Access the inaccessible®

Through your profession, you have decided to offer adventure, sport, and new experiences. For climbing gym operators or adventure parks, for via ferrata or canyoning guides, we have one objective: to make your work easier. That's why we have designed a line of products that is dedicated to you, taking into consideration all the demands and needs of your work.

This year, adventure parks are front and center with the new SWAN harness, TRAC pulley, JOKO lanyard, and PANGA and BOREO CLUB helmets. For canyoning, the all-new YARA and the updated ALCANADRE round out our line of canyoning bags.

Happy reading and have a great season!

Personalized products and ready-to-use solutions

Petzl Custom is a service that allows you to customize certain products from our product lines. It is possible to manufacture and assemble ready-made products to meet specific user needs. Customizing colors can make it easier to identify client groups or adjust the size on a helmet, for example. To take advantage of Petzl Custom, simply contact your regular Petzl dealer and place your order. Petzl Custom can customize helmets, adventure park lanyards, and certain semi-static and dynamic ropes.

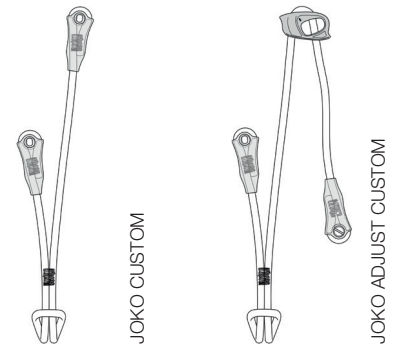

PANGA® and BOREO® CLUB Helmets

Petzl Custom can customize helmets, providing choice of shell color, size (BOREO CLUB), or pre-adjustment of the size around the head (PANGA). Stickers with a logo and/or standard markings can be printed.

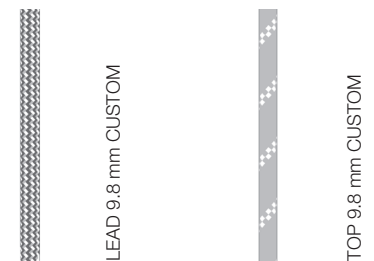

JOKO adventure park lanyards

Petzl Custom can customize the lanyard's color and length, and offers a choice of a single or double arm. Choice of terminations and harness connection types are also possible. Connectors and TRAC trolleys can be pre-installed for a ready-to-use solution.

Dynamic rope LEAD 9.8 mm and semi-static rope TOP 9.8 mm

Petzl Custom ropes are entirely customizable to respond to your structural needs. The ropes are available in three different colors and it is possible to order a custom-length rope (by the meter, from 2 to 500 meters).

Adventure Park Harnesses

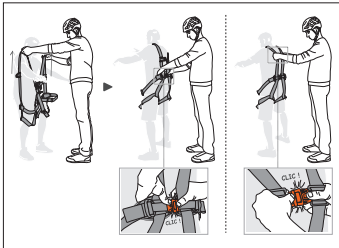

NEW
2021

SWAN EASYFIT STEEL

Durable, easy-to-use full-body harness for adventure parks

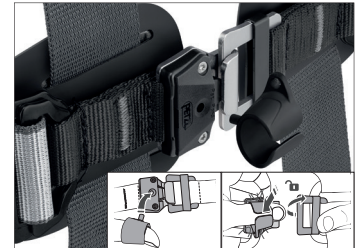

SWAN EASYFIT STEEL is a full-body harness designed for adventure parks. Color-coded straps make it easier to put on. Equipped with a FAST LT PIN-LOCK buckle to secure harness fastening; the PIN-LOCK locking system can only be opened by the guide with a special tool. The raised position of the connection point limits the risk of the client flipping. Its durability makes for easy maintenance and extended product life. The single size and identification areas simplify equipment inventory management.

Installation on the client is facilitated, thanks to the FAST automatic buckles at the rear of the harness.

The wide ventral attachment point facilitates installation of the JOKO or AVENTEX lanyards and allows for a quick visual check. The raised position of the attachment point limits the risk of the client flipping.

The FAST LT PIN-LOCK automatic waistbelt buckle can only be unlocked with a special tool, limiting the risk of the user opening the buckle.

