OVERVIEW

Ryder System, Inc. (Ryder), a Florida corporation founded in 1933, is a global leader in transportation and supply chain management solutions. Our business is divided into three business segments: Fleet Management Solutions (FMS), which provides full service leasing, contract maintenance, contract-related maintenance and commercial rental of trucks, tractors and trailers to customers principally in the U.S., Canada and the U.K.; Supply Chain Solutions (SCS), which provides comprehensive supply chain solutions including distribution and transportation services throughout North America and Asia; and Dedicated Contract Carriage (DCC), which provides vehicles and drivers as part of a dedicated transportation solution in the U.S. Our customers range from small businesses to large international enterprises. These customers operate in a wide variety of industries, the most significant of which include automotive, electronics, transportation, grocery, lumber and wood products, food service, and home furnishings.

For financial information and other information relating to each of our business segments see Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," and Item 8, "Financial Statements and Supplementary Data," of this report.

INDUSTRY AND OPERATIONS

Value Proposition

Through our FMS business, we provide our customers with flexible fleet solutions that are designed to improve their competitive position by allowing them to focus on their core business, lower their costs and redirect their capital to other parts of their business. Our FMS product offering is comprised primarily of contractual-based full service leasing and contract maintenance services. We also offer transactional fleet solutions including commercial truck rental, maintenance services, and value-added fleet support services such as insurance, vehicle administration and fuel services. In addition, we provide our customers with access to a large selection of used trucks, tractors and trailers through our used vehicle sales program.

Market Trends

Over the last several years, many key trends have been reshaping the transportation industry, particularly the U.S. private commercial fleet market which is estimated to include approximately 3.8 million vehicles⁽¹⁾ and the U.S. commercial fleet lease and rental market which is estimated to include approximately 0.6 million vehicles⁽²⁾. The maintenance and operation of commercial vehicles has become more complicated requiring companies to spend a significant amount of time and money to keep up with new technology, diagnostics, retooling and training. Because of increased demand for efficiency and reliability, companies that own and manage their own fleet of vehicles have put greater emphasis on the quality of their preventive maintenance and safety programs. More recently, fluctuating energy prices have made it difficult for businesses to predict and manage fleet costs and the tightened credit market has limited businesses' access to capital.

Operations

For the year ended December 31, 2010, our global FMS business accounted for 66% of our consolidated revenue.

(1) U.S. private fleet as of June 2010, Class 3-8, Source: RL Polk

(2) U.S. outsourced fleet services as of June 2010, Class 3-8, Source: RL Polk

U.S. Our FMS customers in the U.S. range from small businesses to large national enterprises. These customers operate in a wide variety of industries, including transportation, grocery, lumber and wood products, food service and home furnishings. At December 31, 2010, we had 550 operating locations in 2010 exclude ancillary storage locations in 49 states and Puerto Rico and operated 174 maintenance facilities on-site at customer properties. A location typically consists of a maintenance facility or "shop," offices for sales and other personnel, and in many cases, a commercial rental counter. Our maintenance facilities typically include a service island for fueling, safety inspections and preliminary maintenance checks as well as a shop for preventive maintenance and repairs.

Canada. We have been operating in Canada for over 50 years. The Canadian private commercial fleet market is estimated to be approximately 0.4 million vehicles⁽³⁾ and the Canadian commercial fleet lease and rental market is estimated to include approximately 0.02 million vehicles⁽⁴⁾. At December 31, 2010, we had 37 operating locations throughout 9 Canadian provinces. We also have 8 on-site maintenance facilities in Canada.

Europe. We began operating in the U.K. in 1971 and since then have expanded into Germany. The U.K. commercial rental fleet lease and rental market are estimated to include approximately 0.2 million vehicles⁽⁵⁾. At December 31, 2010, we had 41 operating locations throughout the U.K. and Germany. We also manage a network of 320 independent maintenance facilities in the U.K. to serve our customers when it is more effective than providing the service in a Ryder location. In addition to our typical FMS operations, we also supply and manage vehicles, equipment and personnel for military organizations in the U.K. and Germany.

FMS Product Offerings

Full Service Leasing. Under a typical full service lease, we provide vehicle maintenance, supplies and related equipment necessary for operation of the vehicles while our customers furnish and supervise their own drivers and dispatch and exercise control over the vehicles. Our full service lease includes all the maintenance services that are part of our contract maintenance service offering. We target customers that would benefit from outsourcing their fleet management function or upgrading their fleet without having to dedicate a significant amount of their own capital. We will assess a customer's situation, and after considering the size of the customer, residual risk and other factors, will tailor a leasing program that best suits the customer's needs. Once we have signed an agreement, we acquire vehicles and components that are custom engineered to the customer's requirements and lease the vehicles to the customer for periods generally ranging from three to seven years for trucks and tractors and up to ten years for trailers. Because we purchase a large number of vehicles from a limited number of manufacturers, we are able to leverage our buying power for the benefit of our customers. In addition, given our continued focus on improving the efficiency and effectiveness of our maintenance services, we can provide our customers with a cost effective alternative to maintaining their own fleet of vehicles. We also offer our leasing customers the additional fleet support services described below.

Contract Maintenance. Our contract maintenance customers include non-Ryder owned vehicles that want to utilize our extensive network of maintenance facilities and trained technicians to maintain the vehicles they own or lease from third parties. The contract maintenance service offering is designed to reduce vehicle downtime through preventive maintenance based on vehicle type and time or mileage intervals. The service also provides vehicle repairs including parts and labor, 24-hour emergency roadside service and replacement vehicles for vehicles that are temporarily out of service. Vehicles covered under this offering are typically serviced at our own facilities. However, based on the size and complexity of a customer's fleet, we may operate an on-site maintenance facility at the customer's location.

Commercial Rental. We target rental customers that have a need to supplement their private fleet of vehicles on a short-term basis (typically from less than one month up to one year in length) either because of

(3) Canada private fleet as of November 2010, Class 3-8, Source: RL Polk

(4) Canada outsourced fleet market as of November 2010, Class 3-8, Source: RL Polk

(5) U.K. Lease and Rental HGV Market, Projection for December 2010, Source: The Society of Motor Manufacturers & Traders (SMMT) 2009

seasonal increases in their business or discrete projects that require additional transportation resources. Our commercial rental fleet also provides additional vehicles to our full service lease customers to handle their peak or seasonal business needs. In addition to one-off commercial rental transactions, we build national relationships with large national customers to become their preferred source of commercial vehicle rentals. Our rental representatives assist in selecting a vehicle that satisfies the customer's needs and supervise the rental process, which includes execution of a rental agreement and a vehicle inspection. In addition to vehicle rental, we extend to our rental customers liability insurance coverage under our existing policies and the benefits of our comprehensive fuel services program.

The following table provides information regarding the number of vehicles and customers by FMS product offering at December 31, 2010:

	U.S.		Foreign		Total	
	Vehicles	Customers	Vehicles	Customers	Vehicles	Customers
Full service leasing	93,200	10,400	17,900	2,200	111,100	12,600
Contract maintenance ⁽⁶⁾	29,100	1,200	4,300	200	33,400	1,400
Commercial rental	24,600	8,200	5,100	5,800	29,700	14,000

Contract-Related Maintenance. Our full service lease and contract maintenance customers periodically require additional maintenance services that are not included in their contracts. We obtain contract-related maintenance work because of our contractual relationship with the customers; however, the service provided is in addition to that included in their contractual agreements. For example, additional maintenance services may arise when a customer's driver damages the vehicle and these services are performed or managed by Ryder. Some customers also periodically require maintenance work on vehicles that are not covered by a long-term lease or maintenance contract. Ryder may provide service on these vehicles and charge the customer on an hourly basis for work performed.

Fleet Support Services. We have developed a variety of fleet support services tailored to the needs of our large base of lease customers. Customers may elect to include these services as part of their full service lease or contract maintenance agreements. Currently, we offer the following fleet support services:

Service	Description
Fuel	Full service diesel fuel dispensing at competitive prices; fuel planning; fuel tax reporting; centralized billing; and fuel cards
Insurance	Liability insurance coverage under our existing insurance policies which includes monthly invoicing, flexible deductibles, claims administration and discounts based on driver performance and vehicle specifications; physical damage waivers; gap insurance; and fleet risk assessment
Safety	Establishing safety standards; providing safety training, driver certification, prescreening and road tests; safety audits; instituting procedures for transport of hazardous materials; coordinating drug and alcohol testing; and loss prevention consulting
Administrative	Vehicle use and other tax reporting; permitting and licensing; and regulatory compliance (including hours of service administration)
Environmental management	Storage tank monitoring; storm water management; environmental training; and ISO 14001 certification
Information technology	<i>RydeSmart™</i> is a full-featured GPS fleet location, tracking, and vehicle performance management system designed to provide our customers improved fleet operations and cost controls. <i>FleetCARE</i> is our web based tool that provides customers with 24/7 access to key operational and maintenance management information about their fleets.

Used Vehicles. We primarily sell our used vehicles at one of our 55 retail sales centers throughout North America (18 of which are collocated at an FMS shop), at our branch locations or through our website at

⁽⁶⁾ Contract maintenance customers include approximately 800 full service lease customers

www.Usedtrucks.Ryder.com. Typically, before we offer used vehicles for sale, our technicians assure that it is *Road Ready™*, which means that the vehicle has passed a comprehensive, multi-point performance inspection based on specifications formulated through our contract maintenance program. Our retail sales centers throughout North America allow us to leverage our expertise and in turn realize higher sales proceeds than in the wholesale market. Although we generally sell our used vehicles for prices in excess of book value, the extent to which we are able to realize a gain on the sale of used vehicles is dependent upon various factors including the general state of the used vehicle market, the age and condition of the vehicle at the time of its disposal and depreciation rates with respect to the vehicle.

FMS Business Strategy

Our FMS business mission is to be the leading leasing and maintenance service provider for light, medium and heavy duty vehicles. This will be achieved through the following goals and priorities:

- improve customer retention levels and focus on conversion of private fleets and commercial rental customers to full service lease customers;
- successfully implement sales growth initiatives in our contractual product offerings;
- focus on contractual revenue growth strategies, including selective acquisitions;
- deliver consistent industry leading maintenance to our customers while continuing to implement process designs, productivity improvements and compliance discipline in a cost effective manner;
- offer a wide range of support services that complement our leasing, rental and maintenance businesses;
- offer competitive pricing through cost management initiatives and maintain pricing discipline on new business;

- optimize asset utilization and management; and
- leverage our maintenance facility infrastructure.

Competition

As an alternative to using our services, customers may choose to provide these services for themselves, or may choose to obtain similar or alternative services from other third-party vendors.

Our FMS business segment competes with companies providing similar services on a national, regional and local level. Many regional and local competitors provide services on a national level through their participation in various cooperative programs. Competitive factors include price, equipment, maintenance, service and geographic coverage. We compete with finance lessors and also with truck and trailer manufacturers, and independent dealers, who provide full service lease products, finance leases, extended warranty maintenance, rental and other transportation services. Value-added differentiation of the full service leasing, contract maintenance, contract-related maintenance and commercial rental service has been, and will continue to be, our emphasis.

Acquisitions

In addition to our continued focus on organic growth, acquisitions play an important role in enhancing our growth strategy in the U.S., Canada and the U.K. In assessing potential acquisition targets, we look for companies that would create value through the creation of operating synergies, leveraging our existing facility infrastructure and fixed costs, improving our geographic coverage, diversifying our customer base and improving our competitive position in target markets.

We completed four FMS acquisitions from 2008 to 2009, under which we acquired a company's fleet and contractual customers. The FMS acquisitions operate under Ryder's name and complement our existing market coverage and service network. On January 10, 2011 we acquired the assets of Carmenita Leasing, Inc., full

service leasing and rental business located in Santa Fe Springs, California, which included a fleet of approximately 190 full service lease and rental units, and 60 contract customers. On January 28, 2011, we acquired The Scully Companies, Inc. ("Scully"), which includes Scully's fleet of approximately 1,800 full service lease units and 300 rental vehicles, and approximately 200 contractual customers primarily served from its six service facilities.

Supply Chain Solutions

Value Proposition

Through our SCS business, we offer a broad range of innovative logistics management services that are designed to optimize a customer's supply chain and address key customer business requirements. The organization is aligned by industry verticals (Automotive, Industrial, Hi-Tech, Retail and Consumer Packaged Goods) to enable the teams to focus on the specific needs of their customers. Our SCS product offerings are organized into three categories: distribution management, transportation management and professional services. These offerings are supported by a variety of information technology and engineering solutions which are an integral part of our other SCS services. These product offerings can be offered independently or as an integrated solution to optimize supply chain effectiveness. A key aspect of our value proposition is our operational execution. We believe our operational execution is an important differentiator in the marketplace.

Market Trends

Global logistics is approximately \$7 trillion, of which approximately \$500 billion is outsourced. Logistics spending in our primary markets of North America and Asia equates to approximately \$3 trillion, of which \$260 billion is outsourced. Over the long-term, companies tend to outsource more of their logistics. As companies continue to focus on their core competencies, they find value in utilizing third party logistics (3PLs) to manage their supply chains. In 2010, the North American outsourced logistics market grew approximately 10%. We expect 2011 to be another year of outsourced logistics growth.

Operations

For the year ended December 31, 2010, our SCS business accounted for 24% of our consolidated revenue.

U.S. At December 31, 2010, we had 106 SCS customer accounts in the U.S., most of which are large enterprises that maintain large, complex supply chains. In addition, the Total Logistic Control acquisition added 168 SCS customer accounts, which included 131 public warehousing customers. These customers operate in a variety of industries including automotive, electronics, high-tech, telecommunications, industrial, consumer goods, consumer packaged goods, paper and paper products, office equipment, food and beverage, and general retail industries. We continue to further diversify our customer base by expanding into new industry verticals, most recently retail and consumer packaged goods. Most of our core SCS business operations in the U.S. revolve around our customers' supply chains and are geographically located to maximize efficiencies and reduce costs. At December 31, 2010, managed warehouse space totaled approximately 14 million square feet for the U.S. and Puerto Rico. Along with those core customer specific locations, we also concentrate certain logistics expertise in locations not associated with specific customer sites. For example, our carrier procurement, contract management and freight bill audit and payment services groups operate out of our carrier management center, and our transportation optimization and execution groups operate out of our logistics center, both of which have locations in Novi, Michigan and Fort Worth, Texas.

Canada. At December 31, 2010, we had 50 SCS customer accounts and managed warehouse space totaling approximately 1 million square feet. Given the proximity of this market to our U.S. and Mexico operations, the Canadian operations are highly coordinated with their U.S. and Mexico counterparts, managing cross-border transportation and freight movements.

Mexico. We began operating in Mexico in the mid-1990s. At December 31, 2010, we operated and maintained 789 vehicles in Mexico. At December 31, 2010, we had 116 SCS customer accounts and managed

warehouse space totaling approximately 3 million square feet. Our Mexican operations offer a full range of SCS services and manage

approximately 1,400 border crossings each month between Mexico and the U.S. and Canada, often highly integrated with our distribution and transportation operations.

Asia. We began operating in Asia in 2000. At December 31, 2010, we had 32 SCS customer accounts and managed warehouse space totaling approximately 320,000 square feet. Asia is a key component to our retail strategy. With the 2008 acquisition of CRSA Logistics and Transpacific Container Terminals, we were able to gain significant presence in Asia. We now have a network of owned and agent offices throughout Asia, with headquarters in Shanghai. We also entered into a joint venture with a partner in Asia to provide export consolidation services to North American retailers and other companies importing from Asia.

SCS Product Offerings

Dedicated Contract Carriage. Although offered as a stand-alone service, dedicated contract carriage can also be offered as part of an integrated supply chain solution to our customers. The DCC offerings combine the equipment, maintenance and administrative services of a full service lease with drivers and additional services. This combination provides a customer with a dedicated transportation solution that is designed to increase their competitive position, improve risk management and integrate their transportation needs with their overall supply chain. Our DCC solution offers a high degree of specialization to meet the needs of customers with sophisticated service requirements such as tight delivery windows, high-value or time-sensitive freight, closed-loop distribution, multi-stop shipments, specialized equipment or integrated transportation needs. For the year ended December 31, 2010, approximately 44% of our SCS revenue was related to dedicated contract carriage services.

Transportation Management. Our SCS business offers services relating to all aspects of a customer's transportation network. Our team of transportation specialists provides shipment planning and execution, which includes shipment optimization, load scheduling and delivery confirmation through a series of technological and web-based solutions. Our transportation consultants, including our freight brokerage department, focus on carrier procurement of all modes of transportation with an emphasis on truck-based transportation, rate negotiation and freight bill audit and payment services. In addition, our SCS business provides customers as well as our FMS and DCC businesses with capacity management services that are designed to meet backhaul opportunities and minimize excess miles. For the year ended December 31, 2010, we purchased and/or executed over \$3.7 billion in freight moves on our customers behalf. For the year ended December 31, 2010, transportation management solutions accounted for 13% of our SCS revenue.

Distribution Management. Our SCS business offers a wide range of services relating to a customer's distribution operations from designing a customer's distribution network to managing distribution facilities. Services within the facilities generally include managing the flow of goods from the receiving function to the shipping function, coordinating warehousing and transportation for inbound and outbound material flows, handling import and export for international shipments, coordinating just-in-time replenishment of component parts to manufacturing and final assembly and providing shipments to customer distribution centers or end-customer delivery points. Additional value-added services such as light assembly of components into defined units (kitting), packaging and refurbishment are also provided. For the year ended December 31, 2010, distribution management solutions accounted for 38% of our SCS revenue.

Professional Services. Our SCS business offers a variety of knowledge-based services that support every aspect of a customer's supply chain. Our SCS professionals are available to evaluate a customer's existing supply chain to identify inefficiencies, as well as opportunities for integration and improvement. Once the assessment is complete, we work with the customer to develop a supply chain strategy that will create the most value for the customer and their target clients. Once a customer has adopted a supply chain strategy, our SCS logistics team, supported by functional experts, and representatives from our information technology, real estate and finance groups work together to design a strategically focused supply chain solution. The solution may include both a network design that sets forth the number, location and function of key components of the network and a transportation solution that optimizes the mode or modes of transportation and route selection. In addition to providing the distribution and transportation expertise necessary to implement the supply chain

solution, our SCS representatives can coordinate and manage all aspects of the customer's supply chain provider network to assure consistency, efficiency and flexibility. For the year ended December 31, 2010, knowledge-based professional services accounted for 5% of our SCS revenue.

SCS Business Strategy

Our SCS business strategy is to offer our customers differentiated functional execution, and proactive solutions from deep expertise in key industry verticals. The strategy revolves around the following interrelated goals and priorities:

- Further diversifying our customer base through expansion with key industry verticals;
- Developing services specific to the needs of the retail and consumer packaged goods industry;
- Providing customers with a differentiated quality of service through reliable and flexible supply chain solutions;
- Creating a culture of innovation that fosters new solutions for our customers' supply chain needs;
- Focusing on continuous improvement and standardization; and
- Training and developing employees to share best practices and improve talent.

Competition

In the SCS business segment, we compete with a large number of companies providing similar services, each of which has a different set of core competencies. We compete with a handful of large, multi-service companies across all of our service offerings and industries. We also compete against other companies only on a specific service offering (for example, in transportation management or distribution management) or in a specific industry. We face different competitors in each country or region where they may have a greater operational presence. Competitive factors include price, service, market knowledge, expertise in logistics-related technology, and overall performance (e.g. timeliness, accuracy, and flexibility).

Acquisitions

On December 31, 2010, we completed the acquisition of Total Logistic Control (TLC). TLC is a leading provider of comprehensive supply chain solutions to food, beverage, and consumer packaged goods manufacturers with significant supply

chains in the U.S. TLC provides clients a broad suite of end-to-end services, including distribution management, contract packaging services and solutions engineering. TLC's clients consist of local, regional, national, and international firms engaged in food and beverage manufacturing, consumer and wholesale distribution. TLC operates 34 facilities comprising 10.6 million square feet of dry and temperature-controlled warehousing across 13 states.

TLC compliments our strategic initiative to develop a new industry group focused on the consumer packaged goods industry. TLC's leading capabilities in the areas of packaging and warehousing, including temperature-controlled facilities, will continue to be at the center of our consumer packaged goods offering.

Dedicated Contract Carriage

Value Proposition

Through our DCC business segment, we combine the equipment, maintenance and administrative services of a full service lease with drivers and additional services to provide a customer with a dedicated transportation solution that is designed to increase their competitive position, improve risk management and integrate their transportation needs with their overall supply chain. Such additional services include routing and scheduling, fleet sizing, safety, regulatory compliance, risk management, technology and communication systems support including on-board computers, and other technical support. These additional services allow us to address, on behalf of our customers, high service levels, efficient routing and the labor issues associated

7

with maintaining a private fleet of vehicles, such as driver turnover, government regulation, including hours of service regulations, DOT audits and workers' compensation. Our DCC solution offers a high degree of specialization to meet the needs of customers with sophisticated service requirements such as tight delivery windows, high-value or time-sensitive freight, closed-loop distribution, multi-stop shipments, specialized equipment or integrated transportation needs.

Market Trends

The U.S. dedicated contract carriage market is estimated to be \$13 billion. This market is affected by many of the trends that impact our FMS business, including the tightening of capacity in the current U.S. trucking market. The administrative requirements relating to regulations issued by the Department of Transportation (DOT) regarding driver screening, training and testing, as well as record keeping and other costs associated with the hours of service requirements, make our DCC product an attractive alternative to private fleet and driver management. This is expected to become even more significant in light of Compliance, Safety, Accountability (CSA) 2010 regulatory changes. The CSA 2010 regulatory changes will also put pressure on the availability of qualified truck drivers which continues to lag market requirements. In addition, market demand for just-in-time delivery creates a need for well-defined routing and scheduling plans that are based on comprehensive asset utilization analysis and fleet rationalization studies that are offered as part of our DCC product.

Operations/Product Offerings

For the year ended December 31, 2010, our DCC business accounted for 10% of our consolidated revenue. At December 31, 2010, we had 154 DCC customer accounts in the U.S. Because it is highly customized, our DCC product is particularly attractive to companies that operate in industries that have time-sensitive deliveries or special handling requirements, as well as to companies who require specialized equipment. Because DCC accounts typically operate in a limited geographic area, most of the drivers assigned to these accounts are short haul drivers, meaning they return home at the end of each work day. Although a significant portion of our DCC operations are located at customer facilities, our DCC business utilizes and benefits from our extensive network of FMS facilities.

In order to customize an appropriate DCC transportation solution for our customers, our DCC logistics specialists perform a transportation analysis using advanced logistics planning and operating tools. Based on this analysis, they formulate a logistics design that includes the routing and scheduling of vehicles, the efficient use of vehicle capacity and overall asset utilization. The goal of the plan is to create a distribution system that optimizes freight flow while meeting a customer's service goals. A team of DCC transportation specialists can then implement the plan by leveraging the resources, expertise and technological capabilities of both our FMS and SCS businesses.

To the extent a distribution plan includes multiple modes of transportation (air, rail, sea and highway), our DCC team, in conjunction with our SCS transportation specialists, selects appropriate transportation modes and carriers, places the freight, monitors carrier performance and audits billing. In addition, through our SCS business, we can reduce costs and add value to a customer's distribution system by aggregating orders into loads, looking for shipment consolidation opportunities and organizing loads for vehicles that are returning from their destination point back to their point of origin (backhaul).

DCC Business Strategy

Our DCC business strategy is to focus on customers who need specialized equipment, specialized handling or integrated services. This strategy revolves around the following interrelated goals and priorities:

- Increase market share with customers in the energy and utility, metals and mining, retail, construction, healthcare products, and food and beverage industries;
- Leverage the support and talent of the FMS sales team in a joint sales program;

8

-
- Align DCC business with other SCS product lines to create revenue opportunities and improve operating efficiencies in both segments; and
 - Improve competitiveness in the non-specialized and non-integrated customer segments.

Competition

Our DCC business segment competes with truckload carriers and other dedicated providers servicing on a national, regional

and local level. Competitive factors include price, equipment, maintenance, service and geographic coverage and driver and operations expertise. We are able to differentiate the DCC product offering by leveraging FMS and integrating the DCC services with those of SCS to create a more comprehensive transportation solution for our customers. Our strong safety record and focus on customer service enable us to uniquely meet the needs of customers with high-value products that require specialized handling in a manner that differentiates us from truckload carriers.

ADMINISTRATION

Our financial administrative functions for the U.S. and Canada, including credit, billing and collections are consolidated into our Shared Services Center operations, a centralized processing center located in Alpharetta, Georgia. Our Shared Services Center also manages contracted third parties providing administrative finance and support services outside of the U.S. in order to reduce ongoing operating expenses and maximize our technology resources. This centralization results in more efficient and consistent centralized processing of selected administrative operations. Certain administrative functions are also performed at the Shared Services Center for our customers. The Shared Services Center's main objectives are to reduce ongoing annual administrative costs, enhance customer service through process standardization, create an organizational structure that will improve market flexibility and allow future reengineering efforts to be more easily attained at lower implementation costs.

REGULATION

Our business is subject to regulation by various federal, state and foreign governmental entities. The Department of Transportation and various federal and state agencies exercise broad powers over certain aspects of our business, generally governing such activities as authorization to engage in motor carrier operations, safety and financial reporting. We are also subject to a variety of requirements of national, state, provincial and local governments, including the U.S. Environmental Protection Agency and the Occupational Safety and Health Administration, that regulate safety, the management of hazardous materials, water discharges and air emissions, solid waste disposal and the release and cleanup of regulated substances. We may also be subject to licensing and other requirements imposed by the U.S. Department of Homeland Security and U.S. Customs Service as a result of increased focus on homeland security and our Customs-Trade Partnership Against Terrorism certification. We may also become subject to new or more restrictive regulations imposed by these agencies, or other authorities relating to carbon controls and reporting, engine exhaust emissions, drivers' hours of service, security and ergonomics.

The Environmental Protection Agency has issued regulations that require progressive reductions in exhaust emissions from certain diesel engines from 2007 through 2010. Emissions standards require reductions in the sulfur content of diesel fuel since June 2006. Also, the first phase of progressively stringent emissions standards relating to emissions after-treatment devices was introduced on newly-manufactured engines and vehicles utilizing engines built after January 1, 2007. The second phase, which required an additional after treatment system, became effective January 1, 2010.

ENVIRONMENTAL

We have always been committed to sound environmental practices that reduce risk and build value for us and our customers. We have a history of adopting "green" designs and processes because they are efficient, cost effective transportation solutions that improve our bottom line and bring value to our customers. We adopted our first worldwide Environmental Policy mission in 1991 and have updated it periodically as

regulatory and customer needs have changed. Our environmental policy reflects our commitment to supporting the goals of sustainable development, environmental protection and pollution prevention in our business. We have adopted pro-active environmental strategies that have advanced business growth and continued to improve our performance in ways that reduce emission outputs and environmental impact. Our environmental team works with our staff and operating employees to develop and administer programs in support of our environmental policy and to help ensure that environmental considerations are integrated into all business processes and decisions.

In establishing appropriate environmental objectives and targets for our wide range of business activities around the world, we focus on (i) the needs of our customers; (ii) the communities in which we provide services; and (iii) relevant laws and regulations. We regularly review and update our environmental management procedures, and information regarding our environmental activities is routinely disseminated throughout Ryder. We published our first Corporate Responsibility Report (CSR) in 2008 which details our sustainable business practices and environmental strategies to improve energy use, fuel costs and reduce overall carbon emissions. Currently there is no global carbon disclosure requirement for reporting emissions. However, for the past three years, we have participated in the Carbon Disclosure Project (CDP), voluntarily disclosing direct and indirect emissions resulting from our operations. Both of these reports are publicly available on Ryder's Green Center at <http://www.Ryder.com/greencenter>. The Green Center provides all stakeholders information on our key environmental programs and initiatives.

SAFETY

Our safety culture is founded upon a core commitment to the safety, health and well-being of our employees, customers, and the community, a commitment that made us an industry leader in safety throughout our history.

Safety is an integral part of our business strategy because preventing injury improves employee quality of life, eliminates service disruptions to our customers, increases efficiency and customer satisfaction. As a core value, our focus on safety is a daily regimen, reinforced by many safety programs and continuous operational improvement and supported by a talented and dedicated safety organization.

Training is a critical component of our safety program. Monthly safety training topics delivered by location safety committees cover specific and relevant safety topics and managers receive annual safety leadership training. Regular safety behavioral observations are conducted by managers throughout the organization everyday and remedial training takes place on-the-spot and at every location with a reported injury. We also deliver comprehensive suite of highly interactive training lessons through Ryder Pro-TREAD to each driver individually over the internet.

Our safety policies require that all managers, supervisors and employees incorporate processes in all aspects of our business. Monthly safety scorecards are tracked and reviewed by management for progress toward key safety objectives. Our proprietary web-based safety tracking system, RyderStar, delivers proactive safety programs tailored to every location and helps measure safety activity effectiveness.

EMPLOYEES

At December 31, 2010, we had approximately 25,900 full-time employees worldwide, of which 24,600 were employed in North America, 1,000 in Europe and 300 in Asia. We have approximately 13,800 hourly employees in the U.S., approximately 2,900 of which are organized by labor unions. Those employees organized by labor unions are principally represented by the International Brotherhood of Teamsters, the International Association of Machinists and Aerospace Workers, and the United Auto Workers, and their wages and benefits are governed by 99 labor agreements that are renegotiated periodically. Some of the businesses in which we currently engage have experienced a material work stoppage, slowdown or strike. We consider that our relationship with our employees is good.

10

EXECUTIVE OFFICERS OF THE REGISTRANT

All of the executive officers of Ryder were elected or re-elected to their present offices either at or subsequent to the meeting of the Board of Directors held on May 14, 2010 in conjunction with Ryder's 2010 Annual Meeting. They all hold such offices, at the discretion of the Board of Directors, until their removal, replacement or retirement.

Name	Age	Position
Gregory T. Swienton	61	Chairman of the Board and Chief Executive Officer
Art A. Garcia	49	Executive Vice President and Chief Financial Officer
Robert D. Fatovic	45	Executive Vice President, Chief Legal Officer and Corporate Secretary
Cristina A. Gallo-Aquino	37	Vice President and Controller
Gregory F. Greene	51	Executive Vice President and Chief Administrative Officer
Robert E. Sanchez	45	President, Global Fleet Management Solutions
John H. Williford	54	President, Global Supply Chain Solutions

Gregory T. Swienton has been Chairman since May 2002 and Chief Executive Officer since November 2000. He also served as President from June 1999 to June 2005. Before joining Ryder, Mr. Swienton was Senior Vice President of Growth Initiatives of Burlington Northern Santa Fe Corporation (BNSF) and before that Mr. Swienton was BNSF's Senior Vice President, Coal and Agricultural Commodities Business Unit.

Art A. Garcia has served as Executive Vice President and Chief Financial Officer since September 2010. Previously, Mr. Garcia served as Senior Vice President and Controller since October 2005 and as Vice President and Controller since February 2002. Mr. Garcia joined Ryder in December 1997 and has held various positions within Corporate Accounting.

Robert D. Fatovic has served as Executive Vice President, General Counsel and Corporate Secretary since May 2004. He previously served as Senior Vice President, U.S. Supply Chain Operations, High-Tech and Consumer Industries from December 2002 to May 2004. Mr. Fatovic joined Ryder's Law department in 1994 as Assistant Division Counsel and has held various positions within the Law department including Vice President and Deputy General Counsel.

Cristina A. Gallo-Aquino has served as Vice President and Controller since September 2010. Previously, Ms. Gallo-Aquino served as Assistant Controller from November 2009 to September 2010, where she was responsible for Ryder's Corporate Accounting, Benefits Accounting and Payroll Accounting departments. Ms. Gallo-Aquino joined Ryder in 2004 and has held various positions within Corporate Accounting.

Gregory F. Greene has served as Executive Vice President since December 2006, as Chief Human Resources Officer since February 2006 and as Chief Administrative Officer since September 2010. Previously, Mr. Greene served as Senior Vice President, Strategic Planning and Development from April 2003. Mr. Greene joined Ryder in August 1993 and has since held various positions within Human Resources.

Robert E. Sanchez has served as President, Global Fleet Management Solutions since September 2010. Previously, Mr. Sanchez has served as Executive Vice President and Chief Financial Officer since October 2007. He also previously served as Executive Vice President of Operations, U.S. Fleet Management Solutions from October 2005 to October 2007 and as Senior Vice President and Chief Information Officer from January 2003 to October 2005. Mr. Sanchez joined Ryder in 1993 and has held various positions.

John H. Williford has served as President, Global Supply Chain Solutions since June 2008. Prior to joining Ryder, Mr. Williford founded and served as President and Chief Executive Officer of Golden Gate Logistics LLC from 2006 to June 2008. From 2002 to 2005, he served as President and Chief Executive Officer of Menlo Worldwide, Inc., the supply chain business of CNF, Inc. From 2005 to 2006, Mr. Williford was engaged as an advisor to Menlo Worldwide subsequent to the sale of Menlo Forwarding to United Parcel Service.

11

FURTHER INFORMATION

For further discussion concerning our business, see the information included in Items 7 and 8 of this report. Industry and market data used throughout Item 1 was obtained through a compilation of surveys and studies conducted by industry sources, consultants and analysts.

We make available free of charge through the Investor Relations page on our website at www.ryder.com our Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports as soon as reasonably practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission.

In addition, our Corporate Governance Guidelines, Principles of Business Conduct (including our Finance Code of Conduct), and Board committee charters are posted on the Corporate Governance page of our website at www.ryder.com.

In addition to the factors discussed elsewhere in this report, the following are some of the important factors that could affect our business.

Our operating and financial results may fluctuate due to a number of factors, many of which are beyond our control.

Our annual and quarterly operating and financial results are affected by a number of economic, regulatory and competitive factors, including:

- changes in current financial, tax or regulatory requirements that could negatively impact the leasing market;
- our inability to obtain expected customer retention levels or sales growth targets;
- our inability to integrate acquisitions as projected, achieve planned synergies or retain customers of companies we acquire;
- unanticipated interest rate and currency exchange rate fluctuations;
- labor strikes, work stoppages, driver shortages;
- higher costs to procure drivers and high driver turnover rates affecting our customers;
- sudden changes in fuel prices and fuel shortages;
- relationships with and competition from vehicle manufacturers;
- changes in accounting rules, estimates, assumptions and accruals, including changes in lease accounting that could impact customers' leasing decisions;
- increases in healthcare costs resulting in higher insurance costs;
- outages, system failures or delays in timely access to data in legacy information technology systems that support key business processes; and
- reputational risk and other detrimental business consequences in the U.S. and internationally associated with employees, customers, agents, suppliers or other persons using our supply chain or assets to commit illegal acts, including the use of company assets for terrorist activities.

