- Challenge for your custom code

Custom code adaptation

- Custom code analysis
- Functional adaptation
- Custom code optimization

Summary and Outlook

Introduction

SAP S/4HANA – Digital Core

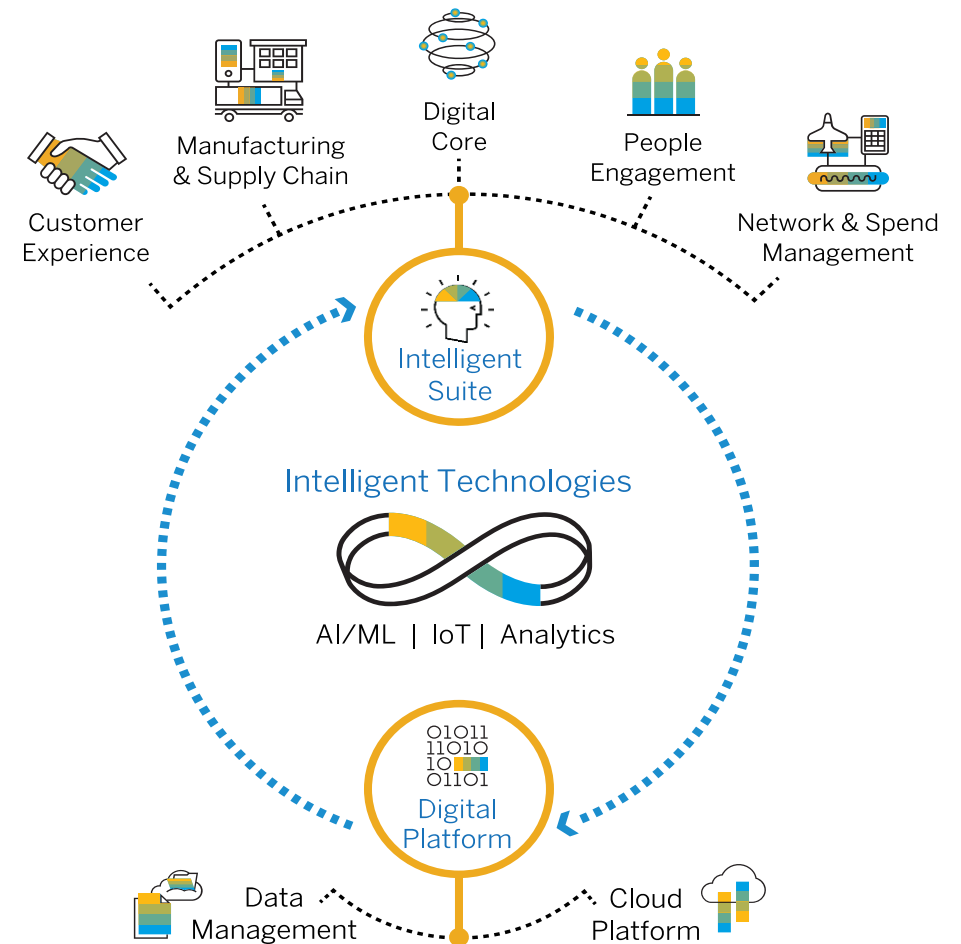

SAP S/4HANA Enterprise Management is SAP's next generation Digital Core

- ▶ Optimized for SAP HANA
- ▶ New architecture and data models
- ▶ “Principle of One”
- ▶ Renewed applications
- ▶ Fiori based User Experience
- ▶ Cloud & on-premise deployment models

