

thyssenkrupp Materials NA

Aerospace Industry

thyssenkrupp

A close-up, high-angle photograph of a jet engine turbine. The central hub is a large, dark, spherical component with a grid of small holes around its circumference. Numerous curved blades radiate from the hub, some appearing as bright, polished metal surfaces while others are in shadow. The lighting creates strong highlights and deep shadows, emphasizing the complex geometry and metallic texture of the engine components.

Precision Processing Services

Improve your efficiency and cycle time with cut-to-size, machine-ready material, shipped to you just-in-time.

Precision Sawing — through 12.0 inches thick. Contour sawing for circles, rings, and special shapes. Sawing tolerances can be held as close as ± 0.010 inches.

Precision Bar & Shape Cutting — precision cutting tolerances can be held as close as ± 0.010 inches.

Your Partner In Aerospace

thyssenkrupp Materials NA provides inventory, processing, and logistical solutions to improve cycle time and lower costs for aerospace materials users around the world. Our people, our suppliers, warehouse and processing facilities are dedicated to consistently meeting or exceeding expectations.

We provide a full range of aerospace materials including aluminum, brass, bronze, copper, stainless steel and nickel; all are produced and processed to the most stringent of aerospace standards.

You will benefit from our industry-leading information systems along with our wide-ranging fleet of trucks and extensive logistics and distribution expertise.

We supply major airframe manufacturers, large assemblers, airlines, hundreds of aerospace machine shops, and maintenance repair and overhaul

facilities. We are closely aligned with the major aerospace material suppliers across the globe.

As a result of the aerospace industry being global, we have the infrastructure to support customers throughout the world including Europe, Asia, Canada, and South America.

Our orders ship on time! We also have integrated systems that support AOG (aircraft-on-ground) and other short lead-time requirements.

We are focused on working for you to improve service, lower your inventories, reduce work in process and free up your working capital.

At thyssenkrupp Materials NA, we want to be your first choice for aerospace materials and logistical needs experts.

A detailed wireframe model of an aircraft, showing the intricate structure of the fuselage, wings, and tail. The model is rendered in a light blue color against a white background.

Quality Assurance

At thyssenkrupp Materials NA, all of our aerospace locations operate under a continuously tested system of quality assurance procedures.

We are AS9100 certified and our ISO9001 approvals have provided us with delegated source acceptance status by many major aerospace customers.

Our commitment to meeting and exceeding customer needs is just one of the many reasons major airframe manufacturers and their subcontractors have chosen thyssenkrupp Materials NA as their supplier of choice for quality aerospace materials.

Our Value Proposition

Product Offering

Leading supplier globally in Aerospace products

- Aluminium (flat roll, extrusions, forgings)
- Nickel & Cobalt Alloys
- Steel Alloys
- Copper Alloys (Al Bronze, Beryllium)
- Plastics

Value Adding Partnership Approach

Our belief in strong partners creates end to end supply chain visibility

- Subcontractor management and support
- System Integration
- Global Key Account Managers with centralized control towers
- Customer Specific Dedicated facilities
- Demand Aggregation

Our Capabilities

- Cut to size: Water jet, Contour, Plasma
- Bar operations: Grinding, Chamfering
- First Operation CNC Machining
- In housing testing: XRF Gun, Hardness and conductivity

Our Footprint

- 14 AS9100 locations in North America
- Dedicated trucking and logistics network
- 2,000 dedicated Aerospace customers in North America
- Global Aerospace reach with 40+ thyssenkrupp Aerospace Locations in 20 Countries

