

Plantrite

WHOLESALE NATIVE NURSERY

**Native Australian Plants
for landscaping projects**

A taste of Plantrite's best varieties.

SUSTAINABILITY · DEDICATION · INNOVATION

Creating healthy, happy places for plants and people to live in balance.

Why Choose Plantrite

Plantrite is a market leader in unique native plants for WA. Our 20-acre commercial nursery provides an enormous selection of form, foliage and flower varieties throughout the year. The majority of the plants in this catalogue are exclusively available through Plantrite, with hundreds of others in our full product list. We're able to grow to order and pride ourselves on being WA's only dedicated native wholesale nursery.

The Benefits of Native Plants

We're in the business of creating sustainable landscapes which are uniquely Western Australian. Our plants have evolved for our climate and soil conditions, they're drought tolerant varieties of native plants. Native plants need less human intervention and resources to grow because they are already adapted to local soil and conditions.

By choosing native plants over international varieties, we encourage biodiversity, the recreation of wildlife corridors for birds, reptiles and mammals, and provide flora for insects and bees, which pollinate plants. Our natural environment supports our existence and in return produces food and water, regulating the climate, supporting nutrient cycles and providing recreational benefits.

Our Facilities and Delivery Fleet

Plantrite has our own truck fleet to service the Perth metro area daily. We have the ability to deliver on site, on time and in full – ensuring a smooth operation for landscape teams. Our clients appreciate our ability to deliver in specified peak timeframes (with appropriate notice). We can be onsite for landscaping projects from 6 am.

Trees & Vertical Growing Shrubs

Tree canopy cover is vital for our natural environment. These varieties assist in reducing urban heat and increasing biodiversity.

1

Calothamnus quadrifidus 'Pencil' CalpenGL (b)

- Narrow, vertical growing shrub
- 2m x 0.5m
- Red flowers during winter
- Bird-attracting
- Ideal for hedging

2

Ricinocarpus tuberculatus 'Pencil' RicpenGL (b)

- Narrow, vertical growing shrub
- 3-4m high x 1m across
- Covered in white flowers in later winter and early spring
- Will grow in all soil types, including coastal
- Ideal for hedging

3

Leptospermum sericeum 'Pencil' SericpenGL (b)

- Narrow, vertical growing shrub
- 3-4m high x 1m across
- Attractive silvery/green foliage
- Large pink flowers in spring
- Will grow in all soil types, including coastal
- Ideal for hedging

