SERIES PUBLICATIONS OF THE SMITHSONIAN INSTITUTION

Emphasis upon publication as a means of “diffusing knowledge” was expressed by the first Secretary of the Smithsonian. In his formal plan for the Institution, Joseph Henry outlined a program that included the following statement: “It is proposed to publish a series of reports, giving an account of the new discoveries in science, and of the changes made from year to year in all branches of knowledge.” This theme of basic research has been adhered to through the years by thousands of titles issued in series publications under the Smithsonian imprint, commencing with Smithsonian Contributions to Knowledge in 1848 and continuing with the following active series:

Smithsonian Contributions to Anthropology
Smithsonian Contributions to Botany
Smithsonian Contributions to History and Technology
Smithsonian Contributions to the Marine Sciences
Smithsonian Contributions to Museum Conservation
Smithsonian Contributions to Paleobiology
Smithsonian Contributions to Zoology

In these series, the Institution publishes small papers and full-scale monographs that report on the research and collections of its various museums and bureaus. The Smithsonian Contributions Series are distributed via mailing lists to libraries, universities, and similar institutions throughout the world.

Manuscripts submitted for series publication are received by the Smithsonian Institution Scholarly Press from authors with direct affiliation with the various Smithsonian museums or bureaus and are subject to peer review and review for compliance with manuscript preparation guidelines. General requirements for manuscript preparation are on the inside back cover of printed volumes. For detailed submissions requirements and to review our manuscript preparation and style guides for authors, visit the Submissions page at www.scholarlypress.si.edu.

ABSTRACT

Janssen, Barbara Suit. *Patent Models Index: Guide to the Collection of the National Museum of American History, Smithsonian Institution – Volume 1, Listings by Patent Number and Invention Name. Smithsonian Contributions to History and Technology*, number 54, xviii + 357 pages, 76 figures, 2010. — This two-volume catalog consists of four indexes providing information on more than ten thousand patent models housed throughout the National Museum of American History's collections. These nineteenth century artifacts are the original models submitted to the United States Patent Office by their inventors.

In Volume 1, the *Listing by Patent Number* sorts the NMAH patent models chronologically by the issued patent number. The *Listing by Invention Name* organizes the patent models alphabetically by the name of the invention.

In Volume 2, the *Listing by Inventor* organizes the NMAH patent models alphabetically by the inventor's last name. The *Listing by Residence* sorts the patent models by residence of the inventor at the time of patent issue by country, state, and city.

The patent number is a unique number that ties all of the indexes together. Issued by the Patent Office at the granting of a patent, the number links the model to its patent specification. The terminology used is consistent with the *Subject-Matter Index of Patents for Inventions Issued by the United States Patent Office from 1790 to 1873*, compiled by Mortimer D. Leggett, Commissioner of Patents in 1874.

Cover images, from left to right: Patent No. 173,295, Richard M. Hoe and Stephen D. Tucker, Printing Press, February 8, 1876 (SI neg. 86-6340); Patent No. 99,743, William T. Smith, Sewing Machine, February 8, 1870 (SI neg. 2006-1858); Patent No. 6,420, Samuel F. B. Morse, Electric Telegraph, May 1, 1849 (SI neg. 89-6704). Introduction

The *Patent Models Index* consists of four lists of information relating to patent models, each containing different information and sorted by a different key detail: patent number, invention name, inventor, and residence of inventor. Nowhere else does there exist such a record of the patent model collections of the Smithsonian Institution's National Museum of American History (NMAH) in an organized and comprehensive manner. The priorities of the Smithsonian Institution Scholarly Press (SISP) are to diffuse the information relevant to NMAH collections and to offer a searchable tool from which end users will benefit. Within the framework of existing processes, SISP has published this set of indexes and makes it available online to all users as a fully searchable PDF.

The purpose of this index is specifically to document the collection of patent models in NMAH. A small number of patent models are in the collections of other Smithsonian museums. Those of the Anacostia Community Museum, the National Postal Museum, and the National Air and Space Museum are not included in this index. The index was not intended to address every question that might be of interest to historians of technology or the patent system, but rather to expose them to the breadth and depth of the NMAH collections. All of the listings include different fields, so their value varies. For example, in the listing by residence of inventor users may compare inventions by country, state, and city. The listing by inventor includes a field for multiple patentees, which is not included in the others. The listing by invention name groups models by name so users might realize the scope of any one set of models within a particular subject matter. All of the indexes include unique fields, with only major fields, such as invention name and patent number, being repeated. Just like Leggett's 1874 three volume patent index, the *Patent Models Index* provides the foundation on which others might build.

THE PURPOSE OF PATENT MODELS

For most of the nineteenth century, the Patent Office required inventors to submit a model with their patent application. Inventors placed great importance on their models and viewed a well-executed model as the key element in obtaining a patent. The inventor would often hire a professional model maker to turn a two-dimensional paper drawing into a three-dimensional miniature machine. The inventor might also turn to other skilled craftsmen, such as blacksmiths, watchmakers, or cabinetmakers, to fabricate models. Some inventors would construct their own models.

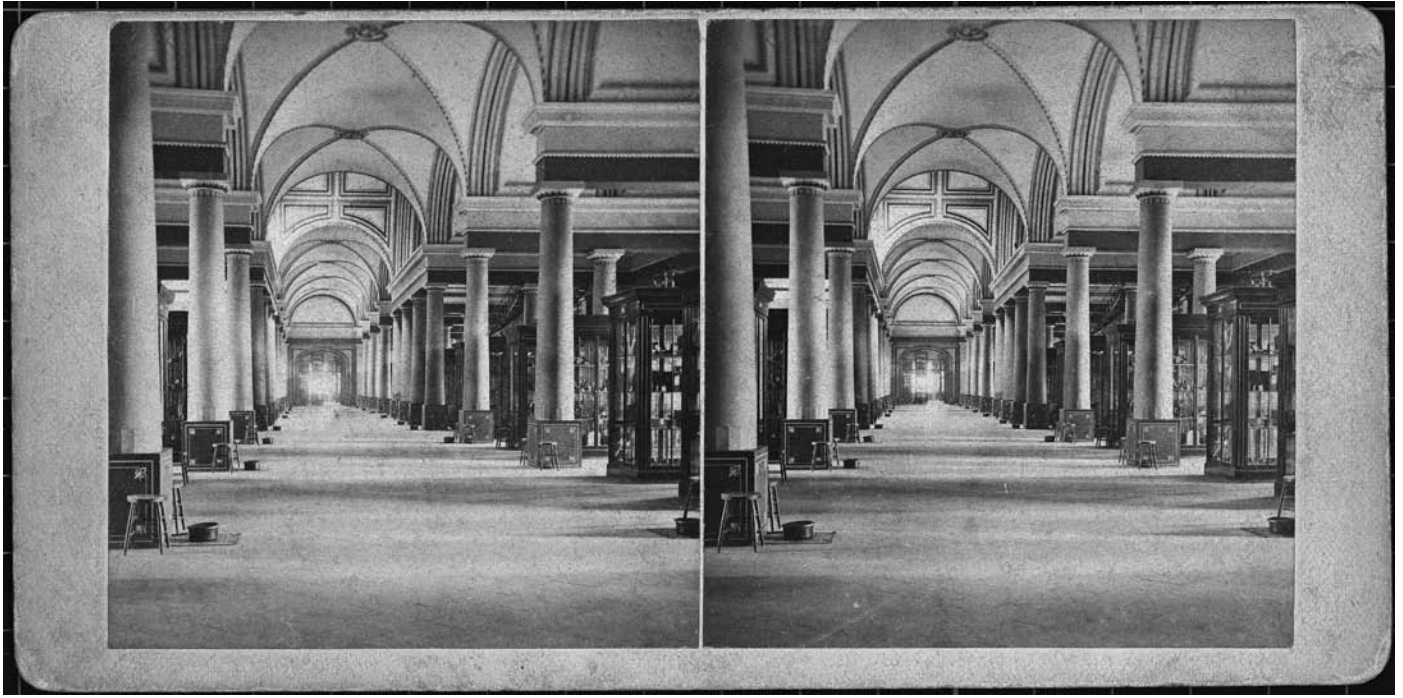

How a model was constructed depended mostly on what the patented feature was. The inventor had a choice of showing the complete machine or only his patented device. Models could be fine miniatures of their commercial counterparts (like printing presses or plows) or they could be the actual manufactured machine (like sewing machines or firearms) with the patented feature added. While it was not essential that the model work, many of them did. In general, the models tended to adhere to requirements of the Patent Office that they not exceed one foot in any dimension. Some inventors took great care to ensure their models were neither too small to be seen on the cabinet shelves in the Patent Office Model Room nor too large to fit there.

THE MODEL-MAKER.—Drawn by A. B. Wain.—[See Page 215.]

This 1868 engraving from *Harper's Weekly* illustrates a typical model maker working in a small workshop. (SI neg. 86-930)

In the second half of the nineteenth century, the U.S. Patent Office Model Room and its four halls showcasing thousands of models was of common interest for researchers as well as a popular destination for inventors, the curious public, and manufacturers seeking helpful mechanical inventions. To the inventor, the idea of investors and manufacturers studying his or her patent model offered great incentive to craft a striking, handsome model that would stand out on the crowded Model Room shelves. Stereoviews of the Patent Office Halls of seemingly endless rows of cabinets filled with models were a popular Washington, D.C., photographic souvenir. Viewed though a stereoscope, the double images were dizzyingly dimensional. In 1855 Alfred Hunter published a guide to the Patent Office Model Room, *A Catalogue Showing the Location of Every Model of Patented Inventions in the New Hall of the Patent Office*. In 1874 Charles H. Fisher compiled a small

Stereoview of the South Hall of the Patent Office. Rows of cases containing patent models fill the Hall. Stamped on back: "T. W. Smillie, Photographer. Smithsonian Institution. Washington, D.C." About 1870–80. (SI neg. 2009-1830)

pamphlet titled *Directory of the Model Room U.S. Patent Office, Alphabetically Arranged*, with Morse's "Original Telegraph" and Elias Howe's "Original Sewing Machine" on the cover, both of which are currently in the NMAH collections. Fisher's directory covered the classes of invention in a mere eight pages, starting with "Acids, Manufacture of . . ." to "Artificial Limbs, Bridges, Coffins, Dental, Electrical Apparatus, Fishing, Governors, Harvesters, Ice Boats, Jewelry, Knitting Machines, Laundry, Meters, Needles and Pins, Ordnance, Photography, Refrigerators, Steam Engines, Traps, Umbrellas, Valves, and . . .," and finishing with "Writing Apps. for the Blind." Fisher concluded his guide with a listing of the four halls of the Model Room, including length and width of each, the number of exhibition cases in each, and the number of classes of invention within the cases. Joseph West Moore, in his 1884 guide book *Picturesque Washington: Pen and Pencil Sketches*, wrote:

The Museum of Models is contained in four lofty, magnificent halls, extending throughout the second story of the department building [the Patent Office]. Here are to be seen 300,000 models of patented articles, arranged in classes and subdivisions, and filling hundreds of spacious cases, all properly labeled and indexed. By means of these

Patent No. 4,750. Elias Howe, Jr. Sewing Machine. September 10, 1846 (SI neg. 90-4210)

models one can trace the progress of every line of industry, from crude designs to the perfected machine, wonderful in construction and almost human in action. Here is the result of the profound study of countless men diligently working in all the industrial fields through many years, and it is a marvelous exhibition of human capability, and can be inspected for hours, even days, with plentiful profit and enjoyment.”

THE ORIGIN OF NMAH’S COLLECTIONS

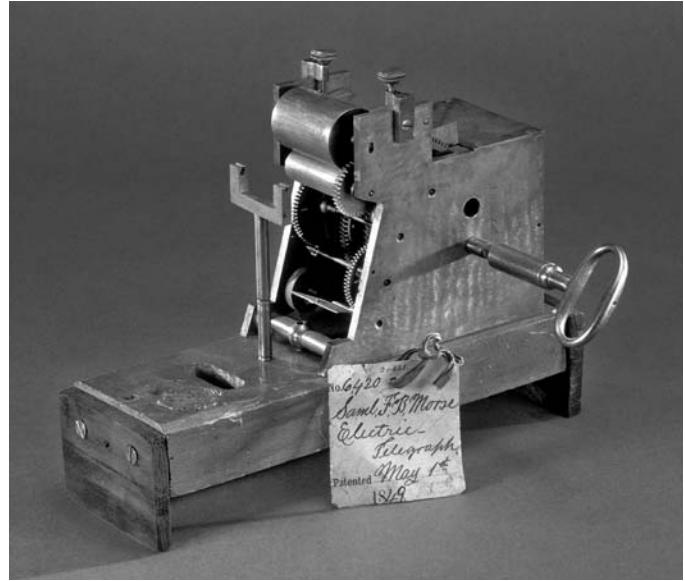

In 1880 the Patent Office dropped the requirement for submitting models, except in unusual circumstances. This action was taken primarily because the Patent Office had simply run out of space in which to store or display an ever-rising flood of models. It was also true that inventions were becoming more complex and less amenable to representation by models. Once the requirement for submission of a model was rescinded, a decline in the large number of professional model makers in Washington, D.C., was inevitable. After 1893, public interest in the Model Room declined as other museums became popular. The patent models in the Model Room were crated and moved off site for storage.

Before the Smithsonian Institution acquired the model collection from the Patent Office, the models had suffered through two major fires at the Patent Office. The first, in 1836, destroyed all the models that had been submitted up to that date (approximately 7,000). Not only were all the models lost, but all of the patent drawings and records of patent applications and grants were also destroyed. These records were irreplaceable, and the U.S. Congress considered the loss so great that \$100,000 was appropriated to restore the drawings and the most important models. The Patent Office conferred with inventors when and where possible to ensure an accurate reproduction of each invention. This restoration program continued until 1849, by which time several thousand drawings and models had been restored. Prior to the 1836 Patent Office fire, patents had not been numbered. After the 1836 fire, patent models began to be numbered consecutively. Restored patents were given a series of new numbers called the “x-series.” A second fire in 1877 destroyed 75,000 models out of a collection of 200,000.

