## Abstract

### Background

The checklist of British and Irish Ichneumonidae is revised, based in large part on the collections of the Natural History Museum, London and the National Museums of Scotland, Edinburgh. Distribution records are provided at the country level.

### New information

Of the 2,447 species regarded as valid and certainly identified, 214 are here recorded for the first time from the British Isles. Neorhacodinae is considered to be a separate subfamily rather than a synonym of Tersilochinae. Echthrini is treated as a junior synonym of the tribe Cryptini, not Hemigastrini. *Echthrus* Gravenhorst and *Helcostizus* Förster are classified in Cryptini rather than, respectively, Hemigastrini and Phygadeuontini.

### Keywords

Britain, Ireland, fauna, Ichneumonoidea

## Introduction

The Ichneumonidae is one of two families of the superfamily Ichneumonoidea, along with the Braconidae. Given the size of each family in Britain (over 1,300 braconids and nearly 2,500 ichneumonids) we are publishing the two checklists separately. This is one part of a series of papers revising the British and Irish list of Hymenoptera, that started with Broad (2014), Broad and Livermore (2014b), Broad and Livermore (2014a) and Liston et al. (2014). For the background and rationale behind these British Hymenoptera checklists see Broad (2014). The bases for the ichneumonid taxonomy are Yu and Horstmann (1997) and Taxapad (Yu et al. 2012) (ichneumonid data for both compiled by Klaus Horstmann). I have not relied on Yu et al. (2012) for data on species occurrence in Britain. Rather, I have relied mostly on the primary literature and collections, especially NMS and BMNH. Indeed, large parts of the checklist rely on original work, identifying specimens in these collections. The collections of the NMS have been invaluable in updating this checklist as Mark Shaw has very actively encouraged taxonomists to use the collections, which contain a large amount of recently collected, often reared, material. The late J.F. Perkins also did a huge amount to improve the BMNH collection of Ichneumonidae that was not really reflected in his published output. I have made great use of Perkins's identifications as well as Horstmann's, Andrey Khalaim's and many other workers, including my own. Many Irish records are taken from O'Connor et al. (2007).

All additions to and deletions from the British list since Fitton (1978) are recorded as well as country-level distribution within the British Isles (but regarding the Republic of Ireland and Northern Ireland as one geographical unit), i.e. England, Scotland, Wales, Ireland, Isle of Man. The current numbers of valid, certainly identified ichneumonid species are listed per subfamily and by country in Table 1. This highlights the lack of data from countries other than England. Because the ichneumonid literature is extensive and scattered I also provide many taxonomic references. Some changes to classification are employed here, following molecular phylogenetic studies (Laurenne et al. 2006, Quicke et al. 2009). Two genera that are usually classified in Hemigastrini and Phygadeuontini - *Echthrus* Gravenhorst and *Helcostizus* Förster - are transferred to Cryptini (as originally suggested by Laurenne et al. 2006), which means that Echthrinini Narayanan & Lal, 1958, becomes a junior synonym of Cryptini Kirby, 1837. And, contrary to Quicke et al. (2009), Neorhacodinae is again regarded as a valid subfamily, not as a synonym of Tersilochinae, following phylogenetic work by A.M.R. Bennett *et al.* (in prep.) and reflecting differences in host use.

Figs 1, 2, 3, 4, 5 illustrate a tiny part of the diversity of Ichneumonidae. A handbook to the British fauna (Broad, Shaw & Fitton, in prep.) provides an introduction to the biology, classification and identification of this family of parasitoid wasps and will be published soon.

## Materials and methods

For a more detailed description of the background and rationale to the Hymenoptera checklist, see Broad (2014). I provide rather extensive Palearctic synonymy and citations because if you do not have access to the Taxapad database (Yu et al. 2012) it can be very difficult to trace the fate of names in the voluminous and scattered literature, although some of the functionality of the catalogue is available [online](#). Conventions and abbreviations are listed below.

var. variety, only available as a valid name under certain provisions of the ICZN code

When there are no countries listed for a species, there are two explanations. First, the species has been carried over from the previous checklist (Fitton 1978) and, although I have not seen any British specimens I have no reason to doubt the original identification. Second, specimens in collections are labelled with imprecise locality data, such as 'Great Britain'. This is the case with many of the older collections.

Alternative versions of the checklist can be downloaded here as a Word document or Excel spreadsheet under supplementary materials: Suppl. materials 1, 2. The British and Irish ichneumonid checklist, together with the entire Hymenoptera checklist, will be kept up to date in a Scratchpad, [Hymenoptera of the British Isles](#).

## **Alomyinae**

### **Subfamily ALOMYINAE Förster, 1869**

**Notes:** *Alomya* has frequently been placed in its own subfamily, Alomyinae (e.g. Perkins 1959), or in a separate tribe within the Ichneumoninae (Diller 1981, Selta and Diller 1994) but a close relationship with *Colpognathus* and *Centeterus* was proposed by Wahl and Mason (1995), with the result that the ichneumonine tribe here called Phaeogenini took the name Alomyini. Based on the molecular phylogenetic results of Laurence et al. (2006) *Alomya* and *Megalomya* Uchida are considered here to comprise a separate subfamily.

### **Genus *Alomya* Panzer, 1806**

**Nomenclature:**

*ALOMYIA* misspelling

*HALOMYA* Billberg, 1820

**Notes:** Distribution data from Perkins (1952), Perkins (1959) and the NMS.

### ***Alomya debellator* (Fabricius, 1775)**

- Anomalon uniguttatum* Gravenhorst, 1829

**Distribution:** England**Notes:** Although Gauld and Mitchell (1977b) record *uniguttata* as British on the basis of one specimen from Norfolk, no British specimen could be located in the depositories cited by Gauld & Mitchell (M.R. Shaw, pers comm.); Gauld was not aware at the time of the presence of *rubricator* in Britain.**Genus *Erigorgus* Förster, 1869****Nomenclature:**

- SYMPRATIS* Förster, 1869

**Notes:** Although Gauld (1976b), Gauld (1997) regarded *Erigorgus* as a subgenus of *Gravenhorstia*, most recent works regard it as a separate genus, a position followed by Yu and Horstmann (1997). As the relative merits of genus versus subgenus are rather subjective I have followed the majority opinion.

### *Erigorgus cerinops* (Gravenhorst, 1829)

**Notes:** Contra Brock (in prep.), subgenera are not employed as there is little justification for their use and some 'subgenera' seem to be of use only in Europe, whereas there is a great variety of species in the wider world referred to *Lissonota* (*Lissonota*) by default.

species of *Lissonota* excluded from British and Irish list:

[*bilineata* Gravenhorst, 1829] J.P. Brock (pers. comm.) has not seen any authentic British material of this species.

