

Plants prohibited from sale in South Australia

Plants considered as serious weeds are banned from being sold in South Australia. Do not buy or sell any plant listed as prohibited from sale.

Plants listed in this document are declared serious weeds and are prohibited from sale anywhere in South Australia pursuant to Section 188 of the *Landscape South Australia Act 2019* (refer *South Australian Government Gazette* 60: 4024-4038, 23 July 2020). This includes the sale of nursery stock, seeds or other propagating material. However, it is not prohibited to sell or transport non-living products made from these plants, such as timber from Aleppo pine, or herbal medicines containing horehound. Such products are excluded from the definition of **plant**, under the *Landscape South Australia (General) Regulations 2020*.

Section 3 of the Act defines **sell** as including:

- barter, offer or attempt to sell
- receive for sale
- have in possession for sale
- cause or permit to be sold or offered for sale
- send, forward or deliver for sale
- dispose of by any method for valuable consideration
- dispose of to an agent for sale on consignment
- sell for the purposes of resale

How to use this list

Plants are often known by many names. This list can help you to find the scientific name and other common names of a declared plant. This list is not intended to be a complete synonymy for each species, such as would be found in a taxonomic revision.

The plants are listed alphabetically by the common name as used in the declaration. Each plant is listed in the following format:

Common name

alternative common name(s)

Scientific name Author

Synonym(s) Author

What to do if you suspect a plant for sale is banned

If you are unsure whether a plant offered for sale under a particular name is banned, please contact your regional landscape board or PIRSA Biosecurity SA.
