HOW TO ORDER

THIS PRICE GUIDE & OUR CATALOGUES

This Parts Price Guide covers all Land Rover models and V8 Engines. It should be used in conjunction with our catalogues for Range Rover, Discovery, Defender, Freelander and V8 Engine which represent the other half of our ordering system. At the front of this Price Guide you will find listings of 'Catalogue Corrections and Updates' which update some of these catalogues. Please see page 3 for details on how to use this Price Guide.

Note: We produce separate Price Guides for Triumph and MG Rover models.

ORDERING BY PHONE

Please quote your home postcode and part numbers where possible. This gives instant access to our computerised records and stock control system. If you have any difficulty in selecting the parts you need, our expert staff can help.

UK Payment for Phone Orders (See also "Overseas Orders & Payment.")

When you have checked on price, availability and delivery costs you can place your order by phone using Visa, MasterCard, Delta/Connect, Maestro, Solo, JCB, Diners Club, or American Express. You will merely need to tell us the card number, expiry date (or issue number), CVC security number, cardholder's full name and registered card address.

After Hours Ordering Service

We operate a 24-hour answering/ordering service which is available to card holders out of normal hours for both UK and Overseas customers. Just leave all necessary details on our telephone voice mails, i.e. your vehicle type, year, model, the parts and/or the part numbers you require, plus your name, address (inc. postcode), credit card details and delivery address (if different).

Writing out these details before phoning usually helps a caller to give us clear instructions. If at all possible, please also leave a daytime telephone number.

ORDERING BY POST

Triumph House, Sleaford Road, Bracebridge Heath, Lincoln, LN4 2NA, England.

We ask you to phone first if at all possible - to check your parts selection, and to advise of delivery charges. Because prices and availability sometimes change, we can also confirm the exact remittance needed avoiding unnecessary delays. If you have not been able to telephone, please give us all possible information - car type/year, RH or LH, front/rear etc - so we can check your selection (including your name, address and postcode) in all correspondence. Use our Order Form if you can (see rear of Price Guide). It asks specifically for all the details we might need. Please photostat or request additional copies of the order form if required.

UK Payment for Post Orders (See also "Overseas Orders & Payment.")

Send your remittance with the order. The 'Pricing' section in the Price Guide tells you how to calculate the amount.

We accept payment by personal cheque even if the cheque guarantee card limit is exceeded. All we require is your full name and address on the back of the cheque along with your cheque card number and for business cheques, a relevant letterhead. Cheques or P.O.s made out "Rimmer Bros Ltd" please.

Note, if you are unsure as to the exact amount to send, you can write across the top of your cheque, "Cheque Value Not To Exceed £...". You can post us your credit card details if you prefer. If you send cash, note that we cannot accept responsibility for any loss, so registered mail is essential. Bank drafts and Building Society cheques are also accepted.

ORDERING BY FAX

UK CUSTOMERS: 01522 567600

OVERSEAS CUSTOMERS: +44 1522 567600

See also "Overseas Orders & Payment."

Another facility for customers who wish to make enquiries, or order by credit, debit or charge card. Again, we will need your name, address (inc. postcode), credit card details including CVC security number and delivery address (if different). Plus fullest possible car/parts details - as for orders by post.

ORDERING ON LINE 24/7 & BY E-MAIL

www.rimmerbros.co.uk

E-Mail: **LRsales@rimmerbros.co.uk**

Our web site holds details on all our parts catalogues, has up to date prices and an on line ordering facility. Use our E-Mail address for sending your order or parts enquiry.

Order through our website using our **secure on-line ordering system!**

All the latest news, special offers, products and prices just a 'click' away.

COLLECTING IN PERSON

If you wish to 'call and collect', you will always be made welcome at our shop and sales counter during business hours. Our Visitor Information Centre has lots of interesting details of each production model and the factories where they were produced.

Customers drive here regularly from all over Europe. Lincoln is a historic Cathedral city and is an excellent place to visit. We're about 2 miles south of Lincoln on the A15 Lincoln to Sleaford road (see map on back cover). We advise you to pre-check by phone that we have the part/s you want in stock.

We accept payment by credit card, cash, bank draft, travellers cheque, building society cheque, and personal cheque (when presented with a cheque card) even if the cheque card limit is exceeded, and by business cheque with accompanying letterhead.

THE LAND ROVER & V8 ENGINE PARTS SPECIALIST

GENERAL INFORMATION

MINIMUM ORDER VALUE

We respectfully request a minimum £5 order value. It is uneconomical for us to process an order for less than this amount. In addition, we have a minimum postage charge which inevitably pushes up the cost of small, low value parts. It is therefore better for you (and for us) if your order can be a minimum of £5 which results in far better value for money. P.S. Why not add an oil filter to your order!

FRAUD PREVENTION

We wish to confirm to our customers that we do not show your credit card details on any paperwork nor do we pass on any details held on our database to any 3rd parties. We also now insist that your first order must be delivered to the card holders registered address. We will also ask for the 3 digit security number found on the signature strip. These measures for first-time users will help prevent unauthorised use of a credit/debit card. Additionally we randomly select orders for authorisation checks.

PRICING

Prices

We show two columns of prices, one excluding VAT (for worldwide, outside EC countries) and one including VAT (currently 15% for UK and EC countries). The cost of delivery should be added to the cost of the part(s). See 'Delivery Methods'.

Prices in this Price Guide were correct at the time of going to press but are subject to change without prior notice. **Please confirm all prices when ordering.**

All goods are sold subject to the price ruling at the time of invoicing.

