Yedayanthittu Estuary is part of the Kaliveli wetland complex which includes the Kaliveli Floodplain, Uppukalli Creek and lowland streams draining into it. The ichthyofauna of Kaliveli Floodplain and Uppukalli Creek has already been assessed (Ramanujam 2005). This report concerns the list of species found in the estuary and lowland streams.

Study Area and Methods

The Kaliveli complex has already been described (Ramanujam 2005). Lowland drains behind Kurumpuram Reserve Forest (Villupuram District, Tamil Nadu) are part of the Arni River complex and has its origin in the Eastern Ghats.

Yedayanthittu or Muttukadu Estuary ($12^{\circ}12' - 12^{\circ}15'N$ & $70^{\circ}56' - 80^{\circ}0'E$) extends from a little north of Marakkanam Road Bridge to the point of confluence with the Bay of Bengal at Alamparai (Kancheepuram District, Tamil Nadu). It is an area of intertidal mudflats and salt pans. It was once linked to Pulicat Lake via Chennai by the Buckingham Canal (Scott 1998). The feature of the estuary is that during the monsoon season (September-mid November) the salinity is low (<1600uS/cm), but during the rest of the year it is brackish (1,600-4,800uS/cm), saline (4,800-51,500uS/cm) and even hypersaline (>51,500uS/cm) depending on the tides and proximity to the sea. The naturally occurring vegetation consists of sea grasses such as *Halophila ovalis*, mangroves such as *Avicennia marina* and *Rhizophora* sp. (the latter has been planted lately) and algae such as *Chaetomorpha*, *Enteromorpha*, etc. A degraded mangrove swamp also exists whose dominant

vegetation includes *Avicennia marina*, *Salicornia brachiata*, *Arthrocnemum indicum*, *Suaeda maritima* and *Sesuvium portulacastrum*.

The study period was from January 2006 to December 2006. Specimens were collected randomly with local fishermen all over the estuary. In addition, small fish stranded in pools when the water recedes (that commercialists ignore) were collected. Identification was based on Daniels (2002), Day (1878), Jayaram (1981), Talwar & Kacker (1984), Talwar & Jhingran (1991) and Venkateswarlu & Rao (1986).

Results and Discussion

A total of 75 species were recorded under 14 orders and 37 families. Perciformes dominated with 32 species (42.66%). 47 species were found exclusively in the estuary, 18 were in lowland streams and 10 species occurred both in the estuary and freshwater. *Oreochromis mossambica* is the only exotic species.

Inventorisation of living resources is of paramount importance to evolve conservation and management strategies, especially when economically important species are involved. As of date it is unfortunate that the Kaliveli Wetland has received little attention (from the viewpoint of the ichthyologist), this report gains importance as the Kaliveli Wetland has been described as one of the two most important wetlands along the Coromandel Coast of southern India (Perennou 1987; Perennou & Santharam 1990).

Table 1. Species diversity and occurrence of fish at Yedayanithittu Estuary and Rivulet behind Kurumpuram Reserve Forest

Sl.No	Scientific Name	English Name	Local Name (Phoenetic Tamil)	Estuary	Rivulet
Order: Anguilliformes					
Family: Anguillidae					
1	<i>Anguilla bicolor</i>	Indian Shortfin Eel	Vilangu	+	+
Family: Muraenesocidae					
2	<i>Congresox talabon</i>	Indian Pike Conger	Pallankili	+	
3	<i>Muraenesox bagio</i>	Common Pike Conger	Pallankili	+	
Family: Ophichthidae					
4	<i>Bascanichthys deraniyagalai</i>	Long-tailed Sand Eel		+	
Order: Clupeiformes					
Family: Engraulidae					
5	<i>Stolephorus tri</i>	Spined Anchovy	Poriva	+	
6	<i>Stolephorus indicus</i>	Indian Anchovy	Poriva	+	
7	<i>Thryssa mystax</i>	Moustached Anchovy	Poriva	+	
8	<i>Thryssa purava</i>	Oblique-jawed Anchovy	Poriva	+	
9	<i>Colia dussumieri</i>	Grenadier Anchovy	Poriva	+	
Family: Clupeidae					
10	<i>Anodontostoma chacunda</i>	Chacunda Gizzard Shad		+	
11	<i>Nematalosa nasus</i>	Bloch's Gizzard Shad	Pachai Kutti, Ponnelli, Pon Kendai	+	+
Order: Elopiformes					
Family: Megalopidae					
12	<i>Megalops cyprinoids</i>	Indian Tarpon		+	+
Order: Gonorynchiformes					
Family: Chanidae					
13	<i>Chanos chanos</i>	Milkfish	Alathi	+	+
Order: Cypriniformes					
Family: Cyprinidae					
14	<i>Puntius sophore</i>	Spotfin Barb	Kulla Kendai	+	+
15	<i>Puntius dorsalis</i>	Kaveri Barb	Sall Kendai	+	
16	<i>Puntius vittatus</i>	Greenstripe Barb		+	+
17	<i>Amblypharyngodon microlepis</i>	Indian Carplet	Ori Kendai	+	
18	<i>Salmostoma clupeoides</i>	Bloch's Razorbelly Minnow		+	
19	<i>Parlociosoma daniconius</i>	Blackline Rasbora	Ovari Kendai	+	
20	<i>Esomus danicus</i>	Flying Barb	Ovari Kendai	+	
Family: Cobitidae					
21	<i>Lepidocephalus thermalis</i>	Malabar Loach	Palli Meen		+
Order: Siluriformes					
Family: Bagridae					
22	<i>Mystus gulio</i>	Long-whiskered Catfish	Pee Keluthi	+	+
23	<i>Mystus vittatus</i>	Striped Dwarf Catfish	Keluthi		+
Family: Ariidae					
24	<i>Arius arius</i>	Threadfin Marine Catfish	Visha Keluthi	+	
25	<i>Arius subrostratus</i>	Shovelnose Marine Catfish	Visha Keluthi	+	
26	<i>Arius maculatus</i>	Spotted Marine Catfish	Visha Keluthi	+	
Family: Plotosidae					
27	<i>Plotosus canius</i>	Grey Eel Catfish	Irun Keluthi	+	
Order: Mugiliformes					
Family: Mugilidae					
28	<i>Liza parsia</i>	Goldspot Mullet	Karunthalai Kendai	+	
29	<i>Mugil cephalus</i>	Common or Flathead Mullet	Madavai	+	
30	<i>Valamugil cunesius</i>	Longarm Mullet	Senkani Kendai	+	
Order: Beloniformes					
Family: Belontidae					
31	<i>Xenotodon canicula</i>	Freshwater Garfish	Retta-mooku Kola	+	
32	<i>Strongylura strongylura</i>	Spot-tailed gar	Retta-mooku Kola		+
Family: Hemiramphidae					
33	<i>Hemiramphus limbatus</i>	Halfbeak Gar	Otha-mooku Kola	+	+
Family: Adrianichthydidae					
34	<i>Oryzias melastigma</i>	Estuarine Ricefish	Kosuru Meen		+
Order: Cyprinodontiformes					
Family: Aplocheilidae					
35	<i>Aplocheilus parvus</i>	Dwarf Panchax	Kosuru Meen		+
Order: Synbranchiformes					
Family: Mastacembelidae					
36	<i>Macrognathus pанcalus</i>	Barred Spiny Eel	Araa	+	
37	<i>Macrognathus aral</i>	Onestripe Spiny Eel	Araa	+