NEW
2021

SWAN EASYFIT STAINLESS

Easy-to-use full-body harness with optimized durability for adventure parks

SWAN EASYFIT STAINLESS is a full-body harness designed for adventure parks. Color-coded straps make it easier to put on. Equipped with a FAST LT PIN-LOCK buckle to secure harness fastening; the PIN-LOCK locking system can only be opened by the guide with a special tool. The raised position of the connection point limits the risk of the client flipping. The stainless steel DOUBLEBACK buckles and thick webbing optimize durability for intensive use in damp and salty environments. The single size and identification areas simplify equipment inventory management.

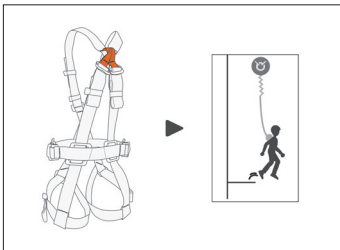

NEW
2021

SWAN FREEFALL STEEL

Durable, easy-to-use full-body harness with dorsal attachment point for adventure parks

SWAN FREEFALL STEEL is a full-body harness designed for adventure parks. Color-coded straps make it easier to put on. The raised position of the connection point limits the risk of the client flipping. It also has a dorsal attachment point for belaying special adventure park activities such as freefall. Its durability makes for easy maintenance and extended product life. The single size and identification areas simplify equipment inventory management.

The dorsal attachment point allows a client to be belayed for special adventure park activities such as freefall.

The wide ventral attachment point facilitates installation of the JOKO or AVENTEX lanyards and allows for a quick visual check. The raised position of the attachment point limits the risk of the client flipping.

Self-locking DOUBLEBACK buckles allow for quick and easy harness adjustment. The excellent grip on the webbing ends makes adjustment easier, even with gloves on.

NEW
2021

SWAN FREEFALL STAINLESS

Easy-to-use full-body harness with optimal durability and dorsal attachment point for adventure parks

SWAN FREEFALL STAINLESS is a full-body harness designed for adventure parks. Color-coded straps make it easier to put on. The raised position of the connection point limits the risk of the client flipping. It also has a dorsal attachment point for belaying special adventure park activities such as freefall. The stainless steel DOUBLEBACK buckles and thick webbing optimize durability for intensive use in damp and salty environments. The single size and identification areas simplify equipment inventory management.

NEW
2021

Comfort foam for SWAN harness

Comfort foam for SWAN EASYFIT and SWAN FREEFALL harnesses provides greater comfort during prolonged suspension. It installs directly to the leg loop webbing of the harnesses.

NEW
2021

Unlocking tool for SWAN EASYFIT harness

Unlocking tool for SWAN EASYFIT harness opens the FAST LT PIN-LOCK automatic buckle at the rear of the harness. It can be easily carried on the guide or monitor's harness.

Versatile Helmets

NEW
2021

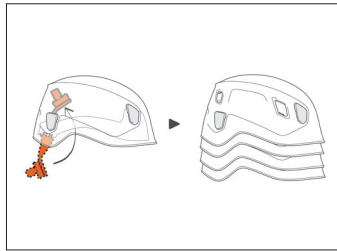

PANGA®

Easy-to-use and durable helmet (pack of 5)

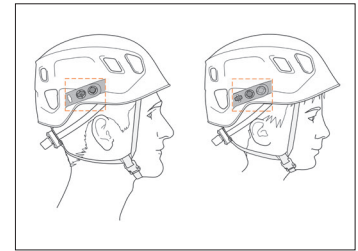

PANGA is a durable, easy-to-use helmet designed for group and club use. The FLIP&FIT system allows low positioning of the headband and secure helmet fit on the head, as well as easy adjustment by the instructor or user. Equipment management is facilitated by the single-size helmet, which can be adjusted to fit smaller heads. It features a thick shell designed to resist impacts and scratches. Its headband folds away for protection during transport or storage. Maintenance is made easier and product life is optimized, thanks to three components - shell, liner and headband - that are completely removable and interchangeable. PANGA is available in five colors and comes in packs of five.

Maintenance is made easier and product life is optimized, thanks to three components - shell, liner and headband - that are completely removable and interchangeable.

The FLIP&FIT system allows the headband to be positioned low on the head, allowing for a more secure fit. The system allows the headband size to be easily adjusted by an instructor or user.

Lateral adjustment allows the headband size to be reduced and makes it easier for smaller sizes to keep the helmet centered on the head.

