This combination was not validly published in Davey and Williams (1966b, p.104), since these authors did not fully reference the basionym. Age: middle Miocene.

"**HYSTRICHOSPHAERA**" Wetzel, 1933b, p.33 ex Deflandre, 1937b, p.61. Emendation: Davey and Williams, 1966a, p.29. **Taxonomic senior synonym:** *Spiniferites*, according to Sarjeant (1970, p.75). Taxonomic junior synonym: *Hystrichokibotium*, according to Gocht (1969, p.32). The name *Hystrichosphaera* was not validly published in Wetzel (1932, p.136; 1933b, p.33), since no type was designated — this contravened the I.C.Z.N. (Article 13b), which is in effect in this case since Wetzel treated his microfossils as "protozoans" and used zoological classification. Deflandre (1937b) considered that he was emending *Hystrichosphaera*. Type: not designated; "type species" — *Hystrichosphaera furcata*, designated by Deflandre (1937b, p.61).

"*assamica*" Kar et al., 1972, p.147, pl.1, figs.6–7. Holotype: Kar et al., 1972, pl.1, fig.6. **NOW** *Spiniferites*?. Originally *Hystrichosphaera*, subsequently *Spiniferites*, thirdly (and now) *Spiniferites*?. Age: Tertiary.

"*asteroidea*" Maslov, 1956, p.262, pl.86, fig.13. Holotype: Maslov, 1956, pl.86, fig.13. **NOW** *Baltisphaeridium asteroideum* (Appendix A). Originally *Hystrichosphaera asteroidea*, subsequently *Hystrichosphaeridium asteroideum*, thirdly *Baltisphaeridium hirsutoides* forma *asteroideum* (Appendix A), fourthly (and now) *Baltisphaeridium asteroideum* (Appendix A). Age: Late Cretaceous.

"*bentorii*" Rossignol, 1964, p.84–85, pl.1, figs.3,3bis,5–8; pl.3, figs.2–3; text-figs.A–F. Holotype: Rossignol, 1964, pl.1, figs.3,7–8. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently (and now) *Spiniferites*. Taxonomic junior synonym: *Hystrichosphaera* (as *Spiniferites*) *nodosa*, according to Reid (1974, p.598) and Harland (1977b, p.98–99) — however, Lentin and Williams (1981, p.264) retained *Hystrichosphaera* (as *Spiniferites*) *nodosa*; and *Leptodinium churchillii*, according to Harland (1977b, p.98–99) — however, the latter is now generally considered a taxonomic junior synonym of *Hystrichosphaera* (now *Spiniferites*) *nodosa*. Motile equivalent: *Gonyaulax digitalis* (Pouchet, 1883) Kofoid, 1911, according to Wall and Dale (1967, p.352) and Dodge (1989, p.283). This name was not validly published in Rossignol (1961, pl.1, figs.7–8), since no description was given, and in Rossignol (1962, p.132), who did not illustrate this taxon or provide a reference to an illustration. Age: Pleistocene–Holocene.

"var. *bentorii*". Autonym. Holotype: Rossignol, 1964, pl.1, figs.3,7–8. **Now redundant.**

"var. *truncata*" Rossignol, 1964, p.85, pl.1, figs.5–6; pl.3, fig.1. Holotype: Rossignol, 1964, pl.1, figs.5–6. **NOW** *Spiniferites bentorii* subsp. *truncatus*. Originally *Hystrichosphaera bentorii* var. *truncata*, subsequently (and now) *Spiniferites bentorii* subsp. *truncatus*. Age: Quaternary.

"*biformis*" Wiesner, 1936, p.154, pl.7, fig.9. Holotype: Wiesner, 1936, pl.7, fig.9. **Name not validly published:** generic name not validly published until 1937. **NOW** *Hystrichosphaeridium?*. Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium*, thirdly (and now) *Hystrichosphaeridium?*. Age: Late Cretaceous.

"*borussica*" Eisenack, 1954b, p.62, pl.9, figs.5a–b,6–7. Holotype: Eisenack, 1954b, pl.9, fig.5a–b. **NOW** *Rottnestia*. Originally *Hystrichosphaera*, subsequently (and now) *Rottnestia*, thirdly *Triblastula*, fourthly *Hystrichosphaeropsis* (combination not validly published). Taxonomic junior synonym: *Hystrichosphaeropsis jubata* (name not validly published), according to May (1980, p.24). Age: early Oligocene.

"*buccina*" Davey and Williams, 1966a, p.42–43, pl.4, fig.1; text-figs.10–11. Holotype: Davey and Williams, 1966a, pl.4, fig.1; text-fig.10. Originally *Hystrichosphaera*, subsequently *Spiniferites*. **Taxonomic senior synonym:** *Hystrichokibotium* (as *Spiniferites*) *pseudofurcatus*, according to Lentin and Williams (1973, p.126). N.I.A. Age: Eocene.

"*bulbosa*" (Ehrenberg, 1837b, pl.1, fig.17) Wetzel, 1933b, p.40. Emendation: Morgenroth, 1968, p.546–547, as *Hystrichokolpoma bulbosum*. Holotype: Ehrenberg, 1837b, pl.1, fig.17. Neotype: Morgenroth, 1968, pl.44, fig.6, designated by Morgenroth (1968, p.546). **Combination not validly published:** generic name not validly published until 1937. **NOW** *Hystrichokolpoma bulbosum*. Originally *Xanthidium bulbosum* (Appendix A), subsequently *Hystrichosphaera bulbosa* (combination not validly published), thirdly *Hystrichosphaeridium bulbosum*, fourthly *Ovum hispidum* subsp. *bulbosum* (combination not validly published, Appendix A), fifthly (and now) *Hystrichokolpoma bulbosum*, sixthly *Baltisphaeridium bulbosum* (combination not validly published, Appendix A). Taxonomic senior synonym: *Xanthidium* (as *Hystrichosphaeridium*) *tubiferum*, according to Stover and Evitt (1978, p.55) — however, Lentin and Williams (1981, p.134) retained *Hystrichosphaera* (as *Hystrichokolpoma*) *bulbosa*. Age: Danian.

"*bulloidea*" Deflandre and Cookson, 1955, p.264, pl.5, figs.3–4. Holotype: Deflandre and Cookson, 1955, pl.5, figs.3–4. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently (and now) *Spiniferites*. Taxonomic senior synonym: *Xanthidium* (as *Spiniferites*) *ramosum*, according to Harland (1977b, p.101–102) — however, Lentin and Williams (1981, p.259) retained *Hystrichosphaera* (as *Spiniferites*) *bulloidea*. Taxonomic junior synonym: *Spiniferites nanus*, according to Matsuoka (1983a, p.23) — however, Matsuoka (1991, table 2 — p.8) retained *Spiniferites nanus*. Motile equivalent: *Gonyaulax scrippsiae* Kofoid, 1911, according to Wall and Dale (1967, p.352; 1968c, p.270) — however, see Head (1996b, p.1205). Age: Eocene–Miocene.

"*ceratioides*" Deflandre, 1937b, p.66–67, pl.12 (al. pl.9), figs.7–8. Holotype: Deflandre, 1937b, pl.12 (al. pl.9), figs.7–8; Fensome et al., 1991, fig.1 — p.601; fig.1 — p.605. **NOW** *Xenascus*. Originally *Hystrichosphaera*, subsequently *Pseudoceratium*, thirdly *Spiniferites*, fourthly *Phoberocysta*, fifthly (and now) *Xenascus*. Taxonomic junior synonyms: *Endoceratium* (now *Xenascus*) *perforatum*, according to Davey and Verdier (1971, p.27) — however, Yun Hyesu (1981, p.62) retained *Xenascus perforatus*; *Xenascus australiensis*, according to Davey and Verdier (1971, p.26) — however, Lentin and Williams (1985, p.374) retained *Xenascus australiensis*; *Odontochitina blastema*, according to Davey and Verdier (1971, p.27) — however, Stover and Helby (1987a, p.128) retained *Odontochitina* (as *Xenascus*) *blastema*. Age: Senonian.

"*cingulata*" (Wetzel, 1933b, p.28, pl.4, fig.10) Deflandre and Cookson, 1955, p.267. Holotype: Wetzel, 1933b, pl.4, fig.10. **NOW** *Pterodinium*. Originally *Cymatiosphaera* (Appendix A), subsequently *Hystrichosphaera*, thirdly *Spiniferites*, fourthly *Spiniferites?*, fifthly (and now) *Pterodinium*. Taxonomic junior synonym: *Cymatiosphaera* (subsequently *Spiniferites?*) *pterota*, according to Below (1981a, p.114) — however, Pavlishina (1990, p.95) retained *Cymatiosphaera* (now *Pterodinium?*) *pterota*. Age: Senonian.

"var. *cingulata*". Autonym. Holotype: Wetzel, 1933b, pl.4, fig.10. **Now redundant**. Originally *Hystrichosphaera cingulata* var. *cingulata*, subsequently *Spiniferites cingulatus* var. *cingulatus*.

"var. *granulata*" Clarke and Verdier, 1967, p.45–46, pl.9, figs.5–6; text-fig.18. Holotype: Clarke and Verdier, 1967, pl.9, fig.5; Jan du Chêne et al., 1986a, pl.88, figs.5–8. **NOW** *Pterodinium cingulatum* subsp. *granulatum*. Originally *Hystrichosphaera cingulata* var. *granulata*, subsequently *Spiniferites cingulatus* subsp. *granulatus*, thirdly *Spiniferites? cingulatus* subsp. *granulatus*, fourthly (and now) *Pterodinium cingulatum* subsp. *granulatum*. Age: Cenomanian.

"var. *perforata*" Clarke and Verdier, 1967, p.46–47, pl.9, figs.2–4; text-fig.19. Holotype: Clarke and Verdier, 1967, pl.9, figs.2–3; Jan du Chêne et al., 1986a, pl.89, figs.1–3. Originally *Hystrichosphaera cingulata* var. *perforata*, subsequently *Spiniferites cingulatus* subsp. *perforatus*, thirdly *Spiniferites? cingulatus* subsp. *perforatus*. **Taxonomic senior synonym:** *Hystrichosphaera cingulata* var. *reticulata* (now *Pterodinium cingulatum* subsp. *reticulatum*), according to Clarke et al. (1968, p.181). Age: Cenomanian.

"var. *polygonalis*" Clarke and Verdier, 1967, p.47, pl.8, figs.7–8; text-fig.20. Holotype: Clarke and Verdier, 1967, pl.8, fig.7; Jan du Chêne et al., 1986a, pl.89, figs.7–9. **NOW** *Pterodinium cingulatum* subsp. *polygonale*. Originally *Hystrichosphaera cingulata* var. *polygonalis*, subsequently *Spiniferites cingulatus* subsp. *polygonalis*, thirdly *Spiniferites? cingulatus* subsp. *polygonalis*, fourthly (and now) *Pterodinium cingulatum* subsp. *polygonale*. Taxonomic senior synonyms (at specific rank): *Hystrichosphaera* (now *Spiniferites*) *crassimurata*, according to Clarke et al. (1968, p.181) and *Cymatiosphaera* (now *Pterodinium?*) *pterota*, according to Pavlishina (1990, p.95) — however, Paul et al. (1994, p.722) retained *Hystrichosphaera cingulata* subsp. *polygonalis* (as *Pterodinium cingulatum* subsp. *polygonale*). Age: late Cenomanian–early Turonian.

"var. *reticulata*" Davey and Williams, 1966a, p.39, pl.1, fig.10; pl.2, fig.4. Holotype: Davey and Williams, 1966a, pl.1, figs.1–10; pl.2, fig.4. **NOW** *Pterodinium cingulatum* subsp. *reticulatum*. Originally *Hystrichosphaera cingulata* var. *reticulata*, subsequently *Spiniferites cingulatus* subsp. *reticulatus*, thirdly *Spiniferites? cingulatus* subsp. *reticulatus*, fourthly (and now) *Pterodinium cingulatum* subsp. *reticulatum*. Taxonomic junior synonym: *Hystrichosphaera cingulata* var. *perforata*, according to Clarke et al. (1968, p.181). Age: Cenomanian.

"*clavigera*" (Deflandre, 1937b, p.71, pl.14 [al. pl.11], figs.1–2) Lentin and Williams, 1989, p.176. Emendation: Davey and Verdier, 1976, p.315, as *Florentinia clavigera*. Holotype: Deflandre, 1937b, pl.14 (al. pl.11), figs.1–2. **NOW** *Florentinia*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma*, fourthly (and now) *Florentinia*, fifthly *Hystrichosphaera*. Age: Senonian.

"*cornigera*" Wetzel, 1933b, p.39, pl.5, fig.6 ex Deflandre, 1937b, p.66. Holotype: Wetzel, 1933b, pl.5, fig.6. **NOW** *Spiniferites?*. Originally *Hystrichosphaera*, subsequently *Spiniferites*, thirdly (and now) *Spiniferites?*. This name

was not validly published in Wetzel (1933b) since the generic name was not validly published until 1937. Age: Late Cretaceous.

"*cornuta*" Gerlach, 1961, p.180, pl.27, figs.10–12. Emendation: Stover and Hardenbol, 1994, p.38–39, as *Spiniferella cornuta*. Holotype: Gerlach, 1961, pl.27, figs.10–12. **NOW** *Spiniferella*. Originally *Hystrichosphaera*, subsequently *Spiniferites*, thirdly (and now) *Spiniferella*. Age: middle Oligocene–middle Miocene.

"var. *cornuta*". Autonym. Holotype: Gerlach, 1961, pl.27, figs.10–12. **Now redundant**. Originally *Hystrichosphaera cornuta* var. *cornuta*, subsequently *Spiniferites cornutus* var. *cornutus*.

"var. *laevimura*" Davey and Williams, 1966a, p.44–45, pl.4, fig.5. Holotype: Davey and Williams, 1966a, pl.4, fig.5; Bujak et al., 1980, pl.4, figs.9,12. **NOW** *Spiniferella cornuta* subsp. *laevimura*. Originally *Hystrichosphaera cornuta* var. *laevimura*, subsequently *Spiniferites cornutus* subsp. *laevimurus*, thirdly (and now) *Spiniferella cornuta* subsp. *laevimura*. Taxonomic senior synonym: *Spiniferites cornutus* subsp. *cornutus* (now *Spiniferella cornuta* subsp. *cornuta*), according to Cookson and Eisenack (1974, p.62) — however, Below (1982c, p.33) retained *Hystrichosphaera cornuta* var. *laevimura* (as *Spiniferites cornutus* subsp. *laevimurus*). Taxonomic junior synonyms: *Spiniferites cornutus* var. *crassifurcatus* and *Spiniferites cornutus* var. *normalis*, both according to Below (1982c, p.33). Age: early Eocene.

"*crassimurata*" Davey and Williams, 1966a, p.39, pl.1, fig.11. Holotype: Davey and Williams, 1966a, pl.1, fig.11. Originally *Hystrichosphaera*, subsequently *Spiniferites*, thirdly *Pterodinium*. **Taxonomic senior synonym:** *Cymatiosphaera* (as *Spiniferites?*, now *Pterodinium pterota*, according to Kjellström (1973, p.44) and Pavlishina (1990, p.95). Taxonomic junior synonym (at specific rank): *Hystrichosphaera cingulata* var. *polygonalis*, according to Clarke et al. (1968, p.181) — however, Paul et al. (1994, p.722) retained *Hystrichosphaera cingulata* var. *polygonalis* (as *Pterodinium cingulatum* subsp. *polygonale*). Age: Cenomanian.

"*crassipellis*" Deflandre and Cookson, 1955, p.265, pl.6, figs.2–3; text-fig.20. Holotype: Deflandre and Cookson, 1955, pl.6, figs.2–3. **NOW** *Achomosphaera*. Originally *Hystrichosphaera*, subsequently *Spiniferites*, thirdly (and now) *Achomosphaera*. Taxonomic junior synonyms: *Achomosphaera recurvata* and *Hystrichosphaera* (subsequently *Spiniferites*) *membranosa*, according to Quattrocchio and Sarjeant (1996, p.116). *Hystrichosphaera crassipellis* was not validly published in Deflandre and Cookson (1954, p.1236), who did not give a description. Age: early Eocene.

"*cristata*" Conrad, 1941, p.4–5, pl.1, fig.D; text-fig.2D. Holotype: Conrad, 1941, pl.1, fig.D; text-fig.2D. **NOW** *Spiniferites?*. Originally *Hystrichosphaera*, subsequently *Spiniferites*, thirdly (and now) *Spiniferites?*. Age: Maastrichtian.

"*cruciata*" Wetzel, 1933b, p.48, pl.4, fig.30. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.22–23, as *Veryhachium cruciatum*. Holotype: Wetzel, 1933b, pl.4, fig.30. **Name not validly published:** generic name not validly published until 1937. **NOW** *Multiplicisphaeridium?* (Appendix A). Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium*, thirdly *Hystrichosphaeridium?*, fourthly *Veryhachium* (Appendix A), fifthly (and now) *Multiplicisphaeridium?* (Appendix A). Age: Late Cretaceous.

"*dentata*" Gocht, 1959, p.75–76, pl.4, fig.11; pl.7, fig.19. Emendation: Duxbury, 1977, p.49–50, as *Spiniferites dentatus*. Holotype: Gocht, 1959, pl.4, fig.11. **NOW** *Spiniferites*. Originally *Hystrichosphaera?*, subsequently *Spiniferites?*, thirdly (and now) *Spiniferites*. Questionable assignment: Gocht (1959, p.75). Age: late Hauterivian.

"**furcata*" (Ehrenberg, 1837b, pl.1, figs.12,14) Deflandre, 1937b, p.61. Holotype: not designated. Originally *Xanthidium furcatum* (Appendix A), subsequently *Hystrichosphaera furcata*, thirdly *Ovum hispidum* subsp. *furcatum* (Appendix A), fourthly *Spiniferites furcatus* (combination not validly published). **Taxonomic senior synonym:** *Xanthidium* (as *Hystrichosphaera*, now *Spiniferites*) *ramosum*, according to Davey and Williams (1966a, p.29–33). Taxonomic junior synonym: *Geodia? tripunctata* (Appendix A), according to Sarjeant (1964b, p.175). The nomenclatural type of the genus *Hystrichosphaera* remains *Hystrichosphaera furcata* (although no holotype has been designated). This combination was not validly published in Wetzel (1933b, p.34) since the generic name *Hystrichosphaera* was not validly published until 1937. The validity/authorship of this name may need to be reconsidered as it appears that Ehrenberg (1837b) did not provide a description. Age: Late Cretaceous.

"subsp. *angusta*" Wetzel, 1952, p.394, pl.A, fig.2; text-fig.2. Emendation: Sarjeant, 1984c, p.125–126, as *Spiniferites ramosus* var. *angustus*. Holotype: Wetzel, 1952, pl.A, fig.2; text-fig.2; Sarjeant, 1984c, pl.8, figs.3–4. **NOW** *Spiniferites ramosus*? subsp. *angustus*. Originally *Hystrichosphaera furcata* subsp. *angusta*, subsequently (and now) *Spiniferites ramosus*? subsp. *angustus*, thirdly *Spiniferites ramosus* var. *angustus*. Age: Danian.

"forma *aulosphaeropsis*" Wetzel, 1933b, p.35, pl.5, fig.5 ex Downie and Sarjeant, 1965, p.118. Holotype: Wetzel, 1933b, pl.5, fig.5. Originally *Hystrichosphaera furcata* forma *aulosphaeropsis*, subsequently *Spiniferites ramosus*? subsp. *aulosphaeropsis*. **Taxonomic senior synonym** (at specific rank): *Avellodinium falsificum*, according to Sarjeant (1985b, p.156–157). The name *Hystrichosphaera furcata* forma *aulosphaeropsis* was not validly published in Wetzel (1933b), since the species combination, *Hystrichosphaera furcata*, was not validly published until 1937. Age: Late Cretaceous.

"forma *furcata*". Autonym. Holotype: not designated. **Now redundant**.

"var. *furcata*". Autonym. Holotype: not designated. **Now redundant**.

"var. *membranacea*" Rossignol, 1964, p.86, pl.1, figs.4,9–10; pl.3, figs.7,12. Holotype: Rossignol, 1964, pl.1, figs.4, 9–10. **NOW** *Spiniferites membranaceus*. Originally *Hystrichosphaera furcata* var. *membranacea*, subsequently *Hystrichosphaera ramosa* var. *membranacea*, thirdly *Hystrichosphaera membranacea*, fourthly (and now) *Spiniferites membranaceus*, fifthly *Gonyaulax membranacea*. Motile equivalent: *Gonyaulax spinifera* (Claparède and Lachmann, 1859) Diesing, 1866, according to Dale (1976, table 2 — p.45) and Dodge (1989, p.289). Age: Pleistocene–Holocene.

"forma *multibrachiata*" de Wit, 1943, p.376; text-fig.3f. Holotype: de Wit, 1943, text-fig.3f. **NOW** *Spiniferites ramosus* subsp. *multibrachiatus*. Originally *Hystrichosphaera furcata* forma *multibrachiata*, subsequently (and now) *Spiniferites ramosus* subsp. *multibrachiatus*. Age: Late Cretaceous.

"var. *multiplicata*" Rossignol, 1964, p.86, pl.1, fig.14; pl.3, fig.16. Holotype: Rossignol, 1964, pl.1, fig.14. **NOW** *Spiniferites ramosus* subsp. *multiplicatus*. Originally *Hystrichosphaera furcata* var. *multiplicata*, subsequently *Hystrichosphaera ramosa* var. *multiplicata* (combination not validly published), thirdly (and now) *Spiniferites ramosus* subsp. *multiplicatus*. Taxonomic senior synonym (at specific rank): *Hystrichosphaera* (as *Spiniferites*) *hyperacantha*, according to Matsuoka (1985a, p.35) — however, Londeix et al. (2009, p.66) retained the latter taxon. Age: Pleistocene–Holocene.

"var. *pachyderma*" Rossignol, 1964, p.86, pl.1, figs.1–2; pl.3, fig.6. Holotype: Rossignol, 1964, pl.1, figs.1–2. **NOW** *Spiniferites pachydermus*. Originally *Hystrichosphaera furcata* var. *pachyderma*, subsequently *Hystrichosphaera ramosa* var. *pachyderma* (combination not validly published), thirdly *Spiniferites ramosus* subsp. *pachydermus*, fourthly (and now) *Spiniferites pachydermus*. N.I.A. Age: Pleistocene–Holocene.

"*granulata*" Davey, 1969b, p.4–5, pl.1, fig.4–7. Holotype: Davey, 1969b, pl.1, figs.4–7. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently (and now) *Spiniferites*. Age: Maastrichtian–?Danian.

"*heterostyla*" Heisecke, 1970, p.238,240, pl.5, figs.1–4; pl.6, figs.4–5. Holotype: Heisecke, 1970, pl.5, figs.3–4; pl.6, fig.4. **NOW** *Achomosphaera*. Originally *Hystrichosphaera*, subsequently *Spiniferites*, thirdly (and now) *Achomosphaera*. Age: Danian.

"*hirsuta*" (Ehrenberg, 1837b, pl.1, figs.10,?13) Wetzel, 1933b, p.47. **Name not validly published**: Ehrenberg (1837b) did not intend to introduce a new species. Originally *Xanthidium hirsutum* (name not validly published; Appendix A), subsequently *Ovum hispidum* subsp. *hirsutum* (name not validly published; Appendix A), thirdly *Hystrichosphaera hirsuta* (name not validly published), fourthly *Hystrichosphaeridium hirsutum* (name not validly published), fifthly *Baltisphaeridium hirsutum* (name not validly published; Appendix A), sixthly *Operculodinium hirsutum* (name not validly published), seventhly *Operculodinium?* *hirsutum* (name not validly published). See

discussion under *Operculodinium? hirsutum*. This name was not validly published in Wetzel (1933b), additionally since the generic name *Hystrichosphaera* was not validly published until 1937. Age: Late Cretaceous.

"forma *minor*" Wetzel, 1933b, p.45–46, pl.4, fig.26. Holotype: Wetzel, 1933b, pl.4, fig.26. **Name not validly published**: the species name *Hystrichosphaera hirsuta* is not validly published. **NOW** *Coronifera striolata?* subsp. *minor*. Originally *Hystrichosphaera hirsuta* forma *minor* (name not validly published), subsequently *Baltisphaeridium hirsutum* forma *minus* (name not validly published; Appendix A), thirdly *Operculodinium? hirsutum* subsp. *minus* (name not validly published), fourthly (and now) *Coronifera striolata?* subsp. *minor*. This name was also cited by Wetzel (1932, caption to pl.3, fig.13 — p.144). Age: Late Cretaceous.

"forma *varians*" Wetzel, 1933b, p.47–48, pl.4, figs.27–29. Holotype: not designated. Lectotype: Wetzel, 1933b, pl.4, fig.29, designated by Lentin and Williams (1989, p.78)). **Name not validly published**: the species name *Hystrichosphaera hirsuta* is not validly published. **NOW** *Coronifera striolata?* subsp. *varians*. Originally *Hystrichosphaera hirsuta* forma *varians* (name not validly published), subsequently *Baltisphaeridium hirsutum* forma *varians* (name not validly published; Appendix A), thirdly *Operculodinium? hirsutum* subsp. *varians* (name not validly published), fourthly (and now) *Coronifera striolata* subsp. *varians?*. This name (as *Hystrichosphaera hirsuta* forma *rarians*) was also cited in Wetzel (1932, caption to pl.3, fig.11 — p.144). Age: Late Cretaceous.

"*hyperacantha*" Deflandre and Cookson, 1955, p.264–265, pl.6, fig.7. Holotype: Deflandre and Cookson, 1955, pl.6, fig.7. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently *Achomosphaera*, thirdly (and now) *Spiniferites*. Taxonomic junior synonym (at specific rank): *Hystrichosphaera furcata* var. *multiplicata*, according to Matsuoka (1985a, p.35) — however, Londeix et al. (2009, p.66) retained the latter taxon. Motile equivalent: *Gonyaulax spinifera* (Claparède and Lachmann, 1859) Diesing, 1866, according to Matsuoka et al. (1989, p.94). Age: Miocene.

"*incerta*" (Klumpp, 1953, p.389–390, pl.17, figs.1–2) Morgenroth, 1966a, p.15. Emendations: Morgenroth, 1966a, p.15, as *Hystrichosphaera incerta*; Sarjeant, 1981, p.109–110, as *Spiniferites incertus*. Holotype: Klumpp, 1953, pl.17, figs.1–2. **NOW** *Spiniferites*. Originally *Areoligera*, subsequently *Hystrichosphaera*, thirdly (and now) *Spiniferites*. Taxonomic junior synonym: *Hystrichokibotium* (now *Spiniferites*) *pseudofurcatum*, according to Morgenroth (1966a, p.15) — however, Sarjeant (1981, p.108–109) retained *Hystrichokibotium* (as and now *Spiniferites*) *pseudofurcatum*. Age: late Eocene.

"*inconspicua*" Deflandre, 1935, p.233, pl.9, figs.11–12. Holotype: Deflandre, 1937b, pl.12 (al. pl.9), fig.11. **Name not validly published**: generic name not validly published until 1937. **NOW** *Micrhystridium* (Appendix A). Originally *Hystrichosphaera* (name not validly published), subsequently (and now) *Micrhystridium* (Appendix A). Age: Late Cretaceous.

"*intermedia*" Wetzel, 1933b, p.46; text-fig.14. Holotype: Wetzel, 1933b, text-fig.14. **Name not validly published**: generic name not validly published until 1937. **NOW** *Hystrichosphaeridium?*. Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium*, thirdly *Baltisphaeridium* (Appendix A), fourthly (and now) *Hystrichosphaeridium?*. Age: ?Late Cretaceous.

"*leptoderma*" (Maier, 1959, p.321–322, pl.33, figs.5–6) Davey and Williams, 1969, p.5. Holotype: Maier, 1959, pl.33, fig.5; Sarjeant, 1983, pl.1, fig.2; pl.6, figs.1–2; pl.7, fig.4. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaera*, thirdly *Spiniferites*. **Taxonomic senior synonym**: *Hystrichosphaeridium* (as *Achomosphaera*) *alcicornu*, according to Sarjeant (1983, p.100–101). This combination was not validly published in Davey and Williams (1966b, p.104), since these authors did not fully reference the basionym. Age: middle Oligocene–late Miocene.

"*longispinosa*" (Eisenack, 1931, p.110–111, pl.5, figs.6–17) Wetzel, 1932, caption to pl.3, fig.12 — p.144. Holotype: Eisenack, 1931, pl.5, fig.10 (as *Ovum hispidum* subsp. *longispinosum*), lost according to Eisenack (1959, p.194). Neotype: Eisenack, 1959, pl.15, fig.1, designated by Eisenack (1959, p.194)). **Name not validly published**: generic name not validly published until 1937. **NOW** *Baltisphaeridium longispinosum* (Appendix A). Originally *Ovum hispidum* subsp. *longispinosum* (name not validly published, Appendix A), subsequently

Hystrichosphaera longispinosa (name not validly published), thirdly *Hystrichosphaeridium longispinosum*, fourthly (and now) *Baltisphaeridium longispinosum* (Appendix A), fifthly *Micrhystridium longispinosum* (combination not validly published, Appendix A). The name *Hystrichosphaera longispinosa* was not validly published also in Wetzel (1933b, p.44) since the generic name *Hystrichosphaera* was not validly published until 1937. Age: Ordovician (erratic).

"forma *longispinosa*". Autonym. Holotype: Eisenack, 1931, pl.5, fig.10 (as *Ovum hispidum* subsp. *longispinosum*), lost according to Eisenack (1959, p.194). Neotype: Eisenack, 1959, pl.15, fig.1, designated by Eisenack (1959, p.194)). **Now redundant.**

"forma *pumilis*" Wetzel, 1933b, p.44, pl.4, fig.24. Emendation: Sarjeant, 1985b, p.162, as *Diacrocanthidium pumile*. Holotype: Wetzel, 1933b, pl.4, fig.24; Sarjeant, 1985b, pl.7, fig.5; designated by Sarjeant (1985b, p.162). **Name not validly published:** species name not validly published until 1938. **NOW** *Diacrocanthidium? pumile* (Appendix A). Originally *Hystrichosphaera longispinosa* forma *pumilis* (name not validly published), subsequently *Hystrichosphaeridium pumile*, thirdly *Baltisphaeridium pumile* (combination not validly published; Appendix A), fourthly *Micrhystridium pumile* (Appendix A), fifthly (and now) *Diacrocanthidium? pumile* (Appendix A). In proposing this taxon, Wetzel (1933b, p.44) included in synonymy the holotype of the species. This name was also cited in Wetzel (1932, caption to pl.3, fig.12). Age: Late Cretaceous (erratic).

"*membranacea*" (Rossignol, 1964, p.86, pl.1, figs.4,9–10; pl.3, figs.7,12) Wall, 1967, p.102. Holotype: Rossignol, 1964, pl.1, figs.4,9–10. **NOW** *Spiniferites membranaceus*. Originally *Hystrichosphaera furcata* var. *membranacea*, subsequently *Hystrichosphaera ramosa* var. *membranacea*, thirdly *Hystrichosphaera membranacea*, fourthly (and now) *Spiniferites membranaceus*, fifthly *Gonyaulax membranacea*. This is a cyst equivalent of *Gonyaulax spinifera* (Claparède and Lachmann, 1859) Diesing, 1866, according to Dale (1976, table 2 — p.45) and Dodge (1989, p.289). Age: Pleistocene–Holocene.

"*membranosa*" Archangelsky, 1969b, p.197,199, pl.3, figs.1–4. Holotype: Archangelsky, 1969b, pl.3, figs.1–3. Originally *Hystrichosphaera*, subsequently *Spiniferites*. **Taxonomic senior synonym:** *Hystrichosphaera* (as and now *Achomosphaera*) *crassipellis*, according to Quattrocchio and Sarjeant (1996, p.116). Age: late Eocene.

"*mensula*" Wetzel, 1933b, p.49–50, pl.4, fig.32. Holotype: Wetzel, 1933b, pl.4, fig.32. **Name not validly published:** generic name not validly published until 1937. **NOW** *Veryhachium* (Appendix A). Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium* (name not validly published), thirdly (and now) *Veryhachium* (Appendix A). N.I.A. Age: Late Cretaceous.

"*mirabilis*" Rossignol, 1964, p.86–87, pl.2, figs.1–3; pl.3, figs.4–5. Holotype: Rossignol, 1964, pl.2, figs.1–2. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently (and now) *Spiniferites*. Motile equivalent: *Gonyaulax spinifera* (Claparède and Lachmann, 1859) Diesing, 1866, according to Wall and Dale (1967, p.352; 1968c, p.270) and Dodge (1989, p.289). This name was not validly published in Rossignol (1962, p.131), since no illustration was given, and Rossignol (1963, p.207–208), since no holotype was designated. Age: Pleistocene.

"*monilis*" Davey and Williams, 1966a, p.45, pl.5, fig.2. Emendation: Eaton, 1976, p.282, as *Spiniferites monilis*. Holotype: Davey and Williams, 1966a, pl.5, fig.2; Bujak et al., 1980, pl.4, figs.7–8. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently (and now) *Spiniferites*. Age: early Eocene.

"*nodosa*" Wall, 1967, p.101, pl.14, figs.7–9; text-fig.2. Holotype: Wall, 1967, pl.14, figs.7–9. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently (and now) *Spiniferites*. Taxonomic senior synonym: *Hystrichosphaera* (as *Spiniferites*) *bentorii*, according to Reid (1974, p.598) and Harland (1977b, p.98–99) — however, Lentin and Williams (1981, p.264) retained *Hystrichosphaera* (as *Spiniferites*) *nodosa*. Taxonomic junior synonym: *Leptodinium churchillii*, according to Reid (1974, p.599). Motile equivalent: *Gonyaulax digitalis* (Pouchet, 1883) Kofoid, 1911, according to Wall and Dale (1967, p.352). Age: Quaternary.

"*ovum*" (Deflandre, 1935, p.232, pl.8, fig.11) Deflandre, 1937b, p.67. Holotype: Deflandre, 1935, pl.8, fig.11; Jan du Chêne et al., 1986a, pl.46, fig.1. **NOW** *Hystrichosphaeropsis*. Originally (and now) *Hystrichosphaeropsis*, subsequently *Hystrichosphaera*. N.I.A. Age: Senonian.

"*paradoxa*" Cookson and Eisenack, 1968, p.114; text-figs.2G,3. Holotype: Cookson and Eisenack, 1968, text-figs.2G,3. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently (and now) *Spiniferites*. Age: Senonian.

"?*pedata*" Wetzel, 1933b, p.55–56, pl.4, fig.35 ex Downie and Sarjeant, 1965, p.119. Emendation: Sarjeant, 1985b, p.145–146, as *Coronifera pedata*. Holotype: Wetzel, 1933b, pl.4, fig.35; Sarjeant, 1985b, pl.4, fig.5. **NOW** *Coronifera*. Originally *Hystrichosphaera*?, subsequently *Spiniferites*?, thirdly (and now) *Coronifera*. Questionable assignment: Wetzel (1933b, p.55). Taxonomic senior synonym: *Coronifera oceanica*, by implication in Sarjeant (1985b, p.145–147), who believed *Hystrichosphaera* (as *Coronifera*) *pedata* to be the senior name — however, Kirsch (1991, p.71) retained the two species. The name *Hystrichosphaera pedata* was not validly published in Wetzel (1933b) since the generic name *Hystrichosphaera* was not validly published until 1937. Age: Late Cretaceous.

"*penicillata*" (Ehrenberg, 1843b, p.62 ex Ehrenberg, 1854, pl.37, section 8, fig.3) Wetzel, 1933b, p.41. Holotype: Ehrenberg, 1854, pl.37, section 8, fig.3. **Combination not validly published**: generic name not validly published until 1937. **NOW** *Systematophora penicillata*. Originally *Xanthidium penicillatum* (Appendix A), subsequently *Hystrichosphaera penicillata* (combination not validly published), thirdly *Hystrichosphaeridium penicillatum*, fourthly *Ovum hispidum* subsp. *penicillatum* (combination not validly published; Appendix A), fifthly *Hystrichosphaeridium?* *penicillatum*, sixthly (and now) *Systematophora penicillata*. Taxonomic junior synonym: *Systematophora fasciculigera*, according to Sarjeant (1980a, p.282). The name *Xanthidium penicillatum* was not validly published in Ehrenberg (1843b) since neither description nor illustration was presented. The validity/authorship of this name may need to be reconsidered as it appears that Ehrenberg (1854) did not provide a description. Age: late Oxfordian.

"forma *coronata*" Wetzel, 1933b, caption to pl.4, fig.17 — p.41, pl.4, fig.17. Holotype: Wetzel, 1933b, pl.4, fig.17; Lejeune-Carpentier, 1938a, fig.6. **Name not validly published**: species combination not validly published. **NOW** *Areoligera coronata*. Originally *Hystrichosphaera penicillata* forma *coronata* (name not validly published), subsequently *Hystrichosphaeridium penicillatum* forma *coronatum*, thirdly (and now) *Areoligera coronata*. Taxonomic junior synonyms: *Hystrichosphaera penicillata* forma *medusettiformis* and *Hystrichosphaera penicillata* forma *rhizopodiphora*, both according to Morgenroth (1968, p.551) — however, Eaton (1976, p.245) retained *Hystrichosphaera penicillata* forma *medusettiformis* (as *Areoligera medusettiformis*). Age: Senonian.

"forma *medusettiformis*" Wetzel, 1933b, caption to pl.4, fig.19 — p.41, pl.4, fig.19. Holotype: Wetzel, 1933b, pl.4, fig.19; Lejeune-Carpentier, 1938a, fig.7. **Name not validly published**: species combination not validly published. **NOW** *Areoligera medusettiformis*. Originally *Hystrichosphaera penicillata* forma *medusettiformis* (name not validly published), subsequently (and now) *Areoligera medusettiformis*. Taxonomic senior synonym: *Hystrichosphaera penicillata* forma *coronata* (now *Areoligera coronata*), according to Morgenroth (1968, p.551) — however, Eaton (1976, p.245) retained *Hystrichosphaera penicillata* forma *medusettiformis* (as *Areoligera medusettiformis*). This name (as *Hystrichosphaera penicillata* forma *medusettiformis*), was also cited by Wetzel (1932, caption to pl.3, fig.7 — p.144). Age: Senonian.

"forma *penicillata*". Autonym. Holotype: Ehrenberg, 1854, pl.37, section 8, fig.3. **Now redundant**.

"forma *rhizopodiphora*" Wetzel, 1933b, caption to pl.4, fig.18 — p.41, pl.4, fig.18. Holotype: Wetzel, 1933b, pl.4, fig.18. **Name not validly published**: species combination not validly published. Originally *Hystrichosphaera penicillata* forma *rhizopodiphora*, subsequently *Areoligera rhizopodiphora*. **Taxonomic senior synonym**: *Hystrichosphaera penicillata* forma *coronata* (now *Areoligera coronata*), according to Morgenroth (1968, p.551). Age: Senonian.

"*perforata*" Davey and Williams, 1966a, p.41, pl.5, fig.7. Holotype: Davey and Williams, 1966a, pl.5, fig.7; Bujak et al., 1980, pl.5, figs.2–3. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently (and now) *Spiniferites*. Age: early Eocene.

"*pilosa*" (Ehrenberg, 1854, pl.37, section 8, fig. 4) Wetzel, 1933b, p.43. Emendation: Erkmen and Sarjeant, 1980, p.50, as *Sentusidinium pilosum*. Holotype: Ehrenberg, 1854, pl.37, fig.8, no.4. **Combination not validly published**: generic name not validly published until 1937. **NOW** *Barbatacysta pilosa*. Originally *Xanthidium pilosum* (Appendix A), subsequently *Hystrichosphaera pilosa* (combination not validly published), thirdly *Hystrichosphaeridium?* *pilosum*, fourthly *Baltisphaeridium pilosum* (Appendix A), fifthly *Ovum hispidum* subsp. *pilosum* (combination not validly published; Appendix A), sixthly *Cleistosphaeridium pilosum* (combination not validly published), seventhly *Tenua pilosa*, eighthly *Sentusidinium pilosum*, ninthly *Batiacasphaera pilosa*, tenthly (and now) *Barbatacysta pilosa*. The validity/authorship of this name may need to be reconsidered as it appears that Ehrenberg (1854) did not provide a description. Age: Oxfordian.

"forma *nanus*" Wetzel, 1933b, p.43, pl.4, fig.23; text-fig.13. Emendation: Sarjeant, 1985b, p.145, as *Prolixosphaeridium nanus*. Holotype: Wetzel, 1933b, pl.4, fig.23; Sarjeant, 1985b, pl.2, figs.6–7. **Name not validly published**: species combination not validly published. **NOW** *Prolixosphaeridium?* *nanus*. Originally *Hystrichosphaera pilosa* forma *nanus* (name not validly published), subsequently *Sentusidinium pilosum?* subsp. *nanus*, thirdly *Prolixosphaeridium nanus*, fourthly (and now) *Prolixosphaeridium?* *nanus*. N.I.A. Age: Late Cretaceous.

"forma *pilosa*". Autonym. Holotype: Ehrenberg, 1854, pl.37, section 8, no.4. **Now redundant**. Originally *Hystrichosphaera pilosa* forma *pilosa*, subsequently *Sentusidinium pilosum* forma *pilosum*.

"*porosa*" Manum and Cookson, 1964, p.11–12, pl.2, figs.1–5; text-fig.2. Holotype: Manum and Cookson, 1964, pl.2, figs.2–3; text-fig.2. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently (and now) *Spiniferites*. Age: Late Cretaceous.

"*pseudofurcata*" (Klumpp, 1953, p.388, pl.16, figs.12–14) Gocht, 1969, p.32. Emendation: Sarjeant, 1981, p.108–109, as *Spiniferites pseudofurcatus*. Holotype: Klumpp, 1953, pl.16, figs.12,14; Sarjeant, 1981, pl.3, figs.1–2; text-fig.2; Fensome et al., 1995, figs.1–2 — p.1709. **Combination illegitimate** — **senior homonym**: *Hystrichosphaera pseudofurcata* Varma and Dangwal, 1964. **NOW** *Spiniferites*. Originally *Hystrichokibotium*, subsequently *Hystrichosphaera* (combination illegitimate), thirdly (and now) *Spiniferites*. Taxonomic senior synonym: *Areoligera* (as *Hystrichosphaera*, now *Spiniferites*) *incerta*, according to Morgenroth (1966a, p.15) — however, Sarjeant (1981, p.108–109) retained *Hystrichokibotium* (as and now *Spiniferites*) *pseudofurcatum*. Taxonomic junior synonyms: *Hystrichosphaera buccina*, according to Lentin and Williams (1973, p.126); *Hystrichosphaera tertiaria*, according to Gocht (1969, p.32) and Sarjeant (1970, p.76). Age: late Eocene.

"*pseudofurcata*" Varma and Dangwal, 1964, p.66, pl.2, figs.7–8. Holotype: Varma and Dangwal, 1964, pl.2, figs.7–8. **Substitute name**: *Spiniferites varmae*. Originally *Hystrichosphaera pseudofurcata*, subsequently *Spiniferites?* *varmae*, thirdly (and now) *Spiniferites varmae*. Junior homonym: *Hystrichosphaera* (originally *Hystrichokibotium*) *pseudofurcata* (Klumpp, 1953) Gocht, 1969. Age: Eocene–Oligocene.

"*ptero*" (Cookson and Eisenack, 1958, p.50, pl.11, fig.7) Eisenack and Kjellström, 1972, p.575. Emendation: Pavlishina, 1990, p.95, as *Pterodinium?* *pterotum*. Holotype: Cookson and Eisenack, 1958, pl.11, fig.7. **NOW** *Pterodinium?* Originally *Cymatiosphaera* (Appendix A), subsequently *Spiniferites*, thirdly *Hystrichosphaera*, fourthly *Spiniferites?*, fifthly (and now) *Pterodinium?*. Taxonomic senior synonym: *Cymatiosphaera* (as and now *Pterodinium*) *cingulata*, according to Below (1981a, p.114) — however, Pavlishina (1990, p.95) retained *Cymatiosphaera* (now *Pterodinium?*) *ptero*. Taxonomic junior synonyms: *Hystrichosphaera* (as *Spiniferites*) *crassimurata*, according to Kjellström (1973, p.44) and Pavlishina (1990, p.95); (at specific rank) *Hystrichosphaera cingulata* var. *polygonalis*, according to Pavlishina (1990, p.95) — however, Paul et al. (1994, p.722) retained *Hystrichosphaera cingulata* subsp. *polygonalis* (as *Pterodinium cingulatum* subsp. *polygonale*). Age: Maastrichtian.

"*+ramosa*" (Ehrenberg, 1837b, pl.1, fig.15) Deflandre 1937b, p.64. Holotype: not designated. Lectotype: Ehrenberg, 1837b, pl.1, fig.15, designated by Davey and Williams (1966a, p.32). **NOW** *Spiniferites*. Originally *Xanthidium ramosum* (Appendix A), subsequently (and now) *Spiniferites ramosus*, thirdly *Hystrichosphaera ramosa*, fourthly *Ovum hispidum* subsp. *ramosum* (combination not validly published, Appendix A), fifthly *Bion ramosum* (Appendix A). Taxonomic junior synonyms: *Xanthidium* (as *Hystrichosphaera*) *furcatum*, according to Davey and Williams (1966a, p.29–33); *Galea korykos* and *Hystrichosphaeridium echinoides*, both according to Sarjeant (1983, p.91–92); *Areoligera birama*, according to Morgenroth (1968, p.550); *Geodia?* *tripunctata*, by

implication in Sarjeant (1964b, p.175), who considered *Geodia? tripunctata* to be a taxonomic junior synonym of *Hystrichosphaera furcata*; *Hystrichosphaera* (now *Spiniferites*) *bulloidea*, according to Harland (1977b, p.101–102) — however, Lentin and Williams (1981, p.259) retained *Hystrichosphaera* (as and now *Spiniferites*) *bulloideus*; *Homotryblium distinctum*, according to Jain and Garg (1982, p.69), who considered *Homotryblium distinctum* to be a taxonomic junior synonym of *Spiniferites ramosus* subsp. *ramosus*. Motile equivalent: *Gonyaulax spinifera* (Claparède and Lachmann, 1859) Diesing, 1866, according to Dodge (1989, p.289). The nomenclatural type of the genus *Hystrichosphaera* remains the holotype of *Hystrichosphaera furcata*. This combination was not validly published in Wetzel (1933b, p.35) since the generic name was not validly published until 1937. The validity/authorship of this name may need to be reconsidered as it appears that Ehrenberg (1837b) did not provide a description. Age: Late Cretaceous.

"var. *gracilis*" Davey and Williams, 1966a, p.34–35, pl.1, fig.5; pl.5, fig.6. Holotype: Davey and Williams, 1966a, pl.5, fig.6; Bujak et al., 1980, pl.4, figs.1–2. **NOW** *Spiniferites ramosus* subsp. *gracilis*. Originally *Hystrichosphaera ramosa* var. *gracilis*, subsequently *Spiniferites ramosus* var. *gracilis*, thirdly (and now) *Spiniferites ramosus* subsp. *gracilis*. Taxonomic junior synonym (at subspecific rank): *Hystrichosphaeridium plicatum*, according to Sarjeant (1983, p.93). Age: Cenomanian–Eocene.

"var. *granomembranacea*" Davey and Williams, 1966a, p.37–38, pl.4, fig.4. Holotype: Davey and Williams, 1966a, pl.4, fig.4; Bujak et al., 1980, pl.4, figs.10–11. **NOW** *Spiniferites ramosus* subsp. *granomembranaceus*. Originally *Hystrichosphaera ramosa* var. *granomembranacea*, subsequently *Spiniferites ramosus* var. *granomembranaceus*, thirdly (and now) *Spiniferites ramosus* subsp. *granomembranaceus*. Age: early Eocene.

"var. *granosa*" Davey and Williams, 1966a, p.35, pl.4, fig.9. Holotype: Davey and Williams, 1966a, pl.4, fig.9; Bujak et al., 1980, pl.4, figs.4–5. **NOW** *Spiniferites ramosus* subsp. *granosus*. Originally *Hystrichosphaera ramosa* var. *granosa*, subsequently *Spiniferites ramosus* var. *granosus*, thirdly (and now) *Spiniferites ramosus* subsp. *granosus*. Age: early Eocene.

"var. *membranacea*" (Rossignol, 1964, p.86, pl.1, figs.4,9–10; pl.3, figs.7,12) Davey and Williams, 1966b, p.37. Holotype: Rossignol, 1964, pl.1, figs.4,9–10. **NOW** *Spiniferites membranaceus*. Originally *Hystrichosphaera furcata* var. *membranacea*, subsequently *Hystrichosphaera ramosa* var. *membranacea*, thirdly *Hystrichosphaera membranacea*, fourthly (and now) *Spiniferites membranaceus*, fifthly *Gonyaulax membranacea*. Motile equivalent: *Gonyaulax spinifera* (Claparède and Lachmann, 1859) Diesing, 1866, according to Dale (1976, table 2 — p.45) and Dodge (1989, p.289). Age: Pleistocene–Holocene.

"var. *multibrevis*" Davey and Williams, 1966a, p.35–36, pl.1, fig.4; pl.4, fig.6; text-fig.9. Holotype: Davey and Williams, 1966a, pl.4, fig.6; Bujak et al., 1980, pl.4, figs.3,6. Originally *Hystrichosphaera ramosa* var. *multibrevis*, subsequently *Spiniferites ramosus* var. *multibrevis*, thirdly *Spiniferites ramosus* subsp. *multibrevis*, fourthly *Spiniferites multibrevis*. **Taxonomic senior synonym** (at specific rank): *Galea twistringiensis*, according to Sarjeant (1983, p.95–96). Taxonomic junior synonym (at subspecific rank): *Achomosphaera* (as *Spiniferites*) *cambra*, according to Jain (1982, p.51). Age: Hauterivian.

"var. *multiplicata*" (Rossignol, 1964, p.86, pl.1, fig.14; pl.3, fig.16) Harland and Downie, 1969, p.232. Holotype: Rossignol, 1964, pl.1, fig.14. **Combination not validly published**: basionym not fully referenced. **NOW** *Spiniferites ramosus* subsp. *multiplicatus*. Originally *Hystrichosphaera furcata* var. *multiplicata*, subsequently *Hystrichosphaera ramosa* var. *multiplicata* (combination not validly published), thirdly (and now) *Spiniferites ramosus* subsp. *multiplicatus*. Taxonomic senior synonym (at specific rank): *Hystrichosphaera* (as *Spiniferites*) *hyperacantha*, according to Matsuoka (1985a, p.35) — however, Londeix et al. (2009, p.66) retained the latter taxon. Age: Pleistocene–Holocene.

"var. *pachyderma*" (Rossignol, 1964, p.86, pl.1, figs.1–2; pl.3, fig.6) Harland and Downie, 1969, p.232. Holotype: Rossignol, 1964, pl.1, figs.1–2. **Combination not validly published**: basionym not fully referenced. **NOW** *Spiniferites pachydermus*. Originally *Hystrichosphaera furcata* var. *pachyderma*, subsequently *Hystrichosphaera ramosa* var. *pachyderma* (combination not validly published), thirdly *Spiniferites ramosus* subsp. *pachydermus*, fourthly (and now) *Spiniferites pachydermus*. Age: Pleistocene–Holocene.

- "var. *ramosa*". Autonym. Holotype: not designated. Lectotype: Ehrenberg, 1837b, pl.1, fig.15, designated by Davey and Williams (1966a, p.32). **Now redundant**. Originally *Hystrichosphaera ramosa* var. *ramosa*, subsequently *Spiniferites ramosus* var. *ramosus*.
- "var. *reticulata*" Davey and Williams, 1966a, p.38, pl.1, figs.2–3. Holotype: Davey and Williams, 1966a, pl.1, figs.2–3. **NOW** *Spiniferites ramosus* subsp. *reticulatus*. Originally *Hystrichosphaera ramosa* var. *reticulata*, subsequently *Spiniferites ramosus* var. *reticulatus*, thirdly (and now) *Spiniferites ramosus* subsp. *reticulatus*. Age: Cenomanian.
- "*reginaldii*" (Mantell, 1844, p.240; text-fig.53, no.5) Sarjeant, 1967c, p.244–245. Emendation: Sarjeant, 1967c, p.244–245, as *Hystrichosphaera reginaldii*. Holotype: Mantell, 1844, text-fig.53, no.5; Sarjeant, 1967c, figs.3A–B,4–5; Sarjeant, 1992a, figs.2,4a–b. **NOW** *Spiniferites?*. Originally *Xanthidium* (Appendix A), subsequently *Spiniferites*, thirdly *Hystrichosphaera*, fourthly *Baltisphaeridium* (Appendix A), fifthly (and now) *Spiniferites?*. Age: Late Cretaceous.
- "*rubina*" Rossignol, 1962, p.134 ex Rossignol, 1964, p.87–88, pl.1, figs.12–13; pl.3, figs.22–23. Holotype: Rossignol, 1964, pl.1, figs.12–13. **NOW** *Spiniferites*. Originally *Hystrichosphaeridium* (name not validly published), subsequently *Hystrichosphaera*, thirdly (and now) *Spiniferites*. This name was not validly published in Rossignol (1962) since no illustration was provided. Age: Quaternary.
- "*salpingophora*" Deflandre, 1935, p.232, pl.9, fig.1. Emendation: Davey and Williams, 1966b, p.61–62, as *Hystrichosphaeridium salpingophorum*. Holotype: Deflandre, 1935, pl.9, fig.1; Deflandre, 1937b, pl.13 (al. pl.10), figs.1,3; Fauconnier and Masure, 2004, pl.46, figs.1–6. **Name not validly published**: generic name not validly published until 1937. **NOW** *Hystrichosphaeridium*. Originally *Hystrichosphaera* (name not validly published), subsequently (and now) *Hystrichosphaeridium*. Age: Senonian.
- "*scabrata*" Wall, 1967, p.102, pl.14, figs.10–13; text-fig.2. Holotype: Wall, 1967, pl.14, figs.10–13. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently (and now) *Spiniferites*. This is a cyst equivalent of *Gonyaulax spinifera* (Claparède and Lachmann, 1859) Diesing, 1866, according to Dodge (1989, p.289). Age: Pleistocene–Holocene.
- "*scabrosa*" Clarke and Verdier, 1967, p.49–50, pl.9, figs.7–10; text-fig.21. Holotype: Clarke and Verdier, 1967, pl.9, fig.10. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently (and now) *Spiniferites*. Age: Cenomanian–Santonian.
- "*sergipensis*" Regali et al., 1974, p.291, pl.24, fig.1. Holotype: Regali et al., 1974, pl.24, fig.1. **NOW** *Hystrichosphaeridium?*. Originally *Hystrichosphaera*, subsequently (and now) *Hystrichosphaeridium?*. Age: early Eocene.
- "*setosa*" Philippot, 1949, p.56; text-fig.1. Holotype: Philippot, 1949, text-fig.1. **NOW** *Spiniferites?*. Originally *Hystrichosphaera*, subsequently *Spiniferites*, thirdly (and now) *Spiniferites?*. Age: Senonian.
- "*speciosa*" Deflandre, 1937b, p.65, pl.11 (al. pl.8), fig.2. Holotype: Deflandre, 1937b, pl.11 (al. pl.8), fig.2. **NOW** *Spiniferites?*. Originally *Hystrichosphaera*, subsequently *Spiniferites*, thirdly (and now) *Spiniferites?*. This name was not validly published in Deflandre (1934, caption to fig.4 — p.967; 1935, p.232; 1936a, p.63), since the generic name *Hystrichosphaera* was not validly published until 1937 and, additionally, since no description was given. Age: Late Cretaceous.
- "*supparus*" Drugg, 1967, p.24, pl.4, figs.5–6. Holotype: Drugg, 1967, pl.4, fig.5. **NOW** *Spiniferites*. Originally *Hystrichosphaera*, subsequently (and now) *Spiniferites*. N.I.A. Age: Maastrichtian–Danian.
- "*tenuicapillata*" Wetzel, 1933b, p.42, pl.4, figs.20–22. Holotype: Wetzel, 1933b, pl.4, fig.20. **Name not validly published**: generic name not validly published until 1937. **NOW** *Areoligera*. Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium*, thirdly (and now) *Areoligera*. Age: Senonian.

"forma *irregularis*" Wetzel, 1933b, p.42–43, pl.4, fig.20. Holotype: Wetzel, 1933b, pl.4, fig.20. **Name not validly published**: specific name not validly published until 1937. **Nomenclatural senior synonym**: *Hystrichosphaera tenuicapillata* forma *tenuicapillata* (now *Areoligera tenuicapillata* subsp. *tenuicapillata*), which has the same holotype. Originally *Hystrichosphaera tenuicapillata* forma *irregularis* (name not validly published), subsequently *Areoligera tenuicapillata* subsp. *irregularis* (name illegitimate). Age: Senonian.

"forma *pinopollina*" Wetzel, 1933b, p.42–43, pl.4, fig.22. Holotype: Wetzel, 1933b, pl.4, fig.22. **Name not validly published**: specific name not validly published until 1937. **NOW** *Areoligera tenuicapillata* subsp. *pinopollina*. Originally *Hystrichosphaera tenuicapillata* forma *pinopollina* (name not validly published), subsequently *Areoligera tenuicapillata* forma *pinopollina*, thirdly (and now) *Areoligera tenuicapillata* subsp. *pinopollina*. Age: Senonian.

"forma *turbilineata*" Wetzel, 1933b, p.42, pl.4, fig.21. Holotype: Wetzel, 1933b, pl.4, fig.21; Sarjeant, 1985b, pl.4, fig.2. **Name not validly published**: specific name not validly published until 1937. **NOW** *Areoligera tenuicapillata* subsp. *turbilineata*. Originally *Hystrichosphaera tenuicapillata* forma *turbilineata* (name not validly published), subsequently *Areoligera turbilineata*, thirdly (and now) *Areoligera tenuicapillata* subsp. *turbilineata*. Age: Senonian.

"*tertiaria*" Eisenack and Gocht, 1960, p.515; text-fig.4. Holotype: Eisenack and Gocht, 1960, text-fig.4. Originally *Hystrichosphaera*, subsequently *Spiniferites*. **Taxonomic senior synonym**: *Hystrichokibotium* (now *Spiniferites*) *pseudofurcatum*, according to Gocht (1969, p.32) and Sarjeant (1970, p.76). Age: Oligocene.

"var. *obliqua*" Wall, 1967, p.103, pl.14, fig.16; text-fig.2. Holotype: Wall, 1967, pl.14, fig.16. **NOW** *Spiniferites pseudofurcatus* subsp. *obliquus*. Originally *Hystrichosphaera tertiariorum* var. *obliqua*, subsequently (and now) *Spiniferites pseudofurcatus* subsp. *obliquus*. Age: late Pleistocene–Holocene.

"var. *tertiaria*". Autonym. Holotype: Eisenack and Gocht, 1960, text-fig.4. **Now redundant**.

"*tubifera*" (Ehrenberg, 1837b, pl.1, fig.16) Wetzel, 1933b, p.40. Emendation: Davey and Williams, 1966b, p.56–58, as *Hystrichosphaeridium tubiferum*. Holotype: Ehrenberg, 1837b, pl.1, fig.16. **Combination not validly published**: generic name not validly published until 1937. **NOW** *Hystrichosphaeridium tubiferum*. Originally *Xanthidium tubiferum* (Appendix A), subsequently *Hystrichosphaera tubifera* (combination not validly published), thirdly (and now) *Hystrichosphaeridium tubiferum*, fourthly *Ovum hispidum tubiferum* (combination not validly published; Appendix A). Taxonomic junior synonym: *Xanthidium* (as *Hystrichokolpoma*) *bulbosum*, according to Stover and Evitt (1978, p.55) — however, Lentin and Williams (1989, p.134) retained *Xanthidium* (as *Hystrichokolpoma*) *bulbosum*. Age: ?Late Cretaceous.

"*wetzelii*" Deflandre, 1937b, p.65, pl.11 (al. pl.8), figs.6,8. Holotype: Deflandre, 1937b, pl.11 (al. pl.8), figs.6,8. **NOW** *Rottnestia*. Originally *Hystrichosphaera*, subsequently *Hystrichosphaeropsis* (combination not validly published), thirdly *Spiniferites*, fourthly (and now) *Rottnestia*. This name was not validly published in Deflandre (1935, p.232; 1936a, p.63) since the generic name *Hystrichosphaera* was not validly published until 1937 and, additionally, since no description was given. Age: Senonian.

"*xanthiopyxides*" Wetzel, 1933b, p.44–45, pl.4, fig.25. Emendations: Morgenroth, 1968, p.556, as *Hystrichosphaeridium? xanthiopyxides*; Sarjeant, 1985b, p.142–144, as *Tanyosphaeridium xanthiopyxides*. Holotype: Wetzel, 1933b, pl.4, fig.25, Morgenroth, 1968, pl.48, fig.5; Sarjeant, 1985b, pl.3, figs.2–3; Dietz et al., 1999, fig.10, no.8. **Name not validly published**: generic name not validly published until 1937. **NOW** *Tanyosphaeridium*. Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium*, thirdly *Hystrichosphaeridium?*, fourthly *Baltisphaeridium* (Appendix A), fifthly *Prolixosphaeridium?*, sixthly (and now) *Tanyosphaeridium*. Taxonomic junior synonym: *Hystrichosphaeridium* (as *Tanyosphaeridium*) *magdali*, according to Stover and Evitt (1978, p.85). Age: Late Cretaceous (?Maastrichtian, according to Sarjeant, 1985b, p.143).

"**HYSTRICHOSPHAERA** subgenus **HYSTRICHOSPHAERA**". Autonym. **Now redundant**. Deflandre (1937b, p.61–67) included the following species in this subgenus: *Hystrichosphaera ceratioides*, *Hystrichosphaera cornigera*, *Hystrichosphaera furcata*, *Hystrichosphaera ramosa*, *Hystrichosphaera speciosa* and *Hystrichosphaera wetzelii*. Entries for these species are included under the genus *Hystrichosphaera*. Type: not designated; "type species" — *Hystrichosphaera furcata*, designated by Deflandre (1937b, p.61).

"**HYSTRICHOSPHAERA** subgenus **HYSTRICHOSPHAEROPSIS**" (Deflandre, 1935, p.232) Deflandre, 1937b, p.67. **NOW** *Hystrichosphaeropsis*. Originally (and now) *Hystrichosphaeropsis*, subsequently *Hystrichosphaera* subgenus *Hystrichosphaeropsis*. Deflandre (1937b, p.67) assigned *Hystrichosphaera ovum* to this subgenus: an entry for this species is included under the genus *Hystrichosphaera*. Type: Deflandre, 1935, pl.8, fig.11, as *Hystrichosphaeropsis ovum*.

HYSTRICHOSPHAERIDIUM Deflandre, 1937b, p.68. Emendation: Davey and Williams, 1966b, p.55–56. Taxonomic junior synonym: *Dilatysphaera* (Appendix A), according to Eisenack et al. (1973, p.407) — however, Cramer and Diez (1979, p.76) retained *Dilatysphaera*. Type: Ehrenberg, 1837b, pl.1, fig.16, as *Xanthidium tubiferum*.

"**aculeatum**" Timofeev, 1959, p.54, pl.4, fig.21. Holotype: Timofeev, 1959, pl.4, fig.21. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"**aemulum**" Deflandre, 1939a, p.187–189, pl.9, fig.12; pl.10, figs.5–8; pl.11, figs.1,7. Emendation: Below, 1982b, p.139–140, as *Rigaudella aemula*. Holotype: Deflandre, 1939a, pl.11, fig.1; Eisenack and Kjellström, 1972, figure to left on p.43; Fensome et al., 1995, fig.1 — p.473; fig.2 — p.1477. **NOW** *Rigaudella*. Originally *Hystrichosphaeridium*, subsequently *Cannosphaeropsis*, thirdly *Adnatosphaeridium*, fourthly (and now) *Rigaudella*. Taxonomic junior synonym: *Cannosphaeropsis paucispina*, according to Below (1982b, p.139). Age: Oxfordian.

"**alagoense**" Regali et al., 1974, p.290, pl.24, fig.2. Holotype: Regali et al., 1974, pl.24, fig.2. **NOW** *Surculosphaeridium?*. Originally *Hystrichosphaeridium*, subsequently (and now) *Surculosphaeridium?*. Age: middle Eocene–Miocene.

"**albertense**" Pocock, 1962, p.82, pl.15, figs.226–227. Holotype: Pocock, 1962, pl.15, fig.226; Brideaux, 1977, pl.11, figs.3–4; Jansonius, 1986, pl.4, figs.4–5; Fauconnier and Masure, 2004, pl.55, figs.1–6. **NOW** *Oligosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Oligosphaeridium*. Taxonomic junior synonyms: *Hystrichosphaeridium* (as *Oligosphaeridium*) *irregulare*, according to Jansonius (1986, p.213); *Hystrichosphaeridium* (as *Oligosphaeridium?*) *coelenteratum*, *Hystrichosphaeridium* (as *Oligosphaeridium?*) *dispare* and *Hystrichosphaeridium* (as *Oligosphaeridium*) *reniforme*, by implication in Stover and Evitt (1978, p.68–69), who considered these species to be taxonomic junior synonyms of *Hystrichosphaeridium* (as *Oligosphaeridium*) *irregulare*, which is now a taxonomic junior synonym of *Hystrichosphaeridium* (now *Oligosphaeridium*) *albertense*. Age: Barremian.

"**albicornu**" Eisenack, 1954b, p.65, pl.10, figs.1–2; text-fig.5. Holotype: Eisenack, 1954b, pl.10, fig.2. **NOW** *Achomosphaera*. Originally *Hystrichosphaeridium*, subsequently (and now) *Achomosphaera*. Taxonomic junior synonyms: *Galea lychnea* and *Hystrichosphaeridium leptodermum*, both according to Sarjeant (1983, p.100–101). Age: Oligocene.

"**amalthei**" Wetzel, 1966, p.317, pl.31, figs.2,2a–b. Holotype: Wetzel, 1966, pl.31, figs.2,2a. **NOW** *Dapsilidinium?*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*, thirdly *Polysphaeridium?*, fourthly (and now) *Dapsilidinium?*. Age: late Toarcian.

"**ancoriferum**" Cookson and Eisenack, 1960a, p.8, pl.2, fig.11. Emendation: Cookson and Eisenack, 1968, p.119–120, as *Cleistosphaeridium ancoriferum*. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.11. **NOW** *Sepispinula*. Originally *Hystrichosphaeridium*, subsequently *Cleistosphaeridium*, thirdly (and now) *Sepispinula*. Taxonomic senior synonym: *Micrhystridium* (as *Polysphaeridium*, now *Sepispinula?*) *ambiguum*, according to Yun Hyesu

(1981, p.44) and Schiøler and Wilson (1998, p.328) — however, Masure in Fauconnier and Masure (2004, p.499) retained *Sepispinula ancorifera*. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Sepispinula?*) *huguoniotii*, according to Clarke and Verdier (1967, p.54) — however, Masure in Fauconnier and Masure (2004, p.499) retained *Sepispinula ancorifera*. Age: Albian–Cenomanian.

"**annulatum**" Timofeev, 1959, p.56, pl.4, fig.22. Holotype: Timofeev, 1959, pl.4, fig.22. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"**anthophorum**" Cookson and Eisenack, 1958, p.43, pl.11, figs.12–13; text-figs.16–18. Holotype: Cookson and Eisenack, 1958, pl.11, fig.12; Fauconnier and Masure, 2004, pl.73, figs.5–6. **NOW** *Stiphrosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Oligosphaeridium*, thirdly *Polystephanephorus*, fourthly *Hystrichosphaerina*, fifthly (and now) *Stiphrosphaeridium*. Taxonomic junior synonym: *Hystrichosphaerina schindewolfii*, according to Davey (1979c, p.65) — however, Lentin and Williams (1981, p.150) retained *Hystrichosphaerina schindewolfii*. Age: Aptian–Albian.

"**apiculatum**" Timofeev, 1959, p.52, pl.4, fig.3. Holotype: Timofeev, 1959, pl.4, fig.3. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A), thirdly *Goniosphaeridium* (combination not validly published; Appendix A). Age: Early Ordovician.

"**aquitanicum**" Deunff, 1961a, p.39–40, pl.2, figs.12–13. Holotype: Deunff, 1961a, pl.2, figs.12–13. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium?*. Questionable assignment: Davey and Williams (1966b, p.70); and Masure and Foucher in Fauconnier and Masure (2004, p.310) as a problematic species. Age: Cretaceous.

"**aracajuense**" Regali et al., 1974, p.291, pl.24, fig.6. Holotype: Regali et al., 1974, pl.24, fig.6. **NOW** *Spiniferites*. Originally *Hystrichosphaeridium*, subsequently (and now) *Spiniferites*. Age: Paleocene–early Eocene.

"**arborispinum**" Davey and Williams, 1966b, p.61, pl.9, figs.5,10. Holotype: Davey and Williams, 1966b, pl.9, fig.10. Age: early-middle Barremian.

"**armatum**" Deflandre, 1937b, p.76–77, pl.16 (al. pl.13), figs.6–7. Emendation: Davey, 1969a, p.153, as *Cleistosphaeridium armatum*. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), fig.6; Fauconnier and Masure, 2004, pl.23, figs.1–3. **NOW** *Downiesphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly (and now) *Downiesphaeridium*. Age: late Senonian.

"**arrectum**" Timofeev, 1959, p.53, pl.4, fig.8. Holotype: Timofeev, 1959, pl.4, fig.8. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early–Mid Ordovician.

"**articulatum**" (Wetzel in Eisenack, 1938b, p.187; text-fig.4) Pastiels, 1948, p.42. Holotype: Eisenack, 1938b, fig.4; Eisenack, 1954b, pl.7, fig.3 (not pl.7, fig.1 as indicated in Eisenack, 1954b, p.90). **NOW** *Wetziella*. Originally (and now) *Wetziella*, subsequently *Palaeoperidinium* (name not validly published), thirdly *Hystrichosphaeridium*, fourthly *Wetziella* subgenus *Wetziella*. Taxonomic junior synonyms: *Wetziella echinulata*, according to Costa and Downie (1979, p.40); *Wetziella horrida*, according to Stover and Evitt (1978, p.131); *Rhombodinium* (as *Wetziella*) *coronatum*, according to Costa and Downie (1979, p.43) — however, Iakovleva and Heilmann-Clausen (2010, p. 211,226) retained *Rhombodinium* (as *Wetziella*) *coronatum*; *Rhombodinium pentagonum*, according to Costa and Downie (1979, p.40) — however, Lentin and Williams (1981, p.244) retained *Rhombodinium pentagonum*; *Wetziella hampdenensis*, according to Costa and Downie (1979, p.40) — however, Lentin and Williams (1981, p.290) retained *Wetziella hampdenensis*; *Wetziella* (now *Charlesdowniea*) *clathrata*, according to Pastiels (1948, p.42) — however, this synonymy has not been generally accepted. Age: late Eocene–early Oligocene.

"**aruncium**" Tasch in Tasch et al., 1964, p.193, pl.3, fig.12. Holotype: Tasch et al., 1964, pl.3, fig.12. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as and now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albian.

"*arundum*" Eisenack and Cookson, 1960, p.8, pl.3, figs.7–9. Emendation: Lucas-Clark, 1984, p.188, as *Litosphaeridium arundum*. Holotype: Eisenack and Cookson, 1960, pl.3, fig.7; Helby et al., 1987, figs.29J–K. **NOW** *Litosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaeridium?*, thirdly (and now) *Litosphaeridium*. Taxonomic senior synonym: *Micrhystridium* (as *Dapsilidinium?*, now *Litosphaeridium*) *fucosum*, according to Below (1982c, p.29) — however, Lentin and Williams (1985, p.227) retained *Hystrichosphaeridium* (as *Litosphaeridium*) *arundum*. Questionable assignment: Davey and Williams (1966b, p.70). Age: Albian.

"*ashdodense*" Rossignol, 1962, p.132, pl.2, fig.2. Holotype: Rossignol, 1962, pl.2, fig.2. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as and now *Lingulodinium*) *machaerophorum*, according to Wall (1967, p.109). Age: Pleistocene.

"*asperum*" Maier, 1959, p.319, pl.33, fig.2. Emendation: Sarjeant, 1983, p.113–114, as *Polysphaeridium asperum*. Holotype: Maier, 1959, pl.33, fig.2. **NOW** *Polysphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*, thirdly *Dapsilidinium*, fourthly (and now) *Polysphaeridium*. Age: middle Miocene.

"*assamicum*" Sah et al., 1970, p.146–147, pl.2, figs.20–21. Holotype: Sah et al., 1970, pl.2, fig.20. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Jain (1982, p.52) recommended that this name be restricted to the holotype. Age: Late Cretaceous.

"*astarte*" Sannemann, 1955, p.325, pl.4, fig.1; text-figs.1a–b. Holotype: Sannemann, 1955, pl.4, fig.1. **NOW** *Buedingiisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Buedingiisphaeridium* (Appendix A). N.I.A. Age: Devonian (late Givetian).

"*asterigerum*" Gocht, 1959, p.67, pl.3, fig.1; pl.7, figs.1–4. Holotype: Gocht, 1959, pl.3, fig.1; Fauconnier and Masure, 2004, pl.57, figs.1–6. **NOW** *Oligosphaeridium?*. Originally *Hystrichosphaeridium*, subsequently (and now) *Oligosphaeridium?*. Taxonomic junior synonym: *Hystrichosphaeridium* (as *Oligosphaeridium*) *vasiformum*, according to Duxbury (1977, p.45) — however, McIntyre and Brideaux (1980, p.21) retained *Hystrichosphaeridium* (as *Oligosphaeridium*) *vasiformum*. Age: late Valanginian–late Hauterivian.

"*asterium*" Eaton, 1976, p.273, pl.11, figs.7–10. Holotype: Eaton, 1976, pl.11, figs.7–8. **NOW** *Melitasphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Melitasphaeridium*. Age: middle Eocene (see Aubry, 1986).

