## THE RIGHT TIRES

**FOR WORK.** Pro Armor Utility Tires are built to provide exactly what you need for your application. Looking for a high-kilometer work horse? We've got it. How about a turf-friendly tire with low-impact? We've got those too. Wanting the most extreme puncture resistance? Check.

"We use our RANGER every day around the farm. We put the Pro Armor HARVESTER Tires on last fall and love them! We have received better traction as well as a gentler and quieter ride compared to the stock tires, whether around the yard or out to the fields. They are so gentle on the lawn; we don't worry about driving the kids anywhere around the farm. We've had them on for a year and can't even see wear and tear. These are the best tires for my RANGER."

Bob S. - Barron, Wisconsin

## MAINTENANCE TIP

### BREAK-IN PERIOD

The break-in period for your new RANGER is the first 25 hours of operation, or the time it takes to use the first two tanks of fuel. No single action on your part is as important as a proper break-in period. Careful treatment of a new engine will result in more efficient performance and longer life for the engine.

**NOTICE:** Excessive heat build-up during the first three hours of operation will damage close-fitted engine parts. Do not operate at full throttle or high speeds for extended periods during the first three hours of use.

SEE OUR LATEST MAINTENANCE TIPS AT [RANGER.POLARIS.COM/EN-CA/SELF-HELP](http://RANGER.POLARIS.COM/EN-CA/SELF-HELP)

### AIR FILTER

A clogged air filter can restrict air flow to the engine leading to reduced engine performance, engine life or catastrophic failure.

### BRAKE PADS

Maintaining and/or replacing brakes are critical to the safety and functionality of a vehicle. Brake pads should be checked for wear and oil or grease (petroleum products) contamination and brake discs should be checked for cracks, excessive corrosion or warping.

### HALF SHAFT

Check for tears and punctures in the boot, which can lead to CV joint wear that can contribute to axle failure.

### DRIVE BELT

Polaris Engineered belts deliver unmatched performance for your off-road vehicle. Developed and tested on all our engines for all environments and conditions. Check your belt for delamination, hour glassing and glazing.

#### BREAK-IN PERIOD

- Use lower gear (if available) while varying speeds and avoid wide open throttle for 5-10 miles / 8-16 km
- If no low gear is available, vary at moderate speeds while avoiding wide open throttle for 50 miles / 80 km

#### OUR INVESTMENT

- 40,000+ miles / 32,187 km of field testing
- Thousands of dyno hours
- 18+ months of development (13,000+ design hours) per belt
- 1,500+ vehicle validation hours
- Collaboration with powertrain and clutch engineers

#### YOUR ADVANTAGE

- No clutch recalibration
- Less wear and tear due to heat
- Ensure maximum vehicle performance
- More time riding, less time wrenching
- Produced in collaboration with powertrain and clutch engineers to ensure a perfect fit, maximum performance and ultimate durability

### OIL FILTER

Change oil filters with every oil change to provide the best engine protection and keep the engine operating at peak performance.

### BATTERY

To ensure a battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a NOCO® Battery Charger (see P. 100). Be sure to check for corrosion from the terminals to the ends of the cables.

# TIRE SEALANT

Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug.

The plug maintains the pressure of the tire so you can continue your ride.

## HOW IT WORKS

Tire sealant remains liquefied inside the tire until a leak develops in the tire or wheel.

## HOW MUCH TIRE SEALANT DO YOU NEED?

$$\begin{array}{r} \text{TIRE HEIGHT (IN.)} \times \text{TIRE WIDTH (IN.)} / 5 = \text{OUNCES REQUIRED PER TIRE} \\ | \qquad \qquad | \qquad \qquad | \\ 27" \times 10" / 5 = 54 \text{ oz} \end{array}$$

FOR A FULL APPLICATION CHART, VISIT [POLARIS.COM/TIRESEALANTCHART](http://POLARIS.COM/TIRESEALANTCHART)

## PREMIUM TIRE SEALANT

- Instantly seals and repairs rim, bead leaks and punctures up to .25" on standard tires and .75" on heavy ply tires
- Helps maintain air pressure for the life of the tire
- Helps seal the tire bead against the wheel
- 100% water soluble for easy cleanup
- Will not rust, corrode or pit wheels
