

# Premium Rotary Table Systems

We understand the engineering intricacies that vary by industry. That's why Pioneer actively invests in research and development to enhance our already superior line of products and allow for development of individualized solutions. We are continuously working to expand our available product lines by listening to our customers while staying on top of market trends and new technology.

Since 1974, **PIONEER** has delivered world class tool and work holding products, earning a reputation built on unsurpassed service, custom solutions, and innovation.

We believe that a quality tool requires quality balance and are uncompromising in our pursuit to provide the most cost effective work holding in the market, going above and beyond the industry standard. Why? Because we know that higher accuracy results in superior outcomes, while also reducing wear and tear, and ultimately saving our customers money by extending their tool life.

Whatever your need, we have your business covered with our Premium and Standard product lines. We are passionate about providing our customers the latest, most sophisticated technology to guarantee a competitive advantage. We guarantee better performance through increased consistency and accuracy and invite you to explore the Pioneer difference.

## Premium Performance Rotary Table

Heavy-duty Premium performance Table  
**YNCP & BNC Series**  
**P.11**

Premium Compact 5 Axis Table  
**TNT Series**  
**P.21**

Standard-duty performance table  
**JNC Series**  
**P.15**

Index Controller  
**AC4 & AC3**  
**P.23**

Economical EDM Rotary Table  
**JNC EDM**  
**P.17**

**Accessories**  
**P.27**

Compact EDM Rotary Table  
**ERB EDM**  
**P.19**

## PIONEER Premium Rotary Table

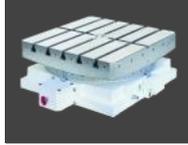

**Standard Type**  
**P.31**

**Horizontal Rotary/Index  
Center Table**  
**P.61**

**Large Size AX Rotary Table**  
**P.35**

**Precision Index Table**  
**P.67**

**Back Mounted Motor Type**  
**P.37**

**Horizontal Machining Center  
Table With Pallets**  
**P.69**

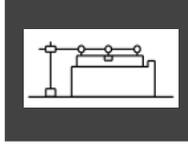

**Roller Gear Cam Rotary  
Table**  
**P.39**

**Manual Tilting Tailstocks**  
**P.71**

**Multi-Spindle Type**  
**P.41**

**Accuracy Standards**  
**P.75**

**NC Coupling Indexer**  
**P.45**

**Rotary table inquiry form**  
**P.77**

**Tilting Table**  
**P.51**

# Power to Perform

**YUKIWA** and **PIONEER** put the highest level of technology and engineering together to build the CNC Rotary Tables that have the power to perform.

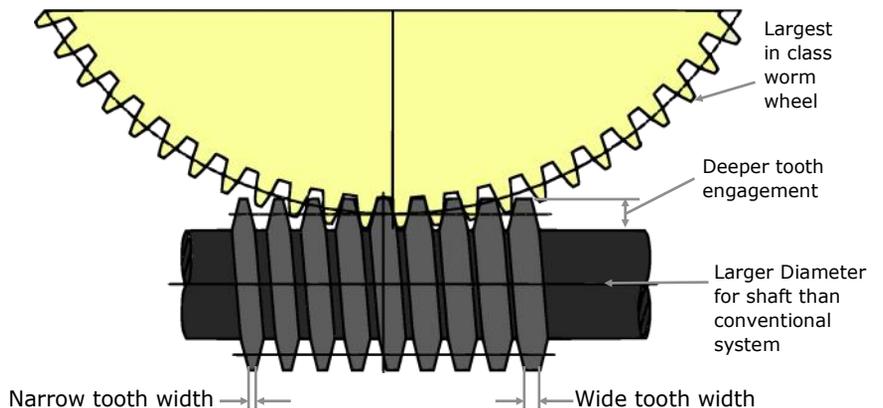

## Durable and Rigid Dual-Lead Gear System

All YUKIWA and PIONEER tables use a combination of case hardened special alloy dual-lead screw that has larger shaft diameter, and special high tensile strength brass worm wheel ensures exceptional wear resistant and long durability for the life of the gear system.

## Largest in Class Worm Wheel

Using the largest diameter in class worm wheel adds extra rigidity, smoothness and torque transfer efficiency to the gear system. It also allows deeper tooth engagement that improves surface contact by 30% compared to a conventional wheel, securing extra rigidity for heavier duty application.

Adjustment of back lash is easy and quick!

### 1 million index test

Model JNC140

Weight 50 lbs

1 million Indexes = Equivalent to 1 Index / 1Minute cycle, 24/7, 1.9years worth

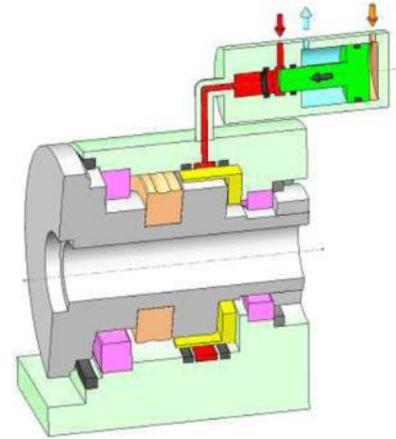

Backlash amount

Start 0.0005" (13 micron)

**End 0.0009" (23 micron)**

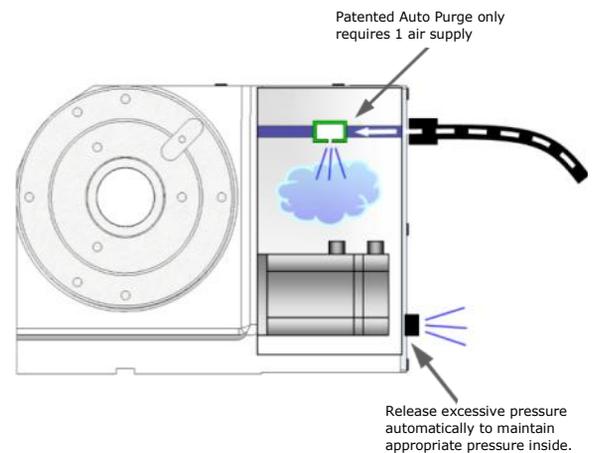

## The Most Powerful Brake System

With Yukiwa's proprietary brake system, YNCP and TNT series deliver the most powerful brake torque, but you do not need an expensive and cumbersome hydraulic supply. Thanks to the Yukiwa's compact built-in air over hydraulic booster, simply supply standard shop air and it immediately generates strong brake torque equivalent to a hydraulic brake system. This feature makes the YUKIWA table the heaviest duty in its class.

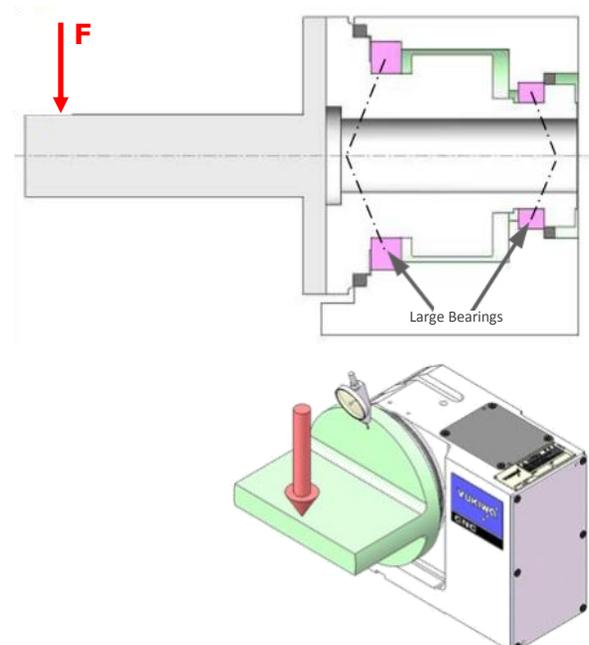

## Auto Air Purge Protects You From Water Hazards

If you have ever experienced problems with the rotary tables within a couple of year or so, 90% of the problems are with electric devices like servo motors, solenoid switches and wire harness caused by cutting fluid. As high pressure coolant is getting more popular, it has become more important to select a table that has excellent water protection. Yukiwa's patented auto air purging system is the ultimate answer. It always keeps the appropriate pressure inside the cover to protect electric devices from water hazards. Auto Air Purge is standard on all Yukiwa models. Air purge is available as an option for most PIONEER models. Don't let the water down your machine any more!