"*asteroideum*" (Maslov, 1956, p.262, pl.86, fig.13) Deflandre and Deflandre-Rigaud, 1958, card 1359. Holotype: Maslov, 1956, pl.86, fig.13. **NOW** *Baltisphaeridium asteroideum* (Appendix A). Originally *Hystrichosphaera asteroidea*, subsequently *Hystrichosphaeridium asteroideum*, thirdly *Baltisphaeridium hirsutoides* forma *asteroideum* (Appendix A), fourthly (and now) *Baltisphaeridium asteroideum* (Appendix A). Age: Late Cretaceous.

"*asymmetricum*" Deflandre and Courteville, 1939, p.100–101, pl.4, figs.1–2. Emendation: Clarke and Verdier, 1967, p.43, as *Hexasphaera asymmetrica* (combination illegitimate). Holotype: Deflandre and Courteville, 1939, pl.4, fig.1; Fensome et al., 1993a, fig.1 — p.949. **NOW** *Callaiosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Callaiosphaeridium*, thirdly *Hexasphaera*. Age: Senonian.

"*atavum*" Naumova, 1968, p.38, pl.2, fig.11. Holotype: Naumova, 1968, pl.2, fig.11. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Cambrian.

"*atlasienne*" Below, 1982c, p.12, pl.3, figs.2a–c; text-figs.2a–c. Holotype: Below, 1982c, pl.3, figs.2a–c; Fauconnier and Masure, 2004, pl.43, figs.1–4. **NOW** *Kleithriasphaeridium*. Originally *Hystrichosphaeridium?*, subsequently (and now) *Kleithriasphaeridium*. Questionable assignment: Below (1982c, p.12). Age: Albian.

"*attadalense*" Cookson and Eisenack, 1982, p.45, pl.4, fig.20. Holotype: Cookson and Eisenack, 1982, pl.4, fig.20. Questionable assignment: Cookson and Eisenack (1982, p.45). Age: early Cenomanian.

"**baciferum**" (Eisenack, 1934, p.66, pl.4, figs.20–21) Eisenack, 1938b, p.189. Holotype: Eisenack, 1934, pl.4, fig.20, lost according to Eisenack (1962, p.356). Neotype: Eisenack, 1962, pl.44, fig.3, designated by Eisenack (1962, p.356). **NOW** *Bacisphaeridium* (Appendix A). Originally *Bion* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly *Veryhachium* (combination not validly published; Appendix A), fourthly (and now) *Bacisphaeridium* (Appendix A), fifthly *Baltisphaeridium* (combination not validly published; Appendix A). Age: Late Ordovician.

"**bahiaense**" Regali et al., 1974, p.289–290, pl.23, fig.5. Holotype: Regali et al., 1974, pl.23, fig.5. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Cleistosphaeridium?*, thirdly *Impletosphaeridium?*, fourthly (and now) *Operculodinium*. Age: Eocene–Oligocene.

"**balticum**" Eisenack, 1951, p.190, pl.3, figs.10–11. Holotype: Eisenack, 1951, pl.3, fig.10. **NOW** *Pachysphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Pulvinosphaeridium* (combination not validly published; Appendix A), thirdly *Veryhachium* (Appendix A), fourthly *Goniosphaeridium* (Appendix A), fifthly *Baltisphaeridium* (Appendix A), sixthly *Estiastra* (Appendix A), seventhly (and now) *Pachysphaeridium* (Appendix A). Age: Early Ordovician.

?**biforme** Wiesner, 1936, p.154, pl.7, fig.9 ex Deflandre, 1946a, card 881. Holotype: Wiesner, 1936, pl.7, fig.9. Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium*, thirdly (and now) *Hystrichosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. The name *Hystrichosphaera biformis* was not validly published in Wiesner (1936), since the generic name *Hystrichosphaera* was not validly published until 1937. Age: Late Cretaceous.

"**biformoides**" Eisenack, 1954b, p.68, pl.11, figs.16–20. Holotype: Eisenack, 1954b, pl.11, fig.18. **NOW** *Achilleodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma*, fourthly (and now) *Achilleodinium*, fifthly *Florentinia*. Age: late Eocene–early Oligocene.

"**bimarginatum**" Timofeev, 1959, p.54, pl.4, fig.12. Holotype: Timofeev, 1959, pl.4, fig.12. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"**bohemicum**" Eisenack, 1934, p.70–71, pl.5, fig.31 ex Eisenack, 1938a, p.12. Holotype: Eisenack, 1934, pl.5, fig.31. **NOW** *Baltisphaeridium bohemicum* (Appendix A). Originally *Ovum hispidum* subsp. *bohemicum* (combination not validly published, Appendix A), subsequently *Hystrichosphaeridium bohemicum*, thirdly (and now) *Baltisphaeridium bohemicum* (Appendix A). The name *Ovum hispidum* subsp. *bohemicum* was not validly published in Eisenack (1934) since the specific name *Ovum hispidum* was not validly published. Age: Silurian.

"**borracherosum**" (Cramer, 1964, p.289, pl.1, fig.11; text-fig.16, no.6) Andreeva, 1973, p.192. Holotype: Cramer, 1964, pl.1, fig.11. **Combination not validly published:** basionym not fully referenced. **NOW** *Petaloferidium* (Appendix A). Originally *Baltisphaeridium* (Appendix A), subsequently *Multiplicisphaeridium* (Appendix A), thirdly *Hystrichosphaeridium* (combination not validly published), fourthly (and now) *Petaloferidium* (Appendix A). Age: Silurian (Ludlow).

"**bowerbankii**" Davey and Williams, 1966b, p.69–70, pl.8, figs.1,4. Holotype: Davey and Williams, 1966b, pl.8, fig.4; Fauconnier and Masure, 2004, pl.43, fig.8. Age: Cenomanian.

?**breviatum** Morgenroth, 1966a, p.29, pl.7, figs.11–12. Holotype: Morgenroth, 1966a, pl.7, figs.11–12; Fauconnier and Masure, 2004, pl.43, figs.5–7. Taxonomic senior synonym (at subspecific rank): *Hystrichosphaeridium zoharyi* subsp. *ktana* (as *Polysphaeridium subtile* subsp. *ktana*), according to Islam (1983b, p.343) — however, Masure and Foucher in Fauconnier and Masure (2004, p.309–310) retained this taxon as a questionable species of *Hystrichosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.56). Age: early Eocene.

"**brevifurcatum**" Eisenack, 1954a, p.207–208, pl.1, fig.2; text-fig.2. Holotype: Eisenack, 1954a, pl.1, fig.2. **NOW** *Visbysphaera* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A),

thirdly (and now) *Visbysphaera* (Appendix A), fourthly *Multiplicisphaeridium* (Appendix A). Age: Silurian (late Llandovery).

"*brevispinosum*" Eisenack, 1931, p.111, pl.5, figs.3–5 ex Eisenack, 1938a, p.12. Holotype: Eisenack, 1931, pl.5, fig.3, lost according to Eisenack (1959, p.197). Neotype: Eisenack, 1959, pl.15, fig.13, designated by Eisenack (1959, p.197), lost according to Ribecai and Tongiorgi (1999, p.124). New Neotype: Eisenack, 1959, pl.15, fig.16, designated by Ribecai and Tongiorgi (1999, p.124). **NOW** *Pachysphaeridium brevispinosum* (Appendix A). Originally *Ovum hispidum* subsp. *brevispinosum* (name not validly published, Appendix A), subsequently *Hystrichosphaeridium brevispinosum*, thirdly *Baltisphaeridium brevispinosum* (Appendix A), fourthly *Buedingiisphaeridium brevispinosum* (combination not validly published; Appendix A), fifthly (and now) *Pachysphaeridium brevispinosum* (Appendix A). The name *Ovum hispidum* subsp. *brevispinosum* was not validly published in Eisenack (1931) since the specific name *Ovum hispidum* was not validly published. Age: Silurian.

"subsp. *brevispinosum*". Autonym. Holotype: Eisenack, 1931, pl.5, fig.3, lost according to Eisenack (1959, p.197). Neotype: Eisenack, 1959, pl.15, fig.13, designated by Eisenack (1959, p.197), lost according to Ribecai and Tongiorgi (1999, p.124). New Neotype: Eisenack, 1959, pl.15, fig.16, designated by Ribecai and Tongiorgi (1999, p.124). **NOW** *Baltisphaeridium brevispinosum* subsp. *brevispinosum* (Appendix A). Originally *Hystrichosphaeridium brevispinosum* subsp. *brevispinosum*, subsequently (and now) *Baltisphaeridium brevispinosum* subsp. *brevispinosum* (Appendix A).

"var. *brevispinosum*". Autonym. Holotype: Eisenack, 1931, pl.5, fig.3, lost according to Eisenack (1959, p.197). Neotype: Eisenack, 1959, pl.15, fig.13, designated by Eisenack (1959, p.197). **Now redundant**. Originally *Hystrichosphaeridium brevispinosum* var. *brevispinosum*, subsequently *Baltisphaeridium brevispinosum* var. *brevispinosum* (Appendix A).

"subsp. *callosum*" Sannemann, 1955, p.325–326, pl.1, figs.1–4,7; pl.3, figs.2–5,10; pl.4, figs.3–9; pl.6, figs.11–12; text-figs.2a–d. Holotype: Sannemann, 1955, pl.4, fig.3. **NOW** *Baltisphaeridium brevispinosum* subsp. *callosum* (Appendix A). Originally *Hystrichosphaeridium brevispinosum* subsp. *callosum*, subsequently *Buedingiisphaeridium brevispinosum* subsp. *callosum* (combination not validly published; Appendix A), thirdly (and now) *Baltisphaeridium brevispinosum* subsp. *callosum* (Appendix A). Age: Devonian (late Givetian).

"subsp. *castaneoides*" Sannemann, 1955, p.326, pl.4, figs.13–14; text-fig.3. Holotype: Sannemann, 1955, pl.4, fig.13. **NOW** *Baltisphaeridium brevispinosum* subsp. *castaneoides* (Appendix A). Originally *Hystrichosphaeridium brevispinosum* subsp. *castaneoides*, subsequently (and now) *Baltisphaeridium brevispinosum* subsp. *castaneoides* (Appendix A). Age: Devonian (late Givetian).

"var. *nanus*" Deflandre, 1945a, p.62–63, pl.1, figs.5–7. Holotype: Deflandre, 1945a, pl.1, figs.5–6. **NOW** *Polygonium nanus* (Appendix A). Originally *Hystrichosphaeridium brevispinosum* var. *nanus*, subsequently *Baltisphaeridium brevispinosum* var. *nanus* (combination not validly published; Appendix A), thirdly *Baltisphaeridium nanus* (Appendix A), fourthly *Micrhystridium nanus* (Appendix A), fifthly (and now) *Polygonium nanus* (Appendix A), sixthly *Solisphaeridium nanus* (Appendix A). Taxonomic junior synonym: *Baltisphaeridium brevispinosum* var. *wenlockense* (subsequently *Salopidium wenlockense*) Downie, 1959, an acritarch taxon, according to Lister (1970, p.54). This name was not validly published in Deflandre (1942, fig.1 — p.476), who did not give a description. N.I.A. Age: Silurian.

"*brideauxii*" Lentin and Williams, 1973, p.74. Holotype: Brideaux, 1971, pl.26, figs.69–70; text-fig.9c. Originally *Hystrichosphaeridium cylindratum* (name illegitimate), subsequently *Hystrichosphaeridium brideauxii*. Substitute name for *Hystrichosphaeridium cylindratum* Brideaux, 1971, p.91–92, pl.26, figs.69–70; pl.27, fig.74; text-fig.9c (an illegitimate name). **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Florentinia*) *cooksoniae*, according to Harker and Sarjeant (1975, p.225–226). Age: Albian.

"*bulbosum*" (Ehrenberg, 1837b, pl.1, fig.17) Deflandre, 1937b, p.70. Emendation: Morgenroth, 1968, p.46–47, as *Hystrichokolpoma bulbosum*. Holotype: Ehrenberg, 1837b, pl.1, fig.17. Neotype: Morgenroth, 1968, pl.44, fig.6, designated by Morgenroth (1968, p.546). **NOW** *Hystrichokolpoma bulbosum*. Originally *Xanthidium bulbosum* (Appendix A), subsequently *Hystrichosphaera bulbosa* (combination not validly published), thirdly

Hystrichosphaeridium bulbosum, fourthly *Ovum hispidum* subsp. *bulbosum* (combination not validly published, Appendix A), fifthly (and now) *Hystrichokolpoma bulbosum*, sixthly *Baltisphaeridium bulbosum* (combination not validly published, Appendix A). Taxonomic senior synonym: *Xanthidium* (as *Hystrichosphaeridium*) *tubiferum*, according to Stover and Evitt (1978, p.55) — however, Lentin and Williams (1981, p.134) retained *Hystrichosphaeridium* (as *Hystrichokolpoma*) *bulbosum*. Age: Danian.

"*caibense*" Regali et al., 1974, p.290, pl.24, fig.4. Holotype: Regali et al., 1974, pl.24, fig.4. Originally *Hystrichosphaeridium*, subsequently *Apectodinium*. **Taxonomic senior synonym:** *Wetzeliella* (as *Apectodinium*) *homomorpha*, according to Williams et al. (1993, p.57). Age: Paleocene.

calospinum He Chengquan, Zhu Shenzhao and Jin Guangxian in He Chengquan et al., 1989, p.47–48, pl.20, fig.15. Holotype: He Chengquan et al., 1989, pl.20, fig.15. Mao Shaozhi et al. (1995, p.99) indicated that this name should be restricted to the holotype. Age: Early Tertiary.

?*calvum* Tasch in Tasch et al., 1964, p.193, pl.1, fig.21. Holotype: Tasch et al., 1964, pl.1, fig.21; Fauconnier and Masure, 2004, pl.43, figs.9–10. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium*?. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Albian.

?*campayense* Varma and Dangwal, 1964, p.63, pl.1, figs.1–2. Holotype: Varma and Dangwal, 1964, pl.1, fig.1. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium*?. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Eocene–Oligocene.

"*caminuspinum*" Wall, 1965a, p.165, pl.9, fig.4. Holotype: Wall, 1965a, pl.9, fig.4. **NOW** *Beaumontella*?. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*?, thirdly *Dapsilidinium*?, fourthly (and now) *Beaumontella*?. Taxonomic junior synonym: *Cleistosphaeridium mojsisovicsii*, according to Below (1987a, p.70). Age: early Sinemurian.

"*cantharellus*" Brosius, 1963, p.40–41, pl.6, fig.1; text-fig.2, nos.11a–c. Holotype: Brosius, 1963, pl.6, fig.1; Fensome et al., 1993a, fig.1 — p.1021. **NOW** *Cordosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Cordosphaeridium*, thirdly *Tityrosphaeridium*. N.I.A. Age: late Oligocene.

"*capillare*" Li Wenben, 1974, p.370, pl.196, fig.15. Holotype: Li Wenben, 1974, pl.196, fig.15. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Late Triassic.

"*capitatum*" Cookson and Eisenack, 1960b, p.252, pl.39, fig.9. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.9; Fauconnier and Masure, 2004, pl.66, fig.1. **NOW** *Barbatocysta*. Originally *Hystrichosphaeridium*, subsequently *Prolixosphaeridium*, thirdly *Tenua* Eisenack, fourthly *Batiacasphaera*, fifthly (and now) *Barbatocysta*. Age: Oxfordian–Kimmeridgian.

"*castanea*" Eisenack, 1934, p.71, pl.5, fig.32 ex Eisenack, 1938a, p.12. Holotype: Eisenack, 1934, pl.5, fig.32. **NOW** *Baltisphaeridium castanea* (Appendix A). Originally *Ovum hispidum* subsp. *castanea* (name not validly published; Appendix A), subsequently *Hystrichosphaeridium castanea*, thirdly (and now) *Baltisphaeridium castanea* (Appendix A). The name *Ovum hispidum* subsp. *castanea* was not validly published in Eisenack (1934) since the specific name *Ovum hispidum* was not validly published. N.I.A. Age: Silurian.

"*caulleryi*" Deflandre, 1939a, p.189, pl.11, figs.2–3. Emendation: Stancliffe and Sarjeant, 1990, p.200, as *Adnatosphaeridium caulleryi*. Holotype: Deflandre, 1939a, pl.11, fig.2; Stancliffe and Sarjeant, 1990, pl.1, figs.3,5; Fauconnier and Masure, 2004, pl.1, figs.7–8. **NOW** *Adnatosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Cannosphaeropsis*, thirdly (and now) *Adnatosphaeridium*, fourthly *Polystephanephorus*. Age: early Oxfordian.

"*centrocarpum*" Deflandre and Cookson, 1955, p.272–273, pl.8, figs.3–4. Holotype: Deflandre and Cookson, 1955, pl.8, figs.3–4; Matsuoka et al., 1997, pl.1, figs.1–6. **NOW** *Operculodinium centrocarpum*. Originally *Hystrichosphaeridium centrocarpum*, subsequently *Baltisphaeridium centrocarpum* (Appendix A), thirdly *Cordosphaeridium centrocarpum*, fourthly *Cordosphaeridium tiara* subsp. *centrocarpum*, fifthly (and now)

Operculodinium centrocarpum, sixthly *Cordosphaeridium microtriainum* subsp. *centrocarpum*, seventhly *Cleistosphaeridium centrocarpum*. Taxonomic junior synonyms: *Operculodinium? echigoense*, according to Matsuoka et al. (1997, p.22); *Membranilarnacia delicata*, according to Jain (1980, p.140). Motile equivalent: *Peridinium* (now *Protoceratium*) *reticulatum* Claparède and Lachmann, 1859 (as *Gonyaulax grindleyi* Reinecke, 1967), according to Wall and Dale (1966, p.1025–1026) — however, see Head (1996b, p.1211). Age: Miocene.

"var. *centrocarpum*". Autonym. Holotype: Deflandre and Cookson, 1955, pl.8, figs.3–4. **Now redundant.**

"var. *teokides*" Srivastava and Banerjee, 1969, p.103, pl.1, figs.6–8. Holotype: Srivastava and Banerjee, 1969, pl.1, figs.6–7. **NOW** *Operculodinium centrocarpum* subsp. *teokides*. Originally *Hystrichosphaeridium centrocarpum* var. *teokides*, subsequently (and now) *Operculodinium centrocarpum* subsp. *teokides*. Age: Eocene.

"*choanophorum*" Deflandre and Cookson, 1955, p.271–272; text-figs.23–29. Emendation: Harland and Hill, 1979, p.39,41, as *Melitasphaeridium choanophorum*. Holotype: Deflandre and Cookson, 1955, text-figs.23–26; Fensome et al., 1993a, figs.1–4 — p.1055. **NOW** *Melitasphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Melitasphaeridium*. Taxonomic junior synonym: *Melitasphaeridium aequabile*, according to Harland, Head and Wrenn in Head and Wrenn (1992, p.10). This name was not validly published in Deflandre and Cookson (1954, p.1236), since these authors did not provide a description. Age: Pliocene.

"*circumscissum*" Timofeev, 1959, p.53, pl.4, fig.9. Holotype: Timofeev, 1959, pl.4, fig.9. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"*classicum*" Deunff, 1967, p.25. **Name not validly published:** no description.

"*clavicularum*" Deflandre, 1939a, p.191–192, pl.10, fig.4. Emendation: Sarjeant, 1968, p.233, as *Solisphaeridium clavicularum*. Holotype: Deflandre, 1939a, pl.10, fig.4. **NOW** *Solisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Solisphaeridium* (Appendix A). Questionable assignment: Stover and Evitt (1978, p.56). Age: Late Jurassic.

"*claviferum*" (Wilkinson, 1849, p.89–92, pl.13, fig.1) Deflandre, 1946a, card 887. Holotype: Wilkinson, 1849, pl.13, fig.1. **NOW** *Baltisphaeridium* (Appendix A). Originally *Xanthidium* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly (and now) *Baltisphaeridium* (Appendix A). Age: Late Cretaceous.

"*clavigerum*" Deflandre, 1937b, p.71, pl.14 (al. pl.11), figs.1–2. Emendation: Davey and Verdier, 1976, p.315, as *Florentinia clavigera*. Holotype: Deflandre, 1937b, pl.14 (al. pl.11), figs.1–2. **NOW** *Florentinia*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma*, fourthly (and now) *Florentinia*, fifthly *Hystrichosphaera*. Age: Senonian.

"*coelenteratum*" Tasch in Tasch et al., 1964, p.195, pl.2, fig.11. Holotype: Tasch et al., 1964, pl.2, fig.11. Originally *Hystrichosphaeridium*, subsequently *Oligosphaeridium?*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Oligosphaeridium*) *albertense*, by implication in Stover and Evitt (1978, p.69), who considered *Hystrichosphaeridium coelenteratum* to be a taxonomic junior synonym of *Hystrichosphaeridium* (subsequently *Oligosphaeridium*) *irregulare*, which is now a taxonomic junior synonym of *Hystrichosphaeridium* (now *Oligosphaeridium*) *albertense*. Age: Albian.

"*cognitum*" Timofeev, 1959, p.54–55, pl.4, fig.15. Holotype: Timofeev, 1959, pl.4, fig.15. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early-Mid Ordovician.

"*colligerum*" Deflandre and Cookson, 1955, p.278–279, pl.7, fig.3. Emendations: Cookson, 1965a, p.86 and Goodman and Witmer, 1985, p.77–78, both as *Diphyes colligerum*. Holotype: Deflandre and Cookson, 1955, pl.7, fig.3. **NOW** *Diphyes*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and

now) *Diphyes*. Taxonomic junior synonym: *Diphyes pseudoficusoides* according to Fensome et al. (2009, p.30). Age: early Eocene.

?*collum* Tasch in Tasch et al., 1964, p.194, pl.2, figs.7,16. Holotype: Tasch et al., 1964, pl.2, figs.7,16; Fauconnier and Masure, 2004, pl.43, figs.11–12. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium*?. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Albian.

"*complex*" (White, 1842, p.39, pl.4, fig.11) Deflandre, 1946b, p.111. Holotype: White, 1842, pl.4, fig.11, lost according to Davey and Williams (1966b, p.74). Neotype: Davey and Williams, 1966b, pl.7, fig.1, designated by Davey and Williams (1966b, p.71). **NOW** *Oligosphaeridium complex*. Originally *Xanthidium tubiferum* var. *complex* (Appendix A), subsequently *Xanthidium complex* (Appendix A), thirdly *Hystrichosphaeridium complex*, fourthly (and now) *Oligosphaeridium complex*. Taxonomic junior synonyms: *Hystrichosphaeridium elegantulum*, according to Deflandre (1946b, p.111); *Hystrichosphaeridium himalayense*, according to Jain and Garg (1986b, p.64); *Oligosphaeridium cephalum*, according to Lejeune-Carpentier and Sarjeant (1981, p.9) and Jain (1982, p.52); *Geodia? irregularis* (Appendix A; subsequently *Hystrichosphaeridium speciale*), according to Harker and Sarjeant in Harker et al. (1990, p.59). Age: Senonian.

"*coniferum*" Sannemann, 1955, p.327, pl.4, fig.2; text-figs.4a–b. Holotype: Sannemann, 1955, pl.4, fig.2. **NOW** *Multiplicisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Multiplicisphaeridium* (Appendix A). Age: Devonian (late Givetian).

conispiniferum Yun Hyesu, 1981, p.30–31, pl.2, figs.4–6,9. Holotype: Yun Hyesu, 1981, pl.2, fig.4; Fensome et al., 1991, fig.1 — p.625. Age: early Santonian.

"*conspicuum*" Timofeev, 1959, p.54, pl.4, fig.14. Holotype: Timofeev, 1959, pl.4, fig.14. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Late Cambrian.

"*cooksoniae*" Singh, 1971, p.329–330, pl.51, figs.7–8; pl.52, figs.1–4. Emendation: Duxbury, 1980, p.120, as *Florentinia cooksoniae*. Holotype: Singh, 1971, pl.51, fig.7. **NOW** *Kleithriasphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Florentinia*, thirdly *Litosphaeridium*, fourthly (and now) *Kleithriasphaeridium*. Taxonomic senior synonym: *Hystrichosphaeridium* (as *Florentinia*) *mantellii*, according to Below (1982c, p.8) — however, Lentin and Williams (1985, p.135) retained *Florentinia cooksoniae*. Taxonomic junior synonym: *Hystrichosphaeridium cylindratum*, according to Harker and Sarjeant (1975, p.225–226). Age: late Albian.

"*corollatum*" Timofeev, 1959, p.54, pl.4, fig.11. Holotype: Timofeev, 1959, pl.4, fig.11. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"*costatum*" Davey and Williams, 1966b, p.62, pl.10, fig.4. Holotype: Davey and Williams, 1966b, pl.10, fig.4; Stancliffe and Sarjeant, 1990, pl.3, fig.1. **NOW** *Compositosphaeridium* Dodekova. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly (and now) *Compositosphaeridium* Dodekova. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Compositosphaeridium*?) *polonicum*, according to Beju (1971, p.292) — however, Masure in Fauconnier and Masure (2004, p.137) retained *Compositosphaeridium costatum*. Age: Oxfordian.

"*crassipes*" (Reade, 1839, pl.9, figs.2–5) Lejeune-Carpentier, 1941, p.B79–B80. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.10, as *Hystrichokolpoma? crassipes*. Holotype: Reade, 1839, pl.9, fig.2, lost according to Lejeune-Carpentier and Sarjeant (1981, p.11). Neotype: Lejeune-Carpentier, 1941, fig.9; Lejeune-Carpentier and Sarjeant, 1981, pl.3, fig.3; text-fig.6; designated by Lejeune-Carpentier and Sarjeant (1981, p.11). **NOW** *Hystrichokolpoma?*. Originally *Xanthidium* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly *Litosphaeridium?*, fourthly (and now) *Hystrichokolpoma?*. Taxonomic junior synonym: *Hystrichosphaeridium* (as *Pervosphaeridium*) *truncigerum*, by implication in Yun Hyesu (1981, p.27), who considered *Hystrichosphaeridium* (as *Pervosphaeridium*) *truncigerum* to be the senior synonym — however, Lentin and Williams (1985, p.282) retained *Hystrichosphaeridium* (as *Pervosphaeridium*) *truncigerum*. Age: Late Cretaceous.

"**cribrotubiferum**" Sarjeant, 1960a, p.137, pl.6, figs.2–3; text-fig.1. Emendations: Davey et al., 1966, p.161 and Stancliffe and Sarjeant, 1990, p.207, both as *Surculosphaeridium cribrotubiferum*. Holotype: Sarjeant, 1960a, pl.6, fig.2; text-fig.1; Stancliffe and Sarjeant, 1990, text-fig.3, nos.4,6; Fauconnier and Masure, 2004, pl.73, figs.9–10. **NOW** *Surculosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Surculosphaeridium*. Age: early Oxfordian.

"**cristatum**" Downie, 1958, p.338–339, pl.16, fig.4; text-fig.4f. Holotype: Downie, 1958, pl.16, fig.4. **NOW** *Cymatiogalea* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Priscogalea* (Appendix A), fourthly (and now) *Cymatiogalea* (Appendix A). Taxonomic junior synonym: *Cymatiogalea polygonomorpha* Górka, 1967, an acritarch species, according to Rasul (1974, p.56). Age: Early Ordovician.

"**cruciatum**" Wetzel, 1933b, p.48–49, pl.4, fig.30 ex Lejeune-Carpentier, 1940, p.B222. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.22–23, as *Veryhachium cruciatum*. Holotype: Wetzel, 1933b, pl.4, fig.30. **NOW** *Multiplicisphaeridium?* (Appendix A). Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium*, thirdly *Hystrichosphaeridium?*, fourthly *Veryhachium* (Appendix A), fifthly (and now) *Multiplicisphaeridium?* (Appendix A). Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. The name *Hystrichosphaera cruciata* was not validly published in Wetzel (1933b), since the generic name *Hystrichosphaera* was not validly published until 1937. Age: Late Cretaceous.

"**cylindratum**" Brideaux, 1971, p.91–92, pl.26, figs.69–70; pl.27, fig.74; text-fig.9c. Holotype: Brideaux, 1971, pl.26, figs.69–70; text-fig.9c. **Name illegitimate** — **senior homonym**: *Hystrichosphaeridium cylindratum* Morgenroth, 1966a. Substitute name: *Hystrichosphaeridium brideauxii*. Originally *Hystrichosphaeridium cylindratum* (name illegitimate), subsequently *Hystrichosphaeridium brideauxii*. **Taxonomic senior synonym**: *Hystrichosphaeridium* (now *Florentinia*) *cooksoniae*, according to Harker and Sarjeant (1975, p.225–226). Age: Albian.

cylindratum Morgenroth, 1966a, p.30, pl.8, figs.3–4. Holotype: Morgenroth, 1966a, pl.8, figs.3–4. Junior homonym: *Hystrichosphaeridium cylindratum* Brideaux, 1971. Age: early Eocene.

"**danicum**" (Wetzel, 1952, p.396–397, pl.A, figs.5–6; text-fig.8) Wetzel, 1955, p.34. Emendation: Sarjeant, 1984c, p.129–130, as *Achomosphaera danica*. Holotype: Wetzel, 1952, pl.A, fig.6; Dietz et al., 1999, text-fig.6b. **NOW** *Achomosphaera*. Originally *Areoligera*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichosphaeridium*, fourthly *Cleistosphaeridium?*, fifthly (and now) *Achomosphaera*. Taxonomic senior synonym: *Areoligera senonensis*, according to Lejeune-Carpentier and Sarjeant (1981, p.15) — however, Sarjeant (1984c, p.130) retained *Hystrichosphaeridium* (as *Achomosphaera*) *danicum*. Age: Paleocene.

"**deanei**" Davey and Williams, 1966b, p.58–59, pl.6, figs.4,8. Holotype: Davey and Williams, 1966b, pl.6, fig.8; Davey and Verdier, 1973, pl.1, fig.9. **NOW** *Florentinia*. Originally *Hystrichosphaeridium*, subsequently (and now) *Florentinia*. Age: Cenomanian.

"**deflandrei**" Valensi, 1947, p.817; text-fig.3. Holotype: Valensi, 1947, text-fig.3; Fauconnier and Masure, 2004, pl.21, figs.1–4. **NOW** *Dapsilidinium?*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*, thirdly (and now) *Dapsilidinium?*. Age: Middle Jurassic.

"**denticulatum**" Courteville in Deflandre, 1946a, card 895. **Name not validly published**: no description. Originally *Hystrichosphaeridium* (name not validly published), subsequently *Baltisphaeridium* (name not validly published; Appendix A).

"**dictyophorum**" Cookson and Eisenack, 1958, p.44, pl.11, fig.14. Holotype: Cookson and Eisenack, 1958, pl.11, fig.14; Fensome et al., 1993a, fig.1 — p.1125. **NOW** *Stiphrosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Oligosphaeridium*, thirdly (and now) *Stiphrosphaeridium*. Age: Late Jurassic.

"**dictyostilum**" Menéndez, 1965, p.11–12, pl.2, fig.6; pl.3, figs.18–22. Emendations: Sarjeant, 1981, p.115, as *Areosphaeridium dictyostilum*; Fensome et al., 2007, p.396–397, as *Enneadocysta dictyostila*. Holotype: Menéndez,

1965, pl.2, fig.6; pl.3, figs.18–20. **NOW** *Enneadocysta*. Originally *Hystrichosphaeridium*, subsequently *Oligosphaeridium*?, thirdly *Areosphaeridium*, fourthly *Enneadocysta*?, fifthly (and now) *Enneadocysta*. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Areosphaeridium*) *diktyoplokum*, according to Eaton (1971, p.359) — however, Sarjeant (1981, p.115) retained *Areosphaeridium* (now *Enneadocysta*) *dictyostilum*. Taxonomic junior synonyms: *Enneadocysta partridgei*, according to Fensome et al. (2007, p.396), *Areosphaeridium* (now *Enneadocysta*) *arcuatum* and *Cordosphaeridium* (now *Cooksonidium*) *capricornum*, both according to Sarjeant (1981, p.115–116) — however, Lentin and Williams (1985, p.26) retained *Areosphaeridium* (now *Enneadocysta*) *arcuatum* and *Cordosphaeridium* (now *Cooksonidium*) *capricornum*. Age: Tertiary.

"*differtum*" Sannemann, 1955, p.327, pl.4, fig.15; text-figs.5a–c. Holotype: Sannemann, 1955, pl.4, fig.15. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Devonian (late Givetian).

"*difficile*" Manum and Cookson, 1964, p.12–14, pl.3, figs.1–3,7. Holotype: Manum and Cookson, 1964, pl.3, fig.1; Fauconnier and Masure, 2004, pl.36, figs.2–4. **NOW** *Heterosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*? (combination not validly published), thirdly (and now) *Heterosphaeridium*. Age: Cenomanian.

"*digitatum*" Eisenack, 1938a, p.20–22, pl.4, figs.3–5; text-fig.7. Holotype: Eisenack, 1938a, pl.4, fig.3. **NOW** *Hoegklintia* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Multiplicisphaeridium* (Appendix A), fourthly (and now) *Hoegklintia* (Appendix A). Age: Ordovician (erratic).

"*dignum*" Sannemann, 1955, p.327, pl.1, fig.5; pl.4, fig.11; text-fig.7. Holotype: Sannemann, 1955, pl.4, fig.11. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Devonian (late Givetian).

"*diktyoplokum*" Klumpp, 1953, p.392, pl.18, figs.3–7 (not pl.18, figs.8–10, which are now *Cordosphaeridium latum*). Emendation: Eaton, 1971, p.358–359, as *Areosphaeridium diktyoplokum*. Holotype: Klumpp, 1953, pl.18, figs.3–4. **NOW** *Areosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly (and now) *Areosphaeridium*. Taxonomic junior synonym: *Hystrichosphaeridium* (now *Areosphaeridium*) *dictyostilum*, according to Eaton (1971, p.359) — however, Sarjeant (1981, p.115) retained *Hystrichosphaeridium* (as *Areosphaeridium*) *dictyostilum*. Age: middle-late Eocene.

"subsp. *diktyoplokum*". Autonym. Holotype: Klumpp, 1953, pl.18, figs.3–4. **Now redundant**. Originally *Hystrichosphaeridium diktyoplokum* subsp. *diktyoplokum*, subsequently *Cordosphaeridium diktyoplokum* subsp. *diktyoplokum*, thirdly *Areosphaeridium diktyoplokum* subsp. *diktyoplokum*.

"subsp. *latum*" Klumpp, 1953, p.392, pl.18, figs.8–10. Emendation: Sarjeant, 1981, p.106–107, as *Plethysyrinx lata* — however, see Lentin and Williams (1985, p.72). Holotype: Klumpp, 1953, pl.18, figs.8–9. **NOW** *Cordosphaeridium latum*. Originally *Hystrichosphaeridium diktyoplokum* subsp. *latum*, subsequently *Cordosphaeridium diktyoplokum* subsp. *latum*, thirdly *Areosphaeridium diktyoplokum* subsp. *latum*, fourthly *Plethysyrinx lata*, fifthly (and now) *Cordosphaeridium latum*. Age: Eocene.

"*diploporum*" Eisenack, 1951, p.190–191, pl.2, fig.6. Holotype: Eisenack, 1951, pl.2, fig.6. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Micrhystridium* (name not validly published; Appendix A), thirdly (and now) *Baltisphaeridium* (Appendix A). Age: Ordovician (erratic).

"*dispare*" Tasch in Tasch et al., 1964, p.195, pl.2, fig.8. Holotype: Tasch et al., 1964, pl.2, fig.8. Originally *Hystrichosphaeridium*, subsequently *Oligosphaeridium*?. **Taxonomic senior synonym:** *Hystrichosphaeridium* (subsequently *Oligosphaeridium*) *albertense*, by implication in Stover and Evitt (1978, p.69), who considered *Hystrichosphaeridium dispare* to be a taxonomic junior synonym of *Hystrichosphaeridium* (subsequently *Oligosphaeridium*) *irregulare*, which is now a taxonomic junior synonym of *Hystrichosphaeridium* (now *Oligosphaeridium*) *albertense*. Age: Albian.

"*dissimilare*" Isagulova, 1963, p.1157, pl.1, fig.17. **Name not validly published:** no description.

"*divergens*" Eisenack, 1954b, p.67, pl.9, figs.13–16. Holotype: Eisenack, 1954b, pl.9, fig.14. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (combination not validly published; Appendix A), thirdly *Cordosphaeridium*, fourthly (and now) *Operculodinium*. Age: early Oxfordian.

"forma *areolatum*" Eisenack 1954b, p.67, pl.9, fig.16. Holotype: Eisenack 1954b, pl.9, fig.16. **Taxonomic senior synonym** (at specific rank): *Operculodinium eisenackii*, according to Heilmann-Clausen and Van Simaey (2005, p.176). Age: Oligocene.

"forma *divergens*". Autonym. Holotype: Eisenack, 1954b, pl.9, fig.14. **Now redundant**.

dowlingii Harland, 1973, p.681, pl.85, fig.1; text-fig.10. Holotype: Harland, 1973, pl.85, fig.1; Fauconnier and Masure, 2004, pl.44, fig.7. Age: late Campanian.

"*duplum*" Lentin and Williams, 1989, p.181. Holotype: White, 1842, pl.4, fig.12. **Name illegitimate** — **nomenclatural senior synonym**: *Xanthidium tubiferum* var. *recurvatum* (now *Hystrichosphaeridium recurvatum*). Originally *Xanthidium tubiferum* var. *palmatum* (Appendix A), subsequently *Xanthidium palmatum* (Appendix A), thirdly *Spiniferites palmatus*, fourthly *Cordosphaeridium palmatum*, fifthly *Hystrichosphaeridium palmatum* (combination illegitimate), sixthly *Hystrichosphaeridium duplum* (name illegitimate). Substitute name for *Hystrichosphaeridium palmatum* (White, 1842, p.39–40, pl.4, fig.12) Downie and Sarjeant, 1965, p.121 (an illegitimate name). Nomenclatural junior synonym (at specific rank): *Xanthidium tubiferum* var. *palmaforme*, which has the same holotype. See *Hystrichosphaeridium recurvatum* for a full discussion. Age: Senonian.

"subsp. *duplum*". Autonym. Holotype: White, 1842, pl.4, fig.12. **Name illegitimate**: the species name is illegitimate. Originally *Hystrichosphaeridium palmatum* subsp. *palmatum* (combination illegitimate), subsequently *Hystrichosphaeridium duplum* subsp. *duplum* (name illegitimate). Age: Senonian.

"subsp. *parvum*" (Rozen, 1965, p.303–304, pl.4, fig.6; text-fig.13) Lentin and Williams, 1989, p.181. Holotype: Rozen, 1965, pl.4, fig.6; text-fig.13. **Name illegitimate**: the species name is illegitimate. **NOW** *Hystrichosphaeridium recurvatum* subsp. *parvum*. Originally *Hystrichosphaeridium recurvatum* var. *parvum*, subsequently (and now) *Hystrichosphaeridium recurvatum* subsp. *parvum*, thirdly *Hystrichosphaeridium palmatum* subsp. *parvum* (combination illegitimate), fourthly (and now) *Hystrichosphaeridium duplum* subsp. *parvum* (combination illegitimate). Age: late Eocene.

"*eccentrum*" Tasch in Tasch et al., 1964, p.194, pl.1, fig.6; pl.2, fig.9. Holotype: Tasch et al., 1964, pl.2, fig.9. **Taxonomic senior synonym**: *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albanian.

"?*echinatum*" Menéndez, 1965, p.12–13, pl.2, fig.9. Emendation: Guerstein et al., 2008, p.79, as *Lingulodinium echinatum*. Holotype: Menéndez, 1965, pl.2, fig.9, lost according to Guerstein et al. (2008, p.79). Neotype: Guerstein et al., 2008, pl.1, figs.11–12, designated by Guerstein et al. (2008, p.79). **NOW** *Lingulodinium*. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaeridium?*, thirdly (and now) *Lingulodinium*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Late Cretaceous.

"*echinoides*" Maier, 1959, p.318–319, pl.32, figs.5–6. Holotype: Maier, 1959, pl.32, fig.6. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*. **Taxonomic senior synonym**: *Xanthidium* (now *Spiniferites*) *ramosum*, according to Sarjeant (1983, p.91–92). Age: middle Oligocene–middle Miocene.

"*ehrenbergii*" Deflandre, 1947c, fig.1, no.5. Emendation: Masure in Fauconnier and Masure, 2004, p.337–338, as *Impletosphaeridium ehrenbergii*. Holotype: Deflandre, 1939a, pl.10, fig.9, as *Hystrichosphaeridium* cf. *hirsutum*; Deflandre, 1947a, fig.1, no.5; Fauconnier and Masure, 2004, pl.48, figs.9,11. **NOW** *Impletosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Cleistosphaeridium?*, fifthly (and now) *Impletosphaeridium*. Nomenclatural junior synonym: *Cleistosphaeridium deflandrei*, which has the same holotype. For a full discussion see *Impletosphaeridium ehrenbergii*. Age: Oxfordian.

"*eisenackianum*" Deunff, 1959, p.23–24, pl.2, figs.26,30–31. Holotype: Deunff, 1959, pl.2, fig.26. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Middle Ordovician.

"var. *crozonense*" Deunff, 1959, p.24, pl.2, figs.25,27–29,32. Holotype: Deunff, 1959, pl.2, fig.28. **NOW** *Baltisphaeridium eisenackianum* var. *crozonense* (Appendix A). Originally *Hystrichosphaeridium eisenackianum* var. *crozonense*, subsequently (and now) *Baltisphaeridium eisenackianum* var. *crozonense* (Appendix A). Age: Ordovician (Caradoc).

"var. *eisenackianum*". Autonym. Holotype: Deunff, 1959, pl.2, fig.26. **NOW** *Baltisphaeridium eisenackianum* var. *eisenackianum* (Appendix A). Originally *Hystrichosphaeridium eisenackianum* var. *eisenackianum*, subsequently (and now) *Baltisphaeridium eisenackianum* var. *eisenackianum* (Appendix A).

"*eisenackii*" Sannemann, 1955, p.327–328, pl.4, figs.10,12; text-figs.8a–d. Holotype: Sannemann, 1955, pl.4, fig.10. **NOW** *Multiplicisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Multiplicisphaeridium* (Appendix A). Age: Devonian (late Givetian).

"*elegantulum*" Lejeune-Carpentier, 1940, p.B222; text-figs.11–12. Holotype: Lejeune-Carpentier, 1940, text-fig.11; Lejeune-Carpentier and Sarjeant, 1981, pl.4, figs.3–4. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?* (combination not validly published). **Taxonomic senior synonym:** *Xanthidium tubiferum* var. *complex* (as *Hystrichosphaeridium*, now *Oligosphaeridium*) *complex*, according to Deflandre (1946b, p.111). Age: Turonian–Senonian.

"*ellipticum*" Cookson, 1965a, p.87–88, pl.11, figs.1–3,3a. Holotype: Cookson, 1965a, pl.11, figs.1–3,3a. **NOW** *Distatodinium*. Originally *Hystrichosphaeridium*, subsequently *Tanyosphaeridium*, thirdly (and now) *Distatodinium*. Age: late Eocene.

"*entomium*" Tasch in Tasch et al., 1964, p.193, pl.3, fig.15. Holotype: Tasch et al., 1964, pl.3, fig.15. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albian.

"*eoinodes*" Eisenack, 1958a, p.402, pl.27, figs.3–4. Emendation: Sarjeant, 1985a, p.74–75, as *Kleithriasphaeridium eoinodes*. Holotype: Eisenack, 1958a, pl.27, fig.3; Sarjeant, 1985a, pl.5, figs.3–4. **NOW** *Kleithriasphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly (and now) *Kleithriasphaeridium*. Taxonomic junior synonym: *Hystrichosphaeridium* (as *Kleithriasphaeridium*) *simplicispinum*, according to Below (1982c, p.17). Age: late Albian.

"*eoplanctonicum*" Eisenack, 1955, p.178–179, pl.4, fig.14. Holotype: Eisenack, 1955, pl.4, fig.14. **NOW** *Oppilatala* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Multiplicisphaeridium* (Appendix A), fourthly (and now) *Oppilatala* (Appendix A). Taxonomic junior synonym: *Multiplicisphaeridium septispinosum* Lister, 1970, an acritarch species, according to Eisenack et al. (1973, p.617). Age: Silurian (late Ludlow).

"*equispinosum*" Tasch, 1963, p.336, pl.1, fig.12. Holotype: Tasch, 1963, pl.1, fig.12. The specimen illustrated is assignable to the spore *Raistrickia* Schopf et al., 1944, according to Stover and Evitt (1978, p.265). Age: Early Permian.

"*erectum*" Manum and Cookson, 1964, p.14, pl.3, figs.5–6. Holotype: Manum and Cookson, 1964, pl.3, fig.5. **NOW** *Kiokansium?*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cordosphaeridium?*, fourthly *Cleistosphaeridium?*, fifthly (and now) *Kiokansium?*. Age: Albian–Turonian.

"*erraticum*" Eisenack, 1954a, p.209, pl.1, figs.6–7; text-fig.7. Holotype: Eisenack, 1954a, pl.1, fig.6. **NOW** *Visbysphaera* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A),

thirdly (and now) *Visbysphaera* (Appendix A), fourthly *Multiplicisphaeridium* (Appendix A). Age: Silurian (late Ludlow).

"*espiritasantense*" Regali et al., 1974, p.290, pl.24, fig.3. Holotype: Regali et al., 1974, pl.24, fig.3; irretrievably damaged according to Arai in Fauconnier and Masure (2004, p.246). Lectotype: Fauconnier and Masure, 2004, pl.31, figs.1–3, designated by Arai in Fauconnier and Masure (2004, p.246). **NOW** *Glaphyrocysta*. Originally *Hystrichosphaeridium*, subsequently *Areoligera*, thirdly (and now) *Glaphyrocysta*. Age: Maastrichtian.

"*fabium*" Tasch in Tasch et al., 1964, p.195, pl.2, fig.5. Holotype: Tasch et al., 1964, pl.2, fig.5. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*?. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albian.

"*ferox*" Deflandre, 1937b, p.72, pl.14 (al. pl.11), figs.3–4. Holotype: Deflandre, 1937b, pl.14 (al. pl.11), figs.3–4. **NOW** *Florentinia*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma*, fourthly *Silicisphaera*, fifthly (and now) *Florentinia*. Age: Senonian.

"*fimbriatum*" (White, 1842, p.36, pl.4, div.3, fig.3) Deflandre, 1946a, card 899. Holotype: White, 1842, pl.4, div.3, fig.3; Sarjeant, 1991, fig.4.2. **NOW** *Filisphaeridium* (Appendix A). Originally *Xanthidium* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly *Baltisphaeridium* (Appendix A), fourthly *Comasphaeridium* (Appendix A), fifthly (and now) *Filisphaeridium* (Appendix A). Age: Late Cretaceous.

"*floripes*" Deflandre and Cookson, 1955, p.276, pl.7, figs.1–2,7. Holotype: Deflandre and Cookson, 1955, pl.7, fig.1. **NOW** *Homotryblium*. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly (and now) *Homotryblium*. Taxonomic junior synonym: *Homotryblium plectilum*, according to Bujak in Bujak et al. (1980, p.64) — however, Lentin and Williams (1985, p.168) retained *Homotryblium plectilum*. Age: Early Tertiary.

"subsp. *breviradiatum*" Cookson and Eisenack, 1961b, p.44, pl.2, figs.10–11. Holotype: Cookson and Eisenack, 1961b, pl.2, figs.10–11. **NOW** *Homotryblium floripes* subsp. *breviradiatum*. Originally *Hystrichosphaeridium floripes* subsp. *breviradiatum*, subsequently *Cordosphaeridium floripes* subsp. *breviradiatum*, thirdly (and now) *Homotryblium floripes* subsp. *breviradiatum*. Age: late Eocene.

"subsp. *floripes*". Autonym. Deflandre and Cookson, 1955, pl.7, fig.1. **NOW** *Homotryblium floripes* subsp. *floripes*. Originally *Hystrichosphaeridium floripes* subsp. *floripes*, subsequently *Cordosphaeridium floripes* subsp. *floripes*, thirdly (and now) *Homotryblium floripes* subsp. *floripes*.

"*flosculus*" Deflandre, 1937b, p.75, pl.15 (al. pl.12), figs.5–6. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), fig.5. **NOW** *Florentinia*?. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (combination not validly published; Appendix A), thirdly *Litosphaeridium*?, fourthly *Silicisphaera*?, fifthly (and now) *Florentinia*?. Taxonomic junior synonym: *Eurysphaeridium fibratum* (name not validly published), according to Slimani (2001a, p.192). N.I.A. Age: Senonian.

"*fluctuans*" (Eisenack, 1938c, p.230–231, pl.16, figs.1–3) PASTIELS, 1948, p.40. Holotype: Eisenack, 1938c, pl.16, fig.3. **NOW** *Baltisphaeridium* (Appendix A). Originally *Bion* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly *Polysphaeridium*? (combination not validly published), fourthly (and now) *Baltisphaeridium* (Appendix A). Age: Silurian.

"*follium*" Tasch in Tasch et al., 1964, p.195, pl.1, fig.8. Holotype: Tasch et al., 1964, pl.1, fig.8. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*?. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albian.

"*franconium*" Sannemann, 1955, p.328, pl.3, fig.1; pl.5, figs.1–2. Holotype: Sannemann, 1955, pl.5, fig.1. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Devonian (late Givetian).

"*fucosum*" (Valensi, 1955a, p.40; text-fig.2b) Downie and Sarjeant, 1965, p.120. Holotype: Valensi, 1955a, text-fig.2b; Fauconnier and Masure, 2004, pl.52, figs.8–11. **NOW** *Litosphaeridium*. Originally *Micrhystridium*,

subsequently *Hystrichosphaeridium*, thirdly *Polysphaeridium?*, fourthly *Dapsilidinium?*, fifthly (and now) *Litosphaeridium*. Taxonomic junior synonyms: *Hystrichosphaeridium tubiferum* var. *brevispinum*, according to Below (1982c, p.29) — however, Lentin and Williams (1985, p.190) retained *Hystrichosphaeridium tubiferum* subsp. *brevispinum*; *Hystrichosphaeridium* (as *Litosphaeridium*) *arundum*, according to Below (1982c, p.29) — however, Lentin and Williams (1985, p.227) retained *Litosphaeridium arundum*. Age: Late Cretaceous.

"*fusoides*" Courteville 1948, p.10. **Name not validly published**: no description, diagnosis or illustration. Age: Cretaceous.

"*galericulatum*" Courteville 1948, p.10. **Name not validly published**: no description, diagnosis or illustration. Age: Cretaceous.

"*geometricum*" Deflandre, 1945a, p.64–65, pl.2, figs.2–5. Holotype: Deflandre, 1945a, pl.2, fig.2. Junior homonym: *Hystrichosphaeridium geometricum* Pastiels, 1948. **NOW** *Striatotheca geometrica* (Appendix A). Originally *Hystrichosphaeridium geometricum*, subsequently *Veryhachium geometricum* (Appendix A), thirdly *Veryhachium trispinosum* subsp. *geometricum* (combination not validly published; Appendix A), fourthly (and now) *Striatotheca geometrica* (Appendix A). Age: Middle Silurian.

"*geometricum*" Pastiels, 1948, p.41, pl.4, figs.1–11. Holotype: Pastiels, 1948, pl.4, fig.4. **Name illegitimate** — **senior homonym**: *Hystrichosphaeridium geometricum* Deflandre, 1945a. Substitute name: *Apectodinium pastielsii* (name illegitimate). **NOW** *Apectodinium geometricum*. Originally *Hystrichosphaeridium geometricum* (name illegitimate), subsequently *Baltisphaeridium geometricum* (Appendix A), thirdly *Apectodinium pastielsii* (name illegitimate), fourthly (and now) *Apectodinium geometricum*. Taxonomic junior synonym (at specific rank): *Wetziella homomorpha* var. *quinquelata* (as *Wetziella quinquelata*, now *Apectodinium quinquelatum*), by implication in Harland (1979c, p.67), who considered the latter to be the senior name — however, Lentin and Williams (1989, p.18) retained *Apectodinium quinquelatum*. Age: Eocene.

?*gliwicense* Macko, 1957, p.113, pl.71, figs.11–15; pl.72, fig.1. Holotype: not designated. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium?*. Questionable assignment: Davey and Williams (1966b, p.70). Age: Miocene.

"*globosum*" Salujha et al., 1973, p.112,114,116. **Name not validly published**: no description.

"*gotlandicum*" Eisenack, 1954a, p.209, pl.1, fig.5; text-fig.6. Holotype: Eisenack, 1954a, pl.1, fig.5. **NOW** *Visbysphaera* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Multiplicisphaeridium* (Appendix A), fourthly (and now) *Visbysphaera* (Appendix A). Taxonomic junior synonym: *Baltisphaeridium peltatum* Cramer, 1966, an acritarch species, according to Cramer (1970, p.157). Age: Silurian (late Llandovery).

"*grallaeforme*" Brosius, 1963, p.42, pl.5, fig.3; text-fig.2. Holotype: Brosius, 1963, pl.5, fig.3. **NOW** *Achomosphaera*. Originally *Hystrichosphaeridium*, subsequently (and now) *Achomosphaera*, thirdly *Spiniferites* (combination not validly published). Taxonomic junior synonym: *Spiniferites solidago*, according to Strauss et al. (2001, p.412). Age: Oligocene.

?*grande* Salujha et al., 1969, p.37, pl.4, figs.59–60. Holotype: Salujha et al., 1969, pl.4, fig.59. Questionable assignment: Masure and Foucher in Fauconnier and Masure (2004, p.311). Age: early Eocene.

granulatum Khanna and Singh, 1981b, p.394,396, fig.3, nos.3–4; text-fig.6. Holotype: Khanna and Singh, 1981b, fig.3, no.4. This name was not validly published in Khanna (1979, p.217) and Singh et al. (1979, p.35–36), since no description was provided. Age: early-middle Eocene.

"*heteracanthum*" Deflandre and Cookson, 1955, p.276, pl.2, figs.5–6; text-figs.40–41. Emendation: Radmacher et al., 2014, p.33,36, as *Heterosphaeridium heteracanthum*. Holotype: Deflandre and Cookson, 1955, pl.2, fig.5; Fauconnier and Masure, 2004, pl.35, figs.7–8. **NOW** *Heterosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly (and now) *Heterosphaeridium*, fifthly *Heterosphaeridium?* Age: Late Cretaceous–early Eocene.

"subsp. *heteracanthum*". Autonym. Holotype: Deflandre and Cookson, 1955, pl.2, fig.5; Fauconnier and Masure, 2004, pl.35, figs.7–8. **NOW** *Heterosphaeridium heteracanthum* subsp. *heteracanthum*. Originally *Hystrichosphaeridium heteracanthum* subsp. *heteracanthum*, subsequently (and now) *Heterosphaeridium heteracanthum* subsp. *heteracanthum*, thirdly *Heterosphaeridium? heteracanthum* subsp. *heteracanthum*.

"subsp. *sparsiprocessum*" Varma and Dangwal, 1964, p.64, pl.1, fig.7. Holotype: Varma and Dangwal, 1964, pl.1, fig.7. **NOW** *Heterosphaeridium heteracanthum?* subsp. *sparsiprocessum*. Originally *Hystrichosphaeridium heteracanthum* subsp. *sparsiprocessum*, subsequently *Heterosphaeridium heteracanthum* subsp. *sparsiprocessum*, thirdly *Heterosphaeridium? heterocanthum* subsp. *sparsiprocessum*, fourthly (and now) *Heterosphaeridium heteracanthum?* subsp. *sparsiprocessum*. Age: Eocene–Oligocene.

?*hillii* (Merrill, 1895, p.17; text-fig.21) Sarjeant, 1964b, p.175. Holotype: Merrill, 1895, text-fig.21. Originally *Geodia* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly (and now) *Hystrichosphaeridium?*. Questionable assignment: Davey and Williams (1966b, p.70); and Masure and Foucher in Fauconnier and Masure (2004, p.311–312) as a problematic species. Age: Early Cretaceous.

"*himalayense*" Mehrotra and Sinha, 1981, p.152, pl.1, figs.7–9. Holotype: Mehrotra and Sinha, 1981, pl.1, fig.7. **Taxonomic senior synonym:** *Xanthidium tubiferum* var. *complex* (as *Oligosphaeridium*) *complex*, according to Jain and Garg (1986b, p.64). Age: Late Cretaceous.

"*hippocrepicum*" Timofeev, 1959, p.52, pl.4, fig.2. Holotype: Timofeev, 1959, pl.4, fig.2. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"*hirsutoides*" Eisenack, 1951, p.189–190, pl.3, fig.8. Holotype: Eisenack, 1951, pl.5, fig.19, as "*Ovum hispidum* cf. *hirsutum* Ehrenb.", lost according to Eisenack et al. (1973, p.125). Neotype: Eisenack, 1951, pl.3, fig.8, designated by Eisenack et al. (1973, p.125). **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Late Ordovician.

"var. *hamatum*" Downie, 1958, p.335, pl.16, fig.1; text-figs.2j–k. Holotype: Downie, 1958, pl.16, fig.1. **NOW** *Baltisphaeridium hamatum* (Appendix A). Originally *Hystrichosphaeridium hirsutoides* var. *hamatum*, subsequently *Baltisphaeridium hirsutoides* var. *hamatum* (Appendix A), thirdly *Micrhystridium hamatum* (Appendix A), fourthly *Acanthodiacrodium hamatum* (Appendix A), fifthly (and now) *Baltisphaeridium hamatum* (Appendix A). Age: Early Ordovician.

"var. *hirsutoides*". Autonym. Holotype: Eisenack, 1951, pl.5, fig.19, as "*Ovum hispidum* cf. *hirsutum* Ehrenb." **Now redundant.** Originally *Hystrichosphaeridium hirsutoides* var. *hirsutoides*, subsequently *Baltisphaeridium hirsutoides* var. *hirsutoides* (Appendix A).

"*hirsutum*" (Ehrenberg, 1837b, pl.1, figs.10,?13) Deflandre, 1939a, p.78. **Name not validly published:** Ehrenberg (1837b) did not intend to introduce a new species. Originally *Xanthidium hirsutum* (name not validly published; Appendix A), subsequently *Ovum hispidum* subsp. *hirsutum* (name not validly published; Appendix A), thirdly *Hystrichosphaera hirsuta* (name not validly published), fourthly *Hystrichosphaeridium hirsutum* (name not validly published), fifthly *Baltisphaeridium hirsutum* (name not validly published; Appendix A), sixthly *Operculodinium hirsutum* (name not validly published), seventhly *Operculodinium? hirsutum* (name not validly published). See discussion under *Operculodinium? hirsutum*. Age: Late Cretaceous.

"subsp. *amplum*" Wetzel, 1955, p.38; text-fig.11. Emendation: Sarjeant, 1984c, p.131, as *Operculodinium centrocarpum* subsp. *amplum*. Holotype: Wetzel, 1955, text-fig.11; Sarjeant, 1984c, pl.3, figs.1–3; text-fig.4. **Name not validly published:** species name not validly published. **NOW** *Operculodinium centrocarpum* subsp. *amplum*. Originally *Hystrichosphaeridium hirsutum* subsp. *amplum* (name not validly published), subsequently *Baltisphaeridium hirsutum* subsp. *amplum* (name not validly published; Appendix A), thirdly *Operculodinium? hirsutum* subsp. *amplum* (name not validly published), fourthly (and now) *Operculodinium centrocarpum* subsp. *amplum*. Age: Danian.

"*hirundo*" Eisenack, 1958a, p.404–405, pl.24, fig.12. Emendation: Sarjeant, 1985a, p.76–77, as *Achomosphaera hirundo*. Holotype: Eisenack, 1958a, pl.24, fig.12. **NOW** *Cordosphaeridium*?. Originally *Hystrichosphaeridium*, subsequently *Achomosphaera*, thirdly *Lanternosphaeridium*, fourthly (and now) *Cordosphaeridium*?, fifthly *Spiniferites*?. N.I.A. Age: Early Cretaceous.

"*horridum*" Deflandre, 1937b, p.74, pl.15 (al. pl.12), figs.7–8. Emendation: Masure, 1986, p.112–113, as *Corradinisphaeridium horridum*. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), figs.7–8; Masure, 1986, pl.1, figs.4–6; text-fig.2. **NOW** *Corradinisphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Corradinisphaeridium*. Taxonomic junior synonym: *Lanternosphaeridium* (as *Fibrocysta*?) *mutinense*, according to Masure (1986, p.112). Age: Senonian.

"?*huecospinosum*" Cramer, 1964, p.331, pl.6, fig.2; text-fig.36, no.7. Holotype: Cramer, 1964, pl.6, fig.2. **NOW** *Umbellasphaeridium* (Appendix A). Originally *Hystrichosphaeridium*?, subsequently *Baltisphaeridium*? (combination not validly published; Appendix A), thirdly *Florisphaeridium* (Appendix A), fourthly (and now) *Umbellasphaeridium* (Appendix A). Questionable assignment: Cramer (1964, p.331). Age: Devonian (Emsian).

"*huguoniotii*" Valensi, 1955a, p.38–39; text-fig.2a. Holotype: Valensi, 1955a, text-fig.2a. **NOW** *Sepispinula*?. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Cleistosphaeridium*?, fifthly *Chlamydochorella*, sixthly *Sepispinula*, seventhly (and now) *Sepispinula*?. Taxonomic senior synonym: *Micrhystridium* (as *Polysphaeridium*, now *Sepispinula*) *ambiguum*, according to Yun Hyesu (1981, p.44) and Schiøler and Wilson (1998, p.328) — however, Masure in Fauconnier and Masure (2004, p.500) retained *Hystrichosphaeridium* (as and now *Sepispinula*?) *huguoniotii*. Taxonomic junior synonym: *Hystrichosphaeridium* (now *Sepispinula*) *ancoriferum*, according to Clarke and Verdier (1967, p.54) — however, Masure in Fauconnier and Masure (2004, p.499) retained *Hystrichosphaeridium* (as and now *Sepispinula*) *ancoriferum*. Age: Late Cretaceous.

"*hymeniferum*" Eisenack, 1938a, p.19, pl.3, figs.2–5. Holotype: Eisenack, 1938a, pl.3, fig.2. **NOW** *Peteinosphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Peteinosphaeridium* (Appendix A). Age: Ordovician (erratic).

?*hymenohystrichum* Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.71, pl.14, figs.3–5. Holotype: Liu Zhili et al., 1992, pl.14, fig.5. Questionable assignment: Zheng Yuefang and Liu Xuexian in Liu Zhili et al. (1992, p.71). Age: Early Tertiary.

"*hystrichoreticulatum*" Eisenack, 1938a, p.20, pl.3, figs.6A–B. Holotype: Eisenack, 1938a, pl.3, figs.6A–B. **NOW** *Peteinosphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Peteinosphaeridium* (Appendix A). Age: Ordovician (erratic).

"*ichikawaii*" Fuji in Ichikawa et al., 1964, pl.10, fig.4. **Name not validly published**: no description.

"*inconspicuum*" Timofeev, 1959, p.54, pl.4, fig.13. Holotype: Timofeev, 1959, pl.4, fig.13. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"*inodes*" Klumpp, 1953, p.391, pl.18, figs.1–2. Emendations: Morgenroth, 1968, p.549–550, as *Cordosphaeridium inodes*; Sarjeant, 1981, p.102–105, as *Cordosphaeridium inodes* — however, see Lentin and Williams (1985, p.72). Holotype: Klumpp, 1953, pl.18, figs.1–2. **NOW** *Cordosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Cordosphaeridium*. Age: late Eocene.

"forma *areolatum*" Eisenack, 1954b, p.67, pl.12, fig.21. Holotype: Eisenack, 1954b, p.67, pl.12, fig.21. **NOW** *Cordosphaeridium gracile* forma *areolatum*. Originally *Hystrichosphaeridium inodes* subsp. *gracile* forma *areolatum*, subsequently (and now) *Cordosphaeridium gracile* forma *areolatum*. See discussion under *Cordosphaeridium gracile* forma *areolatum*. Age: Oligocene.

"subsp. *gracile*" Eisenack, 1954b, p.66–67, pl.8, fig.17; pl.10, figs.3–8; pl.12, figs.7,21. Emendation: Davey and Williams, 1966b, p.84–85, as *Cordosphaeridium gracile*. Holotype: Eisenack, 1954b, pl.10, fig.5. **NOW** *Cordosphaeridium gracile*. Originally *Hystrichosphaeridium inodes* subsp. *gracile*, subsequently *Cordosphaeridium inodes* subsp. *gracile*, thirdly (and now) *Cordosphaeridium gracile*, fourthly *Tityrosphaeridium gracile*. Age: Oligocene.

"forma *gracile*". Autonym. Holotype: Eisenack, 1954b, pl.10, fig.5. **NOW** *Cordosphaeridium gracile* forma *gracile*. Originally *Hystrichosphaeridium inodes* subsp. *gracile* forma *gracile*, subsequently (and now) *Cordosphaeridium gracile* forma *gracile*.

"subsp. *inodes*". Autonym. Holotype: Klumpp, 1953, pl.18, figs.1–2. **NOW** *Cordosphaeridium inodes* subsp. *inodes*. Originally *Hystrichosphaeridium inodes* subsp. *inodes*, subsequently (and now) *Cordosphaeridium inodes* subsp. *inodes*.

"?*insigne*" Fridriksone, 1971, p.14–16, pl.2, figs.10–22. Holotype: Fridriksone, 1971, pl.2, fig.10. **NOW** *Skiagia* (Appendix A). Originally *Hystrichosphaeridium?*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Skiagia* (Appendix A). Questionable assignment: Fridriksone (1971, p.14). Age: Early-Mid Cambrian.

"*integrum*" Sannemann, 1955, p.329, pl.5, fig.12; text-fig.12. Holotype: Sannemann, 1955, pl.5, fig.12. **NOW** *Multiplicisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Multiplicisphaeridium* (Appendix A). Age: Devonian (late Givetian).

"*intermedium*" Eisenack, 1954a, p.208, pl.1, figs.3,9; text-figs.3–4. Holotype: Eisenack, 1954a, pl.1, fig.3. **Name illegitimate** — **senior homonym:** *Hystrichosphaeridium intermedium* (Wetzel, 1933b) Deflandre, 1937a. Substitute name: *Hystrichosphaeridium meson*. **NOW** *Visbysphaera mesa* (Appendix A). Originally *Hystrichosphaeridium intermedium* (name illegitimate), subsequently *Hystrichosphaeridium meson*, thirdly *Baltisphaeridium meson* (Appendix A), fourthly (and now) *Visbysphaera mesa* (Appendix A), fifthly *Multiplicisphaeridium meson* (Appendix A). Taxonomic junior synonym: *Baltisphaeridium* (subsequently *Multiplicisphaeridium*) *micropilare* Cramer, 1970, an acritarch species, according to Ye Xiaorong (1984, p.42). Age: Silurian (late Llandovery–late Ludlow).

?*intermedium* Wetzel, 1933b, p.46; text-fig.14 ex Deflandre, 1937b, p.77. Holotype: Wetzel, 1933b, text-fig.14. Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium*, thirdly *Baltisphaeridium* (Appendix A), fourthly (and now) *Hystrichosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Junior homonym: *Hystrichosphaeridium intermedium* Eisenack, 1954a. Matsuoka (1983a, p.16) considered *Hystrichosphaeridium* (as *Polysphaeridium*) *zoharyi* to be a possible taxonomic junior synonym of this species. This name was not validly published in Wetzel (1933b) since the generic name *Hystrichosphaera* was not validly published until 1937. Age: ?Late Cretaceous.

"?*irregulare*" (Merrill, 1895, p.16; text-fig.14) Sarjeant, 1964b, p.175. Holotype: Merrill, 1895, text-fig.14. **Combination illegitimate** — **senior homonym:** *Hystrichosphaeridium irregulare* Pocock, 1962. Substitute name: *Hystrichosphaeridium speciale*. Originally *Geodia? irregularis* (Appendix A), subsequently *Hystrichosphaeridium irregulare* (combination illegitimate), thirdly *Hystrichosphaeridium? irregulare* (combination illegitimate), fourthly *Hystrichosphaeridium speciale*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. **Taxonomic senior synonym:** *Xanthidium tubiferum* var. *complex* (now *Oligosphaeridium complex*), according to Harker and Sarjeant in Harker et al. (1990, p.59). Age: Early Cretaceous.

"*irregulare*" Pocock, 1962, p.82, pl.15, figs.228–229. Holotype: Pocock, 1962, pl.15, figs.228–229, lost according to Jansonius (1986, p.220). Lectotype: Jansonius, 1986, pl.4, fig.3, designated by Jansonius (1986, p.214 — caption to pl.4); Fauconnier and Masure, 2004, pl.55, fig.9. Originally *Hystrichosphaeridium*, subsequently *Oligosphaeridium*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Oligosphaeridium*) *albertense*, according to Jansonius (1986, p.213). Taxonomic junior synonyms: *Hystrichosphaeridium* (as *Oligosphaeridium?*) *coelenteratum*, *Hystrichosphaeridium* (as *Oligosphaeridium?*) *dispare*, and *Hystrichosphaeridium* (as *Oligosphaeridium*) *reniforme*, all according to Stover and Evitt (1978, p.69). Junior homonym: *Hystrichosphaeridium irregulare* (Merrill, 1895) Sarjeant, 1964b. Age: late Barremian–Aptian.

"*isocalamum*" Deflandre and Cookson, 1955, p.272, pl.2, figs.7–8; text-figs.30–35. Holotype: Deflandre and Cookson, 1955, pl.2, figs.7–8; Fauconnier and Masure, 2004, pl.78, figs.5–8. **NOW** *Tanyosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Tanyosphaeridium*. Age: Early Cretaceous.

"*israelianum*" Rossignol, 1962, p.132, pl.2, fig.3. Holotype: Rossignol, 1962, pl.2, fig.3. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium* (combination not validly published), fourthly (and now) *Operculodinium*, fifthly *Cordosphaeridium* (combination not validly published). Taxonomic junior synonyms: *Cleistosphaeridium cephalum*, according to Jain and Garg (1991, p.78); *Operculodinium crassum*, according to Edwards and Andrieu (1992, p.262) — however, Head (1996b, p.1231) retained *Operculodinium crassum*; and *Hystrichosphaeridium westii* (name not validly published), by implication in Wall and Dale (1968a, p.315, as "hystrichosphere type x of West"). Motile equivalent: *Peridinium* (now *Protoceratium*) *reticulatum* Claparède and Lachmann, 1859, questionably according to Wall and Dale (1968c, p.272), and without question according to Matsuoka (1989, p.224). Age: Pleistocene.

"*kiowanum*" Tasch in Tasch et al., 1964, p.193, pl.2, fig.1. Holotype: Tasch et al., 1964, pl.2, fig.1. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albian.

"*?korykos*" (Maier, 1959, p.310–311, pl.30, figs.7–8) Eisenack and Kjellström, 1975b, p.225 (al. p.652a). Holotype: Maier, 1959, pl.30, fig.7. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Chiropteridium*, fourthly *Hystrichosphaeridium*. Questionable assignment: Eisenack and Kjellström (1975b, p.225). **Taxonomic senior synonym:** *Xanthidium* (as *Spiniferites*) *ramosum*, according to Sarjeant (1983, p.91–92). N.I.A. Age: middle Miocene.

"*lacunosum*" Isagulova, 1963, p.1157, pl.1, fig.3. **Name not validly published:** no description.

"*laevigatum*" (Lister, 1970, p.66, pl.6, figs.10–12; text-figs.18,20d) Eisenack and Kjellström, 1975b, p.652b. Holotype: Lister, 1970, pl.6, fig.10. **NOW** *Dilatitphaera* (Appendix A). Originally (and now) *Dilatitphaera* (Appendix A), subsequently *Hystrichosphaeridium*. Age: Silurian (Wenlock).

"*lairdii*" Deflandre, 1946c, card 1112. **Name not validly published:** no description. Originally *Hystrichosphaeridium* (name not validly published), subsequently *Veryhachium* (Appendix A). **Taxonomic senior synonym:** *Veryhachium valiente* Cramer, 1964, an acritarch species, by implication in Martin (1969, p.95), who believed *Veryhachium lairdii* to be the senior name. Age: Middle Silurian.

"*langii*" Wall, 1965a, p.165, pl.6, figs.9–11; pl.9, fig.9. Emendations: Morbey, 1975, p.41–42, as *Hystrichosphaeridium langii*; Below, 1987a, p.70–71, as *Beaumontella langii*. Holotype: Wall, 1965a, pl.6, fig.9; pl.9, fig.9; Fensome et al., 1995, figs.1–2 — p.1595. **NOW** *Beaumontella*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*, thirdly *Dapsilidinium?*, fourthly (and now) *Beaumontella*. Age: Hettangian–early Sinemurian.

"*lateraliprocessum*" Srivastava and Banerjee, 1969, p.102, pl.1, figs.1–3. Holotype: Srivastava and Banerjee, 1969, pl.1, figs.1–3. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Eocene.

"*?latirictum*" Davey and Williams, 1966b, p.66–67, pl.10, fig.8. Holotype: Davey and Williams, 1966b, pl.10, fig.8; Bujak et al., 1980, pl.8, figs.4–5. **NOW** *Minisphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaeridium?*, thirdly (and now) *Minisphaeridium*. Questionable assignment: Bujak et al. (1980, p.46). Taxonomic junior synonyms: *Cordosphaeridium minimum* (al. *Cordosphaeridium inodes* subsp. *minimum*) according to Fensome et al. (2009, p.44) — the epithet *latirictum* has priority at specific rank over the epithet *minimum*; *Litosphaeridium?* *parvum*, according to Fensome et al. (2009, p.44). Age: early Eocene.

"*leonardianum*" Tasch, 1963, p.336, pl.1, figs.10–11. Holotype: Tasch, 1963, pl.1, figs.10–11. The specimen illustrated is assignable to the spore genus *Raistrickia* Schopf et al., 1944, according to Stover and Evitt (1978, p.265). Age: Early Permian.

"*leptodermum*" Maier, 1959, p.321–322, pl.33, figs.5–6. Holotype: Maier, 1959, pl.33, fig.5; Sarjeant, 1983, pl.1, fig.2; pl.6, figs.1–2; pl.7, fig.4. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaera*, thirdly *Spiniferites*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as *Achomosphaera*) *alcicornu*, according to Sarjeant (1983, p.100–101). Age: middle Oligocene–late Miocene.