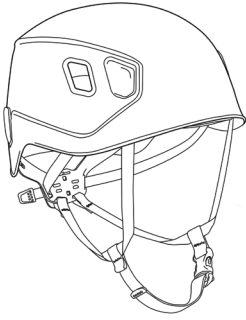

NEW
2021

Headband for PANGA® helmet

Headband for PANGA helmet (pack of 5)

Replacement headband for PANGA helmet optimizes the life of the helmet. The FLIP&FIT system allows low positioning of the headband and secure helmet fit on the head, as well as easy adjustment by the instructor or user. Equipment management is facilitated by the single-size helmet, which can be adjusted to fit smaller heads. The headband folds away for protection during transport or storage.

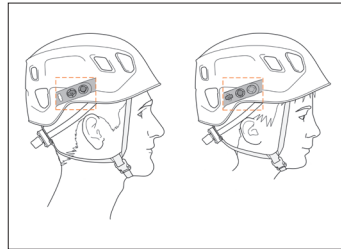

PANGA® CUSTOM

Customizable PANGA helmet (pack of 5)

Petzl Custom offers customized PANGA helmets. They come in a choice of shell colors and include a pre-adjusted size option. Stickers with a logo and/or standard markings can be printed.

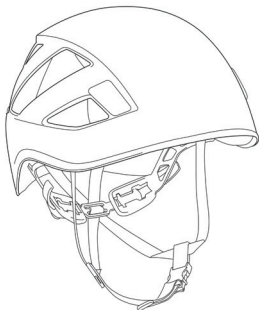

Petzl Custom offers customized PANGA helmets. They come in a choice of shell colors: orange, white, blue, green or red.

The headband can be pre-adjusted to a large or small head size.

Stickers with a logo and/or standard markings can be printed.

BOREO® CLUB CUSTOM

Customizable BOREO CLUB helmet (pack of 4)

Petzl Custom offers customized BOREO CLUB helmets. They come in a selection of sizes and shell colors. Stickers with a logo and/or standard markings can be printed.

Petzl Custom offers customized BOREO CLUB helmets. They come in a selection of sizes and shell colors.

Stickers with a logo and/or standard markings can be printed.

Dynamic Ropes

NEW
2021

CONTACT® 9.8 mm

9.8 mm dynamic rope

The CONTACT 9.8 mm dynamic rope strikes an excellent balance between low weight and durability for greater versatility. Excellent grip and great handling make for easier manipulation and use of belay devices. Additionally, the thickness of the sheath reinforces the rope's durability.

NEW
2020

LEAD 9.8 mm CUSTOM

9.8 mm diameter dynamic rope for lead and top-rope climbing

The LEAD 9.8 mm CUSTOM dynamic rope is designed for top-rope or lead climbing. The diameter and flexibility offer good handling during learning phases and simplify use of belay devices. It is available in three colors. Customized rope lengths can be ordered to correspond with the height requirements of the gym. This rope is not suitable for permanent top-rope climbing.

Low-stretch Kernmantle Rope

NEW
2020

TOP 9.8 mm CUSTOM

9.8 mm diameter low-stretch kernmantle rope for top-rope climbing

The TOP 9.8 mm CUSTOM low-stretch kernmantle rope is designed for continuous top-rope use. Low rope-stretch reduces the risk of a ground-fall within the first few meters of climbing and makes it easier to take up slack when belaying. The diameter and flexibility offer good handling during learning phases and simplify use of belay devices. It is available in three colors. Customized rope lengths can be ordered to correspond with the height requirements of the gym. This rope is not suitable for lead climbing.

TRAC CLUB

Durable, easy-to-use trolley for adventure parks

TRAC CLUB is an easy-to-use trolley designed for adventure parks. Ergonomic and with excellent grip, the client can install the trolley on the cable with one hand. The ends are equipped with protective impact surfaces to reduce the risk of pinched fingers, and two connector support grooves to help to avoid abrasion from the cable. The JOKO and AVENTEX lanyards and the trolley are directly integrated to reduce the risk of separation or loss. Product life is extended thanks to extremely durable bearings and removable impact surfaces available as spare parts.

The ergonomic opening system allows the client to easily install the trolley on the cable with one hand.

Excellent grip makes it comfortable for the client to manipulate.

Two positioning support grooves for the connectors limit abrasion from the cable.

