- > flat pole sleeve technology

ABOUT US

Explore the wild world. Discover its mysteries, climb its peaks, roam its forests and set out on its waters. Adventure awaits! EXPED develops high-performance outdoor gear that enables the maximum outdoor experience with minimal means. Without gimmicks – nor an ounce too many.

EXPED's history is closely linked to the life story of Heidi and Andi Brun, who set off to fulfill their common dream of experiencing solitude in the wilderness. The experience they gained turned them into extraordinary innovators.

After selecting a location, they embarked on their voyage to Canada with the bare necessities and had to build a log cabin by themselves with the bare necessities and built a log cabin by themselves with only a hatchet and saw blade as tools - and this at the end of August in northern Canada, not far from the Arctic Circle. Hunting, fishing and plant foraging enabled them to feed themselves directly from nature. Improvising with minimal means every day set in motion their lifelong fascination with practical outdoor equipment. At the end of 9 months, they tore down their cabin and left no trace in the natural surroundings they had encountered.

“Andi Brun says that few things are of real importance, good ties with the people one knows, humility and finding oneself in the absolute solitude of nature while being fully relaxed.” The maximum outdoor experience with minimal means. The goal is to live with nature, not exploit it.

In 1983 Heidi and Andi founded EXPED AG and gradually took over the distribution of renowned outdoor brands. In 1997 motivated by outdoor colleagues and full of product ideas, EXPED launched its own products for the first time and transitioned

Today EXPED products are distributed in 25 countries exclusively through specialized outdoor retail stores. The team with its 25 employees is a small, lean, innovative group that strives for a good work-life-balance between profession and outdoor leisure time. EXPED does not want to big. EXPED wants to remain agile, small, innovative and personal.

In the meantime, Heidi and Andi have retired to the board of directors and are spending time on the road again, exploring the world. The management now consists of three long-time employees with comprehensive outdoor experience; in addition, a new generation of young and highly motivated team members have joined EXPED.

EXPED Innovations

Since the introduction of our first products in 1997 we have launched a multitude of innovations and received numerous awards for them. Without the partnership in product development with you, our clients, with consumers and our factory partners, this would never have been achieved. We are a global team that believes in partnership, because only in this spirit can the best quality be achieved. Social and environmental responsibility are a matter of course to us.

SUSTAINABILITY

Sustainability has been a core principle at EXPED from the beginning. Durability, reliability and repairability of our products are key focus areas in their development. Long-standing and close cooperation with our partner factories is essential in reaching our goals, as is the careful selection to materials, components and resources used.

ECOLOGICAL FOOTPRINT AND CLIMATE NEUTRALITY

Carbon neutral with myclimate

Our sleeping mats, pillows, sleeping bags, liners, booties as well as our operations are carbon offset with myclimate. In 2021 our mats were the first and only climate neutral ones on the market. Tents, backpacks, gear bags, packsacks and the accessories will follow. Our goal is to be completely climate neutral by 2024.

Together with myclimate, we analyze and quantify the footprint of our product range and our company. This helps us find opportunities for reduction and implement improvement measures.

For a climate-neutral product, all climate-impacting emissions along the life cycle are taken into account. This means from the production of the raw materials to the use of the product and the subsequent disposal or recycling. The amount of CO₂ equivalents (global warming potential) calculated in this way is reduced in high-quality myclimate carbon offset projects. The computation of our footprint with myclimate also enables us to further reduce our emissions.

Myclimate is an internationally operating non-profit foundation with Swiss roots and is one of the quality

leaders of voluntary CO₂ offsetting measures. With projects of the highest quality, myclimate promotes climate protection and sustainable development.

No single use plastic

All EXPED packaging is reduced to a minimum and is made of FSC certified recyclable paper and cardboard. This reduces the amount of resources used, contributes to cleaner air as packaging does not require incineration and does not add to the huge amount of plastics that contaminate our oceans. Certain accessories in our range are packaged in reusable zippered pouches. Only a few products, that need additional protection, come in individual polybags.

ETHICS AND TRANSPARENCY

Cooperative Partnership

The people behind our products are valuable to us. We have been working in partnership with our suppliers for decades. We see this continuity as the basis for sustainable development in our supply chain. We always develop our production planning in collaboration with our suppliers. This enables the factory to operate with little overtime and ensures that no labor is outsourced to production facilities unknown to us. We visit all factories regularly and maintain an extensive exchange. By respecting our manufacturers and their cost structures, we believe that as a small brand with limited resources we can still play an important role.

Guaranteed animal welfare

The down used in our products is certified in accordance with the Responsible Down Standard (RDS) and is fully traceable. RDS adheres to the strictest animal welfare guidelines and guarantees species-appropriate animal husbandry without live plucking or forced feeding. Down,

100%

...climate neutral by 2024. This is a bold statement, but we're more than half way there: 70% of our products are already climate neutral.

85%

...of our range is PFC free- we will reach 100% by 2024.

97%

...of our products use Oekotex 100 or bluesign certified fabrics, buckles and zippers.

100%

...of our range is FR-free*

*except for products sold in Canada, where FR (fire retardant) treatment is required by law.

as a natural product, is almost indestructible. The down from non-repairable products is recycled and flows back into our new products.

Fairtrade organic cotton

With the new Sleepwell liners, EXPED is breaking new ground in the outdoor gear market. The series of newly

designed hut and travel liners is made of Fairtrade certified and recycled materials. The same is now true for the Mat Sheets. The cotton originates from India, is 100% cultivated by Fairtrade producers, and is certified and traded according to Fairtrade standards. Fairtrade promotes better working and living conditions for cotton producers as well as environmental protection.

Labels and Certifications

SERVICE AND CIRCULARITY

Despite all the new recycling methods available, it is still best to keep a product functional for as long as possible. This is why we not only source the most durable materials, but also do maintenance and repair of products, allowing us to extend the life of EXPED gear.

Warranty

All EXPED products carry a five-year warranty on defects, materials and workmanship. At its discretion, EXPED will repair or replace any part that fails due to a manufacturing defect. Failures due to normal wear, negligence, accidents and acts of nature can be repaired for a nominal charge.