"*lewisii*" Deunff, 1954a, p.240, fig.3. Holotype: Deunff, 1954a, fig.3. **NOW** *Gorgonisphaeridium?* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Ammonidium* (combination not validly published; Appendix A), fourthly *Multiplicisphaeridium* (Appendix A), fifthly (and now) *Gorgonisphaeridium?* (Appendix A). Age: Middle Devonian.

"*lobospinosum*" Gocht in Weiler, 1956, p.138, pl.12, figs.1–3; text-fig.8. Holotype: not designated. **Name not validly published:** holotype not designated and name used in anticipation of future acceptance (I.C.N. Article 36.1b). **NOW** *Chiropteridium*. Originally *Hystrichosphaeridium* (name not validly published), subsequently (and now) *Chiropteridium*, thirdly *Baltisphaeridium* (name not validly published; Appendix A). This name was also not validly published in Maier (1959, p.314), since it too was merely used in anticipation of future acceptance of the name (I.C.N. Article 36.1b). Age: middle Oligocene.

"*longifurcatum*" Firtion, 1952, p.157–158, pl.9, fig.1; text-figs.1H–M. Holotype: Firtion, 1952, pl.9, fig.1; lost according to Fauconnier and Pourtoy in Fauconnier and Masure (2004, p.517). Neotype: Foucher, 1976, pl.5, figs.7–8, designated by Fauconnier and Pourtoy in Fauconnier and Masure (2004, p.518); Fauconnier and Masure, 2004, pl.74, figs.2–3. **NOW** *Surculosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Surculosphaeridium*, fourthly *Surculosphaeridium?*. Age: Cenomanian.

"*longispinosoides*" Sannemann, 1955, p.329–330; pl.1, fig.10; pl.2, figs.1–4; pl.3, figs.6,8; pl.6, figs.1–6; text-figs.9a–b. Holotype: Sannemann, 1955, pl.6, fig.1. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Devonian (late Givetian).

"*longispinosum*" Eisenack, 1931, p.110–111, pl.5, figs.6–17 ex Eisenack, 1938a, p.12–14. Holotype: Eisenack, 1931, pl.5, fig.10, as *Ovum hispidum* subsp. *longispinosum*, lost according to Eisenack (1959, p.194). Neotype: Eisenack, 1959, pl.15, fig.1, designated by Eisenack (1959, p.194). **NOW** *Baltisphaeridium longispinosum* (Appendix A). Originally *Ovum hispidum* subsp. *longispinosum* (name not validly published; Appendix A), subsequently *Hystrichosphaera longispinosa* (name not validly published), thirdly *Hystrichosphaeridium longispinosum*, fourthly (and now) *Baltisphaeridium longispinosum* (Appendix A), fifthly *Micrhystridium longispinosum* (combination not validly published; Appendix A). The name *Ovum hispidum* subsp. *longispinosum* was not validly published in Eisenack (1931) since the species name *Ovum hispidum* was not validly published. Age: Ordovician (erratic).

"var. *longispinosum*". Autonym. Holotype: Eisenack, 1931, pl.5, fig.10, as *Ovum hispidum* subsp. *longispinosum*, lost according to Eisenack (1959, p.194). Neotype: Eisenack, 1959, pl.15, fig.1, designated by Eisenack (1959, p.194). **NOW** *Baltisphaeridium longispinosum* var. *longispinosum* (Appendix A). Originally *Hystrichosphaeridium longispinosum* var. *longispinosum*, subsequently (and now) *Baltisphaeridium longispinosum* var. *longispinosum* (Appendix A).

"var. *uncinatum*" Downie, 1958, p.337; text-fig.2a. Holotype: Downie, 1958, text-fig.2a. **NOW** *Stellechinatum uncinatum* (Appendix A). Originally *Hystrichosphaeridium longispinosum* var. *uncinatum*, subsequently *Baltisphaeridium longispinosum* var. *uncinatum* (Appendix A), thirdly *Baltisphaeridium uncinatum* (Appendix A), fourthly *Micrhystridium uncinatum* (Appendix A), fifthly *Goniosphaeridium uncinatum* (Appendix A), sixthly *Polygonium uncinatum* (Appendix A), seventhly *Goniosphaeridium polygonale* subsp. *uncinatum* (combination not validly published; Appendix A), eighthly (and now) *Stellechinatum uncinatum* (Appendix A). Taxonomic junior synonym: *Goniosphaeridium regulare* Yin Leiming in Chen Junyuan et al., 1985, an acritarch species, according to Yin Leiming (1986, p.347). Age: Early Ordovician.

"*longofilum*" Maier, 1959, p.317, pl.32, fig.7. Holotype: Maier, 1959, pl.32, fig.7. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: middle Oligocene.

"*lucidum*" Deunff, 1959, p.25–26, pl.9, figs.80,82–83,85–89. Holotype: Deunff, 1959, pl.9, fig.82. **NOW** *Micrhystridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Solisphaeridium* (Appendix A), fourthly (and now) *Micrhystridium* (Appendix A). Age: Ordovician (Caradoc).

"*machaerophorum*" Deflandre and Cookson, 1955, p.274, pl.9, figs.4,8. Holotype: Deflandre and Cookson, 1955, pl.9, fig.4. **NOW** *Lingulodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium* (combination not validly published), fourthly (and now) *Lingulodinium*. Taxonomic junior synonyms: *Cleistosphaeridium disjunctum*, according to Reid (1974, p.591); *Hystrichosphaeridium ashdodense*, according to Wall (1967, p.109); *Baltisphaeridium* (subsequently *Lingulodinium*) *funginum*, *Lingulodinium brevispinosum* and *Lingulodinium sadoense*, all according to Kokinos and Anderson (1995, p.162); *Hystrichosphaeridium redonense*, questionably according to Harland (1977b, p.94) and according to Rochon et al. (1999, p.20). Motile equivalent: *Gonyaulax polyedra* Stein, 1883, according to Wall and Dale (1968c, p.271). Age: Miocene.

"*macrotubulum*" Neale and Sarjeant, 1962, p.452–455, pl.20, fig.7; text-fig.8a. Holotype: Neale and Sarjeant, 1962, pl.20, fig.7; text-fig.8a; Fauconnier and Masure, 2004, pl.57, fig.7. Originally *Hystrichosphaeridium*, subsequently *Oligosphaeridium*, thirdly *Oligosphaeridium?*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Oligosphaeridium*) *vasiformum*, according to McIntyre and Brideaux (1980, p.21). Age: Hauterivian.

"*magdali*" Drugg, 1967, p.26–27, pl.4, figs.8–10; pl.9, fig.7. Holotype: Drugg, 1967, pl.4, fig.9. Originally *Hystrichosphaeridium*, subsequently *Tanyosphaeridium*. **Taxonomic senior synonym:** *Hystrichosphaera* (as *Tanyosphaeridium*) *xanthiopyxides*, according to Stover and Evitt (1978, p.85). Age: Danian.

"*magnarmatum*" Tasch in Tasch et al., 1964, p.192, pl.1, fig.22. Holotype: Tasch et al., 1964, pl.1, fig.22. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albian.

"*majus*" Lejeune-Carpentier, 1940, p.B220–B221; text-fig.13. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.12, as *Amphorosphaeridium majus*. Holotype: Lejeune-Carpentier, 1940, text-fig.13; Strel et al., 1977, pl.1, fig.7; Lejeune-Carpentier and Sarjeant, 1981, pl.2, figs.6–7; text-fig.7. **NOW** *Exochosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*, thirdly *Cordosphaeridium*, fourthly *Dapsilidinium?* (combination not validly published), fifthly *Amphorosphaeridium*, sixthly (and now) *Exochosphaeridium*. Taxonomic junior synonyms: *Baltisphaeridium* (as *Exochosphaeridium*) *bifidum* and *Exochosphaeridium bifidum* var. *involutum* (as *Exochosphaeridium bifidum* subsp. *involutum*), both according to Peyrot (2011, p.284). Age: Late Cretaceous.

"*malleoferum*" (White, 1842, p.37, pl.4, div.3, fig.7) Lentin and Williams, 1993, p.321. Holotype: White, 1842, pl.4, fig.7; Sarjeant, 1991, fig.4.6. **Combination not validly published:** transfer not intended. **NOW** *Achomosphaera?*. Originally *Xanthidium* (Appendix A), subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Achomosphaera?*, fourthly *Hystrichosphaeridium* (combination not validly published). Although Deflandre (1937b, p.79) indicated this to be a species of *Hystrichosphaeridium*, he did not definitely associate the epithet and generic name (see I.C.N. Article 35.2). Thus, in contradiction to the informal treatment of Sarjeant (1991, p.88) and the formal treatment of Lentin and Williams (1993), this combination is not attributable to Deflandre (1937b) (pending assessment under the I.C.Z.N.). Both Sarjeant (1991) and Lentin and Williams (1993) accepted this as a provisional species of *Achomosphaera*. Age: Late Cretaceous.

"*malum*" (Cramer, 1964, p.297, pl.1, figs.6,8,10; text-fig.19, nos.10–12) Andreeva, 1973, p.192. Holotype: Cramer, 1964, pl.1, fig.8. **Combination not validly published:** basionym not fully referenced. **NOW** *Rhacobrachion* (Appendix A). Originally *Baltisphaeridium* (Appendix A), subsequently *Evittia* Brito (Appendix A), thirdly *Hystrichosphaeridium* (combination not validly published), fourthly *Multiplicisphaeridium* (Appendix A), fifthly (and now) *Rhacobrachion* (Appendix A). Age: Silurian (Ludlow).

"*mantellii*" Davey and Williams, 1966b, p.66, pl.6, fig.6. Holotype: Davey and Williams, 1966b, pl.6, fig.6; Davey and Verdier, 1973, pl.4, figs.1,3. **NOW** *Florentinia*. Originally *Hystrichosphaeridium*, subsequently (and now) *Florentinia*. Age: late Cenomanian.

"*maranhense*" Regali et al., 1974, p.291, pl.23, fig.3. Holotype: Regali et al., 1974, pl.23, fig.3. **NOW** *Spiniferites?*. Originally *Hystrichosphaeridium*, subsequently (and now) *Spiniferites?*. Age: Albian–Cenomanian.

"*marginatum*" Andreeva, 1973, p.192; text-fig.136. **Name not validly published**: no description.

"*mariannae*" Philippot, 1949, p.56–57; text-fig.2. Holotype: Philippot, 1949, text-fig.2. **NOW** *Achomosphaera*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Achomosphaera*. Age: Late Cretaceous.

"*marsupium*" Tasch in Tasch et al., 1964, p.193, pl.3, fig.16. Holotype: Tasch et al., 1964, pl.3, fig.16. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*. **Taxonomic senior synonym**: *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albian.

"*maslovii*" Timofeev, 1963, fig.1, no.11. **Name not validly published**: no description.

"*membranaceum*" Philippot, 1949, p.57–58; text-fig.3. Holotype: Philippot, 1949, text-fig.3. **NOW** *Cymatiosphaera philippotii* (Appendix A). Originally *Hystrichosphaeridium membranaceum*, subsequently *Cymatiosphaera membranacea* (name illegitimate; Appendix A), thirdly (and now) *Cymatiosphaera philippotii* (Appendix A). Age: Late Cretaceous.

"*mensula*" (Wetzel, 1933b, p.49–50, pl.4, fig.32) Downie and Sarjeant, 1965, p.151. Holotype: Wetzel, 1933b, pl.4, fig.32. **Name not validly published**: name not intended. **NOW** *Veryhachium* (Appendix A). Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium* (name not validly published), thirdly (and now) *Veryhachium* (Appendix A). The name *Hystrichosphaera mensula* was not validly published in Wetzel (1933b), since the generic name *Hystrichosphaera* was not validly published until 1937. The name *Hystrichosphaeridium mensula* was attributed to Deflandre (1937b) by Downie and Sarjeant (1965); however, Deflandre (1937b) did not formally propose or use this name. N.I.A. Age: Late Cretaceous.

"*meson*" Eisenack, 1955, p.179. Holotype: Eisenack, 1954a, pl.1, fig.3. **NOW** *Visbysphaera mesa* (Appendix A). Originally *Hystrichosphaeridium intermedium* (name illegitimate), subsequently *Hystrichosphaeridium meson*, thirdly *Baltisphaeridium meson* (Appendix A), fourthly (and now) *Visbysphaera mesa* (Appendix A), fifthly *Multiplicisphaeridium meson* (Appendix A). Substitute name for *Hystrichosphaeridium intermedium* Eisenack, 1954a, p.208, pl.1, figs.3,9; text-figs.3–4 (an illegitimate name). Taxonomic junior synonym: *Baltisphaeridium* (subsequently *Multiplicisphaeridium*) *micropilare* Cramer, 1970, an acritarch species, according to Ye Xiaorong (1984, p.42). Age: Silurian (late Llandovery–late Ludlow).

"*mespilatum*" (Maier, 1959, p.306–307, pl.29, figs.5–6) Eisenack and Kjellström, 1975b, p.233–234. Holotype: Maier, 1959, pl.29, fig.5. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Chiropteridium*, fourthly *Hystrichosphaeridium*. **Taxonomic senior synonym**: *Galea* (now *Chiropteridium*) *galea*, according to Sarjeant (1983, p.108–109). Age: middle Oligocene–middle Miocene.

"*microfurcatum*" Deunff, 1957, p.6, fig.2 — p.13; fig.3 — p.14. Holotype: Deunff, 1957, fig.2 — p.13. **NOW** *Ammonidium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Veryhachium* (combination not validly published, Appendix A), thirdly *Baltisphaeridium* (Appendix A), fourthly (and now) *Ammonidium* (Appendix A). Age: Middle Devonian.

"*microspinosum*" Eisenack, 1954a, p.209–210, pl.1, fig.8. Holotype: Eisenack, 1954a, pl.1, fig.8. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A), thirdly *Lophosphaeridium* (Appendix A), fourthly *Visbysphaera* (Appendix A), fifthly *Buedingiisphaeridium* (combination not validly published; Appendix A). Taxonomic junior synonym:

Baltisphaeridium listeri Kiryanov, 1978, an acritarch species, according to Le Hérisse (1989, p.210). Age: Silurian (late Llandovery).

"*microtriainum*" Klumpp, 1953, p.390, pl.17, figs.6–7. Emendation: Sarjeant, 1981, p.110–112, as *Achomosphaera microtriaina*. Holotype: Klumpp, 1953, pl.17, figs.6–7; Sarjeant, 1981, pl.2, figs.1–2; text-fig.2. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly *Cordosphaeridium?*, fourthly *Polysphaeridium*, fifthly *Achomosphaera*, sixthly (and now) *Operculodinium*. Age: late Eocene.

?*mineralosum* Varma and Dangwal, 1964, p.64–65, pl.1, figs.8–12; pl.2, fig.1. Holotype: Varma and Dangwal, 1964, pl.1, fig.9. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Eocene–Oligocene.

subsp. *jekhowskyi* Varma and Dangwal, 1964, p.65, pl.1, fig.12; pl.2, fig.1. Holotype: Varma and Dangwal, 1964, pl.2, fig.1. Age: Eocene–Oligocene.

subsp. *labiatum* Varma and Dangwal, 1964, p.64–65, pl.1, figs.10–11. Holotype: Varma and Dangwal, 1964, pl.1, fig.10. Age: Eocene–Oligocene.

subsp. *mineralosum*. Autonym. Holotype: Varma and Dangwal, 1964, pl.1, fig.9.

minus He Chengquan, 1991, p.131–132, pl.15, fig.10; text-fig.22. Holotype: He Chengquan, 1991, pl.15, fig.10; text-fig.22. Age: late Turonian–early Senonian.

"*molodovense*" Timofeev, 1962, pl.9, figs.2,2a–b. **Name not validly published**: no description.

"*monacanthum*" Deunff, 1951, p.323; text-fig.4. Holotype: Deunff, 1951, text-fig.4. **NOW** *Deunffia* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Veryhachium?* (combination not validly published; Appendix A), thirdly (and now) *Deunffia* (Appendix A). Age: Middle Ordovician.

"*monstruosum*" Tasch in Tasch et al., 1964, p.195, pl.1, fig.12. Holotype: Tasch et al., 1964, pl.1, fig.12. Originally *Hystrichosphaeridium*, subsequently (and now) *Diphyes?*, thirdly *Coronifera*. Taxonomic senior synonym: *Coronifera oceanica*, according to Below (1982c, p.5) — however, Fauconnier in Fauconnier and Masure (2004, p.176) retained *Hystrichosphaeridium* (as *Diphyes?*) *monstruosum*. Age: Albanian.

?*multicornutum* Kimyai, 1966, p.471, pl.2, fig.20. Holotype: Kimyai, 1966, pl.2, fig.20. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Cenomanian.

"*multifurcatum*" Deflandre, 1937b, p.76, pl.16 (al. pl.13), figs.1–3. Emendation: Masure in Fauconnier and Masure, 2004, p.270, as *Exochosphaeridium multifurcatum*. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), figs.1–2; Fensome et al., 1991, figs.1–2 — p.691; fig.1 — p.693; Fensome et al., 1993a, fig.1 — p.1261; figs.1–2 — p.1265; Fauconnier and Masure, 2004, pl.37, figs.10–11. **NOW** *Exochosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Cleistosphaeridium?*, fifthly *Heterosphaeridium*, sixthly (and now) *Exochosphaeridium*. Age: Late Cretaceous.

"*multipilosum*" Eisenack, 1931, p.111, pl.5, figs.20–22 ex Eisenack, 1938a, p.12. Holotype: Eisenack, 1931, pl.5, fig.22, as *Ovum hispidum* subsp. *multipilosum*, lost according to Eisenack (1959, p.197). Neotype: Eisenack, 1959, pl.15, fig.11, designated by Eisenack (1959, p.197). **NOW** *Baltisphaeridium multipilosum* (Appendix A). Originally *Ovum hispidum* subsp. *multipilosum* (name not validly published; Appendix A), subsequently *Hystrichosphaeridium multipilosum*, thirdly (and now) *Baltisphaeridium multipilosum* (Appendix A). The name *Ovum hispidum* subsp. *multipilosum* was not validly published in Eisenack (1931) since the specific name *Ovum hispidum* was not validly published. Age: Silurian.

"subsp. *multipilosum*". Autonym. Holotype: Eisenack, 1931, pl.5, fig.22, as *Ovum hispidum* subsp. *multipilosum*, lost according to Eisenack (1959, p.197). Neotype: Eisenack, 1959, pl.15, fig.11, designated by Eisenack (1959, p.197). **NOW** *Baltisphaeridium multipilosum* subsp. *multipilosum* (Appendix A).

Originally *Hystrichosphaeridium multipilosum* subsp. *multipilosum*, subsequently (and now) *Baltisphaeridium multipilosum* subsp. *multipilosum* (Appendix A).

"subsp. **validum**" Sannemann, 1955, p.330, pl.5, figs.9–10; text-fig.10. Holotype: Sannemann, 1955, pl.5, fig.9. **NOW** *Baltisphaeridium multipilosum* subsp. *validum* (Appendix A). Originally *Hystrichosphaeridium multipilosum* subsp. *validum*, subsequently (and now) *Baltisphaeridium multipilosum* subsp. *validum* (Appendix A). Age: Devonian (late Givetian).

"**mutabile**" Sannemann, 1955, p.331, pl.5, figs.5–6; text-figs.17a–d. Holotype: Sannemann, 1955, pl.5, fig.5. **NOW** *Aldridgeisphaera* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Multiplicisphaeridium?* (Appendix A), fourthly (and now) *Aldridgeisphaera* (Appendix A). Age: Devonian (late Givetian).

"**notoense**" Fuji in Ichikawa et al., 1964, pl.10, fig.3. **Name not validly published:** no description.

"**nudatum**" Timofeev, 1959, p.53, pl.4, fig.10. Holotype: Timofeev, 1959, pl.4, fig.10. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"**ohioense**" Winslow, 1962, p.77, pl.19, figs.1,22; pl.22, fig.9. Holotype: Winslow, 1962, pl.22, fig.9. **NOW** *Gorgonisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Gorgonisphaeridium* (Appendix A). Age: Late Devonian.

"**oligacanthum**" Wetzel, 1952, p.402–405, pl.A, figs.4,7–8,11a–b; text-figs.21–25. Emendation: Wilson and Sarjeant in Sarjeant, 1984c, p.128, as *Laticavodinium oligacanthum*. Holotype: Wetzel, 1952, pl.A, fig.8; Sarjeant, 1984c, pl.2, figs.4–5; text-fig.2; Fensome et al., 1995, figs.1–5 — p.1625; Dietz et al., 1999, text-fig.6g. **NOW** *Impletosphaeridium?*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium?*, fourthly *Laticavodinium*, fifthly (and now) *Impletosphaeridium?*. Age: Danian.

"subsp. **complanatum**" Wetzel, 1952, p.404–405, pl.A, figs.11a–b. Emendation: Sarjeant, 1984c, p.142, as *Solisphaeridium stimulfiferum* subsp. *complanatum*. Holotype: Wetzel, 1952, pl.A, figs.11a–b; Sarjeant, 1984c, pl.4, fig.6; text-fig.13. **NOW** *Micrhystridium stimulfiferum?* subsp. *complanatum* (Appendix A). Originally *Hystrichosphaeridium oligacanthum* subsp. *complanatum*, subsequently *Baltisphaeridium oligacanthum* subsp. *complanatum* (Appendix A), thirdly *Cleistosphaeridium? oligacanthum* subsp. *complanatum*, fourthly *Solisphaeridium stimulfiferum* subsp. *complanatum* (Appendix A), fifthly (and now) *Micrhystridium stimulfiferum?* subsp. *complanatum* (Appendix A). Age: Paleocene.

"subsp. **granulatum**" Wetzel, 1952, p.404; text-fig.25. Emendation: Sarjeant, 1984c, p.136, as *Surculosphaeridium? granulatum*. Holotype: Wetzel, 1952, text-fig.25; Sarjeant, 1984c, pl.5, figs.1–3; text-fig.8. **NOW** *Surculosphaeridium? granulatum*. Originally *Hystrichosphaeridium oligacanthum* subsp. *granulatum*, subsequently *Baltisphaeridium oligacanthum* subsp. *granulatum* (Appendix A), thirdly *Cleistosphaeridium? oligacanthum* subsp. *granulatum*, fourthly (and now) *Surculosphaeridium? granulatum*. Age: Paleocene.

"subsp. **oligacanthum**". Autonym. Holotype: Wetzel, 1952, pl.A, fig.8; Sarjeant, 1984c, pl.2, figs.4–5; text-fig.2; Fensome et al., 1995, figs.1–5 — p.1625. **Now redundant.** Originally *Hystrichosphaeridium oligacanthum* subsp. *oligacanthum*, subsequently *Baltisphaeridium oligacanthum* subsp. *oligacanthum* (Appendix A), thirdly *Cleistosphaeridium? oligacanthum* subsp. *oligacanthum*.

"subsp. **stella**" Wetzel, 1952, p.403, pl.A, fig.4; text-fig.23. Emendation: Sarjeant, 1984c, p.135, as *Surculosphaeridium phoenix* subsp. *stella*. Holotype: Wetzel, 1952, pl.A, fig.4; Dietz et al. 1999, text-fig.6f. **NOW** *Surculosphaeridium? stella*. Originally *Hystrichosphaeridium oligacanthum* subsp. *stella*, subsequently *Baltisphaeridium oligacanthum* subsp. *stella* (Appendix A), thirdly *Cleistosphaeridium? oligacanthum* subsp. *stella*, fourthly *Surculosphaeridium? phoenix* subsp. *stella*, fifthly (and now) *Surculosphaeridium? stella*. N.I.A. Age: Paleocene.

"subsp. *velatum*" Wetzel, 1952, p.403–404, pl.A, fig.7; text-fig.24. Emendation: Sarjeant, 1984c, p.133, as *Cauca? velata*. Holotype: Wetzel, 1952, pl.A, fig.7; text-fig.24; Sarjeant, 1984c, pl.3, figs.4–6; text-fig.6. **NOW** *Cauca? velata*. Originally *Hystrichosphaeridium oligacanthum* subsp. *velatum*, subsequently *Baltisphaeridium oligacanthum* subsp. *velatum* (Appendix A), thirdly *Cleistosphaeridium? oligacanthum* subsp. *velatum*, fourthly (and now) *Cauca? velata*. Age: Paleocene.

"*oligofurcatum*" Eisenack, 1954a, p.208, pl.1, fig.4; text-fig.5. Holotype: Eisenack, 1954a, pl.1, fig.4; text-fig.5. **NOW** *Visbysphaera* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Visbysphaera* (Appendix A), fourthly *Multiplicisphaeridium* (Appendix A). Age: Silurian (late Llandovery).

"*oligospinosum*" Eisenack, 1934, p.64–65, pl.4, figs.15–18 ex Eisenack, 1938a, p.12. Holotype: Eisenack, 1934, pl.4, fig.18, lost according to Eisenack et al. (1973, p.494). **NOW** *Estiastra? oligospinosa* (Appendix A). Originally *Ovum hispidum* subsp. *oligospinosum* (combination not validly published; Appendix A), subsequently *Hystrichosphaeridium oligospinosum*, thirdly *Pulvinosphaeridium oligospinosum* (Appendix A), fourthly *Veryhachium oligospinosum* (Appendix A), fifthly *Goniosphaeridium oligospinosum* (Appendix A), sixthly (and now) *Estiastra? oligospinosa* (Appendix A). The name *Ovum hispidum* subsp. *oligospinosum* was not validly published in Eisenack (1934) since the specific name *Ovum hispidum* was not validly published. Age: Silurian (erratic).

"*ordovicum*" Timofeev, 1959, p.56, pl.4, fig.20. Holotype: Timofeev, 1959, pl.4, fig.20. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"*pachydermum*" Cookson and Eisenack, 1960b, p.251–252, pl.38, fig.5; text-fig.5. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.5; Fauconnier and Masure, 2004, pl.48, fig.10. **NOW** *Impletosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*, thirdly *Hystrichosphaeridium?*, fourthly *Dapsilidinium*, fifthly (and now) *Impletosphaeridium*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Oxfordian–Tithonian.

"*palmatum*" Deflandre and Courteville, 1939, p.101, pl.3, fig.1. Holotype: Deflandre and Courteville, 1939, pl.3, fig.1. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Exochosphaeridium*, fourthly *Exochosphaeridium?*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as *Pervosphaeridium*) *pseudhystrichodinium*, according to Yun Hyesu (1981, p.29). Junior homonym: *Hystrichosphaeridium palmatum* (White, 1842) Downie and Sarjeant, 1965. Age: Late Cretaceous.

"*palmatum*" (White, 1842, p.39–40, pl.4, fig.12) Downie and Sarjeant, 1965, p.121. Holotype: White, 1842, pl.4, fig.12. **Combination illegitimate** — **senior homonym:** *Hystrichosphaeridium palmatum* Deflandre and Courteville, 1939. **Nomenclatural senior synonym:** *Xanthidium tubiferum* var. *recurvatum* (as *Hystrichosphaeridium recurvatum*), which has the same holotype. Substitute name: *Hystrichosphaeridium duplum*. Originally *Xanthidium tubiferum* var. *palmatum* (Appendix A), subsequently *Xanthidium palmatum* (Appendix A), thirdly *Spiniferites palmatus*, fourthly *Cordosphaeridium palmatum*, fifthly *Hystrichosphaeridium palmatum* (combination illegitimate), sixthly *Hystrichosphaeridium duplum* (name illegitimate). Nomenclatural junior synonyms: *Xanthidium tubiferum* var. *palmaforme* and *Hystrichosphaeridium duplum*, both of which have the same holotype as *Hystrichosphaeridium palmatum*. See *Hystrichosphaeridium recurvatum* for a full discussion. Age: Senonian.

"subsp. *palmatum*". Autonym. Holotype: White, 1842, pl.4, fig.12. **Name illegitimate:** the species name *Hystrichosphaeridium palmatum* is illegitimate. Originally *Hystrichosphaeridium palmatum* subsp. *palmatum* (combination illegitimate), subsequently *Hystrichosphaeridium duplum* subsp. *duplum* (name illegitimate).

"subsp. *parvum*" (Rozen, 1965, p.303–304, pl.4, fig.6; text-fig.13) Lentin and Williams, 1981, p.144. Holotype: Rozen, 1965, pl.4, fig.6; text-fig.13. **Combination illegitimate:** species name illegitimate. **NOW** *Hystrichosphaeridium recurvatum* subsp. *parvum*. Originally *Hystrichosphaeridium recurvatum* var. *parvum*, subsequently (and now) *Hystrichosphaeridium recurvatum* subsp. *parvum*, thirdly

Hystrichosphaeridium palmatum subsp. *parvum* (combination illegitimate), fourthly (and now)
Hystrichosphaeridium duplum subsp. *parvum* (combination illegitimate). Age: late Eocene.

?*paracostatum* Cookson and Eisenack, 1974, p.65–66, pl.25, figs.11–13. Holotype: Cookson and Eisenack, 1974, pl.25, fig.12. Questionable assignment: Masure and Foucher in Fauconnier and Masure (2004, p.310). Age: Albian–Senonian.

"*paradoxum*" Brosius, 1963, p.41–42, pl.4, figs.1,6; text-fig.2, nos.1a–c. Holotype: Brosius, 1963, pl.4, fig.6; Fensome et al., 1995, fig.2 — p.1639. **NOW** *Distatodinium*. Originally *Hystrichosphaeridium*, subsequently *Tanyosphaeridium*, thirdly *Oligosphaeridium?*, fourthly (and now) *Distatodinium*, fifthly *Bipolaribucina*. Taxonomic junior synonym: *Distatodinium craterum*, according to Fensome et al. (2009, p.31). Age: late Oligocene.

"*paraense*" Regali et al., 1974, p.289, pl.23, fig.6. Holotype: Regali et al., 1974, pl.23, fig.6. **NOW** *Tuberculodinium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Tuberculodinium*. Age: early Miocene.

"*parvispinum*" (Deflandre, 1937b, p.77, pl.16 [al. pl.13], fig.5) Cookson and Eisenack, 1958, p.45. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), fig.5; Fauconnier and Masure, 2004, pl.66, figs.5–6. **NOW** *Prolixosphaeridium parvispinum*. Originally *Hystrichosphaeridium?* *xanthiopyxides* var. *parvispinum*, subsequently *Hystrichosphaeridium parvispinum*, thirdly *Baltisphaeridium parvispinum* (Appendix A), fourthly (and now) *Prolixosphaeridium parvispinum*. Taxonomic junior synonyms (at specific and varietal ranks): *Prolixosphaeridium elongatum*, according to Lentin and Williams (1985, p.294); *Prolixosphaeridium deirense*, according to Davey and Verdier (1974, p.636–637) — however, Harding (1990b, p.46) retained *Prolixosphaeridium deirense*. Age: late Aptian.

parvum Davey, 1969b, p.5, pl.1, fig.8; pl.2, fig.1. Holotype: Davey, 1969b, pl.2, fig.1. Age: ?Campanian–Maastrichtian.

"*pateum*" Timofeev, 1959, p.52, pl.4, fig.4. Holotype: Timofeev, 1959, pl.4, fig.4. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"*patriarchum*" Deunff, 1967, p.25. **Name not validly published**: no description or illustration.

pattei Valensi, 1949, p.539–540, fig.1. Holotype: Valensi, 1949, fig.1; Fauconnier and Masure, 2004, pl.62, figs.8–9. Originally (and now) *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Lanterna*, fourthly *Lanterna?*, fifthly *Pandadinium*. Dodekova (1994, p.25) retained this species in *Hystrichosphaeridium*. Age: Bathonian.

patulum Davey and Williams, 1966b, p.60, pl.10, fig.5. Holotype: Davey and Williams, 1966b, pl.10, fig.5. Age: early Eocene.

subsp. *majus* Yu Jingxian, 1989, p.139, pl.45, figs.7,11. Holotype: Yu Jingxian, 1989, pl.45, fig.7. Age: Eocene.

subsp. *patulum*. Autonym. Holotype: Davey and Williams, 1966b, pl.10, fig.5.

?*paucifurcatum* Cookson and Eisenack, 1961b, p.44, pl.2, fig.15. Holotype: Cookson and Eisenack, 1961b, pl.2, fig.15. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Eocene.

"*paulinae*" (Valensi, 1953, p.48, pl.12, fig.6) Downie and Sarjeant, 1965, p.121. Holotype: Valensi, 1953, pl.12, fig.6. **NOW** *Dapsilidinium?*. Originally *Micrhystridium* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly *Polysphaeridium?*, fourthly (and now) *Dapsilidinium?*. Age: Middle Jurassic.

"?*penicillatum*" (Ehrenberg, 1843b, p.62 ex Ehrenberg, 1854, pl.37, section 8, fig.3) Deflandre, 1937b, p.75. Holotype: Ehrenberg, 1854, pl.37, section 8, fig.3. **NOW** *Systematophora penicillata*. Originally *Xanthidium penicillatum* (Appendix A), subsequently *Hystrichosphaera penicillata* (combination not validly published), thirdly *Hystrichosphaeridium penicillatum*, fourthly *Ovum hispidum penicillatum* (combination not validly published; Appendix A), fifthly *Hystrichosphaeridium? penicillatum*, sixthly (and now) *Systematophora penicillata*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Taxonomic junior synonym: *Systematophora fasciculigera*, according to Sarjeant (1980a, p.282). Age: late Oxfordian.

"forma *coronatum*" Wetzel, 1933b, caption to pl.4, fig.17 — p.41, pl.4, fig.17 ex Deflandre, 1937b, p.75. Holotype: Wetzel, 1933b, pl.4, fig.17; Lejeune-Carpentier, 1938a, fig.6. **NOW** *Areoligera coronata*. Originally *Hystrichosphaera penicillata* forma *coronata* (name not validly published), subsequently *Hystrichosphaeridium penicillatum* forma *coronatum*, thirdly (and now) *Areoligera coronata*. Taxonomic junior synonyms: *Hystrichosphaera penicillata* forma *medusettiformis* and *Hystrichosphaera penicillata* forma *rhizopodiphora*, both according to Morgenroth (1968, p.551) — however, Eaton (1976, p.245) retained *Hystrichosphaera penicillata* forma *medusettiformis* (as *Areoligera medusettiformis*). The name *Hystrichosphaera penicillata* forma *coronata* was not validly published in Wetzel (1933b) since the generic name *Hystrichosphaera* was not validly published until 1937. Age: Senonian.

"forma *penicillatum*". Autonym. Holotype: Ehrenberg, 1854, pl.37, section 8, fig.3. **Now redundant.**

"*perceptibile*" Isagulova, 1963, p.1157, pl.1, fig.5. **Name not validly published:** no description.

"*perforatum*" Gocht, 1959, p.68–69, pl.3, fig.7; pl.7, figs.13–16. Holotype: Gocht, 1959, pl.3, fig.7; pl.7, fig.13; Fauconnier and Masure, 2004, pl.59, figs.3–11. **NOW** *Oligosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Oligosphaeridium*. Age: Hauterivian–Barremian.

"*perifurcatum*" Salujha et al., 1969, p.35–36, pl.4, figs.51–52,55,62. Holotype: Salujha et al., 1969, pl.4, fig.51. **Taxonomic senior synonym:** *Hystrichokolpoma rigaudiae*, according to Jain (1982, p.53). Age: early Eocene.

"*perovatum*" Tasch in Tasch et al., 1964, p.194, pl.3, fig.13. Holotype: Tasch et al., 1964, pl.3, fig.13. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albian.

?*perplexum* Varma and Dangwal, 1964, p.64, pl.1, figs.5–6. Holotype: Varma and Dangwal, 1964, pl.1, figs.5–6. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Eocene–Oligocene.

petilum Gitmez, 1970, p.289–290, pl.9, figs.1,6; text-fig.24. Holotype: Gitmez, 1970, pl.9, fig.1; text-fig.24; Fauconnier and Masure, 2004, pl.45, fig.1. Age: early Kimmeridgian.

"?*phoenix*" Duxbury, 1980, p.124–125, pl.13, figs.5–6; text-fig.9. Holotype: Duxbury, 1980, pl.13, figs.5–6; text-fig.9; Fauconnier and Masure, 2004, pl.19, figs.4–11. **NOW** *Cymososphaeridium?*. Originally *Hystrichosphaeridium?*, subsequently *Surculosphaeridium?*, thirdly (and now) *Cymososphaeridium?*. Questionable assignment: Duxbury (1980, p.124). N.I.A. Age: Barremian.

"*picoricum*" (Cramer, 1964, p.303–304, pl.11, figs.1–3; text-fig.24) Andreeva, 1973, p.192. Holotype: Cramer, 1964, pl.11, fig.2. **Combination not validly published:** basionym not fully referenced. Originally *Micrhystridium* (Appendix A), subsequently *Multiplicisphaeridium* (Appendix A), thirdly *Hystrichosphaeridium* (combination not validly published). **Taxonomic senior synonym:** *Baltisphaeridium* (now *Multiplicisphaeridium*) *cladum* Downie, 1963, an acritarch species, according to Colbath (1979, p.20–21). Age: Devonian (middle Siegenian–Emsian).

"?*pilosum*" (Ehrenberg, 1854, pl.37, section 8, fig. 4) Deflandre, 1937b, p.79. Emendation: Erkmen and Sarjeant, 1980, p.51, as *Sentusidinium pilosum*. Holotype: Ehrenberg, 1854, pl.37, section 8, fig. 4. **NOW** *Barbatacysta pilosa*. Originally *Xanthidium pilosum* (Appendix A), subsequently *Hystrichosphaera pilosa* (combination not validly published), thirdly *Hystrichosphaeridium? pilosum*, fourthly *Baltisphaeridium pilosum* (Appendix A), fifthly *Ovum hispidum* subsp. *pilosum* (combination not validly published; Appendix A), sixthly *Cleistosphaeridium*

pilosum (combination not validly published), seventhly *Tenua pilosa*, eighthly *Sentusidinium pilosum*, ninthly *Batiacasphaera pilosa*, tenthly (and now) *Barbatacysta pilosa*. Questionable assignment: Deflandre (1937b, p.79). Age: Oxfordian.

"**piriferum**" Eisenack, 1954a, p.206–207, pl.1, figs.1a–b; text-fig.1. Holotype: Eisenack, 1954a, pl.1, figs.1a–b. **NOW** *Visbysphaera* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Multiplicisphaeridium* (Appendix A), fourthly (and now) *Visbysphaera* (Appendix A). Taxonomic junior synonyms: *Baltisphaeridium hermosum* Cramer and Diez, 1968 (name not validly published), an acritarch species, according to Cramer (1970, p.148); *Baltisphaeridium* (now *Visbysphaera*) *dilatispinosum* Downie, 1963, an acritarch species, according to Eisenack (1965c, p.263) — however, Fensome et al. (1990, p.530) retained *Baltisphaeridium* (now *Visbysphaera*) *dilatispinosum*. Age: Silurian (late Llandovery).

"**placacanthum**" Deflandre and Cookson, 1955, p.276–277, pl.9, figs.1–3. Emendation: May, 1980, p.68, as *Systematophora placacantha*. Holotype: Deflandre and Cookson, 1955, pl.9, figs.1–2; Fauconnier and Masure, 2004, pl.76, figs.14–16. **NOW** *Cleistosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Impletosphaeridium*, fourthly *Systematophora*, fifthly (and now) *Cleistosphaeridium*. Taxonomic junior synonyms: *Baltisphaeridium* (now *Impletosphaeridium*) *panniforme*, according to Sarjeant (1984b, p.86–87) — however, Eaton et al. (2001, p.191) retained *Baltisphaeridium panniforme*; *Systematophora ancyrea*, according to Stover and Evitt (1978, p.84) — however, Lentin and Williams (1981, p.272) retained *Systematophora ancyrea*. Age: Miocene.

"**plicatum**" Maier, 1959, p.318, pl.33, fig.1. Holotype: Maier, 1959, pl.33, fig.1. Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). **Taxonomic senior synonym** (at subspecific rank): *Hystrichosphaera* (as *Spiniferites*) *ramosa* subsp. *gracilis*, according to Sarjeant (1983, p.93). Age: middle Oligocene.

"**podolicum**" Timofeev, 1960, pl.1, fig.12. **Name not validly published**: no description.

"**polonicum**" Górka, 1965, p.306–307, pl.3, figs.5–6. Emendations: Erkmén and Sarjeant, 1980, p.68, as *Compositosphaeridium polonicum*; Courtinat, 1989, p.164, as *Compositosphaeridium polonicum* — however, see Stancliffe and Sarjeant (1990, p.203). Holotype: Górka, 1965, pl.3, fig.5. **NOW** *Compositosphaeridium?* Dodekova. Originally *Hystrichosphaeridium*, subsequently *Compositosphaeridium* Erkmén and Sarjeant (combination illegitimate), thirdly *Compositosphaeridium* Dodekova, fourthly (and now) *Compositosphaeridium?* Dodekova. Taxonomic junior synonyms: *Hystrichosphaeridium* (subsequently *Compositosphaeridium*) *costatum*, according to Beju (1971, p.292); *Compositosphaeridium bulgaricum*, according to Dodekova (1990, p.9) — however, Stancliffe and Sarjeant (1990, p.203) retained *Compositosphaeridium bulgaricum* and Masure in Fauconnier and Masure (2004, p.137) retained *Compositosphaeridium costatum*. Age: Oxfordian.

"**polygonale**" Eisenack, 1931, p.113, pl.4, figs.16–20; pl.5, fig.18 ex Eisenack, 1938a, p.12. Holotype: Eisenack, 1931, pl.4, fig.19 (as *Ovum hispidum* subsp. *polygonale*), lost according to Eisenack (1959, p.199). Neotype: Paris and Deunff, 1970, pl.1, fig.4 (as *Veryhachium splendens*), designated by Fensome et al. (1990, p.235), which see. **NOW** *Polygonium polygonale* (Appendix A). Originally *Ovum hispidum* subsp. *polygonale* (combination not validly published; Appendix A), subsequently *Hystrichosphaeridium polygonale*, thirdly *Baltisphaeridium polygonale* (Appendix A), fourthly *Veryhachium polygonale* (combination not validly published; Appendix A), fifthly *Goniosphaeridium polygonale* (Appendix A), sixthly (and now) *Polygonium polygonale* (Appendix A). Taxonomic junior synonyms: *Impletosphaeridium?* *primordiale*, according to Eisenack et al. (1973, p.497–498); *Veryhachium* (al. *Goniosphaeridium*) *splendens* Paris and Deunff, 1970, an acritarch species, by implication in Turner (1984, p.113–114), who believed *Goniosphaeridium splendens* to be the senior name; *Hystrichosphaeridium* (al. *Baltisphaeridium*) *sexradiatum* Timofeev, 1959, an acritarch species, according to Eisenack (1965c, p.261). The name *Ovum hispidum* subsp. *polygonale* was not validly published in Eisenack (1931) since the specific name *Ovum hispidum* was not validly published. Age: Silurian (erratic).

"**?polyplasiium**" Maier, 1959, p.322–323, pl.33, figs.7–8. Emendation: Sarjeant, 1983, p.96–97, as *Spiniferites polyplasius*. Holotype: Maier, 1959, pl.33, fig.7; Sarjeant, 1983, pl.1, fig.3; pl.2, fig.2. **NOW** *Spiniferites*. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaeridium?*, thirdly (and now) *Spiniferites*. Questionable assignment: Davey and Williams (1966b, p.70). Age: Miocene.

polyradiatum Andreeva, 1966, p.131, pl.20, fig.2. Holotype: Andreeva, 1966, pl.20, fig.2. This is probably an acritarch species. Age: Middle Ordovician.

polytrichum Valensi, 1947, p.818; text-fig.4. Holotype: Valensi, 1947, text-fig.4; Fauconnier and Masure, 2004, pl.24, figs.1–6. **NOW** *Impletosphaeridium*? Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Impletosphaeridium*, fifthly *Downiesphaeridium*, sixthly (and now) *Impletosphaeridium*?. Taxonomic junior synonym: *Cleistosphaeridium* (as *Downiesphaeridium*) *polyacanthum*, according to Masure in Fauconnier and Masure (2004, p.196). Age: late Bathonian.

proprium Marheinecke, 1992, p.60–61, pl.11, figs.4–8. Holotype: Marheinecke, 1992, pl.11, figs.4–6; Fauconnier and Masure, 2004, pl.40, figs.1–3. **NOW** *Hystrichokolpoma*. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichokolpoma*. Contrary to the opinion of Lentin and Williams (1993, p.327), Williams et al. (1998, p.310) considered this name to be validly published. Age: late Maastrichtian.

"subsp. ***brevispinum***" (Davey and Williams, 1966b, p.58, pl.10, fig.10) Marheinecke, 1992, p.61. Emendation: Marheinecke, 1992, p.61, as *Hystrichosphaeridium proprium* subsp. *brevispinum*. Holotype: Davey and Williams, 1966b, pl.10, fig.10; Bujak et al., 1980, pl.8, figs.10–12; Fauconnier and Masure, 2004, pl.47, figs.1–4. **NOW** *Hystrichosphaeridium tubiferum* subsp. *brevispinum*. Originally *Hystrichosphaeridium tubiferum* var. *brevispinum*, subsequently (and now) *Hystrichosphaeridium tubiferum* subsp. *brevispinum*, thirdly *Hystrichosphaeridium proprium* subsp. *brevispinum*. Taxonomic senior synonym: *Micrhystridium* (as *Dapsilidium*?, now *Litosphaeridium*) *fucosum*, according to Below (1982c, p.29) — however, Lentin and Williams (1985, p.190) retained *Hystrichosphaeridium tubiferum* subsp. *brevispinum*. Age: early Eocene.

"subsp. ***proprium***". Autonym. Holotype: Marheinecke, 1992, pl.11, figs.4–6. **Now redundant.**

protellipticum Tasch in Tasch et al., 1964, p.194, pl.2, fig.2. Holotype: Tasch et al., 1964, pl.2, fig.2. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albian.

pseudhystrichodinium Deflandre, 1937b, p.73, pl.15 (al. pl.12), figs.3–4. Emendation: Davey, 1969a, p.163, as *Exochosphaeridium pseudhystrichodinium*. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), fig.3; Eisenack and Kjellström, 1972, p.415; Fensome et al., 1995, fig.1 — p.1705. **NOW** *Pervosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Exochosphaeridium*?, fourthly (and now) *Pervosphaeridium*. Taxonomic junior synonym: *Hystrichosphaeridium* (as *Exochosphaeridium*?) *palmatum* Deflandre and Courteville, according to Yun Hyesu (1981, p.29). Age: Late Cretaceous.

"subsp. ***magnum***" Wetzel, 1955, p.35,38, figs.9–10,14. Emendation: Sarjeant, 1984c, p.138–139, as *Coronifera oceanica* subsp. *magna*. Holotype: Wetzel, 1955, fig.9; Sarjeant, 1984c, pl.5, figs.4–5; text-fig.11 (two illustrations); Fensome et al., 1991, p.663, figs.1–3; p.697, fig.1. **NOW** *Coronifera oceanica* subsp. *magna*. Originally *Hystrichosphaeridium pseudhystrichodinium* subsp. *magnum*, subsequently *Baltisphaeridium pseudhystrichodinium* subsp. *magnum* (Appendix A), thirdly (and now) *Coronifera oceanica* subsp. *magna*, fourthly *Coronifera pedata* subsp. *magna*. Age: Paleocene.

"subsp. ***pseudhystrichodinium***". Autonym. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), fig.3. **Now redundant.** Originally *Hystrichosphaeridium pseudhystrichodinium* subsp. *pseudhystrichodinium*, subsequently *Baltisphaeridium pseudhystrichodinium* subsp. *pseudhystrichodinium* (Appendix A).

pseudorecurvatum Morgenroth, 1966a, p.30–31, pl.8, figs.5–6. Holotype: Morgenroth, 1966a, pl.8, fig.5. **NOW** *Melitasphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Operculodinium*, thirdly (and now) *Melitasphaeridium*. Taxonomic junior synonym: *Hystrichosphaeridium sheppeyense*, according to Stover and Evitt (1978, p.179). Age: early Eocene.

"*pterophorum*" Deflandre and Courteville, 1939, p.102, pl.2, figs.4–5. Holotype: Deflandre and Courteville, 1939, pl.2, figs.4–5. **NOW** *Dinopterygium*. Originally *Hystrichosphaeridium*, subsequently *Cymatiosphaera* (Appendix A), thirdly *Oodnadattia*, fourthly (and now) *Dinopterygium*. Age: Senonian.

"*pulcherrimum*" Deflandre and Cookson, 1955, p.270–271, pl.1, fig.8; text-figs.21–22. Holotype: Deflandre and Cookson, 1955, pl.1, fig.8; text-figs.21–22; Fauconnier and Masure, 2004, pl.60, figs.8–11. **NOW** *Oligosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Oligosphaeridium*. This name was not validly published in Deflandre and Cookson (1954, p.1236), who did not provide a description. Age: Albian.

"*pumile*" Wetzel, 1933b, p.44, pl.4, fig.24 ex Deflandre, 1937b, p.78. Emendation: Sarjeant, 1985b, p.162, as *Diacrocanthidium?* *pumile*. Holotype: Wetzel, 1933b, pl.4, fig.24. **NOW** *Diacrocanthidium?* *pumile* (Appendix A) Originally *Hystrichosphaera longispinosa* forma *pumilis* (name not validly published), subsequently *Hystrichosphaeridium pumile*, thirdly *Baltisphaeridium pumile* (combination not validly published; Appendix A), fourthly *Micrhystridium pumile* (Appendix A), fifthly (and now) *Diacrocanthidium?* *pumile* (Appendix A). The name *Hystrichosphaera longispinosa* forma *pumilis* was not validly published in Wetzel (1933b), since the species name *Hystrichosphaera longispinosa* was not validly published. Age: Late Cretaceous (erratic).

"*quadridactylites*" Stockmans and Willièrè, 1962a, p.67–68, pl.1, fig.18; text-fig.29. Holotype: Stockmans and Willièrè, 1962a, pl.1, fig.18. Originally *Hystrichosphaeridium*, subsequently *Daillydium* (Appendix A).

Taxonomic senior synonym: *Cymatiosphaera* (now *Daillydium*) *pentaster* Staplin, 1961, an acritarch species, according to Playford in Playford and Dring (1981, p.17–18). Age: Devonian (Frasnian).

"*quadriradiatum*" Timofeev, 1959, p.57; pl.4, fig.25. Holotype: Timofeev, 1959, pl.4, fig.25. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"*radiculatum*" Davey and Williams, 1966b, p.65, pl.7, fig.9; pl.8, fig.6. Emendation: Davey and Verdier, 1976, p.318, as *Florentinia radiculata*. Holotype: Davey and Williams, 1966b, pl.8, fig.6; Davey and Verdier, 1973, pl.4, fig.7. **NOW** *Florentinia*. Originally *Hystrichosphaeridium*, subsequently (and now) *Florentinia*. Taxonomic junior synonym: *Coronifera kaiseri*, according to Below (1982c, p.9). Age: late Cenomanian.

"*ramuliferum*" Deflandre, 1937b, p.74, pl.14 (al. pl.11), figs.5–6; pl.17 (al. pl.14), fig.10. Holotype: Deflandre, 1937b, pl.14 (al. pl.11), fig.5; Fensome et al., 1991, fig.1 — p.721; fig.1 — p.725. **NOW** *Achomosphaera*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (combination not validly published; Appendix A), thirdly (and now) *Achomosphaera*, fourthly *Spiniferites*. Taxonomic junior synonym: *Hystrichosphaeridium rehdense*, according to Sarjeant (1983, p.97,99). Age: Late Cretaceous.

"*ramusculosum*" Deflandre, 1945a, p.63, pl.1, figs.8–16; text-figs.38–39. Emendation: Lister, 1970, p.92–93, as *Multiplicisphaeridium ramusculosum*. Holotype: Deflandre, 1945a, pl.1, figs.8–10. **NOW** *Multiplicisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Evittia Brito* (combination not validly published; Appendix A), fourthly (and now) *Multiplicisphaeridium* (Appendix A), fifthly *Peteinosphaeridium* (combination not validly published; Appendix A), sixthly *Oppilatala* (Appendix A). This name was not validly published in Deflandre (1942, figs.2–6 — p.476). Age: Silurian.

"var. *macrocladum*" Deunff, 1955, p.146; text-fig.21. Holotype: Deunff, 1955, text-fig.21. **NOW** *Multiplicisphaeridium ramusculosum* var. *macrocladum* (Appendix A). Originally *Hystrichosphaeridium ramusculosum* var. *macrocladum*, subsequently *Baltisphaeridium ramusculosum* var. *macrocladum* (Appendix A), thirdly *Multiplicisphaeridium ramusculosum* var. *macrocladum* (combination not validly published; Appendix A), fourthly *Oppilatala ramusculosa* var. *macroclada* (Appendix A), fifthly (and now) *Multiplicisphaeridium ramusculosum* var. *macrocladum*. Age: Middle Devonian.

"var. *ramusculosum*". Autonym. Holotype: Deflandre, 1945a, pl.1, figs.8–10. **NOW** *Multiplicisphaeridium ramusculosum* var. *ramusculosum* (Appendix A). Originally *Hystrichosphaeridium ramusculosum* var. *ramusculosum*, subsequently *Baltisphaeridium ramusculosum* var. *ramusculosum* (Appendix A), thirdly *Oppilatala ramusculosa* var. *ramusculosa* (Appendix A), fourthly (and now) *Multiplicisphaeridium ramusculosum* var. *ramusculosum*.

?*raritanianum* Kimyai, 1966, p.471, pl.2, fig.19. Holotype: Kimyai, 1966, pl.2, fig.19. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium*?. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Cenomanian.

"*readei*" Davey and Williams, 1966b, p.64–65, pl.6, fig.3. Emendation: Davey and Verdier, 1976, p.314, as *Kleithriasphaeridium readei*. Holotype: Davey and Williams, 1966b, pl.6, fig.3. **NOW** *Kleithriasphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Kleithriasphaeridium*. Age: Cenomanian.

recurvatum (White, 1842, p.39, pl.4, fig.12) Lejeune-Carpentier, 1940, p.B221–B222. Holotype: White, 1842, pl.4, fig.12. Originally *Xanthidium tubiferum* var. *recurvatum* (Appendix A), subsequently (and now) *Hystrichosphaeridium recurvatum*. Nomenclatural junior synonyms: *Xanthidium tubiferum* var. *palmatum* [subsequently *Hystrichosphaeridium palmatum* (White), an illegitimate name], *Xanthidium tubiferum* var. *palmaforme* and *Hystrichosphaeridium duplum*, since they all have the same holotype as *Hystrichosphaeridium recurvatum*. White (1842, p.39) named "The twelfth ... species of the genus *Xanthidium* ... the *Tubiferum recurvatum* or *palmaforme* — the curved or palm-formed *Tubiferum*", thus presenting two epithets in his text. To compound matters, the single illustration was labelled "*X. tubiferum palmatum*". Since prior to 1953 alternative names were allowed under the I.C.N., and since White (1842) provided a description and illustration, the taxon was validly published. The correct name would be that chosen by the first subsequent author to make such a choice, and this was Bronn (1848, p.1375), who used the name *Xanthidium palmatum*, at species rank. When Downie and Sarjeant (1965, p.121) transferred *Xanthidium palmatum* to *Hystrichosphaeridium*, they created an illegitimate combination — a junior homonym of *Hystrichosphaeridium palmatum* Deflandre and Courteville. Hence, since *Xanthidium tubiferum* var. *recurvatum* had been raised to specific rank, as *Hystrichosphaeridium recurvatum*, by Lejeune-Carpentier (1940), "*recurvatum*" becomes the correct epithet as long as the epithet "*palmatum*" remains unavailable. Age: Late Cretaceous.

subsp. *parvum* (Rozen, 1965, p.303–304, pl.4, fig.6; text-fig.13) Lentin and Williams, 1973, p.79. Holotype: Rozen, 1965, pl.4, fig.6; text-fig.13. Originally *Hystrichosphaeridium recurvatum* var. *parvum*, subsequently (and now) *Hystrichosphaeridium recurvatum* subsp. *parvum*, thirdly *Hystrichosphaeridium palmatum* subsp. *parvum* (combination illegitimate), fourthly *Hystrichosphaeridium duplum* subsp. *parvum* (combination illegitimate). Age: late Eocene.

"var. *parvum*" Rozen, 1965, p.303–304, pl.4, fig.6; text-fig.13. Holotype: Rozen, 1965, pl.4, fig.6; text-fig.13. **NOW** *Hystrichosphaeridium recurvatum* subsp. *parvum*. Originally *Hystrichosphaeridium recurvatum* var. *parvum*, subsequently (and now) *Hystrichosphaeridium recurvatum* subsp. *parvum*, thirdly *Hystrichosphaeridium palmatum* subsp. *parvum* (combination illegitimate), fourthly *Hystrichosphaeridium duplum* subsp. *parvum* (combination illegitimate). Age: late Eocene.

"subsp. *polypes*" Cookson and Eisenack, 1962b, p.491–492, pl.4, figs.11–13. Emendation: Duxbury, 1983, p.49, as *Kiokansium polypes*. Holotype: Cookson and Eisenack, 1962b, pl.4, figs.11–13; Fensome et al., 1996, figs.1–3 — p.2283. Originally *Hystrichosphaeridium recurvatum* subsp. *polypes*, subsequently *Polysphaeridium?* *polypes* (combination not validly published), thirdly *Cleistosphaeridium polypes*, fourthly *Bacchidinium polypes*, fifthly *Impletosphaeridium polypes*, sixthly *Kiokansium polypes*. **Taxonomic senior synonym** (at specific rank): *Hystrichosphaeridium* (as and now *Kiokansium*) *unituberculatum*, by implication in Duxbury (1983, p.49), who considered *Hystrichosphaeridium recurvatum* subsp. *polypes* (as *Kiokansium polypes*) to be the senior name. Taxonomic junior synonym: *Cleistosphaeridium?* *solidum*, according to Below (1982c, p.16). Age: Albian–Cenomanian.

subsp. *recurvatum*. Autonym. Holotype: White, 1842, pl.4, fig.12.

"var. *recurvatum*". Autonym. Holotype: White, 1842, pl.4, fig.12. **Now redundant**.

"*redonense*" Morzadec-Kerfourn, 1966, p.139, pl.2, fig.3; text-fig.1. Holotype: Morzadec-Kerfourn, 1966, pl.2, fig.3. **Taxonomic senior synonym**: *Hystrichosphaeridium* (now *Lingulodinium*) *machaerophorum*, questionably according to Harland (1977b, p.94) and according to Rochon et al. (1999, p.20). Age: Holocene.

"*rehdense*" Maier, 1959, p.317–318, pl.32, figs.3–4. Holotype: Maier, 1959, pl.32, fig.4; Sarjeant, 1983, pl.1, fig.1. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as and now *Achomosphaera*) *ramuliferum*, according to Sarjeant (1983, p.97–99). Age: middle Miocene.

"*reniforme*" Tasch in Tasch et al., 1964, p.193, pl.2, fig.6. Holotype: Tasch et al., 1964, pl.2, fig.6. Originally *Hystrichosphaeridium*, subsequently *Oligosphaeridium*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Oligosphaeridium*) *albertense*, by implication in Stover and Evitt (1978, p.69), who considered *Hystrichosphaeridium reniforme* to be a taxonomic junior synonym of *Hystrichosphaeridium* (subsequently *Oligosphaeridium*) *irregulare*, which is now a taxonomic junior synonym of *Hystrichosphaeridium* (now *Oligosphaeridium*) *albertense*. Age: Albian.

"*replexum*" Tasch in Tasch et al., 1964, p.193, pl.3, fig.14. Holotype: Tasch et al., 1964, pl.3, fig.14. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albian.

"*rhabdophorum*" Valensi, 1955b, p.593, pl.3, fig.7. Holotype: Valensi, 1955b, pl.3, fig.7; Fauconnier and Masure, 2004, pl.20, figs.10–11. **NOW** *Exochosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*, thirdly *Dapsilidinium?*, fourthly (and now) *Exochosphaeridium*. Age: Late Cretaceous.

"*rhopalophorum*" Valensi, 1955a, p.36, fig.1C. Holotype: Valensi, 1955a, fig.1C. **NOW** *Exochosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Exochosphaeridium*. Age: Late Cretaceous.

"*rigens*" Timofeev, 1959, p.55, pl.4, fig.18. Holotype: Timofeev, 1959, pl.4, fig.18. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"*rjabiniini*" Timofeev, 1959, p.56, pl.4, fig.24. Holotype: Timofeev, 1959, pl.4, fig.24. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"*robustum*" Sah et al., 1970, p.146, pl.2, figs.16–17. Holotype: Sah et al., 1970, pl.2, fig.16. **Name illegitimate — senior homonym:** *Hystrichosphaeridium robustum* Sannemann, 1955. **Substitute name:** *Hystrichosphaeridium sahi*. Originally *Hystrichosphaeridium robustum* (name illegitimate), subsequently (and now) *Hystrichosphaeridium sahi*. Age: Late Cretaceous.

"*robustum*" Sannemann, 1955, p.331, pl.1, figs.6,8–9; pl.6, figs.7–9; text-figs.13,14a–c. Holotype: Sannemann, 1955, pl.6, fig.7. **NOW** *Aldridgeisphaera?* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (combination illegitimate; Appendix A), thirdly *Multiplicisphaeridium* (Appendix A), fourthly (and now) *Aldridgeisphaera?* (Appendix A). Junior homonym: *Hystrichosphaeridium robustum* Sah et al., 1970. Age: Devonian (late Givetian).

"subsp. *fissum*" Sannemann, 1955, p.331, pl.1, figs.6–9; pl.6, figs.7–8; text-fig.13. Holotype: Sannemann, 1955, pl.6, fig.7. **NOW** *Aldridgeisphaera?* *robusta* subsp. *fissa* (Appendix A). Originally *Hystrichosphaeridium robustum* subsp. *fissum*, subsequently *Baltisphaeridium robustum* subsp. *fissum* (combination illegitimate; Appendix A), thirdly *Multiplicisphaeridium robustum* subsp. *fissum* (Appendix A), fourthly (and now) *Aldridgeisphaera?* *robusta* subsp. *fissa* (Appendix A). Age: Devonian (late Givetian).

"subsp. *robustum*". Autonym. Holotype: Sannemann, 1955, pl.6, fig.7. **NOW** *Aldridgeisphaera?* *robusta* subsp. *robusta* (Appendix A). Originally *Hystrichosphaeridium robustum* subsp. *robustum*, subsequently *Multiplicisphaeridium robustum* subsp. *robustum* (Appendix A), thirdly (and now) *Aldridgeisphaera?* *robusta* subsp. *robusta* (Appendix A).

"*rubinum*" Banerjee, 1972, p.135. **Name not validly published:** no description or illustration.

"**rubinum**" Rossignol, 1962, p.134. **Name not validly published**: no illustration. **NOW** *Spiniferites*. Originally *Hystrichosphaeridium* (name not validly published), subsequently *Hystrichosphaera*, thirdly (and now) *Spiniferites*. Age: Quaternary.

?**sahii** Lentin and Williams, 1993, p.331. Holotype: Sah et al., 1970, pl.2, fig.16. Originally *Hystrichosphaeridium robustum* (name illegitimate), subsequently (and now) *Hystrichosphaeridium sahi*. Questionable assignment: Masure and Foucher in Fauconnier and Masure (2004, p.313) as a problematic species. This is the substitute name for *Hystrichosphaeridium robustum* Sah et al., 1970, p.146, pl.2, figs.16–17 (an illegitimate name). Jain (1982, p.52) recommended that this species be restricted to the holotype. Age: Late Cretaceous.

salpingophorum Deflandre, 1935, p.232, pl.9, fig.1 ex Deflandre, 1937b, p.70 (not 80). Emendation: Davey and Williams, 1966b, p.61–62, as *Hystrichosphaeridium salpingophorum*. Holotype: Deflandre, 1935, pl.9, fig.1; Deflandre, 1937b, pl.13 (al pl.10), figs.1,3; Fauconnier and Masure, 2004, pl.46, figs.1–6. Originally *Hystrichosphaera* (name not validly published), subsequently (and now) *Hystrichosphaeridium*. The name *Hystrichosphaera salpingophora* was not validly published in Deflandre (1935) since the generic name *Hystrichosphaera* was not validly published until 1937. Age: Senonian.

"**salvadorensis**" Regali et al., 1974, p.290, pl.23, fig.1. Holotype: Regali et al., 1974, pl.23, fig.1. **NOW** *Thalassiphora*. Originally *Hystrichosphaeridium*, subsequently (and now) *Thalassiphora*. Age: Eocene.

"**saturnium**" Maier, 1959, p.319–320, pl.32, fig.8. Holotype: Maier, 1959, pl.32, fig.8; Sarjeant, 1983, pl.4, figs.3–4. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A). **Taxonomic senior synonym**: *Wetzeliella symmetrica*, according to Sarjeant (1983, p.107–108). Age: middle Miocene.

"**scaffoldii**" Baksi, 1962, p.17, pl.2, fig.25. Holotype: Baksi, 1962, pl.2, fig.25. **NOW** *Cannosphaeropsis*?. Originally *Hystrichosphaeridium*, subsequently *Cannosphaeropsis*, thirdly (and now) *Cannosphaeropsis*?. Age: Eocene.

"**scissospinum**" Yun Hyesu, 1981, p.32–33, pl.16, figs.3,7–8,10; text-figs.8a–b. Holotype: Yun Hyesu, 1981, pl.16, fig.10; text-figs.8a–b; Fensome et al., 1991, figs.3–5 — p.731; Fauconnier and Masure, 2004, pl.74, figs.4–6. **NOW** *Surculosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Surculosphaeridium*. Age: early Santonian.

"**scoriaceum**" Raynaud, 1978, p.393, pl.1, figs.4–5. Holotype: Raynaud, 1978, pl.1, fig.4; Fauconnier and Masure, 2004, pl.7, figs.1–2. **NOW** *Systematophora*. Originally *Hystrichosphaeridium*, subsequently (and now) *Systematophora*. Age: Berriasian–mid Valanginian.

semanticum Chibrikova, 1972, p.195–196, pl.16, figs.8–9. Holotype: Chibrikova, 1972, pl.16, fig.8. This is probably an acritarch species. Age: Silurian.

"**seminudum**" Wetzel, 1952, p.405; text-fig.26. Holotype: Wetzel, 1952, text-fig.26. **NOW** *Solisphaeridium*? (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Solisphaeridium*? (Appendix A). Age: Danian.

?**senii** Srivastava and Banerjee, 1969, p.104, pl.1, fig.12. Holotype: Srivastava and Banerjee, 1969, pl.1, fig.12. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Eocene.

?**sergipense** (Regali et al., 1974, p.291, pl.24, fig.1) Lentin and Williams, 1981, p.147. Holotype: Regali et al., 1974, pl.24, fig.1. Originally *Hystrichosphaera*, subsequently (and now) *Hystrichosphaeridium*?. Questionable assignment: Lentin and Williams (1981, p.147); and Masure and Foucher in Fauconnier and Masure (2004, p.313) as a problematic species. Age: early Eocene.

"**setigerfurcatum**" Timofeev, 1959, p.52–53, pl.4, fig.6. Holotype: Timofeev, 1959, pl.4, fig.6. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A), thirdly *Archaeohystrichosphaeridium* (combination not validly published; Appendix A). Age: Early Ordovician.

- "*sexradiatum*" Timofeev, 1959, p.53, pl.4, fig.7. Holotype: Timofeev, 1959, pl.4, fig.7. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A). **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Polygonium*) *polygonale* Eisenack, 1931 ex Eisenack, 1938a, an acritarch species, according to Eisenack (1965c, p.261). Age: Early Ordovician.
- "*sheppeyense*" Davey and Williams, 1966b, p.68–69, pl.11, fig.3. Holotype: Davey and Williams, 1966b, pl.11, fig.3; Bujak et al., 1980, pl.2, figs.1–2. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Melitasphaeridium*) *pseudorecurvatum*, according to Stover and Evitt (1978, p.179). Age: early Eocene.
- "*shimizui*" Fuji in Ichikawa et al., 1964, pl.10, fig.1. **Name not validly published:** no description.
- shuangense* Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.71, pl.12, figs.15–17. Holotype: Liu Zhili et al., 1992, pl.12, fig.16. Age: Early Tertiary.
- "*sibiricum*" Timofeev, 1966, p.46–47, pl.9, fig.3. Holotype: Timofeev, 1966, pl.9, fig.3. **NOW** *Peteinosphaeridium?* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Peteinosphaeridium?* (Appendix A). This name was not validly published in Timofeev (1963, fig.1, no.12) since no description was provided. Age: Late Ordovician.
- siluricum* Pöthe de Baldis, 1981, p.243–244, pl.4, fig.2. Holotype: Pöthe de Baldis, 1981, pl.4, fig.2. This is probably an acritarch species. Age: Silurian (Ludlow).
- "*simplex*" (White, 1842, p.38, pl.4, fig.10) Deflandre, 1946a, card 934. Holotype: White, 1842, pl.4, fig.10. **NOW** *Dapsilidinium simplex*. Originally *Xanthidium tubiferum* var. *simplex* (Appendix A), subsequently *Xanthidium simplex* (Appendix A), thirdly *Hystrichosphaeridium simplex*, fourthly *Polysphaeridium? simplex*, fifthly (and now) *Dapsilidinium simplex*. Age: Late Cretaceous.
- "*simplicispinum*" Davey and Williams, 1966b, p.59–60, pl.9, fig.3. Holotype: Davey and Williams, 1966b, pl.9, fig.3. Originally *Hystrichosphaeridium*, subsequently *Kleithriasphaeridium*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Kleithriasphaeridium*) *eoinodes*, according to Below (1982c, p.17). Age: Barremian.
- "*siphoniphorum*" Cookson and Eisenack, 1958, p.44, pl.11, figs.8–10. Emendation: Lucas-Clark, 1984, p.186, as *Litosphaeridium siphoniphorum*. Holotype: Cookson and Eisenack, 1958, pl.11, fig.8; Helby et al., 1987, figs.380–P. **NOW** *Litosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Litosphaeridium*. Age: Albian–Cenomanian.
- "*speciale*" Lentin and Williams, 1981, p.147. Holotype: Merrill, 1895, text-fig.14. Originally *Geodia? irregularis* (Appendix A), subsequently *Hystrichosphaeridium irregulare* (combination illegitimate), thirdly *Hystrichosphaeridium? irregulare* (combination illegitimate), fourthly *Hystrichosphaeridium speciale*. This is the substitute name for *Hystrichosphaeridium? irregulare* (Merrill, 1895, p.16; text-fig.14) Sarjeant, 1964b, p.175 (an illegitimate name). **Taxonomic senior synonym:** *Xanthidium tubiferum* var. *complex* (now *Oligosphaeridium complex*), according to Harker and Sarjeant in Harker et al. (1990, p.59). Age: Early Cretaceous.
- "*spectabile*" Salujha et al., 1973, p.112. **Name not validly published:** no description.
- "*spiciferum*" Deunff, 1955, p.146, pl.3, fig.1; text-fig.26. Holotype: Deunff, 1955, pl.3, fig.1. **NOW** *Stellechinatum* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Veryhachium* (combination not validly published; Appendix A), thirdly *Baltisphaeridium* (Appendix A), fourthly *Evittia Brito* (combination not validly published; Appendix A), fifthly *Multiplicisphaeridium* (Appendix A), sixthly (and now) *Stellechinatum* (Appendix A). Age: Middle Devonian.
- spiculare* Jagielska, 1962a, p.62, pl.5, figs.6a–b. Holotype: Jagielska, 1962a, pl.5, fig.6a. This is probably an acritarch species. Jagielska (1962b, table 2 — p.337) also cited this species as new, but no description was provided. Age: Ordovician (Arenig–Caradoc).

"*spiculatum*" (White, 1844, p.87, pl.9, fig.4) Deflandre, 1937b, p.79. Holotype: White, 1844, pl.9, fig.4. **NOW** *Baltisphaeridium spiculatum* (Appendix A). Originally *Xanthidium tubiferum* var. *spiculatum* (Appendix A), subsequently *Hystrichosphaeridium spiculatum*, thirdly (and now) *Baltisphaeridium spiculatum* (Appendix A). Age: Late Cretaceous.

"*spinescens*" Timofeev, 1959, p.56, pl.4, fig.23. Holotype: Timofeev, 1959, pl.4, fig.23. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

?*spinipansatum* (Merrill, 1895, p.17; text-fig.20) Sarjeant, 1964b, p.175. Holotype: Merrill, 1895, text-fig.20. Originally *Geodia*? (Appendix A), subsequently *Hystrichosphaeridium*, thirdly (and now) *Hystrichosphaeridium*?. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Early Cretaceous.

"*spinosum*" (White, 1842, p.37, pl.4, fig.6) Lejeune-Carpentier, 1941, p.B76. Holotype: White, 1842, pl.4, fig.6; lost according to Sarjeant (1966b, p.141). **NOW** *Exochosphaeridium*?. Originally *Xanthidium* (Appendix A), subsequently *Hystrichosphaeridium*, thirdly *Baltisphaeridium* (Appendix A), fourthly *Cordosphaeridium* (combination not validly published), fifthly *Exochosphaeridium*, sixthly (and now) *Exochosphaeridium*?. Age: Late Cretaceous.

"var. *deflandrei*" Lejeune-Carpentier, 1941, p.B84, fig.6. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.14, as *Fibrocysta? deflandrei*. Holotype: Lejeune-Carpentier, 1941, fig.6; Lejeune-Carpentier and Sarjeant, 1981, pl.4, figs.5–6; text-fig.8. **NOW** *Fibrocysta? deflandrei*. Originally *Hystrichosphaeridium spinosum* var. *deflandrei*, subsequently *Baltisphaeridium spinosum* var. *deflandrei* (Appendix A), thirdly *Cordosphaeridium spinosum* var. *deflandrei* (combination not validly published), fourthly *Exochosphaeridium spinosum* var. *deflandrei*, fifthly *Exochosphaeridium spinosum* subsp. *deflandrei*, sixthly *Exochosphaeridium? spinosum* subsp. *deflandrei*, seventhly (and now) *Fibrocysta? deflandrei*. Age: Late Cretaceous.