[*funebris* Habermehl, 1923] Only known in Britain from L. Carr material (supposedly from Lichfield) and hence should have been excluded from the previous checklist (J.P. Brock, pers. comm.). See Perkins (1953) and Shaw (2003) for discussions on the inadmissability of species to the British list that are only represented by Carr's material.

[*impressor* Gravenhorst, 1829; syn. *basalis* Brischke, 1865] Identified by Morley (1908) and Aubert (1978) as *impressor* Grav., based on Morley's interpretation of Thomson's interpretation; the species involved is apparently undescribed (J.P. Brock, pers. comm.).

### *Lissonota accusator* (Fabricius, 1793)

**Nomenclature:**

*DIORATICA* Förster, 1869

*OMORGUS* Förster, 1869

*OMORGA* Förster, 1869

**Notes:** The *Campoplex* material in BMNH was sorted and determined by J.F. Perkins and more recently identified by K. Horstmann.

doubtfully placed species of *Campoplex*:

[*arvensis* Gravenhorst, 1829 nom. dub.] Listed as *Sinophorus arvensis* by Fitton (1978), K. Horstmann (pers. comm.) has seen only the type specimen of this species, which remains uninterpreted at present

species of *Campoplex* excluded from the British and Irish list:

[*borealis* (Zetterstedt, 1838, *Porizon*)] All British specimens in NMS were reidentified as *C. caloptiliae* by Horstmann

[*melanostoma* (Strobl, 1904, *Limneria*); syn. *anterior* Aubert, 1960] On earlier versions of this checklist, *C. melanostoma* was included based on a reared specimen in NMS, but this was based on a misidentification of *C. punctulatus*.

*DELOPIA* Cameron, 1903

**Notes:** Most distribution data from Horstmann (2011a), based on R. Hinz's and K. Horstmann's identifications of specimens in NMS and BMNH; older determinations of material in BMNH cannot be relied upon. Some species have been carried over from the 1978 checklist but no recent specimens have been seen, these are indicated by a '?'. Synonymy follows Hinz and Horstmann (2004) and Horstmann (2009c).

Species of *Dusona* excluded from the British and Irish list:

[*limnobia* (Thomson, 1887, *Campoplex*)] K. Horstmann had identified specimens in NMS as *limnobia*, which appeared on earlier versions of this checklist, but, following the redescription of the species (Horstmann 2009c), older identifications need to be checked (Horstmann 2011a).

[*vidua* (Gravenhorst, 1829, *Campoplex*)] Specimens identified in BMNH as *Dusona vidua* are actually *Hyposoter tricolor* (det. K. Horstmann); Shaw (2008) also notes that Irish records almost certainly refer to *H. tricolor*.

*germari* Taschenberg, 1865

**Distribution:** England, Scotland, Wales, Ireland

**Genus Echthrus** Gravenhorst, 1829

**Nomenclature:**

*Sphaetes* Bremi, 1849

**Notes:** *Echthrus* is placed in the Cryptini, following Laurenne et al. (2006), rather than in the Hemigastrini, where it was placed by Townes (1970). Townes and Townes (1960) had previously placed *Echthrus* in the Cryptini based on similarities to the genera that Townes (1970) classified as the subtribe Gabuniina. The molecular results of Laurenne et al. (2006) support this interpretation, in agreement with Townes and Townes (1962).

***Echthrus reluctator* (Linnaeus, 1758)**

**Nomenclature:**

*Ichneumon reluctator* Linnaeus, 1758

*usurpator* (Scopoli, 1763, *Ichneumon*)

*obex* (Müller, 1776, *Ichneumon*)

*rubicinosus* (Christ, 1791, *Ichneumon*)

*striolata* (Thomson, 1896, *Caenocryptus*)

*nigriventris* (Habermehl, 1919, *Caenocryptus*)

**Distribution:** England, Scotland

**Genus *Gambrus* Förster, 1869****Nomenclature:**

*KALTENBACHIA* Förster, 1869

*HYGROCRYPTUS* Thomson, 1873

**Notes:** Synonymy follows Schwarz and Shaw (1998) and Schwarz (2005).

***Gambrus amoenus* (Gravenhorst, 1829)****Nomenclature:**

*Cryptus amoenus* Gravenhorst, 1829

***Gambrus bipunctatus* (Tschek, 1872)****Nomenclature:**

*Cryptus bipunctatus* Tschek, 1872

*ornatus* misident.; Schwarz and Shaw (1998)

*maculatus* Brischke, 1888 synonymy by Schwarz (2005)

**Distribution:** England, Scotland, Wales

**Notes:** Added by Schwarz and Shaw (1998) and transferred from *Aritranis*.

***Gambrus carnifex* (Gravenhorst, 1829)****Nomenclature:**

*Cryptus carnifex* Gravenhorst, 1829

*varicoxis* (Taschenberg, 1865, *Cryptus*)

**Distribution:** England, Scotland, Wales

***Gambrus incubitor* (Linnaeus, 1758)****Nomenclature:**

*Ichneumon incubitor* Linnaeus, 1758

*vibex* (Müller, 1776, *Ichneumon*)

*upsaliensis* (Geoffroy, 1785, *Ichneumon*)

*superus* Thomson, 1896

*quadricinctus* (Strobl, 1901, *Spilocryptus*)

*incertus* Habermehl, 1935 preocc.

**Distribution:** England, Scotland

**Notes:** Schwarz and Shaw (1998) recorded *Gambrus incubitor* (including *ornatus*) from England, Scotland and Wales but, following Schwarz's (Schwarz 2005) separation of *incubitor* and *ornatus*, most specimens in NMS actually belong to *ornatus* (M. Schwarz, pers. comm.).

### ***Gambrus ornatus* (Gravenhorst, 1829)**

#### **Nomenclature:**

- Cryptus ornatus* Gravenhorst, 1829
- ornatulus* (Thomson, 1873, *Spilocryptus*)
- inferus* Thomson, 1896
- quadricinctus* (Strobl, 1901, *Spilocryptus*)
- ruficoxis* Habermehl, 1919
- meridionator* (Aubert, 1965, *Agrothereutes*) preocc.

**Distribution:** England, Scotland, Wales, Ireland

**Notes:** added by Schwarz (2005); see note under *incubitor*. Irish occurrence confirmed by a specimen (coll. A. Anderson) identified by M. Schwarz. The species referred to as *ornatus* in older literature is now known to be *bipunctatus* (Schwarz and Shaw 1998).

### ***Gambrus tricolor* (Gravenhorst, 1829)**

#### **Nomenclature:**

- Cryptus tricolor* Gravenhorst, 1829
- subcinctus* (Gravenhorst, 1829, *Cryptus*)
- opacus* Szépligeti, 1916

**Distribution:** England, Scotland, Wales

**Notes:** Listed as a species of *Thrybius* by Yu and Horstmann (1997), as a species of *Gambrus* by Schwarz and Shaw (1998).