Changes in economic conditions could have an adverse effect on the profitability of our business.

A decline in economic activity can adversely affect demand for any of our businesses, thus reducing our revenue and earnings. The freight recession caused our revenues to decline as FMS customers ran fewer miles with their fleets and SCS customers had lower freight volumes. The most recent decline in economic

conditions has caused some of our full service lease customers to downsize their existing fleets and/or extend instead of renew their leases. Our profitability has been impacted by higher maintenance costs on an aging fleet. Our customers remain cautious about entering into long-term leases. Challenging economic and market conditions may also result in:

- increased competition for fewer projects and sales opportunities;
- pricing pressure that may adversely affect revenue and gross margin;
- customer financial difficulty and increased risk of uncollectible accounts receivable;
- diminished liquidity and credit availability resulting in higher short-term borrowing costs and more stringent borrowing terms;
- difficulty forecasting, budgeting and planning due to limited visibility into the spending plans of current or prospective customers;
- fleet downsizing to match demand which could adversely impact profitability;
- higher overhead costs as a percentage of revenue;
- increased risk of charges relating to asset impairments, including goodwill and other intangible assets; and
- increased risk of declines in the residual values of our vehicles.

In 2010, we began to see signs of a slow, uneven economic recovery. Our commercial rental and used vehicle sales performance improved significantly from the prior year and we saw an increase in the miles run per vehicle. However, we are uncertain whether the recent improvements in miles run and demand for commercial rental will continue and whether we will be able to maintain our current commercial rental rates, which increased this year due to customer demand. Uncertainty and lack of customer confidence around macroeconomic and industry conditions may continue to impact the spending and financial position of our customers.

We bear the residual risk on the value of our vehicles.

We generally bear the residual risk on the value of our vehicles. Therefore, if the market for used vehicles declines, or our vehicles are not properly maintained, we may obtain lower sales proceeds upon the sale of used vehicles. Changes in residual values also impact the overall competitiveness of our full service lease product line, as estimated sales proceeds are a critical component of the overall price of the product. Additionally, technology changes and sudden changes in supply and demand together with other market factors beyond our control vary from year to year and from vehicle to vehicle, making it difficult to accurately predict residual values used in calculating our depreciation expense. Although we have developed disciplines related to the management and maintenance of our vehicles that are designed to prevent these losses, there is no assurance that these practices will sufficiently reduce the residual risk. For a detailed discussion on our accounting policies and assumptions relating to depreciation and residual values, please see the section titled "Critical Accounting Estimates — Depreciation and Residual Value Guarantees" in Management's Discussion and Analysis of Financial Condition and Results of Operations.

Our profitability could be adversely impacted by our inability to maintain appropriate commercial rental utilization rates through our asset management initiatives.

We typically do not purchase vehicles for our full service lease product line until we have an executed contract with a customer. In our commercial rental product line, however, we do not purchase vehicles against specific customer contracts. Rather, we purchase vehicles and optimize the size and mix of the commercial rental fleet based upon our expectations of overall market demand. As a result, we bear the risk for ensuring that we have the proper vehicles in the right condition and location to effectively

capitalize on market demand in order to drive the highest levels of utilization and revenue per unit. We employ a sales force and operations

team on a full-time basis to manage and optimize this product line; however, their efforts may not be sufficient to overcome a significant change in market demand in the rental business or used vehicle market.

We derive a significant portion of our SCS revenue from a relatively small number of customers.

During 2010, sales to our top ten SCS customers representing all of the industry groups we service, accounted for 65% of our SCS total revenue and 64% of our SCS operating revenue (revenue less subcontracted transportation). Additionally, approximately 43% of our global SCS revenue is from the automotive industry and is directly impacted by automotive vehicle production. The loss of any of these customers or a significant reduction in the services provided to any of these customers could impact our domestic and international operations and adversely affect our SCS financial results. In addition, our largest SCS customers can exert downward pricing pressure and often require modifications to our standard commercial terms. While we believe our ongoing cost reduction initiatives have helped mitigate the effect of price reduction pressures from our SCS customers, there is no assurance that we will be able to maintain or improve profitability in those accounts. In 2010, we further diversified our customer base with the acquisition of TLC, which is concentrated in the consumer packaged goods industry. While we continue to focus our efforts on diversifying our customer base we may not be successful in doing so in the short-term.

Our profitability could be negatively impacted if the key assumptions and pricing structure of our SCS contracts prove to be invalid.

Substantially all of our SCS services are provided under contractual arrangements with our customers. Under most of these contracts, all or a portion of our pricing is based on certain assumptions regarding the scope of services, production volumes, operational efficiencies, the mix of fixed versus variable costs, productivity and other factors. If, as a result of subsequent changes in our customers' business needs or operations or market forces that are outside of our control, these assumptions prove to be invalid, we could have lower margins than anticipated. Although certain of our contracts provide for renegotiation upon a material change, there is no assurance that we will be successful in obtaining the necessary price adjustments.

We operate in a highly competitive industry and our business may suffer if we are unable to adequately address potential downward pricing pressures and other competitive factors.

Numerous competitive factors could impair our ability to maintain our current profitability. These factors include the following:

- advances in technology require increased investments to remain competitive, and our customers may not be willing to accept higher prices to cover the cost of these investments;
- we compete with many other transportation and logistics service providers, some of which have greater capital resources than we do;
- some of our competitors periodically reduce their prices to gain business, which may limit our ability to maintain or increase prices; and
- because cost of capital is a significant competitive factor, any increase in either our debt or equity cost of capital as a result of reductions in our debt rating or stock price volatility could have a significant impact on our competitive position.

We operate in a highly regulated industry, and costs of compliance with, or liability for violation of, existing or future regulations could significantly increase our costs of doing business.

Our business is subject to regulation by various federal, state and foreign governmental entities. Specifically, the U.S. Department of Transportation and various state and federal agencies exercise broad powers over our motor carrier operations, safety, and the generation, handling, storage, treatment and disposal of waste materials. We may also become subject to new or more restrictive regulations imposed by the Department of Transportation, the Occupational Safety and Health Administration, the Department of Homeland Security and U.S. Customs Service, the Environmental Protection Agency or other authorities,

relating to the hours of service that our drivers may provide in any one-time period, homeland security, carbon emissions and reporting and other matters. Compliance with these regulations could substantially impair labor and equipment productivity and increase our costs. Recent changes in and ongoing development of data privacy laws may result in increased exposure relating to our data security costs in order to comply with new standards.

With respect to our international operations, we are subject to compliance with local laws and regulatory requirements in foreign jurisdictions, including local tax laws, and compliance with the Federal Corrupt Practices Act. Adherence to rigorous local laws and regulatory requirements may limit our ability to expand into certain international markets and result in residual liability for legal claims and tax disputes arising out of previously discontinued operations.

Regulations governing exhaust emissions that have been enacted over the last few years could adversely impact our business. The Environmental Protection Agency issued regulations that required progressive reductions in exhaust emissions from certain diesel engines from 2007 through 2010. Emissions standards require reductions in the sulfur content of diesel fuel since June 2006. Also, the first phase of progressively stringent emissions standards relating to emissions after-treatment devices was introduced on newly-manufactured engines and vehicles utilizing engines built after January 1, 2007. The second phase, which required an additional after-treatment system, became effective after January 1, 2010. Each of these requirements could result in higher prices for vehicles, diesel engines and fuel, which are passed on to our customers, as well as higher maintenance costs and uncertainty as to reliability of the new engines, all of which could, over time, increase our costs and adversely affect our business and results of operations. The new technology may also impact the residual values of these vehicles when sold in the future.

Volatility in assumptions and asset values related to our pension plans may reduce our profitability and adversely impact current funding levels.

We historically sponsored a number of defined benefit plans for employees in the U.S., U.K. and other foreign locations. In recent years, we made amendments to defined benefit plans which freeze the retirement benefits for non-grandfathered and certain non-union employees. Our major defined benefit plans are funded, with trust assets invested in a diversified portfolio. The cash contributions made to our defined benefit plans are required to comply with minimum funding requirements imposed by employee benefit and tax laws. The projected benefit obligation and assets of our global defined benefit plans as of December 31, 2010 were \$1.74 billion and \$1.43 billion, respectively. The difference between plan obligations and assets, or the funded status of the plans, is a significant factor in determining pension expense and the ongoing funding requirements of those plans. Macroeconomic factors, as well as changes in investment returns and discount rates used to calculate pension expense and related assets and liabilities can be volatile and may have an unfavorable impact on our costs and funding requirements. We also participate in twelve U.S. multi-employer pension (MEP) plans that provide defined benefits to employees covered by collective bargaining agreements. In the event that we withdraw from participation in one of these plans, then applicable law could require us to make an additional lump-sum contribution to the plan. Our withdrawal liability for any MEP plan would depend on the extent of the plan's funding of vested benefits. Economic conditions have caused MEP plans to be significantly underfunded. If the financial condition of the MEP plans were to continue to deteriorate, participating employers could be subject to additional assessments. Although we have actively sought to control increases in these costs and funding requirements, there can be no assurance that we will succeed, and continued cost pressure could reduce the profitability of our business and negatively impact our cash flows.

We establish self-insurance reserves based on historical loss development factors, which could lead to adjustments in the future based on actual development experience.

We retain a portion of the accident risk under vehicle liability and workers' compensation insurance programs. Our self-insurance accruals are based on actuarially estimated, undiscounted cost of claims, which includes claims incurred but not reported. While we believe that our estimation processes are well designed, every estimation process is inherently subject to limitations. Fluctuations in the frequency or severity of accidents make it difficult to precisely predict the ultimate cost of claims. The actual cost of claims can be

different than the historical selected loss development factors because of safety performance, payment patterns and settlement patterns. For a detailed discussion on our accounting policies and assumptions relating to our self-insurance reserves, please see the section titled "Critical Accounting Estimates — Self-Insurance Accruals" in Management's Discussion and Analysis of Financial Condition and Results of Operations.

We may face difficulties in attracting and retaining drivers.

We hire drivers primarily for our DCC and SCS business segments. There is significant competition for qualified drivers in the transportation industry. As a result of driver shortages, we could be required to increase driver compensation, let trucks sit idle, utilize lower quality drivers or face difficulty meeting customer demands, all of which could adversely affect our growth and profitability.

None.

Our properties consist primarily of vehicle maintenance and repair facilities, warehouses and other real estate and improvements.

We maintain 624 FMS properties in the U.S., Puerto Rico and Canada; we own 394 of these and lease the remaining 230. Our FMS properties are primarily comprised of maintenance facilities generally including a repair shop, rental counter, fuel service island administrative offices, and used vehicle retail sales centers.

Additionally, we manage 182 on-site maintenance facilities, located at customer locations.

We also maintain 125 locations in the U.S. and Canada in connection with our domestic SCS and DCC businesses. Almost all of our SCS locations are leased and generally include a warehouse and administrative offices.

We maintain 88 international locations (locations outside of the U.S. and Canada) for our international businesses. These locations are in the U.K., Luxembourg, Germany, Mexico, China and Singapore. The majority of these locations are leased and may be a repair shop, warehouse or administrative office.

Additionally, we maintain 8 U.S. locations primarily used for Central Support Services. These facilities are generally administrative offices, of which we own one and lease the remaining seven.

We are involved in various claims, lawsuits and administrative actions arising in the normal course of our businesses. Some involve claims for substantial amounts of money and/or claims for punitive damages. While any proceeding or litigation has an element of uncertainty, management believes that the disposition of such matters, in the aggregate, will not have a material impact on our consolidated financial condition or liquidity.

	Stock Price		Common Share
	High	Low	
2010			
First quarter	\$42.08	31.86	0.25
Second quarter	48.49	38.57	0.25
Third quarter	44.78	37.00	0.27
Fourth quarter	52.80	41.43	0.27
2009			
First quarter	\$41.24	19.00	0.23
Second quarter	32.89	23.47	0.23
Third quarter	43.18	24.09	0.25
Fourth quarter	46.58	35.91	0.25

Our common shares are listed on the New York Stock Exchange under the trading symbol "R." At January 31, 2011, there were 9,192 common stockholders of record and our stock price on the New York Stock Exchange was \$48.08.

17

Performance Graph

The following graph compares the performance of our common stock with the performance of the Standard & Poor's 500 Composite Stock Index and the Dow Jones Transportation 20 Index for a five year period by measuring the changes in common stock prices from December 31, 2005 to December 31, 2010.

The stock performance graph assumes for comparison that the value of the Company's Common Stock and of each index was \$100 on December 31, 2005 and that all dividends were reinvested. Past performance is not necessarily an indicator of future results.

18

Purchases of Equity Securities

The following table provides information with respect to purchases we made of our common stock during the three months ended December 31, 2010:

	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares That May Yet Be Purchased Under the Anti-Dilutive Program ⁽²⁾	Approximate Dollar Value That May Yet Be Purchased Under the Discretionary Program ⁽³⁾
October 1 through October 31, 2010	108,800	\$ 44.00	105,000	1,583,239	\$ 20,263,949
November 1 through November 30, 2010	552,244	43.97	549,444	1,438,795	2,423,909
December 1 through December 31, 2010	56,131	43.74	55,841	1,438,344	—
Total	717,175	\$ 43.96	710,285		

(1) During the three months ended December 31, 2010, we purchased an aggregate of 6,890 shares of our common stock in employee-related transactions. Employee-related transactions may include: (i) shares of common stock delivered as payment for the exercise price of options exercised or to satisfy the option holders' tax withholding liability associated with our share-based compensation programs and (ii) open-market purchases by the trustee of Ryder's deferred compensation plans relating to investments by employees in our stock, one of the investment options available under the plans.

(2) In December 2009, our Board of Directors authorized a share repurchase program intended to mitigate the dilutive impact of shares issued under our various employee stock, stock option and stock purchase plans. Under the December 2009 program, management is authorized to repurchase shares of common stock in an amount not to exceed the number of shares issued to employees under our various employee stock, stock option and stock purchase plans from December 1, 2009 through December 15, 2011. The December 2009 program limits aggregate share repurchases to no more than 2 million shares of Ryder common stock. Share repurchases of common stock are made periodically in open-market transactions and are subject to market conditions, legal requirements and other factors. Management may establish a prearranged written plan for the Company under Rule 10b5-1 of the Securities Exchange Act of 1934 as part of the December 2009 program, which allows for share repurchases during Ryder's quarterly blackout periods as set forth in the trading plan. For the three months ended December 31, 2010, we repurchased and retired 144,895 shares under this program at an aggregate cost of \$6.4 million.

(3) In February 2010, our Board of Directors authorized a \$100 million discretionary share repurchase program over a period not to exceed two years. Share repurchases of common stock were made periodically in open-market transactions and were subject to market conditions, legal requirements and other factors. Management established a prearranged written plan for the Company under Rule 10b5-1 of the Securities Exchange Act of 1934 as part of the February 2010 program, which allowed for share repurchases during Ryder's quarterly blackout periods as set forth in the trading plan. For the three months ended December 31, 2010, we completed the program and repurchased and retired 565,390 shares at an aggregate cost of \$24.9 million.

19

Securities Authorized for Issuance under Equity Compensation Plans

The following table includes information as of December 31, 2010 about certain plans which provide for the issuance of common stock in connection with the exercise of stock options and other share-based awards.

Number of Securities to be Issued upon Exercise of Outstanding	Weighted-Average Exercise Price of Outstanding	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans Excluding Securities
--	--	---

Plans	Options, Warrants	Options, Warrants	Reflected in
	and Rights (a)	and Rights (b)	Column (a) (c)
Equity compensation plans approved by security holders:			
Broad based employee stock plans	4,116,254 ⁽¹⁾	\$ 42.25 ⁽³⁾	3,073,875
Employee stock purchase plan	—	—	1,139,805
Non-employee directors' stock plans	165,689 ⁽²⁾	33.29 ⁽³⁾	41,471
Equity compensation plans not approved by security holders			
Total	<u>4,281,943</u>	<u>\$ 42.16⁽³⁾</u>	<u>4,255,151</u>

(1) Includes 670,970 time-vested and performance-based restricted stock awards.

(2) Includes 128,189 restricted stock units.

(3) Weighted-average exercise price of outstanding options; excludes restricted stock awards and restricted stock units.

20

The following selected consolidated financial information should be read in conjunction with Items 7 and 8 of this report.

	Years ended December 31

(1) Effective January 1, 2008, our contractual relationship with a significant customer changed, and we determined, after formal review of the terms and conditions of the services, we are acting as an agent based on the revised terms of the agreement. As a result, the amount of total revenue and subcontracted transportation expense decreased by \$640 million in 2008 due to the reporting of revenue net of subcontracted transportation expense for this particular customer contract.

(2) Refer to the section titled "Overview" and "Non-GAAP Financial Measures" in Item 7 of this report for a reconciliation of comparable earnings to net earnings.

(3) Net earnings in 2010, 2009, 2008, 2007 and 2006 included (losses) earnings from discontinued operations of \$(6) million, or \$(0.12) per diluted common share, \$(28) million, or \$(0.51) per diluted common share, \$(58) million, or \$(1.01) per diluted common share, \$2 million, or \$0.03 per diluted common share, and \$2 million, or \$0.04 per diluted common share, respectively.

(4) Shareholders' equity at December 31, 2010, 2009, 2008, 2007 and 2006 reflected after-tax equity charges of \$423 million, \$412 million, \$480 million, \$148 million, and \$201 million, respectively, related to our pension and postretirement plans.

(5) Amounts were computed using an 8-point average based on quarterly information.

(6) Our adjusted return on capital (ROC) represents the rate of return generated by the capital deployed in our business. We use ROC as an internal measure of how effectively we use the capital invested (borrowed or owned) in our operations. Refer to the section titled "Non-GAAP Financial Measures" in Item 7 of this report for a reconciliation of return on average shareholders' equity to adjusted return on average capital.

(7) Refer to the section titled "Financial Resources and Liquidity" in Item 7 of this report for a reconciliation of net cash provided by operating activities to free cash flow.

21

The following Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) should be read in conjunction with our consolidated financial statements and related notes contained in Item 8 of this report on Form 10-K. The following MD&A describes the principal factors affecting results of operations, financial resources, liquidity, contractual cash obligations, and critical accounting estimates.

OVERVIEW

Ryder System, Inc. (Ryder) is a global leader in transportation and supply chain management solutions. Our business is divided into three business segments, which operate in highly competitive markets. Our customers select us based on numerous factors including service quality, price, technology, and service offerings. As an alternative to using our services, customers may choose to provide these services for themselves, or may choose to obtain similar or alternative services from other third-party vendors. Our customer base includes enterprises operating in a variety of industries including automotive, food service, electronics, transportation, grocery, lumber and wood products, and home furnishing.

The *Fleet Management Solutions (FMS)* business segment is our largest segment providing full service leasing, contract maintenance, contract-related maintenance, and commercial rental of trucks, tractors and trailers to customers principally in the U.S., Canada and the U.K. FMS revenue and assets in 2010 were \$3.40 billion and \$5.94 billion, respectively, representing 66% of our consolidated revenue and 89% of consolidated assets.

The *Supply Chain Solutions (SCS)* business segment provides comprehensive supply chain consulting including distribution and transportation services throughout North America and Asia. SCS revenue in 2010 was \$1.25 billion, representing 24% of our consolidated revenue.

The *Dedicated Contract Carriage (DCC)* business segment provides vehicles and drivers as part of a dedicated transportation solution in the U.S. DCC revenue in 2010 was \$483 million, representing 10% of our consolidated revenue.

In 2010, we had a very successful year. In what continues to be an uneven, slow economic recovery, we achieved revenue growth and very good earnings leverage, including a 38% increase in net earnings from continuing operations and a 24% increase in comparable earnings from continuing operations. Our steady progress throughout the year, culminating in a particularly strong fourth quarter, enabled Ryder to deliver an increase in total shareholder value. In Fleet Management Solutions, our commercial rental performance improved because of better pricing due to rising demand in the overall marketplace. Used vehicle sales results improved because of better pricing stemming from a lower supply of vehicles for sale in the marketplace and higher demand. Our full service lease product line continued to improve in miles driven per vehicle; however, customers remain cautious on entering long-term leases. Our Supply Chain solutions business delivered solid margins with particularly strong results from our high-tech and automotive accounts. Our solid balance sheet and strong cash flow enabled us to announce several strategic acquisitions which will help grow and expand capabilities in all three business segments. Additionally, our financial strength enabled us to continue repurchasing shares under the previously announced stock buyback programs and increase our annual dividend.

Total revenue was \$5.14 billion, up 5% from \$4.89 billion in 2009. Operating revenue (total revenue less FMS fuel and subcontracted transportation) was \$4.16 billion in 2010, up 2%. Operating revenue increased primarily due to higher commercial rental revenue and favorable movements in foreign exchange rates partially offset by lower full service lease revenue.

Earnings from continuing operations increased to \$125 million in 2010 from \$90 million in 2009 and earnings per diluted common share from continuing operations increased to \$2.37 from \$1.62 in 2009. Earnings from continuing operations included certain items we do not consider indicative of our ongoing operations and have been excluded from our comparable earnings measure. The following discussion provides

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

a summary of the 2010 and 2009 special items which are discussed in more detail throughout our MD&A and within the Notes to Consolidated Financial Statements:

	Continuing Operations		
	Earnings Before Income Taxes	Earnings	Diluted Earnings per Share
	(Dollars in thousands, except per share amounts)		
2010			
Earnings/EPS from continuing operations	\$ 186,305	\$124,608	\$ 2.37
• Tax benefit associated with settlement of prior tax year's audits and the expiration of a statute of limitation	—	(10,771)	(0.21)
• Gain on sale of an international asset previously impaired ⁽¹⁾	(946)	(946)	(0.02)
• Acquisition costs ⁽¹⁾	4,097	4,097	0.08
Comparable earnings from continuing operations	<u>\$ 189,456</u>	<u>\$116,988</u>	<u>\$ 2.22</u>
2009			
Earnings/EPS from continuing operations	\$ 143,769	\$ 90,117	\$ 1.62
• Restructuring and other charges	6,406	4,176	0.08
• Benefit associated with the reversal of reserves for uncertain tax positions due to the expiration of statutes of limitation in various jurisdictions	—	(2,239)	(0.04)
• Benefit from a tax law change in Ontario, Canada	—	(4,100)	(0.07)
• Charges related to impairment of international asset ⁽¹⁾	6,676	6,676	0.12
Comparable earnings from continuing operations	<u>\$ 156,851</u>	<u>\$ 94,630</u>	<u>\$ 1.70</u>

⁽¹⁾ Refer to Note 26, "Other Items Impacting Comparability," in the Notes to Consolidated Financial Statements.

Excluding the special items listed above, comparable earnings from continuing operations increased 24% to \$117 million in 2010. Comparable earnings per diluted common share from continuing operations increased 31% to \$2.22 in 2010. Results reflect higher earnings in our FMS and SCS business segments. The FMS earnings increase was driven by improved global commercial rental performance and used vehicle sales results. This increase was partially offset by lower full service lease performance resulting from higher maintenance costs on a relatively older fleet and the cumulative impact of customer fleet downsizings. SCS earnings increased due to improved operating performance, particularly in high-tech accounts and higher automotive volumes partially offset by higher compensation costs.

Free cash flow was \$258 million in 2010 compared to \$614 million in 2009. The decline was driven by higher capital expenditures. With our stronger earnings and positive cash flows, we repurchased a total of 3 million shares of common stock in

2010 for \$123 million and made voluntary pension contributions of approximately \$50 million. We also increased our annual dividend by 8% to \$1.08 per share of common stock. In addition, during 2010 we paid \$205 million to acquire Total Logistic Control.

Capital expenditures increased 78% to \$1.09 billion in 2010 and reflects increased commercial rental spending to refresh and grow the fleet. Our debt balances increased 10% to \$2.75 billion at December 31, 2010 due to acquisitions and higher vehicle capital spending levels. Our debt to equity ratio increased to 196% from 175% in 2009. Our total obligations (including off-balance sheet debt) to equity ratio also increased to 203% from 183% in 2009.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

2011 Outlook

We enter 2011 very well positioned to profitably grow the business. For 2011, we expect to see the continuation of many of the same positive trends we experienced in 2010. We plan to benefit from productivity initiatives and operational efficiencies in our FMS business. This benefit will be partially offset by higher maintenance costs as our fleet continues to age. Earnings per share growth is expected from continued improvement in commercial rental performance, the impact of acquisitions, continued strong used vehicle sales results and the benefit of 2010 stock repurchases.

Total revenue for the full-year 2011 is forecast to be \$5.73 billion, which is an increase of 12% compared with 2010. In FMS, contractual leasing and maintenance revenue is expected to increase 2%. Commercial rental revenue is forecast to grow by 19%, driven by strong demand and higher pricing. Total SCS revenue is forecast to increase by 25% reflecting the impact of acquisitions. Total DCC revenue is expected to increase by 14% reflecting the impact of the Scully acquisition. See Note 3, "Acquisitions," in the Notes to Consolidated Financial Statements for further discussion.

ITEMS AFFECTING COMPARABILITY BETWEEN PERIODS

Accounting Changes

See Note 2, "Accounting Changes," for a discussion of the impact of changes in accounting standards.

ACQUISITIONS

On December 31, 2010, we acquired Total Logistic Control (TLC), which is a leading provider of comprehensive supply chain solutions to food, beverage, and consumer packaged goods (CPG) manufacturers in the U.S. TLC provides customers a broad suite of end-to-end services, including distribution management, contract packaging services and solutions engineering. This acquisition will enhance our SCS capabilities and growth prospects in the areas of packaging and warehousing, including temperature-controlled facilities.

We completed four FMS acquisitions from 2008 to 2009, under which we acquired a company's fleet and contractual customers. The FMS acquisitions operate under Ryder's name and complement our existing market coverage and service network. The results of these acquisitions have been included in our consolidated results since the dates of acquisition.

<u>Company Acquired</u>	<u>Date</u>	<u>Vehicles</u>	<u>Contractual Customers</u>	<u>Market</u>
Edart Leasing LLC	February 2, 2009	1,600	340	Northeast U.S.
Gordon Truck Leasing	August 29, 2008	500	130	Pennsylvania
Gator Leasing, Inc.	May 12, 2008	2,300	300	Florida
Lily Transportation Corp.	January 11, 2008	1,600	200	Northeast U.S.

On December 19, 2008, we acquired substantially all of the assets of Transpacific Container Terminal Ltd. and CRSA Logistics Ltd. (CRSA) in Canada, as well as CRSA operations in Hong Kong and Shanghai, China. This strategic acquisition added complementary solutions to our SCS capabilities including consolidation services in key Asian hubs, as well as deconsolidation operations in Vancouver, Toronto and Montreal.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

FULL YEAR CONSOLIDATED RESULTS

	<u>Years ended December 31</u>			<u>Change</u>	
	<u>2010</u>	<u>2009</u>	<u>2008</u>	<u>2010/2009</u>	<u>2009/2008</u>
	(Dollars in thousands)				
Earnings from continuing operations before income taxes	\$186,305	143,769	409,288	30%	(65)%
Provision for income taxes	61,697	53,652	151,709	15	(65)
Earnings from continuing operations	124,608	90,117	257,579	38	(65)
Loss from discontinued operations, net of tax	(6,438)	(28,172)	(57,698)	NM	NM
Net earnings	\$118,170	61,945	199,881	91%	(69)%
Earnings (loss) per common share — Diluted					
Continuing operations	\$ 2.37	1.62	4.51	46%	(64)%
Discontinued operations	(0.12)	(0.51)	(1.01)	NM	NM
Net earnings	\$ 2.25	1.11	3.50	103%	(68)%
Weighted-average shares outstanding — Diluted	51,884	55,094	56,539	(6)%	(3)%

Earnings from continuing operations before income taxes (NBT) increased 30% in 2010 to \$186 million. Excluding restructuring and other items, comparable NBT increased 21% in 2010 to \$189 million, and comparable earnings from continuing operations increased 24% to \$117 million. The increase in comparable NBT and earnings from continuing operations reflects the impact of stronger results in our FMS and SCS business segments. FMS earnings increased due to improved global commercial rental performance and used vehicle sales results. This increase was partially offset by lower full service lease performance reflecting higher maintenance costs on a relatively older fleet and the cumulative impact of customer fleet downsizing. SCS earnings increased due to improved high-tech and global automotive industry volumes partially offset by higher compensation costs. Net earnings increased 91% in 2010 to \$118 million or \$2.25 per diluted common share. Net earnings in 2010 included losses from discontinued operations for SCS South America and Europe of \$6 million or \$0.12 per diluted common share. Earnings per share growth in 2010 exceeded the net earnings growth reflecting the impact of share repurchase programs.

NBT decreased 65% in 2009 to \$144 million. Excluding restructuring and other items, comparable NBT declined 64% in 2009 to \$157 million, and comparable earnings from continuing operations declined 65% to \$95 million. The decrease in comparable NBT and earnings from continuing operations reflected significantly lower earnings in our FMS business segment because of a decline in commercial rental, full service lease and used vehicle sales as well as higher pension expense. NBT was also negatively impacted by lower global SCS automotive industry volumes. Net earnings decreased 69% in 2009 to \$62 million or \$1.11 per diluted common share. Net earnings in 2009 included losses from discontinued operations for SCS South America and Europe of \$28 million or \$0.51 per diluted common share.

25

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

See subsequent discussion within "Full Year Consolidated Results" and "Full Year Operating Results by Business Segment" and refer to our Notes to Consolidated Financial Statements for other items impacting comparability related to discontinued operations, restructuring and other charges and income taxes.

	Years ended December 31			Change	
	2010	2009	2008	2010/ 2009	2009/ 2008
	(Dollars in thousands)				
Revenue:					
Fleet Management Solutions	\$3,712,153	3,567,836	4,454,251	4%	(20)%
Supply Chain Solutions	1,252,251	1,139,911	1,429,632	10	(20)
Dedicated Contract Carriage	482,583	470,956	547,751	2	(14)
Eliminations	(310,552)	(291,449)	(432,593)	(7)	33
Total	\$5,136,435	4,887,254	5,999,041	5%	(19)%
Operating revenue ⁽¹⁾	\$4,158,239	4,062,512	4,590,080	2%	(11)%

(1) We use operating revenue, a non-GAAP financial measure, to evaluate the operating performance of our businesses and as a measure of sales activity. FMS fuel services revenue net of related intersegment billings, which is directly impacted by fluctuations in market fuel prices, is excluded from the operating revenue computation as fuel is largely a pass-through to our customers for which we realize minimal changes in profitability during periods of steady market fuel prices. However, profitability may be positively or negatively impacted by increases or decreases in market fuel prices during a short period of time as customer pricing for fuel services is established based on market fuel costs. Subcontracted transportation revenue in our SCS and DCC business segments is excluded from the operating revenue computation as subcontracted transportation is largely a pass-through to our customers and we realize minimal changes in profitability as a result of fluctuations in subcontracted transportation. Refer to the section titled "Non-GAAP Financial Measures" for a reconciliation of total revenue to operating revenue.

Total revenue increased 5% to \$5.14 billion in 2010 primarily due to higher fuel services revenue, operating revenue and subcontracted transportation. Operating revenue increased 2% to \$4.16 billion in 2010 primarily due to higher commercial rental revenue and favorable movements in foreign exchange rates partially offset by lower full service lease revenue. Total and operating revenue in 2010 included a favorable foreign exchange impact of 0.9% due primarily to the strengthening of the Canadian dollar.

Total revenue decreased 19% to \$4.89 billion in 2009 reflecting lower fuel services and operating revenue. Operating revenue decreased 11% to \$4.06 billion in 2009 primarily due to lower commercial rental revenue and SCS automotive production volumes. To a lesser extent, operating revenue was also negatively impacted by lower SCS and DCC fuel pass-throughs, unfavorable foreign currency movements and lower FMS contractual revenues partially offset by the benefit of acquisitions. Total revenue in 2009 included an unfavorable foreign exchange impact of 1.4% due primarily to the weakening of the British pound and Mexican peso.

Our FMS segment leases revenue earning equipment and provides fuel, maintenance and other ancillary services to our SCS and DCC segments. Eliminations relate to inter-segment sales that are accounted for at rates similar to those executed with third parties. The increase in eliminations in 2010 reflects primarily the pass-through of higher average fuel costs. The decrease in eliminations in 2009 reflects primarily the pass-through of lower average fuel costs.

26

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

	Years ended December 31			Change	
	2010	2009	2008	2010/ 2009	2009/ 2008
	(Dollars in thousands)				
Operating expense (exclusive of items shown separately)	\$2,441,924	2,229,539	2,959,518	10%	(25)%
Percentage of revenue	48%	46%	49%		

Operating expense and operating expense as a percentage of revenue increased in 2010 primarily as a result of higher fuel costs and higher maintenance costs. The increase in fuel costs was driven by an increase in average U.S. fuel prices on lower fuel

volumes. Fuel costs are largely a pass-through to customers for which we realize minimal changes in profitability during periods of steady market fuel prices. The growth in maintenance costs reflects the impact of an aging global fleet.

Operating expense decreased 25% to \$2.23 billion in 2009 as a result of lower fuel costs. The decrease in fuel costs was due to lower average market prices and lower fuel volumes. The decrease was partially offset by higher maintenance costs and safety and insurance costs. The growth in safety and insurance costs reflects less favorable development in self-insured loss reserves. During 2010, 2009 and 2008, we recorded a (charge) benefit of \$(3) million, \$1 million, and \$23 million, respectively, from development in estimated prior years' self-insured loss reserves.

	Years ended December 31			Change	
	2010	2009	2008	2010/ 2009	2009/ 2008
	(Dollars in thousands)				
Salaries and employee-related costs	\$1,255,659	1,233,243	1,345,216	2%	(8)%
Percentage of revenue	24%	25%	22%		
Percentage of operating revenue	30%	30%	29%		

Salaries and employee-related costs increased 2% to \$1.26 billion in 2010 primarily due to higher incentive-based compensation, unfavorable changes in foreign currency exchange rates and higher driver costs, partially offset by lower retirement plans expense. Average headcount, excluding discontinued operations, increased 1% in 2010. The number of employees at December 31, 2010 increased to approximately 25,900 compared to 22,900 (excluding those from discontinued operations) at December 31, 2009. The higher headcount was primarily due to the acquisition of TLC at the end of the year.

Pension expense totaled \$42 million in 2010 compared to \$66 million in 2009. The decrease in pension expense reflects reduced amortization of actuarial losses attributed to higher than expected return on pension assets in 2009 and the favorable impact from voluntary pension contributions made in the fourth quarter of 2009. We expect 2011 pension expense to decrease approximately \$9 million primarily because of reduced amortization of actuarial losses attributed to higher than expected return on plan assets in 2010. Our 2011 pension expense estimates are subject to change based upon the completion of the actuarial analysis for all pension plans. See the section titled "Critical Accounting Estimates — Pension Plans" for further discussion on pension accounting estimates.