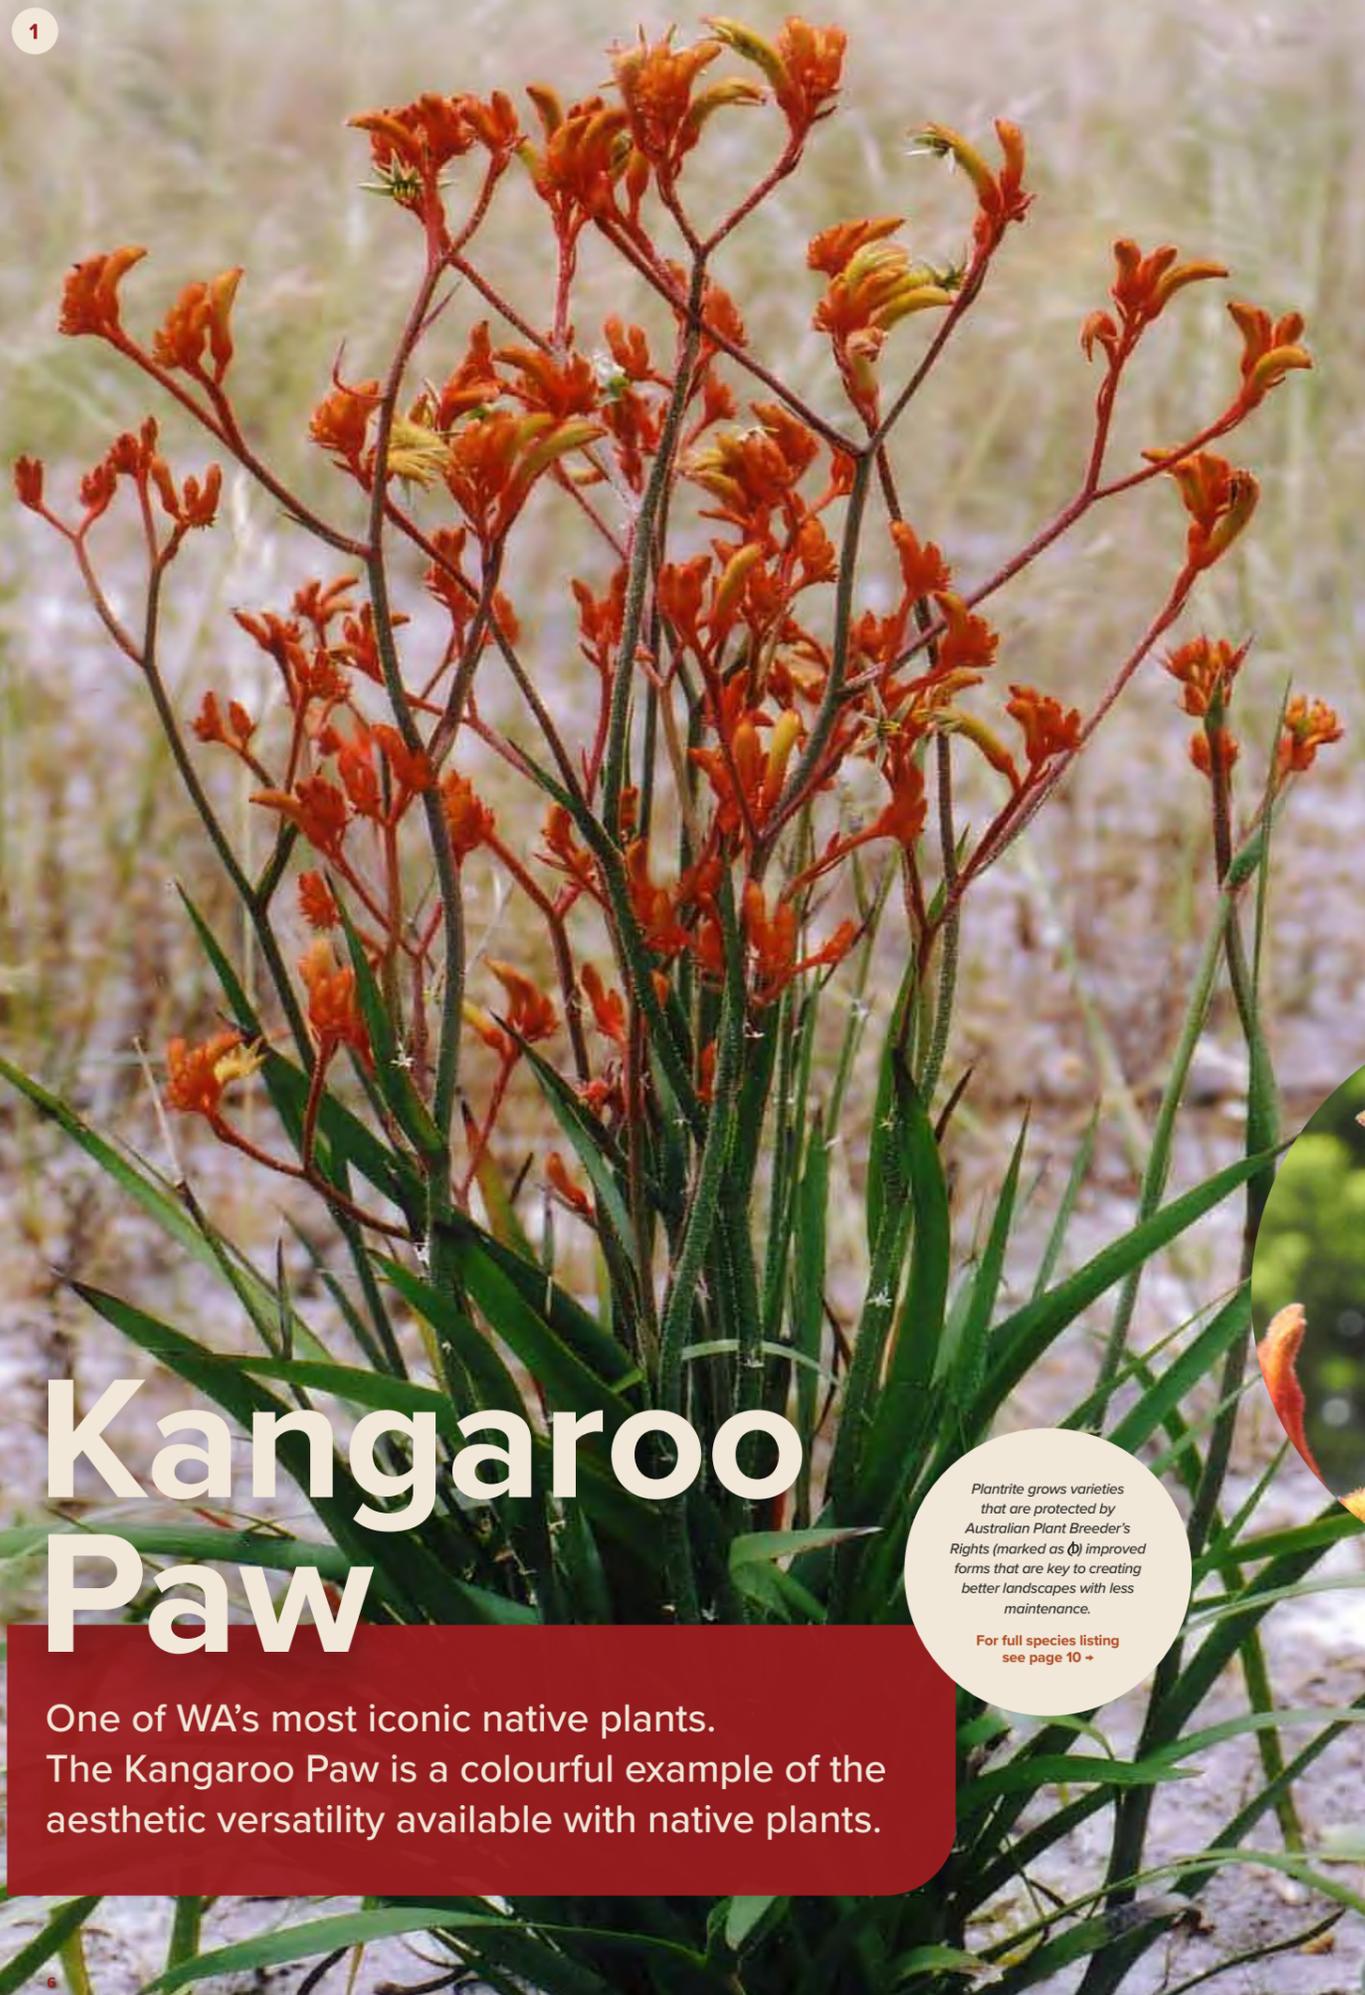

4

Agonis flexuosa 'Lemon & Lime' LemLimeGL (b)

- Lovely lime/yellowish new growth, nice foliage contrast
- Medium tree 4-5m high
- Small white flowers in late spring/summer
- Will grow in all soils including coastal

Kangaroo Paw

One of WA's most iconic native plants. The Kangaroo Paw is a colourful example of the aesthetic versatility available with native plants.

Plantrite grows varieties that are protected by Australian Plant Breeder's Rights (marked as Ⓟ) improved forms that are key to creating better landscapes with less maintenance.
For full species listing see page 10 →

1 Anigozanthos Amber Velvet Ⓟ

- Strap leaved plant to 40cm
- Flower spikes to 1m in spring and summer
- Bird attracting
- Will grow in all soils
- Can be pruned off at ground level after flowering

2 Anigozanthos Gold Velvet Ⓟ

- Strap leaved plant to 40cm
- Flower spikes to 1m in spring and summer
- Bird attracting
- Will grow in all soils
- Can be pruned off at ground level after flowering

3 Anigozanthos Regal Velvet Ⓟ

- Strap leaved plant to 50cm
- Flower spikes to 1.5m in spring and summer
- Bird attracting
- Will grow in all soils
- Can be pruned off at ground level after flowering

4 Anigozanthos Mini Sunrise

- Strap leaved plant to 30cm
- Flower spikes to 50 cm in spring and summer
- Bird attracting
- Will grow in all soils
- Can be pruned off at ground level after flowering

Ground Covers

Low Spreading Shrubs

Providing natural textured ground cover to harshest environments, these varieties will grow in most soil types including coastal sands and limestone.

Plantrite grows varieties that are protected by Australian Plant Breeder's Rights (marked as **(b)**) improved forms that are key to creating better landscapes with less maintenance.