In 1908 the NMAH patent model collection started with acquisition of 284 models from the Patent Office. The United States National Museum’s Department of Anthropology, Division of Technology originally accessioned this collection of models and sent the museum’s wagon to pick up the models from the Patent Office in June 1908. The particular strengths of this selection were firearms, with other smaller categories including printing presses, sewing machines, scales, typewriters, telegraphs, electric lamps, time locks, locomotives, gas and steam engines, agricultural implements, and textile machinery. Before the summer ended, curators made further selections for photography, musical instruments, lighting and heating, firearms and mechanical devices, bringing the total to just over 1,000.

The Patent Office packed the remaining models into more than 3,000 crates and moved them several times. In 1926 Congress decided to dispense with the Patent Office’s stored collection of patent models. The subsequent bill gave the Smithsonian Institution first choice of the models. The Secretary of the Smithsonian, Charles Doolittle Walcott, appointed two curators, Frederick Lewton and Carl Mitman, to select the historically important models. Mitman chose models specifically for the mechanical engineering collection. Lewton selected a broad range of models—his area of specialty was textile machinery and, in particular, sewing machines.

In the museum accession record for this large selection of models (accession number 89797), Lewton wrote in a memorandum dated July 19, 1926: “Of the approximately 155,000 models examined by the commission appointed to dispose of them, something over 3,000 were brought to the National Museum for preservation. The rest were turned over

Patent No. 6,420. Samuel F. B. Morse. Electric Telegraph. May 1, 1849. (SI neg. 89-6904)

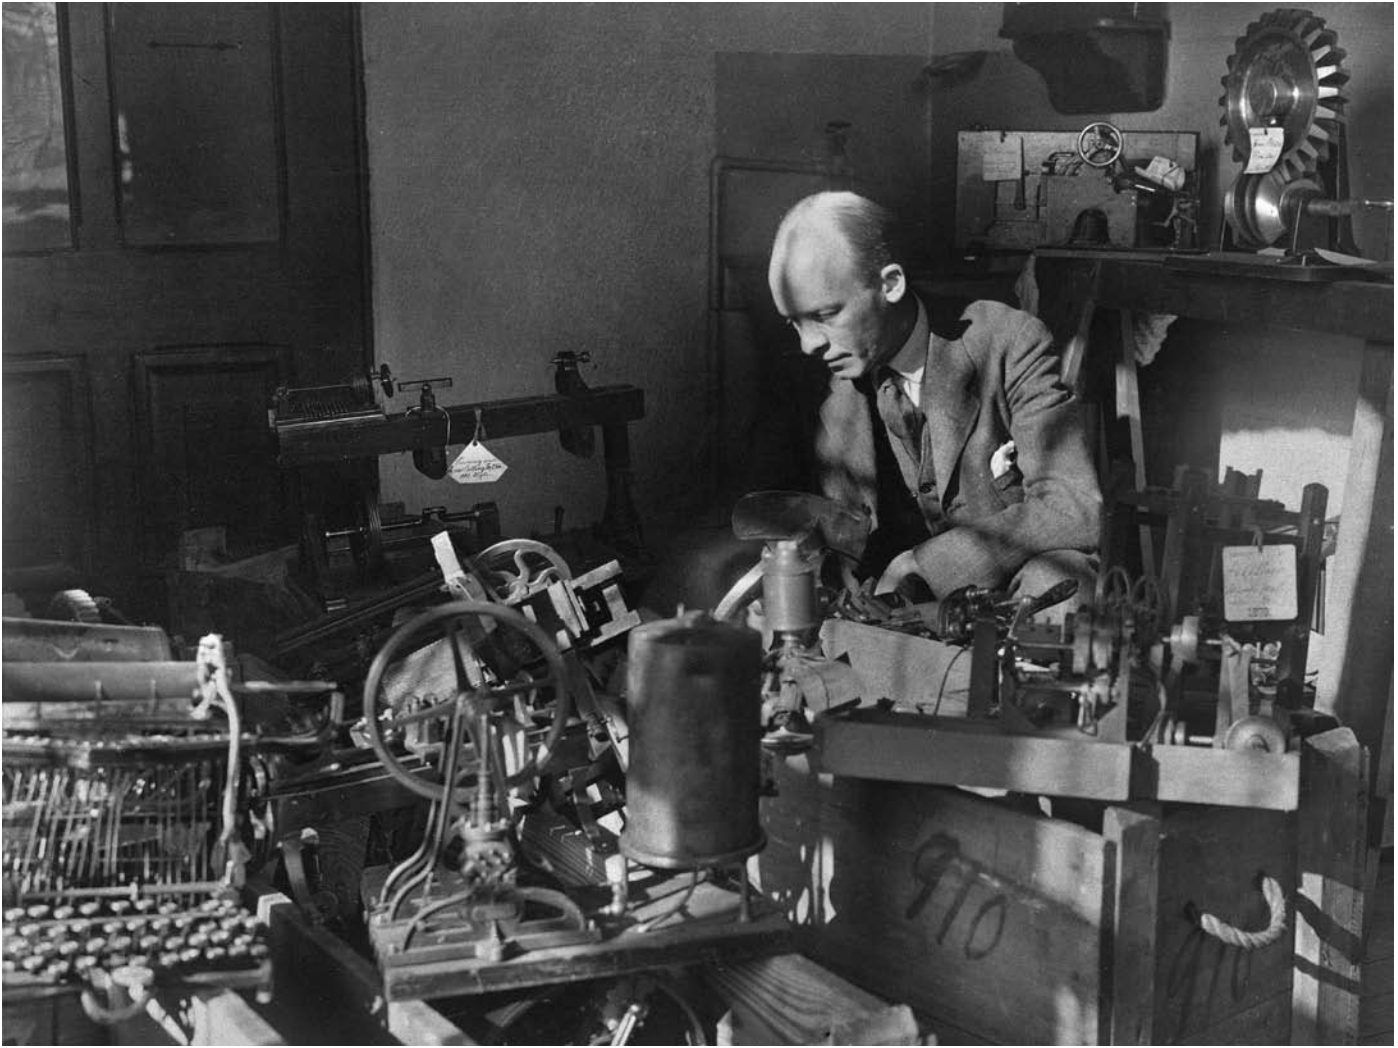

SOUTH HALL, MUSEUM OF MODELS, PATENT OFFICE.

to the Bureau of Supply, Treasury Department, for sale as useless Government property. The Bureau of Supply has held four sales and practically all the models have been disposed of by auction.” Later Lewton would contradict himself in his autobiography, “I examined 352,000 models selecting about 15,000 for preservation, which were taken to the National Museum for study and recording.” Unfortunately, there was no overall list made at the time of accession that detailed the individual patent models collected.

The National Museum gave away an unknown number of models to schools, universities, other museums, and industry, and to descendants of inventors. The U.S. government sold the models that remained in the Patent Office collection to private parties. Today, patent models continue to attract buyers and collectors, and are often for sale on eBay.

At present the condition of patent models in the NMAH collections varies greatly. There are many fine models in excellent shape, and many other models that are in need of conservation before they can be exhibited. Some models bear tags that say “removed from the debris of the 1877 fire.” On a scale of poor to excellent, most of the models fall somewhere in the middle. Curators at the Smithsonian hope that a conservation program will be funded to conserve the models in the future.

Carl M. Mitman, Curator of Technology, going through the patent models sent by the Patent Office in 1926 in order to select models for the Smithsonian Institution. (SI neg. MAH-68817)

The fame and success of inventions such as Eli Whitney's cotton gin and Elias Howe's sewing machine spurred Americans to patent almost everything imaginable. This mania for patenting is illustrated in the NMAH patent model collection by its diversity and number of models. This profusion of patent models testifies to the enthusiasm of Americans to conceive a better idea, create an improved machine, and efficiently mechanize America from the home to the farm to the factory. During the nineteenth century, the patent models were proudly exhibited as icons of American invention. In the twenty-first century, the models remain in storage as "mute stones," waiting to be rediscovered by individuals and scholars in search of the inventive wonders of an earlier era.

PATENT SPECIFICATIONS

From its beginnings, American patent law followed the English tradition of requiring the submission of a written description of ideas for patent as well as drawings. Such a paper submission was referred to as a "patent specification." The specification included a detailed description of the patent claims and a drawing of the invention. Information in the

specification included the patent number, invention title, date the patent was granted, name and residence of the inventor(s). In the written specification, the inventor explained the general nature of his or her invention or improvement and ended with detailed patent claims. The text would refer to numbered figures and lettered details in the drawing. Often the patent model drawing was made directly from the model and provided an illustration of a moment of inspiration fixed in time and space. The drawings created a “still life” of invention.

Following is a typical example of a United States Patent Office patent specification with the accompanying patent drawing and model. The photograph pictures the clothes pin patent model that the inventor, Henry Mellish, submitted to the U.S. Patent Office in 1871. The requirement for a model was a uniquely American prerequisite for receiving a patent in the nineteenth century.

PATENT MODEL DATABASE PROJECT

The NMAH holds several collections of patent models, housed within different divisions at the museum. The Patent Model Database is a repository of information about these collections of over 10,000 patent models identified to date. It includes such simple devices as clothespins and more complex machines like printing presses and the then-new nineteenth-century technology of electricity. The models in the database range in date from 1836 into the early twentieth century. The database was designed as a research tool and is published now as a guide to the collections. Individual division catalog cards, collection lists, and museum accession records were used as original sources of data. There has never been one list for all of the patent models or even for each division’s collection. These paper records are imperfect. Missing Patent Office tags meant that authoritative identification was not possible. In the future, more models may be identified in the vast holdings of NMAH, as well as new accessions added to the collections.

The available patent model information was entered into a Microsoft Access database and drafts of the patent model printouts were verified by division staff. The information about each patent model was confirmed by comparing the divisional information to the data in the patent specification. Additional information from the patent specification was added to the database and inaccurate data was corrected.

Often the original patent tag was tied to the model with the official red tape of the Patent Office. Penned in ink, the tags identify the inventor and coinventors (if any), the invention name, the patent date, and the issued patent number. The patent number links the model to its corresponding patent specification and drawing.

The inventor’s written specification explained the patented claims and matched the model’s features to the drawing of the invention. The patent specification provided provenance for the inventor’s name, including names of coinventors, the date of patent issue, and the residence of the inventor at the time of the patent issue. Nomenclature for the name of the invention also came from the specification. Sometimes the wording of the invention title would vary from the drawing to the written specification. In those cases, the description with the clearest meaning was used. For instance, the specification for John A. Roebbling’s patent no. 6082 is titled “Improvement in Tops for Wire Ropes,” and the drawing titles it “Wire Rope Machine.” The resulting choice, “Rope Making Machine, Wire,” was selected for publication. Careful thought was given

Patent Models melted by the heat of the 1877 Patent Office Fire. Catalog No. 336,683. (SI neg. 78-10031)

119,938

UNITED STATES PATENT OFFICE.

HENRY MELLISH, OF WALPOLE, NEW HAMPSHIRE.

IMPROVEMENT IN CLOTHES-PINS.

Specification forming part of Letters Patent No. 119,938, dated October 17, 1871.

To all whom it may concern:

Be it known that I, HENRY MELLISH, of Walpole, in the county of Cheshire and State of New Hampshire, have invented certain Improvements in Clothes-Pins, of which the following is a specification:

The nature of my invention relates to the construction of a bifurcated clothes-pin in such form that the act of placing it on the line will cause the points of the prongs to approach nearer to each other, and their inner surfaces near the body of the pin to spread further apart. The object of the invention is to produce a pin that shall be light and convenient to carry in the pocket; one that shall be easily put on and taken off the clothes-line; and one that shall always hold the clothes firmly to the line, notwithstanding any blowing about by the wind; and, finally, a pin that can be made and sold at a lower price than any pin heretofore in use.

Figure 1 is a side elevation of the pin. Fig. 2 is a side elevation with a cross-section of the clothes-line between its prongs, showing the extended position of the prongs when on the line. Fig. 3 is a perspective view of the pin.

Fig. 1 shows the shape of the pin, which should be made of straight-grained springy timber by cutting the slit A, between the prongs and the

openings B, through the prongs at right angles to the plane surfaces of the timber, which should be of suitable dimensions out of which to construct a pin in the form and about the size represented in the figures or drawing, although the size or proportions may be varied to suit the purpose to which the pin is to be applied. The openings A and B are connected with each other by dividing the inside bars *c* of the prongs from their attachment to the body of the pin at D, as represented in Fig. 1, for the purpose of allowing the ends of the bars to be spread apart, and, by their action upon the spring portions E of the prongs, to cause their ends to approach each other when placed upon the line, as represented in Fig. 2, so that the pin shall move on instead of off by movement of the clothes.

I claim—

The prongs of a clothes-pin when consisting of the springs E E in connection with the spring-bars C C, with the elliptical openings B B through them, and the ends of the spring-bars C C separated at the point D from the body of the pin, substantially as and for the purpose hereinbefore set forth.

Witnesses: HENRY MELLISH.

Inventor:
Henry Mellish

ALL PHOTO-LITHOGRAPHING BY THE PATENT OFFICE.

Mellish's Patent Drawing for his Clothes Pin, Patent No. 119,938. (SI neg. 2009-1831)

to the order of the terms within the name of an invention to provide for standardized searching by invention. Terminology used was consistent with the nineteenth-century Patent Office nomenclature.