Salaries and employee-related costs decreased 8% to \$1.23 billion in 2009 primarily due to lower headcount, favorable foreign exchange rate changes and lower incentive-based compensation and commissions partially offset by higher pension expense and the impact of acquisitions. Average headcount decreased 9% in 2009 compared with 2008. Pension expense increased by \$65 million as a result of significant negative pension asset returns in 2008.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

	Years ended December 31			Change	
	2010	2009	2008	2010/ 2009	2009/ 2008
	(Dollars in thousands)				
Subcontracted transportation	\$261,325	198,860	233,106	31%	(15)%
Percentage of revenue	5%	4%	4%		

Subcontracted transportation expense represents freight management costs on logistics contracts for which we purchase transportation from third parties. Subcontracted transportation expense is directly impacted by whether we are acting as an agent or principal in our transportation management contracts. To the extent that we are acting as a principal, revenue is reported on a gross basis and carriage costs to third parties are recorded as subcontracted transportation expense. Subcontracted transportation expense increased 31% to \$261 million in 2010 as a result of increased freight volumes particularly in the automotive industry.

Subcontracted transportation expense decreased 15% to \$199 million in 2009 as a result of decreased freight volumes.

	Years ended December 31			Change	
	2010	2009	2008	2010/ 2009	2009/ 2008
	(Dollars in thousands)				
Depreciation expense	\$833,841	881,216	836,149	(5)%	5%
Gains on vehicle sales, net	(28,727)	(12,292)	(39,020)	134	(68)
Equipment rental	63,228	65,828	78,292	(4)	(16)

Depreciation expense relates primarily to FMS revenue earning equipment. Depreciation expense decreased 5% to \$834 million in 2010 because of a smaller fleet as well as decreased write-downs of \$26 million in the carrying value of vehicles held for sale. The decline was also impacted by a prior year impairment charge on a Singapore facility. The decrease in depreciation expense was partially offset by higher average vehicle investments as well as changes in both residual values of certain classes of our revenue earning equipment effective January 1, 2010 and accelerated depreciation for select vehicles expected to be sold by 2011. Depreciation expense increased 5% to \$881 million in 2009 because of increased write-downs of \$24 million in the carrying value of vehicles held for sale, accelerated depreciation of \$10 million on certain classes of vehicles expected to be held for sale through 2010, the impact of acquisitions, higher average vehicle investments and impairment charges on a Singapore facility, partially offset by the impact of foreign exchange rates and a lower number of owned vehicles.

We periodically review and adjust residual values, reserves for guaranteed lease termination values and useful lives of revenue earning equipment based on current and expected operating trends and projected realizable values. See the section titled "Critical Accounting Estimates — Depreciation and Residual Value Guarantees" for further discussion. While we believe that the carrying values and estimated sales proceeds for revenue earning equipment are appropriate, there can be no assurance that deterioration in economic conditions or adverse changes to expectations of future sales proceeds will not occur, resulting in lower gains or losses on sales. In 2010 and 2009, we accelerated depreciation on certain classes of vehicles expected to be sold through 2011. The impact of this change increased depreciation by \$5 million and \$10 million in 2010 and 2009, respectively. At the end of each year, we complete our annual depreciation review of the residual values and useful lives of our revenue earning equipment. Our annual review is established with a long-term view considering historical market price changes, current and expected future market price trends, expected life of vehicles and extent of alternative uses. Based on the results of the 2008 review, the adjustment to depreciation was

not significant for 2009. Based on the results of our 2009 analysis, we adjusted the residual values of certain classes of our revenue earning equipment effective January 1, 2010. The residual value changes decreased pre-tax earnings for 2010 by approximately \$14 million compared with 2009. Based on the results of the 2010 review, we adjusted the residual values and useful lives of certain classes of revenue

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)**

earning equipment effective January 1, 2011. The changes will increase pre-tax earnings by approximately \$5 million compared with 2010.

Gains on vehicle sales, net increased 134% to \$29 million in 2010 due to higher average pricing on vehicles sold. Gains on vehicle sales, net decreased 68% to \$12 million in 2009 due to lower average pricing on vehicles sold primarily in our used truck class.

Equipment rental consists primarily of rent expense for FMS revenue earning equipment under lease by us as lessee. Equipment rental decreased 4% to \$63 million in 2010 primarily due to a lower number of leased vehicles partially offset by higher rental costs associated with investments in material handling equipment to support our SCS operations. Equipment rental decreased 16% to \$66 million in 2009 because of a reduction in the average number of vehicles leased from third parties.

	Years ended December 31			Change	
	2010	2009	2008	2010/ 2009	2009/ 2008
	(Dollars in thousands)				
Interest expense	\$129,994	144,342	152,448	(10)%	(5)%
Effective interest rate	5.2%	5.4%	5.3%		

Interest expense decreased 10% to \$130 million in 2010 because of lower average debt balances and a lower effective interest rate. Interest expense decreased 5% to \$144 million in 2009 because of lower average debt balances partially offset by a higher effective interest rate. A hypothetical 10 basis point change in short-term market interest rates would change annual pre-tax earnings by \$0.7 million.

	Years ended December 31		
	2010	2009	2008
	(In thousands)		
Miscellaneous (income) expense, net	\$ (7,114)	(3,657)	2,564

Miscellaneous (income) expense, net consists of investment (income) losses on securities held to fund certain benefit plans, interest income, (gains) losses from sales of property, foreign currency transaction (gains) losses, and non-operating items. Miscellaneous (income) expense, net improved \$3 million in 2010 primarily due to gains from sales of property and a life insurance recovery partially offset by lower income on investment securities. Miscellaneous (income) expense, net improved \$6 million in 2009 due to better market performance of our investment securities partially offset by lower foreign currency transaction gains in 2009.

	Years ended December 31		
	2010	2009	2008
	(In thousands)		
Restructuring and other charges, net	\$ —	6,406	21,480

See Note 5, "Restructuring and Other Charges," in the Notes to Consolidated Financial Statements for further discussion around the charges related to these actions.

	Years ended December 31			Change	
	2010	2009	2008	2010/ 2009	2009/ 2008
	(Dollars in thousands)				
Provision for income taxes	\$61,697	53,652	151,709	15%	(65)%
Effective tax rate from continuing operations	33.1%	37.3%	37.1%		

The 2010 effective income tax rate benefited from the favorable settlement of domestic tax audits in 2010 and the reversal of reserves for uncertain tax positions due to the expiration of a statute of limitation. In the aggregate, these items reduced the effective rate by 5.7% of pre-tax earnings from continuing operations. The 2009 effective income tax rate benefited from enacted tax law changes in Ontario, Canada, the favorable settlement of a foreign tax audit and reversal of reserves for uncertain tax positions for which the statute of limitation in various jurisdictions had expired. In the aggregate, these items reduced the effective rate by 6.5%

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)**

of pre-tax earnings. The benefits in 2009 were partially offset by the impact of non-deductible expenses on lower pre-tax earnings from continuing operations. The 2008 effective income tax rate benefited from enacted tax law changes in Massachusetts and the reversal of reserves for uncertain tax positions, for which the statute of limitation in various jurisdictions had expired which, in the aggregate, totaled 3.3% of pre-tax earnings. The benefits in 2008 were partially offset by the adverse impact of non-deductible restructuring and other charges.

On December 17, 2010 and September 27, 2010, the U.S. enacted the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act, and the Small Business Job Act of 2010, respectively. These Acts expanded and extended bonus depreciation to qualified property placed in service during 2010 through 2012. The impact of these changes is expected to result in a net operating loss carryforward in 2011. In addition, these changes are expected to significantly reduce our U.S. federal tax payments through 2013.

	2010	2009	2008
		(In thousands)	
Loss from discontinued operations, net of tax	\$(6,438)	(28,172)	(57,698)

Pre-tax loss from discontinued operations in 2010 primarily included exit costs related to a leased facility and adverse legal developments. Pre-tax loss from discontinued operations in 2009 and 2008 included operating losses of \$11 million and \$12 million, respectively. During 2009 and 2008, we also incurred \$17 million and \$47 million, respectively, of pre-tax restructuring and other charges (primarily exit-related) related to discontinued operations. See Note 4, "Discontinued Operations," in the Notes to Consolidated Financial Statements for additional information.

Earnings from continuing operations before income taxes	\$ 186,305	<u>143,769</u>	<u>409,288</u>	30%	(65)%

(1) See Note 5, "Restructuring and Other Charges" and Note 26, "Other Items Impacting Comparability," in the Notes to Consolidated Financial Statements for a discussion of items excluded from our segment measure of profitability.

As part of management's evaluation of segment operating performance, we define the primary measurement of our segment financial performance as "Net Before Taxes" (NBT) from continuing operations, which includes an allocation of CSS and excludes restructuring and other charges, net and other items we do not believe are representative of the ongoing operations of the segment.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

The following table provides a reconciliation of items excluded from our segment NBT measure to their classification within our Consolidated Statements of Earnings:

Description	Consolidated Statements of Earnings Line Item ⁽¹⁾	Years ended December 31		
		2010	2009	2008
		(In thousands)		
Severance and employee-related costs ⁽²⁾	Restructuring	\$ —	(2,206)	(11,209)
Contract termination costs ⁽²⁾	Restructuring	—	—	(29)
Early retirement of debt ⁽²⁾	Restructuring	—	(4,178)	—
Asset impairments ⁽²⁾	Restructuring	—	(22)	(10,242)
Restructuring and other charges, net		—	(6,406)	(21,480)
International asset impairment ⁽³⁾	Depreciation expense	—	(6,676)	(1,617)
Gain on sale of property ⁽³⁾	Miscellaneous income	946	—	—
Acquisition costs ⁽³⁾	Operating expense	(4,097)	—	—
Restructuring and other charges, net and other items		\$(3,151)	<u>(13,082)</u>	<u>(23,097)</u>

(1) Restructuring refers to the "Restructuring and other charges, net," and Miscellaneous income refers to "Miscellaneous (income) expense, net" on our Consolidated Statements of Earnings.

(2) See Note 5, "Restructuring and Other Charges," in the Notes to Consolidated Financial Statements for additional information.

(3) See Note 26, "Other Items Impacting Comparability" in the Notes to Consolidated Financial Statements for additional information.

Our FMS segment leases revenue earning equipment and provides fuel, maintenance and other ancillary services to our SCS and DCC segments. Inter-segment revenue and NBT are accounted for at rates similar to those executed with third parties. NBT related to inter-segment equipment and services billed to customers (equipment contribution) are included in both FMS and the business segment which served the customer and then eliminated (presented as "Eliminations").

The following table sets forth equipment contribution included in NBT for our SCS and DCC segments:

	Years ended December 31		
	2010	2009	2008
	(In thousands)		
Equipment Contribution:			
Supply Chain Solutions	\$ 8,426	9,461	16,701
Dedicated Contract Carriage	10,849	11,597	15,102
Total	<u>\$19,275</u>	<u>21,058</u>	<u>31,803</u>

CSS represents those costs incurred to support all business segments, including human resources, finance, corporate services and public affairs, information technology, health and safety, legal and corporate communications. The objective of the NBT measurement is to provide clarity on the profitability of each business segment and, ultimately, to hold leadership of each business segment and each operating segment within each business segment accountable for their allocated share of CSS costs. Segment results are not necessarily indicative of the results of operations that would have occurred had each segment been an independent, stand-alone entity during the periods presented. Certain costs are considered to be overhead not attributable to any segment and remain unallocated in CSS. Included within the unallocated overhead remaining within CSS are the costs for investor relations, public affairs and certain executive compensation. See Note 29, "Segment Reporting," in the Notes to Consolidated Financial Statements for a description of how the remainder of CSS costs is allocated to the business segments.

32

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

Fleet Management Solutions

	Years ended December 31			Change	
	2010	2009	2008	2010/ 2009	2009/ 2008
	(Dollars in thousands)				
Full service lease	\$1,934,346	1,989,676	2,041,513	(3)%	(3)%
Contract maintenance	158,784	167,182	168,157	(5)	(1)
Contractual revenue	2,093,130	2,156,858	2,209,670	(3)	(2)

Commercial rental	525,083	431,058	557,491	22	(23)
Other	67,448	66,511	77,906	1	(15)
Operating revenue(1)	2,846,532	2,817,733	3,038,923	1	(7)
Fuel services revenue	865,621	750,103	1,415,328	15	(47)
Total revenue	<u>\$3,712,153</u>	<u>3,567,836</u>	<u>4,454,251</u>	4%	(20)%
Segment NBT	<u>\$ 172,185</u>	<u>140,400</u>	<u>395,909</u>	23%	(65)%
Segment NBT as a % of total revenue	4.6%	3.9%	8.9%	70bps	(500) bps
Segment NBT as a % of operating revenue(1)	6.0%	5.0%	13.0%	100bps	(800) bps

(1) We use operating revenue, a non-GAAP financial measure, to evaluate the operating performance of our FMS business segment and as a measure of sales activity. Fuel services revenue, which is directly impacted by fluctuations in market fuel prices, is excluded from our operating revenue computation as fuel is largely a pass-through to customers for which we realize minimal changes in profitability during periods of steady market fuel prices. However, profitability may be positively or negatively impacted by sudden increases or decreases in market fuel prices during a short period of time as customer pricing for fuel services is established based on market fuel costs.

2010 versus 2009

Total revenue increased 4% in 2010 to \$3.71 billion due primarily to higher fuel services revenue. Fuel services revenue increased 15% in 2010 due to higher fuel cost pass-throughs. Operating revenue increased 1% in 2010 to \$2.85 billion reflecting higher commercial rental revenue partially offset by lower contractual revenue. Total and operating revenue in 2010 also included a favorable foreign exchange impact of 0.6%.

Full service lease revenue declined 3% and contract maintenance revenue declined 5% as a result of the cumulative impact of customer fleet downsizings. However, the level of downsizings decreased toward the latter half of the year. We expect favorable contractual revenue comparisons next year due to acquisitions as well as a reduction in customer fleet downsizings. Commercial rental revenue increased 22% in 2010 reflecting improving global market demand and higher pricing. The average global rental fleet increased 1% in 2010 in response to increased demand. Power fleet utilization increased to 76.1% in 2010. We expect favorable commercial rental comparisons next year driven by higher demand and higher pricing on a larger fleet.

33

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

The following table provides rental statistics on our global fleet:

	Years ended December 31			Change	
	2010	2009	2008	2010/ 2009	2009/ 2008
	(Dollars in thousands)				
Non-lease customer rental revenue	\$332,077	265,143	329,875	25%	(20)%
Lease customer rental revenue ⁽¹⁾	\$193,006	165,915	227,616	16%	(27)%
Average commercial rental power fleet size — in service ^{(2),(3)}	23,800	23,000	25,800	3%	(11)%
Commercial rental utilization — power fleet	76.1%	68.0%	71.4%	810bps	(340)bps

(1) Lease customer rental revenue is revenue from rental vehicles provided to our existing full service lease customers, generally during peak periods in their operations.

(2) Number of units rounded to nearest hundred and calculated using average counts.

(3) Fleet size excluding trailers.

FMS NBT increased 23% in 2010 to \$172 million primarily due to better commercial rental performance, improved used vehicle sales results, and lower retirement plans expense. These items were partially offset by lower full service lease results and, to a lesser extent, higher compensation and depreciation expense. Commercial rental performance improved as a result of increased market demand and higher pricing. Used vehicle sales results were positively impacted by higher pricing and a lower average inventory level. Retirement plan costs decreased \$20 million because of improved performance in the overall stock market in 2009 which impacted 2010 pension expense. Full service lease performance was adversely impacted by increased maintenance costs on a relatively older fleet and the cumulative impact of customer fleet downsizing. Depreciation expense increased \$10 million resulting from residual value changes and accelerated depreciation.

2009 versus 2008

Total revenue decreased 20% in 2009 to \$3.57 billion due primarily to lower fuel services revenue. Fuel services revenue decreased 47% in 2009 because of lower average fuel prices as well as reduced gallons pumped. Operating revenue decreased 7% in 2009 to \$2.82 billion reflecting declines in all product lines, especially commercial rental, in light of the deterioration in global economic conditions in 2009, partially offset by the benefit of acquisitions. Total and operating revenue in 2009 also included an unfavorable foreign exchange impact of 1.2% and 1.7%, respectively.

Full service lease revenue declined 3% and contract maintenance revenue declined 1% as a result of fleet downsizing decisions and lower variable revenue from fewer miles driven by our customers with their fleets. Commercial rental revenue decreased 23% in 2009 reflecting weak global market demand and lower pricing. In 2009, we reduced the size and mix of our rental fleet in order to better align with market demand. The average global rental fleet size declined 13% in 2009 and year-end fleet counts decreased by 15% compared with 2008. As a result of our fleet right-sizing actions, rental fleet utilization in the fourth quarter of 2009 improved over the prior-year period for the first time in 2009.

FMS NBT decreased 65% in 2009 to \$140 million driven primarily by the economic slowdown and freight recession, which resulted in a decline in global commercial rental demand, lower full service lease performance and lower used vehicle sales results. Results in 2009 were also impacted by significantly higher pension expense. These items were partially offset by cost reduction initiatives, including workforce reductions implemented in early 2009. Commercial rental results were impacted by weak global demand which drove lower utilization and, to a lesser extent, reduced pricing on a smaller fleet. Full service lease results were adversely impacted by the protracted length and severity of the freight recession, which resulted in reduced customer demand for new leases and downsizing of customer fleets. Used vehicle sales results declined primarily due to weak market demand which drove lower pricing, as well as higher average inventory levels. Used vehicle inventory levels

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

improved during the second half of the year and finished the year 10% below the prior year. Pension expense significantly increased in 2009 because of poor performance in the overall stock market in 2008.

Our global fleet of owned and leased revenue earning equipment and contract maintenance vehicles is summarized as follows (number of units rounded to the nearest hundred):

	December 31			Change	
	2010	2009	2008	2010/ 2009	2009/ 2008
End of period vehicle count					
By type:					
Trucks ⁽¹⁾	63,000	63,600	68,300	(1)%	(7)%
Tractors ⁽²⁾	49,600	50,300	51,900	(1)	(3)

Other	3,100	3,100	3,300	—	(6)
Total	148,700	152,400	163,400	(2)%	(7)%
By ownership:					
Owned	145,000	147,200	158,100	(1)%	(7)%
Leased	3,700	5,200	5,300	(29)	(2)
Total	148,700	152,400	163,400	(2)%	(7)%
By product line:					
Full service lease	111,100	115,100	120,600	(3)%	(5)%
Commercial rental	29,700	27,400	32,300	8	(15)
Service vehicles and other	2,700	3,000	2,800	(10)	7
Active units	143,500	145,500	155,700	(1)	(7)
Held for sale	5,200	6,900	7,700	(25)	(10)
Total	148,700	152,400	163,400	(2)	(7)

Customer vehicles under contract maintenance	<u>33,400</u>	<u>34,400</u>	<u>35,500</u>	(3)%	(3)%
Average vehicle count					
By product line:					
Full service lease	112,500	118,800	118,100	(5)%	1%
Commercial rental	29,800	29,400	33,900	1	(13)
Service vehicles and other	2,600	2,900	3,300	(10)	(12)
Active units	144,900	151,100	155,300	(4)	(3)
Held for sale	5,800	8,400	6,200	(31)	35
Total	150,700	<u>159,500</u>	<u>161,500</u>	(6)	(1)
Customer vehicles under contract maintenance	33,700	<u>35,200</u>	<u>33,900</u>	(4)%	4%

(1) Generally comprised of Class 1 through Class 6 type vehicles with a Gross Vehicle Weight (GVW) up to 26,000 pounds.

(2) Generally comprised of over the road on highway tractors and are primarily comprised of Classes 7 and 8 type vehicles with a GVW of over 26,000 pounds.

(3) Generally comprised of dry, flatbed and refrigerated type trailers.

Note: Average vehicle counts were computed using 24-point average based on monthly information.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

The totals in the previous table include the following non-revenue earning equipment for the global fleet (number of units rounded to the nearest hundred):

Number of Units	December 31			Change	
	2010	2009	2008	2010/ 2009	2009/ 2008
Not yet earning revenue (NYE)	800	700	1,500	14%	(53)%
No longer earning revenue (NLE):					
Units held for sale	5,200	6,900	7,700	(25)	(10)
Other NLE units	2,000	2,900	2,900	(31)	—
Total	8,000	<u>10,500</u>	<u>12,100</u>	(24)%	(13)%

NYE units represent new vehicles on hand that are being prepared for deployment to a lease customer or into the rental fleet. Preparations include activities such as adding lift gates, paint, decals, cargo area and refrigeration equipment. For 2010, the number of NYE units increased compared with prior year reflecting new lease sales and, to a lesser extent, the refresh and growth of the rental fleet. For 2009, the number of NYE units decreased reflecting lower new replacement lease activity. NLE units represent all vehicles held for sale and vehicles for which no revenue has been earned in the previous 30 days. Accordingly, these vehicles may be temporarily out of service, being prepared for sale or awaiting redeployment. The number of NLE units decreased because of lower used vehicle inventory levels and higher rental utilization. For 2009, the number of NLE units decreased because of lower used vehicle inventory levels. We expect NLE levels in 2011 to be slightly higher due to increased levels of vehicle replacement activity from both our lease and rental fleets.

Supply Chain Solutions

	Years ended December 31			Change	
	2010	2009	2008	2010/ 2009	2009/ 2008
	(Dollars in thousands)				
Operating revenue:					
Automotive	\$ 449,170	409,862	616,477	10%	(34)%
High-tech	220,494	209,852	229,923	5	(9)
Retail and CPG	177,797	167,097	167,874	6	—
Industrial and other	157,501	168,598	193,249	(7)	(13)
Total operating revenue ⁽¹⁾	1,004,962	955,409	1,207,523	5	(21)
Subcontracted transportation	247,289	184,502	222,109	34	(17)
Total revenue	\$1,252,251	1,139,911	1,429,632	10%	(20)%
Segment NBT	\$47,111	35,700	56,953	32%	(37)%
Segment NBT as a % of total revenue	3.8%	3.1%	4.0%	70 bps	(90) bps
Segment NBT as a % of operating revenue ⁽¹⁾	4.7%	3.7%	4.7%	100 bps	(100) bps
Memo: Fuel costs ⁽²⁾	\$ 78,806	64,915	136,400	21%	(52)%

(1) We use operating revenue, a non-GAAP financial measure, to evaluate the operating performance of our SCS business segment and as a measure of sales activity. Subcontracted transportation is excluded from our operating revenue computation as subcontracted transportation is largely a pass-through to customers. We realize minimal changes in profitability as a result of fluctuations in subcontracted transportation.

(2) Fuel costs are largely a pass-through to customers and therefore have a direct impact on revenue.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

Total revenue increased 10% in 2010 to \$1.25 billion due to higher subcontracted transportation, higher operating revenue and favorable foreign exchange rate movements. Operating revenue increased 5% to \$1.00 billion primarily due to higher freight volumes particularly in the automotive industry and favorable foreign exchange rate movements partially offset by prior year contract rationalizations. For 2010, SCS total revenue and operating revenue included a favorable foreign currency exchange impact of 2.3% and 2.1%, respectively. We expect favorable operating revenue comparisons next year due to the impact of the TLC acquisition, higher overall freight volumes and new business.

SCS NBT increased 32% in 2010 to \$47 million primarily due to improved operating performance, particularly in high tech accounts and higher automotive production volumes partially offset by higher compensation costs.

2009 versus 2008

Total revenue decreased 20% in 2009 to \$1.14 billion and operating revenue decreased 21% in 2009 to \$955 million. Total revenue and operating revenue decreased as a result of lower automotive production, overall freight volumes and fuel cost pass-throughs. For 2009, SCS total revenue and operating revenue included an unfavorable foreign currency exchange impact of 2.4% and 2.0%, respectively.

SCS NBT decreased 37% in 2009 to \$36 million primarily due to significantly reduced North American automotive volumes which decreased NBT by \$19 million, including costs incurred upon the termination of certain automotive operations. During the second quarter of 2009, several of our automotive customers filed for bankruptcy. We did not realize any losses on our pre-petition accounts receivable with any of these customers.

Dedicated Contract Carriage

	Years ended December 31			Change

Memo: Fuel costs ⁽²⁾	\$ 83,928	69,858	123,003	20%	(43)%

(1) We use operating revenue, a non-GAAP financial measure, to evaluate the operating performance of our DCC business segment and as a measure of sales activity. Subcontracted transportation is excluded from our operating revenue computation as subcontracted transportation is largely a pass-through to customers. We realize minimal changes in profitability as a result of fluctuations in subcontracted transportation.

(2) Fuel costs are largely a pass-through to customers and therefore have a direct impact on revenue.

2010 versus 2009

Total revenue increased 2% in 2010 to \$483 million and operating revenue increased 3% in 2010 to \$469 million due to higher fuel cost pass-throughs. We expect favorable operating revenue comparisons next

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

year because of the announced Scully acquisition which closed on January 28, 2011. See Note 3, "Acquisitions," in the Notes to Consolidated Financial Statements for additional information.

DCC NBT decreased 18% in 2010 to \$31 million primarily due to investments associated with new technology initiatives, higher compensation costs, increased self-insurance costs from unfavorable development related to prior year claims, and lower operating performance caused by increased driver costs.

2009 versus 2008

Total revenue declined 14% in 2009 to \$471 million and operating revenue declined 15% in 2009 to \$457 million as a result of lower fuel cost pass-throughs, lower freight volumes and non-renewal of customer contracts.

DCC NBT decreased 24% in 2009 to \$38 million as a result of lower revenue, and to a lesser extent, increased self-insurance costs. The increase in self-insurance costs reflected less favorable development in estimated prior years' self-insured loss reserves.

Central Support Services

-----------------	------------------	---------------	---------------	------------	-------------

2010 versus 2009

Total CSS costs increased 10% in 2010 to \$184 million primarily due to increased compensation costs, information technology investments and professional service fees related to strategic initiatives. Unallocated CSS costs increased due to higher compensation costs.

2009 versus 2008

Total CSS costs decreased 9% in 2009 to \$168 million reflecting lower spending across all functional areas as a result of cost reduction actions implemented in early 2009 and lower incentive-based compensation. These items were partially offset by higher professional service fees on cost savings initiatives. Unallocated CSS costs decreased 6% in 2009 to \$36 million primarily due to lower incentive-based compensation offset slightly by higher spending on cost savings initiatives.

FOURTH QUARTER CONSOLIDATED RESULTS

	Three months ended December 31,		Change 2010/2009
	2010	2009	
	(Dollars and shares in thousands, except per share amounts)		
Total revenue	<u>\$1,313,426</u>	<u>1,246,968</u>	5%
Operating revenue	<u>\$1,061,939</u>	<u>1,019,822</u>	4%
Earnings from continuing operations before income taxes	<u>\$ 49,608</u>	<u>31,800</u>	56%
Provision for income taxes	<u>8,146</u>	<u>8,130</u>	—
Earnings from continuing operations	<u>41,462</u>	<u>23,670</u>	75
Loss from discontinued operations, net of tax	<u>(4,341)</u>	<u>(15,422)</u>	(72)
Net earnings	<u>\$ 37,121</u>	<u>8,248</u>	350%
Earnings (loss) per common share — Diluted			
Continuing operations	<u>\$ 0.80</u>	<u>0.43</u>	86%
Discontinued operations	<u>(0.08)</u>	<u>(0.28)</u>	(71)
Net earnings	<u>\$ 0.72</u>	<u>0.15</u>	380%
Weighted-average shares outstanding — Diluted	<u>51,040</u>	<u>54,235</u>	(6)%

Total revenue increased 5% in the fourth quarter of 2010 to \$1.31 billion primarily due to higher operating revenue in all our business segments and higher fuel services revenue. Operating revenue increased 4% in the fourth quarter of 2010 to \$1.06 billion primarily due to higher commercial rental revenue, and to a lesser extent, improved SCS high-tech and automotive volumes. The increase in revenue was partially offset by lower full service lease revenue. Total revenue and operating revenue in the fourth quarter of 2010 included a favorable foreign exchange impact of 0.4% and 0.3%, respectively.

Earnings from continuing operations before income taxes (NBT) increased 56% in the fourth quarter of 2010 to \$50 million which reflects significantly higher earnings in our FMS business segment driven by better commercial rental performance and improved used vehicle results. The higher earnings were partially offset by lower full service lease performance resulting from higher maintenance costs due to fleet aging and the cumulative impact of customer fleet reductions. Fourth quarter 2010 results also included a \$1.5 million pension settlement charge, allocated between the FMS and SCS business segments.

Earnings from continuing operations in the fourth quarter of 2010 included a net benefit of \$8 million or \$0.15 per diluted common share related to certain tax benefits, partially offset by restructuring and other items. The tax benefits related to a favorable settlement of prior tax year's audits and the expiration of a statute of limitation. Restructuring and other items related to costs incurred on the TLC acquisition and were partially offset by a gain on sale of an international supply chain facility. Earnings from continuing operations in the fourth quarter of 2009 included a net benefit of \$1 million or \$0.02 per diluted common share related primarily to changes in Canadian income tax laws partially offset by an impairment charge related to the facility sold in 2010.

Earnings per share growth in the fourth quarter of 2010 exceeded the net earnings growth reflecting the impact of share repurchase programs.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

In 2009, we discontinued SCS operations in South America and Europe. Accordingly, results of these operations are reported as discontinued operations for all periods presented. Pre-tax losses from discontinued operations totaled \$5 million (\$4 million after-tax or \$0.08 per diluted share) for the three months ended December 31, 2010, compared with a loss of \$15 million (\$15 million after-tax or \$0.28 per diluted share) in the year-earlier period. Results of discontinued operations for 2010 included a loss on a lease facility, which we no longer operate, and losses related to adverse legal developments. Results of discontinued operations for the fourth quarter of 2009 included accumulated foreign currency translation losses associated with the substantial liquidation of investments in

certain discontinued operations.

Earnings from continuing operations before income taxes	<u>\$ 49,608</u>	<u>31,800</u>	56%

Fleet Management Solutions

Total revenue increased 5% to \$948 million in the fourth quarter of 2010 reflecting higher operating revenue and fuel services revenue. Operating revenue increased 4% to \$726 million in the fourth quarter of 2010 because of higher commercial rental revenue reflecting strong global market demand and higher pricing. The increase in operating revenue was partially offset by lower contractual revenue reflecting the cumulative impact of customer fleet downsizings.

FMS NBT increased 55% to \$49 million in the fourth quarter of 2010 reflecting significantly better commercial rental performance, improved used vehicle sales results and lower retirement plans expense. These

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

items were partially offset by lower full service lease results, higher compensation costs and investments in sales and information technology investments.

Supply Chain Solutions

Total revenue increased 8% to \$325 million in the fourth quarter of 2010 and operating revenue increased 4% to \$258 million in the fourth quarter of 2010. Both total revenue and operating revenue increased primarily due to improved high-tech and automotive volumes and new business.

SCS NBT increased 5% to \$12 million in the fourth quarter of 2010 because of better operating performance particularly in high-tech accounts partially offset by higher compensation costs and a pension settlement charge of \$1 million.

Dedicated Contract Carriage

Total revenue increased 2% to \$122 million in the fourth quarter of 2010 and operating revenue increased 5% to \$119 million in the fourth quarter of 2010. Both total revenue and operating revenue increased due to the pass-through of higher fuel costs and net new business.

DCC NBT decreased 6% to \$7 million in the fourth quarter of 2010 because of lower operating performance reflecting increased driver costs.

Central Support Services

Unallocated CSS costs decreased 4% to \$11 million in the fourth quarter of 2010 because of lower professional fees partially offset by higher compensation costs.

FINANCIAL RESOURCES AND LIQUIDITY

Cash Flows

The following is a summary of our cash flows from operating, financing and investing activities from continuing operations:

	Years ended December 31		
	2010	2009	2008
	(In thousands)		
Net cash provided by (used in):			
Operating activities	\$1,028,034	984,956	1,248,169
Financing activities	78,166	(542,016)	(148,152)
Investing activities	(982,464)	(448,610)	(1,103,468)

Effect of exchange rate changes on cash	1,723	1,794	1,408
Net change in cash and cash equivalents	<u>\$ 125,459</u>	<u>(3,876)</u>	<u>(2,043)</u>

Cash provided by operating activities from continuing operations increased to \$1.03 billion in 2010 compared with \$985 million in 2009 because of reduced working capital needs primarily from lower pension contributions and compensation-related payments, partially offset by lower cash based earnings. Cash provided by financing activities increased to \$78 million in 2010 from cash used in financing activities of \$542 million in 2009 reflecting higher borrowing needs to fund capital spending, including acquisitions. Cash used in investing activities increased to \$982 million in 2010 compared with \$449 million in 2009 primarily due to higher vehicle capital spending and acquisition-related payments in 2010.

Cash provided by operating activities from continuing operations decreased to \$985 million in 2009 compared with \$1.25 billion in 2008 because of lower cash-based earnings and higher pension contributions. Cash used in financing activities increased to \$542 million in 2009 compared with \$148 million in 2008

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)**

reflecting higher net debt repayments resulting from less borrowing needs to fund capital spending, including acquisitions. Cash used in investing activities decreased to \$449 million in 2009 compared with \$1.10 billion in 2008 primarily due to lower vehicle capital spending and acquisition-related payments in 2009.

Our principal sources of operating liquidity are cash from operations and proceeds from the sale of revenue earning equipment. We refer to the sum of operating cash flows, proceeds from the sales of revenue earning equipment and operating property and equipment, collections on direct finance leases, sale and leaseback of revenue earning equipment and other cash inflows as "total cash generated." We refer to the net amount of cash generated from operating and investing activities (excluding changes in restricted cash and acquisitions) as "free cash flow." Although total cash generated and free cash flow are non-GAAP financial measures, we consider them to be important measures of comparative operating performance. We also believe total cash generated to be an important measure of total cash inflows generated from our ongoing business activities. We believe free cash flow provides investors with an important perspective on the cash available for debt service, acquisitions and for shareholders after making capital investments required to support ongoing business operations. Our calculation of free cash flow may be different from the calculation used by other companies and therefore comparability may be limited.

