

Guam Plant Extinction Prevention Program

Protecting Guam's Rarest Plants

The Guam Plant Extinction Prevention (GPEP) Program is an island-wide program dedicated to preventing the extinction of Guam's rarest plant species that have fewer than 200 individuals remaining in the wild by working with conservation partners to protect wild populations, preserve their genes off-site, and reintroduce plants to their natural habitats.

Serianthes nelsonii

Cyathea lunulata

Fagraea berteriana var. *ladronica*

Heritiera longipetiolata

Psychotria hombroniana var. *malaspinae*

Maesa walkeri

Zehneria guamensis

Drypetes dolichocarpa

Claoxylon marianum