Repair instead of discarding

All EXPED products are designed for maximum longevity. We repair products in our specialized workshops - even if it is not always economically viable.

We process warranty cases and repairs with professional team in our own workshops. The feedback and data gathered is a valuable source of information for future improvements and innovations - and for long-lasting products.

With the mat testing equipment in our repair workshops, our repair team can find even the smallest puncture. We are pleased to be able to offer our customers exceptional and reliable service.

2nd hand and donations

Test samples and items repaired due to malfunction or production errors are sold as 2nd hand products or donated.

«To keep them in use as long as possible, we design our products according to their intended use and repair them whenever possible instead of replacing them.»

Muriel Weber, Sustainability Manager

MATS

Since the introduction of the industry-changing DownMat in 2001, EXPED sleeping mats have been the most innovative on the market. EXPED's sleeping mats are known for their great features, high quality construction and comfort.

Sustainability

As part of EXPED's longstanding commitment to responsible manufacturing and sustainability, our entire sleeping mat line is certified climate neutral – an unprecedented achievement in the industry. Our new ULTRA, DURA and VERSA series sleeping mats utilize recycled materials. Using recycled polyester keeps plastic out of landfills and uses less water, energy and carbon to produce. Moreover, EXPED's fabrics are bluesign® or OEKO-TEX® accredited, meeting the highest levels of environmental protection.

5 Years warranty

Defects in materials and workmanship will be repaired or replaced at Exped's discretion.

100% Quality control

We go the extra mile to make sure every mat that leaves the factory is airtight.

Stress tests

Each mat model endures our 15,000 cycle 80 kg roller test, and 200 cycle 60 kg dropper test, to ensure our mats are up to your next expedition.

R-value

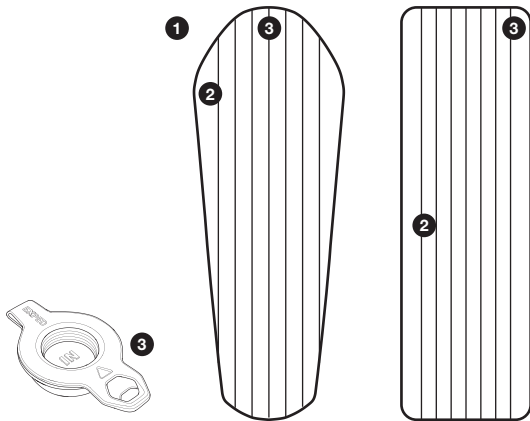

We think the most important factor in a comfortable and warm night's sleep for backpacking mats is R-value: the amount of insulation a mat provides from the ground. Just as our sleeping bags are differentiated by their temperature rating according to the ISO 23537 standard, our sleeping mats are now differentiated by their own standard, ASTM F3340, which was launched in 2020.

Summer 3-Season All-Season Extreme Cold

EXPED DESIGN PRINCIPALS

Highest quality materials paired with excellent workmanship and innovative designs create comfortable sleep-systems for any environment and intended use.

1 Airmat, Synmat and Downmat Technology

The right insulation for any application, whether summer, 3 season or winter.

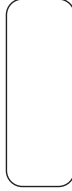

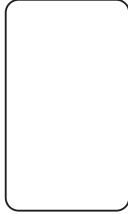

2 Comfort Cradle

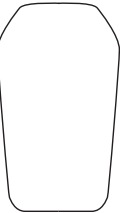

Air chambers run head-to-toe, fully supporting the body for an unrivaled night's sleep and increased durability. EXPED's Comfort Cradle side rails center and secure the sleeper on the mat.

