- 2 Removable, replaceable engine transmission block**
 Various gear ratios and tyres to alter the top speed, acceleration and braking performance of the car.
- 3 Cars with front (xenon) and rear/brake lighting**
 Most Carrera DIGITAL 124 cars are equipped with lights.
- 4 Adjustable Chassis Height**
 To adjust the ground clearance of the car's body in high banked curves and crossings.
 - a) standard setting of the chassis - for flat track layouts
 - b) high-adjusted chassis - for track layouts with high banked curves and crossings
- 5 Adjustable Rocker Arm**
 Enlarges the car's distance between the track and the body's front (improves passing high banked curves and crossings).

the car with gasoline as indicated

- Gas volume depends on the time spent in the pit stop – exactly as in real races
- A coded pace car starts moving at a constant speed and leaves the pit stop lane by order from the Black Box
- After a defined period of time the pace car leaves the race track and returns automatically to the pit stop lane