### **Genus *Helcostizus* Förster, 1869**

#### **Nomenclature:**

- BRACHYCENTRUS* Taschenberg, 1865 preocc.
- CYRTOCRYPTUS* Marshall, 1872
- MESOCRYPTUS* Thomson, 1873
- HETEROCRYPTUS* Woldstedt, 1874
- CHENBERGUS* Navás, 1930

**Notes:** *Helcostizus* is transferred here from the Phygadeuontini, following the molecular phylogenetic results of Laurenne et al. (2006). The combination of morphological characters associated with parasitising wood-boring hosts had previously led Townes & Townes (1962) to classify this genus in the Cryptini. Distribution data from Townes (1983) and Schwarz and Shaw (2010).

### *Helcostizus restaurator* (Fabricius, 1775)

#### Nomenclature:

- Ichneumon restaurator* Fabricius, 1775

### *Hoplocryptus melanocephalus* (Gravenhorst, 1829)

**Nomenclature:**

*Cryptus melanocephalus* Gravenhorst, 1829

**Distribution:** England

**Notes:** added by Schwarz (2007)

### *Hoplocryptus murarius* (Börner, 1782)

**Nomenclature:**

*Ichneumon murarius* Börner, 1782  
*olitorius* (Fabricius, 1793, *Ichneumon*) synonymy by Horstmann (2001a)  
*fugitivus* (Gravenhorst, 1829, *Cryptus*) synonymy by Schwarz (2007)  
*gracilis* (Gravenhorst, 1829, *Cryptus*)

*ratzeburgi* (Habermehl, 1919, *Spilocryptus*)  
*obscurata* (Kiss, 1929, *Habrocyptus*) preocc.

**Notes:** *Ichneumon murarius* has priority over *fugitivus* (as used by Schwarz and Shaw 1998) or *olitorius*; *Hoplocryptus binotatulus* f. *grandis* Habermehl, 1926 was removed

from synonymy and is a junior synonym of the extralimital *H. besseianus* (Seyrig, 1926) (Schwarz 2007).

### ***Hoplocryptus quadriguttatus* (Gravenhorst, 1829)**

#### **Nomenclature:**

*Cryptus quadriguttatus* Gravenhorst, 1829

*cognatus* (Fonscolombe, 1850, *Cryptus*) synonymy by Schwarz (2005)

*mallorcanus* Kriechbaumer, 1894 synonymy by Schwarz (2007)

*enslini* Habermehl, 1921 synonymy by Schwarz (2007)

*hebraicator* (Aubert, 1970, *Aritranis*) synonymy by Schwarz (2005)

*tiloidalis* (Kolarov & Beyarslan, 1994, *Agrothereutes*) synonymy by Schwarz (2005)

#### **Distribution:** England

### **Genus *Idiolispa* Förster, 1869**

#### **Nomenclature:**

*LIOCRYPTUS* Thomson, 1873

*PARACRYPTUS* Szépligeti, 1916

**Notes:** species of *Idiolispa* deleted from the British and Irish list by Schwarz and Shaw (1998):

[*obfuscator* (Villers, 1789, *Ichneumon*)] Fitton (1978) listed *obfuscator* (Villers) as a doubtfully placed species of *Trychosis* but it was probably misidentified.

### ***Idiolispa analis* (Gravenhorst, 1807)**

#### **Nomenclature:**

*Bassus analis* Gravenhorst, 1807

*cursor* (Thunberg, 1824, *Ichneumon*) preocc.

*elevata* (Zetterstedt, 1838, *Cryptus*)

*geminus* (Gravenhorst, 1829, *Cryptus*) synonymy by Sawoniewicz (2003)

*sannio* (Gravenhorst, 1829, *Cryptus*)

*sedulus* (Gravenhorst, 1829, *Cryptus*) synonymy by Sawoniewicz (2003)

*flavopictus* (Rudow, 1883, *Cryptus*)

*alpinus* (Strobl, 1901, *Habrocyptus*)

*obscuratus* (Kiss, 1924, *Habrocyptus*)

**Distribution:** England

**Notes:** Horstmann (1968) misidentified Fabricius's *migrator*, a mistake followed by Schwarz and Shaw (1998). Horstmann's subsequent (Horstmann 2001a) lectotype designations resulted in *inquisitorius* becoming the valid name for *migrator* sensu Horstmann (1968) and Schwarz and Shaw (1998) and *migrator* being the senior synonym for *collaris*. Sawoniewicz (2003) correctly applied the names (Horstmann, pers. comm.).

### *Ischnus migrator* (Fabricius, 1775)

**Nomenclature:**

*Ichneumon migrator* Fabricius, 1775

*collaris* (Tschek, 1872, *Cryptus*) synonymy by Horstmann (2001a)

### Genus *Medophron* Förster, 1869

**Nomenclature:**

*BARYNTICA* Förster, 1869

*HEDYLUS* Förster, 1869

*SUBHEMITELES* Horstmann, 1976

**Notes:** Some distribution data from Horstmann (1998a). Townes (1983), whilst noting that *crassicornis* Ashmead 'might be segregated in a separate genus', retained *crassicornis* as a species of *Medophron*, whilst Yu and Horstmann (1997) follow in treating *Hedylus* as a separate genus. Schwarz and Shaw (2010) follow Townes (1983), noting that separate of *Hedylus* is inconsistent with the synonymy of *Subhemiteles* with *Medophron*.

## Ctenopelmatinae

### Subfamily CTENOPELMATINAE Förster, 1869

#### Nomenclature:

SCOLOBATINAE Schmiedeknecht, 1911

**Notes:** Parts of the NHM collection have relatively recently been determined by J. Barron, R. Hinz, K. Horstmann, M. Idar and J.-F. Aubert, parts of the NMS have been determined by D.R. Kasparyan. the catalogue of Aubert (2000) frequently has different dates of publication and endings of specific names to those in Yu and Horstmann (1997), the latter is followed. Unless stated otherwise, distribution data from Aubert (2000), Fitton (1976), for type localities, and the collections of NHM, NMS and UM.

### Tribe CHRIONOTINI Uchida, 1957

#### Nomenclature:

OLETHRODOTINI Townes, 1970

**Notes:** Distribution data from Shaw and Kasparyan (2002). Note that Olethrodotini has generally been used as the name for this small tribe but Chrionotini has precedence.