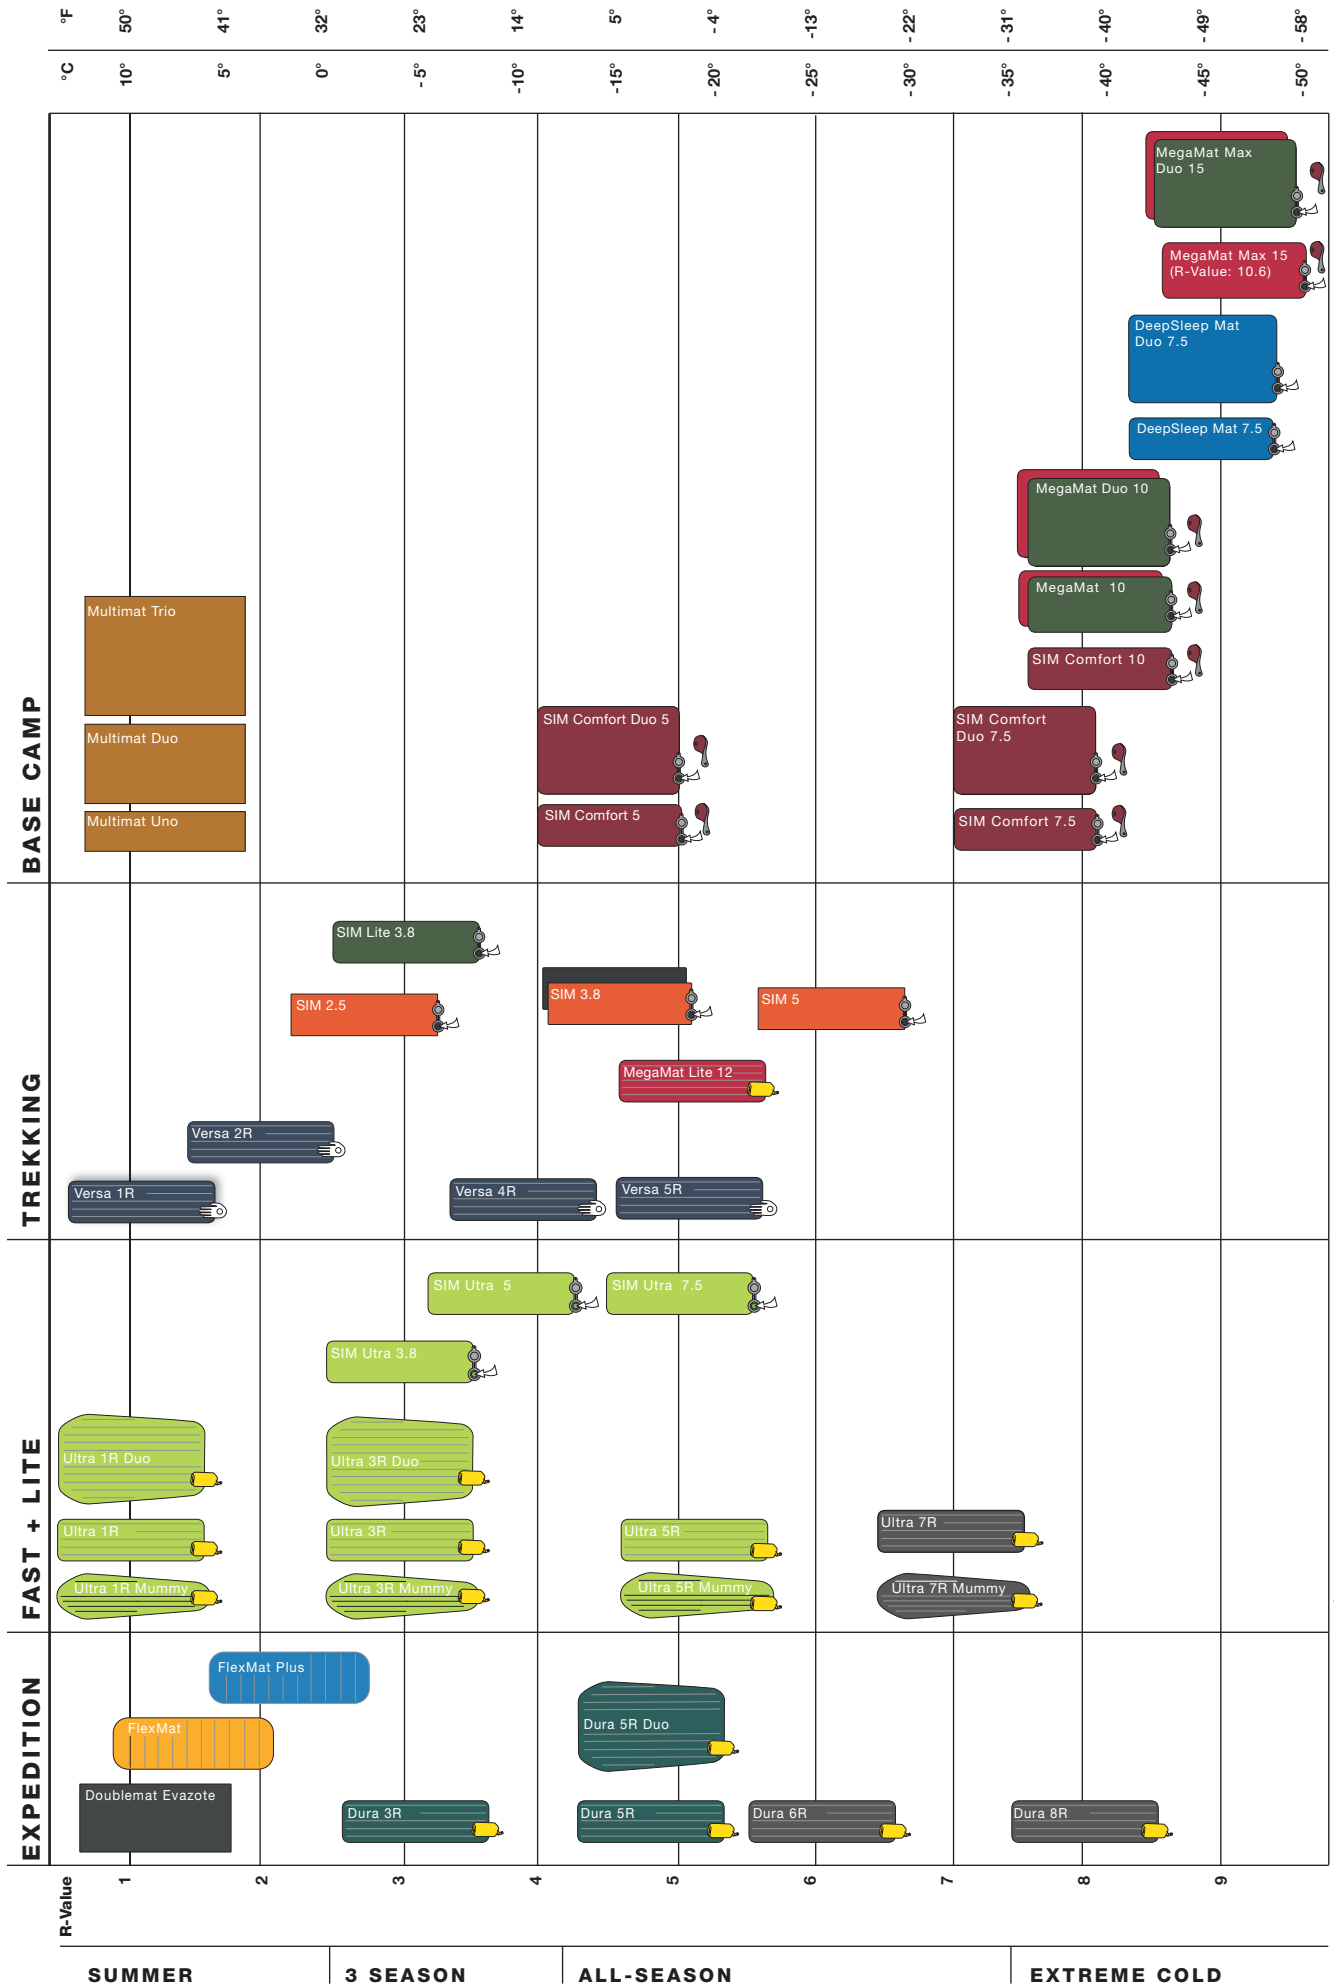

3 Flat Valve

Pioneered by EXPED. Industry-leading durability, reliability and intuitive performance.

