Examples of Pain Points and STO Application Solutions

#### **Conclusion of the Market Study**

#### STO pain-point map – the foundation for solution packages

Critical pain-point Minor pain-point No pain-point

	Assess	Define	Plan & Prepare	Execute	<b>Evaluate</b>
Systems	<ul> <li>Missing portfolio view across assets to schedule STOs</li> <li>Master data incomplete/inaccurate</li> <li>Missing sources of scope items</li> </ul>	<ul> <li>Manual scope collection and management</li> <li>No possibility to evaluate scenarios and optimize them systematically</li> <li>Master data incomplete/inaccurate</li> </ul>	<ul> <li>Missing integration of 3rd-party systems for current information</li> <li>Missing support for resource leveling and procurement</li> </ul>	<ul> <li>Missing real-time tracking</li> <li>No overview about progress of SOW</li> <li>Disconnected systems during mobilization of service workers</li> <li>Having many systems</li> </ul>	
Processes	<ul> <li>Underestimation of STO efforts</li> <li>Different processes at each asset</li> <li>Missing best practices/ standardization</li> <li>Missing industry view of competition activities</li> </ul>	<ul> <li>Lack of proper risk assessment for scope items</li> <li>Inaccurate cost and time estimates</li> </ul>	<ul> <li>STO scope is not frozen and additional work emerges</li> <li>Changes are added by individuals</li> </ul>	<ul> <li>No tracking/document- tation of work completed</li> <li>Missing integration of regular tasks and STO</li> <li>Inefficient motion of resources across plant</li> <li>Inaccurate Invoices</li> </ul>	<ul> <li>Operational commissioning takes longer than expected due to rework</li> </ul>
Resources		<ul> <li>Underestimation of logistics for resources</li> <li>Missing trust to suppliers/contractors</li> <li>Manual permission/ certificate evaluation</li> <li>Contractors chosen with limited information</li> </ul>	<ul> <li>Long lead times for material not considered</li> <li>Missing possibility to reserve materials</li> </ul>	<ul> <li>Missing willingness to track time</li> <li>Difficult/No visibility on skillset on site</li> <li>Lack of material management</li> <li>Risk of having blacklisted workers.</li> </ul>	<ul> <li>Loss of materials that were not used</li> <li>No documentation of experience with contractor</li> <li>No evaluation of work t</li> <li>No evaluation of workers on ground.</li> </ul>
Capabilities		<ul> <li>No sustainable team with experience of previous STOs</li> </ul>	<ul> <li>No shared interest of stakeholders</li> </ul>	<ul> <li>Missing knowledge base, experiences &amp; right skills</li> <li>Inappropriate training with systems</li> <li>Lack of quality of supervisors</li> <li>Collaboration barriers</li> </ul>	<ul> <li>No documentation and dependency on individual knowledge.</li> </ul>

#### Eliminating the Pain ... Wipro's STO Cloud Application

The STO Application helps customers manage TA events efficiently and effectively and deliver TA projects safely on time, within budget, and in an environmentally friendly manner;

- STO is an end-to-end application that address all aspect/areas of STO events.
- Highly configurable, secure, and user friendly:
  - User companies can configure their STO practices and processes (Templates design/Workflow.)
  - Role based authorization and configurable UIs.
  - Ability to go fully paperless operations use of mobile handheld devices.
- Allows standardization across customer plants to improve consistent delivery of STO events, training, and movement of resources.
- Data integrity via data entry validation, authorization, and change control.
- Variety of specialized Workbenches for centralized management of STO Phases and Deliverables, Scope Items, Material, Services, Equipment Rental, Inspections, etc.
- Realtime visibility of field work progress (Execution Control Board/Center) no need for field supervisors to submit end-of-shift progress reports. Management can immediately recognize delays and take corrective actions.
- Scope Change Requests raised from the field appear immediately on the Execution Control Board for follow up and decisions.
- Consolidated confirmation module (Scope Items/Activities, Work Orders, Notifications, timesheet, Material, Services, Primavera P<sup>6</sup> activities, etc.)
- Configurable and auto generated multi-discipline End-of-Shift/Subsequent-Shift report routed to STO event organization and plant management.
- Ability to develop STO budget versions, control budget, budget supplements, and budget monitoring.

#### Eliminating the Pain ...

The STO Application helps customers manage TA events efficiently and effectively and deliver a TA project safely on time, within budget, and in an environmentally friendly manner;

- Customizable dashboards and reports.
- Several statistical analysis objects. Knowledge database with past TA events statistical data and information which improve
  productivity, reduce training, better and informed decision-making, etc.
- STO configuration and authorization modules.
- Proven two-way interface with Primavera P<sup>6</sup> CARBON
- Future interfaces with Ariba and GIS.
- The application supports best STO practices as described in various standards (ex,. VDI 2775)

# WIPRO CORPORATE OVERVIEW

#### **WIPRO TODAY**

## A trusted, global partner.

**Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO)** is a leading technology services and consulting firm focused on building innovative solutions that address clients' most complex digital transformation needs.

Leveraging our holistic portfolio of capabilities in consulting, design, engineering, and operations, we help clients realize their boldest ambitions and build future-ready, sustainable businesses. With over 250,000 employees and business partners across 66 countries, we deliver on the promise of helping our customers, colleagues, and communities, to thrive in an ever-changing world.

Q3 FY23 IT services	Employees	Global presence
revenue	258,744	66 countries
\$2.80 Bn		
FY22 revenue	Active global clients	149 diverse nationalities
\$10.4 Bn	1,484	

We believe business fuels our purpose, and purpose fuels our business.

#### Dow Jones Sustainability Indices

Powered by the S&P Global CSA

Wipro is a proud member of the Dow Jones Sustainability Index (DJSI) – World for the 13<sup>th</sup> year in a row.

Wipro is the only company in the IT Services industry with an unbroken track record since 2010, reflecting our long-term commitment to sustainability.

Wipro is also a member of the DJSI Emerging Markets Index.

Figures based on the Quarter ended December 31, 2022, for Global IT Services business.

# Customers Engagements

#### **Objectives**

- Share the outcome of the Wipro and SAP global market study including the statistical data, challenges, priorities, and development approach
- Discuss the Oil and Gas, Petrochemicals, Utilities, Chemicals, Mining, and Metals (ENR) industries' best practices for STO
- Share the initial design and mockups for the STO solutions and Identify missing requirements
- Discuss potential solutions and implementation approaches identified by SAP and CAG
- Involve customers in the current and next development life cycle at periodic review points
- Advise by engaging a business process consultancy firm in the area of asset-intensive maintenance and optimization
- Share the STO requirements to facilitate the development of future solution releases
- Establish a customer point of contact for the development project

#### SAP STO Customer Advisory Group Participants – Customers & Organizations

Oil, Gas & Energy

**Chemicals & LiveScience**
