

# *Atriplex leucophylla*

## Beach Saltbush

PERENNIAL HERB/SUBSHRUB

To 12" high, to 3' spread.

Oval leaves are silvery. Whitish scaly surface.

Male and female flowers separate, inconspicuous — April to October.

Native Habitat: plant is mainly found in sandy areas along the high tide line, dunes and around a bay — below 200' — Fort Bragg to Baja California.

Photographs by Margaret L. Fillius

Sun.

Moderate to no watering needed.

Prefers beach sand.

Needs fast drainage.

Good for birds.