MEGAMAT LITE 12

MEGAMAT MAX 15

MEGAMAT 10 | DUO 10

The world's most comfortable basecamp mat

- > proven sell-through and field performance
- > stretch tricot surface for maximum comfort
- > air-core-channeled foam insulation reduces weight, bulk
- > separate inflation/deflation FlatValves, extra-large deflation valve
- > MiniPump for top-off inflation
- > sold with easy-to-pack SideWinder™ stuff sack
- > durable construction
- > 2 sizes fit trucks, SUVs, minivans, etc.

MEGAMAT LITE 12

MegaMat comfort in a portable, lightweight package

- > ultra-thick 12 cm for maximum comfort, evens out rocky ground
- > innovative 3-D construction for edge-to-edge sleeping surface
- > cozy brushed tricot top, extra large deflation valve
- > incl. Schnozzel Pumpbag doubles as waterproof stuffsack
- > light enough for backpacking trips
- > fits in many cars and camper vans

MEGAMAT MAX 15

EXPED's famous MegaMat built 50% thicker

- > luxurious 15 cm-thick open-cell foam support
- > stretch tricot surface for maximum comfort
- > air-core-channeled foam reduces weight and bulk
- > extra-large deflation valve for maximum air flow
- > sold with easy-to-pack SideWinder™ stuff sack

BACKPACKS

What makes Exped packs unique? Clean and functional design paired with reduction to the basics and removal of the unnecessary. This ultimately leads to a reduction in weight and resources. Less is more.

ALPINE

- > for alpine terrain
- > next-to-body fit
- > weatherproof and 100% waterproof models available

Refined alpine packs developed in cooperation with professional mountain guides. Packs that distinguish themselves through superb load control, smart features, excellent functionality and light weight. Weatherproof packs feature factory-taped seams.

HIKING

- > for day and multi-day use
- > slim and well ventilated
- > organization made easy

Trim hiking packs that offer excellent back ventilation and arm movement even when side pockets are filled with water bottles. The angled base places the pack's weight, even when only partially filled, against the back for load control. Outstanding comfort on any trail.

URBAN

- > for the urban jungle
- > Refined and cleanly designed
- > for office, campus and daily tasks

These packs combine Exped functionality with a classy, urban appearance. They are perfect for the commute between home, office and leisure activities.

TREKKING

- > for multi-day adventures
- > refined and extremely lightweight
- > excellent load control

Streamlined packs for multi-day backpacking adventures. Fully focused on the necessary, these packs combine light weight with superb load-bearing properties and solid load control.

EVERYDAY

- > for outings and shopping
- > extremely versatile
- > lightweight and practical

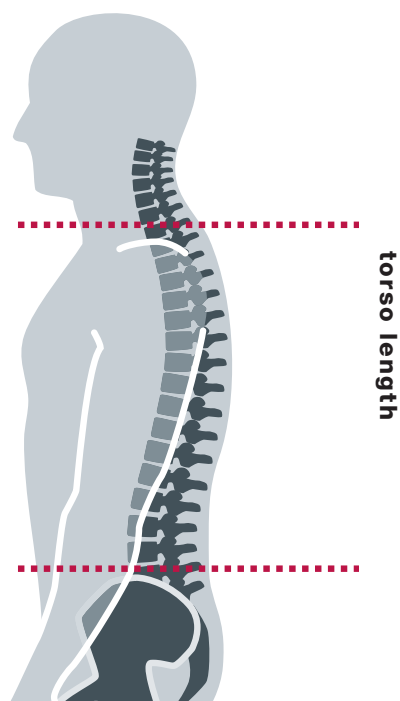

Packs designed for day trips into the great outdoors or for everyday needs, for travels, for the weekend or any day out.

EXPED'S SUSPENSION SYSTEM

Depending on pack volume and intended use, the suspension system of a backpack can be the most important component. Defining torso length is not necessarily critical for a lightly loaded daypack, but crucial on backpacking or mountaineering packs where only precise fit will efficiently transfer weight to the hips. For large loads and/or internal frame packs, the center of

the hip belt "wings" ideally rests on the hip bone crest (pelvis) and the lumbar pad on the bones of the sacrum. But sometimes a shorter pack length is better, such as in mountaineering situations where a higher-riding pack allows easy access to the climbing harness and/or when unrestricted head movement is needed.

How is torso length defined?

Use a measuring tape to determine the distance between the top edge of the shoulders or the C7 vertebra (the one that protrudes where the neck meets the spine) and the top of the iliac crest (pelvic crest).

A rough guide to pack sizing and torso lengths:

extra short (XS) = 36 – 41 cm / 14 – 16 inches

short (S) = 42 – 47 cm / 16.5 – 18.5 inches

medium (M) = 48 – 52 cm / 19 – 20.5 inches

long (L) = 53 – 58 cm / 21 – 23 inches

Note: The Lightning and Thunder series packs feature torso-length-adjustable suspension systems that cover sizes S – L for men's packs and XS – M for women's versions.

EXPED DESIGN PRINCIPALS

The concepts and design behind Exped packs originate from personal experience in the Swiss Alps and other great mountain regions of the world. Signature reduced-to-the-max Swiss design distinguishes Exped packs along with their precise functionality and clever details derived from real-world use.

1 Rapide Alu Hooks

Lid closure with breakproof aluminum Rapide Hooks.

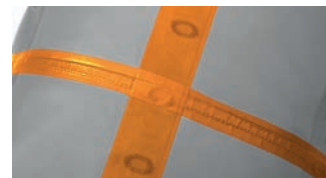

2 Velcro Tidies

Loose and flapping webbing ends are a thing of the past. These can be easily rolled up and secured with tidies.

3 Weatherproof Construction

Almost all Exped pack categories feature models that are waterproof or weatherproof.

4 Free-standing

Most of our packs stand upright on their own with no need for a tree or rock to lean on.