### Genus *Olethrodotis* Förster, 1869

#### Nomenclature:

TASCHENBERGIA Schmiedeknecht, 1888

### *Olethrodotis modestus* (Gravenhorst, 1829)

#### Nomenclature:

*Mesoleptus modestus* Gravenhorst, 1829

*evolans* (Gravenhorst, 1829, *Tryphon*)

*microtamia* (Gravenhorst, 1829, *Phytodietus*)

**Distribution:** England, Scotland

### Tribe CTENOPELMATINI Förster, 1869

**Notes:** The checklist of British Ctenopelmatini was revised by Shaw et al. (2003), including nomenclatural changes and distribution data.

**Genus *Ctenopelma* Holmgren, 1857****Nomenclature:**

- DIEDRUS* Förster, 1869  
*ERYMA* Förster, 1869  
*XANIOPELMA* Tschek, 1869  
*ZACHRESTA* Förster, 1869  
*HOLMGRENIA* Kriechbaumer, 1877  
*KRIECHBAUMERIA* Dalla Torre, 1885  
*POLYOMORUS* Kriechbaumer, 1894  
*POLYHOMORUS* Schulz, 1906  
*PSEUDOBANCHUS* Szépligeti, 1911

***Ctenopelma ruficorne* Holmgren, 1857****Nomenclature:**

- Ctenopelma ruficornis* Holmgren, 1857

**Distribution:** Scotland

**Notes:** added by Shaw et al. (2003)

***Ctenopelma tomentosum* (Desvignes, 1856)****Nomenclature:**

- Campoplex tomentosus* Desvignes, 1856  
*nigrum* misident.  
*lucifer* misident.  
*luteum* Holmgren, 1857  
*xanthostigma* Holmgren, 1857; synonymy by Kasparyan (2004a)  
*variabile* Tschek, 1869  
*gagatinum* (Kriechbaumer, 1894, *Polyomorus*)  
*athimi* Kriechbaumer, 1896; synonymy by Kasparyan (2004a)  
*pulchrum* (Kriechbaumer, 1877, *Holmgrenia*)  
*braunsi* Pfankuch, 1904  
*dispar* Ulbricht, 1916

**Distribution:** England

**Notes:** Although Aubert (2000) placed *tomentosum* in synonymy with *luteum*, Holmgren's publication actually dates from 1857, not 1855, so *tomentosum* is the valid name (Shaw et al. 2003).

### Genus *Homaspis* Förster, 1869

#### Nomenclature:

*NEOHOMASPSIS* Heinrich, 1949

### *Homaspis analis* (Holmgren, 1857)

#### Nomenclature:

*Notopygus analis* Holmgren, 1857

*subalpina* misident.

*defectivus* (Tschek, 1869, *Ctenopelma*); synonymy by Kasparyan (2004a)

*pectator* Aubert, 1989; synonymy by Kasparyan (2004a)

#### Distribution:

England

**Notes:** Listed as a synonym of *H. narrator* (Gravenhorst, 1829, *Mesoleptus*) by Yu and Horstmann (1997) but this was not accepted by Shaw et al. (2003).

### Genus *Notopygus* Holmgren, 1857

#### Nomenclature:

*ANTIPYGUS* Tschek, 1869

### *Notopygus emarginatus* Holmgren, 1857

#### Nomenclature:

*sinifer* Ulbricht, 1922

#### Distribution:

England, Scotland

### Genus *Xenoschesis* Förster, 1869

### Subgenus *Xenoschesis* Förster, 1869

#### Nomenclature:

*ZOOTREPHES* Förster, 1869

*ZOOTREPHUS* Thomson, 1890

*SYNODYTES* Thomson, 1893

*ANAGLYMMUS* Roman, 1914

**Notes:** species of *Synodites* excluded from the British and Irish list:

[*breviventris* (Gravenhorst, 1829, *Hemiteles*)] Listed as a species of *Dichrogaster* (Cryptinae: Phygadeuontini) in Fitton (1978), there are no identified specimens in BMNH and Aubert (2000) does not list it as occurring in Britain or Ireland.

### ***Synodites breviusculus* (Fonscolombe, 1849)**

**Nomenclature:**

*Tryphon breviusculus* Fonscolombe, 1849

*delicatus* (Fonscolombe, 1849, *Tryphon*)

*buccatus* (Holmgren, 1857, *Mesoleius*)

**Distribution:** England

**Notes:** Placed in *Hypamblys* in Yu and Horstmann (1997), in *Synodites* by Aubert (2000).

***Synodites carinatus* (Holmgren, 1857)****Nomenclature:**

*Mesoleius carinatus* Holmgren, 1857

**Distribution:** England

**Notes:** added by Aubert (2000)

***Synodites erosus* (Holmgren, 1857)****Nomenclature:**

*Trematopygus erosus* Holmgren, 1857

**Distribution:** Scotland

**Notes:** Added by Aubert (2000); one specimen in BMNH from 'Wissant', which could not be located in a Gazetteer. 'England' is given in Aubert (2000) but all other BMNH specimens are from Scotland.

***Synodites facialis* (Thomson, 1893)****Nomenclature:**

*Spudaeus facialis* Thomson, 1893

**Distribution:** England

**Notes:** In Yu and Horstmann (1997) as a synonym of *discolor* (Holmgren, 1857, *Trematopygus*) (placed in *Syndipnus* in Aubert 2000); the two species were differentiated by Horstmann (2011b).

## Cylloceriinae

### Subfamily CYLLOCERIINAE Wahl, 1990

#### Genus *Allomacrus* Förster, 1869

##### Nomenclature:

*SIBIRIAKOFFIA* Holmgren, 1880

*KENTROTRYPHON* Strobl, 1903 synonymy by Schwarz (2003)

#### *Allomacrus arcticus* (Holmgren, 1880)

##### Nomenclature:

*Sibiriakoffia arctica* Holmgren, 1880

*pimplarius* Thomson, 1888

##### Distribution:

 England, Scotland, Ireland

##### Notes:

 BMNH, NMS, UM, added here

#### Genus *Cylloceria* Schiødte, 1838

##### Nomenclature:

*CHALINOCERUS* Ratzeburg, 1852

*ASPHRAGIS* Förster, 1869

##### Notes:

 Most distribution data from BMNH and NMS, some from Fitton (1976) and Rossem (1981).

#### *Cylloceria caligata* (Gravenhorst, 1829)

##### Nomenclature:

*Phytodietus caligatus* Gravenhorst, 1829

*nunciator* misident.

*nigra* (Gravenhorst, 1829, *Phytodietus*)

*crenicornis* (Curtis, 1832, *Lampronota*)

*nuntiator* (Zetterstedt, 1838, *Bassus*)

*manca* (Ruthe, 1855, *Chalinocerus*)

##### Distribution:

 England, Ireland

**Notes:** Raised from synonymy (Dasch 1992, Yu and Horstmann 1997) by Humala (2002). Humala (2002) did not report synonymy, which therefore mostly follows Rossem (1981).