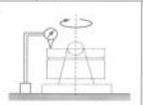

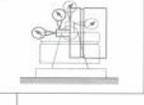

## Rock Solid Design gets your job done right

YUKIWA's True Dual Bearing System with Triple Support makes the YNCP and TNT series most robust and rock solid table in its class. Large bearings are located beneath the table face providing axial and radial support. Unlike most competitors who use only "1" bearing, YUKIWA added one more bearing at the very end of the spindle for extra support. Mated with the largest diameter spindle, YNCP and TNT series are the most robust and rock solid table. This massive construction reduces displacement from machining load by nearly 80% compared to competitors equivalent table. Whether you need to just index or simultaneous cut, remember your accuracy relies on the rigidity of the rotary table. YUKIWA rotary tables guarantees your job gets done right.

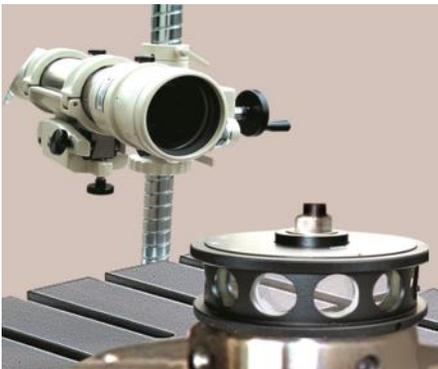

**100% inspection is our policy**

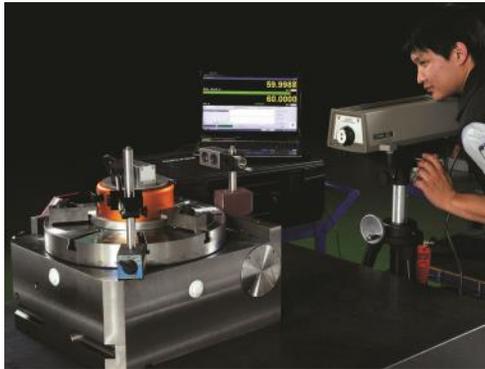

In order to guarantee quality for our rotary tables 100%, we believe the only way is to inspect every single rotary table before we ship. YUKIWA and PIONEER tables are subject to 100% inspection at the factory to ensure quality and performance of the rotary tables meet or exceed specifications. All YUKIWA and PIONEER table are provided with actual inspection certificate from the factory so you know your table has guaranteed quality. Further more, all YUKIWA tables are subject to test run at least 3 hours at the factory.

| Tilting Rotary Table - Inspection Report |  |  |   |        |   |  |  |
|--|--|--|---|--------|---|--|--|
| Model                                    | TNT170R  | Manufacturing Serial No.                         | 120   |        |   |  |  |
| Order                                    |  |  |   |        |   |  |  |

**Top notch inspection equipment ensures accuracy**

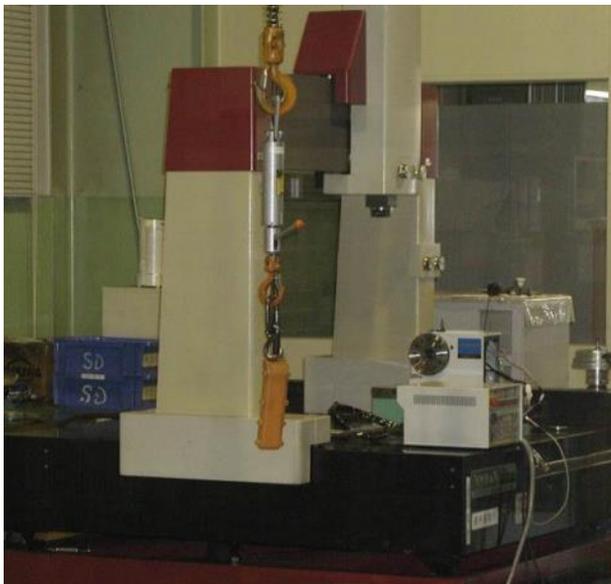

Nikon autocollimator

HP optical angle encoder

Wyler electric level tester

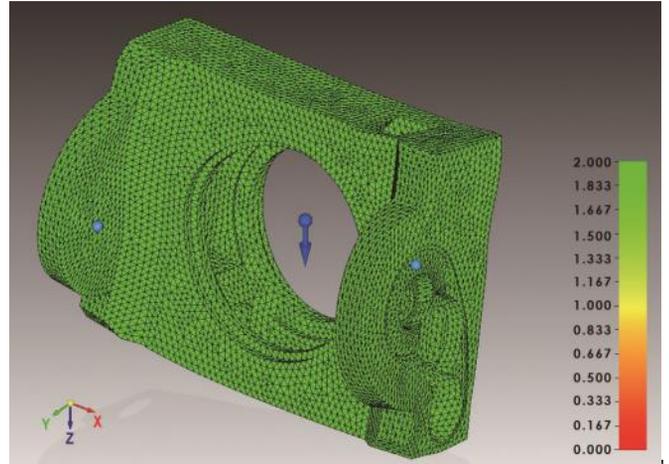

Large CMM for after finished table inspection

ZEISS CMM for components inspection

**State of the art factory equipment makes**

YUKIWA and PIONEER with the state of the art factory equipment produce the widest range of CNC rotary table products such as: 5" most affordable table to up to 80" super large table, compact 5 axis table for BT30 application to up to 800mm 5 axis trunnion table, industry standard worm gear system, roller gear cam, Direct Drive system, and many more. From our standard rotary tables to special tailor made rotary tables, we have the ability to quote, build and service. This feature makes us the "one stop shop" for all your rotary table needs.

**PIONEER** brings an Installation and Service department  
**SECOND TO NONE**

**PIONEER** brings an Installation and Service department second to none, with over 20 years experience in full rotary table 4th and 5th Axis installations as well as repair and service on many popular brands.

- Full Turnkey Installations on many Fanuc based controls including Fanuc 0i, 16i, 18i, 21i series and more.
- Guaranteed Compatibility - We only install OEM Motors & Controllers to guarantee 100% compatibility with the machine control.

#### **Installation includes:**

- Drive (Amplifier) Installation
- Table Installation
- Parameter Updates
- External Cable Installation
- Cable Set
- Communication Cables
- Fiber Optic Cables
- Bulkhead Cable Set

#### **Rotary Tables or Indexer - Which one do you need?**

- **Indexer:** using a secondary controller for part positioning. While simultaneous or contour milling is not possible with indexer, advantage of indexer is you can move the indexer and controller from machine to machine easily when you need it on the other machine. Indexer option only needs one M-code function to send FIN signal to the secondary controller. Most machines these days come with M-code function so check your local machine dealer or builder if the machine has the M-code function.
- **Integrated Rotary Table:** which is wired directly to the machine control and functions as an additional true axis of the machine. This configuration can be used for positioning and simultaneous cutting. While interfacing is a lot more complicated than indexer (we can do that for you!), the benefits and options are dramatically improved. Integrated Rotary Table is the only option that enables you to perform true 4th and 5th axis work on your machine.