5 Top Access

A large opening to the main compartment allows for efficient loading and unpacking.

6 Signature Pack Shape

The tapered pack body profile leads to an improved close to body fit.

7 Inner Coatings

Light grey or white inner coatings increase contrast and visibility within the pack.

Ski touring pack with back access and countless smart features

- > durable and sustainable: all materials are recycled and PFC free
- > dark lava: good visibility in alpine surroundings
- > bright color inside the main compartment for good visibility and contrast
- > can be placed in the snow and opened without the back upholstery getting wet
- > quick access to avalanche safety equipment
- > 2 removable ice axe attachment possibilities can be positioned individually
- > compatible with EXPED Mesh Helmet Holder (not included)

Intended use

Ski-, snowboard- and snowshoe adventures

- 1 clean front for easy fixation of equipment
- 2 touch points are highlighted with color
- 3 front and base reinforced with EVA foam
- 4 the lid closure is on the carrying side for easy handling
- 5 top loader with 270° zippered back access
- 6 beefy hipbelt with 2 stretch mesh pockets

Main fabric Recycled 420 D ripstop nylon carbonate PU, 1'500 mm water column, Oeko-Tex® 100 certified, PFC-free
 recycled 600 D polyester PU, 1'500mm water column, bluesign® certified, PFC-free

Lining fabric Recycled 150 D polyester, PU coated, 3'000 mm water column, PFC-free

Frame Spring steel U-frame

STORAGE

Stuff sacks and dry bags are often the last defense against moisture and dirt. This is why no matter how simple an Exped storage sack may seem, every detail is designed with care and manufactured with quality and durability in mind.

■ DRYBAGS

- > protection against moisture, dirt and dust
- > Roll-top closure enables volume adjustability
- > range of fabrics - ultralight to ultra-durable

Exped drybags are manufactured with the best fabrics and seam tapes, for highest performance in their intended use. All seam tapes used are manufactured by the market leaders in the field and are customized to the fabrics and coatings/laminations used in the product.

■ COMPRESSION DRYBAGS

- > protection against moisture and dust
- > Roll-top allows variable compression
- > vertical and horizontal compression solutions

FlatValves (made of flexible PU material) allow maximum air purging and easy compression of bags and clothing. They are easy to use, lightweight and durable. Exped waterproof compression bags are shaped a bit wider, making it easier to reach items at the bottom of the bag without the need to empty all contents.

■ TRAVEL ORGANISERS

- > Hyper-organization of packs and duffles
- > Padded options for gear protection
- > Transparent options for overview of contents

A light-grey PU coating, bright interior fabrics or transparent side panels are used to increase visibility of contents within the bags and pouches. We use only high-quality cord stoppers and zippers from the market leaders in the field.

TENTS AND TARPS

Tents and tarps for any adventure: unique and innovative designs and attention to the finest details set Exped tents apart. From solo trips in the tropics to month-long big-mountain expeditions, these truly deliver comfort anywhere.

EXPEDITION

- > safe in any weather and in all seasons
- > durable and long lasting
- > pole supported vestibules

Protection and safety is the main focus of these tents. Pole crossings, flat pole sleeves and extra-strong pole structure ensure stability in extreme weather conditions. Developed and tested in stormy Patagonia, the cold Himalayas and on long winter expeditions.

TREKKING

- > the right tent for every season
- > multiple setup options depending on preference
- > generous canopy dimensions

The trekking range offers models for hot and bug infested areas to humid and cold regions. Besides multiple set-up options, these tents feature refined details, protection from the elements, durable materials and generous storage space for gear. Backpackers and hikers appreciate the low weights and large floor space.

FAST + LITE

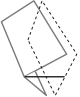

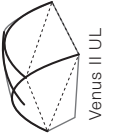

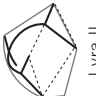

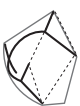

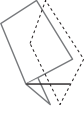

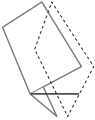

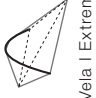

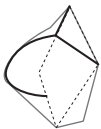

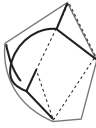

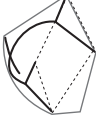

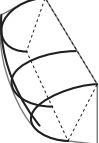

- > low weight and small packed size
- > quick and simple set-up
- > roomy despite low bulk

The trekking range offers models for hot and bug infested areas to humid and cold regions. Besides multiple set-up options, these tents feature refined details, protection from the elements, durable materials and generous storage space for gear. Backpackers and hikers appreciate the low weights and large floor space.

TARPS

- > reduced to the minimum
- > versatile
- > close to nature

Lightweight alternatives to tents for however you hit the trail. Whether in a group, as a thru-hiker, car camper or paddler, tarps are versatile and deliver closeness to nature.

EXPED DESIGN PRINCIPALS

Two decades of innovation and advancement in tent design in which refined details and the highest comfort merge with weight and bulk reduction.

1 Windward side

The windward side of the rainfly reaches the ground for full weather protection (dark green stake loops).

2 Ventilation

The leeward side of the rainfly features a ventilation gap for enhanced climate control (orange stake loops).

3 Dry canopy

The rainfly reaches out over the canopy to prevent rain from dripping into the tent.

4 Protected vestibule

EXPED designs respect the ever-present threat of harsh weather and always offer a rain and wind shelter vestibule for occupants and gear.

5 Slide Locks

Slide Locks allow quick and continuously adjustable tensioning of the tent.

6 Cord Stuffsack

Yellow Cord Stuffsacks enhance guyline visibility and prevent cords from tangling when stored.

7 Flat Pole Sleeves

Flat Pole Sleeve design minimizes wind resistance and increases stability.

8 Comprehensive accessories

All tents include additional cords, pegs and other maintenance parts.

POLARIS

Stormproof expedition tent

A super-sturdy single wall freestanding expedition tent. The Polaris has endured countless expeditions making it the tent of choice for tough endeavors. The generous vestibule for gear storage and snow melting is exceptional for a single wall tent. Polaris is wide enough to hold 3 sleepers if necessary and the headroom generous enough for 3 to sit out a storm.