Please note: - up to date prices are available on our website.

VAT

Residents of UK and EC countries pay VAT (currently 15%) on parts and delivery. For EC businesses who are VAT registered, we require your VAT number and official order to export at VAT exempt prices.

For worldwide (outside the EC) orders sent direct from our premises, VAT is not applicable.

N.B. Books and manuals are currently zero rated for VAT purposes.

Written Quotation

If you require a written quotation for the part(s) and/or delivery charge(s) before ordering, please ask.

BACK-ORDERS

Back-ordered items are not charged for until despatch. Upon despatch we will charge the price quoted at the time of ordering. Prices will be unaffected by any subsequent price alterations unless advised in writing to you. Please notify us in writing (letter, fax or e-mail) if you wish to cancel any back ordered items.

Back orders are automatically cancelled after 3 months.

SPECIAL ORDERS

Certain items (coloured trim, carpets, one-off type parts etc) are sometimes only available by special order. This means we have to order them for you specially from the manufacturer. For this reason, we require a 20% non-refundable deposit upon taking your order. The balance is payable when the goods are despatched.

PART NUMBERS

In general, we use Land Rover part numbers to identify original equipment (OE) Land Rover Parts. When an alternative to the OE part is offered (aftermarket) then the part number is identified with a 'P' suffix. Sometimes we offer more than one variant of an aftermarket part. These are identified with a P1, P2 suffix etc. This suffix can identify perhaps an OE specification part (but not OE boxed) or an aftermarket (non genuine part). The prices shown will determine which is the case. For example an OE spec (not OE boxed) part will be more expensive than an aftermarket part, but cheaper than an OE boxed part! Other part number suffixes are also used such as UR (Up-rated) or SS (Stainless Steel) etc.

With Land Rover part numbers, there is also similarity with certain Rover and Triumph parts where we list the Rover/Triumph part number. RA, RD, RX, LR, LF and LL prefixes denote a Rimmer Bros derived part, where no original part number exists. An 'R' suffix denotes 'reconditioned'.

NEW & RECONDITIONED PARTS

Almost every part we list is sold brand-new, but in many instances we also offer you the facility to buy "Reconditioned" (usually giving us your old component in part-exchange). Where there is a reconditioned version of a part, you will find the letter 'R' added at the end of the part number.

EXCHANGE SURCHARGES (REFUNDABLE)

Where parts are sold on an exchange basis an "Exchange Surcharge" is applied – a deposit in effect, which is refunded to you when your old unit is received by us. This system allows you to make an exchange without having to send the old unit first ... it can often prevent your vehicle being off the road. The amount of the Exchange Surcharge is shown in italics below the part number.

Before returning your old unit please telephone our customer service dept on 01522 568000 in order to obtain a returns authorisation number. See reverse of invoice for full details of return procedure. Units must be drained of oil, water and be complete and serviceable. We reserve the right to retain all or part of the surcharge if the unit is irreparable, damaged or not identical to the type supplied.

OVERSEAS ORDERS & PAYMENT

We supply parts to Classic Car owners worldwide. We have thousands of customers in Europe and regularly send parts as far afield as Australia, North America, Africa and the Far East. Delivery costs of course, vary greatly (depending on size/weight/ urgency). We can quote accurately for the cost of parts and delivery once your requirements are known.

WE EXPORT TO THE EC & WORLDWIDE

Payment by Export Customers

There is a choice of payment methods for customers overseas:

- A) Credit card, debit card or charge card.
- B) Bank cheque - in £ sterling drawn on a London Bank.
- C) Travellers Cheques (signed) - in £ sterling, or euros (see note below)

DELIVERY METHODS

WE USE ROYAL MAIL FIRST CLASS POST SERVICE FOR SMALL PARCELS DELIVERED IN THE UK, AND UPS, THE WORLD'S LEADING CARRIER, FOR MOST OF OUR LARGER DOMESTIC AND OVERSEAS PARCELS TO PROVIDE OUR CUSTOMERS WITH THE BEST SERVICE AVAILABLE.

UNITED KINGDOM

Delivery charges (including packaging & handling) are calculated on the weight of the consignment (and volume if large/bulky item) and the desired delivery method (Royal Mail, UPS, etc.) If you are posting your order to us then please request an exact remittance so that we can confirm delivery charges. All prices subject to change.

Post from £2.00 (+ vat)

Carrier from £9.95 (+ vat)

Supplements are applied to Next Day, Saturday, Royal Mail Special Delivery and out of area rural destinations including Highlands, Scottish Islands, Northern Ireland, Isle of Man, Isle of Wight and Channel Islands.

Any delivery times quoted are for 'Working Days' from despatch and exclude weekends and bank holidays. All delivery times are guides, no guarantees can be given. Certain large or bulky items may incur additional packing charges. Please note that the delivery driver may need assistance to unload large/ heavy items - Please advise if special delivery arrangements are required.

OVERSEAS

Worldwide (Non EU Countries)

We started exporting parts worldwide in 1982 and since then we have gained an excellent reputation for our speed and efficiency of service. Delivery costs are based on size, weight and method of delivery. We have discounted rates with well known carriers, so costs are kept to a minimum. Please note that costs are calculated by carriers on both actual and dimensional weights and the higher is charged. Send us a list of the parts you need (using post, phone, fax or E-Mail), tell us quantities and urgency, and we will work out the best delivery method and quickly advise you of the cost. Written quotations are available on request. Please note that any local import duty, taxes or customs clearance are not included in our prices and must be paid by you.