"var. *spinosum*". Autonym. Holotype: White, 1842, pl.4, fig.6. **Now redundant**. Originally *Hystrichosphaeridium spinosum* var. *spinosum*, subsequently *Baltisphaeridium spinosum* var. *spinosum* (Appendix A), thirdly *Exochosphaeridium spinosum* var. *spinosum*.

"*spiralisetum*" de Wit, 1943, p.383; text-figs.2,11. Holotype: de Wit, 1943, text-figs.2,11, lost according to de Wit (personal communication to GLW). **NOW** *Impletosphaeridium*?. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*?, fourthly (and now) *Impletosphaeridium*?. Age: Late Cretaceous.

"*staurasteroides*" Deflandre, 1945a, p.63–64, pl.2, figs.7–9. Emendation: Stancliffe and Sarjeant, 1994, p.234, as *Veryhachium staurasteroides*. Holotype: Deflandre, 1945a, pl.2, fig.7. **NOW** *Veryhachium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Veryhachium* (Appendix A). This name was not validly published in Deflandre (1942, fig.10 — p.476). Age: Middle Silurian.

"*stellaeforme*" Timofeev, 1959, p.57, pl.4, fig.26. Holotype: Timofeev, 1959, pl.4, fig.26. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"?*stellatum*" Maier, 1959, p.320–321, pl.33, figs.3–4. Holotype: Maier, 1959, pl.33, fig.3; Sarjeant, 1983, pl.7, figs.1–2. **NOW** *Florentinia*. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaeridium*?, thirdly (and now) *Florentinia*, fourthly *Hystrichokolpoma*. Taxonomic senior synonym: *Hystrichokolpoma rigaudiae*, according to Sarjeant (1983, p.104) — however, Srivastava (1995, p.306) retained *Hystrichosphaeridium*? (as and now *Florentinia*) *stellatum*. Questionable assignment: Stover and Evitt (1978, p.56). Age: middle Oligocene–middle Miocene.

"?*stephanophorum*" Benedek, 1972, p.30–31, pl.9, fig.6; text-fig.10. Emendation: Benedek and Sarjeant, 1981, p.349–350, as *Araneosphaera stephanophora*. Holotype: Benedek, 1972, pl.9, fig.6. **NOW** *Araneosphaera*.

Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaeridium?*, thirdly (and now) *Araneosphaera*. Questionable assignment: Stover and Evitt (1978, p.56). Age: middle-late Oligocene.

"*stimuliferum*" Deflandre, 1939a, p.192, pl.10, fig.10. Holotype: Deflandre, 1939a, pl.10, fig.10. **NOW** *Solisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Solisphaeridium* (Appendix A), fourthly *Filisphaeridium* (combination not validly published; Appendix A), fifthly *Micrhystridium* (Appendix A). Age: Late Jurassic.

"*striatoconum*" Deflandre and Cookson, 1955, p.275, pl.2, fig.10; text-fig.36. Holotype: Deflandre and Cookson, 1955, text-fig.36. **NOW** *Conosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Litosphaeridium?*, fourthly (and now) *Conosphaeridium*. This name was not validly published in Deflandre and Cookson (1954, p.1236), who did not provide a description. Age: middle Senonian.

"*striolatum*" Deflandre, 1937b, p.72, pl.15 (al. pl.12), figs.1–2. Holotype: Deflandre, 1937b, pl.15 (al. pl.12), fig.1. **NOW** *Coronifera*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Exochosphaeridium*, fourthly (and now) *Coronifera*. Age: Late Cretaceous.

"*stylhetii*" Baksi, 1962, p.17, fig.26. Holotype: Baksi, 1962, fig.26. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A), thirdly *Hystrichosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Eocene.

"*tenuicapillata*" Wetzel, 1933b, p.42, pl.4, figs.20–22 ex Deflandre, 1937b, p.78. Holotype: Wetzel, 1933b, pl.4, fig.20. **NOW** *Areoligera*. Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium*, thirdly (and now) *Areoligera*. The name *Hystrichosphaera tenuicapillata* was not validly published in Wetzel (1933b) since the generic name *Hystrichosphaera* was not validly published until 1937. Age: Senonian.

tenuitubatum Marheinecke, 1992, p.61–62, pl.11, figs.10–11. Holotype: Marheinecke, 1986, pl.17, figs.5–6, as *Hystrichosphaeridium* sp.; Marheinecke, 1992, pl.11, figs.10–11; Fauconnier and Masure, 2004, pl.45, figs.4–5. Contrary to the opinion of Lentin and Williams (1993, p.334), Williams et al. (1998, p.316) considered this name to be validly published. Age: early Maastrichtian.

"*tiara*" Klumpp, 1953, p.390–391, pl.17, figs.8–10. Holotype: Klumpp, 1953, pl.17, figs.8–9. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cordosphaeridium*, fourthly *Cleistosphaeridium*, fifthly (and now) *Operculodinium*. N.I.A. Age: Eocene.

"*toryna*" Cookson and Eisenack, 1960b, p.252, pl.38, figs.6,15. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.15. **NOW** *Egmontodinium*. Originally *Hystrichosphaeridium*, subsequently *Prolixosphaeridium?*, thirdly *Tanyosphaeridium*, fourthly (and now) *Egmontodinium*. N.I.A. Age: Tithonian–Neocomian.

"*toyetae*" (Cramer, 1964, p.302, pl.1, figs.14–15; text-fig.22, nos.7,7a) Lardeux, 1976, p.75. Holotype: Cramer, 1964, pl.1, fig.15. **NOW** *Florisphaeridium* (Appendix A). Originally *Baltisphaeridium* (Appendix A), subsequently *Multiplicisphaeridium?* (Appendix A), thirdly *Hystrichosphaeridium*, fourthly (and now) *Florisphaeridium* (Appendix A). Age: Devonian (middle Siegenian–Emsian).

"*transculentum*" Sah et al., 1970, p.147, pl.2, figs.18–19. Holotype: Sah et al., 1970, pl.2, fig.18. **NOW** *Achomosphaera*. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaeridium?*, thirdly (and now) *Achomosphaera*. Questionable assignment: Stover and Evitt (1978, p.56) as a problematic species. Age: Late Cretaceous.

"*tribrachiosum*" Tasch in Tasch et al., 1964, p.195, pl.1, fig.3. Holotype: Tasch et al., 1964, pl.1, fig.3. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albian.

"*tridactylites*" Valensi, 1955a, p.37–38, fig.1D. Holotype: Valensi, 1955a, fig.1D. **NOW** *Florentinia*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Hystrichokolpoma* (combination not validly published), fourthly *Achomosphaera*, fifthly *Silicisphaera*, sixthly (and now) *Florentinia*. Age: Cretaceous.

"*trifurcatum*" Eisenack, 1931, p.112, pl.4, figs.21–23 ex Eisenack, 1938a, p.12,16–19. Holotype: Eisenack, 1931, pl.4, fig.21, as *Ovum hispidum* subsp. *trifurcatum* (Appendix A); Eisenack, 1938a, pl.2, fig.2, lost according to Eisenack (1959, p.202). Neotype: Eisenack, 1959, pl.17, fig.3, designated by Eisenack (1959, p.202). **NOW** *Peteinosphaeridium trifurcatum* (Appendix A). Originally *Ovum hispidum* subsp. *trifurcatum* (combination not validly published; Appendix A), subsequently *Hystrichosphaeridium trifurcatum*, thirdly *Baltisphaeridium trifurcatum* (Appendix A), fourthly (and now) *Peteinosphaeridium trifurcatum* (Appendix A). Taxonomic junior synonyms: *Peteinosphaeridium bergstroemii* Staplin et al., 1965, an acritarch species, according to Eisenack (1969b, p.254–255); *Baltisphaeridium trifurcatum* subsp. *breviradiatum* (subsequently *Peteinosphaeridium breviradiatum*), by implication in Eisenack (1969a, p.255), who considered *Baltisphaeridium trifurcatum* subsp. *breviradiatum* to have priority over *Baltisphaeridium trifurcatum* subsp. *trifurcatum*. The name *Ovum hispidum* subsp. *trifurcatum* was not validly published in Eisenack (1931) since the specific name *Ovum hispidum* was not validly published. Age: Ordovician (erratic).

"subsp. *consonum*" Sannemann, 1955, p.332, pl.5, fig.7. Holotype: Sannemann, 1955, pl.5, fig.7. **NOW** *Multiplicisphaeridium consonum* (Appendix A). Originally *Hystrichosphaeridium trifurcatum* subsp. *consonum*, subsequently *Baltisphaeridium trifurcatum* subsp. *consonum* (Appendix A), thirdly (and now) *Multiplicisphaeridium consonum* (Appendix A). Age: Devonian (late Givetian).

"subsp. *procerum*" Sannemann, 1955, p.332, pl.5, fig.8; text-fig.18. Holotype: Sannemann, 1955, pl.5, fig.8. **NOW** *Multiplicisphaeridium procerum* (Appendix A). Originally *Hystrichosphaeridium trifurcatum* subsp. *procerum*, subsequently *Baltisphaeridium trifurcatum* subsp. *procerum* (Appendix A), thirdly (and now) *Multiplicisphaeridium procerum* (Appendix A). Age: Devonian (late Givetian).

"subsp. *trifurcatum*". Autonym. Holotype: Eisenack, 1931, pl.4, fig.21, as *Ovum hispidum* subsp. *trifurcatum* (Appendix A); Eisenack, 1938a, pl.2, fig.2, lost according to Eisenack (1959, p.202). Neotype: Eisenack, 1959, pl.17, fig.3, designated by Eisenack (1959, p.202). **NOW** *Peteinosphaeridium trifurcatum* subsp. *trifurcatum* (Appendix A). Originally *Hystrichosphaeridium trifurcatum* subsp. *trifurcatum*, subsequently *Baltisphaeridium trifurcatum* subsp. *trifurcatum* (Appendix A), thirdly (and now) *Peteinosphaeridium trifurcatum* subsp. *trifurcatum* (Appendix A).

"*triplicativum*" Timofeev, 1959, p.55, pl.4, fig.16. Holotype: Timofeev, 1959, pl.4, fig.16. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

"*triradicosum*" Tasch in Tasch et al., 1964, p.194, pl.2, figs.4,14. Holotype: Tasch et al., 1964, pl.2, figs.4,14. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albanian.

trispiculare Jagielska, 1962a, p.62, pl.5, fig.5. Holotype: Jagielska, 1962a, pl.5, fig.5. This is probably an acritarch species. Age: Ordovician (Arenig–Caradoc).

"*trispinosum*" Eisenack, 1938a, p.14,16; text-figs.2–3. Emendation: Stancliffe and Sarjeant, 1994, p.233, as *Veryhachium trispinosum*. Holotype: Eisenack, 1938a, text-fig.2, lost according to Eisenack et al. (1979, p.499). Neotype: Deunff, 1980, pl.1, fig.7, designated by Stancliffe and Sarjeant (1994, p.233). **NOW** *Veryhachium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Veryhachium* (Appendix A), thirdly *Baltisphaeridium* (Appendix A), fourthly *Micrhystridium* (combination not validly published; Appendix A). Taxonomic junior synonyms: *Veryhachium cucruse* Timofeev, 1962, an acritarch species, according to Martin (1969, p.106) and *Veryhachium arctatum* Deunff, 1981, *Veryhachium concavum* Piskun, 1974a, *Veryhachium edenense* Colbath, 1979, *Veryhachium microgranuliferum* Piskun, 1974a and *Hystrichosphaeridium* (subsequently *Veryhachium*) *trisulcum*, all acritarch species, and all according to Stancliffe and Sarjeant (1994, p.233). Age: Silurian (erratic).

"*trisolcum*" Deunff, 1951, p.323, caption to text-fig.3. **Name not validly published**: no description. Originally *Hystrichosphaeridium trisolcum* (name not validly published), subsequently *Veryhachium trisolcum* (name not validly published, Appendix A), thirdly *Veryhachium trisolcum* (Appendix A), fourthly *Veryhachium trispinosum* subsp. *trisolcum* (combination not validly published; Appendix A). **Taxonomic senior synonym**: *Hystrichosphaeridium* (now *Veryhachium*) *trispinosum*, according to Stancliffe and Sarjeant (1994, p.233). Age: Middle Ordovician.

"*truncigerum*" Deflandre, 1937b, p.71–72, pl.13 (al. pl.10), figs.6–7. Holotype: Deflandre, 1937b, pl.13 (al. pl.10), fig.6. **NOW** *Raetiaedinium*. Originally *Hystrichosphaeridium*, subsequently *Litosphaeridium?*, thirdly *Cordosphaeridium*, fourthly *Exochosphaeridium*, fifthly *Pervosphaeridium*, sixthly *Tityrosphaeridium?*, seventhly *Florentinia*, eighthly *Pervosphaeridium?*, ninthly (and now) *Raetiaedinium*. Taxonomic senior synonym: *Xanthidium* (now *Hystrichokolpoma*) *crassipes*, by implication in Yun Hyesu (1981, p.27), who considered *Hystrichosphaeridium* (as *Pervosphaeridium*) *truncigerum* to be the senior synonym — however, Lentin and Williams (1985, p.282) retained *Hystrichosphaeridium* (as *Pervosphaeridium*) *truncigerum*. Taxonomic junior synonym: *Laticavodinium latispinosum* (name not validly published), according to Slimani (2001a, p.194). Age: Senonian.

truswelliae Wrenn and Hart, 1988, p.355, fig.25, nos.1–4, fig.39, no.1. Holotype: Wrenn and Hart, 1988, fig.25, nos.1–3. Age: early Eocene.

"*tshunense*" Timofeev, 1962 — caption to pl.11, fig.1. Holotype: Timofeev, 1962 pl.11, fig.1. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Middle Ordovician.

"*tuberatum*" Downie, 1958, p.338, pl.17, fig.3; text-fig.3f. Holotype: Downie, 1958, pl.17, fig.3. **NOW** *Acanthodiacrodium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Acanthodiacrodium* (Appendix A), fourthly *Vulcanisphaera* (Appendix A), fifthly *Goniosphaeridium* (Appendix A). Age: Early Ordovician.

"*tuberosum*" Sannemann, 1955, p.345, pl.4, fig.17; text-fig.16. Holotype: Sannemann, 1955, pl.4, fig.17. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Devonian (late Givetian).

**tubiferum* (Ehrenberg, 1837b, pl.1, fig.16) Deflandre, 1937b, p.68. Emendation: Davey and Williams, 1966b, p.56–58, as *Hystrichosphaeridium tubiferum*. Holotype: Ehrenberg, 1837b, pl.1, fig.16. Originally *Xanthidium tubiferum* (Appendix A), subsequently *Hystrichosphaera tubifera* (combination not validly published), thirdly (and now) *Hystrichosphaeridium tubiferum*, fourthly *Ovum hispidum* subsp. *tubiferum* (combination not validly published; Appendix A). Taxonomic junior synonym: *Xanthidium* (as *Hystrichokolpoma*) *bulbosum*, according to Stover and Evitt (1978, p.55) — however, Lentin and Williams (1989, p.134) retained *Xanthidium* (as *Hystrichokolpoma*) *bulbosum*. The validity/authorship of this name may need to be reconsidered as it appears that Ehrenberg (1837b) did not provide a description. Age: Late Cretaceous?.

subsp. *brevispinum* (Davey and Williams, 1966b, p.58, pl.10, fig.10) Lentin and Williams, 1973, p.80. Emendation: Marheinecke, 1992, p.61, as *Hystrichosphaeridium proprium* subsp. *brevispinum*. Holotype: Davey and Williams, 1966b, pl.10, fig.10; Bujak et al., 1980, pl.8, figs.10–12; Fauconnier and Masure, 2004, pl.47, figs.1–4. Originally *Hystrichosphaeridium tubiferum* var. *brevispinum*, subsequently (and now) *Hystrichosphaeridium tubiferum* subsp. *brevispinum*, thirdly *Hystrichosphaeridium proprium* subsp. *brevispinum*. Lentin and Williams (1993, p.336) retained this taxon as a subspecies of *Hystrichosphaeridium tubiferum*. Taxonomic senior synonym: *Micrhystridium* (as *Dapsilidium?*, now *Litosphaeridium*) *fucosum*, according to Below (1982c, p.29) — however, Lentin and Williams (1985, p.190) retained *Hystrichosphaeridium tubiferum* subsp. *brevispinum*. Age: early Eocene.

"var. *brevispinum*" Davey and Williams, 1966b, p.58, pl.10, fig.10. Emendation: Marheinecke, 1992, p.61, as *Hystrichosphaeridium proprium* subsp. *brevispinum*. Holotype: Davey and Williams, 1966b, pl.10, fig.10; Bujak et al., 1980, pl.8, figs.10–12; Fauconnier and Masure, 2004, pl.47, figs.1–4. **NOW** *Hystrichosphaeridium tubiferum* subsp. *brevispinum*. Originally *Hystrichosphaeridium tubiferum* var.

brevispinum, subsequently (and now) *Hystrichosphaeridium tubiferum* subsp. *brevispinum*, thirdly *Hystrichosphaeridium proprium* subsp. *brevispinum*. Taxonomic senior synonym: *Micrhystridium* (as *Dapsilidinium?*, now *Litosphaeridium*) *fucosum*, according to Below (1982c, p.29) — however, Lentin and Williams (1993, p.336) retained *Hystrichosphaeridium tubiferum* subsp. *brevispinum*. Age: early Eocene.

subsp. *ovale* Marheinecke, 1992, p.59–60, pl.10, figs.11,13–14. Holotype: Marheinecke, 1986, pl.6, figs.2–3, as *Hystrichosphaeridium tubiferum*; Marheinecke, 1992, pl.10, figs.13–14; Fauconnier and Masure, 2004, pl.47, figs.8–10. Contrary to the opinion of Lentin and Williams (1993, p.337), Williams et al. (1998, p.318) considered this name to be validly published. Age: early Maastrichtian.

subsp. *tubiferum*. Autonym. Holotype: Ehrenberg, 1837b, pl.1, fig.16.

"var. *tubiferum*". Autonym. Holotype: Ehrenberg, 1837b, pl.1, fig.16. **Now redundant.**

"*ukaiense*" Fuji in Ichikawa et al., 1964, pl.10, fig.2. **Name not validly published:** no description.

"*unituberculatum*" Tasch in Tasch et al., 1964, p.194, pl.3, fig.8. Holotype: Tasch et al., 1964, pl.3, fig.8; Eisenack and Kjellström, 1972, p.713; Fensome et al., 1995, fig.1 — p.1861. **NOW** *Kiokansium*. Originally *Hystrichosphaeridium*, subsequently *Kiokansium*. Taxonomic junior synonyms (at specific rank): *Hystrichosphaeridium recurvatum* subsp. *polypes* (as *Kiokansium polypes*), by implication in Duxbury (1983, p.49), who considered *Kiokansium polypes* to be the senior name; *Hystrichosphaeridium aruncium*, *Hystrichosphaeridium eccentricum*, *Hystrichosphaeridium entomium*, *Hystrichosphaeridium fabium*, *Hystrichosphaeridium follium*, *Hystrichosphaeridium kiowanum*, *Hystrichosphaeridium magnarmatum*, *Hystrichosphaeridium marsupium*, *Hystrichosphaeridium perovatum*, *Hystrichosphaeridium protellipticum*, *Hystrichosphaeridium replexum*, *Hystrichosphaeridium tribrachiosum*, *Hystrichosphaeridium triradicosum*, and *Hystrichosphaeridium valgum*, all according to Stover and Evitt (1978, p.267). Age: Albanian.

"*valgum*" Tasch in Tasch et al., 1964, p.192–193, pl.2, fig.10. Holotype: Tasch et al., 1964, pl.2, fig.10.

Taxonomic senior synonym: *Hystrichosphaeridium* (now *Kiokansium*) *unituberculatum*, according to Stover and Evitt (1978, p.267). Age: Albanian.

"*vasiformum*" Neale and Sarjeant, 1962, p.452, pl.20, fig.1; text-fig.8b. Holotype: Neale and Sarjeant, 1962, pl.20, fig.1; text-fig.8b; Fauconnier and Masure, 2004, pl.62, fig.4. **NOW** *Oligosphaeridium*. Originally *Hystrichosphaeridium*, subsequently (and now) *Oligosphaeridium*. Taxonomic senior synonym: *Hystrichosphaeridium* (as *Oligosphaeridium?*) *asterigerum*, according to Duxbury (1977, p.45) — however, McIntyre and Brideaux (1980, p.21) retained *Hystrichosphaeridium* (as *Oligosphaeridium*) *vasiforme*. Taxonomic junior synonym: *Hystrichosphaeridium* (as *Oligosphaeridium*) *macrotubulum*, according to McIntyre and Brideaux (1980, p.21). Age: middle Hauterivian–early Eocene.

"*veliferum*" Downie, 1958, p.340, pl.17, fig.2. Holotype: Downie, 1958, pl.17, fig.2. **NOW** *Cymatiogalea* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly (and now) *Cymatiogalea* (Appendix A). Age: Ordovician (Tremadoc).

"*venustum*" Sannemann, 1955, p.345, pl.5, fig.11; text-fig.15. Holotype: Sannemann, 1955, pl.5, fig.11. **NOW** *Hapsidopalla* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Multiplicisphaeridium* (Appendix A), fourthly (and now) *Hapsidopalla* (Appendix A). Age: Devonian (late Givetian).

?*verbinense* Courteville in Deflandre, 1946a, card 945. Holotype: Courteville in Deflandre, 1946a, card 945. Originally *Hystrichosphaeridium*, subsequently (and now) *Hystrichosphaeridium?*. Questionable assignment: Stover and Evitt (1978, p.57) as a problematic species. Age: Late Cretaceous.

"*vestitum*" Deflandre, 1939a, p.189, pl.11, figs.4–6. Emendation: Sarjeant, 1960b, p.397, as *Baltisphaeridium vestitum*. Holotype: Deflandre, 1939a, pl.11, fig.5; Fauconnier and Masure, 2004, pl.74, figs.11–12. **NOW** *Surculosphaeridium?*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Surculosphaeridium*, fourthly (and now) *Surculosphaeridium?*, fifthly *Multiplicisphaeridium?* (Appendix A), sixthly

Systematophora. Taxonomic junior synonym: *Polystephanosphaera valensii*, according to Courtinat (1989, p.173) — however, Stancliffe and Sarjeant (1990, p.209) retained *Polystephanosphaera* (as and now *Systematophora*) *valensii*. Age: Oxfordian.

viticulosum Andreeva, 1966, p.131–132, pl.21, fig.1. Holotype: Andreeva, 1966, pl.21, fig.1. This is probably an acritarch species. Age: Middle Ordovician.

vitile Andreeva, 1966, p.132, pl.23, fig.1. Holotype: Andreeva, 1966, pl.23, fig.1. This is probably an acritarch species. Age: Middle Ordovician.

"westii" Deflandre in West, 1961, p.452. **Name not validly published:** no description or illustration. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Operculodinium*) *israelianum*, according to Wall and Dale (1968a, p.315, as hystrichosphere type "x" of West). Head (1998a, p.216) considered this to be equivalent to the "*Operculodinium centrocarpum/israelianum* complex". Age: early Pleistocene.

"whitei" Deflandre and Courteville, 1939, p.103, pl.3, figs.5–6. Emendation: Monteil, 1991a, p.444, as *Cometodinium? whitei*. Holotype: Deflandre and Courteville, 1939, pl.3, fig.5, lost according to Monteil (1991a, p.439). Neotype: Monteil, 1991a, pl.2, figs.1a–c; pl.3, fig.9, designated by Monteil (1991a, p.444); Fauconnier and Masure, 2004, pl.16, figs.7–8. **NOW** *Cometodinium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Impletosphaeridium*, fourthly *Comasphaeridium* (Appendix A), fifthly *Cometodinium?*, sixthly (and now) *Cometodinium*. Age: Senonian.

"williereae" Martin, 1966a, p.389–391, pl.1, fig.23; text-figs.33–34. Holotype: Martin, 1966a, pl.1, fig.23. **NOW** *Dilatisphaera* (Appendix A). Originally *Hystrichosphaeridium*, subsequently *Dilatisphaera* (combination not validly published; Appendix A), thirdly *Palaeohystrichosphaeridium* (Appendix A), fourthly (and now) *Dilatisphaera*. Taxonomic junior synonym: *Ozotobrachion? podolicus* Sheshegova, 1973, an acritarch species, according to Kiryanov (1978, p.90). Age: Silurian (Llandovery).

"wimanii" Eisenack, 1968, p.92, pl.24, figs.1–3. Holotype: Eisenack, 1968, pl.24, fig.2. **NOW** *Palaeohystrichosphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Palaeohystrichosphaeridium* (Appendix A). Age: Silurian (Llandovery).

"?xanthiopyxides" Wetzel, 1933b, p.44–45; pl.4, fig.25 ex Deflandre, 1937b, p.77. Emendations: Morgenroth, 1968, p.556, as *Hystrichosphaeridium? xanthiopyxides*; Sarjeant, 1985b, p.142–144, as *Tanyosphaeridium xanthiopyxides*. Holotype: Wetzel, 1933b, pl.4, fig.25, Morgenroth, 1968, pl.48, fig.5; Sarjeant, 1985b, pl.3, figs.2–3; Dietz et al., 1999, fig.10, no.8. **NOW** *Tanyosphaeridium*. Originally *Hystrichosphaera* (name not validly published), subsequently *Hystrichosphaeridium*, thirdly *Hystrichosphaeridium?*, fourthly *Baltisphaeridium* (Appendix A), fifthly *Prolixosphaeridium?*, sixthly (and now) *Tanyosphaeridium*. Taxonomic junior synonym: *Hystrichosphaeridium* (as *Tanyosphaeridium*) *magdali*, according to Stover and Evitt (1978, p.85). Questionable assignment: Morgenroth (1968, p.556). This name was not validly published in Wetzel (1933b) since the generic name *Hystrichosphaera* was not validly published until 1937. Age: Late Cretaceous (?Maastrichtian, according to Sarjeant, 1985b, p.143).

"var. **granulosum**" Deflandre, 1937b, p.77, pl.16 (al. pl.13), fig.4. Holotype: Deflandre, 1937b, pl.16 (al. pl.13), fig.4; Fauconnier and Masure, 2004, pl.66, fig.4. **NOW** *Prolixosphaeridium granulosum*. Originally *Hystrichosphaeridium xanthiopyxides* var. *granulosum*, subsequently *Baltisphaeridium xanthiopyxides* var. *granulosum* (combination not validly published; Appendix A), thirdly *Baltisphaeridium granulosum* (Appendix A), fourthly (and now) *Prolixosphaeridium granulosum*. Taxonomic junior synonyms (at specific rank): *Baltisphaeridium pilosum* var. *longispinosum* (as *Tenua pilosa* subsp. *longispinosa*), according to Sarjeant (1976c, p.19) — however, Erkmen and Sarjeant (1980, p.64–65) considered *Baltisphaeridium pilosum* var. *longispinosum* to be a taxonomic junior synonym (at specific rank) of *Prolixosphaeridium anasillum*, not of *Hystrichosphaeridium xanthiopyxides* var. *granulosum* (as *Prolixosphaeridium granulosum*); *Prolixosphaeridium anasillum*, according to Lentin and Williams (1993, p.539) — however, this synonymy was based on a mis-reading of Erkmen and Sarjeant (1980). Age: Senonian.

"var. *parvispinum*" Deflandre, 1937b, p.77, pl.16 (al. pl.13), fig.5. Holotype: pl.16 (al. pl.13), fig.5; Fauconnier and Masure, 2004, pl.66, figs.5–6. **NOW** *Prolixosphaeridium parvispinum*. Originally *Hystrichosphaeridium? xanthiopyxides* var. *parvispinum*, subsequently *Hystrichosphaeridium parvispinum*, thirdly *Baltisphaeridium parvispinum* (Appendix A), fourthly (and now) *Prolixosphaeridium parvispinum*. Taxonomic junior synonyms (at specific and varietal ranks): *Prolixosphaeridium elongatum*, according to Lentin and Williams (1985, p.294); *Prolixosphaeridium deirense*, according to Davey and Verdier (1974, p.636–637) — however, Harding (1990b, p.46) retained *Prolixosphaeridium deirense*. Age: late Aptian.

"var. *xanthiopyxides*". Autonym. Holotype: Wetzel, 1933b, pl.4, fig.25; Morgenroth, 1968, pl.48, fig.5; Sarjeant, 1985b, pl.3, figs.2–3. **Now redundant.**

"*xipheum*" (Maier, 1959, p.309, pl.30, fig.5) Sarjeant, 1964b, p.176. Holotype: Maier, 1959, pl.30, fig.5. Originally *Galea* (generic name illegitimate), subsequently *Hystrichosphaeridium*, thirdly *Hystrichokolpoma?*. **Taxonomic senior synonym:** *Hystrichokolpoma rigaudiae*, according to Sarjeant (1983, p.104). Age: middle Miocene.

"*zoharyi*" Rossignol, 1962, p.132, pl.2, fig.10. Holotype: Rossignol, 1962, pl.2, fig.10. **NOW** *Polysphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium?* (combination not validly published), thirdly *Hemicystodinium*, fourthly (and now) *Polysphaeridium*. Taxonomic junior synonyms: *Polysphaeridium subtile*, according to Islam (1983b, p.343) — however, Lentin and Williams (1989, p.300) retained *Polysphaeridium subtile*; *Tenua* (as *Hemicystodinium?*) *taugourdeau*, according to Lentin and Williams (1981, p.26,127) — however, *Tenua taugourdeau* is now considered a taxonomic junior synonym of *Polysphaeridium subtile*; *Membranilarnacia delicata*, according to Jain and Garg (1991, p.82). Motile equivalents: *Pyrodinium bahamense* Plate, 1906, according to Wall and Dale (1969, p.140); *Pyrodinium bahamense* forma *compressum* Böhm, 1931, according to Matsuoka (1989, p.220). Age: Pleistocene.

"var. *ktana*" Rossignol, 1964, p.88, pl.2, figs.6–7,10; pl.3, fig.11. Holotype: Rossignol, 1964, pl.2, fig.7. **NOW** *Polysphaeridium zoharyi* subsp. *ktana*. Originally *Hystrichosphaeridium zoharyi* var. *ktana*, subsequently *Hemicystodinium zoharyi* var. *ktana* (combination not validly published), thirdly *Hemicystodinium zoharyi* subsp. *ktana*, fourthly (and now) *Polysphaeridium zoharyi* subsp. *ktana*, fifthly *Polysphaeridium subtile* subsp. *ktana*. Taxonomic junior synonym (at subspecific rank): *Hystrichosphaeridium? breviatum*, according to Islam (1983b, p.343) — however, Masure and Foucher in Fauconnier and Masure (2004, p.309–310) retained *Hystrichosphaeridium? breviatum*. Age: Pleistocene.

"var. *zoharyi*". Autonym. Holotype: Rossignol, 1962, pl.2, fig.10. **Now redundant.**

"*zonale*" Timofeev, 1959, p.55, pl.4, fig.19. Holotype: Timofeev, 1959, pl.4, fig.19. **NOW** *Baltisphaeridium* (Appendix A). Originally *Hystrichosphaeridium*, subsequently (and now) *Baltisphaeridium* (Appendix A). Age: Early Ordovician.

HYSTRICHOSPHAERINA Alberti, 1961, p.38. Emendation: Stancliffe and Sarjeant, 1990, p.204. Taxonomic senior synonym: *Systematophora*, by implication in Downie and Sarjeant (1965, p.146) who transferred the "type species" of *Hystrichosphaerina*, *Hystrichosphaerina schindewolfii*, to *Systematophora* — however, Stover and Evitt (1978, p.57–58) and Stancliffe and Sarjeant (1990, p.204) retained *Hystrichosphaerina*. Taxonomic junior synonym: *Polystephanephorus*, according to Duxbury (1980, p.125–126) — however, Lentin and Williams (1981, p.232) retained *Polystephanephorus*. Type: Alberti, 1961, pl.10, figs.2–3, as *Hystrichosphaerina schindewolfii*.

"*anthophora*" (Cookson and Eisenack, 1958, p.43, pl.11, figs.12–13; text-figs.16–18) Duxbury, 1980, p.126. Holotype: Cookson and Eisenack, 1958, pl.11, fig.12. **NOW** *Stiphrosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Oligosphaeridium*, thirdly *Polystephanephorus*, fourthly *Hystrichosphaerina*, fifthly (and now) *Stiphrosphaeridium*. Taxonomic junior synonym: *Hystrichosphaerina schindewolfii*, according to Davey (1979c, p.65) — however, Lentin and Williams (1981, p.150) retained *Hystrichosphaerina schindewolfii*. Age: Aptian–Albian.

"*calatha*" (Sarjeant, 1961a, p.104, pl.14, fig.7; text-fig.7) Duxbury, 1980, p.126. Emendation: Stancliffe and Sarjeant, 1990, p.205, as *Polystephanephorus calathus*. Holotype: Sarjeant, 1961a, pl.14, fig.7; text-fig.7; Stancliffe

and Sarjeant, 1990, pl.2, figs.1,4; text-fig.1. **NOW** *Polystephanephorus*. Originally *Polystephanosphaera*, subsequently (and now) *Polystephanephorus*, thirdly *Hystrichosphaerina*. Age: early Oxfordian.

crusta Dodekova, 1992, p.43, pl.3, figs.1–3,6,9. Holotype: Dodekova, 1992, pl.3, figs.1–3. Age: early–late Kimmeridgian.

"**exilimura**" (Davey and Williams, 1966b, p.87, pl.11, fig.2) Sarjeant, 1981, p.122. Holotype: Davey and Williams, 1966b, pl.11, fig.2; Bujak et al., 1980, pl.7, figs.4–5. Originally *Cordosphaeridium*, subsequently *Hystrichosphaerina*?, thirdly *Tityrosphaeridium*?. Questionable assignment: Sarjeant (1981, p.122). **Taxonomic senior synonym:** *Cordosphaeridium fibrospinosum*, according to Fensome et al. (2009, p.23). Taxonomic junior synonym: *Achomosphaera* (subsequently *Cordosphaeridium*) *valianta*, according to Jain (1982, p.52). Age: early Eocene.

neuquina Quattrocchio and Volkheimer, 1983, p.40,42, pl.B, figs.11–12; pl.G, figs.37–40. Emendation: Quattrocchio and Sarjeant, 1992, p.77 (al. 2–229). Holotype: Quattrocchio and Volkheimer, 1983, pl.B, fig.11; pl.G, figs.37–38. Age: Late Jurassic.

?**orbifera** (Klement, 1960, p.66–67, pl.9, figs.9–10; pl.10, fig.7) Stover and Evitt, 1978, p.58. Holotype: Klement, 1960, pl.9, fig.9; Stancliffe and Sarjeant, 1990, pl.5, fig.2; Fauconnier and Masure, 2004, pl.48, figs.1–2. Originally *Systematophora*, subsequently *Hystrichosphaerina*, thirdly (and now) *Hystrichosphaerina*?. Questionable assignment: Courtinat in Fauconnier and Masure (2004, p.333–334). Age: middle Oxfordian.

"**paracalatha**" (Sarjeant, 1960a, p.143–144, pl.6, fig.4; text-fig.3b) Duxbury, 1980, p.126. Emendation: Stancliffe and Sarjeant, 1990, p.206, as *Polystephanephorus paracalathus*. Holotype: Sarjeant, 1960a, pl.6, fig.4; text-fig.3b; Stancliffe and Sarjeant, 1990, pl.2, figs.2,3,5; text-fig.2. **NOW** *Polystephanephorus*. Originally *Polystephanosphaera*, subsequently (and now) *Polystephanephorus*, thirdly *Hystrichosphaerina*. Age: middle Callovian.

"**sarjeantii**" (Gitmez, 1970, p.291–292, pl.11, fig.4; text-fig.25) Duxbury, 1980, p.126. Holotype: Gitmez, 1970, pl.11, fig.4; text-fig.25; Fauconnier and Masure, 2004, pl.26, fig.7. **NOW** *Emmetrocyta*. Originally *Polystephanephorus*, subsequently (and now) *Emmetrocyta*, thirdly *Hystrichosphaerina*, fourthly *Stiphrosphaeridium*. Age: early Kimmeridgian.

***schindewolfii** Alberti, 1961, p.38–39, pl.10, figs.1–3,6–7. Holotype: Alberti, 1961, pl.10, figs.2–3; Eisenack and Kjellström, 1972, p.1009; Fensome et al., 1995, figs.2–3 — p.1765. Originally (and now) *Hystrichosphaerina*, subsequently *Systematophora*, thirdly *Polystephanephorus*. Lentin and Williams (1985, p.191) retained this species in *Hystrichosphaerina*. Taxonomic senior synonym: *Hystrichosphaeridium* (as *Oligosphaeridium*) *anthophorum*, according to Davey (1979c, p.65) — however, Lentin and Williams (1981, p.150) retained *Hystrichosphaerina schindewolfii*. Taxonomic junior synonym: *Perisseiasphaeridium eisenackii*, according to Davey and Verdier (1974, p.640). Age: late Barremian–Turonian.

turonica Alberti, 1961, p.39, pl.10, figs.4a–b. Holotype: Alberti, 1961, pl.10, figs.4a–b. Originally (and now) *Hystrichosphaerina*, subsequently *Systematophora*, thirdly *Polystephanephorus*. Stancliffe and Sarjeant (1990, p.204) retained this species in *Hystrichosphaerina*. Age: Turonian.

varians (May, 1980, p.68–69, pl.7, figs.12–16) Lentin and Williams, 1981, p.150. Holotype: May, 1980, pl.7, figs.12–14. Originally *Systematophora*, subsequently (and now) *Hystrichosphaerina*. Age: Campanian.

?**varispinosa** (Brenner, 1988, p.87–88, pl.16, figs.2a–c,5a–b) Stancliffe and Sarjeant, 1990, p.204. Holotype: Brenner, 1988, pl.16, figs.2a–c. Originally *Systematophora*, subsequently (and now) *Hystrichosphaerina*?. Questionable assignment: Stancliffe and Sarjeant (1990, p.204); and Courtinat in Fauconnier and Masure (2004, p.334) as a problematic species. Age: Oxfordian–early Kimmeridgian.

HYSTRICHOSPHAEROPSIS Deflandre, 1935, p.232. Emendations: Sarjeant, 1966b, p.138; Gocht, 1976, p.331–333; Sarjeant, 1982b, p.47. Originally (and now) *Hystrichosphaeropsis*, subsequently *Hystrichosphaera* subgenus

Hystrichosphaeropsis. Eisenack (1963c, p.118) retained *Hystrichosphaeropsis* at generic rank. Taxonomic senior synonym: *Triblastula*, according to Yun Hyesu (1981, p.22) — however, Jan du Chêne et al. (1986a, p.158) retained *Hystrichosphaeropsis*. Taxonomic junior synonym: *Rottnestia*, according to Sarjeant (1966b, p.139) — however, Jan du Chêne et al. (1986a, p.309) retained *Rottnestia*. Type: Deflandre, 1935, pl.8, fig.11, as *Hystrichosphaeropsis ovum*.

arctica Matsuoka and Bujak, 1988, p.47–48, pl.5, figs.1a–b,2a–b,3,4a–b. Holotype: Matsuoka and Bujak, 1988, pl.5, figs.1a–b. Age: late Miocene.

"*borussica*" (Eisenack, 1954b, p.62, pl.9, figs.5a–b,6–7) Sarjeant, 1966b, p.139. Holotype: Eisenack, 1954b, pl.9, fig.5a–b. **Combination not validly published:** basionym not fully referenced. **NOW** *Rottnestia*. Originally *Hystrichosphaera*, subsequently (and now) *Rottnestia*, thirdly *Triblastula*, fourthly *Hystrichosphaeropsis* (combination not validly published). Taxonomic junior synonym: *Hystrichosphaeropsis jubata* (name not validly published), according to May (1980, p.24). Age: early Oligocene.

complanata Eisenack, 1965b, p.153–154, pl.14, figs.5a–b,6–7; pl.15, figs.5a–b; text-figs.2a–b,3. Holotype: Eisenack, 1965b, pl.14, figs.5a–b; text-figs.2a–b; Jan du Chêne et al., 1986a, pl.46, figs.2–3 and pl.48, figs.1–3. Age: late Eocene–early Oligocene.

costae Bujak, 1994, p.125, pl.3, figs.1–4. Holotype: Bujak, 1994, pl.3, figs.1–3. Age: Ypresian–Lutetian.

"*downiei*" (Pocock, 1972, p.87, pl.22, figs.1–2; text-fig.2) Stover and Evitt, 1978, p.164. Holotype: Pocock, 1972, pl.22, figs.1–2; Jan du Chêne et al., 1986a, pl.97, figs.7–12. Originally *Gonyaulacysta*, subsequently *Hystrichosphaeropsis*, thirdly *Rhynchodiniopsis?*, fourthly *Rhynchodiniopsis*. **Taxonomic senior synonym:** *Gonyaulax* (as *Hystrichogonyaulax cladophora*, according to Fisher and Riley (1980, p.320) and Kunz (1990, p.23)). Age: Oxfordian–Kimmeridgian.

"*forficata*" Wilson in Slimani, 1994, p.59. **Name not validly published:** no description or illustration. **Taxonomic senior synonym:** *Hystrichosphaera* (now *Rottnestia*) *wetzeli*, according to Slimani (2001a, p.194).

galeata (Cookson and Eisenack, 1960a, p.3–4, pl.1, figs.16–18) Gocht, 1976, p.332. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.16; Jan du Chêne et al., 1986a, pl.48, figs.11–13; Helby et al., 1987, fig.38L. Originally *Scriniodinium*, subsequently *Psaligonyaulax*, thirdly (and now) *Hystrichosphaeropsis*. Age: Albian–Cenomanian.

irisiae (Kjellström, 1973, p.40–42, fig.34) Gocht, 1976, p.333. Holotype: Kjellström, 1973, fig.34; Jan du Chêne et al., 1986a, pl.46, fig.8. Originally *Scriniodinium?*, subsequently (and now) *Hystrichosphaeropsis*. Age: middle-late Maastrichtian.

"*jubata*" Wilson in May, 1980, p.24. **Name not validly published:** no description or illustration. **Taxonomic senior synonym:** *Hystrichosphaera* (as *Triblastula*, now *Rottnestia*) *borussica*, according to May (1980, p.24). Taxonomic senior synonym (at subspecific rank): *Rottnestia wetzeli* subsp. *brevispinosa*, according to Slimani (1994, p.58) — however, Slimani did not acknowledge the synonymy of *Hystrichosphaeropsis jubata* with *Hystrichosphaera* (now *Rottnestia*) *borussica* by May (1980).

"*minimum*" Zevenboom and Santarelli in Zevenboom, 1995, p.144, pl.5, figs.5,7,9. Holotype: Zevenboom, 1995, pl.5, figs.5,7,9. **Name not validly published:** considered a manuscript name. Age: latest late Oligocene–early Miocene.

"*nuda*" (Wetzel, 1961, p.340, pl.2, fig.2) Sarjeant, 1985b, p.140. Holotype: Wetzel, 1961, pl.2, fig.2. Originally *Triblastula*, subsequently *Hystrichosphaeropsis*. **Taxonomic senior synonym:** *Triblastula* (as *Hystrichosphaeropsis*) *quasicribrata*, according to Marheinecke (1992, p.44). Age: ?Late Cretaceous (erratic).

obscura Habib, 1972, p.379–380, pl.21, figs.1–3. Holotype: Habib, 1972, pl.21, fig.1. Age: late Miocene.

***ovum** Deflandre, 1935, p.232, pl.8, fig.11. Holotype: Deflandre, 1935, pl.8, fig.11; Jan du Chêne et al., 1986a, pl.46, fig.1. Originally (and now) *Hystrichosphaeropsis*, subsequently *Hystrichosphaera*. Lentin and Williams (1973, p.81) retained this species in *Hystrichosphaeropsis*. N.I.A. Age: Senonian.

perforata Schiøler, 1993, p.106, pl.2, figs.4–8; text-fig.3. Holotype: Schiøler, 1993, pl.2, fig.4; text-fig.3. Age: late Maastrichtian.

pontiana (Balteş, 1969, p.35–36, pl.3, fig.15 ex Lentin and Williams, 1973, p.123) Stover and Evitt, 1978, p.164. Holotype: Balteş, 1969, pl.3, fig.15, designated by Lentin and Williams (1973, p.123). Originally *Scriniodinium*, subsequently (and now) *Hystrichosphaeropsis*. The name *Scriniodinium pontianum* was not validly published in Balteş (1969, p.35), since that author considered the name to be a provisional designation. Age: early Pliocene.

quasicribrata (Wetzel, 1961, p.340, pl.2, fig.3) Gocht, 1976, p.322. Holotype: Wetzel, 1961, pl.2, fig.3; Sarjeant, 1985b, pl.2, fig.1; Jan du Chêne et al., 1986a, pl.46, figs.9–10; Dietz et al., 1999, fig.10, no.9. Originally *Triblastula*, subsequently (and now) *Hystrichosphaeropsis*. Taxonomic junior synonyms: *Deflandrea rectangularis* var. *samuelsonii* (as *Amphidiadema rectangularis* subsp. *samuelsonii*), according to Gocht (1976, p.322); *Triblastula nuda* and *Triblastula tubulata*, both according to Marheinecke (1992, p.44). Contrary to the opinion of Stover and Evitt (1978, p.94), Gocht (1976, p.322) did not consider this species to be the taxonomic senior synonym of *Amphidiadema rectangularis*, but only the specimen identified by Kjellström (1973, fig.17). Age: ?Late Cretaceous (erratic).

rectangularis Bujak in Bujak et al., 1980, p.66, pl.16, figs.10–12; text-fig.15. Holotype: Bujak et al., 1980, pl.16, figs.10–12; Jan du Chêne et al., 1986a, pl.48, figs.8–10. Age: middle Eocene (see Aubry, 1986).

somphosa Warny and Wrenn, 1997, p.284,286–287, pl.1, figs.1–6; pl.2, figs.5–10. Holotype: Warny and Wrenn, 1997, pl.1, figs.1–4. Age: late Miocene (Messinian).

"tubulata" (Wetzel, 1961, p.340, pl.2, fig.4) Sarjeant, 1985b, p.140. Holotype: Wetzel, 1961, pl.2, fig.4. Originally *Triblastula*, subsequently *Hystrichosphaeropsis*. **Taxonomic senior synonym:** *Triblastula* (as *Hystrichosphaeropsis*) *quasicribrata*, according to Marheinecke (1992, p.44). Age: ?Late Cretaceous (erratic).

variabilis Matsuoka and Bujak, 1988, p.49–50, pl.5, figs.5a–b,6–8; text-fig.8. Holotype: Matsuoka and Bujak, 1988, pl.5, figs.5a–b; text-fig.8. Age: late Miocene.

"wetzelii" (Deflandre, 1937b, p.65, pl.11 [al. pl.8], figs.6,8) Sarjeant, 1966b, p.139. Holotype: Deflandre, 1937b, pl.11 (al. pl.8), figs.6,8. **Combination not validly published:** basionym not fully referenced. **NOW** *Rottnestia*. Originally *Hystrichosphaera*, subsequently *Hystrichosphaeropsis* (combination not validly published), thirdly *Spiniferites*, fourthly (and now) *Rottnestia*. Taxonomic junior synonym: *Hystrichosphaeropsis forficata* (name not validly published), according to Slimani (2001a, p.194). Age: Senonian.

HYSTRICHOSTROGYLON Agelopoulos, 1964, p.673–674. Emendation: Stover and Evitt, 1978, p.164. Taxonomic senior synonym: *Achomosphaera*, by implication in Eaton (1976, p.237), who transferred the "type species" of *Hystrichostrogylon*, *Hystrichostrogylon membraniphorum*, to *Achomosphaera* — however, Stover and Evitt (1978, p.165) retained *Hystrichostrogylon*. Taxonomic junior synonym: *Diphasiosphaera*, according to Stover and Williams (1987, p.81). Type: Agelopoulos, 1964, text-fig.1, as *Hystrichostrogylon membraniphorum*.

borisii Schiøler, 1993, p.106,108, pl.1, figs.7–9; pl.2, figs.1–3. Holotype: Schiøler, 1993, pl.1, fig.7. Age: latest Maastrichtian–early Danian.

clausenii Bujak, 1994, p.125,127, pl.1, figs.4–6. Holotype: Bujak, 1994, pl.1, figs.4–6. Age: Ypresian–Lutetian.

coninckii Heilmann-Clausen in Thomsen and Heilmann-Clausen, 1985, p.353,355, pl.7, figs.9–12; text-figs.10A–F. Holotype: Thomsen and Heilmann-Clausen, 1985, pl.7, figs.9–10; text-figs.10C–D. Taxonomic junior synonyms: *Hystrichostrogylon palliatum*, according to Marheinecke (1992, p.37); *Spiniferites palliatus* (name not validly published), according to Slimani (2001a, p.193). Age: Maastrichtian–Paleocene.

holohyemenium Islam, 1983a, p.238,240, pl.3, figs.5–7 (not 4–6 as indicated by Islam, 1983a, p.238); text-fig.3. Holotype: Islam, 1983a, pl.3, fig.5 (not 4 as indicated by Islam, 1983a, p.238). Age: early Eocene.

***membraniphorum** Agelopoulos, 1964, p.674; text-figs.1–2. Emendation: Eaton, 1976, p.237, as *Achomosphaera membraniphora*. Holotype: Agelopoulos, 1964, text-fig.1. Originally (and now) *Hystrichostrogylon*, subsequently *Achomosphaera*. Stover and Evitt (1978, p.165) retained this species in *Hystrichostrogylon*. Age: late Eocene.

subsp. **granulatum** Heilmann-Clausen in Heilmann-Clausen and Costa, 1989, p.468, pl.18, figs.1–3. Holotype: Heilmann-Clausen and Costa, 1989, pl.18, fig.3. Age: early Eocene.

subsp. **membraniphorum**. Autonym. Holotype: Agelopoulos, 1964, text-fig.1.

"**palliatum**" Hultberg, 1985c, p.131–132, pl.7, figs.I–J. Holotype: Hultberg, 1985c, pl.7, fig.I. **Taxonomic senior synonym:** *Hystrichostrogylon coninckii*, according to Marheinecke (1992, p.37). Age: late Maastrichtian–Danian.

robustum Pearce, 2010, p.52–53, pl. 5, figs.4–7. Holotype: Pearce, 2010, pl.5, figs.4–7. Age: late Turonian to mid–early Campanian.

stolidotum (Duxbury, 1980, p.116–117, pl.1, figs.5–9; text-fig.6) Stover and Williams, 1987, p.81. Emendation: Harding, 1990b, p.29, as *Hystrichostrogylon stolidotum*. Holotype: Duxbury, 1980, pl.1, fig.5; text-fig.6; Fensome et al., 1995, figs.1,3 — p.1803. Originally *Diphasiosphaera*, subsequently (and now) *Hystrichostrogylon*. Age: middle Barremian.

sulcatum Guerstein et al., 2004, p.332,336, figs.4a–f,5a–1,6a–c. Holotype: Guerstein et al., 2004, figs.4a–b,5a–c. Age: late Oligocene to early Miocene.

IFECYSTA Jan du Chêne and Adediran, 1985, p.20. Emendation: Antolinez-Delgado and Oboh-Ikuenobe, 2007, p.55. Type: Jan du Chêne and Adediran, 1985, pl.15, figs.1–2; text-figs.6a–b, as *Ifecysta pachyderma*.

fusiforma Antolinez-Delgado and Oboh-Ikuenobe, 2007, p.58, pl.1, figs.1–3. Holotype: Antolinez-Delgado and Oboh-Ikuenobe, 2007, pl.1, fig.1. Age: Paleocene–?earliest Eocene.

heterospinosa Antolinez-Delgado and Oboh-Ikuenobe, 2007, p.58–60, pl.1, fig.7; pl.2, fig.5. Holotype: Antolinez-Delgado and Oboh-Ikuenobe, 2007, pl.1, fig.7. Age: Paleocene–?earliest Eocene.

lappacea (Drugg, 1970b, p.812–813, figs.4A–D,5A–D) Antolinez-Delgado and Oboh-Ikuenobe, 2007, p.60. Holotype: Drugg, 1970b, figs.4A–D. Originally *Lanternosphaeridium*, subsequently *Fibrocysta*, thirdly (and now) *Ifecysta*. Age: early Eocene.

***pachyderma** Jan du Chêne and Adediran, 1985, p.20, pl.15, figs.1–11; text-figs.6a–6i. Holotype: Jan du Chêne and Adediran, 1985, pl.15, figs.1–2; text-figs.6a–b; Fensome et al., 1995, figs.1–2,6–7 — p.1637. Age: late Paleocene–early Eocene.

IMBATODINIUM Vozzhennikova, 1967, p.52–53. Emendations: Dörhöfer and Davies, 1980, p.36–37; Mehrotra and Sarjeant, 1984a, p.215; Lentin and Vozzhennikova, 1990, p.86–87. Taxonomic senior synonym: *Pareodinia*, according to Wiggins (1975, p.103) and Below (1990, p.64) — however, Dörhöfer and Davies (1980, p.36) and Lentin and Williams (1993, p.345) retained *Imbatodinium*. Taxonomic junior synonyms: *Batioladinium*, according to Dörhöfer and Davies (1980, p.36) — however, Lentin and Williams (1985, p.35) retained *Batioladinium*; *Necrobroomea*, according to Dörhöfer and Davies (1980, p.36) and by implication in Below (1990, p.52), who considered *Necrobroomea* to be the taxonomic senior synonym (see discussion under *Necrobroomea*). Type: Vozzhennikova, 1967, pl.9, figs.4–5; pl.10, figs.1a–b, as *Imbatodinium kondratjevii*.

"antennatum" Gitmez and Sarjeant, 1972, p.232–233, pl.11, figs.2–3. Holotype: Gitmez and Sarjeant, 1972, pl.11, figs.2–3. **NOW** *Gochteodinia*. Originally *Imbatodinium*, subsequently *Pareodinia*, thirdly (and now) *Gochteodinia*. Age: early–late Kimmeridgian.

"exiguum" (Alberti, 1961, p.26–27, pl.5, fig.14) Dörhöfer and Davies, 1980, p.37. Holotype: Alberti, 1961, pl.5, fig.14. **NOW** *Batioladinium?*. Originally *Broomea*, subsequently (and now) *Batioladinium?*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Below (1990, p.53) suggested that this species may be simply a smooth variant of *Batioladinium?* (as *Necrobroomea*) *pelliferum* (Alberti, 1961) Brideaux, 1975. Age: early Hauterivian.

"fractum" Mehrotra and Sarjeant, 1984a, p.217–218, pl.1, figs.1–7; pl.2, figs.1–7; text-figs.1a–e. Holotype: Mehrotra and Sarjeant, 1984a, pl.1, fig.1; pl.2, fig.7; text-figs.1a–e. Originally *Imbatodinium*, subsequently *Batioladinium*. **Taxonomic senior synonym:** *Broomea* (as *Necrobroomea*) *micropoda*, according to Below (1990, p.56). Age: Aptian.

"gochtii" (Alberti, 1961, p.27, pl.5, figs.8–10,?16) Dörhöfer and Davies, 1980, p.37. Holotype: Alberti, 1961, pl.5, fig.8. **NOW** *Batioladinium?*. Originally *Broomea*, subsequently (and now) *Batioladinium?*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Taxonomic junior synonyms: *Batioladinium pomum* and *Aprobolocysta* (as *Batioladinium varigranosa*, both according to Below (1990, p.53). Age: Valanginian–?Hauterivian.

"imbatodinense" Vozzhennikova, 1967, p.55, pl.12, figs.4a–c. Emendation: Lentin and Vozzhennikova, 1990, p.91–92, as *Protobatioladinium imbatodinense*. Holotype: Vozzhennikova, 1967, pl.12, fig.4a; Lentin and Vozzhennikova, 1990, pl.11, figs.9–11; text-fig.50. **NOW** *Protobatioladinium*. Originally *Imbatodinium*, subsequently *Necrobroomea?*, thirdly *Pareodinia*, fourthly *Pareodinia?*, fifthly *Batioladinium*, sixthly (and now) *Protobatioladinium*, seventhly *Gochteodinia*. Age: Late Jurassic.

?inflatum Harker and Sarjeant in Harker et al., 1990, p.36–37, pl.2, figs.3–4; text-fig.17 ex Harker and Sarjeant, 1991, p.708. Holotype: Harker et al., 1990, pl.2, fig.4; text-fig.17. Questionable assignment: Harker and Sarjeant in Harker et al. (1990, p.36). This name was not validly published in Harker et al. (1990) since the lodgement of the holotype was not cited (I.C.N. Article 40.7). Age: Campanian.

"jaegeri" (Alberti, 1961, p.26, pl.5, figs.1–7) Dörhöfer and Davies, 1980, p.37. Emendation: Below, 1990, p.53–54, as *Necrobroomea jaegeri*. Holotype: Alberti, 1961, pl.5, fig.2; Eisenack and Klement, 1964, p.67; Fensome et al., 1995, fig.2 — p.1571. **NOW** *Batioladinium*. Originally *Broomea*, subsequently (and now) *Batioladinium*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Taxonomic junior synonym: *Pseudoceratium gochtii* Pocock (subsequently *Pseudoceratium hansgochtii*), according to Singh (1971, p.320). Age: late Barremian.

***kondratjevii** Vozzhennikova, 1967, p.55, pl.9, figs.1,2a–c,3–9; pl.10, figs.1a–b,2a–b,3a–b,4–6; pl.11, figs.1a–e,2a–b,3; pl.15, figs.3–4. Emendations: Dörhöfer and Davies, 1980, p.37 and Lentin and Vozzhennikova, 1990, p.88–89, both as *Imbatodinium kondratjevii*; Below, 1990, p.68, as *Pareodinia kondratjevii*. Holotype: Vozzhennikova, 1967, pl.9, figs.4–5; pl.10, figs.1a–b; Lentin and Vozzhennikova, 1990, pl.11, figs.1–2; text-figs.48a–b. Originally (and now) *Imbatodinium*, subsequently *Pareodinia*. Lentin and Williams (1993, p.346) retained this species in *Imbatodinium*. Age: Late Jurassic.

"longicornutum" (Alberti, 1961, p.27–28, pl.5, figs.18–21; pl.6, figs.1–2) Dörhöfer and Davies, 1980, p.37. Emendation: Below, 1990, p.56, as *Necrobroomea longicornuta*. Holotype: Alberti, 1961, pl.5, fig.19; Eisenack and Klement, 1964, p.69; Fensome et al., 1996, fig.1 — p.2205. **NOW** *Batioladinium*. Originally *Broomea?*, subsequently (and now) *Batioladinium*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Taxonomic junior synonym: *Batioladinium radiculatum*, according to Below (1990, p.53). Age: late Hauterivian–late Barremian.

"micropodum" (Eisenack and Cookson, 1960, p.7–8, pl.2, figs.8–9) Dörhöfer and Davies, 1980, p.37. Emendation: Below, 1990, p.56, as *Necrobroomea micropoda*. Holotype: Eisenack and Cookson, 1960, pl.2, fig.9. **NOW** *Batioladinium*. Originally *Broomea*, subsequently (and now) *Batioladinium*, thirdly *Necrobroomea*, fourthly *Imbatodinium*. Taxonomic junior synonyms: *Imbatodinium fractum*, according to Below (1990, p.56); *Broomea* (now *Batioladinium?*) *pellifera*, according to Wiggins (1975, p.111) — however, Dörhöfer and Davies (1980, p.38) retained *Broomea* (as *Batioladinium?*) *pellifera*. Age: Aptian–Albian.

"**pelliferum**" (Alberti, 1961, p.26, pl.5, figs.11–13) Dörhöfer and Davies, 1980, p.38. Holotype: Alberti, 1961, pl.5, fig.11. **NOW** *Batioladinium?*. Originally *Broomea*, subsequently (and now) *Batioladinium?*, thirdly *Imbatodinium*, fourthly *Necrobroomea*. Taxonomic senior synonym: *Broomea* (as *Necrobroomea*, now *Batioladinium*) *micropoda*, according to Wiggins (1975, p.111) — however, Dörhöfer and Davies (1980, p.38) retained *Broomea* (as *Batioladinium?*) *pellifera*. Age: late Barremian–early Aptian.

"**pomum**" (Davey, 1982b, p.21, pl.5, figs.2–4) Mehrotra and Sarjeant, 1984a, p.220. Holotype: Davey, 1982b, pl.5, fig.3. Originally *Batioladinium*, subsequently *Imbatodinium*. **Taxonomic senior synonym:** *Broomea* (as *Necrobroomea*, now *Batioladinium?*) *gochtii*, according to Below (1990, p.53). Age: late Portlandian–early Valanginian.

"**radiculatum**" (Davey, 1982b, p.21–22, pl.5, figs.1,7–9) Mehrotra and Sarjeant, 1984a, p.153. Holotype: Davey, 1982b, pl.5, fig.8. Originally *Batioladinium*, subsequently *Imbatodinium*. **Taxonomic senior synonym:** *Broomea* (as *Necrobroomea*, now *Batioladinium*) *longicornuta*, according to Below (1990, p.53). Age: early–late Ryazanian.

"**?tricornoides**" (Alberti, 1961, p.28, pl.5, fig.17) Lentin and Williams, 1981, p.153. Holotype: Alberti, 1961, pl.5, fig.17. **NOW** *Batioladinium?*. Originally *Broomea?*, subsequently (and now) *Batioladinium?*, thirdly *Necrobroomea?*, fourthly *Imbatodinium?*. Questionable assignment: Lentin and Williams (1981, p.153). Age: late Hauterivian.

"**verrucosum**" Vozzhennikova, 1967, p.56, pl.12, fig.6. Emendation: Lentin and Vozzhennikova, 1990, p.83–84, as *Gochteodinia verrucosa*. Holotype: Vozzhennikova, 1967, pl.12, fig.6; Lentin and Vozzhennikova, 1990, pl.11, fig.5; text-fig.46. **NOW** *Gochteodinia*. Originally *Imbatodinium*, subsequently *Pareodinia*, thirdly (and now) *Gochteodinia*. Age: Late Jurassic.

"**villosum**" Vozzhennikova, 1967, p.56, pl.12, figs.1a–b,2a–b,3a–b; pl.13, figs.1a–e,2,3a–d; pl.14, figs.1a–e,2a–i; pl.15, figs.1–2. Emendations: Lentin and Vozzhennikova, 1990, p.85 and Below, 1990, p.50, both as *Gochteodinia villosa*. Holotype: Vozzhennikova, 1967, pl.12, figs.3a–b; pl.15, fig.1; Eisenack and Kjellström, 1975b, figure to right — p.726f; Lentin and Vozzhennikova, 1990, pl.11, figs.7–8; text-fig.47; Fensome et al., 1995, fig.1 — p.1903; Fensome et al., 1996, figs.1–3 — p.2431. **NOW** *Gochteodinia villosa*. Originally *Imbatodinium villosum*, subsequently *Pareodinia villosa* (Vozzhennikova) (combination not validly published), thirdly *Pareodinia dasyforma*, fourthly (and now) *Gochteodinia villosa*. Age: Late Jurassic.

IMPAGIDINIUM Stover and Evitt, 1978, p.165–166. Type: Cookson and Eisenack, 1965a, pl.12, figs.5–6, as *Leptodinium dispertitum*.

aculeatum (Wall, 1967, p.104–105, pl.14, figs.18–19; text-figs.3C–D) Lentin and Williams, 1981, p.153. Holotype: Wall, 1967, pl.14, fig.18; Jan du Chêne et al., 1986a, pl.53, figs.1–3. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: Pleistocene–Holocene.

agremon Willumsen, 2011, p.219–220, figs.9F,H,L; figs.10C–E. Holotype: Willumsen, 2011, fig.9L. N.I.A. Age: latest Maastrichtian–early Paleocene.

alectrolophum (Sarjeant, 1966b, p.134–135, pl.15, figs.3–6; text-fig.34) Stover and Evitt, 1978, p.165. Holotype: Sarjeant, 1966b, pl.15, figs.5–6; Jan du Chêne et al., 1986a, pl.54, figs.15–16. Originally *Leptodinium*, subsequently (and now) *Impagidinium*, thirdly *Pterodinium*. Lentin and Williams (1985, p.194) retained this species in *Impagidinium*. Age: middle Barremian.

aliferum Mudie, 1987, p.803, pl.4, figs.1a–b. Holotype: Mudie, 1987, pl.4, figs.1a–b. Age: late Miocene–late Pliocene.

antecarcereum de Verteuil and Norris, 1996a, p.136,138,140, pl.8, figs.7–14; pl.9, figs.1–8; text-fig.34. Holotype: de Verteuil and Norris, 1996a, pl.8, figs.7–10; text-fig.34. Age: latest Miocene.

- "aquaeductus"** (Piasecki, 1980, p.70, pl.1, figs.1–3; pl.5, figs.1–2) Lentin and Williams, 1985, p.194. Holotype: Piasecki, 1980, pl.1, figs.1–3. **NOW** *Unipontidinium*. Originally *Nematosphaeropsis*, subsequently *Nematosphaeropsis*?, thirdly *Impagidinium*, fourthly (and now) *Unipontidinium*. N.I.A. Age: middle Miocene.
- arachnion** de Verteuil and Norris, 1996a, p.140,142,144, pl.9, figs.9–20; pl.10, figs.1–5; pl.18, figs.4–6. Holotype: de Verteuil and Norris, 1996a, pl.9, figs.9–12. N.I.A. Age: middle-late Miocene.
- aspinatum** (Cookson and Eisenack, 1974, p.63, pl.23, fig.6) Damassa, 1979a, p.826. Holotype: Cookson and Eisenack, 1974, pl.23, fig.6. Originally *Spiniferites cornutus* var. *aspinatus*, subsequently *Spiniferites cornutus* subsp. *aspinatus*, thirdly (and now) *Impagidinium aspinatum*. Age: Paleocene.
- bacatum** Londeix et al., 1992, p.696,698,700, pl.1, figs.1a–b,2–3,4a–c,5–8,9a–b; text-figs.3a–b. Holotype: Londeix et al., 1992, pl.1, figs.1a–b,9a–b. Age: early–late Pliocene.
- "brevisulcatum"** Michoux, 1985, p.144–145, pl.1, figs.9–11; text-fig.4. Holotype: Michoux, 1985, pl.1, fig.10; Jan du Chêne et al., 1986a, pl.56, figs.4–6. **NOW** *Ynezidinium*. Originally *Impagidinium*, subsequently (and now) *Ynezidinium*. Age: middle Eocene.
- caecopapillatum** Prössl, 1992b, p.104–106, pl.1, figs.6–7,9–10,12–13; pl.3, figs.2–3,5–6,8–11; text-fig.2. Holotype: Prössl, 1992b, pl.3, figs.3,6,9. Age: middle Eocene.
- californiense** Damassa, 1979a, p.829–830, pl.5, figs.1–13; text-fig.8. Holotype: Damassa, 1979a, pl.5, figs.3–6; Jan du Chêne et al., 1986a, pl.52, fig.18. Age: early-middle Eocene.
- cantabrigiense** De Schepper and Head, 2008, p.106–107, pl.2, figs.1–16. Holotype: De Schepper and Head, pl.2, figs.1–3. Age: latest Pliocene–mid Pleistocene.
- caspienense** Marret in Marret et al., 2004, p.11,13; pl.2, figs.1–7; text-fig.3D–E. Holotype: Marret et al., 2004, pl.2, figs.1–4. Age: late Holocene.
- cassiculus** Wilson, 1988, p.23, pl.13, figs.2a–b,3,5a–b. Holotype: Wilson, 1988, pl.13, fig.3; Fensome et al., 1996, fig.3 — p.2085. N.I.A. Age: early Eocene.
- cavea** Willumsen, 2011, p.219, figs.9G,J,K; figs.10F–H. Holotype: Willumsen, 2011, fig.9K. N.I.A. Age: latest Maastrichtian–early Paleocene.
- celineae** Jan du Chêne, 1988, p.159, pl.19, figs.1–6; pl.20, figs.1–5; pl.26, figs.1–4; text-fig.3. Holotype: Jan du Chêne, 1988, pl.19, figs.1–2. Age: Danian.
- "churchillii"** (Harland, 1968, p.548,550–551, figs.12–13,22–24) Matsuoka, 1983a, p.7. Holotype: Harland, 1968, figs.12–13,22–24. Originally *Leptodinium*, subsequently *Impagidinium*. **Taxonomic senior synonym:** *Hystrichosphaera* (now *Spiniferites*) *nodosa*, according to Reid (1974, p.599). Taxonomic senior synonym: *Hystrichosphaera* (now *Spiniferites*) *bentorii* according to Harland (1977b, p.98–99) — however, *Leptodinium churchillii* is now generally considered to be a taxonomic junior synonym of *Hystrichosphaera* (now *Spiniferites*) *nodosa*. Age: Holocene.
- cornutum** Matsuoka and Bujak, 1988, p.51–53, pl.5, fig.10; pl.6, figs.1a–c,2; text-fig.9. Holotype: Matsuoka and Bujak, 1988, pl.6, figs.1a–c; text-fig.9. Age: late Miocene.
- crassimuratum** Wilson, 1988, p.23, pl.12, figs.5a–b,6a–b,7a–c. Holotype: Wilson, 1988, pl.12, figs.5a–b; Fensome et al., 1996, figs.1–2 — p.2099. Age: early Eocene.
- cristatum** (May, 1980, p.57, pl.5, figs.16–20) Lentin and Williams, 1981, p.153. Holotype: May, 1980, pl.5, figs.16–20. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: late Campanian–early Maastrichtian.

crouchiae Willumsen, 2011, p.220,222, figs.9A,D. Holotype: Willumsen, 2011, fig.9A. Age: late Maastrichtian–early Paleocene.

"*densiverrucosum*" Zevenboom and Santarelli in Zevenboom, 1995, p.145, pl.5, figs.1–3. Holotype: Zevenboom, 1995, pl.5, figs.1–3. **Name not validly published:** considered a manuscript name. Age: middle Miocene.

**dispertitum* (Cookson and Eisenack, 1965a, p.122–123, pl.12, figs.5–7) Stover and Evitt, 1978, p.165. Holotype: Cookson and Eisenack, 1965a, pl.12, figs.5–6; Jan du Chêne et al., 1986a, pl.149, figs.11–16; Fensome et al., 1993a, figs.1–2 — p.1127. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: late Eocene.

diversum Duxbury, 2001, p.107–108, fig.9, nos.1–6. Holotype: Duxbury, 2001, fig.9, no.5. Age: late Barremian (holotype caved into middle Barremian according to Duxbury, 2001, p.107).

elegans (Cookson and Eisenack, 1965a, p.123–124, pl.12, figs.10–13) Stover and Evitt, 1978, p.165. Holotype: Cookson and Eisenack, 1965a, pl.12, figs.10,12; Jan du Chêne et al., 1986a, pl.149, figs.5–10. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: late Eocene.

elongatum Schreck et al., 2012, p.89–90, pl.2, figs.6–20; text-figs.6–7. Holotype: Schreck et al., 2012, pl.2, figs.6–10. Age: Langhian–early Tortonian.

eugubinum Biffi and Manum, 1988, p.206, pl.12, figs.16,18–20. Holotype: Biffi and Manum, 1988, pl.12, fig.18. Age: early Miocene.

fenestroseptatum Head et al., 1989b, p.458, pl.2, figs.5–7,10–14. Holotype: Head et al., 1989b, pl.2, figs.11–13. Age: early Pliocene.

gibreuse Michoux, 1985, p.145, pl.1, figs.5–8,13–14; pl.2, fig.10; text-fig.5. Holotype: Michoux, 1985, pl.1, figs.5–6; Jan du Chêne et al., 1986a, pl.57, figs.1–5. Age: early-middle Eocene.

globosum Sütő-Szentai, 1985, p.518–519, pl.81, fig.3. Holotype: Sütő-Szentai, 1985, pl.81, fig.3. This name was not validly published in Sütő-Szentai (1982a, pl.5, fig.4), who did not give a description. Sütő-Szentai (1990, pl.4, fig.4 — p.864) cited this species as new. Age: late Miocene.

gracilium Shaw Chenglong, 1999b, p.170, figs.37–42. Holotype: Shaw Chenglong, 1999b, figs.37–39. Age: Eocene.

"*grande*" (Davey, 1975, p.153–154, pl.1, fig.9) Jan du Chêne et al., 1986a, p.168. Holotype: Davey, 1975, pl.1, fig.9; Jan du Chêne et al., 1986a, pl.55, figs.1–8. **NOW** *Unipontidinium*. Originally *Nematosphaeropsis*, subsequently *Impagidinium*, thirdly (and now) *Unipontidinium*. Age: Senonian, ?Campanian.

hannahii Willumsen, 2011, p.222,224, figs.9B–C; figs.10A–B,E. Holotype: Willumsen, 2011, fig.9B. Age: late Maastrichtian–early Paleocene.