UPDATE

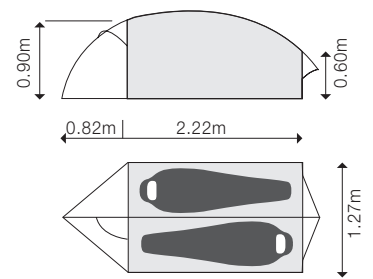

- > new 3-layer fabric based on a membrane of electro spun PU nano fibers
- > tonal color scheme
- > 5 pre-mounted guylines
- > durable black colored mosquito mesh allows good visibility from within

Intended use

ideal for alpine use, expeditions

- 1 single-wall tent of vapor-permeable 3-layer fabric
- 2 free-standing exostructure design
- 3 generous vestibule and storage space at foot end
- 4 canopy fits to 2 M or LW mats
- 5 protected lookout on both sides
- 6 4-way guylines optimize wind force distribution

ORION

Freestanding tunnel tent

The full length ridge pole design reaches the ground enhancing wind stability and creating a freestanding structure. The high canopy offers comfortable living space. Two large vestibules hold loads of gear and two wide doors make entry and exit simple. Exostructure poles (pole in rainfly) allow quick setup. The Extreme version is characterized by its sturdiness and durability. The UL version has the same design but is trimmed for weight.

- 1 sturdy freestanding construction
- 2 pre-attached Dyneema core guylines
- 3 2 generous vestibules
- 4 ridge pole reaches ground

VENUS

The Exped classic for all seasons

An excellent tent for travellers in all climate zones, Venus tents have seen it all. The combination of tunnel and dome tent designs results in a freestanding tent with generous space to weight ratio. Each occupant has a personal door and vestibule for comfortable access and storage. This is the ultimate backpacking and travel tent. The Venus is available in 2 options. The Extreme version is characterized by its sturdiness and durability. The UL version has the same design but is trimmed for weight.

- 1 virtually freestanding construction
- 2 pre-attached Dyneema core guylines
- 3 2 generous vestibules
- 4 internal pole sleeves

MIRA HL

Super-light shelter

The Mira HL series offer a balanced mix of space, comfort and low weight making them perfect for warm climates. They have a free-standing design and a ridge pole increasing head room for comfortable sitting. Because they are built with ultra-lightweight fabrics, we recommend the use of a footprint for floor protection.

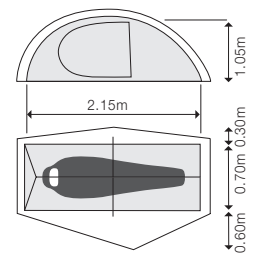

- > virtually freestanding construction
- > doubles as freestanding mosquito mesh tent
- > multiple setup options

Intended Use

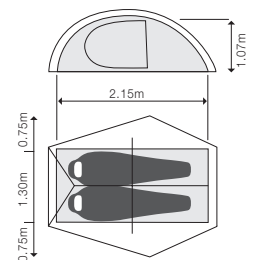

summer trips, fast and lite backpacking, thru-hiking, micro adventures, bikepacking

- 1 poles with hubs and clips: quick and easy to set up
- 2 fine mosquito mesh
- 3 wind and privacy shield
- 4 2 vestibules: Mira HL II, III

OUTER SPACE

Spacious 3-season tent with large vestibule

Outer Space tents are shape-shifting, multi-mode, take-anywhere tents with enough vestibule space for a party. Multiple set-up and deployment modes allow Outer Space to adapt to changing conditions and personal preferences for optimal comfort. The fly can easily be set up on its own, without the inner tent, or combined with a footprint for lightweight trips. Party Mode is made possible by the exostructure pole configuration, allowing the inner tent to be temporarily disconnected and pushed aside. Multiple chairs fit comfortably under the steep-walled fly-only shelter.

- > virtually freestanding
- > easy setup with attached canopy and fly
- > sideways and double as airy sun canopy

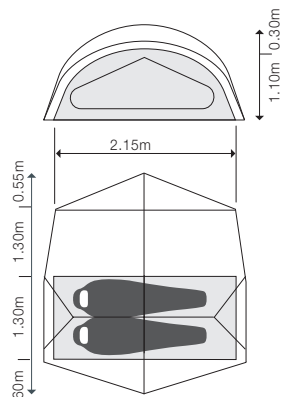

Intended Use

camping, canoeing, summer basecamp, family trips

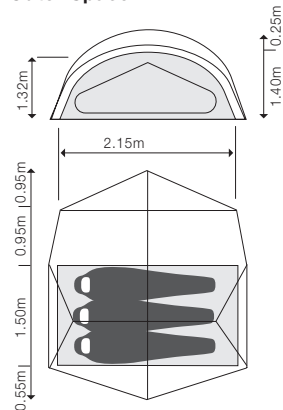

- 1 spacious vestibule for cozy get-togethers
- 2 small rear vestibule
- 3 wind and privacy shield
- 4 fine mosquito mesh
- 5 the complete tent attaches to the pole structure with clips

- > for extreme weather conditions
- > water resistant shells
- > unique production techniques

While everyone has their own definition of what amounts to an expedition, challenging conditions are always involved. These sleeping bags distinguish themselves with durable materials and important features that shield against humidity and low temperatures, offering the best possible protection against the extremes.

TREKKING

- > sophisticated 3-season bags
- > fully featured and comfortable
- > excellent functionality

A warm sleeping bag plays a huge part in a successful adventure. The Trekking Series bags cover a wide scope of uses and offer the demanding trekker a finely tuned sleeping bag for each season. The emphasis lies in refined details, comfort and functionality.

FAST + LITE

- > minimalist designs
- > maximum warmth-to-weight ratio
- > lightest and finest materials

The maximum outdoor experience with minimal means. These featherlight sleeping bags crafted from the highest quality, extremely lightweight fabrics combined with excellent functionality are the choice for those traveling fast and light. Built with minimal features and a trim fit they still offer the necessary comfort.