#### **Machine and control capability**

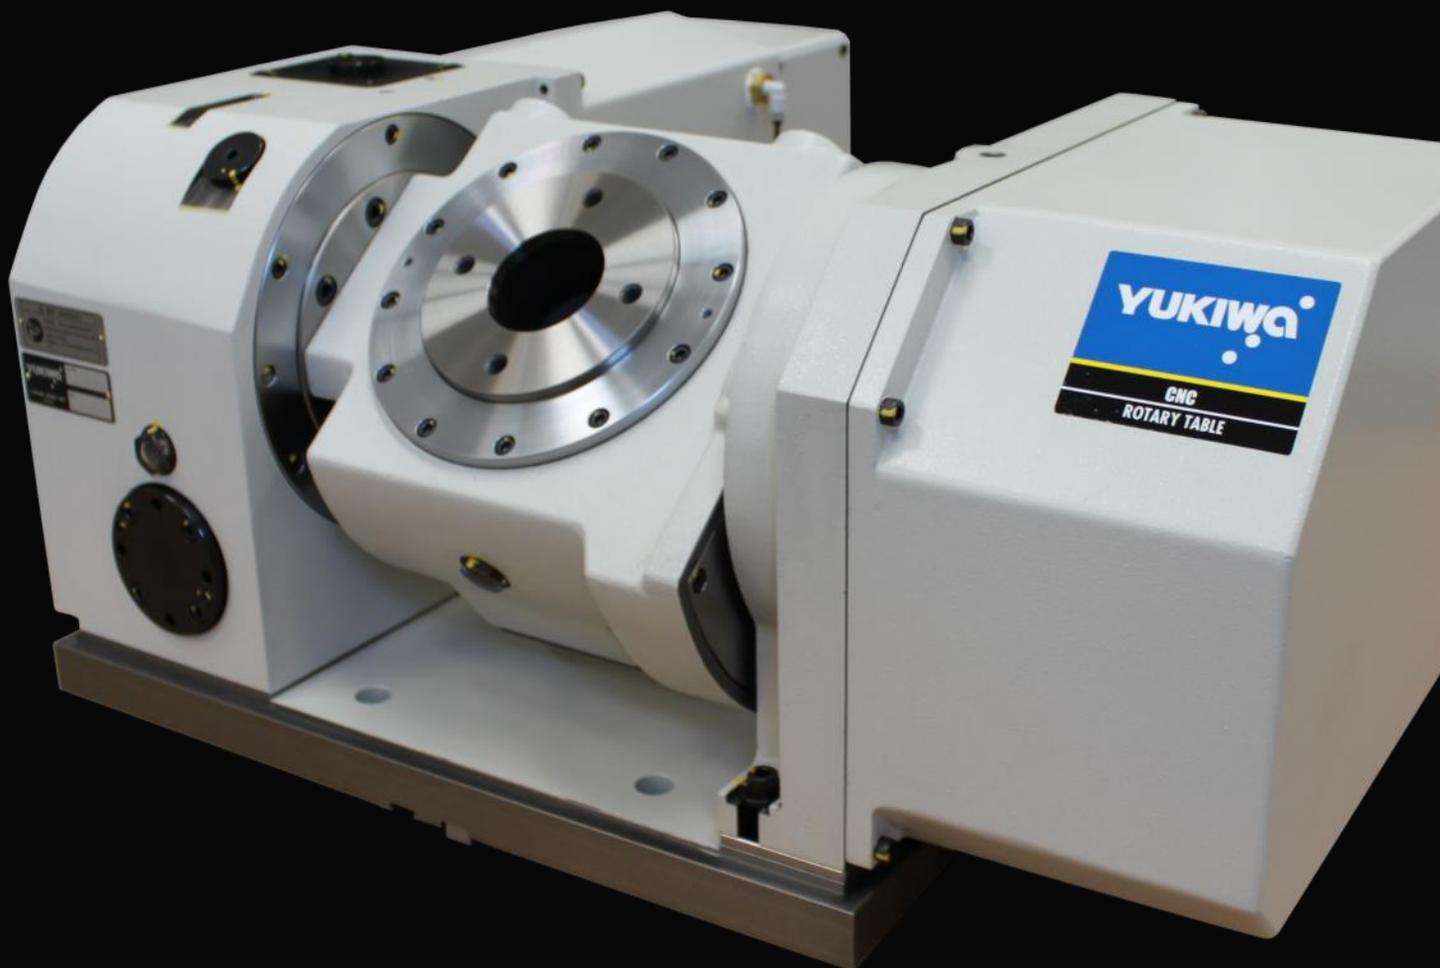

Even though you want to install 4th & 5th axis rotary table if the machine control is capable of only 4 simultaneous axis, it will only be 4th axis and you will need separate control for your 5th axis. It is also possible that your machine control is capable of 5 simultaneous axis but your machine does not have 5th axis software preinstalled at the factory. If you are not sure, we can help you find your machine and control capability. With over 15 years of installation experience PIONEER knows many different machines and controls.

#### **What machine and control brand can PIONEER do the installation?**

With over 15 years of experience we can install on most Fanuc based control machines including Mori Seiki. Installation on Yaskawa and Mitsubishi control can be available, too. We just need to know your machine make, model, year and control model, or simplest and best way is send us the machine data sheet then we can advise you if we can offer installation immediately.

Note that availability of installation on custom controls or proprietary control like Haas, Mazak, Okuma etc are subject to availability of information and support from the machine builder and/or dealer.

# Premium Performance Rotary Tables

**BNC320R**

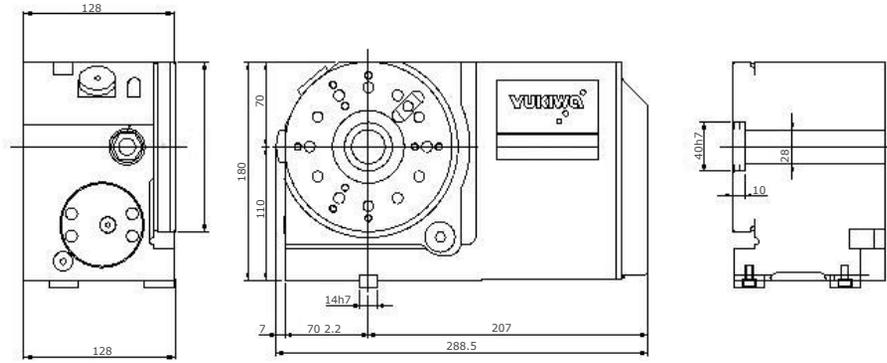

- Affordable Quality Japanese manufactured rotary table
- Compact Design suitable for small machines.
- Accurate indexing & high durability worm gearing system and solid once piece face plate and spindle design
- Exceptional water protection with patented Auto Air Purging System
  - o Protects unit against high pressure coolant
  - o Suitable for grinding, graphite and EDM application
- Available as :
  - o Integrated 4<sup>th</sup> axis
  - o Indexer with programmable YUKIWA AC4 control box
  - o Left hand configurations
  - o Super high resolution with optional rotary scale

**JNC170R**

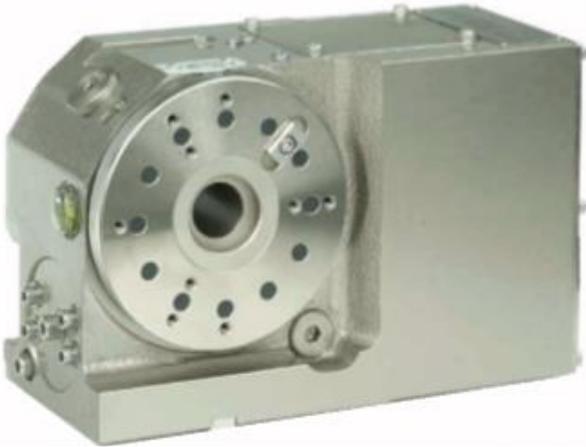

**JNC200R**

**JNC 250R**

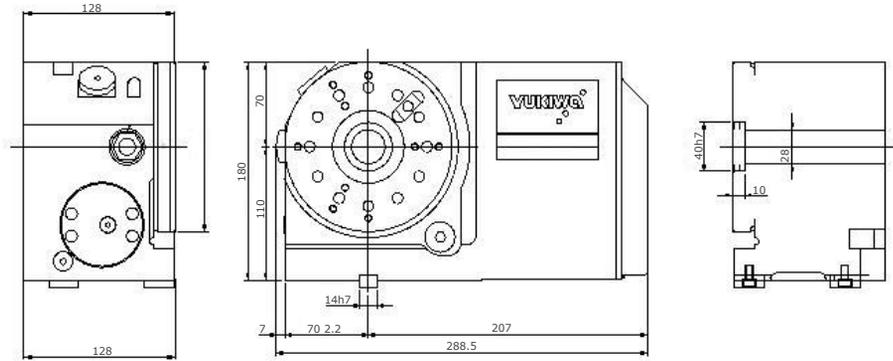

- Most affordable EDM rotary and indexing solution
- Submersible protection w/ Standard Auto Air Purging System (PAT)
- Optional stainless steel face plate with commutator block
- Optional nickel plating for corrosion protection
- Super high resolution indexing accuracy w/optional rotary scale
- Vertical installation standard – Optional horizontal available
- Available as :
  - o Integrated 4<sup>th</sup> axis
  - o Indexer with programmable YUKIWA AC4 control box