The following table shows the sources of our free cash flow computation:

	Years ended December 31		
	2010	2009	2008
		(In thousands)	
Net cash provided by operating activities	\$ 1,028,034	984,956	1,248,169
Sales of revenue earning equipment	220,843	211,002	257,679
Sales of operating property and equipment	13,844	4,634	3,727
Collections on direct finance leases	61,767	65,242	61,096
Other, net	3,178	209	395
Total cash generated	1,327,666	1,266,043	1,571,066
Purchases of property and revenue earning equipment	(1,070,092)	(651,953)	(1,230,401)
Free cash flow	\$ 257,574	614,090	340,665

Free cash flow decreased to \$258 million in 2010 compared with \$614 million in 2009 primarily due to higher vehicle capital spending and lower cash-based earnings partially offset by lower pension contributions. Free cash flow increased to \$614 million in 2009 compared with \$341 million in 2008 as lower net capital expenditures were partially offset by lower cash-based earnings and higher pension contributions. We expect negative free cash flow in 2011 to be approximately \$265 million reflecting higher capital expenditures.

Capital expenditures are generally used to purchase revenue earning equipment (trucks, tractors and trailers) within our FMS segment. These expenditures primarily support the full service lease product line and also the commercial rental product line. The level of capital required to support the full service lease product line varies directly with the customer contract signings for replacement vehicles and growth. These contracts are long-term agreements that result in predictable cash flows typically over a three to seven year term for trucks and tractors and ten years for trailers. The commercial rental product line utilizes capital for the purchase of vehicles to replenish and expand the fleet available for shorter-term use by contractual or occasional customers. Operating property and equipment expenditures primarily relate to FMS and SCS spending on items such as vehicle maintenance facilities and equipment, computer and telecommunications equipment, investments in technologies and warehouse facilities and equipment.

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)**

The following is a summary of capital expenditures:

	Years ended December 31		
	2010	2009	2008
		(In thousands)	
Revenue earning equipment:			
Full service lease	\$ 646,671	547,750	985,924
Commercial rental	378,678	7,436	171,128
	1,025,349	555,186	1,157,052

Operating property and equipment	62,302	56,216	108,284
Total capital expenditures(1)	1,087,651	611,402	1,265,336
Changes in accounts payable related to purchases of revenue earning equipment	(17,559)	40,551	(34,935)
Cash paid for purchases of property and revenue earning equipment	\$1,070,092	651,953	1,230,401

(1) Capital expenditures exclude non-cash additions of approximately \$2 million and \$1 million in 2009 and 2008, respectively, in assets held under capital leases resulting from the extension of existing operating leases and other additions.

Capital expenditures (accrual basis) increased 78% to \$1.09 billion in 2010 primarily as a result of a planned increase in commercial rental spending to refresh and grow the fleet. Capital expenditures decreased 52% to \$611 million in 2009 as a result of reduced full service lease vehicle spending due to lower new and replacement sales in the current global economic environment, as well as increased use of lease term extensions and used vehicle redeployments. Additionally, the decrease reflects planned minimal spending on transactional commercial rental vehicles. We expect capital expenditures to increase to \$1.75 billion, as we make investments in both the lease and rental fleet. We expect to fund 2011 capital expenditures with both internally generated funds and additional financing.

Working Capital

	December 31	
	2010	2009
	(Dollars in thousands)	
Current assets	\$1,023,301	\$880,373
Current liabilities	1,131,519	850,274
Working capital	\$ (108,218)	\$ 30,099

Our net working capital (current assets less current liabilities) was \$(108) million at December 31, 2010 compared with \$30 million at December 31, 2009. The decrease in net working capital was primarily due to an increase of \$188 million in the current portion of long-term debt. Excluding the increase in short-term debt, other working capital components increased \$49 million resulting from higher cash flows partially offset by higher accrued compensation.

Financing and Other Funding Transactions

We utilize external capital primarily to support working capital needs and growth in our asset-based product lines. The variety of financing alternatives typically available to fund our capital needs include commercial paper, long-term and medium-term public and private debt, asset-backed securities, bank term loans, leasing arrangements and bank credit facilities. Our principal sources of financing are issuances of commercial paper and medium-term notes.

Our ability to access unsecured debt in the capital markets is linked to both our short-term and long-term debt ratings. These ratings are intended to provide guidance to fixed income investors in determining the

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

credit risk associated with particular Ryder securities based on current information obtained by the rating agencies from us or from other sources. Lower ratings generally result in higher borrowing costs as well as reduced access to unsecured capital markets. A downgrade of our short-term debt ratings to a lower tier would impair our ability to issue commercial paper. As a result, we would have to rely on alternative funding sources. A downgrade of our debt ratings would not affect our ability to borrow amounts under our revolving credit facility described below, given ongoing compliance with the terms and conditions of the credit facility.

Our debt ratings at December 31, 2010 were as follows:

	Short-term	Long-term	Outlook
Moody's Investors Service	P2	Baa1	Stable (affirmed February 2011)
Standard & Poor's Ratings Services	A2	BBB+	Stable (raised August 2010)
Fitch Ratings	F2	A-	Stable (affirmed March 2010)

We believe that our operating cash flows, together with our access to commercial paper markets and other available debt financing, will be adequate to meet our operating, investing and financing needs in the foreseeable future. However, there can be no assurance that unanticipated volatility and disruption in commercial paper markets would not impair our ability to access these markets on terms commercially acceptable to us or at all. If we cease to have access to commercial paper and other sources of unsecured borrowings, we would meet our liquidity needs by drawing upon contractually committed lending agreements as described below and/or by seeking other funding sources.

We can borrow up to \$875 million under a global revolving credit facility with a syndicate of thirteen lending institutions led by Bank of America N.A., Bank of Tokyo-Mitsubishi UFJ, Ltd., Mizuho Corporate Bank, Ltd., Royal Bank of Scotland Plc and Wells Fargo N.A. The global credit facility matures in April 2012 and is used primarily to finance working capital and provide support for the issuance of unsecured commercial paper in the U.S. and Canada. This facility can also be used to issue up to \$75 million in letters of credit (there were no letters of credit outstanding against the facility at December 31, 2010). At our option, the interest rate on borrowings under the credit facility is based on LIBOR, prime, federal funds or local equivalent rates. The agreement provides for annual facility fees, which range from 22.5 basis points to 62.5 basis points, and are based on Ryder's long-term credit ratings. The credit facility's current annual facility fee is 37.5 basis points, which applies to the total facility size of \$875 million. The credit facility contains no provisions limiting its availability in the event of a material adverse change to Ryder's business operations; however, the credit facility does contain standard representations and warranties, events of default, cross-default provisions, and certain affirmative and negative covenants. In order to maintain availability of funding, we must maintain a ratio of debt to consolidated tangible net worth, of less than or equal to 300%. Tangible net worth, as defined in the credit facility, includes 50% of our deferred federal income tax liability and excludes the book value of our intangible assets. The ratio at December 31, 2010 was 189%. At December 31, 2010, \$506 million was available under the credit facility, net of the support for commercial paper borrowings.

Our global revolving credit facility permits us to refinance short-term commercial paper obligations on a long-term basis.

Settlement of short-term commercial paper obligations not expected to require the use of working capital are classified as long-term as we have both the intent and ability to refinance on a long-term basis.

We have a trade receivables purchase and sale program, pursuant to which we sell certain of our domestic trade accounts receivable to a bankruptcy remote, consolidated subsidiary of Ryder, that in turn sells, on a revolving basis, an ownership interest in certain of these accounts receivable to a receivables conduit or committed purchasers. We use this program to provide additional liquidity to fund our operations, particularly when it is cost effective to do so. The costs under the program may vary based on changes in interest rates. The available proceeds amounts that may be received under the program are limited to \$175 million. In

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)**

October 2010, we renewed the trade receivables purchase and sales program. If no event occurs which causes early termination, the 364-day program will expire on October 28, 2011. The program contains provisions restricting its availability in the event of a material adverse change to our business operations or the collectibility of the collateralized receivables. At December 31, 2010 and December 31, 2009, no amounts were outstanding under the program.

Historically, we have established asset-backed securitization programs whereby we have sold beneficial interests in certain long-term vehicle leases and related vehicle residuals to a bankruptcy-remote special purpose entity that in turn transfers the beneficial interest to a special purpose securitization trust in exchange for cash. The securitization trust funds the cash requirement with the issuance of asset-backed securities, secured or otherwise collateralized by the beneficial interest in the long-term vehicle leases and the residual value of the vehicles. The securitization provides us with further liquidity and access to additional capital markets based on market conditions. On June 18, 2008, Ryder Funding II LP, a special purpose bankruptcy-remote subsidiary wholly-owned by Ryder, filed a registration statement on Form S-3 with the Securities and Exchange Commission (SEC) for the registration of \$600 million in asset-backed notes. The registration statement became effective on November 6, 2008 and remains effective until November 6, 2011.

On February 25, 2010, Ryder filed an automatic shelf registration statement on Form S-3 with the SEC. The registration is for an indeterminate number of securities and is effective for three years. Under this universal shelf registration statement, we have the capacity to offer and sell from time to time various types of securities, including common stock, preferred stock and debt securities, subject to market demand and ratings status.

In September 2010, we issued \$300 million of unsecured medium-term notes maturing in March 2016. If the notes are downgraded following, and as a result of, a change of control, the note holder can require us to repurchase all or a portion of the notes at a purchase price equal to 101% of the principal amount plus accrued and unpaid interest. The medium-term notes were issued to take advantage of historically low interest rates and fund capital expenditures and debt maturities.

At December 31, 2010, we had the following amounts available to fund operations under the aforementioned facilities:

	(In millions)
Global revolving credit facility	\$ 506
Trade receivables program	175

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)**

The following table shows the movements in our debt balance:

	Years ended December 31	
	2010	2009
	(In thousands)	
Debt balance at January 1	\$2,497,691	2,862,799
Cash-related changes in debt:		
Net change in commercial paper borrowings	174,939	148,256
Proceeds from issuance of medium-term notes	300,000	—
Proceeds from issuance of other debt instruments	14,169	2,014
Retirement of medium-term notes and debentures	(175,000)	(276,000)
Other debt repaid, including capital lease obligations	(73,668)	(243,710)
Net change from discontinued operations	(2,955)	(9,427)
	237,485	(378,867)
Non-cash changes in debt:		
Fair market value adjustment on notes subject to hedging	3,328	(6,290)
Addition of capital lease obligations, including acquisitions	2,164	1,949
Changes in foreign currency exchange rates and other non-cash items	6,334	18,100
Total changes in debt	249,311	(365,108)
Debt balance at December 31	\$2,747,002	2,497,691

In accordance with our funding philosophy, we attempt to match the aggregate average remaining re-pricing life of our debt with the aggregate average remaining re-pricing life of our assets. We utilize both fixed-rate and variable-rate debt to achieve this match and generally target a mix of 25% — 45% variable-rate debt as a percentage of total debt outstanding. The variable-rate portion of our total obligations (including notional value of swap agreements) was 28% and 26% at December 31, 2010 and 2009, respectively.

Ryder's leverage ratios and a reconciliation of on-balance sheet debt to total obligations were as follows:

December 31,	%	December 31,	%
---------------------	---	--------------	---

	2010	of Equity	2009	of Equity
		(Dollars in thousands)		
On-balance sheet debt	\$ 2,747,002	196%	\$ 2,497,691	175%
Off-balance sheet debt — PV of minimum lease payments and guaranteed residual values under operating leases for vehicles ⁽¹⁾	99,797		118,828	
Total obligations	\$ 2,846,799	203%	\$ 2,616,519	183%

(1) Present value (PV) does not reflect payments we would be required to make if we terminated the related leases prior to the scheduled expiration dates.

On-balance sheet debt to equity consists of balance sheet debt divided by total equity. Total obligations to equity represents balance sheet debt plus the present value of minimum lease payments and guaranteed residual values under operating leases for vehicles, discounted based on our incremental borrowing rate at lease inception, all divided by total equity. Although total obligations is a non-GAAP financial measure, we believe that total obligations is useful as it provides a more complete analysis of our existing financial obligations and helps better assess our overall leverage position. The increase in our leverage ratios in 2010 was driven by increased funding needs to support acquisitions and stock repurchases.

46

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

Off-Balance Sheet Arrangements

Sale and leaseback transactions. We periodically enter into sale and leaseback transactions in order to lower the total cost of funding our operations, to diversify our funding among different classes of investors (e.g., regional banks, pension plans, insurance companies, etc.) and to diversify our funding among different types of funding instruments. These sale-leaseback transactions are often executed with third-party financial institutions. In general, these sale-leaseback transactions result in a reduction in revenue earning equipment and debt on the balance sheet, as proceeds from the sale of revenue earning equipment are primarily used to repay debt. Accordingly, sale-leaseback transactions will result in reduced depreciation and interest expense and increased equipment rental expense.

Our sale-leaseback transactions contain limited guarantees by us of the residual values of the leased vehicles (residual value guarantees) that are conditioned upon disposal of the leased vehicles prior to the end of their lease term. The amount of future payments for residual value guarantees will depend on the market for used vehicles and the condition of the vehicles at time of disposal. See Note 19, "Guarantees," in the Notes to Consolidated Financial Statements for additional information. We did not enter into any sale-leaseback transactions during the years ended December 31, 2010 and 2009.

Guarantees. We executed various agreements with third parties that contain standard indemnifications that may require us to indemnify a third party against losses arising from a variety of matters such as lease obligations, financing agreements, environmental matters, and agreements to sell business assets. In each of these instances, payment by us is contingent on the other party bringing about a claim under the procedures outlined in the specific agreement. Normally, these procedures allow us to dispute the other party's claim. Additionally, our obligations under these agreements may be limited in terms of the amount and/or timing of any claim. We have entered into individual indemnification agreements with each of our independent directors, through which we will indemnify such director acting in good faith against any and all losses, expenses and liabilities arising out of such director's service as a director of Ryder. The maximum amount of potential future payments under these agreements is generally unlimited.

We cannot predict the maximum potential amount of future payments under certain of these agreements, including the indemnification agreements, due to the contingent nature of the potential obligations and the distinctive provisions that are involved in each individual agreement. Historically, no such payments made by Ryder have had a material effect on our consolidated financial statements. We believe that if a loss were incurred in any of these matters, the loss would not result in a material impact on our consolidated results of operations or financial position. The total amount of maximum exposure determinable under these types of provisions at December 31, 2010 and 2009, was \$9 million and \$11 million, respectively, and we accrued \$8 million in 2010 and \$9 million in 2009 as a corresponding liability. See Note 19, "Guarantees," in the Notes to Consolidated Financial Statements for further discussion.

47

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

Contractual Obligations and Commitments

As part of our ongoing operations, we enter into arrangements that obligate us to make future payments under contracts such as debt agreements, lease agreements and unconditional purchase obligations. The following table summarizes our expected future contractual cash obligations and commitments at December 31, 2010:

	2011	2012- 2013	2014- 2015 (In thousands)	Thereafter	Total
Debt	\$ 417,932	980,814	558,273	763,185	2,720,204
Capital lease obligations	2,153	4,240	3,952	1,024	11,369
Total debt, including capital leases⁽¹⁾	420,085	985,054	562,225	764,209	2,731,573
Interest on debt ⁽²⁾	116,741	180,245	119,156	124,968	541,110
Operating leases ⁽³⁾	100,156	116,839	62,839	27,230	307,064
Purchase obligations ⁽⁴⁾	309,927	18,447	11,545	7,746	347,665
Total contractual cash obligations	526,824	315,531	193,540	159,944	1,195,839
Insurance obligations (primarily self-insurance)	110,697	87,669	33,756	27,214	259,336
Other long-term liabilities ^{(5),(6),(7)}	6,103	5,529	2,200	46,535	60,367

- (1) Net of unamortized discount.
- (2) Total debt matures at various dates through fiscal year 2025 and bears interest principally at fixed rates. Interest on variable-rate debt is calculated based on the applicable rate at December 31, 2010. Amounts are based on existing debt obligations, including capital leases, and do not consider potential refinancing of expiring debt obligations.
- (3) Represents future lease payments associated with vehicles, equipment and properties under operating leases. Amounts are based upon the general assumption that the leased asset will remain on lease for the length of time specified by the respective lease agreements. No effect has been given to renewals, cancellations, contingent rentals or future rate changes.
- (4) The majority of our purchase obligations are pay-as-you-go transactions made in the ordinary course of business. Purchase obligations include agreements to purchase goods or services that are legally binding and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed minimum or variable price provisions; and the approximate timing of the transaction. The most significant item included in the above table are purchase obligations related to vehicles. Purchase orders made in the ordinary course of business that are cancelable are excluded from the above table. Any amounts for which we are liable under purchase orders for goods received are reflected in our Consolidated Balance Sheets as "Accounts payable" and "Accrued expenses and other current liabilities" and are excluded from the above table.
- (5) Represents other long-term liability amounts reflected in our Consolidated Balance Sheets that have known payment streams. The most significant items included were asset retirement obligations and deferred compensation obligations.
- (6) The amounts exclude our estimated pension contributions. For 2011, our pension contributions, including our minimum funding requirements as set forth by ERISA and international regulatory bodies, are expected to be \$15 million. Our minimum funding requirements after 2011 are dependent on several factors. However, we estimate that the undiscounted required global contributions over the next five years are approximately \$396 million (pre-tax) (assuming expected long-term rate of return realized and other assumptions remain unchanged). We also have payments due under our other postretirement benefit (OPEB) plans. These plans are not required to be funded in advance, but are pay-as-you-go. See Note 24, "Employee Benefit Plans," in the Notes to Consolidated Financial Statements for additional information.
- (7) The amounts exclude \$67 million of liabilities associated with uncertain tax positions as we are unable to reasonably estimate the ultimate amount or timing of settlement. See Note 14, "Income Taxes," in the Notes to Consolidated Financial Statements for additional information.

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)**

Pension Information

Over the past few years we have made the following amendments to our defined benefit retirement plans:

- In July 2009, our Board of Directors approved an amendment to freeze our United Kingdom (UK) retirement plan for all participants effective March 31, 2010.
- In July 2008, our Board of Directors approved an amendment to freeze the defined benefit portion of our Canadian retirement plan effective January 1, 2010 for current participants who do not meet certain grandfathering criteria.
- In January 2007, our Board of Directors approved the amendment to freeze the U.S. pension plans effective December 31, 2007 for current participants who did not meet certain grandfathering criteria.

As a result of these amendments, non-grandfathered plan participants ceased accruing benefits under the plan as of the respective amendment effective date and began receiving an enhanced benefit under a defined contribution plan. All retirement benefits earned as of the amendment effective date were fully preserved and will be paid in accordance with the plan and legal requirements. The freeze of the Canadian defined benefit plan created a pre-tax curtailment gain in 2008 of \$4 million. There was no material impact to our financial condition and operating results from the other plan amendments in 2010 or 2009.

Due to the underfunded status of our defined benefit plans, we had an accumulated net pension equity charge (after-tax) of \$423 million and \$412 million at December 31, 2010 and 2009, respectively. The higher equity charge in 2010 reflects the impact of a lower discount rate partially offset by higher actual returns compared to the expected asset returns during 2010. The total asset return for our U.S. qualified pension plan (our primary plan) was 12% in 2010.

The funded status of our pension plans is dependent upon many factors, including returns on invested assets and the level of certain market interest rates. We review pension assumptions regularly and we may from time to time make voluntary contributions to our pension plans, which exceed the amounts required by statute. During 2010, total pension contributions, including our international plans, were \$64 million compared with \$131 million in 2009. We made voluntary pension contributions of \$50 million in 2010. We estimate 2011 required pension contributions will be \$15 million. After considering the 2010 contributions and asset performance, the projected estimated global pension contributions that would be required over the next 5 years totals approximately \$396 million (pre-tax). Changes in interest rates and the market value of the securities held by the plans could materially change, positively or negatively, the funded status of the plans and affect the level of pension expense and required contributions in future years. The ultimate amount of contributions is also dependent upon the requirements of applicable laws and regulations. See Note 24, "Employee Benefit Plans," in the Notes to Consolidated Financial Statements for additional information.

We participate in twelve U.S. multi-employer pension (MEP) plans that provide defined benefits to employees covered by collective bargaining agreements. At December 31, 2010, approximately 1,100 employees (approximately 4% of total employees) participated in these MEP plans. The annual net pension cost of the MEP plans is equal to the annual contribution determined in accordance with the provisions of negotiated labor contracts. Our current annualized MEP plan contributions total approximately \$5 million. Pursuant to current U.S. pension laws, if any MEP plans fail to meet certain minimum funding thresholds, we could be required to make additional MEP plan contributions, until the respective labor agreement expires, of up to 10% of current contractual requirements. Several factors could cause MEP plans not to meet these minimum funding thresholds, including unfavorable investment performance, changes in participant demographics, and increased benefits to participants. The plan administrators and trustees of the MEP plans provide us with the annual funding notice as required by law. This notice sets forth the funded status of the plan as of the beginning of the prior year but does not provide any company-specific information.

Employers participating in MEP plans can elect to withdraw from the plans, contingent upon labor union consent, and be subject to a withdrawal obligation based on, among other factors, the MEP plan's unfunded vested benefits. U.S. pension regulations provide that an employer can fund its withdrawal obligation in a lump sum or over a time period of up to 20 years based on previous contribution rates. Based on the most recently available plan information, collectively as of January 2009, we estimate our pre-tax contingent MEP plan withdrawal obligation to be approximately \$29 million. We have no current intention of taking any action that would subject us to the payment of material withdrawal obligations; however, under applicable law, in very limited circumstances, the plan trustee can impose these obligations on us.

Share Repurchase Programs and Cash Dividends

Refer to Note 20, "Share Repurchase Programs," in the Notes to Consolidated Financial Statements for further discussion on our share repurchase programs.

Cash dividend payments to shareholders of common stock were \$54 million in 2010, \$53 million in 2009, and \$52 million in 2008. During 2010, we increased our annual dividend to \$1.08 per share of common stock.

Market Risk

In the normal course of business, we are exposed to fluctuations in interest rates, foreign currency exchange rates and fuel prices. We manage these exposures in several ways, including, in certain circumstances, the use of a variety of derivative financial instruments when deemed prudent. We do not enter into leveraged derivative financial transactions or use derivative financial instruments for trading purposes.

Exposure to market risk for changes in interest rates exists for our debt obligations. Our interest rate risk management program objectives are to limit the impact of interest rate changes on earnings and cash flows and to lower overall borrowing costs. We manage our exposure to interest rate risk primarily through the proportion of fixed-rate and variable-rate debt we hold in the total debt portfolio. From time to time, we also use interest rate swap and cap agreements to manage our fixed-rate and variable-rate exposure and to better match the repricing of debt instruments to that of our portfolio of assets. See Note 18, "Derivatives," in the Notes to Consolidated Financial Statements for further discussion on interest rate swap agreements.

At December 31, 2010, we had \$1.99 billion of fixed-rate debt outstanding (excluding capital leases) with a weighted-average interest rate of 5.6% and a fair value of \$2.12 billion. A hypothetical 10% decrease or increase in the December 31, 2010 market interest rates would impact the fair value of our fixed-rate debt by approximately \$32 million at December 31, 2010. Changes in the relative sensitivity of the fair value of our financial instrument portfolio for these theoretical changes in the level of interest rates are primarily driven by changes in our debt maturities, interest rate profile and amount.

At December 31, 2010, we had \$742 million of variable-rate debt, including the impact of an interest rate swap, which effectively changed \$250 million of fixed-rate debt instruments with an interest rate of 6.0% to LIBOR-based floating-rate debt with an interest rate of 2.63%. Changes in the fair value of the interest rate swap were offset by changes in the fair value of the debt instruments and no net gain or loss was recognized in earnings. The fair value of our interest rate swap agreement at December 31, 2010 was recorded as an asset totaling \$15 million. The fair value of our variable-rate debt at December 31, 2010 was \$741 million. A hypothetical 10 basis point change in market interest rates would impact pre-tax earnings from continuing operations by approximately \$0.7 million.

We also are subject to interest rate risk with respect to our pension and postretirement benefit obligations, as changes in interest rates will effectively increase or decrease our liabilities associated with these benefit plans, which also results in changes to the amount of pension and postretirement benefit expense recognized each period.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

Exposure to market risk for changes in foreign currency exchange rates relates primarily to our foreign operations' buying, selling and financing in currencies other than local currencies and to the carrying value of net investments in foreign subsidiaries. The majority of our transactions are denominated in U.S. dollars. The principal foreign currency exchange rate risks to which we are exposed include the Canadian dollar, British pound sterling and Mexican peso. We manage our exposure to foreign currency exchange rate risk related to our foreign operations' buying, selling and financing in currencies other than local currencies by naturally offsetting assets and liabilities not denominated in local currencies to the extent possible. A hypothetical uniform 10% strengthening in the value of the dollar relative to all the currencies in which our transactions are denominated would result in a decrease to pre-tax earnings from continuing operations of approximately \$4 million. We also use foreign currency option contracts and forward agreements from time to time to hedge foreign currency transactional exposure. We generally do not hedge the translation exposure related to our net investment in foreign subsidiaries, since we generally have no near-term intent to repatriate funds from such subsidiaries.

Exposure to market risk for fluctuations in fuel prices relates to a small portion of our service contracts for which the cost of fuel is integral to service delivery and the service contract does not have a mechanism to adjust for increases in fuel prices. At December 31, 2010, we also had various fuel purchase arrangements in place to ensure delivery of fuel at market rates in the event of fuel shortages. We are exposed to fluctuations in fuel prices in these arrangements since none of the arrangements fix the price of fuel to be purchased. Increases and decreases in the price of fuel are generally passed on to our customers for which we realize minimal changes in profitability during periods of steady market fuel prices. However, profitability may be positively or negatively impacted by sudden increases or decreases in market fuel prices during a short period of time as customer pricing for fuel services is established based on market fuel costs. We believe the exposure to fuel price fluctuations would not materially impact our results of operations, cash flows or financial position.

ENVIRONMENTAL MATTERS

Refer to Note 25, "Environmental Matters," in the Notes to Consolidated Financial Statements for a discussion surrounding environmental matters.

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements in conformity with U.S. GAAP requires us to make estimates and assumptions. Our significant accounting policies are described in the Notes to Consolidated Financial Statements. Certain of these policies require the application of subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. These estimates and assumptions are based on historical experience, changes in the business environment and other factors that we believe to be reasonable under the circumstances. Different estimates that could have been applied in the current period or changes in the accounting estimates that are reasonably likely can result in a material impact on our financial condition and operating results in the current and future periods. We review the development, selection and disclosure of these critical accounting estimates with Ryder's Audit Committee on an annual basis.

The following discussion, which should be read in conjunction with the descriptions in the Notes to Consolidated Financial Statements, is furnished for additional insight into certain accounting estimates that we consider to be critical.

Depreciation and Residual Value Guarantees. We periodically review and adjust the residual values and useful lives of revenue earning equipment of our FMS business segment as described in Note 1, "Summary of Significant Accounting Policies — Revenue Earning Equipment, Operating Property and Equipment, and Depreciation" and "Summary of Significant Accounting Policies — Residual Value Guarantees and Deferred

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

Gains," in the Notes to Consolidated Financial Statements. Reductions in residual values (i.e., the price at which we ultimately expect to dispose of revenue earning equipment) or useful lives will result in an increase in depreciation expense over the life of the equipment. Based on the mix of revenue earning equipment at December 31, 2010, a 10% decrease in expected vehicle residual values would increase depreciation expense in 2011 by approximately \$100 million. We review residual values and useful lives of revenue earning equipment on an annual basis or more often if deemed necessary for specific groups of our revenue earning equipment. Reviews are performed based on vehicle class, generally subcategories of trucks, tractors and trailers by weight and usage. Our annual review is established with a long-term view considering historical market price changes, current and expected future market price trends, expected life of vehicles included in the fleet and extent of alternative uses for leased vehicles (e.g., rental fleet, and SCS and DCC applications). As a result, future depreciation expense rates are subject to change based upon changes in these factors. At the end of each year, we complete our annual review of the residual values and useful lives of revenue earning equipment. Based on the results of our analysis in 2010, we will adjust the residual values and useful lives of certain classes of our revenue earning equipment effective January 1, 2011. The change will increase earnings in 2011 by approximately \$5 million compared with 2010. Factors that could cause actual results to materially differ from the estimated results include significant changes in the used-equipment market brought on by unforeseen changes in technology innovations and any resulting changes in the useful lives of used equipment.

We also lease vehicles under operating lease agreements. Certain of these agreements contain limited guarantees for a portion of the residual values of the equipment. Results of the reviews described above for owned equipment are also applied to equipment under operating lease. The amount of residual value guarantees expected to be paid is recognized as rent expense over the expected remaining term of the lease. At December 31, 2010, total liabilities for residual value guarantees of \$4 million were included in "Accrued expenses and other current liabilities" (for those payable in less than one year) and in "Other non-current liabilities." Based on the existing mix of vehicles under operating lease agreements at December 31, 2010, a 10% decrease in expected vehicle residual values would increase rent expense in 2011 by approximately \$1 million.

Pension Plans. We apply actuarial methods to determine the annual net periodic pension expense and pension plan liabilities on an annual basis, or on an interim basis if there is an event requiring remeasurement. Each December, we review actual experience compared with the more significant assumptions used and make adjustments to our assumptions, if warranted. In determining our annual estimate of periodic pension cost, we are required to make an evaluation of critical factors such as discount rate, expected long-term rate of return, expected increase in compensation levels, retirement rate and mortality. Discount rates are based upon a duration analysis of expected benefit payments and the equivalent average yield for high quality corporate fixed income investments as of our December 31 annual measurement date. In order to provide a more accurate estimate of the discount rate relevant to our plan, we use models that match projected benefits payments of our primary U.S. plan to coupons and maturities from a hypothetical portfolio of high quality corporate bonds. Long-term rate of return assumptions are based on actuarial review of our asset allocation strategy and long-term expected asset returns. Investment management and other fees paid using plan assets are factored into the determination of asset return assumptions. In 2010, we adjusted our long-term expected rate of return assumption for our primary U.S. plan down to 7.65% from 7.9% based on the factors reviewed. The composition of our pension assets was 67% equity securities and 33% debt securities and other investments. As part of our strategy to manage future pension costs and net funded status volatility, we regularly assess our pension investment strategy. We evaluate our mix of investments between equity and fixed income securities and may adjust the composition of our pension assets when appropriate. For 2011, we changed our target asset allocation to 60% equity securities, 30% fixed income, and 10% all other types of investments. The rate of increase in compensation levels and retirement rates are based primarily on actual experience.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

Accounting guidance applicable to pension plans does not require immediate recognition of the effects of a deviation between these assumptions and actual experience or the revision of an estimate. This approach allows the favorable and unfavorable effects that fall within an acceptable range to be netted and recorded within "Accumulated other comprehensive loss." We had a pre-tax actuarial loss of \$658 million at the end of 2010 compared with a loss of \$638 million at the end of 2009. The increase in the net actuarial loss in 2010 resulted primarily from a lower discount rate partially offset by higher than expected pension asset returns. To the extent the amount of actuarial gains and losses exceed 10% of the larger of the benefit obligation or plan assets, such amount is amortized over the average remaining life expectancy of active participants or the remaining life expectancy of inactive participants if all or almost all of a plan's participants are inactive. The amount of the actuarial loss subject to amortization in 2011 and future years will be \$484 million. The effect on years beyond 2011 will depend substantially upon the actual experience of our plans.

Disclosure of the significant assumptions used in arriving at the 2010 net pension expense is presented in Note 24, "Employee Benefit Plans," in the Notes to Consolidated Financial Statements. A sensitivity analysis of 2010 net pension expense to changes in key underlying assumptions for our primary plan, the U.S. pension plan, is presented below.

	Assumed Rate	Change	Impact on 2010 Net Pension Expense	Effect on December 31, 2010 Projected Benefit Obligation
Expected long-term rate of return on assets	7.65%	+/- 0.25%	-/+ \$2.0 million	
Discount rate increase	6.20%	+ 0.25%	- \$3.0 million	- \$3 million
Discount rate decrease	6.20%	- 0.25%	+ \$3.0 million	+ \$3 million
Actual return on assets	7.65%	+/- 0.25%	-/+ \$0.3 million	

Self-Insurance Accruals. Self-insurance accruals were \$243 million as of December 31, 2010 and 2009. The majority of our self-insurance relates to vehicle liability and workers' compensation. We use a variety of statistical and actuarial methods that are widely used and accepted in the insurance industry to estimate amounts for claims that have been reported but not paid and claims incurred but not reported. In applying these methods and assessing their results, we consider such factors as frequency and severity of claims, claim development and payment patterns and changes in the nature of our business, among other factors. Such factors are analyzed for each of our business segments. Our estimates may be impacted by such factors as increases in the market price for medical services, unpredictability of the size of jury awards and limitations inherent in the estimation process. During 2010, 2009, and 2008, we recorded a (charge) benefit of \$(3) million, \$1 million, and \$23 million, respectively, from development in estimated prior years' self-insured loss reserves. Based on self-insurance accruals at December 31, 2010, a 5% adverse change in actuarial claim loss estimates would increase operating expense in 2011 by approximately \$11 million.

Goodwill Impairment. We assess goodwill for impairment, as described in Note 1, "Summary of Significant Accounting Policies — Goodwill and Other Intangible Assets," in the Notes to Consolidated Financial Statements, on an annual basis or more often if deemed necessary. At December 31, 2010, goodwill totaled \$356 million. To determine whether goodwill impairment indicators exist, we are required to assess the fair value of the reporting unit and compare it to the carrying value. A reporting unit is a component of an operating segment for which discrete financial information is available and management regularly reviews its operating performance.

Our valuation of fair value for each reporting unit is determined based on an average of discounted future cash flow models that use ten years of projected cash flows and various terminal values based on multiples, book value or growth assumptions. We considered the current trading multiples for comparable publicly-traded companies and the historical pricing multiples for comparable merger and acquisition transactions that have occurred in our industry. Rates used to discount cash flows are dependent upon interest rates and the cost of capital at a point in time. Our discount rates reflect a weighted average cost of capital based on our industry

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

and capital structure adjusted for equity risk premiums and size risk premiums based on market capitalization. Estimates of future cash flows are dependent on our knowledge and experience about past and current events and assumptions about conditions we expect to exist, including long-term growth rates, capital requirements and useful lives. Our estimates of cash flows are also based on historical and future operating performance, economic conditions and actions we expect to take. In addition to these factors, our SCS reporting units are dependent on several key customers or industry sectors. The loss of a key customer may have a significant impact to one of our SCS reporting units, causing us to assess whether or not the event resulted in a goodwill impairment loss. While we believe our estimates of future cash flows are reasonable, there can be no assurance that deterioration in economic conditions, customer relationships or adverse changes to expectations of future performance will not occur, resulting in a goodwill impairment loss. Our annual impairment test performed as of April 1, 2010 did not result in any impairment of goodwill. The excess of fair value over carrying value for each of our reporting units as of April 1, 2010, our annual testing date, ranged from approximately \$2 million to approximately \$597 million. The fair value of our reporting units with a material amount of goodwill significantly exceeded the carrying value. In order to evaluate the sensitivity of the fair value calculations on the goodwill impairment test, we applied a hypothetical 5% decrease to the fair values of each reporting unit. This hypothetical 5% decrease would result in excess fair value over carrying value ranging from approximately \$1 million to approximately \$395 million for each of our reporting units.

