Mystacidium Neil McCormick

A really great primary hybrid between capense and braybonae. Makes super specimen plants covered in sparkling white flowers. One of the best Angraecoid miniature hybrids ever made. Nice seedlings ready to mount.

\$20.00

Renanetia Sunrise 'Prasong' AM/AOS

This is one of the finest Neofinetia falcata hybrids produced. It is a new cross of Neof. falcata and Renanthera imshootiana. A real show stopper with an abundance of flower spikes covered with bright orange flowers. Plants are compact. Nice near flowering size plants in baskets.

\$20.00

Vf. Virgil X Vanda cristata

A next generation hybrid of Neof. falcata breeding. Backcrossing with V. cristata to produce beautiful soft green flowers with dark lips showing Neofinetia influence in shape. Very compact growing for those short on space. Picture is sample only (not clones). Nice new seedlings in baskets.

\$20.00

Dendrobium hercoglossum

This is a truly beautiful Dendrobium species found throughout South East Asia. It is an intermediate grower that prefers dry winters when they drop some leaves from the soft cane bulbs. It can be grown in pots, mounted or in baskets. The flowers are an incredibly beautiful shade of pink offset by a white lip.

Flowering size plants in baskets.

\$25.00

Blc. Pauwela Dawn 'Exotic Orchids' AM/AOS

Not your everyday Cattleya! This orchid will brighten any collection. It is a cross of Blc. Toshi Aoki X Blc. Haiku Dawn so has many famous parents in it's background.

Flowers are bright butter yellow with an unbelievable lip.

Limited availability. Near flowering size.

\$25.00

Den. Valley Isle Pink 'Sunshine' AM/AOS

A first introduction of this fantastic Phalaenopsis type Dendrobium. Recently awarded. Very full shaped flowers colored in light green with a beautiful pink overlay. Very long lasting flowers on easy to bloom plants.

Flowering size

\$35.00

Max. Mem. Ben Berliner 'Yellow Cape' AM/AOS

One of the most popular plants that we have ever stocked! We import these from our friend, Mr. Omura, in Japan and this will be the LAST offering of this clone. No more are available. A really cool hybrid between Max. tenuifolia and Max. sanguinea. Bright yellow flowers covered in red dots. We consistently sell out.

Flowering size.

\$35.00

Microterangis hildebrandtii

Here is a truly unique and rewarding plant from the Comoro Islands.

This popular species, from the Angraecoid alliance puts on a real show with many long spikes loaded with small bright orange flowers.

Plants form nice clumps and resembles a mini Phalaenopsis.

Flowering size.

\$20.00

Laelia purpurata sanguinea

Laelia purpurata is one of our very favorite Cattleya plants and this exceptionally darkly colored form is one of the dramatic of all. Flowers are the new generation, showing much fuller and flatter shape.

Don't miss out as these are very limited.

Near flowering seedlings.

\$40.00

Dendrobium faciferum

This very showy Dendrobium species is from the Sulawesi Islands and grows quite tropically. In the Spring, the canes can be completely covered with bright orange flowers. Plants are equally beautiful.

Spectacular show plants. Limited availability.

Flowering size.

\$35.00

Dendrobium Shining Pink

We purchased these seedlings from a grower in Japan and they were well worth the effort. It is a cross of Farmeri-Thrysoflorum X farmeri.

The flowers, similar to Chinese lanterns, hang on long spikes. Color will vary from soft pink to deep rose pink with large size.

Vigorous growers. Flowering size.

\$35.00

Aer. Mire X Aer. coriacea

Seedlings from one of our new Angraecoid breeding. Plants will develop into nice specimens with attractive spotted leaves. Long spikes will carry many "Birds in Flight" flowers with nice night-time fragrance.

New seedlings to flower in 2 years

\$15.00

Phalaenopsis schilleriana

Yes, Phalaenopsis are too common, but some species are spectacular and this is one of them. Huge branching sprays of pink flowers on the most wonderful grey speckled foliage. Worth growing for the leaves alone.

Bred by our friend Wilson in Taiwan.

Flowering size.

\$30.00

Lc. Callistoglossa semi-alba

Primary Cattleya crosses have never been so popular and for good reason. This charming hybrid is made from L. purpurata X C. warscewiczii. The flowers will be huge, and pure white with super dark purple lips, held in large clusters. Stunning display plants. Near flowering size.

\$20.00

Cattleya trianae coerulea

These seedlings were selected, pre-flowered, by our friend Francisco Villegas of Colombia. C. trianae, considered to be the most beautiful unifoliate Cattleya species by many, and this is the most unusual color form. Large shapely flowers with lovely blue hue. Well established. Flowering size.

\$50.00

Angraecum leonis

This fantastic Angraecoid species is from the Comoro Islands. Characterized by and sought after for its super unusual fan shape of succulent leaves, it produces large sparkling white flowers. A must for any collector. Fragrant. Super large plants. Flowering size

\$30.00

Cym. Madison Falls 'Best Boy'

A super unique primary hybrid between the ever popular tracyanum and madidum, so yes, some warmth tolerance here. Copper colored flowers produced on long arching sprays. Very attractive foliage as well. Unlike almost any other cymbidium, and quite attractive. Strong single growths ready to pot on.

\$20.00

Microcoelia stolzii 'Kathy Fenwick's Medusa' CHM/AOS

The most unusual orchid that we grow. Completely leafless balls of roots produce many spikes of small white flowers. Easy to grow and flower. Simply put on top of an empty basket and away they go. Do not overwater. Great looking divisions. Limited availability.

\$80.00

Oeniella polystachys

Another nice Angraecoid species. Commonly found in Madagascar and some of the nearby Islands. Small monopodial growth form large clumps which produce many flowers with a wonderful fragrance like Lily of the Valley. Very easy to cultivate and flower, even in the house.
Flowering size.

\$20.00

Ctna. Why Not YELLOW

Ctna. Why Not is an older Broughtonia hybrid noted for bright red flowers. These are seedlings from the very rare yellow form from Richard Takafuji. Clusters of butter yellow flowers on stately spikes.
Can be mounted or potted.
Flowering size. LIMITED

\$45.00

Laelia anceps Package

Our favorite orchid so we've done a lot of selective breeding to develop exceptional strains. This limited time Open House package will include one nice seedling of three different crosses to provide you with an assortment of colors. This is cutting edge breeding at a very special price. Two years to flower and worth the wait.
Nice seedlings ready to pot on.

\$50.00

Platyserium Horn's Surprise

Strong new mounts of this Platyserium primary hybrid. It is a cross of madagascariense X alcornae. This hybrid has the most beautiful foliage and the charm of both parents. It is best grown in a greenhouse or a warmer climate. A show stopper.
Nice mounts ready to hang!

\$40.00

Cym. Carol Connelly

A really rewarding and unusual Cymbidium that we imported from our friend Bert Ruiter of Holland. It is a cross of schroederiae X Disney Girl. It will brighten any collection with its unusual style of stripes and spots. A new introduction for those who want something different yet also beautiful.
Nice plants in 5" pots.

\$30.00

Minimum purchase is \$50.00

We bill for exact shipping costs and minimal handling charges.

ALL PLANTS ARE SHIPPED FEDEX **2 DAY** SERVICE.

Shipping days are Mon, Tues, and Wed.

Hawaiian customers please note: You will need an import permit. We will obtain a phytosanitary certificate for your order (\$40 charge).