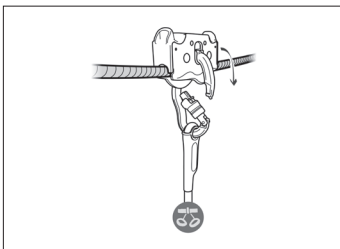

NEW
2021

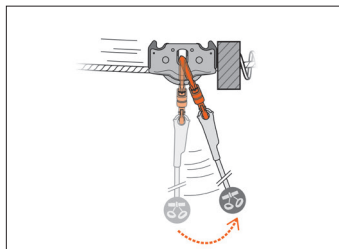

TRAC GUIDE

Trolley with optimal durability for adventure parks

TRAC GUIDE is a trolley designed for adventure parks. Featuring an ergonomic captive carabiner, it allows the guide or monitor to quickly install the trolley on the cable with one hand. Because the carabiner pivots, the trolley remains in position on the cable when it makes contact with the end brake of the zip line. The ends are equipped with protective impact surfaces to reduce the risk of pinched fingers, and two connector support grooves to help to avoid abrasion from the cable. The JOKO and AVENTEX lanyards and the trolley are directly integrated to reduce the risk of separation or loss. The carabiner's reinforced construction provides greater resistance to damp and salty environments. Product life is extended thanks to extremely durable bearings and removable impact surfaces available as spare parts.

The ergonomic captive carabiner allows the guide to quickly install the trolley on the cable with one hand.

Because the system allows the carabiner to pivot, the trolley remains in position on the cable when it makes contact with the end brake of the zip line.

Two positioning support grooves for the connectors limit abrasion from the cable.

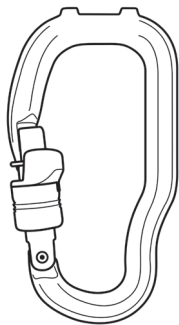

NEW
2021

Impact Surfaces for TRAC Trolleys

Replacement impact surfaces for TRAC CLUB and TRAC GUIDE trolleys extend the life of the trolley. They limit the risk of pinched fingers and help position the connectors in order to reduce abrasion from the cable.

NEW
2021

Carabiner for TRAC GUIDE Trolley

Replacement carabiner that extends the life of the TRAC GUIDE trolley. Its ergonomic shape allows the guide to very quickly install the carabiner/trolley unit on the cable with just one hand. Reinforced construction provides greater resistance to damp and salty environments.

NEW
2021

CARITRAC

Storage accessory for TRAC trolleys

Designed for adventure parks, CARITRAC is an accessory that is installed on the webbing of the harness for easy storage of a TRAC trolley. Its ergonomic shape allows the client or guide to very rapidly place the trolley on the harness. CARITRAC is not PPE.

NEW
2021

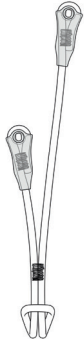

NANO TRAXION

High-efficiency, ultra-lightweight progress-capture pulley

NANO TRAXION is an ultra-lightweight (53 g) and compact progress-capture pulley designed for rescue. Sealed ball bearings provide excellent efficiency (91 %).

JOKO CUSTOM

Customizable rope lanyard for adventure parks

JOKO CUSTOM is an entirely customizable rope lanyard designed for adventure parks. Easy-to-use, this lanyard allows the user to attach the mobile connection device to the harness. The ends are equipped with a plastic sheath to protect the stitching from abrasion. Petzl Custom can customize the lanyard's color and length, and offers a choice of a single or double arm. Choice of terminations and harness connection types are also possible. Connectors and TRAC trolleys can be pre-installed for a ready-to-use solution.

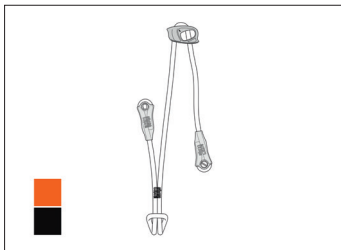

NEW
2021

JOKO ADJUST CUSTOM

Customizable adjustable rope lanyard for adventure parks

JOKO ADJUST CUSTOM is an entirely customizable adjustable rope lanyard equipped with an ADJUST rope adjuster and designed for adventure parks. Easy-to-use, this lanyard allows the user to attach the mobile connection device to the harness. The ends are equipped with a plastic sheath to protect the stitching from abrasion. Petzl Custom can customize the lanyard's color and length, and offers a choice of a single or double arm. Choice of terminations and harness connection types are also possible. Connectors and TRAC trolleys can be pre-installed for a ready-to-use solution.

Petzl Custom offers the lanyard with a single or double arm, as well as the choice of color in orange or black.

The lanyard can be customized to a specified length (5 cm increments, from 25 to 200 cm).

A selection of terminations and harness connection types is available: sewn termination, girth hitch or ADJUST rope adjuster.