BASE CAMP

- > value focused designs
- > built for versatility
- > comfortable fit

The Base camp series pairs comfort with affordable pricing. These sleeping bags and quilts include signature Exped features and versatility, going from car camping to backpacking with ease. These are workhorse bags that will provide years of warm and comfortable nights.

EXPED DESIGN PRINCIPALS

Highest quality materials paired with excellent workmanship and innovative designs create comfortable sleep-systems for any environment and intended use. The details express perfection in materials and construction.

- 1 Comfort hood**
- 2 Infoprint und QR Code**
A QR code on each bag supplies information regarding down quality and contents
- 3 Anti-snap webbing**
- 4 3D Footbox**
Differential cut and 11 baffles prevent down shift and allow optimal down lofting
- 5 Differential cut**
Outer shell cut wider than inner liner for optimal down lofting
- 6 Tuck-stitch technology**
Multiple fabric layers stitched together and tucked away create stronger seams
- 7 Down**
Only RDS certified down from our German supplier is used in Exped sleeping bags

SLEEPING BAGS

Waterbloc PRO

Dreamwalker PRO

WATERBLOC PRO

The world's lightest water-repellent down sleeping bag

- > Welded instead of sewn: new STEALTH technology
- > differential cut and shoulder width adapted/bag size
- > beefy draft collar
- > newly developed anti-snag zipper webbing
- > 3D footbox with 11 individually down-filled baffles
- > fit provides good insulation performance

Intended Use

Ideal for humid and cold conditions under a tarp or in an igloo; ideal for bushcrafters, survivalists, expeditionists and micro adventurers

DREAMWALKER PRO

Water-repellent multi-featured and ultra versatile

- > converts into blanket, coat, sleeping bag and hammock quilt
- > water-repellent Pertex Quantum Pro fabric
- > tuck-stitch seam technology for enhanced durability and moisture protection
- > side arm exits
- > water-repellent zippers
- > draft collar with velcro closure
- > differential cut and shoulder width adapted/bag size
- > adjustable hood and numerous inner and outer pockets

Intended Use

Perfect for hunting and fishing or those who just want to hang out cozy and warm around camp.

Quilt PRO

Cover PRO

QUILT PRO

Water-repellent, multi-purpose and warm

- > full-fledged hoodless sleeping bag with contoured fit
- > used as liner, makes 3-season sleeping bags winter-capable
- > ideal as hammock underquilt
- > full length zipper allows use as blanket or cape
- > beefy end baffles with drawcord retain body heat

Intended Use

Extra-comfortable and affordable versatility in a car camp, on an overland expedition as well as human-powered adventures

COVER PRO

Lightweight protective sleeping bag cover for nights under a tarp in wet weather

- > extra-long sleeping bag cover - with storage space at the foot end
- > wide hood opening seals with drawcord
- > water-repellent zipper
- > temperature enhancement of up to 7°C

Intended Use

It also works very well for nights under a tarp in wet conditions and in snow caves.

LINERS

EXPED is breaking new ground in the outdoor gear industry with its Sleepwell liners. The series of five completely re-imagined cabin and travel sleepliner bags are made from Fairtrade and recycled materials where possible and are completely recyclable. Five models made of different materials and in different shapes are available.

With the new, environmentally friendly Sleepwell series, EXPED once again proves its innovative strength and its will to enrich the outdoor market with genuine milestone products.

Fairtrade – a milestone in hut sleeping bags. Fairtrade is one of the “hot topics” - and will remain so. Fairtrade grants product producers stable minimum prices, a right of co-determination in shaping their trade relations, and buyers the good feeling that they have actually supported the producers with their purchase.

When it comes to Fairtrade hut sleeping bags and inlets, EXPED is a market pioneer with its Sleepwell series. The innovative inlets are offered in five different material blends: Pure silk, a fine silk-cotton blend, Egyptian cotton, organic cotton, and recycled Thermolite EcoMade®- a toasty warm, GRS-certified polyester fiber.

Thus, buyers can purchase the model optimally suited to their own needs in each case. Pure silk scores with maximum sleeping comfort and a tiny pack size, silk-cotton blend or Egyptian silk with increased durability, organic cotton with increased breathability and Thermolite EcoMade® with particularly good drying properties and the highest thermal performance.

SLEEPWELL ORGANIC COTTON

TRAVEL

- > Fairtrade certified organic cotton
- > high perspiration absorption and breathability
- > lightweight and durable fabric
- > rectangular shape: stretchy fit due to diagonal fabric alignment

HAMMOCKS

Nothing beats the feeling of relaxing, swinging, dreaming, observing, and sleeping in nature. Exped hammocks make this experience possible for everyone. Blending into the surroundings, viewing wildlife, camping on boggy ground or steep slopes are all made possible with a hammock.

FAST + LITE

- > alternative to a tent
- > low weight and quick setup
- > overnight outside no matter what the ground looks like

With hammocks in this category you have the choice between complete sleep-systems in various weights or single components that allow you to put together a system of choice.

TRAVEL

- > compact when stowed
- > easy setup
- > stuff sack doubles as pocket

We offer these hammocks in two versions. The Kit version with included Suspension Kit and the regular version without. Various suspension kits and carabiners are available as accessories. The Slit Line (pat. pend) is available with the Suspension Kit or on its own, an extremely versatile accessory. The wide versions feature a wider cut offering more space for diagonal sleeping.

SCOUT HAMMOCK COMBI EXTREME

FAST + LITE

Full camp setup – hammock, tarp, bug net, suspension kit

- > Tarp of durable lightweight fabrics
- > mat sleeve in double floor
- > interior pockets and loops
- > 3 pole sleeves on the net to expand inner space
- > lightweight suspension system
- > hammock and tarp PFC-free, mesh treated with DWR C6
- > durable black colored mosquito net (mosquito-free)
- > Dyneema Ridge Line

Intended Use

fast and light backpacking, bushcraft, micro adventures

Material

Hammock 70 D ripstop nylon

Mosquito net 20 D No-See-Um mesh

Tarp 40 D ripstop nylon, silicone coated on both sides, Oeko-Tex® 100 certified, PFC-free, flame-retardant free

BIVYBAGS

What a hardshell rain jacket is for daytime, the bivy bag is at night: the protective layer for sleeping out in wet and cold conditions. A tent can stay at home, which significantly minimizes the weight of the equipment you need to take with you. In short, the ideal shelter for the lightweight trekker, expeditionist or alpinist.