**JNC 250R-EDM**

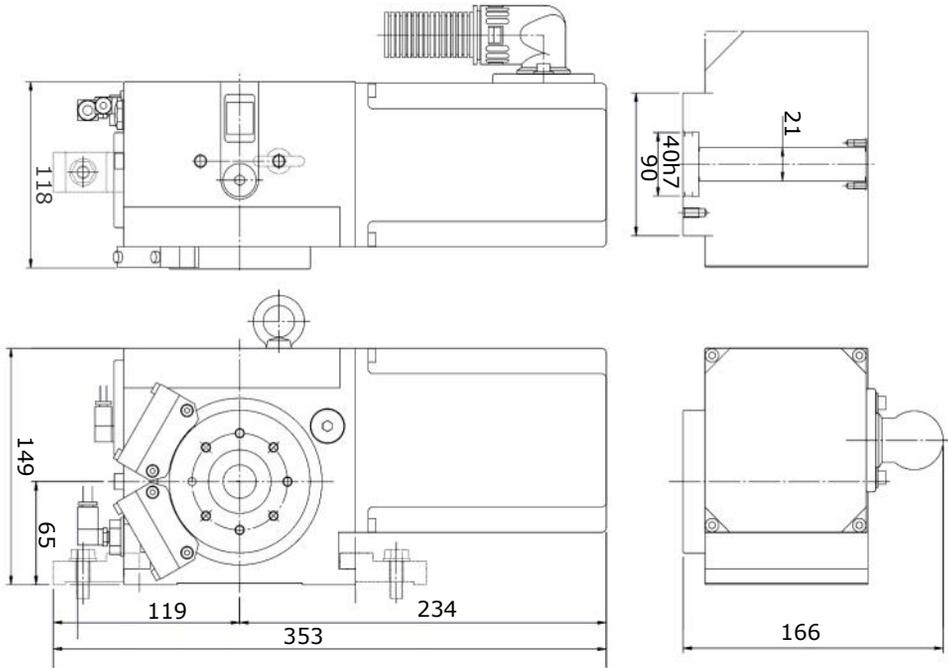

- Stainless steel body for EDM
- Low weight and compact size: 149mm of height from bottom face ( at vertical position)
- Low Height : Table Diameter  $\Phi$ 90mm. Center height: 65mm
- Fully submersible with water protection with sealed structure and patented Auto Air Purging
- Super high resolution indexing accuracy w/optional rotary scale
- Available as
  - o Integrated additional axis
  - o Indexer with programmable YUKIWA AC4 control box

ERB90-EDM

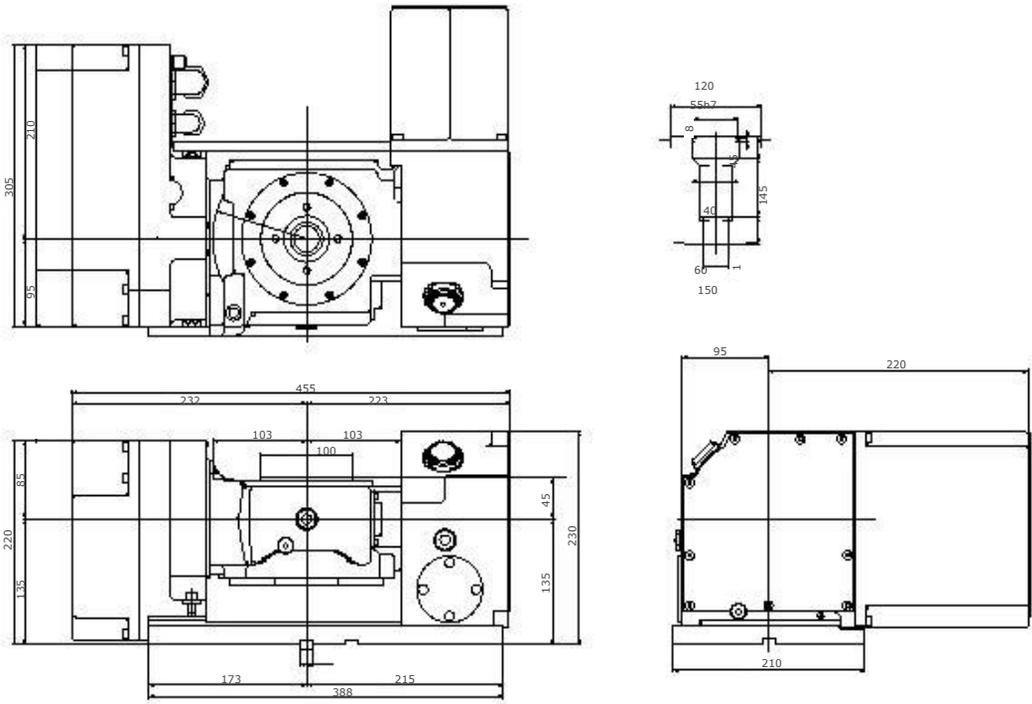

- Most compact design in class to fit small machines
- Largest machine-able work area in class
- Strongest brake torque in class with "Built In" air over hydraulic booster
- Heaviest duty design in class:
  - o True Dual Bearing design with nose & tail bearing spindle for "Best in Class" Rigidity
  - o Largest diameter bearing, worm wheel and spindle diameter for heavier duty milling
- Exceptional water protection with patented Auto Air Purging System
- Available as :
  - o Integrated 5<sup>th</sup> axis
  - o Integrated 4<sup>th</sup> axis + programmable Yukiwa AC4 controller on tilt axis
  - o Indexer with programmable YUKIWA AC4 control boxes
  - o Left hand configurations (TNT170 only)
  - o Super high resolution with optional rotary scale

| External interlocking cable                   | AC3-60-W02  |  |                                       |        |

### External Dimensions / Connections

## Data display

To Display program, current position parameter, diagnosis, data and etc.

**P:** Program numbers

**N:** Step numbers

**ADRS:** Address for program function

**DATA:** The first digit from the left will be indicated as follows:

|                        |   |   |
|------------------------|---|---|
| Rotation direction     | - | + |
| Shortcut               | ↩ | ↪ |
| Effective Stroke Limit | ≡ | ≡ |

**W** Flickering during return to work origin and will be ON when the table is on work origin.

**M** Flickering during return to machine origin and will be ON when the table is on machine origin.

**INC** ON during incremental command.

## Emergency Stop Button

When pressed, the motor will be on SERVO-OFF.

For releasing, turn to right.

## Interlocking

Always to show the state with interlocking signals.

FN1, FN2, and ALM are output signals, while all others are input signals.

## Rotary Table

Always to show the state with signals of rotary table.

**LSZ** Proximity/Limit switch for zero point deceleration.

**LSC** Proximity/Limit switch for clamping confirmation.

**CLP** Flickering during the clamping and will be ON after confirmation

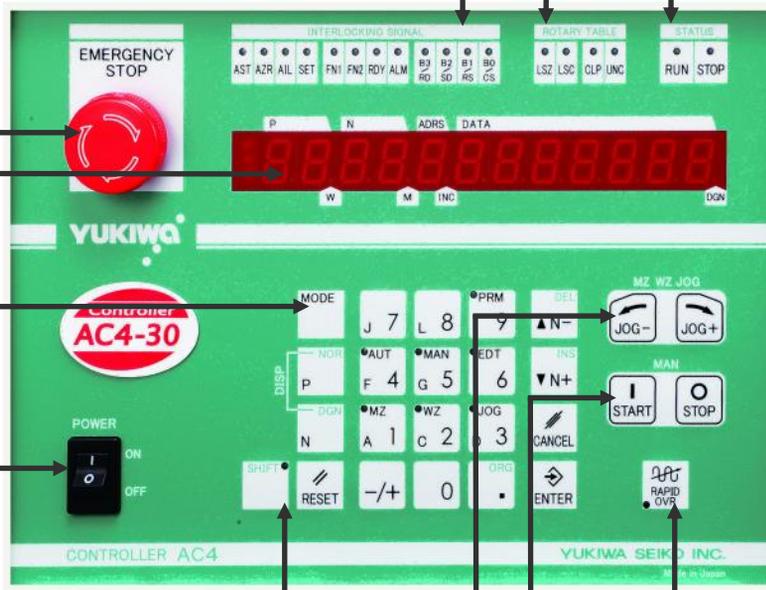

**UNC** Flickering during the unclamping and will be ON after confirmation.

## Status

Always to show running status.

**RUN** ON during program execution.

**STOP** ON when stopped or when alarming appears, but flickering during the emergency stop.

## Power Switch

ON: Controller will be switched on.

## MODE Numeric Key

Mode is selected by entering figures after pressing.

Selected mode will be indicated on the upper left side of the figures.

**MZ** Machine origin mode (return / setting)

**WZ** Work origin mode (return / setting)

**JOG** To effect one pulse feed or jog feed.

**AUT** Automatic operation mode interlocked with the mating machine.

**MAN** Operation by the controller only.

**EDT** Program editing. Initiating and selecting.

**PRM** Parameter setting mode.

For the figure key, the first pressing will enter the address of EDT mode, and the second pressing and further pressings will enter figures.

## RAPID OVR Rapid Override

Flickering frequency will change per percentage and at 100%, the lamp will be OFF.