NEW
2021

AVENTEX

Double webbing lanyard for adventure parks

Designed for adventure parks, AVENTEX is a double webbing lanyard that allows the mobile connection device to be connected to the harness. Installation on the harness is quick and easy with a girth hitch. The ends are equipped with the STRING accessory to help keep the mobile connection device in position and protect the webbing from abrasion. The individual identification marking on the plastic sheath allows the equipment to be tracked throughout its lifespan.

Durable individual identification to track equipment throughout its lifespan.

The ends are equipped with the STRING accessory to help keep the mobile connection device in position and protect the webbing from abrasion.

NEW
2021

DUAL CANYON CLUB

Double lanyard for canyoning

Designed for canyoning, the DUAL CANYON CLUB is an easy-to-use lanyard for groups. It allows progression on a lifeline with intermediate anchors and positioning at an anchor. It attaches easily to the CANYON CLUB harness with a simple girth hitch. The plastic sheaths hold the carabiners in position and protect the stitching from abrasion.

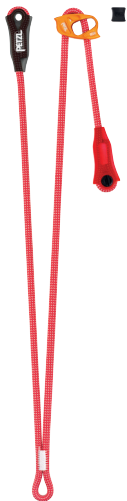

Attaches easily to the CANYON CLUB harness with a simple girth hitch.

Ends equipped with plastic sheaths to help hold the carabiners in place and protect the stitching from abrasion.

NEW
2021

DUAL CANYON GUIDE

Adjustable double lanyard for canyoning

Designed for canyoning, the DUAL CANYON GUIDE is an easy-to-use lanyard for advanced users and guides. It allows progression on a lifeline with intermediate anchors and optimal positioning at an anchor. It attaches directly to the pin of the gated attachment point on the CANYON GUIDE harness. The ADJUST rope adjuster has an ergonomic shape that allows for simple and quick length selection of the adjustable arm. The plastic sheaths hold the carabiners in position and help protect the stitching from abrasion.

Attaches directly to the pin of the gated attachment point on the CANYON GUIDE harness.

Adjustable arm is quick and easy to lengthen or shorten, thanks to the ergonomic ADJUST rope adjuster.

NEW
2021

DUAL CONNECT VARIO

Completely adjustable double lanyard for canyoning

DUAL CONNECT VARIO is an adjustable double lanyard designed for tethering oneself or moving along a traverse line when canyoning. The length of the fixed arm can be adjusted to the user's needs. The adjustable arm allows the length to be adapted for moving along a traverse line. With an ergonomic shape, the ADJUST rope adjuster allows simple and quick one-handed length selection of the adjustable arm.

DJINN STEEL AXESS

Quickdraw with DJINN STEEL carabiner and GO 8 mm quick link for climbing gyms (pack of 10)

The pack of ten DJINN STEEL AXESS quickdraws has steel carabiners, GO 8 mm quick links with K-LINK positioning accessory, and AXESS slings. The slings have AXESS STRING protection along their entire length for intensive use in a climbing gym.

AXESS STRING protection over entire length of sling to keep the carabiner in position and help protect webbing from wear during intensive use.

NEW
2020

GO 8 mm

Wide-opening quick link for climbing gyms (pack of 10)

The GO 8 mm quick link can be used to connect a TIPTOP top anchor carabiner or replace the quick link on DJINN STEEL AXESS quickdraws. Its 8 mm diameter and galvanized steel frame provide excellent durability. It is compatible with the K-LINK positioning accessory that promotes loading of the quick link on the major axis and limits the risk of rotation.

NEW
2020

K-LINK

Positioning accessory for GO 8 mm quick link (pack of 10)

K-LINK positioning accessory is designed to promote loading of the quick link on the major axis and to limit the risk of rotation. It helps reduce wear on the webbing from the quick link. K-LINK is only compatible with the GO 8 mm quick link.

EASYTOP® STEEL

Ergonomic and durable top anchor carabiner for interior use

EASYTOP STEEL is a top anchor carabiner designed for indoor climbing gyms. The carabiner design makes clipping easy. The steel frame and the locking system are extremely durable. The inspection pin (included) allows operators to rapidly inspect the function and wear of the equipment.

Smooth and easy clipping.

The wide and rounded rope channel helps protect the rope.

Function and wear inspection is quick and easy, thanks to an inspection pin (included).