Revenue Recognition. We recognize revenue when persuasive evidence of an arrangement exists, the services have been rendered to customers or delivery has occurred, the pricing is fixed or determinable, and collectibility is reasonably assured. In the normal course of business, we may act as or use an agent in executing transactions with our customers. In these arrangements, we evaluate whether we should report revenue based on the gross amount billed to the customer or on the net amount received from the customer after payments to third parties.

Determining whether revenue should be reported as gross or net is based on an assessment of whether we are acting as the principal or the agent in the transaction and involves judgment based on the terms of the arrangement. To the extent we are acting as the principal in the transaction, revenue is reported on a gross basis. To the extent we are acting as an agent in the transaction, revenue is reported on a net basis. In the majority of our arrangements, we are acting as a principal and therefore report revenue on a gross basis. However, our SCS business segment engages in some transactions where we act as agents and thus record revenue on a net basis. The impact on net earnings is the same whether we record revenue on a gross or net basis.

In transportation management arrangements where we act as principal, revenue is reported on a gross basis for subcontracted transportation billed to our customers. From time to time, the terms and conditions of our transportation management arrangements may change, which could require a change in revenue recognition from a gross basis to a net basis or vice versa. Our non-GAAP measure of operating revenue would not be impacted from this change in revenue reporting.

Income Taxes. Our overall tax position is complex and requires careful analysis by management to estimate the expected realization of income tax assets and liabilities.

Tax regulations require items to be included in the tax return at different times than the items are reflected in the financial statements. As a result, the effective tax rate reflected in the financial statements is different than that reported in the tax return. Some of these differences are permanent, such as expenses that are not deductible on the tax return, and some are timing differences, such as depreciation expense. Timing differences create deferred tax assets and liabilities. Deferred tax assets generally represent items that can be used as a tax deduction or credit in the tax return in future years for which we have already recorded the

tax benefit in the financial statements. Deferred tax assets amounted to \$365 million and \$320 million at December 31, 2010 and 2009, respectively. We record a valuation allowance for deferred tax assets to reduce such assets to amounts expected to be realized. At December 31, 2010 and 2009, the deferred tax valuation

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)**

allowance, principally attributed to foreign tax loss carryforwards in the SCS business segment, was \$39 million and \$37 million, respectively. In determining the required level of valuation allowance, we consider whether it is more likely than not that all or some portion of deferred tax assets will not be realized. This assessment is based on management's expectations as to whether sufficient taxable income of an appropriate character will be realized within tax carryback and carryforward periods. Our assessment involves estimates and assumptions about matters that are inherently uncertain, and unanticipated events or circumstances could cause actual results to differ from these estimates. Should we change our estimate of the amount of deferred tax assets that we would be able to realize, an adjustment to the valuation allowance would result in an increase or decrease to the provision for income taxes in the period such a change in estimate was made.

We are subject to tax audits in numerous jurisdictions in the U.S. and around the world. Tax audits by their very nature are often complex and can require several years to complete. In the normal course of business, we are subject to challenges from the Internal Revenue Service (IRS) and other tax authorities regarding amounts of taxes due. These challenges may alter the timing or amount of taxable income or deductions, or the allocation of income among tax jurisdictions. As part of our calculation of the provision for income taxes on earnings, we determine whether the benefits of our tax positions are at least more likely than not of being sustained upon audit based on the technical merits of the tax position. For tax positions that are more likely than not of being sustained upon audit, we accrue the largest amount of the benefit that is more likely than not of being sustained in our consolidated financial statements. Such accruals require management to make estimates and judgments with respect to the ultimate outcome of a tax audit. Actual results could vary materially from these estimates. We adjust these reserves, including any impact on the related interest and penalties, in light of changing facts and circumstances, such as progress of a tax audit.

A number of years may elapse before a particular matter for which we have established a reserve is audited and finally resolved. The number of years with open tax audits varies depending on the tax jurisdiction. The tax benefit that has been previously reserved because of a failure to meet the "more likely than not" recognition threshold would be recognized in our income tax expense in the first interim period when the uncertainty is resolved under any one of the following conditions: (1) the tax position is "more likely than not" to be sustained, (2) the tax position, amount, and/or timing is ultimately settled through negotiation or litigation, or (3) the statute of limitations for the tax position has expired. Settlement of any particular issue would usually require the use of cash. See Note 14, "Income Taxes," in the Notes to Consolidated Financial Statements for further discussion of the status of tax audits and uncertain tax positions.

RECENT ACCOUNTING PRONOUNCEMENTS

See Note 1, "Summary of Significant Accounting Policies — Recent Accounting Pronouncements," in the Notes to Consolidated Financial Statements for a discussion of recent accounting pronouncements.

NON-GAAP FINANCIAL MEASURES

This Annual Report on Form 10-K includes information extracted from consolidated financial information but not required by generally accepted accounting principles (GAAP) to be presented in the financial statements. Certain of this information are considered "non-GAAP financial measures" as defined by SEC rules. Specifically, we refer to adjusted return on average capital, operating revenue, salaries and employee-related costs as a percentage of operating revenue, FMS operating revenue, FMS NBT as a % of operating revenue, SCS operating revenue, SCS NBT as a % of operating revenue, DCC operating revenue, DCC NBT as a % of operating revenue, total cash generated, free cash flow, total obligations, total obligations to equity, and comparable earnings from continuing operations and comparable earnings per diluted common share from continuing operations. We believe that the comparable earnings from continuing operations and comparable earnings per diluted common share from continuing operations measures provide useful information to investors because they exclude significant items that are unrelated to our ongoing business operations. As

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)**

required by SEC rules, we provide a reconciliation of each non-GAAP financial measure to the most comparable GAAP measure and an explanation why management believes that presentation of the non-GAAP financial measure provides useful information to investors. Non-GAAP financial measures should be considered in addition to, but not as a substitute for or superior to, other measures of financial performance prepared in accordance with GAAP.

The following table provides a numerical reconciliation of earnings from continuing operations before income taxes to comparable earnings from continuing operations before income taxes for the years ended December 31, 2008, 2007 and 2006 which was not provided within the MD&A discussion:

	Years ended December 31		
	2008	2007	2006
	(In thousands)		
Earnings from continuing operations before income taxes	\$409,288	402,204	390,275
Net restructuring charges	21,480	9,290	—
International impairment	1,617	—	—
Gain on sale of property	—	(10,110)	—

Pension accounting charge	—	—	5,872
Comparable earnings from continuing operations before income taxes	<u>\$432,385</u>	<u>401,384</u>	<u>396,147</u>

The following table provides a numerical reconciliation of net cash provided by operating activities to free cash flow for the years ended December 31, 2007 and 2006 which was not provided within the MD&A discussion:

	Years ended December 31	
	2007	2006
(In thousands)		
Net cash provided by operating activities	\$ 1,096,559	852,466
Sales of revenue earning equipment	354,736	326,134
Sales of operating property and equipment	18,725	6,256
Collections on direct finance leases	62,346	65,343
Sale and leaseback of revenue earning equipment	150,348	—
Other, net	1,588	2,196
Total cash generated	<u>1,684,302</u>	<u>1,252,395</u>
Purchases of property and revenue earning equipment	<u>(1,304,033)</u>	<u>(1,691,007)</u>
Free cash flow	<u>\$ 380,269</u>	<u>(438,612)</u>

56

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

The following table provides a numerical reconciliation of earnings from continuing operations and earnings per diluted common share from continuing operations to comparable earnings from continuing operations and comparable earnings per diluted common share from continuing operations for the years ended December 31, 2008, 2007 and 2006 which was not provided within the MD&A discussion:

	Years ended December 31		
	2008	2007	2006
(In thousands)			
Earnings from continuing operations	\$257,579	251,779	246,694
Net restructuring charges	17,493	5,935	—
Tax law changes and/or benefits from reserve reversals	(9,545)	(3,333)	(6,796)
International asset impairment	1,617	—	—
Gain on sale of property	—	(6,154)	—
Pension accounting charge	—	—	3,720
Comparable earnings from continuing operations	<u>\$267,144</u>	<u>248,227</u>	<u>243,618</u>
Earnings per diluted common share from continuing operations	\$ 4.51	4.19	3.99
Net restructuring charges	0.31	0.10	—
Tax law changes/or benefits from reserve reversals	(0.17)	(0.06)	(0.11)
International asset impairment	0.03	—	—
Gain on sale of property	—	(0.10)	—
Pension accounting charge	—	—	0.06
Comparable earnings per diluted common share from continuing operations	<u>\$ 4.68</u>	<u>4.13</u>	<u>3.94</u>

The following table provides a numerical reconciliation of total revenue to operating revenue for the years ended December 31, 2010, 2009 and 2008 which was not provided within the MD&A discussion:

	Years ended December 31		
	2010	2009	2008
(In thousands)			
Total revenue	\$ 5,136,435	4,887,254	5,999,041
FMS fuel services and SCS/DCC subcontracted transportation revenue	(1,126,946)	(948,963)	(1,648,434)
Fuel eliminations	148,750	124,221	239,473
Operating revenue	<u>\$ 4,158,239</u>	<u>4,062,512</u>	<u>4,590,080</u>

The following table provides a numerical reconciliation of total revenue to operating revenue for the three months ended December 31, 2010 and 2009 which was not provided within the MD&A discussion:

	Three months ended December 31,	
	2010	2009
(In thousands)		
Total revenue	1,313,426	1,246,968
FMS fuel services and SCS/DCC subcontracted transportation	(291,159)	(261,079)
Fuel eliminations	39,672	33,933
Operating revenue	<u>1,061,939</u>	<u>1,019,822</u>

57

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

The following table provides a numerical reconciliation of net earnings to adjusted net earnings and average total debt to adjusted average total capital for the years ended December 31, 2010, 2009, 2008, 2007 and 2006 which was not provided within the MD&A discussion:

	Years ended December 31				
	2010	2009	2008	2007	2006
	(Dollars in thousands)				
Net earnings [A]	\$ 118,170	61,945	199,881	253,861	248,959
Restructuring and other charges, net and other items(1)	6,225	29,943	70,447	1,467	—
Income taxes	60,610	53,737	150,075	151,603	144,014
Adjusted net earnings before income taxes	185,005	145,625	420,403	406,931	392,973
Adjusted interest expense(2)	132,778	149,968	164,975	169,060	146,565
Adjusted income taxes(3)	(123,429)	(121,758)	(230,456)	(219,971)	(207,183)
Adjusted net earnings [B]	\$ 194,354	173,835	354,922	356,020	332,355
Average total debt	\$2,512,005	2,691,569	2,881,931	2,847,692	2,480,314
Average off-balance sheet debt	114,212	141,629	170,694	150,124	98,767
Average obligations [C]	2,626,217	2,833,198	3,052,625	2,997,816	2,579,081
Average shareholders' equity [D]	1,401,681	1,395,629	1,778,489	1,790,814	1,610,328
Average adjustments to shareholders' equity(4)	2,059	15,645	9,608	855	(5,114)
Average adjusted shareholders' equity [E]	1,403,740	1,411,274	1,788,097	1,791,669	1,605,214
Average adjusted capital	\$4,029,957	4,244,472	4,840,722	4,789,485	4,184,295
Return on average shareholders' equity (%) [A/D]	8.4	4.4	11.2	14.2	15.5
Adjusted return on average capital (%) [B]/[C+E]	4.8	4.1	7.3	7.4	7.9

(1) For 2010, 2009 and 2008, see Note 4, "Discontinued operations," Note 5, "Restructuring and Other Charges" and Note 26, "Other Items Impacting Comparability," in the Notes to Consolidated Financial Statements; 2007 includes restructuring and other charges of \$11 million in the second half of 2007 and a gain of \$10 million related to the sale of property in the third quarter.

(2) Includes interest on off-balance sheet vehicle obligations.

(3) Calculated by excluding taxes related to restructuring and other charges, net and other items, impacts of tax law changes or reserve reversals and interest expense.

(4) Represents shareholders' equity adjusted for restructuring and other charges and other items, net of their related tax effects, as discussed above.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Forward-looking statements (within the meaning of the Federal Private Securities Litigation Reform Act of 1995) are statements that relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends concerning matters that are not historical facts. These statements are often preceded by or include the words "believe," "expect," "intend," "estimate," "anticipate," "will," "may," "could," "should" or similar expressions. This Annual Report contains forward-looking statements including, but not limited to, statements regarding:

- our expectations as to anticipated revenue and earnings, as well as future economic conditions and market demand, with respect to earnings per share, operating revenue, contractual and maintenance revenue improvement, positive commercial rental performance and used vehicle sales results, freight volume projections, outsourced logistics growth and increased revenue from recent acquisitions;
- our ability to successfully achieve the operational goals that are the basis of our business strategies, including improving customer retention levels, focusing on sales and revenue growth in contractual product

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS — (Continued)

offerings, delivering industry leading maintenance in a cost effective manner, offering competitive pricing, a wide range of support services and value-added differentiation, optimizing asset utilization and management, leveraging infrastructure, providing operational execution, expanding our expertise and market presence in certain supply chain industry segments and maintaining a diversified customer base;

- impact of losses from conditional obligations arising from guarantees;
- number of NLE vehicles in inventory and the size of our contractual lease and commercial rental fleets;
- estimates of free cash flow and capital expenditures for 2011;
- the adequacy of our accounting estimates and reserves for pension expense, employee benefit plan obligations, depreciation and residual value guarantees, self-insurance reserves, impairment of goodwill and other long-lived assets, revenue recognition, allowance for accounts receivable, income taxes, contingent liabilities, fair value estimates, risk of loss under derivative instruments and hedging activities and accounting changes;
- our ability to fund all of our operations for the foreseeable future through internally generated funds and outside funding sources;
- future availability and our expected use of outside funding sources;
- the anticipated impact of fuel price fluctuations;
- our expectations as to future pension expense, contributions and return on plan assets;
- our expectations relating to withdrawal liability and funding levels of multi-employer plans;
- the anticipated deferral of federal and state tax gains on disposal of eligible revenue earning equipment pursuant to our vehicle like-kind exchange program;
- our expectations regarding the completion and ultimate outcome of certain tax audits;

- the impact of recent U.S. tax law changes;
- the ultimate disposition of legal proceedings and estimated environmental liabilities;
- our expectations relating to compliance with new regulatory requirements; and
- our expectations regarding the effect of the adoption of recent accounting pronouncements.

These statements, as well as other forward-looking statements contained in this Annual Report, are based on our current plans and expectations and are subject to risks, uncertainties and assumptions. We caution readers that certain important factors could cause actual results and events to differ significantly from those expressed in any forward-looking statements. For a detailed description of certain of these risk factors, please see "Item 1A. Risk Factors" of this Annual Report.

The risks included in the Annual Report are not exhaustive. New risk factors emerge from time to time and it is not possible for management to predict all such risk factors or to assess the impact of such risk factors on our business. As a result, no assurance can be given as to our future results or achievements. You should not place undue reliance on the forward-looking statements contained herein, which speak only as of the date of this Annual Report. We do not intend, or assume any obligation, to update or revise any forward-looking statements contained in this Annual Report, whether as a result of new information, future events or otherwise.

The information required by ITEM 7A is included in ITEM 7 (page 50) of PART II of this report.

maintaining adequate internal control over financial reporting as defined in Rule 13a- 15(f) under the Securities Exchange Act of 1934. Ryder's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the consolidated financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Ryder's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of Ryder; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of Ryder's management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of Ryder's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of Ryder's internal control over financial reporting as of December 31, 2010. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in "Internal Control — Integrated Framework." Based on our assessment and those criteria, management determined that Ryder maintained effective internal control over financial reporting as of December 31, 2010.

Ryder's independent registered certified public accounting firm has audited the effectiveness of Ryder's internal control over financial reporting. Their report appears on page 62.

61

TO THE BOARD OF DIRECTORS AND SHAREHOLDERS OF
RYDER SYSTEM, INC.:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of earnings, shareholders' equity, and cash flows present fairly, in all material respects, the financial position of Ryder System, Inc. and its subsidiaries at December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2010 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on these financial statements, on the financial statement schedule and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

(2) Represents open-market transactions of common shares by the trustee of Ryder's deferred compensation plans.

See accompanying notes to consolidated financial statements.

RYDER SYSTEM, INC. AND SUBSIDIARIES

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Consolidation and Presentation

The consolidated financial statements include the accounts of Ryder System, Inc. (Ryder) and all entities in which Ryder has a controlling voting interest ("subsidiaries") and variable interest entities ("VIEs") where Ryder is determined to be the primary beneficiary. Ryder is deemed to be the primary beneficiary if we have the power to direct the activities that most significantly impact the entity's economic performance and we share in the significant risks and rewards of the entity. All significant intercompany accounts and transactions between consolidated companies have been eliminated in consolidation. Certain prior year amounts have been reclassified to conform to the current period presentation.

In December of 2008, we announced strategic initiatives to improve our competitive advantage and drive long-term profitable growth. As part of these initiatives, we decided to discontinue Supply Chain Solutions operations in South America and Europe. In the second half of 2009, we ceased service operations in South America and Europe. Accordingly, results of these operations, financial position and cash flows are separately reported as discontinued operations for all periods presented either in the Consolidated Financial Statements or notes thereto.

Use of Estimates

The preparation of our consolidated financial statements requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. These estimates are based on management's best knowledge of historical trends, actions that we may take in the future, and other information available when the consolidated financial statements are prepared. Changes in estimates are recognized in accordance with the accounting rules for the estimate, which is typically in the period when new information becomes available. Areas where the nature of the estimate make it reasonably possible that actual results could materially differ from the amounts estimated include: depreciation and residual value guarantees, employee benefit plan obligations, self-insurance accruals, impairment assessments on long-lived assets (including goodwill and indefinite-lived intangible assets), revenue recognition, allowance for accounts receivable, income tax liabilities and contingent liabilities.

Cash Equivalents

Cash equivalents represent cash in excess of current operating requirements invested in short-term, interest-bearing instruments with maturities of three months or less at the date of purchase and are stated at cost.

Restricted Cash

Restricted cash primarily consists of cash proceeds from the sale of eligible vehicles or operating property set aside for the acquisition of replacement vehicles or operating property under our like-kind exchange tax programs. See Note 14, "Income Taxes," for a complete discussion of the vehicle like-kind exchange tax program. We classify restricted cash within "Prepaid expenses and other current assets" if the restriction is expected to expire in the twelve months following the balance sheet date or within "Direct financing leases and other assets" if the restriction is expected to expire more than twelve months after the balance sheet date. The changes in restricted cash balances are reflected as an investing activity in our Consolidated Statements of Cash Flows as they

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Revenue Recognition

We generate revenue primarily through the lease, rental and maintenance of revenue earning equipment and services rendered under service contracts. We recognize revenue when persuasive evidence of an arrangement exists, the services have been rendered to customers or delivery has occurred, the pricing is fixed or determinable, and collectibility is reasonably assured. We are required to make judgments about whether pricing is fixed or determinable and whether or not collectibility is reasonably assured.

Revenue is recorded on a gross basis, without deducting third-party services costs, when we are acting as a principal with substantial risks and rewards of ownership. Revenue is recorded on a net basis, after deducting third-party services costs, when we are acting as an agent without substantial risks and rewards of ownership. Sales tax collected from customers and remitted to the applicable taxing authorities is accounted for on a net basis, with no impact on revenue. In addition to the aforementioned general policy, the following are the specific revenue recognition policies for our reportable business segments by major revenue arrangement:

Fleet Management Solutions (FMS)

Our full service lease arrangements include lease deliverables such as the lease of a vehicle and the executory agreement for the maintenance, insurance and taxes of the leased equipment during the lease term and non-lease deliverables. Arrangement consideration is allocated between lease deliverables and non-lease deliverables based on management's best estimate of the relative fair value of each deliverable. The arrangement consideration allocated to lease deliverables is accounted for pursuant to accounting guidance on leases. Our full service lease arrangements provide for a fixed charge billing and a variable charge billing based on mileage or time usage. Fixed charges are typically billed at the beginning of the month for the services to be provided that month. Variable charges are typically billed a month in arrears. Costs associated with the activities performed under our full service leasing arrangements are primarily comprised of labor, parts, outside work, depreciation, interest, licenses, insurance, operating taxes and vehicle rent. These costs are expensed as incurred except for depreciation. Refer to "Summary of Significant Accounting Policies — Revenue Earning Equipment, Operating Property and Equipment, and Depreciation" for information regarding our depreciation policies.

Revenue from lease and rental agreements is driven by the classification of the arrangement typically as either an operating or direct finance lease (DFL).

- The majority of our leases and all of our rental arrangements are classified as operating leases and therefore, we recognize lease and commercial rental revenue on a straight-line basis as it becomes receivable over the term of the lease or rental arrangement. Lease and rental agreements do not usually provide for scheduled rent increases or escalations. However, lease agreements allow for rate changes based upon changes in the Consumer Price Index (CPI). Lease and rental agreements provide for a time charge plus a fixed per-mile charge. The fixed time charge, the fixed per-mile charge and the changes in rates attributed to changes in the CPI are considered contingent rentals and recognized as earned.
- The non-lease deliverables of our full service lease arrangements are comprised of access to substitute vehicles, emergency road service, and safety services. These services are available to our customers throughout the lease term. Accordingly, revenue is recognized on a straight-line basis over the lease term.
- Direct financing lease revenue is recognized using the effective interest method, which provides a constant periodic rate of return on the outstanding investment on the lease. Interest is no longer recognized when the receivable is deemed to be uncollectible.

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Under our contract maintenance arrangements, we provide maintenance and repairs required to keep a vehicle in good operating condition, schedule mechanical preventive maintenance inspections and access to emergency road service and substitute vehicles. The vast majority of our services are routine services performed on a recurring basis throughout the term of the arrangement. From time to time, we provide non-routine major repair services in order to place a vehicle back in service. Revenue from maintenance service contracts is recognized on a straight-line basis as maintenance services are rendered over the terms of the related arrangements. Contract maintenance arrangements are generally cancelable, without penalty, after one year with 60 days prior written notice. Our maintenance service arrangement provides for a monthly fixed charge and a monthly variable charge based on mileage or time usage. Fixed charges are typically billed at the beginning of the month for the services to be provided that month. Variable charges are typically billed a month in arrears. Contract maintenance agreements allow for rate changes based upon changes in the CPI. The fixed per-mile charge and the changes in rates attributed to changes in the CPI are recognized as earned. Costs associated with the activities performed under our contract maintenance arrangements are primarily comprised of labor, parts, outside work, licenses, insurance and operating taxes. These costs are expensed as incurred.

Revenue from fuel services is recognized when fuel is delivered to customers.

Supply Chain Solutions (SCS) and Dedicated Contract Carriage (DCC)

Revenue from service contracts is recognized as services are rendered in accordance with contract terms, which typically include discrete billing rates for the services. In transportation management arrangements where we act as principal, revenue is reported on a gross basis, without deducting third-party purchased transportation costs. To the extent that we are acting as an agent in the arrangement, revenue is reported on a net basis, after deducting purchased transportation costs.

Accounts Receivable Allowance

We maintain an allowance for uncollectible customer receivables and an allowance for billing adjustments related to certain discounts and billing corrections. Estimates are updated regularly based on historical experience of bad debts and billing adjustments processed, current collection trends and aging analysis. Accounts are charged against the allowance when determined to be uncollectible. The allowance is maintained at a level deemed appropriate based on loss experience and other factors affecting collectibility. Historical results may not necessarily be indicative of future results.

Inventories

Inventories, which consist primarily of fuel, tires and vehicle parts, are valued using the lower of weighted-average cost or market.

Revenue Earning Equipment, Operating Property and Equipment, and Depreciation

Revenue earning equipment, comprised of vehicles and operating property and equipment are initially recorded at cost inclusive of vendor rebates. Revenue earning equipment and operating property and equipment under capital lease are initially recorded at the lower of the present value of minimum lease payments or fair value. Vehicle repairs and maintenance that extend the life or increase the value of a vehicle are capitalized, whereas ordinary maintenance and repairs are expensed as incurred. The cost of vehicle replacement tires and tire repairs are expensed as incurred. Direct costs incurred in connection with developing or obtaining internal-use software are capitalized. Costs incurred during the preliminary software development project stage, as well as maintenance and training costs, are expensed as incurred.

Leasehold improvements are depreciated over the shorter of their estimated useful lives or the term of the related lease, which may include one or more option renewal periods where failure to exercise such options would result in an economic penalty in such amount that renewal appears, at the inception of the lease, to be

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

reasonably assured. If a substantial additional investment is made in a leased property during the term of the lease, we re-evaluate the lease term to determine whether the investment, together with any penalties related to non-renewal, would constitute an economic penalty in such amount that renewal appears to be reasonably assured.

Provision for depreciation is computed using the straight-line method on all depreciable assets. We periodically review and adjust, as appropriate, the residual values and useful lives of revenue earning equipment. Our review of the residual values and useful lives of revenue earning equipment, is established with a long-term view considering historical market price changes, current and expected future market price trends, expected life of vehicles and extent of alternative uses. Factors that could cause actual results to materially differ from estimates include but are not limited to unforeseen changes in technology innovations.

We routinely dispose of used revenue earning equipment as part of our FMS business. Revenue earning equipment held for sale is stated at the lower of carrying amount or fair value less costs to sell. For revenue earning equipment held for sale, we stratify our fleet by vehicle type (tractors, trucks, and trailers), weight class, age and other relevant characteristics and create classes of similar assets for analysis purposes. Fair value is determined based upon recent market prices obtained from our own sales experience for sales of each class of similar assets and vehicle condition. Reductions in the carrying values of vehicles held for sale are recorded within "Depreciation expense" in the Consolidated Statements of Earnings. While we believe our estimates of residual values and fair values of revenue earning equipment are reasonable, changes to our estimates of values may occur due to changes in the market for used vehicles, the condition of the vehicles, and inherent limitations in the estimation process.

Gains and losses on sales of operating property and equipment are reflected in "Miscellaneous (income) expense, net."

Goodwill and Other Intangible Assets

Goodwill and other intangible assets with indefinite useful lives are not amortized, but rather, are tested for impairment at least annually (April 1st). In addition to the annual impairment test, an interim test for impairment is completed when events or circumstances change between annual tests that would more likely than not reduce the fair value of the reporting unit below its carrying value. Recoverability of goodwill is evaluated using a two-step process. The first step involves a comparison of the fair value of each of our reporting units with its carrying amount. If a reporting unit's carrying amount exceeds its fair value, the second step is performed. The second step involves a comparison of the implied fair value and carrying value of that reporting unit's goodwill. To the extent that a reporting unit's carrying amount exceeds the implied fair value of its goodwill, an impairment loss is recognized. Identifiable intangible assets not subject to amortization are assessed for impairment by comparing the fair value of the intangible asset to its carrying amount. An impairment loss is recognized for the amount by which the carrying value exceeds fair value.

In making our assessments of fair value, we rely on our knowledge and experience about past and current events and assumptions about conditions we expect to exist in the future. These assumptions are based on a number of factors including future operating performance, economic conditions, actions we expect to take, and present value techniques. Rates used to discount future cash flows are dependent upon interest rates and the cost of capital at a point in time. There are inherent uncertainties related to these factors and management's judgment in applying them to the analysis of goodwill impairment. It is possible that assumptions underlying the impairment analysis will change in such a manner that impairment in value may occur in the future.

Intangible assets with finite lives are amortized over their respective estimated useful lives. Identifiable intangible assets that are subject to amortization are evaluated for impairment using a process similar to that used to evaluate long-lived assets described below.

Impairment of Long-Lived Assets Other than Goodwill

Long-lived assets held and used, including revenue earning equipment, operating property and equipment and intangible assets with finite lives, are tested for recoverability when circumstances indicate that the carrying amount of assets may not be recoverable. Recoverability of long-lived assets is evaluated by comparing the carrying amount of an asset or asset group to management's best estimate of the undiscounted future operating cash flows (excluding interest charges) expected to be generated by the asset or asset group. If these comparisons indicate that the asset or asset group is not recoverable, an impairment loss is recognized for the amount by which the carrying value of the asset or asset group exceeds fair value. Fair value is determined by quoted market price, if available, or an estimate of projected future operating cash flows, discounted using a rate that reflects the related operating segment's average cost of funds. Long-lived assets to be disposed of including revenue earning equipment and operating property and equipment, are reported at the lower of carrying amount or fair value less costs to sell.

Debt Issuance Costs

Costs incurred to issue debt are deferred and amortized as a component of interest expense over the estimated term of the related debt using the effective interest rate method.

Contract Incentives

Payments made to or on behalf of a lessee or customer upon entering into a lease of our revenue earning equipment or contract are deferred and recognized on a straight-line basis as a reduction of revenue over the contract term. Amounts to be amortized in the next year have been classified as "Prepaid expenses and other current assets" with the remainder included in "Direct financing leases and other assets."

Self-Insurance Accruals

We retain a portion of the accident risk under vehicle liability, workers' compensation and other insurance programs. Under our insurance programs, we retain the risk of loss in various amounts up to \$3 million on a per occurrence basis. Self-insurance accruals are based primarily on an actuarially estimated, undiscounted cost of claims, which includes claims incurred but not reported. Such liabilities are based on estimates. Historical loss development factors are utilized to project the future development of incurred losses, and these amounts are adjusted based upon actual claim experience and settlements. While we believe that the amounts are adequate, there can be no assurance that changes to our actuarial estimates may not occur due to limitations inherent in the estimation process. Changes in the actuarial estimates of these accruals are charged or credited to earnings in the period determined. Amounts estimated to be paid within the next year have been classified as "Accrued expenses and other current liabilities" with the remainder included in "Other non-current liabilities."

We also maintain additional insurance at certain amounts in excess of our respective underlying retention. Amounts recoverable from insurance companies are not offset against the related accrual as our insurance policies do not extinguish or provide legal release from the obligation to make payments related to such risk-related losses. Amounts expected to be received within the next year from insurance companies have been included within "Receivables, net" with the remainder included in "Direct financing leases and other assets" and are recognized only when realization of the claim for recovery is considered probable. The accrual for the related claim has been classified within "Accrued expenses and other current liabilities" if it is estimated to be paid within the next year, otherwise it has been classified in "Other non-current liabilities."

Residual Value Guarantees and Deferred Gains

We periodically enter into agreements for the sale and operating leaseback of revenue earning equipment. These leases contain purchase and/or renewal options as well as limited guarantees of the lessor's residual

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

value ("residual value guarantees"). We review the residual values of revenue earning equipment that we lease from third parties and our exposures under residual value guarantees. The review is conducted in a manner similar to that used to analyze residual values and fair values of owned revenue earning equipment. The residual value guarantees are conditioned on termination of the lease prior to its contractual lease term. The amount of residual value guarantees expected to be paid is recognized as rent expense over the expected remaining term of the lease. Adjustments in the estimate of residual value guarantees are recognized prospectively over the expected remaining lease term. While we believe that the amounts are adequate, changes to our estimates of residual value guarantees may occur due to changes in the market for used vehicles, the condition of the vehicles at the end of the lease and inherent limitations in the estimation process. See Note 19, "Guarantees," for additional information.

Gains on the sale and operating leaseback of revenue earning equipment are deferred and amortized on a straight-line basis over the term of the lease as a reduction of rent expense.

Income Taxes

Our provision for income taxes is based on reported earnings before income taxes. Deferred taxes are recognized for the future tax effects of temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases using tax rates in effect for the years in which the differences are expected to reverse. The effects of changes in tax laws on deferred tax balances are recognized in the period the new legislation is enacted. Valuation allowances are recognized to reduce deferred tax assets to the amount that is more likely than not to be realized. In assessing the likelihood of realization, management considers estimates of future taxable income. We calculate our current and deferred tax position based on estimates and assumptions that could differ from the actual results reflected in income tax returns filed in subsequent years. Adjustments based on filed returns are recorded when identified.

We are subject to tax audits in numerous jurisdictions in the U.S. and foreign countries. Tax audits by their very nature are often complex and can require several years to complete. In the normal course of business, we are subject to challenges from the Internal Revenue Service (IRS) and other tax authorities regarding amounts of taxes due. These challenges may alter the timing or amount of taxable income or deductions, or the allocation of income among tax jurisdictions. As part of our calculation of the provision for income taxes on earnings, we recognize the tax benefit from uncertain tax positions that are at least more likely than not of being

sustained upon audit based on the technical merits of the tax position. The tax benefit to be recognized is measured as the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. Such calculations require management to make estimates and judgments with respect to the ultimate outcome of a tax audit. Actual results could vary materially from these estimates.

Interest and penalties related to income tax exposures are recognized as incurred and included in "Provision for income taxes" in our Consolidated Statements of Earnings. Accruals for income tax exposures, including penalties and interest, expected to be settled within the next year are included in "Accrued expenses and other current liabilities" with the remainder included in "Other non-current liabilities" in our Consolidated Balance Sheets. The federal benefit from state income tax exposures is included in "Deferred income taxes" in our Consolidated Balance Sheets.

Severance and Contract Termination Costs

We recognize liabilities for severance and contract termination costs based upon the nature of the cost to be incurred. For involuntary separation plans that are completed within the guidelines of our written involuntary separation plan, we record the liability when it is probable and reasonably estimable. For one-time termination benefits, such as additional severance pay or benefit payouts, and other exit costs, such as contract termination costs, the liability is measured and recognized initially at fair value in the period in which the liability is incurred, with subsequent changes to the liability recognized as adjustments in the period of

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

change. Severance related to position eliminations that are part of a restructuring plan are recorded within "Restructuring and other charges, net" in the Consolidated Statements of Earnings, otherwise severance is recorded within "Salaries and employee-related costs" in the Consolidated Statements of Earnings.

Environmental Expenditures

We record liabilities for environmental assessments and/or cleanup when it is probable a loss has been incurred and the costs can be reasonably estimated. Environmental liability estimates may include costs such as anticipated site testing, consulting, remediation, disposal, post-remediation monitoring and legal fees, as appropriate. The liability does not reflect possible recoveries from insurance companies or reimbursement of remediation costs by state agencies, but does include estimates of cost sharing with other potentially responsible parties. Estimates are not discounted, as the timing of the anticipated cash payments is not fixed or readily determinable. Subsequent adjustments to initial estimates are recorded as necessary based upon additional information developed in subsequent periods. In future periods, new laws or regulations, advances in remediation technology and additional information about the ultimate remediation methodology to be used could significantly change our estimates. Claims for reimbursement of remediation costs are recorded when recovery is deemed probable.

