

# Queen's University Biological Station Species List: Lichens

The current list has been compiled by Dr. Ivy Schoepf, [QUBS Research Coordinator](#), in 2020. This list includes data gathered using digital distribution maps from [The Natural Heritage Information Centre](#) (April 2018), [The IUCN Red List of Threatened Species](#) (February 2018), [iNaturalist](#) and [GBIF](#). Contact [Ivy](#) to report any errors, omissions and/or new sightings.

Based on the aforementioned criteria we can expect to find a total of 502 species of lichens (kingdom: Fungi, phylum: Ascomycota) present at QUBS. Species are reported using their full taxonomy; common name and status, based on whether the species is of global or provincial concern (see Table 1 for details). All species are considered QUBS residents unless otherwise stated. One lichen species, the Prostrate Thorn Cladonia (*Cladonia dimorphoclada*), has most likely been extirpated from the area, but has been included here for completeness.

**Figure 1.** The Smooth Rock Tripe (*Umbilicaria mammulata*) is the largest lichen in the world. It grows on a number of rock surfaces, such as sandstone and granite boulders, and it is, unlike many other lichen species, quite common. Lichens typically grow very slowly and have specialized habitat requirements that make them, in general, quite vulnerable to habitat disturbance. Photo courtesy of Mark Conboy.

**Table 1. Status classification reported for the lichens of QUBS.** Global status based on IUCN Red List of Threatened Species rankings. Provincial status based on Ontario Natural Heritage Information Centre SRank.

Global Status	Provincial Status
<b>Extinct (EX)</b>	<b>Presumed Extirpated (SX)</b>
<b>Extinct in the Wild (EW)</b>	<b>Possibly Extirpated (SH)</b>
<b>Critically Endangered (CR)</b>	<b>Critically Imperiled (S1)</b>
<b>Endangered (EN)</b>	<b>Imperiled (S2)</b>
<b>Vulnerable (Vu)</b>	<b>Vulnerable (S3)</b>
Near Threatened (NT)	Apparently Secure (S4)
Least Concern (LC)	Secure (S5)
Data Deficient (DD)	Unrankable - insufficient information (SU)
Not Evaluated (NE)	Unranked - not yet assessed (SNR)
	Conservation Status Rank Not Applicable (SNA)