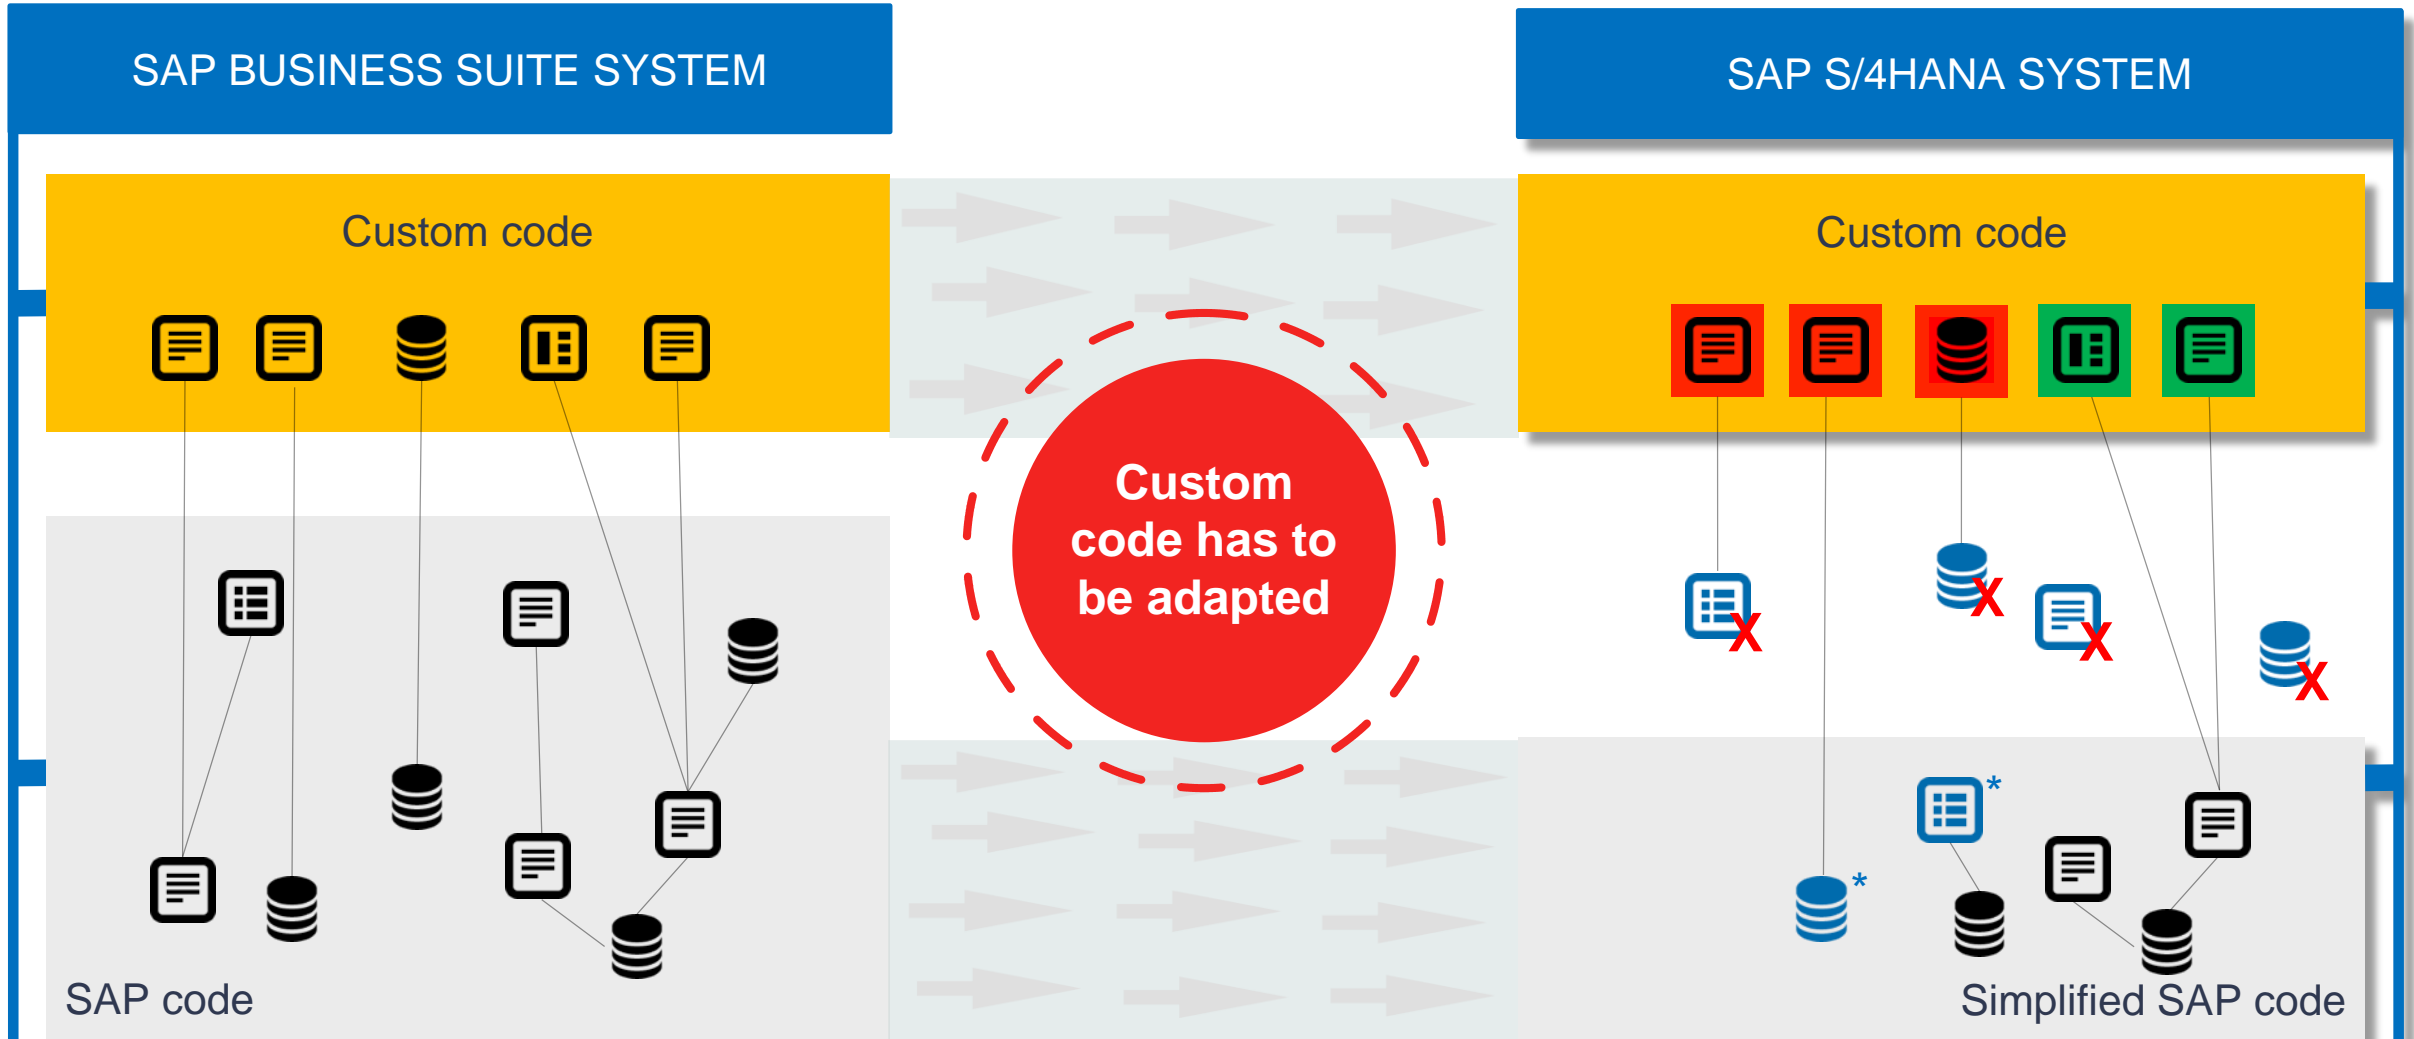

SAP S/4HANA is a *new* product line

The classical SAP Business Suite & SAP ERP is a separate product line and will still be available

System conversion including custom code from existing SAP Business Suite or SAP ERP is possible