The patent number for each model is unique and becomes the primary key to each patent model record. The uniqueness of the patent numbering system is fortunate as NMAH's catalog numbers include many problematic combinations of numbers and letters and, in a few cases, duplicate numbers. Searches on the database can be done by invention name, inventor, date, patent number (which is chronological), and country, state, and city, and by any combination of sorts. Using the database, it is now possible to answer inquiries across the entire collection. For example, what models are

Patent No. 119,938. Henry Mellish. Clothes Pin. October 17, 1871. (SI neg. 2005-37597)

Patent No. 39,916. John F. Heissenbuttel. Rolling Pin. September 15, 1863. (SI neg. 86-6558)

from Pennsylvania, or just Philadelphia? How many of Thomas Edison's patent models are in the collection? Are there patent models for cameras in the collections? This catalog provides a straightforward reference to answer these kinds of questions. In Volume 1, the patent model listings are by patent number and invention name. In Volume 2, the information is available by inventor and residence of inventor.

This index includes only utility patent models. Not included are a small number of early x-series, design and reissue patent models that use a separate lettered numbering system.

KEY TO NMAH DIVISIONS WITH PATENT MODEL COLLECTIONS

The patent model collections found their present home in 1964 with the opening of the National Museum of History and Technology (now the National Museum of American History). In this index's listing by patent number, the name of the NMAH division that originally housed a patent model is provided. These division names are contemporary to cataloging the models, but like all changing and growing institutions, the collecting divisions of NMAH have been reorganized and renamed over time. The current division names at NMAH, reflecting current collecting interests, are listed below, and the corresponding former division names—found in the listing by patent number—are identified.

Division of Music, Sports, and Entertainment

Description: Contains the models pertaining to musical instruments, sports, and recreation.
Former divisions: Community Life
Musical Instruments

Division of Information Technology and Communications

Description: Incorporates the patent model collections of electricity, graphic arts, mathematics, and photography.

Former divisions: Electricity
Graphic Arts
Mathematics
Photographic History

Division of Home and Community Life

Description: Consists of the patent model collections concerning ceramics and glass, costume, domestic life, furniture, lighting, and textiles.

Former divisions: Ceramics and Glass
Costume
Domestic Life
Textiles

Division of Work and Industry

Description: Consolidates the former collections of agriculture, natural resources, mechanical and civil engineering, mechanisms, extractive industries, and transportation.

Former divisions: Extractive Industries (included agriculture and natural resources)
Mechanical and Civil Engineering
Mechanisms
Transportation

Division of Medicine and Science

Description: Includes patent model collections of medical sciences and physical sciences. The collection of medical sciences includes models relating to dentistry, surgery, pharmacy, medicine, and health. The physical science collection contains models for surveying, weighing, and navigation.

Former divisions: Medical Science
Physical Sciences

Division of Military History and Diplomacy

Description: Concerns the collection of military technology.

Former division: Armed Forces History

Division of Politics and Reform

Description: Houses the sole patent model of Abraham Lincoln's river boat buoyancy model.

Former division: Political History

Acknowledgments

I am grateful to colleagues, past and present, who cared for and shared their knowledge of their patent model collections. Many museum specialists and curators of the National Museum of American History (NMAH) helped with the verification of the patent models in their collections. In the Division of Music, Sports and Entertainment, Ellen Hughes and Gary Sturm provided information about models pertaining to musical instruments, sports, and recreation. Assistance for the models in the Division of Information Technology and Communications was given by Joan Boudreau, Nance Briscoe, Barney Finn, Elizabeth Harris, Ray Hutt, Peggy Kidwell, Shannon Perich, Jim Spears, and Hal Wallace. This Division incorporates the patent model collections of electricity, graphic arts, mathematics, and photography. Information concerning the patent models in the Division of Home and Community Life was provided by Rita Adrosko, Reggie Blaszczyk, Doris Bowman, Bonnie Campbell Lilienfeld, Shelly Foote, Anne Golovin, Rodris Roth, Anne Serio, Jennifer Strobel, and William Yeingst. This Division consists of the patent model collections concerning ceramics and glass, costume, domestic life, furniture, lighting, and textiles. Information on the models in the Division of Work and Industry was provided by Michael Harrison, Francis Gadson, Paul Johnston, Terry Sharrer, David Shayt, Carlene Stephens, Susan Tolbert, Bob Walther, John White, Roger White, William Worthington, and Kay Youngflesh. This division consolidates the former collections of agriculture, natural resources, mechanical and civil engineering, mechanisms, extractive industries, and transportation. For the Division of Medicine and Science, Judy Chelnick, Jon Eklund, Michael Harris, George Norton, Ann Seeger, Deborah Warner, and Diane Wendt provided information on the patent model collections of medical sciences and physical sciences. Information on the military technology patent models in the Division of Military and Diplomacy was provided by Harry Hunter, David Miller, and Sarah Rittgers. In the Division of Politics and Reform, Harry Rubenstein confirmed the existence of the sole patent model of Abraham Lincoln's river boat buoyancy model.

Photographs of the models were taken by Richard Strauss, Hugh Talman, Eric Long, Laurie Minor, Jeff Tinsley, and Harold Dorwin. Michael Barnes and John Dillaber provided scans of photographs for this publication. Nancy Brooks furnished editorial assistance. Accession files from Collection Records were copied by Nan Card. Ginger Strader, Meredith McQuoid-Greason, and Deborah Stultz of Smithsonian Institution Scholarly Press managed the many details involved in the production of the publication.

I particularly wish to thank Rita Adrosko, Curator Emeritus of the Division of Textiles, Douglas Evelyn, former Deputy Director of the National Museum of American History, and Kendall J. Dood, former U.S. Patent Office Classifier, for their support and advice. The Ruth and Vernon Taylor Foundation deserves special thanks for providing funding for the Patent Model Database Project upon which this index is based.

I am grateful to my husband, Theodore Jon Janssen, for his belief in the importance of this patent model project. Computer wizard, problem solver, and first editor of endless patent lists, his considerable talents enabled the database to evolve into this index.

An article in the Smithsonian's Torch, 1968, featured Grace Cooper, Curator of Textiles, demonstrating sewing on Benjamin W. Bean's 1843 sewing machine patent model, Patent No. 2,982. To the left is Elias Howe's sewing machine patent model of 1846, Patent No. 4750, and to the right is James J. Greenough's sewing machine patent model of 1842, Patent No. 2,466. Guide to the Listing by Patent Number

The *Listing by Patent Number* sorts the patent models chronologically by the issued patent number. It includes the invention name, the inventor's last name (excluding coinventors), the year patented, and the NMAH holding division. An explanation and key to the current divisional names as well as their historic names is included in the Introduction. Should individuals or researchers be interested in seeing any particular models, arrangements may be made with the divisional staff. The collections are housed in various locations and cared for by different divisions. Many of the models are located off-site.

Within the listings, a dagger (†) next to the patent number indicates that a photograph of the model is included in Volume 1; two daggers (††) indicate a photo is in Volume 2. See the Appendix for a complete list of all illustrations in the present volume.

58015	Spinning Machine, Hand	Wilson	Textiles	1866
58024	Loom	Kershaw	Textiles	1866
58046	Spinning Frame Spindle	Atwood	Textiles	1866
58123	Shoe Edge Plane	Miller	Extractive Industries	1866
58181	Sewing Machine	Tyler	Textiles	1866
58182	Sewing Machine Shuttle	Tyler	Textiles	1866
58190	Peat Slicing Machine	Emery	Extractive Industries	1866
58210	Sewing Machine Hemmer	Browning	Textiles	1866
58217	Helice Insulating Wires	Clark	Electricity	1866
58231	Chair, Reclining	Duane	Domestic Life	1866
58257	Dental Plugger	Hooker	Medical Science	1866
58271	Level, Pendulum	Masten	Community Life	1866
58296	Candlestick	Rix	Domestic Life	1866
58361	Lamp	Strobwasser	Domestic Life	1866
58376	Sewing Machine Ruffler	Cary	Textiles	1866
58391	Hat Making Device	Doubleday	Extractive Industries	1866
58399	Sewing Machine Shuttle	Etzold	Textiles	1866
58434	Twisting & Stretching Machine, Silk	Kohn	Textiles	1866
58464	Loom, Narrow Ware	Oldfield	Textiles	1866
58497	Floor Covering Manufacture	Spencer	Textiles	1866
58525	Pistol, Breech Loading	Williamson	Armed Forces History	1866
58611	Warp Dressing Frame	Damon	Textiles	1866
58614	Sewing Machine Needle Feed	Davis	Textiles	1866
58626	Nail & Spike Extractor	Fish	Community Life	1866
58670	Sewing Machine Hemming Guide	Ogburn	Textiles	1866
58681	Leather Splitting Machine	Schenck	Extractive Industries	1866
58752	Planter, Cotton Seed	Badgely	Extractive Industries	1866
58865	Loom, Hand	Mendenhall	Textiles	1866
58908	Desk, School	Stagg	Community Life	1866
58910	Railroad Semaphore Signal	Stead	Transportation	1866
58937	Firearm Magazine	Briggs	Armed Forces History	1866
59024	Loom Let Off	Hussey	Textiles	1866
59088	Sewing Machine Shuttle	Smith	Textiles	1866
59106	Spinning Direct From Carding	Welham	Textiles	1866
59120	Fishing Line Making Machine	Brooks	Textiles	1866
59229	Book Cutting Machine	Jones	Graphic Arts	1866
59240	Sewing Table, Book Binder's	Lincoln	Graphic Arts	1866
59259	Cotton Preparing Machine	Pilson	Textiles	1866
59284	Dental Plugger	Snow	Medical Science	1866
59332	Clasp for Belting	White	Extractive Industries	1866
59339	Planter, Cotton Seed	Badgely	Extractive Industries	1866
59507	Photographic Finishing Roller	Gordon	Photographic History	1866
59554	Lamp Burner	Capewell	Domestic Life	1866
59613	Loom, Narrow Weave	Knowles	Textiles	1866
59659	Sewing Machine	Rodier	Textiles	1866
59692	Hide Fleshing & Stoning Machine	Wheat	Extractive Industries	1866
59715	Sewing Machine, Shoe	Duchemin	Textiles	1866
59738	Magneto Electric Machine	Wilde	Electricity	1866
59746	Sewing Machine for Uniting Knits	Kilbourn	Textiles	1866
59777	Valve Gear, Cut Off	Pike	Mechanical and Civil Engineering	1866
59800	Photographic Printing Frame	Lochman	Photographic History	1866
59801	Reel	McLean	Textiles	1866
59831	Brick Machine	Gard	Ceramics	1866
59836	Picture Frame	Hanks	Graphic Arts	1866
59865	Lantern	Smith	Domestic Life	1866
59879	Sewing Machine Binder	Vincent	Textiles	1866
59917	Camera, Solar	Masters	Photographic History	1866
59959	Pianoforte Cover, Ornamenting	Burgess	Textiles	1866
59973	Spinning Machine	Crowfoot	Textiles	1866
59983	Sewing Machine Gauge	Duffy	Textiles	1866
59987	Loom Shedding Motion	Ellis	Textiles	1866

Patent Number	Invention Name	Inventor Last Name	NMAH Division	Year
59997	Sewing Machine Guide	Hall	Textiles	1866
60021	Sewing Machine Shuttle	Lenher	Textiles	1866
60103	Yarn Drying Machine	Whitehill	Textiles	1866
60106	Firearm, Breech Loading	Wolcott	Armed Forces History	1866
60111	Sewing Machine Marker & Creaser	Yale	Textiles	1866

Patent No. 42. Alonzo Platt. Hanging Lamp. October 8, 1836. (SI neg. 86-5797)

Patent No. 1,421. Richard Walker. Knitting Machine. December 5, 1839. (SI neg. 89-6724)

Patent No. 2,720. John A. Roebling. Wire Rope Making Machine. July 16, 1842. (SI neg. 86-6332)

Patent No. 6,469. Abraham Lincoln. Buoyant Air Chambers for Vessels. May 22, 1849. (SI neg. 86-6162)

Patent No. 7,921. Delamar Kinnear. Lard Lamp. February 4, 1851. (SI neg. 89-6707)

Selected Patent Nos. from 9,257 to 200,299. Clothespin models dating from 1852 to 1878. (SI neg. 83-14917)

Patent No. 10,987. Silas A. Holmes. Daguerreotype Camera. May 30, 1854. (SI neg. 86-6328)

Patent No. 11,696. James R. Napier and William Rankine. Hot Air Engine. September 19, 1854. (SI neg. 86-6552)

Patent No. 16,234. James E. A. Gibbs. Sewing Machine. December 16, 1856. (SI neg. 2007-6332)

Patent No. 16,434. James E. A. Gibbs. Sewing Machine. January 20, 1857. (SI neg. 2007-6308)

Patent No. 19,015. David W. Clark. Sewing Machine. January 5, 1858. (SI neg. 2007-6328)

Patent No. 19,405. John H. Belter. Chair Manufacturing Method. February 23, 1858. (SI neg. 86-10223)

Patent No. 21,243. Jabez Burns. Adding Machine. August 24, 1858. (SI neg. 89-6706)

Patent No. 21,751. James E. A. Gibbs. Sewing Machine. October 12, 1858. (SI neg. 2007-6327)

Patent No. 22,464. William P. Uhlinger. Sewing Machine Cabinet. December 28, 1858. Cabinet is closed and the sewing machine is concealed. (SI neg. 2006-1876)

Patent No. 22,464 (detail). Cabinet doors are open with the sewing machine in place. (SI neg. 2006-1878)

Patent No. 22,464 (detail). Doors are open showing the sewing machine still lowered. (SI neg. 2006-1877)

Patent No. 26,295. Charles W. Richter. Lamp. November 29, 1859. (SI neg. 83-12604.2A)

Patent No. 28,159. Haro J. Coster. Rocking Chair. May 8, 1860. (SI neg. 89-6586)

Patent No. 29,200. Frederick E. Sickels. Steam Steering Apparatus. July 17, 1860. (SI neg. 86-6331)

Patent No. 31,887. Frederick Heidrick. Lamp. April 2, 1861. (SI neg. 83-12604.5)

Patent No. 34,088. Lansing Marble. Basket. January 7, 1862. (SI neg. 90-15658.2)

Patent No. 41,494. Andrew Dougherty. Fishing Reel. February 9, 1864. (SI neg. 86-6555)

