To whom it may concern:

REMOVAL OF MINE DUMPS: ERF 5024, 6376 AND 5058; KIMBERLEY.

It has come to our attention that the mine dumps situated on the above-mentioned erven was transferred to you from the De Beers Consolidated Mines. The area concerned has become a good hiding place for criminals and thugs who use the said area for the illegal activities. The community adjacent to the said site also have to deal with the criminal elements orchestrated from refuge of the dumps. The area can thus be deemed dangerous and unsightly.

As you are the owner and custodian of the said mine dumps which exist on the above-mentioned erven, we hereby request that these mine dumps be fast-tracked in your reprocessing schedule and removed or removed for future reprocessing. Furthermore, we would like to request that all operations be carried out in a manner that the reclamation / rehabilitation is to an acceptable satisfactory condition by,

- Eliminating unacceptable health hazards for ensuring public safety
- Restoring the site to a condition that is visually acceptable to the municipality

- Reclaim the areas impacted for future use such as agriculture, recreation or human settlement
- Preparing the site to be amenable to support vegetation
- Removing any contaminated soils
- Ensuring physical stabilization of the soil (a combination of smoothing and contouring slopes, replacing overburden and topsoil as well as vegetation)
- Ensuring that the final drainage of the site does not adversely affect neighboring properties

The mine dumps on the said erven are a severe concern to Sol Plaatje Municipality as managing this area comes with considerable financial strain.

Your compliance will be appreciated.

Yours faithfully