Challenge for custom code after SAP S/4HANA system conversion

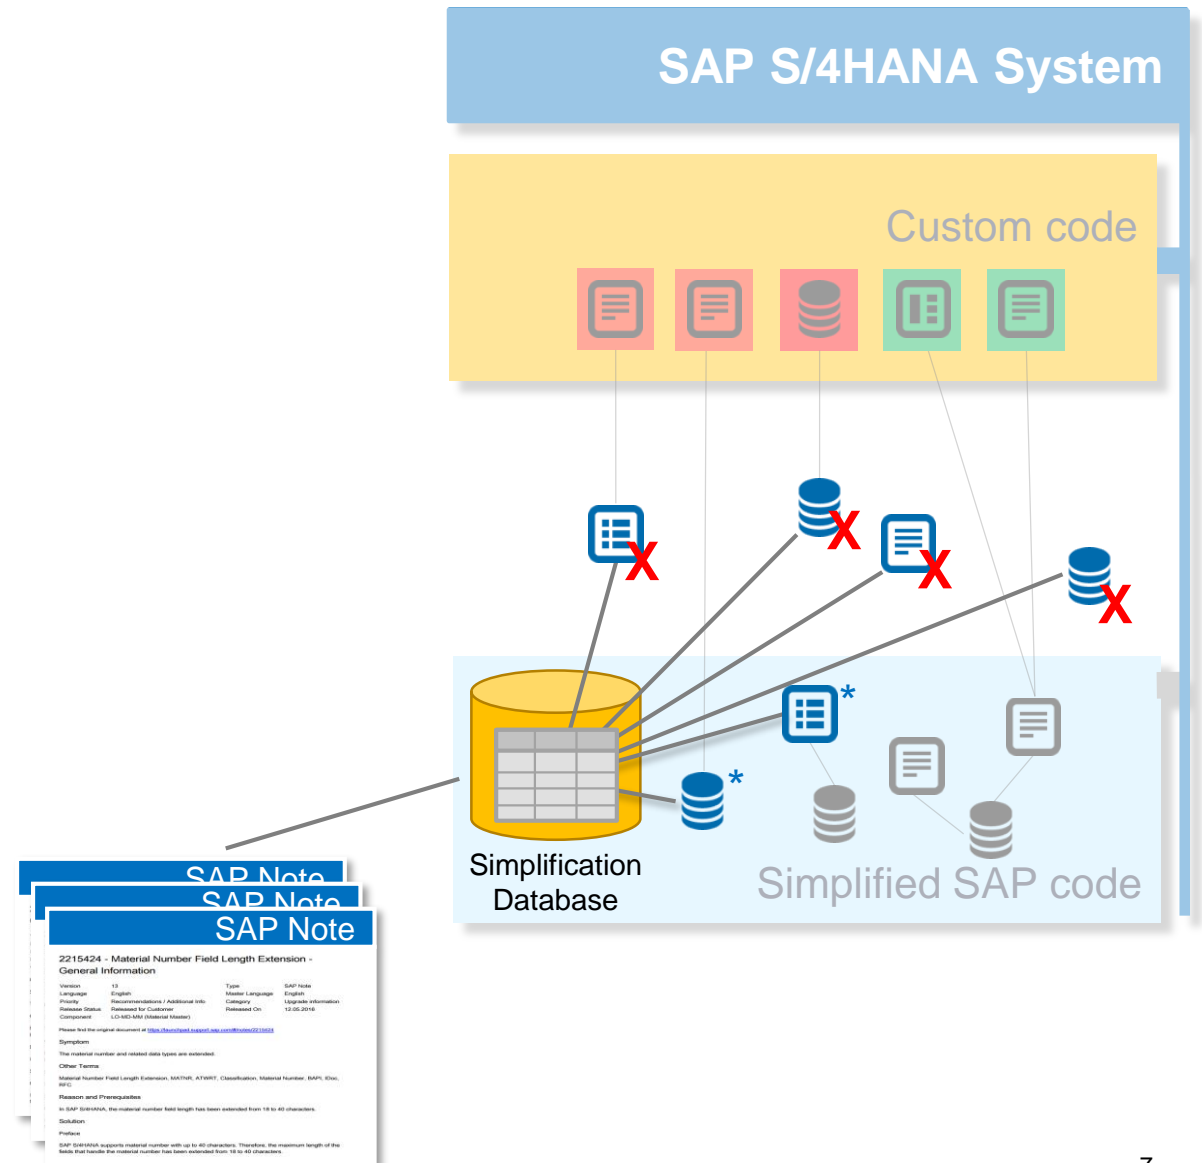

Adapt your custom code using Simplification Database

Simplification Database contains a list of **SIMPLIFICATION ITEMS**

Each simplification item refers to

- ▶ An SAP Note that describes the impact and how related custom code can be adapted
- ▶ Changed or removed SAP objects