**START** execute one block of the program in MAN mode, and stop with **STOP**

## JOG

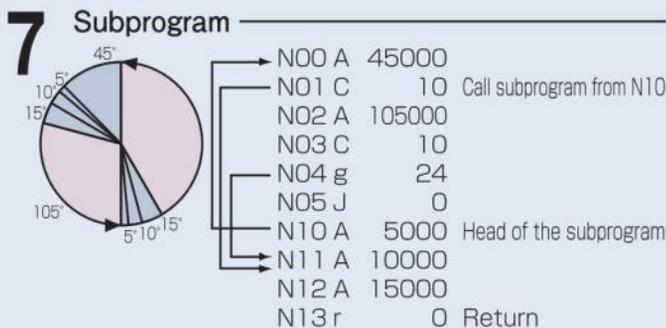

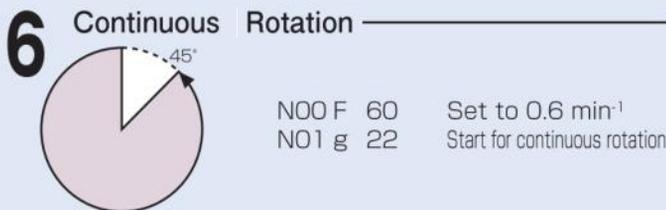

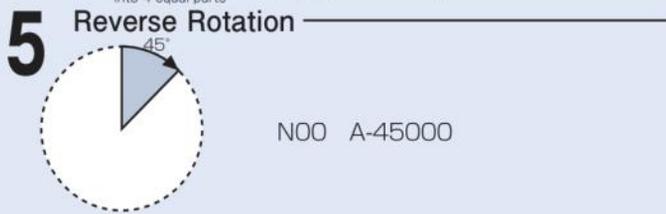

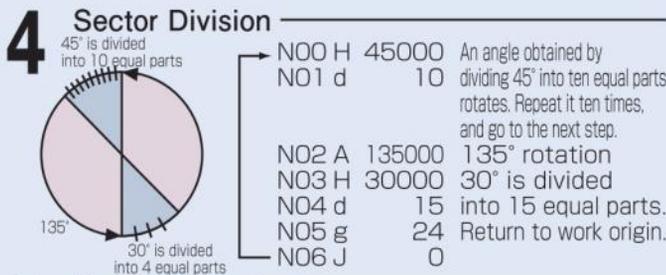

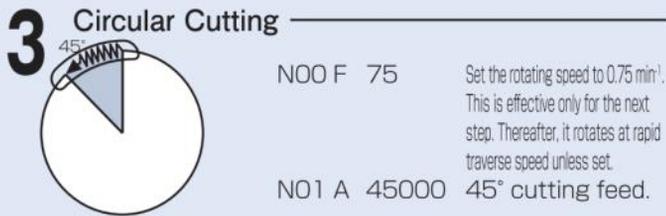

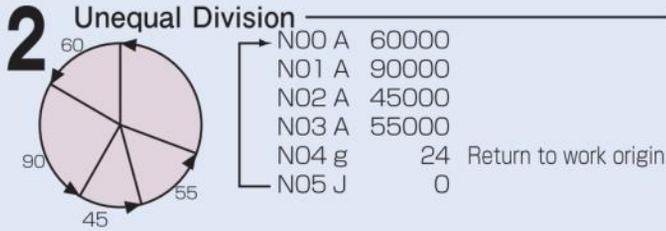

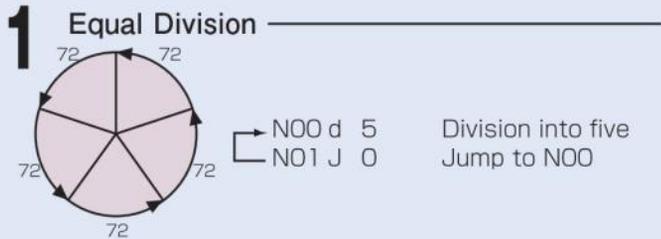

When **JOG** key is pressed briefly in JOG mode, the table will rotate one pulse.

If the key is pressed together with a figure key, the table will rotate in the speed of the figure.

If the key is kept being pressed in ZRN mode, the table will return to origin.

When **SHIFT** is pressed, the lamp will be ON and the function will be indicated on the upper right side of each key.

## Example of program

## Address

| <b>G83</b> |                               | FN2 only output     | A   |
| <b>G84</b> |                               | FN1,2 output        | A   |

●: Setting with the power source being ON and changeable by parameter.

■: Setting with the power source being ON.

R: Commanding to execute rotation

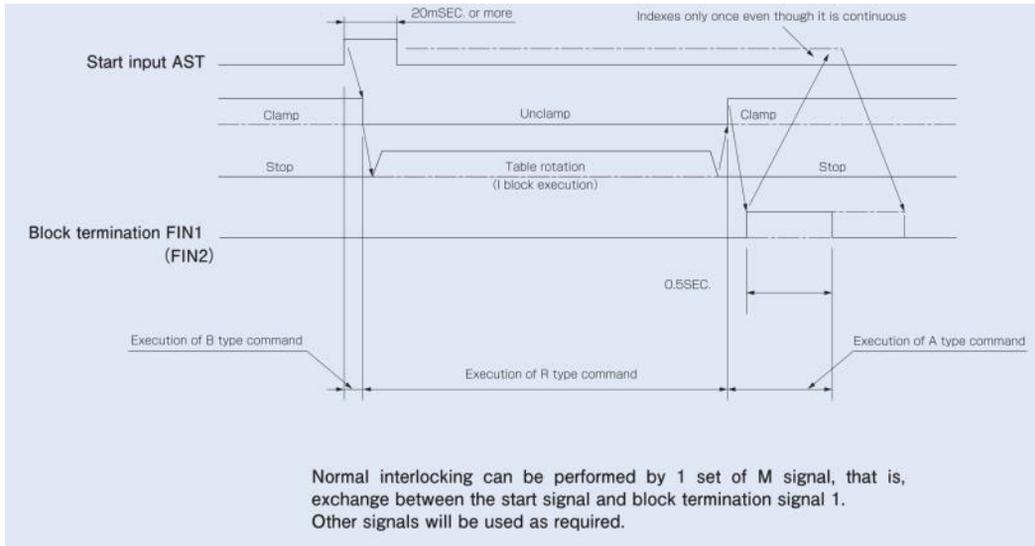

B: Commanding to immediate before R-type.

A: Commanding to immediate after R-type.

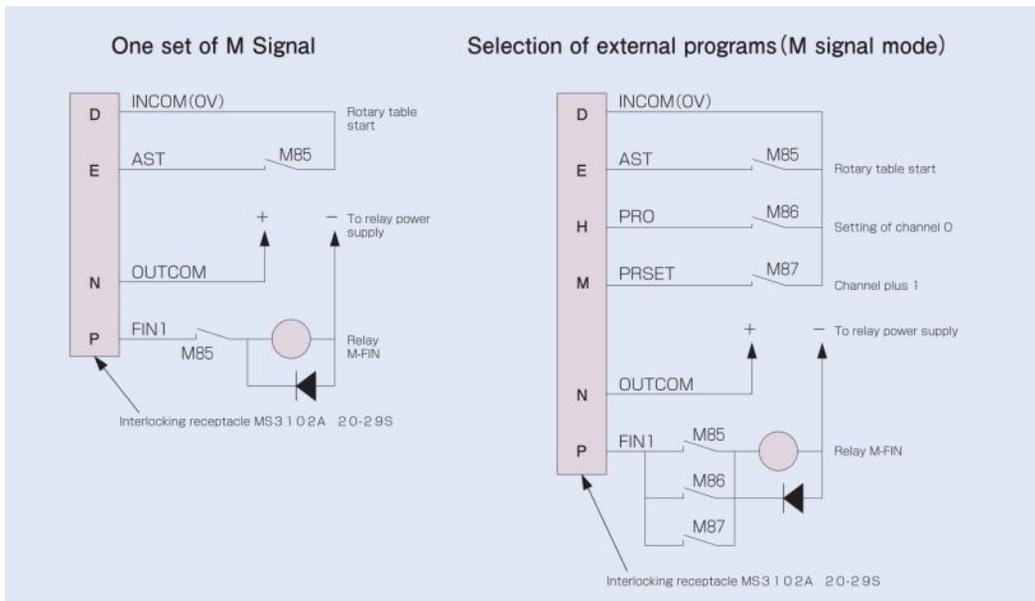

For G-code with L, the figures will be set by L-commands of preceding G-code.

Commanding to immediate before R-type.