NEW
2020

EASYTOP® STAINLESS

Ergonomic and durable top anchor carabiner for exterior use

EASYTOP STAINLESS is a top anchor carabiner designed for outdoor climbing walls. The carabiner design makes clipping easy. The stainless steel frame and the locking system optimize durability. The inspection pin (included) allows operators to rapidly inspect the function and wear of the equipment.

NEW
2020

TIPTOP STEEL

Durable carabiner for interior use (pack of 10)

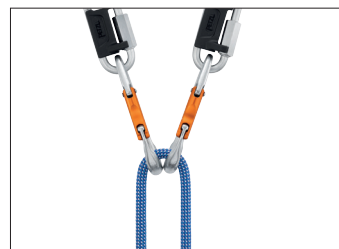

TIPTOP STEEL is a top anchor carabiner designed for indoor climbing gyms. Its aluminum gate and large opening make it easier to clip the rope. The steel frame offers great durability. It is easy to install on an existing anchor.

Aluminum gate gives it the feel of clipping a quickdraw.

The wide and rounded rope channel helps protect the rope.

To be installed on an existing anchor system with quick links (not included).

NEW
2020

TIPTOP STAINLESS

Durable top anchor carabiner for exterior use (pack of 10)

TIPTOP STAINLESS is a top anchor carabiner designed for outdoor climbing walls. Its aluminum gate and large opening make it easier to clip the rope. The stainless steel frame and hard anodized gate optimize durability. It is easy to install on an existing anchor.

SAKAB

Freestanding chalk bucket for bouldering

Built for chalking up between boulders, the SAKAB stands upright on the ground. Its semi-rigid construction provides excellent stability and the large opening makes it easy to chalk up both hands at the same time. The magnetic roll-top closure keeps the chalk tightly sealed inside the bag. Two handles make it easy to transport and hang. Two brush holders and two zippered pockets for storing the essentials make the SAKAB the ideal companion for your next bouldering session.

Large opening and bag capacity allow both hands to easily access the chalk.

Quick magnetic closure.

The roll-top provides complete closure to reduce bulk and prevent chalk from spilling during transport.

SAKOVER

Ultra-lightweight sealed bag for storage and transport of chalk bags

With a lightweight design, the SAKOVER is made to store and transport chalk bags. Sealed seams with thermo-bonded bands provide airtight storage of remaining chalk. The roll-top and buckle closure system keeps chalk from spilling out.

Airtight storage of chalk and easy transport of chalk bags.

Canyoning Packs

ALCANADRE CLUB 30

Easy-to-use canyoning pack

Designed for canyoning, the ALCANADRE CLUB 30 is an easy-to-use pack for groups. The padded shoulder straps offer great comfort during the approach. The large opening makes it easy to store and remove the rope. Multiple drain holes optimize water evacuation. It is equipped with three color-coded loops for attaching the rope ends and rescue equipment. The buckles on each shoulder strap quickly release the pack in an emergency situation. Its construction and reinforced upper handle provide additional durability.

Drain holes in sides and bottom evacuate water efficiently.

Three color-coded loops inside the pack for attaching the rope ends and rescue equipment.

Multi-position webbing allows the pack to be transported efficiently in any situation.

ALCANADRE GUIDE 45

Ergonomic and comfortable canyoning pack

Designed for canyoning, the ALCANADRE GUIDE 45 is a comfortable, ergonomic pack designed for advanced users and guides. The generous padding provides optimal comfort during long approaches. Multiple drain holes optimize water evacuation. Special features that facilitate movement including color-coded loops, removable waistbelt, and shoulder strap buckles that quickly release the pack in emergency situations. It is equipped with two compartments that allow direct access to a waterproof container and the rope, a pocket for rescue equipment, and a mesh pocket for small items. Its construction and reinforced upper handle provide additional durability.

Back, shoulder strap, and waistbelt padding provide optimal comfort during long approaches.

Lower compartment can be opened for access to a waterproof container.

YARA CLUB 15

Small capacity rope bag for canyoning

YARA CLUB 15 is a small capacity canyoning rope bag designed for groups. It can transport a rope, keep it from tangling with other equipment, and facilitate maneuvers at the anchor or during installation of a fixed line. The padded back provides buoyancy, while the removable shoulder straps and two handles improve handling. Multiple drain holes optimize water evacuation. Its construction and reinforced upper handle provide additional durability.

Drain holes in sides and bottom evacuate water efficiently.

Two color-coded loops inside the bag for attaching the rope ends.

Molded upper handle and front handle make it easy to throw and pass the bag.