A distinction is made between Bivy Bags with and without vapor permeable fabric. The Bivybag 100% VentAir and Bivybag VentAir/PU are both made of an extremely vapor permeable and waterproof 3-layer laminate called VentAir. The membrane of this laminate is composed of PU fibers (polyurethane) in the nano range.

The big advantage over PTFE membranes (polytetrafluoroethylene) is the environmentally friendly production, processing and disposal of the PU material.

Which one should be chosen for which specific use? For backpacking trips and general use we recommend the Bivybag VentAir/PU, its floor fabric is made of waterproof

PU nylon. It is ideal for those who wish to place a sleeping mat inside the bivy bag, which negates the need for breathable fabric on the bottom.

For expeditions to particularly cold and wet areas, Bivy Bag 100% VentAir is the better choice. By placing the sleeping mat on the outside of the bag, active sleepers who turn frequently in the night can rest assured that breathable VentAir fabric is always facing upward, reducing internal condensation to a minimum.

BIVYBAG 100% VENTAIR

Bivy bag made entirely of highly vapor-permeable fabric

- > 3-layer VentAir E5 laminate fabric top and bottom: extremely breathable, waterproof and lightweight
- > roomy design
- > wide zippered entry with mosquito mesh panel
- > flexible aluminum wire stiffener allows hood adjustment
- > roomy 3-D footbox
- > The sleeping mat can be placed both in or under the bivy bag

Material VentAir E5 3-layer-laminate, fully seam taped, 10 000 mm water column, MVTR: > 40 000 g/m²/24h

Prod. No	Name	Color	Dimension L x W shoulder x W feet	Weight	Weight Packsack	Packed	Temperature upgrade
7640147769328	Bivybag 100% VentAir	olive grey	240 x 95 x 80 cm	540 g	19 g	20 x 11 cm	7 °C

BIVYBAG VENTAIR / PU

Bivy bag built with highly vapor-permeable upper and coated nylon floor

- > 3-layer VentAir E5 laminate fabric on top side: extremely breathable, waterproof and lightweight
- > roomy design
- > wide zippered entry with mosquito mesh panel
- > flexible aluminum wire stiffener allows hood adjustment
- > roomy 3-D footbox
- > We recommend placing the sleeping mat inside the bivy bag, so that breathable layer is always on top.

Material VentAir E5 3-layer-laminate, fully seam taped, 10 000 mm water column, MVTR: > 40 000 g/m²/24h

WEB | SOCIAL MEDIA

EXPED WEBSITE

The EXPED website in the languages German, English and French contains all relevant technical information, photos and videos of our entire product range. The new, crisp and clear design allows the user to easily navigate the page and click directly through our product categories directly from the landing page. All product images of the current range are available in high resolution files on our photo database at photo.exped.com for your advertising purposes.

EXPED AND OUTTRA

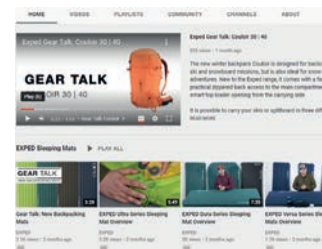

EXPED distributes its products exclusively through specialized outdoor retailers. We cooperate with OUTTRA and their shop locator so interested consumers can find your store. For this purpose we have integrated a „Buy local“ button. With just one click, consumers can check the availability of a product in a specialty store in their vicinity. You as an Exped retailer have the opportunity to present your available stock and product competence online.

EXPED VIDEOS

Off the cuff, straightforward, helpful, and at times even funny: with our video content we want to share additional information about our products as well as give you useful tips and tricks. Many of them can be found directly on the product page of our website. All videos are also available on our YouTube channel. You are welcome to link them on your own channels (www.youtube.com/user/ExpedLLC).

SOCIAL MEDIA

EXPED is also present in the social media universe. On Facebook and Instagram, we keep you informed about new products, provide useful tips and tricks or show inspiring images and videos on how our products travel the world. On Twitter you can stay up to date on our most current developments and on LinkedIn we provide insights into our company, introduce team members or report on our sustainability commitment. TikTok is the platform for entertaining videos and a different kind of insight. On social media, we live by the motto: Together, we can reach further. Tag us in your posts, we enjoy sharing them. You can also contact us at any time for cross-media campaigns,

LEGEND

Womens model

For sleeping bags: 10 – 15% additional down filling in the foot and torso sections.
For backpacks: Shorter back length and shoulder straps.

Animal welfare

RDS is the strictest standard for animal welfare in the production of down. EXPED uses 100% certified down in all down products.

PFC free

PFC is the abbreviation for Per- or poly fluorinated chemicals, also known as fluorocarbons. Non degradable and accumulating toxic chemicals used for waterproofing.

Recycled materials

An increasing number of EXPED products are made from recycled materials. Materials gained from previously made materials -such as PET-bottles or waste from the production of textiles.

Ski, snowboard and snowshoe touring.

This backpack features specific attachments for skis, snowboard or snowshoes.

Sleepwell-Warranty

Exchange your Exped sleeping bag for the next warmer one and pay only the difference. For more details see exped.com

Spray water protection

Through the materials used and the construction stored contents are protected against spray water. However, the ingress of dust is possible.

Submersible

This product is IP67 certified making it dustproof and is submersible down to a depth of 1m for a maximum of 30 minutes.

Waterproof

The special materials, the welded or taped seams as well as the roll-top closure make this product completely waterproof..

Weatherproof

This product is water repellent due to the materials used and the taped seams, but because of the zipper not completely waterproof.

Refillable

All Exped down sleeping bags can be refilled with down.

Windproof

The materials used are completely windproof.