SAP provides **TOOLS** based on the Simplification Database to detect custom code that needs to be adapted to SAP S/4HANA

Usage tracking of custom code in production (SCMON/SUSG or UPL)

New SAP Fiori App to detect unused code with automated removal via SUM

Custom code scoping

MONITOR usage of your custom code via the ABAP Call Monitor (transaction [SCMON](#))

AGGREGATE usage data in your production system with [SUSG transaction](#) (*)

ANALYZE usage data in SAP Fiori App Custom Code Migration to define custom code migration scope

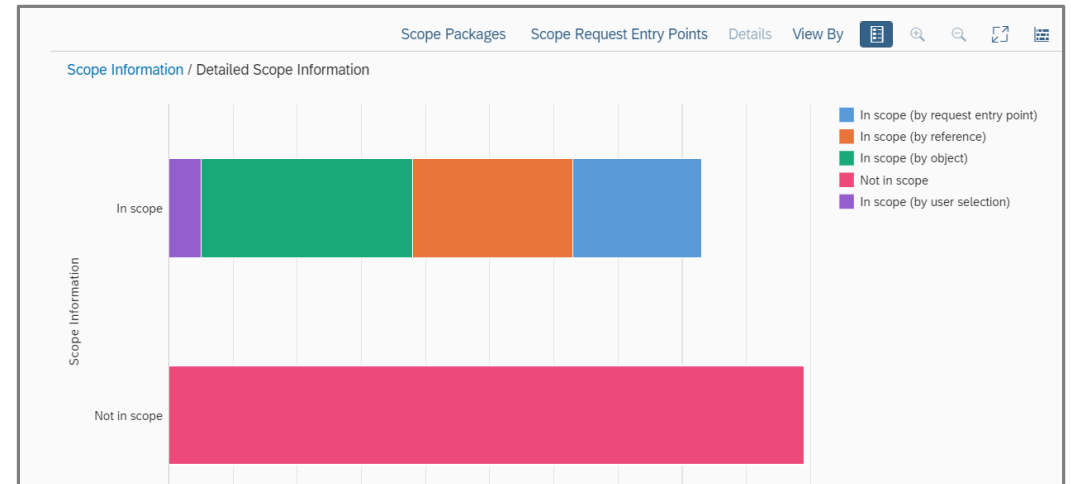

REMOVE unused code during the SAP S/4HANA conversion automatically via SUM

* Custom code evaluation with CCLM/UPL tools of SAP Solution Manager is still possible

Technical infrastructure for custom code analysis

CENTRAL ATC SYSTEM TO ANALYZE CUSTOM CODE in whole system landscape

- ▶ **REMOTE** stubs return a model from custom code
- ▶ **CHECK LOGIC** is executed on central system
- ▶ **RESULT** is analyzed in central system
- ▶ **INTEGRATED** in development environment
- ▶ **ALL KINDS OF CUSTOM CODE** are supported (incl. modifications and enhancements)
- ▶ **SUPPRESS** false-positive findings with pseudo-comments, e.g. for MATNR findings
- ▶ **INSTALL** Simplification DB via OSS Note 2241080

SIMPLIFICATION USE CASES

- ▶ Functionality not available anymore
- ▶ Data model changes
- ▶ Data type changes

SAP HANA USE CASES

- ▶ Use of DB vendor specifics (native SQL)
- ▶ DB operations on pool/cluster tables
- ▶ SELECT/OPEN CURSOR statements without ORDER BY

Use check variant **S4HANA_READINESS_REMOTE** which includes **SAP S/4HANA** and **SAP HANA** checks
