

Records of Immigrant Insects for 1932

BY THE EDITOR

The occurrence in Hawaii of the following immigrant insects is recorded for the first time in this issue. Those of the list marked with an asterisk were observed for the first time in the year 1932. The other species were already known to occur here, some of them for a number of years, but they had not been identified previously, and herein their names are used for the first time in Hawaiian literature. For details of records, etc., refer to the pages given..

	PAGE
<i>Contarinia maculipennis</i> Felt. Hibiscus bud midge.....	212, 236, 247
<i>Hierodula patellifera</i> (Serv.) Mantis on Kauai.....	212
