

TEN YEARS AFTER.

The enclosed city of La Plata celebrated yesterday its tenth anniversary... The occasion was marked by a display of fireworks... The city has grown from a small settlement to a metropolis of 100,000 inhabitants.

Private capital..... 30,000,000
Treasury disbursements over and above ordinary expenditure during the years 1881 and 1891 amounted to 171,000,000 currency, as we see by the statement of debt of the Province, and may be assumed to represent more than half of this sum spent in public buildings, sumptuous furniture from the stores of Europe, and the like.

Compare Sweden and Norway, where duties are light, with countries like France and Germany, where duties are high... The result is that the Argentine Republic is in a position to compete with the most advanced nations of the world.

THE WINE PROSPECTS.
Yesterday's telegrams from Mendoza are of a deplorable character, for they inform us that the grape crop has been entirely destroyed by the locusts.

MR. SEEBER'S ESSAY ON ECONOMY.
This portion of Mr. Seiber's book comprises 300 pages, divided into chapters, which we condense as follows:

Production of native wine this year is estimated at 5,000,000 gallons... The total value of the wine produced is estimated at 20,000,000 currency.

Analysis by Professor Kyle is followed by a table showing the production of various agricultural products in different provinces.

Table with 2 columns: Province and Production. Lists provinces like Entre Rios, Corrientes, and their respective agricultural outputs.
