Introduction

This was our first birding trip together, although we did keep notes during the trip we never wrote a trip report. This (very) short report was written in 2015, mainly to document our birdlist.

We birded by public transport (which was very easy on this route), the only exception was the trip from Palenque to Tikal via Bonampak + Yaxchilan, where we joined a 'backpacker-style' tour. We tried to see most endemics, but we did not go all out (e.g. did not try for Yucatan Poorwill or Yucatan Nightjar). Due to the time between the trip and writing this report I cannot give many details. If you have any questions, please send us an email.

ANNOTATED SPECIES LIST

We have tried to accurately indicate the proper subspecies for all our observations, usually based on geographic locations based on the IOC World Bird List version 5.1. Not a complete checklist of all sighting, species mostly only written down on first day of sighting. Very common species during the trip: Black-and-White Warbler, Wilsons Warbler, Cattle Egret, Great White Egret, Magnolia Warbler.