?*hyalodermum* (Deflandre, 1939b, p.144, pl.6, figs.3–4 ex Sarjeant, 1967b, p.252) Jan du Chêne et al., 1986a, p.169. Holotype: Deflandre, 1939b, pl.6, figs.3–4; Jan du Chêne et al., 1986a, pl.58, figs.1–5. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta*, thirdly *Gonyaulacysta?*, fourthly *Rhynchodiniopsis?*, fifthly (and now) *Impagidinium*. Questionable assignment: Jan du Chêne et al. (1986a, p.169). The name *Palaeoperidinium hyalodermum* was not validly published in Deflandre (1939b) since the generic name *Palaeoperidinium* was not validly published until 1967. Williams et al. (1998, p.328) accepted Sarjeant's (1967b) indirect reference to Deflandre (1939b) as indication of a type (I.C.N. Article 40.3). Age: Kimmeridgian.

inaequalis (Wall and Dale in Wall et al., 1973, p.22, pl.1, figs.7–8) Londeix et al., 2009, p.68. Holotype: Wall et al., 1973, pl.1, figs.7–8. Originally *Spiniferites*, subsequently (and now) *Impagidinium*. Londeix et al. (2010, p.204) corrected an error to the basionym citation in Londeix et al. (2009), but the combination was still validated in the latter reference. Age: Holocene.

japonicum Matsuoka, 1983b, p.120–121, pl.6, figs.2a–c,3a–b,4–5; text-figs.13A–B. Holotype: Matsuoka, 1983b, pl.6, figs.2a–c; Jan du Chêne et al., 1986a, pl.59, figs.1–3. Taxonomic junior synonym: *Impagidinium pacificum*, according to Bujak and Matsuoka (1986, p.236). Age: Pliocene or younger.

maculatum (Cookson and Eisenack, 1961b, p.40, pl.2, figs.5–6) Stover and Evitt, 1978, p.166. Holotype: Cookson and Eisenack, 1961b, pl.2, figs.5–6. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: Eocene.

maghribensis Slimani et al. 2008, p.331–332, 334, figs.4G–L. Holotype: Slimani et al. 2008, figs.4G–K. Age: early Danian.

manumii Matsuoka and Bujak, 1988, p.54–56, pl.6, figs.5a–b,6–7; text-fig.10. Holotype: Matsuoka and Bujak, 1988, pl.6, figs.5a–b; text-fig.10. Age: late Miocene.

margaritifera (Cookson and Eisenack, 1960a, p.5–6, pl.2, figs.1–2; text-fig.1) Stover and Evitt, 1978, p.166. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.1; Jan du Chêne et al., 1986a, pl.54, fig.6. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly *Leptodinium*, fourthly (and now) *Impagidinium*. Age: Campanian.

"?**membranigerum**" (Gerlach, 1961, p.162–164, pl.26, figs.1–4,7; text-figs.4–5) Stover and Evitt, 1978, p.166. Emendation: Sarjeant, 1984b, p.75–76, as *Leptodinium membranigerum*. Holotype: Gerlach, 1961, pl.26, figs.1–3, lost according to Sarjeant (1984b, p.75). Lectotype: Gerlach, 1961, pl.26, fig.7; text-fig.5; Sarjeant, 1984b, pl.1, figs.1,3; text-figs.1A–B; Jan du Chêne et al., 1986a, pl.67, figs.17–18; designated by Sarjeant (1984b, p.75). **NOW** *Leptodinium*. Originally (and now) *Leptodinium*, subsequently *Impagidinium*?. Questionable assignment: Stover and Evitt (1978, p.166). Age: late Oligocene.

minus Biffi and Manum, 1988, p.206–207, pl.12, figs.9–15,17. Holotype: Biffi and Manum, 1988, pl.12, figs.9–11. Age: late Oligocene–early Miocene.

modicum (Brideaux and McIntyre, 1975, p.22, pl.5, figs.10–15) Jan du Chêne et al., 1986a, p.168. Holotype: Brideaux and McIntyre, 1975, pl.5, figs.10–13; Jan du Chêne et al., 1986a, pl.59, figs.4–6. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: middle Albian.

subsp. **denticulatum** (Brideaux, 1977, p.8, pl.1, figs.10–11) Jan du Chêne et al., 1986a, p.168. Holotype: Brideaux, 1977, pl.1, figs.10–11. Originally *Leptodinium modicum* subsp. *denticulatum*, subsequently (and now) *Impagidinium modicum* subsp. *denticulatum*. Age: Barremian.

subsp. **modicum**. Autonym. Holotype: Brideaux and McIntyre, 1975, pl.5, figs.10–13; Jan du Chêne et al., 1986a, pl.59, figs.4–6. Originally *Leptodinium modicum* subsp. *modicum*, subsequently (and now) *Impagidinium modicum* subsp. *modicum*.

multiplex (Wall and Dale, 1968a, p.318, pl.1, figs.1–7; text-fig.1) Lentin and Williams, 1981, p.154. Holotype: Wall and Dale, 1968a, pl.1, figs.1–6; Jan du Chêne et al., 1986a, pl.54, figs.7–9. Originally *Anhystrichosphaera* (name not validly published), subsequently *Leptodinium*, thirdly (and now) *Impagidinium*. Wall and Dale (1968a, p.315,318) expressly based this species and name on the invalid name *Anhystrichosphaera multiplex* Deflandre in West, 1961 (West's hystrichosphere type "z"). Age: early Pleistocene.

?obesum (Sütő-Szentai, 1982a, p.210–211,218–219, pl.4, figs.1 [two illustrations]-2 [three illustrations]; text-fig.5) Lentin and Williams, 1989, p.196. Holotype: Sütő-Szentai, 1982a, pl.4, fig.2 (three illustrations); text-fig.5. Originally *Pontiadinium*, subsequently (and now) *Impagidinium*?. Questionable assignment: Lentin and Williams (1989, p.196). Age: late Miocene.

ordocaviopse Iosifova, 1996, p.219,221, pl.1, figs.1a–c,2a–c,4a–c,5a–c; text-figs.7A–D. Holotype: Iosifova, 1996, pl.1, figs.2a–c; text-figs.7C–D. Age: ?Hauterivian.

?*ovum* (Sah et al., 1970, p.147–148, pl.2, fig.25) Stover and Evitt, 1978, p.166. Holotype: Sah et al., 1970, pl.2, fig.25. Originally *Leptodinium*, subsequently (and now) *Impagidinium*?. Questionable assignment: Stover and Evitt (1978, p.166). N.I.A. Age: Late Cretaceous.

"*pacificum*" Bujak, 1984, p.187, pl.2, figs.3–8. Holotype: Bujak, 1984, pl.2, figs.3–4; Jan du Chêne et al., 1986a, pl.60, figs.9–11. **Taxonomic senior synonym:** *Impagidinium japonicum*, according to Bujak and Matsuoka (1986, p.236). Age: early–late Pliocene.

pallidum Bujak, 1984, p.187, pl.2, figs.9–12. Holotype: Bujak, 1984, pl.2, figs.11–12; Jan du Chêne et al., 1986a, pl.58, figs.7–9. Originally (and now) *Impagidinium*, subsequently *Impagidinium*?. Questionable assignment: Mudie (1987, p.803) — however, Manum et al. (1989, p.618) retained this species in *Impagidinium* without question. Age: late Eocene–early Pleistocene.

paradoxum (Wall, 1967, p.106–107, pl.15, figs.5–8; text-figs.2–3A,B) Stover and Evitt, 1978, p.166. Holotype: Wall, 1967, pl.15, fig.5. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: middle Miocene–Holocene.

subsp. *granulatum* Mao Shaozhi, 1989, p.134–135, pl.26, figs.12,18,19; text-figs.3A–B. Holotype: Mao Shaozhi, 1989, pl.26, figs.12,18. Age: Quaternary.

subsp. *paradoxum*. Autonym. Holotype: Wall, 1967, pl.15, fig.5.

parvireticulatum Wilson, 1988, p.24, pl.13, figs.4a–c,6a–b. Holotype: Wilson, 1988, pl.13, figs.4a–c; Fensome et al., 1996, figs.1–3 — p.2263. Age: middle Eocene; see Fensome et al. (1996, p.2264).

patulum (Wall, 1967, p.105–106, pl.14, fig.20; pl.15, figs.1–4; text-fig.4) Stover and Evitt, 1978, p.166. Holotype: Wall, 1967, pl.14, fig.20; pl.15, figs.1–2. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: middle Miocene–Holocene.

?*pecsvaradense* (Sütő-Szentai, 1982a, p.209–210,218, pl.3, figs.1–3; text-fig.4) Lentin and Williams, 1989, p.196. Holotype: Sütő-Szentai, 1982a, pl.3, figs.1a–b; text-fig.4. Originally *Pontiadinium*, subsequently (and now) *Impagidinium*?. Questionable assignment: Lentin and Williams (1989, p.196). Age: late Miocene.

pengchiahsun Shaw Chenglong, 1999b, p.173–174, figs.22–27. Holotype: Shaw Chenglong, 1999b, figs.22–23. Age: Eocene.

"*pentahedrias*" Damassa, 1979b, p.202,204, pl.3, figs.22,24–26,28–29; pl.4, figs.1–3,6; text-fig.4. Holotype: Damassa, 1979b, pl.3, fig.25; Jan du Chêne et al., 1986a, pl.59, figs.7–8. **NOW** *Ynezidinium*. Originally *Impagidinium*, subsequently (and now) *Ynezidinium*. N.I.A. Age: early Paleocene.

phlyctaena Stover and Helby, 1987d, p.268,271, figs.8A–P. Holotype: Stover and Helby, 1987d, figs.8A–H; Fensome et al., 1996, figs.1–6 — p.2273. Age: Barremian–early Aptian.

plicatum Versteegh and Zevenboom in Versteegh, 1995, p.88–90, pl.3, figs.1–8. Holotype: Versteegh, 1995, pl.3, figs.1–3; Versteegh and Zevenboom, 1995, pl.3, figs.1–3. Versteegh and Zevenboom (1995, p.221,223) also proposed this name. Age: earliest Pliocene–Holocene (earliest Zanclean–Versilian).

reductum Stover and Helby, 1987c, p.241–242,244, figs.13A–C,14A–D,15A–Q. Holotype: Stover and Helby, 1987c, figs.15I–K; Fensome et al., 1996, figs.1–3 — p.2319. Age: Hauterivian.

rigidaseptatum Slimani, 1994, p.104–105, pl.17, figs.1–9; text-fig.13A. Holotype: Slimani, 1994, pl.17, figs.1–7. Taxonomic junior synonym: *Spiniferites cingulatus* var. *prominoseptatus* (name not validly published), according to Slimani (2001a, p.193). Age: late Campanian–Danian.

scabrosum Slimani, 1994, p.105–107, pl.17, figs.10–15; text-fig.13B. Holotype: Slimani, 1994, pl.17, figs.10–11. Age: late Campanian–earliest Maastrichtian.

setcheyense (Sarjeant, 1976c, p.4–6, pl.1, fig.7; text-fig.1) Courtinat, 1989, p.205. Holotype: Sarjeant, 1976c, pl.1, fig.7; Jan du Chêne et al., 1986a, pl.74, figs.1–4. Originally *Gonyaulacysta*, subsequently *Leptodinium*, thirdly *Rhynchodiniopsis*, fourthly (and now) *Impagidinium*. Age: Kimmeridgian.

"*siliciense*" Zevenboom and Santarelli in Zevenboom, 1995, p.145–146, pl.5, figs.4,6,8. Holotype: Zevenboom, 1995, pl.5, figs.4,6,8. **Name not validly published:** considered a manuscript name. Age: middle Miocene.

simplex Mao Shaozhi, 1989, p.136, pl.26, figs.1–3,5–8; text-figs.5A–D. Holotype: Mao Shaozhi, 1989, pl.26, figs.1,3. Age: Quaternary.

?*simplicium* (Cookson and Eisenack, 1961b, p.42, pl.2, figs.3–4; text-figs.1e–f) Stover and Evitt, 1978, p.166. Holotype: Cookson and Eisenack, 1961b, pl.2, figs.3–4; text-figs.1e–f; Jan du Chêne et al., 1986a, pl.54, figs.1–5. Originally *Rottmestia*, subsequently *Psaligonyaulax*, thirdly (and now) *Impagidinium*?. Questionable assignment: Stover and Evitt (1978, p.166). Age: Eocene.

solidum Versteegh and Zevenboom in Versteegh, 1995, p.90–91, pl.2, figs.5–12. Holotype: Versteegh, 1995, pl.2, figs.5–6,9; Versteegh and Zevenboom, 1995, pl.2, figs.5–6,9. Versteegh and Zevenboom (1995, p.223) also proposed this name. Age: late early–early late Pliocene (late Zanclean–early Piacenzian).

sphaericum (Wall, 1967, p.108, pl.15, figs.11–15; text-figs.2a–c) Lentin and Williams, 1981, p.154. Holotype: Wall, 1967, pl.15, figs.11–12. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: Pleistocene–Holocene.

spongianum Sütő-Szentai, 1985, p.519, pl.81, fig.6 (non 5 — see below). Holotype: Sütő-Szentai, 1982a, pl.5, fig.3; Sütő-Szentai, 1985, p.519, pl.81, fig.6 (non 5 — see below). This name was not validly published in Sütő-Szentai (1982a, pl.5, fig.3), who did not give a description. Sütő-Szentai (1990, pl.2, fig.3 — p.860) also cited this species as new. The nomenclatural status of this species is in question because Sütő-Szentai (1985, p.519 and caption to pl.81) indicated her pl.81, fig.5 as the holotype; however, as L. Londeix (pers. comm.) has pointed out, this specimen had been previously designated as a paratype of *Millioudodinium* (now *Apteodinium*?) *foveolatum*, and does not accord in morphology with the genus *Impagidinium*. It appears that the holotype was thus incorrectly indicated and should have been cited as pl.81, fig.6 in Sütő-Szentai (1985) (the same specimen as the single illustration labelled as *Impagidinium spongiosum* in Sütő-Szentai, 1982a, pl.5, fig.3). This is an unusual situation and it is unclear how ICN rules might apply, although generally typographic errors are not reasons for invalidating a name. We thus provisionally accept that *Impagidinium spongianum* was validly published in Sütő-Szentai (1985) despite the apparently incorrect indication of the holotype. Age: late Miocene.

striatum (Wall, 1967, p.107–108, pl.15, figs.9–10; text-fig.5) Stover and Evitt, 1978, p.166. Holotype: Wall, 1967, pl.15, fig.9. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: middle Miocene–Holocene.

"*striatum*" (Clarke and Verdier, 1967, p.31, pl.4, figs.11–13; pl.5, fig.15; text-fig.12) Stover and Evitt, 1978, p.166. Holotype: Clarke and Verdier, 1967, pl.4, figs.11–13; Jan du Chêne et al., 1986a, pl.88, figs.9–11. **NOW** *Dimidium*. Originally *Gonyaulacysta*, subsequently *Leptodinium*, thirdly *Impagidinium*, fourthly *Pterodinium*, fifthly (and now) *Dimidium*. Age: Santonian.

taiwanianum Shaw Chenglong, 1999b, p.170–172, figs.28–36. Holotype: Shaw Chenglong, 1999b, figs.28–30. Age: Eocene.

tectum Biffi and Manum, 1988, p.207, pl.12, figs.3–8. Holotype: Biffi and Manum, 1988, pl.12, figs.3–4. Age: late Oligocene–early Miocene.

torsium Stover and Hardenbol, 1994, p.36, pl.7, figs.47a–c; pl.8, figs.49a–c. Holotype: Stover and Hardenbol, 1994, pl.7, figs.47a–c. Age: Rupelian.

variaseptum Marret and de Vernal, 1997, p.385,387, pl.3, figs.1–5. Holotype: Marret and de Vernal, 1997, pl.3, figs.3–5. Age: Holocene.

velorum Bujak, 1984, p.187–188, pl.2, figs.13–16. Holotype: Bujak, 1984, pl.2, fig.13; Jan du Chêne et al., 1986a, pl.58, fig.10. Age: middle to late Eocene–late Pliocene.

verrucosum (Brideaux and McIntyre, 1975, p.30, pl.9, figs.1–8) Stover and Evitt, 1978, p.166. Holotype: Brideaux and McIntyre, 1975, pl.9, figs.1–4; Jan du Chêne et al., 1986a, pl.64, figs.16–19. Originally *Pterodinium*, subsequently (and now) *Impagidinium*. Age: middle Albian.

victorianum (Cookson and Eisenack, 1965a, p.123, pl.12, figs.8–9) Stover and Evitt, 1978, p.166. Holotype: Cookson and Eisenack, 1965a, pl.12, figs.8–9; Jan du Chêne et al., 1986a, pl.149, figs.1–4. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: late Eocene.

"**waipawaense**" Wilson, 1988, p.24, pl.13, figs.1a–b; pl.14, figs.1a–c,2a–b. Holotype: Wilson, 1988, pl.14, figs.1a–c; Fensome et al., 1996, figs.1–3 — p.2439. **NOW** *Ynezidinium*. Originally *Impagidinium*, subsequently (and now) *Ynezidinium*. Age: early-middle Eocene.

?**whitei** (Sarjeant, 1966b, p.126–128, pl.14, fig.2; text-fig.32) Stover and Evitt, 1978, p.166. Holotype: Sarjeant, 1966b, pl.14, fig.2. Originally *Gonyaulacysta*, subsequently (and now) *Impagidinium*?, thirdly *Rhynchodiniopsis*. Jan du Chêne et al. (1986a, p.169) questionably retained this species in *Impagidinium*. Questionable assignment: Stover and Evitt (1978, p.166). Age: Cenomanian.

wuqiaense He Chengquan, 1991, p.107–108, pl.5, fig.28; text-fig.14. Holotype: He Chengquan, 1991, pl.5, fig.28; text-fig.14. Age: middle Eocene.

"**IMPERFECTODINIUM**" Zevenboom and Santarelli in Zevenboom, 1995, p.146. **Name not validly published:** considered a manuscript name. This name was also not validly published in Gedl (1996, p.198), since no description was provided. Type: Zevenboom, 1995, pl.6, figs.1–4, as *Imperfectodinium bulbosum*.

"***bulbosum**" Zevenboom and Santarelli in Zevenboom, 1995, p.147, pl.5, figs.10–12; pl.6, figs.1–4. Holotype: Zevenboom, 1995, pl.6, figs.1–4. **Name not validly published:** considered a manuscript name. This name was also not validly published in Gedl (1996, p.198), since no description was provided. Age: latest early Miocene–late Miocene.

"**septatum**" Zevenboom and Santarelli in Zevenboom, 1995, p.148, pl.6, figs.5–10. Holotype: Zevenboom, 1995, pl.6, figs.5–7. **Name not validly published:** considered a manuscript name. This name was also not validly published in Gedl (1996, p.198), since no description was provided. Age: latest early Miocene–earliest late Miocene.

IMPLETOSPHAERIDIUM Morgenroth, 1966a, p.32. Emendation: Islam, 1993, p.84–85. Taxonomic junior synonyms: *Ciliosphaeridium*, according to Stover and Evitt (1978, p.232–233); *Laticavodinium*, by implication in Islam (1993, p.86), who questionably transferred the "type species", *Laticavodinium oligacanthum*, to *Impletosphaeridium* and by Masure in Fauconnier and Masure (2004, p.337). This genus was considered problematic by Masure in Fauconnier and Masure (2004, p.337). Type: Morgenroth, 1966a, pl.10, fig.5, as *Impletosphaeridium transfodum*.

"**acropora**" Warny and Wrenn, 1997, p.302,304, pl.10, figs.1–6. Holotype: Warny and Wrenn, 1997, pl.10, figs.4,6. **Taxonomic senior synonym:** *Nannobarbophora walldalei* (Appendix A), according to Head and Westphal (1999, p.20). Masure in Fauconnier and Masure (2004, p.341) independently also considered that this may be an acritarch species. N.I.A. Age: Miocene–Pleistocene.

baculatum (He Chengquan and Li Peng, 1981, p.62, pl.34, figs.21–22) Islam, 1993, p.85. Holotype: He Chengquan and Li Peng, 1981, pl.34, fig.21; Fauconnier and Masure, 2004, pl.48, fig.7. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: late Oligocene.

"?**bahiaense**" (Regali et al., 1974, p.289–290, pl.23, fig.5) Islam, 1993, p.85. Holotype: Regali et al., 1974, pl.23, fig.5. **NOW** *Operculodinium*. Originally *Hystrichosphaeridium*, subsequently *Cleistosphaeridium?*, thirdly *Impletosphaeridium?*, fourthly (and now) *Operculodinium*. Questionable assignment: Islam (1993, p.85). Age: Eocene–Oligocene.

bifurcatum (Jiabo, 1978, p.60–61, pl.20, figs.11–12) Islam, 1993, p.85. Holotype: Jiabo, 1978, pl.20, fig.11. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Early Tertiary.

brevibaculum (Song Zhichen in Song Zhichen et al., 1985, p.31, pl.4, fig.10) Islam, 1993, p.85. Holotype: Song Zhichen et al., 1985, pl.4, fig.10. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Cenozoic.

capillaceum Morgenroth, 1966a, p.33, pl.9, fig.12. Holotype: Morgenroth, 1966a, pl.9, fig.12. Age: early Eocene.

capillare He Chengquan et al. 2005b, p.386,390–391, pl.2, figs.14,17. Holotype: He Chengquan et al. 2005b, p.390–391, pl.2, fig.17. Age: Miocene to early Pliocene.

capitatum Fensome et al., 2009, p.38,39, pl.5, figs.m–p. Holotype: Fensome et al., 2009, pl.5, fig.m. Age: youngest occurrence, middle Campanian.

"**charrieri**" Troncoso and Doubinger, 1980, p.102, pl.2, figs.7–8. Holotype: Troncoso and Doubinger, 1980, pl.2, fig.7. Originally *Impletosphaeridium*, subsequently *Operculodinium*. **Taxonomic senior synonym:** *Cleistosphaeridium* (now *Lingulodinium*) *bergmannii*, according to Quattrocchio and Sarjeant, 2003, p.142. Age: Maastrichtian–Danian.

cingulatum (Grigorovich, 1971, p.94, pl.2, fig.1) Stover and Evitt, 1978, p.232–233. Holotype: Grigorovich, 1971, pl.2, fig.1; Fensome et al., 1993a, fig.1 — p.1059. Originally *Ciliosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Paleocene.

?**clavulum** (Davey, 1969a, p.154–155, pl.6, figs.9–10) Islam, 1993, p.85. Holotype: Davey, 1969a, pl.6, fig.9; Fauconnier and Masure, 2004, pl.50, fig.1. Originally *Cleistosphaeridium polypes* var. *clavulum*, subsequently *Cleistosphaeridium polypes* subsp. *clavulum*, thirdly *Impletosphaeridium polypes* subsp. *clavulum*, fourthly *Bacchidinium polypes* subsp. *clavulum*, fifthly *Cleistosphaeridium clavulum*, sixthly *Impletosphaeridium clavulum*, seventhly (and now) *Impletosphaeridium? clavulum*. Questionable assignment: Peyrot (2011, p.293). Age: Cenomanian.

clavus Wrenn and Hart, 1988, p.356–357, fig.27, nos.10–11,13. Emendation: Bowman et al., 2013, p.155,157. Holotype: Wrenn and Hart, 1988, fig.27, nos.11,13. N.I.A. Age: late Paleocene–Eocene.

commixtum (Jiabo, 1978, p.61–62, pl.21, figs.3–5) Islam, 1993, p.85–86. Holotype: Jiabo, 1978, pl.21, fig.3. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Early Tertiary.

"**conicosum**" (Jiabo, 1978, p.57, pl.29, figs.4–5) Chen et al., 1988, p.7. Holotype: Jiabo, 1978, pl.29, fig.4. **NOW** *Palaeohystrichodinium*. Originally *Bipolaribucina*, subsequently *Impletosphaeridium*, thirdly (and now) *Palaeohystrichodinium*. Age: Early Tertiary.

cracens Eaton, 1976, p.306, pl.21, fig.6; text-fig.25E. Holotype: Eaton, 1976, pl.21, fig.6; Bujak et al., 1980, pl.5, fig.4. Age: early-middle Eocene (see Aubry, 1986).

"?**densicomatum**" (Maier, 1959, p.307–308, pl.29, figs.7–8) Morgenroth, 1966a, p.33. Emendation: Sarjeant, 1983, p.111–113, as *Sentusidinium densicomatum*. Holotype: Maier, 1959, pl.29, fig.7. **NOW** *Pilosidinium*. Originally *Galea* (generic name illegitimate), subsequently *Baltisphaeridium* (Appendix A), thirdly *Impletosphaeridium*,

fourthly *Impletosphaeridium?*, fifthly *Sentusidinium*, sixthly (and now) *Pilosidinium*. Questionable assignment: Lentin and Williams (1973, p.82). Age: middle Oligocene–middle Miocene.

densum (He Chengquan and Li Peng, 1981, p.65, pl.31, figs.14–17; text-fig.6) He Chengquan and Wang Kede, 1990, p.413. Holotype: He Chengquan and Li Peng, 1981, pl.31, fig.14; text-fig.6. Originally *Impletosphaeridium polypes* subsp. *densum*, subsequently *Kiokansium polypes* subsp. *densum*, thirdly (and now) *Impletosphaeridium densum*. He Chengquan (1991, p.142) also proposed this combination. Age: late Oligocene.

digitale (He Chengquan, 1991, p.141, pl.25, figs.14–16; text-fig.26) Williams et al., 1998, p.332. Holotype: He Chengquan, 1991, pl.25, fig.14. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: early Eocene.

ehrenbergii (Deflandre, 1947c, fig.1, no.5) Islam, 1993, p.86. Emendation: Masure in Fauconnier and Masure, 2004, p.337–338, as *Impletosphaeridium ehrenbergii*. Holotype: Deflandre, 1939a, pl.10, fig.9, as *Hystrichosphaeridium* cf. *hirsutum*; Deflandre, 1947c, fig.1, no.5; Fauconnier and Masure, 2004, pl.48, figs.9,11. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Cleistosphaeridium?*, fifthly (and now) *Impletosphaeridium*. Nomenclatural junior synonym: *Cleistosphaeridium deflandrei* Courtinat, 1989, which has the same holotype. This combination was not validly published in Davey et al. (1966, p.170), since these authors did not fully reference the basionym. Courtinat (1989, p.166) erected the species *Cleistosphaeridium deflandrei* and designated as holotype the specimen illustrated in Deflandre (1939a, pl.10, fig.9) and Deflandre (1947c, fig.1, no.5). This is the only specimen of *Hystrichosphaeridium ehrenbergii* illustrated by Deflandre (1947c) when he erected that species, and which thus must be considered its holotype. Courtinat (1989, p.166) considered *Hystrichosphaeridium ehrenbergii* to be not validly published, since Deflandre (1947c) did not give a diagnosis or designate a holotype. I.C.N. Article 40.1 implies that designation of a holotype was not required before 1958. Also, according to I.C.N. Article 38.1, "In order to be validly published, a name of a new taxon ... must ... be accompanied by a description or diagnosis ... or ... by a reference to a previously and effectively published description or diagnosis ...". Deflandre (1947c, caption to fig.1, no.5) referred to "*H. cf. hirsutum* (Ehr.) Defl. 1938", this reference including a description by Deflandre (1939a, p.191). Hence, *Hystrichosphaeridium ehrenbergii* must be regarded as having been validly published by Deflandre (1947c); consequently *Cleistosphaeridium deflandrei* is an illegitimate name for the same taxon. Age: Oxfordian.

elegans (He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989, p.43, pl.18, figs.1–4) Williams et al., 1998, p.332. Holotype: He Chengquan et al., 1989, pl.18, fig.1. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Early Tertiary.

"elongatum" Lentin and Williams, 1989, p.197. Holotype: Jiabo, 1978, pl.29, fig.2. **NOW** *Peltiphoridium oblongatum*. Originally *Bipolaribucina oblongatum*, subsequently *Impletosphaeridium oblongatum* (combination illegitimate), thirdly *Impletosphaeridium elongatum*, fourthly (and now) *Peltiphoridium oblongatum*. Substitute name for *Impletosphaeridium oblongatum* (Jiabo, 1978, p.58, pl.29, figs.1–3) Chen et al., 1988, p.7 (an illegitimate name). Age: Early Tertiary.

"erinaceum" Morgenroth, 1966a, p.33–34, pl.8, figs.10–12. Holotype: Morgenroth, 1966a, pl.8, fig.10. **NOW** *Operculodinium*. Originally *Impletosphaeridium*, subsequently (and now) *Operculodinium*. Age: early-middle Miocene.

furcillatum (Prössl, 1990, p.100, pl.7, figs.12,14 ex Prössl, 1992b, p.113–114) Williams et al. 1998, p.332. Holotype: Prössl, 1990, pl.7, figs.12,14; Fauconnier and Masure, 2004, pl.49, figs.1–2. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. The name *Cleistosphaeridium furcillatum* was not validly published in Prössl (1990) since that author did not specify the lodgement of the holotype, Age: Hauterivian–early Barremian.

"giganteum" (Caro, 1973, p.360–361, pl.2, fig.12) Islam, 1993, p.86. Holotype: Caro, 1973, pl.2, fig.12; Fauconnier and Masure, 2004, pl.49, figs.13–14. **NOW** *Exochosphaeridium*. Originally *Polysphaeridium*, subsequently *Cleistosphaeridium*, thirdly *Impletosphaeridium*, fourthly (and now) *Exochosphaeridium*. Age: early Eocene.

granulatum (Burger, 1980a, p.77, pl.33, figs.2–4,6–10) Islam, 1993, p.86. Holotype: Burger, 1980a, pl.33, fig.2; Fauconnier and Masure, 2004, pl.49, figs.3–4. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Albian.

"granulosum" Jain and Tandon, 1981, p.11, pl.2, figs.30–31; pl.3, fig.50. Holotype: Jain and Tandon, 1981, pl.2, fig.30. **NOW** *Exochosphaeridium*. Originally *Impletosphaeridium*, subsequently (and now) *Exochosphaeridium*. Age: middle Eocene.

"huanghuaense" (Jiabo, 1978, p.57, pl.29, figs.9–10) Chen et al., 1988, p.7. Holotype: Jiabo, 1978, pl.29, fig.9. **NOW** *Songiella*. Originally *Bipolaribucina*, subsequently *Impletosphaeridium*, thirdly (and now) *Songiella*. Age: Early Tertiary.

implicatum Morgenroth, 1966a, p.34, pl.9, figs.1–3. Holotype: Morgenroth, 1966a, pl.9, figs.1–2, lost, according to Sarjeant in Islam (1993, p.86). Neotype: Islam, 1993, pl.1, fig.12, designated by Islam (1993, p.86). Taxonomic junior synonym: *Adnatosphaeridium capilatatum*, according to Eaton (1976, p.306). Age: early Eocene.

insolitum Eaton, 1976, p.308, pl.21, figs.5,8; text-fig.25B. Holotype: Eaton, 1976, pl.21, fig.5; Bujak et al., 1980, pl.5, fig.5; Fauconnier and Masure, 2004, pl.49, figs.5–6. Originally (and now) *Impletosphaeridium*, subsequently *Cleistosphaeridium?*. This species was retained in *Impletosphaeridium* by Islam (1993, p.86). Age: early-middle Eocene (see Aubry, 1986).

kroemmelbeinii Morgenroth, 1966a, p.34–35, pl.9, figs.4–5. Holotype: Morgenroth, 1966a, pl.9, fig.5. Age: early Eocene.

labyrinthus Morgenroth, 1966a, p.35, pl.9, figs.6–7. Holotype: Morgenroth, 1966a, pl.9, figs.6–7. N.I.A. Age: early Eocene.

laxabaculum (Song Zhichen in Song Zhichen et al., 1985, p.31–32, pl.4, fig.11) Islam, 1993, p.86. Holotype: Song Zhichen et al., 1985, pl.4, fig.11. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: ?early Pleistocene.

"liaoningense" (Jiabo, 1978, p.58, pl.29, figs.6–8) Chen et al., 1988, p.7. Holotype: Jiabo, 1978, pl.29, fig.7. **NOW** *Peltiphoridium*. Originally *Bipolaribucina*, subsequently *Impletosphaeridium*, thirdly (and now) *Peltiphoridium*. Age: Early Tertiary.

ligospinosum (de Coninck, 1969, p.50, pl.15, figs.9–19) Islam, 1983a, p.240. Holotype: de Coninck, 1969, pl.15, fig.19; Fauconnier and Masure, 2004, pl.49, fig.7. Originally *Baltisphaeridium* (Appendix A), subsequently (and now) *Impletosphaeridium*. Age: early Eocene.

lorum Wrenn and Hart, 1988, p.357, fig.26, nos.1–2. Holotype: Wrenn and Hart, 1988, fig.26, nos.1–2. N.I.A. Age: Paleocene–Eocene.

lumectum (Sarjeant, 1960a, p.139–140, pl.6, fig.1; text-fig.2) Islam, 1993, p.86. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Cleistosphaeridium?*, fourthly (and now) *Impletosphaeridium*. Age: late Oxfordian.

luxurium Eaton, 1976, p.309, pl.21, figs.3–4; text-fig.25F. Holotype: Eaton, 1976, pl.21, fig.3; Bujak et al., 1980, pl.5, fig.6. Age: middle Eocene (see Aubry, 1986).

machaeroides Stover and Hardenbol, 1994, p.36–37, pl.13, figs.91a–b,92a–b. Holotype: Stover and Hardenbol, 1994, pl.13, figs.91a–b. Age: Rupelian.

"mediterraneum" (Corradini, 1973, p.137–138, pl.19, figs.5a–b; text-fig.4) Islam, 1993, p.86. Holotype: Corradini, 1973, text-fig.4. **NOW** *Pervosphaeridium*. Originally *Cleistosphaeridium*, subsequently *Impletosphaeridium*, thirdly (and now) *Pervosphaeridium*. Age: Senonian.

minus (Jiabo, 1978, p.62, pl.20, figs.13–16) Islam, 1993, p.86. Holotype: Jiabo, 1978, pl.20, fig.16. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Early Tertiary.

multifurcillatum (Prössl, 1990, p.199–101, pl.9, figs.2,8,11 ex Prössl, 1992b, p.113–114) Williams et al., 1998, p.333. Holotype: Prössl, 1990, pl.9, figs.8,11; Fauconnier and Masure, 2004, pl.49, figs.9–10. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. The name *Cleistosphaeridium multifurcillatum* was not validly published in Prössl (1990) since that author did not specify the lodgement of the holotype. Age: early Hauterivian–late Barremian.

multispinosum Benedek, 1972, p.31–32, pl.11, fig.11; pl.12, fig.15. Holotype: Benedek, 1972, pl.12, fig.15. Age: middle Oligocene.

nanus (Rozen, 1965, p.311, pl.2, figs.7–8; text-fig.21) Islam, 1993, p.86. Holotype: Rozen, 1965, pl.2, figs.7–8. Originally *Cordosphaeridium microtriainum* var. *nanus*, subsequently *Cordosphaeridium microtriainum* subsp. *nanus*, thirdly *Cleistosphaeridium?* *nanus*, fourthly (and now) *Impletosphaeridium nanus*. N.I.A. Age: late Eocene.

"nenjiangense" (Gao Ruiqi et al., 1992a, p.18,24, pl.3, figs.1–9; pl.4, figs.1–7) Williams et al., 1998, p.333. Holotype: Gao Ruiqi et al., 1992a, pl.3, fig.1. Originally *Cleistosphaeridium*, subsequently *Impletosphaeridium*, thirdly *Spicadinium* (Appendix A). **Taxonomic senior synonym:** *Spicadinium akidoton* (Appendix A), according to Mao Shaozhi et al. (1999, p.159). Age: Campanian.

oblongatum Islam, 1983a, p.240, pl.3, figs.8–9. Holotype: Islam, 1983a, pl.3, fig.8. Junior homonym: *Impletosphaeridium oblongatum* (Jiabo, 1978 ex Lentin and Williams, 1981) Chen et al., 1988. Age: early Eocene.

"oblongatum" (Jiabo, 1978, p.58, pl.29, figs.1–3) Chen et al., 1988, p.7. Holotype: Jiabo, 1978, pl.29, fig.2. **Combination illegitimate** — **senior homonym:** *Impletosphaeridium oblongatum* Islam, 1983a. Substitute name: *Impletosphaeridium elongatum*. **NOW** *Peltiphoridium oblongatum*. Originally *Bipolaribucina oblongata*, subsequently *Impletosphaeridium oblongatum* (combination illegitimate), thirdly *Impletosphaeridium elongatum*, fourthly (and now) *Peltiphoridium oblongatum*. Age: Early Tertiary.

?oligacanthum (Wetzel, 1952, p.402–405, pl.A, figs.4,7–8,11a–b; text-figs.21–25) Islam, 1993, p.86. Emendation: Wilson and Sarjeant in Sarjeant, 1984c, p.128, as *Laticavodinium oligacanthum*. Holotype: Wetzel, 1952, pl.A, fig.8; Sarjeant, 1984c, pl.2, figs.4–5; text-fig.2; Fensome et al., 1995, figs.1–5 — p.1625; Dietz et al., 1999, text-fig.6g. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium?*, fourthly *Laticavodinium*, fifthly (and now) *Impletosphaeridium?*. Questionable assignment: Islam (1993, p.86). Age: Danian.

pachydermum (Cookson and Eisenack, 1960b, p.251–252, pl.38, fig.5; text-fig.5) Masure in Fauconnier and Masure, 2004, p.343. Holotype: Cookson and Eisenack, 1960b, pl.38, fig.5; Fauconnier and Masure, 2004, pl.48, fig.10. Originally *Hystrichosphaeridium*, subsequently *Polysphaeridium*, thirdly *Hystrichosphaeridium?*, fourthly *Dapsilidinium*, fifthly (and now) *Impletosphaeridium*. Age: Oxfordian–Tithonian.

panniforme (Gerlach, 1961, p.196–198, pl.28, fig.13) Morgenroth, 1966a, p.35. Holotype: Gerlach, 1961, pl.28, fig.13. Originally *Baltisphaeridium*, subsequently (and now) *Impletosphaeridium*, thirdly *Cleistosphaeridium*. Eaton et al. (2001, p.191) implied that this species be retained in *Impletosphaeridium*. Taxonomic senior synonym: *Hystrichosphaeridium* (now *Cleistosphaeridium*) *placacanthum*, according to Sarjeant (1984b, p.86–87) — however, Eaton et al. (2001, p.191) retained *Baltisphaeridium* (as *Impletosphaeridium*) *panniforme*. Age: middle Oligocene.

patagonicum (Archangelsky, 1969b, p.200–201, pl.3, figs.9–10) Islam, 1993, p.86. Holotype: Archangelsky, 1969b, pl.3, figs.9–10. Originally *Cleistosphaeridium*, subsequently *Cleistosphaeridium?*, thirdly (and now) *Impletosphaeridium*. Age: Eocene.

"?paucifurcatum" (Cookson and Eisenack, 1982, p.39, pl.8, figs.5–6) Islam, 1993, p.86. Holotype: Cookson and Eisenack, 1982, pl.8, fig.5. **NOW** *Spiniferites?*. Originally *Cleistosphaeridium*, subsequently *Impletosphaeridium?*, thirdly (and now) *Spiniferites?*. Questionable assignment: Islam (1993, p.86). Age: Paleocene.

paucispinum He Chengquan, 1991, p.143, pl.24, fig.2; text-fig.29. Holotype: He Chengquan, 1991, pl.24, fig.2; text-fig.29. Age: Paleocene.

petalum Islam, 1983c, p.88, pl.4, figs.1–3,7. Holotype: Islam, 1983c, pl.4, fig.1. N.I.A. Age: middle Eocene.

placacanthum" (Deflandre and Cookson, 1955, p.276–277, pl.9, figs.1–3) Morgenroth, 1966a, p.35. Emendation: May, 1980, p.68, as *Systematophora placacantha*. Holotype: Deflandre and Cookson, 1955, pl.9, figs.1–2; Fauconnier and Masure, 2004, pl.76, figs.14–16. **NOW** *Cleistosphaeridium*. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Impletosphaeridium*, fourthly *Systematophora*, fifthly (and now) *Cleistosphaeridium*. Taxonomic junior synonyms: *Baltisphaeridium* (as *Cleistosphaeridium*) *panniforme*, according to Sarjeant (1984b, p.86–87); *Systematophora* (now *Cleistosphaeridium*) *ancyrea*, according to Stover and Evitt (1978, p.84) — however, Lentin and Williams (1981, p.272) retained *Systematophora ancyrea*. Age: Miocene.

?*polyozum* (Brosius, 1963, p.45, pl.1, fig.6; pl.6, fig.5; text-figs.2a–d) Islam, 1993, p.87. Holotype: Brosius, 1963, pl.1, fig.6. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium?*, thirdly *Surculosphaeridium*, fourthly (and now) *Impletosphaeridium?*. Questionable assignment: Islam (1993, p.87). The epithet is derived from the Greek for "much branched", as implied by Brosius (1963). Since Principle 5 of the I.C.N. states that taxon names are to be treated as Latin, this epithet should be rendered as "*polyozum*" in agreement with the neuter gender of the generic name ("*polyoza*" would be the feminine form and "*polyozus*" the masculine form). Age: late Oligocene.

polypes" (Cookson and Eisenack, 1962b, p.491–492, pl.4, figs.11–13) He Chengquan and Li Peng, 1981, p.65. Emendation: Duxbury, 1983, p.49, as *Kiokansium polypes*. Holotype: Cookson and Eisenack, 1962b, pl.4, figs.11–13; Fensome et al., 1996, figs.1–3 — p.2283. Originally *Hystrichosphaeridium recurvatum* subsp. *polypes*, subsequently *Polysphaeridium?* *polypes* (combination not validly published), thirdly *Cleistosphaeridium polypes*, fourthly *Bacchidinium polypes*, fifthly *Impletosphaeridium polypes*, sixthly *Kiokansium polypes*. **Taxonomic senior synonym** (at specific rank): *Hystrichosphaeridium* (as and now *Kiokansium*) *unituberculatum*, by implication in Duxbury (1983, p.49), who considered *Hystrichosphaeridium recurvatum* subsp. *polypes* (as *Bacchidinium polypes*) to be the senior name. Taxonomic junior synonym: *Cleistosphaeridium?* *solidum*, according to Below (1982c, p.16). Age: Albian–Cenomanian.

"subsp. ***clavulum***" (Davey, 1969a, p.154–155, pl.6, figs.9–10) He Chengquan and Li Peng, 1981, p.65. Holotype: Davey, 1969a, pl.6, fig.9; Fauconnier and Masure, 2004, pl.50, fig.1. **NOW** *Impletosphaeridium?* *clavulum*. Originally *Cleistosphaeridium polypes* var. *clavulum*, subsequently *Cleistosphaeridium polypes* subsp. *clavulum*, thirdly *Impletosphaeridium polypes* subsp. *clavulum*, fourthly *Bacchidinium polypes* subsp. *clavulum*, fifthly *Cleistosphaeridium clavulum*, sixthly *Impletosphaeridium clavulum*, seventhly (and now) *Impletosphaeridium?* *clavulum*. Age: Cenomanian.

"subsp. ***densum***" He Chengquan and Li Peng, 1981, p.65, pl.31, figs.14–17; text-fig.6. Holotype: He Chengquan and Li Peng, 1981, pl.31, fig.14; text-fig.6. **NOW** *Impletosphaeridium densum*. Originally *Impletosphaeridium polypes* subsp. *densum*, subsequently *Kiokansium polypes* subsp. *densum*, thirdly (and now) *Impletosphaeridium densum*. Age: late Oligocene.

"subsp. ***polypes***". Autonym. Holotype: Cookson and Eisenack, 1962b, pl.4, figs.11–13; Fensome et al., 1996, figs.1–3 — p.2283. **Now redundant**. Originally *Cleistosphaeridium polypes* subsp. *polypes*, subsequently *Bacchidinium polypes* subsp. *polypes*, thirdly *Impletosphaeridium polypes* subsp. *polypes*, fourthly *Kiokansium polypes* subsp. *polypes*.

?*polytrichum* (Valensi, 1947, p.818; text-fig.4) Islam, 1993, p.87. Holotype: Valensi, 1947; text-fig.4; Fauconnier and Masure, 2004, pl.24, figs.1–6. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*, fourthly *Impletosphaeridium*, fifthly *Downiesphaeridium*, sixthly (and now) *Impletosphaeridium?*. Questionable assignment: Peyrot (2011, p.293–294). Taxonomic junior synonym: *Cleistosphaeridium* (as *Downiesphaeridium*) *polyacanthum*, according to Masure in Fauconnier and Masure (2004, p.196). Age: late Bathonian.

"*?primordiale*" Wetzel, 1967b, p.41–42, pl.3, fig.18. Holotype: Wetzel, 1967b, pl.3, fig.18. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Polygonium* — Appendix A) *polygonale*, according to Eisenack et al. (1973, p.497–498). Questionable assignment: Wetzel (1967b, p.41). Age: Ordovician.

prolatum Head et al., 1989c, p.491, pl.6, fig.1. Holotype: Head et al., 1989c, pl.6, fig.1. Age: early–?early late Miocene.

"*pycnospinosum*" Benedek, 1972, p.32, pl.12, fig.14. Emendation: Benedek and Sarjeant, 1981, p.343–344, as *Lingulodinium pycnospinosum*. Holotype: Benedek, 1972, pl.12, fig.14; Benedek and Sarjeant, 1981, fig.10, no.1. **NOW** *Lingulodinium*. Originally *Impletosphaeridium*, subsequently *Lingulodinium?*, thirdly (and now) *Lingulodinium*. Age: middle-late Oligocene.

radiculopse (Mao Shaozhi and Norris, 1988, p.38, pl.7, figs.21–23) Islam, 1993, p.87. Holotype: Mao Shaozhi and Norris, 1988, pl.7, fig.21. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Late Cretaceous.

"*regulatum*" (Zhou Heyi, 1985, p.7, pl.1, figs.16–17,19–21) Williams et al., 1998, p.335. Holotype: Zhou Heyi, 1985, pl.1, fig.16. **NOW** *Cleistosphaeridium*. Originally (and now) *Cleistosphaeridium*, subsequently *Impletosphaeridium*, thirdly *Sepispinula?*. Age: middle Oligocene.

rugosum Morgenroth, 1966a, p.36, pl.10, figs.2–3. Holotype: Morgenroth, 1966a, pl.10, figs.2–3. Age: early Eocene.

"*sarmentum*" (Stancliffe, 1991, p.187–188, pl.1, figs.1–2; pl.2, fig.6; text-figs.5A–B) Williams et al., 1998, p.335. Holotype: Stancliffe, 1991, pl.1, figs.1–2; text-figs.5A–B. **NOW** *Downiesphaeridium*. Originally *Cleistosphaeridium*, subsequently *Impletosphaeridium*, thirdly (and now) *Downiesphaeridium*. N.I.A. Age: late Oxfordian.

selseyense (Islam, 1983b, p.337, pl.2, figs.3,7) Islam, 1993, p.87. Holotype: Islam, 1983b, pl.2, fig.3. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: middle Eocene.

"*severinii*" (Cookson and Cranwell, 1967, p.208, pl.3, figs.1–2) Liengjarern et al., 1980, p.486. Holotype: Cookson and Cranwell, 1967, pl.3, fig.1. **NOW** *Operculodinium*. Originally *Baltisphaeridium* (Appendix A), subsequently *Impletosphaeridium*, thirdly (and now) *Operculodinium*. Age: Eocene–Oligocene.

shandongense (He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989, p.44, pl.18, figs.5–6; pl.30, figs.3–6) Williams et al., 1998, p.335. Holotype: He Chengquan et al., 1989, pl.18, fig.6. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: Early Tertiary.

?sphericum (Horowitz, 1975, p.24, pl.1, fig.5) Islam, 1993, p.87. Holotype: Horowitz, 1975, pl.1, fig.5. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Questionable assignment: Islam (1993, p.87). Age: Late Jurassic.

?spiralisetum (de Wit, 1943, p.383; text-figs.2,11) Islam, 1993, p.87. Holotype: de Wit, 1943; text-figs.2,11, lost according to R. de Wit (personal communication to GLW). Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium?*, fourthly (and now) *Impletosphaeridium*. Questionable assignment: Islam (1993, p.87). Age: Late Cretaceous.

"*tenuis*" (Harris, 1974, p.164, pl.2, figs.7–9) Islam, 1993, p.87. Holotype: Harris, 1974, pl.2, figs.8–9. **NOW** *Sepispinula?*. Originally *Cleistosphaeridium*, subsequently *Impletosphaeridium*, thirdly (and now) *Sepispinula?*. Age: Paleocene.

?tenuifilum (Cookson and Eisenack, 1982, p.40, pl.8, fig.14) Islam, 1993, p.87. Holotype: Cookson and Eisenack, 1982, pl.8, fig.14. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium?*. Questionable assignment: Islam (1993, p.87). Age: Paleocene.

tianjinense (Jiabo, 1978, p.59, pl.29, figs.13–14) Chen et al., 1988, p.8. Holotype: Jiabo, 1978, pl.29, fig.13. Originally *Bipolaribucina*, subsequently (and now) *Impletosphaeridium*. Age: Early Tertiary.

tianshanense (He Chengquan, 1991, p.142, pl.25, figs.4–7; text-fig.28) Williams et al., 1998, p.336. Holotype: He Chengquan, 1991, pl.25, fig.4. Originally *Cleistosphaeridium*, subsequently (and now) *Impletosphaeridium*. Age: early Eocene.

**transfodum* Morgenroth, 1966a, p.32, pl.10, figs.4–5. Holotype: Morgenroth, 1966a, pl.10, fig.5. Age: early Eocene.

"*tribuliferum*" (Sarjeant, 1962a, p.487–488, pl.70, fig.4; text-figs.6c,7) Islam, 1993, p.87. Holotype: Sarjeant, 1962a, pl.70, fig.4; Fauconnier and Masure, 2004, pl.23, fig.11. **NOW** *Downiesphaeridium*. Originally *Baltisphaeridium* (Appendix A), subsequently *Cleistosphaeridium*, thirdly *Cleistosphaeridium?*, fourthly *Impletosphaeridium*, fifthly (and now) *Downiesphaeridium*. Age: Oxfordian.

varispinosum (Sarjeant, 1959, p.338–340, pl.13, fig.7; text-fig.6) Islam, 1993, p.87. Holotype: Sarjeant, 1959, pl.13, fig.7; text-fig.6; Fauconnier and Masure, 2004, pl.49, fig.8. Originally *Baltisphaeridium* (Appendix A), subsequently *Tenua* Eisenack, thirdly *Sentusidinium*, fourthly *Sentusidinium?*, fifthly *Cleistosphaeridium*, sixthly (and now) *Impletosphaeridium*. Age: early Callovian.

"*whitei*" (Deflandre and Courteville, 1939, p.103, pl.3, figs.5–6) Morgenroth, 1966a, p.37. Emendation: Monteil, 1991a, p.444, as *Cometodinium? whitei*. Holotype: Deflandre and Courteville, 1939, pl.3, fig.5, lost according to Monteil (1991a, p.439). Neotype: Monteil, 1991a, pl.2, figs.1a–c; pl.3, fig.9, designated by Monteil (1991a, p.444); Fauconnier and Masure, 2004, pl.16, figs.7–8. **NOW** *Cometodinium*. Originally *Hystriospheridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Impletosphaeridium*, fourthly *Comasphaeridium* (Appendix A), fifthly *Cometodinium?*, sixthly (and now) *Cometodinium*. Age: Senonian.

williamsii (Boltenhagen, 1977, p.41–42, pl.2, figs.6–7) Islam, 1993, p.87. Holotype: Boltenhagen, 1977, pl.2, fig.6; Fauconnier and Masure, 2004, pl.50, fig.6. Originally *Polysphaeridium*, subsequently *Cleistosphaeridium*, thirdly (and now) *Impletosphaeridium*. Age: Cenomanian–early Turonian.

xinjiangense (Lentin and Williams, 1993, p.117) Williams et al., 1998, p.336. Holotype: He Chengquan, 1991, pl.24, fig.5. Originally *Cleistosphaeridium elegans* (name illegitimate), subsequently *Cleistosphaeridium xinjiangense*, thirdly (and now) *Impletosphaeridium xinjiangense*. Age: Paleocene.

INDODINIUM Kumar, 1986b, p.388–389. This name was not validly published in Kumar (1984, p.26), who did not provide a description. Type: Kumar, 1986b, pl.4, fig.3, as *Indodinium khariense*.

**khariense* Kumar, 1986b, p.389,391, pl.4, figs.2–3; text-figs.5A–B. Emendation: Riding and Helby, 2001f, p.157,159. Holotype: Kumar, 1986b, pl.4, fig.3; Fensome et al., 1995, fig.2 — p.1587. Taxonomic junior synonym: *Diplotesta nodosa* (name not validly published), according to Riding and Helby (2001f, p.157). This name was not validly published in Kumar (1984, p.26), who did not provide a description or illustration. Age: Kimmeridgian–Tithonian.

"?*parvelatum*" Jiang Qinghua in Jiang Qinghua et al., 1992, p.85,87, pl.2, fig.10. Emendation: Riding and Helby, 2001f, p.162, as *Mombasadinium parvelatum*. Holotype: Jiang Qinghua et al., 1992, pl.2, fig.10. **NOW** *Mombasadinium*. Originally *Indodinium?*, subsequently (and now) *Mombasadinium*. Questionable assignment: Jiang Qinghua in Jiang Qinghua et al. (1992, p.85). Taxonomic junior synonym: *Omatia jurabiana* (name not validly published), according to Riding and Helby (2001f, p.162). Age: Tithonian.

INDOSPHERA Kumar, 1986b, p.391. Type: Kumar, 1986b, pl.3, fig.5, as *Indosphaera bhujensis*.

***bhujensis** Kumar, 1986b, p.392, pl.3, figs.3,5; text-fig.6. Holotype: Kumar, 1986b, pl.3, fig.5; Fensome et al., 1993a, fig.2 — p.973. Age: Kimmeridgian–Tithonian.

INOCARDION Masters and Scott 1978 p.215. Calcareous dinoflagellate genus (see Elbrächter et al., 2008, p.1300). This generic name was proposed using the I.C.Z.N. Type: not designated — "type species" *Lagena orbularia* de Lapparent, 1918.

"**caucasicum**" (Keller 1946, p.95, pl.3, fig.2) Masters and Scott, 1978, p.216. Holotype: Keller 1946, pl.3, fig.2. **NOW** *Pithonella*. Originally (and now) *Pithonella*, subsequently *Inocardion*. As this combination was published under the I.C.Z.N., it can be considered validly published and legitimate when brought under the I.C.N., even though the basionym was not fully referenced. Age: information not available.

maastrichtiense (Visser 1951, p.211, pl.7, fig.13) Masters and Scott, 1978, p.216. Holotype: Visser, 1951, pl.7, fig.13. Originally *Leptodermella* (Appendix A), subsequently *Bonetocardiella*, thirdly and now *Inocardion*. Taxonomic junior synonym: *Stomiosphaera cardiiiformis*, according to Villain (1975, p.198). As this combination was published under the I.C.Z.N., it can be considered validly published and legitimate when brought under the I.C.N., even though the basionym was not fully referenced. Age: Maastrichtian.

neumannae (Villain 1975, p.199–200, pl.2, figs.7–8; pl.6, figs.1–17, pl.1, figs.1d–e; pl.2, figs.1–12; pl.15, fig.2) Masters and Scott 1978, p.216,218. Holotype: Villain, 1975, pl.6, fig.4. Originally *Bonetocardiella*, subsequently (and now) *Inocardion*. As this combination was published under the I.C.Z.N., it can be considered validly published and legitimate when brought under the I.C.N., even though the basionym was not fully referenced. Age: Late Cretaceous.

***orbularium** (de Lapparent, 1918, p.20, pl.2, figs.1–part,2–part; pl.3, fig.2–part) Masters and Scott 1978, p.218. Holotype: not designated. Originally *Lagena* (Appendix A), subsequently *Stomiosphaera*, thirdly *Sphaerella* (generic name illegitimate), fourthly *Stomiodinium?*, fifthly (and now) *Inocardion*. Taxonomic senior synonym: *Lagena* (now *Pithonella*) *sphaerica*, according to Bonet (1956, p.450) — however, Masters and Scott (1978, p.215) retained this species as type of *Inocardion*. As this combination was published under the I.C.Z.N., it can be considered validly published and legitimate when brought under the I.C.N., even though the basionym was not fully referenced. Age: Late Cretaceous.

pseudoconoideum Masters and Scott, 1978, p.215–216,218. Holotype: not designated. *Inocardion pseudoconoideum* was proposed as a "new name" (sensu I.C.Z.N.) by Masters and Scott (1978, p.215) for a form included by Villain (1975, p.197–198, pl.4, fig.1; pl.5, figs.2–4; table 15, figs.7–8) as *Bonetocardiella conoidea*. As this name was published under the I.C.Z.N., it can be considered validly published and legitimate when brought under the I.C.N. even though no type was designated. Age: ?Cretaceous.

"**INVERSIDINIUM**" McLean, 1973b, p.730. **Taxonomic senior synonym:** *Palaeotetradinium*, according to Stover and Evitt (1978, p.70–71). Type: McLean, 1973b, pl.90, figs.1–2, as *Inversidinium exilimurum*.

"**caudatum**" Benson, 1976, p.218,220, pl.13, figs.4–6. Holotype: Benson, 1976, pl.13, figs.4–6. **NOW** *Palaeotetradinium*. Originally *Inversidinium*, subsequently (and now) *Palaeotetradinium*. Age: late Maastrichtian–early Paleocene.

"***exilimurum**" McLean, 1973b, p.730,732, pl.90, figs.1–9. Holotype: McLean, 1973b, pl.90, figs.1–2; Fensome et al., 1993a, figs.1–2 — p.1163. **Taxonomic senior synonym:** *Wetzeliella* (now *Palaeotetradinium*) *minusculum*, according to Stover and Evitt (1978, p.71). The nomenclatural type of the genus *Inversidinium* remains the holotype of *Inversidinium exilimurum*. Age: late Paleocene.

"**+minusculum**" (Alberti, 1961, p.10–11, pl.1, fig.10; pl.12, fig.4) Costa and Downie, 1979, p.44. Holotype: Alberti, 1961, pl.1, fig.10. **NOW** *Palaeotetradinium*. Originally *Wetzeliella* subgenus *Rhombodinium*, subsequently *Rhombodinium?*, thirdly *Inversidinium*, fourthly (and now) *Palaeotetradinium*. Taxonomic junior

synonym: *Inversidinium exilimurum*, according to Stover and Evitt (1978, p.71). The nomenclatural type of the genus *Inversidinium* remains the holotype of *Inversidinium exilimurum*. Age: early Eocene.

INVERTOCYSTA Edwards, 1984, p.585. Type: Edwards, 1984, pl.3, figs.3A–B; text-figs.6A–B, as *Invertocysta tabulata*.

"*flandriensis*" Louwye, 1997, p.150, pl.1, figs.10–13. Holotype: Louwye, 1997, pl.1, figs.10–13. **Taxonomic senior synonym:** *Turnosphaera hypoflata*, according to Slimani and Louwye (2012, p.110,114). Age: Turonian–Campanian.

lacrymosa Edwards, 1984, p.586, pl.3, figs.4a–b,5. Holotype: Edwards, 1984, pl.3, figs.4a–b. Age: middle-late Miocene.

**tabulata* Edwards, 1984, p.585–586, pl.3, figs.3A–B; text-figs.6A–B. Holotype: Edwards, 1984, pl.3, figs.3A–B; text-figs.6A–B; Fensome et al., 1995, figs.1–4 — p.1837. Age: middle-late Miocene.

"**ISABELIA**" Lentin and Williams, 1976, p.56. **Name illegitimate** — **senior homonym:** *Isabelia* Barbosa-Rodrigues, 1877. **Substitute name:** *Isabelidinium*. Type: Cookson and Eisenack, 1958, pl.4, fig.10, as *Deflandrea korojonensis*.

"*?amphiata*" (McIntyre, 1975, p.65–66, pl.2, figs.5–8) Lentin and Williams, 1976, p.57. Holotype: McIntyre, 1975, pl.2, figs.5–6. **Combination illegitimate:** the generic name *Isabelia* is illegitimate. **NOW** *Isabelidinium?*. Originally *Deflandrea*, subsequently *Isabelia?* (combination illegitimate), thirdly (and now) *Isabelidinium?*, fourthly *Alterbia* (combination illegitimate). Questionable assignment: Lentin and Williams (1976, p.57). Age: Campanian–Maastrichtian.

"*bakeri*" (Deflandre and Cookson, 1955, p.251, pl.4, figs.1–4) Lentin and Williams, 1976, p.57. Emendation: Stover, 1974, p.169–170, as a "revised description" for *Deflandrea bakeri*. Holotype: Deflandre and Cookson, 1955, pl.4, fig.1. **Combination illegitimate:** the generic name *Isabelia* is illegitimate. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*, fourthly *Alterbia* (combination illegitimate). Age: Paleocene–early Eocene.

"*belfastensis*" (Cookson and Eisenack, 1961a, p.71, pl.11, figs.4–6) Lentin and Williams, 1976, p.57. Holotype: Cookson and Eisenack, 1961a, pl.11, fig.4; Helby et al., 1987, fig.41D. **Combination illegitimate:** the generic name *Isabelia* is illegitimate. **Taxonomic senior synonym:** *Deflandrea* (now *Isabelidinium*) *cooksoniae*, according to Fensome et al. (2009, p.39). Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*. Age: Late Cretaceous.

"*conorata*" (Stover, 1974, p.171–172, pl.1, figs.8a–b; text-fig.3C) Lentin and Williams, 1976, p.57. Holotype: Stover, 1974, pl.1, figs.8a–b. **Combination illegitimate:** the generic name *Isabelia* is illegitimate. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly *Eurydinium*, fifthly (and now) *Manumiella*. Age: early-middle Paleocene.

"*cooksoniae*" (Alberti, 1959b, p.97, pl.9, figs.1–6) Lentin and Williams, 1976, p.57. Holotype: Alberti, 1959b, pl.9, fig.2. **Combination illegitimate:** the generic name *Isabelia* is illegitimate. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Australiella*, thirdly *Isabelia* (combination illegitimate), fourthly (and now) *Isabelidinium*. Taxonomic junior synonyms: *Deflandrea* (as *Isabelidinium*) *belfastensis* and *Isabelidinium bujakii*, according to Fensome et al. (2009, p.39). Age: Late Cretaceous.

"*cretacea*" (Cookson, 1956, p.184–185, pl.1, figs.1–7 [but see discussion under *Isabelidinium cretaceum*]) Lentin and Williams, 1976, p.57. Holotype: Cookson, 1956, pl.1, fig.1; Helby et al., 1987, fig.42L. **Combination illegitimate:** the generic name *Isabelia* is illegitimate. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*, fourthly *Manumiella?* Age: Late Cretaceous.

"*dakotaensis*" (Stanley, 1965, p.217–218, pl.19, figs.1–3) Lentin and Williams, 1976, p.57. Holotype: Stanley, 1965, pl.19, figs.1–3. **Combination illegitimate**: the generic name *Isabelia* is illegitimate. **NOW** *Chatangiella*?. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Chatangiella*?. Age: Paleocene.

"*delicata*" (Balteş, 1969, p.31, pl.1, fig.7 ex Lentin and Williams, 1973, p.40) Lentin and Williams, 1976, p.58. Holotype: Balteş, 1969, pl.1, fig.7, designated by Lentin and Williams (1973, p.40). **Combination illegitimate**: the generic name *Isabelia* is illegitimate. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Manumiella*. Age: early Eocene.

"*druggii*" (Stover, 1974, p.171, pl.1, figs.3a–b,4; text-fig.3B) Lentin and Williams, 1976, p.58. Holotype: Stover, 1974, pl.1, figs.3a–b. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Manumiella*. Taxonomic senior synonym: *Broomea* (as and now *Manumiella*) *seelandica*, according to Firth (1987, p.213) — however, Thorn et al. (2009, p.443) retained *Manumiella druggii*. Taxonomic junior synonym: *Isabelidinium tingitanense*, according to Lentin and Williams (1985, p.201). Age: early-middle Paleocene.

"*gambangensis*" (Cookson and Eisenack, 1970a, p.140, pl.11, figs.1–2) Lentin and Williams, 1976, p.58. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.1. **Combination illegitimate**: the generic name *Isabelia* is illegitimate. **NOW** *Eucladinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eucladinium*. Age: Senonian.

"*glabra*" (Cookson and Eisenack, 1969, p.3, fig.1A) Lentin and Williams, 1976, p.58. Holotype: Cookson and Eisenack, 1969, fig.1A. **Combination illegitimate**: the generic name *Isabelia* is illegitimate. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*. Age: Albian–Cenomanian.

"*globosa*" (Davey, 1970, p.344, pl.2, fig.3) Lentin and Williams, 1976, p.58. Holotype: Davey, 1970, pl.2, fig.3. **Combination illegitimate**: the generic name *Isabelia* is illegitimate. **NOW** *Isabelidinium*?. Originally *Deflandrea*, subsequently *Isabelia*? (combination illegitimate), thirdly (and now) *Isabelidinium*?. Questionable assignment: Lentin and Williams (1976, p.58). Age: Cenomanian.

"*glomerata*" (Davey, 1970, p.343–344, pl.1, figs.7–9) Lentin and Williams, 1976, p.58. Holotype: Davey, 1970, pl.1, figs.7–8. **Combination illegitimate**: the generic name *Isabelia* is illegitimate. **NOW** *Eurydinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eurydinium*. Age: Cenomanian.

"**korojonensis*" (Cookson and Eisenack, 1958, p.27–28, pl.4, figs.10–11) Lentin and Williams, 1976, p.56. Holotype: Cookson and Eisenack, 1958, pl.4, fig.10; Eisenack and Klement, 1964, p.191; Fensome et al., 1996, fig.1 — p.2187. **Combination illegitimate**: the generic name *Isabelia* is illegitimate. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*. Age: Campanian–early Maastrichtian.

"*lata*" (Cookson and Eisenack, 1968, p.110, figs.1A–C) Lentin and Williams, 1976, p.58. Holotype: Cookson and Eisenack, 1968, fig.1A. **Combination illegitimate**: the generic name *Isabelia* is illegitimate. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Manumiella*. Age: ?Santonian–early Campanian.

"*madurensis*" (Cookson and Eisenack, 1970a, p.140, pl.11, figs.3–4) Lentin and Williams, 1976, p.58. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.3; Eisenack and Kjellström, 1975a, page labelled "nach S.194"; Fensome et al., 1996, fig.1 — p.2219. **Combination illegitimate**: the generic name *Isabelia* is illegitimate. **NOW** *Eucladinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eucladinium*. Age: Senonian.

"*microarma*" (McIntyre, 1975, p.65, pl.1, figs.5–8) Lentin and Williams, 1976, p.58. Holotype: McIntyre, 1975, pl.1, figs.5–6. **Combination illegitimate**: the generic name *Isabelia* is illegitimate. **NOW** *Isabelidinium*.

Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*. Age: Campanian–Maastrichtian.

"pellucida" (Deflandre and Cookson, 1955, p.251, pl.4, fig.3) Lentin and Williams, 1976, p.58. Holotype: Deflandre and Cookson, 1955, pl.4, fig.3; Cookson and Eisenack, 1958, pl.4, fig.9; Stover, 1974, pl.1, figs.7a–b. **Combination illegitimate:** the generic name *Isabelia* is illegitimate. **NOW** *Isabelidinium pellucidum*. Originally *Deflandrea bakeri* forma *pellucida*, subsequently *Deflandrea pellucida*, thirdly *Isabelia pellucida* (combination illegitimate), fourthly (and now) *Isabelidinium pellucidum*, fifthly *Alterbia pellucida* (combination illegitimate). Age: Paleocene–early Eocene.

"rhombovalis" (Cookson and Eisenack, 1970a, p.143, pl.12, figs.10–11) Lentin and Williams, 1976, p.58. Holotype: Cookson and Eisenack, 1970a, pl.12, fig.11. **Combination illegitimate:** the generic name *Isabelia* is illegitimate. **NOW** *Isabelidinium?*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Isabelidinium?*. Age: late Albian–Santonian.

"seelandica" (Lange, 1969, p.113–114, pl.2, fig.10; pl.3, fig.3) Lentin and Williams, 1976, p.58. Emendation: Firth, 1987, p.213–214, as *Manumiella seelandica*. Holotype: Lange, 1969, pl.3, fig.3; Fensome et al., 1995, fig.2 — p.1773. **NOW** *Manumiella*. Originally *Broomea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Manumiella*. Taxonomic junior synonym: *Deflandrea* (as *Manumiella*) *druggii*, according to Firth (1987, p.213) — however Thorn et al. (2009, p.443) retained *Deflandrea* (as *Manumiella*) *druggii*. Age: Danian

"spinosissima" (Cookson and Eisenack, 1970a, p.141, pl.11, figs.5–6) Lentin and Williams, 1976, p.59. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.5. **Combination illegitimate:** the generic name *Isabelia* is illegitimate. **NOW** *Eucladinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eucladinium*. Age: Senonian.

"thomasii" (Cookson and Eisenack, 1961a, p.71–72, pl.11, figs.7–10) Lentin and Williams, 1976, p.59. Holotype: Cookson and Eisenack, 1961a, pl.11, fig.8. **Combination illegitimate:** the generic name *Isabelia* is illegitimate. **NOW** *Isabelidinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*. Age: Senonian.

ISABELIDINIUM Lentin and Williams, 1977a, p.167. Emendations: Marshall, 1988, p.203,205; Fensome et al., 2009, p.39. Substitute name for *Isabelia* Lentin and Williams, 1976, p.56 (an illegitimate name). Marshall (1988, p.205) suggested that *Manumiella* may be a taxonomic junior synonym of this genus. Type: Cookson and Eisenack, 1958, pl.4, fig.10, as *Deflandrea korojonensis*.

acuminatum (Cookson and Eisenack, 1958, p.27, pl.4, figs.5–8) Stover and Evitt, 1978, p.109. Holotype: Cookson and Eisenack, 1958, pl.4, fig.5. Originally *Deflandrea*, subsequently *Alterbia* (combination illegitimate), thirdly *Senegalinium*, fourthly (and now) *Isabelidinium*. Age: Cenomanian–early Turonian.

?amphiatum (McIntyre, 1975, p.65–66, pl.2, figs.5–8) Lentin and Williams, 1977a, p.167. Holotype: McIntyre, 1975, pl.2, figs.5–6. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium?*, fourthly *Alterbia* (combination illegitimate). Lentin and Williams (1985, p.199) retained this species in *Isabelidinium*. Questionable assignment: Lentin and Williams (1977a, p.167). Age: Campanian–Maastrichtian.

armatum (Cookson and Eisenack, 1970a, p.142–143, pl.13, fig.9) Lindgren, 1984, p.165. Holotype: Cookson and Eisenack, 1970a, pl.13, fig.9. Originally *Deflandrea*, subsequently *Chatangiella*, thirdly *Chatangiella?*, fourthly (and now) *Isabelidinium*. Age: Senonian.

bakeri (Deflandre and Cookson, 1955, p.251, pl.4, figs.1–4) Lentin and Williams, 1977a, p.167. Emendation: Stover, 1974, p.169–170, as a "revised description" for *Deflandrea bakeri*. Holotype: Deflandre and Cookson, 1955, pl.4, fig.1. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now)

Isabelidinium, fourthly *Alterbia* (combination illegitimate). Lentin and Williams (1985, p.199) retained this species in *Isabelidinium*. Age: Paleocene–early Eocene.

"*balmei*" (Cookson and Eisenack, 1962b, p.486) Stover and Evitt, 1978, p.109. Emendation: Morgan, 1977, p.130, as *Alterbia minor*. Holotype: Cookson and Eisenack, 1960a, pl.1, fig.1; Morgan, 1977, text-fig.2. **NOW** *Spinidinium balmei*. Originally *Deflandrea minor* (name illegitimate), subsequently *Deflandrea balmei*, thirdly *Alterbia balmei* (combination illegitimate), fourthly *Isabelidinium balmei*, fifthly (and now) *Spinidinium balmei*, sixthly *Magallanesium balmei*. Taxonomic senior synonym: *Palaeohystrichophora* (as *Diconodinium*) *minuta*, according to Morgan (1977, p.130) — however, Lentin and Williams (1981, p.156) retained *Deflandrea* (as *Isabelidinium*, now *Spinidinium*) *balmei*. Age: Late Cretaceous.

"*belfastense*" (Cookson and Eisenack, 1961a, p.71, pl.11, figs.4–6) Lentin and Williams, 1977a, p.167. Holotype: Cookson and Eisenack, 1961a, pl.11, fig.4; Helby et al., 1987, fig.41D. **Taxonomic senior synonym:** *Deflandrea* (now *Isabelidinium*) *cooksoniae* according to Fensome et al. (2009, p.39). Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*. Age: Late Cretaceous.

brunae Roncaglia et al., 1999, p.305,307, fig.14, nos.7–8,11. Holotype: Roncaglia et al., 1999, fig.14, no.11. Age: middle-late Campanian.

"*bujakii*" Marheinecke, 1992, p.86–87, pl.18, figs.1–3; text-fig.16. Holotype: Marheinecke, 1992, pl.18, figs.2–3. **Taxonomic senior synonym:** *Deflandrea* (now *Isabelidinium*) *cooksoniae*, according to Fensome et al. (2009, p.39). Contrary to the opinion of Lentin and Williams (1993, p.357), Williams et al. (1998, p.339) considered this name to be validly published. Age: early Maastrichtian.

campbellensis (Wilson, 1967b, p.225, figs.2–3) Lebedeva, 2000, p.118. Holotype: Wilson, 1967b, fig.2. Originally *Deflandrea*, subsequently *Chatangiella*, thirdly (and now) *Isabelidinium*. Age: Maastrichtian (see Wilson, 1972).

cingulatum Wilson, 1988, p.25, pl.14, figs.3,4a–c. Holotype: Wilson, 1988, pl.14, figs.4a–c; Fensome et al., 1996, figs.1–3 — p.2091. Age: Paleocene.

"*conoratum*" (Stover, 1974, p.171–172, pl.1, figs.8a–b; text-fig.3C) Lentin and Williams, 1977a, p.167. Holotype: Stover, 1974, pl.1, figs.8a–b. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly *Eurydinium*, fifthly (and now) *Manumiella*. Age: early-middle Paleocene.

cooksoniae (Alberti, 1959b, p.97, pl.9, figs.1–6) Lentin and Williams, 1977a, p.167. Holotype: Alberti, 1959b, pl.9, fig.2. Originally *Deflandrea*, subsequently *Australiella*, thirdly *Isabelia* (combination illegitimate), fourthly (and now) *Isabelidinium*. Taxonomic junior synonyms: *Deflandrea* (as *Isabelidinium*) *belfastensis* and *Isabelidinium bujakii*, according to Fensome et al. (2009, p.39). Age: Late Cretaceous.

cretaceum (Cookson, 1956, p.184–185, pl.1, figs.1–7 [but see below]) Lentin and Williams, 1977a, p.167. Holotype: Cookson, 1956, pl.1, fig.1; Helby et al., 1987, fig.42L. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*, fourthly *Manumiella*? This species was retained in *Isabelidinium* by Bowman et al. (2012, p.54). Of the original illustrations in the protologue, pl.1, figs.6–7 were considered by Cookson and Eisenack (1960a, p.4) to belong to their new species, *Nelsoniella aceras*; pl.1, fig.5 was considered by Lentin and Williams (1985, p.231) to belong to *Manumiella delicata*; thus, only pl.1, figs.1–4 are now considered to belong to this species. Age: Late Cretaceous.