### *Cylloceria melancholica* (Gravenhorst, 1820)

#### Nomenclature:

- Ichneumon melancholicus* Gravenhorst, 1820
- accusator* misidentification
- defectiva* (Gravenhorst, 1829, *Lissonota*)
- affinis* (Zetterstedt, 1838, *Bassus*)

### Genus *Hyperacmus* Holmgren, 1858

#### Nomenclature:

- CUSHMANIA* Dasch, 1992 synonymy by Wahl and Gauld (1998)

**Notes:** *Hyperacmus* has sometimes been included in the Microleptinae *sensu stricto* (e.g. Humala 1997, Yu and Horstmann 1997) but the Microleptinae is restricted to the single genus, *Microleptes* (Broad 2004). Wahl and Gauld (1998) argued that *Hyperacmus* is better placed in the Orthocentrinae but, on the basis of phylogenetic studies (Quicke et al. 2009), *Hyperacmus* is placed here in the Cylloceriinae.

***Hyperacmus crassicornis* (Gravenhorst, 1829)****Nomenclature:**

*Exochus crassicornis* Gravenhorst, 1829

*brunniventris* (Rudow, 1883, *Exochus*)

*suerinensis* (Brauns, 1905, *Lampronota*) synonymy by Humala (2002)

**Distribution:** England, Scotland, Ireland

**Diacritinae****Subfamily DIACRITINAE Townes, 1965**

**Notes:** Treated by Fitton et al. (1988), who give distribution data, as a tribe of the Pimplinae.

#### ***Enizemum nigricorne* (Thomson, 1890)**

**Nomenclature:**

*Homotropus nigricornis* Thomson, 1890

**Distribution:** Ireland

**Notes:** Fitton and Rotheray (1982) doubted whether the few British specimens identified as *nigricorne* were distinct from *ornatum*. One apparently British specimen in BMNH (Capron coll., no other details) is *nigricorne* (det. Broad and Klopstein). Beirne (1941) records *nigricorne* from Ireland.

#### ***Enizemum ornatum* (Gravenhorst, 1829)**

*Ichneumon erigator* Fabricius, 1793

*festiva* (Fabricius, 1798, *Ichneumon*)

*festivator* (Fabricius, 1804, *Ophion*)

**Distribution:** England

**Notes:** The only English specimens listed by Kerrich (1949) (and possibly the same as those listed by Beirne 1941) were supposedly from the Lichfield district (Carr (1924)) and are thus inadmissible (Perkins 1953, Shaw 2003). There are specimens in BMNH recently identified by S. Klopfstein.

***Sussaba flavipes* (Lucas, 1849)****Nomenclature:**

*Bassus flavipes* Lucas, 1849

*pulchella* misident.

*neopulchella* Diller, 1980

*coriacea* Dasch, 1964

**Distribution:** England, Scotland, Wales, Ireland

**Notes:** Sometimes identified as *coriacea*, but this is now classified as the Nearctic subspecies of *flavipes* (Yu and Horstmann 1997).

***Sussaba placita* Dasch, 1964****Nomenclature:**

*punctiventris* misident.

**Distribution:** England

**Notes:** The only British specimens labelled as *punctiventris* in BMNH were misidentified *flavipes*, and Beirne (1941) did not mention any British or Irish specimens. According to S. Klopfstein (pers. comm.), specimens identified as *punctiventris* (Thomson, 1890, *Homotropus*) by Fraser et al. (2007) are actually *placita* and the species was subsequently recorded as *placita* by Mayhew et al. (2009).

***Sussaba pulchella* (Holmgren, 1858)****Nomenclature:**

*Bassus pulchellus* Holmgren, 1858

- elongata* (Provancher, 1874, *Bassus*)
- monticola* (Vollenhoven, 1880, *Bassus*)

#### Nomenclature:

PAXYLLOMATINAE Förster, 1862

**Notes:** Usually referred to as Paxyllomatinae (e.g. Fitton 1978, Mason 1981, Yu and Horstmann 1997), but Hybrizontinae has priority (Wharton and Achterberg 2000). Distribution data from Donisthorpe (1927), Achterberg (1999) and the collections of BMNH and NMS.

### Genus *Ghilaromma* Tobias, 1988

#### *Ghilaromma fuliginosi* (Donisthorpe & Wilkinson, 1930)

#### Nomenclature:

*Paxyloma fuliginosi* Donisthorpe & Wilkinson, 1930

#### Distribution:

 England

### Genus *Hybrizon* Fallén, 1813

#### Nomenclature:

PAXYLOMMA Latreille, 1817

PLANCUS Curtis, 1833

PACHYLOMMA Ratzeburg, 1848

#### *Hybrizon buccatus* (de Brébisson, 1825)

#### Nomenclature:

*Paxyloma buccata* de Brébisson, 1825

*apicalis* (Curtis, 1833, *Plancus*)

*latebricola* Nees, 1834

#### Distribution:

 England, Wales

**Notes:** *Hybrizon pubicornis* Zetterstedt, 1838, is listed as a synonym of *buccatus* in Yu and Horstmann (1997) but is actually a species of *Anteon* (Dryinidae) (Achterberg 1999).

## Ichneumoninae

### Subfamily ICHNEUMONINAE Latreille, 1802

**Notes:** Distribution data from Perkins (1953), Perkins (1959), Perkins (1960), Fitton (1976), Boston and Nash (1989) and the collections of BMNH and NMS, except where noted. Additional distribution references are given.

*Ichneumon riesei* Habermehl, 1916

*hoerhammeri* Heinrich, 1949

*amabilis* Kriechbaumer, 1895 preocc.

**Distribution:** England, Ireland

**Notes:** Transferred to *Exephanes* (from *Ichneumon*) by Hinz and Horstmann (2000).

### ***Exephanes venustus* (Tischbein, 1876)**

**Nomenclature:**

*Ichneumon venustus* Tischbein, 1876

*insidiator* (Tischbein, 1876, *Ichneumon*)

*caelebs* Kreichbaumer, 1890

**Distribution:** Ireland

### **Genus *Gareila* Heinrich, 1980**

#### ***Gareila tenebrosa* (Wesmael, 1845)**

**Nomenclature:**

*Ichneumon tenebrosus* Wesmael, 1845

*nigricornis* (Schmiedeknecht, 1930, *Ichneumon*) preocc.

**Distribution:** Scotland

**Notes:** NMS, det. Riedel, added here

### **Genus *Hepiopelmus* Wesmael, 1845**

**Nomenclature:**

*EPIOPELMUS* Dalla Torre, 1902

#### ***Hepiopelmus melanogaster* (Gmelin, 1790)**

**Nomenclature:**

*Ichneumon melanogaster* Gmelin, 1790

*leucostigmus* (Gravenhorst, 1820, *Ichneumon*)

*maculiventris* (Desvignes, 1856, *Ichneumon*)

**Nomenclature:**

*Ichneumon variegatorius* Panzer, 1800

*notatorius* (Panzer, 1801, *Ichneumon*) preocc.