# Standard Models AX4-120R, 170R, 200R, 250R, 320R

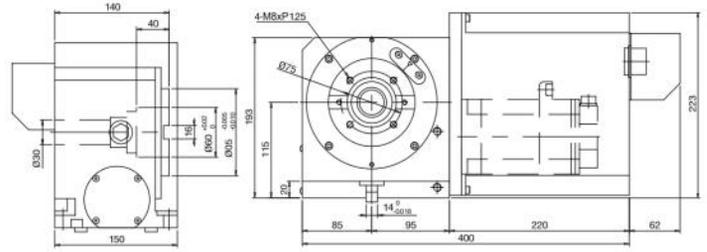

- Combination of case hardened special alloy screw and special high tensile strength brass worm wheel ensures exceptional wear resistant and long durability
- Dual lead worm screw for easy backlash adjustment
- Large diameter worm wheel for extra rigidity, smoothness and torque transfer efficiency
- Double bearing design and solid one piece face plate & spindle for extra rigidity
- Large thru hole standard on most face plate sizes
- Available as :
  - o Integrated 4<sup>th</sup> axis
  - o Indexer with a programmable control box
  - o Optional air purge for water protection
  - o Left hand configurations
  - o Super high resolution with optional rotary scale

# Large Size AX Rotary Table AX4-1000, 1200, 1500, 2000 H/V

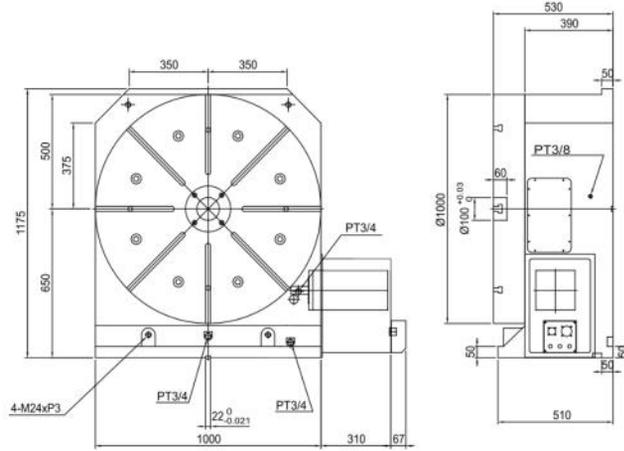

- Table size available from 1,000mm to 2,000mm
- Available in both vertical & horizontal position
- Heavy loading capacity axial-radial roller bearings are incorporated to provide higher rigidity
- Custom design available for various applications
- Super high resolution of +/- 5 sec with direct measuring rotary scale available as option \*Available resolution varies depending on the grade of the rotary scale

## Back-Mounted Models AX4-120RB, 170RB, 200RB, 250RB

- Back-Mounted Motor, avoid the interference with M/C splash guard
- Suitable for small-size of AX Machining / Tapping-Center.

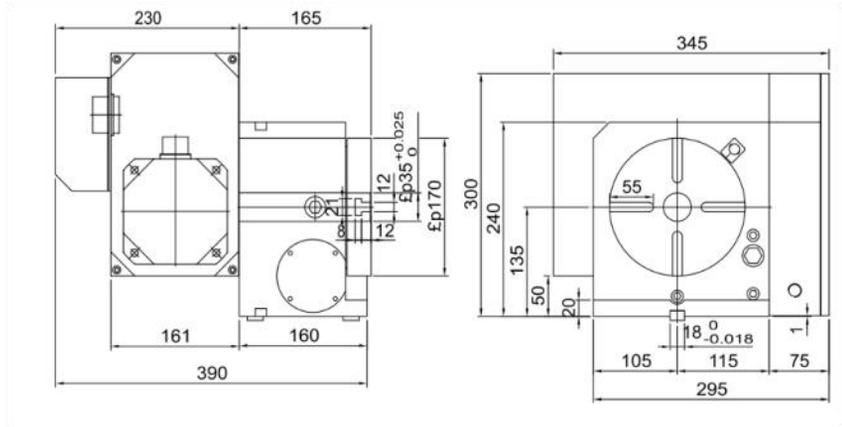

\*This model cannot be installed for horizontal use.\*

# Roller Gear Cam—Rotary Table RCT200R-001

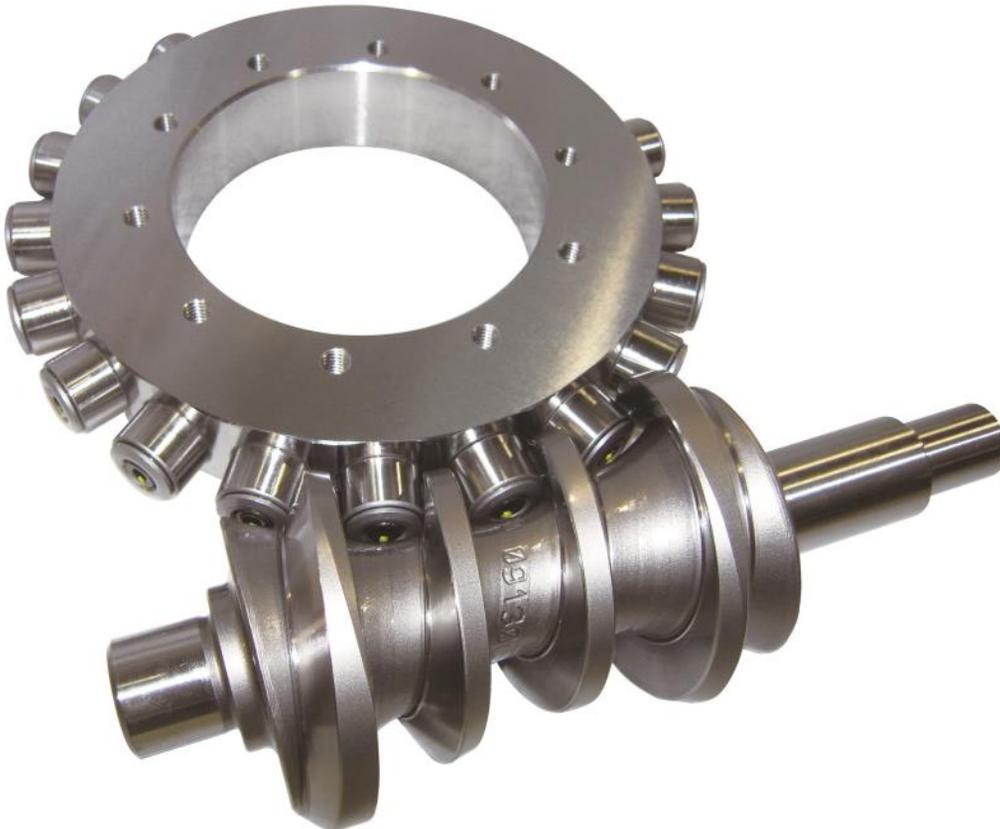

- Roller Cam Gear System has many advantages over conventional worm gearing system
  - Higher RPM
  - Higher rigidity
  - Higher accuracy compared to conventional worm gear system
- Maintenance Free – unique Zero-Backlash design requires no backlash adjustments
- Available as :
  - Integrated 4<sup>th</sup> axis
  - Indexer with a programmable control box
  - Optional air purge for water protection
  - Left hand configurations
  - Super high resolution with optional rotary scale

Roller Gear Cam Drive Assembly

# Multi-Spindle Models AX4-120R-2W-FA, 120R-32W-FA, 120R-42W-FA

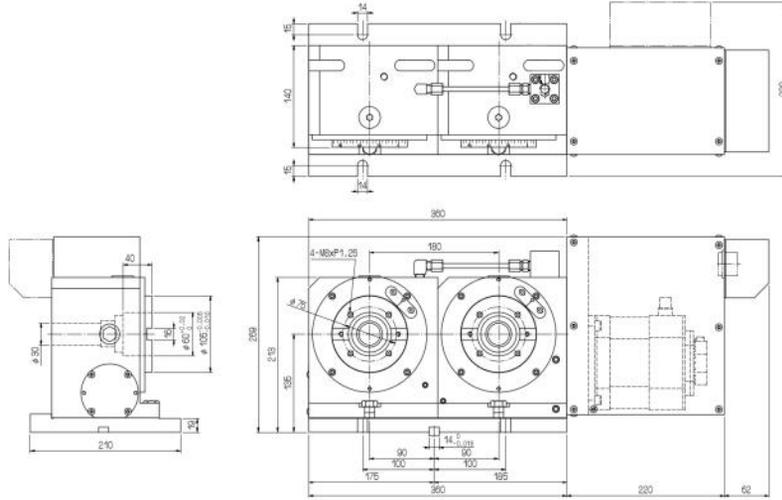

- Increase productivity - Available up to 4 spindles
- Combination of case hardened special alloy screw and special high tensile strength brass worm wheel ensures exceptional wear resistant and long durability.
- Dual lead worm screw for easy backlash adjustment
- Large diameter worm wheel for extra rigidity, smoothness and torque transfer efficiency
- Double bearing design and solid one piece face plate & spindle for extra rigidity
- Available as :
  - o Integrated 4<sup>th</sup> axis
  - o Indexer with a programmable control box
  - o Optional air purge for water protection