Patent No. 51,668. Burkhard Muller. Imitation Embroidery. December 19, 1865. (SI neg. 93-15028)

Patent No. 54,885. A. A. Fradensburg. Animal Trap. May 22, 1866. (SI neg. 89-6685)

Patent No. 85,600. William C. Michaelis. Artificial Teeth. January 5, 1869. (SI neg. 83-15989.16)

Patent No. 99,743. William T. Smith. Sewing Machine. February 8, 1870. (SI neg. 2006-1859)

Left and above: Patent No. 99,743 (details). William T. Smith's Sewing Machine. (SI neg. 2006-1862)

Patent No. 105,548. Milton Chase. Sewing Machine Table. July 19, 1870. (SI neg. 2006-1874)

Patent No. 109,710. Bennett C. Bailey. Washing Machine. November 29, 1870. (SI neg. 2006-1872)

Patent No. 115,357. Montague Redgrave. Bagatelle. May 30, 1871. (SI neg. 86-5804)

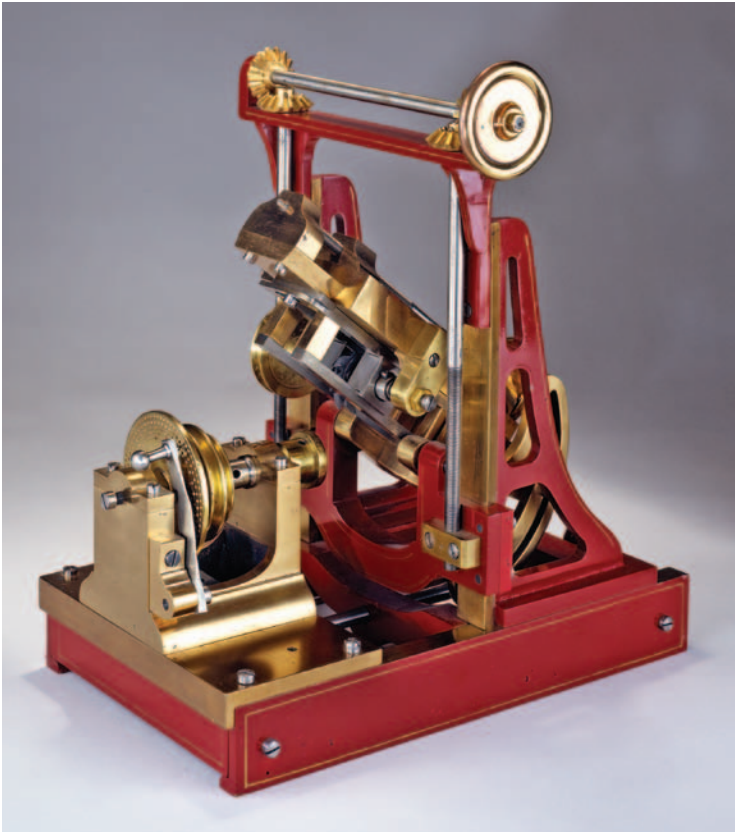

Patent No. 121,127. Martin Power. Clothes Dryer and Ironing Table. November 21, 1871. (SI neg. 83-13265)

Patent No. 135,089. Sylvanus Cox and William W. Fanning. School Desk. January 21, 1873. (SI neg. 86-6164)

Patent No. 147,981. Joseph B. Sargent. Sewing Machine Table Casters. February 24, 1874. (SI neg. 2006-1886)

Patent No. 153,370. John A. Peer. Gear Cutting Machine. July 21, 1874. (SI neg. 86-6311)

Patent No. 156,230. Murdock McLeod. Spinning Wheel. October 27, 1874. (SI neg. 90-16430)

Patent No. 165,419. Horace C. Jones. Stave Basket. July 13, 1875. (SI neg. 90-15659.1)

Patent No. 173,410. Raymond Longin. Pendulum. February 15, 1876. (SI neg. 83-16183.26A)

Patent No. 177,462. Ferdinand Braun. Combination Bed and Lounge. May 16, 1876. (SI neg. 86-5801)

Patent No. 180,932. Peter E. Rudel. Wash Bench and Wringer. August 8, 1876. (SI neg. 80-13968)

Patent No. 183,695. Edwin E. Mersick. Foot Rest. October 24, 1876. (SI neg. 86-6565)

Patent No. 189,164. Henry Williams. Feathering Paddle-Wheel. April 3, 1877. (SI neg. 89-6721)

Patent No. 193,006. Peter A. La France. Street Sign. July 10, 1877. (SI neg. 83-15990-25A)

Patent No. 203,401. Curran Battle. Cotton Bale Tie. May 7, 1878. (SI neg. 83-14920)

Patent No. 208,594. Robert W. Harper. Wash Board. October 1, 1878. (SI neg. 83-15477.19)

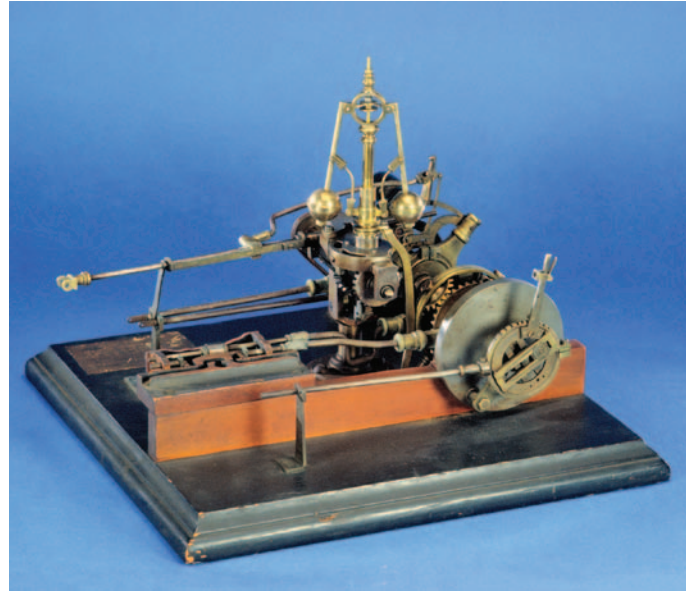

Patent No. 209,862. John Cook. Wind Engine. November 12, 1878. (SI neg. 86-6165)

Patent No. 212,000. John H. Heinz. Vegetable Sorter. February 4, 1879. (SI neg. 86-6327)

Patent No. 213,751. Adam Heinz. Refrigerator. April 1, 1879. (SI neg. 89-6702)

Patent No. 220,151. Mathias L. Jacquemin. Valve Regulating Mechanism. September 30, 1879. (SI neg. 89-6764)

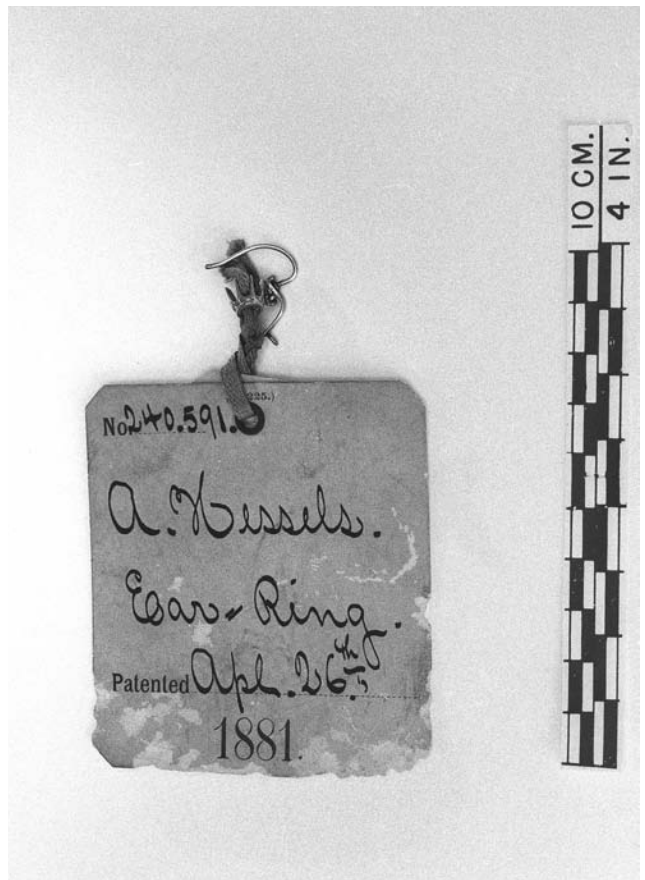

Left: Patent No. 224,174. John Glendenning. School Desk. February 3, 1880. Right: Patent No. 135,089. Sylvanus Cox and William Fanning. School Desk. January 21, 1873. (SI neg. 83-13275)

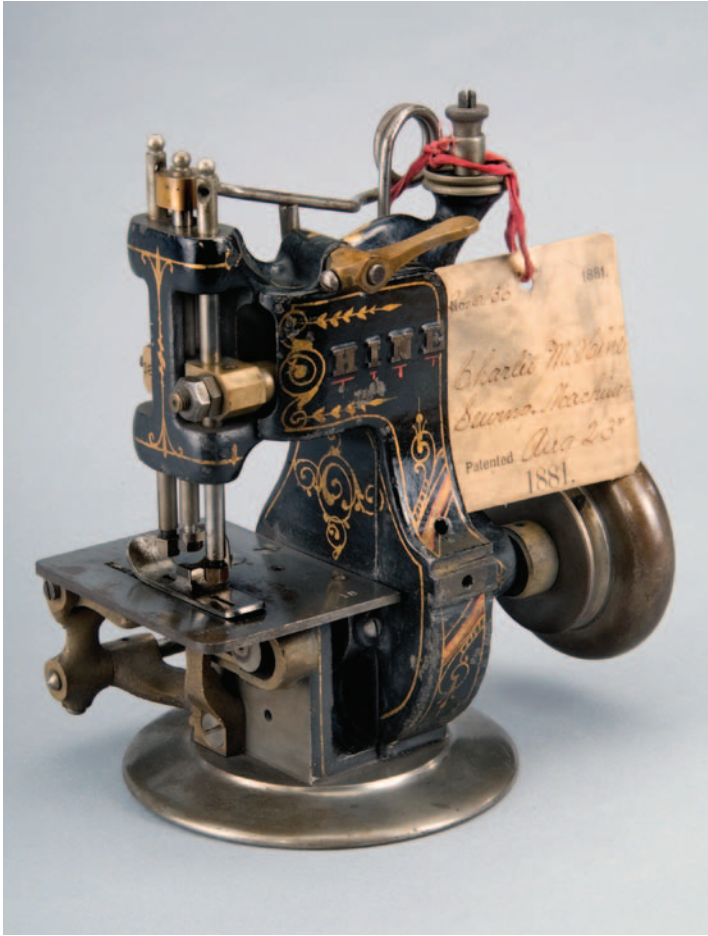

Patent No. 226,265. Henry H. Bevil. Windmill. April 6, 1880. (SI neg. 86-5802)

Patent No. 229,985. Charles G. Everet. Corn Planter. July 13, 1880. (SI neg. 89-6743)

Patent No. 240,591. Anthony Hessels. Earring. April 26, 1881. (SI neg. 83-15990.15A)

Patent No. 246,136. Charlie M. Hine. Sewing Machine. August 23, 1881. (SI neg. 2006-13428)

Patent No. 246,136. Sewing Machine, alternate view. (SI neg. 2006-13429)

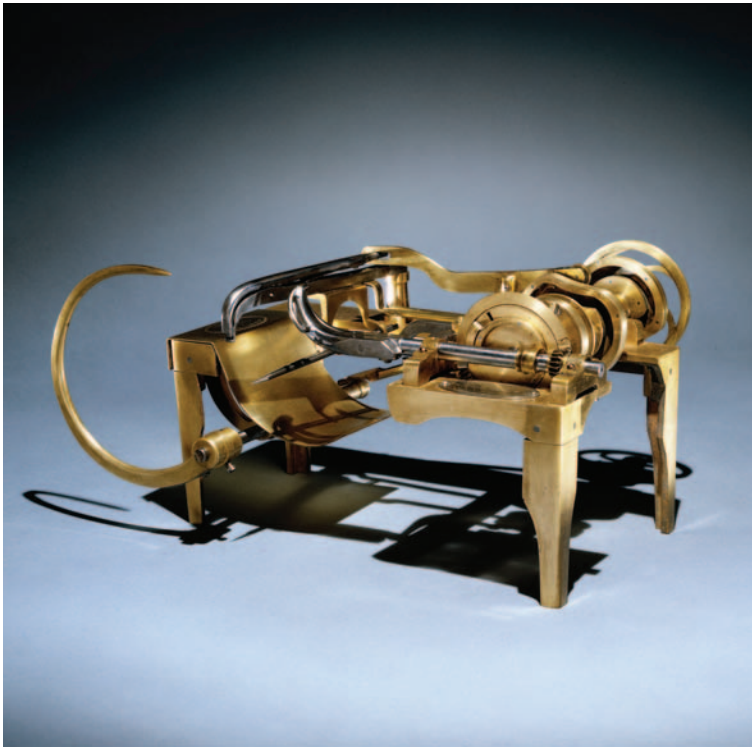

Patent No. 246,136 (detail). Close-up of stamping, "Invented & Built by C. M. Hine." (SI neg. 2006-13427)

Patent No. 252,103. Charles Hammelmann. Portable Forge. January 10, 1882. (SI neg. 89-6675)

Patent No. 278,497. George W. Brown. Corn Planter. May 29, 1883. (SI neg. 89-6684)

Patent No. 311,492. Harvey R. Ingledue. Grain Binding Machine. February 3, 1885. (SI neg. 86-5799)

Patent No. 353,970. Sally Adolph Rosenthal. Pocket Sewing Machine. December 7, 1886. (SI neg. 2006-1890)

Patent No. 467,660. George B. Davison. Cultivator. January 26, 1892. (SI neg. 89-6657)

Guide to the Listing by Invention Name

The *Listing by Invention Name* organizes NMAH patent models alphabetically by invention name. Within a subject with several patents, such as adding machines, the models are next sorted by patent number, which arranges the models chronologically by month, day, and year. The inventor's first and last names are included. The majority of patents were held by an individual inventor. The last name of coinventors can be located in the *Listing by Inventor*.