EU Countries

The European Union Single Market permits the free movement of goods between all EU countries. This allows us to provide a superb service to all our customers within the EU, with the benefits of improved delivery – via lower charges and easier documentation. Deliveries can be easily arranged using air or surface transport. Please request a competitive quotation for the cost of shipping. Deliveries can take 3-7 working days from despatch. If you are posting your order to us, please request an exact remittance so that we can confirm delivery charges.

GENERAL INFORMATION

HOW TO USE THIS PRICE GUIDE

PART NUMBER LISTING FORMAT

All numbers listed are computer generated and appear in a logical sequence (numerical/alphabetical order) i.e. 1 – 999999 first, then A-Z last.

Note that for example, part number

557922	will appear before	55800
21A2818	will appear after	219270.
RTC11A	will appear after	RTC1196A
AA604021	will appear after	9920.

Should you have any difficulty in locating a part number or a price, please enquire.

PART NUMBER DESCRIPTION

This price guide gives a brief description (sometimes abbreviated) of the part and this should be used to confirm that you have selected the correct part number from the catalogue.

Exchange surcharges are shown in italics below the part number.

Where you see 'Enquire' in the description or price field, this usually means there is a supply problem, but it is worth asking if the part has become available since the price guide was printed. You may also see 'NCA' (not currently available) or 'NLA' (no longer available), which are self explanatory.

PART NUMBER SUPERSESSIONS

When you see "Now Use..." this is SUPERSESSSION where an old number has been replaced by a new number or when a part is no longer available and an alternative can be supplied. .

PRICES

Two columns of prices are shown, one excluding VAT (for worldwide, outside EC countries) and one including VAT at 15% (for UK and EC countries).

Prices were correct at the time of going to press, but are subject to change without prior notice. Please confirm all prices when ordering. Up to date prices are available on our web site.

NEW PRODUCTS, GENERAL ACCESSORIES

At the front of this price guide, you will find parts that have become available or have been introduced since we last printed our catalogue(s).

CATALOGUE CORRECTIONS & UPDATES

Please take a few minutes to update your Rimmer Bros catalogue with amendments and additions by referring to this section.

MORE STOCK EVERY DAY

If the part you require is not listed in our catalogue or in this price guide, please phone, we can consult factory listings and check on availability and price.

OUR PRICE GUIDE ON CD

See page 10 for details on our CD rom.

TROUBLESHOOTER GUIDE

PLEASE CHECK YOUR PARCELS

When you sign for a parcel please inspect it carefully. If it has suffered in transit you can mark the delivery note "Parcel Damaged" before signing or even refuse delivery in serious cases. We do, of course, pack carefully and strongly to help avoid these problems!

Some deliveries involve more than one parcel - please check that ALL have been received. We must be advised within 48 hours of delivery of any shortages or damaged goods.

LOSS IN TRANSIT

If your parcel does not arrive, we have to establish our claim with the carriers concerned before we can send a replacement consignment. This can sometimes be a lengthy process and if your part is needed urgently a second order can be paid for to save time. We refund one of your orders as soon as the carriers clear our claim.

RETURNS

All returns MUST be pre-authorized with a Returns Authorisation (RA) number. Returned products without a RA number will be subject to delay and possible return to sender.

RETURNS OF EXCHANGE 'OLD' UNITS.

There is no specific time limit for the return of exchange old units, except for genuine Land Rover Parts, where old core must be returned within 90 days. Please contact us prior to returning the old unit for a 'Return Authorisation Number'. This speeds up the process of returning the surcharge refund. See reverse of invoice for full details of return procedure.

Please note that old core must be complete, serviceable and drained of fluids where applicable. We reserve the right to retain all or part of the surcharge if the unit is irreparable, damaged or not identical to the type supplied.

RETURNS OF PARTS NOT REQUIRED - WITHIN 7 DAYS

All goods sold by mail order are covered by the Consumer Protection (Distance Selling) Regulations, which allow for a seven day 'cooling off' period during which you may cancel your order (in writing) by sending us a letter, fax or e-mail at any time up to and including the seventh working day after the day on which you received your purchase. If you exercise your statutory right to cancel you must immediately return to us (at your own cost), the item(s) that you do not wish to keep. Carriage charges are non-refundable. We will acknowledge receipt of your written cancellation by issuing a 'Returns Authorisation Number' which should be quoted and accompanied by a proof of purchase or invoice when returning the goods. Please ensure all goods are adequately packed to avoid damage, that you insure them accordingly with the carrier used and obtain a proof of shipment. Please note that all goods must be in the condition supplied at the point of sale and with their original, undamaged packaging. Returns are not permitted on parts specially ordered by Rimmer Bros on customer's behalf.

RETURNS OF PARTS NOT REQUIRED - WITHIN 7-28 DAYS

As an added benefit to Rimmer Bros customers and in addition to your statutory cancellation right (as detailed above), returns may be considered outside the 7 day cooling off period up to and including 28 days after you receive your purchase, subject to the following criteria. Please note that any offset, credit or refund will be at the sole discretion of Rimmer Bros' Ltd. A 'Returns Authorisation Number' must be applied for within the 7 to 28 day period. Where goods have been correctly supplied, it may be possible to offset the full value of the return against another order of the same or higher value. Alternatively, a credit note (for the full value) could be offered. Please note that any cash refund will be subject to a handling charge (typically 15% min £5) to cover administration and re-stocking costs. Carriage charges are non-refundable. All goods returned for a credit or exchange must be accompanied by our invoice quoting the 'Return Authorisation Number'. Please complete the form on the reverse side of the invoice. Goods must be adequately packed to avoid damage. You should insure them accordingly with the carrier and obtain a proof of shipment. No responsibility can be accepted for goods received by us, damaged. Goods must be in the condition supplied at the point of sale and with their original, undamaged packaging. Returns are not permitted on parts specially ordered by Rimmer Bros on customer's behalf.