Asset Retirement Obligations

Asset retirement obligations (AROs) are legal obligations associated with the retirement of long-lived assets. Our AROs are associated with underground tanks, tires and leasehold improvements. These liabilities are initially recorded at fair value and the related asset retirement costs are capitalized by increasing the carrying amount of the related assets by the same amount as the liability. Asset retirement costs are subsequently depreciated over the useful lives of the related assets. Subsequent to initial recognition, we record period-to-period changes in the ARO liability resulting from the passage of time within "Operating expense" in the Consolidated Statements of Earnings and revisions to either the timing or the amount of the original expected cash flows to the related assets.

Derivative Instruments and Hedging Activities

We use financial instruments, including forward exchange contracts, futures, swaps and cap agreements to manage our exposures to movements in interest rates and foreign currency exchange rates. The use of these financial instruments modifies the exposure of these risks with the intent to reduce the risk or cost to us. We do not enter into derivative financial instruments for trading purposes. We limit our risk that counterparties to the derivative contracts will default and not make payments by entering into derivative contracts only with counterparties comprised of large banks and financial institutions (primarily J.P. Morgan) that meet established credit criteria. We do not expect to incur any losses as a result of counterparty default.

On the date a derivative contract is entered into, we formally document, among other items, the intended hedging designation and relationship, along with the risk management objectives and strategies for entering into the derivative contract. We also formally assess, both at inception and on an ongoing basis, whether the derivatives we used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items. Cash flows from derivatives that are accounted for as hedges are classified in the Consolidated Statements of Cash Flows in the same category as the items being hedged. When it is determined that a derivative is not highly effective as a hedge or that it has ceased to be a highly effective hedge, we discontinue hedge accounting prospectively.

The hedging designation may be classified as one of the following:

No Hedging Designation. The gain or loss on a derivative instrument not designated as an accounting hedging instrument is recognized in earnings.

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Fair Value Hedge. A hedge of a recognized asset or liability or an unrecognized firm commitment is considered a fair value hedge. For fair value hedges, both the effective and ineffective portions of the changes in the fair value of the derivative, along with

the gain or loss on the hedged item that is attributable to the hedged risk, are both recorded in earnings.

Cash Flow Hedge. A hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability is considered a cash flow hedge. The effective portion of the change in the fair value of a derivative that is declared as a cash flow hedge is recorded in "Accumulated other comprehensive loss" until earnings are affected by the variability in cash flows of the designated hedged item.

Net Investment Hedge. A hedge of a net investment in a foreign operation is considered a net investment hedge. The effective portion of the change in the fair value of the derivative used as a net investment hedge of a foreign operation is recorded in the currency translation adjustment account within "Accumulated other comprehensive loss." The ineffective portion, if any, on the hedged item that is attributable to the hedged risk is recorded in earnings and reported in "Miscellaneous (income) expense, net" in the Consolidated Statements of Earnings.

Foreign Currency Translation

Our foreign operations generally use the local currency as their functional currency. Assets and liabilities of these operations are translated at the exchange rates in effect on the balance sheet date. If exchangeability between the functional currency and the U.S. dollar is temporarily lacking at the balance sheet date, the first subsequent rate at which exchanges can be made is used to translate assets and liabilities. Income statement items are translated at the average exchange rates for the year. The impact of currency fluctuations is recorded in "Accumulated other comprehensive loss" as a currency translation adjustment. Upon sale or upon complete or substantially complete liquidation of an investment in a foreign operation, the currency translation adjustment attributable to that operation is removed from accumulated other comprehensive loss and is reported as part of the gain or loss on sale or liquidation of the investment for the period during which the sale or liquidation occurs. Gains and losses resulting from foreign currency transactions are recorded in "Miscellaneous (income) expense, net" in the Consolidated Statements of Earnings.

Share-Based Compensation

The fair value of stock option awards and nonvested stock awards other than restricted stock units (RSUs), is expensed on a straight-line basis over the vesting period of the awards. RSUs are generally expensed in the year they are granted. Share-based compensation expense is generally reported in "Salaries and employee-related costs" in our Consolidated Statements of Earnings. Cash flows from the tax benefits resulting from tax deductions in excess of the compensation expense recognized for those options (windfall tax benefits) are classified as financing cash flows. Tax benefits resulting from tax deductions in excess of share-based compensation expense recognized are credited to additional paid-in capital in the Consolidated Balance Sheets. Realized tax shortfalls are first offset against the cumulative balance of windfall tax benefits, if any, and then charged directly to income tax expense. We have applied the long-form method for determining the pool of windfall tax benefits and had a pool of windfall tax benefits for all periods presented.

Defined Benefit Pension and Postretirement Benefit Plans

The funded status of our defined benefit pension plans and postretirement benefit plans are recognized in the Consolidated Balance Sheets. The funded status is measured as the difference between the fair value of plan assets and the benefit obligation at December 31, the measurement date. The fair value of plan assets represents the current market value of contributions made to irrevocable trust funds, held for the sole benefit of participants, which are invested by the trust funds. For defined benefit pension plans, the benefit obligation

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

represents the actuarial present value of benefits expected to be paid upon retirement based on estimated future compensation levels. For postretirement benefit plans, the benefit obligation represents the actuarial present value of postretirement benefits attributed to employee services already rendered. Overfunded plans, with the fair value of plan assets exceeding the benefit obligation, are aggregated and recorded as a prepaid pension asset equal to this excess. Underfunded plans, with the benefit obligation exceeding the fair value of plan assets, are aggregated and recorded as a pension and postretirement benefit liability equal to this excess.

The current portion of pension and postretirement benefit liabilities represent the actuarial present value of benefits payable within the next 12 months exceeding the fair value of plan assets (if funded), measured on a plan-by-plan basis. These liabilities are recorded in "Accrued expenses and other current liabilities" in the Consolidated Balance Sheets.

Pension and postretirement benefit expense is recorded in "Salaries and employee-related costs" in the Consolidated Statements of Earnings and includes service cost, interest cost, expected return on plan assets (if funded), and amortization of prior service credit and net actuarial loss. Service cost represents the actuarial present value of participant benefits earned in the current year. Interest cost represents the time value of money cost associated with the passage of time. The expected return on plan assets represents the average rate of earnings expected on the funds invested or to be invested to provide for the benefits included in the obligation. Prior service credit represents the impact of negative plan amendments. Net actuarial loss arises as a result of differences between actual experience and assumptions or as a result of changes in actuarial assumptions. Net actuarial loss and prior service credit not recognized as a component of pension and postretirement benefit expense as they arise are recognized as a component of accumulated comprehensive loss, net of tax in the Consolidated Statements of Shareholders' Equity. These pension and postretirement items are subsequently amortized as a component of pension and postretirement benefit expense over the remaining service period, if the majority of the employees are active, otherwise over the remaining life expectancy, provided such amounts exceed thresholds which are based upon the benefit obligation or the value of plan assets.

The measurement of benefit obligations and pension and postretirement benefit expense is based on estimates and assumptions approved by management. These valuations reflect the terms of the plans and use participant-specific information such as compensation, age and years of service, as well as certain assumptions, including estimates of discount rates, expected return on plan assets, rate of compensation increases, interest rates and mortality rates.

Fair Value Measurements

We carry various assets and liabilities at fair value in the Consolidated Balance Sheets. The most significant assets and

liabilities are vehicles held for sale, which are stated at the lower of carrying amount or fair value less costs to sell, investments held in Rabbi Trusts and derivatives.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Fair value measurements are classified based on the following fair value hierarchy:

- Level 1** Quoted prices (unadjusted) in active markets for identical assets or liabilities that we have the ability to access at the measurement date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2** Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or model-derived valuations or other inputs that are

75

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

- Level 3** Unobservable inputs for the asset or liability. These inputs reflect our own assumptions about the assumptions a market participant would use in pricing the asset or liability.

When available, we use unadjusted quoted market prices to measure fair value and classify such measurements within Level 1. If quoted prices are not available, fair value is based upon model-driven valuations that use current market-based or independently sourced market parameters such as interest rates and currency rates. Items valued using these models are classified according to the lowest level input or value driver that is significant to the valuation.

Revenue earning equipment held for sale is measured at fair value on a nonrecurring basis and is stated at the lower of carrying amount or fair value less costs to sell. Investments held in Rabbi Trusts and derivatives are carried at fair value on a recurring basis. Investments held in Rabbi Trusts include exchange-traded equity securities and mutual funds. Fair values for these investments are based on quoted prices in active markets. For derivatives, fair value is based on model-driven valuations using the LIBOR rate or observable forward foreign exchange rates, which are observable at commonly quoted intervals for the full term of the financial instrument.

Earnings Per Share

Earnings per share is computed using the two-class method. The two-class method of computing earnings per share is an earnings allocation formula that determines earnings per share for common stock and any participating securities according to dividends declared (whether paid or unpaid) and participation rights in undistributed earnings. Our nonvested stock (time-vested restricted stock rights, market-based restricted stock rights and restricted stock units) are considered participating securities since the share-based awards contain a non-forfeitable right to dividend equivalents irrespective of whether the awards ultimately vest. Under the two-class method, earnings per common share are computed by dividing the sum of distributed earnings to common shareholders and undistributed earnings allocated to common shareholders by the weighted average number of common shares outstanding for the period. In applying the two-class method, undistributed earnings are allocated to both common shares and participating securities based on the weighted average shares outstanding during the period.

Diluted earnings per common share reflect the dilutive effect of potential common shares from stock options. The dilutive effect of stock options is computed using the treasury stock method, which assumes any proceeds that could be obtained upon the exercise of stock options would be used to purchase common shares at the average market price for the period. The assumed proceeds include the purchase price the grantee pays, the windfall tax benefit that we receive upon assumed exercise and the unrecognized compensation expense at the end of each period. We calculate the assumed proceeds from excess tax benefits based on the deferred tax assets actually recorded without consideration of "as if" deferred tax assets.

Share Repurchases

Repurchases of shares of common stock are made periodically in open-market transactions and are subject to market conditions, legal requirements and other factors. The cost of share repurchases is allocated between common stock and retained earnings based on the amount of additional paid-in capital at the time of the share repurchase.

Comprehensive Income (Loss)

Comprehensive income (loss) presents a measure of all changes in shareholders' equity except for changes resulting from transactions with shareholders in their capacity as shareholders. Our total

76

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

comprehensive income (loss) presently consists of net earnings, currency translation adjustments associated with foreign operations that use the local currency as their functional currency, adjustments for derivative instruments accounted for as cash flow hedges and various pension and other postretirement benefits related items.

Recent Accounting Pronouncements

In September 2009, the Financial Accounting Standards Board (FASB) issued accounting guidance which amends the criteria for allocating a contract's consideration to individual services or products in multiple-deliverable arrangements. The guidance requires that the best estimate of selling price be used when vendor specific objective or third-party evidence for deliverables cannot

be determined. This guidance is effective for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, with early adoption permitted. We do not expect this guidance to have a significant impact on our consolidated financial position, results of operations or cash flows.

2. ACCOUNTING CHANGES

Transfers of Financial Assets

In June 2009, the FASB issued accounting guidance which addresses the accounting and disclosure requirements for transfers of financial assets. The guidance is effective for new transfers of financial assets occurring on or after January 1, 2010. The adoption of this accounting guidance did not have a material impact on our consolidated financial position, results of operations or cash flows.

Consolidation for Variable Interest Entities

In June 2009, the FASB issued accounting guidance which amends the consolidation principles for variable interest entities by requiring consolidation of VIEs based on which party has control of the entity. The guidance is effective for fiscal years beginning after November 15, 2009, and interim periods within those fiscal years. The adoption of this accounting guidance did not have a material impact on our consolidated financial position, results of operations or cash flows.

Business Combinations

In December 2007, the FASB revised the accounting guidance for recognizing and measuring assets acquired and liabilities assumed in a business combination and requires, among other things, that transaction costs in a business combination be expensed as incurred. This guidance was effective for business combinations closing after January 1, 2009. Effective January 1, 2009, we adopted the accounting guidance without a material impact to our consolidated financial position, results of operations or cash flows.

Fair Value Measurements

In September 2006, the FASB issued accounting guidance on fair value measurements, which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. We adopted the accounting guidance on January 1, 2009 for all nonfinancial assets and liabilities recognized or disclosed at fair value on a nonrecurring basis, including our vehicles held for sale. The adoption of this accounting guidance did not have a material impact on our consolidated financial position, results of operations or cash flows.

3. ACQUISITIONS

Total Logistic Control Acquisition — On December 31, 2010, we acquired all the common stock of Total Logistic Control (TLC), a leading provider of comprehensive supply chain solutions to food, beverage, and

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

consumer packaged goods manufacturers in the U.S. TLC provides customers a broad suite of end-to-end services, including distribution management, contract packaging services and solutions engineering. This acquisition will enhance our SCS capabilities and growth prospects in the areas of packaging and warehousing, including temperature-controlled facilities. The purchase price was \$209 million, of which \$205 was paid in 2010. In addition, we incurred \$4 million of acquisition costs, all of which was included in "Operating expense" in the Consolidated Statements of Earnings. The purchase price excludes certain items to be resolved post-closing with the seller, which may result in additional adjustments to the final purchase price.

The following table provides the preliminary estimated fair values of the assets and liabilities assumed at the acquisition date. The preliminary purchase price allocations and resulting impact on the December 31, 2010 Consolidated Balance Sheet relating to the TLC acquisition were as follows:

	(In thousands)
Assets	
Current assets	\$ 24,249
Operating property and equipment	75,471
Goodwill	138,321
Customer relationships and other intangibles	35,380
Other assets	632
	<u>274,053</u>
Liabilities:	
Current liabilities	(26,575)
Deferred tax liabilities and other liabilities	(38,883)
	<u>(65,458)</u>
Net assets acquired	<u>\$ 208,595</u>

Edart Leasing LLC Acquisition — On February 2, 2009, we acquired the assets of Edart Leasing LLC ("Edart"), which included Edart's fleet of approximately 1,600 vehicles and more than 340 contractual customers from Edart's five locations in Connecticut for a purchase price of \$85 million of which \$81 million was paid in 2009 and \$2 million was paid in 2010. The purchase price consisted mainly of revenue earning equipment and operating property. The combined network operates under the Ryder name, complementing our FMS business segment market coverage in the Northeast. We also acquired approximately 525 vehicles for remarketing.

Transpacific Container Terminal Ltd. and CRSA Logistics Ltd. Acquisition — On December 19, 2008, we acquired all of the assets of Transpacific Container Terminal Ltd. and CRSA Logistics Ltd. ("CRSA") located in Port Coquitlam, British Columbia, as well as CRSA's operations in Hong Kong and Shanghai, China. The companies specialize in trans-Pacific, end-to-end transportation management and supply chain services primarily for Canadian retailers. This acquisition adds complementary solutions to our capabilities including consolidation services in key Asian hub and off-dock deconsolidation operations in Canada. The purchase price

was \$15 million, of which \$12 million was paid in 2008 and \$2 million was paid in 2009.

Gordon Truck Leasing Acquisition — On August 29, 2008, we acquired the assets of Gordon Truck Leasing (“Gordon”), which included Gordon’s fleet of approximately 500 vehicles and nearly 130 contractual customers for a purchase price of \$24 million, of which \$23 million was paid in 2008 with remaining amounts paid in subsequent years. The combined network operates under the Ryder name, complementing our FMS market coverage and service network in Pennsylvania.

Gator Leasing Acquisition — On May 12, 2008, we acquired the assets of Gator Leasing, Inc. (“Gator”), which included Gator’s fleet of approximately 2,300 vehicles and nearly 300 contractual customers for a

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

purchase price of \$117 million, of which \$114 million was paid in 2008 and \$3 million was paid in 2009. The combined network operates under the Ryder name, complementing our FMS market coverage and service network in Florida.

Lily Acquisition — On January 11, 2008, we completed an asset purchase agreement with Lily Transportation Corporation (“Lily”), under which we acquired Lily’s fleet of approximately 1,600 vehicles and over 200 contractual customers for a purchase price of \$99 million, of which \$97 million was paid in 2008 and \$2 million was paid in 2009. The combined network operates under the Ryder name, complementing our FMS market coverage and service network in the Northeast United States.

All of the acquisitions were accounted for as an acquisition of a business. Goodwill on these acquisitions represents the excess of the purchase price over the fair value of the underlying acquired net tangible and intangible assets. Factors that contributed to the recognition of goodwill in our acquisitions included (i) expected growth rates and profitability of the acquired companies, (ii) securing buyer-specific synergies that increase revenue and profits and are not otherwise available to market participants, (iii) significant cost savings opportunities, (iv) the experienced workforce and (v) our strategies for growth in sales, income and cash flows.

During the years ended December 31, 2010 and 2009, we paid \$5 million and \$1 million, respectively, related to other acquisitions including payments for acquisitions completed in prior years.

Pro Forma Information — The operating results of the acquired companies have been included in our consolidated financial statements from the dates of acquisitions. The following table provides the unaudited pro forma revenue, net earnings and earnings per diluted common share as if the results of the 2010 acquisition had been included in operations commencing January 1, 2009 and the 2008 acquisitions had been included in operations commencing January 1, 2007. This pro forma information is not necessarily indicative either of the combined results of operations that actually would have been realized had the acquisitions been consummated during the periods for which the pro forma information is presented, or of future results.

	Unaudited Pro Forma Years ended December 31		
	2010	2009	2008
	(In thousands, except per share amounts)		
Revenue	\$5,389,841	5,145,959	6,049,390

Diluted	\$ 2.25	1.11	3.50

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Subsequent Events

On January 10, 2011, we acquired the assets of Carmenita Leasing, Inc., a full service leasing and rental business located in Santa Fe Springs, California, which included a fleet of approximately 190 full service lease and rental units, and 60 contractual customers. The asset purchase will be accounted for as an acquisition of a business.

On January 28, 2011, we acquired The Scully Companies, Inc. (“Scully”), which included Scully’s fleet of approximately 1,800 full service lease units and 300 rental vehicles, and approximately 200 contractual customers. The purchase will be accounted for as an acquisition of a business.

4. DISCONTINUED OPERATIONS

In December 2008, we announced strategic initiatives to improve our competitive advantage and drive long-term profitable growth. As part of these initiatives, we decided to discontinue SCS operations in South America and Europe. During the second half of 2009, we ceased SCS service operations in Brazil, Argentina, Chile and European markets. Accordingly, results of these operations, financial position and cash flows are separately reported as discontinued operations for all periods presented either in the

Summarized results of discontinued operations were as follows:

	Years ended December 31		
	2010	2009	2008
	(In thousands)		
Total revenue	\$ —	70,357	207,195
Pre-tax loss from discontinued operations	\$(7,525)	(28,087)	(59,367)
Income tax benefit (expense)	1,087	(85)	1,669
Loss from discontinued operations, net of tax	\$(6,438)	(28,172)	(57,698)

Results of discontinued operations in 2010 included \$4 million of pre-tax losses related to adverse legal developments, professional fees and administrative fees associated with our discontinued South American operations. Results of discontinued operations in 2010 also included a \$3 million charge related to the remaining contractual lease payments of a SCS leased facility in Europe, which we are no longer utilizing.

Results of discontinued operations included operating losses of \$11 million and \$12 million in 2009 and 2008, respectively. During 2009 and 2008, we incurred restructuring and other charges (primarily exit-related) of \$17 million and \$47 million, respectively. These charges included the following:

- Net severance and employee-related costs of \$1 million in 2009 and \$15 million in 2008 related to approximately 2,500 employees associated with these operations. In 2009, we had severance and employee-related costs of \$5 million offset by \$4 million of non-cash reductions as we refined our prior year estimates.
- Termination costs of \$1 million in 2009 and \$4 million in 2008 representing the contractual penalty for terminating leases and customer contracts before the end of the contract term. In 2009, we incurred contract termination costs of \$3 million as we continued to negotiate with our counterparties. The charges in 2009 were offset by \$2 million of non-cash reductions as we refined our prior year estimates.
- Asset impairments totaled \$18 million in 2008 in conjunction with our decision to discontinue operations in these regions. The review of assets for impairment was triggered by our restructuring initiatives. The asset impairments included \$11 million of SCS U.K. goodwill which represented the

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

entire goodwill related to this reporting unit. The asset impairment charges also included \$7 million primarily for revenue earning equipment and operating property and equipment.

- Restructuring plan implementation costs of \$2 million in 2009, mostly professional service fees.
- In the fourth quarter of 2009, we substantially liquidated our investment in several South American subsidiaries where we ceased operations. As a result, we recognized a charge of \$14 million related to accumulated foreign currency translation losses.
- In the fourth quarter of 2008, a customer in the SCS business segment in the U.K. declared bankruptcy. A portion of our services to this customer included the long-term financing of assets used to support the operations. As a result of the bankruptcy, we determined that this finance lease receivable was not recoverable and recorded a \$4 million pre-tax charge. During 2009, we recovered approximately \$1 million of the receivable.
- In the second quarter of 2008, we recorded a pre-tax charge of \$6.5 million (\$6.8 million after-tax) for prior years' adjustments associated with our Brazilian SCS operation. The charge was identified in the course of a detailed business and financial review in Brazil, which occurred following certain adverse tax and legal developments. We determined that accruals of \$3.7 million, primarily for carrier transportation and loss contingencies related to tax and legal matters, were not established in the appropriate period; and deferrals of \$3.1 million, primarily for indirect value-added taxes, were overstated. The charges related primarily to the period from 2004 to 2007. After considering the qualitative and quantitative effects of the charges, we determined the charges were not material to our consolidated financial statements in any individual prior period, and the cumulative amount was not material to 2008 results. Therefore, we recorded the adjustment for the cumulative amount in the second quarter of 2008.

We are subject to various claims, tax assessments and administrative proceedings associated with our discontinued operations. We have established loss provisions for matters in which losses are deemed probable and can be reasonably estimated. However, at this time, it is not possible for us to determine fully the ultimate effect of all unasserted claims and assessments on our consolidated financial condition, results of operations or liquidity. Additional adjustments and expenses may be recorded through discontinued operations in future periods as further relevant information becomes available. Although it is not possible to predict the ultimate outcome of these matters, we do not expect that any resulting liability will have a material adverse effect upon our financial condition, results of operations or liquidity.

The following is a summary of assets and liabilities of discontinued operations:

	December 31,	December 31,
	2010	2009
	(In thousands)	
Assets:		
Total current assets, primarily other receivables	\$ 4,710	\$ 3,671
Total assets	\$ 6,346	\$ 7,631

Total current liabilities, primarily other payables	\$ 4,018	\$ 7,713
Total liabilities	\$ 7,882	\$ 12,869

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

5. RESTRUCTURING AND OTHER CHARGES

The components of restructuring and other charges, net in 2010, 2009 and 2008 were as follows:

	Years ended December 31		
	2010	2009	2008
	(In thousands)		
Restructuring charges, net:			
Severance and employee-related costs	\$ —	2,206	11,209
Contract termination costs	—	—	29
	—	2,206	11,238
Other charges:			
Early retirement of debt	—	4,178	—
Asset impairments	—	22	10,242
Total	\$ —	6,406	21,480

As mentioned in Note 29, "Segment Reporting," our primary measure of segment financial performance excludes, among other items, restructuring and other charges, net. However, the applicable portion of the restructuring and other charges, net that related to each segment in 2010, 2009, and 2008 were as follows:

	Years ended December 31		
	2010	2009	2008
	(In thousands)		
Fleet Management Solutions	\$ —	5,631	16,643
Supply Chain Solutions	—	618	2,820
Dedicated Contract Carriage	—	41	533
Central Support Services	—	116	1,484
Total	\$ —	6,406	21,480

2009 Activity

In the first quarter of 2009, we eliminated approximately 30 positions as part of workforce reductions under cost containment initiatives, which began in the fourth quarter of 2008. Workforce reductions resulted in a pre-tax restructuring charge of \$3 million, and were offset by \$1 million of refinements in estimates from prior restructuring charges.

Other charges, net in 2009 consisted primarily of debt extinguishment charges of \$4 million incurred as part of a \$100 million debt tender offer completed in September 2009 and described in Note 16, "Debt." The charge consisted of \$3 million premium paid on the purchase of the \$100 million outstanding and \$1 million for the write-off of unamortized original debt discount and issuance costs and fees on the transaction.

2008 Activity

During the fourth quarter of 2008, we approved a plan to eliminate approximately 700 positions, primarily in the U.S. The workforce reduction resulted in a pre-tax restructuring charge of \$11 million in the fourth quarter of 2008, all of which related to the payment of severance and other termination benefits. These actions were substantially completed in the first quarter of 2009.

In connection with the decision to transition out of European supply chain contracts and a declining economic environment, we performed an impairment analysis relating to our FMS U.K. reporting unit. Based

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

on our analysis, given current market conditions and business expectations, we concluded that the fair value of the reporting unit was less than the carrying amount. In the fourth quarter of 2008, we recorded a non-cash pre-tax impairment charge of \$10 million related to the write-off of goodwill related to this reporting unit as the implied fair value of the goodwill was less than the carrying amount.

The following table presents a roll-forward of the activity and balances of our restructuring reserves, including discontinued operations for the years ended December 31, 2010 and 2009:

	Beginning Balance	Additions	Deductions		Foreign Translation Adjustment	Ending Balance
			Cash Payments	Non-Cash Reductions ⁽¹⁾		
	(In thousands)					
Year ended December 31, 2010:						
Employee severance and benefits	\$ 1,070	152	971	29	12	234
Contract termination costs	172	3,150	303	—	21	3,040
Total	\$ 1,242	3,302	1,274	29	33	3,274
Year ended December 31, 2009:						
Employee severance and benefits	\$26,541	8,162	29,668	4,790	825	1,070
Contract termination costs	3,482	3,098	4,851	1,687	130	172
Total	\$30,023	11,260	34,519	6,477	955	1,242

(1) Non-cash reductions represent adjustments to the restructuring reserve as actual costs were less than originally estimated.

At December 31, 2010, outstanding restructuring obligations are generally required to be paid over the next two years.

8. REVENUE EARNING EQUIPMENT

	Estimated Useful Lives (In years)	December 31, 2010			December 31, 2009		
		Cost	Accumulated Depreciation	Net Book Value(1)	Cost	Accumulated Depreciation	Net Book Value(1)
(In thousands)							
Held for use:							
Full service lease	3 — 12	\$5,639,410	(2,408,126)	3,231,284	5,616,102	(2,173,693)	3,442,409
Commercial rental	4.5 — 12	1,549,094	(647,764)	901,330	1,235,404	(577,839)	657,565
Held for sale		260,114	(191,510)	68,604	340,332	(261,647)	78,685
Total		\$7,448,618	(3,247,400)	4,201,218	7,191,838	(3,013,179)	4,178,659

(1) Revenue earning equipment, net includes vehicles under capital leases of \$12 million, less accumulated amortization of \$5 million at December 31, 2010, and \$20 million, less accumulated amortization of \$7 million at December 31, 2009. Amortization expense attributed to vehicles under capital leases is combined with depreciation expense.

Revenue earning equipment captioned as "Full service lease" and "Commercial rental" is differentiated exclusively by the service line in which the equipment is employed. Two core service offerings of our FMS business segment are full service leasing and short-term commercial rental. Under a full service lease, we provide customers with vehicles, maintenance, supplies (including fuel), ancillary services and related equipment necessary for operation, while our customers exercise control of the related vehicles over the lease term (generally three to seven years for trucks and tractors and up to ten years for trailers). We also provide short-term rentals, which tend to be seasonal, to customers to supplement their fleets during peak business periods.

At the end of 2009, 2008 and 2007, we completed our annual review of residual values and useful lives of revenue earning equipment. Based on the results of our 2009 analysis, we adjusted the residual values of certain classes of our revenue earning equipment effective January 1, 2010. The residual value change decreased pre-tax earnings in 2010 by approximately \$14 million compared with 2009. Based on the results of the review, the adjustment to depreciation was not significant for 2009 and 2008.

In 2010, based on current and expected market conditions, we recognized \$5 million of accelerated depreciation on certain classes of vehicles expected to be held for sale through 2011. In 2009, we recognized

84

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

\$10 million of accelerated depreciation on certain classes of vehicles expected to be held for sale through 2010.

9. OPERATING PROPERTY AND EQUIPMENT

	\$ 192,619	158,323	4,900	355,842

(1) See Note 3, "Acquisitions," for additional information on acquisitions.

(2) Adjusted for write-off of SCS UK goodwill and accumulated impairment loss upon discontinuance of operations in 2009.

On April 1st of this year, we completed our annual goodwill impairment test and determined there was no impairment. On December 31, 2008, we performed an interim impairment test for our reporting units in the

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

U.K. based on market conditions in the fourth quarter of 2008 and our decision to exit certain SCS contracts in Europe. We determined that goodwill associated with our U.K. reporting units was impaired and we recorded an impairment charge of \$21 million for all goodwill in the U.K. as of December 31, 2008. The impairment charge for the FMS U.K. goodwill was recorded within "Restructuring and other charges, net" in our Consolidated Statements of Earnings and the impairment charge for the SCS U.K. goodwill was recorded within "Loss from discontinued operations, net of tax" in our Consolidated Statements of Earnings.

11. INTANGIBLE ASSETS

	December 31	
	2010	2009
		(In thousands)
Indefinite lived intangible assets — Trade name	\$ 9,084	9,084
Finite lived intangible assets:		
Customer relationship intangibles	73,237	37,497
Accumulated amortization	(11,415)	(8,252)
	61,822	29,245
Foreign currency translation adjustment	1,363	791
Total	\$ 72,269	39,120

The Ryder trade name has been identified as having an indefinite useful life. Customer relationship intangibles are being amortized on a straight-line basis over their estimated useful lives, generally 10-16 years. We recorded amortization expense associated with finite lived intangible assets of approximately \$3 million in 2010 and 2009, and \$2 million in 2008. The future amortization expense for each of the five succeeding years related to all intangible assets that are currently recorded in the Consolidated Balance Sheets is estimated to be as follows at December 31, 2010:

	(In thousands)
2011	\$ 5,978
2012	5,178
2013	5,178

2014	4,375
2015	4,257
Total	\$ 24,966

Total	\$417,015	680,808	1,097,823	354,945	681,613	1,036,558

We retain a portion of the accident risk under vehicle liability and workers' compensation insurance programs. Self-insurance accruals are based primarily on actuarially estimated, undiscounted cost of claims, and include claims incurred but not reported. Such liabilities are based on estimates. Historical loss development factors are utilized to project the future development of incurred losses, and these amounts are adjusted based upon actual claim experience and settlements. While we believe the amounts are adequate,

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

there can be no assurance that changes to our estimates may not occur due to limitations inherent in the estimation process. During 2010, 2009 and 2008, we recorded a (charge) benefit of \$(3) million, \$1 million, and \$23 million, respectively, within "Operating expense" in our Consolidated Statements of Earnings, from development in estimated prior years' self-insured loss reserves for the reasons noted above.

14. INCOME TAXES

The components of earnings from continuing operations before income taxes and the provision for income taxes from continuing operations were as follows:

	Years ended December 31		
	2010	2009	2008
(In thousands)			
Earnings from continuing operations before income taxes:			
United States	\$156,123	132,235	352,180

Federal	38,179	90,433	114,778
State	7,198	2,736	11,776
Foreign	(4,280)	(486)	2,246
	41,097	92,683	128,800
Provision for income taxes from continuing operations	\$ 61,697	53,652	151,709

(1) Excludes federal and state tax benefits resulting from the exercise of stock options and vesting of restricted stock awards, which were credited directly to "Additional paid-in capital."

A reconciliation of the federal statutory tax rate with the effective tax rate from continuing operations follows:

	Years ended December 31		
	2010	2009	2008
	(Percentage of pre-tax earnings)		
Federal statutory tax rate	35.0	35.0	35.0
Impact on deferred taxes for changes in tax rates	0.4	(3.7)	(0.6)
State income taxes, net of federal income tax benefit	4.6	6.0	4.0
Tax reviews and audits	(7.0)	(2.8)	(2.7)
Restructuring and other charges, net	—	1.7	1.1
Miscellaneous items, net	0.1	1.1	0.3
Effective tax rate	33.1	37.3	37.1

88

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The 2010 effective income tax rate benefited from the favorable settlement of domestic tax audits in 2010 and the reversal of reserves for uncertain tax positions due to the expiration of a statute of limitation. In the aggregate, these items reduced the effective rate by 5.7% of pre-tax earnings from continuing operations. The 2009 effective income tax rate benefited from enacted tax law changes in Ontario, Canada, the favorable settlement of a foreign tax audit and reversal of reserves for uncertain tax positions for which the statute of limitation in various jurisdictions had expired. In the aggregate, these items reduced the effective rate by 6.5% of pre-tax earnings. The benefits in 2009 were partially offset by the impact of non-deductible expenses on lower pre-tax earnings from continuing operations. The 2008 effective income tax rate benefited from enacted tax law changes in Massachusetts and the reversal of reserves for uncertain tax positions, for which the statute of limitation in various jurisdictions had expired which, in the aggregate, totaled 3.3% of pre-tax earnings. The benefits in 2008 were partially offset by the adverse impact of non-deductible restructuring and other charges.

Tax Law Changes

The effects of changes in tax laws on deferred tax balances are recognized in the period the new legislation is enacted. The following provides a summary of the impact of changes in tax laws on net earnings from continuing operations and net earnings per diluted common share from continuing operations by tax jurisdiction:

Tax Jurisdiction	Enactment Date	Net Earnings (In thousands)	Diluted Earnings Per Share
2010			
United Kingdom	July 27, 2010	\$ 400	\$ 0.01
2009			
Ontario, Canada	December 15, 2009	\$ 4,100	\$ 0.07
State of Wisconsin	February 19, 2009	\$ 513	\$ 0.01
2008			
State of Massachusetts	July 2, 2008	\$ 1,759	\$ 0.03

On March 23, 2010, the U.S. enacted the Patient Protection and Affordable Care Act and on March 30, 2010, the U.S. enacted the Health Care and Education Reconciliation Act of 2010 (collectively, the "Act"). The Act will reduce certain tax benefits available to employers for providing prescription coverage to retirees among other tax law changes. We do not provide prescription coverage for our retirees; therefore the Act had no impact on our deferred income taxes or net earnings.