"subsp. *cretaceum*". Autonym. Holotype: Cookson, 1956, pl.1, fig.1; Helby et al., 1987, fig.42L. **NOW** *Manumiella cretacea* subsp. *cretacea*. Originally *Isabelidinium cretaceum* subsp. *cretaceum*, subsequently (and now) *Manumiella cretacea* subsp. *cretacea*.

"subsp. *gravidum*" Mao Shaozhi and Mohr, 1992, p.319, pl.1, figs.11–12. Holotype: Mao Shaozhi and Mohr, 1992, pl.1, fig.11. **NOW** *Manumiella? cretacea* subsp. *gravida*. Originally *Isabelidinium cretaceum* subsp. *gravidum*, subsequently (and now) *Manumiella? cretacea* subsp. *gravida*. Age: Maastrichtian.

- "subsp. *oviforme*" Mao Shaozhi and Mohr, 1992, p.319–310, pl.1, figs.7,9; pl.10, fig.2; pl.11, fig.5. Holotype: Mao Shaozhi and Mohr, 1992, pl.1, fig.7. **NOW** *Manumiella? cretacea* subsp. *oviformis*. Originally *Isabelidinium cretaceum* subsp. *oviforme*, subsequently (and now) *Manumiella? cretacea* subsp. *oviformis*. Age: late Campanian.
- "*dakotaense*" (Stanley, 1965, p.217–218, pl.19, figs.1–3) Lentin and Williams, 1977a, p.167. Holotype: Stanley, 1965, pl.19, figs.1–3. **NOW** *Chatangiella?*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Chatangiella?*. Age: Paleocene.
- "*delicatum*" (Balteş, 1969, p.31, pl.1, fig.7 ex Lentin and Williams, 1973, p.40) Lentin and Williams, 1977a, p.167. Holotype: Balteş, 1969, pl.1, fig.7, designated by Lentin and Williams (1973, p.40). **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Manumiella*. Age: early Eocene.
- "*druggii*" (Stover, 1974, p.171, pl.1, figs.3a–b,4; text-fig.3B) Lentin and Williams, 1977a, p.167. Holotype: Stover, 1974, pl.1, figs.3a–b. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Manumiella*. Taxonomic senior synonym: *Broomea* (as and now *Manumiella seelandica*, according to Firth (1987, p.213) — however, Thorn et al. (2009, p.443) retained *Manumiella druggii*. Taxonomic junior synonym: *Isabelidinium tingitanense*, according to Lentin and Williams (1985, p.201). Age: early-middle Paleocene.
- "*?extremum*" (Cookson and Eisenack, 1974, p.48, pl.20, fig.4) Stover and Evitt, 1978, p.109. Holotype: Cookson and Eisenack, 1974, pl.20, fig.4. **NOW** *Spongodinium?*. Originally *Deflandrea*, subsequently (and now) *Spongodinium?*, thirdly *Isabelidinium?*. Questionable assignment: Stover and Evitt (1978, p.109). Age: Albian–Cenomanian.
- foucheri* Schiøler, 1992, p.8,12,16,20, pl.1, figs.5–8. Holotype: Schiøler, 1992, pl.1, figs.6–7. Age: Coniacian.
- gallium* (Davey and Verdier, 1973, p.196–197, pl.3, figs.1–4) Stover and Evitt, 1978, p.109. Holotype: Davey and Verdier, 1973, pl.3, figs.1,3. Originally *Deflandrea*, subsequently *Spinidinium*, thirdly (and now) *Isabelidinium*. Age: late Albian–early Cenomanian.
- "*gambangense*" (Cookson and Eisenack, 1970a, p.140, pl.11, figs.1–2) Lentin and Williams, 1977a, p.167. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.1. **NOW** *Eucladinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eucladinium*. Age: Senonian.
- glabrum* (Cookson and Eisenack, 1969, p.3, fig.1A) Lentin and Williams, 1977a, p.167. Holotype: Cookson and Eisenack, 1969, fig.1A. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*. Age: Albian–Cenomanian.
- ?globosum* (Davey, 1970, p.344, pl.2, fig.3) Lentin and Williams, 1977a, p.167. Holotype: Davey, 1970, pl.2, fig.3. Originally *Deflandrea*, subsequently *Isabelia?* (combination illegitimate), thirdly (and now) *Isabelidinium?*. Questionable assignment: Lentin and Williams (1977a, p.167). Age: Cenomanian.
- "*glomeratum*" (Davey, 1970, p.343–344, pl.1, figs.7–9) Lentin and Williams, 1977a, p.167. Holotype: Davey, 1970, pl.1, figs.7–8. **NOW** *Eurydinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eurydinium*. Age: Cenomanian.
- greenense* Marshall, 1990a, p.24,26,28, figs.12A–C,14A–Z,AA–GG,21A–R,22A–D. Holotype: Marshall, 1990a, figs.12A,14S,21F–I; Fensome et al., 1996, figs.1–4,12 — p.2143. Age: Campanian.
- "*?haumuriense*" Wilson, 1984c, p.554, figs.14–21. Holotype: Wilson, 1984c, figs.14–15; Lentin and Manum, 1986, text-fig.4B; Fensome et al., 1996, figs.1–2 — p.2147. **NOW** *Satyrodinium*. Originally *Isabelidinium*, subsequently *Isabelidinium?*, thirdly (and now) *Satyrodinium*. Questionable assignment: Lentin and Williams (1985, p.200). Age: Maastrichtian.

**korojonense* (Cookson and Eisenack, 1958, p.27–28, pl.4, figs.10–11) Lentin and Williams, 1977a, p.167. Holotype: Cookson and Eisenack, 1958, pl.4, fig.10; Eisenack and Klement, 1964, p.191; Fensome et al., 1996, fig.1 — p.2187. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*. Age: Campanian–early Maastrichtian.

"latum" (Cookson and Eisenack, 1968, p.110, figs.1A–C) Lentin and Williams, 1977a, p.168. Holotype: Cookson and Eisenack, 1968, fig.1A. **NOW** *Manumiella*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Manumiella*. Age: ?Santonian–early Campanian.

"madurense" (Cookson and Eisenack, 1970a, p.140, pl.11, figs.3–4) Lentin and Williams, 1977a, p.168. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.3; Eisenack and Kjellström, 1975a, page labelled "nach S.194"; Fensome et al., 1996, fig.1 — p.2219. **NOW** *Eucladinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eucladinium*. Age: Senonian.

magnum (Davey, 1970, p.342–343, pl.2, figs.6–8) Stover and Evitt, 1978, p.109. Holotype: Davey, 1970, pl.2, fig.6. Originally *Deflandrea*, subsequently *Chatangiella*, thirdly (and now) *Isabelidinium*. Age: Cenomanian.

majae Schiøler, 1993, p.108,110, pl.1, figs.1–6; text-figs.4a–h. Holotype: Schiøler, 1993, pl.1, fig.1; text-fig.4a. Age: latest Maastrichtian.

marshallii Roncaglia, 2000, p.138–139,142–143,145, figs.3A–N,4A–N. Holotype: Roncaglia, 2000, figs.3A–B. Age: Campanian.

microarmum (McIntyre, 1975, p.65, pl.1, figs.5–8) Lentin and Williams, 1977a, p.168. Holotype: McIntyre, 1975, pl.1, figs.5–6. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*. Age: Campanian–Maastrichtian.

"microverrucosum" (Yu Jingxian and Zhang Wangping, 1980, p.109, pl.3, figs.1–2) Lentin and Williams, 1985, p.201. **Incorrect orthographic variant** of *Isabelidinium?* (now *Alterbidinium*) *microverrucosum*, which see.

"microverrucosum" (Yu Jingxian and Zhang Wangping, 1980, p.109, pl.3, figs.1–2) Lentin and Williams, 1985, p.201. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.3, fig.2. **NOW** *Alterbidinium*. Originally *Deflandrea*, subsequently *Isabelidinium?*, thirdly (and now) *Alterbidinium*. Questionable assignment: Lentin and Williams (1985, p.201). Yu Jingxian and Zhang Wangping (1980, p.109) spelled the epithet as "*microverrucosa*", but as "*microverrucosa*" in their plate caption. Previous editions of the "Lentin and Williams Index" and DINOFLAJ2 have cited the epithet as "*microverrucosa* / *microverrucosum*", but He Chengquan et al. (2009, p.416) used "*microverrucosum*", which we follow here. Age: Campanian–early Maastrichtian.

papillum Sumner, 1992, p.306,308, figs.3b–c. Holotype: Sumner, 1992, fig.3b. Age: middle to late Campanian.

pellucidum (Deflandre and Cookson, 1955, p.251, pl.4, fig.3) Lentin and Williams, 1977a, p.168. Holotype: Deflandre and Cookson, 1955, pl.4, fig.3; Cookson and Eisenack, 1958, pl.4, fig.9; Stover, 1974, pl.1, figs.7a–b. Originally *Deflandrea bakeri* forma *pellucida*, subsequently *Deflandrea pellucida*, thirdly *Isabelia pellucida* (combination illegitimate), fourthly (and now) *Isabelidinium pellucidum*, fifthly *Alterbia pellucida* (combination illegitimate). Lentin and Williams (1985, p.201) retained this species in *Isabelidinium*. Age: Paleocene–early Eocene.

poncticum Marshall, 1988, p.205, figs.8A–M,15A–X. Holotype: Marshall, 1988, figs.8A,15A–F; Fensome et al., 1996, figs.1–5,13 — p.2287. Age: Santonian.

psilatium (Yu Jingxian and Zhang Wangping, 1980, p.108–109, pl.2, figs.19–20) Lentin and Williams, 1985, p.201. Holotype: Yu Jingxian and Zhang Wangping, 1980, pl.2, fig.20. Originally *Deflandrea*, subsequently (and now) *Isabelidinium*. Age: Campanian–early Maastrichtian.

?rhombovale (Cookson and Eisenack, 1970a, p.143, pl.12, figs.10–11) Lentin and Williams, 1977a, p.168. Holotype: Cookson and Eisenack, 1970a, pl.12, fig.11. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Isabelidinium?*. Questionable assignment: Stover and Evitt (1978, p.109). Age: late Albian–Senonian.

"seelandicum" (Lange, 1969, p.113–114, pl.2, fig.10; pl.3, fig.3) Lentin and Williams, 1977a, p.168. Emendation: Firth, 1987, p.213–214, as *Manumiella seelandica*. Holotype: Lange, 1969, pl.3, fig.3; Fensome et al., 1995, fig.2 — p.1773. **NOW** *Manumiella*. Originally *Broomea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Manumiella*. Taxonomic junior synonym: *Deflandrea* (as *Manumiella*) *druggii*, according to Firth (1987, p.213) — however Thorn et al. (2009, p.443) retained *Deflandrea* (as *Manumiella*) *druggii*. Age: Danian.

spasicum (Grigorovich, 1969b, p.67–68, pl.1, fig.1) Lentin and Williams, 1981, p.158. Holotype: Grigorovich, 1969b, pl.1, fig.1. Originally *Australiella*, subsequently (and now) *Isabelidinium*. Age: Late Cretaceous.

"spinossimum" (Cookson and Eisenack, 1970a, p.141, pl.11, figs.5–6) Lentin and Williams, 1977a, p.168. Holotype: Cookson and Eisenack, 1970a, pl.11, fig.5. **NOW** *Eucladinium*. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly *Isabelidinium*, fourthly (and now) *Eucladinium* (combination illegitimate). Age: Senonian.

svartenhukense Nøhr-Hansen, 1996, p.34–35, pl.3, figs.7–12. Holotype: Nøhr-Hansen, 1996, pl.3, fig.7. Age: early Coniacian–early Santonian.

thomasii (Cookson and Eisenack, 1961a, p.71–72, pl.11, figs.7–10) Lentin and Williams, 1977a, p.168. Holotype: Cookson and Eisenack, 1961a, pl.11, fig.8. Originally *Deflandrea*, subsequently *Isabelia* (combination illegitimate), thirdly (and now) *Isabelidinium*. Age: Senonian.

"tingitanense" Rauscher and Doubinger, 1982, p.103–104, pl.1, figs.1–6; pl.2, fig.17. Holotype: Rauscher and Doubinger, 1982, pl.1, fig.1. **Taxonomic senior synonym:** *Deflandrea* (now *Manumiella*) *druggii*, according to Lentin and Williams (1985, p.201). Age: late Maastrichtian.

variabile Marshall, 1988, p.205,207,211, figs.9A–P,10A–H,13A–Z,14A–Y. Holotype: Marshall, 1988, figs.13A–E; Fensome et al., 1996, figs.3–7 — p.2419. Age: Santonian.

?viborgense Heilmann-Clausen, 1985, p.22–23, pl.1, figs.21–25; text-fig.9. Holotype: Heilmann-Clausen, 1985, pl.1, figs.24–25; text-fig.9A. Questionable assignment: Heilmann-Clausen (1985, p.22). Age: late Paleocene.

weidichii Kirsch, 1991, p.107–108, pl.21, figs.5–8. Holotype: Kirsch, 1991, pl.21, fig.7. Age: early Maastrichtian.

ISLANDINIUM Head et al. 2001, p.629. Taxonomic junior synonym: *Cantiacidinium* (name not validly published), by implication in Head et al. (2001, p.629), who considered the only recorded species name, *Cantiacidinium conicum* (name not validly published), to be a taxonomic junior synonym of *Islandinium minutum*. Type: Harland et al., 1980, fig.2O, as *Multispinula? minuta*.

brevispinosum Pospelova and Head, 2002, p.594–595,597–598, figs.3a–u,4a–p,5a–b,6a–c. Holotype: Pospelova and Head, 2002, figs.3a–m. Age: Holocene.

?cezare (de Vernal et al., 1989, p.2463, pl.2, figs.5,10 ex de Vernal in Rochon et al., 1999, p.53) Head et al., 2001, p.631. Emendation: Head et al., 2001, p.631, as *Islandinium cezare*. Holotype: de Vernal et al., 1989, pl.2, fig. 10, designated by Rochon et al., 1999, p.53. Originally *Algidasphaeridium? minutum* var. *cezare*, subsequently (and now) *Islandinium? cezare*. Questionable assignment: Head et al. (2001, p.631). Age: late Pleistocene.

***minutum** (Harland and Reid in Harland et al., 1980, p.216,218, figs.2M–O) Head et al., 2001, p.629. Holotype: Harland et al., 1980, fig.2O. Emendation: Potvin et al. (2013, p.16–17). Originally *Multispinula*, subsequently

Multispinula?, thirdly *Algidasphaeridium?*, fourthly (and now) *Islandinium*. Taxonomic junior synonym: *Cantiacidinium conicum* (name not validly published), according to Head et al. (2001, p.629). Age: Holocene.

"*tricingulatum*" (Kawami et al., 2009, p.262–264, figs.2a–1,3a–p,4) Potvin et al., 2013, p.17. Holotype: Kawami et al., 2009, figs.3a–p. **Combination not validly published**: basionym not fully referenced. **NOW** *Protopteridinium* (Appendix B). Originally (and now) *Protopteridinium*, subsequently *Islandinium* (combination not validly published). This species is based on a motile cell. Age: extant.

ISTHMOCYSTIS Duxbury, 1979a, p.199–200. Type: Duxbury, 1979a, pl.1, figs.1–2; text-fig.4, as *Isthmocystis distincta*.

**distincta* Duxbury, 1979a, p.201, pl.1, figs.1–6; pl.2, fig.8; text-figs.3A–B,4. Holotype: Duxbury, 1979a, pl.1, figs.1–2; text-fig.4; Fensome et al., 1993a, figs.1–2,7 — p.1133. Age: Valanginian.

ITHNACYSTA Slimani, 1994, p.107. Type: Slimani, 1994, pl.18, figs.27–29, as *Ithnacysta elongata*.

**elongata* Slimani, 1994, p.107–108, pl.17, figs.16–19; pl.18, figs.27–29; text-fig.14. Holotype: Slimani, 1994, pl.18, figs.27–29. Age: late Maastrichtian–earliest Danian.

JAINIELLA Khowaja-Ateequzzaman and Garg, 1995, p.245–246. Type: Khowaja-Ateequzzaman and Garg, 1995, pl.1, figs.1–2, as *Jainiella breviornata*.

**breviornata* Khowaja-Ateequzzaman and Garg, 1995, p.246–247, pl.1, figs.1–6. Holotype: Khowaja-Ateequzzaman and Garg, 1995, pl.1, figs.1–2. Age: Late Cretaceous.

plena (Islam, 1983c, p.90, pl.4, figs.4–6) Khowaja-Ateequzzaman and Garg, 1995, p.246. Holotype: Islam, 1983c, pl.4, fig.5. Originally *Trivalvadinium*, subsequently (and now) *Jainiella*. Age: early Eocene.

JANSONIA Pocock, 1972, p.97. Emendation: Riding and Walton in Riding et al., 1991, p.146,148. Type: Pocock, 1972, pl.29, fig.8, as *Jansonia jurassica*.

**jurassica* Pocock, 1972, p.97–98, pl.29, figs.8–9; text-figs.14–15. Holotype: Pocock, 1972, pl.29, fig.8; Jansonius, 1986, pl.3, figs.4–6. Age: late Bajocian.

manifesta Riding and Walton in Riding et al., 1991, p.148–149, pl.8, figs.1–16; text-figs.5A–G. Holotype: Riding et al., 1991, pl.8, fig.1. Age: Bathonian.

psilata Martínez et al., 1999, p.257–259, pl.1, figs.1–9; text-figs.5A–D. Holotype: Martínez et al., 1999, pl.1, figs.1–2; text-figs.5A–D. Age: Middle Jurassic.

"*scarffei*" Tykoezinski et al., 2001, p.84,86, pl.1, figs.1a–c,2a–c,3a–b,4a–c,5a–c; pl.4, figs.10–13. Holotype: Tykoezinski et al., 2001, pl.1, figs.1a–c. **NOW** *Fostericysta*. Originally *Jansonia*, subsequently (and now) *Fostericysta*. Age: late Bathonian.

JINHUDINIUM Qian Zeshu et al., 1986, p.23,28. Type: Qian Zeshu et al., 1986, pl.1, fig.5, as *Jinhudinium laevigatum*.

granulatum Qian Zeshu et al., 1986, p.23, pl.1, figs.1–4. Holotype: Qian Zeshu et al., 1986, pl.1, fig.2. Age: Paleocene–Eocene.

**laevigatum* Qian Zeshu et al., 1986, p.23–24, pl.1, figs.5–6; text-fig.2. Holotype: Qian Zeshu et al., 1986, pl.1, fig.5. Age: Paleocene–Eocene.

JUERGENELLA Banasová et al., 2007, p.111 ex Streng et al., 2009, p.236. Calcareous dinoflagellate genus (see Gottschling and Soehner, 2013, p.128). The name was not validly published in Banasová et al. (2007), since it was merely used in anticipation of future acceptance of the name (I.C.N. Article 36.1). Type: Hildebrand-Habel and Willems, 1999, pl.1, figs.8–10, as *Calcigonellum ansatum*.

**ansata* (Hildebrand-Habel and Willems, 1999, p.93, pl.1, figs.8–12; pl.2, figs.1–6; text-fig.2) Streng et al., 2009, p.237. Holotype: Hildebrand-Habel and Willems, 1999, pl.1, figs.8–10. Originally *Calcigonellum*, subsequently *?Calcigonellum*, thirdly (and now) *Juergenella*. Age: late Eocene.

granulata (Kohring, 1993a, p.55–57, pl.32, figs.g–m; text-fig.9) Streng et al., 2009, p.237. Holotype: Kohring, 1993a, pl.32, fig.k. Originally *Calcigonellum*, subsequently *?Calcigonellum*, thirdly (and now) *Juergenella*. Age: middle Oligocene.

remanei Streng et al., 2009, p.237, pl.9, figs.1–9, text-figs.3A,7. Holotype: Streng et al., 2009, pl.9, fig.1. Age: middle Miocene.

JUSELLA Vozzhennikova, 1963, p.183. Siliceous dinoflagellate genus. Type: Vozzhennikova, 1963, text-figs.19a–b, as *Jusella denticulata* (which see for lectotype).

crebraporosa Vozzhennikova, 1967, p.120, pl.53, figs.1–6. Holotype: Vozzhennikova, 1967, p.120 specified a holotype but did not give any details of the illustration(s). Age: early Oligocene.

**denticulata* Vozzhennikova, 1963, p.183; text-figs.19a–b. Holotype: Vozzhennikova, 1963, text-figs.19a–b; Vozzhennikova, 1967, pl.52, figs.4–5; lost according to Vozzhennikova (1967, p.119). Vozzhennikova (1967, p.119) considered that no description had been provided under this name by Vozzhennikova (1963). However, since the latter author provided a description for the genus *Jusella*, and since *Jusella denticulata* was the only species proposed at that time, the generic description also applied to the species (I.C.N. Article 38.5). The name *Jusella denticulata* was thus validly published in Vozzhennikova (1963). Age: early Oligocene.

"rariporosa" Vozzhennikova, 1967, p.119–120, pl.52, figs.1–5. Holotype: Vozzhennikova, 1963, text-figs.19a–b; Vozzhennikova, 1967, pl.52, figs.4–5; lost according to Vozzhennikova (1967, p.119). **Name illegitimate — nomenclatural senior synonym:** *Jusella denticulata*, which has the same holotype. Vozzhennikova (1967, p.119) designated a "lectotype" for *Jusella rariporosa*, but did not identify that specimen in the accompanying illustrations. Age: early Oligocene.

KAIWARADINIUM Wilson, 1978, p.81–82. Type: Wilson, 1978, figs.2A–B,3–5, as *Kaiwaradinium buccinatum*.

**buccinatum* Wilson, 1978, p.82, figs.2A–B,3–8. Holotype: Wilson, 1978, figs.2A–B,3–5; Fensome et al., 1993a, figs.1–3 — p.993; Fauconnier and Masure, 2004, pl.50, fig.7. Age: early Tithonian.

ramosum Wilson, 1984a, p.217,219,221, figs.12A–B,13–21. Holotype: Wilson, 1984a, figs.12A–B,16–17; Fensome et al., 1996, figs.1–2,7–8 — p.2315; Fauconnier and Masure, 2004, pl.50, fig.8. Age: Valanginian, according to Wilson and Helby (1988).

scrutillinum Backhouse, 1987, p.216,219, figs.6A–B,11E–I,14A. Holotype: Backhouse, 1987, figs.6A–B,11G–H; Fensome et al., 1996, figs.4–5,7–8 — p.2341; Fauconnier and Masure, 2004, pl.51, figs.1–3. Age: Valanginian.

KALLOSPHAERIDIUM de Coninck, 1969, p.44. Emendation: Jan du Chêne et al., 1985a, p.8–9. Type: de Coninck, 1969, pl.13, figs.14–15, as *Kallosphaeridium brevibarbatum*.

"*agglutinatum*" McIntyre and Brideaux, 1980, p.25, pl.12, figs.5–12. Holotype: McIntyre and Brideaux, 1980, pl.12, figs.7–9. **NOW** *Batiacasphaera*. Originally *Kallosphaeridium*?, subsequently (and now) *Batiacasphaera*. Questionable assignment: McIntyre and Brideaux (1980, p.25). Age: early-middle Valanginian.

"*aspersum*" (Jiabo, 1978, p.116, pl.31, figs.1–6; pl.49, figs.2–4) Sarjeant and Stancliffe, 1994, p.56. Holotype: Jiabo, 1978, pl.31, fig.1. Originally *Filisphaeridium* (Appendix A), subsequently (and now) *Kallosphaeridium*?. Questionable assignment: Sarjeant and Stancliffe (1994, p.56). Age: Oligocene.

"*bellulum*" (Jiabo, 1978, p.51, pl.23, figs.14–16) Lentin and Williams, 1981, p.160. Holotype: Jiabo, 1978, pl.23, fig.15. **NOW** *Batiacasphaera*?. Originally *Tenua* Eisenack, subsequently *Kallosphaeridium*?, thirdly *Batiacasphaera*, fourthly (and now) *Batiacasphaera*?, fifthly *Sentusidinium*. Questionable assignment: Lentin and Williams (1981, p.160). Age: Early Tertiary.

"*biornatum*" (Jiabo, 1978, p.52, pl.22, figs.21–29; pl.23, figs.1–4) Lentin and Williams, 1981, p.160. Holotype: Jiabo, 1978, pl.22, fig.24. **Combination not validly published:** basionym not fully referenced. **NOW** *Sentusidinium biornatum*. Originally *Tenua biornata*, subsequently *Kallosphaeridium biornatum* (combination not validly published), thirdly *Kallosphaeridium biparatum*, fourthly *Batiacasphaera biornata*, fifthly (and now) *Sentusidinium biornatum*. Age: Early Tertiary.

"subsp. *biornatum*". Autonym. Holotype: Jiabo, 1978, pl.22, fig.24. **NOW** *Sentusidinium biornatum* subsp. *biornatum*. Originally *Tenua biornata* subsp. *biornata*, subsequently *Kallosphaeridium biornatum* subsp. *biornatum* (combination not validly published), thirdly *Kallosphaeridium biparatum* subsp. *biparatum*, fourthly *Batiacasphaera biornata* subsp. *biornata*, fifthly (and now) *Sentusidinium biornatum* subsp. *biornatum*.

"subsp. *crassum*" (Jiabo, 1978, p.52, pl.23, figs.1–4) Lentin and Williams, 1981, p.160. Holotype: Jiabo, 1978, pl.23, fig.3. **Combination not validly published:** basionym not fully referenced. **NOW** *Sentusidinium biornatum* subsp. *crassum*. Originally *Tenua biornata* subsp. *crassa*, subsequently *Kallosphaeridium biornatum* subsp. *crassum* (combination not validly published), thirdly *Kallosphaeridium biparatum* subsp. *crassum*, fourthly *Batiacasphaera biornata* subsp. *crassa*, fifthly (and now) *Sentusidinium biornatum* subsp. *crassum*. Age: Early Tertiary.

biornatum Stover, 1977, p.73–74, pl.1, figs.9–10. Emendation: Jan du Chêne et al., 1985a, p.9–10. Holotype: Stover, 1977, pl.1, figs.9–10. Age: early Oligocene.

"*biparatum*" Lentin and Williams, 1981, p.160. Holotype: Jiabo, 1978, pl.22, fig.24. **NOW** *Sentusidinium biornatum*. Originally *Tenua biornata*, subsequently *Kallosphaeridium biornatum* (combination not validly published), thirdly *Kallosphaeridium biparatum*, fourthly *Batiacasphaera biornata*, fifthly (and now) *Sentusidinium biornatum*. Substitute name for *Tenua biornata* Jiabo, 1978, p.52, pl.22, figs.21–29; pl.23, figs.1–4 (an illegitimate name). Age: Early Tertiary.

"subsp. *biparatum*". Autonym. Holotype: Jiabo, 1978, pl.22, fig.24. **NOW** *Sentusidinium biornatum* subsp. *biornatum*. Originally *Tenua biornata* subsp. *biornata*, subsequently *Kallosphaeridium biornatum* subsp. *biornatum* (combination not validly published), thirdly *Kallosphaeridium biparatum* subsp. *biparatum*, fourthly *Batiacasphaera biornata* subsp. *biornata*, fifthly (and now) *Sentusidinium biornatum* subsp. *biornatum*.

"subsp. *crassum*" (Jiabo, 1978, p.52, pl.23, figs.1–4) Lentin and Williams, 1981, p.160. Holotype: Jiabo, 1978, pl.23, fig.3. **NOW** *Sentusidinium biornatum* subsp. *crassum*. Originally *Tenua biornata* subsp. *crassa*, subsequently *Kallosphaeridium biornatum* subsp. *crassum* (combination not validly published), thirdly *Kallosphaeridium biparatum* subsp. *crassum*, fourthly *Batiacasphaera biornata* subsp. *crassa*, fifthly (and now) *Sentusidinium biornatum* subsp. *crassum*. Age: Early Tertiary.

**brevibarbatum* de Coninck, 1969, p.44–45, pl.13, figs.14–15. Emendation: Jan du Chêne et al., 1985a, p.10. Holotype: de Coninck, 1969, pl.13, figs.14–15; Jan du Chêne et al., 1985a, pl.1, fig.3; text-fig.4A. Age: early Eocene.

callosum Dodekova, 1994, p.22–23, pl.4, figs.7–9. Holotype: Dodekova, 1994, pl.4, fig.7. Age: middle Tithonian–Berriasian.

capulatum Stover, 1977, p.74, pl.1, figs.11–13. Emendation: Jan du Chêne et al., 1985a, p.10–11. Holotype: Stover, 1977, pl.1, figs.12–13; Jan du Chêne et al., 1985a, pl.2, figs.1–7; text-figs.5A–B. Age: middle-late Oligocene.

?*circulare* (Cookson and Eisenack, 1971, p.219, pl.8, fig.6) Helby, 1987, p.324–325. Holotype: Cookson and Eisenack, 1971, pl.8, fig.6. Originally *Canningia*, subsequently *Canningia*?, thirdly *Batiacasphaera*, fourthly (and now) *Kallosphaeridium*?. Questionable assignment: Helby (1987, p.324–325). Age: Middle Cretaceous, ?Turonian.

coninckii (Burger, 1980a, p.74, pl.26, figs.5,6a–b) Burger, 1980b, p.277. Holotype: Burger, 1980a, pl.26, figs.6a–b. Originally *Membranosphaera*, subsequently (and now) *Kallosphaeridium*. Age: Albian.

"*curiosum*" Bujak, 1984, p.188, pl.2, figs.17–20. Holotype: Bujak, 1984, pl.2, fig.19. **NOW** *Batiacasphaera*. Originally *Kallosphaeridium*, subsequently (and now) *Batiacasphaera*. Age: middle-late Eocene.

dolomiticum Torricelli, 2000, p.261–262, pl.4, figs.9,12. Holotype: Torricelli, 2000, pl.4, fig.9. Age: late Hauterivian.

?*granulatum* (Norvick, 1976, p.79–80, pl.11, fig.9; pl.12, fig.3) Stover and Evitt, 1978, p.59. Holotype: Norvick, 1976, pl.11, fig.9. Originally *Membranosphaera*, subsequently (and now) *Kallosphaeridium*?. Questionable assignment: Stover and Evitt (1978, p.59). Age: Cenomanian.

?*helbyi* Lentin and Williams, 1989, p.206. Holotype: Cookson and Hughes, 1964, pl.8, fig.1. Originally *Canningia minor*, subsequently *Canningia? minor*, thirdly *Batiacasphaera minor*, fourthly *Chytroeisphaeridia minor*, fifthly *Kallosphaeridium? minus* (combination illegitimate), sixthly (and now) *Kallosphaeridium? helbyi*. Questionable assignment: Lentin and Williams (1989, p.206). Substitute name for *Kallosphaeridium? minus* (Cookson and Hughes, 1964, p.43, pl.8, figs.1–3,5) Helby, 1987, p.324–325 (an illegitimate name). Age: late Albian–early Cenomanian.

subsp. *helbyi*. Autonym. Holotype: Cookson and Hughes, 1964, pl.8, fig.1. Originally *Canningia? minor* subsp. *minor*, subsequently *Chytroeisphaeridia minor* subsp. *minor*, thirdly (and now) *Kallosphaeridium? helbyi* subsp. *helbyi*. Age: late Albian–early Cenomanian.

subsp. *psilatum* (Burger, 1980a, p.71, pl.25, figs.5–11) Lentin and Williams, 1989, p.206. Holotype: Burger, 1980a, pl.25, fig.10. Originally *Canningia? minor* var. *psilata*, subsequently *Canningia? minor* subsp. *psilata*, thirdly *Chytroeisphaeridia minor* subsp. *psilata*, fourthly (and now) *Kallosphaeridium? helbyi* subsp. *psilatum*. Age: Aptian–Albian.

hypornatum Prauss, 1989, p.40–41, pl.6, figs.1–4; text-fig.16. Holotype: Prauss, 1989, pl.6, fig.1; text-fig.16. Age: middle-late Bajocian.

?*inornatum* Batten and Lister, 1988, p.344, figs.3a–b,d. Holotype: Batten and Lister, 1988, figs.3a–b. Questionable assignment: Batten and Lister (1988, p.344). Junior homonym: *Kallosphaeridium inornatum* Prauss, 1989. Age: Hauterivian.

"*inornatum*" Prauss, 1989, p.41–42, pl.5, figs.4–6, pl.6, fig.18; text-fig.17. Holotype: Prauss, 1989, pl.6, fig.18; text-fig.17. **Name illegitimate** — **senior homonym**: *Kallosphaeridium inornatum* Batten and Lister, 1988. **Substitute name**: *Kallosphaeridium praussii*. Originally *Kallosphaeridium inornatum* Prauss (name illegitimate), subsequently (and now) *Kallosphaeridium praussii*. Age: Aalenian–mid Bajocian.

jiyangense Xu Jinli et al., 1997, p.100, pl.18, fig.11; pl.20, fig.7 ex He Chengquan et al., 2009, p.656. Holotype: Xu Jinli et al., 1997, pl.18, fig.11. The name was not validly published in Xu Jinli et al. (1997), since no English or Latin description was provided: He Chengquan et al. (2009, p.656) validated the name it by publishing an English diagnosis. Age: middle-late Eocene.

"?*minus*" (Cookson and Hughes, 1964, p.43, pl.8, figs.1–3,5) Helby, 1987, p.324–325. Holotype: Cookson and Hughes, 1964, pl.8, fig.1. **Combination illegitimate** — **senior homonym**: *Kallosphaeridium? minus* (Jiabo, 1978) Lentin and Williams, 1981. **Substitute name**: *Kallosphaeridium helbyi*. Originally *Canningia minor*, subsequently *Canningia? minor*, thirdly *Batiacasphaera minor*, fourthly *Chytroeisphaeridia minor*, fifthly *Kallosphaeridium minus* (combination illegitimate), sixthly (and now) *Kallosphaeridium? helbyi*. Questionable assignment: Helby (1987, p.324–325). Age: late Albian–early Cenomanian.

"?*minus*" (Jiabo, 1978, p.52–53, pl.23, figs.5–7) Lentin and Williams, 1981, p.161. Holotype: Jiabo, 1978, pl.23, fig.5. **NOW** *Sentusidinium minus*. Originally *Tenua hystrix* subsp. *minor*, subsequently *Kallosphaeridium? minus*, thirdly *Batiacasphaera minor* (combination illegitimate), fourthly *Batiacasphaera sinensis*, fifthly *Batiacasphaera jiaboi* (name not validly published), sixthly (and now) *Sentusidinium minus*. Questionable assignment: Lentin and Williams (1981, p.161). Junior homonym: *Kallosphaeridium? minus* (Cookson and Hughes, 1964) Helby, 1987. Age: Early Tertiary.

nigeriense Jan du Chêne et al., 1985a, p.12, pl.4, figs.1–13. Holotype: Jan du Chêne et al., 1985a, pl.4, figs.1–3. Age: late Paleocene (Thanetian)–early Eocene (Ypresian).

"*norvickii*" (Burger, 1980a, p.73–74, pl.26, figs.7–8) Lentin and Williams, 1981, p.161. Holotype: Burger, 1980a, pl.26, fig.7. **NOW** *Batiacasphaera*. Originally *Membranosphaera*, subsequently *Kallosphaeridium*, thirdly (and now) *Batiacasphaera*. Age: Albian.

orchiesense de Coninck, 1975, p.101–102, pl.18, figs.15–17. Emendation: Jan du Chêne et al., 1985a, p.12–13. Holotype: de Coninck, 1975, pl.18, figs.15–17; Jan du Chêne et al., 1985a, pl.3, figs.8–13; text-figs.4A–B. Age: early Eocene (Ypresian).

parvum Jan du Chêne, 1988, p.160–161, pl.13, figs.7–9; pl.14, figs.10–12; pl.15, figs.9–12; pl.16, figs.9–10; text-fig.5. Holotype: Jan du Chêne, 1988, pl.13, figs.7–8. This species was cited as "Jan du Chêne, sous presse" in Soncini and Rauscher (1988, p.449). Age: Danian.

praussii Lentin and Williams, 1993, p.365. Holotype: Prauss, 1989, pl.6, fig.18; text-fig.17. Originally *Kallosphaeridium inornatum* Prauss, 1989 (name illegitimate), subsequently (and now) *Kallosphaeridium praussii*. Substitute name for *Kallosphaeridium inornatum* Prauss, 1989, p.41–42, pl.5, figs.4–6; pl.6, fig.18; text-fig.17 (an illegitimate name). Age: Aalenian–mid Bajocian.

?*reticuloidum* (Jiabo, 1978, p.115–116, pl.31, figs.18–19) Sarjeant and Stancliffé, 1994, p.56. Holotype: Jiabo, 1978, pl.31, fig.19. Originally *Baltisphaeridium* (Appendix A), subsequently *Filisphaeridium* (Appendix A), thirdly (and now) *Kallosphaeridium?*. Questionable assignment: Sarjeant and Stancliffé (1994, p.56). Age: late Oligocene.

retirugosum (He Chengquan, 1991, p.56, pl.8, fig.11) He Chengquan et al., 2009, p.164. Holotype: He Chengquan, 1991, pl.8, fig.11. Originally *Canningia*; subsequently (and now) *Kallosphaeridium*. Age: Late Cretaceous.

?*ringnesiorum* (Manum and Cookson, 1964, p.15, pl.2, fig.10) Helby, 1987, p.324–325. Holotype: Manum and Cookson, 1964, pl.2, fig.10. Originally *Canningia*, subsequently *Canningia?*, thirdly *Batiacasphaera*, fourthly *Chytroeisphaeridia*, fifthly (and now) *Kallosphaeridium?*. Questionable assignment: Helby (1987, p.324–325). The epithet is correctly rendered as "*ringnesiorum*", rather than "*ringnesii*", since the species is named for the Ringnes brothers. Tocher and Jarvis (1987, p.151) also proposed this combination, but without question. Age: Campanian–Maastrichtian.

?*romaense* (Burger, 1980a, p.74, pl.27, figs.1–3) Burger, 1980b, p.277. Holotype: Burger, 1980a, pl.27, fig.3. Originally *Membranosphaera*, subsequently *Kallosphaeridium*, thirdly (and now) *Kallosphaeridium?*. Questionable assignment: Jan du Chêne et al. (1985a, p.15). Age: Aptian.

?*spongiosum* Batten and Lister, 1988, p.344–345, figs.4e–h. Holotype: Batten and Lister, 1988, figs.4e–g. Questionable assignment: Batten and Lister (1988, p.344). Age: late Hauterivian.

yorubaense Jan du Chêne and Adediran, 1985, p.22–23, pl.6, figs.7–12; pl.7, figs.7–10, pl.10; figs.1–4; text-fig.7. Holotype: Jan du Chêne and Adediran, 1985, pl.6, figs.11–12. Age: late Paleocene–early Eocene.

KALYPTEA Cookson and Eisenack, 1960b, p.256. Emendation: Wiggins, 1975, p.110. Taxonomic senior synonym: *Pareodinia*, according to Gocht (1970b, p.154) — however, Lentin and Williams (1993, p.365) retained *Kalyptea*. Taxonomic junior synonyms: *Komewuia*, according to Wiggins (1975, p.110) and, by implication in Dörhöfer and Davies (1980, p.30), who considered *Komewuia* to be the senior name — however, Chen (1982, p.32) retained *Komewuia*; *Netrelytron*, according to Wiggins (1975, p.110) and Poulsen (1996, p.60). Type: Cookson and Eisenack, 1960b, pl.39, fig.1, as *Kalyptea diceras*.

"*aceras*" Manum and Cookson, 1964, p.27–28, pl.6, figs.9–11. Holotype: Manum and Cookson, 1964, pl.6, fig.9. **NOW** *Caligodinium*. Originally *Kalyptea*, subsequently (and now) *Caligodinium*, thirdly *Pareodinia*. Taxonomic junior synonym: *Caligodinium amiculum*, according to Heilmann-Clausen (1985, p.18) — however, Lentin and Williams (1989, p.44) retained *Caligodinium amiculum*. Age: Cenomanian.

"*amiculum*" (Drugg, 1970b, p.815, figs.8A–B,9A–E) Jain and Millepied, 1975, p.145. Holotype: Drugg, 1970b, fig.9A; Biffi and Manum, 1988, text-fig.1D. **NOW** *Caligodinium*. Originally (and now) *Caligodinium*, subsequently *Kalyptea*. Taxonomic senior synonym: *Caligodinium aceraceras*, according to Heilmann-Clausen (1985, p.18) — however, Lentin and Williams (1989, p.44) retained *Caligodinium amiculum*. N.I.A. Age: Danian.

**diceras* Cookson and Eisenack, 1960b, p.256–257, pl.39, fig.1. Emendation: Fisher and Riley, 1980, p.323, as *Kalyptea diceras*. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.1. Originally (and now) *Kalyptea*, subsequently *Komewuia*, thirdly *Pareodinia*. Lentin and Williams (1993, p.366) retained this species in *Kalyptea*. Taxonomic junior synonym: *Kalyptea jurassica*, according to Below (1990, p.65). Gocht (1970b, p.154) considered *Pareodinia ceratophora* to be the questionable taxonomic senior synonym of this species. Age: Tithonian.

?*distincta* Jain and Millepied, 1975, p.145–146, pl.4, fig.65. Holotype: Jain and Millepied, 1975, pl.4, fig.65. Originally *Kalyptea*, subsequently (and now) *Kalyptea*?. Questionable assignment: Stover and Evitt (1978, p.110) as a problematic species. Age: Aptian–Albian.

"*glabra*" (Cookson and Eisenack, 1960b, p.257, pl.39, figs.7–8) Wiggins, 1975, p.110. Emendation: Chen, 1982, p.32, as *Komewuia glabra*. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.8. **NOW** *Komewuia*. Originally (and now) *Komewuia*, subsequently *Kalyptea*. Lentin and Williams (1981, p.162) retained this species in *Kalyptea*. Age: ?Tithonian.

"*granulata*" Jiabo, 1978, p.91, pl.6, fig.20. Holotype: Jiabo, 1978, pl.6, fig.20. **NOW** *Caligodinium*?. Originally *Kalyptea*, subsequently *Caligodinium*, thirdly (and now) *Caligodinium*?. Age: Early Tertiary.

"?halosa" Filatoff, 1975, p.91, pl.29, figs.10–11. Emendation: Prauss, 1989, p.42, as *Pareodinia halosa*. Holotype: Filatoff, 1975, pl.29, fig.10. **NOW** *Pareodinia*. Originally *Kalyptea*, subsequently *Kalyptea*?, thirdly *Caddasphaera*, fourthly *Pterocystidiopsis* (Appendix A), fifthly (and now) *Pareodinia*. Questionable assignment: Stover and Evitt (1978, p.110) as a problematic species. Age: Bajocian.

?*indica* Jain and Maheshwari in Jain et al., 1982, p.24–25, pl.1, figs.7–12; text-figs.1A–C. Holotype: Jain et al., 1982, pl.1, figs.8–9. Originally *Kalyptea*, subsequently (and now) *Kalyptea*?. Questionable assignment: Lentin and Williams (1985, p.205). Age: ?Late Jurassic.

"*jurassica*" Alberti, 1961, p.21, pl.7, fig.8. Holotype: Alberti, 1961, pl.7, fig.8. Originally *Kalyptea*, subsequently *Netrelytron* (combination not validly published). **Taxonomic senior synonym:** *Kalyptea diceras*, according to Below (1990, p.65). Taxonomic senior synonym: *Netrelytron* (as *Kalyptea*, now *Pareodinia*) *stegasta*, according to Wiggins (1975, p.110) and Kunz (1990 [January], p.12) — however, Below (1990 [October], p.65) considered

Kalyptea jurassica to be a taxonomic junior synonym of *Kalyptea diceras*. Gocht (1970b, p.154) considered *Pareodinia ceratophora* to be the questionable taxonomic senior synonym of this species. Age: Bathonian–Callovian.

"*monoceras*" Cookson and Eisenack, 1960b, p.257, pl.39, figs.2–3. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.2. **Taxonomic senior synonym:** *Pareodinia ceratophora*, according to Wiggins (1975, p.103) and Kunz (1990, p.13). Age: Late Jurassic.

"*par*" (Gitmez, 1970, p.314–315, pl.5, fig.4; pl.9, fig.4) Dodekova, 1992, p.51. Holotype: Gitmez, 1970, pl.9, fig.4. Originally *Netrelytron*, subsequently *Kalyptea*. **Taxonomic senior synonym:** *Netrelytron* (as *Kalyptea*) *stegastum*, according to Poulsen (1996, p.61). Taxonomic senior synonyms: *Pareodinia ceratophora* subsp. *ceratophora* (as *Pareodinia ceratophora* var. *ceratophora*), according to Below (1990, p.65); *Netrelytron* (as *Kalyptea*) *trinetrum*, according to Wiggins (1975, p.110). Gitmez (1970, p.314) indicated that the epithet is based on the Latin noun "par" (pair); hence, as a noun in apposition, it should be rendered as "*par*". N.I.A. Age: early Kimmeridgian.

stegasta (Sarjeant, 1961a, p.114–115, pl.15, fig.15; text-fig.14) Wiggins, 1975, p.110. Holotype: Sarjeant, 1961a, pl.15, fig.15; text-fig.14 (left figure); Sarjeant et al., 1987, pl.1, fig.6. Originally *Netrelytron*, subsequently (and now) *Kalyptea*, thirdly *Pareodinia*. Poulsen (1996, p.61) retained this species in *Kalyptea*. Taxonomic junior synonyms: *Netrelytron par* and *Netrelytron trinetrum*, both according to Poulsen (1996, p.61); *Kalyptea jurassica*, according to Wiggins (1975, p.110) and Kunz (1990 [January], p.12) — however, Below (1990 [October], p.65) considered *Kalyptea jurassica* to be a taxonomic junior synonym of *Kalyptea* (as *Pareodinia*) *diceras*. Age: early Oxfordian.

"*trinetra*" (Sarjeant, 1966c, p.199–200, pl.22, fig.3; text-fig.51) Wiggins, 1975, p.110. Holotype: Sarjeant, 1966c, pl.22, fig.3. Originally *Netrelytron*, subsequently *Kalyptea*, thirdly *Pareodinia*. **Taxonomic senior synonym:** *Netrelytron* (as *Kalyptea*) *stegastum*, according to Poulsen (1996, p.61). Taxonomic junior synonym: *Netrelytron par*, according to Wiggins (1975, p.110). For etymology, see under *Pareodinia trinetra*. Age: middle Barremian.

wisemaniae Stover and Helby, 1987a, p.110, figs.8,9A–C. Holotype: Stover and Helby, 1987a, fig.9A; Fensome et al., 1996, fig.1 — p.2451. Age: Berriasian.

KENLEYIA Cookson and Eisenack, 1965b, p.135–136. Type: Cookson and Eisenack, 1965b, pl.17, fig.3, as *Kenleyia pachycerata*.

conspicua He Chengquan, 1991, p.117, pl.12, figs.2,5. Holotype: He Chengquan, 1991, pl.12, fig.2. Age: early Eocene.

"*essentialis*" (de Coninck, 1969, p.38, pl.11, figs.7–8) Stover and Evitt, 1978, p.167. Holotype: de Coninck, 1969, pl.11, figs.7–8. **NOW** *Fibrocyta*. Originally *Lanternosphaeridium*, subsequently *Kenleyia?*, thirdly (and now) *Fibrocyta*. Questionable assignment: Stover and Evitt (1978 p.167). Age: early Eocene.

"*fimbriata*" Cookson and Eisenack, 1967b, p.252, pl.40, figs.1–7. Holotype: Cookson and Eisenack, 1967b, pl.40, fig.3. **NOW** *Muratodinium*. Originally *Kenleyia*, subsequently (and now) *Muratodinium*. Age: late Paleocene.

leptocerata Cookson and Eisenack, 1965b, p.136, pl.17, figs.5–6. Holotype: Cookson and Eisenack, 1965b, pl.17, fig.6. Age: Paleocene.

lophophora Cookson and Eisenack, 1965b, p.136–137, pl.17, figs.7–10. Holotype: Cookson and Eisenack, 1965b, pl.17, fig.8. Age: Paleocene.

nuda de Coninck, 1969, p.45–46, pl.13, figs.24–25. Holotype: de Coninck, 1969, pl.13, figs.24–25. Originally *Kenleyia?*, subsequently (and now) *Kenleyia*. Questionable assignment: de Coninck (1969, p.45) — however, Brinkhuis and Leereveld (1988, p.17) included the species in *Kenleyia* without question. Age: early Eocene.

**pachycerata* Cookson and Eisenack, 1965b, p.136, pl.17, figs.1–4. Holotype: Cookson and Eisenack, 1965b, pl.17, fig.3. Age: Paleocene.

shabaka Slimani et al., 2012, p.345–346, fig.5A–L. Holotype: Slimani et al., 2012, fig.5A–D. Age: early Danian.

xinjiangensis He Chengquan, 1991, p.117–118, pl.12, fig.1. Holotype: He Chengquan, 1991, pl.12, fig.1. Age: early Eocene.

KEUPPISPHAERA Lentin and Williams, 1989, p.397. Emendation: Keupp and Kowalski, 1992, p.216, as *Keuppisphaera*. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1300). Substitute name for *Hexasphaera* Keupp, 1987, p.41 (an illegitimate name). Type: Keupp, 1987, pl.6, figs.8–12, as *Hexasphaera radiata*.

"*minuta*" (Keupp, 1987, p.40–41, pl.6, figs.1–7; text-fig.2a) Keupp and Kowalski, 1992, p.215. Holotype: Keupp, 1987, pl.6, figs.5–6. **Combination not validly published**: basionym not fully referenced. **NOW** *Calcigonellum*?. Originally *Calcigonellum*, subsequently *Keuppisphaera* (combination not validly published), thirdly (and now) *?Calcigonellum*. Age: middle Albian–early Cenomanian.

**radiata* (Keupp, 1987, p.41, pl.6, figs.8–12; text-fig.4) Lentin and Williams, 1989, p.397. Emendation: Keupp and Kowalski, 1992, p.216–217, as *Keuppisphaera radiata*. Holotype: Keupp, 1987, pl.6, figs.8–12. Originally *Hexasphaera* Keupp (name illegitimate), subsequently (and now) *Keuppisphaera*. Age: Albian–early Cenomanian.

KILWACYSTA Schrank, 2005, p.62. Type: Schrank, 2005, pl.6, figs.2,4, as *Kilwacysta semiseptata*.

multiramosa Schrank, 2005, p.64,66, pl.7, figs.1–4. Holotype: Schrank, 2005, pl.7, figs.1,3. Age: Tithonian.

**semiseptata* Schrank, 2005, p.62,64, pl.6, figs.2–6. Holotype: Schrank, 2005, pl.6, figs.2,4. Age: Tithonian.

KIOKANSIUM Stover and Evitt, 1978, p.167. Emendation: Duxbury, 1983, p.48. Taxonomic junior synonyms: *Bacchidinium*, according to Below (1982c, p.13–15) and Davey (1982a, p.377); *Nexosispinum*, according to Stover and Williams (1987, p.163) — however, Prössl (1990, p.104) retained *Nexosispinum*; *Taleisphaera*, according to Below (1982c, p.13–15) — however, Lentin and Williams (1985, p.206) retained *Taleisphaera*. Type: Tasch et al., 1964, pl.3, fig.8, as *Hystrichosphaeridium unituberculatum*.

"*brevispinosum*" Iosifova, 1992, p.61–62, pl.10, figs.2a–b,3a–b. Holotype: Iosifova, 1992, pl.10, figs.3a–b; Iosifova, 1996, pl.14, figs.1a–c. **NOW** *Warrenia*?. Originally *Kiokansium*, subsequently (and now) *Warrenia*?. Age: Valanginian.

"*corollum*" Hasenboehler in Below, 1984, p.634, pl.5, figs.2–4. **Name not validly published**: no description given. Below (1984, p.634) gave the citation "*Kiokansium corollum* (Hasenboehler, in press)".

declinatum Gao Ruiqi et al., 1992a, p.21,27, pl.2, figs.1–4. Holotype: Gao Ruiqi et al., 1992a, pl.2, fig.2. Age: Cenomanian.

?erectum (Manum and Cookson, 1964, p.14, pl.3, figs.5–6) Below, 1982c, p.15. Holotype: Manum and Cookson, 1964, pl.3, fig.5. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cordosphaeridium*?, fourthly *Cleistosphaeridium*?, fifthly (and now) *Kiokansium*?. Questionable assignment: Below (1982c, p.15). Age: Albian–Turonian.

"*hesperus*" (Davey, 1979b, p.558, pl.6, figs.1–5) Stover and Williams, 1987, p.163. Holotype: Davey, 1979b, pl.6, fig.5; Fensome et al., 1995, fig.3 — p.1541. **NOW** *Nexosispinum*. Originally (and now) *Nexosispinum*, subsequently *Kiokansium*. N.I.A. Age: Aptian–Albian.

"*hydra*" (Duxbury, 1979a, p.201, pl.2, figs.1–4,6–7) Below, 1982c, p.16. Emendation: Harding, 1986a, p.97–98,100, as *Taleisphaera hydra*. Holotype: Duxbury, 1979a, pl.2, figs.1,4; Fensome et al., 1993a, figs.1–2 — p.1233. **NOW** *Taleisphaera*. Originally (and now) *Taleisphaera*, subsequently *Kiokansium*. N.I.A. Age: middle Barremian.

perprolatum Singh, 1983, p.150–151, pl.54, figs.7–8. Holotype: Singh, 1983, pl.54, fig.7. Age: middle Cenomanian.

"*polypes*" (Cookson and Eisenack, 1962b, p.491–492, pl.4, figs.11–13) Below, 1982c, p.16. Emendation: Duxbury, 1983, p.49, as *Kiokansium polypes*. Holotype: Cookson and Eisenack, 1962b, pl.4, figs.11–13; Fensome et al., 1996, figs.1–3 — p.2283. Originally *Hystrichosphaeridium recurvatum* subsp. *polypes*, subsequently *Polysphaeridium?* *polypes* (combination not validly published), thirdly *Cleistosphaeridium polypes*, fourthly *Bacchidinium polypes*, fifthly *Impletosphaeridium polypes*, sixthly *Kiokansium polypes*. **Taxonomic senior synonym** (at specific rank): *Hystrichosphaeridium* (as *Kiokansium*) *unituberculatum*, by implication in Duxbury (1983, p.49), who considered *Hystrichosphaeridium recurvatum* subsp. *polypes* (as *Kiokansium polypes*) to be the senior name. Taxonomic junior synonym: *Cleistosphaeridium?* *solidum*, according to Below (1982c, p.16). Age: Albian–Cenomanian.

"subsp. *densum*" (He Chengquan and Li Peng, 1981, p.65, pl.31, figs.14–17; text-fig.6) Lentin and Williams, 1985, p.207. Holotype: He Chengquan and Li Peng, 1981, pl.31, fig.14; text-fig.6. **NOW** *Impletosphaeridium densum*. Originally *Impletosphaeridium polypes* subsp. *densum*, subsequently *Kiokansium polypes* subsp. *densum*, thirdly (and now) *Impletosphaeridium densum*. Age: late Oligocene.

"subsp. *polypes*". Autonym. Holotype: Cookson and Eisenack, 1962b, pl.4, figs.11–13; Fensome et al., 1996, figs.1–3 — p.2283. **Now redundant**. Originally *Cleistosphaeridium polypes* subsp. *polypes*, subsequently *Bacchidinium polypes* subsp. *polypes*, thirdly *Impletosphaeridium polypes* subsp. *polypes*, fourthly *Kiokansium polypes* subsp. *polypes*.

prolatum Duxbury, 1983, p.49–50, pl.6, figs.4,8. Emendation: Masure, 1986, p.114. Holotype: Duxbury, 1983, pl.6, fig.8. Age: late Aptian–early Albian.

regulatum Gao Ruiqi et al., 1992a, p.21,27–28 pl.2, figs.5–9. Holotype: Gao Ruiqi et al., 1992a, pl.2, fig.5. Age: Cenomanian.

"*sarmentum*" (Davey, 1979b, p.555, pl.1, figs.8–12) Davey, 1982a, p.377. Holotype: Davey, 1979b, pl.1, figs.8–9,12. **NOW** *Kleithriasphaeridium?*. Originally *Bacchidinium*, subsequently *Kiokansium*, thirdly (and now) *Kleithriasphaeridium?*. N.I.A. Age: late Aptian–middle Albian.

**unituberculatum* (Tasch in Tasch et al., 1964, p.194, pl.3, fig.8) Stover and Evitt, 1978, p.167,267. Holotype: Tasch et al., 1964, pl.3, fig.8; Eisenack and Kjellström, 1972, p.713; Fensome et al., 1995, fig.1 — p.1861. Originally *Hystrichosphaeridium*, subsequently (and now) *Kiokansium*. Taxonomic junior synonyms (at specific rank): *Hystrichosphaeridium recurvatum* subsp. *polypes* (as *Kiokansium polypes*), by implication in Duxbury (1983, p.49), who considered *Hystrichosphaeridium recurvatum* subsp. *polypes* (as *Kiokansium polypes*) to be the senior name; *Hystrichosphaeridium aruncium*, *Hystrichosphaeridium eccentricum*, *Hystrichosphaeridium entomium*, *Hystrichosphaeridium fabium*, *Hystrichosphaeridium folium*, *Hystrichosphaeridium kiowanum*, *Hystrichosphaeridium magnarmatum*, *Hystrichosphaeridium marsupium*, *Hystrichosphaeridium perovatum*, *Hystrichosphaeridium protellipticum*, *Hystrichosphaeridium replexum*, *Hystrichosphaeridium tribrachiosum*, *Hystrichosphaeridium triradicatum*, and *Hystrichosphaeridium valgum*, all according to Stover and Evitt (1978, p.267). Age: Albian.

"*vetusculum*" (Davey, 1974, p.45, pl.1, figs.1–2) Stover and Williams, 1987, p.163. Holotype: Davey, 1974, pl.1, fig.2. **NOW** *Nexosispinum*. Originally *Adnatosphaeridium*, subsequently *Systematophora*, thirdly (and now) *Nexosispinum*, fourthly *Kiokansium*. Age: early Barremian.

williamsii Singh, 1983, p.150, pl.54, figs.3–6. Holotype: Singh, 1983, pl.54, fig.3. Age: Albian–Cenomanian.

"**KISSELEVIA**" Vozzhennikova, 1963, p.183 ex Vozzhennikova, 1967, p.103. Emendations: Lentin and Williams, 1976, p.134–137 and Lentin and Vozzhennikova, 1989, p.221, both as *Kisselovia*. **Taxonomic senior synonym:** *Rhombodinium*, according to Williams et al. (2015, p.309–310). This name, as *Kisselovia*, was not validly published in Vozzhennikova (1963) since no validly published species names were assigned to it: Vozzhennikova (1963) indicated a "type species" (*Kisselevia ornata*), but did not provide a description for it, and since she assigned two species to the genus, the generic description cannot be taken as the description of the "type species" also. Williams et al. (1998, p.350) indicated that the correct spelling of this generic name is *Kisselevia*, as this was the version used in the validating publication (Vozzhennikova, 1967). Type: Vozzhennikova, 1967, pl.44, fig.6, as *Kisselevia ornata* (which see for lectotype).

"**aculeata**" Michoux, 1988, p.24,26, pl.1, figs.1,4,7–8; pl.2, figs.1–2, text-figs.5A–B,6A–B. Holotype: Michoux, 1988, pl.1, figs. 1,4,7; text-figs.5A–B. **NOW** *Michouxdinium*. Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Michouxdinium*. Age: early Eocene.

"**?clathrata**" (Eisenack, 1938b, p.187; fig.5) Lentin and Williams, 1976, p.136. Holotype: Eisenack, 1938b, fig.5; Eisenack, 1954b, pl.7, fig.12. **NOW** *Talladinium?* Originally *Wetzeliella*, subsequently *Kisselevia?*, thirdly *Charlesdowniea*, fourthly (and now) *Talladinium?* Questionable assignment: Lentin and Williams (1976, p.136). Taxonomic senior synonym: *Wetzeliella* (as *Hystrichosphaeridium articulata*, according to Pasteris (1948, p.42) — however, this synonymy has not been generally accepted. Age: late Eocene–early Oligocene.

"subsp. **angulosa**" (Châteauneuf and Gruas-Cavagnetto, 1978, p.69–70, pl.5, figs.8–9) Lentin and Vozzhennikova, 1989, p.227. Holotype: Châteauneuf and Gruas-Cavagnetto, 1978, pl.5, figs.8–9. **NOW** *Talladinium? angulosum*. Originally *Kisselevia clathrata* subsp. *angulosa*, subsequently *Charlesdowniea clathrata* subsp. *angulosa*, thirdly (and now) *Talladinium? angulosum*. Age: early Oligocene (Sannoisian).

"subsp. **clathrata**". Autonym. Holotype: Eisenack, 1938b, fig.5; Eisenack, 1954b, pl.7, fig.12. **Now redundant**. Originally *Wetzeliella clathrata* subsp. *clathrata*, subsequently *Kisselevia? clathrata* subsp. *clathrata*, thirdly *Charlesdowniea clathrata? subsp. clathrata*.

"subsp. **fasciata**" (Rozen, 1965, p.296–297; pl.2, fig.13; text-fig.4) Lentin and Williams, 1976, p.136. Holotype: Rozen, 1965, pl.2, fig.13; text-fig.4. **NOW** *Charlesdowniea? fasciata*. Originally *Wetzeliella clathrata* var. *fasciata*, subsequently *Wetzeliella clathrata* subsp. *fasciata*, thirdly *Kisselevia? clathrata* subsp. *fasciata*, fourthly *Kisselevia fasciata*, fifthly *Charlesdowniea fasciata*, sixthly *Charlesdowniea? fasciata*. Age: late Eocene.

"**coleothrypta**" (Williams and Downie, 1966b, p.185–186, pl.18, figs.8–9; text-fig.47) Lentin and Williams, 1976, p.136. Holotype: Williams and Downie, 1966b, pl.18, fig.8; text-fig.47; Bujak et al., 1980, pl.12, figs.7–8. **NOW** *Charlesdowniea*. Originally *Wetzeliella*, subsequently *Kisselevia*, thirdly (and now) *Charlesdowniea*. Age: early Eocene.

"subsp. **coleothrypta**". Autonym. Holotype: Williams and Downie, 1966b, pl.18, fig.8; text-fig.47; Bujak et al., 1980, pl.12, figs.7–8. **NOW** *Charlesdowniea coleothrypta* subsp. *coleothrypta*. Originally *Kisselevia coleothrypta* subsp. *coleothrypta*, subsequently (and now) *Charlesdowniea coleothrypta* subsp. *coleothrypta*.

"subsp. **rotundata**" Châteauneuf and Gruas-Cavagnetto, 1978, p.68–69, pl.3, fig.5. Holotype: Châteauneuf and Gruas-Cavagnetto, 1978, pl.3, fig.5. **NOW** *Charlesdowniea? rotundata*. Originally *Kisselevia coleothrypta* subsp. *rotundata*, subsequently *Charlesdowniea coleothrypta* subsp. *rotundata*, thirdly (and now) *Charlesdowniea? rotundata*. Age: middle Eocene (Lutetian–Bartonian).

"**columna**" Michoux, 1988, p.28,30, pl.1, figs.2–3,5–6; pl.2, figs.3–5; text-figs.7A–B. Holotype: Michoux, 1988, pl.1, figs.2–3. **NOW** *Piladinium*. Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Piladinium*. N.I.A. Age: early Eocene.

"*crassoramosa*" (Williams and Downie, 1966b, p.189–190; pl.19, figs.1,5,7; text-fig.50) Damassa, 1979a, p.837. Holotype: Williams and Downie, 1966b, pl.19, fig.7. **NOW** *Sophismatia crassoramosa*. Originally *Wetzeliella tenuivirgula* var. *crassoramosa*, subsequently *Wetzeliella tenuivirgula* subsp. *crassoramosa*, thirdly *Kisselevia tenuivirgula* subsp. *crassoramosa*, fourthly *Kisselevia crassoramosa*, fifthly *Charlesdowniea crassoramosa*, sixthly (and now) *Sophismatia crassoramosa*. Age: early Eocene.

"*edwardsii*" (Wilson, 1967c, p.477, figs.8–9) Stover and Evitt, 1978, p.111. Holotype: Wilson, 1967c, fig.8. **NOW** *Piladinium*. Originally *Wetzeliella*, subsequently *Kisselevia*, thirdly *Charlesdowniea*, fourthly (and now) *Piladinium*. Age: early Eocene.

"*fasciata*" (Rozen, 1965, p.296–297; pl.2, fig.13; text-fig.4) Costa and Downie, 1979, p.44. Holotype: Rozen, 1965, pl.2, fig.13; text-fig.4. **NOW** *Charlesdowniea? fasciata*. Originally *Wetzeliella clathrata* var. *fasciata*, subsequently *Wetzeliella clathrata* subsp. *fasciata*, thirdly *Kisselevia? clathrata* subsp. *fasciata*, fourthly *Kisselevia fasciata*, fifthly *Charlesdowniea fasciata*, sixthly (and now) *Charlesdowniea? fasciata*. Age: late Eocene.

"*fusififormis*" Mao Shaozhi and Norris, 1988, p.49–50, pl.13, figs.2–4. Holotype: Mao Shaozhi and Norris, 1988, pl.13, fig.3. **NOW** *Talladinium*. Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Talladinium*. Age: early Oligocene.

"*?insolens*" Eaton, 1976, p.292–293, pl.18, figs.1–2. Holotype: Eaton, 1976, pl.18, fig.2; Bujak et al., 1980, pl.11, fig.4. **NOW** *Sophismatia*. Originally *Kisselevia*, subsequently *Kisselevia?*, thirdly (and now) *Sophismatia*. Questionable assignment: Lentin and Vozzhennikova (1989, p.221). Age: early Eocene.

"*major*" Vozzhennikova, 1967, p.104–105. Holotype: Vozzhennikova, 1960, pl.3, fig.1, lost according to Lentin and Vozzhennikova (1989, p.215–216). **NOW** *Rhombodinium? vozzhennikovae*. Originally *Kisselevia major*, subsequently (and now) *Rhombodinium? vozzhennikovae*. Fensome and Williams (2004, p.382) did not follow Lentin and Vozzhennikova (1989) in considering this name to be not validly published. Vozzhennikova (1967) provided a description and designated a holotype from Vozzhennikova (1960): that the holotype is lost has no bearing on the validity of the name. Lentin and Vozzhennikova (1989) noted that no potential lectotype is available. This name was not validly published in Vozzhennikova (1963, fig.15) since that author did not provide a description. Age: Eocene.

"**ornata*" Vozzhennikova, 1967, p.103–104, pl.42, figs.1–3; pl.43, figs.1–4; pl.44, figs.1–12; pl.45, figs.1–3. Emendations: Lentin and Vozzhennikova, 1989, p.223; Vasilyeva in Andreeva-Grigorovich et al., 2011, p.53. Holotype: Vozzhennikova, 1967, pl.44, fig.6, lost according to Lentin and Vozzhennikova (1989, p.223). Lectotype: Vozzhennikova, 1967, pl.44, fig.1 (as holotype of *Kisselevia ornata* forma *reticulata*); Lentin and Vozzhennikova, 1989, pl.1, figs.1–2; Lentin and Vozzhennikova, 1990, pl.9, fig.1; designated by Lentin and Vozzhennikova (1989, p.223). **NOW** *Rhombodinium*. Originally *Kisselevia*, subsequently (and now) *Rhombodinium*. This name was not validly published in Vozzhennikova (1963, p.183, figs.16a–b) since that author did not provide a description. Age: Bartonian.

"forma *ornata*". Autonym. Holotype: Vozzhennikova, 1967, pl.44, fig.6, lost according to Lentin and Vozzhennikova (1989, p.223). Lectotype: Vozzhennikova, 1967, pl.44, fig.1 (as holotype of *Kisselevia ornata* forma *reticulata*); Lentin and Vozzhennikova, 1989, pl.1, figs.1–2; Lentin and Vozzhennikova, 1990, pl.9, fig.1; designated by Lentin and Vozzhennikova (1989, p.223). **Now redundant**. Taxonomic junior synonym: *Kisselevia ornata* forma *reticulata*, according to Lentin and Vozzhennikova (1989, p.221,223).

"subsp. *ornata*". Autonym. Holotype: Vozzhennikova, 1967, pl.44, fig.6, lost according to Lentin and Vozzhennikova (1989, p.223). Lectotype: Vozzhennikova, 1967, pl.44, fig.1 (as holotype of *Kisselevia ornata* forma *reticulata*); Lentin and Vozzhennikova, 1989, pl.1, figs.1–2; Lentin and Vozzhennikova, 1990, pl.9, fig.1; designated by Lentin and Vozzhennikova (1989, p.223). **Now redundant**. Taxonomic junior synonym: *Kisselevia ornata* forma *reticulata*, according to Lentin and Vozzhennikova (1989, p.221,223).

"forma *reticulata*" Vozzhennikova, 1967, p.104, pl.44, figs.1–3,7–8; pl.45, figs.1–3;. Holotype: Vozzhennikova, 1967, pl.44, fig.1. Originally *Kisselevia ornata* forma *reticulata*, subsequently *Kisselevia ornata* subsp. *reticulata*. **Taxonomic senior synonym:** *Kisselevia ornata*, according to Lentin and Vozzhennikova (1989, p.221,223). Age: Eocene.

"subsp. *reticulata*" (Vozzhennikova, 1967, p.104, pl.44, figs.1–3,7–8; pl.45, figs.1–3) Lentin and Williams, 1973, p.84. Holotype: Vozzhennikova, 1967, pl.44, fig.1. Originally *Kisselevia ornata* forma *reticulata*, subsequently *Kisselevia ornata* subsp. *reticulata*. **Taxonomic senior synonym:** *Kisselevia ornata*, according to Lentin and Vozzhennikova (1989, p.221,223). Age: Eocene.

"?*pengchiahsuensis*" Shaw Chenglong, 1999a. Holotype: Shaw Chenglong, 1999a, figs.5–7. **NOW** *Charlesdowniea*? Originally *Kisselevia*, subsequently (and now) *Charlesdowniea*? Age: Eocene.

"*reticulata*" (Williams and Downie, 1966b, p.187–188, pl.19, figs.3,6; text-fig.48) Lentin and Williams, 1976, p.136. Holotype: Williams and Downie, 1966b, pl.19, figs.3,6; text-fig.48. **NOW** *Sophismatia*. Originally *Wetzeliella*, subsequently *Kisselevia*, thirdly *Charlesdowniea*, fourthly (and now) *Sophismatia*. Age: early Eocene.

"*rhomboidalis*" He Chengquan, 1991, p.93, pl.35, figs.11–13. Holotype: He Chengquan, 1991, pl.35, figs.11–12. **NOW** *Michouxdinium*? Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Michouxdinium*? Age: middle Eocene.

"*stellata*" Damassa, 1979a, p.834,837, pl.7, figs.1–7. Holotype: Damassa, 1979a, pl.7, figs.1–2. **NOW** *Vallodinium*. Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Vallodinium*. Age: early-middle Eocene.

"*taiwaniana*" Shaw Chenglong, 1999a, p.38–39, figs.8–10,19–21. Holotype: Shaw Chenglong, 1999a, figs.8–10. **NOW** *Charlesdowniea*. Originally *Kisselevia*, subsequently (and now) *Charlesdowniea*. Age: Eocene.

"*tenuivirgula*" (Williams and Downie, 1966b, p.188–189, pl.19, figs.1–2,4–5,7; text-figs.49–50) Lentin and Williams, 1976, p.136. Holotype: Williams and Downie, 1966b, pl.19, figs.2,4; text-fig.49. **NOW** *Sophismatia*. Originally *Wetzeliella*, subsequently *Kisselevia*, thirdly *Charlesdowniea*, fourthly (and now) *Sophismatia*. Age: early Eocene.

"subsp. *conopia*" (Williams and Downie, 1966b, p.184, pl.18, fig.5) Costa and Downie, 1979, p.44. Holotype: Williams and Downie, 1966b, pl.18, fig.5. **NOW** *Sophismatia conopia*. Originally *Wetzeliella articulata* var. *conopia*, subsequently *Wetzeliella articulata* subsp. *conopia*, thirdly *Kisselevia tenuivirgula* subsp. *conopia*, fourthly *Charlesdowniea tenuivirgula* subsp. *conopia*, fifthly (and now) *Sophismatia conopia*. Age: early Eocene.

"subsp. *crassoramosa*" (Williams and Downie, 1966b, p.189–190; pl.19, figs.1,5,7; text-fig.50) Lentin and Williams, 1976, p.137. Holotype: Williams and Downie, 1966b, pl.19, fig.7. **NOW** *Sophismatia crassoramosa*. Originally *Wetzeliella tenuivirgula* var. *crassoramosa*, subsequently *Wetzeliella tenuivirgula* subsp. *crassoramosa*, thirdly *Kisselevia tenuivirgula* subsp. *crassoramosa*, fourthly *Kisselevia crassoramosa*, fifthly *Charlesdowniea crassoramosa*, sixthly (and now) *Sophismatia crassoramosa*. Age: early Eocene.

"subsp. *exouros*" Islam, 1983c, p.88, pl.3, figs.3–4. Holotype: Islam, 1983c, pl.3, fig.3. **NOW** *Sophismatia? exouros*. Originally *Kisselevia tenuivirgula* subsp. *exouros*, subsequently *Charlesdowniea tenuivirgula* subsp. *exouros*, thirdly (and now) *Sophismatia? exouros*. Age: middle Eocene.

"subsp. *tenuivirgula*". Autonym. Holotype: Williams and Downie, 1966b, pl.19, figs.2,4; text-fig.49. **Now redundant.** Originally *Wetzeliella tenuivirgula* subsp. *tenuivirgula*, subsequently *Kisselevia tenuivirgula* subsp. *tenuivirgula*, thirdly *Charlesdowniea tenuivirgula* subsp. *tenuivirgula*.

