ABOUT SET JU

The School of Engineering & Technology, Jain (Deemed-to-be University) (SET), is a highly renowned Engineering Institution located in Bangalore. SET was established in 2005. SET offer 7 undergraduate and 9 post graduate programs offered by highly qualified and experienced faculty. Our 2500 strong students community is drawn from length and breadth of India as well as abroad. SET actively collaborates with eminent industrial enterprises as well as research organization such as ISRO, Infosys, Cognizant, HAL in undertaking research and academic activities.

SET has realized that education can go beyond the conventional boundaries. Remarkable facilities and diverse co-curricular activities serve these educational purposes. Our well maintained campus provides a sense of persistent vision, stability and management. Besides classroom teaching, SET emphasizes on intensive interactions between students and mentors. It also provides state-of-the-art infrastructure facilities.

ABOUT THE SCHOOL OF ELECTRICAL ENGINEERING

The School of Electrical Engineering offers Doctoral, Postgraduate (M.Tech), Undergraduate (B.Tech), PG Diploma, and Certification programs. We have well-experienced faculty members both from academia and industry.The school is well committed to impart knowledge in the vistas of Electronics and Communication, Electrical and Electronics, Robotics and Automation. With a well-established infrastructure put in place, the school has all the tools and equipment necessary for its academic and research programs. IRNSS/NavIC receiving station is set up in the campus in association with ISRO.

ABOUT THE CONFERENCE

Automation ,Control and Communication is an interdisciplinary area of Science and Engineering for various areas of Applied Science & Engineering Technologies. The national conference on NCACC is the forum to present new advances & research results in the fields of Electrical, Electronics and Communication, Robotics and Automation.

TOPICS OF CONFERENCE

- Automation and Control Engineering
- Renewable Energy
- Industrial Drives
- MEMS and Nano Technologies
- Signal processing Remote Spatial Sensing, Navigation Systems
- Antennas/Radar Systems
- Satellite and Space Communications
- Nano Satellites, Geographic Information and applications
- Remote sensing, Satellite/space communications-based applications
- Machine learning and Artificial intelligence
- Internet of Things (IOT)