RETURNS OF PARTS NOT REQUIRED - OUTSIDE 28 DAYS

No returns will be considered after 28 days unless covered by the terms and conditions of our warranty - see below.

OTHER RETURNS

Other returns will be dealt with in accordance with your statutory rights, if applicable, or our warranty, see section below.

RETURNS PROCESSING

Please note that returns are processed as quickly as possible. During busy periods, especially in the Spring & Summer, returns may take up to 14 days to process.

Your statutory rights remain unaffected.

WARRANTY

PARTS WARRANTY

All new and reconditioned parts are covered by a 12 month manufacturer's warranty unless specifically stated. You should notify us immediately if a potential warranty situation arises. The warranty period commences from our invoice date not from the date of installation or first use. This warranty covers defects to the part when fitted and used correctly for normal, everyday vehicle use but does not apply to parts used for any extraordinary or unusual uses such as competition, racing, rallying or parts subsequently stripped down, altered, modified or adapted etc. in any way from their original design or intended use.

Although we are, by law, liable for death or personal injury caused by our proven negligence and by The Sale of Goods Act 1979, our warranty only covers the parts in question and not to any consequential loss or cost, e.g. garage labour, recovery, car hire, re-delivery, parking fines, etc. No claim will be validated if the failure is caused by mis-use, neglect, overheating, incorrect installation or failure of a related component.

Any part replaced or repaired under warranty, will only benefit from the balance of the cover remaining from the original purchase date. Warranties are not transferable. Acceptance of goods is deemed as acceptance of these terms. The warranties are in addition to, and do not affect your statutory consumer rights.

STAINLESS STEEL EXHAUST SYSTEM WARRANTY

The exhaust system is guaranteed for the lifetime of the vehicle whilst it remains in the ownership of the original purchaser of the exhaust.

The guarantee is non-transferable and has no surrender value. In the rare event of a claim, we will replace or repair, free of charge, any part of a system that should fail in service due to defective materials or workmanship.

The purchaser undertakes to ensure that all engine and exhaust mountings, brackets, clamps, etc. are checked for condition at least once a year and replaced if necessary. Our guarantee does not extend to cover failure due to mis-use, neglect, internal detonation, incorrect installation or failure of a related component.

The warranty covers the exhaust system only. Our prices are kept low for DIY installation, so our liability cannot extend to cover garage labour, recovery, hire car or any other consequential or associated costs. The warranties are in addition to, and do not affect your statutory consumer rights. For any claim, we will need reference to our original sales invoice.

We will also require any failed parts to be made available for collection to be returned to our manufacturer for repair or replacement (this is at the discretion of the manufacturer).

It should be noted that it is quite normal for discolouration to occur on external

surfaces after a few months of use. This can be removed with wire wool if required and will not affect the guarantee.

This guarantee does not cover part systems or modifications made to parts unless previously agreed in writing with a Rimmer Bros representative.

Acceptance of goods is deemed to be an acceptance of these terms. This guarantee does not apply to catalysts or to vehicles converted to run on LPG fuel.

How to Claim

In the rare event of a new or reconditioned part becoming faulty, please notify us immediately. It must be returned to us together with the original invoice or proof of purchase with as much information relating to the fault as possible.

Please note that the defective part must be returned and received before it can be exchanged.

Dear Land Rover Owner,

Welcome to the 2009-10 edition of our Land Rover Price Guide. This annual publication is intended for use with our industry leading range of parts and accessory catalogues and to give you an update on new products and services that are now available. It also displays that Rimmer Bros is your 'one stop shop' for all your Land Rover parts and accessories requirements - whether they are genuine (OE) Land Rover or Aftermarket.

In addition, we also supply Classic Triumph, MG, MG Rover and New MINI Parts and Accessories. Don't forget you can request a free catalogue for any of these models.

Rimmer Bros are an Authorised Land Rover Parts Distributor.

We stock a vast range of genuine Land Rover parts in addition to those listed in our catalogues. We can also order non-stocked parts (on a quick turn round) direct from Land Rover. Our EPC's (Electronic Parts Catalogue's) have direct access to all stock that is currently available from the factory. Contact us with your VIN number or registration number for a speedy service.

We also supply Aftermarket (or Pattern Parts) which are often sold alongside genuine Land Rover (OE) parts, usually with a considerable cost saving. To help identify these parts in the pricing section we suffix the end of the Land Rover part number with a 'P' (for Pattern). Sometimes there are other variants of the same part number, for example 'UR' for uprated, or 'SS' for Stainless Steel. It is therefore easy to compare prices and see if there are alternatives available.

From humble beginnings over 25 years ago, Rimmer Bros has always concentrated on just three things: an extensive product range, superb service and good value. We continue to strive for these goals. Our buying power and warehouse capacity means we can buy big, put the stock on the shelf, cut out overheads and reduce costs to you. We continually check the price of thousands of products to make sure you're always getting value for money. Our internal procedures for stock handling and order processing ensure you get what you want, and when. For mail-order Land Rover parts, you need look no further for your parts and accessories.