An inventor's written patent specification explained the patented claims and matched the model's features to the drawing of the invention. The specification provided provenance for the inventor's name, including names of coinventors; the date of patent issue; and the residence of the inventor at the time of the patent issue. Nomenclature for the name of the invention also came from the specification. Sometimes the wording of the invention name would vary from the drawing to the written specification. In those cases, the description with the clearest meaning was used. For instance, the specification for John A. Roebling's patent no. 6082 is titled "Improvement in Tops for Wire Ropes," and the drawing titles it "Wire Rope Machine." The resulting choice, "Rope Making Machine, Wire," was selected for publication. Careful thought was given to the order of the terms within the name of an invention to provide for standardized searching by invention. Terminology used was consistent with the nineteenth-century Patent Office nomenclature.

Within the listings, a dagger (†) next to the patent number indicates that a photograph of the model is included in Volume 1; two daggers (††) indicate a photo is in Volume 2. See the Appendix for a complete list of all illustrations in the present volume.

Patent No. 118,435. George P. Clarke. Creeping Baby Doll. August 29, 1871. (SI neg. 86-6160)

Invention Name	Patent Number	Month and Day	Year	Inventor First Name, Middle Initial	Inventor Last Name
Acupuncture Instrument	60917	January 1	1867	Anson R.	Brown
Acupuncture Instrument	102262	April 26	1870	Gardner	Herrick
Adding Machine	11726	September 26	1854	Aaron L.	Hatfield
Adding Machine	21243 †	August 24	1858	Jabez	Burns
Adding Machine	24990	August 9	1859	John T.	Campbell
Adding Machine	27418	March 13	1860	John	Ballou
Adding Machine	39222	July 14	1863	George B.	Fowler
Adding Machine	40105	September 29	1863	Milton C.	Jeffers
Adding Machine	137107	March 25	1873	Archibald M.	Stephenson
Adding Machine	140146	June 24	1873	Gustavus	Linderoos
Adding Machine	153522	July 28	1874	Frank S.	Baldwin
Adding Machine	153826	August 4	1874	Calvin J.	Holman
Adding Machine	155772	October 6	1874	Elmore W.	Taylor
Adding Machine	176833	May 2	1876	David	Carroll
Adding Machine	200911	March 5	1878	Milton W.	Hinkle
Adding Machine	209690	November 5	1878	Reuben R.	James
Adding Machine	263904	September 5	1882	Christian W.	Hergenroeder
Adding Machine	431365	July 1	1890	William	Lang
Adding Stick	206136	July 16	1878	Robert F.	Roche
Advertising Tablet	215665	May 20	1879	John E.	Phillips
Album, Easel	200922	March 5	1878	John C.	Koch, Jr.
Alloy, Anti-Friction	429249	June 3	1890	Samuel	Singley
Amalgamating Tub	203075	April 30	1878	William	Purvine
Anchor	97342	November 30	1869	Elisha Trask	Barlow
Andiron	3170	July 12	1843	Edward	Smylie
Apparatus for Raising Sunken Vessels	2572	April 21	1842	Theodore R.	Timby
Arithmometer	18692	November 24	1857	Thomas	Hill
Arm Rest	189157	April 3	1877	Philo R.	Wagor
Arm Splint	158893	January 19	1875	David	Bissell
Art of Decorating Wood	333127	December 29	1885	William	Hyland
Ash Sifter	47615	May 9	1865	T. W.	Brown
Auger, Hollow	234693	November 23	1880	George N.	Stearns
Auger, Ice	139769	June 10	1873	William A.	Clark
Auger, Post	91387	June 15	1869	A.	Vaughan
Automobile, Gasoline	549160	November 5	1895	George B.	Selden
Awl	65843	June 18	1867	Sineus E.	Totten
Awning Attachment	147090	February 3	1874	De Witt C.	Baxter
Baby Pen, Folding	169471	November 2	1875	Hiram J.	Parker
Baby Walker	202724	April 23	1878	John H.	Headler
Badge, Campaign	83486	October 27	1868	Henry C.	Griggs
Bag Holder	221251	November 4	1879	Myron	Pomroy
Bag, Woven	56081	July 3	1866	Charles	Moore, Sr.
Bag, Woven	240645	April 26	1881	Samuel	Bernstein
Bag, Woven	570174	October 27	1896	Jesse A.	Knight
Baking, Multiple Roasting Pans for	124256	March 5	1872	Thomas J. T.	Cummings
Balance, Compensation	4135	August 4	1845	John	Bliss
Balance, Computing Spring	103977	June 7	1870	Samuel R. P.	Camp
Balance, Steam Engine	216818	June 24	1879	James O.	Baird
Bale Band Bender	220636	October 14	1879	Lewis	Miller
Bale Band Tightener	207902	September 10	1878	John L.	Sheppard
Band Making Machine, Endless	145386	December 9	1873	Leedham	Binns
Band, Endless	143743	October 21	1873	Leedham	Binns
Barbing Machine, Wire	232831	October 5	1880	Paul W.	Leffler
Bark Extract Making Machine	76755	April 14	1868	James W.	Jones
Bark Extracting Machine	64323	April 30	1867	Benjamin	Irving
Barrel Compressing Machine	165163	July 6	1875	Elihu J.	Granger
Barrel Dumper	225792	March 23	1880	Myron C.	Briggs
Barrel Head Machine	68856	September 17	1867	John B.	Dougherty
Barrel Head Making Machine	30024	September 11	1860	Charles B.	Hutchinson
Barrel Head Making Machine	209311	October 22	1878	Abraham	Wason
Barrel Hoop Finishing Machine	233471	October 19	1880	David H.	Burrell
Barrel Hoop Making Machine	245495	August 9	1881	Erastus	Hibbard

Invention Name	Patent Number	Month and Day	Year	Inventor First Name, Middle Initial	Inventor Last Name
Barrel Machine	196927	November 6	1877	James	Naylor, Jr.
Barrel Making Machine	205923	July 9	1878	Clark W.	Thompson
Barrel Making Machine	232054	September 7	1880	David	Murray
Barrel Trussing Machine	200733	February 26	1878	Horace W.	King
Barrel Trussing Machine	211914	February 4	1879	Horace W.	King
Basket	49774	September 5	1865	E. B.	Lyman
Basket	52914	February 27	1866	G. Z.	Van Riper
Basket	116374	June 27	1871	Benjamin F.	Tuthill
Basket	121758	December 12	1871	Elisha B.	Cole
Basket	124231	March 5	1872	Hercy E.	Tower
Basket	130135	August 6	1872	Horace C.	Jones
Basket	130136	August 6	1872	Horace C.	Jones
Basket	130137	August 6	1872	Horace C.	Jones
Basket	133941	December 17	1872	Horace C.	Jones
Basket	137368	April 1	1873	William C.	Higgins
Basket	148784	March 17	1874	Robert W.	Van Ornum
Basket	149264	March 31	1874	Henry H.	Stevens
Basket	150424	May 5	1874	Sylvender F.	Maynard
Basket	198289	December 18	1877	Abraham	Fox
Basket	198696	December 25	1877	Jacob W.	Sickler
Basket	205355	June 25	1878	Isaac J.	Cole
Basket	217572	July 15	1879	Elmer D.	Ballou
Basket	388425 ††	August 28	1888	Elizabeth N.	Little
Basket, Fruit	24723	July 12	1859	David	Cook

Invention Name	Patent Number	Month and Day	Year	Inventor First Name, Middle Initial	Inventor Last Name
Fire Kindler	101704	April 12	1870	Charles	Batcheller
Fire Kindler	104336	June 14	1870	Austin S.	Morse
Fire Kindler	115216	May 23	1871	Abraham B.	King
Fire Kindler	126245	April 30	1872	William	Altick
Fire Kindler	126347	April 30	1872	David W.	Thompson
Fire Kindler	127365	May 28	1872	Barton	Pickering
Fire Kindler	136451	March 4	1873	Charles A.	Nisbett
Fire Kindler	147556	February 17	1874	Barzilla S.	Harrington
Fire Kindler	149510	April 7	1874	Jesse	Newman
Fire Kindler	153875	August 4	1874	Richard G.	Williams
Fire Kindler	167520	September 7	1875	David	Frankfoder
Fire Kindler	176705	April 25	1876	Jerome B.	Sweetland
Fire Kindler	180248	July 25	1876	Rollin C.	Lewis
Fire Kindler	186593	January 23	1877	Josiah	McFarland
Fire Kindler	228131	May 25	1880	David B.	Smith
Fire Kindler	359272	March 15	1887	Richard	Miller
Fire Lighter	74782	February 25	1868	Levi H.	Whitney
Fire Proof Building	224173	February 3	1880	Joseph	Gilbert
Firearm	1461	December 31	1839	Silas	Day
Firearm	11917	November 7	1854	Wendell	Wright
Firearm	28677	June 12	1860	James	Lord
Firearm Lock Mechanism	104211	June 14	1870	George W.	Schofield
Firearm Lock Mechanism	104223	June 14	1870	William	Soper
Firearm Lock Mechanism	135671	February 11	1873	Christopher M.	Spencer
Firearm Lock Mechanism	202418	April 16	1878	Amedee T.	De Mouncie
Firearm Lock, Safety	451191	April 28	1891	William H.	Whitney
Firearm Magazine	5814	September 26	1848	Milo M.	Cass
Firearm Magazine	6136	February 20	1849	Christian W.	Buchel

Firearm Magazine Hammer	15262	July 1	1856	James N.	Ward
Firearm Percussion Primer	4208	September 22	1845	Edward	Maynard
Firearm Primer Lock	14319	February 26	1856	John H. B.	Latrobe
Firearm Sight	25389	September 13	1859	Henry W.	Colvin
Firearm, Breech Loading	747	May 25	1838	William	Jenks
Firearm, Breech Loading	960	October 3	1838	Samuel	Adams
Firearm, Breech Loading	1141	May 3	1839	Nathan	Starr
Firearm, Breech Loading	1611	May 19	1840	James R.	Thomas
Firearm, Breech Loading	3649	July 1	1844	William W.	Hubbell
Firearm, Breech Loading	3686	July 30	1844	Edward	Savage
Firearm, Breech Loading	6139	February 27	1849	David	Minesinger
Firearm, Breech Loading	8637	January 6	1852	Richard S.	Lawrence
Firearm, Breech Loading	11685	September 19	1854	Henry W.	Adams
Firearm, Breech Loading	11835	October 24	1854	Gustav F.	Palmie
Firearm, Breech Loading	12681	April 10	1855	Ferdinand	Klein
Firearm, Breech Loading	13154	July 3	1855	Ethan	Allen
Firearm, Breech Loading	14077	January 8	1856	James H.	Merrill
Firearm, Breech Loading	14491	March 25	1856	Ambrose E.	Burnside
Firearm, Breech Loading	15995	October 28	1856	George W.	Morse
Firearm, Breech Loading	16288	December 23	1856	Hermann	Schroeder
Firearm, Breech Loading	30033	September 18	1860	Ethan	Allen

Invention Name	Patent Number	Month and Day	Year	Inventor First Name, Middle Initial	Inventor Last Name
Firearm, Breech Loading	30537	October 30	1860	Edward	Maynard
Firearm, Breech Loading	34319	February 4	1862	Christopher M.	Spencer
Firearm, Breech Loading	34729	March 25	1862	Henry	Berg
Firearm, Breech Loading	35241	May 13	1862	William	Johnston
Firearm, Breech Loading	35488	June 3	1862	James C.	Cooke
Firearm, Breech Loading	36709	October 21	1862	Edward	Gwyn
Firearm, Breech Loading	36779	October 28	1862	Sebre	Howard
Firearm, Breech Loading	40151	September 29	1863	John H.	Wichmann
Firearm, Breech Loading	42471	April 26	1864	George	Hancock
Firearm, Breech Loading	44312	September 20	1864	William D.	Hillis
Firearm, Breech Loading	45801	January 3	1865	Cosme Garcia	Saez
Firearm, Breech Loading	47755	May 16	1865	C. Edward	Sneider
Firearm, Breech Loading	48423	June 27	1865	Edward	Maynard
Firearm, Breech Loading	49718	September 5	1865	Cyprien	Chabot
Firearm, Breech Loading	52925	February 27	1866	Hiram	Berdan
Firearm, Breech Loading	60106	November 27	1866	H. H.	Wolcott
Firearm, Breech Loading	64999	May 21	1867	Joseph	Needham
Firearm, Breech Loading	69941	October 15	1867	Jacob	Snider, Jr.
Firearm, Breech Loading	78603	June 2	1868	Samuel	Norris
Firearm, Breech Loading	81059	August 11	1868	Bethel	Burton
Firearm, Breech Loading	81100	August 18	1868	Joe V.	Meigs
Firearm, Breech Loading	84929	December 15	1868	Ethan	Allen
Firearm, Breech Loading	89947	May 11	1869	Gustav	Schulz
Firearm, Breech Loading	89955	May 11	1869	Louis B.	Tiebel
Firearm, Breech Loading	97780	December 14	1869	Francois A.	Le Mat
Firearm, Breech Loading	109277	November 15	1870	Frederick	Vetterlin
Firearm, Breech Loading	110353	December 20	1870	Stephen	Gerngross
Firearm, Breech Loading	116225	June 20	1871	George W.	Schofield
Firearm, Breech Loading	141383	July 29	1873	Joseph	Rider
Firearm, Breech Loading	169641	November 9	1875	Benjamin B.	Hotchkiss
Firearm, Breech Loading	196399	October 23	1877	Henry	Sutter
Firearm, Breech Loading	196748	November 6	1877	George H.	Fox
Firearm, Breech Loading	209613	November 5	1878	Richard	Fay
Firearm, Breech Loading	213760	April 1	1879	Charles A.	King
Firearm, Breech Loading	220271	October 7	1879	John M.	Browning
Firearm, Breech Loading	242529	June 7	1881	William W.	Greener
Firearm, Breech Loading	248249	October 11	1881	William H.	Baker
Firearm, Breech Loading	308482	November 25	1884	William	Folk
Firearm, Breech Loading & Magazine	143614	October 14	1873	Bethel	Burton
Firearm, Flint-Lock to Percussion	16503	January 27	1857	James N.	Ward
Firearm, Many Chambered	603	February 15	1838	Epenetus A.	Bennett
Firearm, Many Chambered Cylinder	188	April 29	1837	John W.	Cochran
Firearm, Many Chambered Cylinder	707	April 24	1838	Rufus	Nichols
Firearm, Many Chambered Cylinder	832	July 12	1838	Elijah	Jaquith
Firearm, Muzzle Loading	1422	December 5	1839	Benjamin F.	Smith
Firearm, Muzzle Loading	15041	June 3	1856	George	Kesling
Firearm, Rapid Firing	466778	January 12	1892	William B.	Forbes
Firearm, Repeating	6723	September 18	1849	George	Leonard, Jr.
Firearm, Repeating	15110	June 10	1856	Alexander	Hall
Firearm, Repeating	15144	June 17	1856	Henry S.	North
Firearm, Repeating	16477	January 27	1857	Heinrich	Genhart
Firearm, Repeating	22969	February 15	1859	Henry	McKenny
Firearm, Repeating	35685	June 24	1862	P. J.	Jarre
Firearm, Revolving	7894	January 7	1851	James	Warner
Firearm, Revolving	9694	May 3	1853	Robert	Adams
Firearm, Revolving	13581	September 18	1855	William W.	Marston
Firearm, Revolving	14118	January 15	1856	Eben T.	Starr
Firearm, Revolving	15734	September 16	1856	Edmund H.	Graham
Firearm, Revolving	15797	September 30	1856	Joseph	Adams
Firearm, Revolving	22005	November 9	1858	Ethan	Allen
Firearm, Revolving	22666	January 18	1859	Henry S.	North
Firearm, Revolving	22905	February 8	1859	John	Walch