2

1
Acacia redolens
'Desert Carpet'

- 60cm high x 2m across
- Vanilla scented, grey/green foliage
- Yellow flowers in later winter/spring

2
Myoporum insulare dwarf
'Coastal Rambler' (b)

- Proven landscape plant
- 60cm high x 2m across
- Will grow in all soils, including limestone and coastal
- Small white flowers during summer

3
Melaleuca huegelli prostrate HueglaftGL (b)

- Low, spreading shrub
- 0.5m x 2m across
- White bottle brush flowers in summer
- Will grow in all soils, including coastal sands

4
Melaleuca pentagona
'Little Penta' (b)

- Spreading, ground covering plant.
- 60cm high x 2m across
- Reliable landscape plant

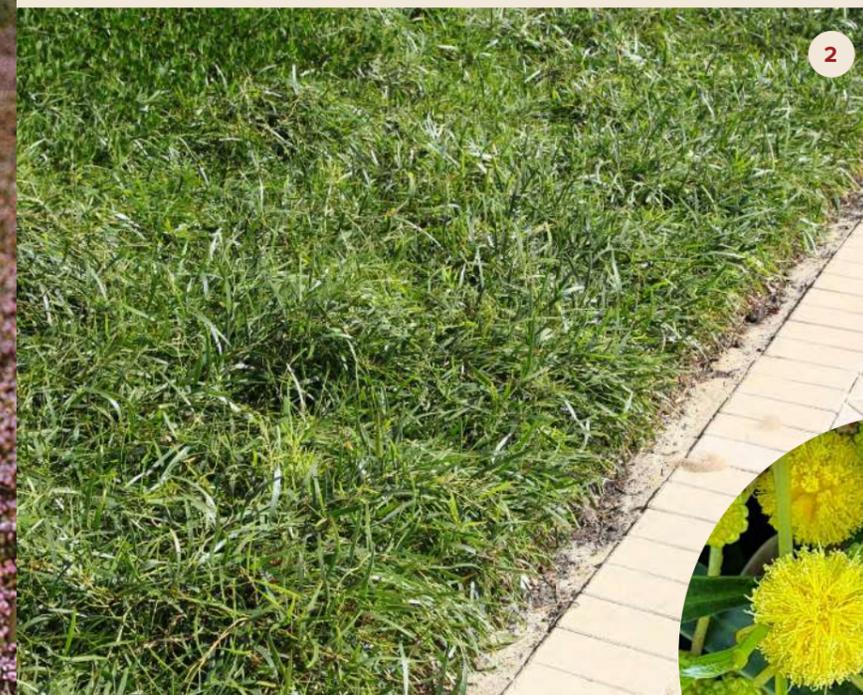

1

Ground Covers Flat

Protective. Drought resistant. Appealing. Flat ground covers help suppress weeds and are a must-have for any landscaping project.

Plantrite grows varieties that are protected by Australian Plant Breeder's Rights (marked as ) improved forms that are key to creating better landscapes with less maintenance.

For full species listing see page 10 →

1
Acacia lasiocarpa prostrate

- Ground covering plant
- 20cm high x 1m across
- Showy yellow flowers in later winter to spring
- Fast growing plant, ideal for landscape
- Thrives in coastal conditions and sandy soils.

2
Acacia saligna prostrate 'Green Mulch'

- Very vigorous, dense groundcover
- 20cm high x 2-3m across
- Dark green foliage, completely flat on the ground
- Yellow flowers in later winter & spring
- Great landscape plant, producing quick ground covering results
- Reliable in all soils, including coastal and clay

3
Hibbertia racemosa 'Racey Rambler' 

- New release
- Flat, small growing plant 10cm x 40cm
- Thrives in coastal conditions, including limestone and sandy soils
- Yellow flowers in winter/spring
- Full sun or part shade

4

Marianthus paralius

- Great ground covering plant 20cm x 1m or very light climber
- Dark green, large leaves for contrast in a landscaping
- Declared rare flora
- Tolerates all soils, including coastal exposure

5

Billardiera fusiformis prostrate 'Blue Carpet' (D)

- Fantastic ground covering form, with dark green foliage
- Blue flowers in summer
- Will tolerate all soils, including coastal

6

Myoporum insulare prostrate 'Coastal Carpet' (FlatinsulGL) (D)