Many of our customers have been snapping up bargains from our 'Land Rover Clearance Bargains' listed on our website (rimmerbros.co.uk) and in last years Price Guide. This has recently been extended to include even more genuine Land Rover bargains. On pages 28 to 40 you will find clearance parts that were available at the time of going to print. Our website will show the latest availability and additional product as it arrives...Don't miss out!

For those who check our website regularly you may have noticed our **Auto Jumble Bargains**. Here you can find a selection of 'one-off', scratch and dent, shop soiled, carrier damaged or miscellaneous parts that we sell off cheap. There are bargains to be had right across our model range. Check it out at rimmerbros.co.uk/bargains.

And finally, carriage costs. The majority of our small, UK orders go via first class post for a few pounds. Anything over 1.5kg has to be sent by carrier. We use UPS for this, as we believe they offer the best service of any carrier. Parcels are delivered on time, undamaged, are not left on your doorstep (or thrown over the fence!). This service does cost a little more than some of the budget carriers, but we believe our customers want, and expect the best service from Rimmer Bros, so this is what we aim to deliver.

We would like to take this opportunity to thank you for your past custom and add that we hope to be of service for your parts requirements during the next 12 months.

TESTIMONIALS

Further comments from customers this year.

*"I cannot believe that your team has just gone one step further and helped me again."
KW by email*

*"12:44 yesterday I placed this order and now at 10:50 the following morning the part is delivered, fitted and well done to you all, I'm really impressed with your customer satisfaction and will not hesitate to use you in the future, In fact order 2 just been placed. My rating of Rimmer Bros so far 10/10. Keep it up, companies like you are as rare as some of the parts I will need"
MC by email*

*"May I please thank your SD1 Parts Sales Team for the superlative service they have given me over the last few months... I have used Rimmer Bros consistently during that period and have always found the on-line ordering system to be absolutely superb, very user friendly and secure, the sales team friendly, professional and efficient when I have had cause to phone up with queries, and deliveries of all these items were very well and securely packed and delivered with super speed and efficiency."
JD, Hampshire*

*"Thanks for the awesome service received from you Rimmer Bros. We will highly recommend Rimmer Bros to all Triumph owners in South Africa. Absolutely stunning service. You are simply the best."
DH, South Africa*

*"Last night I left a message on your sales answer phone line re an enquiry for some brake parts for my herald. I was pleasantly surprised this morning (8.50am) when I got a call from Chris in your sales department who dealt with my enquiry efficiently! Many thanks for your speedy response and service - he also made arrangements to have the parts delivered to the garage that are making the repairs to my car..."
NM, Nuneaton.

New MINI parts

Rimmer Bros now stock a range of Service and Wear parts for the New MINI!

In conjunction with XPart and some of our existing suppliers, we can offer owners a selection of affordable parts and accessories, ideally suited to the DIY owner or for fitment at an independent workshop.

Full details of Parts and Accessories currently available can be found in our MG Rover Catalogue and Price Guide. Please request your free copy! Our range is ever expanding and covers most of your day to day requirements.

With over a million cars now on the road, and the oldest models some 7 years old, we believe the demand for parts is very high. Like all the vehicles that Rimmer Bros supply parts for, the New MINI has very British roots (although now owned of course by BMW but produced at Cowley in Oxford) and therefore fits snugly with our 'family' of cars and parts.

Rover in fact, started work on the New MINI back in 1993 which was soon enhanced by the arrival of BMW the following year. The original Mini (which we class as the Rover Mini and already supply parts for) has its origins back in the 50's with Alec Issigonis's first design. It's production continued into the 90's, but with ever increasing EC emission regulations, drive-by noise ratings and impending EuroNCAP crash testing demands, its long-term fate was clear. In addition, the Mini was exceptionally labour intensive and therefore expensive to produce.

It was time for a change.

Rover was working on a replacement for the Metro, so therefore was looking for a new design that would replace both cars. The New MINI was the solution. When BMW bought MG Rover from British Aerospace in 1994, they inherited early designs of the New MINI and allowed Rover to continue on with its development. However, BMW also had some ideas for the New MINI and after many years of development from concept cars in 1997 to the official launch in 2000 (when "Mini" became 'MINI') and finally to its debut on the UK market in July 2001. Since then, this very successful car has been enhanced and developed with many new models and variations. Manufacturing output is now at record levels.

Attractively priced and with strong residual values, the New MINI is a worthy successor to its predecessor.

See our separate MG Rover Catalogue & Price Guide for details on parts available.

QUICKFINDER SERVICE KITS

QUICKFINDER SERVICE KITS

**SERVICE KIT FOR RANGE ROVER
3.9 V8 (1994 ON) - RA1475**

These kits are designed to make it easier for you to get the parts you need to carry out a basic service at the right price. They contain essentials like spark plugs, points and condenser (petrol engines) air, oil and fuel filters, sump plug washer and pollen filter if applicable.

If your vehicle is in need of a more major service, we do stock a host of other items to cater for your requirements so, don't hesitate to enquire with our sales people when placing your order.

In most cases, there are 2 versions of each kit. There is an "OE" version containing genuine Land Rover parts, and a "P" (or pattern) version containing quality aftermarket parts. For example the kit for a 1994-on, 3.9 V8 Range Rover is available as RA1475 (OE) and RA1475P (aftermarket).

The "P" version of the kit can often offer considerable savings over the "OE" version. Please refer to the pricing section (or our Website) for prices.

Most models are covered however, if your vehicle is not listed here please contact us for knowledgeable advice.

RimWax - provides extreme shine and protection for all wheel finishes including chrome and alloy wheels.