Invention Name	Patent Number	Month and Day	Year	Inventor First Name, Middle Initial	Inventor Last Name
Firearm, Revolving	28331	May 15	1860	Edward	Savage
Firearm, Revolving	28951	July 3	1860	Ethan	Allen
Firearm, Revolving	30079	September 18	1860	Daniel	Moore
Firearm, Revolving	30260	October 2	1860	August	Spellier
Firearm, Revolving	30602	November 6	1860	John	Adams
Firearm, Revolving	33328	September 24	1861	Ethan	Allen
Firearm, Revolving	33770	November 26	1861	Charles H.	Alsop
Firearm, Revolving	35067	April 29	1862	Ethan	Allen
Firearm, Revolving	35404	May 27	1862	Aaron C.	Vaughan
Firearm, Revolving	38921	June 16	1863	Horace	Smith
Firearm, Revolving	39318	July 21	1863	Willard C.	Ellis
Firearm, Revolving	47252	April 11	1865	Alexander	Guerriero
Firearm, Revolving	47712	May 16	1865	George H.	Gardner
Firearm, Revolving	51628	December 19	1865	Eben T.	Starr
Firearm, Revolving	51690	December 26	1865	George C.	Bunsen
Firearm, Revolving	52248	January 23	1866	Henry S.	Josselyn
Firearm, Revolving	53548	March 27	1866	Prosper	Polain
Firearm, Revolving	57864	September 11	1866	Albert	Christ
Firearm, Revolving	85350	December 29	1868	John	Adams
Firearm, Revolving	109914	December 6	1870	Charles J.	Linberg
Firearm, Revolving	116422	June 27	1871	Sullivan	Forehand
Firearm, Revolving	138047	April 22	1873	George W.	Schofield
Firearm, Revolving	143394	September 30	1873	Rollin	White
Firearm, Revolving	187980	March 6	1877	Daniel	Moore
Firearm, Revolving	194653	August 28	1877	James A.	Crocker
Firearm, Revolving	207168	August 20	1878	Henry M.	Erskine
Firearm, Revolving	213221	March 11	1879	Paul	Mausser
Firearm, Revolving	222168	December 2	1879	Daniel B.	Wesson
Firearm, Revolving Breech	8982	June 1	1852	Henry S.	North
Firearm, Signal or Bomb	43881	August 16	1864	Ralph	Graham
Fireplace	1578	April 30	1840	Homer	Roberts
Fireplace	171565	December 28	1875	David	Hayes
Fireplace Flue	784	June 14	1838	Thomas	Whitson
Fireplace, Coal Grate	1001	November 9	1838	James	Atwater
Fireplace, Open	249	June 30	1837	Roger M.	Sherman
Firewood Splitting Machine	34808	April 1	1862	Henry	Behn
Fish Grappling Spear	144110	October 28	1873	Jonah W.	Knapp
Fishing Float	86609	February 2	1869	John A.	Terrell
Fishing Line Making Machine	59120	October 23	1866	Peter	Brooks
Fishing Reel	27305	February 28	1860	Mark S.	Palmer
Fishing Reel	41494 †	February 9	1864	Andrew	Dougherty
Fishing Reel	71344	November 26	1867	Julius	Von Hofe
Fishing Reel	147414	February 10	1874	Charles W.	MacCord
Fishing Reel	214495	April 22	1879	L. Taylor	Dickson
Fishing Reel	220776	October 21	1879	Simon W.	Wardwell, Jr.
Fishing Reel	260932	July 11	1882	James B. D'A.	Boulton
Fishing Reel	377100	January 31	1888	George S.	Gates
Flax Dressing Machine	10876	May 9	1854	E. L.	Norfolk
Fleam	236084	December 28	1880	Herman	Reinhold
Flexible Shaft	130253	August 6	1872	Nelson	Stow
Floor Covering Manufacture	58497	October 2	1866	James H.	Spencer
Floral Ornament	129173	July 16	1872	Henry J.	Rogers
Flour Bolting & Dressing Machine	226360	April 6	1880	Heinrich	Seck
Flour Bolting Machine	207448	August 27	1878	Adolph W.	Schoenleben
Flour Crushing Machine	199605	January 22	1878	Federigo	Wegmann
Flour Dressing Machine	232379	September 21	1880	Gardner E.	Throop
Flushing Box for Water Closets	202586 ††	April 16	1878	William G.	Rhoads
Flute	17054	April 14	1857	John	Pfaff
Fluting Machine	122607	January 9	1872	Jacob F.	Hayen
Fluting Machine	174999	March 21	1876	Hermann	Albrecht
Fly Frame	91032	June 8	1869	Job G.	Luscomb
Fly Frame Flyer	80783	August 4	1868	James S.	Streeter

Invention Name	Patent Number	Month and Day	Year	Inventor First Name, Middle Initial	Inventor Last Name
Fly Net Making Machine	97809	December 14	1869	A.	Prutzmann
Fly String Cutter & Rounder	92377	July 6	1869	S. W.	Sheller
Flyer	33866	December 3	1861	David F.	Smith
Flyer & Bobbin for Twisting	1235	July 12	1839	Oliver	Ellsworth
Flyer for Speeder & Fly Frame	200321	February 12	1878	William C.	Macomber
Flyer for Spinning Cotton	1043	December 28	1838	John	Howarth
Flyer Grooving Machine	829	July 9	1838	James S.	Brown
Flyer Guide, Manufacturing Machine	41297	January 19	1864	David L.	Hill
Flyer, Covering Bonnet Wire	140322	June 24	1873	Erastus H.	Tyler
Folding Machine	191819	June 12	1877	Stephen D.	Tucker
Folding Machine, Mosquito Netting	39868	September 8	1863	Jacob A.	Van Riper
Food Warmer	76390	April 7	1868	Edward	Bevan
Foot Rest	183695 †	October 24	1876	Edwin E.	Mersick
Foot Warmer	5029	March 20	1847	George H.	Thatcher
Foot Warmer	13859	November 27	1855	Nathaniel	Waterman
Foot Warmer	35532	June 10	1862	Joseph W.	Merrill
Foot Warmer	35936	July 22	1862	Solomon	Hunt
Foot Warmer	50123	September 26	1865	Hermann	Hock
Foot Warmer	51534	December 19	1865	Josias J.	Andrews
Foot Warmer	172773	January 25	1876	Edwards A.	Reed
Foot Warmer For Vehicles	185290	December 12	1876	Henry P.	Buckland
Foot Warmer, Lamp & Iron Heater	75802	March 24	1868	Eleazer	Small
Forceps, Sheathed Bladder	268039	November 28	1882	John W.	Merrill, Jr.
Forge, Portable	252103 †	January 10	1882	Charles	Hammelmann
Fracture Apparatus	32229	April 30	1861	Theodore	Burr
Fringe	124051	February 27	1872	James E.	Gillespie
Fringe	210869	December 17	1878	August	Moll
Fringe Cutting Machine	16977	April 7	1857	William J.	Horstmann
Fringe Machine	184637	November 21	1876	Jesse B.	Lincoln
Fringe Manufacture, Netted	358452	March 1	1887	Charles W.	Jackson
Fringe Manufacture, Woven	353433	November 30	1886	Samuel	Steinecke
Fringe Twisting Machine	8424	October 14	1851	John	Nesmith
Fringe Twisting Machine	87620	March 9	1869	Edwin	Barton
Fringe Twisting Machine	114562	May 9	1871	Hiland	Howard
Fringe Twisting Machine	147550	February 17	1874	William	Brooks
Fringe Twisting Machine	182590	September 26	1876	Samuel	Mortimer
Fringe Twisting Machine, Shawl	6911	November 27	1849	Milton D.	Whipple
Fuel Compressing Apparatus	208929	October 15	1878	William H.	Rosewarne
Fulling Machine	2255	September 18	1841	Henry A.	Wells
Fulling Machine	10453	January 24	1854	James H.	Jennings
Fulling Machine, Hat Bodies	75122	March 3	1868	Angelo	Gattaneo
Fulling Mill	78660	June 9	1868	Ernst	Gessner
Fulling Mill	173922	February 22	1876	Rudolf	Eickemeyer
Fulling Mill	175641	April 4	1876	Joel M.	Baldwin
Fulling Mill	178599	June 13	1876	Charles P.	Cooledge
Fulling Mill	182909	October 3	1876	Rudolf	Eickemeyer
Fulling Mill	187820	February 27	1877	Charles T.	Colby
Fulling Mill	195810	October 2	1877	Rudolf	Eickemeyer
Fulling Mill	203355	May 7	1878	Willard H.	Mase
Fulling Mill	209152	October 22	1878	Alonzo C.	Arnold
Fulling Mill	245362	August 9	1881	Rudolf	Eickemeyer
Fulling Mill Measuring Attachment	209229	October 22	1878	Theodore W.	Clark
Furnace	23	September 8	1836	Frederick A.	Fickardt
Furnace	218326	August 5	1879	Charles William	Siemens
Furnace for Grain Dryer	40090	September 29	1863	Addison G.	Williams
Furnace Fuel Feeder	180550	August 1	1876	Allin	Cockrell
Furnace Gas Check, Blast	202730	April 23	1878	Daniel N.	Jones
Furnace Grate	221430	November 11	1879	Francis B.	Stevens
Furnace Grate	283144	August 14	1883	Philander	Rexford
Furnace, Blast	228528	June 8	1880	John M.	Hartman
Furnace, Hot Air	5459	February 29	1848	Robert	Hillson
Furnace, Hot Air	55564	June 12	1866	Edward	Webster

Invention Name	Patent Number	Month and Day	Year	Inventor First Name, Middle Initial	Inventor Last Name
Furnace, Hot Air	95281	September 28	1869	B. F.	Sturtevant
Furnace, Hot Air	134118	December 17	1872	Cyrus	White
Furnace, Hot Air	158954	January 19	1875	James A.	Lawson
Furnace, Hot Air	163050	May 11	1875	William O.	Crocker
Furnace, Steam Boiler	15803	September 30	1856	David H.	Fowler
Furnace, Steam Boiler	20840	July 6	1858	Henry	Yates
Furnace, Steam Boiler	238235	March 1	1881	Alexander L.	Holley
Furniture Drawer	158423	January 5	1875	John A.	Knight
Galvanometer, Reflecting	92228	July 6	1869	William	Thomson
Game	108587	October 25	1870	D. Frank	Hale
Game Counter	203189	April 30	1878	Philip	Orth
Game Counter	204404	May 28	1878	Charles B.	Wessmann
Game Counter	242635	June 7	1881	Le Roy B.	Haff
Game, Bagatelle	115357 †	May 30	1871	Montague	Redgrave
Garment Edge Protection	633496	September 19	1899	Aaron M.	Weber
Garment Edging	589720	September 7	1897	Henry	Haase
Gas Apparatus	228547	June 8	1880	Hiram S.	Maxim
Gas Apparatus for Headlights	99927	February 15	1870	Hiram S.	Maxim
Gas Carbureting Machine	153952	August 11	1874	Loring P.	Hawes
Gas Carbureting Machine	154475	August 25	1874	Benjamin F.	Grimes
Gas Machine	88079	March 23	1869	Silas C.	Salisbury
Gas Machine	97748	December 7	1869	T. G.	Springer
Gas Machine, Generating & Carbureting	92943	July 27	1869	Cleaveland F.	Dundersdale
Gas Making Process	164093	June 8	1875	Moses W.	Kidder
Gas Manufacturing Apparatus	154552	September 1	1874	Moses W.	Kidder
Gas Manufacturing Apparatus	224266	February 10	1880	Henry Y.	Atrill
Gas Manufacturing Apparatus	226397	April 13	1880	Mahlon S.	Frost
Gas Purifier	21121	August 10	1858	W. F.	Danowsky
Gas Purifier	140034	June 17	1873	James T.	Goodfellow
Gas Purifying Apparatus	156351	October 27	1874	David	Hulett
Gas Retort	22591	January 11	1859	H. K.	Symmes
Gas Retort	23433	March 29	1859	Davis L.	Weatherhead
Gas Retort Charger	212572	February 25	1879	Abbott Q.	Ross
Gas Retort Discharging Apparatus	212569	February 25	1879	Abbott Q.	Ross
Gas Retort Mouth Piece	143998	October 28	1873	Thomas R.	Rowland
Gas Stand, Portable	55447	June 12	1866	Boyd	Allen
Gasometer	20988	July 27	1858	P. T.	Burtis
Gate	202422	April 16	1878	Daniel	Edgar
Gate	236673	January 18	1881	Benjamin C.	Cressey
Gate, Farm	203479	May 7	1878	Thomas J.	Miller
Gauge	174211	February 29	1876	Thomas S.	Disston
Gauge, Conical Turning	49073	August 1	1865	Milton	Bowker
Gauge, Depth	66239	July 2	1867	Ivory A.	Hurd