89

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Deferred Income Taxes

The components of the net deferred income tax liability were as follows:

	December 31	
	2010	2009
	(In thousands)	
Deferred income tax assets:		
Self-insurance accruals	\$ 34,554	33,139
Net operating loss carryforwards	97,084	69,807
Alternative minimum taxes	9,679	9,679
Accrued compensation and benefits	54,666	38,024
Federal benefit on state tax positions	18,238	17,987
Pension benefits	118,710	121,115
Miscellaneous other accruals	32,147	30,143
	<u>365,078</u>	<u>319,894</u>
Valuation allowance	(39,216)	(36,573)
	<u>325,862</u>	<u>283,321</u>
Deferred income tax liabilities:		
Property and equipment bases difference	(1,398,642)	(1,292,691)
Other items	(19,363)	(13,714)
	<u>(1,418,005)</u>	<u>(1,306,405)</u>
Net deferred income tax liability⁽¹⁾	<u>\$(1,092,143)</u>	<u>(1,023,084)</u>

(1) Deferred tax assets of \$17 million and \$13 million have been included in "Prepaid expenses and other current assets" at December 31, 2010 and 2009, respectively.

We do not provide for U.S. deferred income taxes on temporary differences related to our foreign investments that are considered permanent in duration. These temporary differences consist primarily of undistributed foreign earnings of \$451 million at December 31, 2010. A full foreign tax provision has been made on these undistributed foreign earnings. Determination of the amount of deferred taxes on these temporary differences is not practicable due to foreign tax credits and exclusions.

At December 31, 2010, we had U.S. federal net operating loss carryforwards of \$21 million and various U.S. subsidiaries had state net operating loss carryforwards of \$41 million both expiring through tax year 2029. We also had foreign net operating losses of \$35 million that are available to reduce future income tax payments in several countries, subject to varying expiration rules. A valuation allowance has been established to reduce deferred income tax assets, principally foreign tax loss carryforwards to amounts more likely than not to be realized. We had unused alternative minimum tax credits, for tax purposes, of \$10 million at December 31, 2010 available to reduce future income tax liabilities. The alternative minimum tax credits may be carried forward indefinitely.

Uncertain Tax Positions

We are subject to tax audits in numerous jurisdictions in the U.S. and foreign countries. Tax audits by their very nature are often complex and can require several years to complete. In the normal course of business, we are subject to challenges from the Internal Revenue Service (IRS) and other tax authorities regarding amounts of taxes due. These challenges may alter the timing or amount of taxable income or deductions, or the allocation of income among tax jurisdictions. As part of our calculation of the provision for income taxes on earnings, we recognize the tax benefit from uncertain tax positions that are at least more

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

likely than not of being sustained upon audit based on the technical merits of the tax position. The tax benefit to be recognized is measured as the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. Such calculations require management to make estimates and judgments with respect to the ultimate outcome of a tax audit. Actual results could vary materially from these estimates.

The following is a summary of tax years that are no longer subject to examination:

Federal — audits of our U.S. federal income tax returns are closed through fiscal year 2006.

State — for the majority of states, we are no longer subject to tax examinations by tax authorities for tax years before 2007.

Foreign — we are no longer subject to foreign tax examinations by tax authorities for tax years before 2003 in Canada, 2001 in Brazil, 2005 in Mexico and 2007 in the U.K., which are our major foreign tax jurisdictions. In Brazil, we were assessed \$17 million, including penalties and interest, related to the tax due on the sale of our outbound auto carriage business in 2001. On November 11, 2010, the Administrative Tax Court dismissed the assessment. The period for the tax authority to appeal the decision has not yet closed. We believe it is more likely than not that our tax position will ultimately be sustained and no amounts have been reserved for this matter.

The following table summarizes the activity related to unrecognized tax benefits (excluding the federal benefit received from state positions):

	December 31		
	2010	2009	2008
	(In thousands)		
Balance at January 1	\$69,494	51,741	65,306
Additions based on tax positions related to the current year	4,233	12,422	6,840
Additions for tax positions of prior years	—	9,615	—
Reductions for tax positions of prior years	—	—	(11,296)
Settlements	(8,280)	(1,995)	(1,664)
Reductions due to lapse of applicable statute of limitation	(4,211)	(2,289)	(7,445)
Gross balance at December 31	61,236	69,494	51,741
Interest and penalties	5,858	6,709	3,996

Balance at December 31	<u>\$67,094</u>	<u>76,203</u>	<u>55,737</u>
------------------------	-----------------	---------------	---------------

Of the total unrecognized tax benefits, \$49 million (net of the federal benefit on state issues) represents the amount of unrecognized tax benefits that, if recognized, would favorably affect the effective tax rate in future periods. The total amount of accrued interest and penalties, net of the federal benefit on state issues, resulting from such unrecognized tax benefits was \$5 million and \$6 million at December 31, 2010 and 2009, respectively. For the years ended December 31, 2010, 2009 and 2008, we recognized an income tax benefit related to interest and penalties of \$2 million, \$0.6 million, and \$2 million, respectively, within "Provision for income taxes" in our Consolidated Statements of Earnings. Unrecognized tax benefits related to federal, state and foreign tax positions may decrease by \$2 million by December 31, 2011, if audits are completed or tax years close during 2011.

Like-Kind Exchange Program

We have a like-kind exchange program for certain of our revenue earning equipment operating in the U.S. Pursuant to the program, we dispose of vehicles and acquire replacement vehicles in a form whereby tax gains on disposal of eligible vehicles are deferred. To qualify for like-kind exchange treatment, we exchange, through a qualified intermediary, eligible vehicles being disposed of with vehicles being acquired allowing us

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

to generally carryover the tax basis of the vehicles sold ("like-kind exchanges"). The program results in a material deferral of federal and state income taxes. As part of the program, the proceeds from the sale of eligible vehicles are restricted for the acquisition of replacement vehicles and other specified applications. Due to the structure utilized to facilitate the like-kind exchanges, the qualified intermediary that holds the proceeds from the sales of eligible vehicles and the entity that holds the vehicles to be acquired under the program are required to be consolidated in the accompanying Consolidated Financial Statements in accordance with U.S. GAAP. At December 31, 2010 and 2009, these consolidated entities had total assets, primarily revenue earning equipment, and total liabilities, primarily accounts payable, of \$50 million and \$29 million, respectively.

15. LEASES

Leases as Lessor

We lease revenue earning equipment to customers for periods ranging from three to seven years for trucks and tractors and up to ten years for trailers. From time to time, we may also lease facilities to third parties. The majority of our leases are classified as operating leases. However, some of our revenue earning equipment leases are classified as direct financing leases and, to a lesser extent, sales-type leases. The net investment in direct financing and sales-type leases consisted of:

	December 31	
	2010	2009
	(In thousands)	
Total minimum lease payments receivable	\$ 548,419	582,532
Less: Executory costs	(171,076)	(189,057)
Minimum lease payments receivable	377,343	393,475
Less: Allowance for uncollectibles	(784)	(813)
Net minimum lease payments receivable	376,559	392,662
Unguaranteed residuals	57,898	59,049
Less: Unearned income	(96,522)	(98,142)
Net investment in direct financing and sales-type leases	337,935	353,569
Current portion	(63,304)	(68,296)
Non-current portion	\$ 274,631	285,273

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Our direct financing lease customers operate in a wide variety of industries, and we have no significant customer concentrations in any one industry. We assess credit risk for all of our customers including those who lease equipment under direct financing leases. Credit risk is assessed using an internally developed model which incorporates credit scores from third party providers and our own custom risk ratings and is updated on a monthly basis. The external credit scores are developed based on the customer's historical payment patterns and an overall assessment of the likelihood of delinquent payments. Our internal ratings are weighted based on the industry that the customer operates, company size, years in business, and other credit-related indicators (i.e. profitability, cash flow, liquidity, tangible net worth, etc.). Any one of the following factors may result in a customer being classified as high risk: i) the customer has a history of late payments; ii) the customer has open lawsuits, liens or judgments; iii) the customer has been in business less than 3 years; and iv) the customer operates in an industry with low barriers to entry. For those customers who are designated as high risk, we typically require deposits to be paid in advance in order to mitigate our credit risk. Additionally, our receivables are collateralized by the vehicle's fair value, which further mitigates our credit risk. The following table presents the credit risk profile by creditworthiness category of our direct financing lease receivables at December 31, 2010:

	(In thousands)
Very low risk	\$ 41,942
Low risk	39,369
Moderate risk	198,195
Moderately high risk	43,012
High risk	15,417

The balance of the allowance for uncollectible accounts for our direct financing lease receivables was \$0.8 million as of December 31, 2010. We determine the adequacy of our allowance for uncollectible accounts for our direct financing lease receivables based on an analysis of historical write-offs to receivable and reserve levels on a monthly basis as well as declines in the value of the underlying vehicle. As of December 31, 2010, the amount of direct financing lease receivables which were past due was not significant and there were no impaired receivables. Accordingly, there was no material risk of default with respect to the direct financing lease receivables as of December 31, 2010.

Leases as Lessee

We lease vehicles, facilities and office equipment under operating lease agreements. Rental payments on certain vehicle lease agreements vary based on the number of miles run during the period. Generally, vehicle lease agreements specify that rental payments be adjusted periodically based on changes in interest rates and provide for early termination at stipulated values. None of our leasing arrangements contain restrictive financial covenants.

We periodically enter into sale and leaseback transactions in order to lower the total cost of funding our operations, to diversify our funding among different classes of investors (e.g., regional banks, pension plans, insurance companies, etc.) and to diversify our funding among different types of funding instruments. These sale-leaseback transactions are often executed with third-party financial institutions. In general, these sale-leaseback transactions result in a reduction in revenue earning equipment and debt on the balance sheet, as proceeds from the sale of revenue earning equipment are used primarily to repay debt. Sale-leaseback transactions will result in reduced depreciation and interest expense and increased equipment rental expense.

Certain leases contain purchase and/or renewal options, as well as limited guarantees for a portion of the lessor's residual value. The residual value guarantees are conditional on termination of the lease prior to its contractual lease term. The amount of residual value guarantees expected to be paid is recognized as rent expense over the expected remaining term of the lease. Facts and circumstances that impact management's

**RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)**

estimates of residual value guarantees include the market for used equipment, the condition of the equipment at the end of the lease and inherent limitations in the estimation process. See Note 19, "Guarantees," for additional information.

During 2010, 2009 and 2008, rent expense (including rent of facilities classified within "Operating expense," in our Consolidated Statements of Earnings but excluding contingent rentals) was \$156 million, \$163 million and \$171 million, respectively. During 2010, 2009 and 2008, contingent rental income comprised of residual value guarantees, payments based on miles run and adjustments to rental payments for changes in interest rates on all other leased vehicles were \$2 million, \$2 million and \$1 million, respectively.

Lease Payments

Future minimum payments for leases in effect at December 31, 2010 were as follows:

	As Lessor ⁽¹⁾		As Lessee
	Operating Leases	Direct Financing Leases	Operating Leases
	(In thousands)		
2011	\$1,208,567	126,156	100,156
2012	873,190	110,155	68,669
2013	560,183	93,169	48,170
2014	334,379	77,852	49,369
2015	191,275	59,584	13,470
Thereafter	137,329	81,503	27,230
Total	<u>\$3,304,923</u>	<u>548,419</u>	<u>307,064</u>

(1) Amounts do not include contingent rentals, which may be received under certain leases on the basis of miles of use or changes in the Consumer Price Index. Contingent rentals from operating leases included in revenue during 2010, 2009 and 2008 were \$294 million, \$326 million, and \$354 million, respectively. Contingent rentals from direct financing leases included in revenue during 2010, 2009, and 2008 were \$12 million, \$13 million, and \$14 million, respectively.

The amounts in the previous table related to the lease of revenue earning equipment are based upon the general assumption that revenue earning equipment will remain on lease for the length of time specified by the respective lease agreements. The future minimum payments presented above related to the lease of revenue earning equipment are not a projection of future lease revenue or expense; no effect has been given to renewals, new business, cancellations, contingent rentals or future rate changes. Total future sublease rentals from revenue earning equipment under operating leases as lessee of \$87 million are included within the future minimum rental payments for operating leases as lessor.

Debt Facilities

We can borrow up to \$875 million under a global revolving credit facility with a syndicate of thirteen lending institutions led by Bank of America N.A., Bank of Tokyo-Mitsubishi UFJ, Ltd., Mizuho Corporate Bank, Ltd., Royal Bank of Scotland Plc and Wells Fargo N.A. The global credit facility matures in April 2012 and is used primarily to finance working capital and provide support for the issuance of unsecured commercial paper in the U.S. and Canada. This facility can also be used to issue up to \$75 million in letters of credit (there were no letters of credit outstanding against the facility at December 31, 2010). At our option, the interest rate on borrowings under the credit facility is based on LIBOR, prime, federal funds or local equivalent rates. The agreement provides for annual facility fees, which range from 22.5 basis points to 62.5 basis points, and are based on Ryder's long-term credit ratings. The current annual facility fee is 37.5 basis points, which applies to the total facility size of \$875 million. The credit facility contains no provisions limiting its availability in the event of a material adverse change to Ryder's business operations; however, the credit facility does contain standard representations and warranties, events of default, cross-default provisions, and certain affirmative and negative covenants. In order to maintain availability of funding, we must maintain a ratio of debt to consolidated tangible net worth, of less than or equal to 300%. Tangible net worth, as defined in the credit facility, includes 50% of our deferred federal income tax liability and excludes the book value of our intangibles. The ratio at December 31, 2010 was 189%. At December 31, 2010, \$506 million was available under the credit facility, net of the support for commercial paper borrowings.

Our global revolving credit facility permits us to refinance short-term commercial paper obligations on a long-term basis. Settlement of short-term commercial paper obligations not expected to require the use of working capital are classified as long-term as we have both the intent and ability to refinance on a long-term basis. At December 31, 2010 and 2009, we classified \$368 million and \$192 million, respectively, of short-term commercial paper as long-term.

In September 2010, we issued \$300 million of unsecured medium-term notes maturing in March 2016. If the notes are downgraded following, and as a result of, a change of control, the note holder can require us to repurchase all or a portion of the notes at a purchase price equal to 101% of the principal amount plus accrued and unpaid interest. The medium-term notes were issued to take advantage of historically low interest rates and fund capital expenditures and debt maturities.

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

We have a trade receivables purchase and sale program, pursuant to which we sell certain of our domestic trade accounts receivable to a bankruptcy remote, consolidated subsidiary of Ryder, that in turn sells, on a revolving basis, an ownership interest in certain of these accounts receivable to a receivables conduit or committed purchasers. The subsidiary is considered a VIE and is consolidated based on our control of the entity's activities. We use this program to provide additional liquidity to fund our operations, particularly when it is cost effective to do so. The costs under the program may vary based on changes in interest rates. The available proceeds that may be received under the program are limited to \$175 million. If no event occurs which causes early termination, the 364-day program will expire on October 28, 2011. The program contains provisions restricting its availability in the event of a material adverse change to our business operations or the collectibility of the collateralized receivables. At December 31, 2010 and December 31, 2009, no amounts were outstanding under the program. Sales of receivables under this program will be accounted for as secured borrowings based on our continuing involvement in the transferred assets.

On February 25, 2010, we filed an automatic shelf registration statement on Form S-3 with the Securities and Exchange Commission. The registration is for an indeterminate number of securities and is effective for three years. Under this universal shelf registration statement, we have the capacity to offer and sell from time to time various types of securities, including common stock, preferred stock and debt securities, subject to market demand and ratings status.

Debt Retirements

In September 2009, we completed a \$100 million debt tender offer at a total cost of \$104 million. We purchased \$50 million aggregate principal amount of outstanding 5.95% medium-term notes maturing May 2011 and \$50 million aggregate principal amount of outstanding 4.625% medium-term notes maturing April 2010. We recorded a pre-tax debt extinguishment charge of \$4 million which included \$3 million for the premium paid and \$1 million for the write-off of unamortized original debt discount and issuance costs and fees on the transaction. These charges have been included within "Restructuring and other charges, net."

17. FAIR VALUE MEASUREMENTS

The following tables present our assets and liabilities that are measured at fair value on a recurring basis and the levels of inputs used to measure fair value:

	Balance Sheet Location	Fair Value Measurements At December 31, 2010 Using			Total
		Level 1	Level 2	Level 3	
(In thousands)					
Assets:					
Investments held in Rabbi Trusts:					
Cash and cash equivalents		\$ 2,348	—	—	\$ 2,348
U.S. equity mutual funds		8,409	—	—	8,409
Foreign equity mutual funds		5,188	—	—	5,188
Fixed income mutual funds		1,459	—	—	1,459

Interest rate swap	DFL and other assets	—	15,429	—	15,429
Total assets at fair value		\$17,404	15,429	—	\$32,833

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

	Balance Sheet Location	Fair Value Measurements At December 31, 2009 Using			Total
		Level 1	Level 2	Level 3	
(In thousands)					
Assets:					
Investments held in Rabbi Trusts	DFL and other assets	\$19,686	—	—	19,686
Interest rate swap	DFL and other assets	—	12,101	—	12,101
Total assets at fair value		\$19,686	12,101	—	31,787

The following table presents our assets that are measured at fair value on a nonrecurring basis and the levels of inputs used to measure fair value:

	Balance Sheet Location	Fair Value Measurements At December 31, 2010 Using			Total Losses ⁽²⁾
		Level 1	Level 2	Level 3	
Assets held for sale:					
Revenue earning equipment: ⁽¹⁾					
Trucks		\$ —	—	11,796	\$ 13,014
Tractors		—	—	8,818	9,432
Trailers		—	—	1,437	3,812
Total assets at fair value		\$ —	—	22,051	\$ 26,258

Fair Value Measurements At December 31, 2009 Using			
Level 1	Level 2	Level 3	Total Losses ⁽²⁾

Assets held for sale:				
Revenue earning equipment ⁽¹⁾	\$	—	44,276	\$ 52,284
Operating property and equipment	—	—	8,753	6,676
Total assets at fair value	\$	—	53,029	\$ 58,960

(1) Represents the portion of all revenue earning equipment held for sale that is recorded at fair value, less costs to sell.

(2) Total losses represent fair value adjustments for all vehicles held for sale throughout the period for which fair value less costs to sell was less than carrying value.

Revenue earning equipment held for sale is stated at the lower of carrying amount or fair value less costs to sell. Losses to reflect changes in fair value are presented within "Depreciation expense" in the Consolidated Statements of Earnings. For revenue earning equipment held for sale, we stratify our fleet by vehicle type (tractors, trucks and trailers), weight class, age and other relevant characteristics and create classes of similar assets for analysis purposes. Fair value was determined based upon recent market prices obtained from our own sales experience for sales of each class of similar assets and vehicle condition. Therefore, our revenue earning equipment held for sale was classified within Level 3 of the fair value hierarchy. During the years ended December 31, 2010, 2009, and 2008, we recorded a loss to reflect changes in fair value of \$26 million, \$52 million and \$29 million, respectively.

Operating property and equipment held for sale represented a SCS facility in Singapore for which the carrying amount was required to be written down to fair value of \$9 million, resulting in an impairment loss of \$7 million in 2009. Fair value was based on an appraisal of the facility determined using observable market data and adjusted for recent offers. Therefore, our operating property and equipment held for sale was classified within Level 3 of the fair value hierarchy.

98

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Total fair value of debt (excluding capital lease obligations) at December 31, 2010 and 2009 was \$2.86 billion and \$2.60 billion, respectively. For publicly-traded debt, estimates of fair value are based on market prices. For other debt, fair value is estimated based on rates currently available to us for debt with similar terms and remaining maturities. The carrying amounts reported in the Consolidated Balance Sheets for cash and cash equivalents, accounts receivable and accounts payable approximate fair value because of the immediate or short-term maturities of these financial instruments.

18. DERIVATIVES

From time to time, we enter into interest rate swap and cap agreements to manage our fixed and variable interest rate exposure and to better match the repricing of debt instruments to that of our portfolio of assets. We assess the risk that changes in interest rates will have either on the fair value of debt obligations or on the amount of future interest payments by monitoring changes in interest rate exposures and by evaluating hedging opportunities. We regularly monitor interest rate risk attributable to both our outstanding or forecasted debt obligations as well as our offsetting hedge positions. This risk management process involves the use of analytical techniques, including cash flow sensitivity analysis, to estimate the expected impact of changes in interest rates on our future cash flows.

In February 2008, we entered into an interest rate swap with a notional amount of \$250 million maturing in March 2013. The swap was designated as a fair value hedge whereby we receive fixed interest rate payments in exchange for making variable interest rate payments. The differential to be paid or received is accrued and recognized as interest expense. The interest rate swap agreement effectively changed \$250 million of fixed-rate debt with an interest rate of 6.00% to LIBOR-based floating-rate debt at a rate of 2.63% and 2.90% at December 31, 2010 and 2009, respectively. Changes in the fair value of the interest rate swap are offset by changes in the fair value of the debt instrument. Accordingly, there is no ineffectiveness related to the interest rate swap.

The location and amount of gains (losses) on derivative instruments and related hedged items reported in the Consolidated Statements of Earnings were as follows:

Fair Value Hedging Relationship	Location of Gain (Loss) Recognized in Income	December 31		
		2010	2009	2008
		(In thousands)		
Derivative: Interest rate swap	Interest expense	\$ 3,328	(6,290)	18,391
Hedged item: Fixed-rate debt	Interest expense	(3,328)	6,290	(18,391)
Total		\$ —	—	—

19. GUARANTEES

We have executed various agreements with third parties that contain standard indemnifications that may require us to indemnify a third party against losses arising from a variety of matters such as lease obligations, financing agreements, environmental matters, and agreements to sell business assets. In each of these instances, payment by Ryder is contingent on the other party bringing about a claim under the procedures outlined in the specific agreement. Normally, these procedures allow us to dispute the other party's claim. Additionally, our obligations under these agreements may be limited in terms of the amount and/or timing of any claim. We have entered into individual indemnification agreements with each of our independent directors, through which we will indemnify such director acting in good faith against any and all losses, expenses and liabilities arising out of such director's service as a director of Ryder. The maximum amount of potential future payments under these agreements is generally unlimited.

We cannot predict the maximum potential amount of future payments under certain of these agreements, including the indemnification agreements, due to the contingent nature of the potential obligations and the

99

distinctive provisions that are involved in each individual agreement. Historically, no such payments made by us have had a material adverse effect on our business. We believe that if a loss were incurred in any of these matters, the loss would not have a material adverse impact on our consolidated results of operations or financial position.

At December 31, 2010 and 2009, the maximum determinable exposure of each type of guarantee and the corresponding liability, if any, recorded on the Consolidated Balance Sheets were as follows:

Guarantee	December 31, 2010		December 31, 2009	
	Maximum Exposure of Guarantee	Carrying Amount of Liability	Maximum Exposure of Guarantee	Carrying Amount of Liability
	(In thousands)			
Vehicle residual value guarantees — finance lease programs ⁽¹⁾	\$ 1,787	1,350	2,285	1,255
Used vehicle financing	—	—	1,595	104
Standby letters of credit	6,774	6,774	7,506	7,527
Total	<u>\$ 8,561</u>	<u>8,124</u>	<u>11,386</u>	<u>8,886</u>

(1) Amounts exclude contingent rentals associated with residual value guarantees on certain vehicles held under operating leases for which the guarantees are conditioned upon disposal of the leased vehicles prior to the end of their lease term. At December 31, 2010 and 2009, our maximum exposure for such guarantees was approximately \$113 million and \$159 million, respectively, with \$4 million recorded as a liability at 2010 and 2009.

We have provided vehicle residual value guarantees to independent third parties for certain finance lease programs made available to customers. If the sales proceeds from the final disposition of the assets are less than the residual value guarantee, we are required to pay the difference to the independent third party. The individual customer finance leases expire periodically through 2014 but may be extended at the end of each lease term. At both December 31, 2010 and 2009, our maximum exposure for such guarantees was approximately \$2 million with \$1 million recorded as a liability.

We maintain agreements with independent third parties for the financing of used vehicle purchases by customers. Certain agreements require that we provide financial guarantees on defaulted customer contracts up to a maximum exposure amount. At December 31, 2010, the majority of these financing contracts had been repaid and our remaining exposure for such guarantees was not significant. At December 31, 2009, our maximum exposure for such guarantees was approximately \$2 million with \$0.1 million recorded as a liability.

At December 31, 2010 and 2009, we had letters of credit and surety bonds outstanding, which primarily guarantee various insurance activities as noted in the following table:

	December 31	
	2010	2009
	(In thousands)	
Letters of credit	\$188,499	179,507
Surety bonds	76,273	83,231

Certain of these letters of credit and surety bonds guarantee insurance activities associated with insurance claim liabilities transferred in conjunction with the sale of our automotive transport business, reported as discontinued operations in previous years. To date, the insurance claims representing per-claim deductibles payable under third-party insurance policies have been paid and continue to be paid by the company that assumed such liabilities. However, if all or a portion of the estimated outstanding assumed claims of approximately \$7 million at December 31, 2010 are unable to be paid, the third-party insurers may have recourse against certain of the outstanding letters of credit provided by Ryder in order to satisfy the unpaid claim deductibles. In 2009, in order to reduce our potential exposure to these claims, we drew upon an

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

outstanding letter of credit provided by the purchaser and have a deposit and corresponding liability, both of which are outstanding at December 31, 2010. Periodically, an actuarial valuation will be made in order to better estimate the amount of outstanding insurance claim liabilities.

20. SHARE REPURCHASE PROGRAMS

In February 2010, our Board of Directors authorized a \$100 million discretionary share repurchase program over a period not to exceed two years. In 2010, we completed this program and repurchased and retired 2,420,390 shares at an aggregate cost of \$100 million.

In December 2009, our Board of Directors authorized a share repurchase program intended to mitigate the dilutive impact of shares issued under our various employee stock, stock option and employee stock purchase plans. Under the December 2009 program, management is authorized to repurchase shares of common stock in an amount not to exceed the number of shares issued to employees under the Company's various employee stock, stock option and employee stock purchase plans from December 1, 2009 through December 15, 2011. The December 2009 program limits aggregate share repurchases to no more than 2 million shares of Ryder common stock. Share repurchases of common stock are made periodically in open-market transactions and are subject to market conditions, legal requirements and other factors. Management may establish a prearranged written plan under Rule 10b5-1 of the Securities Exchange Act of 1934 as part of the December 2009 program, which allow for share repurchases during Ryder's quarterly blackout periods as set forth in the trading plan. During 2010, we repurchased and retired 561,656 shares under this program at an aggregate cost of \$23 million. No shares were repurchased under this program during 2009.

In December 2007, our Board of Directors authorized a \$300 million discretionary share repurchase program over a period not to exceed two years. Additionally, our Board of Directors authorized a separate two-year anti-dilutive repurchase program. The anti-dilutive program limited aggregate share repurchases to no more than 2 million shares of our common stock. In 2009 and 2008, we repurchased and retired 2,348,909 shares and 2,615,000 shares, respectively, under the \$300 million program at an aggregate cost of \$100 million and \$170 million, respectively. In 2009 and 2008, we repurchased and retired 377,372 shares and 1,363,436 shares, respectively, under the anti-dilutive program at an aggregate cost of \$16 million and \$86 million, respectively.

22. EARNINGS PER SHARE INFORMATION

The following table presents the calculation of basic and diluted earnings per common share from continuing operations:

	Years ended December 31		
	2010	2009	2008
	(In thousands, except per share amounts)		
Earnings per share — Basic:			
Earnings from continuing operations	\$124,608	90,117	257,579
Less: Distributed and undistributed earnings allocated to nonvested stock	(1,759)	(964)	(2,353)
Earnings from continuing operations available to common shareholders — Basic	\$122,849	89,153	255,226
Weighted average common shares outstanding — Basic	51,717	55,035	56,204
Earnings from continuing operations per common share — Basic	\$ 2.38	1.62	4.54
Earnings per share — Diluted:			
Earnings from continuing operations	\$124,608	90,117	257,579
Less: Distributed and undistributed earnings allocated to nonvested stock	(1,756)	(964)	(2,341)
Earnings from continuing operations available to common shareholders — Diluted	\$122,852	89,153	255,238
Weighted average common shares outstanding — Basic	51,717	55,035	56,204
Effect of dilutive options	167	59	335
Weighted average common shares outstanding — Diluted	51,884	55,094	56,539
Earnings from continuing operations per common share — Diluted	\$ 2.37	1.62	4.51
Anti-dilutive options not included above	1,654	2,632	1,109

23. SHARE-BASED COMPENSATION PLANS

The following table provides information on share-based compensation expense and income tax benefits recognized in 2010, 2009 and 2008:

	Years ended December 31		
	2010	2009	2008
	(In thousands)		
Stock option and stock purchase plans	\$ 9,069	9,887	10,617
Nonvested stock	7,474	6,517	6,459
Share-based compensation expense	16,543	16,404	17,076
Income tax benefit	(5,572)	(5,412)	(5,673)
Share-based compensation expense, net of tax	\$10,971	10,992	11,403

Total unrecognized pre-tax compensation expense related to share-based compensation arrangements at December 31, 2010 was \$20 million and is expected to be recognized over a weighted-average period of approximately 1.5 years. The total fair value of equity awards vested during the years ended December 31, 2010, 2009, and 2008 were \$11 million, \$14 million, and \$14 million, respectively.

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Share-Based Incentive Awards

Share-based incentive awards are provided to employees under the terms of six share-based compensation plans (collectively, the "Plans"). The Plans are administered by the Compensation Committee of the Board of Directors. Awards under the Plans principally include at-the-money stock options and nonvested stock at December 31, 2010. There are 8.0 million shares authorized to be issued under the Plans at December 31, 2010. There were 3.1 million unused shares available to be granted under the Plans as of December 31, 2010.

A majority of share-based compensation expense is generated from stock options. Stock options are awards which allow employees to purchase shares of our stock at a fixed price. Stock option awards are granted at an exercise price equal to the market price of our stock at the time of grant. These awards, which generally vest one-third each year, are fully vested three years from the grant date and generally have contractual terms of seven years.

Restricted stock awards are nonvested stock rights that are granted to employees and entitle the holder to shares of common stock as the award vests. Participants are entitled to non-forfeitable dividend equivalents on such awarded shares, but the sale or transfer of these shares is restricted during the vesting period. Time-vested restricted stock rights typically vest in three years regardless of company performance. The fair value of the time-vested awards is determined and fixed on the grant date based on Ryder's stock price on the date of grant. Market-based restricted stock awards include a market-based vesting provision. For grants issued subsequent to 2008, employees only receive the grant of stock if Ryder's cumulative average total shareholder return (TSR) at least meets the S&P 500 cumulative average TSR for the applicable three-year period. For the grants issued prior to 2009, employees only receive the grant of stock if Ryder's total shareholder return (TSR) at least meets the S&P 500 TSR over the applicable three-year period. The fair value of the market-based awards is determined on the date of grant and is based on the likelihood of Ryder achieving the market-based condition. Expense on the market-based restricted stock awards is recognized regardless of whether the awards vest.

Employees granted market-based restricted stock rights also received market-based cash awards. The cash awards granted during 2010, 2009 and 2008 have the same vesting provisions as the market-based restricted stock rights except that Ryder's TSR must at least meet the TSR of the 33rd percentile of the S&P 500. The cash awards are accounted for as liability awards under the share-based compensation accounting guidance as the awards are based upon the performance of our common stock and are settled in cash. As a result, the liability is adjusted to reflect fair value at the end of each reporting period. The fair value of the cash awards was estimated using a lattice-based option pricing valuation model that incorporates a Monte-Carlo simulation. The liability related to the cash awards was \$4 million at December 31, 2010 and 2009.

The following table is a summary of compensation expense recognized related to cash awards in addition to share-based compensation expense reported in the previous table.

	Years ended December 31		
	2010	2009	2008
		(In thousands)	
Cash awards	\$2,052	2,456	3,333

We grant restricted stock units (RSUs) to non-management members of the Board of Directors. Once granted, RSUs are eligible for non-forfeitable dividend equivalents but have no voting rights. The fair value of the awards is determined and fixed on the grant date based on Ryder's stock price on the date of grant. The board member receives the RSUs upon their departure from the Board. The initial grant of RSUs will not vest unless the director has served a minimum of one year. When the board member receives the RSUs, they are redeemed for an equivalent number of shares of our common stock. Share-based compensation expense is recognized for RSUs in the year the RSUs are granted.

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Option Awards

The following is a summary of option activity under our stock option plans as of December 31, 2010, and changes during the year ended December 31, 2010:

	Shares (In thousands)	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term (In years)	Aggregate Intrinsic Value (In thousands)
Options outstanding at January 1	3,029	\$ 43.70		
Granted	897	32.99		
Exercised	(354)	32.04		
Forfeited or expired	(89)	42.47		
Options outstanding at December 31	<u>3,483</u>	<u>\$ 42.16</u>	<u>4.2</u>	<u>\$ 39,904</u>
Vested and expected to vest at December 31	<u>3,357</u>	<u>\$ 42.50</u>	<u>4.1</u>	<u>\$ 37,423</u>
Exercisable at December 31	<u>1,869</u>	<u>\$ 47.70</u>	<u>3.0</u>	<u>\$ 11,519</u>

The aggregate intrinsic values in the table above represent the total pre-tax intrinsic value (the difference between the market price of our stock on the last trading day of the year and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options at year-end. The amount changes

based on the fair market value of our stock.

Information about options in various price ranges at December 31, 2010 follows:

Price Ranges	Options Outstanding			Options Exercisable	
	Shares (In thousands)	Weighted-Average Remaining Contractual Term (In years)	Weighted-Average Exercise Price	Shares (In thousands)	Weighted-Average Exercise Price
Less than \$35.00	1,651	5.6	\$ 32.76	219	\$ 32.12
35.00-40.00	52	1.9	37.36	52	37.36
40.00-45.00	674	1.8	43.48	668	43.50
45.00 and over	1,106	3.6	55.59	930	54.96
Total	3,483	4.2	\$ 42.16	1,869	\$ 47.70

Stock Awards

The following is a summary of the status of Ryder's nonvested stock awards as of December 31, 2010 and changes during the year ended December 31, 2010:

	Time-Vested		Market-Based Vested	
	Shares (In thousands)	Weighted-Average Grant Date Fair Value	Shares (In thousands)	Weighted-Average Grant Date Fair Value
Nonvested stock outstanding at January 1	258	\$ 49.32	364	\$ 28.56
Granted	76	39.87	188	15.50
Vested	(1)	41.61	(68)	30.13
Forfeited	(3)	58.48	(15)	24.26
Nonvested stock outstanding at December 31	330	\$ 47.05	469	\$ 23.23

Stock Purchase Plan

We maintain an Employee Stock Purchase Plan (ESPP), which enables eligible participants in the U.S. and Canada to purchase full or fractional shares of Ryder common stock through payroll deductions of up to 15% of eligible compensation. The ESPP provides for quarterly offering periods during which shares may be purchased at 85% of the fair market value on either the first or the last trading day of the quarter, whichever is less. Stock purchased under the ESPP must generally be held for 90 days. The amount of shares authorized to be issued under the existing ESPP was 5.0 million at December 31, 2010. There were 1.1 million unused shares available to be purchased under the ESPP at December 31, 2010.