- Compact design with larger machine-able work space
- Combination of case hardened special alloy screw and special high tensile strength brass worm wheel ensures exceptional wear resistant and long durability.
- Dual lead worm screw for easy backlash adjustment
- Large diameter worm wheel for extra rigidity, smoothness and torque transfer efficiency
- Double bearing design and solid one piece face plate & spindle for extra rigidity
- Available as :
  - o Integrated 5<sup>th</sup> axis
  - o Integrated 4<sup>th</sup> axis + programmable controller on tilt axis
  - o Indexer with programmable control boxes on rotary and tilt axis
  - o Optional air purge for water protection
  - o Super high resolution with optional rotary scale

# Trunnion Models AX5-320T, 450, 630, 800

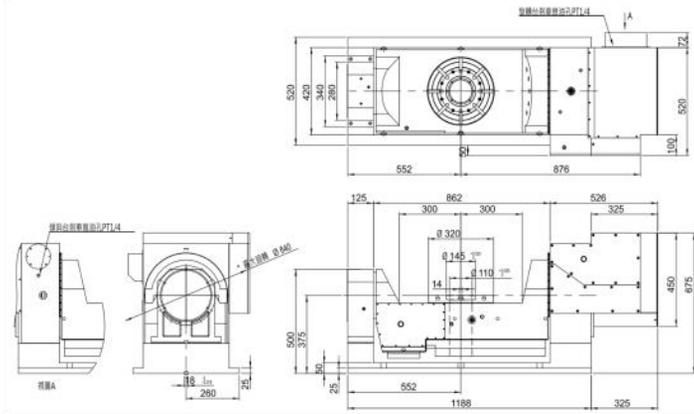

- Compact design with wide machining range.
- Up to 1 meter table M/C install available upon request
- Easy installation & operation.
- Compact design with wide machining range.
- Even an approx. 1 Meter Table M/C can be installed.
- To match 5 axis M/C for continuous machining, the tilting axis can connect to the M-code by using our single axis AC/DC/Stepping servo controller.

# Manual-Tilting Rotary Table AX4MT-200, 250, 320, 400, 500, 630

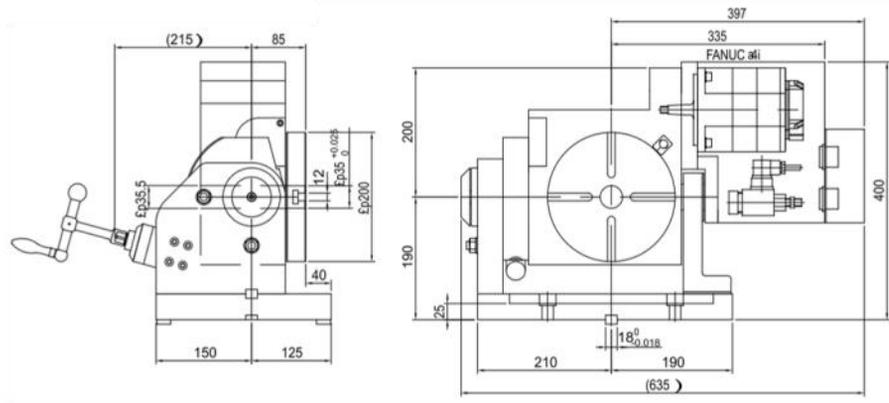

- Suitable for conventional milling, boring, and tapping machine.
- Manual tilting, Rotating by AX control.
- Available as Indexer or 4th Axis Installation.

# Horizontal Rotary/Index Center Table HIT-400, 500, 630, 800

- Suitable for horizontal machining center.
- Rotating speed can reach up to 33.3 RPM.
- Special anti-wearing/rigid alloy of bronze/nickel worm wheel and hardened steel worm screw ensure long term indexing accuracy.
- Twice as powerful brake system with large size clamping contact surface suitable for heavy cutting
- 2 or 3 pieces hirth coupling for positioning, repeatability can be reached +/- 0.5 sec. Accuracy will not be changed even with long operation times.
- Indexing accuracy can be specified to customer's requirement: +/-2sec. Or +/-3sec.

# Large size horizontal AX Rotary Table HRT-400, 500, 630, 800, 1000, 1500, 2000, 2500

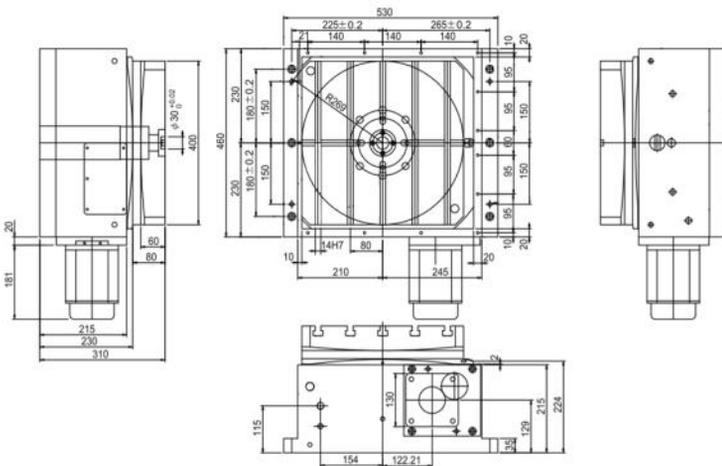

- Suitable for horizontal machining center, floor type boring machine.
- For both indexing & simultaneous machine.
- Hi-accuracy: Special anti-wearing/rigid alloy of bronze/nickel worm wheel and hardened steel worm screw ensure long term indexing accuracy.
- Can be manufactured according to customer's design and interface of machine saddle.
- Hydraulic clamping & high rigid brake structure for heavy cutting.
- Table sizes from 400mm to 2,500mm or even custom size for special requirements
- High loading/accuracy design available, suitable for heavy machining and metrology applications
- Built-in hydraulic ports system suitable for special machine of horizontal machining center and automobile/motorbike industrial.
- Random dividing 0.001 degrees, Indexing accuracy according to customer's requirement 6 sec, 10 sec, or higher indexing accuracy. (Encoder is required)

### HRT-1000

### HRT-1200

# Precision Index Table GCT-301, 450, 600, 700, 800, 1000, 1200

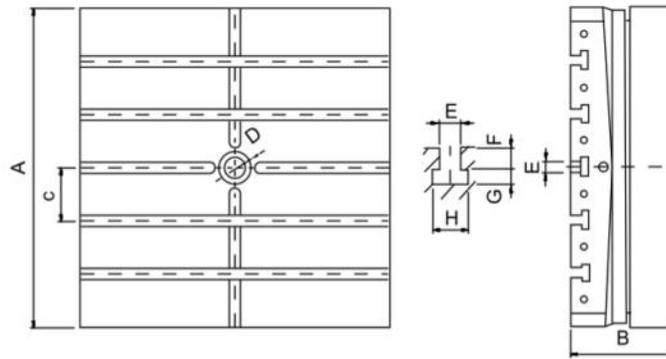

- Suitable for high accuracy machining such as boring, milling, grinding, etc.
- Built-in 2 piece hirth coupling for positioning, indexing accuracy +/- 3 sec. ensures long-term operation.
- Powerful clamping design allows heavy cutting and boring.
- Clamping/Unclamping by easy pneumatic operation.
- Body material is FC-35 cast iron, durable and will last longer without deformation.