"*variabilis*" Bujak in Bujak et al., 1980, p.67, pl.17, figs.1–6; text-fig.16. Holotype: Bujak et al., 1980, pl.17, figs.1–3. **NOW** *Michouxdinium*. Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Michouxdinium*. Age: middle Eocene (see Aubry, 1986).

"*wulagenensis*" Mao Shaozhi and Norris, 1988, p.50, pl.13, figs.5–10. Holotype: Mao Shaozhi and Norris, 1988, pl.13, fig.6. **NOW** *Talladinium*. Originally *Kisselevia*, subsequently *Charlesdowniea*, thirdly (and now) *Talladinium*. Age: late Eocene.

"**KISSELJOVIA**" Vozzhennikova, 1961, p.1462. **Name not validly published**: no description or illustration. This is an orthographic variant of *Kisselevia*, which see.

"**KISSELOVIA**" Vozzhennikova, 1963, p.183. **Name not validly published**: no validly published species names. This is an orthographic variant of *Kisselevia*, which see.

KLEDODINIUM Williams et al., 2015, p.305–306. Type: Damassa, 1979a, pl.7, figs.4–7, as *Kisselevia stellata* (now *Kledodinium filosum*).

**filosum* Williams et al., 2015, p.306, pl.3, fig.10. Holotype: Damassa, 1979a, pl.7, figs.4–7, as *Kisselevia stellata*. Age: early-middle Eocene.

KLEITHRIASPHAERIDIUM Davey, 1974, p.55–56. Emendations: Torricelli, 2001, p.98; Fensome et al., 2009, p.40. Taxonomic junior synonym: *Diversispina*, according to Stover and Evitt (1978, p.167–168). Type: Davey, 1974, pl.5, figs.1–2; text-fig.3, as *Kleithriasphaeridium corrugatum*.

atlasiense (Below, 1982c, p.12, pl.3, figs.2a–c; text-figs.2a–c) Torricelli, 2001, p.100. Holotype: Below, 1982c, pl.3, figs.2a–c; Fauconnier and Masure, 2004, pl.43, figs.1–4. Originally *Hystrichosphaeridium?*, subsequently (and now) *Kleithriasphaeridium*. Age: Albian.

cooksoniae (Singh, 1971, p.329–330, pl.51, figs.7–8; pl.52, figs.1–4) Fensome et al., 2009, p.40. Emendation: Duxbury, 1980, p.120, as *Florentinia cooksoniae*. Holotype: Singh, 1971, pl.51, fig.7. Originally *Hystrichosphaeridium*, subsequently *Florentinia*, thirdly *Litosphaeridium*, fourthly (and now) *Kleithriasphaeridium*. Taxonomic senior synonym: *Hystrichosphaeridium* (as *Florentinia*) *mantellii*, according to Below (1982c, p.8) — however, Lentin and Williams (1985, p.135) retained *Florentinia cooksoniae*. Taxonomic junior synonym: *Hystrichosphaeridium cylindratum*, according to Harker and Sarjeant (1975, p.225–226). Age: late Albian.

**corrugatum* Davey, 1974, p.56–57, pl.5, figs.1–5; text-fig.3. Holotype: Davey, 1974, pl.5, figs.1–2; text-fig.3. Age: early Barremian.

eoinodes (Eisenack, 1958a, p.402, pl.27, figs.3–4) Davey, 1974, p.58. Emendation: Sarjeant, 1985a, p.74–75, as *Kleithriasphaeridium eoinodes*. Holotype: Eisenack, 1958a, pl.27, fig.3; Sarjeant, 1985a, pl.5, figs.3–4. Originally *Hystrichosphaeridium*, subsequently *Cordosphaeridium*, thirdly (and now) *Kleithriasphaeridium*. Taxonomic junior synonym: *Hystrichosphaeridium* (as *Kleithriasphaeridium*) *simplicispinum*, according to Below (1982c, p.17). Age: late Aptian.

fasciatum (Davey and Williams, 1966b, p.90, pl.7, figs.5–6) Davey, 1974, p.58. Holotype: Davey and Williams, 1966b, pl.7, fig.5. Originally *Cordosphaeridium?*, subsequently (and now) *Kleithriasphaeridium*. Age: Barremian.

loffrense Davey and Verdier, 1976, p.310–312, pl.1, figs.1–6. Holotype: Davey and Verdier, 1976, pl.1, figs.1–2. Taxonomic junior synonym: *Florentinia aculeata*, according to Fensome et al. (2009, p.42). Age: Late Cretaceous.

perforatum (Firth, 1993, p.193,195, pl.2, figs.1–7) Fensome et al., 2009, p.42. Holotype: Firth, 1993, pl.2, figs.1–4. Originally *Florentinia*, subsequently (and now) *Kleithriasphaeridium*. Age: early–late Maastrichtian.

porosispinum Davey, 1982b, p.29–30, pl.10, figs.8–12. Holotype: Davey, 1982b, pl.10, figs.10–12. Originally (and now) *Kleithriasphaeridium*, subsequently *Tityrosphaeridium*. Lentin and Williams (1985, p.209) retained this species in *Kleithriasphaeridium*. Age: late Kimmeridgian–late Ryazanian.

readei (Davey and Williams, 1966b, p.64–65, pl.6, fig.3) Davey and Verdier, 1976, p.314. Emendation: Davey and Verdier, 1976, p.314, as *Kleithriasphaeridium readei*. Holotype: Davey and Williams, 1966b, pl.6, fig.3. Originally *Hystrichosphaeridium*, subsequently (and now) *Kleithriasphaeridium*. Age: Cenomanian.

?**sarmentum** (Davey, 1979b, p.555, pl.1, figs.8–12) Below, 1982c, p.17. Holotype: Davey, 1979b, pl.1, figs.8–9,12. Originally *Bacchidinium*, subsequently *Kiokansium*, thirdly (and now) *Kleithriasphaeridium*?. Questionable assignment: Below (1982c, p.17). N.I.A. Age: late Aptian–middle Albian.

secatum Schiøler and Wilson, 1998, p.340,342, pl.6, figs.1–6. Holotype: Schiøler and Wilson, 1998, pl.6, fig.5. Age: middle-late Coniacian.

"simplicispinum" (Davey and Williams, 1966b, p.59–60, pl.9, fig.3) Davey, 1974, p.57. Holotype: Davey and Williams, 1966b, pl.9, fig.3. Originally *Hystrichosphaeridium*, subsequently *Kleithriasphaeridium*. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as and now *Kleithriasphaeridium*) *einodes*, according to Below (1982c, p.17). Age: Barremian.

suevicum Dürr, 1988, p.79–81, pl.4, figs.1–5; pl.11, figs.1–3; text-fig.23. Holotype: Dürr, 1988, pl.4, figs.1–2. Age: early Tithonian.

telaspinosum (Fisher and Riley, 1980, p.322, pl.1, fig.5) Lentin and Williams, 1981, p.165. Holotype: Fisher and Riley, 1980, pl.1, fig.5. Originally *Hystrichodinium*?, subsequently (and now) *Kleithriasphaeridium*. Riley (1979, p.221), prior to valid publication of the name, and Fisher and Riley (1982, p.53) also proposed this combination. Age: Volgian.

truncatum (Benson, 1976, p.184–185, pl.2, figs.6–9) Stover and Evitt, 1978, p.168. Holotype: Benson, 1976, pl.2, figs.6–9. Originally *Diversispina*, subsequently (and now) *Kleithriasphaeridium*. Taxonomic junior synonym: *Cordosphaeridium digitatum* (name not validly published), according to Slimani (2001a, p.193). Schiøler et al. (1997, p.83) considered this to be the possible taxonomic senior synonym of *Achilleodinium bianii*. Age: late Maastrichtian–early Paleocene.

tubulosum (Cookson and Eisenack, 1969, p.5,7, pl.2, figs.D–F) Stover and Evitt, 1978, p.168. Holotype: Cookson and Eisenack, 1969, pl.2, fig.E. Originally *Conosphaeridium*, subsequently (and now) *Kleithriasphaeridium*. Age: Albian–Cenomanian.

"KLEMENTIA" Warren in Duxbury, 1983, p.44. **Name not validly published:** no description or illustration.

Taxonomic senior synonym: *Desmocysta*, according to Duxbury (1983, p.44).

"barbata" Warren in Duxbury, 1983, p.44. **Name not validly published:** no description or illustration.

KOMEWUIA Cookson and Eisenack, 1960b, p.257. Emendations: Dörhöfer and Davies, 1980, p.30; Chen, 1982, p.32. Taxonomic senior synonym: *Kalyptea*, according to Wiggins (1975, p.110) and by implication in Dörhöfer and Davies (1980, p.30), who considered *Komewuia* to be the senior name — however, Chen (1982, p.32) retained *Komewuia*. Taxonomic junior synonym: *Pontiadinium*, according to Chen (1982, p.36). Type: Cookson and Eisenack, 1960b, pl.39, fig.8, as *Komewuia glabra*.

"challisiana" Helby in Riding and Helby, 2001e, p.119. **Name not validly published:** no description. **Taxonomic senior synonym:** *Fusiformacysta challisiana*, according to Riding and Helby (2001e, p.119).

"*dicerus*" (Cookson and Eisenack, 1960b, p.256–257, pl.39, fig.1) Dörhöfer and Davies, 1980, p.30. Emendation: Fisher and Riley, 1980, p.323, as *Kalyptea dicerus*. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.1. **NOW** *Kalyptea*. Originally (and now) *Kalyptea*, subsequently *Komewuia*, thirdly *Pareodinia*. Taxonomic junior synonym: *Kalyptea jurassica*, according to Below (1990, p.65). Age: Tithonian.

evittii Chen, 1982, p.36,38, pl.2, figs.17–18,21; text-figs.2e–i. Holotype: Chen, 1982, pl.2, fig.17; text-fig.2g. Age: ?Callovian–Kimmeridgian.

**glabra* Cookson and Eisenack, 1960b, p.257, pl.39, figs.7–8. Emendation: Chen, 1982, p.32, as *Komewuia glabra*. Holotype: Cookson and Eisenack, 1960b, pl.39, fig.8. Originally (and now) *Komewuia*, subsequently *Kalyptea*. Chen (1982, p.32) retained this species in *Komewuia*. Age: ?Tithonian.

"*granulata*" Beju, 1978, p.4. **Name not validly published:** no description or illustration.

inequicornuta (Balteş, 1971, p.5, pl.1, figs.8–12; pl.2, figs.1–3 ex Stover and Evitt, 1978, p.180) Chen, 1982, p.36. Holotype: Balteş, 1971, pl.2, fig.2; Fensome et al., 1996, fig.5 — p.2161; designated as a lectotype by Stover and Evitt (1978, p.180). Originally *Diconodinium* (name not validly published), subsequently *Pontiadinium*, thirdly (and now) *Komewuia*. The name *Diconodinium inequicornutum* was not validly published in Balteş (1971) since that author did not designate a holotype. Age: early Pliocene.

stoveri Chen, 1982, p.38,40, pl.3, figs.22,24–29; text-figs.2p–w. Holotype: Chen, 1982, pl.3, fig.29; text-fig.2s. Age: Kimmeridgian–Tithonian.

KORYSTOCYSTA Woollam, 1983, p.193–194. Emendation: Benson, 1985, p.154. Taxonomic senior synonym: *Ctenidodinium*, according to Courtinat (1989, p.208) — however, Lentin and Williams (1989, p.213) retained *Korystocysta*. Type: Sarjeant, 1976a, pl.1, figs.1–2, as *Dichadogonyaulax kettonensis*.

+*gochtii* (Sarjeant, 1976a, p.11,13, pl.2, fig.1; pl.3, fig.4; text-figs.2A–C) Woollam, 1983, p.194. Holotype: Sarjeant, 1976a, pl.2, fig.1; text-figs.2A–B. Originally *Dichadogonyaulax*, subsequently *Ctenidodinium*, thirdly (and now) *Korystocysta*. Taxonomic senior synonym: *Gonyaulax* (now *Korystocysta*) *pachyderma*, by implication in Conway (1990, p.35), who considered *Dichadogonyaulax* (as *Korystocysta*) *kettonensis* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Dichadogonyaulax* (as *Korystocysta*) *gochtii*. Taxonomic junior synonym: *Dichadogonyaulax* (subsequently *Korystocysta*) *kettonensis*, according to Riley and Fenton (1982, p.199) and Hengreen et al. (2000, p.50). The name *Dichadogonyaulax gochtii* has priority over the name *Dichadogonyaulax kettonensis* since the authors who first considered the two species to be synonyms (Riley and Fenton, 1982, p.199) designated the former name as senior (I.C.N. Article 11.5). The nomenclatural type of the genus *Korystocysta* remains the holotype of *Korystocysta kettonensis*. Age: Bathonian.

"**kettonensis*" (Sarjeant, 1976a, p.13,15, pl.1, figs.1–2; pl.3, figs.1–2; pl.6, fig.1; text-figs.3A–D) Woollam, 1983, p.193–194. Holotype: Sarjeant, 1976a, pl.1, figs.1–2; Fensome et al., 1995, figs.1–4 — p.1583. Originally *Dichadogonyaulax*, subsequently *Ctenidodinium*, thirdly *Korystocysta*. **Taxonomic senior synonym:** *Dichadogonyaulax* (now *Korystocysta*) *gochtii*, according to Riley and Fenton (1982, p.199) and Hengreen et al. (2000, p.50). Taxonomic senior synonyms: *Gonyaulax* (now *Korystocysta*) *pachyderma* and *Leptodinium* (subsequently *Korystocysta*) *norrisii*, by implication in Conway (1990, p.35), who considered *Dichadogonyaulax* (as *Korystocysta*) *kettonensis* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Korystocysta kettonensis*. The name *Dichadogonyaulax* (now *Korystocysta*) *gochtii* has priority over the name *Dichadogonyaulax* (subsequently *Korystocysta*) *kettonensis* since the authors who first considered the two species to be synonyms (Riley and Fenton, 1982, p.199) designated the former name as senior (I.C.N. Article 11.5). Age: Bathonian.

"*norrisii*" (Pocock, 1972, p.92–93, pl.24, figs.9–12; text-fig.9) Woollam, 1983, p.194. Holotype: Pocock, 1972, pl.24, fig.9; Jansonius, 1986, pl.2, figs.6–8; text-fig.5. Originally *Leptodinium*, subsequently *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly *Korystocysta*. **Taxonomic senior synonym:** *Gonyaulax* (now *Korystocysta*) *pachyderma*, according to Benson (1985, p.154). Taxonomic junior synonym: *Dichadogonyaulax* (subsequently *Korystocysta*) *kettonensis*, by implication in Conway (1990, p.35), who considered *Dichadogonyaulax* (as

Korystocysta kettonensis to be the senior name — however, Lentin and Williams (1993, p.374) retained *Dichadogonyaulax* (as *Korystocysta kettonensis*). Age: Callovian.

pachyderma (Deflandre, 1939a, p.176–178, pl.7, figs.6–10; text-figs.7–10) Woollam, 1983, p.194. Holotype: Deflandre, 1939a, pl.7, figs.6–7. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Ctenidodinium*, fourthly *Ctenidodinium?*, fifthly (and now) *Korystocysta*, sixthly *Dichadogonyaulax*. Lentin and Williams (1989, p.213) retained this species in *Korystocysta*. Taxonomic junior synonyms: *Dichadogonyaulax* (subsequently *Korystocysta kettonensis* by implication in Conway (1990, p.35), who considered *Dichadogonyaulax pachyderma* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Dichadogonyaulax* (as *Korystocysta kettonensis*); *Leptodinium* (as *Korystocysta norrisii*, according to Benson (1985, p.154). Age: Oxfordian.

"***reticulata***" Partington et al., 1993, p.380. **Name not validly published:** no description or illustration.

"**KRUTZSCHIDIINIUM**" Strauss, 1991a, p.52,54. **Name not validly published:** no validly published species. Type: Strauss, 1991a, pl.1, figs.a–b; text-fig.4c, as *Krutzschidinium spinosum*.

"****spinosum***" Strauss, 1991a, p.54,56, pl.1, figs.a–h; pl.2, figs.a–e; text-figs.4a–h. Holotype: Strauss, 1991a, pl.1, figs.a–b; text-fig.4c. **Name not validly published:** lodgment of holotype not specified. Strauss (1991a, p.57) considered this species to be a possible taxonomic junior synonym of *Wetzeliella* (now *Apectodinium*) *summissa*. Age: middle Eocene.

"***summissum***" (Harland, 1979c, p.66–67, fig.12) Strauss, 1991a, p.57. Holotype: Harland, 1979c, pl.1, fig.12. **Combination not validly published:** basionym not fully referenced. **NOW** *Apectodinium*. Originally *Wetzeliella* subgenus *Apectodinium*, subsequently (and now) *Apectodinium*, thirdly *Krutzschidinium*. Age: late Paleocene.

"**KYLINDROCYSTA**" Fenton et al., 1980, p.162. **Taxonomic senior synonym:** *Valvaeodinium*, according to Below (1987b, p.64). Type: Fenton et al., 1980, pl.14, fig.13, as *Kylindrocysta spinosa*.

"***atlantica***" (Habib, 1972, p.375, pl.4, figs.2,5) Jansonius, 1989, p.67. Holotype: Habib, 1972, pl.4, fig.2. **NOW** *Valvaeodinium*. Originally *Tenua* Eisenack, subsequently *Sentusidinium?*, thirdly *Fromea* (Appendix A), fourthly *Kylindrocysta*, fifthly (and now) *Valvaeodinium*. Taxonomic junior synonym: *Fromea complicata* (Appendix A), according to Davies (1983, p.31) — however, Jansonius (1989, p.65) retained *Fromea complicata*. Age: Callovian–Oxfordian.

"****spinosa***" Fenton et al., 1980, p.162–163, pl.14, figs.10–13; pl.15, figs.2,4–6. Holotype: Fenton et al., 1980, pl.14, fig.13; Fensome et al., 1995, fig.4 — p.1797. **NOW** *Valvaeodinium*. Originally *Kylindrocysta*, subsequently (and now) *Valvaeodinium*. Age: late Bajocian–early Bathonian.

LABYRINTHODINIUM Piasecki, 1980, p.67. Type: Piasecki, 1980, pl.2, figs.9–11, as *Labyrinthodinium truncatum*.

****truncatum*** Piasecki, 1980, p.67,70, pl.2, figs.9–11; pl.3, fig.2; pl.6, figs.3–4. Emendation: de Verteuil and Norris, 1996a, p.150. Holotype: Piasecki, 1980, pl.2, figs.9–11; Fensome et al., 1995, figs.1–3 — p.1855; Fauconnier and Masure, 2004, pl.51, figs.5–6. Age: middle Miocene.

subsp. ***modicum*** de Verteuil and Norris, 1996a, p.151, pl.14, figs.7–18; pl.15, figs.1–8. Holotype: de Verteuil and Norris, 1996a, pl.14, figs.7–12. Age: early-middle Miocene.

var. ***reductum*** Strauss and Lund, 1992, p.164, pl.2, figs.7–11. Holotype: Strauss and Lund, 1992, pl.2, figs.9–11. Age: middle Miocene.

subsp. *truncatum*. Autonym. Holotype: Piasecki, 1980, pl.2, figs.9–11; Fensome et al., 1995, figs.1–3 — p.1855; Fauconnier and Masure, 2004, pl.51, figs.5–6.

var. *truncatum*. Autonym. Holotype: Piasecki, 1980, pl.2, figs.9–11; Fensome et al., 1995, figs.1–3 — p.1855; Fauconnier and Masure, 2004, pl.51, figs.5–6.

LACINIADINIUM McIntyre, 1975, p.70. Taxonomic junior synonyms: *Apiculodinium* and *Bellatudinium*, according to He Chengquan et al. (2009, p.386); and *Sinocysta* according to Chen et al. (1988, p.28) and He Chengquan et al. (2009, p.386). Type: McIntyre, 1975, pl.4, figs.12–13, as *Laciniadinium orbiculatum*.

?*aquiloniforme* Schiøler et al., 1997, p.83,85, pl.2, figs.9–12. Holotype: Schiøler et al., 1997, pl.2, fig.9. Questionable assignment: Schiøler et al. (1997, p.83). Age: late Maastrichtian.

arcticum (Manum and Cookson, 1964, p.18–19, pl.6, figs.1–4) Lentin and Williams, 1980, p.41. Holotype: Manum and Cookson, 1964, pl.6, fig.1. Originally *Diconodinium*, subsequently (and now) *Laciniadinium*. Taxonomic junior synonym: *Diconodinium acutum*, according to Morgan (1977, p.126). Age: Cenomanian.

biconiculum McIntyre, 1975, p.71, pl.4, figs.5–9. Holotype: McIntyre, 1975, pl.4, figs.5–6. Age: Campanian.

conpicuum (Yu Jingxian et al., 1981, p.261, pl.1, figs.20–22,24; text-fig.2) He Chengquan et al., 2009, p.387. Holotype: Yu Jingxian et al., 1981, pl.1, fig.20. Originally *Bellatudinium*, subsequently (and now) *Laciniadinium*. He Chengquan et al. (2009, p.387) spelled the epithet as "*conspicuum*". Age: Late Cretaceous.

elongatum He Chengquan, 1991, p.62–63, pl.4, figs.24–25. Holotype: He Chengquan, 1991, pl.4, fig.25. Age: Paleocene–Eocene.

"*eminens*" Jin Guangxing, He Chengquan and Zhu Shenzhao in He Chengquan et al., 1989, p.48, pl.5, figs.17–18. Holotype: He Chengquan et al., 1989, pl.5, fig.17. **NOW** *Saeptodinium*. Originally *Laciniadinium*, subsequently (and now) *Saeptodinium*. Age: Early Tertiary.

firmum (Harland, 1973, p.669–670, pl.84, figs.8–9,15; text-fig.6) Morgan, 1977, p.136. Holotype: Harland, 1973, pl.84, fig.8. Originally *Diconodinium*, subsequently (and now) *Laciniadinium*. Lentin and Williams (1980, p.41) also proposed this combination. Age: late Campanian.

fusum (Yu Jingxian et al., 1981, p.261, pl.1, figs.25–27,29–31) He Chengquan et al., 2009, p.388. Holotype: Yu Jingxian et al., 1981, pl.1, fig.27. Originally *Bellatudinium*, subsequently (and now) *Laciniadinium*. Age: Late Cretaceous.

granulare He Chengquan in Zheng Yahui and He Chengquan, 1984, p.92, pl.8, figs.1–3; pl.11, figs.1–2. Holotype: Zheng Yahui and He Chengquan, 1984, pl.11, fig.1. Age: Late Cretaceous.

granulatum (He Chengquan, 1991, p.64, pl.1, figs.1–6,30) Lentin and Williams, 1993, p.377. Holotype: He Chengquan, 1991, pl.1, fig.1. Originally *Sinocysta*, subsequently (and now) *Laciniadinium*. Age: late Turonian–early Senonian.

hokkaidoanum (Kurita and Matsuoka, 1995) comb. nov.

Bellatudinium hokkaidoanum Kurita and Matsuoka, 1995, p.146–147, pl.1, figs.1–7.

Holotype: Kurita and Matsuoka, 1995, pl.1, fig.1. Originally *Bellatudinium* subsequently (and now) *Laciniadinium*. The combination *Laciniadinium hokkaidoanum* is proposed here since *Bellatudinium* is now considered a taxonomic junior synonym of *Laciniadinium*. Age: late middle to late Eocene.

?*inflatum* (Eisenack and Cookson, 1960, p.4, pl.1, figs.12–13) Morgan, 1977, p.136. Emendation: Morgan, 1977, p.136, *Laciniadinium? inflatum*. Holotype: Eisenack and Cookson, 1960, pl.1, fig.13; Morgan, 1977, pl.2, figs.5a–c. Originally *Diconodinium*, subsequently (and now) *Laciniadinium?*. Questionable assignment: Morgan (1977, p.136). Age: late Albian–Cenomanian.

macrocephalum (Jin Guangxing, He Chengquan and Zhu Shenzhao in He Chengquan et al., 1989, p.69, pl.6, figs.23–25) Lentin and Williams, 1993, p.377. Holotype: He Chengquan et al., 1989, pl.6, fig.24. Originally *Sinocysta*, subsequently (and now) *Laciniadinium*. Age: Early Tertiary.

minutum (He Chengquan, 1984a, p.769–770, pl.1, figs.5–7; text-fig.1) Chen et al., 1988, p.29. Holotype: He Chengquan, 1984a, pl.1, fig.5; text-fig.1. Originally *Sinocysta*, subsequently (and now) *Laciniadinium*. Age: Late Cretaceous.

***orbiculatum** McIntyre, 1975, p.70–71, pl.4, figs.10–13. Holotype: McIntyre, 1975, pl.4, figs.12–13. Age: Campanian.

orientale He Chengquan, 1991, p.63, pl.4, figs.14–16. Holotype: He Chengquan, 1991, pl.4, fig.14. Age: Paleocene–middle Eocene.

"**ovatum**" He Chengquan and Li Peng, 1981, p.66, pl.31, fig.13. Holotype: He Chengquan and Li Peng, 1981, pl.31, fig.13. **NOW** *Holmwoodinium*. Originally *Laciniadinium*?, subsequently (and now) *Holmwoodinium*. Questionable assignment: He Chengquan and Li Peng (1981, p.66). Age: late Oligocene.

petaloidum Vasilyeva in Andreeva-Grigorovich et al., 2011, p.35–36, pl.9, figs.1–7; text-fig.17a–c. Holotype: Andreeva-Grigorovich et al., 2011, pl.9, fig.5; text-fig.17c. Vasilyeva in Andreeva-Grigorovich et al. (2011, p.36) cited the holotype as "pl.9, figs.1–7 and text-fig.17c". This holotype citation includes multiple specimens. However, in the caption to text-fig.17, the holotype is clearly indicated as the far right of three figures (here cited as text-fig.17c), which is also figured as pl.9, fig.5. Age: Danian–Selandian.

rhombiforme (Vozzhennikova, 1967, p.50, pl.7, figs.1–4; pl.15, fig.5) Lentin and Vozzhennikova, 1990, p.57. Emendation: Lentin and Vozzhennikova, 1990, p.57–58, as *Laciniadinium rhombiforme*. Holotype: Vozzhennikova, 1967, pl.7, fig.3; pl.15, fig.5, lost according to Lentin and Vozzhennikova (1990, p.57). Neotype: Vozzhennikova, 1967, pl.7, fig.2; Lentin and Vozzhennikova, 1990, pl.10, figs.4–5; text-fig.29; designated by Lentin and Vozzhennikova (1990, p.57). Originally *Diconodinium*, subsequently *Diconodinium*?, thirdly (and now) *Laciniadinium*. Age: Turonian.

rhomboidale He Chengquan in Zheng Yahui and He Chengquan, 1984, p.92–93, pl.8, figs.8–12; pl.11, fig.5. Holotype: Zheng Yahui and He Chengquan, 1984, pl.8, fig.10. Age: Late Cretaceous.

simplex He Chengquan in Zheng Yahui and He Chengquan, 1984, p.93, pl.8, figs.13–15. Holotype: Zheng Yahui and He Chengquan, 1984, pl.8, fig.14. Age: Late Cretaceous.

subtile (He Chengquan, 1991, p.65, pl.1, figs.19–23) Lentin and Williams, 1993, p.378. Holotype: He Chengquan, 1991, pl.1, fig.19. Originally *Sinocysta*, subsequently (and now) *Laciniadinium*. Age: late Turonian–Eocene.

tenuistriatum (Eisenack and Cookson, 1960, p.4, pl.1, figs.14–16) Morgan, 1977, p.136. Holotype: Eisenack and Cookson, 1960, pl.1, figs.14–15; Morgan, 1977, pl.2, figs.3a–b. Originally *Diconodinium*, subsequently (and now) *Laciniadinium*. Age: late Albian–Cenomanian.

tianshanense (He Chengquan, 1991, p.65, pl.2, figs.8–9) Lentin and Williams, 1993, p.378. Holotype: He Chengquan, 1991, pl.2, fig.8. Originally *Sinocysta*, subsequently (and now) *Laciniadinium*. Age: late Eocene.

williamsii Ioannides, 1986, p.28, pl.10, figs.1–6; pl.11, fig.5. Holotype: Ioannides, 1986, pl.10, fig.1. Age: Santonian–Campanian.

xinjiangense (He Chengquan, 1991, p.65, pl.1, figs.7–12) Lentin and Williams, 1993, p.378. Holotype: He Chengquan, 1991, pl.1, fig.11. Originally *Sinocysta*, subsequently (and now) *Laciniadinium*. Age: Paleocene–Eocene.

LACRYMODINIUM Albert et al., 1986, p.305–307. Type: Albert et al., 1986, pl.1, figs.1–2,4, as *Lacrymodinium warrenii*.

**warrenii* Albert et al., 1986, p.307–308,310, pl.1, figs.1–12; pl.2, figs.1–13; text-fig.3. Holotype: Albert et al., 1986, pl.1, figs.1–2,4; Fensome et al., 1995, figs.1–3 — p.1907. Age: late Oxfordian or Kimmeridgian.

LACUNODINIUM He Chengquan, 1984a, p.768. Type: He Chengquan, 1984a, pl.1, figs.2a–b, as *Lacunodinium foveolatum*.

fissile (Jiabo, 1978, p.100–101, pl.35, figs.3–9) He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989, p.49, pl.7, figs.27–30. Emendation: Mao Shaozhi et al., 1995, p.43, as *Lacunodinium fissile*. Holotype: Jiabo, 1978, pl.35, fig.4. Originally *Hungarodiscus* (Appendix A), subsequently (and now) *Lacunodinium*. Taxonomic junior synonym: *Hungarodiscus foveolatus* (Appendix A), according to Mao Shaozhi et al. (1995, p.43). Age: Oligocene.

**foveolatum* He Chengquan, 1984a, p.768, pl.1, figs.2a–b,3. Holotype: He Chengquan, 1984a, pl.1, figs.2a–b. Age: middle Eocene.

laxilveolum Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.73–74, pl.16, figs.19–20. Holotype: Liu Zhili et al., 1992, pl.16, fig.19. Age: Early Tertiary.

punctatum (Jiabo, 1978, p.101, pl.35, figs.1–2) Liu Zhili and Zheng Yuefang in Liu Zhili et al., 1992, p.74. Holotype: Jiabo, 1978, pl.35, fig.1. Originally *Hungarodiscus* (Appendix A), subsequently (and now) *Lacunodinium*. Age: late Oligocene.

puyangense He Chengquan, Zhu Shenzhao and Jin Guangxing in He Chengquan et al., 1989, p.49, pl.7, fig.26. Holotype: He Chengquan et al., 1989, pl.7, fig.26. Mao Shaozhi et al. (1995, p.99) indicated that this name should be restricted to the holotype. Age: Early Tertiary.

"**LAGENADINIUM**" Piel, 1985, p.108. **Taxonomic senior synonym:** *Stephanelytron*, according to Courtinat (1999, p.177). Type: Piel, 1985, pl.1, figs.1–6, as *Lagenadinium callovanum*.

callovanum*" Piel, 1985, p.108,110,112, pl.1, figs.1–9; pl.2, figs.1–8; pl.3, figs.1–5; text-figs.1a–d,2a–c,3 (part). Holotype: Piel, 1985, pl.1, figs.1–6; Fensome et al., 1993a, figs.1–3 — p.1011. **NOW *Stephanelytron*. Originally *Lagenadinium*, subsequently (and now) *Stephanelytron*. Age: middle to late Callovian.

"?*membranoidium*" (Vozzhennikova, 1967, p.114–115, pl.48, figs.1–2,3a–b,4a–b,5–8,9a–c,10) Lentin and Vozzhennikova, 1990, p.103. Emendation: Lentin and Vozzhennikova, 1990, p.103, as *Lagenadinium membranoidium*. Holotype: Vozzhennikova, 1967, pl.48, figs.9a–b; Lentin and Vozzhennikova, 1990, text-fig.58; lost according to Lentin and Vozzhennikova (1990, p.103). Lectotype: ?Vozzhennikova, 1967, pl.48, fig.6; Lentin and Vozzhennikova, 1990, pl.10, figs.6–7; designated by Lentin and Vozzhennikova (1990, p.103). **NOW** *Stephanelytron*. Originally *Chlamydothorella*, subsequently *Chlamydothorella*?, thirdly *Lagenadinium*?, fourthly (and now) *Stephanelytron*. Questionable assignment: Lentin and Vozzhennikova (1990, p.103). Taxonomic junior synonym: *Stephanelytron cretaceum*, according to Heilmann-Clausen in Heilmann-Clausen and Thomsen (1995, p.301) — however, Courtinat (1999, p.178) retained *Stephanelytron cretaceum*. Age: Late Jurassic.

"*scarburghense*" (Sarjeant, 1961a, p.111, pl.15, figs.12–13) Piel, 1985, p.112. Emendation: Stover et al., 1977, p.333, as *Stephanelytron scarburghense*. Holotype: Sarjeant, 1961a, pl.15, figs.12–13; Fauconnier and Masure, 2004, pl.73, fig.4. **NOW** *Stephanelytron*. Originally (and now) *Stephanelytron*, subsequently *Lagenadinium*. Age: early Oxfordian.

LAGENORHYTIS Duxbury, 1979b, p.587. Emendation: Piasecki, 1984, p.149. Substitute name for *Speetonia* Duxbury, 1977, p.48–49 (an illegitimate name). Type: Duxbury, 1977, pl.12, fig.4, as *Speetonia delicatula*.

**delicatula* (Duxbury, 1977, p.49, pl.12, figs.1–2,4–5; text-fig.18) Duxbury, 1979b, p.587. Emendation: Piasecki, 1984, p.149–150, as *Lagenorhytis delicatula*. Holotype: Duxbury, 1977, pl.12 (not pl.2), fig.4; Fensome et al., 1993a, fig.3 — p.1107. Originally *Speetonia* (generic name illegitimate), subsequently (and now) *Lagenorhytis*. Age: early Valanginian.

granorugosa Cheng Jinhui and He Chengquan, 2001, p.129,133, fig.1, nos.6–7. Holotype: Cheng Jinhui and He Chengquan, 2001, fig.1, no.7. Age: Berriasian–Valanginian.

LANTERNA Dodekova, 1969, p.16. Emendation: Courtinat, 1989, p.188. Type: Dodekova, 1969, pl.2, figs.4–6, as *Lanterna bulgarica*.

**bulgarica* Dodekova, 1969, p.16–17, pl.2, figs.3–6; pl.3, fig.1; text-figs.B,Db. Holotype: Dodekova, 1969, pl.2, figs.4–6. Age: Tithonian.

?*cantrellii* (Sarjeant, 1972, p.37–38, pl.4, fig.3; pl.6, figs.1–2; text-fig.8) Williams et al., 1993, p.56. Holotype: Sarjeant, 1972, pl.4, fig.3; pl.6, figs.1–2; text-fig.8. Originally *Meiourogonyaulax*?, subsequently *Lithodinia*?, thirdly *Lanterna*, fourthly and now *Lanterna*?. Questionable assignment: Courtinat in Fauconnier and Masure (2004, p.371) as a problematic species. Age: late Bathonian.

emitecta Courtinat, 1989, p.188–189, pl.17, fig.1; pl.20, fig.12; pl.23, figs.12–13,16. Holotype: Courtinat, 1989, pl.23, fig.16; Fauconnier and Masure, 2004, pl.51, figs.8–9. Age: Portlandian.

"?*pattei*" (Valensi, 1949, p.539–540, fig.1) Brideaux and Fisher, 1976, p.25. Holotype: Valensi, 1949, fig.1; Fauconnier and Masure, 2004, pl.62, figs.8–9. **NOW** *Hystrichosphaeridium*. Originally (and now) *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Lanterna*, fourthly *Lanterna*?, fifthly *Pandadinium*. Questionable assignment: Stover and Evitt (1978, p.59). Age: Bathonian.

"?*saturnalis*" Brideaux and Fisher, 1976, p.24–25, pl.6, figs.1–10; pl.7, figs.1–13. Holotype: Brideaux and Fisher, 1976, pl.6, figs.1–7. **NOW** *Epipliosphaera*. Originally *Lanterna*, subsequently *Lanterna*?, thirdly *Pandadinium*, fourthly (and now) *Epipliosphaera*. Questionable assignment: Stover and Evitt (1978, p.59). Age: late Oxfordian–late Kimmeridgian.

"?*spinosa*" Dodekova, 1969, p.17–18, pl.3, figs.2–3,5–6,9,12; text-figs.C,Da. Holotype: Dodekova, 1969, pl.3, figs.2–3,5. **NOW** *Pandadinium*. Originally *Lanterna*, subsequently *Lanterna*?, thirdly (and now) *Pandadinium*. Questionable assignment: Stover and Evitt (1978, p.59). Age: Tithonian.

sportula Dodekova, 1969, p.18–19, pl.3, figs.4,7,10–11; text-fig.Dc. Holotype: Dodekova, 1969, pl.3, figs.4,7. Age: Tithonian.

LANTERNOSPHAERIDIUM Morgenroth, 1966a, p.37. Emendation: Stover and Evitt, 1978, p.168. Taxonomic junior synonym: *Amphorosphaeridium*, according to Norvick (1976, p.50) — however, Stover and Evitt (1978, p.169) retained *Amphorosphaeridium*. Type: Morgenroth, 1966a, pl.10, fig.10, as *Lanternosphaeridium lanosum*.

"*axiale*" (Eisenack, 1965b, p.150, pl.15, figs.1–4) Morgenroth, 1966a, p.38–39. Holotype: Eisenack, 1965b, pl.15, fig.2. **NOW** *Fibrocysta*. Originally *Cordosphaeridium*, subsequently *Lanternosphaeridium*, thirdly *Amphorosphaeridium*, fourthly (and now) *Fibrocysta*. Age: late Eocene–early Oligocene.

"*bipolare*" (Cookson and Eisenack, 1965b, p.135, pl.16, figs.7–8) de Coninck, 1969, p.38. Holotype: Cookson and Eisenack, 1965b, pl.16, fig.8. **NOW** *Fibrocysta*. Originally *Cordosphaeridium*, subsequently *Lanternosphaeridium*, thirdly *Amphorosphaeridium*, fourthly (and now) *Fibrocysta*. Age: early Eocene.

"*ciliatum*" Khanna and Singh, 1981b, p.402, fig.4, nos.7–8; text-fig.12. Holotype: Khanna and Singh, 1981b, fig.4, no.8. **NOW** *Fibrocysta*?. Originally *Lanternosphaeridium*, subsequently (and now) *Fibrocysta*?. Age: middle Eocene.

"*cinctum*" Cookson and Eisenack, 1982, p.45, pl.2, fig.22. Holotype: Cookson and Eisenack, 1982, pl.2, fig.22. **NOW** *Fibrocysta*?. Originally *Lanternosphaeridium*, subsequently (and now) *Fibrocysta*?. Age: Albian–Cenomanian.

doubingerae Troncoso in Troncoso and Doubinger, 1980, p.103, pl.3, figs.7–9. Holotype: Troncoso and Doubinger, 1980, pl.3, figs.8–9. Age: Maastrichtian–Danian.

"*essentiale*" de Coninck, 1969, p.38, pl.11, figs.7–8. Holotype: de Coninck, 1969, pl.11, figs.7–8. **NOW** *Fibrocysta*. Originally *Lanternosphaeridium*, subsequently *Kenleyia*?, thirdly (and now) *Fibrocysta*. Age: early Eocene.

"*hirundo*" (Eisenack, 1958a, p.404–405, pl.24, fig.12) Corradini, 1973, p.154. Emendation: Sarjeant, 1985a, p.76–77, as *Achomosphaera hirundo*. Holotype: Eisenack, 1958a, pl.24, fig.12. **NOW** *Cordosphaeridium*?. Originally *Hystrichosphaeridium*, subsequently *Achomosphaera*, thirdly *Lanternosphaeridium*, fourthly (and now) *Cordosphaeridium*?, fifthly *Spiniferites*?. N.I.A. Age: Early Cretaceous.

**lanosum* Morgenroth, 1966a, p.38, pl.10, figs.10–11. Holotype: Morgenroth, 1966a, pl.10, fig.10. Age: early Eocene.

"*lappaceum*" Drugg, 1970b, p.812–813, figs.4A–D,5A–D. Holotype: Drugg, 1970b, figs.4A–D. **NOW** *Ifecysta*. Originally *Lanternosphaeridium*, subsequently *Fibrocysta*, thirdly (and now) *Ifecysta*. Age: early Eocene.

"*licium*" Jain et al., 1975, p.10, pl.4, figs.51–53. Holotype: Jain et al., 1975, pl.4, fig.51. **NOW** *Fibrocysta*. Originally *Lanternosphaeridium*, subsequently (and now) *Fibrocysta*. Age: Danian.

"*morgenrothii*" Corradini, 1973, p.155, pl.23, fig.1. Holotype: Corradini, 1973, pl.23, fig.1. **NOW** *Pervosphaeridium*. Originally *Lanternosphaeridium*, subsequently *Fibrocysta*, thirdly (and now) *Pervosphaeridium*. Age: Senonian.

"*mutinense*" Corradini, 1973, p.155–156, pl.23, figs.2,9; pl.34, figs.2,3a–b. Holotype: Corradini, 1973, pl.23, fig.2. Originally *Lanternosphaeridium*, subsequently *Fibrocysta*?. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as *Corradinisphaeridium*) *horridum*, according to Masure (1986, p.112). Age: Senonian.

"*ovale*" Hansen, 1977, p.17, figs.19F–G. Holotype: Hansen, 1977, figs.19F–G. **NOW** *Fibrocysta*. Originally *Lanternosphaeridium*, subsequently (and now) *Fibrocysta*. Age: Maastrichtian–Danian.

"*personatum*" Corradini, 1973, p.157, pl.23, figs.5–6. Emendation: Masure, 1986, p.110–111, as *Corradinisphaeridium personatum*. Holotype: Corradini, 1973, pl.23, fig.6; Eisenack and Kjellström, 1981b, p.770f; Masure, 1986, pl.1, figs.1–3; text-figs.1a–b; Fensome et al., 1995, figs.1–3,5–7 — p.1663. **NOW** *Corradinisphaeridium*. Originally *Lanternosphaeridium*, subsequently *Operculodinium*?, thirdly (and now) *Corradinisphaeridium*. Age: Senonian.

"*radiatum*" Morgenroth, 1966a, p.37–38, pl.10, figs.7–9. Holotype: Morgenroth, 1966a, pl.10, figs.7–8. **NOW** *Fibrocysta*. Originally *Lanternosphaeridium*, subsequently (and now) *Fibrocysta*. Age: early Eocene.

reinhardtii Habib in Moshkovitz and Habib, 1993, p.184,186, pl.5, figs.1a–c,2,3a–b,4a–b. Holotype: Moshkovitz and Habib, 1993, pl.5, figs.1a–c. Age: early Danian.

"*vectense*" Eaton, 1976, p.275–276, pl.12, figs.4–6. Holotype: Eaton, 1976, pl.12, fig.4; Bujak et al., 1980, pl.7, fig.10. **NOW** *Fibrocysta*. Originally *Lanternosphaeridium*, subsequently (and now) *Fibrocysta*. Age: middle-late Eocene.

LASAGNIELLA Brinkhuis et al., 2000, p.101. Type: Brinkhuis et al., 2000, pl.1, figs.11–13, as *Lasagniella herngreenii*.

**herngreenii* Brinkhuis et al., 2000, p.101,103, pl.1, figs.1–13; pl.2, figs.1–12; pl.3, figs.1–12; pl.6, figs.1–2; pl.7, fig.1. Holotype: Brinkhuis et al., 2000, pl.1, figs.11–13. Age: latest Maastrichtian–Danian.

"**LATICAVODINIUM**" Wilson and Sarjeant in Sarjeant, 1984c, p.127. **Taxonomic senior synonym:** *Impletosphaeridium*, by implication in Islam (1993, p.86), who questionably transferred the "type species", *Laticavodinium oligacanthum*, to *Impletosphaeridium* and by Masare in Fauconnier and Masare (2004, p.337). Taxonomic senior synonym: *Cleistosphaeridium*, according to Stover and Williams (1987, p.145) — however, *Laticavodinium* is now considered a taxonomic junior synonym of *Impletosphaeridium*. Type: Wetzel, 1952, pl.A, fig.8, as *Hystrichosphaeridium oligacanthum*.

"*latispinosum*" Wilson in Slimani, 2001a, p.194. **Name not validly published:** no description. **Taxonomic senior synonym:** *Hystrichosphaeridium* (now *Raetiaedinium*) *truncigerum*, according to Slimani (2001a, p.194).

"**oligacanthum*" (Wetzel, 1952, p.402–405, pl.A, figs.4,7–8,11a–b; text-figs.21–25) Wilson and Sarjeant in Sarjeant, 1984c, p.127–128. Emendation: Wilson and Sarjeant in Sarjeant, 1984c, p.128, as *Laticavodinium oligacanthum*. Holotype: Wetzel, 1952, pl.A, fig.8; Sarjeant, 1984c, pl.2, figs.4–5; text-fig.2; Fensome et al., 1995, figs.1–5 — p.1625; Dietz et al., 1999, text-fig.6g. **NOW** *Impletosphaeridium*?. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium*?, fourthly *Laticavodinium*, fifthly (and now) *Impletosphaeridium*?. Age: Danian.

LEBERIDOCYSTA Stover and Evitt, 1978, p.59–60. Emendation: Pestchevitskaya, 2009, p.110. Taxonomic senior synonym: *Polygonifera*, according to Mehrotra and Sarjeant (1984c, p.46) — however, Lentin and Williams (1985, p.214) retained *Leberidocysta*. Type: Cookson and Eisenack, 1962b, pl.7, fig.2, as *Hexagonifera chlamydata*.

**chlamydata* (Cookson and Eisenack, 1962b, p.496, pl.7, figs.1–3,5–8) Stover and Evitt, 1978, p.60. Emendations: Fechner, 1985, p.119 and Marheinecke, 1992, p.88, both as *Leberidocysta chlamydata*. Holotype: Cookson and Eisenack, 1962b, pl.7, fig.2; Fensome et al., 1993a, fig.2 — p.1049. Originally *Hexagonifera*, subsequently *Hexagonifera*?, thirdly (and now) *Leberidocysta*, fourthly *Polygonifera*. Lentin and Williams (1985, p.214) retained this species in *Leberidocysta*. Age: Albian–Cenomanian.

subsp. *chlamydata*. Autonym. Holotype: Cookson and Eisenack, 1962b, pl.7, fig.2; Fensome et al., 1993a, fig.2 — p.1049.

subsp. *schioeleri* Slimani, 1996, p.375, pl.1, figs.A–G ex Slimani 2001b, p.3,5. Holotype: Slimani, 1996, pl.1, figs.A–D; Slimani, 2001a, pl.1, figs.10–13. This name was not validly published in Slimani (1996) since no English or Latin description or diagnosis was provided. Slimani (2001b, p.3) cited the epithet as "*schioeleri*"; with latinization of the diacritical marks ("ø" to "oe" and correction of the ending ("er" endings takes a single "i" in the genitive), the epithet is to be cited as "*schioeleri*". Age: late Campanian–earliest Danian.

defloccata (Davey and Verdier, 1973, p.198, pl.3, figs.6,8) Stover and Evitt, 1978, p.60. Holotype: Davey and Verdier, 1973, pl.3, fig.8. Originally *Hexagonifera*, subsequently *Thalassiphora*, thirdly (and now) *Leberidocysta*, fourthly *Disphaeria*, fifthly *Craspedodinium*. Lentin and Williams (1985, p.214) retained this species in *Leberidocysta*. Age: late Albian–early Cenomanian.

"**eisenackii*" (Mehrotra and Sarjeant, 1984c, p.46–48, pl.1, figs.1–7; pl.2, figs.1–7; text-figs.1a–d,2a–c,3a–b) Lentin and Williams, 1985, p.214. Holotype: Mehrotra and Sarjeant, 1984c, pl.1, fig.6; text-fig.1c. **NOW** *Platycystidia* (Appendix A). Originally *Polygonifera*, subsequently *Leberidocysta*?, thirdly (and now) *Platycystidia* (Appendix A). Questionable assignment: Lister and Batten (1988b, p.39). Age: Aptian.

?*flagellichnia* Schiøler, 1993, p.110–111, pl.3, figs.7–14; text-fig.5. Holotype: Schiøler, 1993, pl.3, figs.7–8; text-fig.5. Questionable assignment: Schiøler (1993, p.110). Schiøler et al. (1997, p.87) considered this species to be the possible taxonomic senior synonym of *Leberidocysta microverrucosa*. Age: Maastrichtian–early Danian.

?*laticaudata* (Vozzhennikova, 1967, p.125–126, pl.54, fig.1) Stover and Evitt, 1978, p.60. Holotype: Vozzhennikova, 1967, pl.54, fig.1; Lentin and Vozzhennikova, 1990, text-fig.30; lost according to Lentin and Vozzhennikova (1990, p.59). Originally *Hexagonifera*, subsequently *Hexagonifera?*, thirdly (and now) *Leberidocysta?*. Lentin and Williams (1985, p.214) retained this species in *Leberidocysta*. Questionable assignment: Stover and Evitt (1978, p.60). According to Lentin and Vozzhennikova (1990, p.59), no potential lectotype is available. Age: Santonian.

lingfengensis (Yu Jingxian, 1989, p.158, pl.38, figs.9–10) He Chengquan et al., 2009, p.442. Holotype: Yu Jingxian, 1989, pl.38, fig.10. Originally *Ascodinium*, subsequently (and now) *Leberidocysta*. Age: Paleocene.

?*microverrucosa* Slimani, 1994, p.111–112, pl.18, figs.18,21–25. Holotype: Slimani, 1994, pl.18, figs.24–25. Questionable assignment: Slimani (1994, p.111). Taxonomic junior synonyms: *Hexagonifera verrucosa* (name not validly published) and *Leberidocysta? verrucosa*, both according to Slimani (2001a, p.193). Schiøler et al. (1997, p.87) considered this species to be a possible taxonomic junior synonym of *Leberidocysta? flagellichnia*. Age: early Campanian–earliest Danian.

?*pergamentacea* (Burger, 1980a, p.88, pl.47, figs.2–3) Burger, 1980b, p.272. Holotype: Burger, 1980a, pl.47, fig.3. Originally *Palaeostomocystis* (Appendix A), subsequently (and now) *Leberidocysta?*, thirdly *Craspedodinium*. Lentin and Williams (1985, p.215) retained this species in *Leberidocysta*. Questionable assignment: Burger (1980b, p.272). Age: Aptian.

"?*scabrata*" (Jain and Taugourdeau-Lantz, 1973, p.64, pl.4, figs.11–12) Stover and Evitt, 1978, p.60. Holotype: Jain and Taugourdeau-Lantz, 1973, pl.4, fig.11. **NOW** *Ovoidinium*. Originally *Hexagonifera*, subsequently *Leberidocysta?*, thirdly *Hexagonifera?*, fourthly (and now) *Ovoidinium*. Questionable assignment: Stover and Evitt (1978, p.60). Age: Early Cretaceous.

spinosa Pestchevitskaya, 2009, p.110–111, pl.1, figs.5,7–9, text-fig.2C. Holotype: Pestchevitskaya, 2009, pl.1, fig.5. Age: Berriasian–early Valanginian.

?*strigosa* Mantle, 2009b, p.109,110, pl.13, figs.11–13; text-fig.4. Holotype: Mantle, 2009b, pl.13, fig.11. Questionable assignment: Mantle (2009b, p.109). Age: Callovian.

suibinensis He Chengquan and Zhu Youhua, 2003, p.339,341–342, pl.2, figs.1–3,5–6. Holotype: He Chengquan and Zhu Youhua, 2003, pl.2, fig.2. Age: Berriasian–Valanginian.

"?*verrucosa*" Schiøler et al., 1997, p.85,87, pl.3, figs.1–8. Holotype: Schiøler et al., 1997, pl.3, figs.1–3. Questionable assignment: Schiøler et al. (1997, p.85). **Taxonomic senior synonym:** *Leberidocysta? microverrucosa*, according to Slimani (2001a, p.193). Age: late Maastrichtian.

LEIPOKATIUM Bradford, 1975, p.3066. Harland and Reid in Harland et al. (1980, p.223) contended that this name was not validly published in Bradford (1975) since that author did not provide a Latin description. However, it is based on a fossil type and thus does not require a Latin description in order to be validly published. Type: Bradford, 1975, fig.8, as *Leipokatium invisitatum*.

**invisitatum* Bradford, 1975, p.3067, figs.8–16. Holotype: Bradford, 1975, fig.8; Fensome et al., 1995, fig.1 — p.1569. Age: Holocene.

LEJEUNECYSTA Artzner and Dörhöfer, 1978, p.1381. Emendations: Kjellström, 1972, p.467, Lentin and Williams, 1976, p.68–69 and Bujak in Bujak et al., 1980, p.68, all as *Lejeunia* — however, see Head (1993, p.30–

31). Originally *Lejeunia* Gerlach, 1961 (name illegitimate), subsequently (and now) *Lejeunecysta*, thirdly *Protoperidinium* subgenus *Protoperidinium* section *Lejeunecysta* (section name not validly published). Substitute name for *Lejeunia* Gerlach, 1961, p.169 (an illegitimate name). Taxonomic senior synonym: *Quinquecuspis*, by implication in Matsuoka (1987, p.57), who incorrectly considered *Lejeunecysta* to be the senior name — however, this synonymy has not been generally followed. Type: Gerlach, 1961, pl.26, figs.10–11, as *Lejeunia hyalina*.

acuminata Clowes et al., 2016, p.72, figs.5a–l. Holotype: Clowes et al., figs.5a–c. Age: Oligocene.

"*aechmophora*" (Benedek, 1972, p.41, pl.5, figs.7,11; text-fig.17) Wilson and Clowes, 1980, p.63. Emendation: Benedek and Sarjeant, 1981, p.340–341, as *Gerlachidium aechmophorum*. Holotype: Benedek, 1972, pl.5, fig.7; text-fig.17; Benedek and Sarjeant, 1981, figs.7,9, nos.1–2; Fensome et al., 1993a, figs.1–2 — p.887. **NOW** *Gerlachidium*. Originally *Lejeunia* (generic name illegitimate), subsequently *Wilsonidium*?, thirdly *Lejeunecysta*, fourthly (and now) *Gerlachidium*. Age: middle-late Oligocene.

"*applanata*" (Bradford, 1977 [April], p.47–49, fig.2, nos.1–8) Artzner and Dörhöfer, 1978, p.1381. Holotype: Bradford, 1977, fig.2, nos.1–4. **NOW** *Trinovantedinium*. Originally *Lejeunia* (generic name illegitimate), subsequently *Lejeunecysta*, thirdly (and now) *Trinovantedinium*, fourthly *Capillicysta*. Taxonomic junior synonym: *Trinovantedinium capitatum* Reid, 1977 (November), by implication in Matsuoka (1984b, p.6), who did not specify priority, and de Verteuil and Norris (1992, p.408). Age: Holocene.

attenuata Clowes et al., 2016, p.72–75, figs.6a–l. Holotype: Clowes et al., figs.6a–c. Age: Oligocene.

beninensis Biffi and Grignani, 1983, p.128–130, pl.2, figs.4–5,8; text-fig.2A. Holotype: Biffi and Grignani, 1983, pl.2, fig.5. Age: Oligocene.

brassensis Biffi and Grignani, 1983, p.130, pl.1, figs.1–3; text-fig.2B. Holotype: Biffi and Grignani, 1983, pl.1, fig.1. Age: Oligocene.

catomus (Harland in Harland et al., 1991, p.651,653, figs.4d–e) Lentin and Williams, 1993, p.383. Holotype: Harland et al., 1991, fig.4d. Originally *Protoperidinium* subgenus *Protoperidinium* section *Lejeunecysta* (section name not validly published; Appendix B), subsequently (and now) *Lejeunecysta*. Contrary to the opinion of Lentin and Williams (1993, p.383), the name *Protoperidinium catomus* was validly published in Harland in Harland et al. (1991) since, although *Lejeunecysta* as a section name was not validly published, the species was assigned to the validly published generic name *Protoperidinium*. N.I.A. Age: early Pleistocene.

challengerensis Louwye et al., 2008, p.136, pl.2, figs.1–9. Holotype: Louwye et al., 2008, pl.2, figs.1–9. Age: early-middle Miocene.

cinctoria (Bujak in Bujak et al., 1980, p.68–69, pl.18, figs.1–4; text-fig.17) Lentin and Williams, 1981, p.169. Holotype: Bujak et al., 1980, pl.18, figs.1–2. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Age: middle Eocene (see Aubry, 1986).

circularis (He Chengquan in Zheng Yahui and He Chengquan, 1984, p.94, pl.7, figs.21–25; pl.10, figs.3–4) Lentin and Williams, 1989, p.218. Holotype: Zheng Yahui and He Chengquan, 1984, pl.7, fig.22. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Age: Late Cretaceous.

communis Biffi and Grignani, 1983, p.130–132, pl.1, figs.4–7; text-fig.2C. Holotype: Biffi and Grignani, 1983, pl.1, fig.5. Age: Oligocene.

"*concreta*" (Reid, 1977, p.438–439, pl.1, figs.9–11) Matsuoka, 1987, p.58. Holotype: Reid, 1977, pl.1, figs.9–11; Fensome et al., 1993a, figs.1–3 — p.1069. **NOW** *Quinquecuspis*. Originally *Trinovantedinium*, subsequently (and now) *Quinquecuspis*, thirdly *Lejeunecysta*. Motile equivalent: *Protoperidinium leonis* (Pavillard, 1916) Balech, 1974, according to Harland (1981, p.68) and Lewis et al. (1984, p.30). Age: Holocene.

convexa Matsuoka and Bujak, 1988, p.56–58, pl.7, fig.2; pl.19, figs.1–2; text-figs.11A–C. Holotype: Matsuoka and Bujak, 1988, pl.7, fig.2; text-fig.11A. Age: late Oligocene–early Miocene.

cowiei Hannah et al., 1998, p.535, figs.5f–g. Holotype: Hannah et al., 1998, figs.5f–g. Age: early Miocene.

decorinassa Srivastava, 1995, p.312,314, pl.30, figs.6–7. Holotype: Srivastava, 1995, pl.30, fig.7. Age: Maastrichtian.

subsp. *diversiforma*. Autonym. Holotype: Bradford, 1977, fig.4, no.1. Originally *Lejeunia diversiforma* subsp. *diversiforma* (generic name illegitimate), subsequently (and now) *Lejeunecysta diversiforma* subsp. *diversiforma*.

subsp. *muscatensis* (Bradford, 1977, p.55–56, figs.6, nos.1–3) Artzner and Dörhöfer, 1978, p.1381. Holotype: Bradford, 1977, fig.6, no.3. Originally *Lejeunia diversiforma* subsp. *muscatensis* (generic name illegitimate), subsequently (and now) *Lejeunecysta diversiforma* subsp. *muscatensis*. Age: Holocene.

diversiforma (Bradford, 1977, p.49,52,55–56, fig.4, nos.1–4,6–7; fig.6, nos.1–3) Artzner and Dörhöfer, 1978, p.1381. Holotype: Bradford, 1977, fig.4, no.1. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Age: Holocene.

?*epidoma* Matsuoka, 1987, p.59–60, pl.9, figs.5–6. Holotype: Matsuoka, 1987, pl.9, figs.5–6. Questionable assignment: Matsuoka (1987, p.59). Age: Quaternary.

fallax (Morgenroth, 1966b, p.2–3, pl.1, figs.6–7) Artzner and Dörhöfer, 1978, p.1381. Emendation: Biffi and Grignani, 1983, p.132, as *Lejeunecysta fallax*. Holotype: Morgenroth, 1966b, pl.1, fig.6. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Age: middle Oligocene.

"*gaditana*" (Riegel, 1974, p.356–357, pl.2, figs.8–9; pl.3, figs.1–2) Wilson and Clowes, 1980, p.63. Emendation: Riegel and Sarjeant, 1982, p.297–299, as *Phelodinium gaditanum*. Holotype: Riegel, 1974, pl.2, figs.8–9; Riegel and Sarjeant, 1982, fig.7D. **NOW** *Phelodinium*. Originally *Deflandrea*, subsequently *Senegalinium*, thirdly *Lejeunia* (combination illegitimate), fourthly *Lejeunecysta*, fifthly (and now) *Phelodinium*. Age: Senonian.

globosa Biffi and Grignani, 1983, p.132–134, pl.2, figs.6–7,10; text-fig.2E. Holotype: Biffi and Grignani, 1983, pl.2, fig.6. Age: Oligocene.

granosa Biffi and Grignani, 1983, p.134, pl.4, figs.1–2; text-fig.2D. Holotype: Biffi and Grignani, 1983, pl.4, fig.2. Age: Oligocene.

hatterasensis Head and Norris, 2003, p.3–4,6, fig.4, nos.1–20. Holotype: Head and Norris, 2003, fig.4, nos.10–13. Age: Pliocene.

**hyalina* (Gerlach, 1961, p.169–171, pl.26, figs.10–11) Artzner and Dörhöfer, 1978, p.1381. Emendations: Kjellström, 1972, p.469, as *Lejeunia hyalina*; Sarjeant, 1984b, p.89–90, as *Lejeunecysta hyalina*. Holotype: Gerlach, 1961, pl.26, figs.10–11. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Age: late Oligocene.

illecebrosa Jin Guangxing, He Chengquan and Zhu Shenzhao in He Chengquan et al., 1989, p.49–50, pl.3, figs.8–17; text-fig.4. Holotype: He Chengquan et al., 1989, pl.3, fig.15. Age: Early Tertiary.

interrupta Head and Norris, 2003, p.6,8, fig.6, nos.1–20. Holotype: Head and Norris, 2003, fig.6, nos.14–17. Age: late Miocene–earliest Pliocene.

izerzenensis Slimani et al., 2008, p.340–342, figs.10A–F. Holotype: Slimani et al., 2008, figs.10A–B. Age: late Maastrichtian.

kammae Willumsen, 2011, p.224,226, figs.11K–L. Holotype: Willumsen, 2011, fig.K. Age: early Paleocene.

katatonos Clowes et al. 2016, p.75–77, figs.8a–l. Holotype: Clowes et al., figs.8a–c. N.I.A. Age: Oligocene.

"laevigata" (Malloy, 1972, p.64, pl.1, figs.1–7) Wilson and Clowes, 1980, p.63. Holotype: Malloy, 1972, pl.1, fig.5. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently *Lejeunia* (combination illegitimate), thirdly *Andalusiella*, fourthly *Lejeunecysta*, fifthly (and now) *Senegalinium*. Taxonomic junior synonym: *Senegalinium psilatatum*, according to Hergreen (1975, p.61). Age: Senonian.

lata Biffi and Grignani, 1983, p.134–136, pl.3, figs.1–2,4; text-fig.2G. Holotype: Biffi and Grignani, 1983, pl.3, fig.2; text-fig.2G. Age: Oligocene.

"magnifica" (Stanley, 1965, p.218–219, pl.20, figs.1–6) Artzner and Dörhöfer, 1978, p.1381. Holotype: Stanley, 1965, pl.20, figs.4–6. **NOW** *Phelodinium*. Originally *Deflandrea*, subsequently *Lejeunia* (combination illegitimate), thirdly *Senegalinium*, fourthly *Lejeunecysta*, fifthly (and now) *Phelodinium*. Taxonomic junior synonym (at specific rank): *Peridinium crassipes* forma *altum*, according to Sarjeant (1985b, p.159) and Lentin and Williams (1993, p.503). Age: Paleocene.

marieae (Harland in Harland et al., 1991, p.653, figs.4j–l) Lentin and Williams, 1993, p.383. Holotype: Harland et al., 1991, fig.4j. Originally *Protoperidinium* subgenus *Protoperidinium* section *Lejeunecysta* (section name not validly published; Appendix B), subsequently (and now) *Lejeunecysta*. Contrary to the opinion of Lentin and Williams (1993, p.383), the name *Protoperidinium marieae* was validly published in Harland in Harland et al. (1991) since, although *Lejeunecysta* as a section name was not validly published, the species was assigned to the validly published generic name *Protoperidinium*. Age: early Pleistocene.

microgranulata (He Chengquan in Zheng Yahui and He Chengquan, 1984, p.94, pl.7, fig.30) Lentin and Williams, 1989, p.218. Holotype: Zheng Yahui and He Chengquan, 1984, pl.7, fig.30. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Age: Late Cretaceous.

oliva (Reid, 1977, p.439–440, pl.1, figs.12–14; pl.2, fig.18) Turon and Londeix, 1988, p.344. Holotype: Reid, 1977, pl.1, figs.12–13. Originally *Trinovantedinium*, subsequently (and now) *Lejeunecysta*. Taxonomic senior synonym: *Lejeunia* (now *Lejeunecysta*) *paratenella*, according to Harland (1977b, p.105) — however, Turon and Londeix (1988, p.344) retained *Trinovantedinium* (as *Lejeunecysta*) *oliva*. N.I.A. Age: Holocene.

"paratenella" (Benedek, 1972, p.41–42, pl.5, fig.8; text-fig.18) Artzner and Dörhöfer, 1978, p.1381. Holotype: Benedek, 1972, pl.5, fig.8; Benedek and Sarjeant, 1981, fig.9, nos.3–4. Originally *Lejeunia* (generic name illegitimate), subsequently *Lejeunecysta*. **Taxonomic senior synonym:** *Selenopemphix selenoides*, according to Benedek and Sarjeant (1981, p.336–338). Taxonomic junior synonym: *Trinovantedinium* (now *Lejeunecysta*) *oliva*, according to Harland (1977b, p.105) — however, Turon and Londeix (1988, p.344) retained *Trinovantedinium* (as *Lejeunecysta*) *oliva*. Age: late Oligocene.

pentagona He Chengquan, 1991, p.68, pl.1, figs.13–14. Holotype: He Chengquan, 1991, pl.1, fig.13. Age: middle Eocene.

"pentagonalis" (Corradini, 1973, p.175, pl.28, fig.3) Artzner and Dörhöfer, 1978, p.1381. Holotype: Corradini, 1973, pl.28, fig.3; Eisenack and Kjellström, 1981a, page labelled "nach S.208"; Fensome et al., 1995, fig.1 — p.1649. **NOW** *Phelodinium*. Originally *Deflandrea*, subsequently *Lejeunia* (combination illegitimate), thirdly *Senegalinium*, fourthly *Lejeunecysta*, fifthly (and now) *Phelodinium*. Age: Senonian.

?psilodora (Benedek, 1972, p.42, pl.6, fig.5) Artzner and Dörhöfer, 1978, p.1381. Holotype: Benedek, 1972, pl.6, fig.5. Originally *Lejeunia* (generic name illegitimate), subsequently *Lejeunia?* (generic name illegitimate), thirdly (and now) *Lejeunecysta?*. Taxonomic senior synonym: *Selenopemphix nephroides*, according to Benedek and Sarjeant (1981, p.333) — however, Lentin and Williams (1985, p.217) and Head (1993, p.36) retained *Lejeunecysta psilodora*. Questionable assignment: Stover and Evitt (1978, p.112) as *Lejeunia psilodora*. Age: middle Oligocene.

psuchra Matsuoka, 1987, p.60–61, pl.9, figs.7–8; pl.14, figs.11–12. Holotype: Matsuoka, 1987, pl.9, figs.7–8. Age: Holocene.

pulchra Biffi and Grignani, 1983, p.136, pl.2, figs.1–3; text-fig.2I. Holotype: Biffi and Grignani, 1983, pl.2, fig.1; text-fig.2I. Age: Oligocene.

rotunda Clowes et al., 2016, p.77–78, figs.9a–l. Holotype: Clowes et al., figs.9a–c. Age: Oligocene.

sabrina (Reid, 1977, p.441–442, pl.2, figs.15–17) Bujak, 1984, p.193. Holotype: Reid, 1977, pl.2, fig.15. Originally *Trinovantedinium*, subsequently (and now) *Lejeunecysta*. Motile equivalent: *Protoperidinium leonis* (Pavillard, 1916) Balech, 1974, according to Harland (1981, p.68). N.I.A. Age: Holocene.

spatiosa (Morgenroth, 1966b, p.3–4, pl.1, fig.5) Wilson and Clowes, 1980, p.63. Holotype: Morgenroth, 1966b, pl.1, fig.5. Originally *Lejeunia* (generic name illegitimate), subsequently *Maduradinium*, thirdly (and now) *Lejeunecysta*. Lentin and Williams (1981, p.170) also proposed this combination. Age: early Oligocene.

spectabilis He Chengquan, 1991, p.68–69, pl.1, fig.40. Holotype: He Chengquan, 1991, pl.1, fig.40. Age: middle Eocene.

striata Clowes et al., 2016, p.78–79, figs.10a–l. Holotype: Clowes et al., figs.10a–c. Age: Oligocene–Miocene.

tenella (Morgenroth, 1966b, p.4–5, pl.1, figs.8–9) Wilson and Clowes, 1980, p.63. Holotype: Morgenroth, 1966b, pl.1, fig.8. Originally *Lejeunia* (generic name illegitimate), subsequently *Vozzhennikovia*, thirdly *Dioxya*, fourthly (and now) *Lejeunecysta*. Lentin and Williams (1981, p.170) also proposed this combination. Age: early Oligocene.

"*tricuspis*" (Wetzel, 1933a, p.166, pl.2, fig.14) Artzner and Dörhöfer, 1978, p.1381–1382. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.20, as *Lejeunecysta tricuspis*. Holotype: Wetzel, 1933a, pl.2, fig.14; Lejeune-Carpentier, 1942, fig.21; Lejeune-Carpentier and Sarjeant, 1981, pl.6, fig.5. **NOW** *Phelodinium*. Originally *Peridinium* (Appendix B), subsequently *Lejeunia* (combination illegitimate), thirdly *Astrocysta*, fourthly *Senegalinium*, fifthly *Lejeunecysta*, sixthly (and now) *Phelodinium*. Taxonomic junior synonym: *Lejeunia* (now *Phelodinium*) *kozłowskii*, according to Harker and Sarjeant (1975, p.223) — however, Lindgren (1984, p.181) retained *Lejeunia* (as *Phelodinium*) *kozłowskii*. According to Lejeune-Carpentier and Sarjeant (1981, p.20, pl.6, fig.5), this species represents an autocyst; therefore it should be retained in *Lejeunecysta*. Age: Senonian.

variabilis (He Chengquan in Zheng Yahui and He Chengquan, 1984, p.94–95, pl.7, figs.26–29; pl.10, fig.5) Lentin and Williams, 1989, p.219. Holotype: Zheng Yahui and He Chengquan, 1984, pl.7, fig.26. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Age: Late Cretaceous.

"**LEJEUNIA**" Gerlach, 1961, p.169. Emendations: Kjellström, 1972, p.467, Lentin and Williams, 1976, p.68–69 and Bujak in Bujak et al., 1980, p.68, all as *Lejeunia* — however, see Head (1993, p.30–31). **Name illegitimate** — **senior homonym**: *Lejeunea* Libert, 1820. **Substitute name**: *Lejeunecysta*. Originally *Lejeunia* Gerlach, 1961 (generic name illegitimate), subsequently (and now) *Lejeunecysta*, thirdly *Protoperidinium* subgenus *Protoperidinium* section *Lejeunecysta* (section name not validly published). Taxonomic senior synonym: *Quinquecuspis*, by implication in Matsuoka (1987, p.57), who incorrectly considered *Lejeunecysta* to be the senior name — however, this synonymy has not been generally followed. Type: Gerlach, 1961, pl.26, figs.10–11, as *Lejeunia hyalina*.

"*aechmophora*" Benedek, 1972, p.41, pl.5, figs.7,11; text-fig.17. Emendation: Benedek and Sarjeant, 1981, p.340–341, as *Gerlachidium aechmophorum*. Holotype: Benedek, 1972, pl.5, fig.7; text-fig.17; Benedek and Sarjeant, 1981, figs.7,9, nos.1–2; Fensome et al., 1993a, figs.1–2 — p.887. **NOW** *Gerlachidium*. Originally *Lejeunia* (generic name illegitimate), subsequently *Wilsonidium*?, thirdly *Lejeunecysta*, fourthly (and now) *Gerlachidium*. Following I.C.N. Article 55.1, the species name *Lejeunia aechmophora* is validly published even though the generic name *Lejeunia* is illegitimate. Age: middle-late Oligocene.

"*ampla*" Harland, 1973, p.673–674, pl.84, figs.1,7; text-fig.8. Holotype: Harland, 1973, pl.84, fig.1. Originally *Lejeunia* (generic name illegitimate), subsequently *Astrocysta* (combination not validly published), thirdly *Palaeoperidinium*. **Taxonomic senior synonym**: *Palaeoperidinium cretaceum*, according to Harker and Sarjeant in

Harker et al. (1990, p.128). Following I.C.N. Article 55.1, the species name *Lejeunia ampla* is validly published even though the generic name *Lejeunia* is illegitimate. Age: late Campanian.

"*applanata*" Bradford, 1977 (April), p.47–49, fig.2, nos.1–4. Holotype: Bradford, 1977, fig.2, nos.1–4. **NOW** *Trinovantedinium*. Originally *Lejeunia* (generic name illegitimate), subsequently *Lejeunecysta*, thirdly (and now) *Trinovantedinium*, fourthly *Capillicysta*. Taxonomic junior synonym: *Trinovantedinium capitatum* Reid, 1977 (November), by implication in Matsuoka (1984b, p.6), who did not specify priority, and de Verteuil and Norris (1992, p.408). Following I.C.N. Article 55.1, the species name *Lejeunia applanata* is validly published even though the generic name *Lejeunia* is illegitimate. Age: Holocene.

"*cinctoria*" Bujak in Bujak et al., 1980, p.68–69, pl.18, figs.1–4; text-fig.17. Holotype: Bujak et al., 1980, pl.18, figs.1–2. **NOW** *Lejeunecysta*. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Following I.C.N. Article 55.1, the species name *Lejeunia cinctoria* is validly published even though the generic name *Lejeunia* is illegitimate. Age: middle Eocene (see Aubry, 1986).