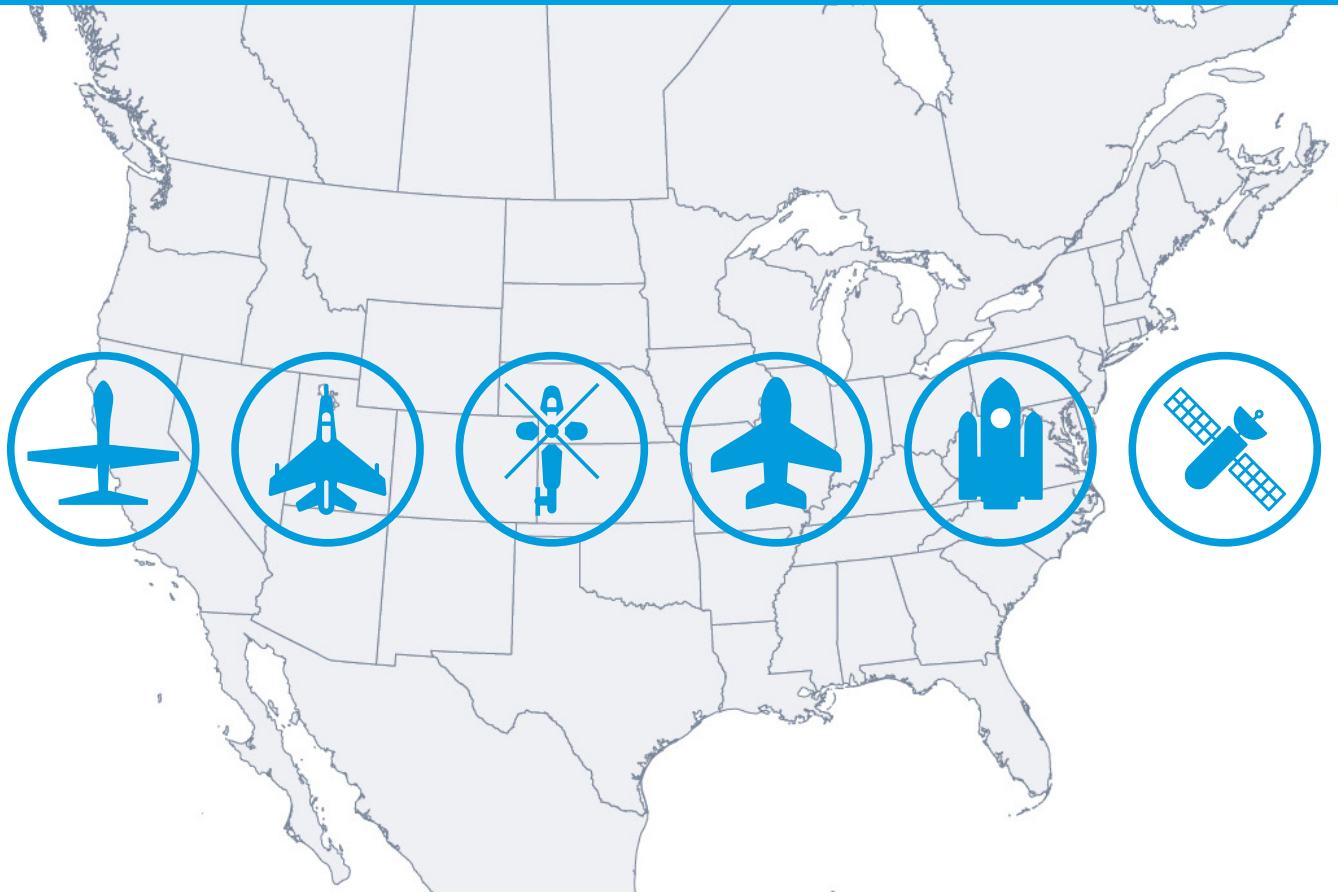

Supply Chain Services

We collaborate to deliver integrated supply chain solutions to increase efficiencies and standardization

- Kitting and Sequencing
- Outside processing management
- 3PLs
- Point of Use
- Export control with dedicated team
- Extensive quality inspection
- Super Market Model
- Storage Services

Our Commitment to Aerospace

thyssenkrupp Materials NA