Don't let dull, dirty rims ruin the look of your freshly washed and waxed car! RimWax is the answer.

RimWax is a specialized cleaner, polish and wax that quickly restores a bright, polished and protected wheel finish. The anti-static RimWax formula actually helps repel brake dust to reduce dust buildup by as much as 75%.

The fine RimWax polish brightens all chrome, polished aluminum and factory clear coat finish wheels. The ultra-tough RimWax sealant protects wheels for months, preventing water spotting and staining from road contaminants and brake dust buildup.

Features

- Professional Wheel Polish and Sealer
- Removes bonded brake dust and oxidation
- Polishes clear coated, polished and chrome wheels
- Shines, protects and repels brake dust

Freelander K Series Engine Upgrades

NEW

The following parts are designed to reduce the instances of head gasket failure on the Freelander K Series engine (WA600000-1A324161).

Firstly, a retro-fit remotely mounted Pressure Relief Thermostat. This is a replacement for the standard thermostat and thus will require a blanking plate fitted and a new seal when refitting, (part numbers below). The new remote thermostat incorporates hoses that also replace the standard top and bottom coolant hoses.

Also available is a better design Multi Layer Steel Head Gasket and a stiffer design Oil Rail for either repair or preventative action.

We can supply these genuine parts as follows:

Pressure Relief Thermostat	PCH001190	£52.28	£60.12
Thermostat Blanking Plate	PEL000040	£6.85	£7.88
Thermostat Seal	PEF10010	£1.31	£1.51
Multi Layer Steel Head Gasket	LVB500190P	£20.64	£23.74
Oil Rail	LCN000140L	£28.38	£32.64
Head Bolt (10 req)	WAM2293P	£3.62	£4.16

RADIATOR RELIEF

COOLING SYSTEM ADDITIVE

Radiator relief allows your radiator to transfer heat more efficiently, reducing your engines operating temperature (which is obviously controlled by the thermostat) by up to 30°F. You therefore have 'a little bit in hand' for those hot days stuck in traffic. This proven coolant additive will also cut engine warm-up time in half which will reduce engine wear which is most extreme when the engine is cold. Fully compatible with water and anti-freeze and is safe with cast iron and all alloys.

- 30°F lower operating temperature
- 50% quicker warm up time
- Safe with water/antifreeze mixture
- Safe with cast iron, alloy engines and heads
- Increased engine life!
- 100% biodegradable, non corrosive, non toxic
- For use in all water cooled engines

STAINLESS STEEL EXHAUSTS FOR ALL LAND ROVER MODELS

EXHAUST INSULATING WRAP **COOL IT** Thermo-Tec

Thermo-Tec exhaust insulating wrap reduces under bonnet temperatures by as much as 70%, this increases air intake and exhaust gas velocity which adds performance.

Retaining the heat in the exhaust protects you from mechanical burns and it will also help to prevent under bonnet fires. Any electrical components which are close to the manifold will be less prone to heat failure, increasing their life and performance. As an added benefit, under bonnet noise is also reduced! Thermo-Tec can be used on any 4 stroke, 2 stroke or diesel engines and contains no asbestos or carcinogens.

The Snap Strap Installation Kit secures Thermo-Tec exhaust insulation wrap to your tubular manifold/s. A stainless steel high temperature material designed better than hose clamps and is easier to use.

Also recommended is Hy-cote paint. This preserves and protects the exhaust wrap after installation. Extra resins and binders seal the pores, toughen the surface and help extend the life of the wrap.

INTERIOR PRE-HEATING for Comfort and Safety including ENGINE PRE-HEATING

SAVE PETROL, ENSURE DIESEL ENGINE STARTING, PROVIDE WARM AIR HEATING & DEMISTING ON THE MOVE - EVEN ON SHORT JOURNEYS. Enjoy the comfort and safety of a pre-heated interior with de-iced windows from a 1kw cab heater unit, coupled to a 2kw engine pre-heater with pump.

Additional advantages:

- Eliminates engine wear from a cold start.
- Increases catalytic converter life.
- Cuts unsociable cold running emissions.
- Avoids, uninsured loss of your vehicle, if stolen whilst engine running unattended on your drive!
- Avoids illegally running engine whilst unattended.
- DIY pack transferable from car to car
- Comfort and safety, winter and year round!

Avoid a cold start which is like pressing the self destruct button on your engine.

Don't wait for winter fit now!

Kenlowe are proud to have supplied Rimmer Bros for over 25 years.

see LRO Oct 08 on how to IMPROVE YOUR FUEL ECONOMY up to 10%...

Imagine your large engine-driven viscous fan continuously keeping your engine cold when you are trying to warm up this winter. A cold heater can be particularly annoying on short trips to work, the shops, or the school run and really you don't need a fan most of the time! Normal driving through the air can scoop up enough free cooling for your radiator, so you just need a capable fan as insurance for the unexpected tailbacks and long uphill climbs. A Kenlowe temperature controlled electric fan saves a whole lot of energy, and your precious fuel, by running only when needed (on average 4% of the time, which means you save during 96% of your motoring).

A genuine Kenlowe 4 x 4 thermo electric fan provides all the cooling you need for normal caravan, horsebox or boat towing, plus off-road work in Europe, year round. It's an easy upgrade making your off-roader feel more like a car on the road – noticeably quieter and with more power available, but above all, with a real fuel saving which could be so important this winter! *And that reduces your carbon footprint too!*

State full vehicle spec. and, if towing, gross trailer weight and range (local, national or give countries).