The following table summarizes the status of Ryder's ESPP:

	Shares (In thousands)	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (In years)	Aggregate Intrinsic Value (In thousands)
Outstanding at January 1	—	\$ —	—	—
Granted	179	34.10	—	—
Exercised	(179)	34.10	—	—
Forfeited or expired	—	—	—	—
Outstanding at December 31	—	\$ —	—	\$ —
Exercisable at December 31	—	\$ —	—	\$ —

Share-Based Compensation Fair Value Assumptions

The fair value of each option award is estimated on the date of grant using a Black-Scholes-Merton option-pricing valuation model that uses the weighted-average assumptions noted in the table below. Expected volatility is based on historical volatility of our stock and implied volatility from traded options on our stock. The risk-free rate for periods within the contractual life of the stock option award is based on the yield curve of a zero-coupon U.S. Treasury bond on the date the stock option award is granted with a maturity equal to the expected term of the stock option award. We use historical data to estimate stock option exercises and forfeitures within the valuation model. The expected term of stock option awards granted is derived from historical exercise experience under the share-based employee compensation arrangements and represents the period of time that stock option awards granted are expected to be outstanding. The fair value of market-based

106

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

stock awards is estimated using a lattice-based option-pricing valuation model that incorporates a Monte-Carlo simulation. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by employees who receive equity awards,

and subsequent events are not indicative of the reasonableness of the original estimates of fair value made by Ryder.

The following table presents the weighted-average assumptions used for options granted:

	Years ended December 31		
	2010	2009	2008
Option plans:			
Expected dividends	3.0%	2.8%	1.6%
Expected volatility	43.9%	46.4%	31.9%
Risk-free rate	1.7%	1.5%	2.4%
Expected term	3.4 years	3.1 years	3.7 years
Grant-date fair value	\$ 8.93	\$ 9.26	\$ 14.00
Purchase plan:			
Expected dividends	2.5%	2.8%	1.6%
Expected volatility	35.6%	67.6%	45.7%
Risk-free rate	0.2%	0.2%	1.9%
Expected term	0.25 years	0.25 years	0.25 years
Grant-date fair value	\$ 8.95	\$ 9.43	\$ 14.00

Exercise of Employee Stock Options and Purchase Plans

The total intrinsic value of options exercised during the years ended December 31, 2010, 2009 and 2008 was \$4 million, \$2 million and \$29 million, respectively. The total cash received from employees as a result of exercises under all share-based employee compensation arrangements for the years ended December 31, 2010, 2009 and 2008 was \$17 million, \$7 million and \$55 million, respectively. In connection with these exercises, the tax benefits realized from share-based employee compensation arrangements were \$1.0 million, \$0.4 million and \$8 million for the years ended December 31, 2010, 2009 and 2008, respectively.

24. EMPLOYEE BENEFIT PLANS

Pension Plans

We historically sponsored several defined benefit pension plans covering most employees not covered by union-administered plans, including certain employees in foreign countries. These plans generally provided participants with benefits based on years of service and career-average compensation levels. The funding policy for these plans is to make contributions based on annual service costs plus amortization of unfunded past service liability, but not greater than the maximum allowable contribution deductible for federal income tax purposes. We may, from time to time, make voluntary contributions to our pension plans, which exceed the amount required by statute. The majority of the plans' assets are invested in a master trust that, in turn, is invested primarily in listed stocks and bonds. As discussed under Pension Curtailments and Settlements, we have frozen all of our major defined benefit pension plans.

We have a non-qualified supplemental pension plan covering certain U.S. employees, which provides for incremental pension payments from our funds so that total pension payments equal the amounts that would have been payable from our principal pension plans if it were not for limitations imposed by income tax regulations. The accrued pension liability related to this plan was \$40 million and \$37 million at December 31, 2010 and 2009, respectively.

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

We also participate in multi-employer plans that provide defined benefits to certain employees covered by collective-bargaining agreements. Such plans are usually administered by a board of trustees comprised of the management of the participating companies and labor representatives. The net pension cost of these plans is equal to the annual contribution determined in accordance with the provisions of negotiated labor contracts. Assets contributed to such plans are not segregated or otherwise restricted to provide benefits only to our employees.

Pension Expense

Pension expense from continuing operations was as follows:

	Years ended December 31		
	2010	2009	2008
		(In thousands)	
Company-administered plans:			
Service cost	\$ 15,239	21,022	25,162
Interest cost	96,125	93,008	92,468
Expected return on plan assets	(93,135)	(74,925)	(120,627)
Settlement/curtailment loss (gain)	1,487	58	(3,607)
Amortization of:			
Transition obligation	(25)	(25)	(29)
Net actuarial loss	19,025	24,028	5,947
Prior service credit	(2,256)	(2,192)	(2,524)
	36,460	60,974	(3,210)
Union-administered plans	5,199	5,256	4,886
Net pension expense	\$ 41,659	66,230	1,676
Company-administered plans:			
U.S.	\$ 33,733	50,863	(5,568)
Foreign	2,727	10,111	2,358
	36,460	60,974	(3,210)
Union-administered plans	5,199	5,256	4,886

\$ 41,659 66,230 1,676

The following table sets forth the weighted-average actuarial assumptions used in determining annual pension expense:

	U.S. Plans			Foreign Plans		
	Years ended December 31			Years ended December 31		
	2010	2009	2008	2010	2009	2008
Discount rate	6.20%	6.25%	6.35%	5.93%	6.81%	5.66%
Rate of increase in compensation levels	4.00%	4.00%	4.00%	3.54%	4.24%	4.13%
Expected long-term rate of return on plan assets	7.65%	7.90%	8.40%	7.04%	7.15%	7.50%
Transition amortization in years	—	—	—	2	2	4
Gain and loss amortization in years	26	27	28	28	17	11

The return on plan assets assumption reflects the weighted-average of the expected long-term rates of return for the broad categories of investments held in the plans. The expected long-term rate of return is

108

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

adjusted when there are fundamental changes in expected returns or in asset allocation strategies of the plan assets.

Pension Curtailments and Settlements

Over the past few years we have made the following major amendments to our defined benefit retirement plans:

- In July 2009, our Board of Directors approved an amendment to freeze our United Kingdom (UK) retirement plan for all participants effective March 31, 2010.
- In July 2008, our Board of Directors approved an amendment to freeze the defined benefit portion of our Canadian retirement plan effective January 1, 2010 for current participants who did not meet certain grandfathering criteria.
- In January 2007, our Board of Directors approved the amendment to freeze the U.S. pension plans effective December 31, 2007 for current participants who did not meet certain grandfathering criteria.

As a result of these amendments, non-grandfathered plan participants ceased accruing benefits under the plan as of the respective amendment effective date and began receiving an enhanced benefit under a defined contribution plan. All retirement benefits earned as of the amendment effective date will be fully preserved and will be paid in accordance with the plan and legal requirements. The freeze of the Canadian defined benefit plan created a pre-tax curtailment gain in 2008 of \$4 million. There was no material impact to our financial condition and operating results from the other plan amendments.

During 2010, a number of employees in our Canadian pension plan elected to receive a lump-sum payment under the plan which resulted in a partial settlement of our benefit plan obligation. Accounting guidance requires that when a partial settlement occurs, the employer should recognize a pro rata portion of the unamortized net loss as pension expense. Accordingly, we recognized a pre-tax settlement loss during 2010 of \$1.5 million, which reflects the partial reduction in the projected benefit obligation due to the partial settlement.

109

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Obligations and Funded Status

The following table sets forth the benefit obligations, assets and funded status associated with our pension plans:

	December 31	
	2010	2009
	(In thousands)	
Change in benefit obligations:		
Benefit obligations at January 1	\$1,603,560	1,477,485
Service cost, including discontinued operations	15,239	21,405
Interest cost	96,125	93,008
Actuarial loss	104,893	58,236
Benefits paid	(65,377)	(67,335)
Settlement/curtailment	(4,635)	(7,677)
Foreign currency exchange rate changes	(5,572)	28,438
Benefit obligations at December 31	1,744,233	1,603,560
Change in plan assets:		
Fair value of plan assets at January 1	1,282,882	975,540
Actual return on plan assets	157,567	213,768
Employer contribution	63,793	130,931
Participants' contributions	372	1,303
Benefits paid	(65,377)	(67,335)
Settlement	(4,635)	—
Foreign currency exchange rate changes	(5,818)	28,675
Fair value of plan assets at December 31	1,428,784	1,282,882
Funded status	\$ (315,449)	(320,678)

Amounts recognized in the Consolidated Balance Sheets consisted of:

	December 31	
	2010	2009
	(In thousands)	
Noncurrent asset	\$ 20,609	10,588
Current liability	(2,984)	(2,695)
Noncurrent liability	(333,074)	(328,571)
Net amount recognized	<u>\$ (315,449)</u>	<u>(320,678)</u>

Amounts recognized in accumulated other comprehensive loss (pre-tax) consisted of:

	December 31	
	2010	2009
	(In thousands)	
Transition obligation	\$ (51)	(76)
Prior service credit	(7,630)	(9,886)
Net actuarial loss	<u>658,486</u>	<u>638,385</u>
Net amount recognized	<u>\$650,805</u>	<u>628,423</u>

110

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

In 2011, we expect to recognize approximately \$2 million of the prior service credit and \$20 million of the net actuarial loss as a component of pension expense.

The following table sets forth the weighted-average actuarial assumptions used in determining funded status:

	U.S. Plans December 31		Foreign Plans December 31	
	2010	2009	2010	2009
Discount rate	5.70%	6.20%	5.55%	5.93%
Rate of increase in compensation levels	4.00%	4.00%	3.55%	3.54%

At December 31, 2010 and 2009, our pension obligations (accumulated benefit obligations (ABO) and projected benefit obligations (PBO) greater than the fair value of related plan assets for our U.S. and foreign plans were as follows:

	U.S. Plans December 31		Foreign Plans December 31		Total December 31	
	2010	2009	2010	2009	2010	2009
	(In thousands)					
Accumulated benefit obligations	\$1,373,145	1,254,161	335,563	313,470	1,708,708	1,567,631
Plans with ABO in excess of plan assets:						
PBO	\$1,405,691	1,287,929	8,198	6,406	1,413,889	1,294,335
ABO	\$1,373,145	1,254,161	6,888	5,664	1,380,033	1,259,825
Fair value of plan assets	\$1,077,831	963,068	—	—	1,077,831	963,068
Plans with PBO in excess of plan assets:						
PBO	\$1,405,691	1,287,929	8,198	6,406	1,413,889	1,294,335
ABO	\$1,373,145	1,254,161	6,888	5,664	1,380,033	1,259,825
Fair value of plan assets	\$1,077,831	963,068	—	—	1,077,831	963,068

Plan Assets

Our pension investment strategy is to maximize the long-term rate of return on plan assets within an acceptable level of risk in order to minimize the cost of providing pension benefits. The plans utilize several investment strategies, including actively and passively managed equity and fixed income strategies. The investment policy establishes a target allocation for each asset class. Deviations between actual pension plan asset allocations and targeted asset allocations may occur as a result of investment performance during a month. Rebalancing of our pension plan asset portfolios is evaluated each month based on the prior month's ending balances and rebalanced if actual allocations exceed an acceptable range. U.S. plans account for approximately 75% of our total pension plan assets. The target allocations for our U.S. plans during 2010 were 65% equity securities, 30% fixed income and 5% to all other types of investments. Equity securities primarily include investments in both domestic and international mutual funds. Fixed income securities include corporate bonds, U.S. Treasuries, mutual funds and other fixed income investments, primarily mortgage-backed securities. Other types of investments include private equity funds. The target allocations for our international plans are 67% equity securities and 33% fixed income. Equity and fixed income securities in our international plans include actively and passively managed mutual funds.

Private equity funds	19,191	—	—	19,191
Total	\$1,282,882	213,996	1,049,695	19,191

(1) We made voluntary pension contributions at the end of December 2009 of \$102 million, which had not yet been invested in target asset classes.

The following is a description of the valuation methodologies used for our pension assets as well as the level of input used to measure fair value:

Cash and cash equivalents — These investments are short term investment funds that invest in government securities that have an original maturity of 90 days or less. Fair values for these investments were based on quoted prices in active markets and were therefore classified within Level 1 of the fair value hierarchy.

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Equity securities — These investments include common and preferred stocks and index mutual funds that track U.S. and foreign indices. Fair values for the common and preferred stocks were based on quoted prices in active markets and were therefore classified within Level 1 of the fair value hierarchy. The mutual funds were valued at the unit prices established by the funds' sponsors based on the fair value of the assets underlying the funds. Since the units of the funds are not actively traded, the fair value measurements have been classified within Level 2 of the fair value hierarchy.

Fixed income securities — These investments include investment grade bonds of U.S. issuers from diverse industries, index mutual funds that track the Barclays Aggregate Index and other fixed income investments (primarily mortgage-backed securities). Fair values for the corporate bonds were based on quoted prices in active markets and were therefore classified within Level 1 of the fair value hierarchy. The mutual funds were valued at the unit prices established by the funds' sponsors based on the fair value of the assets underlying the funds. Since the units of the funds are not actively traded, the fair value measurements have been classified within Level 2 of the fair value hierarchy. The other investments are not actively traded and fair values are estimated using bids provided by brokers, dealers or quoted prices of similar securities with similar characteristics or pricing models. Therefore, the other investments have been classified within Level 2 of the fair value hierarchy.

Private equity funds — These investments represent limited partnership interests in private equity funds. The partnership interests are valued by the general partners based on the underlying assets in each fund. The limited partnership interests are valued using unobservable inputs and have been classified within Level 3 of the fair value hierarchy.

The following table presents a summary of changes in the fair value of the pension plans' Level 3 assets for the years ended December 31, 2010 and 2009:

	2010	2009
(In thousands)		
Beginning balance at January 1	\$19,191	24,333
Return on plan assets:		
Relating to assets still held at the reporting date	1,079	(6,265)
Relating to assets sold during the period	1,925	2,420
Purchases, sales, settlements and expenses	(4,450)	(1,297)
Ending balance at December 31	<u>\$17,745</u>	<u>\$19,191</u>

The following table details pension benefits expected to be paid in each of the next five fiscal years and in aggregate for the five fiscal years thereafter:

(In thousands)

2011	\$ 78,202
2012	82,522
2013	87,116
2014	91,999
2015	96,864
2016-2020	561,957

For 2011, required pension contributions to our pension plans are estimated to be \$15 million.

Savings Plans

Employees who do not actively participate in pension plans and are not covered by union-administered plans are generally eligible to participate in enhanced savings plans. Plans provide for (i) a company

113

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

contribution even if employees do not make contributions, (ii) a company match of employee contributions of eligible pay, subject to tax limits and (iii) a discretionary company match based on our performance. Savings plan costs totaled \$27 million in 2010, \$22 million in 2009, and \$29 million in 2008.

Deferred Compensation and Long-Term Compensation Plans

We have deferred compensation plans that permit eligible U.S. employees, officers and directors to defer a portion of their compensation. The deferred compensation liability, including Ryder matching amounts and accumulated earnings, totaled \$23 million and \$22 million at December 31, 2010 and 2009, respectively.

We have established grantor trusts (Rabbi Trusts) to provide funding for benefits payable under the supplemental pension plan, deferred compensation plans and long-term incentive compensation plans. The assets held in the trusts at December 31, 2010 and 2009 amounted to \$21 million and \$22 million, respectively. The Rabbi Trusts' assets consist of short-term cash investments and a managed portfolio of equity securities, including our common stock. These assets, except for the investment in our common stock, are included in "Direct financing leases and other assets" because they are available to our general creditors in the event of insolvency. The equity securities are classified as trading securities and stated at fair value. Both realized and unrealized gains and losses are included in "Miscellaneous (income) expense, net." The Rabbi Trusts' investment of \$3 million and \$2 million in our common stock at December 31, 2010 and 2009, respectively, is reflected at historical cost and recorded against shareholders' equity.

Other Postretirement Benefits

We sponsor plans that provide retired U.S. and Canadian employees with certain healthcare and life insurance benefits. Substantially all U.S. and Canadian employees not covered by union-administered health and welfare plans are eligible for the healthcare benefits. Healthcare benefits for our principal plan are generally provided to qualified retirees under age 65 and eligible dependents. Generally, this plan requires employee contributions that vary based on years of service and include provisions that limit our contributions.

Total postretirement benefit expense was as follows:

	Years ended December 31		
	2010	2009	2008
	(In thousands)		
Service cost	\$1,374	1,455	1,437
Interest cost	2,722	2,828	2,727
Amortization of:			
Net actuarial loss	352	637	743
Prior service credit	(231)	(231)	(231)
Postretirement benefit expense	<u>\$4,217</u>	<u>4,689</u>	<u>4,676</u>
U.S.	<u>\$3,134</u>	<u>3,537</u>	<u>3,776</u>
Foreign	<u>1,083</u>	<u>1,152</u>	<u>900</u>
	<u>\$4,217</u>	<u>4,689</u>	<u>4,676</u>

The following table sets forth the weighted-average discount rates used in determining annual postretirement benefit expense:

	U.S. Plan Years ended December 31			Foreign Plan Years ended December 31		
	2010	2009	2008	2010	2009	2008
Discount rate	6.20%	6.25%	6.35%	6.00%	6.75%	5.25%

114

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Our postretirement benefit plans are not funded. The following table sets forth the benefit obligations associated with our postretirement benefit plans:

	December 31	
	2010	2009
	(In thousands)	

Benefit obligations at January 1	\$49,329	46,377
Service cost	1,374	1,455
Interest cost	2,722	2,828
Actuarial gain	(4,741)	(171)
Benefits paid	(1,894)	(2,292)
Foreign currency exchange rate changes	379	1,132
Benefit obligations at December 31	<u>\$47,169</u>	<u>49,329</u>

Amounts recognized in the Consolidated Balance Sheets consisted of:

	December 31	
	2010	2009
	(In thousands)	
Current liability	\$ (3,382)	(3,214)
Noncurrent liability	(43,787)	(46,115)
Amount recognized	<u>\$(47,169)</u>	<u>(49,329)</u>

Amounts recognized in accumulated other comprehensive loss (pre-tax) consisted of:

	December 31	
	2010	2009
	(In thousands)	
Prior service credit	\$(1,769)	(2,000)
Net actuarial loss	6,901	12,074
Net amount recognized	<u>\$ 5,132</u>	<u>10,074</u>

In 2011, we expect to recognize approximately \$0.2 million of the prior service credit and \$0.4 million of the net actuarial loss as a component of total postretirement benefit expense.

Our annual measurement date is December 31 for both U.S. and foreign postretirement benefit plans. Assumptions used in determining accrued postretirement benefit obligations were as follows:

	U.S. Plan December 31		Foreign Plan December 31	
	2010	2009	2010	2009
Discount rate	5.70%	6.20%	5.25%	6.00%
Rate of increase in compensation levels	4.00%	4.00%	3.50%	3.50%
Healthcare cost trend rate assumed for next year	8.00%	8.00%	8.00%	8.50%
Rate to which the cost trend rate is assumed to decline (ultimate trend rate)	5.00%	5.00%	5.00%	5.00%
Year that the rate reaches the ultimate trend rate	2017	2016	2017	2017

Changing the assumed healthcare cost trend rates by 1% in each year would not have a material effect on the accumulated postretirement benefit obligation at December 31, 2010 or annual postretirement benefit expense for 2010.

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The following table details other postretirement benefits expected to be paid in each of the next five fiscal years and in aggregate for the five fiscal years thereafter:

	(In thousands)
2011	\$ 3,382
2012	3,535
2013	3,844
2014	4,054
2015	4,233
2016-2020	21,480

25. ENVIRONMENTAL MATTERS

Our operations involve storing and dispensing petroleum products, primarily diesel fuel, regulated under environmental protection laws. These laws require us to eliminate or mitigate the effect of such substances on the environment. In response to these requirements, we continually upgrade our operating facilities and implement various programs to detect and minimize contamination. In addition, we have received notices from the Environmental Protection Agency (EPA) and others that we have been identified as a potentially responsible party under the Comprehensive Environmental Response, Compensation and Liability Act, the Superfund Amendments and Reauthorization Act and similar state statutes and may be required to share in the cost of cleanup of 17 identified disposal sites.

Our environmental expenses which are presented within "Operating expense" in our Consolidated Statements of Earnings, consist of remediation costs as well as normal recurring expenses such as licensing, testing and waste disposal fees. These expenses totaled \$7 million, \$8 million, and \$9 million, in 2010, 2009 and 2008, respectively. The carrying amount of our environmental liabilities was \$14 million and \$15 million at December 31, 2010 and 2009, respectively. Capital expenditures related to our environmental programs totaled approximately \$2 million, \$4 million, and \$3 million, in 2010, 2009, and 2008, respectively. Our asset retirement obligations related to fuel tanks to be removed are not included above and are recorded within "Accrued expenses" and "Other non-current liabilities" in our Consolidated Balance Sheets.

The ultimate cost of our environmental liabilities cannot presently be projected with certainty due to the presence of several unknown factors, primarily the level of contamination, the effectiveness of selected remediation methods, the stage of investigation at individual sites, the determination of our liability in proportion to other responsible parties and the recoverability of such costs from

third parties. Based on information presently available, we believe that the ultimate disposition of these matters, although potentially material to the results of operations in any one year, will not have a material adverse effect on our financial condition or liquidity.

26. OTHER ITEMS IMPACTING COMPARABILITY

Our primary measure of segment performance excludes certain items we do not believe are representative of the ongoing operations of the segment. Excluding these items from our segment measure of performance allows for better year over year comparison.

Sale of International Facility

In the fourth quarter of 2008, we were notified that a significant customer in Singapore would not renew their contract, which was set to expire in 2009. The notification required us to assess the recoverability of the facility used in this customer's operation. We concluded that the carrying value of the facility was not recoverable and that the carrying value exceeded the fair value. Consequently, we recorded a pre-tax impairment charge of \$2 million in 2008 to write-down the facility to its estimated fair value. Conditions in

116

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

the real estate market in Singapore continued to deteriorate during 2009. As a result, we recorded an additional pre-tax impairment charge during 2009 of \$7 million to write-down the facility to its estimated fair value. These charges were recorded within "Depreciation expense" in our Consolidated Statements of Earnings.

During 2010, real estate conditions improved and in the fourth quarter of 2010, we completed the sale of the facility and recognized a pre-tax gain of \$1 million. The gain was included within "Miscellaneous (income) expense" in our Consolidated Statements of Earnings.

Transaction Costs

During 2010, we incurred \$4 million of transaction costs related to the acquisition of TLC. These charges were recorded within "Operating expense" in our Consolidated Statements of Earnings.

27. OTHER MATTERS

We are a party to various claims, complaints and proceedings arising in the ordinary course of business including but not limited to those relating to litigation matters, environmental matters, risk management matters (e.g. vehicle liability, workers' compensation, etc.) and administrative assessments primarily associated with operating taxes. We have established loss provisions for matters in which losses are probable and can be reasonably estimated. It is not possible at this time for us to determine fully the effect of all unasserted claims and assessments on our consolidated financial condition, results of operations or liquidity; however, to the extent possible, where unasserted claims can be estimated and where such claims are considered probable we have recorded a liability. Litigation is subject to many uncertainties, and the outcome of any individual litigated matter is not predictable with assurance. It is possible that certain of the actions, claims, inquiries or proceedings could be decided unfavorably to Ryder. Although the final resolution of any such matters could have a material effect on our consolidated operating results for the particular reporting period in which an adjustment of the estimated liability is recorded, we believe that any resulting liability should not materially affect our consolidated financial position.

28. SUPPLEMENTAL CASH FLOW INFORMATION

Supplemental cash flow information was as follows:

	Years ended December 31		
	2010	2009	2008
	(In thousands)		
Interest paid	\$120,184	144,998	141,406
Income taxes paid (refunded)	4,906	(15,452)	26,142
Changes in accounts payable related to purchases of revenue earning equipment	17,559	(40,551)	34,935
Revenue earning equipment acquired under capital leases	137	1,949	1,430

29. SEGMENT REPORTING

Our operating segments are aggregated into reportable business segments based upon similar economic characteristics, products, services, customers and delivery methods. We operate in three reportable business segments: (1) FMS, which provides full service leasing, contract maintenance, contract-related maintenance and commercial rental of trucks, tractors and trailers to customers, principally in the U.S., Canada and the U.K.; (2) SCS, which provides comprehensive supply chain consulting including distribution and transportation services throughout North America and in Asia; and (3) DCC, which provides vehicles and drivers as part of a dedicated transportation solution in the U.S.

117

RYDER SYSTEM, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Our primary measurement of segment financial performance, defined as "Net Before Taxes" (NBT) from continuing operations, includes an allocation of CSS and excludes restructuring and other charges, net described in Note 5, "Restructuring and Other Charges" and excludes the items discussed in Note 26, "Other Items Impacting Comparability." CSS represents those costs incurred to support all business segments, including human resources, finance, corporate services, public affairs, information technology, health and safety, legal and corporate communications. The objective of the NBT measurement is to provide clarity on the profitability

of each business segment and, ultimately, to hold leadership of each business segment and each operating segment within each business segment accountable for their allocated share of CSS costs. Certain costs are considered to be overhead not attributable to any segment and remain unallocated in CSS. Included among the unallocated overhead remaining within CSS are the costs for investor relations, public affairs and certain executive compensation. CSS costs attributable to the business segments are predominantly allocated to FMS, SCS and DCC as follows:

- *Finance, corporate services, and health and safety* — allocated based upon estimated and planned resource utilization;
- *Human resources* — individual costs within this category are allocated in several ways, including allocation based on estimated utilization and number of personnel supported;
- *Information technology* — principally allocated based upon utilization-related metrics such as number of users or minutes of CPU time. Customer-related project costs and expenses are allocated to the business segment responsible for the project; and
- *Other* — represents legal and other centralized costs and expenses including certain share-based incentive compensation costs. Expenses, where allocated, are based primarily on the number of personnel supported.

Our FMS segment leases revenue earning equipment and provides fuel, maintenance and other ancillary services to the SCS and DCC segments. Inter-segment revenue and NBT are accounted for at rates similar to those executed with third parties. NBT related to inter-segment equipment and services billed to customers (equipment contribution) is included in both FMS and the business segment which served the customer and then eliminated (presented as "Eliminations").

118

RYDER SYSTEM, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Segment results are not necessarily indicative of the results of operations that would have occurred had each segment been an independent, stand-alone entity during the periods presented. Each business segment follows the same accounting policies as described in Note 1, "Summary of Significant Accounting Policies." Business segment revenue and NBT from continuing operations is as follows:

	Years ended December 31		
	2010	2009	2008
	(In thousands)		
Revenue:			
Fleet Management Solutions:

Total assets	\$5,944,971	674,196	117,595	106,906	(191,294)	6,652,374

2009

Share-based compensation expense	\$ 4,692	3,295	480	7,937	—	16,404
Depreciation expense ⁽¹⁾	\$ 850,214	28,692	1,335	975	—	881,216
Gains on vehicles sales, net	\$ (12,282)	(10)	—	—	—	(12,292)
Other non-cash charges, net ⁽²⁾	\$ 33,202	710	15	7,374	—	41,301
Interest expense (income) ⁽³⁾	\$ 144,605	1,707	(2,085)	115	—	144,342
Capital expenditures paid ⁽⁴⁾	\$ 635,135	8,550	1,436	6,832	—	651,953
Total assets	\$5,809,086	366,920	105,484	116,632	(138,292)	6,259,830

2008

Share-based compensation expense	\$ 5,749	3,011	432	7,884	—	17,076
Depreciation expense ⁽¹⁾	\$ 809,681	24,101	1,619	748	—	836,149
Gains on vehicle sales, net	\$ (38,974)	(46)	—	—	—	(39,020)
Other non-cash charges (credits), net ⁽²⁾	\$ 16,710	2,243	(3)	6,313	—	25,263
Interest expense (income) ⁽³⁾	\$ 155,436	12	(2,914)	(86)	—	152,448
Capital expenditures paid ⁽⁴⁾	\$1,181,006	33,177	3,476	12,742	—	1,230,401
Total assets	\$6,204,130	421,572	110,552	136,396	(183,142)	6,689,508

(1) Depreciation expense associated with CSS assets was allocated to business segments based upon estimated and planned asset utilization. Depreciation expense totaling \$9 million, \$12 million and \$13 million during 2010, 2009 and 2008, respectively, associated with CSS assets was allocated to other business segments.

(2) Includes amortization expense and impairment of goodwill (only in 2008).

(3) Interest expense was primarily allocated to the FMS segment since such borrowings were used principally to fund the purchase of revenue earning equipment used in FMS; however, interest expense (income) was also reflected in SCS and DCC based on targeted segment leverage ratios.

(4) Excludes FMS and SCS acquisition payments of \$212 million, \$89 million and \$247 million in 2010, 2009 and 2008, respectively, comprised primarily of long-lived assets. See Note 3, "Acquisitions," for additional information.

Certain Concentrations

We have a diversified portfolio of customers across a full array of transportation and logistics solutions and across many industries. We believe this will help to mitigate the impact of adverse downturns in specific sectors of the economy. Our portfolio of full service lease and commercial rental customers is not concentrated in any one particular industry or geographic region. We derive a significant portion of our SCS revenue from the automotive industry, mostly from manufacturers and suppliers of original equipment parts. During 2010, 2009 and 2008, the automotive industry accounted for approximately 43%, 42% and 47%, respectively, of SCS total revenue.

Full year	\$ 4,887,254	90,117	61,945	1.62	1.62	1.11	1.11

Quarterly and year-to-date computations of per share amounts are made independently; therefore, the sum of per-share amounts for the quarters may not equal per-share amounts for the year.

See Note 4, "Discontinued Operations," Note 5, "Restructuring and Other Charges," and Note 26, "Other Items Impacting Comparability," for items included in earnings during 2010 and 2009.

Earnings in the fourth quarter of 2010 included an income tax benefit of \$11 million, or \$0.21 per diluted common share, related to the favorable settlement of prior tax years as well as the expiration of a statute of limitation. Earnings in the fourth quarter of 2009 included an income tax benefit of \$4 million, or \$0.07 per diluted common share, associated with the reduction of deferred income taxes due to enacted changes in Ontario tax laws.

(2) Deductions represent receivables written-off, lease termination payments, insurance claim payments during the period and net foreign currency translation adjustments.

(3) Self-insurance accruals include vehicle liability, workers' compensation, property damage, cargo and medical and dental, which comprise our self-insurance programs. Amount charged to earnings include development in prior year selected loss development factors which reduced earnings by \$3 million in 2010 and benefited earnings by \$1 million and \$23 million in 2009 and 2008, respectively.

123

None.

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of management, including Ryder's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of Ryder's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that at December 31, 2010, Ryder's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) were effective.

Management's Report on Internal Control over Financial Reporting

Management's Report on Internal Control over Financial Reporting and the Report of Independent Registered Certified Public Accounting Firm thereon are set out in Item 8 of Part II of this Form 10-K Annual Report.

Changes in Internal Controls over Financial Reporting

During the three months ended December 31, 2010, there were no changes in Ryder's internal control over financial reporting that has materially affected or is reasonably likely to materially affect such internal control over financial reporting.

On December 16, 2010, the Company entered into a severance agreement with Art A. Garcia, the Company's Executive Vice President and Chief Financial Officer that provides for certain severance benefits if the executive's employment is terminated due to death, disability, without cause or after a change in control (as each term is defined in the severance agreement). The benefits provided by Mr. Garcia's agreement are substantially the same benefits as those set forth in the Form of Severance Agreement that was filed with the SEC on February 11, 2009 and which is described under "Potential Payments Upon Termination or Change of Control" in our Schedule 14A filed with the SEC on March 29, 2010 (the "2010 Schedule 14A"); provided, however, that rather than provide for a gross-up of payments in the case that any payment under the agreement would constitute an "excess parachute payment" within the meaning of Section 280G of the Internal Revenue Code of 1986 as amended (the "Code"), our severance agreement with Mr. Garcia provides that the Company shall reduce (but not below zero) the aggregate present value of the payments under the agreement to an amount which does not cause any payment to be subject to the excise tax under Section 4999 of the Code, if reducing the payments under the agreement would provide the executive with a greater net after-tax amount than would be the case if no reduction was made. The description of the form severance agreement set forth under "Potential Payments Upon Termination or Change of Control" in our 2010 Schedule 14A is incorporated by reference herein.

The information required by Item 10 with respect to executive officers is included within Item 1 in Part I under the caption "Executive Officers of the Registrant" of this Form 10-K Annual Report.

124

The information required by Item 10 with respect to directors, audit committee, audit committee financial experts and Section 16(a) beneficial ownership reporting compliance is included under the captions "Election of Directors," "Audit Committee" and "Section 16(a) Beneficial Ownership Reporting Compliance" in our definitive proxy statement, which will be filed with the Commission within 120 days after the close of the fiscal year, and is incorporated herein by reference.

Ryder has adopted a code of ethics applicable to its Chief Executive Officer, Chief Financial Officer, Controller and Senior Financial Management. The Code of Ethics forms part of Ryder's Principles of Business Conduct which are posted on the Corporate Governance page of Ryder's website at www.ryder.com.

The information required by Item 11 is included under the captions "Compensation Discussion and Analysis," "Executive Compensation," "Compensation Committee," "Compensation Committee Report on Executive Compensation" and "Director Compensation" in our definitive proxy statement, which will be filed with the Commission within 120 days after the close of the fiscal year, and is incorporated herein by reference.

The information required by Item 12 with respect to security ownership of certain beneficial owners and management is included under the captions "Security Ownership of Officers and Directors" and "Security Ownership of Certain Beneficial Owners" in our definitive proxy statement, which will be filed with the Commission within 120 days after the close of the fiscal year, and is incorporated herein by reference.

The information required by Item 12 with respect to related stockholder matters is included within Item 5 in Part I under the caption "Securities Authorized for Issuance under Equity Compensation Plans" of this Form 10-K Annual Report.

The information required by Item 13 is included under the captions "Board of Directors" and "Related Person Transactions" in our definitive proxy statement, which will be filed with the Commission within 120 days after the close of the fiscal year, and is incorporated herein by reference.

The information required by Item 14 is included under the caption "Ratification of Independent Registered Certified Public Accounting Firm" in our definitive proxy statement, which will be filed with the Commission within 120 days after the close of the fiscal year, and is incorporated herein by reference.

125

(a) Items A through G and Schedule II are presented on the following pages of this Form 10-K Annual Report:

1. Financial Statements for Ryder System, Inc. and Consolidated Subsidiaries:	
A) Management's Report on Internal Control over Financial Reporting	61