Sewing Machine Hat Lining Device	239319	March 29	1881	Rudolf	Eickemeyer
Sewing Machine Hem Folder	25807	October 18	1859	Leverett	Clark
Sewing Machine Hem Stitcher	27944	April 17	1860	William W.	Allen

Invention Name	Patent Number	Month and Day	Year	Inventor First Name, Middle Initial	Inventor Last Name
Sewing Machine Hemmer	21355	August 31	1858	Henry B.	Odiorne
Sewing Machine Hemmer	24088	May 24	1859	Daniel	Barnum
Sewing Machine Hemmer	26207	November 22	1859	Lemuel W.	Serrell
Sewing Machine Hemmer	28889	June 26	1860	William P.	Mitchell
Sewing Machine Hemmer	31602	March 5	1861	Josiah	Howell
Sewing Machine Hemmer	32519	June 11	1861	George L.	Jencks
Sewing Machine Hemmer	37505	January 27	1863	Frank	Henry
Sewing Machine Hemmer	38662	May 26	1863	George W.	Downs
Sewing Machine Hemmer	43657	July 26	1864	Charles H.	Willcox
Sewing Machine Hemmer	46790	March 14	1865	William	Gaskill
Sewing Machine Hemmer	47629	May 9	1865	William	Gaskill
Sewing Machine Hemmer	47630	May 9	1865	William	Gaskill
Sewing Machine Hemmer	47632	May 9	1865	Henry	Goebel
Sewing Machine Hemmer	52646	February 13	1866	George	Overhiser
Sewing Machine Hemmer	58210	September 25	1866	Thomas W.	Browning
Sewing Machine Hemmer	67753	August 13	1867	James R.	Haggerty
Sewing Machine Hemmer	69095	September 24	1867	C. J.	Holcomb
Sewing Machine Hemmer	75079	March 3	1868	William H.	Thomas
Sewing Machine Hemmer	76720	April 14	1868	Edward P.	Davis
Sewing Machine Hemmer	80090	July 21	1868	George	Rehfuss
Sewing Machine Hemmer	80558	August 4	1868	John	Morrison
Sewing Machine Hemmer	84454	November 24	1868	Elihu	Wilder
Sewing Machine Hemmer	92692	July 20	1869	Henry	Bartleson
Sewing Machine Hemmer	96180	October 26	1869	Enoch S.	Yentzer
Sewing Machine Hemmer	96809	November 16	1869	E.	Howell
Sewing Machine Hemmer	96901	November 16	1869	Thomas H.	Eulass
Sewing Machine Hemmer	101988	April 19	1870	John V. D.	Eldredge
Sewing Machine Hemmer	102082	April 19	1870	Almon	Boomer
Sewing Machine Hemmer	102294	April 26	1870	Joshua E.	Mellen
Sewing Machine Hemmer	103611	May 31	1870	Moses Champero	Hawkins
Sewing Machine Hemmer	106155	August 9	1870	Milo	Harris
Sewing Machine Hemmer	106968	August 30	1870	William B.	Snyder
Sewing Machine Hemmer	107650	September 27	1870	Abel H.	Bartlett
Sewing Machine Hemmer	107889	October 4	1870	John V. D.	Eldredge
Sewing Machine Hemmer	110737	January 3	1871	Cyrus	Carleton
Sewing Machine Hemmer	111867	February 14	1871	Schamu M.	Moschcowitz
Sewing Machine Hemmer	115197	May 23	1871	Milo	Harris
Sewing Machine Hemmer	115282	May 30	1871	Daniel H.	Darby

Sole Cutting Machine	3857	December 16	1844	Richard	Richards
Sole Cutting Machine	39437	August 4	1863	Samuel S.	Weed
Sole Cutting Machine	70481	November 5	1867	Edgar M.	Stevens
Sole Cutting Machine	82716	October 6	1868	Micah	Hobbs
Sole Edge & Heel Shaver	42306	April 12	1864	Owen B.	Parker
Sole Edge Bending Machine	193447	July 24	1877	Samuel	Henshall
Sole Edge Burnisher	28181	May 8	1860	Elias T.	Ingalls
Sole Edge Burnishing Machine	173284	February 8	1876	Charles H.	Helms
Sole Edge Cutter	238303	March 1	1881	William D.	Orcutt
Sole Edge Finisher	143682	October 14	1873	Hadley P.	Fairfield
Sole Edge Finisher	176810	May 2	1876	Christopher	Reimel
Sole Edge Finishing Tool	60563	December 18	1866	Franz M.	Schmitt
Sole Edge Planer	17905	July 28	1857	Charles	Warren
Sole Edge Planer	18237	September 22	1857	Isaac A.	Dunham

Invention Name	Patent Number	Month and Day	Year	Inventor First Name, Middle Initial	Inventor Last Name
Sole Edge Planer	24494	June 21	1859	Henry	Sauerbier
Sole Edge Planer	38026	March 31	1863	John	Brooks
Sole Edge Planer	139034	May 20	1873	Benjamin J.	Tayman
Sole Edge Planer	172048	January 11	1876	Willard	Osborne
Sole Edge Setting Tool	136087	February 18	1873	Jonathan H.	Morrison
Sole Edge Shaver	88920	April 13	1869	Thomas	Smiley
Sole Edge Trimmer	22102	November 16	1858	Isaac	Rich
Sole Edge Trimmer	129824	July 23	1872	Samuel H.	Hodges
Sole Edge Trimmer	142029	August 19	1873	Richard C.	Lambart
Sole Edge Trimmer	158569	January 12	1875	Robert F.	Burns
Sole Edge Trimmer	212253	February 11	1879	John R.	Moffitt
Sole Edge Trimmer	215189	May 6	1879	Joseph D.	Westgate
Sole Edge Trimmer	237671	February 15	1881	Zotique	Beaudry
Sole Edge Trimmer	266257	October 17	1882	Charles C.	Hanson
Sole Fastening Compressor	159859	February 16	1875	Benjamin F.	Sturtevant
Sole Fastening Material	162969	May 4	1875	Benjamin F.	Sturtevant
Sole Finishing Tool	67579	August 6	1867	Oliver P.	Pettengill
Sole Imitation Stitch	158633	January 12	1875	Charles S.	Dunbrach
Sole Making Machine	194866	September 4	1877	Thomas J.	Gifford
Sole Marking Tool	213712	March 25	1879	Joseph S.	Turner
Sole Mold	126823	May 14	1872	William J. B.	Mills
Sole Molding Machine	186909	January 30	1877	Joseph H.	Walker
Sole Molding Machine	245558	August 9	1881	Frederick W.	Pope
Sole Molding, Rounding & Channeling	83172	October 20	1868	Albert	Jeffers
Sole Pressing Machine	139577	June 3	1873	Charles M.	Hayden
Sole Shaper	141058	July 22	1873	Joseph B.	Johnson
Sole Skiving Machine	32671	June 25	1861	William F.	Trowbridge
Sole Trimmer	122462	January 2	1872	Gardner C.	Hawkins
Sole Trimmer	190482	May 8	1877	William E.	Forster
Sole Trimmer	210829	December 10	1878	Joseph D.	Westgate
Sole Trimming & Burnishing	130212	August 6	1872	Charles W.	Glidden
Sound Transmitting Apparatus, Electrical	239742	April 5	1881	Amos E.	Dolbear
Sounding Apparatus, Deep Sea	210067	November 19	1878	William	Thomson
Sounding Board, Musical Instrument	211337	January 14	1879	Ernst	Marx
Sounding Board, Piano	9287	September 28	1852	Alfred	Speer
Sounding Guard for Vessels	15319	July 8	1856	John	Guest
Speculum	196600	October 30	1877	Alexander	Shiland
Speculum	206162	July 23	1878	Addison	Bradford
Speculum	373361	November 15	1887	Jonathan R.	Hamilton
Speculum & Dilator	281880	July 24	1883	Newton S.	Hubbell
Speculum & Syringe, Combined	212600	February 25	1879	William	Harz
Speculum, Rectal	224991	March 2	1880	Alexander W.	Brinkerhoff
Speculum, Throat	350809	October 12	1886	James J.	Cole
Speeder	16463	January 27	1857	James S.	Brown
Speeder	165352	July 6	1875	Thomas	Mayor
Speeder & Fly Frame	174918	March 21	1876	Thomas	Mayor
Speeder Flyer	3926	February 24	1845	Erastus B.	Bigelow
Speeder Flyer	83436	October 27	1868	John H.	Aldrich
Speeder for Roving Cotton	724	May 4	1838	William	Mason
Speeder Stop Motion	11475	August 8	1854	Lewis	Cutting
Speeder, Double	3089	May 19	1843	William C.	Davoll
Speeder, Drawing & Twisting	149498	April 7	1874	Thomas	Mayor
Speeder, Spinning & Twisting	92859	July 20	1869	Thomas	Mayor
Speeder, Trostle & Cap	2108	May 29	1841	Jesse	Whitehead
Spindle	35145	May 6	1862	James	Eaton
Spindle	77566	May 5	1868	Eugene	Atwood
Spindle	130860	August 27	1872	Enoch	Osgood
Spindle	144067	October 28	1873	Lewis C.	Crocker
Spindle	152008	June 16	1874	George	Richardson
Spindle	156770	November 10	1874	Euclid D.	Carter
Spindle	192473	June 26	1877	Gilbert P.	Whitman
Spindle & Bobbin	192493	June 26	1877	George	Draper

Invention Name	Patent Number	Month and Day	Year	Inventor First Name, Middle Initial	Inventor Last Name
Spindle & Bobbin Tube	93633	August 10	1869	Alexander	McFarland
Spindle & Flyer	781	June 12	1838	Richard E.	Yerkes
Spindle & Flyer	3553	April 20	1844	Phineas	Stevens
Spindle & Flyer	6572	July 3	1849	William	MacLardy

Yarn Dyeing & Scouring Preparation	16934	March 31	1857	Lucien E.	Pratt
Yarn Evener	92218	July 6	1869	George S.	Smith
Yarn Guide and Cleaner	86973	February 16	1869	A. C.	Dakin
Yarn Making Machine	12040	December 5	1854	James	Taylor
Yarn Manufacture, Clouded	76042	March 31	1868	John W.	Bentley
Yarn Manufacture, Felted	14815	May 6	1856	Moses A.	Johnson
Yarn Sizing & Beaming Machine	187597	February 20	1877	John	Bullough
Yarn Sizing Machine	134964	January 21	1873	Thomas	Abbott

Appendix: List of Illustrations

Patent No. 173,295. Printing Press (SI neg. 86-6340)	cover
Patent No. 99,743. Sewing Machine (SI neg. 2006-1858)	cover
Patent No. 6,420. Electric Telegraph (SI neg. 89-6704)	cover
Harper's Weekly Engraving (SI neg. 86-930)	vi
Stereoview of Patent Office (SI neg. 2009-1830)	vii
Patent No. 4,750. Sewing Machine (SI neg. 90-4210)	vii
Patent No. 6,420. Electric Telegraph (SI neg. 89-6904)	viii
Museum of Models (SI neg. 2008-4988)	ix
Carl M. Mitman (SI neg. MAH-68817)	x
1877 Patent Office Fire Relic (SI neg. 78-10031)	xi
Henry Mellish's Specification, Patent No. 119,938 (SI neg. 2009-1832)	xii
Mellish's Patent Drawing, Patent No. 119,938 (SI neg. 2009-1831)	xiii
Patent No. 119,938. Clothes Pin (SI neg. 2005-37597)	xiv
Patent No. 39,916. Rolling Pin (SI neg. 86-6558)	xiv
Grace Cooper (SI neg. 94-1525)	xviii
Patent No. 37,637. Artificial Leg (SI neg. 85-10299.22)	1
PHOTO GALLERY (<i>see list below</i>)	165
Patent No. 118,435. Creeping Baby Doll (SI neg. 86-6160)	187
"Uncle Sam" cartoon for <i>Curiosities of the U.S. Patent Office</i>	354

PHOTO GALLERY IMAGES

Listed in order of appearance, beginning on page 165

Patent No. 42. Hanging Oil Lamp (SI neg. 86-5797)
Patent No. 1,421. Knitting Machine (SI neg. 89-6724)
Patent No. 2,720. Wire Rope Making Machine (SI neg. 86-6332)
Patent No. 6,469. Buoyant Air Chambers for Vessels (SI neg. 86-6162)
Patent No. 7,921. Lard Lamp (SI neg. 89-6707)
Selected Patent Nos. from 9,257 to 200,299. Clothes Pins (SI neg. 83-14917)
Patent No. 10,987. Daguerreotype Camera (SI neg. 86-6328)