You can pay more for less – insist on the best. Only Kenlowe fans have these features.....

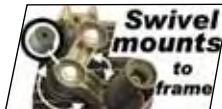

An electric fan is fitted as standard on the L. R. Freelander

Even more important this winter!

The fan with a pedigree that won't let you down

HEAT & SOUND INSULATION MATERIAL

Designed for insulating floors, bulkheads, transmission tunnels and many other applications from the effects of heat, road noise, engine and transmission noise. Made from an aluminium face bonded to a 1/8" composite fibreglass insulation, then backed to an aggressive adhesive. Tough enough for under vehicle applications and harsh environments where high heat can be a problem. Can also block out up to 50% of unwanted noise. Self adhesive, can be cut with tin snips to any shape.

Supplied in 3 sizes: 2' x 21" (3.5sq ft), 4' x 21" (7sq ft), 4' x 42" (14 sq ft).

COOL TAPE

Consists of a 1mm aluminised material bonded to a lightweight, woven fibreglass with super strong adhesive backing. Reflects radiant heat. Limitless application, but common uses include wrapping cables, hoses, fuel lines, 'spot' heat retardation areas and sealing gaps in floors or firewalls. The best product on the market! Flexible, strong adhesive and thin for a tight wrap.

THERMAL HEAT SLEEVES

This high temperature sleeving will protect wiring, HT leads, hydraulic hoses and coolant hoses from radiant heat. Two different designs are offered. The fixed tube type is designed to slide over wiring/hoses whereas the velcro type can be easily installed without having to disconnect anything. Easy to cut & shape to suit. Supplied in 3ft lengths.

TURBO-GUARD

Ideal protection for all TD owners!

Turbo failure can often be attributed to oil starvation both at start-up and shut-down. Oil can 'carbonise' in a hot turbo after the engine is turned off and the turbo is still revolving, effectively allowing the turbo to run-on-unlubricated! At start-up, the turbo will revolve momentarily on dry bearings until the oil pressure builds up from the engine.

Turbo-Guard stops this from happening. It is a reliable, automatic, maintenance free device that ensures pressurised oil is present at all times. Comprising of an oil accumulator tank, oil feed hose and a one-way check valve, it can easily be installed by a competent person. The kit is for universal application and will therefore fit a variety of applications.

AIR INTAKE PIPE COVER

Reflects heat away from air intake and intercooler pipes!

This product is designed to reflect heat away from the air intake pipe allowing cooler air to be introduced into the engine intake for a denser air/fuel charge. Ideal for most applications including intercooler pipes for added power and engine efficiency! Made from heat treated fibreglass with a reflective coating, it is easily installed (without tools) with the full length hoop and loop closure system. Size: 36" long x 14" wide.

PERFORMANCE ENHANCEMENT

- Increased torque
- Improves mileage
- Cuts emissions

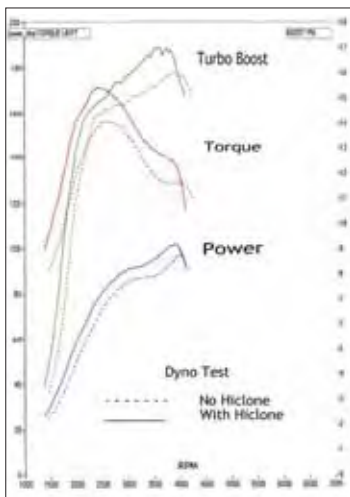

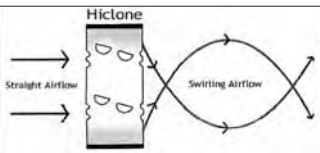

Hiclone is a simple non moving stainless steel device that sits inside the air induction system of an engine. Like a static mixer, it vigorously swirls the air. The swirling effect improves the fuel/air mixture promoting more complete combustion. Hiclone increases torque, improves fuel consumption and cuts hydrocarbon emissions: in particular smoke.

Fit Hiclone in front of a Land Rover Turbo Charger and feel the difference (see graph). See how it improves low down grunt, acceleration and reduces turbo lag. Hiclone can also be fitted to non turbo diesel and petrol engines - feel the difference!

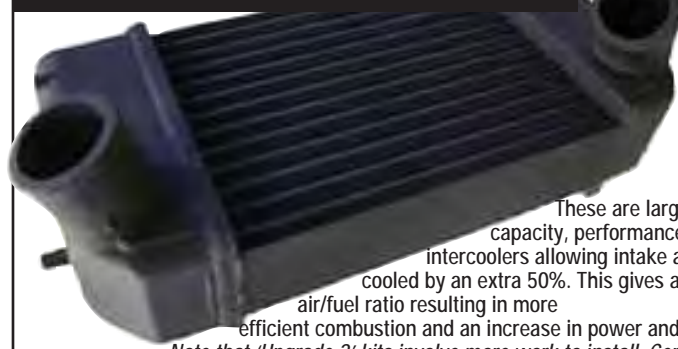

Hiclone also smoothes out the engine torque curve, resulting in a reduction in gear changes and a quieter engine especially on the motorway. With Hiclone fitted you can corner in a higher gear, this makes the vehicle easier to drive and improves the ride.

Note: Certain applications can benefit from the installation of 2 Hiclones which accounts for the higher prices for some models in the table below.

UPRATED INTERCOOLERS

These are large capacity, performance intercoolers allowing intake air to be cooled by an extra 50%. This gives a denser air/fuel ratio resulting in more efficient combustion and an increase in power and torque. Note that 'Upgrade 2' kits involve more work to install. Certain applications also require installation of a modified performance engine management unit - refer to Powerbox applications in this Price Guide.