"*circularis*" He Chengquan in Zheng Yahui and He Chengquan, 1984, p.94, pl.7, figs.21–25; pl.10, figs.3–4. Holotype: Zheng Yahui and He Chengquan, 1984, pl.7, fig.22. **NOW** *Lejeunecysta*. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Following I.C.N. Article 55.1, the species name *Lejeunia circularis* is validly published even though the generic name *Lejeunia* is illegitimate. Age: Late Cretaceous.

"?*cretacea*" (Pocock, 1962, p.80, pl.14, figs.219–221 ex Davey, 1970, p.359, pl.2, fig.4) Brideaux, 1971, p.86. Emendation: Harding, 1990a, p.44, as *Palaeoperidinium cretaceum*. Holotype: Pocock, 1962, pl.14, fig.219. **Combination illegitimate**: the generic name *Lejeunia* is illegitimate. **NOW** *Palaeoperidinium*. Originally *Palaeoperidinium* (name not validly published), subsequently *Astrocysta*, thirdly *Lejeunia?* (name illegitimate), fourthly *Subtilisphaera*, fifthly (and now) *Palaeoperidinium*. Questionable assignment: Brideaux (1971, p.86). Taxonomic junior synonyms: *Lejeunia* (as *Palaeoperidinium*) *ampla*, according to Harker and Sarjeant in Harker et al. (1990, p.128); *Astrocysta* (as *Palaeoperidinium*) *manumcooksonii*, according to Lentin and Williams (1976, p.110). Age: Aptian–Albian.

"*diversiforma*" Bradford, 1977, p.49, 52, 55–56, fig.4, nos.1–4, 6–7; fig.6, nos.1–3. Holotype: Bradford, 1977, fig.4, no.1. **NOW** *Lejeunecysta*. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Following I.C.N. Article 55.1, the species name *Lejeunia diversiforma* is validly published even though the generic name *Lejeunia* is illegitimate. Age: Holocene.

"*elongata*" Jiabo, 1978, p.54–55, pl.1, figs.5–7. Holotype: Jiabo, 1978, pl.1, fig.6. **NOW** *Cangxianella*. Originally *Lejeunia* (generic name illegitimate), subsequently *Ceratiopsis* (combination illegitimate), thirdly *Cerodinium*, fourthly (and now) *Cangxianella*. Following I.C.N. Article 55.1, the species name *Lejeunia elongata* is validly published even though the generic name *Lejeunia* is illegitimate. Age: Early Tertiary.

"*fallax*" Morgenroth, 1966b, p.2–3, pl.1, figs.6–7. Emendation: Biffi and Grignani, 1983, p.132, as *Lejeunecysta fallax*. Holotype: Morgenroth, 1966b, pl.1, fig.6. **NOW** *Lejeunecysta*. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Following I.C.N. Article 55.1, the species name *Lejeunia fallax* is validly published even though the generic name *Lejeunia* is illegitimate. Age: middle Oligocene.

"*fissurata*" Jiabo, 1978, p.55, pl.1, figs.4, 8–10. Holotype: Jiabo, 1978, pl.1, fig.9. **NOW** *Cangxianella*. Originally *Lejeunia* (generic name illegitimate), subsequently *Ceratiopsis* (combination illegitimate), thirdly *Cerodinium*, fourthly (and now) *Cangxianella*. Following I.C.N. Article 55.1, the species name *Lejeunia fissurata* is validly published even though the generic name *Lejeunia* is illegitimate. Age: Early Tertiary.

"*gaditana*" (Riegel, 1974, p.356–357, pl.2, figs.8–9; pl.3, figs.1–2) Stover and Evitt, 1978, p.112. Emendation: Riegel and Sarjeant, 1982, p.297–299, as *Phelodinium gaditanum*. Holotype: Riegel, 1974, pl.2, figs.8–9; Riegel and Sarjeant, 1982, fig.7D. **Combination illegitimate**: the generic name *Lejeunia* is illegitimate. **NOW** *Phelodinium*. Originally *Deflandrea*, subsequently *Senegalium*, thirdly *Lejeunia* (combination illegitimate), fourthly *Lejeunecysta*, fifthly (and now) *Phelodinium*. Age: ?Senonian.

"**hyalina*" Gerlach, 1961, p.169–171, pl.26, figs.10–11. Emendations: Kjellström, 1972, p.469, as *Lejeunia hyalina*; Sarjeant, 1984b, p.89–90, as *Lejeunecysta hyalina*. Holotype: Gerlach, 1961, pl.26, figs.10–11. **NOW** *Lejeunecysta*. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Following I.C.N. Article 55.1, the species name *Lejeunia hyalina* is validly published even though the generic name *Lejeunia* is illegitimate. Age: late Oligocene.

"*kozlowskii*" Górka, 1963, p.41, pl.5, fig.4. Holotype: Górka, 1963, pl.5, fig.4. **NOW** *Phelodinium*. Originally *Lejeunia* (generic name illegitimate), subsequently *Astrocysta*, thirdly *Senegalinium*, fourthly (and now) *Phelodinium*. Taxonomic senior synonym: *Peridinium* (now *Phelodinium*) *tricuspis*, according to Harker and Sarjeant (1975, p.223) — however, Lindgren (1984, p.181) retained *Peridinium* (as *Phelodinium*) *kozlowskii*. Following I.C.N. Article 55.1, the species name *Lejeunia kozlowskii* is validly published even though the generic name *Lejeunia* is illegitimate. Age: late Maastrichtian.

"*laevigata*" (Malloy, 1972, p.64, pl.1, figs.1–7) Lentin and Williams, 1976, p.71. Holotype: Malloy, 1972, pl.1, fig.5. **Combination illegitimate**: the generic name *Lejeunia* is illegitimate. **NOW** *Senegalinium*. Originally *Deflandrea*, subsequently *Lejeunia* (combination illegitimate), thirdly *Andalusiella*, fourthly *Lejeunecysta*, fifthly (and now) *Senegalinium*. Taxonomic junior synonym: *Senegalinium psilatatum*, according to Herengreen (1975, p.61). Age: Senonian.

"*magnifica*" (Stanley, 1965, p.218–219, pl.20, figs.1–6) Lentin and Williams, 1976, p.71. Holotype: Stanley, 1965, pl.20, figs.4–6. **Combination illegitimate**: the generic name *Lejeunia* is illegitimate. **NOW** *Phelodinium*. Originally *Deflandrea*, subsequently *Lejeunia* (combination illegitimate), thirdly *Senegalinium*, fourthly *Lejeunecysta*, fifthly (and now) *Phelodinium*. Taxonomic junior synonym (at specific rank): *Peridinium crassipes* forma *altum*, according to Sarjeant (1985b, p.159) and Lentin and Williams (1993, p.503). Age: Paleocene.

"*microgranulata*" He Chengquan in Zheng Yahui and He Chengquan, 1984, p.94, pl.7, fig.30. Holotype: Zheng Yahui and He Chengquan, 1984, pl.7, fig.30. **NOW** *Lejeunecysta*. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Following I.C.N. Article 55.1, the species name *Lejeunia microgranulata* is validly published even though the generic name *Lejeunia* is illegitimate. Age: Late Cretaceous.

"*paratenella*" Benedek, 1972, p.41–42, pl.5, fig.8; text-fig.18. Holotype: Benedek, 1972, pl.5, fig.8; Benedek and Sarjeant, 1981, fig.9, nos.3–4. Originally *Lejeunia* (generic name illegitimate), subsequently *Lejeunecysta*. **Taxonomic senior synonym**: *Selenopemphix selenoides*, according to Benedek and Sarjeant (1981, p.336–338). Taxonomic junior synonym: *Trinovantedinium* (now *Lejeunecysta*) *oliva*, according to Harland (1977b, p.105) — however, Turon and Londeix (1988, p.344) retained *Trinovantedinium* (as *Lejeunecysta*) *oliva*. Following I.C.N. Article 55.1, the species name *Lejeunia paratenella* is validly published even though the generic name *Lejeunia* is illegitimate. Age: late Oligocene.

"*parva*" Harland, 1973, p.672–673, pl.84, figs.3,12–14; text-fig.7. Holotype: Harland, 1973, pl.84, fig.14. **NOW** *Palaeoperidinium*. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Palaeoperidinium*. Following I.C.N. Article 55.1, the species name *Lejeunia parva* is validly published even though the generic name *Lejeunia* is illegitimate. Age: late Campanian.

"*pentagonalis*" (Corradini, 1973, p.175, pl.28, fig.3) Lentin and Williams, 1976, p.71. Holotype: Corradini, 1973, pl.28, fig.3; Eisenack and Kjellström, 1981a, page labelled "nach S.208"; Fensome et al., 1995, fig.1 — p.1649. **Combination illegitimate**: the generic name *Lejeunia* is illegitimate. **NOW** *Phelodinium*. Originally *Deflandrea*, subsequently *Lejeunia* (combination illegitimate), thirdly *Senegalinium*, fourthly *Lejeunecysta*, fifthly (and now) *Phelodinium*. Age: Senonian.

"?*psilodora*" Benedek, 1972, p.42, pl.6, fig.5. Holotype: Benedek, 1972, pl.6, fig.5. **NOW** *Lejeunecysta*?. Originally *Lejeunia* (generic name illegitimate), subsequently *Lejeunia*? (generic name illegitimate), thirdly (and now) *Lejeunecysta*. Questionable assignment: Stover and Evitt (1978, p.112). Taxonomic senior synonym: *Selenopemphix nephroides*, according to Benedek and Sarjeant (1981, p.333) — however, Lentin and Williams (1985, p.217) and Head (1993, p.36) retained *Lejeunia* (as *Lejeunecysta*) *psilodora*. Following I.C.N. Article 55.1, the species name *Lejeunia psilodora* is validly published even though the generic name *Lejeunia* is illegitimate. Age: middle Oligocene.

"*spatiosa*" Morgenroth, 1966b, p.3–4, pl.1, fig.5. Holotype: Morgenroth, 1966b, pl.1, fig.5. **NOW** *Lejeunecysta*. Originally *Lejeunia* (generic name illegitimate), subsequently *Maduradinium*, thirdly (and now) *Lejeunecysta*. Following I.C.N. Article 55.1, the species name *Lejeunia spatiosa* is validly published even though the generic name *Lejeunia* is illegitimate. Age: early Oligocene.

"*tenella*" Morgenroth, 1966b, p.4–5, pl.1, figs.8–9. Holotype: Morgenroth, 1966b, pl.1, fig.8. **NOW** *Lejeunecysta*. Originally *Lejeunia* (generic name illegitimate), subsequently *Vozzhennikovia*, thirdly *Dioxya*, fourthly (and now) *Lejeunecysta*. Following I.C.N. Article 55.1, the species name *Lejeunia tenella* is validly published even though the generic name *Lejeunia* is illegitimate. Age: early Oligocene.

"*tricuspis*" (Wetzel, 1933a, p.166, pl.2, fig.14) Górka, 1963, p.40. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.20, as *Lejeunecysta tricuspis*. Holotype: Wetzel, 1933a, pl.2, fig.14; Lejeune-Carpentier, 1942, fig.21; Lejeune-Carpentier and Sarjeant, 1981, pl.6, fig.5. **Combination illegitimate**: the generic name *Lejeunia* is illegitimate. **NOW** *Phelodinium*. Originally *Peridinium* (Appendix B), subsequently *Lejeunia* (combination illegitimate), thirdly *Astrocysta*, fourthly *Senegalinium*, fifthly *Lejeunecysta*, sixthly (and now) *Phelodinium*. Taxonomic junior synonym: *Lejeunia* (now *Phelodinium*) *kozłowskii*, according to Harker and Sarjeant (1975, p.223) — however, Lindgren (1984, p.181) retained *Lejeunia* (as *Phelodinium*) *kozłowskii*. Age: Senonian.

"*variabilis*" He Chengquan in Zheng Yahui and He Chengquan, 1984, p.94–95, pl.7, figs.26–29; pl.10, fig.5. Holotype: Zheng Yahui and He Chengquan, 1984, pl.7, fig.26. **NOW** *Lejeunecysta*. Originally *Lejeunia* (generic name illegitimate), subsequently (and now) *Lejeunecysta*. Following I.C.N. Article 55.1, the species name *Lejeunia variabilis* is validly published even though the generic name *Lejeunia* is illegitimate. Age: Late Cretaceous.

"subsp. *diversiforma*". Autonym. Holotype: Bradford, 1977, fig.4, no.1. **NOW** *Lejeunecysta diversiforma* subsp. *diversiforma*. Originally *Lejeunia diversiforma* subsp. *diversiforma* (generic name illegitimate), subsequently (and now) *Lejeunecysta diversiforma* subsp. *diversiforma*.

"subsp. *muscatensis*" Bradford, 1977, p.55–56, fig.6, nos.1–3. Holotype: Bradford, 1977, fig.6, no.3. **NOW** *Lejeunecysta diversiforma* subsp. *muscatensis*. Originally *Lejeunia diversiforma* subsp. *muscatensis* (generic name illegitimate), subsequently (and now) *Lejeunecysta diversiforma* subsp. *muscatensis*. Age: Holocene.

LENTINIA Bujak in Bujak et al., 1980, p.69. Type: Bujak et al., 1980, pl.18, figs.7–9; text-figs.18A–F, as *Lentinia serrata*.

"*extensa*" (Stover, 1974, p.178–179, pl.5, figs.4a–c, 5a–d, 6) Bujak and Davies, 1983, p.162. Holotype: Stover, 1974, pl.5, figs.4a–c; Fensome et al., 1993a, figs.1–3 — p.1167. **NOW** *Gippslandia*. Originally *Deflandrea*, subsequently *Vozzhennikovia*?, thirdly *Dioxya*?, fourthly *Lentinia*, fifthly (and now) *Gippslandia*. Age: middle-late Eocene.

"*orei*" Jan du Chêne and Adediran, 1985, p.29, pl.1, figs.2–4. Holotype: Jan du Chêne and Adediran, 1985, pl.1, fig.3. **NOW** *Senegalinium*. Originally *Lentinia*, subsequently (and now) *Senegalinium*. Age: late Paleocene–early Eocene.

**serrata* Bujak in Bujak et al., 1980, p.71–72, pl.18, figs.7–12; text-figs.18A–F, 19. Holotype: Bujak et al., 1980, pl.18, figs.7–9; text-figs.18A–F; Fensome et al., 1995, figs.1–7 — p.1783. Age: middle Eocene (see Aubry, 1986).

?*wetzelii* (Morgenroth, 1966a, p.9, pl.1, figs.4–5) Bujak in Bujak et al., 1980, p.72. Holotype: Morgenroth, 1966a, pl.1, figs.4–5. Originally *Deflandrea*, subsequently *Lentinia*, thirdly (and now) *Lentinia*?. Questionable assignment: Stover and Williams (1987, p.148). Age: early Eocene.

LENTODINELLA Kienel, 1994, p.54. (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1298, the latter noting that the cyst wall is pithonelloid and so a dinoflagellate affinity is questionable). Type: Kienel, 1994, pl.14, figs.1–3, as *Lentodinella danica*.

**danica* Kienel, 1994, p.54–55, pl.14, figs.1–15; pl.15, figs.1–8. Holotype: Kienel, 1994, pl.14, figs.1–3. Age: Danian.

LEONELLA Janofske and Karwath, 2000, p.107. Calcareous dinoflagellate genus (see Streng et al., 2004, p.482 and Elbrächter et al., 2008, p.1300). Elbrächter et al. (2008, p.1300) implied that this is an extant genus; however, the type is Gelasian. Type: Fütterer, 1978, pl.2, figs.1,4,7, as *Thoracosphaera granifera*.

**granifera* (Fütterer, 1978, p.715, pl.2, figs.1–12) Janofske and Karwath, 2000, p.107. Emendation: Janofske and Karwath, 2000, p.107–108, as *Leonella granifera*. Holotype: Fütterer, 1978, pl.2, figs.1,4,7. Originally *Thoracosphaera*, subsequently *Obliquipithonella*, thirdly *Orthopithonella*, fourthly (and now) *Leonella*. Age: Gelasian.

LEPTODINIUM Klement, 1960, p.45–46. Emendations: Sarjeant, 1966b, p.133; Wall, 1967, p.104; Sarjeant, 1969, p.11–12; Stover and Evitt, 1978, p.169–170; Sarjeant, 1982b, p.37. Type: Klement, 1960, pl.6, figs.1–2; text-figs.23–24, as *Leptodinium subtile*.

"*aceras*" (Eisenack, 1958a, p.391, pl.21, figs.1–2) Sarjeant, 1969, p.12. Emendation: Sarjeant, 1985a, p.57,59, as *Cribroperidinium aceras*. Holotype: Eisenack, 1958a, pl.21, fig.1; Sarjeant, 1985a, pl.4, figs.1–2; Jan du Chêne et al., 1986a, pl.2, figs.6–7. **NOW** *Cribroperidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta?* (combination not validly published), thirdly *Leptodinium*, fourthly *Acanthaulax?*, fifthly (and now) *Cribroperidinium*. Age: Aptian.

acneum Snape, 1992, p.275, figs.7l–m. Holotype: Snape, 1992, figs.7l–m. Age: middle Tithonian.

"*aculeatum*" Wall, 1967, p.104–105, pl.14, figs.18–19; text-figs.3C–D. Holotype: Wall, 1967, pl.14, fig.18; Jan du Chêne et al., 1986a, pl.53, figs.1–3. **NOW** *Impagidinium*. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: Pleistocene–Holocene.

"*allectrolophum*" Sarjeant, 1966b, p.134–135, pl.15, figs.3–6; text-fig.34. Holotype: Sarjeant, 1966b, pl.15, figs.5–6; Jan du Chêne et al., 1986a, pl.54, figs.15–16. **NOW** *Impagidinium*. Originally *Leptodinium*, subsequently (and now) *Impagidinium*, thirdly *Pterodinium*. Age: middle Barremian.

amabile (Deflandre, 1939b, p.143, pl.6, fig.8) Sarjeant, 1969, p.12. Emendation: Kunz, 1990, p.18–19, as *Leptodinium amabile*. Holotype: Deflandre, 1939b, pl.6, fig.8; Jan du Chêne et al., 1986a, pl.69, figs.1–3. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Leptodinium*, thirdly *Gonyaulacysta*, fourthly *Leptodinium?*. Lentin and Williams (1973, p.86) retained this species in *Leptodinium*. Questionable assignment: Stover and Evitt (1978, p.171) as a problematic species — however, Kunz (1990, p.18) included the species in *Leptodinium* without question. Age: Kimmeridgian.

?*ambiguiforme* Dodekova, 1994, p.39–40, pl.12, figs.5,8–11; text-figs.6a–b. Holotype: Dodekova, 1994, pl.12, figs.9–11. Questionable assignment: Dodekova (1994, p.39). Age: late Tithonian.

ambiguum (Deflandre, 1939b, p.144, pl.6, fig.2) Helenes, 1984, p.131. Holotype: Deflandre, 1939b, pl.6, fig.2; Jan du Chêne et al., 1986a, pl.68, figs.1–3. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Millioudodinium*, fourthly *Rhynchodiniopsis*, fifthly (and now) *Leptodinium*. Age: Kimmeridgian.

?*ancoralium* Mantle, 2005, p.256,258–260, pl.3, figs.1–9; text-figs.7A–D,8A–C. Holotype: Mantle, 2005, pl.3, figs.4–7. Questionable assignment: Mantle (2005, p.256). Age: Callovian–early Oxfordian.

?*antigonium* Ioannides et al., 1977, p.456–457, pl.3, figs.7–8; text-fig.10. Holotype: Ioannides et al., 1977, pl.3, fig.8; Jan du Chêne et al., 1986a, pl.74, figs.7–8. Originally *Leptodinium*, subsequently (and now) *Leptodinium?*. Questionable assignment: Stover and Evitt (1978, p.170). Age: Kimmeridgian.

arcuatum Klement, 1960, p.48, pl.6, figs.5–6. Emendations: Gitmez, 1970, p.270; Sarjeant, 1984a, p.163–164. Holotype: Klement, 1960, pl.6, figs.5–6; Sarjeant, 1984a, pl.1, figs.1–2; text-fig.4; Jan du Chêne et al., 1986a, pl.67, figs.9–12. Age: middle Oxfordian.

asymmetricum Morgan, 1980, p.25–26, pl.17, figs.1–5. Holotype: Morgan, 1980, pl.17, figs.1–3; Jan du Chêne et al., 1986a, pl.75, figs.5–6; pl.152, figs.1–3. Age: Aptian–middle Albian.

"*bab*" (Below, 1981a, p.113, pl.7, figs.10a–b, 11a–c; pl.14, figs.9, 12a–c, 13; text-figs.72a–d, 73a–c) Sarjeant, 1985a, p.72. Holotype: Below, 1981a, pl.7, figs.11a–c; Jan du Chêne et al., 1986a, pl.87, fig.8; Fensome et al., 1991, figs.1–3 — p.581. **NOW** *Pterodinium*. Originally (and now) *Pterodinium*, subsequently *Leptodinium*. N.I.A. Age: Hauterivian.

?*bacculatum* Balteş, 1971, p.3, pl.1, figs.4–5. Holotype: Balteş, 1971, pl.1, figs.4–5. Originally *Leptodinium*, subsequently *Millioudodinium*, thirdly *Rhynchodiniopsis*?, fourthly (and now) *Leptodinium*?. Questionable assignment: Helenes (1984, p.131). Age: early Pliocene.

cancellatum Brideaux and McIntyre, 1975, p.21–22, pl.5, figs.7–9. Holotype: Brideaux and McIntyre, 1975, pl.5, fig.8; Jan du Chêne et al., 1986a, pl.73, figs.5–6. Age: middle Albian.

"*churchillii*" Harland, 1968, p.548, 550–551, figs.12–13, 22–24. Holotype: Harland, 1968, figs.12–13, 22–24. Originally *Leptodinium*, subsequently *Impagidinium*. **Taxonomic senior synonym:** *Hystrichosphaera* (now *Spiniferites*) *nodosa*, according to Reid (1974, p.599). Taxonomic senior synonym: *Hystrichosphaera* (now *Spiniferites*) *bentorii* according to Harland (1977b, p.98–99) — however, *Leptodinium churchillii* is now generally considered a taxonomic junior synonym of *Hystrichosphaera* (now *Spiniferites*) *nodosa*. Age: Holocene.

clathratum (Cookson and Eisenack, 1960b, p.246–247, pl.37, fig.5; text-fig.2) Sarjeant in Davey et al., 1969, p.12. Holotype: Cookson and Eisenack, 1960b, pl.37, fig.5; text-fig.2; Jan du Chêne et al., 1986a, pl.71, figs.10–12. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Leptodinium*, thirdly *Gonyaulacysta*. Lentin and Williams (1973, p.86) retained this species in *Leptodinium*. Age: ?Tithonian.

"*crassinervum*" (Deflandre, 1939b, p.144, pl.6, fig.5 ex Sarjeant, 1967b, p.248–249) Sarjeant, 1969, p.12. Emendation: Nøhr-Hansen, 1986, p.33, as *Cribroperidinium crassinervum*. Holotype: Deflandre, 1939b, pl.6, fig.5; Jan du Chêne et al., 1986a, pl.70, figs.1–4. **NOW** *Cribroperidinium*. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta*, thirdly *Leptodinium*, fourthly *Leptodinium*?, fifthly (and now) *Cribroperidinium*. Questionable assignment: Stover and Evitt (1978, p.170) as a problematic species. Age: Kimmeridgian.

"*cristatum*" May, 1980, p.57, pl.5, figs.16–20. Holotype: May, 1980, pl.5, figs.16–20. **NOW** *Impagidinium*. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Junior homonym: *Leptodinium cristatum* (Riley in Fisher and Riley, 1980) Lentin and Williams, 1981. Age: late Campanian–early Maastrichtian.

"*cristatum*" (Riley in Fisher and Riley, 1980, p.320, pl.1, figs.8, 12) Lentin and Williams, 1981, p.175. Holotype: Fisher and Riley, 1980, pl.1, figs.8, 12; Jan du Chêne et al., 1986a, pl.67, fig.20. **Combination illegitimate — senior homonym:** *Leptodinium cristatum* May, 1980. **Substitute name:** *Leptodinium volgense*. Originally *Gonyaulacysta cristata*, subsequently *Leptodinium cristatum* (combination illegitimate), thirdly (and now) *Leptodinium volgense*, fourthly *Millioudodinium cristatum*, fifthly *Cribroperidinium cristatum* (combination not validly published). Age: Volgian.

deflandrei (Riley in Fisher and Riley, 1980, p.320–321, pl.1, figs.1–2) Lentin and Williams, 1981, p.173. Holotype: Fisher and Riley, 1980, pl.1, figs.1–2; Jan du Chêne et al., 1986a, pl.75, fig.7. Originally *Gonyaulacysta*, subsequently (and now) *Leptodinium*, thirdly *Millioudodinium*. This species name, as *Gonyaulacysta deflandrei*, was not validly published in Fisher and Riley (1976, p.52) since no description was provided. Age: Volgian.

?*delicatum* (Davey, 1969a, p.123–124, pl.1, figs.7–8; text-figs.10A–B) Sarjeant in Davey et al., 1969, p.12. Holotype: Davey, 1969a, pl.1, fig.7; text-figs.10A–B; Jan du Chêne et al., 1986a, pl.75, figs.1–3. Originally *Gonyaulacysta*, subsequently *Leptodinium*, thirdly (and now) *Leptodinium*?. Questionable assignment: Stover and

Evitt (1978, p.170). Sarjeant (1969, p.12) cited the date for the publication of the name of this species as 1968; Davey's paper appeared early in 1969. Age: Cenomanian.

"*dispertitum*" Cookson and Eisenack, 1965a, p.122–123, pl.12, figs.5–7. Holotype: Cookson and Eisenack, 1965a, pl.12, figs.5–6; Jan du Chêne et al., 1986a, pl.149, figs.11–16; Fensome et al., 1993a, figs.1–2 — p.1127. **NOW** *Impagidinium*. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: late Eocene.

"*egemenii*" Gitmez, 1970, p.272–274, pl.10, figs.5–6; text-fig.18. Holotype: Gitmez, 1970, pl.10, figs.5–6; text-fig.18; Jan du Chêne et al., pl.126, figs.4–7. **NOW** *Tubotuberella*. Originally *Leptodinium*, subsequently (and now) *Tubotuberella*. Age: early Kimmeridgian.

"*elegans*" Cookson and Eisenack, 1965a, p.123–124, pl.12, figs.10–13. Holotype: Cookson and Eisenack, 1965a, pl.12, figs.10,12; Jan du Chêne et al., 1986a, pl.149, figs.5–10. **NOW** *Impagidinium*. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: late Eocene.

episomum (Sarjeant, 1966b, p.118–119, pl.13, figs.9–10; text-fig.27) Helenes, 1984, p.131. Holotype: Sarjeant, 1966b, pl.13, figs.9–10; text-fig.27; Jan du Chêne et al., 1986a, pl.67, figs.15–16. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Rhynchodiniopsis*, fourthly (and now) *Leptodinium*. Age: late Barremian.

eumorphum (Cookson and Eisenack, 1960b, p.246, pl.37, figs.1–3; text-fig.3) Sarjeant in Davey et al., 1969, p.12. Holotype: Cookson and Eisenack, 1960b, pl.37, fig.1; Jan du Chêne et al., 1986a, pl.75, fig.4. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly (and now) *Leptodinium*. Age: Late Jurassic.

flammeolum Morgan, 1980, p.26, pl.17, figs.14–17. Holotype: Morgan, 1980, pl.17, figs.14–17; Jan du Chêne et al., 1986a, pl.75, figs.8–9. Age: Aptian–Albian.

formosum Singh, 1983, p.140, pl.48, figs.6–8; text-fig.17. Holotype: Singh, 1983, pl.48, figs.6–7; Jan du Chêne et al., 1986a, pl.71, figs.2–3. Age: early Cenomanian.

"*freakei*" (Sarjeant, 1963c, p.85–86, pl.1, figs.1–3) Sarjeant in Davey et al., 1969, p.12. Holotype: Sarjeant, 1963c, pl.1, figs.1–3; Jan du Chêne et al., 1986a, pl.67, figs.13–14. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly *Leptodinium*. **Taxonomic senior synonym:** *Leptodinium subtile*, according to Brenner (1988, p.60). Age: early Oxfordian.

gitmeziae Sarjeant, 1985a, p.62. Holotype: Gitmez and Sarjeant, 1972, pl.5, figs.1–2; text-fig.17; Jan du Chêne et al., 1986a, pl.150, figs.1–6. Age: early Kimmeridgian.

?*globosum* Oлару, 1978a, p.81, pl.12, fig.14; pl.15, fig.23. Holotype: Oлару, 1978a, pl.12, fig.14. Originally *Leptodinium*, subsequently (and now) *Leptodinium?*, thirdly *Scriniodinium*. Questionable assignment: Jan du Chêne et al. (1986a, p.211) as a problematic species. Lentini and Williams (1985, p.316) incorrectly listed this species in the genus *Scriniodinium*, as well as correctly in *Leptodinium*. Age: late Eocene.

"?*gongylos*" (Sarjeant, 1966b, p.111–113, pl.13, figs.1–2; text-fig.23) Stover and Evitt, 1978, p.170. Holotype: Sarjeant, 1966b, pl.13, figs.1–2; text-fig.23; Jan du Chêne et al., 1986a, pl.93, figs.10–13. **NOW** *Rhynchodiniopsis*. Originally *Gonyaulacysta*, subsequently *Leptodinium?*, thirdly (and now) *Rhynchodiniopsis*. Questionable assignment: Stover and Evitt (1978, p.170). N.I.A. Age: early Oxfordian.

?*hadrum* (Sarjeant, 1966b, p.119–121, pl.14, fig.1; text-fig.28) Helenes, 1984, p.131. Holotype: Sarjeant, 1966b, pl.14, fig.1. Originally *Gonyaulacysta*, subsequently *Millioudodinium*, thirdly *Rhynchodiniopsis*, fourthly (and now) *Leptodinium?*. Questionable assignment: Helenes (1984, p.131). Age: late Barremian.

hulinense He Chengquan et al., 1999, p.188–189,200–201, pl.2, figs.4–5. Holotype: He Chengquan et al., 1999, pl.2, figs.4–5. Age: late Hauterivian–Barremian.

?hyalodermopse (Cookson and Eisenack, 1958, p.34, pl.3, figs.11–12; text-figs.5–6) Stover and Evitt, 1978, p.170. Holotype: Cookson and Eisenack, 1958, pl.3, figs.11–12; text-figs.5–6; Jan du Chêne et al., 1986a, pl.74, figs.9–10. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly (and now) *Leptodinium?*, fourthly *Rhynchodiniopsis*. Jan du Chêne et al. (1986a, p.210) provisionally retained this species in *Leptodinium*. Questionable assignment: Stover and Evitt (1978, p.170). Age: Neocomian–Aptian.

impenseum Yu Jingxian, 1982, p.242, pl.2, figs.10–11. Holotype: Yu Jingxian, 1982, pl.2, fig.10. Taxonomic junior synonym: *Leptodinium quadrangulum*, according to He Chengquan et al. (2009, p.107). Age: Late Jurassic–Early Cretaceous.

"incompositum" (Drugg, 1970b, p.810–811, figs.1E–O,2A) Lentin and Williams, 1973, p.87. Holotype: Drugg, 1970b, figs.1I–J; Eisenack and Kjellström, 1975a, page labelled "nach S.306d"; Jan du Chêne et al., 1986a, pl.17, figs.1–2; Fensome et al., 1995, figs.1–2 — p.1561. **NOW** *Corrudinium*. Originally *Gonyaulacysta*, subsequently *Leptodinium*, thirdly (and now) *Corrudinium*. Age: Oligocene.

italicum Biffi and Manum, 1988, p.208, pl.13, figs.4–17. Holotype: Biffi and Manum, 1988, pl.13, figs.4,8,15. Age: Oligocene–early Miocene.

kubassense Fedorova, 1980, p.71–72, pl.1, figs.6–6a. Holotype: Fedorova, 1980, pl.1, figs.6–6a. Age: Aptian.

"latolineatum" Yun Hyesu, 1981, p.10–11, pl.9, figs.10a–b,15a–b; text-figs.2a–c. Holotype: Yun Hyesu, 1981, pl.9, figs.10a–b; text-figs.2a–b; Jan du Chêne et al., 1986a, pl.75, figs.12–14; Fensome et al., 1991, figs.1–4 — p.659. **NOW** *Ynezidinium*. Originally *Leptodinium*, subsequently (and now) *Ynezidinium*. Age: early Santonian.

"maculatum" Cookson and Eisenack, 1961b, p.40, pl.2, figs.5–6. Holotype: Cookson and Eisenack, 1961b, pl.2, figs.5–6. **NOW** *Impagidinium*. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: Eocene.

mamilliferum (Deflandre, 1939b, p.143, pl.6, fig.1) Helenes, 1984, p.131. Holotype: Deflandre, 1939b, pl.6, fig.1; Jan du Chêne et al., 1986a, pl.72, figs.1–8. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta?*, thirdly *Millioudodinium?*, fourthly *Rhynchodiniopsis?*, fifthly (and now) *Leptodinium*. Age: Kimmeridgian.

"margaritiferum" (Cookson and Eisenack, 1960a, p.5–6, pl.2, figs.1–2; text-fig.1) Sarjeant, 1969, p.31. Holotype: Cookson and Eisenack, 1960a, pl.2, fig.1; Jan du Chêne et al., 1986a, pl.54, fig.6. **NOW** *Impagidinium*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly *Leptodinium*, fourthly (and now) *Impagidinium*. Age: Campanian.

membranigerum Gerlach, 1961, p.162–164, pl.26, figs.1–4,7; text-figs.4–5. Emendation: Sarjeant, 1984b, p.75–76, as *Leptodinium membranigerum*. Holotype: Gerlach, 1961, pl.26, figs.1–3, lost according to Sarjeant (1984b, p.75). Lectotype: Gerlach, 1961, pl.26, fig.7; text-fig.5; Sarjeant, 1984b, pl.1, fig.1,3; text-figs.1A–B; Jan du Chêne et al., 1986a, pl.67, figs.17–18; designated by Sarjeant (1984b, p.75). Originally (and now) *Leptodinium*, subsequently *Impagidinium?*. Sarjeant (1984b, p.75) retained this species in *Leptodinium*. Age: late Oligocene.

?micropunctatum Jain and Millepied, 1975, p.139, pl.2, figs.32–33. Holotype: Jain and Millepied, 1975, pl.2, fig.32, lost according to Jan du Chêne et al. (1986a, p.211). Originally *Leptodinium*, subsequently (and now) *Leptodinium?*. Questionable assignment: Stover and Evitt (1978, p.170) as a problematic species. Taxonomic senior synonym: *Oodnadattia tuberculata*, according to Below (1981a, p.107) — however, Lentin and Williams (1981, p.173) retained *Leptodinium? micropunctatum*. Age: early–?late Aptian.

millioudii (Sarjeant, 1963c, p.86–88, pl.1, figs.4–7) Sarjeant, 1969, p.13. Holotype: Sarjeant, 1963c, pl.1, figs.4–7; Jan du Chêne et al., 1986a, pl.71, figs.4–7. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly (and now) *Leptodinium*. Age: early Oxfordian.

"minutiornatum" Beju, 1978, p.4. **Name not validly published**: no description or illustration.

mirabile Klement, 1960, p.48–50, pl.6, figs.7–10; text-figs.25–27. Emendation: Sarjeant, 1984a, p.164–166, as *Leptodinium mirabile*. Holotype: Klement, 1960, pl.6, figs.7–8; text-figs.25–26; Sarjeant, 1984a, pl.4, figs.1–2;

text-fig.5; Jan du Chêne et al., 1986a, pl.67, figs.5–8. Originally (and now) *Leptodinium*, subsequently *Gonyaulacysta*. Lentin and Williams (1973, p.87) retained this species in *Leptodinium*. Age: middle Oxfordian.

"**modicum**" Brideaux and McIntyre, 1975, p.22, pl.5, figs.10–15. Holotype: Brideaux and McIntyre, 1975, pl.5, figs.10–13; Jan du Chêne et al., 1986a, pl.59, figs.4–6. **NOW** *Impagidinium*. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: middle Albian.

"subsp. **denticulatum**" Brideaux, 1977, p.8, pl.1, figs.10–11. Holotype: Brideaux, 1977, pl.1, figs.10–11. **NOW** *Impagidinium modicum* subsp. *denticulatum*. Originally *Leptodinium modicum* subsp. *denticulatum*, subsequently (and now) *Impagidinium modicum* subsp. *denticulatum*. Age: Barremian.

"subsp. **modicum**". Autonym. Holotype: Brideaux and McIntyre, 1975, pl.5, figs.10–12. **NOW** *Impagidinium modicum* subsp. *modicum*. Originally *Leptodinium modicum* subsp. *modicum*, subsequently (and now) *Impagidinium modicum* subsp. *modicum*.

?**mosaicum** (Downie, 1957, p.424, pl.20, fig.7; text-fig.2f ex Sarjeant, 1967b, p.253) Sarjeant, 1969, p.13. Emendation: Sarjeant, 1976c, p.6–7, as *Leptodinium mosaicum*. Holotype: Downie, 1957, pl.20, fig.7; text-fig.2f; Sarjeant, 1976c, pl.2, figs.3,5; text-figs.2a–b; Jan du Chêne et al., 1986a, pl.70, figs.5–6. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta*, thirdly *Leptodinium*, fourthly (and now) *Leptodinium*?. Questionable assignment: Stover and Evitt (1978, p.170). The name *Palaeoperidinium mosaicum* was not validly published in Downie (1957) since the generic name *Palaeoperidinium* was not validly published until 1967. Williams et al. (1998, p.371) accepted Sarjeant's (1967b) indirect reference to Downie (1957) as indication of a type (I.C.N. Article 40.3). Jan du Chêne et al. (1986a, p.210) considered that this species may be assignable to *Acanthaulax*. N.I.A. Age: late Kimmeridgian.

"**multiplax**" Wall and Dale, 1968a, p.318, pl.1, figs.1–7; text-fig.1. Holotype: Wall and Dale, 1968a, pl.1, figs.1–6; Jan du Chêne et al., 1986a, pl.54, figs.7–9. **NOW** *Impagidinium*. Originally *Anhystrichosphaera* (name not validly published), subsequently *Leptodinium*, thirdly (and now) *Impagidinium*. Age: early Pleistocene.

?**nannotrix** (Deflandre, 1939b, p.143, pl.6, fig.7) Jan du Chêne et al., 1986a, p.211. Holotype: Deflandre, 1939b, pl.6, fig.7; Jan du Chêne et al., 1986a, pl.69, figs.4–6. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Gonyaulacysta*?, fourthly *Rhynchodiniopsis*?, fifthly (and now) *Leptodinium*. Questionable assignment: Jan du Chêne et al. (1986a, p.211) as a problematic species. Jan du Chêne et al. (1986a, p.211) recommended that this name be restricted to the holotype. Age: Kimmeridgian.

"**norrisii**" Pocock, 1972, p.92–93, pl.24, figs.9–12; text-fig.9. Holotype: Pocock, 1972, pl.24, fig.9; Jansonius, 1986, pl.2, figs.6–8; text-fig.5. Originally *Leptodinium*, subsequently *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly *Korystocysta*. **Taxonomic senior synonym:** *Gonyaulax* (as *Korystocysta*) *pachyderma*, according to Benson (1985, p.154). **Taxonomic junior synonym:** *Dichadogonyaulax* (subsequently *Korystocysta*) *kettonensis*, by implication in Conway (1990, p.35), who considered *Dichadogonyaulax* (as *Korystocysta*) *kettonensis* to be the senior name — however, Lentin and Williams (1993, p.374) retained *Dichadogonyaulax* (as *Korystocysta*) *kettonensis*. Age: Callovian.

okerense Kunz, 1990, p.19–20, pl.4, figs.5a–e,6a–c; text-fig.8. Holotype: Kunz, 1990, pl.4, figs.5a–e; text-fig.8. Age: Oxfordian.

"**ovum**" Sah et al., 1970, p.147–148, pl.2, fig.25. Holotype: Sah et al., 1970, pl.2, fig.25. **NOW** *Impagidinium*?. Originally *Leptodinium*, subsequently (and now) *Impagidinium*?. N.I.A. Age: Late Cretaceous.

"**panneum**" Norris, 1965, p.796–798, figs.3,10–13. Holotype: Norris, 1965, figs.10–12. **NOW** *Dichadogonyaulax*?. Originally *Leptodinium*, subsequently *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly (and now) *Dichadogonyaulax*?. Age: Kimmeridgian–Portlandian.

"**paradoxum**" Wall, 1967, p.106–107, pl.15, figs.5–8; text-figs.2–3A–B. Holotype: Wall, 1967, pl.15, fig.5. **NOW** *Impagidinium*. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: middle Miocene–Holocene.

"*patulum*" Wall, 1967, p.105–106, pl.14, fig.20; pl.15, figs.1–4; text-fig.4. Holotype: Wall, 1967, pl.14, fig.20; pl.15, figs.1–2. **NOW** *Impagidinium*. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: middle Miocene–Holocene.

"*pectinigerum*" (Gocht, 1970b, p.138–139, pl.33, figs.1–4; text-fig.11) Fenton et al., 1980, p.158. Emendation: Fensome, 1979, p.43, as *Gonyaulacysta pectinigera*. Holotype: Gocht, 1970b, pl.33, fig.1. **NOW** *Gonyaulacysta pectinigera*. Originally *Leptodinium subtile* subsp. *pectinigerum*, subsequently *Hystrichogonyaulax pectinigera*, thirdly (and now) *Gonyaulacysta pectinigera*, fourthly *Leptodinium pectinigerum*. Age: early Bathonian.

"*perforans*" (Cookson and Eisenack, 1958, p.30–32, pl.2, figs.1–4,7–8; text-figs.8–9) Stover and Evitt, 1978, p.170. Holotype: Cookson and Eisenack, 1958, pl.2, fig.1; text-figs.8–9; Jan du Chêne et al., 1986a, pl.32, fig.2. **NOW** *Cribroperidinium?*. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta*, thirdly *Leptodinium?*, fourthly *Rhynchodiniopsis*, fifthly *Cribroperidinium*, sixthly (and now) *Cribroperidinium?*. Questionable assignment: Stover and Evitt (1978, p.69). Age: Late Jurassic.

perornatum Jansonius, 1986, p.212, pl.3, figs.1–3; text-fig.11. Holotype: Jansonius, 1986, pl.3, figs.1–3; text-fig.11. Age: late Bajocian.

?*pilum* (Gocht, 1959, p.56–57, pl.6, fig.14; pl.8, fig.8 ex Sarjeant, 1967b, p.254) Sarjeant, 1969, p.13. Holotype: Gocht, 1959, pl.6, fig.14; Jan du Chêne et al., 1986a, pl.73, figs.7–8. Originally *Palaeoperidinium* (name not validly published), subsequently *Gonyaulacysta?*, thirdly (and now) *Leptodinium?*. Questionable assignment: Sarjeant (1969, p.13). The name *Palaeoperidinium pilum* was not validly published in Gocht (1959) since the generic name *Palaeoperidinium* was not validly published until 1967. Williams et al. (1998, p.372) accepted Sarjeant's (1967b) indirect reference to Gocht (1959) as indication of a type (I.C.N. Article 40.3). Jan du Chêne et al. (1986a, p.211) recommended that this name be restricted to the holotype. N.I.A. Age: Valanginian.

pinnosum Davey, 1988, p.39–40, pl.5, figs.1–5,8–9. Holotype: Davey, 1988, pl.5, figs.1–3; Fensome et al., 1996, figs.1–3 — p.2277. Age: late Berriasian.

?*plagatum* Dodekova, 1994, p.41–42, pl.11, figs.1–12; text-figs.7a–d. Holotype: Dodekova, 1994, pl.11, figs.1–4. Questionable assignment: Dodekova (1994, p.41). Age: middle Tithonian–Berriasian.

porosum (Lejeune-Carpentier, 1946, p.B193,B196; text-fig.6) Sarjeant, 1969, p.13. Emendation: Lejeune-Carpentier and Sarjeant, 1981, p.7–8, as *Leptodinium porosum*. Holotype: Lejeune-Carpentier, 1946, text-fig.6; Streel et al., 1977, pl.2, fig.4; Lejeune-Carpentier and Sarjeant, 1981, pl.3, figs.1–2; text-fig.4. Originally *Gonyaulax* (Appendix B), subsequently *Gonyaulacysta* (combination not validly published), thirdly (and now) *Leptodinium*, fourthly *Leptodinium?*. Questionable assignment: Stover and Evitt (1978, p.171) as a problematic species — however, Lejeune-Carpentier and Sarjeant (1981, p.7) included the species in *Leptodinium* without question. Jan du Chêne et al. (1986a, p.211) recommended that this name be restricted to the holotype. Age: Late Cretaceous.

posterolucatum Snape, 1992, p.275, figs.7i–j. Holotype: Snape, 1992, fig.7i. Age: Tithonian.

"*punctatum*" Balteş, 1971, p.3, pl.1, figs.2–3,6–7. **Name not validly published:** holotype not designated. Originally *Leptodinium* (name not validly published), subsequently *Millioudodinium* (name not validly published). Age: early Pliocene.

?*pustulatum* Crouch et al., 2014, p.64–65, pl.1, figs.1–12. Holotype: Crouch et al., 2014, pl.1, figs.1–3. Questionable assignment: Crouch et al. (2014, p.64). Age: middle Paleocene–earliest Eocene.

"*quadrangulum*" Yu Jingxian, 1982, p.242, pl.4, figs.10,13,15. Holotype: Yu Jingxian, 1982, pl.4, fig.13. **Taxonomic senior synonym:** *Leptodinium impenseum*, according to He Chengquan et al. (2009, p.107). Age: Late Jurassic–Early Cretaceous.

"*regale*" Gocht, 1970b, p.139–140, pl.33, figs.5–7; text-fig.10. Holotype: Gocht, 1970b, pl.33, fig.6; text-fig.10; Jan du Chêne et al., 1986a, pl.98, figs.6–10. **NOW** *Rhynchodiniopsis*?. Originally *Leptodinium*, subsequently *Hystrichogonyaulax*, thirdly (and now) *Rhynchodiniopsis*?. Age: early Bathonian.

?*reticulatum* (Nagy, 1969, p.293, pl.1, figs.7,10; text-figs.4a–b) Lentin and Williams, 1973, p.88. Holotype: Nagy, 1969, pl.1, figs.7,10; Jan du Chêne et al., 1986a, pl.74, figs.5–6. Originally *Gonyaulax* (Appendix B), subsequently *Leptodinium*, thirdly (and now) *Leptodinium*?. Questionable assignment: Stover and Evitt (1978, p.171) as a problematic species. Jan du Chêne et al. (1986a, p.211–212) recommended that this name be restricted to the holotype. Age: late Miocene.

saepitum Ashraf, 1979, p.128, pl.2, fig.27; pl.3, figs.1–3,5. Holotype: Ashraf, 1979, pl.3, fig.2. Originally (and now) *Leptodinium*, subsequently *Hystrichogonyaulax*, thirdly *Rhynchodiniopsis*, fourthly *Ctenidodinium*. Brenner (1988, p.60) retained this species in *Leptodinium*. Age: Late Jurassic (Malm).

"*schizoblattum*" Norris, 1965, p.798–800, figs.4–5,14–17. Holotype: Norris, 1965, figs.5,15–17. **NOW** *Ctenidodinium*?. Originally *Leptodinium*, subsequently *Dichadogonyaulax*, thirdly *Ctenidodinium*, fourthly (and now) *Ctenidodinium*?. Age: Portlandian.

sepimentum Stevens and Helby, 1987, p.178–179, figs.11A–D,12A–I. Holotype: Stevens and Helby, 1987, figs.11A–D,12D–F; Fensome et al., 1996, figs.1–3,8–11 — p.2347. N.I.A. Age: early Berriasian.

"*setcheyense*" (Sarjeant, 1976c, p.4–6, pl.1, fig.7; text-fig.1) Stover and Evitt, 1978, p.170. Holotype: Sarjeant, 1976c, pl.1, fig.7; Jan du Chêne et al., 1986a, pl.74, figs.1–4. **NOW** *Impagidinium*. Originally *Gonyaulacysta*, subsequently *Leptodinium*, thirdly *Rhynchodiniopsis*, fourthly (and now) *Impagidinium*. Jan du Chêne et al. (1986a, p.210) retained this species in *Leptodinium*. Age: Kimmeridgian.

simplex Burger, 1980a, p.84, pl.42, figs.1–5. Holotype: Burger, 1980a, pl.42, figs.4a–b; Jan du Chêne et al., 1986a, pl.75, fig.10. Questionable assignment: Sarjeant (1982b, p.38) — however, Jan du Chêne et al. (1986a, p.210) included the species in *Leptodinium* without question. Age: Aptian.

songhuajiangense He Chengquan and Huang Guanjun, 1997, p.29,38, pl.3, figs.5–7; text-fig.3. Holotype: He Chengquan and Huang Guanjun, 1997, pl.3, figs.5–7; text-fig.3. Age: Callovian.

"*sphaericum*" Wall, 1967, p.108, pl.15, figs.11–15; text-figs.2a–c. Holotype: Wall, 1967, pl.15, figs.11–12. **NOW** *Impagidinium*. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: Pleistocene–Holocene.

"*striatum*" Wall, 1967, p.107–108, pl.15, figs.9–10; text-fig.5. Holotype: Wall, 1967, pl.15, fig.9. **NOW** *Impagidinium*. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: middle Miocene–Holocene.

"*striatum*" (Clarke and Verdier, 1967, p.31, pl.4, figs.11–13; pl.5, fig.15; text-fig.12) Sarjeant, 1969, p.13. Holotype: Clarke and Verdier, 1967, pl.4, figs.11–13; Jan du Chêne et al., 1986a, pl.88, figs.9–11. **NOW** *Dimidium*. Originally *Gonyaulacysta*, subsequently *Leptodinium*, thirdly *Impagidinium*, fourthly *Pterodinium*, fifthly (and now) *Dimidium*. Age: Santonian.

**subtile* Klement, 1960, p.46–47, pl.6, figs.1–4; text-figs.23–24. Holotype: Klement, 1960, pl.6, figs.1–2; text-figs.23–24. Taxonomic junior synonym: *Gonyaulax* (subsequently *Leptodinium*) *freaki*, according to Brenner (1988, p.60). Age: early Kimmeridgian.

"subsp. *pectinigerum*" Gocht, 1970b, p.138–139, pl.33, figs.1–4; text-fig.11. Emendation: Fensome, 1979, p.43, as *Gonyaulacysta pectinigera*. Holotype: Gocht, 1970b, pl.33, fig.1. **NOW** *Gonyaulacysta pectinigera*. Originally *Leptodinium subtile* subsp. *pectinigerum*, subsequently *Hystrichogonyaulax pectinigera*, thirdly (and now) *Gonyaulacysta pectinigera*, fourthly *Leptodinium pectinigerum*. Age: early Bathonian.

"subsp. *subtile*". Autonym. Holotype: Klement, 1960, pl.6, figs.1–2; text-figs.23–24. **Now redundant.**

?*tenuicornutum* Cookson and Eisenack, 1962b, p.478, pl.3, figs.12–13; text-figs.1a–b. Holotype: Cookson and Eisenack, 1962b, pl.3, figs.12–13; text-figs.1a–b. Originally *Leptodinium*, subsequently *Gonyaulacysta*, thirdly (and now) *Leptodinium*?. Questionable assignment: Stover and Evitt (1978, p.160). Age: Albian.

tunellum Stover and Helby, 1987c, p.244–245, figs.16A–B,17A–I. Holotype: Stover and Helby, 1987c, figs.17A–C; Fensome et al., 1996, figs.1–3 — p.2415. Age: Hauterivian.

"*victorianum*" Cookson and Eisenack, 1965a, p.123, pl.12, figs.8–9. Holotype: Cookson and Eisenack, 1965a, pl.12, figs.8–9; Jan du Chêne et al., 1986a, pl.149, figs.1–4. **NOW** *Impagidinium*. Originally *Leptodinium*, subsequently (and now) *Impagidinium*. Age: late Eocene.

volgense Lentin and Williams, 1981, p.175. Holotype: Fisher and Riley, 1980, pl.1, figs.8,12; Jan du Chêne et al., 1986a, pl.67, fig.20. Originally *Gonyaulacysta cristata*, subsequently *Leptodinium cristatum* (combination illegitimate), thirdly (and now) *Leptodinium volgense*, fourthly *Millioudodinium cristatum*, fifthly *Cribroperidinium cristatum* (combination not validly published). Substitute name for *Leptodinium cristatum* (Riley in Fisher and Riley, 1980, p.320, pl.1, figs.8,12) Lentin and Williams, 1981, p.175 (an illegitimate name). Jan du Chêne et al. (1986a, p.210) retained this species in *Leptodinium*. Age: Volgian.

LEVISPHAERA Davey, 1988, p.40. Type: Burger, 1980b, figs.4.D1–2, as *Canningia crassicingulata*.

**crassicingulata* (Burger, 1980b, p.268, figs.4C,D1–2) Davey, 1988, p.40. Holotype: Burger, 1980b, figs.4D1–2; Fensome et al., 1993a, figs.2–3 — p.1081. Originally *Canningia*, subsequently *Batiacasphaera*, thirdly (and now) *Levisphaera*. Age: Berriasian–Valanginian

"**LIAOHEDINA**" Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.74. **Taxonomic senior synonym:** *Bosedinia*, according to He Chengquan et al. (2009, p.455). Type: Liu Zhili et al., 1992, pl.16, fig.10; text-fig.5, as *Liaohedina obovata*.

*"*obovata*" Zheng Yuefang and Liu Xuexian in Liu Zhili et al., 1992, p.74, pl.16, figs.7–12; text-fig.5. Holotype: Liu Zhili et al., 1992, pl.16, fig.10; text-fig.5. **NOW** *Bosedinia*. Originally *Liaohedina*, subsequently (and now) *Bosedinia*. Age: Early Tertiary.

LIASIDIUM Drugg, 1978, p.69. Type: Drugg, 1978, pl.5, fig.9, as *Liasidium variabile*.

**variabile* Drugg, 1978, p.69–70, pl.4, fig.10; pl.5, figs.1–9. Holotype: Drugg, 1978, pl.5, fig.9; Fensome et al., 1995, fig.4 — p.1881. Age: late Sinemurian.

LICRACYSTA Fensome et al., 2007, p.400,402. Type: Fensome et al., 2007, pl.4, figs.9–12, as *Licracysta corymbus*.

**corymbus* Fensome et al., 2007, p.402,404,406,408, pl.4, figs.5–6,9–20, pl.5, figs.1–8,12,16,20. Holotype: Fensome et al., 2007, pl.4, figs.9–12. N.I.A. Age: youngest occurrence, Rupelian.

?*semicirculata* (Morgenroth, 1966b, p.9–10, pl.2, figs.3–4) Fensome et al., 2007, p.408. Holotype: Morgenroth, 1966b, pl.2, fig.3. Originally *Cyclonephelium*, subsequently *Areoligera*, thirdly (and now) *Licracysta*?. Questionable assignment: Fensome et al. (2007, p.408). Age: middle Oligocene.

LIESBERGIA Berger, 1986, p.341. Type: Berger, 1986, fig.3 (part), fig.5, nos.1–4, as *Liesbergia liesbergensis*.

abdounensis Soncini, 1992, p.329,331–334, pl.2, figs.2–9; text-figs.5,6a–b. Holotype: Soncini, 1992, pl.2, figs.4–6. Age: Thanetian–Ypresian.

**liesbergensis* Berger, 1986, p.341–342, fig.3 (part); fig.5, nos.1–7. Holotype: Berger, 1986, fig.3 (part), fig.5, nos.1–4; Fensome et al., 1995, figs.1–4,7 — p.1605. Age: early Oxfordian.

"*scarburghensis*" (Sarjeant, 1964b, p.472–473) Berger, 1986, p.343. Holotype: Sarjeant, 1961a, pl.13, fig.13; text-fig.5; Jan du Chêne et al., 1986a, pl.3, figs.1–2. **NOW** *Trichodinium scarburghense*. Originally *Gonyaulax areolata* (name illegitimate; Appendix B), subsequently *Gonyaulacysta areolata* (combination illegitimate), thirdly *Gonyaulacysta scarburghensis*, fourthly *Acanthaulax areolata* (combination illegitimate), fifthly *Acanthaulax scarburghensis*, sixthly *Liesbergia scarburghensis*, seventhly (and now) *Trichodinium scarburghense*. *Gonyaulacysta scarburghensis* is the substitute name for *Gonyaulax areolata* Sarjeant, 1961a, p.95–96, pl.13, fig.13; text-fig.5 (an illegitimate name). Taxonomic junior synonym: *Acanthaulax senta*, according to Berger (1986, p.343). Age: late Callovian–early Oxfordian.

LIMBODINIUM Riding, 1987b, p.56,58,60. Type: Drugg, 1978, pl.4, fig.7, as *Dinopterygium absidatum*.

**absidatum* (Drugg, 1978, p.66–67, pl.4, figs.7–9) Riding, 1987b, p.60. Emendation: Riding, 1987b, p.60,62, as *Limbodinium absidatum*. Holotype: Drugg, 1978, pl.4, fig.7; Riding, 1987b, pl.1, fig.7; Fensome et al., 1993a, fig.1 — p.871. Originally *Dinopterygium*, subsequently *Dinopterygium?*, thirdly (and now) *Limbodinium*. Age: late Callovian–middle Oxfordian.

ridingii Herngreen et al., 2000, p.50, pl.8, figs.3–5. Holotype: Herngreen et al., 2000, pl.8, figs.3–4. Age: early Kimmeridgian.

"**LINGULASPHAERA**" Drugg, 1970b, p.817. **Taxonomic senior synonym:** *Diphyes*, according to Stover and Evitt (1978, p.38). Type: Drugg, 1970b, fig.11D, as *Lingulasphaera spinula*.

spinula* Drugg, 1970b, p.817–818, figs.10G,11D–E,12A–B. Holotype: Drugg, 1970b, fig.11D. **NOW *Diphyes*. Originally *Lingulasphaera*, subsequently (and now) *Diphyes*. N.I.A. Age: early Eocene.

LINGULODINIUM Wall, 1967, p.109. Emendations: Wall and Dale in Wall et al., 1973, p.23–24; Dodge, 1989, p.291. Taxonomic junior synonym: *Trioperculodinium*, according to Wall and Dale in Wall et al. (1973, p.24). Type: Deflandre and Cookson, 1955, pl.9, fig.4, as *Hystrichosphaeridium machaerophorum*.

bergmannii (Archangelsky, 1969a, p.414–415, pl.2, figs.8,11) Quattrocchio and Sarjeant, 2003, p.142. Holotype: Archangelsky, 1969a, pl.2, fig.11. Originally *Cleistosphaeridium*, subsequently *Operculodinium*, thirdly *Downiesphaeridium*, fourthly (and now) *Lingulodinium*. Taxonomic junior synonyms: *Solisphaeridium filamentosum* (Appendix A) and *Impletosphaeridium charrieri*, both according to Quattrocchio and Sarjeant (2003, p.142). Quattrocchio and Sarjeant (2003, p.142) considered this species to be the possible taxonomic senior synonym of *Operculodinium radiculatum*. Masure in Fauconnier and Masure (2004, p.197) proposed the retention of this species in *Operculodinium*, but was not aware of the work of Quattrocchio and Sarjeant (2003). Age: Eocene.

"*brevispinosum*" Matsuoka and Bujak, 1988, p.60–61, pl.7, figs.8a–b,9; pl.8, fig.1. Holotype: Matsuoka and Bujak, 1988, pl.7, figs.8a–b; Head, 1994b, pl.8, figs.2–5. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as and now *Lingulodinium*) *machaerophorum*, according to Kokinos and Anderson (1995, p.162). Age: late Oligocene–early Miocene.

echinatum (Menéndez, 1965, p.12–13, pl.2, fig.9) Guerstein et al. 2008, p.79. Emendation: Guerstein et al. 2008, p.79, as *Lingulodinium echinatum*. Holotype: Menéndez, 1965, pl.2, fig.9. Originally *Hystrichosphaeridium*, subsequently *Hystrichosphaeridium?*, thirdly (and now) *Lingulodinium*. Age: Late Cretaceous.

"*funginum*" (Morgenroth, 1966a, p.17–18, pl.3, figs.7–8) Islam, 1983b, p.341. Holotype: Morgenroth, 1966a, pl.3, fig.7. Originally *Baltisphaeridium* (Appendix A), subsequently *Lingulodinium*. **Taxonomic senior synonym:**

Hystrichosphaeridium (as and now *Lingulodinium*) *machaerophorum*, according to Kokinos and Anderson (1995, p.162). Age: early Eocene.

hemicystum McMinn, 1991, p.278, pl.3, figs.1–5,7–8,10–11,13–14. Holotype: McMinn, 1991, pl.3, figs.7,10,13. Age: Holocene.

**machaerophorum* (Deflandre and Cookson, 1955, p.274, pl.9, figs.4,8) Wall, 1967, p.109. Holotype: Deflandre and Cookson, 1955, pl.9, fig.4. Originally *Hystrichosphaeridium*, subsequently *Baltisphaeridium* (Appendix A), thirdly *Cleistosphaeridium* (combination not validly published), fourthly (and now) *Lingulodinium*. Taxonomic junior synonyms: *Cleistosphaeridium disjunctum*, according to Reid (1974, p.591); *Cleistosphaeridium mikirii*, according to Jain and Garg (1983, p.61); *Hystrichosphaeridium ashdodense*, according to Wall (1967, p.109); *Baltisphaeridium* (subsequently *Lingulodinium*) *funginum*, *Lingulodinium brevispinosum* and *Lingulodinium sadoense*, all according to Kokinos and Anderson (1995, p.162); *Hystrichosphaeridium redonense*, questionably according to Harland (1977b, p.94) and according to Rochon et al. (1999, p.20). Motile equivalent: *Gonyaulax* (now *Lingulodinium*) *polyedra* Stein, 1883, according to Wall and Dale (1967, p.352; 1968c, p.271). Stover and Evitt (1978, p.172) considered *Impletosphaeridium* (as *Lingulodinium*?) *pycnospinosum* to be a possible taxonomic junior synonym of this species. Age: Miocene.

subsp. *breve* He Chengquan, 1991, p.144, pl.19, fig.5. Holotype: He Chengquan, 1991, pl.19, fig.5. Age: middle Eocene.

subsp. *filiforme* (Rossignol, 1964, p.91, pl.2, fig.13) Lentin and Williams, 1973, p.89. Holotype: Rossignol, 1964, pl.2, fig.13. Originally *Baltisphaeridium machaerophorum* var. *filiforme* (Appendix A), subsequently (and now) *Lingulodinium machaerophorum* subsp. *filiforme*. Age: Pleistocene.

subsp. *machaerophorum*. Autonym. Holotype: Deflandre and Cookson, 1955, pl.9, fig.4.

var. *machaerophorum*. Autonym. Holotype: Deflandre and Cookson, 1955, pl.9, fig.4.

subsp. *megacanthum* (Rossignol, 1964, p.91, pl.2, fig.15) Lentin and Williams, 1973, p.89. Holotype: Rossignol, 1964, pl.2, fig.15. Originally *Baltisphaeridium machaerophorum* var. *megacanthum* (Appendix A), subsequently (and now) *Lingulodinium machaerophorum* subsp. *megacanthum*. Age: Pleistocene.

"subsp. *strangulatum*" (Rossignol, 1964, p.92, pl.2, fig.16) Lentin and Williams, 1973, p.89. Holotype: Rossignol, 1964, pl.2, fig.16. **NOW** *Lingulodinium strangulatum*. Originally *Baltisphaeridium machaerophorum* var. *strangulatum* (Appendix A), subsequently *Lingulodinium machaerophorum* subsp. *strangulatum*, thirdly (and now) *Lingulodinium strangulatum*. Age: Pleistocene.

var. *truncatum* Strauss et al., 2001, p.405; pl.6, fig.7. Holotype: Strauss et al., 2001, p.405; pl.6, fig.7. Originally *Lingulodinium truncatum* (name not validly published), subsequently (and now) *Lingulodinium machaerophorum* var. *truncatum*. Age: late Miocene.

milneri (Murray and Whitting, 1899, p.325, pl.27, figs.2a–d) Dodge, 1989, p.294. Holotype: not designated. Originally *Goniodoma* (Appendix B), subsequently *Gonyaulax* (Appendix B), thirdly (and now) *Lingulodinium*. This species represents living motile cells and has no fossil representation; it is included here because it has been assigned to a genus, *Lingulodinium*, with a fossil type. Age: extant.

multivirgatum de Verteuil and Norris, 1996a, p.118,120,122, pl.4, figs.1–14; pl.18, fig.7. Holotype: de Verteuil and Norris, 1996a, pl.4, figs.4–6. Age: early Miocene.

polyedra (Stein, 1883, p.13, pl.4, figs.7–9) Dodge, 1989, p.291. Holotype: not designated. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Lingulodinium*. This species name was originally proposed for the motile stage of a living dinoflagellate; its cyst equivalent is *Lingulodinium machaerophorum*. N.I.A. Age: extant.

pugiatum (Drugg, 1970b, p.819; text-figs.16D–E) Wall and Dale in Wall et al., 1973, p.24. Holotype: Drugg, 1970b, text-fig.16E. Originally *Operculodinium*, subsequently (and now) *Lingulodinium*. Age: Oligocene.

pyncospinosum (Benedek, 1972, p.32, pl.12, fig.14) Stover and Evitt, 1978, p.172. Emendation: Benedek and Sarjeant, 1981, p.343–344, as *Lingulodinium pyncospinosum*. Holotype: Benedek, 1972, pl.12, fig.14; Benedek and Sarjeant, 1981, fig.10, no.1. Originally *Impletosphaeridium*, subsequently *Lingulodinium?*, thirdly (and now) *Lingulodinium*. Questionable assignment: Stover and Evitt (1978, p.172) — however, Benedek and Sarjeant (1981, p.343) retained the species in *Lingulodinium* without question. Stover and Evitt (1978, p.172) considered *Hystrichosphaeridium* (as *Lingulodinium*) *machaerophorum* to be a possible taxonomic senior synonym of this species. Age: middle-late Oligocene.

"*sadoense*" Matsuoka, 1983b, p.124, pl.10, figs.1a–c,2–3,4a–b,5–7. Holotype: Matsuoka, 1983b, pl.10, figs.1a–c. **Taxonomic senior synonym:** *Hystrichosphaeridium* (as and now *Lingulodinium*) *machaerophorum*, according to Kokinos and Anderson (1995, p.162). Age: early Pleistocene.

sicula (Drugg, 1970b, p.820; text-figs.16F–G) Wall and Dale in Wall et al., 1973, p.24. Holotype: Drugg, 1970b, text-figs.16F–G. Originally *Trioperculodinium*, subsequently (and now) *Lingulodinium*. N.I.A. Age: Oligocene.

solarum (Drugg, 1970b, p.819; text-figs.16A–C) Wall and Dale in Wall et al., 1973, p.24. Holotype: Drugg, 1970b, text-figs.16A–C. Originally *Operculodinium*, subsequently (and now) *Lingulodinium*. Age: Oligocene.

strangulatum (Rossignol, 1964, p.92, pl.2, fig.16) Islam, 1983c, p.90. Holotype: Rossignol, 1964, pl.2, fig.16. Originally *Baltisphaeridium machaerophorum* var. *strangulatum* (Appendix A), subsequently *Lingulodinium machaerophorum* subsp. *strangulatum*, thirdly (and now) *Lingulodinium strangulatum*. Age: Pleistocene.

"*truncatum*" Strauss in Pross, 1997, p.91. **Name not validly published:** holotype not designated. **NOW** *Lingulodinium machaerophorum* var. *truncatum*. Originally *Lingulodinium truncatum* (name not validly published), subsequently (and now) *Lingulodinium machaerophorum* var. *truncatum*. Pross (1997) indicated that this name is from an unpublished thesis by Strauss.

varispinosum Slimani, 1994, p.75–76, pl.11, fig.17; pl.13, figs.16–21. Holotype: Slimani, 1994, pl.11, fig.17; pl.13, figs.16–19. Age: early Campanian–early Maastrichtian.

varium Sütő-Szentai, 1986, p.33–34, pl.1, figs.1–2. Holotype: Sütő-Szentai, 1986, pl.1, fig.1. Age: late Miocene.

"*xanthium*" (Benedek, 1972, p.27–28, pl.9, fig.8; text-fig.9) Benedek and Sarjeant, 1981, p.342. Emendation: Benedek and Sarjeant, 1981, p.342–343, as *Lingulodinium xanthium*. Holotype: Benedek, 1972, pl.9, fig.8; Benedek and Sarjeant, 1981, fig.9, no.5. **NOW** *Operculodinium*. Originally *Cordosphaeridium*, subsequently (and now) *Operculodinium*, thirdly *Lingulodinium*. Age: middle-late Oligocene.

LITHODINIA Eisenack, 1935, p.175. Emendations: Gocht, 1975b, p.353; Williams et al., 1993, p.54. Taxonomic junior synonym: *Meiourogonyaulax*, according to Gocht (1975b, p.353) and Williams et al. (1993, p.54) — however, *Meiourogonyaulax* was retained by Riding and Helby (2001d, p.81,83). Type: Eisenack, 1935, pl.4, fig.5, as *Lithodinia jurassica*.

"*acanthosphaera*" (Sarjeant, 1961a, p.94–95, pl.13, fig.14; text-fig.4) Lentin and Williams, 1977b, p.100. Emendation: Sarjeant, 1976c, p.12, as *Meiourogonyaulax? acanthosphaera*. Holotype: Sarjeant, 1961a, pl.13, fig.14; text-fig.4; Sarjeant, 1976c, pl.5, figs.2,4. **NOW** *Meiourogonyaulax?* Originally *Gonyaulax* (Appendix B), subsequently *Acanthogonyaulax* (combination not validly published), thirdly *Acanthaulax*, fourthly *Meiourogonyaulax*, fifthly (and now) *Meiourogonyaulax?*, sixthly *Lithodinia*, seventhly *Lithodinia?*. Questionable assignment: Williams et al. (1993, p.56) as a problematic species. Age: early Oxfordian.

"*amlasis*" (Below, 1981a, p.58, pl.6, figs.14–15,16a–b) Williams et al., 1993, p.55. Holotype: Below, 1981a, pl.6, figs.16a–b; Fensome et al., 1991, figs.3–4 — p.567. **NOW** *Meiourogonyaulax*. Originally (and now) *Meiourogonyaulax*, subsequently *Lithodinia*. Age: Hauterivian.

"*araneosa*" (Muir and Sarjeant, 1978, p.197–198, pl.1, fig.1; text-fig.1) Riley, 1979, p.221. Holotype: Muir and Sarjeant, 1978, pl.1, fig.1; text-fig.1. **NOW** *Meiourogonyaulax* Originally (and now) *Meiourogonyaulax*, subsequently *Lithodinia*, thirdly *Lithodinia*?. Questionable assignment: Williams et al. (1993, p.56) as a problematic species. Age: middle Callovian.

arcanitabulata Brenner, 1988, p.61–63, pl.18, figs.3–5; text-fig.20. Holotype: Brenner, 1988, pl.18, fig.4. Age: Oxfordian–early Kimmeridgian.

"*areolata*" (Klement, 1960, p.76–77, pl.8, figs.5–9) Sarjeant, 1984a, p.166. Holotype: Klement, 1960, pl.8, figs.5–7; Fauconnier and Masure, 2004, pl.26, fig.8; pl.27, fig.1. **NOW** *Epiplosphaera*?. Originally *Epiplosphaera*, subsequently *Lithodinia*?, thirdly (and now) *Epiplosphaera*?. Brenner (1988, p.50–51) retained this species in *Epiplosphaera*. Questionable assignment: Sarjeant (1984a, p.166). Age: early Kimmeridgian.

"*arktika*" Fenton, 1981, p.251,253, pl.2, figs.1–2; pl.3, fig.1. Holotype: Fenton, 1981, pl.2, fig.2. **Taxonomic senior synonym:** *Meiourogonyaulax borealis*, according to Riley and Fenton (1982, p.200) and Lentin and Williams (1989, p.228). Age: late Bathonian.

"*australica*" Morgan in Riding and Helby, 2001d, p.81. **Name not validly published:** no description. **Taxonomic senior synonym:** *Lithodinia protothymosa*, according to Riding and Helby (2001d, p.81).

"*bathonica*" Conway, 1978, p.349, pl.2, figs.4–5,7–8. Holotype: Conway, 1978, pl.2, figs.4–5. **NOW** *Meiourogonyaulax* Originally *Lithodinia*, subsequently (and now) *Meiourogonyaulax*. Age: late Bathonian.

"*bejui*" (Zotto et al., 1987, p.199–202, pl.1, figs.1a–b,2a–c,3; text-figs.5a–c) Williams et al., 1993, p.55. Holotype: Zotto et al., 1987, pl.1, figs.1a–b. **NOW** *Meiourogonyaulax*. Originally (and now) *Meiourogonyaulax*, subsequently *Lithodinia*. This combination was not validly published in Dodekova (1992, p.46), since that author did not fully reference the basionym. Age: Kimmeridgian.

"*borealis*" (Sarjeant, 1980b, p.123–124) Riley and Fenton, 1982, p.200. Holotype: Sarjeant, 1972, pl.5, fig.3; text-fig.5 [as *Meiourogonyaulax decapitata* (Wetzel, 1967a) Sarjeant, 1972]. **NOW** *Meiourogonyaulax*. Originally (and now) *Meiourogonyaulax*, subsequently *Lithodinia*. Taxonomic junior synonym: *Lithodinia arktika*, according to Riley and Fenton (1982, p.200) and Lentin and Williams (1989, p.228). Age: late Bathonian.

"*bulloidea*" (Cookson and Eisenack, 1960b, p.247, pl.37, fig.11; text-figs.4a–b) Gocht, 1976, p.334. Emendation: Riding and Helby, 2001g, p.206, as *Meiourogonyaulax bulloidea*. Holotype: Cookson and Eisenack, 1960b, pl.37, fig.11. **NOW** *Meiourogonyaulax*. Originally *Gonyaulax* (Appendix B), subsequently (and now) *Meiourogonyaulax*, thirdly *Lithodinia*. Age: Tithonian.