*flavoguttatus* (Gravenhorst, 1829, *Ichneumon*)

**Distribution:** England, Wales, Ireland

**Genus *Homotherus* Förster, 1869**

***Homotherus locutor* (Thunberg, 1824)**

**Nomenclature:**

*Ichneumon locutor* Thunberg, 1824

*labiatorius* (Thunberg, 1824, *Ichneumon*)

*albicinctus* (Gravenhorst, 1829, *Ichneumon*)

*albiceps* (Hartig, 1838, *Phygadeuon*)

*festinatorius* (Zetterstedt, 1838, *Ichneumon*)

*lautus* (Tischbein, 1868, *Ichneumon*)

*ruber* (Kiss, 1924, *Proscus*)

**Distribution:** England, Scotland, Wales, Ireland

***Homotherus magus* (Wesmael, 1855)**

**Nomenclature:**

*Ichneumon magus* Wesmael, 1855

*clavipes* (Möller, 1883, *Ichneumon*) preocc.

*nitidus* (Bridgman, 1886, *Phaeogenes*)

**Distribution:** England, Ireland

***Homotherus varipes* (Gravenhorst, 1829)**

**Nomenclature:**

*Ichneumon varipes* Gravenhorst, 1829

*costator* (Donovan, 1810, *Ichneumon*) preocc., synonymy by Horstmann (2002b)

- decimator* (Gravenhorst, 1829, *Ichneumon*)
- laevis* (Ratzeburg, 1844, *Ichneumon*)

- anglicanus* (Schmiedeknecht, 1928, *Ichneumon*)

**Distribution:** England, Scotland, Wales, Ireland

### Genus *Hoplismenus* Gravenhorst, 1829

**Nomenclature:**

- PERITAENIUS* Förster, 1869
- TAENIASPIS* Clément, 1927

### *Hoplismenus albifrons* Gravenhorst, 1829

**Nomenclature:**

- axillatorius* misident.
- ?*armatorius* (Fabricius, 1787, *Ichneumon*) preocc.
- albifrons* Gravenhorst, 1829
- perniciosus* Gravenhorst, 1829
- crassicornis* (Rudow, 1883, *Cryptus*) preocc.
- bellicosus* (De Stefani, 1885, *Ichneumon*)

**Distribution:** England, Scotland, Ireland

**Notes:** Usually known as *H. axillatorius* (Thunberg) but *Ichneumon axillatorius* Thunberg, 1824 was found to be a senior synonym of *Cyclolabus pactor* (Wesmael) by Riedel (2014).

### *Hoplismenus bidentatus* (Gmelin, 1790)

**Nomenclature:**

- Ichneumon bidentatus* Gmelin, 1790
- moestus* Gravenhorst, 1829
- maurus* (Marshall, 1873, *Mesostenus*)
- ichneumonoides* (Rudow, 1883, *Cryptus*)

**Nomenclature:**

*BRACHYPTERUS* Gravenhorst, 1829 preocc.

*PTEROCHORMUS* Förster, 1850

**Notes:** Distribution data from Hilpert (1992), BMNH and NMS.

doubtfully placed species of *Ichneumon*:

[*femorator* Kirby, 1802 preocc., nom. dub.]

### ***Ichneumon albiger* Wesmael, 1845**

**Nomenclature:**

*tempestivus* Holmgren, 1864

**Distribution:** England, Scotland, Ireland

### ***Ichneumon alius* Tischbein, 1879**

**Nomenclature:**

*eurycerus* Thomson, 1890

*dubiosus* Habermehl, 1926

*petrophilus* Heinrich, 1951

**Distribution:** England, Scotland

***Ichneumon ? alpestris* Holmgren, 1864**

**Notes:** Added by Hilpert (1992); uncertain identification, based on female specimen.

***Ichneumon analis* Gravenhorst, 1829****Nomenclature:**

*nigroscutellatus* Habermehl, 1916 preocc.

***Ichneumon aquilonius* Perkins, 1953**

**Distribution:** England, Scotland, Ireland

**Notes:** some distribution data from Shaw (2004)

## Mesochorinae

### Subfamily MESOCHORINAE Förster, 1869

**Notes:** Schwenke (1999) reinstated various synonyms of *Astiphromma* and *Mesochorus* as valid genera. This treatment is not followed here as Wahl (1993) gave good reasons for treating these as synonyms. Looking at material from across the globe, there are no clear-cut differences between, for example, *Stictopisthus* and *Mesochorus*. An exception is *Dolichochorus*, q.v. Distribution data, unless noted otherwise, are taken from Schwenke (1999), NMS, BMNH and UM.

## Genus *Astiphromma* Förster, 1869

### Nomenclature:

*ASTIPHROMMUS* Thomson, 1886

*MESOCHORELLA* Szépligeti, 1911

*PSEUDACOENITUS* Kiss, 1924

*DEMOPHORELLUS* Hedwig, 1955

**Notes:** Some distribution data and much synonymy from Riedel (2015), with most identifications by M. Riedel and GRB. J.F. Perkins, A. Roman and W. Schwenke had also identified a few interesting specimens in BMNH.

species of *Astiphromma* excluded from the British and Irish list:

[*dorsale* (Holmgren, 1860, *Mesochorus*)] No British or Irish specimens have been seen (Riedel 2015). The previously synonymous name *hirsutum*, described from British specimens, is a senior synonym of *granigerum*.

[*striatum* (Brischke, 1880, *Mesochorus*); syn. *mandibulare* (Thomson, 1886, *Mesochorus*)] All British specimens under the name *mandibulare* (synonymised under *striatum* by Riedel 2015) in BMNH have proved to be misidentifications.

## *Astiphromma aggressor* (Fabricius, 1804)

### Nomenclature:

*plagiatum* (Thomson, 1886, *Mesochorus*) synonymy by Schwenke (1999)

**Distribution:** England, Scotland, Ireland

**Notes:** *Astiphromma sericans* was reinstated as a valid species by Horstmann (2006b) but synonymised under *splenium* again by Riedel (2015).

***Astiphromma tenuicorne* (Thomson, 1886)****Nomenclature:**

*Mesochorus tenuicornis* Thomson, 1886

*brischkei* (Szépligeti, 1911, *Plesiophthalmus*) synonymy by Horstmann (2002b)

**Distribution:** England, Scotland

**Notes:** Added by Fitton (1985b); listed as a synonym of *alarius* in Yu and Horstmann (1997), with *brischkei* as the valid name for this species.