"It does what it says on the label"

Land Rover Enthusiast Magazine (March 2004) carried a 3 page feature fitting and testing a Plug-In Powerbox upgrade to a Series 2 (P 38A) Range Rover. A full version of this feature can be found on our website www.rimmerbros.co.uk

"Claim Rimmer Bros: you can expect an increase of 25 bhp and 42 Nm (31 lb ft) of torque. New printout figures with the Powerbox fitted showed it was producing 169 bhp at 4160 rpm - an increase of 31 bhp. And the torque had increased as well, to 242 lb ft (328 Nm) - an increase of 45 lb ft (60Nm)....."

"As for the claims on power and torque, then the Powerbox had done just what it claimed and more. Very impressive!....."

"You just unplug the wiring harness going to the fuel pump and connect the Powerbox in line, and then do the same with the wiring connection to the fuel filter. As for being easy to fit and remove... well, yes it is....."

"However the most impressive thing about the Powerbox is not a claim that is actually made for it. It's the better driveability it gives the vehicle. It gives more grunt, changing the sluggish diesel Range Rover into a much livelier vehicle, especially when pulling away....."

"The power is now there when you require it....."

"The Range Rover is much nicer to drive....."

"In all, we reckoned the Powerbox would be a good buy for any 38A owner. It totally changed the diesel Range Rover....."

PLUG IN A Power Box!

Installation is relatively easy, with no specialist tools or skills required.

No irreversible modifications are made - the Power Box can be removed just as easily and the vehicle reverts to its original state.

HOW DOES IT WORK?

Power Box is a high quality, digital management upgrade, incorporating a modern RISC microprocessor. The "chip" is carefully programmed - using the manufacturers standard fuel map as a foundation - and modifies the opening times of the injectors, which then accurately meters the extra fuel required. Unlike many analogue devices, which crudely over-fuel throughout the entire rev-range, each Power Box is specifically mapped for the intended application. Extra fuel is provided when needed - eliminating flat-spots and hesitation - but there is no unnecessary enrichment, meaning no loss of fuel economy and no black smoke. In fact, most Power Box users report a noticeable improvement in fuel economy, as they discover it's no longer necessary to work their vehicle so hard.

WHERE IS IT FITTED?

On most vehicles, the Power Box fits under the bonnet, interrupting the wiring loom from the engine ECU. All Power Boxes are fitted with the original vehicle connectors, so installation is simply a case of unplugging the relevant connector and plugging in the Power Box. Full instructions are supplied and no special tools or skills are required.

Power Boxes are small, neat and discrete. They are fully encapsulated in resin and are shock resistant. Care, of course, should be taken to locate the Power Box away from the effects of water.

HOW MUCH POWER WILL I GAIN?

On average, Power Boxes give around 20% increase in power and 15-20% increase in torque (see the power table opposite). However, more important is how the vehicle feels: throttle response, crispness and driveability are all immeasurably improved, while flat-spots and sluggishness are virtually eliminated.

ADDITIONAL POWER GAINS

We also strongly recommend fitting a K&N air filter with a Power Box. This will allow the engine to breathe and perform more efficiently (K&N's can also be cleaned and re-used). In addition, fitting one of our stainless steel exhausts will also have the benefits of extracting exhaust gasses more effectively, with reduced back pressure, increased flow and improved turbo response - they look good too! If you wish to go further than this, consider an uprated intercooler (see page 21) for a truly efficient turbo diesel engine. With each of these enhancements, your Power Box can be adjusted to give even better results. Please see the tables below.

WHY NOT JUST HAVE MY ECU RE-CHIPPED?

Unlike an ECU chip, a Power Box can be fitted and removed easily. Also, as the Power Box doesn't disturb the ECU, its presence cannot be detected by diagnostic equipment. Finally, when the vehicle is sold, the Power Box can simply be removed if required and refitted to another vehicle.

In addition, Power Boxes are:

- ✓ TUV approved.
- ✓ Fully compliant with original exhaust emissions standards.
- ✓ Non-damaging to your engine.
- ✓ Power Box is covered by a 3 year guarantee (limited liability).

ORIGINAL TECHNICAL PUBLICATIONS NOW AVAILABLE ON CD ROM

**THE PARTS CATALOGUE, WORKSHOP MANUAL AND DRIVER'S HANDBOOK
YOU NEED FOR YOUR LAND ROVER - ALL ON ONE CD ROM!**

Introducing the exciting new range of Land Rover original technical publications on CD Rom from the Heritage Motor Centre and Land Rover Classic Parts.

Original parts books, workshop manuals and handbooks for Land Rovers have always been greatly sought after, and rightly so: nothing compares, for example, to a Land Rover workshop manual compiled by the car's manufacturer. Now for the first time owners and enthusiasts have the opportunity to effortlessly collect all the original publications for their favourite Land Rover, on one handy and cost-effective CD Rom.

Each CD Rom focuses on one model or family of models and each has the same format: the original parts catalogues are followed by the workshop manuals and driver's handbooks, all reproduced in an easy-to-use and easy-to-print PDF format. As appropriate to certain models, additional publications detailing special equipment or usage are also on the CD Rom.

Also included are details of the Land Rover Classic Parts programme, the Heritage Motor Centre and the British Motor Industry Heritage Trust, Land Rover history notes and useful information on relevant car clubs and enthusiast's organisations. PDF reader software is included if required.

CD ROM'S CURRENTLY AVAILABLE:-