Patent No. 11,696. Hot Air Engine (SI neg. 86-6552)
Patent No. 16,234. Sewing Machine (SI neg. 2007-6332)
Patent No. 16,434. Sewing Machine (SI neg. 2007-6308)
Patent No. 19,015. Sewing Machine (SI neg. 2007-6328)
Patent No. 19,405. Chair Manufacturing Method (SI neg. 86-10223)
Patent No. 21,243. Adding Machine (SI neg. 89-6706)
Patent No. 21,751. Sewing Machine (SI neg. 2007-6327)
Patent No. 22,464. Sewing Machine Cabinet (SI neg. 2006-1876)
Patent No. 22,464. Cabinet detail (SI neg. 2006-1878)
Patent No. 22,464. Cabinet detail (SI neg. 2006-1877)
Patent No. 26,295. Lamp (SI neg. 83-12604.2A)
Patent No. 28,159. Rocking Chair (SI neg. 89-6586)
Patent No. 29,200. Steam Steering Apparatus (SI neg. 86-6331)
Patent No. 31,887. Lamp (SI neg. 83-12604.5)
Patent No. 34,088. Basket (SI neg. 90-15658.2)
Patent No. 41,494. Fishing Reel (SI neg. 86-6555)
Patent No. 51,668. Imitation Embroidery (SI neg. 93-15028)
Patent No. 54,885. Animal Trap (SI neg. 89-6685)
Patent No. 85,600. Artificial Teeth (SI neg. 83-15989.16)
Patent No. 99,743. Sewing Machine (SI neg. 2006-1859)
Patent No. 99,743. Sewing Machine details (SI neg. 2006-1862)
Patent No. 105,548. Sewing Machine Table (SI neg. 2006-1874)
Patent No. 109,710. Washing Machine (SI neg. 2006-1872)
Patent No. 115,357. Bagatelle (SI neg. 86-5804)
Patent No. 121,127. Clothes Dryer and Ironing Table (SI neg. 83-13265)
Patent No. 135,089. School Desk. (SI neg. 86-6164)
Patent No. 147,981. Sewing Machine Table Casters (SI neg. 2006-1886)
Patent No. 153,370. Gear Cutting Machine (SI neg. 86-6311)
Patent No. 156,230. Spinning Wheel (SI neg. 90-16430)
Patent No. 165,419. Stave Basket (SI neg. 90-15659.1)
Patent No. 173,410. Pendulum (SI neg. 83-16183.26A)
Patent No. 177,462. Combination Bed and Lounge (SI neg. 86-5801)
Patent No. 180,932. Wash Bench and Wringer (SI neg. 80-13968)
Patent No. 183,695. Foot Rest (SI neg. 86-6565)
Patent No. 189,164. Feathering Paddle-Wheel (SI neg. 89-6721)
Patent No. 193,006. Street Sign (SI neg. 83-15990-25A)
Patent No. 203,401. Cotton Bale Tie (SI neg. 83-14920)
Patent No. 208,594. Wash Board (SI neg. 83-15477.19)
Patent No. 209,862. Wind Engine (SI neg. 86-6165)
Patent No. 212,000. Vegetable Sorter (SI neg. 86-6327)
Patent No. 213,751. Refrigerator (SI neg. 89-6702)
Patent No. 220,151. Valve Regulating Mechanism (SI neg. 89-6764)
Patent Nos. 224,174 and 135,089. School Desks (SI neg. 83-13275)
Patent No. 226,265. Windmill (SI neg. 86-5802)
Patent No. 229,985. Corn Planter (SI neg. 89-6743)
Patent No. 240,591. Earring (SI neg. 83-15990.15A)
Patent No. 246,136. Sewing Machine (SI neg. 2006-13428)
Patent No. 246,136. Alternate view of Sewing Machine (SI neg. 2006-13429)
Patent No. 246,136. Sewing Machine detail (SI neg. 2006-13427)

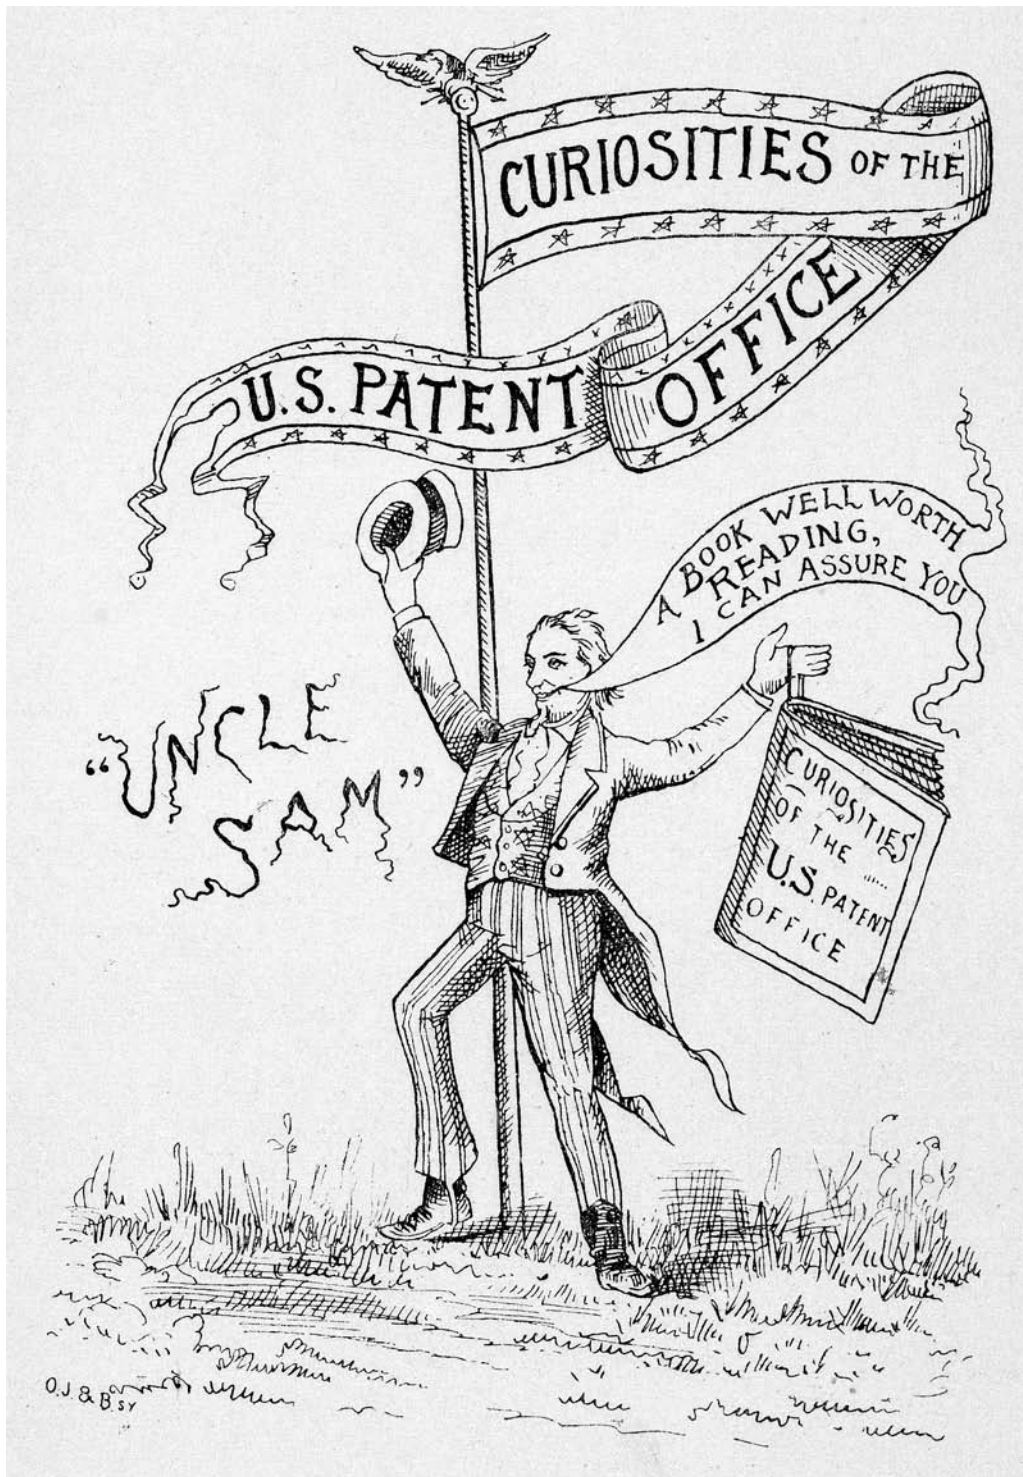

Patent No. 252,103. Portable Forge (SI neg. 89-6675)

Patent No. 278,497. Corn Planter (SI neg. 89-6684)

Patent No. 311,492. Grain Binding Machine (SI neg. 86-5799)

Patent No. 353,970. Pocket Sewing Machine (SI neg. 2006-1890)

Patent No. 467,660. Cultivator (SI neg. 89-6657)

"Uncle Sam" character recommends reading *Curiosities of the U.S. Patent Office*, written by William Chandler Raymond in 1888. (SI neg. 83-14630)

Selected Bibliography

Smithsonian exhibitions are even more ephemeral than the Patent Office's *Museum of Models* was in the nineteenth century. Viewable briefly at one point in history, they then are dismantled and the artifacts removed to storage. The record of an exhibition may be captured in a catalog, a newspaper, or a magazine review, but most often the exhibit is only a fleeting memory for those who saw it.

In this bibliography I feature publications that accompanied patent model exhibitions and catalogs written by curators to document their collections. Writings from the 1930s may seem stilted by today's latest social theory of technology and invention, but the catalogs stand as foundations of information about the models upon which other thoughts may be built or, if desired, deconstructed. Included are publications chronicling the history of the United States Patent Office and indexes for patents and their inventors in the nineteenth century.

Various publications are available that provide information on nineteenth century patents. The most useful are probably the series *Annual Report of the Commissioner of Patents*—started in 1841 and containing patent listings arranged by invention (class), patentee's name, and/or patent number—and the three volume set *Subject-Matter Index of Patents for Inventions Issued by the United States Patent Office from 1790 to 1873*, which lists patents in an alphabetical form by invention.

Since this project began, the Patent Office has set up a web site where patent specifications and drawings may be retrieved. In addition GOOGLE Patent Search provides searchable access to the patent specifications and drawings. Before the advent of these web sites, the best source for patent specifications and drawings was the microfilm series *United States Patents, 1790–1906*, available at libraries throughout the country designated as Patent Office Depository Libraries.

REQUIREMENTS FOR SMITHSONIAN SERIES PUBLICATION

ALL MANUSCRIPTS ARE REVIEWED FOR ADHERENCE TO THE SISP MANUSCRIPT PREPARATION AND STYLE GUIDE FOR AUTHORS (available on the “Submissions” page at www.scholarlypress.si.edu). Manuscripts not in compliance will be returned to the author. Manuscripts intended for publication in the Contributions Series are evaluated by a content review board and undergo substantive peer review. Accepted manuscripts are submitted for funding approval and scheduling to the Publications Oversight Board.

MINIMUM MANUSCRIPT LENGTH is thirty manuscript pages. If a manuscript is longer than average, an appropriate length will be determined during peer review and evaluation by the Content Review Board. Authors may be asked to edit manuscripts that are determined to be too long.

TEXT must be prepared in a recent version of Microsoft Word; use a Times font in 12 point for regular text; be double spaced; and have 1" margins. Each chapter/section must be saved in a separate file.

REQUIRED ELEMENTS are title page, abstract page, table of contents, main text, and reference section. See the SISP Manuscript Preparation and Style Guide for Authors for the order of all elements.

HEADINGS should be styled so different levels of headings are distinct from each other and so the organization of the manuscript is clear. Insert one line space above and one line space below all headings.

FRONT MATTER should include title page, abstract page, and table of contents. All other sections are optional. Abstracts must not exceed 300 words. Table of contents should include A-, B-, and C-level headings.

TABLES (numbered, with captions, stubs, rules) should be submitted in separate MS Word files; should include footnotes, if appropriate; should have rules only at top, bottom, and beneath column heads. Printouts of each table should accompany the manuscript to ensure correct layout of data. Tabulations within running text should not be numbered or formatted like formal tables, and should be included in the text of the manuscript.

FIGURE CAPTIONS should be provided in a separate MS Word file.

FIGURES (e.g., photographs, line art, maps) should be numbered sequentially (1, 2, 3, etc.) in the order called out; be placed throughout text, not at end of manuscript; have all components of composites lettered with lowercase letters and described in the caption; include a scale bar or scale description, if appropriate; include any legends in or on the figure rather than in a caption.

ART must not be embedded in the main text.

Figures must be original and submitted as individual TIFF or EPS files. Resolution for art files must be at least 300 dpi for grayscale and color images and at least 1200 dpi for line art. Electronic images should measure no more than 100% and no less than 75% of final size when published. JPG files will not be accepted. Color images significantly increase costs so should be included only if required. Funding for color art is subject to approval by SISP and the Publications Oversight Board.

IN-TEXT REFERENCES should be used rather than bibliographic notes and should follow the author-date system in the following format: “(author last name, year)” or “. . . author (year)”; “(author, year:page used within the text)” or “. . . author (year:page).” A full citation should be included in a “References” section.

ENDNOTES are to be used in lieu of footnotes and should be keyed manually into a separate MS Word file, in a section titled “Notes.” Notes should not contain bibliographic information. Manually type superscript numerals in text and use full-sized numerals at the beginning of each note in the “Notes” section. SISP will determine the best placement of the notes section, either at the end of each chapter or at the end of the main text.

REFERENCES should be in alphabetical order, and in chronological order for same-author entries. Each reference should be cited at least once in main text. Complete bibliographic information must be included in all citations (e.g., author/editor, title, subtitle, edition, volume, issue, pages, figures). For books, place of publication and publisher are required. For journals, use the parentheses system for volume(number):pagination [e.g., “10(2):5–9”]. Do not use “et al.”; all authors/editors should be included in reference citations. In titles, capitalize first word, last word, first word after colon, and all other words except articles, conjunctions, and prepositions. Examples of the most common types of citations are provided in the SISP Manuscript Preparation and Author Style Guide.

For questions regarding the guidelines, please email SISP at schol.press@si.edu.