***Cidaphus atricillus* (Haliday, 1838)****Nomenclature:**

*Cryptus atricillus* Haliday, 1838

*potanini* Kokujev, 1906

*melanocephalus* (Habermehl, 1909, *Plesiophthalmus*)

**Distribution:** England, Scotland, Wales

**Genus *Dolichochorus* Strobl, 1904**

**Notes:** *Mesochorus longiceps* is the type species of *Dolichochorus* Strobl, 1904. This genus was synonymised under *Astiphromma* by Townes et al. (1965) but reinstated as a valid genus by Schwenke (1999). Wahl (1993) listed *Dolichochorus* as a synonym of *Astiphromma* but did not include *longiceps* in his cladistic analysis. Broad & Watanabe (in prep.) have found that *Dolichochorus* is a rather basal member of the Mesochorinae, and distinct from *Astiphromma*.

***Dolichochorus longiceps* (Strobl, 1904)****Nomenclature:**

*Mesochorus longiceps* Strobl, 1904

**Distribution:** England

**Notes:** Added by Schwenke (1999); it is not known on what basis Schwenke (1999) recorded this as a British species but its occurrence in Britain is confirmed by Riedel (2015) and Broad & Watanabe (in prep.).

**Genus *Mesochorus* Gravenhorst, 1829****Nomenclature:**

*STICTOPISTHUS* Thomson, 1886

**Notes:** Horstmann (2006b) substantially revised the taxonomy of various species of *Mesochorus* as W. Schwenke had misinterpreted many names.

species of *Mesochorus* excluded from the British and Irish list:

## Ophioninae

### Subfamily OPHIONINAE Shuckard, 1840

**Notes:** Unless stated otherwise, all distribution data are taken from Brock (1982), Gauld (1973), Gauld (1974) and from the nocturnal Ichneumonoidea recording scheme (database maintained by GRB).

### Genus *Enicospilus* Stephens, 1835

#### Nomenclature:

*HENICOSPILUS* Agassiz, 1846

*ALLOCAMPTUS* Förster, 1869

*CYMATONEURA* Kriechbaumer, 1901

*CRYPTOCAMPTUS* Brèthes, 1909

*AMESOPHILUS* Enderlein, 1914

**Notes:** Distribution and taxonomy follow Broad and Shaw (2016)

***Enicospilus adustus* (Haller, 1885)****Nomenclature:**

*Ophion adustus* Haller, 1885

*merdarius* misident.

**Distribution:** England, Scotland, Ireland

**Notes:** *Enicospilus 'merdarius' auctt.* has now been split into three species, none of which is actually *merdarius* (Broad and Shaw 2016); *E. merdarius* was regarded as a synonym of *E. ramidulus* by Gauld (1973) and listed as such in Fitton (1978) but regarded by most recent authors as a valid species, which is borne out by the lack of intermediate specimens and differences in distribution (Broad and Shaw 2016) (allowing for the fact that the name *merdarius* was misapplied).

***Enicospilus cerebrator* Aubert, 1966**

**Distribution:** England

**Notes:** added by Broad and Shaw (2016)

***Enicospilus combustus* (Gravenhorst, 1829)****Nomenclature:**

*Ophion combustus* Gravenhorst, 1829

**Distribution:** England, Wales

***Enicospilus inflexus* (Ratzeburg, 1844)****Nomenclature:**

*Ophion inflexus* Ratzeburg, 1844

**Distribution:** England, Scotland, Wales

***Enicospilus merdarius* (Gravenhorst, 1829)****Nomenclature:**

*Ophion merdarius* Gravenhorst, 1829

*repentinus* misident.

*tournieri* (Vollenhoven, 1879, *Ophion*) synonymy by Broad and Shaw (2016)

*rossicus* (Kokujev, 1907, *Henicospilus*)

*contributus* Shestakov, 1926

**Distribution:** England, Scotland

**Notes:** see note under *repentinus*

### ***Enicospilus myricae* Broad & Shaw, 2016**

**Distribution:** England, Scotland, Wales

**Notes:** added by Broad and Shaw (2016)

### ***Enicospilus ramidulus* (Linnaeus, 1758)**

**Nomenclature:**

*Ichneumon ramidulus* Linnaeus, 1758

*truncatus* (Poda, 1761, *Sphex*)

*instabilis* (Kokujev, 1907, *Henicospilus*)

**Distribution:** England, Scotland, Wales, Ireland

### ***Enicospilus repentinus* (Holmgren, 1860)**

**Nomenclature:**

*Ophion repentinus* Holmgren, 1860

**Distribution:** England

**Notes:** Added by Broad and Shaw (2016); although previously recognised as British (Gauld 1973), this was in error and the specimens are *merdarius* (=*tournieri* auctt.), however, Broad and Shaw (2016) record the true *repentinus* from Britain.

### ***Enicospilus undulatus* (Gravenhorst, 1829)**

**Nomenclature:**

*Ophion undulatus* Gravenhorst, 1829

*arcuatus* (Brullé, 1846, *Ophion*)

**Distribution:** England

### **Genus *Eremotylus* Förster, 1869**

**Nomenclature:**

*CAMPTOEURA* Kriechbaumer, 1901

*CAMPTOEUROIDES* Strand, 1928

*CLISTORAPHA* Cushman, 1947

***Eremotylus curvinervis* (Kriechbaumer, 1878)****Nomenclature:**

*Ophion curvinervis* Kriechbaumer, 1878

*hungaricus* Szépligeti, 1905

*dryobotae* Seyrig, 1926

**Distribution:** England

**Notes:** added by Horstmann (1981b)

***Eremotylus marginatus* (Jurine, 1807)****Nomenclature:**

*Anomalon marginatum* Jurine, 1807

**Distribution:** England

**Notes:** a distribution record from George (1957)

**Genus *Ophion* Fabricius, 1798****Nomenclature:**

*PANISCUS* Schrank, 1802

*STENOPHTHALMUS* Szépligeti, 1905

*PACHYPROTOMA* Kohl, 1906

*APATOPHION* Shestakov, 1926

*PLATOPHION* Hellén, 1926

**Notes:** The species *areolaris* and *ocellaris* have often been treated as comprising a separate genus, *Platophion* (e.g. Gauld 1973, Brock 1982) but are now generally treated as a species-group of *Ophion* (see Schwarzfeld et al. 2016).