## Machining Status

## Allowed Loading Chart

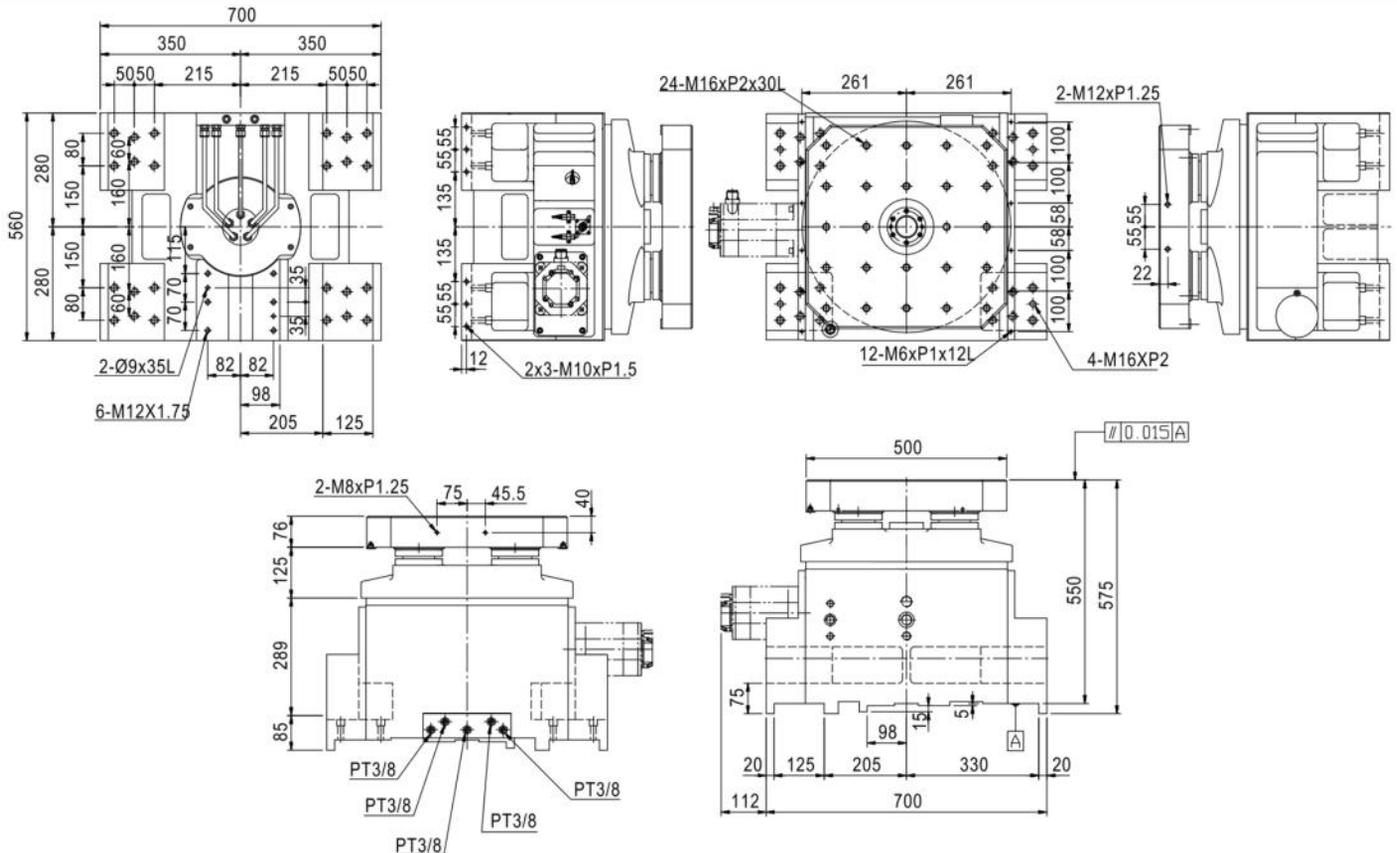

# Horizontal Machining Center Table with Pallets APCR/APCI-400, 500, 630, 800, 1000

- High accuracy and tested modular system for table (receiver) & single/multi pallets design.
- Suitable for new horizontal machining centers as well as for existing customer's design horizontal table/pallets manufacturing.
- Tall units table (receiver) & single/multi pallets are manufactured from high quality materials and workmanship.
- Can be furnished to DIN, ISO, or customer's design. All pallets are exchangeable for every index tables or AX tables (receivers) pallets changing type can be swing or forward/backward designed.
- High accuracy 4 pieces cones/caps.
- Hydraulic 4 pieces pull studs or clamping plate.
- Can be designed to match customer's drawings saddle.
- 1 degree or 0.001 degree increment options available.  
+/- 2 sec. or +/- 3 sec. (APR series: encoder is required)

**Machine Tool Info**

Manufacturer: \_\_\_\_\_ Model: \_\_\_\_\_ Year: \_\_\_\_\_

Control Make: \_\_\_\_\_ Model: \_\_\_\_\_

Machine condition: New / Existing or used

Please describe type of the machine. For example, 3 axis vertical machine, horizontal machine with C-axis, vertical with rotary pallet etc.

Table size: X \_\_\_\_\_ Y \_\_\_\_\_ Axis travel: X \_\_\_\_\_ Y \_\_\_\_\_ Z \_\_\_\_\_

**Workpiece and Application Info**

Workpiece dimension: \_\_\_\_\_

Material: \_\_\_\_\_ Weight: \_\_\_\_\_

Application is mainly: Drill / Mill                      Contour milling: Yes / No

Please describe about your application:

**Rotary table info**

Size of face plate: \_\_\_\_\_                      Number of axis: 4<sup>th</sup> / 4<sup>th</sup> & 5<sup>th</sup>

Motor orientation (4<sup>th</sup> axis models only) : Right(standard) / Left / Top / Back

Type of connection: Integrated 4<sup>th</sup> axis / Integrated 4<sup>th</sup> & 5<sup>th</sup> axis /Indexer with control box/ other

Special request

### Rotary Table Interface and Installation RFQ Quick Check List

1. Information of the machine  
 Manufacturer: \_\_\_\_\_ Model: \_\_\_\_\_ Year: \_\_\_\_\_  
 Control Make: \_\_\_\_\_ Model: \_\_\_\_\_
2. Can the customer or dealer send the data sheet of the machine that they can send? Data sheet is usually provided with the machine manual. Yes / No
3. Can the customer or dealer send the electrical manual and electric diagram of the machine? Yes/ No
4. Are these options on your control?
  - a. 4<sup>th</sup> axis select switch on the control panel Yes/ No
  - b. 5<sup>th</sup> axis select switch on the control panel Yes/No
  - c. 4<sup>th</sup> select switch axis on the MPG jog Yes/No
  - d. 5<sup>th</sup> axis select switch on the control panel Yes/No
  - e. None of above
5. Does the machine have bulkhead mount area for additional axis?
6. Does the machine have 4<sup>th</sup> and 5<sup>th</sup> axis software (PLC ladder) preinstalled?
7. Can the customer send pictures of the following?
  - a. Control panel and MPG jog
  - b. Machine table
  - c. Additional axis bulk head mount area
  - d. Inside the back cabinet to see amplifier terminals, I/O terminals etc.

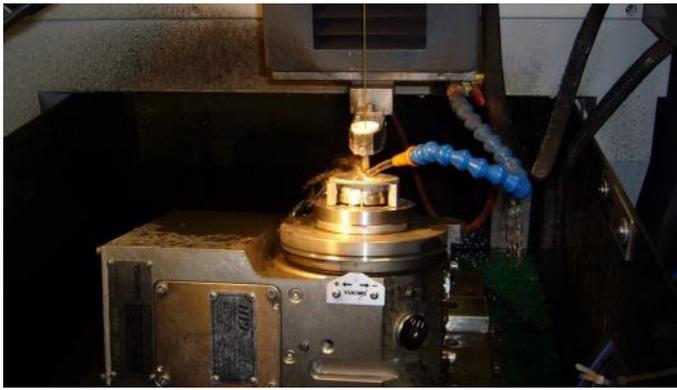

Following control and machine builders are most popular machines we can offer installation. If your machine control or machine builder is not on the list, please contact us.

#### Control make

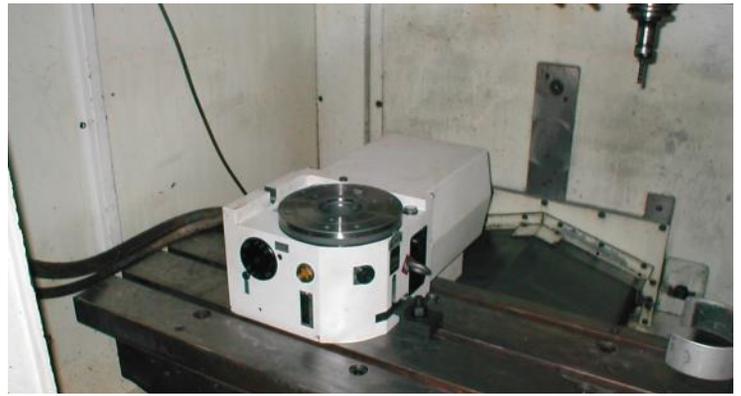

- Fanuc OiM series / 16i / 18i / 21i
- Some models of Yaskawa
- Some models of Mitsubishi

#### Machine builders
