

Golden Saxifrage *Chrysosplenium iowense*

Habitat: Algific talus slopes

Blooms: Yellowish-green flowers bloom from May to July.

Threats:

- Loss of habitat due to urban expansion
- Decrease in habitat quality from altered shade, drainage and erosion.
- Cattle grazing
- Human trampling
- Logging
- Invasive species

Habitat Improvement Guidelines:

- Protection of land around known populations
- Fence cattle out of sites
- Do not log on Algific talus slopes
- Control invasive species