*distans* Thomson, 1888

*slaviceki* Kriechbaumer, 1892

*pictus* Kokujev, 1906

*calcaratus* Morley, 1915

**Distribution:** England, Scotland, Wales, Ireland, Isle of Man

**Notes:** *slaviceki* was re-synonymised by Brock (1982)

***Ophion minutus* Kriechbaumer, 1879**

**Nomenclature:**

*eremotyloides* Ceballos, 1962

**Distribution:** England, Scotland, Wales

***Ophion mocsaryi* Brauns, 1889**

**Nomenclature:**

**Distribution:** England**Orthocentrinae****Subfamily ORTHOCENTRINAE Förster, 1869****Nomenclature:**

*HELICTINAE* Gupta, 1987

**Notes:** Traditionally, the Orthocentrinae comprised a tightly-knit group of genera related to *Orthocentrus* but now includes many genera of the former 'Microleptinae' sensu Townes (1971) (Wahl 1990). Distribution data taken from BMNH, NMS (det. J.F. Perkins and GRB), UM, Rossem (1982), Rossem (1983a), Rossem (1987), Rossem (1988) and Dasch (1992), with additional references given.

**Genus *Aniseres* Förster, 1871*****Aniseres lapponicus* Jussila, 1994****Distribution:** Scotland

**Notes:** NMS, added here; synonymised *lapponicus* under *pallipes*; I do not follow this as there are two clearly distinct species in Britain and one corresponds to Jussila's (Jussila 1994b) description of *lapponicus*. However, I have not yet examined type material.

***Aniseres pallipes* Förster, 1871****Nomenclature:**

*pallidipes* Dalla Torre, 1901

**Distribution:** England

*Cryptus socius* Haliday, 1839

**Distribution:** Ireland

**Notes:** BMNH, added here; described from Ireland so not included in the 1978 British checklist, and Fitton (1976) considered the name to be a nomen dubium.

**Genus *Proeliator* Rossem, 1982*****Proeliator proprius* Rossem, 1982**

**Distribution:** England

**Notes:** BMNH, det. Broad, added here

**Genus *Stenomacrus* Förster, 1869**

**Notes:** species of *Stenomacrus* excluded from the British and Irish list:

[*affinis* misident.] *Stenomacrus affinis* (Zetterstedt, 1838, *Bassus*) of authors was redescribed as *S. affinitor* Aubert, 1981 as the type of *affinis* is a species of *Hypsicera* (Metopiinae), a junior synonym of *curvator* (Fabricius). Old British records of '*Stenomacrus affinis*' are not valid.

[*exserens* (Thomson, 1897, *Orthocentrus*)] Morley (1911) recorded *Stenomacrus exserens* as a British species but the only two specimens purportedly of this species in BMNH, from C. Morley's collection, are misidentified *Eusterinx*. There is no other evidence that *exserens* is a British or Irish species.

##### Subgenus *Eclytus* Holmgren, 1857

**Nomenclature:**

ZAPEDIAS Förster, 1869 synonymy by Bennett (2015)

**Notes:** species of *Eclytus (Eclytus)* excluded from the British and Irish list:

[*ornatus* Holmgren, 1857] Fitton and Ficken (1990) recorded *Eclytus ornatus* from England and Scotland but their identifications were not based on egg characters, used by Kasparyan (1977) to separate species, and they suggested that their records of *ornatus* might be based on misidentifications. Shaw and Kasparyan (2005) did not find any specimens of the true *ornatus* in NMS.

*Paniscus testaceus* Gravenhorst, 1829

**Distribution:** England, Scotland

**Notes:** Added by Horstmann (1992b); this has been a much misunderstood name. Listed as a possible (senior) synonym of *opacula* in Fitton (1978), Horstmann (1992b) regarded it as a possible senior synonym of *valvator* Aubert, 1969. Broad & Shaw (in prep.), following a dissection of the lectotype male's genitalia, offer a different interpretation of *testacea*. Tolkanitz (1974) and Kasparyan and Tolkanitz (2000) treated *fuscarpus*, together with its associated synonyms, as a junior synonym of *testacea*. This is not followed here.

**Notes:** Added by Shaw (2001) who tentatively identified this widespread species as *thomsonii* (lapsus for *Netelia thomsonii* (Brauns, 1899, *Paniscus*), whilst noting that in Delrio (1975) specimens would key to *inedita*. Tolkanitz (1974) synonymised *inedita* under *thomsonii* but these two species are distinct (Broad & Shaw, in prep.), with *inedita* occurring in Britain and Ireland. **Notes:** Previous records of *ornata* in Britain were probably based on misidentifications of *inedita* but there are specimens of the true *ornata* in BMNH (Broad & Shaw, in prep.). *Netelia longipes* has been treated as a separate species by Tolkanitz (1974) and Kasparyan and Tolkanitz (2000) but as a synonym of *ornata* by Delrio (1975). The type of *longipes* is very similar to material corresponding to *ornata* (Broad & Shaw, in press).

[*?breviseta* (Ratzeburg, 1852, *Pimpla*); syn. *aberrans* (Ruthe, 1855, *Tryphon*) (Horstmann 2002a)] Although appearing on the last British list (Fitton 1978, as *aberrans*), this may have been on the basis of misidentifications of *haemosterna* (K. Horstmann, pers. comm.). Kasparyan and Tolkanitz (2000) interpreted *aberrans* as a synonym of *haemosterna* but K. Horstmann's interpretation is followed here, having revised the closely related species involved (Horstmann 2002a).

**Distribution:** England, Scotland, Wales, Ireland, Isle of Man

**Notes:** NMS, det. Horstmann, BMNH, det. Broad, added here; specimens of *Dyspetes* in Britain and Ireland have usually been treated as one species (named *praerogator* or *arrogator*) but Horstmann (2006a) demonstrated that the commoner species is actually *luteomarginatus*. The name *praerogator* was used by Gravenhorst and Thomson, referring to Linnaeus's *praerogator*, which is actually a species of *Tranosemella* (Campopleginae). These usages of *praerogator* are unavailable names (Horstmann 2005a, Horstmann 2006a).

**Distribution:** England, Scotland

**Notes:** H.K. Townes (pers. comm. to M.G. Fitton) regarded *duplicatus* as a junior synonym of *exclamationis*, the correct name for the species here called *duplicatus* being *Tryphon hinzi* (Heinrich, 1953). Townes also regarded 'duplicatus' (=*hinzi* sensu Townes) as comprising two species, one with red hind femora and one with black hind femora, also differing in characteristics of the egg. However, Shaw and Kasparyan (2005) regard a form of *bidentatus* with red hind femora as possibly being synonymous with *hinzi*. Further clarification is needed.

Jim Brock, Mike Fitton, the late Klaus Horstmann, Heinz Schnee and Mark Shaw have all been of great help in maintaining the accuracy of the list and in providing the encouragement to actually finish it. Klaus Horstmann and Kees Zwakhals bravely checked drafts of the entire list and provided many useful comments. Tony Hunter (World Museum Liverpool) kindly provided several unpublished Welsh records. Natalie Dale-Skey transformed the original Word files into spreadsheets for import. I am grateful to the photographers who were happy for me to use their images to brighten up the checklist.