- Proven landscape plant
- 20cm high x 1m across
- Will grow in all soils, including limestone and coastal
- Small white flowers during summer

7

Scaevola crassifolia 'Flat Fred' (D)

- Proven reliable groundcover, ideal for landscape use
- 20-30cm high x 1m across
- Small blue fan shaped flowers in summers
- Limestone tolerant

5

7

6

4

11

8
Adenanthos cuneatus
'Coral Carpet' 

- Ground covering plant, 25cm high x 2m across
- Small red bird-attracting flowers throughout most of the year
- Lovely pink/red new growth,
- Excellent foliage contrast for landscaping

9
Kennedia coccinea prostrate **'Coastal Carpet'** KencoralGL 

- New release
- Ground cover form of the popular 'Coral Vine'
- Thick leathery leaves
- Showy pea flowers in late winter/spring
- Will tolerate all soils, inc limestone and coastal

8

10
Calothamnus quadrifidus prostrate Flat01 

- New release
- New improved ground cover form
- Fast growing
- 20cm high x 2m across
- Red flowers in late winter/spring

10

11
Thryptomene baeckeacea prostrate

- Completely flat, ground covering form of Thryptomene
- 10cm high a 1m across
- Long flowering period, throughout Autumn and Winter
- Will grow in full sun or part shade
- Will grow in all soils, including limestone

9

1

Compact Shrubs

Perfect for roadside and median strips, compact shrubs are tough, weather resistant and versatile.

Plantrite grows varieties that are protected by Australian Plant Breeder's Rights (marked as **(P)**) improved forms that are key to creating better landscapes with less maintenance.

5
Grevillea preissii
'Green Seaspray' ⁽¹⁾

- Improved low growing form
- Red, bird attracting flowers in winter and spring
- Will grow in all soils including coastal

6
Eremophila glabra
 subsp **tomentosa**
'Silver Flame' ^{Kalbarri Red (1)}

- Low growing plant 60cm x 1m wide
- Lovely silver foliage provides great contrast in a landscape
- Red, bird-attracting flowers throughout most of the year.
- Will grow in all soils including coastal

7
Calothamnus quadrifidus
'Clean & Green' ^{Calgreen1GL (1)}

- Compact shrub 1m x 1m
- Dark green foliage
- Showy red flowering in winter/spring
- Very reliable landscape plant

8
Chamelaucium uncinatum dwarf
'Beach Ball Pink'
^{FlatwaxpinkGL (1)}

- Very compact shrub to 60cm high x 1m across
- Ideal for landscape projects and gardens
- Pink flowers in Oct/Nov
- Grows naturally on the coast, will tolerate salt winds

9

9
Thryptomene
baeckeacea
'Kalbarri Cascade'

- Neat growing shrub 50cm x 50cm
- Dainty pink flowers in autumn and winter
- All soils, including coastal locations

10
Beaufortia aestiva
'Summer Flame'

- Improved low growing, compact form
- Bright red flowering during spring and summer
- Will grow in all soils including coastal sands

11
Ricinocarpus
cyanescens dwarf
'Little Bride'

- Compact growing form of the popular 'wedding bush'
- 1m high x 1m across
- Glossy white flowers in spring and early summer
- All soils, including coastal locations

12
Kunzea baxteri dwarf
'Mandy's Surprise' (D)

- Very compact plant, 1m x 1m
- Masses of attractive red bottlebrush flowers in winter/spring

Placing Your Order

Contact the sales team at Plantrite in regards to what species we can supply for your project. The team will provide a written quote and is happy to offer suggestions of suitable species.

We understand every project is different. If you have specific requirements such as container size, potting mix, salt hardiness - feel free to get in contact and discuss how we can offer a solution to suit.

Ordering

Ensure you achieve the best mix of plants for your landscaping project by ordering in advance. Orders between 9 - 6 month before required help ensure your plants will be delivered on time and in the quantities required.

Reporting

We'll supply progress reports of your order throughout the growing season, ensuring peace of mind.

Delivery

Plantrite provides delivery and can be on site from 6am. We recommend booking your delivery date and time at least one week in advance to avoid disappointment.

Last minute project?

Plantrite carries the largest volume of native plants and regularly fulfills orders for last minute planting projects. Contact us for the current species availability.

Our purpose To green WA with native flora.

Discuss your planting plan with us and order exactly the plants you need, grown specifically for your project.
